(2) All committee decisions regarding the actions listed above must be unanimous. If the vote is not unanimous, the item shall be referred to Technical Standards Committee “B.” Written notice of Technical Standards Committee “A’s” decision, stating the basis for the decision, will be provided to the sponsor.

(3) Items accepted without conditions by the Technical Standards Committees will be considered to be accepted

on a general basis. No restrictions as to quantity or application will be placed on items which have received general acceptance. Items accepted subject to certain conditions, such as limited use to gain service experience, or limited use appropriate to certain areas and conditions, will be considered to be accepted on a conditional basis. The conditions will be cited as a part of the listing provided for in § 1728.60, or as part of the technical acceptance for nondomestic items.

(e) *Appeal to Technical Standards Committee “B”.* A sponsor may request a review of an adverse decision by Technical Standards Committee “A” within ten (10) days of notification of such decision by submitting a letter requesting such review to Technical Standards Committee “B” (Electric).

(f) *Action by Technical Standards Committee “B”.* Committee “B” may take any of the actions listed for Committee “A” in § 1728.30(d). However, for a Committee “B” action to be effective it must be by majority vote. Failure to obtain a majority on one of the proposed actions shall mean that the product will not be listed or accepted. Committee “B’s” determination shall be based on the record developed before Committee “A” and such additional information as Committee “B” may request. Formal rules of procedure and evidence shall not apply to proceedings before Committee “B.” Written notice of Committee “B’s” decision, stating the basis of the decision, will be provided to the sponsor.

(g) *Appeal to the Administrator.* In the event of an adverse decision by Committee “B,” the sponsor may, within ten (10) days of notification of such decision, request a review of this decision by submitting a letter to the Administrator requesting such a review.

(h) *Change in Design.* RUS acceptance of an item will be conditioned on the understanding that no design changes (material or dimensions) affecting the quality, strength, or electrical characteristics of the item shall be made without prior concurrence of Technical Standards Committee “A.”

¹Nondomestic items are items which do not qualify as domestic products pursuant to RUS “Buy American” requirement.

[50 FR 47711, Nov. 20, 1985. Redesignated at 55 FR 39395, Sept. 27, 1990]

§ 1728.40 Procedure for submission of a proposal.

(a) *Written Request.* Consideration of an item of material or equipment will be obtained by the sponsor through the submission of a written request in an original and five copies addressed to the Chairman, Technical Standards Committee "A" (Electric). The letter must include the catalog number or other identifying number or code as well as a description of the item. In the event that an item being submitted is also intended for consideration by Technical Standards Committee "A" (Telephone), a separate request must be made to the telephone committee. (See part 1755 of this chapter).

(b) *Technical and Performance Data.* Six copies of the specification of manufacture, drawings and test data must be submitted to the committee. Six copies of the performance history shall also be submitted unless RUS determines that such performance history is not reasonably available.

(c) *Sample.* One sample of the item must be submitted to the Chairman, Technical Standards Committee "A," unless RUS waives the requirements of the sample. In case of large, bulky or extremely heavy samples, the sponsor should contact the Chairman, Technical Standards Committee "A" (Electric), at the above address, before any sample is shipped.

(d) *Action on Proposal.* RUS will inform a sponsor of the action taken on the sponsor's proposal.

[50 FR 47711, Nov. 20, 1985. Redesignated at 55 FR 39395, Sept. 27, 1990]

§ 1728.50 Removal of an item from listing or technical acceptance.

(a) *Removal Actions.* An item of material or equipment may be removed from the listing or technical acceptance in accordance with the following procedures upon determination that the item is unsatisfactory or has been misrepresented to the owner or RUS.

(b) *Notification by the Committee.* The sponsor of an item of material or equipment will be notified in writing of a proposal to remove such item from the listing or technical acceptance.

(c) *Supplemental Information.* Within ten (10) days of receipt of such notification, the sponsor may submit to Com-

mittee "A" a letter expressing the sponsor's intent to submit written supplemental technical information relevant to Committee "A's" determination. The sponsor must submit such information within twenty (20) days from the submission of its letter to Committee "A." Committee "A" will have the discretion of making a decision following the expiration of the time periods provided in this paragraph.

(d) *Review by the Technical Standards Committee "A".* Committee "A" will consider all relevant information presented in determining whether an item should be removed from the listing or technical acceptance. Formal rules of evidence and procedure shall not apply to proceedings before Technical Standards Committee "A."

(e) *Action by the Technical Standards Committee "A".* Committee "A" may take one of the following actions:

(1) Order the immediate removal of the item from the listing, or technical acceptance,

(2) Condition the item's continued listing, or technical acceptance,

(3) Recommend a basis of settlement which will adequately protect the interest of the Government, or

(4) Delay the effectiveness of its decision for a time period sufficient to allow the sponsor to appeal to Technical Standards Committee "B."

All committee "A" decisions regarding the actions listed above must be by unanimous vote. If the vote is not unanimous, the item will be referred to Technical Standards Committee "B."

Written notice of Technical Standards Committee "A's" decision, stating the basis for the decision, will be provided to the sponsor.

(f) *Additional Opportunity to Present Information.* At the request of the sponsor, RUS may afford additional opportunity for consideration of relevant information. Such additional opportunity may include, without limitation, a meeting between RUS and the sponsor in such a forum that RUS may determine. In making this decision, RUS will consider, among other things, the best interests of RUS, its borrowers, and the sponsor, and the best manner to develop sufficient information relating to the proposed action.

§ 1728.60

7 CFR Ch. XVII (1–1–97 Edition)

(g) *Appeal to the Technical Standards Committee “B”*. Within ten (10) days of notification of Committee “A’s” decision, a sponsor may appeal in writing to Technical Standards Committee “B” to review Committee “A’s” decision, specifying the reasons for such a request. Committee “B’s” determination, in response to such request, shall be based on the record developed before Committee “A” and such additional information as Committee “B” may request. Formal rules of procedure and evidence shall not apply to proceedings before Committee “B.”

(h) *Action by Technical Standards Committee “B”*. Committee “B,” by majority vote, may take one of the following actions:

(1) Order the immediate removal of the item from listing, or technical acceptance,

(2) Condition the item’s continued listing, or technical acceptance,

(3) Recommend a basis of settlement which adequately protects the interests of the Government, or

(4) Delay the effectiveness of its decision for a time period sufficient to allow the sponsor to appeal to the Administrator of RUS.

Failure to obtain a majority vote on any of the above actions shall mean that the product will continue to be listed or accepted.

Written notice of Committee “B’s” decision stating the basis of the decision will be provided to the sponsor.

(i) *Appeal to the Administrator*. Within ten (10) days of the receipt of Committee “B’s” decision, a sponsor may appeal to the Administrator to review Committee “B’s” decision. If an appeal is made, the sponsor shall submit a written request to the Administrator, Rural Utilities Service, Room 4053, South Building, U.S. Department of Agriculture, Washington, DC 20250–1500 specifying the reasons to request reconsideration. The Administrator will have the option to decline the request, in which case the decision of Committee “B” shall stand. If a review is granted, the determination by the Administrator or the Administrator’s designee shall be based on the record developed before Committee “A” and Committee “B” and such additional in-

formation as the Administrator may request. Formal rules of procedure and evidence shall not apply to the actions of the Administrator.

(j) *Action by the Administrator*. The Administrator may take one of the following actions:

(1) Order the immediate removal of the item from the listing, or technical acceptance,

(2) Condition its continued listing, or technical acceptance, or

(3) Recommend a basis of settlement which adequately protects the interests of the Government.

Written notice of the Administrator’s determination, stating the basis for the decision, will be provided to the sponsor.

The Administrator’s actions are final.

[50 FR 47711, Nov. 20, 1985. Redesignated at 55 FR 39395, Sept. 27, 1990]

§ 1728.60 List of materials and equipment.

(a) *General*. Those items of material or equipment accepted by Technical Standards Committee “A” or “B,” with the exception of technically accepted nondomestic items, will be listed in the List of Materials. Items which do not qualify as domestic products may be accepted on a technical basis only (technical acceptance) for a period of one year as provided in § 1728.30(c)(1) and will not be included in the List of Materials.

(b) *Publishing and Revisions*. RUS will reissue the List of Materials every year, dated July, and issue supplements, if needed, dated October, January, and April of every year. An RUS office copy, which is the official current copy, of the List of Materials, will be updated every time changes are made by the Technical Standards Committees.

(c) *Dual Listings*. RUS, through its Technical Standards Committees, will accept for listing only one item of a particular type of material or equipment for each manufacturer. If a manufacturer submits an item to perform the identical function of a listed item, RUS, through its Technical Standards Committees, may accept that item and remove the one previously listed. RUS will list only new items of material and

Rural Utilities Service, USDA

§ 1728.97

equipment in the List of Materials. Used items will not be considered for listing.

[50 FR 47712, Nov. 20, 1985. Redesignated at 55 FR 39395, Sept. 27, 1990]

§ 1728.70 Procurement of materials.

(a) *By Owner.* When purchasing the type of materials included in the List of Materials, RUS borrowers shall purchase only materials listed in the List of Materials, or materials which have a current technical acceptance by RUS and meet the "Buy American" requirement.

(b) *By Contractor.* When performing work for an RUS borrower, contractors shall supply only items from the general acceptance pages of the List of Materials, or obtain the borrower's concurrence prior to purchase and use of a technically nondomestic item or any item listed on a conditional basis.

(c) *Procurement of Unlisted Items.* (1) The borrower shall request prior approval from RUS for use of an item that does not fall in categories established by RUS in the List of Materials for which acceptability has been established by the Technical Standards Committees.

(2) RUS will also determine, on a case-by-case basis, whether to allow use of an unlisted item in emergency situations and for experimental use or to meet a specific need. For purposes of this part 1728, an emergency shall mean a situation wherein the supply of listed material and equipment from the industry is not readily available, or the standard designs are not applicable to the borrower's specific problem under consideration.

(3) RUS will make arrangements for test or experimental use of newly developed items requiring limited trial use. RUS, working with the borrower and the manufacturer, will establish test locations for the items to facilitate installation and observation.

[50 FR 47712, Nov. 20, 1985. Redesignated at 55 FR 39395, Sept. 27, 1990]

§ 1728.97 Incorporation by reference of electric standards and specifications.

(a) The following electric bulletins have been approved for incorporation by reference by the Director of the Of-

fice of the Federal Register. The bulletins containing construction standard (50-1 to 50-14) and Bulletin 50-18 (DT-5C), may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. The bulletins containing specifications for materials and equipment (50-15 to 50-99) may be obtained from the Rural Utilities Service, Administrative Services Division, Room 0175-S, Washington, DC 20250. The terms "RUS form", "RUS standard form", "RUS specification", and "RUS bulletin" have the same meanings as the terms "REA form", "REA standard form", "REA specification", and "REA bulletin", respectively unless otherwise indicated.

The bulletins are available for inspection at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. These materials are incorporated as they exist on the date of the approval and a notice of any change in these materials will be published in the FEDERAL REGISTER.

(b) List of Bulletins.

- Bulletin 50-1 (T-805-B), Electric Transmission Specifications and Drawings for 115 kV to 230 kV (10-88)
- Bulletin 50-2 (T-805-A), Electric Transmission Specifications and Drawings for 34.5 kV to 69 kV (2-73)
- Bulletin 50-3 (D-804), Specifications and Drawings for 12.5/7.2 kV Line Construction (4-83)
- Bulletin 50-4 (D-801), Specification and Drawings for 34.5/19.9 kV Distribution Line Construction (11-86)
- Bulletin 50-5 (D-803), Specifications and Drawings for 14.4/24.9 kV Line Construction (9-69)
- Bulletin 50-6 (D-806), Specifications and Drawings for Underground Electric Distribution (3-90)
- Bulletin 50-15 (DT-3), RUS Specifications for Pole Top Pins with 1 $\frac{3}{8}$ " Diameter Lead Thread (1-51)
- Bulletin 50-16 (DT-4), RUS Specifications for Angle Suspension Brackets (3-52)
- Bulletin 50-19 (DT-7), RUS Specifications for Clevis Bolts (8-53)
- Bulletin 50-23 (DT-18), RUS Specifications for 60" Wood Crossarm Braces (2-71)
- Bulletin 50-31 (D-3), RUS Specifications for Pole Top Pins with 1" Diameter Lead Threads (2-79)
- Bulletin 50-32 (D-4), RUS Specifications for Steel Crossarm Mounted Pins with 1" Diameter Lead Threads (10-50)

§ 1728.201

7 CFR Ch. XVII (1–1–97 Edition)

- Bulletin 50-33 (D-5), RUS Specifications for Single and Double Upset Spool Bolts (2-51)
- Bulletin 50-34 (D-6), RUS Specifications for Secondary Swinging Clevises (12-70)
- Bulletin 50-35 (D-7), RUS Specifications for Service Swinging Clevises (9-52)
- Bulletin 50-36 (D-8), RUS Specifications for Service Deadend Clevises (9-52)
- Bulletin 50-40 (D-14), RUS Specifications for Pole Top Brackets for Channel Type Pins (9-51)
- Bulletin 50-41 (D-15), RUS Specifications for Service Wireholders (11-51)
- Bulletin 50-55 (T-2), RUS Specifications for Overhead Ground Wire Support Brackets (5-53)
- Bulletin 50-56 (T-3), RUS Specifications for Steel Plate Anchors for Transmission Lines (12-53)
- Bulletin 50-60 (T-9), RUS Specification—Single Pole Steel Structures, Complete with Arms (12-71)
- Bulletin 50-70 (U-1), RUS Specification for 15 kV and 25 kV Primary Underground Power Cable (12-22-87)
- Bulletin 50-72 (U-4), RUS Specification for Electrical Equipment Enclosures (5-35 kV) (10-79)
- Bulletin 50-73 (U-5), RUS Specifications for Pad-Mounted Transformers (Single and Three-Phase) (1-77)
- Bulletin 50-74 (U-6), RUS Specification for Secondary Pedestals (600 Volts and Below) (10-79)
- Bulletin 50-91 (S-3), RUS Specifications for Step-Down Distribution Substation Transformers (34.4-138 kV) (1-78)
- Bulletin 1728F-700, RUS Specification for Wood Poles, Stubs and Anchor Logs (8-93).

Redesignated at 55 FR 39395, Sept. 27, 1990, as amended at 56 FR 1563, Jan. 16, 1991; 58 FR 41398, Aug. 3, 1993; 59 FR 66440, Dec. 27, 1994]

§ 1728.201 RUS Bulletin 1728H-701, RUS Specification for Wood Cross-arms (Solid and Laminated), Transmission Timbers and Pole Keys.

(a) *General provisions.* (1) This section implements contractual provisions between RUS and borrowers receiving financial assistance from RUS. The contractual agreement between RUS and its borrowers requires the borrower's system to be constructed in accordance with RUS accepted plans and specifications. Each RUS electric borrower must purchase only wood crossarms

produced in accordance with the specification in this section.

(2) Each RUS electric borrower shall require each contractor to agree in writing to furnish only materials produced in accordance with the specification in this section.

(3) This specification describes the minimum acceptable quality of wood distribution crossarms and transmission crossarms (hereinafter called crossarms) that are purchased by or for RUS borrowers. Where there is conflict between this specification and any other specification referred to in this section, this specification shall govern.

(4) Various requirements relating to quality control and inspection are contained in § 1728.202 of this part, RUS Specification for Quality Control and Inspection of Timber Products. Section 1728.201 of this part and the American National Standards Institute (ANSI) 05.2, 1983, American National Standard for Wood Products—Structural Glued Laminated Timber for Utility Structures, shall be followed exactly and shall not be interpreted or subjected to judgment by the quality control person or an independent inspector.

(5) The borrower shall purchase from producers only material that meets the requirements of this specification. Each purchaser shall use a written purchase order to purchase material for use in RUS financed systems in order to insure compliance with the standards and specifications of this part. The written purchase order shall contain a provision that specifically requires the producer to comply with the provisions of this part. The purchase order shall contain a provision that specifically requires the producer to make the treating plant, and storage areas available, during normal business hours, in order for representatives of either the purchaser or RUS to inspect such to determine compliance with the standards and specifications of this part.

(6) The borrower shall insure that the producer provides the inspectors with full information (drawings, etc.) relating to the requirements contained in purchase order which is supplementary to this specification.

(7) The borrower shall insure that the producer maintains, or has access to,

adequate laboratory facilities at or very near the treating plant. All chemical tests, assays or analyses associated with the treatment shall be independently performed in this laboratory by both the quality control designee and the borrower's inspector. If acceptable to RUS on a case-by-case basis, the producer may use a central laboratory.

(8) Inspection and treatment of all timber products produced under this specification should be performed after receipt of the order from the purchaser, except as provided for reserve treated stock.

(9) The borrower shall insure that each inspection agency maintains its own central laboratory with qualified staff capable of completely analyzing the preservative and treatments. If acceptable to RUS, this central laboratory may be used for the independent inspector's routine assays, with results made available the next working day.

(10) The testing and inspection of the lamination process shall be in accordance with American Institute of Timber Construction (AITC) 200-83, Inspection Manual.

(11) With the exception of reserve treated stock, all invoices for treated timber products shall be accompanied, in duplicate, by a copy of the producer's Certificate of Compliance and a copy of either the Independent Inspection Report or a Quality Assurance Plan Certificate. The certificate shall be presented to the purchaser with the invoice. For reserve treated stock, inspection reports shall be available from the inspection agency. When shipped from reserve stock, the invoice shall bear an endorsement and a further certification by the producer that the material meets the requirements of this specification and any supplementary requirements cited in the purchase order under which it is purchased.

(12) Crossarms shall be warranted to conform to this specification. If any crossarm is determined to be defective or does not conform to this specification within 1 year after shipment to the borrower, it shall be replaced as promptly as possible by the producer. In the event of failure to do so, the purchaser may make such replacement and the cost of the crossarm, at des-

tination, recoverable from the producer.

(b) *Definitions.*

Arm refers to structural wood member used to support electrical conductors.

Certificate of compliance is a certification by an authorized employee of the producer that the material shipped meets the requirements of this specification and any supplementary requirements specified in a purchase order from a borrower or the borrower's contractor.

Crossarm is a term used interchangeably with arm.

Independent inspection relates to examination of material by an independent inspector employed by a commercial inspection agency.

Inspection means an examination of material in sufficient detail to insure conformity to all phases of the specification under which it was purchased.

Lot is a quantity of crossarms of like size, conditioning, and fabrication, usually making up one treating charge.

Producer is used to describe the party who manufactures and treats crossarms.

Purchaser refers to either the RUS borrower or contractors acting as the borrower's agent, except where a part of the specification specifically refers to only the RUS borrower or the contractor.

Quality control designee refers to an individual designated by the producer to be responsible for quality control.

Reserve treated stock consists of timber products treated in accordance with this specification, prior to and in anticipation of the receipt of specific orders, and held in storage ready for immediate shipment.

Supplier is a term used interchangeably with producer, or in some cases, may be the distributor selling crossarms to the borrower.

Treating plant is the organization that applies the preservative treatment to the crossarms.

(c) *Related specifications and standards incorporated by reference.*

The following specifications and standards are incorporated by reference. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5

§ 1728.201

U.S.C. 552(a) and 1 CFR part 51. Copies of each reference are available for inspection during normal business hours at RUS, room 1250-S, U.S. Department of Agriculture, Washington, DC 20250 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. Copies of these standards and specifications may be purchased from the addresses shown below.

(d) *Independent inspection plan.*

This plan or a Quality Assurance Plan, as described in paragraph (e) of this section, is acceptable for supplying crossarms. All crossarms produced under the independent inspection plan for use on an RUS financed system shall be inspected by a qualified independent inspector in accordance with §1728.202 of this part.

(1) The borrower has the prerogative to contract directly with the inspection agency for service. The borrower should, where practical, select the inspection agency so that continual employment is dependent only on performance acceptable to the borrower and in accordance with this specification. The selected inspection agency shall not subcontract the service to any other inspection agency without the prior written consent by the borrower.

(2) The producer shall not be a party to the selection of the inspection agency by the borrower and shall not interfere with the work of the inspector, except to provide notification of the readiness of material for inspection. To obtain the inspection services for reserve stock, the producer may deal directly with the inspection agency. Under the Independent Inspection Plan, the producer shall not treat material before it has been properly inspected in the white, as evidenced by the inspector's hammer mark.

(3) The methods of inspection described in this section and in §1728.202 of this part shall be used no matter which plan crossarms are produced under, i.e., Independent Inspection Plan, or Quality Assurance Plans, as described in this section. The number of crossarms actually inspected by monitors of quality control under a Quality Assurance Plan may vary from the number of crossarms inspected under the Independent Inspection Plan.

(e) *Quality assurance plans.*

The producer shall furnish crossarms conforming to this specification as monitored by a Quality Assurance Plan acceptable to RUS. RUS borrower groups or agents for borrower groups endeavoring to operate Quality Assurance Plans shall submit their plan for assuring quality control to the Director, Electric Staff Division, Rural Utilities Service, Washington, DC 20250–

1500, for specific approval prior to contracting with RUS borrowers under such plans.

(f) *Material requirements*—(1) *Material and grade.* All crossarms furnished under this specification shall be free of brashy wood, decay, and insect holes larger than 3/32 of an inch (0.24 cm), and shall meet additional requirements as shown on specific drawings. They shall be made of one of the following:

(i) Douglas-fir which conforms to the applicable crossarm provisions of paragraphs 170 and 170a, or the applicable transmission arm provisions of paragraphs 169 and 169a of the 1991 Standard Grading Rules for West Coast Lumber No. 17. All references to Douglas-fir shall be of coastal origin;

(ii) Southern Yellow Pine which conforms to the provisions of Dense Industrial Crossarm 65, as described in paragraph 31.2 in Southern Pine Inspection Bureau 1991 Special Product Rules for Southern Pine; or

(iii) Laminated wood crossarms shall conform to ANSI 05.2–1983, and have at least the same load carrying capacity as the solid sawn arm it replaces. The load carrying capacity of the laminated arms shall be determined by one of the procedures outlined in ANSI 05.2.

(2) Borrowers may use alternative wood crossarms that are listed in RUS Bulletin 1728C-100, List of Materials Acceptable for Use on Systems of RUS Electrification Borrowers.

(3) *Knots.* Sound, firm, and tight knots, if well spaced, are allowed.

(i) Slightly decayed knots are permitted, except on the top face, provided the decay extends no more than 3/4 of an inch (1.91 cm) into the knot and provided the cavities will drain water when the arm is installed. For knots to be considered well spaced, the sum of the sizes of all knots in any 6 inches (15.24 cm) of length of a piece shall not exceed twice the size of the largest knot permitted. More than one knot of maximum permissible size shall not be in the same 6 inches (15.24 cm) of length. Slightly decayed, firm, or sound “Pin knots” (3/8 of an inch (0.95 cm) or less) are not considered in size, spacing, or zone considerations.

(ii) Knots are subject to the following limits on size and location:

§ 1728.201

Knot Limits For Transmission Arms
(SEE FIGURE 2, EXHIBIT A)
ALL DIMENSIONS IN INCHES

Pole Mounting Hole Zone*	Maximum Diameter For Single Knot		
Upper Half (inner zone)	3/4		
Upper Half (outer zone)	1 for close grain		
	1-1/4 dense grain		
Other Locations Transmission Arm Size**	Narrow Face	Wide Face (Two Sides)	
		Edge	Along Centerline
4-5/8 x 5-5/8 or less	1	1-1/4	1-1/4
5-5/8 x 7-3/8	1-1/4	1-3/8	1-7/8
3-5/8 x 9-3/8	3/4	1-3/4	2-1/4

*No knot will be closer than its diameter to the pole mounting hole.

**For cross sections not shown, refer to grading rules.

(iii) Knot clusters shall be prohibited unless the entire cluster, measured on the worst face, is equal to or less than the round knot allowed at the specific location.

(iv) Spike knots shall be prohibited in deadend arms. Any spike knot across the top face shall be limited to the equivalent displacement of a knot 3/8 of an inch (0.95 cm) deep on one face and the maximum round knot for its particular location on the worst face, with a maximum width of 1 inch (2.54 cm) measured at the midpoint of the spiked section. Elsewhere across the bottom or side faces, spike knots shall not exceed 1/2 the equivalent displacement of a round knot permitted at that location, provided that the depth of the knot on the worst face shall not exceed the maximum round knot allowed at that location.

(v) Loose knots and knot holes shall drain water when the arm is normally installed. In the center section, upper half, they shall not be greater than 1/2 the dimensions of round knots. Elsewhere, they shall not be greater than the round knot dimension. They shall be prohibited in deadend arms.

(vi) All knots except those “spike” knots intersecting a corner shall be measured on the least diameter of the knot.

(vii) A knot shall be considered to occupy a specific zone or section if the center of the knot (i.e. pith of knot) is within the zone or on the zone’s boundary.

(viii) If a round or oval knot appears on two faces and is in two zones, each face shall be judged independently. When this does not occur, average the least dimension showing on both faces. Knots which occur on only one face of a free of heart center (FOHC) arm shall be permitted to be 25 percent larger than the stated size.

(ix) *Knot spacing.* Two or more knots opposite each other on any face shall be limited by a sum not to exceed the size of a maximum single knot permitted for the location. On all four faces, all knots shall be well spaced.

(x) Knots which have a maximum of 5/8 inch (1.59 cm) diameter may intersect pin holes in the center section. One inch (2.54 cm) diameter knots may intersect pin holes elsewhere.

(4) *Miscellaneous characteristics, features and requirements.*

(i) The top face of distribution cross-arms shall not have more than four medium pitch and bark pockets in 8

foot (2.4 m) arms, and not more than five pitch and bark pockets in 10 foot (3.0 m) arms. Elsewhere a maximum of six medium pockets in 8 foot (2.4 m) arms and eight in 10 foot (3.0 m) arms shall be permitted. Equivalent smaller pockets shall be permissible. An occasional large pocket is permissible.

(ii) Shakes shall be prohibited.

(iii) *Checks.* Prior to treatment on properly seasoned arms, single face checks shall not exceed an average penetration of 1/4 the depth from any face and shall be limited to 10 inches (25.40 cm) long on the top face, and 1/3 the arm length on the other faces. Checks shall not be repeated in the same line of grain in adjacent pin holes. The sum of the average depths of checks occurring in the same plane on opposite faces shall be limited to 1/4 the face depth.

(iv) Compression wood shall be prohibited on any face. It is permitted if wholly enclosed in the arm, more than six annual rings from the surface, and not over 3/8 of an inch (0.95 cm) in width.

(v) Insect holes larger than 3/32 of an inch (0.24 cm) shall be prohibited. Pin holes (i.e. holes not over 1/16 of an inch (0.16 cm) diameter) shall be allowed if scattered and not exceeding 10 percent of the arm girth.

(vi) Wane shall be allowed on one edge, limited to approximately 1 inch (2.54 cm), measured across the corner. Outside of the top center section, an aggregate length not to exceed 2 feet may have wane up to 1-1/2 inches (3.81 cm) on an occasional piece on one or both edges. Bark shall be removed.

(vii) Prior to preservative treatment, crook, bow, or twist shall not exceed 1/2 of an inch (1.27 cm) in 8 foot arms (2.4 m) and 5/8 of an inch (1.59 cm) in 10 foot (3.0 m) arms.

(g) *Manufacture.* (1) All dimensions and tolerances shall conform to those shown on the drawings in this section or drawings supplied with the purchase order. Drawings supplied shall meet or exceed minimum dimensions and tolerances shown on the drawings in this section. Cross-sectional dimensions shall be measured and judged at about 1/4 the arm length, except when the defects of “skip dressing” or “machine bite or offset” are involved.

(2) Lamination techniques shall comply with ANSI 05.2-1983.

(3) Pin and bolt holes shall be smoothly bored without undue splintering where drill bits break through the surface. The center of any hole shall be within 1/8 of an inch (0.32 cm) of the center-line locations on the face in which it appears. The holes shall be perpendicular to the starting and finishing faces.

(4) *Shape.* The shape of the arms at any cross section, except for permissible wane, shall be as shown on the respective drawings in this section or supplied with the order. The two top edges may be either chamfered or rounded 3/8 of an inch (0.95 cm) radius. The two bottom edges may be slightly eased 1/8 of an inch (0.32 cm) radius for the entire length.

(5) *Incising.* The lengthwise surfaces of Douglas-fir crossarms shall be incised approximately 1/4 of an inch (0.64 cm) deep. The incision shall be reasonably clean cut with a spacing pattern that insures uniform penetration of preservative.

(6) *Workmanship.* All crossarms shall be first quality workmanship. Crossarms shall be dressed on four sides, although “hit and miss skips” may occur on two adjacent faces on occasional pieces. Five (5) percent of a lot or shipment may be 1/8 of an inch (0.32 cm) scant in thickness or width at the ends for a length not exceeding 6 inches (15.24 cm), or may have 1/8 of an inch (0.32 cm) machine bite on offset.

(h) *Conditioning prior to treatment.* (1) All solid sawn crossarms shall be made of lumber which has been kiln-dried. Douglas-fir arms shall have an average moisture content of 19 percent or less, with a maximum not to exceed 22 percent. Southern Yellow Pine arms shall have an average moisture content of 22 percent or less, with a maximum not to exceed 30 percent.

(2) Moisture content levels shall be measured at about 1/4 the length and at a depth of about 1/5 the crossarm's thickness. Additionally, the moisture content gradient between the shell (i.e. 1/4 of an inch (0.64 cm) deep) and the core (i.e. about 1 inch (2.54 cm) deep) shall not exceed 5 percentage points.

(3) A minimum of at least 20 solid sawn crossarms per treating charge

§ 1728.201

7 CFR Ch. XVII (1–1–97 Edition)

shall be measured to verify moisture content and shall be duly recorded by the quality control designee or independent inspector.

(4) The moisture content of lumber used in laminating shall, at the time of gluing, be within the range of 8 to 12 percent, inclusive.

(i) *Preservatives.* (1) The preservatives shall be:

(i) Creosote which conforms to the requirements of AWP Standard P1 when analyzed in accordance with the methods in AWP Standard A1, sections 2, 3, 4, either 5 or 9, and 6;

(ii) Pentachlorophenol which contains not less than 95 percent chlorinated phenols and conforms to AWP Standard P8 when analyzed in accordance with AWP Standard A5 or A9. The hydrocarbon solvents for introducing the preservative into the wood shall meet the requirements of AWP Standard P9 Type A; or

(iii) Waterborne preservatives, which may only be one of the following:

(A) Ammoniacal Copper Arsenates (ACA) and Ammoniacal Copper Zinc Arsenate (ACZA) which shall meet the requirements of AWP Standard P5, when analyzed in accordance with methods in AWP Standards A2, A9, or A11; and

(B) Chromated Copper Arsenates (CCA) which shall meet the requirements of one of the formulations given in AWP Standard P5, sections 4, 5 or 6, and 10. Tests to establish conformity shall be made in accordance with AWP Standards A2, A9, or A11.

(1) The pH of treating solutions of the waterborne preservatives shown in AWP Standard P5, section 10, shall be determined in accordance with AWP Standard A2, section 8.

(2) Waterborne preservatives are available either as oxides, which form non-ionizing chemical compounds in the wood, or as salts, which leave ionizing compounds as well as non-ionizing compounds in the wood. Salt formulations of a waterborne preservative are more corrosive to metal than the oxide formulation and may cause surface deposits. Unless otherwise specified in the purchase order, the oxide formulations of waterborne preservatives shall be supplied.

(3) Douglas-fir crossarms shall not be treated with CCA preservatives.

(4) Materials treated with waterborne preservatives shall be free of visible surface deposits.

(iv) Copper Naphthenate (CuN) concentrate used to prepare wood preserving solutions shall contain not less than 6 percent nor more than 8 percent copper in the form of Copper Naphthenate and shall conform to AWP Standard P8 when analyzed in accordance with AWP Standard A5. The hydrocarbon solvents for introducing the preservative into the wood shall meet the requirements of AWP Standard P9 Type A.

(2) [Reserved]

(j) *Preservative treatment.* (1) All timber products treated under this specification shall be treated by either a pressure or a thermal (nonpressure) process.

(2) These materials may be further conditioned by steaming, or by heating in hot oil (Douglas-fir), within the following limits:

	Time Hours (max.)	Temperature Deg. F (max.)
Steam	3	220 (104.4C)
Heating in Preservative	3	210 (98.9C)

(3) A final steam or hot oil bath may be used only to meet cleanliness requirements of paragraph (k) of this section. Total duration of the final steam bath shall not exceed 2 hours and the temperature shall not exceed 240 degrees Fahrenheit (115.6C).

(k) *Results of treatments.* (1) The quality control designee shall test or supervise the testing of each treated charge for penetration and retention.

(2) *Method of sampling.* When testing penetration and retention, a borer core shall be taken from not less than 20 crossarms in each treating charge. The borings shall be taken from any face except the top face at a point as close to the end as possible, being at least 3 inches (7.62 cm) from the end of the arm and no closer than 3 inches (7.62 cm) from the edge of the holes. The bored holes shall be plugged with preservative-treated plugs driven into the arm. Borings from laminated arms

Rural Utilities Service, USDA

§1728.201

shall not be taken from the same laminate unless there is an end joint separation.

(3) Penetration by the preservative, as determined in accordance with AWP Standard A3, shall be 100 percent of the sapwood in crossarms. In the heartwood of Douglas-fir crossarms, the penetration shall be not less than 3 inches (7.62 cm) longitudinally from the edge of holes and ends, and at least 3/16 inch (0.45 cm) from the surface of any face.

(4) Retention of preservative in the outer 6/10 of an inch (1.52 cm) for Douglas-fir and one inch (2.54 cm) for Southern Yellow Pine assay zones at the treating plant shall be not less than:

Preservative	Retention (pcf)	AWPA Analysis Method
Creosote	8	A6
Pentachlorophenol	0.4*	A5
ACA, ACZA, or CCA	0.4	A2, A7, A9, or A11
Copper Naphthenate	0.04	A5, A9, or A11

*This retention is for the lime ignition method. The copper pyridine method, retention 0.36 pcf, is required when timbers may have been in contact with salt water, and for all species native to the Pacific coast region. It is not required when it specifically states on the rough sawn material invoice that this material has not been in contact with salt water or is shown by analysis to have no additional chlorides present in the wood before treating.

(5) Cleanliness of lengthwise surfaces of all crossarms shall be free from tarry, greasy, or sticky material, and from oil exudation and pentachlorophenol crystallization (blooming).

(6) Re-treatment of materials which do not meet the penetration and retention requirements of this specification may be done only twice. Initial treatment steaming time plus re-treatment steaming time, combined, shall not exceed time allowed in paragraph (i) of this section.

(1) *Marks and brands.* (1) All crossarms shall be branded (hot brand) or die-stamped legibly and to a depth of approximately 1/16 of an inch (0.16 cm) before treatment.

(2) The letters and figures shall be not less than 1/2 of an inch (1.27 cm) in height. The top of the brand shall be oriented to the top of the arm.

(3) The brand or die-stamp shall include:

(i) The manufacturer's identification symbol;

(ii) Month and year of manufacture;

(iii) Species of timber such as DF for Douglas-fir and SP for Southern Yellow Pine; and

(iv) The preservative notated with a C for creosote, P for penta, S for salts, or N for Copper Naphthenate.

(4) An example is:

M-6-72 Manufacturer—Month—Year
DF-P Douglas-fir—penta treated

(5) The brand or stamp shall be placed on either of the wide surfaces of the arms, oriented with letters right side up towards the top of the arm and preferably about 1 foot (30.48 cm) from the midpoint of the arm.

(6) The mark should be approximately the same location on each type of crossarm of each producer.

(7) Brands, inspection marks, or quality assurance marks shall be removed from arms that do not meet these specifications

(m) *Storage.* (1) Producers may treat crossarms for reserve stock under any of the RUS approved plans. Prior to treating reserve stock, and annually thereafter, producers shall notify the Director of the Electric Staff Division of their intent to treat reserve stock. The letter of notification shall be addressed to the Director, Electric Staff Division, Rural Utilities Service, Washington, DC 20250-1500.

(2) RUS shall acknowledge, by letter, each notification of intent to treat material for reserve stock under the RUS specification.

(3) RUS's letter acknowledging the plant's advance notice of intent to treat material for reserve treated stock for the calendar year in question shall be evidence of compliance with the notification requirements.

(4) Producers shall notify RUS of:

(i) The locations of all storage or distribution yards where reserve treated stock will be maintained;

(ii) The designation of the RUS-approved plan;

(iii) The name of the selected inspection agency, where applicable; and

(iv) Any changes that occur during the year.

(5) Crossarms treated with oil-borne preservatives which have been held in storage for more than 1 year before shipment to the borrower, shall be re-assayed before shipment and shall be

§ 1728.201

7 CFR Ch. XVII (1–1–97 Edition)

re-treated if found nonconforming for retention on orders placed in accordance with this section.

(6) The crossarms shall meet the assay after re-treatment in accordance with paragraph (k) of this section.

(7) Crossarms which are held in storage after final acceptance shall be stacked in piles or on skids in such a manner as to assure good ventilation. The stacks shall be covered or stored indoors for protection from the sun and weather to reduce checking, bending, and loss of preservative.

(8) Borrowers or their contractors shall not purchase reserve treated stock from plants that fail to comply with the notification requirements.

(n) *Drawings.* (1) The drawings of Exhibit B of this section, Crossarm Drilling Guide, have a type number and show in detail the hole size, shape, and pattern desired for crossarms ordered under this specification.

(2) Purchase orders shall indicate the type required.

(3) Crossarms shall be furnished in accordance with the details of these drawings or in accordance with drawings attached to the purchase order

(4) Technical drawings for transmission crossarms are published in RUS Bulletin 1728F-T805B (formerly 50–1), Electric Transmission Specifications and Drawings, 115kV through 230kV, and RUS Bulletin 1728F-T805A (formerly 50–2), Electric Transmission Specification and Drawings, 34.5kV through 69kV.

(5) Appropriate drawings for transmission arms are to be specified and included with purchase orders.

(o) *Destination inspection.* (1) When cross-sectional tolerances are measured at destination, average shrinkage allowance shall be considered using the arm's current moisture content and actual size.

(2) Using the average shrinkage allowances for Douglas-fir and Southern Yellow Pine as 1 percent size change for each four point moisture content change below the fiber saturation point, calculations can be made to determine if the arm met the minimum size at time of manufacture, when the arm was to meet the average moisture content.

EXHIBIT A TO §1728.201—DISTRIBUTION AND TRANSMISSION ARMS

DISTRIBUTION ARMS

Figure 1

No knot shall exceed $\frac{3}{4}$ " for close grain and 1" for dense material in this top section

TRANSMISSION ARMS

POLE MOUNTING HOLE ZONE

Figure 2

No knot shall exceed a diameter of 1" for close grain, or $1\frac{1}{4}$ " for dense grain, in these two sections

EXHIBIT B TO § 1728.201—CROSSARM DRILLING GUIDE

§1728.202 RUS Bulletin 1728H-702, RUS Specification for Quality Control and Inspection of Timber Products.

(a) *Scope.* This specification describes in more detail the responsibilities and procedures pertaining to quality control for crossarms, as specified in §1728.201 of this part, and poles, covered in RUS Bulletin 1728F-700, incorporated by reference in §1728.97 of this part and in §1755.97 of 7 CFR part 1755.

(b) *Related specifications and standards incorporated by reference.*

The following specifications and standards referenced throughout this section are incorporated by reference. This incorporation by reference is approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of each are available for inspection during normal business hours at RUS, room 1250-S, U.S. Department of Agriculture, Washington, DC 20250 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. Copies of these standards and specifications may be purchased from the addresses shown below.

(1) American Wood-Preservers' Association (AWPA), Book of Standards, 1991 edition, available from AWPA, P.O. Box 286, Woodstock, Maryland 21163-0286.

§ 1728.202

Philadelphia, Pennsylvania 19103-1187, telephone number (215) 299-5585.

(c) *General stipulations.* (1) Each RUS electric borrower shall submit to the Director, Electric Staff Division, Rural Utilities Service, room 1250-S, 14th and Independence Avenue, SW., Washington, DC 20250-1500, in January of each year a list of plants from which it obtained poles or crossarms during the preceding calendar year.

(2) Ultimate quality control is the responsibility of the producer's management; however, a member of the producer's staff shall be designated quality control designee and charged with the responsibility for the exercise of proper quality control procedures. The requirements in American Wood Preservers' Association (AWPA) Standard M3, covering records, adequate laboratory, plant gauges, and other plant facilities including proper storage, shall be followed.

(3) The methods of inspection described in this section shall be used no matter which plan timber products are purchased under, i.e., Insured Warranty Plan, Independent Inspection Plan, or Quality Assurance Plans as described in § 1728.201 of this part or RUS Bulletin 1728F-700. The number of poles and crossarms actually inspected by monitors for quality control under a Quality Assurance Plan or the Insured Warranty Plan may vary from the number of poles and crossarms inspected under the Independent Inspection Plan. Under the Independent Inspection Plan, each pole and a sample number of crossarms shall be inspected.

(4) Under the Independent Inspection Plan, the RUS borrower should designate in the purchase order which inspection agency it has selected. Unless the RUS borrower contracts for inspection as a separate transaction, the treating company shall obtain the services of the RUS borrower's designated inspection agency. For reserve treated stock for purchase under the Independent Inspection Plan, the treating company shall obtain the services of an inspection agency. Selection of and changes in inspection agencies for reserve treated stock shall be promptly reported to the Director, Electric Staff Division, Rural Utilities Service, Washington, DC 20250-1500, in accord-

7 CFR Ch. XVII (1-1-97 Edition)

ance with RUS Bulletin 1728F-700, and § 1728.201.

(5) Individual inspectors in the employ of Independent Inspection Agencies shall be experienced and competent. The inspector shall perform all phases of the inspection personally and in the proper sequence. The primary responsibility of the inspector is to determine, for the borrower, by careful inspection and verification, that the timber products, preservative, and treatment meet the requirements of RUS Bulletin 1728F-700 and Bulletin 1728H-701 and that the methods, storage facilities, and production equipment conform to applicable RUS specifications. For details of the recommended inspector's qualifications see appendix A of this section.

(6) Laminated materials for use on RUS borrower systems shall follow manufacturing and quality control requirements as specified in ANSI 05.2-1983, American National Standard for Wood Products—Structural Glued Laminated Timber for Utility Structures, and ANSI/AITC A190.1-1983, American National Standard for Wood Products—Structural Glued Laminated Timber. The product shall be marked and certified.

(i) Laminated material shall be inspected by a qualified inspection and testing agency.

(ii) Quality control of material shall be performed to determine conformance with § 1728.201 of this part and AITC 200-83, Inspection Manual.

(d) *Quality control and inspection procedures for product acceptance.* It is the responsibility of the plant quality control designee to perform the following procedures to insure that a particular lot of material conforms to the requirements of the applicable RUS specification prior to treatment. After the plant quality control designee has performed these procedures, a particular lot of material shall be released to the inspector for verification of conformance.

(1) Poles can be purchased under any of the three purchase plans. These plans are Insured Warranty Plan, Independent Inspection Plan, or a Quality Assurance Plan. Under the Independent Inspection Plan, all poles in a lot shall

be inspected. Under the Insured Warranty Plan and a Quality Assurance Plan, the number of poles in a lot actually inspected may be less than every pole, depending on the terms of the plans.

(i) Ample space and assistance shall be provided by the treating plant for handling and turning to insure that the surfaces of all items can be adequately inspected.

(ii) Under the Independent Inspection Plan, all poles shall be inspected for conformance to the requirements of RUS Bulletin 1728F-700. If a pole is rejected and the cause of rejection is corrected, the rejected pole may be offered again for inspection as new material.

(iii) Dimensions, length, and circumference shall be measured by a standard steel pole tape to determine that they are in agreement with the details for class and length in the brand and butt stamp. If it is obvious by visual comparison with a measured pole that the brand information is correct, individual poles need not be measured. Pole circumference dimensions made prior to treatment shall govern acceptance. Reduction in dimension due to treatment and shipping shall be not more than 2 percent below the minimum for the pole class.

(iv) If 15 percent of the poles in a lot offered for inspection are defective, the inspector shall terminate the inspection. Re-examination of an entire lot by plant quality control shall be required when the number of rejected poles equals or exceeds 15 percent of the lot inspected. All defective or nonconforming poles either shall be removed from the lot or marked out.

(v) Poles in a lot inspected for decay shall be of the same seasoning condition. If the independent inspector suspects that decay has occurred, he shall cut a slice from both ends for closer examination. If 5 percent of the inspected poles in a lot shows evidence of decay, the entire lot shall be unconditionally rejected without further sorting.

(vi) Moisture content, when limited by the purchaser, as stated on the borrower's purchase order, shall be measured by calibrated electric moisture meter. Calibration of the meter shall include not only the zero settings for the X and Y readings, but also two re-

sistance standards for 12 and 22 percent moisture content.

(vii) Material failing to conform for moisture content may be retested upon request after a recalibration of the instrument. The results of the second test shall govern disposition of the lot.

(viii) Re-examination for any mechanical damage or deterioration and for original acceptance shall be conducted on timber products not treated within 10 days after original inspection.

(2) Crossarms can be purchased only under either of two purchase plans. These plans are the Independent Inspection Plan or Quality Assurance Plans. Under the Independent Inspection Plan, crossarms are to be inspected prior to manufacture, during manufacture, and after treatment. Under a Quality Assurance Plan, crossarms are monitored according to the terms of the quality assurance program acceptable to RUS.

(i) Inspection prior to treatment shall include:

(A) Surface inspection of all ends of all arms. This is usually done on the stacks of arms prior to manufacture. Particular attention shall be paid to defects commonly found in the ends, such as compression wood, red heart and other forms of decay, shakes, splits, through checks, scantiness, honeycomb, and low density, determined by rings per inch (centimeter) and percent of summerwood. Whenever the number of nonconforming arms is found to exceed 0.5 percent of the lot or one arm, whichever is greater, the entire lot shall be rejected for excess number of defective ends. After the producer has removed or marked out the defective material, the arms may be resubmitted for inspection.

(B) Surface inspection of the lengthwise sides performed on a random representative sample. The sample size shall equal 20 percent of a lot size or 200 arms, whichever is smaller. The inspector shall examine side surfaces as they are slowly rotated. When necessary, the rotation may be stopped for closer inspection. Whenever the number of nonconforming arms is found to exceed 2 percent of the sample size, the entire lot shall be rejected. After the producer has removed or marked out

the defective material, the arms may be resubmitted for inspection.

(C) Check of moisture content of the random sample by a calibrated moisture meter.

(D) Check of crossarm dimensions of the random sample measured after surfacing.

(ii) Inspection during manufacture shall consist of:

(A) Checking bolt and insulator pin holes for squareness and excessive splintering;

(B) Checking brands for completeness, location, and legibility; and

(C) Checking arms for conformance.

(iii) Under the Independent Inspection Plan, there shall be a final inspection during and after treatment for preservative retention and penetration and for damage.

(3) Structural glued laminated timber shall be tested and inspected in accordance with AITC 200–83, Inspection Manual. Grade of lumber shall be inspected by a qualified grader for specified quality, and so marked, in accordance with grading rules of the American Lumber Standards. Adhesives used for all structural arms shall meet requirements of ANSI 05.2–83, paragraph 5.2. Melamine urea adhesives shall not be used. End joint spacings and limitations shall be in accordance with ANSI 05.2–83.

(e) *Preservatives.* (1) Creosote shall conform to the requirements of AWP Standard P1 when analyzed by AWP Standard A1, sections 2, 3, 4, either 5 or 9, and 6.

(i) Each occasional charge, all material treated in a cylinder at one time, shall be analyzed.

(ii) The first charge and one of every five charges randomly selected in consecutive charges shall be analyzed.

(2) Solutions of waterborne preservatives shall be analyzed for components in accordance with AWP Standards A2, A9, or A11, and shall meet the requirements of P5 for composition. AWP A2 shall be used as a referee method.

(3) Pentachlorophenol shall contain not less than 95 percent chlorinated phenols and conform to AWP Standard P8 in hydrocarbon solvent AWP P9 Type A.

(4) Copper Naphthenate in hydrocarbon solvent (AWP P9 Type A) shall contain not less than 6 percent nor more than 8 percent copper in the form of Copper Naphthenate and conform to AWP Standard P8 when analyzed in accordance with AWP Standard A5.

(f) *Plant facilities and inspection during treatment.* (1) Manufacturing and treating plant facilities shall conform to AWP Standard M3, paragraph 3. Pressure plants shall be equipped with recording instruments to register time, pressure, temperature and vacuum during each cycle of treatment. They shall also be equipped with indicating thermometers and pressure and vacuum gauges to check the accuracy of the recorders. Work tanks shall be equipped with a thermometer. Thermal treating vats shall be equipped with a time and temperature recorder and with an indicating thermometer. Temperature recording devices are not mandatory for plants treating exclusively with waterborne preservatives.

(2) Under the Independent Inspection Plan, the inspector shall be present during the treatment procedure, except at times when it may be impractical, such as during late night or early morning treatments. At such times, temperature, pressure, and vacuum data shall be taken from the recording charts.

(3) Recording instruments shall be checked with indicating gauges and thermometers. Inaccuracies shall be referred to the treating company for prompt correction. In the event of an inaccuracy, indicating possible damage to the material, the inspector shall reject the charge.

(g) *Results of treatment.* (1) Poles shall be tested for retention and penetration by means of a calibrated increment borer 0.2 inches (0.51 cm) $\pm$ 0.02 inches (0.05 cm) in diameter in accordance with procedures in AWP Standard M2, paragraph 5.22. Under the Independent Inspection Plan, all treating charges shall be tested for retention and penetration. Plant quality control and independent inspection shall do their analyses separately. Under the Insured Warranty Plan and Quality Assurance Plans, the frequency of testing retention and penetration may vary according to the plan.

(i) Western red and northern white cedars and western larch poles shall be bored at any point of the periphery approximately 6–12 inches (15.24–30.48 cm) above ground line and all other species approximately 1 foot (30.48 cm) above or below the brand.

(ii) Penetration shall be determined in accordance with AWP Standard A3. Chrome Azurol S and Penta-Check shall be used to determine penetration of copper containing preservatives and penta, respectively.

(iii) *Retention sampling.*

(A) When there are 20 or more poles in the treating charge, the retention sample for creosote shall consist of 20 assay zones from southern pine and Douglas-fir poles. All poles in charges with fewer than 20 poles shall be bored once. Charges with less than 15 poles shall be bored once and bored again on a random basis to obtain a minimum of 15 assay zones.

(B) Retention samples shall be taken from 20 poles in charges of 20 or more poles.

(C) Retention samples for Alaska yellow, western red, and northern white cedars shall be comprised of a minimum of 30 assay zones for creosote and waterborne preservatives. For penta charges of fewer than 30 poles, the sample shall contain the assay zone from each pole in the lot.

(D) Retention samples shall be comprised of borings, representative of pole volumes for each class and length in the charge. Further selection and marking of poles of mixed seasoning, volume, and location on the tram shall be made as illustrated in the following table:

Number of Poles	Class/Length	Vol. in cu. ft.	Total Volume	Number of Borings
27	7/30(9.1 m)	232	15	3
26	4/35(10.7 m)	447	29	6
11	5/35(10.7 m)	163	10	2
55*	6/35(10.7 m)	704	46	9
Total		1,546		

*If a portion of these poles were green and some partially seasoned, then the number of borings should reflect the approximate percentage of each.

(iv) When material in a lot consists of fewer pieces than the designated minimum number of samples for assay, additional borings shall be taken so as

to make up at least the minimum sample, and in such manner that the sample is representative of the lot of material with respect to any variations in size, seasoning condition, or other features that might affect the results of treatment.

(v) Analyses for preservative retention shall be performed.

(A) Creosote shall be analyzed by AWP Standard A6.

(B) Penta shall be analyzed by AWP Standard A5 or A9. Copper pyridine method is required when timber may have been in contact with salt water and for all species native to the Pacific coast region, unless the raw material invoice specifically states that the material either has not been in contact with salt water or has been shown by analysis to have contained no additional chlorides before treating.

(C) Copper Naphthenate shall be analyzed by tests in accordance with AWP Standards A5 or A9.

(D) Waterborne preservatives shall be analyzed by tests in accordance with AWP Standards A2, A7, A9, or A11.

(E) Prior to unloading a tram, the inspectors may take their own samples and analyze them concurrently with the quality control designee, but each shall work independently, and quality control data shall be presented before acceptance of the charge.

(vi) *Penetration sampling of poles.*

(A) Group A poles consist of poles with a circumference of 37.5 inches (95.25 cm) or less at 6 feet (1.8 m) from butt.

(1) Bore 20 Group A poles or 20 percent of the poles, whichever is greater. Accept if 100 percent of the sample conform; otherwise, bore all poles.

(2) Re-treat the charge if more than 15 percent of the borings are found to be nonconforming.

(3) Re-treat all nonconforming poles if 15 percent or fewer fail the requirement.

(B) Group B poles consist of poles with circumference greater than 37.5 inches (95.25 cm) at 6 feet (1.8 m) from the butt.

(1) For Group B poles 50 feet (15.2 m) and shorter, bore each pole and re-treat only those found to be nonconforming, unless more than 15 percent fail; in that case, re-treat the entire lot.

(2) For Group B poles longer than 50 feet (15.2 m), bore each pole twice at 90 degrees apart around the pole and accept only those poles conforming to the penetration requirement in both borings. All nonconforming poles may be re-treated only twice.

(vii) All holes (nominal 0.2 of an inch (0.05 cm) diam. bit) shall be promptly filled with treated, tight-fitting wood plugs.

(2) Under the Independent Inspection Plan, all treating charges of crossarms shall be tested for retention and penetration. Plant quality control inspectors and independent inspectors shall do their analyses *independently*. Under the Quality Assurance Plans, the frequency of testing retention and penetration may vary according to the plan.

(i) The penetration and retention sample shall consist of 20 (48 for creosote) outer 6/10 of an inch (1.52 cm) for Douglas-fir and 1 inch (2.54 cm) for Southern Yellow Pine zones from borings taken from any face except the top face at a location as close to the end as possible being at least 3 inches (7.62 cm) from the end of the arm and no closer than 3 inches from the edge of any holes. For laminated material, borings shall be taken from laminates on a random basis.

(ii) Penetration shall be tested by taking not less than 20 borings from 20 crossarms in each charge, determined in accordance with AWP Standard A3. Chrome Azurol S and Penta-Check shall be used to determine penetration of copper containing preservatives and penta, respectively.

(3) Laminated material shall be checked for any evidence of delamination due to treatment and for the identifying quality stamp of AITC or American Plywood Association (APA).

(4) When x-ray fluorescence (XRF) instruments are used to analyze preservative or retention, Periodic Instrument Checks (PIC) shall be made by the treating plant and any outside inspection agency using the treating plant's instrument or its own. Appendix B of this section outlines a recommended procedure.

(5) At a minimum, treating plants shall perform the PIC weekly and

record the results in the instrument's log, which shall be stored with the instrument. Independent inspection agencies shall use their own samples to perform the PIC on treater's instrument once per visit, not to exceed one PIC per week. Inspection agencies shall record their results in the instrument's log and state the date of its latest PIC on all treating reports.

(6) XRF instruments shall be accurate and reliable, and they shall generate reproducible results. Instruments shall have thorough instructions which should include recommendations on drying techniques, equipment, and density calculations. These drying recommendations shall be followed when using these instruments.

(h) *Product acceptance.* Under the Independent Inspection Plan, the inspector shall signify acceptance by marking each piece of accepted material with a clear, legible hammer stamp in one end prior to treatment and in the other end after treatment. The inspector shall personally mark each piece, and shall not delegate this responsibility to another person.

(i) *Charge inspection reports.*

(1) Inspection Reports shall cover the following:

(i) The total pieces in the lot, number of and causes for rejection;

(ii) The conditioning of the material prior to treatment;

(iii) The analyses of preservative identified by the analyst's signature or certification;

(iv) The details of treatment; and

(v) The results of treatment. These results shall include the following:

(A) The depth of penetration for retention sample and a summary of all poles rejected for insufficient penetration;

(B) Worksheets for retention analyses, each identified by quality control designee and independent inspector;

(C) The number of pieces offered and rejected, together with the cause(s) for rejection;

(D) The date of latest Periodic Instrument Check.

(2) On each inspection report the independent inspector and the plant quality control designee shall certify, in writing, that the material listed on the report has been inspected before,

Rural Utilities Service, USDA

§1728.202

during, and after treatment, and that the preservative used was analyzed in accordance with the requirements of this section.

(3) Each inspector or inspection agency shall retain for a period of 1 year a copy or transcript of each report of inspection, together with laboratory worksheets covering retention by assay and preservative analyses for the purchaser, and on request shall furnish a copy or transcript of any of these reports to the Director, Electric Staff Division, Rural Utilities Service, Washington, DC 20250-1500.

(j) *Charge numbers on re-treat poles.* The letter “R” shall be added to the original charge number in the butts of all poles that are re-treated for insufficient penetration or retention of preservative. All poles that fail to meet treatment requirements after two re-treatments shall be permanently rejected.

(k) *Safety provisions.* Poles intended for RUS borrowers shall not be inspected when, in the opinion of the inspector, unsafe conditions are present.

APPENDIX A TO §1728.202—RECOMMENDED INSPECTORS’ QUALIFICATIONS

(a) Inspection agencies should see that inspectors assigned to the inspection of timber products and treatment for RUS borrowers are competent and experienced.

(b) *Recommended experience.* In general, any of the following examples are recommended as minimum qualifying experience before a new inspector may be permitted to inspect timber products for RUS borrowers:

(1) Three years’ experience as an inspector of timber and the preservative treatment of timber.

(2) Three years’ experience in timber treating plant quality control work.

(3) Under the direct supervision of an experienced, well-qualified inspector, who has performed the following:

(i) Inspected at least 2,500 poles and/or crossarms “in the white.”

(ii) Checked preservative penetration results on at least 500 poles and crossarms.

(iii) Made at least 35 wood assays for preservative retention.

(iv) Made at least 25 analyses of each type preservative used on material the person is assigned to inspect.

(v) In both (b)(1) and (b)(2) of this appendix A, the experience should be not less than that required in (b)(3)(i), (b)(3)(ii), (b)(3)(iii), and (b)(3)(iv).

(4) Inspectors experienced in the inspections of one product, such as poles, should

not be qualified to inspect another product, such as crossarms, until the above experience is gained.

(5) The inspector should be especially well informed in wood preservation and the operation of a timber treating plant, and be competent in preservative analysis and other laboratory work.

(6) In all cases, an inspector should be thoroughly instructed in the application of RUS specifications and the standards pertaining thereto before being permitted to independently inspect timber products and the treatments applied to them. Knowledge of these specifications and standards, as well as the inspector’s proficiency, may be checked routinely by members of the RUS staff.

APPENDIX B TO §1728.202—PERIODIC INSTRUMENT CHECK X-RAY FLUORESCENCE

(a) *General.* The following sample calibration standards and procedures may be used in lieu of comparison with analysis by wet ash or lime ignition methods.

(b) *Penta.* Until such time as AWPAs approve calibration standards for penta, the following method should be used to run a salt water solution to measure Cl (chloride).

(1) *Standard Solution.* Dry approximately 15 grams of reagent grade NaCl at 105°C for 1 hour. Weigh 10.00 grams into a tared beaker. Add distilled water until the total weight is 100.00 grams. Stir until completely dissolved. This will give a 10 percent weight to weight solution of NaCl.

(2) *Baseline Check.* (i) Insure that the instrument is in good agreement with lime ignition.

(ii) Record any user correction factors.

(iii) Stabilize and standardize the instrument.

(iv) Run the salt solution five times using the PENTA-OIL calibration mode.

(v) Record the average and standard deviation of the values for percent penta. The average value will now be considered the nominal value.

(3) *Periodic Instrument Check.* Run the salt solution two times and average the results. If the value is more than ± 5 percent of the nominal value, the instrument needs further calibration, following manufacturer’s recommendation.

(c) *Waterborne preservatives.* Treaters and inspection agencies should purchase AWPAs Committee P-5 Standard Reference Materials to analyze on their instruments. Reference materials should be in the retention range of the material being produced at the plants. If the value is more than ± 5 percent of the nominal value, the instrument needs further calibration. AWPAs Committee P-5 Standard Reference Materials may be purchased from:

EDITORIAL NOTE: Nomenclature changes to part 1735 appear at 55 FR 39397, Sept. 27, 1990.

Subpart A—General

§ 1735.1 General statement.

(a) Subparts A through E of this part set forth the general policies, types of loans and loan requirements under the Telephone loan program.

(b) The standard RUS security documents (see 7 CFR 1744 subpart D or RUS Bulletins 320–4, 320–22, 321–2, 322–2,

Rural Utilities Service, USDA

§ 1735.2

323-1, 326-1) contain provisions regarding acquisitions, mergers, and consolidations. Subparts F through J of this part implement those provisions by setting forth the policies, procedures, and requirements for telephone borrowers planning to acquire existing telephone lines, facilities, or systems with RUS loan or other funds, or planning to merge or consolidate with another system. This part supersedes all RUS Bulletins that are in conflict with it.

(c) Subparts F through J of this part also detail RUS's requirements with respect to mergers and acquisitions involving RUS loan funds.

[55 FR 39395, Sept. 27, 1990; 55 FR 41170, Oct. 9, 1990]

§ 1735.2 Definitions.

As used in this part:

Access line means a transmission path between user terminal equipment and a switching center that is used for local exchange service. For multiparty service, the number of access lines equals the number of lines/paths terminating on the mainframe of the switching center.

Acquisition means the purchase of another telephone system, lines, or facilities whether by acquiring telephone plant in service or majority stock interest of one or more organizations.

Acquisition agreement means the agreement, including a sales agreement, between the seller and purchaser outlining the terms and conditions of the acquisition. Acquisition agreements also include any other agreements, such as options and subsidiary agreements relating to terms of the transaction.

Adjusted assets has the meaning as defined in Article II, section 15(d) of the standard RUS mortgage. See 7 CFR part 1758.

Adjusted net worth has the meaning as defined in Article II, section 15(d) of the standard RUS mortgage. See 7 CFR part 1751.

Administrator means the Administrator of RUS.

Advance of funds means the transferring of funds by RUS to the borrower's construction fund.

Appropriated means funds appropriated based on subsidy.

Affiliate means an organization that directly, or indirectly through one or more intermediaries, controls or is controlled by, or is under common control with, the borrower.

Borrower means any organization which has an outstanding loan made or guaranteed by RUS, or which is seeking such financing.

Composite economic life as applied to facilities financed by loan funds means the weighted (by dollar amount of each class of facility in the loan) average economic life of all classes of facilities in the loan.

Consolidation means the combination of two or more borrower or nonborrower organizations, pursuant to state law, into a new successor organization that takes over the assets and assumes the liabilities of those organizations.

Construction fund means the RUS Construction Account required by § 2.4 of the standard loan contract into which all RUS loan funds are advanced. See 7 CFR part 1758.

Depreciation means the loss not restored by current maintenance, incurred in connection with the consumption or prospective retirement of telecommunications plant in the course of service from causes which are known to be in current operation, against which the company is not protected by insurance, and the effect of which can be forecast to a reasonable approach to accuracy.

Economic life as applied to facilities financed by loan funds, means the number of years resulting from dividing 100 percent by the depreciation rate (expressed as a percent) approved by the regulatory body with jurisdiction over the telephone service provided by the borrower for the class of facility involved or, if no approved rate exists, by the median depreciation rate expressed as a percent as published by RUS in its Statistical Report, Rural Telephone Borrowers for all RUS and RTB borrowers for that class of facility.

Feasibility study means the pro forma financial analysis performed by RUS to determine the economic feasibility of a loan. See 7 CFR part 1737.

Forecast period means the time period beginning on the date (base date) of the borrower's balance sheet used in preparing the feasibility study and ending

§ 1735.2

7 CFR Ch. XVII (1–1–97 Edition)

on a date equal to the base date plus the number of years estimated in the feasibility study for completion of the project. Feasibility projections are usually for 5 years, see § 1737.70(a) of this chapter. For example, the forecast period for a loan based on a December 31, 1990 balance sheet and having a 5-year estimated project completion time is the period from December 31, 1990 to December 31, 1995.

Funded reserve means a separate asset account, approved by RUS, consisting of any or all of the following:

- (1) Federal government securities purchased in the name of the borrower;
- (2) Other securities issued by an institution whose senior unsecured debt obligations are rated in any of the top three categories by a nationally recognized rating organization; or
- (3) Cash.

GFR means the RUS general field representative.

Guaranteed loan means a loan guaranteed by RUS under section 306 of the RE Act bearing interest at a rate agreed to by the borrower and the lender.

Hardship loan means a loan made by RUS under section 305(d)(1) of the RE Act bearing interest at a rate of 5 percent per year.

Interim financing means funding for a project which RUS has acknowledged could be included in a loan, should said loan be approved, but for which RUS funds have not yet been made available. See 7 CFR part 1737, subpart E.

Loan means any loan made or guaranteed by RUS.

Loan contract means the loan agreement between RUS and the borrower, including all amendments thereto.

Loan funds means funds provided by RUS through direct or guaranteed loans.

Majority noteholders means the holder or holders of a majority in principal amount of the notes outstanding at a particular time.

Merger means the combining, pursuant to state law, of one or more borrower or nonborrower organizations into an existing survivor organization that takes over the assets and assumes the liabilities of the merged organizations. While the terms merger and consolidation have different meanings, for

the purpose of this part, “mergers” also include consolidations as defined above. Furthermore, “mergers” also include acquisitions where the acquired systems, lines, or facilities and the acquiring system are operated as one system.

Mortgage means the security agreement between RUS and the borrower, including any amendments and supplements thereto.

RUS cost-of-money loan means a loan made under section 305(d)(2) of the RE Act bearing an interest rate as determined under § 1735.31(c). RUS cost-of-money loans are made concurrently with RTB loans.

RTB loan means a loan made by the Rural Telephone Bank (RTB) under section 408 of the RE Act bearing an interest rate as determined under 7 CFR 1610.10. RTB loans are made concurrently with RUS cost-of-money loans.

Rural area means any area of the United States, its territories and insular possessions (including any area within the Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau) not included within the boundaries of any incorporated or unincorporated city, village or borough having a population exceeding 5,000 inhabitants. The population figure is obtained from the most recent data available, such as from the Bureau of the Census and Rand McNally and Company. For purposes of the “rural area” definition, the character of an area is determined as of a time the initial loan for the system is made.

Subscriber means the same as access line.

Survivor means (1) the successor corporation formed by the consolidation of one or more borrowers, (2) the corporation remaining after completion of a merger involving one or more borrowers, and (3) a corporation assuming all or a portion of an RUS loan in connection with an acquisition.

Telephone service means any communication service for the transmission or reception of voice, data, sounds, signals, pictures, writing, or signs of all kinds by wire, fiber, radio, light, or other visual or electromagnetic means

Rural Utilities Service, USDA

§ 1735.12

and includes all telephone lines, facilities and systems to render such service. It does not mean:

- (1) Message telegram service;
- (2) Community antenna television system services or facilities other than those intended exclusively for educational purposes; or
- (3) Radio broadcasting services or facilities within the meaning of section 3(o) of the Communications Act of 1934, as amended.

Times Interest Earned Ratio (TIER) means the ratio of a borrower's net income (after taxes) plus interest expense, all divided by interest expense. For the purpose of this calculation, all amounts will be annual figures and interest expense will include only interest on debt with a maturity greater than one year.

[54 FR 13351, Apr. 3, 1989; 54 FR 16194, Apr. 21, 1989. Redesignated at 55 FR 39395, Sept. 27, 1990, as amended at 56 FR 26596, June 10, 1991; 58 FR 66253, Dec. 20, 1993]

§ 1735.3 Availability of forms.

Single copies of RUS forms and publications cited in this part are available from Administrative Services Division, Rural Utilities Service, United States Department of Agriculture, Washington, DC 20250. These RUS forms and publications may be reproduced. The terms "RUS form", "RUS standard form", and "RUS specification" have the same meanings as the terms "REA form", "REA standard form", and "REA specification", respectively, unless otherwise indicated.

[54 FR 13351, Apr. 3, 1989. Redesignated at 55 FR 39395, Sept. 27, 1990, and amended at 59 FR 66441, Dec. 27, 1994]

§§ 1735.4—1735.9 [Reserved]

Subpart B—Loan Purposes and Basic Policies

SOURCE: 54 FR 13351, Apr. 3, 1989, unless otherwise noted. Redesignated at 55 FR 39395, Sept. 27, 1990.

§ 1735.10 General.

(a) The Rural Utilities Service (RUS) makes loans to furnish and improve telephone service in rural areas. Loans made or guaranteed by the Administrator of RUS will be made in conform-

ance with the Rural Electrification Act of 1936 (RE Act), as amended (7 U.S.C. 901 *et seq.*), and 7 CFR chapter XVII. RUS provides borrowers specialized and technical accounting, engineering, and other managerial assistance in the construction and operation of their facilities when necessary to aid the development of rural telephone service and to protect loan security.

(b) RUS will not make hardship loans, RUS cost-of-money loans, or RTB loans for any purposes that, in RUS's opinion, are inconsistent with the borrower achieving the requirements stated in the State's telecommunications modernization plan within the time frame stated in the plan (see 7 CFR part 1751, subpart B), unless RUS has determined that achieving the requirements as stated in such plan is not technically or economically feasible.

(c) RUS will not deny or reduce a loan or an advance of loan funds based on a borrower's level of general funds.

(d) No fees or charges are assessed for any type of loan or guarantee provided by RUS or the Rural Telephone Bank (RTB).

(e) The Administrator may use consultants funded by the borrower for financial, legal, engineering, and other technical advice in connection with the review of a borrower's loan application.

[58 FR 66253, Dec. 20, 1993, as amended at 59 FR 17464, Apr. 13, 1994]

§ 1735.11 Area coverage.

Borrowers must make adequate telephone service available to the widest practical number of rural subscribers during the life of the loan. Both the nature of the service area and the cost per subscriber must be fully considered. The borrower must seek to provide service to all interested potential subscribers in the service area. Borrowers are not required to extend service in situations where the costs would be exorbitant. The loan contract shall contain appropriate provisions to effect this requirement. See 7 CFR 1737.11(a), Preapplication Determinations: Area to be Served.

§ 1735.12 Nonduplication.

(a) In states having a state regulatory body with authority to regulate

§ 1735.13

7 CFR Ch. XVII (1–1–97 Edition)

telephone service and to require certificates of convenience and necessity, the borrower must obtain such a certificate before RUS will make a loan. Facilities or services not specifically covered by such certificate will be subject to the provisions of § 1735.12(b).

(b) In states where there is no such regulatory body, a loan will not be made unless the Administrator determines that no duplication of lines, facilities, or systems already providing reasonably adequate services shall result from such a loan.

(c) RUS shall consider the following criteria in determining whether service is reasonably adequate:

(1) Availability of telephone service to commercial establishments, professional offices, essential community services, and residences in the community.

(2) Reasonable audibility and clarity of sound transmission and reception.

(3) Absence of frequent interruptions.

(4) Adequacy of line circuits and central office facilities to permit reasonably frequent subscriber use without unreasonable delay.

(5) Availability of connections with other exchanges and with the interexchange facilities of the Nation.

(6) Any other criteria the Administrator determines to be applicable to the particular case.

§ 1735.13 Location of facilities and service for nonrural subscribers.

(a) When it is determined by the Administrator to be necessary in order to furnish or improve telephone service in rural areas, loans may be made for the improvement, expansion, construction, acquisition, and operation of telephone lines, facilities, or systems without regard to their geographical location.

(b) To the greatest extent practical, loans are limited to providing telephone facilities that serve subscribers in rural areas. In order to furnish and improve service to rural subscribers it may at times be necessary to provide loan funds to finance telephone facilities which (1) will also serve nonrural subscribers, or (2) are located in nonrural areas. Loans may be approved to finance such facilities if the Administrator determines, on a case-by-case basis, that (i) the primary purpose of

the loan is to provide service to rural areas and (ii) the financing of facilities for nonrural subscribers is necessary and incidental to furnishing or improving telephone service in rural areas.

(c) Loan funds may be approved for facilities to serve nonrural subscribers only if (1) the principal purpose of the loan is to furnish and improve rural service and (2) the use of loan funds to serve nonrural subscribers is necessary and incidental to the principal purpose of the loan. The following are examples of purposes for which such loans may be made (such loans are not limited to these examples):

(1) In the case of construction of a new system, if the loan would not be economically feasible and self-liquidating unless the nonrural as well as the rural portions of the telephone service area are included in the proposed system, the loan may include funds for both portions.

(2) Where the acquisition of an existing system located in and serving a nonrural area is necessary to serve as the nucleus of an expanded system to furnish area coverage service in rural areas, the loan may include funds to finance the acquisition.

(3) When a system is being converted to modern service for rural subscribers, the loan may include funds for the conversion of the nonrural facilities, if the rural service will be improved as a result of such nonrural improvements and it is impractical to finance and serve the nonrural and rural areas separately.

(4) A loan may include funds to serve nonrural subscribers located in community centers frequently called by the rural subscribers if the construction to serve such nonrural subscribers will be incidental to, and contribute substantially to, the provision of adequate service for the rural subscribers.

(d) RUS may also approve financing for facilities to serve nonrural areas if, at the time financing was first approved by RUS:

(1) The nonrural area had a population of 1,500 or less when first financed by RUS and that financing was approved prior to November 1, 1993; or

Rural Utilities Service, USDA

§ 1735.19

(2) The nonrural area had a population of 5,000 or less when first financed by RUS and that financing was approved on or after November 1, 1993.

[54 FR 13351, Apr. 3, 1989. Redesignated at 55 FR 39395, Sept. 27, 1990, as amended at 58 FR 66253, Dec. 20, 1993]

§ 1735.14 Borrower eligibility.

(a) RUS makes loans to:

(1) Entities providing, or who may hereafter provide, telephone service in rural areas;

(2) Public bodies providing telephone service in rural areas as of October 28, 1949; and

(3) Cooperative, nonprofit, limited dividend or mutual associations.

(b) RUS does not make loans to individuals.

(c) RUS gives preference to those borrowers (including initial loan applicants) already providing telephone service in rural areas, and to cooperative, nonprofit, limited dividend, or mutual associations. To be eligible for a loan, a borrower must provide or propose to provide the basic local exchange telephone service needs of rural areas, and it must be incorporated.

[58 FR 66253, Dec. 20, 1993]

§ 1735.15 Civil rights.

Borrowers are required to comply with certain regulations on non-discrimination and equal employment opportunity. See RUS Bulletin 320-19 and RUS Bulletin 320-15, respectively.

§ 1735.16 Minimum loan amount.

Recognizing plant costs, the borrower's cost of system design, and RUS's administrative costs, RUS will not consider applications for loans of less than \$50,000.

§ 1735.17 Facilities financed.

(a) RUS makes hardship and guaranteed loans to finance the improvement, expansion, construction, acquisition, and operation of systems or facilities (including station apparatus owned by the borrower, headquarters facilities, and vehicles not used primarily in construction) to furnish and improve telephone service in rural areas, except as noted under paragraph (c) of this section.

(b) RUS makes concurrent RUS cost-of-money and RTB loans to finance the improvement, expansion, construction, and acquisition of systems or facilities (excluding station apparatus owned by the borrower, headquarters facilities, and vehicles not used primarily in construction) to furnish and improve telephone service in rural areas, except as noted under paragraph (c) of this section.

(c) RUS will not make any type of loan to finance the following items:

(1) Station apparatus (including PBX and key systems) not owned by the borrower and any associated inside wiring;

(2) Certain duplicative facilities, see § 1735.12;

(3) Facilities to serve subscribers outside the local exchange service area of the borrower unless those facilities are necessary to furnishing or improving telephone service within the borrower's service areas; and

(4) Facilities to provide service other than 1-party.

(d) If an unadvanced loan, or portion thereof, is rescinded, a new loan shall not be made for the same purposes as in the rescinded loan, except as provided in § 1735.47.

[54 FR 13351, Apr. 3, 1989. Redesignated at 55 FR 39395, Sept. 27, 1990, and amended at 58 FR 66253, Dec. 20, 1993]

§ 1735.18 Additional equity.

If determined by the Administrator to be necessary for loan security, a borrower applying for an initial loan shall increase its net worth as a percentage of assets to the highest level recorded, not to exceed 40 percent, at the end of any calendar quarter in the period beginning 2 years prior to the receipt by RUS of the borrower's loan application form (RUS Form 490). This restoration to the higher level of net worth shall take place before RUS will determine the feasibility of the proposed loan.

§ 1735.19 Mergers and consolidations.

RUS does not make loans for the sole purpose of merging or consolidating telephone organizations. After a merger or consolidation, RUS will consider making loans to the telephone system to finance the improvement or extension of telephone service in rural areas.

§ 1735.20

See RUS Bulletins 320-4, 321-2, 325-1, and 326-1.

§ 1735.20 Acquisitions.

(a) RUS finances the acquisition by a borrower of another system, lines, or facilities only when the acquisition is necessary and incidental to furnishing or improving rural telephone service. See 7 CFR 1735.13.

(b) RUS determines the amount it will lend for each acquisition. If the acquisition price exceeds this amount, the borrower shall provide the remainder.

(c) For additional policies on acquisitions, see subpart F through J of this part.

[54 FR 13351, Apr. 3, 1989. Redesignated at 55 FR 39395, Sept. 27, 1990, and amended at 58 FR 66253, Dec. 20, 1993]

§ 1735.21 Refinancing loans.

(a) Hardship loans and guaranteed loans may include funds to refinance outstanding indebtedness of corporations furnishing telephone service when such refinancing is necessary and incidental to furnishing or improving telephone service in rural areas. Refinancing may not constitute more than 40 percent of the loan.

(b) Loans for refinancing are not made solely to enable borrowers to obtain a lower interest rate or a longer amortization period. RUS requires borrowers, to the greatest extent possible, to liquidate outstanding indebtedness through the use of nonloan funds.

(c) If deemed necessary by RUS to provide itself with adequate security, RUS will consider loans for refinancing outstanding indebtedness secured by a lien on property offered as security for the loan, if the property covered by the lien is integral to the operation of the system.

(d) RUS will consider loans for refinancing when the borrower would otherwise be unable to meet payments on both the outstanding indebtedness and the loan as they become due.

(e) RUS may consider loans for refinancing in other situations.

[54 FR 13351, Apr. 3, 1989. Redesignated at 55 FR 39395, Sept. 27, 1990, and amended at 58 FR 66254, Dec. 20, 1993]

7 CFR Ch. XVII (1-1-97 Edition)

§ 1735.22 Loan security.

(a) RUS makes loans only if, in the judgment of the Administrator, the security therefor is reasonably adequate and the loan will be repaid within the time agreed. See 7 CFR 1735.18 and 7 CFR 1735.51.

(b) RUS generally requires that borrowers provide it with a first lien on all of the borrower's property. See 7 CFR 1735.46.

(c) In the case of loans that include the financing of telephone facilities that do not constitute self-contained operating systems or units (such as lines switched by other systems), the borrower shall, in addition to the mortgage lien on all of the borrower's telephone facilities, furnish adequate assurance, in the form of contractual or other security arrangements, that continuous and efficient telephone service will be rendered.

(d) The borrower shall provide RUS with a satisfactory Area Coverage Survey. See 7 CFR 1737.30 and 1737.31.

(e) RUS makes loans only if the borrower's entire system, including the facilities to be constructed with the proceeds of the loan, is economically feasible, as determined by RUS.

(f) Borrowers with loans approved prior to November 1, 1993, must continue to meet the TIER maintenance requirements contained in their loan contract or mortgage. Loan contracts and mortgages covering hardship loans, RUS cost-of-money loans, RTB loans, and guaranteed loans approved on or after December 20, 1993, shall contain a provision requiring the borrower to maintain a TIER of at least 1.0 during the Forecast period. At the end of the Forecast period, the borrower shall be required to maintain, at a minimum, a TIER at least equal to the projected TIER determined by the feasibility study prepared in connection with the loan, but not greater than 1.75. Execution and delivery of these loan contracts and mortgages shall supersede any conflicting TIER requirements in the borrower's previous loan contracts or mortgages.

(g) A borrower will not be required to raise its TIER as a condition for receiving a loan. Additional financial, investment, and managerial controls appear

Rural Utilities Service, USDA

§ 1735.30

in the loan contract and mortgage required by RUS.

[54 FR 13351, Apr. 3, 1989. Redesignated at 55 FR 39395, Sept. 27, 1990, as amended at 56 FR 26597, June 10, 1991; 58 FR 66254, Dec. 20, 1993]

§§ 1735.23—1735.29 [Reserved]

Subpart C—Types of Loans

§ 1735.30 Hardship loans.

(a) RUS makes hardship loans under section 305(d)(1) of the RE Act. These loans bear interest at a rate of 5 percent per year. To qualify for a hardship loan on or after November 1, 1993, a borrower must meet each of the following requirements:

(1) The average number of proposed subscribers per mile of line in the service area of the borrower is not more than 4;

(2) The borrower has a projected TIER (including the proposed loan or loans) of at least 1.0, but not greater than 3.0, as determined by the feasibility study prepared in connection with the loan, see 7 CFR part 1737, subpart H; and

(3) The Administrator has approved and the borrower is participating in a telecommunications modernization plan for the state, see 7 CFR part 1751, subpart B.

(b)(1) Hardship loan funds shall not be used to finance facilities located in any exchange of the borrower that has:

(i) More than 1,000 existing subscribers; and

(ii) An average number of proposed subscribers per mile of line greater than 17.

(2) Those facilities may, however, be financed with concurrent RUS cost-of-money and RTB loans or a guaranteed loan if the borrower is eligible for such financing.

(c) The Administrator may waive the TIER requirement in paragraph (a)(2) of this section in any case in which the Administrator determines, and sets forth the reasons therefor in writing, that the requirement would prevent emergency restoration of the telephone system of the borrower or result in severe hardship to the borrower.

(d) In order to fairly and equitably approve hardship loans to ensure that borrowers most in need receive hard-

ship financing first, RUS will prioritize for approval all applications qualifying for hardship loans. The criteria in this paragraph will be used by the Administrator to rank, from high to low, applications that have been determined to qualify for hardship financing. Subject to the availability of funds, applications receiving the highest number of points will be selected for loan approval each fiscal year quarter (the application with the most points will be approved first, the second highest next, etc.) The following ranking methodology and loan approval conditions apply:

(1) *Ranking criteria.* Borrowers will receive points based on each of the following criteria applicable to the proposed loan:

(i) *Forecasted Average Number of Subscribers Per Mile of Line (Density).* The number of points assigned to a borrower will be the value 4 less the value of the borrower's forecasted density as determined by the Feasibility Study prepared in connection with the loan (i.e., if a borrower's forecasted system density is 2.75, the borrower would receive 4 less 2.75 points, or 1.25 points).

(ii) *Forecasted TIER.* The number of points assigned to a borrower will be the value 3 less the value of the borrower's forecasted TIER as determined by the Feasibility Study prepared in connection with the loan (i.e., if a borrower's forecasted TIER is 1.75, the borrower would receive 3 less 1.75 points, or 1.25 points).

(iii) *Unserved Territories.* Borrowers will receive points for loan funds included in the application to provide telephone service in areas previously unserved because it was considered cost prohibitive (for example, high costs resulting from the terrain, remoteness, or system design). In particular, borrowers will receive one tenth of a point, up to a maximum of 2 points, for each subscriber added (in connection with the loan) that currently resides in an unserved area.

(iv) *Plant Modernization.* Borrowers will receive 1 point for loan funds included in the application for at least one of the following basic plant modernizations or system improvements:

§ 1735.31

(A) Providing digital switching capabilities where those capabilities did not previously exist; and/or

(B) Upgrading to equal access; and/or

(C) Conversion of service to 1-party making an entire exchange all 1-party service.

(v) *Distance Learning and Medical Link Facilities.* Borrowers will receive 2 points for loan funds included in the application for the purpose of providing distance learning or medical link transmission facilities. If loan funds are included for both distance learning and medical link transmission facilities, borrowers will receive 3 points. (See 7 CFR part 1703 for definitions of distance learning and medical link.)

(vi) *Time Factor.* If a borrower's application has been ranked but cannot be approved due to the lack of funds available for loans in that quarter, the borrower will receive .25 points for each quarter in which its loan is pending but not approved.

(2) *Ranking and approval of loans.* Eligible loan applications (satisfying the requirements of 7 CFR 1737.21) will be ranked during the quarter in which the application is received. If an application is received in which insufficient time remains in that quarter to process and rank the application, it will be ranked in the next quarter. At the beginning of the quarter and as soon as practical, RUS will approve all eligible hardship loans ranked in the previous quarter to the extent loan funds are available, beginning with the borrowers that received the highest number of points and working downwards. Any qualified application that is not approved due to the lack of funds will be carried forward to the next quarter and ranked with all other eligible hardship loan applications in that quarter. Upon completion of the ranking and approval of loans, all borrowers will be informed in writing of the status of their loan applications.

(e) *Optimal use of funds.* RUS retains the right to limit the size of hardship loans made to individual borrowers in order to more equitably distribute the amount of hardship funds appropriated among the greatest number of qualified borrowers. Generally, no more than 10 percent of the funds appropriated in any fiscal year may be loaned to a sin-

7 CFR Ch. XVII (1–1–97 Edition)

gle borrower. In addition, RUS retains the right to approve loans to borrowers that are ranked lower in the priority system, or without regard to when the application was received and ranked, if it is necessary to:

(1) Expedite restoration of service outages due to natural disasters; or

(2) Maximize the use of all available hardship funds appropriated for loans in that fiscal year.

(f) On request of any borrower who is eligible for a hardship loan for which funds are not available, the borrower shall be considered to have applied for concurrent RUS cost-of-money and RTB loans under sections 305 and 408, respectively, of the RE Act.

(g) Hardship loans may be made simultaneously with concurrent RUS cost-of-money and RTB loans or guaranteed loans.

[58 FR 66254, Dec. 20, 1993]

§ 1735.31 RUS cost-of-money and RTB loans.

(a) RUS makes cost-of-money loans, under section 305(d)(2) of the RE Act, concurrently with RTB loans made under section 408 of the RE Act. To qualify for concurrent RUS cost-of-money and RTB loans on or after November 1, 1993, a borrower must meet each of the following requirements:

(1) The average number of proposed subscribers per mile of line in the service area of the borrower is not more than 15, or the borrower has a projected TIER (including the proposed loans) of at least 1.0, but not greater than 5.0, as determined by the feasibility study prepared in connection with the loans, see 7 CFR part 1737, subpart H; and

(2) The Administrator has approved and the borrower is participating in a telecommunications modernization plan for the state, see 7 CFR part 1751, subpart B.

(b) The loan amounts from each program (RUS cost-of-money and RTB, including amounts for class B stock) will be proportionate to the total amount of funds appropriated for the fiscal year for RUS cost-of-money loans and RTB loans. To determine the RUS cost-of-money portion, the total loan amount will be multiplied by the ratio of RUS cost-of-money funds appropriated for the fiscal year to the sum of

Rural Utilities Service, USDA

§ 1735.32

RUS cost-of-money and RTB funds appropriated for the fiscal year in which the loan is approved. The same method would be used to calculate the RTB portion (see 7 CFR 1610.6(b)). If during the fiscal year the amount of funds appropriated changes, the ratio will be adjusted accordingly and applied only to those loans approved afterwards.

(c) The RUS cost-of-money loan shall bear interest as described in paragraphs (c)(1) and (c)(2) of this section (the actual rate of interest on the RTB loan shall be determined as provided in 7 CFR 1610.10):

(1) Each advance of funds included in RUS cost-of-money loans shall bear interest at a rate (the “Cost of Money Interest Rate”) equal to the current cost of money to the Federal Government for loans of a similar maturity. The Cost of Money Rate is determined when the funds are advanced to the borrower but cannot exceed 7 percent per year.

(2) RUS shall use the Federal Treasury Statistical Release (the “Statistical Release”) issued by the United States Treasury to determine the interest rate for each advance of RUS cost-of-money loan funds. Generally, the Statistical Release is issued each Monday to cover the preceding week. RUS shall determine the Cost of Money Interest Rate as follows:

(i) Each advance shall bear the interest rate stated in the applicable Statistical Release for Treasury constant maturities with a maturity similar to that of the advance.

(ii) RUS shall determine the interest rate for an advance bearing a maturity other than those stated in the applicable Statistical Release by straight-line interpolation between the next higher and next lower stated maturities.

(iii) The first Statistical Release published after the date of an advance shall apply to that advance.

(iv) If the interest rate determined under paragraph (c)(2)(i) or (c)(2)(ii) of this section is higher than 7 percent, then the advance shall bear interest at the rate of 7 percent per year.

(v) Advances with maturities greater than 30 years shall bear interest at the rate stated in the applicable Statistical Release for 30-year maturities.

(vi) RUS may use an alternative method to determine the Cost of

Money Interest Rate if the Treasury ceases to issue the Statistical Release or changes its format or frequency of issue so that it is no longer appropriate for use in the manner described in paragraph (c)(2) of this section. In this eventuality, RUS shall immediately notify all borrowers with unadvanced RUS cost-of-money loan funds. RUS may, with the borrower’s consent, determine the Cost of Money Interest Rate on a case-by-case basis for subsequent advances of RUS cost-of-money loan funds but may also decide, in its discretion, that it is unable to continue advancing funds until an alternative method is in effect.

(vii) Refer to § 1735.43(a) for additional information on maturities of RUS loans.

(viii) RUS shall provide borrowers with prompt written confirmation of the Cost of Money Interest Rate borne by each advance of funds included in a RUS cost-of-money loan.

(d) On request of any borrower who is eligible for concurrent RUS cost-of-money and RTB loans for which funds are not available, the borrower shall be considered to have applied for a loan guarantee under section 306 of the RE Act.

(e) Concurrent RUS cost-of-money and RTB loans may be made simultaneously with hardship loans or guaranteed loans.

[58 FR 66255, Dec. 20, 1993]

§ 1735.32 Guaranteed loans.

(a) *General.* Loan guarantees under this section will be considered for only those borrowers specifically requesting a guarantee. Borrowers may also specify that the loan to be guaranteed shall be made by the Federal Financing Bank (FFB). RUS provides loan guarantees pursuant to section 306 of the RE Act. Guaranteed loans may be made simultaneously with hardship loans or concurrent RUS cost-of-money and RTB loans. No fees or charges are assessed for any guarantee of a loan provided by RUS. In view of the Government’s guarantee, RUS generally obtains a first lien on all assets of the borrower (see § 1735.46).

(b) *Requirements.* To qualify for a guaranteed loan, a borrower must have

a projected TIER (including the proposed loan or loans) of at least 1.5 as determined by the feasibility study prepared in connection with the loan. In addition, a borrower must meet all requirements set forth in the regulations applicable to a loan made by RUS with the exception that it is not required to participate in a state telecommunications modernization plan and is not subject to a subscriber per mile eligibility requirement, as provided in § 1735.31(a).

(c) *Net worth requirements.* RUS generally requires that borrowers seeking guaranteed loans have a net worth in excess of 20 percent of assets. For the purpose of this section, the term “net worth” means “Total Retained Earnings or Margins and Capital Credits” plus either “Total Capital Stock Outstanding and Subscribed” or “Total Membership and Capital Certificates” as reported to RUS pursuant to RUS Telecommunications Operations Manual section 1800. RUS will consider loan guarantees for borrowers with a net worth less than 20 percent.

(d) *Full amount guaranteed.* Loans are guaranteed in the full amount of principal and interest. Because of the Government’s full faith and credit 100 percent guarantee of these loans, only RUS obtains a mortgage on the borrower’s assets.

(e) *Federal Register notice.* After RUS has reviewed an application and determined that it shall consider guaranteeing a loan for the proposed project and if the borrower has not specified that the loan be made from the FFB, RUS shall publish a notice in the FEDERAL REGISTER. The Notice will include a description of the proposed project, the estimated total cost, the estimated amount of the guaranteed loan, a statement that the Federal Financing Bank (FFB) has a standing loan commitment agreement with RUS, and the name and address of the borrower to which financing proposals may be submitted.

(f) *Qualified lenders.* RUS considers loan guarantees on a case by case basis for loans made by the FFB and any other legally organized lending agency or by a combination of lenders that the Administrator determines to be qualified to make, hold and service the loan.

“Legally organized lending agency” and “lender” include commercial banks, trust companies, mortgage banking firms, insurance companies, and any other institutional investor authorized by law to loan money. The borrower is responsible for evaluating all proposals received from lenders other than FFB. The borrower furnishes RUS with a report on the evaluations and its choice of proposals. However, at the request of the borrower, the guaranteed loan shall be made by the FFB.

(g) *Interest rate.* Guaranteed loans shall bear interest at the rate agreed upon by the borrower and lender. Guaranteed FFB loans shall be at a rate of interest that is not more than the rate of interest applicable to other similar loans then being made or purchased by FFB.

(h) *Condition of guarantee.* RUS will not guarantee a loan if the income from the loan or the income from obligations issued by the holder of the loan, when the obligations are created by the loan, is excluded from gross income for the purpose of chapter I of the Internal Revenue Code of 1954.

(i) *Contract of guarantee.* If RUS is satisfied with the engineering and economic feasibility of the project and approves the borrower’s choice of proposal, subject to the submission of satisfactory financing documents and to the satisfaction of other pertinent terms and conditions, RUS will prepare a contract of guarantee to be executed by the borrower, the lender, and RUS within a specified time. The lender, or its representative, shall have the right to examine the borrower’s application and supporting data submitted to RUS in support of its request for financial assistance.

(j) *Loan servicing.* The contract of guarantee will require that arrangements satisfactory to RUS be made to service the loan. Required servicing by the lender will include:

(1) Determining that all prerequisites to each advance of loan funds by the lender under the terms of the contract of guarantee, all financing documents, and all related security instruments have been fulfilled. Such determinations may be met by obtaining RUS approval of each advance.

Rural Utilities Service, USDA

§ 1735.43

(2) Billing and collecting loan payments from the borrower.

(3) Notifying the Administrator promptly of any default in the payment of principal and interest on the loan and submitting a report, as soon as possible thereafter, setting forth its views as to the reasons for the default, how long it expects the borrower will be in default, and what corrective actions the borrower states it is taking to achieve a current debt service position.

(4) Notifying the Administrator of any known violations or defaults by the borrower under the lending agreement, contract of guarantee, or related security instruments, or conditions of which the lender is aware which might lead to nonpayment, violation, or other default.

(k) *Payments under the contract of guarantee.* Upon receipt of the notification required in § 1735.32(j)(3) of this section, RUS will pay the lender the amount in default with interest to the date of payment. When RUS has made a payment under a contract of guarantee, it will establish in its accounts the amount of the payment as due and payable from the borrower, with interest at the rate of interest specified in the lending agreement. RUS will work with the borrower and the lender in an effort to eliminate the borrower's default as soon as possible. RUS may also proceed with other remedies available under its security instruments.

(l) *Pledging of contract of guarantee.* Subject to applicable law, RUS will consider, on a case by case basis, permitting pledging of the contract of guarantee in order to facilitate the obtaining of funds by the lending agency to make the guaranteed loan.

[54 FR 13351, Apr. 3, 1989; 54 FR 16194, Apr. 21, 1989. Redesignated at 55 FR 39395, Sept. 27, 1990, as amended at 56 FR 26597, June 10, 1991; 58 FR 66255, Dec. 20, 1993]

§§ 1735.33—1735.39 [Reserved]

Subpart D—Terms of Loans

SOURCE: 54 FR 13351, Apr. 3, 1989, unless otherwise noted. Redesignated at 55 FR 39395, Sept. 27, 1990.

§ 1735.40 General.

Terms and conditions of loans are set forth in a mortgage, note, and loan contract. Provisions of the mortgage and loan contract are implemented by provisions in RUS Bulletins and Regulations. Forms of the mortgage, note, and loan contract can be obtained from RUS.

§ 1735.41 Notes.

Loans are represented by one or more notes. Interest accrues only on funds advanced. There are no loan commitment fees or charges. See RUS Bulletin 320-12 for additional information. This CFR part supersedes those portions of RUS Bulletin 320-12 "Loan Payments and Statements" with which it is in conflict.

§ 1735.42 [Reserved]

§ 1735.43 Payments on Loans.

(a) Borrowers shall, at the time a loan application is submitted, select a loan maturity up to a maximum of 35 years. If the maturity selected exceeds the composite economic life of the facilities to be financed by the loan by a period of more than three years, release of funds included in the loan shall be conditioned upon the borrower electing to either:

(1) Establish and maintain, pursuant to a plan approved by RUS, a funded reserve in such an amount that the balance of the reserve plus the value of the facilities less depreciation shall at all times be at least equal to the remaining principal payments on the loan; or

(2) Maintain a net plant to secured debt ratio of at least 1.2. Secured debt shall mean the total of long term debt and current maturities of long term debt (whether owed to RUS, RTB, or some other creditor) and capital leases.

The loan documents prepared by RUS for the loan will contain the appropriate condition as selected by the borrower. If the funded reserve option is selected, funding of the reserve must begin within one year of approval of release of funds and must continue regularly over the composite economic life of the facilities financed. If net plant to secured debt ratio option is selected,

§ 1735.44

this ratio must be achieved one year following the first advance of loan funds and must be shown in RUS's analysis of the borrower's operating report.

(b) Principal and interest will be repaid in accordance with the terms of the notes. Generally, interest is payable each month as it accrues. Principal payments on each note generally are scheduled to begin 2 years after the date of the note. After this deferral period, interest and principal payments on all funds advanced during this 2-year period are scheduled in equal monthly installments. Principal payments on funds advanced 2 years or more after the date of the note will begin with the first billing after the advance. The interest and principal payments on each of these advances will be scheduled in equal monthly installments. This CFR part supersedes those portions of RUS Bulletin 320-12, "Loan Payments and Statements" with which it is in conflict.

[56 FR 26598, June 10, 1991]

§ 1735.44 Prepayment premiums.

The loan documents normally provide that RUS insured loans may be repaid in full at any time without prepayment premiums. Depending upon the lender, there may be prepayment premiums on loans guaranteed by RUS. See 7 CFR part 1610 for prepayment premiums on RTB loans. See RUS Bulletin 320-12 for additional information. This CFR part supersedes those portions of RUS Bulletin 320-12, "Loan Payments and Statements", with which it is in conflict.

§ 1735.45 Extension of payments.

RUS may extend the time of payment of principal or interest on a loan. Under section 12 of the Rural Electrification Act, as amended, this extension may be up to 5 years after such payment is due. Under section 236 of the Disaster Relief Act of 1970 (Pub. L. 91-606) payment may be deferred by the Secretary of Agriculture as long as necessary in disaster situations so long as the final maturity date is not later than 40 years after the date of the loan. See RUS Bulletin 320-2 for additional information.

7 CFR Ch. XVII (1-1-97 Edition)

§ 1735.46 Loan security documents.

(a) Loans are to be repaid according to their terms. RUS generally obtains a first lien on all assets of the borrower. This lien shall be in the form of a mortgage by the borrower to the Government or a deed of trust made by and between the borrower and a trustee, satisfactory to the Administrator, together with such security agreements, financing statements, or other security documents as RUS may deem necessary in a particular case. Where a borrower is unable by reason of pre-existing encumbrances, or otherwise, to furnish a first mortgage lien on its entire system the Administrator may, if he determines such security to be reasonably adequate and the form and nature thereof otherwise appropriate, accept other forms of security. See RUS Bulletins 320-4, 320-22, 321-2, 322-2, 323-1, and 326-1 for details. See 7 CFR part 1744, subpart B for information on lien accommodations and subordinations.

(b) The standard form of mortgage or other security document required by RUS to secure telephone loans prohibits the borrower from making certain investments or distributions of assets unless, after such action, the borrower's adjusted net worth is at least:

(1) Forty percent of its adjusted assets; or

(2) As an alternative, the sum of ten percent of its adjusted assets plus certain other adjustments specified in the mortgage.

(c) The standard form of telephone mortgage also states that if the borrower's adjusted net worth is at least ten percent of its adjusted assets, the borrower is not required to take or refrain from taking certain actions as set forth in the mortgage.

(d) RUS will apply the ten percent requirement to all telephone borrowers regardless of whether the borrower's existing mortgage sets forth a higher percentage of adjusted net worth to assets for purposes of determining whether the borrower can:

(1) Use the alternative calculation described in paragraph (b)(2) of this section to determine if it can make investments or distributions; or

(2) Take advantage of the benefits described in paragraph (c) of this section.

Rural Utilities Service, USDA

§ 1735.51

(e) A borrower with an adjusted net worth of less than twenty percent of its adjusted assets shall continue to fulfill the requirements of the mortgage relating to reporting its ownership and transfers of its ownership, including capital stock, membership certificates and equity capital certificates.

(f) Any borrower meeting the standard forty percent limitation described in paragraph (b)(1) of this section shall continue to be able to pay dividends or make investments in accordance with the borrower's mortgage.

(g) References to a borrower's mortgage in this section include deeds of trust and any other loan document applying the same requirements to a borrower.

(h) This section does not limit the rights of any parties to the mortgage other than RUS or RTB.

[54 FR 13351, Apr. 3, 1989. Redesignated at 55 FR 39395, Sept. 27, 1990, and amended at 59 FR 29537, June 8, 1994]

§ 1735.47 Rescissions of loans.

(a) Rescission of a loan may be requested by a borrower at any time. To rescind a loan, the borrower must demonstrate to RUS that:

(1) The purposes of the loan being rescinded have been completed;

(2) Sufficient funds are available from sources other than RUS, RTB or FFB to complete the purposes of the loan being rescinded; or

(3) The purposes of the loan are no longer required to extend or improve telephone service in rural areas.

(b) Borrowers submitting loan applications containing purposes previously covered by a loan that has been rescinded shall include in the application an explanation, satisfactory to RUS, of the change of conditions since the rescission that re-establishes the need for those purposes.

(c) RUS shall not initiate the rescission of a loan unless all of the purposes for which telephone loans have been made to the borrower under the Act have been accomplished with funds provided under the Act.

[56 FR 26598, June 10, 1991]

§§ 1735.48—1735.49 [Reserved]

Subpart E—Basic Requirements For Loan Approval

SOURCE: 54 FR 13351, Apr. 3, 1989, unless otherwise noted. Redesignated at 55 FR 39395, Sept. 27, 1990.

§ 1735.50 Administrative findings.

The RE Act requires that the Administrator make certain findings to approve a telephone loan or loan guarantee. The borrower shall provide the evidence determined by the Administrator to be necessary to make these findings. Details on the information required to support these findings are included in 7 CFR part 1737.

§ 1735.51 Required findings.

(a) *Feasibility of and security for the Loan.* The borrower shall provide RUS with satisfactory evidence to enable the Administrator to determine that the security for the loan is reasonably adequate and the loan will be repaid on time. This finding is based on the following factors:

(1) Self-liquidation of the loan within the loan amortization period; this requires that there be sufficient revenues from the borrower's system, in excess of operating expenditures (including maintenance and replacement), to repay the loan with interest.

(2) Reasonable assurance of achieving the telephone market projections upon which the loan is based.

(3) Economic feasibility (based on projected revenues, expenses, net income, maximum debt service, and rate of return on investment) for the proposed system using local service rate schedules appropriate for the area served.

(4) Impact of the proposed loan and construction on the ratio of the borrower's secured debt to assets.

(5) Projected growth in the borrower's equity.

(6) Satisfactory experience and reputation of the system's principal owners and manager.

(7) A first lien on the borrower's total system or other adequate security.

(8) Fair market value of the borrower's assets as represented in its financial reports to RUS.

§ 1735.52

(9) Appropriate financial and managerial controls included in the loan documents.

(10) Other factors determined to be relevant by RUS.

(b) *Area coverage.* The borrower shall provide RUS with satisfactory evidence to enable the Administrator to determine that adequate telephone service will be made available to the widest practical number of rural users during the life of the loan.

(c) *Nonduplication or certificate requirement.* The borrower shall provide RUS with satisfactory evidence to enable the Administrator to determine that no duplication of service shall result from a particular loan for those borrowers not required by the state regulatory commission to have a certificate of convenience and necessity (or its equivalent). For borrowers required to have a certificate of convenience and necessity, all portions of the existing and proposed system must be covered by the certificate.

[54 FR 13351, Apr. 3, 1989. Redesignated at 55 FR 39395, Sept. 27, 1990, as amended at 56 FR 26598, June 10, 1991]

§ 1735.52 Findings required for particular loan purposes.

(a) *Refinancing.* For loans that include funds to refinance outstanding indebtedness of the borrower, the borrower shall provide RUS with satisfactory evidence to enable the Administrator to determine that the inclusion in the loan of such funds shall be necessary and incidental to furnishing or improving telephone service in rural areas. See 7 CFR 1735.21.

(b) *Facilities for nonrural areas.* Whenever a borrower proposes to use loan funds for the improvement, expansion, construction, or acquisition of telephone facilities within or for nonrural areas, the borrower shall provide RUS with satisfactory evidence to enable the Administrator to determine that such funds shall be necessary and incidental to furnishing or improving telephone service in rural areas.

7 CFR Ch. XVII (1–1–97 Edition)

§§ 1735.53–1735.59 [Reserved]

Subpart F—Mortgage Controls on Acquisitions and Mergers

SOURCE: 54 FR 14626, Apr. 12, 1989, unless otherwise noted. Redesignated at 55 FR 39395, Sept. 27, 1990.

§ 1735.60 Specific provisions.

(a) The standard form of RUS mortgage (see 7 CFR part 1758) contains certain provisions concerning mergers and acquisitions:

(1) Article II, section 4(a) requires the borrower to obtain the written approval of the majority noteholders before taking any action to reorganize, or to consolidate with or merge into any other corporation.

(2) Article II, section 4(b), if made applicable, provides certain exceptions to the requirements of section 4(a).

(3) Article II, section 15(c), which applies to each borrower with an adjusted net worth of less than 20 percent of its adjusted assets, sets forth, among other matters, certain requirements in the event of a change in ownership interests of the borrower, which in the sole opinion of the majority noteholders might adversely affect its or their security.

(b) Similar provisions are contained in other forms of documents executed by borrowers that have not entered into the standard form of mortgage.

(c) Mortgages and loan contracts may contain other provisions concerning mergers and acquisitions.

§ 1735.61 Approval criteria.

(a) If a borrower is required by the terms of its mortgage or loan contract to obtain RUS approval of a merger or acquisition, the borrower shall request RUS approval and shall provide RUS with such data as RUS may request.

(b) If loan funds are requested, the borrower shall comply with subpart G of this part. If no additional loan funds are involved, the borrower shall comply with subpart H of this part.

(c) In considering whether to approve the request, RUS will take into account, among other matters:

Rural Utilities Service, USDA

§ 1735.70

(1) Whether the operation, management, and the economic and loan-repayment feasibility characteristics of the proposed system are satisfactory;

(2) Whether the merger or acquisition may result in any relinquishment, impairment, or waiver of a right or power of the Government;

(3) Whether the proposed merger or acquisition is in the best interests of the Government as note holder; and

(4) Whether the proposed purchase price and terms of an acquisition are reasonable, regardless of the source of funds used to pay for the purchase. RUS will consider the purchase price unreasonable if, in RUS's opinion, it will endanger financial feasibility.

§ 1735.62 Approval of acquisitions and mergers.

(a) If a proposal is unsatisfactory to RUS, then RUS shall inform the borrower in writing of those features it considers objectionable and, as appropriate, recommend corrective action.

(b) If a proposal is satisfactory to RUS, then RUS shall inform the borrower in writing of its approval and any conditions of such approval. Among the conditions of approval are the following:

(1) RUS shall require a compensating benefit in return for any relinquishment, impairment, or waiver of its rights or powers.

(2) If the survivor is an affiliate of another company, RUS shall require any investments in, advances to, accounts receivable from, and accounts payable to the affiliated company contrary to mortgage provisions shall be eliminated in a manner satisfactory to the Administrator.

(3) RUS requires that the borrower agree not to extend credit to, perform services for, or receive services from any affiliated company unless specifically authorized in writing by the Administrator or pursuant to contracts satisfactory in form and substance to the Administrator.

(4) RUS may require the borrower to execute additional mortgages, loan agreements, and associated documentation.

§§ 1735.63—1735.69 [Reserved]

Subpart G—Acquisitions Involving Loan Funds

SOURCE: 54 FR 14626, Apr. 12, 1989, unless otherwise noted. Redesignated at 55 FR 39395, Sept. 27, 1990.

§ 1735.70 Use of loan funds.

(a) See 7 CFR part 1735 and 1737 for RUS's general loan policies and requirements.

(b) RUS will finance an acquisition by a borrower only when the acquisition is necessary and incidental to furnishing or improving rural telephone service and the service area is eligible for RUS assistance.

(c) RUS does not make loans for the sole purpose of merging or consolidating telephone organizations. After a merger or consolidation, RUS will consider making loans to the telephone system to finance the improvement or extension of telephone service in rural areas.

(d) Generally, RUS will not make a loan for the acquisition of an existing borrower unless, in addition to all other requirements, such acquisition will improve the likelihood of repayment of an outstanding RUS loan and all outstanding balances of the previous RUS loans are paid in full.

(e) In determining the amount it will lend for each acquisition, RUS shall place a valuation on all telephone facilities that are to be acquired with loan funds. RUS may consider fair market value, the original cost less depreciation of the facilities, income generating potential, any improvement in the financial strength of the borrower as a result of the acquisition, and any other factors deemed relevant by RUS to determine the reasonableness of the acquisition price and the amount of loan funds RUS will provide for an acquisition. RUS shall not consider the acquisition price reasonable or approve a loan if, in the Administrator's opinion, the acquisition price will endanger financial feasibility. If the acquisition price exceeds the amount RUS will lend, the borrower provides the remainder.

§ 1735.71

(f) When a borrower intends to request RUS loan funds for an acquisition, it shall present a proposal in writing to the Area Office as soon as possible. The borrower must either obtain RUS approval prior to making any binding commitments with the seller or make the commitments subject to RUS's approval. Failure to comply with these requirements will disqualify the borrower from obtaining an RUS loan for the acquisition unless the Administrator determines there were extenuating circumstances.

§ 1735.71 Nonrural areas.

Loan funds may be approved for the acquisition and improvement of facilities to serve nonrural subscribers only if the principal purpose of the loan is to furnish and improve rural service and only if the use of loan funds to serve nonrural subscribers is necessary and incidental to the principal purpose of the loan. For example, when the acquisition of an existing system located in and serving a nonrural area is necessary to serve as the nucleus of an expanded system to furnish area coverage service in rural areas, the loan may include funds to finance the acquisition. Approval for the use of loan funds in these circumstances shall be made only on a case by case basis by the Administrator.

§ 1735.72 Acquisition agreements.

When borrowers are seeking RUS financing, acquisition agreements between the borrower and the seller must be in form and substance satisfactory to RUS and shall be expressly conditioned on approval of the agreement by RUS and on obtaining an RUS loan. Normally, the acquisition agreement will not be approved by RUS until the loan has been approved.

§ 1735.73 Loan design.

When loan funds are requested for an acquisition, details of the proposed acquisition shall be included in the Loan Design. See 7 CFR part 1737.

§ 1735.74 Submission of data.

(a) RUS will not approve any acquisition, other than of toll facilities (see subpart J of this part), financed in whole or in part with loan funds until

7 CFR Ch. XVII (1–1–97 Edition)

the borrower submits the following data to the GFR:

(1) For any nonborrowers involved, their most recent balance sheets, operating statements, detail of plant accounts, reports to the state commission, and audits, if available.

(2) Completed RUS Form 507, "Report on Telephone Acquisition," which provides system data, including the type of purchase and purchase price, a system description, and data by exchange. See § 1735.3 for information on obtaining copies of this form.

(3) A map (such as a road map) showing county lines, the boundaries of the proposed acquisition and the borrower's existing service territory, and the names of other telephone companies serving adjoining areas.

(4) A brief statement of the plans for incorporating the acquired facilities into the borrower's existing system.

(5) The number of subscribers currently receiving service in the area to be acquired and the number of new subscribers that will be served over the next 5 years as a result of the acquisition.

(6) The proposed purchase price.

(7) Two copies of any options, bills of sale, or deeds, and four copies of any acquisition agreements. All of these documents are subject to RUS approval. If the acquisition agreement is approved by RUS, two copies of it shall be returned to the borrower.

(8) An appraisal by the borrower's consulting engineer or other qualified person of the physical plant to be acquired. The appraisal shall include the following:

(i) Inspection of each central office, noting the age and condition of the switch and associated equipment, and the extent and quality of maintenance of the equipment and premises.

(ii) Inspection of the outside plant, noting the general age and condition of cable and wire, poles and related hardware, pedestals, and subscriber drops. Any joint use or ownership shall be explained.

(iii) Inspection of miscellaneous items such as commercial office facilities, vehicles, furniture, tools and work equipment, and materials and supplies in stock, noting age and condition.

Rural Utilities Service, USDA

§ 1735.75

(iv) Inspection of all buildings and other structures (such as radio towers), noting age and condition.

(v) Detailed description of all real estate including the present market value that local real estate dealers, bankers, insurance agents, etc., place on the property.

(vi) Any widely accepted method, approved by RUS, may be used to estimate the condition of the facilities in paragraphs (a)(8)(i) through (a)(8)(iv) of this section. The “percent condition” method is recommended, but is not required.

(9) Copies of deeds to real estate to be acquired, with an explanation of the proposed use of the land.

(10) Copies of leases to be acquired.

(11) Copies of any existing mortgages with parties other than RUS, indentures, deeds of trust, or other security documents or financing agreements relating to the property to be acquired and any contracts or other rights or obligations to be assumed as part of the acquisition.

(12) A list of all counties in which the proposed system will have facilities.

(13) If the borrower is a cooperative-type organization, a description of its plans for taking subscribers in as members, membership fees, equity payments required because of the acquisition, and extent of membership support.

(14) A certification, signed by the president of the borrower, that the borrower is participating in the State’s telecommunications modernization plan (for information concerning the plan, see 7 CFR part 1751, subpart B). This certification is not required if the borrower is seeking a guaranteed loan.

(15) Any other data deemed necessary by the Administrator for an evaluation of the acquisition.

(b) For stock acquisitions, the borrower shall submit the following in addition to the items listed in (a) of this section:

(1) A list of all stockholders of the company to be acquired and the number of shares each owns.

(2) Guarantees and indemnifications to be obtained from the sellers of the stock.

(Approved by the Office of Management and Budget under control number 0572-0084)

[54 FR 14626, Apr. 12, 1989. Redesignated at 55 FR 39395, Sept. 27, 1990; 58 FR 66256, Dec. 20, 1993]

§ 1735.75 Interim financing.

(a) A borrower may submit a written request for RUS approval of interim financing if it is necessary to close an acquisition before the loan to finance the acquisition is approved. Loan funds shall not be used to reimburse acquisition costs unless RUS has granted approval of interim financing prior to the closing of the acquisition.

(b) RUS will approve interim financing of acquisitions only in cases where loan funds cannot be made available in time for the closing.

(c) RUS will not approve interim financing unless the following information is acceptable:

(1) A written request for approval of interim financing, including a brief description of the acquisition, an explanation of the urgency of proceeding with the acquisition, and the source of funds to be used.

(2) A completed RUS Form 490, “Application for Telephone Loan or Loan Guarantee.” See 7 CFR part 1737.

(3) The portions of the Loan Design that cover the proposed acquisition, including cost estimates and information on any investments in nonrural areas. See 7 CFR 1737.

(4) The information required in § 1735.74 (a)(1) through (a)(8), (a)(14) and (b)(1).

(5) Any other data deemed necessary by the Administrator to approve the interim financing of the acquisition.

(d) Furthermore, RUS will not approve interim financing if, in RUS’s judgment, the proposed acquisition will not qualify for RUS financing or the proposed interim financing presents unacceptable loan security risks to RUS.

(e) Because RUS approval of interim financing is not a commitment to make a loan, RUS will not approve interim financing unless the borrower is

§ 1735.76

prepared to assume responsibility for financing all obligations incurred.

(f) If the borrower plans to proceed with the closing after receiving RUS approval of interim financing, it must first receive preliminary approval from RUS. See § 1735.90

(g) See 7 CFR part 1737 for regulations on interim financing for construction.

(h) See 7 CFR part 1744, subpart B for conditions under which RUS will provide shared first lien and/or a lien accommodation for non-RUS lenders.

§ 1735.76 Acquisition of affiliates.

A borrower shall not use RUS loan funds to acquire any stock or any telephone plant or an affiliate.

§ 1735.77 Release of loan funds, requisitions, advances.

(a) RUS will not approve the advance of loan funds until the borrower has fulfilled all loan contract provisions to the extent deemed necessary by RUS.

(b) The first advance of loan funds pursuant to the loan contract normally shall provide funds needed for the acquisition. Unless the borrower has received approval of interim financing, it must submit the requisition in time for the advance to be made by the closing date.

(c) After the borrower has closed the acquisition, it shall furnish RUS all documents necessary to demonstrate to RUS's satisfaction that the transaction has been closed.

(d) Advances for improvements or expansion of the acquired facilities will not be approved until RUS has determined that the transaction has been closed and the borrower has obtained satisfactory title to the acquired facilities.

(e) See 7 CFR part 1737 (or RUS Bulletin 320-4) for additional requirements for releases of loan funds and 7 CFR part 1744, subpart C for additional requirements for requisitions and advances.

7 CFR Ch. XVII (1-1-97 Edition)

§§ 1735.78—1735.79 [Reserved]

Subpart H—Acquisitions or Mergers Not Involving Additional Loan Funds

§ 1735.80 Submission of data.

When a borrower is not requesting loan funds for an acquisition or merger, the borrower shall first notify RUS and submit for review by RUS the documents and information listed in (a) through (l) of this section required by RUS.

(a) For any nonborrowers involved, their most recent balance sheets, operating statements, detail of plant accounts, reports to the state commission, and audits, if available.

(b) Completed RUS Form 507, "Report on Telephone Acquisition."

(c) A map (such as a road map) showing county lines, the boundaries of the proposed acquisition and the borrower's existing service territory, and the names of other telephone companies serving adjoining areas.

(d) A brief statement of the plans for incorporating the acquired facilities into the borrower's existing system.

(e) The number of subscribers currently receiving service in the areas involved in the acquisition or merger and the number of new subscribers that will be served over the next 5 years as a result of the acquisition or merger.

(f) Copies of deeds of real estate to be acquired, with an explanation of the proposed use of the land.

(g) Copies of security documents of any other lenders involved and any contracts or other rights of obligations to be assumed by the survivor.

(h) A list of all counties in which the proposed system will have facilities.

(i) If Article II, section 4(b) of the standard mortgage has not been made applicable, plans for operating the unified system.

(j) In the case of a merger, the proposed articles of merger that are to be used.

Rural Utilities Service, USDA

§ 1735.92

(k) In the case of an acquisition, the proposed purchase price, plus two copies of any options, bills of sale, or deeds, and two copies of any acquisition agreements. All of these documents are subject to RUS approval. If the acquisition agreement is approved by RUS, two copies of it shall be returned to the borrower.

(l) Any other data deemed necessary by the Administrator for an evaluation of the acquisition or merger.

(Approved by the Office of Management and Budget under control number 0572-0084)

[54 FR 14626, Apr. 12, 1989. Redesignated at 55 FR 39395, Sept. 27, 1990]

§§ 1735.81—1735.89 [Reserved]

Subpart I—Requirements for All Acquisitions and Mergers

SOURCE: 54 FR 14626, Apr. 12, 1989, unless otherwise noted. Redesignated at 55 FR 39395, Sept. 27, 1990.

§ 1735.90 Preliminary approvals.

(a) In cases where the borrower's schedule for completion of the proposed action leaves insufficient time for RUS to prepare and process the required documentation, including new mortgages and replacement notes, the borrower may request RUS to give preliminary approval to the acquisition or merger. However, the borrower may not obtain additional loan funds until the documentation is completed to RUS's satisfaction.

(b) Consideration of preliminary approvals generally will not be practicable in cases in which compensating benefits are required.

(c) RUS will not give preliminary approval when the lien of the mortgage on after-acquired property may be affected.

(d) Before RUS will grant preliminary approval, the borrower shall submit:

- (1) Merger or acquisition documents required by state law;
- (2) Acquisition agreements covering the transaction;
- (3) Any required franchises, licenses, and permits;
- (4) All required regulatory body approvals;
- (5) All required corporate actions;

(6) Leases, contracts, and evidence of titles to be assigned to the purchaser; and

(7) The latest audited financial statements for any nonborrowers involved.

(e) If the information in (d) of this section is acceptable to RUS, the borrower may proceed with the closing.

(Approved by the Office of Management and Budget under control number 0572-0084)

§ 1735.91 Location of facilities.

Telephone facilities to be acquired must be located so that they can be efficiently operated by the borrower and provide adequate security for the RUS loan.

§ 1735.92 Accounting considerations.

(a) Proper accounting shall be applied to all acquisitions and mergers, as required by the regulatory commission having jurisdiction, or in the absence of such a commission, as required by RUS based on Generally Accepted Accounting Principles or other accounting conventions as deemed necessary by RUS.

(b) If RUS determines that the plant accounts are not properly depreciated, the borrower should adjust its depreciation rates. Depending upon the characteristics of the case, commission jurisdiction and requirements, and similar factors, one of the following actions shall be taken:

(1) In states where commission approval of depreciation rates is required, a covenant shall be included in the loan contract that requires the borrower to:

(i) Have the consulting engineer make an original cost less depreciation inventory and appraisal of retained plant as part of the final inventory, and

(ii) Request commission approval of adjustments to its records on the basis of this inventory.

(2) In states where commission approval is not required, informal discussions between RUS and the borrower may be undertaken to reach satisfactory voluntary adjustments. If this does not resolve the situation to RUS's satisfaction, a covenant similar to that in paragraph (b)(1)(i) of this section shall be included in the loan contract and the borrower shall agree to submit

§ 1735.93

evidence satisfactory to the Administrator that it has adjusted its records on the basis of the inventory.

§ 1735.93 Notes.

Substitute notes may be required in the case of an acquisition or merger, regardless of the source of funds.

§ 1735.94 Final approval and closing procedure.

(a) Legal documents relating to the acquisition or merger, including copies of required franchises, commission orders, permits, licenses, leases, title evidence, corporate proceedings, and contracts to be assigned to the purchaser shall be forwarded to the Area Office prior to closing.

(b) The Administrator will not give final approval to any acquisition or merger until all RUS requirements relating to the transactions are satisfied.

(c) Following the Administrator's final approval of the proposal, the Area Office shall inform the borrower in writing of the necessary legal and other actions required for the advance of loan funds to finance the acquisition, including the submission, in form and substance satisfactory to the Administrator, of (1) all information and documents necessary to demonstrate that the transaction has been completed, and (2) all loan contracts, notes, mortgages, and related documents and materials required by RUS.

(d) Deeds reflecting the change in ownership, executed bills of sale, and opinions of counsel shall be forwarded to the Area Office following closing.

(e) RUS will not advance loan funds to furnish or improve service in the acquired or merged areas until the Administrator has given final approval and the transaction has been closed. RUS may, however, advance funds if it determines that loan security will not be jeopardized.

(f) At the discretion of RUS, a GFR may be present at the closing to assist the borrower and protect the interests of RUS. Under certain circumstances the closing may take place prior to RUS granting final approval for the transaction and the execution of amended loan security documents.

7 CFR Ch. XVII (1–1–97 Edition)

§ 1735.95 Unadvanced loan funds.

(a) The unadvanced loan funds of a borrower that will not be a survivor of an acquisition or merger shall be advanced only to the survivor and only under the following circumstances.

(1) If the funds are to be used for purposes approved in prior loans, the funds shall be advanced after the effective date of the proposed action only when all loan contract prerequisites have been met and documents have been submitted in form and substance satisfactory to the Administrator.

(2) If the funds are to be used for new purposes, then in addition to the requirements in (a)(1) of this section, RUS must also approve the change in purpose.

(b) No loan or other money in the construction fund shall be used to finance facilities outside areas to be served by projects approved by RUS.

§§ 1735.96–1735.99 [Reserved]

Subpart J—Toll Line Acquisitions

§ 1735.100 Use of loan funds.

An acquisition of toll line facilities financed with loan funds must be necessary and incidental, as determined by the Administrator, to furnishing or improving telephone service in rural areas. The borrower shall submit to RUS the acquisition agreement, the original cost less depreciation of the facilities, any concurrences with the connecting companies involved, and a detailed inventory of the facilities to be purchased. The borrower must submit to RUS evidence, satisfactory to the Administrator, of the borrower's ownership of the toll line facilities before loan funds for improvement of those facilities will be advanced.

[54 FR 14626, Apr. 12, 1989. Redesignated at 55 FR 39395, Sept. 27, 1990]

§ 1735.101 With nonloan funds.

When an acquisition is limited to toll line facilities and loan funds are not involved, RUS approval of the acquisition is not required. The borrower, however, shall submit to RUS for its approval all concurrences with the connecting companies involved and any

Rural Utilities Service, USDA

other proof of ownership of the toll facilities required by RUS.

Subpart F—Review of Application Procedures

1737.50 Review of completed loan application.

1737.51 Approval of loan design.

1737.52—1737.59 [Reserved]

Subpart G—Project Cost Estimation Procedures

1737.60 Telephone loan budget.

1737.61 Cost allocation for rural and nonrural areas.

1737.62—1737.69 [Reserved]

§ 1737.1

Subpart H—Feasibility Determination Procedures

1737.70 Description of feasibility study.

1737.71 Interest rate to be considered for the purpose of assessing feasibility for loans.

1737.72—1737.79 [Reserved]

Subpart I—Characteristics Letter

1737.80 Description of characteristics letter.

1737.81—1737.89 [Reserved]

Subpart J—Final Loan Approval Procedures

1737.90 Loan approval requirements.

1737.91 Approval.

1737.92 Loan documents.

1737.93—1737.99 [Reserved]

Subpart K—Release of Funds Procedure

1737.100 Prerequisites to the release and advance of funds.

1737.101 Amounts spent for preloan activities.

1737.102—1737.109 [Reserved]

AUTHORITY: 7 U.S.C. 901 *et seq.*; 7 U.S.C. 1921 *et seq.*; Pub. L. 103-354, 108 Stat. 3178 (7 U.S.C. 6941 *et seq.*).

SOURCE: 54 FR 13356, Apr. 3, 1989, unless otherwise noted. Redesignated at 55 FR 39396, Sept. 27, 1990.

EDITORIAL NOTE: Nomenclature changes to part 1737 appear at 55 FR 39397, Sept. 27, 1990.

Subpart A—General

§ 1737.1 General statement.

(a) This part prescribes policies, procedures and responsibilities relating to applications for RUS loans to finance the improvement and extension of telephone service in rural areas. Requirements for both initial and subsequent loans are discussed, with differences pointed out.

(b) This part sets forth the policies, procedures, and requirements of RUS during the period from the receipt of a completed loan application until the advance of funds. This part sets forth the factors RUS considers in determining the characteristics of a loan, such as the amount of the loan, and conditions to the advance of funds. Involved in this determination are:

A loan budget, feasibility study, characteristics letter, loan recommendation, and release of funds. This CFR part supersedes all RUS Bulletins that are in conflict with it.

§ 1737.2

7 CFR Ch. XVII (1–1–97 Edition)

(c) See 7 CFR part 1735 on general loan policies, 7 CFR part 1737 for details on submitting a loan application, and 7 CFR part 1744 on the advance of funds.

§ 1737.2 Definitions.

As used in this part:

Access line means a transmission path between user terminal equipment and a switching center that is used for local exchange service. For multiparty service, the number of access lines equals the number of lines/paths terminating on the mainframe of the switching center.

Acquisition means the purchase of another telephone system, lines, or facilities whether by acquiring telephone plant in service or majority stock interest of one or more organizations.

Administrator means the Administrator of RUS.

Area Coverage means the provision of adequate telephone service to the widest practical number of rural users during the life of the loan.

Advance of funds means the transferring of funds by RUS to the borrower's construction fund.

Borrower means any organization which has an outstanding loan made or guaranteed by RUS, on which is seeking such financing.

Characteristics letter means the letter informing the borrower of the characteristics of the proposed loan before the loan is recommended.

Feasibility study means the pro forma financial analysis performed by RUS to determine the economic feasibility of a loan.

Forecast period means the time period beginning on the date (base date) of the borrower's balance sheet used in preparing the feasibility study and ending on a date equal to the base date plus the number of years estimated in the feasibility study for the completion of the project. Feasibility projections are usually for 5 years, see § 1737.70(a). For example, the forecast period for a loan based on a December 31, 1990 balance sheet and having a 5-year estimated project completion time is the period from December 31, 1990 to December 31, 1995.

Guaranteed loan means a loan guaranteed by RUS under section 306 of the

RE Act bearing interest at a rate agreed to by the borrower and the lender.

Hardship loan means a loan made by RUS under section 305(d)(1) of the RE Act bearing interest at a rate of 5 percent per year.

Initial loan means the first loan made to a borrower.

Interim construction means the purchase of equipment or the conduct of construction under an RUS-approved plan of interim financing.

Interim financing means funding for a project which RUS has acknowledged will be included in a loan, should said loan be approved, but for which RUS loan funds have not yet been made available.

Loan means any loan made or guaranteed by RUS.

Project means the improvements and telephone facilities financed by a particular RUS loan.

RE Act means the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 et seq.).

RUS cost-of-money loan means a loan made under section 305(d)(2) of the RE Act bearing an interest rate as determined under 7 CFR 1735.31(c). RUS cost-of-money loans are made concurrently with RTB loans.

Release of funds means determination by RUS that a borrower has complied with all of the conditions prerequisite to the advances as set forth in the loan contract to the extent deemed necessary by RUS for approval of the use of loan funds and any required equity or other nonloan funds.

Reserves means loan or nonloan funds that have not been encumbered. Funds are encumbered when they have been set aside for by RUS for a particular loan purpose.

RTB loan means a loan made by the Rural Telephone Bank (RTB) under section 408 of the RE Act bearing an interest rate as determined under 7 CFR 1610.10. RTB loans are made concurrently with RUS cost-of-money loans.

Rural area means any area of the United States, its territories and possessions (including any area within the Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau) not included

Rural Utilities Service, USDA

§ 1737.11

within the boundaries of any incorporated or unincorporated city, village or borough having a population exceeding 5,000 inhabitants. The population figure is obtained from the most recent data available, such as from the Bureau of the Census and Rand McNally and Company. For purposes of the “rural area” definition, the character of an area is determined as of a time the initial loan for the system is made.

Special project means facilities involving investment in excess of \$100,000 for any single subscriber.

Subscriber means the same as access line.

Subsequent Loan means any loan to a borrower which has already received a loan.

Telephone service means any communication service for the transmission or reception of voice, data, sounds, signals, pictures, writing, or signs of all kinds by wire, fiber, radio, light, or other visual or electromagnetic means and includes all telephone lines, facilities and systems to render such service. It does not mean:

- (1) Message telegram service;
- (2) Community antenna television system services or facilities other than those intended exclusively for educational purposes; or
- (3) Radio broadcasting services or facilities within the meaning of section 3(o) of the Communications Act of 1934, as amended.

Times Interest Earned Ratio (TIER) means the ratio of a borrower’s net income (after taxes) plus interest expense, all divided by interest expense. For the purpose of this calculation, all amounts will be annual figures and interest expense will include only interest on debt with a maturity greater than one year.

[54 FR 13356, Apr. 3, 1989. Redesignated at 55 FR 39396, Sept. 27, 1990, as amended at 56 FR 26598, June 10, 1991; 58 FR 66256, Dec. 20, 1993]

§ 1737.3 Availability of RUS forms.

Single copies of RUS forms and publications cited in this part are available from Administrative Services Division, Rural Utilities Service, United States Department of Agriculture, Washington, DC 20250. These RUS forms and publications may be reproduced. The terms “RUS form”, “RUS standard

form”, and “RUS specification” have the same meanings as the terms “REA form” “REA standard form”, and “REA specification”, respectively, unless otherwise indicated.

[54 FR 13356, Apr. 3, 1989. Redesignated at 55 FR 39396, Sept. 27, 1990, and amended at 59 FR 66441, Dec. 27, 1994]

§§ 1737.4—1737.9 [Reserved]

Subpart B—Preapplication Stage

§ 1737.10 Initial contact.

Initial loan applicants seeking assistance should write the Rural Utilities Service, United States Department of Agriculture, Washington, DC 20250. A field representative will be assigned by RUS to visit the applicant and discuss its financial needs and eligibility. Existing borrowers initiate the contact directly with their assigned field representative. Borrowers consult with RUS field representatives and headquarters staff, as necessary.

§ 1737.11 Preapplication determinations.

Before submitting an application to RUS, the borrower should consider the following:

(a) *Area to be served.* The proposed service area should neither include subscribers already receiving adequate service from another telephone system nor leave out unserved pockets of potential subscribers who have indicated an interest in service and are located between the proposed system and neighboring systems. See 7 CFR 1735.11 on Area Coverage and 7 CFR 1735.12 on Nonduplication. In establishing service area boundaries, borrowers should consider the location of adjoining systems, natural boundaries such as rivers and mountains, and economic and cultural features such as trading and community centers.

(b) *Number of subscribers.* The borrower must estimate the number of subscribers that will request service from the proposed system.

(c) *Acquisitions.* A borrower considering an acquisition should refer to 7 CFR 1735.20 and RUS Bulletins 320–4, 321–2, 325–1, and 326–1.

§ 1737.21

(d) *Mergers and consolidations.* A borrower considering a merger or consolidation should refer to 7 CFR 1735.19.

(e) *Refinancing.* Restrictions on the use of loan funds for refinancing are contained in 7 CFR 1735.21.

(f) *Service for nonrural subscribers.* In some situations, RUS loan funds may be used to finance facilities to serve nonrural subscribers. See 7 CFR 1735.13.

(g) *Loan amount.* The initial loan request is based on the borrower's best estimate of financing needs. RUS requires detailed studies by the borrower to complete the application and the initial estimate is subject to revision.

(h) *Loans for a portion of a system.* If it is impractical to finance facilities to provide adequate service throughout the borrower's entire telephone service area, RUS will consider a loan application to finance improvements to a portion of a borrower's system.

(i) *Telecommunications modernization plan.* A borrower applying for hardship or concurrent RUS cost-of-money and RTB loans should refer to 7 CFR part 1751, subpart B.

[54 FR 14626, Apr. 12, 1989. Redesignated at 55 FR 39395, Sept. 27, 1990, as amended at 58 FR 66256, Dec. 20, 1993]

§§ 1737.12—1737.19 [Reserved]

Subpart C—The Loan Application

§ 1737.20 [Reserved]

§ 1737.21 The completed loan application.

(a) The completed loan application consists of four parts:

- (1) A completed RUS Form 490.
- (2) A market survey called the Area Coverage Survey (ACS).
- (3) The plan and associated costs for the proposed construction, called the Loan Design (LD).

(4) Various supplementary information specified in 7 CFR 1737.22.

(b) The RUS field representative assists the borrower in assembling this information. Certain information is required from initial loan applicants but usually not from borrowers seeking subsequent loans. Borrowers are to submit all information in paragraph (a) of this section to their RUS field representatives, who will review and then

7 CFR Ch. XVII (1–1–97 Edition)

forward the packages to RUS headquarters.

(c) RUS will make a determination of completeness of the application package and will notify the borrower of this determination within 10 working days of receipt of the information at RUS headquarters. If the application package is not complete, RUS will notify the borrower of what information is needed in order to complete the application package. If the information required to complete the application package is not received by RUS within 90 working days from the date the borrower was notified of the information needed, RUS may return the application package to the borrower. Returned applications are without prejudice and borrowers may resubmit the completed application.

(Approved by the Office of Management and Budget under control number 0572–0079)

[54 FR 13356, Apr. 3, 1989. Redesignated at 55 FR 39396, Sept. 27, 1990, as amended at 56 FR 26598, June 10, 1991]

§ 1737.22 Supplementary information.

RUS requires additional information in support of the loan application form. The information listed in paragraphs (a), (b), and (c) of this section must be submitted as part of the loan application as specified in 7 CFR 1737.21.

(a) The following must be submitted by all initial loan applicants. Borrowers seeking subsequent loans must submit any changes in these items since they were last submitted.

(1) Name of attorney and manager, and certified copies of board resolutions selecting them.

(2) Certified copy of articles of incorporation showing evidence of filing with the Secretary of State and in county records.

(3) Certified copies of bylaws and board minutes showing their adoption.

(4) Certified sample stock certificates.

(5) Amounts of common and preferred stock issued and outstanding.

(6) Names, addresses, business affiliations, and stockholdings of the manager, officers, directors, and other principal stockholders (those owning at least 20 percent of borrower's voting stock).

Rural Utilities Service, USDA

§ 1737.22

(7) Certified copies of real estate deeds showing all recording information.

(8) Service agreements, such as for management or system maintenance.

(9) Certified copies of existing leases, except those for vehicles, furniture and office equipment, and computer equipment.

(10) Certified copies of existing franchises.

(11) Information on any franchises required as a result of the proposed loan project.

(12) Federal Communications Commission (FCC) authorizations.

(13) Certified copy of a certificate of convenience and necessity (or its equivalent), or information demonstrating the nonduplication of reasonably adequate facilities, for all areas in the loan project.

(14) For toll, operator office, traffic, and EAS agreements, the names of all parties to the agreement, the type of agreement, and the effective and termination dates of the agreement and annexes, and the exchanges involved.

(15) Copies of rate schedules. (A copy of the tariff must be available for review by the RUS field representative.)

(16) Executed copy of RUS Form 291, "Certification of Nonsegregated Facilities".

(17) A sketch or map showing the existing and proposed service areas.

(18) Executed assurance that the borrower will comply with the Uniform Relocation Assistance and Real Property Acquisitions Policies Act of 1970, as amended (see 49 CFR 24.4).

(19) A certification (which is included on RUS Form 490, "Application for Telephone Loan or Guarantee") that the borrower has been informed of the collection options listed below that the Federal government may use to collect delinquent debt. RUS and other government agencies are authorized to take any or all of the following actions in the event that a borrower's loan payments become delinquent or the borrower defaults (OMB Circular A-129 defines "delinquency" for direct or guaranteed loans as debt more than 31 days past due on a scheduled payment):

(i) Report the borrower's delinquent account to a credit bureau.

(ii) Assess additional interest and penalty charges for the period of time that payment is not made.

(iii) Assess charges to cover additional administrative costs incurred by the Government to service the borrower's account.

(iv) Offset amounts owed to the borrower under other Federal programs.

(v) Refer the borrower's debt to the Internal Revenue Service for offset against any amount owed to the borrower as an income tax refund.

(vi) Refer the borrower's account to a private collection agency to collect the amount due.

(vii) Refer the borrower's account to the Department of Justice for litigation in the courts.

(20) A certification, signed by the president of the borrower, that the borrower is participating in the State's telecommunications modernization plan (for additional information concerning the plan, see 7 CFR part 1751, subpart B). This certification is not required if the borrower is seeking a guaranteed loan.

All of the actions in paragraph (a)(19) of this section can and will be used to recover any debts owed when it is determined to be in the interest of the Government to do so. The notification and the required form of certification in paragraph (a)(19) of this section are included on RUS Form 490, Application for Telephone Loan or Guarantee.

(b) The following must be submitted by all initial loan applicants and borrowers seeking subsequent loans:

(1) Certified financial statements for the last 3 years.

(2) Toll settlement statements and related data.

(3) Present exchange rates and any pending changes.

(4) Borrower's Environmental Report (BER)—See 7 CFR part 1794.

(5) A "Certification Regarding Lobbying" for loans, or a "Statement for Loan Guarantees and Loan Insurance" for loan guarantees, and when required, an executed Standard Form LLL, "Disclosure of Lobbying Activities," (see section 319, Public Law 101-121 (31 U.S.C. 1352)).

(6) Executed copy of Form AD-1047, "Certification Regarding Debarment, Suspension, and Other Responsibility

§ 1737.30

Matters—Primary Covered Transactions” (see appendix A to 7 CFR part 3017).

(7) Borrower’s determination of loan maturity, including information noted in § 1735.43(a) of this chapter as required.

(8) Approved depreciation rates for items under regulatory authority jurisdiction.

(9) A statement that the borrower is or is not delinquent on any Federal debt, such as income tax obligations or a loan or loan guarantee from another Federal agency. If delinquent, the reasons for the delinquency must be explained and RUS will take such explanation into consideration in deciding whether to approve the loan. RUS Form 490, “Application for Telephone Loan or Guarantee,” contains a section for providing the required statement and any appropriate explanation.

(10) Any other supporting data required by the Administrator.

(c) The following must be submitted for all borrowers requesting funds for refinancing:

(1) Copies of all bonds, notes, mortgages, and contracts covering outstanding indebtedness proposed to be refinanced.

(2) For each note or bond, the name of the creditor, original amount of debt and amount as of last year-end, purpose of debt, dates incurred and due, interest rates, and repayment terms.

(3) Justification for refinancing and evidence that the use of loan funds is necessary and incidental to furnishing or improving rural telephone service. See 7 CFR 1735.21.

(d) Borrowers requesting loan funds for acquisitions should refer to RUS bulletins 320–4, 321–2, 325–1, and 326–1 for requirements.

(Approved by the Office of Management and Budget under control number 0572–0079)

[54 FR 13356, Apr. 3, 1989. Redesignated at 55 FR 39396, Sept. 27, 1990, as amended at 56 FR 26599, June 10, 1991, 58 FR 66256, Dec 20, 1993]

7 CFR Ch. XVII (1–1–97 Edition)

§§ 1737.23–1737.29 [Reserved]

Subpart D—Preloan Studies—Area Coverage Survey and Loan Design

§ 1737.30 General.

In support of a loan application, the borrower shall prepare and submit to RUS: (a) A market forecast to determine service requirements (the Area Coverage Survey) and (b) engineering studies to determine the system design that provides service most efficiently (the Loan Design). The RUS field representative confers with the borrower and its engineer to schedule the completion and submission of these studies.

(Approved by the Office of Management and Budget under control number 0572–0079)

§ 1737.31 Area Coverage Survey (ACS).

(a) The Area Coverage Survey (ACS) is a market forecast of service requirements of subscribers in a proposed service area.

(b) The objective of the ACS is to determine the location, number and telephone service requirements of subscribers in a service area. RUS will use the ACS to appraise the proposed plan for area coverage and to determine the largest practical number of rural subscribers which can be served on an economically feasible basis. Preparation of the ACS requires:

(1) A field survey of the service area to locate and identify on maps all business and residential establishments, whether currently served or not. The location and identification of future establishments are also recorded on the maps.

(2) A forecast of the number of telephone subscribers, in the entire service area, by exchange, grade and class of service, projected for the end of the 5-year study period.

(c) The results of the survey and forecast shall be:

(1) Shown on maps (maps for those service areas previously financed by

Rural Utilities Service, USDA

§ 1737.32

RUS do not have to be included in the ACS provided that the borrower's records contain sufficient information as to subscriber development to enable cost estimates for the proposed facilities to be prepared);

(2) Tabulated on RUS Form 569 "Area Coverage Survey Report," or its equivalent; and

(3) supported by a narrative (see § 1737.32(f)(1)(ii)) containing information on the bases for the service requirement forecasts in each exchange.

(d) Guidelines on preparing an ACS are provided in RUS Telecommunications Engineering and Construction Manual section 205.

(e) The RUS field representative reviews and approves the borrower's ACS. The borrower should make sure this is done before proceeding with the Loan Design in order to prevent unnecessary expense should the ACS not be approved. The borrower's engineer must use the RUS-approved ACS in preparing the Loan Design.

(Approved by the Office of Management and Budget under control number 0572-0079)

§ 1737.32 Loan design (LD).

(a) A loan application requires supporting data collectively called a "Loan Design." The LD contains a forecast of service requirements and a narrative with supporting exhibits. Most of the items included in the LD are similar for all loan applications. However, as noted below, there are certain additional requirements for initial loans and for any exchange areas not previously financed by RUS, and other additional requirements for subsequent loans for areas previously financed by RUS. The LD must conform to the borrower's state telecommunications modernization plan unless the borrower is seeking a guaranteed loan (for additional information concerning the plan, see 7 CFR part 1751, subpart B).

(b) Because of the importance and complexity of the engineering studies necessary for the LD, it should be prepared by a competent experienced telecommunications engineer. While the LD is subject to RUS approval, the borrower's selection of an engineer to perform preloan work is not. Note: The borrower's selection of an engineer to perform postloan work is subject to

RUS approval. This should be considered when selecting a preloan engineer, if the same individual or company is to perform both services. See 7 CFR 1753.17.

(c) An LD for initial loans or for any exchange areas not previously financed by RUS requires an Outside Plant Design that provides:

(1) The most economical and practical design for a telephone system that meets immediate service demands; and

(2) The basis for orderly expansion of the system to serve the widest practical number of rural establishments.

(d) The LD for a subsequent loan (which only includes areas previously financed by RUS) does not require a detailed Outside Plant Design. The detailed Outside Plant Design for these subsequent loans may be completed for RUS review and approval after loan approval, but before staking is started and plans and specifications are prepared. By scheduling preparation of the outside plant design closer to preparation for construction, the need for redesign resulting from changing conditions and its attendant costs are reduced.

(e) Guidelines on preparing an LD are provided in RUS Telecommunications Engineering and Construction Manual section 205.

(f) The LD shall include a narrative, several exhibits, and a certification, as explained below:

(1) *Narrative.* This section discusses the following topics, as appropriate.

(i) *General.* The purposes and amount of the proposed construction and both immediate and long range plans must be covered. The source and amount of any nonloan funds to be used for this construction must be discussed.

(ii) *Subscriber data.* The basis for the subscriber forecast, including any unusual factors expected to influence growth, must be discussed. Reasons for growth projections which vary from historic trends must be explained.

(iii) *Proposed construction.* All proposed construction must be described fully. Reference to the BER must be made here.

(iv) *Service area.* For subsequent loans only, proposed construction which is not within the boundaries of prior loan

projects must be discussed. New areas to be served (even if from existing exchanges) must be shown on maps submitted with the proposal.

(v) *Toll and EAS*. Proposed new toll or extended area service (EAS) facilities, including any changes from the existing trunking arrangements, must be described fully. Minutes of meetings and correspondence with connecting companies, and connecting company concurrences, if any, must be included.

(vi) *Radio telephone service*. Proposed radio telephone service must be discussed. Results of studies demonstrating demand and/or need must be included as an exhibit.

(vii) *Special projects*. Facilities involving investment in excess of \$100,000 for any single subscriber must be discussed fully. Contractual arrangements with the subscriber, including a termination agreement providing for (A) the full recovery by the borrower of its capital costs of the facilities no later than the maturity date of the note representing the loan, (B) the immediate repayment of all remaining capital costs, if terminated, and (C) repayment to RUS of the outstanding amount of the special note shall be submitted. Usually a separate short-term note is prepared for loans to finance Special Projects.

(viii) *Investment in nonrural areas*.

(A) For initial loans, or loans for areas not previously financed by RUS, the borrower must fully discuss proposed improvements or expansions in an exchange serving a community over 5,000 population. The name of the community, the number of existing and projected new subscribers by grades of service within the community, detailed cost estimates of the facilities involved, and information sufficient to establish the necessity for the use of loan funds must be provided.

(B) For subsequent loans, the borrower must fully discuss as specified in paragraph (f)(1)(viii)(A) of this section proposed improvements or expansions in an exchange serving a community over 5,000 population which had a population of more than 5,000 at the time the facilities to serve the community were first financed by RUS. The population determination is based on the corporate limits or boundaries of unincorporated areas in existence at the

time the facilities to serve the community were first financed by RUS.

(C) For subsequent loans, the borrower shall state whether the population of a community, which is currently more than 5,000, was considered rural at the time RUS first financed the facilities to serve the community. Detailed cost estimates are not required if the population was considered rural at the time RUS first financed facilities to serve the community, see 7 CFR 1735.13(d).

(ix) *Prior loan project*. For subsequent loans only, the reason for and amount of additional loan funds needed to complete construction in progress which was part of a prior loan project in central office areas not included in the current LD must be discussed fully.

(x) *Route miles*. Route miles of outside plant in central office areas not shown on RUS Form 495 must be provided.

(xi) *Future plans*. Where the loan application is to finance part of a system-wide upgrading plan, plans for those remaining exchanges not included in the current loan proposal must be discussed.

(2) *Exhibits*. (i) An RUS Form 569, "Area Coverage Survey Report," or its equivalent shall be included for the total system and for each exchange in which system improvements or additions are proposed.

(ii) An RUS Form 495, "Construction Cost Estimates," or its equivalent shall be prepared for each exchange in which system improvements or additions are proposed. An explanation of the method used in developing these cost estimates must be included.

(iii) RUS Form 494, "Loan Design Summary," or its equivalent shall be prepared for each loan. This must show all expected 5-year construction costs, loan and nonloan.

(iv) A schematic trunking diagram shall be included showing the number and type, length, ownership and make-up of existing and proposed toll and EAS trunks, plus transmission and traffic data for each trunk group.

(v) Detailed outside plant design maps must be submitted for all central office areas of initial loan applicants and for areas not previously served by existing borrowers or financed by RUS.

Rural Utilities Service, USDA

§ 1737.41

These design maps must be in sufficient detail to substantiate the construction cost estimates.

(vi) For subsequent loans only, if a change in system boundaries is proposed, a map must be furnished showing present and proposed boundaries, and existing establishments and subscribers in the new areas.

(vii) Any other special exhibits needed to support particular items in the loan proposal must be included.

(3) *Certification.* The following certification shall be signed by a principal of the engineering firm and the borrower:

We, the undersigned, certify that the data in this Loan Design are correct to the best of our knowledge and belief and reasonably reflect the cost to serve the subscribers as proposed on the Forms 569, "Area Coverage Survey Report," which are integral parts hereof, and that this Loan Design adheres to RUS engineering and construction standards and practices.

(g) The RUS field representative shall review and make a recommendation on each LD.

(1) After completion of the LD, the borrower arranges a meeting with its engineer and RUS's field representative to review:

(i) Design and cost estimates.

(ii) Reserves available from prior loans, if any, or internally generated funds which may be applied against the requirements of the current application.

(2) One copy of RUS Form 567, "Checklist for Review of Loan Design," completed and signed by the borrower's engineer must be attached to the LD submitted to the RUS field representative.

(3) The RUS field representative recommends acceptance of the LD as the basis for RUS financing.

(4) Three copies of the final LD with the RUS field representative's recommendation are then sent to the relevant Area Office in RUS. A fourth copy is retained by the RUS field representative.

(5) A transmittal letter from the borrower must accompany the LDs, requesting that the application previously submitted be amended so as to be consistent with the approved LD.

(6) Final approval of the LD is given by the relevant Area Office in RUS. To

be approved, the LD must be cost effective, include appropriate technology, and provide area coverage.

(7) Upon receipt of the LD and any other required information, RUS makes a preliminary analysis of the loan proposal. Before final consideration of the loan, RUS reviews the results of its preliminary analysis with the borrower.

(Approved by the Office of Management and Budget under control number 0572-0079)

[54 FR 13356, Apr. 3, 1989; 54 FR 16194, Apr. 21, 1989. Redesignated at 55 FR 39396, Sept. 27, 1990; 58 FR 66256, Dec. 20, 1993]

§§ 1737.33—1737.39 [Reserved]

Subpart E—Interim Financing of Construction of Telephone Facilities

§ 1737.40 General.

(a) Under special circumstances a borrower may request that RUS approve interim financing for interim construction. This subpart describes the circumstances in which RUS will consider approving interim financing of construction, the information to be submitted to RUS to support the borrower's request, RUS's requirements relating to interim construction, and related matters.

(b) For a borrower to preserve the option of obtaining loan funds for reimbursement of interim financing, it must obtain prior RUS approval of its interim financing plan and follow the procedures in 7 CFR 1737.41 and 7 CFR 1737.42.

(c) RUS will approve interim financing only for projects which must be performed immediately.

(d) RUS approval of interim financing is not a commitment that RUS will make loan funds available.

(e) Equal employment opportunity requirements apply to interim construction. See RUS Bulletin 320-15.

§ 1737.41 Procedure for obtaining approval.

(a) The borrower shall submit to the RUS Area Office a written request for approval of interim financing. This request shall include:

§ 1737.42

(1) A description of the construction proposed under interim financing.

(2) An explanation of the urgency of proceeding with the proposed construction.

(3) An estimate of the cost.

(4) The source of funds to be used for interim financing.

(b) RUS will not approve interim financing until it has reviewed and found acceptable:

(1) All of the information required under § 1737.21; or

(2) The following documents:

(i) The loan application (RUS Form 490) clearly marked “in support of interim financing request.”

(ii) The Loan Design (LD), or the portion thereof that covers the proposed construction if the completed LD is not available. See 7 CFR 1737.32.

(iii) Evidence that the borrower has satisfied the requirements of 7 CFR part 1794 applying to the proposed interim construction.

(iv) A statement that the borrower is or is not delinquent on any Federal debt, such as income tax obligations or a loan guarantee from another Federal agency. If delinquent, the reasons for the delinquency must be explained and RUS will take such explanation into consideration in deciding whether to approve the interim financing, see 7 CFR 1737.22(b)(9).

(v) A “Certification Regarding Lobbying” for loans, or a “Statement for Loan Guarantees and Loan Insurance” for loan guarantees, and when required, an executed Standard Form LLL, “Disclosure of Lobbying Activities,” (see section 319, Pub. L. 101-121 (31 U.S.C. 1352)).

(vi) Executed copy of Form AD-1047, “Certification Regarding Debarment, Suspension, and Other Responsibility Matters—Primary Covered Transactions” (see appendix A to 7 CFR part 3017).

(vii) Any other supporting data required by the Administrator.

(c) RUS will not approve a borrower’s request for approval of interim financing if, in RUS’s judgment:

(1) The proposed interim financing does not comply with the requirements of this subpart.

(2) The proposed interim construction will not qualify for RUS financing.

7 CFR Ch. XVII (1-1-97 Edition)

(3) The proposed interim financing presents unacceptable loan security risks to RUS, or otherwise is not in the best interests of RUS.

(Approved by the Office of Management and Budget under control number 0572-0079)

[54 FR 13356, Apr. 3, 1989. Redesignated at 55 FR 39396, Sept. 27, 1990, as amended at 56 FR 26599, June 10, 1991; 59 FR 54381, Oct. 31, 1994]

§ 1737.42 Procedure for construction.

(a) If RUS approves the interim financing, interim construction shall be conducted in accordance with 7 CFR Part 1753, 7 CFR 1788, RUS Bulletin 320-15, and RUS Bulletins 381-1, 381-2, 381-4, 381-7, 381-8, 381-9, 381-10, 381-11, 381-13, 382-1, 382-2, 382-3, 383-1, 383-4, 384-1, 384-2, 384-3, 385-1, 385-2, 385-3, 385-4, 385-5, 385-6, 387-1, 387-2, 387-3, 387-4, and 387-5) except for the following:

(1) All sellers and contractors invited to bid must be informed that funds from sources other than RUS will be used to pay for construction.

(2) Contracts involving the interim construction must contain a provision, in form and substance satisfactory to RUS, stating that RUS is not committed to lend or advance funds to finance the project.

(3) Contracts will not be approved by RUS until the borrower demonstrates to RUS’s satisfaction that funds from sources other than RUS will be available when needed to pay invoices submitted in accordance with contract payment terms.

(4) The borrower shall not begin interim construction until all necessary licenses, permits, and other governmental approvals have been obtained.

(b) After RUS loan funds are released, the borrower can obtain reimbursement for interim financing by submitting a Financial Requirement Statement. See 7 CFR Part 1744, subpart C (or RUS Bulletin 327-1).

(1) The first advance of loan funds to a borrower that has received interim financing approval generally will be limited to funds to repay any interim financing indebtedness and such additional amounts as RUS deems necessary. RUS will make no further advances of loan funds until the borrower has submitted evidence, in form and

Rural Utilities Service, USDA

§ 1737.60

substance satisfactory to the Administrator, that (i) any indebtedness created by the interim financing and any liens associated therewith have been fully discharged of record and (ii) the borrower has satisfied all other conditions on the advance of additional loan funds.

(2) If the source of funds for interim financing is the borrower's internally generated funds, the borrower may request reimbursement of those funds along with advances for other purposes on the first Financial Requirement Statement.

[54 FR 13356, Apr. 3, 1989; 54 FR 16194, Apr. 21, 1989. Redesignated at 55 FR 39396, Sept. 27, 1990]

§§ 1737.43—1737.49 [Reserved]

Subpart F—Review of Application Procedures

§ 1737.50 Review of completed loan application.

(a) The completed loan application consists of:

(1) A completed RUS Form 490, "Application for Telephone Loan or Loan Guarantee;"

(2) A completed certification Form AD-1047, "Certification Regarding Debarment, Suspension, and Other Responsibility Matters—Primary Covered Transactions," (see appendix A to 7 CFR part 3017);

(3) A market survey called the Area Coverage Survey (ACS);

(4) The plan and associated costs for the proposed construction, called the Loan Design (LD);

(5) Evidence that the borrower is participating in a telecommunications modernization plan in the state where the proposed construction will occur, unless the borrower is seeking a guaranteed loan; and

(6) Various supplementary information.

See 7 CFR part 1737 for additional information.

(b) RUS shall review the completed loan application, particularly noting subscriber data, grades of service, extended area service (EAS), connecting company commitments, commercial facilities, system and exchange boundaries, and proposed acquisitions. RUS

shall review the LD to determine that the system design is acceptable to RUS, that the design is technically correct, that the cost estimates are reasonable, and that the design provides for area coverage service. RUS shall also review the population and incorporation status of all communities served or to be served by the borrower to determine if any nonrural areas are served and if municipal franchises are required. Any RUS lending for nonrural areas must be in accordance with 7 CFR part 1735. RUS shall also check the "List of Parties Excluded from Federal Procurement of Nonprocurement Programs", compiled, maintained and distributed by General Services Administration, to determine whether the borrower is debarred, suspended, ineligible, or voluntarily excluded (see 7 CFR 3017.505).

(c) RUS will notify the borrower if RUS recommends major changes in subscriber projections, design, cost estimates, or other significant matters. RUS will not continue loan processing until RUS and the borrower agree on all major changes.

[54 FR 13356, Apr. 3, 1989; 54 FR 16194, Apr. 21, 1989. Redesignated at 55 FR 39396, Sept. 27, 1990; 58 FR 66256, Dec. 20, 1993]

§ 1737.51 Approval of loan design.

RUS shall notify the borrower when the preloan data concerning the system design and costs and subscriber projections have been approved. If found acceptable, RUS will approve the LD with any required changes. A copy of the approved LD, with any significant changes, as determined by RUS, will be returned to the borrower.

§§ 1737.52—1737.59 [Reserved]

Subpart G—Project Cost Estimation Procedures

§ 1737.60 Telephone loan budget.

(a) RUS shall prepare a "Telephone Loan Budget" (RUS Form 493) showing all costs for the proposed project and the amount of loan and nonloan funds to be used. The budget shall show, as applicable, amounts for central offices, outside plant and station equipment, right-of-way procurement, land, buildings, removal costs, special projects,

§ 1737.61

engineering, vehicles and work equipment, office equipment, operating funds, refinancing with loan funds, debt retirement with nonloan funds, acquisitions, and contingencies. The amounts budgeted, exclusive of prior loan reserves, generally shall be rounded to the nearest \$1,000.

(1) If the loan is to be made by the Rural Telephone Bank (RTB) or concurrently with RTB, the budget shall include the amount required for the purchase of RTB Class B stock. This is 5 percent of the amount to be borrowed from RTB for all purposes other than the purchase of RTB Class B stock. The borrower may elect to use nonloan funds for all or part of this requirement.

(2) The amount of funds included in any loan shall be limited for certain items:

(i) Operating funds for working capital or current operating deficiencies shall be included only in cases of financial hardship as determined by the Administrator.

(ii) Contingencies shall not exceed 3 percent of the total amount of loan funds to be used for construction, engineering, operating equipment and operating funds.

(b) RUS shall prepare the cost estimates based on the data in RUS Form 494, "Loan Design Summary," and RUS Form 495, "Construction Cost Estimates," or their equivalents, and other parts of the LD submitted by the borrower, and on other pertinent information. See subpart D of this part. The amounts included in the proposed budget shall be the estimated costs, less the value of materials and supplies on hand or acquired that can be used in the proposed construction. The cost estimates in the LD may be adjusted by RUS in consultation with the borrower. See § 1737.50(c).

(c) Generally, the new loan shall be reduced by any required equity funds and funds available in reserves no longer needed for prior loan purposes to determine the proposed loan requirement.

(d) When amounts are available in reserves no longer needed for prior loan purposes, RUS may, at its option, deny further advances of these funds if they

7 CFR Ch. XVII (1–1–97 Edition)

will be used to finance projects in the proposed loan.

(e) The budget shall also show, if applicable, the reserves for each budget item as of the date of the latest RUS Form 481, "Financial Requirement Statement," submitted by the borrower. To ensure that sufficient funds are included in the budget to finance all proposed construction, RUS includes in the budget any funds deposited by the borrower for approved interim financing.

§ 1737.61 Cost allocation for rural and nonrural areas.

(a) Pursuant to the requirements in 7 CFR part 1735, if loan funds are proposed for facilities to serve subscribers in nonrural areas, RUS shall allocate costs between rural and nonrural areas. This allocation will be used to determine whether the use of loan funds in nonrural areas is necessary and incidental to furnishing and improving telephone service in rural areas. Cost estimates shall be provided by the borrower in the LD. See subpart D of this part. RUS will use the following method to review the cost breakdowns and to determine their appropriateness:

(1) The costs of facilities associated directly with particular subscribers shall be allocated to those subscribers.

(2) The costs of facilities that serve both rural and nonrural subscribers shall be allocated based on the relative number of rural and nonrural subscribers receiving service from those facilities.

(3) When a borrower's exchange that includes a nonrural community will have an extended area of service (EAS) with other exchanges of the borrower, the breakdown of subscribers and funds in the allocation for rural and nonrural areas included in the proposed loan shall show the number of rural and nonrural subscribers and the costs to serve each group, as determined per paragraphs (a)(1) and (a)(2) of this section, in the subject exchange and in all exchanges connected by EAS.

(b) If RUS determines that costs cannot be adequately allocated using the procedures in paragraphs (a)(1) through (a)(3) of this section, RUS shall, on a

Rural Utilities Service, USDA

§ 1737.70

case by case basis, allocate costs between the rural and nonrural subscribers using whatever methodology it deems reasonable. All allocations in paragraphs (a) and (b) of this section shall be documented.

§§ 1737.62—1737.69 [Reserved]

Subpart H—Feasibility Determination Procedures

§ 1737.70 Description of feasibility study

(a) In connection with each loan RUS shall prepare a feasibility study that includes sections on consolidated loan estimates, operating statistics, projected telecommunications, plant, projected retirement computations, and projected revenue and expense estimates (including detailed estimates of depreciation and amortization expense, scheduled debt service payments, toll and access charge revenues, and local service revenues). Normally, projections will be for a 5-year period and used to determine the ability of the borrower to repay its loans in accordance with the terms thereof. RUS will not require borrowers to raise local service rates. Local service revenue projections will be based on the borrower's existing local service rates or regulatory body approved rates not yet in effect but to be implemented within the Forecast period. In the latter case, if a borrower is not required to obtain regulatory body approval for the implementation of such rates, RUS will require a resolution of the board of directors indicating when those rates will be in effect.

(b) RUS makes loans only to rural telephone systems that are financially feasible. RUS shall consider the factors discussed in paragraphs (c) through (j) of this section in determining feasibility.

(c) The revenue and expense estimates for the feasibility study generally will be based on the borrower's operating experience provided that:

(1) Adjustments are made for any nonrecurring revenues and expenses that are not representative of the borrower's past operations and would thus make the borrower's experience data inappropriate for the forecast; and

(2) Adjustments are made for any special or new characteristics or other considerations deemed necessary by the Administrator.

(d) Variable interest rate loans. After June 10, 1991, and prior to November 1, 1993, RUS made certain variable rate loans at interest rates less than 5 percent but not less than 2 percent. For those borrowers that received variable rate loans, this paragraph describes the method in which interest rates are adjusted. The interest rate used in determining feasibility is the rate charged to the borrower until the end of the Forecast period for that loan. At the end of the Forecast period, the interest rate for the loan may be annually adjusted by the Administrator upward to a rate not greater than 5 percent, or downward to a rate not less than the rate determined in the feasibility study on which the loan was based, based on the borrower's ability to pay debt service and maintain a minimum TIER of 1.0. Downward and upward adjustments will be rounded down to the nearest one-half or whole percent. To make this adjustment, projections set forth in the loan feasibility study will be revised annually by RUS (beginning within four months after the end of the Forecast period) to reflect updated revenue and expense factors based on the borrower's current operating condition. Any such adjustment will be effective on July 1 of the year in which the adjustment was determined. If the Administrator determines that the borrower is capable of meeting the minimum TIER requirements of 7 CFR 1735.22(f) at a loan interest rate of 5 percent on a loan made as described in this paragraph, then the loan interest rate shall be fixed, for the remainder of the loan repayment period, at the standard interest rate of 5 percent.

(e) Depreciation expense will be determined using depreciation rates appropriate to the normal operation of the borrower, based on:

(1) The borrower's regulatory body approved depreciation rates; and

(2) Where such rates as described in paragraph (e)(1) of this section do not exist for items which the borrower is seeking financing, the most recent median depreciation rates published by

§ 1737.71

RUS for all borrowers. RUS will publish such depreciation rates annually in RUS's "Statistical Report, Rural Telephone Borrowers."

(f) Projected scheduled debt service payments will generally be based on all of the borrower's outstanding and proposed loans from RUS and all other lenders as of the end of the feasibility Forecast period (i.e. for a 5-year Forecast period, the amount of debt outstanding in year 5).

(g) The financial and statistical data are derived from RUS Form 479, "Financial and Statistical Data for Telephone Borrowers," or for initial loans, the data may be obtained from the borrower's financial statements and other reports, and from other information supplied with the completed loan applications (see 7 CFR 1737.21 and 1737.22).

(h) When, in RUS's opinion, the borrower's operating experience is not adequate or the borrower's current operations are not representative, the estimates in the feasibility study normally will be developed from state and regional standards based on the experience of RUS borrowers. These standards are included in the Borrower's Statistical Profile (BSP), which is revised annually by RUS. If the borrower's operating experience is not the basis for one or more per-subscriber estimates used in the feasibility study, the estimates generally may not vary from the standard by more than 20 percent to reflect the particular characteristics of the loan applicant. Any variation from the standard shall be documented.

(i) In cases where these per-subscriber standards do not represent a reasonable forecast of a particular borrower's operations (for example, when a variation greater than 20 percent is necessary), estimates based upon a special analysis of the borrower's projected operations shall be used. The special analysis will accompany the feasibility study.

(j) When it is reasonably expected that a subscriber, classified as a special project, may discontinue service, a second feasibility study will be prepared, for comparison purposes, omitting revenues and expenses from this subscriber.

7 CFR Ch. XVII (1-1-97 Edition)

(k) RUS may obtain and review commercially available credit reports on applicants for a loan or loan guarantee to verify income, assets, and credit history, and to determine whether there are any outstanding delinquent Federal or other debts. Such reports will also be reviewed for parties that are or propose to be joint owners of a project with a borrower.

(l) If it is determined that loan feasibility cannot be proven as described in this section, the loan application will be returned to the borrower with an explanation. A borrower whose application has been returned will have 90 working days, from the date the application was returned, to revise and re-submit its application. If a revised application is not received by RUS within the 90-day period described above, the application will be canceled and a new application will need to be submitted if the borrower wishes further consideration.

[54 FR 13356, Apr. 3, 1989. Redesignated at 55 FR 39396, Sept. 27, 1990, as amended at 56 FR 26599, June 10, 1991; 58 FR 66256, Dec. 20, 1993]

§ 1737.71 Interest rate to be considered for the purpose of assessing feasibility for loans.

(a) For purposes of determining the creditworthiness of a borrower for concurrent RUS cost-of-money and RTB loans, the Administrator shall assume that the loans, if made, would bear interest at the Treasury rate on the date of determination as described in paragraph (b) of this section. If the Treasury rate exceeds 7 percent, the interest rate used to determine eligibility for the RUS cost-of-money loan will be 7 percent.

(b) The 30-year Treasury rate will be used in all feasibility studies for loans with a final maturity of at least 30 years. A straight-line interpolation between other Treasury rates will be used to determine the rate used in feasibility studies for loans with final maturities of less than 30 years.

(c) The Treasury rate will be obtained each Tuesday, or as soon as possible thereafter, from the Federal Reserve. The rate for the current week, from the column labeled "This week"

Rural Utilities Service, USDA

§ 1737.90

in the Federal Reserve statistical release, will be used from that Wednesday through the following Tuesday.

(d) As used in this section, the “date of determination” means the date of the feasibility study used in support of the loan recommendation.

[58 FR 66257, Dec. 20, 1993]

§§ 1737.72—1737.79 [Reserved]

Subpart I—Characteristics Letter

§ 1737.80 Description of characteristics letter.

(a) After all of the studies and exhibits for the proposed loan have been prepared, but before the loan is recommended, RUS shall inform the borrower, in writing, of the characteristics of the proposed loan. The purpose of the characteristics letter is to inform the borrower and obtain its concurrence, before further consideration by RUS of the loan approval and the preparation of legal documents relating to the loan, in such matters as the amount of the proposed loan, its purposes, rate of interest, loan security requirements, and other prerequisites to the advance of loan funds. The letter, whether or not concurred in by the borrower, does not commit RUS to approve the loan on these or any other terms.

(b) The Forecast of Revenues and Expenses and a copy of RUS Form 493, “Telephone Loan Budget,” shall be enclosed with the characteristics letter. This copy of the budget shall be subject to change by RUS with the borrower’s agreement.

[54 FR 13356, Apr. 3, 1989. Redesignated at 55 FR 39396, Sept. 27, 1990, as amended at 56 FR 26600, June 10, 1991]

§§ 1737.81—1737.89 [Reserved]

Subpart J—Final Loan Approval Procedures

§ 1737.90 Loan approval requirements.

(a) In addition to requirements set forth in 7 CFR part 1735, 7 CFR part 1737 and other applicable parts of 7 CFR chapter XVII, the following are certain additional requirements that

must be met before RUS will approve a loan:

(1) If the borrower had 100 or more employees as of the prior December 31, it must submit the current annual Employer Information Report EEO-1, Standard Form 100, as required by the Department of Labor; see 29 CFR 1602.7 through 1602.14.

(2) The borrower must be in compliance with regulations on non-discrimination. See 7 CFR part 1790 (or RUS Bulletin 320-19).

(3) For subsequent loans, RUS must determine whether the borrower’s accounting records are adequate. If the records are not adequate, as determined by RUS based on Generally Accepted Accounting Principles or other accounting conventions as deemed necessary by RUS, a provision will be included in the loan contract requiring the borrower to improve its records to an adequate level.

(4) The borrower must not have any receivables, loans, guarantees, investments, or other obligations that are contrary to the mortgage provisions or any RUS regulations including, but not limited to, 7 CFR part 1758 (or RUS Bulletins 320-4, 320-22, 321-2, 322-2, 323-1, or 326-1). If the borrower has any of these items, the loan contract shall contain a provision requiring that they be eliminated prior to the release of funds. See 7 CFR part 1744 for conditions under which RUS will provide a shared first lien and/or a lien accommodation for non-RUS lenders.

(5) RUS must make a determination on flood insurance requirements. In accordance with the National Flood Insurance Act of 1968, as amended by the Flood Disaster Protection Act of 1973, as amended (the “Flood Insurance Act”), RUS shall not approve financial assistance for the acquisition, construction, repair or improvement of any building or any machinery, equipment, fixtures or furnishings contained or to be contained in any such building located in an area which has been identified by the Director of the Federal Emergency Management Agency (the “Director of FEMA”) pursuant to the Flood Insurance Act as an area having special flood hazards unless:

§ 1737.91

(i) Flood insurance has been made available, pursuant to the Flood Insurance Act, in the area in which the acquisition, construction, repair or improvement is proposed to occur; and

(ii) The borrower has obtained flood insurance coverage with respect to such building, machinery, equipment, fixtures or furnishings as may be required pursuant to the Flood Insurance Act.

Accordingly, a finding shall be made on whether loan funds will be used to finance buildings, machinery, fixtures or furnishings located in an identified special flood hazard area. If loan funds are to be used in such a special flood hazard area, a provision will be included in the loan contract restricting the release of funds until all the requirements of the Flood Insurance Act have been satisfied.

(6) All environmental requirements must be met (see 7 CFR part 1794).

[54 FR 13356, Apr. 3, 1989. Redesignated at 55 FR 39396, Sept. 27, 1990, as amended at 56 FR 26600, June 10, 1991]

§ 1737.91 Approval.

(a) A loan is approved when the Administrator, or whoever is delegated authority, signs the administrative findings and the letter to the borrower announcing the loan.

(b) If the loan is not approved, RUS shall notify the borrower, in writing, of the reasons.

§ 1737.92 Loan documents.

Following approval of the loan, RUS shall forward the necessary loan documents to the borrower for execution, delivery, recording, and filing, as directed by RUS. See 7 CFR part 1758 for details (or RUS Bulletins 320-4, 320-22, 321-2, 322-2, 323-1, or 326-1).

§§ 1737.93—1737.99 [Reserved]

Subpart K—Release of Funds Procedure

§ 1737.100 Prerequisites to the release and advance of funds.

(a) Standard prerequisites to the advance of funds, generally applied to all loans, are set forth in Article II of the form of loan contract attached as ap-

7 CFR Ch. XVII (1-1-97 Edition)

pendix A to 7 CFR part 1758. Additional prerequisites may be added on a case by case basis to the loan contract.

(b) Before any loan funds can be advanced, RUS must approve a release of funds.

(c) RUS approves the release of funds only after it determines that all prerequisites to the advance of loan funds have been met or funds should be advanced even though certain loan contract prerequisites remain unsatisfied.

(d) Following release approval, loan funds and related nonloan funds may be advanced in accordance with 7 CFR part 1744.

(e) The borrower may be required to discharge indebtedness and/or to close acquisitions before advances are made for construction purposes. In such cases, the borrower shall submit evidence that these actions have been completed. If the evidence is satisfactory to RUS, RUS shall allow the remaining loan funds to be advanced in accordance with 7 CFR part 1744.

(Approved by the Office of Management and Budget under control number 0572-0085)

§ 1737.101 Amounts spent for preloan activities.

If the borrower desires to credit amounts spent for preloan activities against any equity or general funds required by the loan contract, it shall submit an itemized statement of such expenditures to the Area Office. These expenditures will be accounted for on RUS Form 503, "Release of Telephone Loan Funds," if RUS determines that the amounts spent are reasonable based on normal industry practice and that the procedures set forth in 7 CFR part 1737, subpart D, have been complied with. Statements of preloan expenditures will be verified as to accuracy by loan fund audits.

(Approved by the Office of Management and Budget under control number 0572-0085)

Subpart A—General

§ 1739.1 General.

(a) This part establishes specific pre-loan policies, procedures and requirements that apply to guaranteed loans which finance the construction and improvement of telephone facilities in rural areas, and other facilities and purposes as set forth in 7 CFR 1735.17.

(b) Additional general and pre-loan policies and procedures that apply to both guaranteed loans and insured loans are set forth in 7 CFR parts 1735 and 1737. Borrowers must also comply with all other applicable RUS regulations.

(c) This part supersedes those portions of RUS Bulletin 320-22, Guarantee of Loans for Telephone Facilities, and supplements thereto that are in conflict.

§ 1739.2 Definitions.

The definitions in 7 CFR parts 1735, 1737 and 1744 are applicable to this part. Other terms used in this part shall have the following meaning:

Amended and Restated Loan Commitment Agreement means the agreement between RUS and the Federal Financing Bank (FFB) that sets forth certain terms and conditions for loans made by the FFB and guaranteed by RUS, and well as the responsibilities and obligations of the two parties.

Assignment Guarantee Agreement means the agreement executed between RUS, the private lender and the holder that sets forth the terms and conditions of an assignment of all or any part of the guaranteed portion of a loan.

Conditional Commitment to Guarantee means the executed document that sets forth RUS's conditional commitment to guarantee a private lender's loan subject to the acknowledgment and acceptance by the borrower and lender of certain conditions and requirements. A similar document may be used for guaranteed loans made by the FFB.

Holder means the entity that owns all or part of the guaranteed portion of a loan. A lender may be a holder, but in most contexts holder refers to an entity other than the lender.

Lender means the organization making and servicing the guaranteed loan under the provisions of an executed Lender's Agreement. Lender is also referred to as a private lender.

Lender certification statement means the statement executed by a private lender certifying to RUS that the Lender's Agreement, the Loan Note, any loan agreement between the lender

§ 1739.3

and borrower, any Assignment Guarantee Agreement, and any other documents to be executed among the respective parties are the same in form and substance, except as clearly specified by the lender, as such unexecuted documents previously approved by RUS.

Lender's Agreement means the written contract between the private lender and RUS setting forth primarily the lender's rights and obligations with respect to the guaranteed loan and the manner in which RUS will make payments to the lender under the Loan Note Guarantee.

Loan Note means an evidence of debt. Should RUS guarantee a bond issue, "note" shall also be construed to include "bond" or other evidence of indebtedness.

Loan Note Guarantee means the contract of guarantee issued by RUS that sets forth the terms and conditions of RUS's guarantee of a private lender's loan.

Monetary default, which is also referred to as a payment default, means the failure of a borrower to make a loan payment when due as prescribed in the Loan Note.

Notice of Lender Selection means the document that sets forth the private lender's qualifications and the private lender's proposal to make a loan to a borrower.

Private lender means a lender eligible under § 1739.52.

§ 1739.3 Initial contact.

Telephone systems interested in applying for a loan guarantee that have not previously received financial assistance from RUS should write to the Rural Utilities Service, United States Department of Agriculture, 14th and Independence Avenue, SW., Washington, DC 20250-1500. A field or headquarters staff representative may be assigned by RUS to visit the applicant and discuss its financial needs and eligibility. Existing borrowers should initiate contact directly with their assigned field representative. Borrowers may consult with RUS field representatives and headquarters staff, as necessary.

7 CFR Ch. XVII (1-1-97 Edition)

§§ 1739.4—1739.49 [Reserved]

Subpart B—Section 314 Loan Guarantees—Private Sector

§ 1739.50 Legal authority.

Pursuant to section 314 of the RE Act, RUS may provide financial assistance to borrowers for the purposes set forth in section 201 of the RE Act by providing 90 percent guarantees of loans made by any legally organized lending agency as defined in 7 CFR 1739.52. RUS may not provide a guarantee under this subpart for a loan made by the Federal Financing Bank, the Rural Telephone Bank, or any other lending agency that is an agency or instrumentality of the United States.

§ 1739.51 Eligible loan purposes.

RUS may provide 90 percent loan guarantees for the loan purposes set forth in 7 CFR 1735.17.

§ 1739.52 Eligible lenders.

(a) To be eligible for a loan guarantee under this subpart, a lender must be a legally organized lending agency. The following classes of lenders are eligible, provided they meet all the requirements of this section:

- (1) Any Federal or state chartered bank or savings and loan association;
- (2) Any Farm Credit System institutions with direct lending authority;
- (3) Building and loan associations;
- (4) The Rural Telephone Finance Cooperative;
- (5) A mortgage company that is part of a bank holding company;
- (6) An agricultural credit corporation that is a subsidiary of a Federal or state chartered bank;
- (7) An insurance company regulated by the National Association of Insurance Commissioners; and
- (8) Other lenders that meet the requirements of this section.

(b) Lenders shall be subject to credit examination and supervision by a Federal or state agency unless RUS determines that alternative examination and supervisory mechanisms are adequate.

(c) Lenders shall demonstrate to RUS the capability to adequately service guaranteed loans. They also shall be in

Rural Utilities Service, USDA

§ 1739.56

good standing with their licensing authority and meet the loan-making, the loan-servicing, and other requirements of the state in which the lender makes loans guaranteed under this subpart.

(d) The lender selected by the borrower shall provide evidence satisfactory to RUS of its qualification under this section, along with the name of the authority that supervises such lender.

(e) RUS may require that a lender provide information on its financial strength and capitalization.

§ 1739.53 Exclusion of tax-exempt financing.

(a) A loan, including any other type of debt issuance, is not eligible for an RUS guarantee if the income from the loan or the income from obligations issued by the holder of the loan, when the obligations are created by the loan, is excluded from gross income for the purposes of chapter I of the Internal Revenue Code of 1986 (26 U.S.C. 501(c)(12) *et seq.*)

(b) The lender shall certify to RUS, and each subsequent holder of the loan shall certify to the seller, that it is in compliance with this section.

(c) A loan guarantee issued by RUS shall be null and void with respect to the current holder of the loan if said holder is in violation of this section.

§ 1739.54 Loan guarantee limit.

(a) RUS will guarantee repayment of 90 percent of the outstanding loan principal and 90 percent of the interest due on the outstanding loan principal, as further defined in 7 CFR 1746.56. A lesser proportion may be guaranteed if requested by the lender.

(b) RUS's guarantee is limited to the loan repayment obligation of the borrower and does not extend to guaranteeing that a lender will remit to a holder loan payments made by the borrower.

§ 1739.55 Loan security.

(a) RUS will allow the full pro rata sharing of its mortgage security on all of a borrower's facilities and property with a private lender on both the guaranteed and unguaranteed portions of the loan (see 7 CFR 1746.56 for the application of payments between the

guaranteed and unguaranteed portions of the loan.) RUS's accommodation of its lien will provide for the following:

(1) An equal pro rata mortgage lien with all other lenders on the mortgage in the event of liquidation;

(2) Limited controls over the borrower's operations; and

(3) The ability to pursue remedies for financial defaults, as set forth in the mortgage, subject to RUS's prior written approval.

(b) If RUS has repurchased the guaranteed portion of the loan, the lender's lien will then apply only to the unguaranteed portion of the loan, and RUS shall have the lien for the guaranteed portion of the loan.

(c) The lender may not obtain greater security for the unguaranteed portion of the loan than for the guaranteed portion, and if the lender exercises any rights to set-off in order to collect any portion of the loan, any payments so collected shall be applied as provided in 7 CFR 1746.56.

(d) At all times when any note representing any portion of the guaranteed loan is outstanding, the mortgage security shall secure payment of all such notes pro rata. So long as any such note has not been repurchased by RUS, the lender and not the holder of such note or any interest therein shall be considered to be, and shall have the rights of, a secured noteholder for purposes of such mortgage security.

(e) The granting of a lien to the lender is subject to any approval rights of other mortgagees secured under the mortgage.

(f) The mortgage, which is subject to RUS approval, shall be prepared by the lender, unless RUS decides otherwise.

§ 1739.56 Interest rates.

(a) Interest rates, which are subject to RUS approval, shall be negotiated between the lender and the borrower. They may be either fixed or variable. The interest rate must be the same for the guaranteed and unguaranteed portions of the loan.

(b) The interest rate charged shall be no higher than the rate customarily charged by the lender on other loans of similar maturity, having a similar risk of repayment and similar security.

§ 1739.57

RUS will not guarantee a loan if it determines, in its sole discretion, that the proposed interest rate does not meet the standards of this paragraph.

(c) If a variable interest rate is selected, it shall be tied to a published rate, agreed to by the lender and the borrower and approved by RUS, that is recognized regionally or nationally and is readily accessible and verifiable. The published rate selected may not be changed unless approved in writing by the lender, the borrower, and RUS.

(d) The frequency of change in a variable interest rate for a given advance of funds shall be specified in the Lender's Agreement and in the Loan Note, but shall not be more often than monthly. The variable interest rate for a given advance of funds shall not be raised:

(1) More than 100 basis points in any year; and

(2) Not more than 500 basis points during the life of the loan, which establishes the ceiling interest rate for the loan advance. The borrower shall be given sufficient notice of each adjustment in the interest rate.

(e) A variable interest rate can be changed to a fixed rate, provided the fixed rate does not exceed the ceiling interest rate for the advance. A fixed interest rate can be changed to a variable rate if the variable rate has a ceiling that is not higher than the original fixed rate. Such interest rate changes may be made at any time during the life of the loan in accordance with the Lender's Agreement and as provided in the Loan Note. Written notice to and prior written approval by RUS for each change under this paragraph is required. The lender is responsible for the legal documentation of interest changes under this paragraph by an amendment to the Loan Note.

(f) The Loan Note shall provide for adjustment of payment installments coincident with an interest rate change to ensure that the outstanding principal balance is amortized within the prescribed loan maturity and to eliminate the possibility of a balloon payment at the final maturity date of the loan.

(g) The interest rate applicable to each advance of funds shall be estab-

7 CFR Ch. XVII (1-1-97 Edition)

lished and recorded in accordance with the terms of the Loan Note.

§ 1739.57 Loan maturity.

The maturity of the loan, which may not exceed 35 years, is subject to the requirements of § 1735.43(a) and (b). The maturity date shall be determined by mutual consent of the borrower and the lender.

§ 1739.58 Terms of repayment.

(a) The method and frequency of debt service payments on the loan shall be specified in the Loan Note and are subject to RUS approval. Debt service payments shall be scheduled on terms that assure repayment of the loan by the final maturity date, and shall be no less frequent than quarterly.

(b) Interest shall be payable on the unpaid principal balance, from the date of each advance of funds until the principal is repaid.

(c) The guaranteed loan may be repaid in substantially equal periodic installments covering interest and principal, in periodic installments that include interest and level amortization of principal, or other principal repayment schedule satisfactory to RUS.

(d) Principal amortization on loan fund advances during the first 2 years following the date of the Loan Note shall begin no later than 2 years from the date of the Loan Note. Principal amortization on advances made 2 years or more after the date of the Loan Note shall begin with the next scheduled loan payment.

(e) RUS will not guarantee any loan under this subpart that provides for:

(1) A balloon payment of principal or interest at the final maturity date of the loan; or

(2) The payment of interest on interest.

§ 1739.59 Advance of funds.

(a) The time limit on advance of funds shall be as agreed upon by the borrower and lender.

(b) When requested by the lender, the Administrator may approve the advance of loan funds after the date set forth in paragraph (a) of this section if the borrower has demonstrated to the satisfaction of the Administrator that

Rural Utilities Service, USDA

§ 1739.66

said advances will be adequately secured under the mortgage.

(c) RUS will rescind its loan guarantee with respect to any loan funds not advanced to a borrower as of the final date approved for advancing funds pursuant to this section.

(d) RUS reserves the right to restrict advance of funds if the continued feasibility of the loan can not be adequately demonstrated.

§ 1739.60 Fees for guaranteed loans.

(a) No fees or charges will be assessed by RUS for its guarantee of a loan under this subpart.

(b) The lender may assess the borrower loan origination fees or other charges, subject to RUS approval, provided such fees and charges are no higher than those charged by the lender to its other customers for similar types of transactions.

(c) Any loan servicing fees assessed a holder, other than RUS, are not subject to RUS review or approval.

(d) Fees and other charges authorized by this section will not be guaranteed by RUS and shall not be included as part of the loan.

§ 1739.61 Loan servicing.

The lender shall be responsible for servicing the entire guaranteed loan in accordance with the Lender's Agreement, notwithstanding the fact that another party may hold all or a part of the guaranteed portion of the loan. Loan servicing requirements are set forth in 7 CFR 1746.52.

§ 1739.62 Secondary transactions.

(a) Lenders are permitted to assign to a holder up to 100 percent of the guaranteed portion of a loan, provided the loan is not in payment default. The assignment may be by direct sale of all or part of the guaranteed portion of the loan to the holder, or by other means. The assignment must comply with the provisions of 7 CFR 1746.53, and be evidenced by an Assignment Guarantee Agreement, using appendix B of this part as a guide to the extent practicable. The unguaranteed portion of a loan shall not be assigned except for security purposes.

(b) The Loan Note Guarantee and the Assignment Guarantee Agreement

shall be considered collectively to constitute the "contract of guarantee" as that term is used in Section 306 of the RE Act with respect to assignment of the loan and related loan guarantee.

(c) If RUS makes a payment under the Lender's Agreement, RUS's liability for such payment is discharged. The lender is responsible for remitting to the holder that portion of the payment due the holder as set forth in 7 CFR 1746.56 and the Lender's Agreement.

§ 1739.63 Conflict of interest.

(a) All eligible lenders shall provide information, satisfactory to RUS, in the Notice of Lender Selection as to whether and the extent that:

(1) The borrower, its principal officers, members of the board of directors, or members of the immediate families of said officials hold any stock or other evidence of ownership in the lender's organization; and

(2) The lender or its principal officers hold any stock or other evidence of ownership in the borrower, other than patronage capital.

(b) If a borrower has knowledge of any information required in paragraph (a) of this section that is not reported on the Notice of Lender Selection form, it shall report such information to the lender and RUS.

(c) RUS will determine whether such ownership represents an actual or potential conflict of interest.

§ 1739.64 Debarment and suspension.

Lenders are required to comply with certain Federal requirements on debarment and suspension as set forth in 7 CFR part 3017.

§ 1739.65 Borrower's loan guarantee application.

All loan guarantee applications shall be submitted to RUS. The applications of all borrowers shall include all of the material required for applications under 7 CFR part 1737, a completed Notice of Lender Selection as set forth in § 1739.66, and a copy of the form of opinion of counsel that will be given in connection with the loan transaction.

§ 1739.66 Notice of lender selection.

(a) Borrowers must submit a Notice of Lender Selection to RUS setting

forth the lender's qualifications and the lender's loan proposal. The notice must be signed by the lender and the borrower. The Notice of Lender Selection shall be prepared using appendix C of this part as a guide to the extent practicable.

(b) RUS encourages borrowers to make a lender selection prior to the submission of an application for a loan guarantee so that the Notice of Lender Selection can be submitted with the borrower's application. The notice shall provide the following information:

(1) The lender's current interest rates and proposed interest rate terms;

(2) The basic terms and conditions of the lender's loan;

(3) Potential conflicts of interest between the borrower and lender;

(4) Credit reports on the borrower, if available, obtained from national or regional credit bureaus or similar organizations, and the lender's assessment of said reports;

(5) Fees and charges to be assessed by the lender;

(6) A description of the lender's loan servicing plans;

(7) The lender's financial analysis and evaluation of the borrower and the proposed loan;

(8) Any plans by the lender to market, by means of an assignment of the guarantee, all or part of the guaranteed portion of the loan;

(9) Evidence of the lender's regulation by the appropriate authorities, including a description of its current standing with those authorities and evidence of the lender's fulfillment of licensing and other requirements;

(10) Evidence of the lender's financial strength and capitalization;

(11) A draft of the Loan Note;

(12) A copy of the form of loan agreement to be used, if any; and

(13) The form of lender's opinion of counsel that shall be given in connection with the loan transaction.

(c) If evidence in paragraphs (b)(9) and (b)(10) of this section has been provided to RUS within the 12 months preceding RUS receipt of the Notice of Lender Selection, such evidence need not be resubmitted if there has been no material change in conditions.

(d) If a borrower has not made a lender selection at the time of submitting an application for a loan guarantee, the borrower shall contact a prospective lender regarding the lender's proposed rate of interest, loan maturity and debt repayment method on similar transactions, and include the lender's written response with the borrower's application for a loan guarantee. Such information shall be used by the borrower in its long range financial forecast included with the application.

(e) RUS will determine the lender's qualification based on the information submitted by the lender as required by this subpart. RUS will provide written notification of its approval or disapproval of the borrower's choice of lender to the borrower and the lender.

(f) The lender shall notify RUS and the borrower promptly of any material changes in the information contained in the Notice of Lender Selection submitted to RUS.

(g) Any changes in lender selection must be approved by RUS and supported by an amendment to the Notice of Lender Selection form.

(h) RUS will not conditionally commit to guarantee a loan until the borrower has selected a lender and submitted to RUS a complete Notice of Lender Selection, in form and substance satisfactory to RUS.

§ 1739.67 Lender's loan note.

(a) A loan guaranteed by RUS shall be represented by a single Loan Note that shall be prepared by the lender and executed by the borrower.

(b) Appendix F of this part shall be used to the extent practicable in preparing the loan note. The Loan Note and any Loan Note amendments are subject to RUS written approval.

(c) A completed draft of the note shall be submitted with the Notice of Lender Selection, or as soon thereafter as practicable. RUS will notify the borrower and the lender of RUS's approval or disapproval of the draft note. If material changes are made in the draft Loan Note after it has been approved by RUS, the lender shall clearly identify the changes to RUS, with evidence of the borrower's concurrence with the changes, when the final executed Loan Note is submitted to RUS for approval.

Rural Utilities Service, USDA

§ 1739.70

(d) Each Loan Note guaranteed by RUS shall include a Loan Note Guarantee based on appendix E of this part to the extent practicable.

(e) The Loan Note shall include a date beyond which the lender shall not advance any funds under the note. This date is subject to RUS approval and to the provisions of § 1739.59.

(f) Loan notes may be amended, subject to RUS approval, but new Loan Notes may not be issued.

§ 1739.68 Lender's loan agreement.

(a) Loans guaranteed by RUS may be represented by a loan agreement, in form and substance satisfactory to RUS, executed between the lender and the borrower. Such loan agreements may include, for example, provisions of interest rates, loan repayment, advance of funds procedures, approvals required by law, special covenants and conditions, prepayments, and events of default.

(b) A completed draft of the loan agreement shall be submitted with the Notice of Lender Selection, or as soon thereafter as practicable. RUS will notify the borrower and the lender of RUS's approval or disapproval of the draft contract. If material changes are made in the draft contract after it has been approved by RUS, the lender shall clearly identify the changes to RUS, with evidence of the borrower's concurrence with the changes, when the final executed loan agreement is submitted to RUS for approval.

§ 1739.69 Lender's agreement.

(a) The Lender's Agreement is the executed agreement between RUS and the lender setting forth primarily the lender's rights and obligations with respect to the guaranteed loan and the manner in which RUS will make payments to the lender under the Loan Note Guarantee. The Lender's Agreement in appendix A of this part should be used as a guide to the extent practicable.

(b) Subsequent to RUS's approval of a borrower's choice of private lender, the lender shall prepare a draft of the Lender's Agreement for RUS's review and approval. Evidence of RUS's approval of this draft agreement will be

provided in writing to the lender, with a copy to the borrower.

(c) If material changes are made in the draft Lender's Agreement after it has been approved by RUS, the lender shall clearly identify the changes to RUS before the final agreement is submitted to RUS for approval.

(d) Lenders will be required to follow existing RUS policies and procedures, as well as future policies and procedures, provided such future policies and procedures are not inconsistent with the express provisions of the Lender's Agreement executed by the lender and RUS.

(e) Other provisions of the Lender's Agreement are set forth in 7 CFR part 1746, subpart B.

§ 1739.70 Conditional commitment to guarantee.

(a) RUS will commit to guarantee a loan, subject to conditions to be met by the borrower or lender, when the administrative findings applicable to the loan are signed per 7 CFR part 1737.

(b) RUS's Conditional Commitment to Guarantee, using appendix D of this part as a guide to the extent practicable, will be provided to the lender, with a copy to the borrower. Such commitment will include the following:

(1) The interest rate provisions of the loan, the loan amount and purposes, and the conditions precedent to the execution of a Loan Note Guarantee by RUS and the advance of guaranteed funds by the lender.

(2) A request that the lender and borrower each sign the "Acceptance of Conditions" section of the Conditional Commitment to Guarantee and return it to RUS by the date specified indicating their acceptance of the stated terms and conditions and requesting the issuance of a Loan Note Guarantee by RUS.

(3) A request that the lender begin preparing in final form the Lender's Agreement and Loan Note, along with the loan agreement and Assignment Guarantee Agreement, as applicable.

(c) The Conditional Commitment to Guarantee shall be valid for a period not to exceed one year from the date of execution unless extended in writing by RUS before the expiration date.

§ 1739.71

(d) If RUS determines it is unable to guarantee a loan, RUS will notify the borrower and lender in writing. Such notification will include the reasons for denial of the guarantee.

§ 1739.71 Changes in conditions.

(a) *Changes in loan terms and conditions.* Changes in contractual conditions regarding interest rate provisions or other terms and conditions, after execution of the Conditional Commitment to Guarantee, may be made for good cause if acceptable to both the lender and the borrower, and prior written approval is obtained from RUS.

(b) *Change of Lender.* (1) With RUS's prior written approval, a new lender may be substituted prior to execution of the Loan Note Guarantee. Subsequent to such execution, a new lender will not be approved unless the original lender has discontinued lending operations, or is unable to make the loan or satisfactorily fulfill its obligations under the Lender's Agreement. New lenders must meet the requirements of this subpart.

(2) The borrower shall provide in writing to RUS, with a copy to the new lender, the reasons for the substitution and any proposed changes in the conditions of the loan.

(c) *Criteria for approval.* In deciding whether or not to approve changes authorized by this section, RUS will consider whether the changes will increase RUS's guarantee risk or otherwise adversely affect the government's interests, and whether the changes are essential to enable the borrower to obtain a loan from an eligible lender.

[56 FR 42479, Aug. 27, 1991; 56 FR 55205, Oct. 25, 1991]

§ 1739.72 Documents summary.

For the convenience of the reader, this section summarizes the main documents set forth in this subpart:

(a) *Borrower's Loan Guarantee Application* (see 7 CFR part 1737 and § 1739.65). The application is submitted by the borrower to RUS and contains all of the documents and other information required for RUS to approve a loan guarantee. Information provided RUS in connection with an insured or Rural Telephone Bank loan is not required to be resubmitted.

7 CFR Ch. XVII (1–1–97 Edition)

(b) *Notice of Lender Selection* (§ 1739.66). This document, signed by the lender and the borrower, sets forth the lender's qualifications and the basic terms and conditions of the lender's proposed loan. The notice is submitted to RUS by the borrower, preferably at the same time as the loan guarantee application.

(c) *Conditional Commitment to Guarantee* (§ 1739.70). RUS issues this commitment to the lender when RUS determines that a loan guarantee can be approved if certain conditions are met by the borrower and/or lender.

(d) *Lender Certification* (§ 1739.73). The lender submits this document to RUS before the Lender's Agreement, Loan Note, Assignment Guarantee Agreement, and loan agreement are executed in final form to certify that these documents are the same in form and substance as the most recent draft of the documents approved by RUS.

(e) *Loan Note* (§ 1739.67). This is the promissory note issued by the borrower to the lender, which sets forth the obligation of the borrower to repay the loan with interest. A draft of the Loan Note is submitted by the borrower to RUS for approval at the same time as the Notice of Lender Selection, or as soon thereafter as practicable.

(f) *Loan Agreement* (§ 1739.68). In addition to the Loan Note, the borrower and the lender may execute a loan agreement to set forth certain provisions of the loan, such as those relating to interest rates, loan repayment, advance of funds procedures, etc. Procedures for RUS approval of a loan agreement are the same as for the Loan Note.

(g) *Loan Note Guarantee* (§ 1739.67). This is the contract of guarantee, prepared by the lender, which states the terms and conditions of RUS's guarantee of the lender's loan.

(h) *Lender's Agreement* (§ 1739.69). This contract between RUS and the lender sets forth primarily the lender's rights and obligations with respect to the guaranteed loan and the manner in which RUS will make payments to the lender under the Loan Note Guarantee. After RUS has approved the borrower's choice of lender, the Lender's Agreement is prepared by the lender and submitted to RUS for approval.

(i) *Assignment Guarantee Agreement* (§1739.62). This agreement is required if the lender intends to assign all or part of the guaranteed portion of the loan. It is prepared by the lender and is executed by the lender, the holder, and RUS.

§1739.73 Execution of final documents.

(a) The process to execute final loan and security documents will begin after the borrower and lender sign the "Acceptance of Conditions" section of the Conditional Commitment to Guarantee and return it to RUS. The process must be completed before expiration of the Conditional Commitment to Guarantee as provided for in §1739.70. Before a Loan Note Guarantee will be issued, the lender must certify to RUS that there has been no material adverse change in the Borrower's financial condition nor any other material adverse changes in the Borrower's condition since the date of submission of the loan guarantee application to RUS. If any such change, in the opinion of RUS, threatens loan feasibility or loan security, regardless of when the change occurred or when RUS became aware it, RUS is under no obligation to issue a Loan Note Guarantee.

(b) All final documents shall be prepared by the lender and submitted to RUS for approval. Said documents must either be materially the same in form and substance as the draft documents previously approved by RUS, or any material changes must be clearly identified to RUS.

(c) Borrowers under the jurisdiction of a state regulatory authority may obtain drafts of the loan and security documents in advance from the lender in order to begin proceedings with the state authority.

(d) The lender will be responsible for:

(1) Arranging for and ensuring the proper execution of the loan and security documents by all parties;

(2) Arranging for and ensuring the proper recording of all security instruments, if applicable; and

(3) Providing to RUS all said documents, evidence of proper execution and recording, and opinions of counsel, in form and substance satisfactory to the Administrator, regarding the loan

transaction for both the lender and borrower.

(e) When RUS has determined that all of the required loan and security documents and associated evidence of execution and recording are satisfactory, RUS will execute the Lender's Agreement, the Loan Note Guarantee, and if applicable, the Assignment Guarantee Agreement.

(f) The original of the executed Loan Note Guarantee, Loan Note, Lender's Agreement, and any loan agreement will be provided to the lender. The original of the executed Assignment Guarantee Agreement, if applicable, will be provided to the lender for transmittal to the holder.

(g) If RUS determines that it cannot execute the Loan Note Guarantee or other related documents because all requirements have not been met, RUS will inform the lender and borrower of the reasons and establish a reasonable period for the lender and the borrower to resolve the problems, if possible.

§1739.74 Access to records of lender.

Upon request, the lender shall permit representatives of RUS and other agencies of the Federal government to inspect and make copies of any of the records of the lender pertaining to RUS guaranteed loans. Such inspection and copying may be made during the lender's regular office hours, or any other time the lender and the government find convenient.

§1739.75 Loan documentation.

The document examples set forth in appendices A through F of this part shall be used as a guide to the extent practicable for loans guaranteed under this subpart.

§§1739.76—1739.99 [Reserved]

APPENDIX A TO PART 1739—LENDER'S AGREEMENTS

Type of Loan: _____
RUS Loan No. _____
Applicable: 7 CFR parts 1712, 1719, 1739 & 1746

(Lender) of _____
has made a loan to _____
(Borrower) in the principal amount of \$_____ as evidenced by a note (include Bond as appropriate) described as follows: _____

The United States of America, acting through the Rural Utilities Service (RUS) has entered into a Loan Note Guarantee or has issued a Conditional Commitment to Guarantee to enter into a Loan Note Guarantee with the Lender applicable to such loan to guarantee repayment of 90 percent of the outstanding principal advanced and interest owed thereon. The terms of the Loan Note Guarantee are controlling. As a condition for obtaining a guarantee of the loan, and to facilitate the marketability of the guaranteed portion of the loan, the Lender enters into this agreement.

THE PARTIES AGREE:

I. The maximum loss covered under the Loan Note Guarantee will not exceed 90 percent of the principal advanced and accrued interest on the above indebtedness.

II. *Full Faith and Credit.* The Loan Note Guarantee constitutes an obligation supported by the full faith and credit of the United States and is incontestable except for fraud or misrepresentation of which the Lender had actual knowledge at the time it became such Lender or which Lender participates in or condones. Any note which provides for the payment of interest on interest shall not be guaranteed. Any Loan Note Guarantee or Assignment Guarantee Agreement attached to or relating to a note which provides for payment of interest on interest is void.

The Loan Note Guarantee will be unenforceable by the Lender to the extent any loss is occasioned by violation of usury laws, negligent servicing, or failure to obtain the required security regardless of the time at which RUS acquires knowledge of the foregoing. Negligent servicing is defined as the failure to perform those services which a reasonable prudent Lender would perform in servicing its portfolio of loans that are not guaranteed. The term includes not only a failure to act but also not acting in a timely manner or acting in a manner contrary to the manner in which a reasonably prudent Lender would act up to the time of loan maturity or until a final loss is paid.

III. Lender's Assignment of Guaranteed Portion of Loan.

A. The Lender may retain all of the guaranteed loan. The Lender is not permitted to sell or participate in any amount of the guaranteed or unguaranteed portions of the loan to the applicant or Borrower or members of their immediate families, their officers, directors, stockholders, other owners, or any parent, subsidiary or affiliate. If the Lender desires to market all or part of the guaranteed portion of the loan at or subsequent to loan closing, such loan must not be in default as set forth in the items of the notes.

B. The Lender may assign all or a part of the guaranteed portion of the loan to not more than one Holder. The assignment is

subject to RUS approval, and an "Assignment Guarantee Agreement" must be used. The Holder, and any subsequent Holder, upon written notice to Lender and RUS, may reassign to not more than one assignee all, but not part, of its unpaid guaranteed portion of the loan. Upon such notification the assignee shall succeed to all rights and obligations of the Holder thereunder.

C. When a guaranteed portion of a loan is assigned to a Holder, the Holder shall thereupon succeed to all rights of Lender under the Loan Note Guarantee to the extent of the portion of the loan purchased, but not including those rights conveyed solely by the security instrument. Lender will remain bound to all the obligations under the Loan Note Guarantee and this agreement and the applicable RUS program regulations found in 7 CFR Parts 1712, 1719, 1739 and 1746 and to future RUS program regulations not inconsistent with the express provisions hereof.

IV. The Lender agrees loan funds will be used for the purposes authorized in the applicable subpart of 7 CFR 1712 or 1739 and in accordance with the terms of the Conditional Commitment to Guarantee.

V. Lender agrees to obtain RUS approval to advance loan funds prior to each advance of funds.

VI. The Lender certifies that it has disclosed in writing to RUS all information concerning actual or potential conflicts of interest as required by 7 CFR part 1712 or 1739.

VII. The Lender certifies that it has no knowledge of any material adverse change, financial or otherwise, in the Borrower, Borrower's business, or any parent, subsidiaries, or affiliates since it requested a Loan Note Guarantee.

VIII. The Lender certifies that a Loan Note concurred in by RUS has been or will be signed with the Borrower.

IX. Servicing.

A. The Lender will service the entire loan and will remain mortgagee and/or secured party of record, notwithstanding the fact that another party may hold a portion of the loan. The entire loan will be secured by the same security. Lender may charge Holder a servicing fee. The unguaranteed portion of a loan will not be paid first nor given any preference or priority over the guaranteed portion of the loan.

B. Disposition of the guaranteed portion of the loan may be made prior to full disbursement of loan funds, only with the prior written approval of RUS. Subsequent to full disbursement, the guaranteed portion of the loan may be disposed of as provided herein.

C. It is the Lender's responsibility to see that the borrower has obtained any required approvals of the loan from a state regulatory authority.

D. Lender's servicing responsibilities include, but are not limited to:

1. Obtaining compliance with the covenants and provisions in the note, security instruments, and any loan agreement or supplemental agreements and notifying RUS and the Borrower in writing of any violations. None of the aforesaid instruments will be altered without RUS's prior written concurrence. The Lender must service the loan in a reasonable and prudent manner.

2. Receiving all payments on principal and interest on the loan as they fall due and promptly remitting and accounting to any Holder its pro rata share thereof determined according to its interest in the loan, less only Lender's servicing fee. The loan may be reamortized, renewed, rescheduled or written down only with agreement of the Lender and Holder and only with RUS's written concurrence.

3. Inspecting the collateral as often as necessary to properly service the loan.

4. Assuring that adequate insurance is maintained. This includes hazard insurance obtained and maintained with a loss payable clause in favor of the Lender as the mortgagee or secured party and Fidelity Bond coverage if required.

5. Assuring that: taxes, assessment or ground rents against or affecting collateral are paid; the loan and collateral are protected in foreclosure, bankruptcy, receivership, insolvency, condemnation, or other litigation; insurance loss payments, condemnation awards, or similar proceeds are applied on debts in accordance with section 2 of the Loan Note Guarantee, or to rebuilding or otherwise acquiring needed replacement collateral with the written approval of RUS; proceeds from the sale or other disposition of collateral are applied in accordance with section 2 of the Loan Note Guarantee, except that proceeds from the disposition of collateral such as machinery, equipment, furniture or fixtures may, with prior written approval of RUS, be used to acquire property of similar nature; and the Borrower complies with all laws and ordinances applicable to the loan and the collateral.

6. Assuring that if corporate guarantees are part of the collateral, current financial statements from such loan guarantors will be obtained and copies provided to RUS at such time and frequency as required by the Conditional Commitment to Guarantee or any loan agreement. In the case of guarantees secured by collateral, assuring that the priority and validity of the lien is properly maintained.

7. Obtaining the lien coverage and lien priorities specified by the Lender and agreed to by RUS, properly recording or filing lien or notice instruments to obtain or maintain such lien priorities during the existence of the guarantee by RUS.

8. Assuring that the Borrower obtains marketable title to the collateral.

9. Assuring that the Borrower or any party liable is not released from liability for all or any part of the loan except in accordance with RUS regulations.

10. Providing the Director, Fiscal Accounting Division, RUS with a loan status report within 10 working days of the end of each quarter (March 31, June 30, September 30, and December 31).

11. Obtaining from the Borrower periodic financial statements under the following schedule:

Lender is responsible for analyzing the financial statements, taking any servicing actions, and reporting such actions to the RUS Area Operations Branch responsible for the loan.

12. Notifying the RUS Area Operations Branch promptly of a prepayment of all or a portion of the Loan Note by the borrower.

13. Assuring that the funds are used for the purposes approved in the loan, except that the lender may rely on RUS for said assurance if RUS has agreed in advance in writing.

E. The lender shall reimburse RUS for any payments made to a holder under the guarantee on account of negligent servicing.

X. Default.

A. The Lender shall notify the RUS Area Operations Branch promptly, in writing, when any default in the payment of principal or interest due on a loan has been in effect for five calendar days or more. In the case of such monetary defaults, the lender shall contact the borrower to determine the nature of the problem, and subsequently submit the following to the RUS Area Operations Branch:

1. A report, submitted promptly, setting forth the lender's views as to the reasons for the default, how long the borrower is expected to be in default, and the corrective actions being taken by the borrower to achieve a current debt service position, and

2. A proposal, submitted promptly for RUS's approval, outlining actions to be taken by the lender and the borrower to cure the default if the default has been in effect for 30 calendar days or more. Such proposal must be delivered to RUS within 35 calendar days of the date of the default.

B. The lender shall take all reasonable steps to cure the default as soon as practicable. Actions taken by the Lender with written concurrence of RUS may include but are not limited to the following or any combination thereof:

1. Deferment of principal payments subject to rights of any Holder.

2. An additional unguaranteed temporary loan by the Lender to bring the account current.

3. Reamortization of or rescheduling the payments on the loan, subject to rights of any Holder.

4. Transfer and assumption of the loan in accordance with RUS regulations.

5. Reorganization.

6. Liquidation.

7. Changes in interest rate with RUS's, Lender's, and the Holder's approval, provided such interest rate is adjusted proportionally between the guaranteed and unguaranteed portion of the loan and the type of rate remains the same.

C. The Lender will negotiate in good faith in an attempt to resolve any problem to permit the borrower to cure a default, where reasonable.

D. The Holder has the right to request that the Lender repurchase the unpaid guaranteed portion of the loan when (a) the borrower is in default not less than 60 days on principal and/or interest due on the loan, or (b) the Lender has failed to remit to the Holder its pro rata share of any payment made by the borrower within 30 days of its receipt. If the Lender agrees to repurchase, repurchase will be for an amount equal to the unpaid guaranteed portion of principal and accrued interest, less the Lender's servicing fee. Holder will concurrently send a copy of demand to RUS. The Lender will accept an assignment without recourse from the Holder upon repurchase. The Lender is encouraged to repurchase the loan to facilitate the accounting for funds, resolve the problem, and to permit the borrower to cure the default where reasonable. The Lender will promptly notify the Holder and RUS of its decision regarding repurchase.

E. If the borrower is in default on its loan payments and the Lender does not repurchase the Holder's portion as provided in paragraph D, within thirty (30) days after written demand to RUS from Holder, RUS will either (a) pay to Lender any shortfall in principal and interest payments by the borrower on the guaranteed portion held by the Holder, as due, to be remitted by Lender to Holder, or (b) purchase the unpaid principal balance of the guaranteed portion held by the Holder, together with accrued interest to date of repurchase, less Lender's servicing fee. Under option (b) of this paragraph, the Loan Note Guarantee will not cover any note interest to the Holder accruing after 90 days from the date of the original demand letter of the Holder to the Lender requesting the repurchase. RUS's obligation to Holder applies only in the case where the Borrower is in monetary default, and does not apply if the Borrower is not in default and the Lender fails to remit payment to Holder.

The demand to RUS shall include a copy of the written demand made upon the Lender. The Holder or its duly authorized agent will also include evidence of its right to require payment from RUS. Such evidence will consist of the original of the Assignment Guarantee Agreement properly assigned to RUS without recourse including all rights, title

and interest in the loan. RUS will be subrogated to all rights of Holder. The Holder will include in its demand the amount due, including unpaid principal, unpaid interest to date of demand, and interest subsequently accruing from date of demand to proposed payment date. Unless otherwise determined by RUS, such proposed payment will not be later than 30 days from the date of demand.

RUS will promptly notify the Lender of its receipt of the Holder's demand for payment. The Lender will promptly provide RUS with the information necessary for RUS determination of the appropriate amount due the Holder. Any discrepancy between the amount claimed by the Holder and the information submitted by the Lender must be resolved before payment will be approved. RUS will notify both parties, who must resolve the conflict to RUS's satisfaction, before payment by RUS will be approved. Such conflict will suspend the running of the 30 day payment requirement. Upon receipt of the necessary information, RUS will review the demand and determine if payment is warranted, and if so, pay the Lender, who shall in turn promptly pay the Holder.

F. If the Lender holds any part of the guaranteed portion of the loan and a monetary event of default has been in effect for 180 days from the payment due date, and the Lender has not been able to work out a satisfactory cure of the default, RUS will at its option make payment to the Lender under one of the methods set forth below within 30 days of written demand by the Lender, provided the Lender has met all of its obligations under the Lender's Agreement:

1. RUS will pay the outstanding principal balance, plus accrued interest that the Borrower has failed to pay with respect to the portion of the guaranteed loan held by the Lender. In this case, the guarantee will not cover any note interest accruing after 90 days from the date of the demand letter by the Lender to RUS.

2. RUS will pay that portion of principal and interest payments owed on the guaranteed portion of the loan held by the lender that the borrower has failed to pay, plus such principal and interest payments owed on said guaranteed portion, as due, that the borrower fails to pay in the future.

G. Lender consents to the purchase by RUS and agrees to furnish on request by RUS a current statement, certified by an appropriate authorized officer of the Lender, of the unpaid principal and interest then owed by the Borrower on the loan and the amount then owed to any Holder. Lender agrees that any purchase by RUS does not change, alter or modify any of the Lender's obligations to RUS arising from said loan or guarantee, nor does it waive any of RUS's rights against Lender, and that RUS will have the right to set-off against Lender all rights inuring to RUS as the Holder of this instrument against

RUS's obligation to Lender under the Loan Note Guarantee.

H. Servicing fees assessed by the Lender to a Holder are collectible only from payment installments received by the Lender from the Borrower. When RUS repurchases from a Holder, RUS will pay the Holder only the amounts due the Holder. RUS will not reimburse the Lender for servicing fees assessed to a Holder and not collected from payments received from the Borrower. No servicing fee shall be charged RUS and no such fee is collectible from RUS.

I. Lender may also repurchase the guaranteed portion of the loan pursuant to section 12 of the Loan Note Guarantee.

XI. *Liquidation.* If the Lender concludes that liquidation of a guaranteed loan account is necessary because of one or more defaults or third party actions that the Borrower cannot or will not cure or eliminate within a reasonable period of time, a meeting will be arranged by the Lender with RUS. If RUS concurs in the Lender's conclusion or at any time concludes independently that liquidation is necessary, it will promptly notify the Lender and the matter will be handled as follows:

A. *Lender's proposed method of Liquidation.* Within 30 days after the decision to liquidate, the Lender will advise RUS in writing of its proposed detailed method of liquidation called a liquidation plan and will provide RUS with:

1. Such proof as RUS requires to establish the Lender's ownership of the guaranteed loan promissory note and related security instruments.

2. Information lists concerning the Borrower's assets including real and personal property, fixtures, claims, contracts, inventory, accounts receivable, corporate guarantees, and other existing and contingent assets, and advice as to whether or not each item is serving as collateral for the guaranteed loan.

3. A proposed method of making the maximum collection possible on the indebtedness.

4. If the outstanding principal loan balance including accrued interest is \$200,000 or less, the Lender will obtain an estimate of the market and potential liquidated value of the collateral. On loan balances in excess of \$200,000, the Lender will obtain an independent appraisal report on all collateral securing the loan, which will reflect the current market value and potential liquidation value. The appraisal report is for the purpose of permitting the Lender and RUS to determine the appropriate liquidation actions. Any independent appraiser's fee will be shared equally by RUS and the Lender.

B. *RUS's Response to Lender's Liquidation Plan.* RUS will inform the Lender in writing whether it concurs in the Lender's liquidation plan within 30 days after receipt of such plan from the Lender. If RUS needs additional time to respond to the liquidation

plan, it will advise the Lender of a definite time for such response. Should RUS and the Lender not agree on the Lender's liquidation plan, negotiations will take place between RUS and the Lender to resolve the disagreement. The Lender will ordinarily conduct the liquidation, however, should RUS opt to conduct the liquidation, RUS will proceed as follows:

1. The Lender will transfer to RUS all rights and interest necessary to allow RUS to liquidate the loan. In this event, the Lender will not be paid for any loss until after the collateral is liquidated and the final loss is determined by RUS.

2. RUS will attempt to obtain the maximum amount of proceeds from liquidation.

3. Options available to RUS include any one or combination of the usual commercial methods of liquidation.

C. *Acceleration.* The Lender or RUS, if it liquidates, will proceed as expeditiously as possible when acceleration of the indebtedness is necessary including giving any notices and taking any other legal actions required by the security instruments. A copy of the acceleration notice or other acceleration documents will be sent to RUS or the Lender, as the case may be.

D. *Liquidation: Accounting and Reports.* When the Lender conducts the liquidation, it will account for funds during the period of liquidation and will provide RUS with periodic reports on the progress of liquidation, disposition of collateral, resulting costs, and additional procedures necessary for successful completion of liquidation. When RUS is the holder of a portion of the guaranteed loan, the Lender will transmit to RUS any payments received from the Borrower and/or pro rata share of liquidation or other proceeds, etc., pursuant to the priorities set forth in section 2 of the Loan Note Guarantee. When RUS liquidates, the Lender will be provided with similar reports on Request.

E. *Determination of Loss and Payment.* In all liquidation cases, final settlement will be made with the Lender after the collateral is liquidated. RUS will have the right to recover losses paid under the guarantee from any party liable.

1. Estimated loss payments may be approved by RUS after the Lender's liquidation plan has been approved by RUS. Payments will be made in accordance with applicable RUS procedures.

2. When the Lender is conducting the liquidation and owns any of the guaranteed portion of the loan, it may request a tentative loss estimate by submitting to RUS an estimate of loss that will occur in connection with liquidation of the loan. If RUS agrees to pay an estimated loss settlement, the Lender shall apply such amount due to the outstanding principal balance owed on the guaranteed debt. The appraisal value of the collateral will be used to determine the

estimated loss. Once this claim is approved by RUS, the Lender will discontinue interest accrual on the defaulted loan and the loss claim will be promptly processed in accordance with the applicable RUS procedures.

Within 30 days of RUS's approval of the loss estimate, RUS will request the issuance of a Treasury check in payment of the estimated amount due the Lender.

After liquidation has been completed, a final loss report will be submitted by the Lender to RUS.

3. After the Lender has completed liquidation, RUS, upon receipt of the final accounting and report of loss, may audit and will determine the actual loss. If RUS has any questions regarding the amounts set forth in the final report of loss, it will investigate the matter. The Lender will make its records available to and otherwise assist RUS in making the investigation. If RUS finds any discrepancies, it will contact the Lender and arrange for the necessary corrections to be made as soon as possible. When RUS finds the final report of loss to be proper in all respects, it will be tentatively approved.

4. When the Lender has conducted liquidation and after the final report of loss has been tentatively approved:

a. If the loss is greater than the estimated loss payment, RUS will request the issuance of a Treasury check in payment of the additional amount owed by RUS to the Lender.

b. If the loss is less than the estimated loss payment, the Lender will reimburse RUS for the overpayment plus interest at the note rate from date of payment.

5. If RUS has conducted liquidation, it will provide an accounting and report of loss to the Lender and will pay the Lender in accordance with the Loan Note Guarantee.

6. If the Lender has made authorized protective advances, it may claim recovery for the guaranteed portion of any loss of monies advanced as protective advances and interest resulting from such protective advances as provided above, and such payment will be made by RUS when the final report of loss is approved.

F. *Maximum amount of interest loss payment.* Notwithstanding any other provisions of this agreement, the amount payable by RUS to the Lender cannot exceed the limits set forth in the Loan Note Guarantee. If RUS conducts the liquidation, loss occasioned by accruing interest will be covered by the guarantee only to the date RUS accepts this responsibility. Loss occasioned by accruing interest will be covered to the extent of the guarantee to the date of final settlement when the liquidation is conducted by the Lender, provided it proceeds expeditiously with the liquidation plan approved by RUS.

G. *Application of RUS loss payment.* The estimated loss payment shall be applied as of the date of such payment. The total amount of the loss payment remitted by RUS will be

applied by the Lender on the guaranteed portion of the loan debt. However, such application does not release the Borrower from liability. At time of final loss the Lender will notify the Borrower that the loss payment has been so applied.

H. *Income from collateral.* Any net rental or other income that has been received by the Lender from the collateral will be applied on the guaranteed loan debt.

I. *Liquidation costs.* Certain reasonable liquidation costs will be allowed during the liquidation process. The liquidation costs will be submitted as a part of the liquidation plan. Such costs will be deducted from gross proceeds from the disposition of collateral unless the costs have been previously determined by the lender (with RUS's written concurrence) to be protective advances. If changed circumstances after submission of the liquidation plan require a revision of liquidation costs, the Lender will obtain RUS's written concurrence prior to proceeding with the proposed changes. No in-house expenses of the Lender will be allowed. In-house expenses include, but are not limited to, employees' salaries, staff lawyers, travel and overhead.

J. *Foreclosure.* The parties owning the guaranteed portion and unguaranteed portions of the loan will join to institute foreclosure action or, in lieu of foreclosure, to take a deed of conveyance to such parties. When the conveyance is received and liquidated, net proceeds will be applied to the guaranteed loan debt.

K. *Payment.* Such loss will be paid by RUS within 60 days after the review of the accounting of the collateral.

XII. *Protective Advances.*

Protective advances must constitute an indebtedness of the Borrower to the Lender and be secured by the security instrument(s). RUS's written authorization is required on all protective advances. Protective advances include, but are not limited to, advances made for taxes, annual assessments, ground rents, hazard or flood insurance premiums affecting the collateral, and other expenses necessary to preserve or protect the security. Attorney fees are not a protective advance.

XIII. *Additional Loans or Advances.*

The Lender will not make additional expenditures or new loans without first obtaining the written approval of RUS even though such expenditures or loans will not be guaranteed.

XIV. *Future Recovery.*

After a loan has been liquidated and final loss has been paid by RUS, any future funds that may be recovered by the Lender will be pro rated between RUS and the Lender. RUS will be paid such amount recovered in proportion to the percentage it guaranteed for the loan and the Lender will retain such

amounts in proportion to the percentage of the unguaranteed portion of the loan.

XV. Transfer And Assumption Cases.

If a loss should occur upon consummation of a complete transfer and assumption for less than the full amount of the debt and the transferor-debtor is released from personal liability, the Lender, if it holds the guaranteed portion, may file a report of estimated loss to recover its pro rata share of the actual loss at that time.

XVI. Bankruptcy.

A. The Lender is responsible for protecting the guaranteed loan debt and all collateral securing the loan in bankruptcy proceedings. When the loan is involved in a reorganization bankruptcy proceeding under Chapters 9, 11, 12 or 13 of the Bankruptcy Code (11 U.S.C. 101 et seq.), payment of loss claims may be made as proved in this section XVI. For a Chapter 7 bankruptcy or liquidation plan in a Chapter 11 bankruptcy, only paragraph XVI B.3. is applicable.

B. Loss Payments.

1. Estimated Loss Payments.

a. If a borrower has filed for protection under a reorganization bankruptcy, the Lender will request a tentative estimated loss payment of accrued interest and principal written off. This request can be made only after the bankruptcy plan is confirmed by the court. Only one estimated loss payment is allowed during the reorganization bankruptcy. All subsequent claims during reorganization will be considered revisions to the initial estimated loss. A revised estimated loss payment may be processed by RUS at its option in accordance with any court approved changes in the reorganization plan. At the time the performance under the confirmed reorganization plan has been completed, the Lender is responsible for providing RUS with the documentation necessary to review and adjust the estimated loss claim to (a) reflect the actual principal and interest reduction on any part of the guaranteed debt determined to be unsecured and (b) to reimburse the Lender for any court ordered interest rate reduction during the term of the reorganization plan.

b. The estimated loss claim, as well as any revisions to this claim, will be accompanied by necessary legal documentation to support the claim.

c. Upon completion of the reorganization plan, the Lender will report to RUS on the status of the borrower and the loan pursuant to RUS instructions.

2. Interest Loss Payments.

a. Interest loss payments sustained during the period of the reorganization plan will be processed in accordance with paragraph XVI B.1.

b. Interest loss payments sustained after the reorganization plan is completed will be processed annually when the Lender sustains a loss as a result of a permanent interest

rate reduction that extend beyond the period of the reorganization plan.

3. Final Loss Payments.

a. Final Loss Payments will be processed when the loan is liquidated.

b. If the loan is paid in full without an additional loss, RUS will close out the estimated loss account at the time notification of payment in full is received.

4. **Payment Application.** The Lender must apply estimated loss payments first to the unsecured principal of the guaranteed portion of the debt and then to the unsecured interest of the guaranteed portion of the debt. In the event the bankruptcy court attempts to direct the payments to be applied in a different manner, the Lender will immediately notify the RUS servicing office.

5. **Overpayments.** Upon completion of the reorganization plan, the Lender will provide RUS with the documentation necessary to determine whether the estimated loss paid equals the actual loss sustained. If the actual loss sustained, as a result of the reorganization, is greater than the estimated loss payment, the Lender will submit a revised estimated loss in order to obtain payment of the additional amount owed by RUS to the Lender. If the actual loss payment is less than the estimated loss, the Lender will reimburse RUS for the overpayment plus interest at the note rate from the date of the payment of the estimated loss.

XVII. Other Requirements.

This agreement is subject to all the applicable provisions of 7 CFR Parts 1712, 1719, 1739 and 1746 and any future amendments of these regulations not inconsistent with this agreement.

XVIII. Execution of Agreements.

If this agreement is executed prior to the execution of the Loan Note Guarantee, this agreement does not impose any obligation upon RUS with respect to the execution of such guarantee. RUS in no way warrants that such a guarantee has been or will be executed.

XIX. Notices.

All notices and actions will be initiated through the RUS Area Operations Branch.

Dated this _____ day of _____, 19____.

ATTEST: (Seal) _____

By _____

Title _____

UNITED STATES OF AMERICA, Rural Utilities Service.

By _____

Title _____

[56 FR 42479, Aug. 27, 1991; 56 FR 47832, Sept. 20, 1991; 56 FR 55205, Oct. 25, 1991]

APPENDIX B TO PART 1739—ASSIGNMENT
GUARANTEE AGREEMENT

Type of Loan: _____
 RUS Loan No. _____
 Applicable: 7 CFR 1712, 1719, 1739 & 1746

_____ of _____
 (Lender) has made a loan to _____
 in the principal amount of \$ _____
 as evidenced by a note dated _____.
 The United States of America, acting
 through the Rural Utilities Service (RUS)
 entered into a Loan Note Guarantee with the
 Lender applicable to such loan to guarantee
 the loan not to exceed _____% of the
 amount of the principal advanced and any
 interest due thereon as provided therein.

_____ of _____
 (Holder) desires to purchase from Lender
 _____% of the guaranteed portion of such
 loan. Copies of Borrower's note and the Loan
 Note Guarantee are attached hereto as a
 part hereto.

NOW, THEREFORE, THE PARTIES
 AGREE:

1. The principal amount of the loan now
 outstanding is \$ _____. Lender hereby
 assigns to Holder _____% of the guar-
 anteed portion of the loan representing
 \$ _____ of such loan now outstanding in
 accordance with all of the terms and condi-
 tions hereinafter set forth.

2. Loan servicing. The Lender will be re-
 sponsible for servicing the entire loan and
 will remain mortgagee and/or secured party
 of record. The entire loan will be secured by
 the same security.

The Lender will receive all payments on
 account of principal of, or interest on, the
 entire loan and shall promptly remit to the
 Holder its pro rata share thereof determined
 according to their respective interests in the
 loan, less only Lender's servicing fee.

3. Servicing Fee. Holder agrees that Lender
 will retain a servicing fee of _____ per-
 cent per annum of the unpaid balance of the
 guaranteed portion of the loan assigned here-
 under.

4. Purchase by Holder. The portion pur-
 chased by the Holder must be from the guar-
 anteed portion of the loan. Subject to the
 limitations of 7 CFR 1712.55 or 1739.55, the
 Holder will hereby succeed to all rights of
 the Lender under the Loan Note Guarantee
 to the extent of the assigned portion of the
 loan. The Lender, however, will remain
 bound by all the obligations under the Loan
 Note Guarantee and the applicable program
 regulations found in 7 CFR Parts 1712, 1719,
 1739 and 1746 now in effect, and future RUS
 program regulations not inconsistent with
 the provisions of said guarantee.

5. Full Faith and Credit. The Loan Note
 Guarantee constitutes an obligation sup-
 ported by the full faith and credit of the

United States and is incontestable except for
 fraud or misrepresentation of which the
 Holder has actual knowledge at the time of
 this assignment, or which it participates in
 or condones. A note which provides for the
 payment of interest on interest shall not be
 guaranteed. Any Assignment Guarantee
 Agreement attached to or relating to a note
 which provides for payment of interest on in-
 terest is void.

6. Exclusion of Tax-Exempt Financing. A
 loan is not eligible for a guarantee if the in-
 come from the loan or the income from obli-
 gations issued by the owner of the loan
 (Lender or Holder), when the obligations are
 created by the loan, is excluded from gross
 income for the purposes of Chapter I of the
 Internal Revenue Code of 1986. The Lender
 shall certify to RUS, and each subsequent
 Holder of the loan shall certify to the seller,
 that it is in compliance with this section.
 The loan guarantee and the Assignment
 Guarantee Agreement shall be null and void
 with respect to the current owner of a guar-
 anteed portion of the loan if said owner is in
 violation of this section.

7. Rights and Liabilities. The guarantee
 and right to require purchase will be directly
 enforceable by Holder notwithstanding any
 fraud or misrepresentations by Lender or
 any unenforceability of the Loan Note Guar-
 antee by Lender. Nothing contained herein
 shall constitute any waiver by RUS of any
 rights it possesses against the Lender, and
 the Lender agrees that Lender will be liable
 and will promptly reimburse RUS for any
 payment made by RUS to Holder that RUS
 would not be required to make if such lender
 had held the guaranteed portion of the loan.
 The Holder, upon written notice to the Len-
 der and RUS, may resell the unpaid balance of
 the guaranteed portion of the loan assigned
 hereunder. An endorsement may be added to
 this form to effectuate the transfer.

8. Repurchase by the Lender (Defaults).
 The holder has the right to request that the
 Lender repurchase the unpaid guaranteed
 portion of the loan from the Holder within 30
 days of written demand by the Holder when:
 (a) the borrower is in default not less than 60
 days on principal and/or interest due on the
 loan, or (b) the Lender has failed to remit to
 the Holder its pro rata share of any payment
 made by the borrower within 30 days of its
 receipt. If the Lender agrees to repurchase,
 repurchase will be for an amount equal to
 the unpaid guaranteed portion of principal
 and accrued interest, less the Lender's serv-
 icing fee. The loan note guarantee will not
 cover the note interest to the Holder accru-
 ing after 90 days from the date of the demand
 letter to the Lender requesting the repur-
 chase. Holder will concurrently send a copy
 of demand to RUS. The Lender will accept an
 assignment without recourse from the Hold-
 er upon repurchase. The Lender is encour-
 aged to repurchase the loan to facilitate the

accounting for funds, resolve the problem, and to permit the borrower to cure the default, where reasonable. The Lender will notify the Holder and RUS of its decision regarding repurchase.

9. RUS Purchase or Payments on Guaranteed Portion Held by Holder. If the borrower is in default on its loan payments and the Lender does not repurchase the Holder's portion as provided in paragraph 8 hereof, within thirty (30) days after written demand to RUS from Holder, RUS will either (a) pay to Lender any shortfall in principal and interest payments by the borrower on the guaranteed portion held by the Holder, as due, to be remitted by Lender to Holder, or (b) purchase the unpaid principal balance of the guaranteed portion held by the Holder, together with accrued interest to date of repurchase, less Lender's servicing fee. In the case of option (b) herein, the Loan Note Guarantee will not cover any note interest to the Holder accruing after 90 days from the date of the original demand letter of the Holder to the Lender requesting the repurchase. RUS's obligation to Holder applies only in the case where the Borrower is in monetary default, and does not apply if the Borrower is not in default and the Lender fails to remit payment to Holder.

The demand to RUS shall include a copy of the written demand made upon the Lender. The Holder or its duly authorized agent will also include evidence of its right to require payment from RUS. Such evidence will consist of the original of the Assignment Guarantee Agreement properly assigned to RUS without recourse including all rights, title and interest in the loan. RUS will be subrogated to all rights of Holder. The Holder will include in its demand the amount due, including unpaid principal, unpaid interest to date of demand, and interest subsequently accruing from date of demand to proposed payment date. Unless otherwise determined by RUS, such proposed payment will not be later than 30 days from the date of demand.

RUS will promptly notify the Lender of its receipt of the Holder's demand for payment. The Lender will promptly provide RUS with the information necessary for RUS determination of the appropriate amount due the Holder. Any discrepancy between the amount claimed by the Holder and the information submitted by the Lender must be resolved before payment will be approved. RUS will notify both parties, who must resolve the conflict to RUS's satisfaction, before payment by RUS will be approved. Such conflict will suspend the running of the 30 day payment requirement. Upon receipt of the necessary information, RUS will review the demand and determine if payment is warranted, and if so, pay the Lender, who shall in turn promptly pay the Holder.

10. Lender's Obligations. Lender consents to the purchase by RUS and agrees to furnish

on request by RUS a current statement, certified by an appropriate authorized officer of the Lender, of the unpaid principal and interest then owed by the Borrower on the loan and the amount then owed to any Holder. Lender agrees that any purchase by RUS does not change, alter or modify any of the Lender's obligations to RUS arising from said loan or guarantee, nor does it waive any of RUS's rights against Lender, and that RUS will have the right to set-off against Lender all rights inuring to RUS as the Holder of this instrument against RUS's obligation to Lender under the Loan Note Guarantee.

11. Repurchase by Lender for Servicing. If in the opinion of the Lender, repurchase of the guaranteed portion of the loan is necessary to adequately service the loan, the Holder will sell the portion of the loan to the Lender for an amount equal to the unpaid principal and interest on such portion, less Lender's servicing fee. The Loan Note Guarantee will not cover any note interest to the Holder accruing after 90 days from the date of the demand letter of the Lender or RUS to the Holder requesting that the Holder tender its guaranteed portion.

a. The Lender will not repurchase from the Holder for arbitrage purposes or other purposes to further its own financial gain.

(b.) No repurchase will be made without RUS written approval.

(c.) If the Lender does not repurchase the Holder's portion, RUS at its option may purchase such guaranteed portion for servicing purposes.

12. Foreclosure. The parties owning the guaranteed portion and unguaranteed portion of the loan will join to institute foreclosure action, or in lieu of foreclosure, take a deed of conveyance to such parties.

13. Reassignment. Holder upon written notice to Lender and RUS may reassign the unpaid guaranteed portion of the loan sold hereunder. Upon such notification, the assignee will succeed to all rights and obligations of the Holder hereunder.

14. Notices.

All notice and actions will be initiated through RUS at the following mailing address as of the date of this instrument.

**APPENDIX D TO PART 1739—CONDITIONAL
COMMITMENT TO GUARANTEE**

Borrower
Lender
Type of Loan _____
Loan No. _____
State _____
Principal Amount of Loan _____

From an examination of information supplied by the Lender on the above proposed loan and other relevant information, it appears that a Loan Note Guarantee can be issued.

Therefore, the United States of America, acting through the Rural Utilities Service (RUS), hereby agrees that, in accordance with applicable provisions of the RUS regulations published in the Code of Federal Regulations and related forms, it will execute the "Loan Note Guarantee," subject to the conditions and requirements specified herein and in said Guarantee and the applicable RUS regulations.

The interest rate for the loan is _____ percent.¹ If a variable rate is used, it cannot change more often than monthly and must be tied to a base rate, agreed to by the Lender, the Borrower and RUS, that meets the requirements of regulation 7 CFR part 1712, for electric loans, or 7 CFR part 1739, for telephone loans.

The following conditions must be met before a Loan Note Guarantee will be issued:²

A Loan Note Guarantee will not be issued until the Lender certifies as required in 7 CFR parts 1712 or 1739 that there has been no

¹Insert fixed interest rate or, if authorized by regulations, variable interest rate followed by a "V".

²Insert any conditions that must be met by the borrower or the lender before a Loan Note Guarantee can be issued. If none, so indicate.

Rural Utilities Service, USDA

Pt. 1739, App. E

material adverse change in the Borrower's financial condition nor any other material adverse changes in the Borrower's condition since the date of submission of the loan guarantee application to RUS. If any such change, in the opinion of RUS, threatens loan feasibility or loan security, regardless of when the change occurred or when RUS became aware of it, RUS is under no obligation to issue a Loan Note Guarantee.

The Lender's certification must address all adverse changes and be supported by financial statements of the Borrower and any guarantors not more than 60 days old at the time of certification. For the purposes of this paragraph only, the term "Borrower" includes any parent, affiliate, or subsidiary of the Borrower.

This agreement becomes null and void unless the conditions are accepted by the Lender and Borrower within 60 days from date of issuance by RUS. Any negotiations concerning these conditions must be completed by that time. Acceptance shall be indicated by signing and returning to RUS the attached "Acceptance of Conditions" form.

Except as set out below, the purposes for which the loan funds will be used and the amounts to be used for such purposes are set out in the Borrower's loan guarantee applications:³

This conditional commitment will expire on _____ unless the time is extended in writing by RUS, or the Lender notifies RUS that it does not wish to obtain an RUS guarantee.

**APPENDIX E TO PART 1739—LOAN NOTE
GUARANTEE**

Type of Loan _____

Applicable: 7 CFR 1712, 1719, 1739, & 1746

Borrower:

Lender:

Tax No.:

Lender's Address:

State:

Date of Note:

RUS Loan No.:

Lender's IRS ID:

Principal Amount of Loan: \$ _____

The guaranteed portion of the loan is \$_____, which is _____ percent of loan principal. The loan is evidenced by the following note _____ (includes bond as appropriate).

In consideration of the making of the subject loan by the above named Lender, the United States of America, acting through the Rural Utilities Service (RUS) pursuant to the Rural Electrification Act of 1936 (7 U.S.C. 901 *et seq.*) and 7 CFR parts 1712 and 1719 or 1739 and 1746, does hereby agree that in accordance with and subject to the conditions and requirements herein, it will pay to:

A. Any Holder: 100 percent of any loss sustained by such Holder on the guaranteed portion of the loan and on interest due on such portion.

B. The Lender: the lesser of (1.) or (2.) below:

1. Any loss sustained by such Lender on the guaranteed portion including:

a. Principal and interest indebtedness as evidenced by said note or by assumption agreement, and

b. Principal and interest indebtedness on secured protective advances for protection and preservation of collateral made with RUS's authorization, including but not limited to advances for taxes, annual assessments, any ground rents, and hazard or flood insurance premiums affecting the collateral, or

2. The guaranteed principal advanced to or assumed by the Borrower under said note or assumption agreement and any interest due thereon.

If RUS conducts the liquidation of the loan, loss occasioned to a Lender by accruing interest after the date RUS accepts responsibility for liquidation will not be covered by this Loan Note Guarantee. If Lender conducts the liquidation of the loan, accruing interest shall be covered by this Loan Note Guarantee to date of final settlement when the Lender conducts the liquidation expeditiously in accordance with the liquidation plan approved by RUS.

Definition of Holder

The Holder is the person or organization other than the Lender that holds all or part of the guaranteed portion of the loan pursuant to an executed Assignment Guarantee Agreement. Holders have no loan servicing responsibilities and they are prohibited from obtaining any part of the guaranteed portion of the loan with proceeds from any obligation, the interest on which is excludable from gross income under Chapter I of the Internal Revenue Code of 1986.

Definition of Lender

The Lender is the organization making and servicing the loan guaranteed by RUS under the provisions of 7 CFR parts 1712 and 1719 or 1739 and 1746.

*Conditions of Guarantee**1. Loan servicing.*

Lender will be responsible for servicing the entire loan, and Lender will remain mortgagee and/or secured party of record not withstanding the fact that another party may hold a portion of the loan.

2. Priorities.

The entire loan will be secured by the same security. The unguaranteed portion of the loan will not be paid first nor given any preference or priority over the guaranteed portion. In the event of monetary default by the borrower, any proceeds from liquidation of the loan and any payments made by the borrower will be applied first to any loan payments made by RUS under the guarantee, including any penalties assessed by RUS, then to any principal and accrued interest owed on the guaranteed portion of the loan, and then to any principal and accrued interest owed on the unguaranteed portion of the loan.

3. Full Faith and Credit.

The Loan Note Guarantee constitutes an obligation supported by the full faith and credit of the United States and is incontestable except for fraud or misrepresentation of which Lender or any Holder had actual knowledge at the time it became such Lender or Holder or which Lender or any Holder participates in or condones. If the note to which this is attached or relates provides for payment of interest on interest then this Loan Note guarantee is void. In addition, the Loan Note Guarantee will be unenforceable by Lender to the extent any loss is occasioned by the violation of usury laws, negligent servicing or failure to obtain the required security, regardless of when RUS acquires knowledge of the foregoing. Negligent servicing is defined as the failure to perform those services which a reasonably prudent lender would perform in servicing its own portfolio of loans that are not guaranteed. The term includes not only the concept of a failure to act but also not acting in a timely

manner or acting in a manner contrary to the manner in which a reasonably prudent lender would act up to the time of loan maturity or until a final loss is paid.

4. Rights and Liabilities.

The guarantee and right of Holder to request purchase of its portion of the loan will be directly enforceable by Holder notwithstanding any fraud or misrepresentation by Lender or any unenforceability of this Loan Note Guarantee by Lender. Nothing contained herein will constitute any waiver by RUS of any rights it possesses against the Lender. Lender will be liable for and will promptly pay to RUS any payment made by RUS to Holder which, if such Lender had held the guaranteed portion of the loan, RUS would not be required to make.

5. Exclusion of Tax-Exempt Financing.

A loan is not eligible for a guarantee if the income from the loan or the income from obligations issued by the owner of the loan (Lender or Holder), when the obligations are created by the loan, is excluded from gross income for the purposes of Chapter I of the Internal Revenue Code of 1986. The Lender shall certify to RUS, and each subsequent Holder of the loan shall certify to the seller, that it is in compliance with this section. The loan guarantee and any Assignment Guarantee Agreement shall be null and void with respect to the current owner of a guaranteed portion of the loan if said owner is in violation of this section.

6. Payments.

Lender will receive all payments of principal and/or interest on account of the entire loan and will promptly remit to Holder its pro rata share thereof determined according to its respective interest in the loan, less only Lender's servicing fee.

7. Protective Advances.

Protective advances made by the Lender and approved in advance by RUS will be guaranteed against a percentage of loss to the same extent as provided in this Loan Note Guarantee, notwithstanding the guaranteed portion of the loan that is held by another.

8. Repurchase by Lender.

The Holder has the right to request that the Lender repurchase the unpaid guaranteed portion of the loan when (a) the borrower is in default not less than 60 days on principal and/or interest due on the loan, or (b) the Lender has failed to remit to the Holder its pro rata share of any payment made by the borrower within 30 days of its receipt. If the Lender agrees to repurchase, repurchase will be for an amount equal to the unpaid guaranteed portion of principal and accrued interest, less the Lender's servicing fee. The Loan Note Guarantee will not cover any note interest to the Holder accruing after 90 days from the date of the demand letter to the Lender requesting the repurchase. Holder will concurrently send a copy

of demand to RUS. The Lender will accept an assignment without recourse from the Holder upon repurchase. The Lender is encouraged to repurchase the loan to facilitate the accounting for funds, resolve the problem, and to permit the borrower to cure the default where reasonable. The Lender will promptly notify the Holder and RUS and its decision regarding repurchase.

9. RUS Purchase or Payments on Guaranteed Portion Held by Holder.

If the borrower is in default on its loan payments and the Lender does not repurchase the Holder's portion as provided in paragraph 8 hereof, within thirty (30) days after written demand to RUS from Holder, RUS will either (a) pay to Lender any shortfall in principal and interest payments by the borrower on the guaranteed portion held by the Holder, as due, to be remitted by Lender to Holder, or (b) purchase the unpaid principal balance of the guaranteed portion held by the Holder, together with accrued interest to date of repurchase, less Lender's servicing fee. In the case of option (b) herein, the Loan Note Guarantee will not cover any note interest to the Holder accruing after 90 days from the date of the original demand letter of the Holder to the Lender requesting the repurchase. RUS's obligation to Holder applies only in the case where the Borrower is in monetary default, and does not apply if the Borrower is not in default and the Lender fails to remit payment to Holder.

The demand to RUS shall include a copy of the written demand made upon the Lender. The Holder or its duly authorized agent will also include evidence of its right to require payment from RUS. Such evidence will consist of the original of the Assignment Guarantee Agreement properly assigned to RUS without recourse including all rights, title and interest in the loan. RUS will be subrogated to all rights of Holder. The Holder will include in its demand the amount due, including unpaid principal, unpaid interest to date of demand, and interest subsequently accruing from date of demand to proposed payment date. Unless otherwise determined by RUS, such proposed payment will not be later than 30 days from the date of demand.

RUS will promptly notify the Lender of its receipt of the Holder's demand for payment. The Lender will promptly provide RUS with the information necessary for RUS determination of the appropriate amount due the Holder. Any discrepancy between the amount claimed by the Holder and the information submitted by the Lender must be resolved before payment will be approved. RUS will notify both parties, who must resolve the conflict to RUS's satisfaction, before payment by RUS will be approved. Such conflict will suspend the running of the 30 day payment requirement. Upon receipt of the necessary information, RUS will review the demand and determine if payment is war-

ranted, and if so, pay the Lender, who shall in turn promptly pay the Holder.

10. RUS Purchase or Payments on Guaranteed Portion Held by Lender.

If the Lender holds any part of the guaranteed portion of the loan and a monetary event of default has been in effect for 180 days from the payment due date, and the Lender has not been able to work out a satisfactory cure of the default, RUS will at its option make payment to the Lender under one of the methods set forth below within 30 days of written demand by the Lender, provided the Lender has met all of its obligations under the Lender's Agreement:

a. RUS will pay the outstanding principal balance, plus accrued interest, that the Borrower has failed to pay with respect to the portion of the guaranteed loan held by the Lender. In this case, the guarantee will not cover any note interest accruing after 90 days from the date of the demand letter by the Lender to RUS.

b. RUS will pay that portion of principal and interest payments owed on the guaranteed portion of the loan held by the lender that the borrower has failed to pay, plus such principal and interest payments owed on said guaranteed portion, as due, that the borrower fails to pay in the future.

11. Lender's Obligations.

Lender consents to the purchase by RUS and agrees to furnish on request by RUS a current statement, certified by an appropriate authorized officer of the Lender, of the unpaid principal and interest then owed by the Borrower on the loan and the amount then owed to any Holder. Lender agrees that any purchase by RUS does not change, alter or modify any of the Lender's obligations to RUS arising from said loan or guarantee, nor does it waive any of RUS's rights against Lender, and that RUS will have the right to set-off against Lender all rights inuring to RUS as the Holder of this instrument against RUS's obligation to Lender under the Loan Note Guarantee.

12. Repurchase by Lender for Servicing.

If in the opinion of the Lender, repurchase of the guaranteed portion of the loan is necessary to adequately service the loan, the Holder will sell the portion of the loan to the Lender for an amount equal to the unpaid principal and interest on such portion, less Lender's servicing fee. The Loan Note Guarantee will not cover any note interest to the Holder accruing after 90 days from the date of the demand letter of the Lender or RUS to the Holder requesting that the Holder tender its guaranteed portion.

a. The Lender will not repurchase from the Holder for arbitrage purposes or other purposes to further its own financial gain.

b. No repurchase will be made without RUS written approval.

c. If the Lender does not repurchase the Holder's portion, RUS at its option may purchase such guaranteed portion for servicing purposes.

13. *Custody of Unguaranteed Portion.*

The Lender must retain all of the guaranteed portion of the loan in its portfolio.

14. *When Guarantee Terminates.*

The Loan Note Guarantee will terminate automatically (a) upon full payment of the guaranteed loan, or (b) upon full payment of any loss obligation hereunder, or (c) upon written notice from the Lender to RUS that the guarantee will terminate 30 days after the date of notice, provided the Lender holds all of the guaranteed portion and the Loan Note Guarantee is returned to RUS.

15. *Settlement.*

The amount due under this instrument will be determined and paid as provided in the applicable Subpart of Part _____ of Title 7 CFR in effect on the date of this instrument.

16. *Notices.*

All notices and actions will be initiated through RUS at the following mailing address as of the date of this instrument:

Assumption Agreement by _____ dated _____

APPENDIX F TO PART 1739—LOAN NOTE

Level Debt Service

All of the Terms of this Note shall be in accordance with the applicable provisions of either 7 CFR parts 1712 and 1719 for electric loans, or 7 CFR parts 1739 and 1746 for telephone loans.

MORTGAGE NOTE

_____ 19____

1. *Amount.*

(hereinafter called the "Corporation"), a corporation organized and existing under the laws of the State of _____, for value received, promises to pay to the order of _____

(hereinafter called the "Lender"), at _____ at the times and in the manner hereinafter provided, the sum of _____ dollars (\$ _____), with interest on the amount thereof advanced by the Lender, pursuant to a certain loan contract, dated as of _____ 19____, between the Lender and the Corporation (said loan contract being hereinafter called the "Loan Contract") at the rate per annum specified in section 2.

2. *Interest Rate on Principal Advanced.*

The interest rate specified in this section shall be in accordance with 7 CFR 1712.56 or 1739.56 and is subject to approval by the Rural Utilities Service.

3. *Payment on Advances made within a Principal Deferment Period.*

Interest on principal advanced pursuant to the Loan Contract and remaining unpaid shall be payable on the last day of each _____¹ of each year for a period ending on _____² 19____. Thereafter, to and including a date _____³ () years after the date hereof, the Corporation shall make a payment on each of said _____⁴ dates in each year at the rate of \$_____ per \$1,000 of the principal amount hereof advanced pursuant to the Loan Contract and unpaid as of _____ 19____.²

4. *Payment on Advances made after a Principal Deferment Period.*

Interest and principal payments on principal advanced after _____² 19____ shall be made _____⁴ beginning with the last day of the _____ following the month of each advance of principal. Each payment on an advance shall be of an amount including interest and principal equal to every other payment on that advance over a period between the date of the first payment on that advance and a date _____³ () years after the date of this Note. These payments shall be in addition to the payment made pursuant to Section 3.

5. *Termination of Advances.*

Except as otherwise approved by RUS, the Lender's obligation to advance funds under this Note shall terminate _____⁵ () years after the date hereof.

6. *Application of Payments.*

Each payment made on this Note shall be applied first to the payment of interest on principal and then on account of principal. _____³ () years after the date hereof, the _____

¹Insert billing period, eg. month, quarter.

²Insert ending date of principal deferral period. For electric loans, this period shall be no longer than 2 years for distribution and subtransmission facilities. For bulk transmission and generating facilities, the principal deferral period shall be approved by RUS but in no case shall the amortization of principal begin later than the date these facilities are placed into service. For telephone loans this period shall be no longer than 2 years.

³Insert number of years between date of note and the date the note is due.

⁴Insert billing period, eg. monthly, quarterly.

⁵Insert, for electric loans, 4 years for distribution and subtransmission facilities or 7 years for bulk transmission and generating facilities. For telephone loans this period will be determined by agreement of the lender and borrower.

Rural Utilities Service, USDA

Pt. 1739, App. F

principal hereof advanced remaining unpaid, if any, and interest thereon, shall become due and payable.

7. Prepayments.

The loan evidenced by this note may be prepaid in full or in part, subject to the following conditions:

Any prepayment must be on both the guaranteed and unguaranteed portions of the loan, in proportion to the outstanding principal balances of each portion.

8. Security.

This Note has been executed and delivered pursuant to and is secured by a certain mortgage, dated as of _____, 19____ made by and among the

as the same may have been amended or supplemented by any supplemental mortgage or supplemental mortgages (said mortgage and any such supplemental mortgage or supplemental mortgages being hereinafter collectively called the "Mortgage"), and is one of several notes (hereinafter called the "notes") permitted to be executed and delivered by the Corporation pursuant to the Mortgage. The Mortgage provides that all notes shall be equally and ratably secured thereby and reference is hereby made to the Mortgage for a description of the property mortgaged and pledged, the nature and extent of the security and the rights of the holder of notes with respect thereto.

9. Default.

In case of default by the Corporation, as provided in the Mortgage, all principal advanced and remaining unpaid on this Note and any other notes at the time outstanding, and all interest thereon, may be declared or may become due and payable in the manner and with the effect provided in the Mortgage.

10. Noteholder.

This Note evidences indebtedness created by a loan made under the Loan Contract. If the Lender shall at any time assign all or part of the guaranteed portion of this loan, the Corporation shall continue to make payments hereunder to the Lender as collection agent for the holder, and for purposes of the Mortgage the Lender shall continue as, and shall have the rights of, the noteholder.

11. Amendment of Note.

This Note may be amended, subject to approval by the Rural Utilities Service, but new Loan Notes may not be issued.

IN WITNESS WHEREOF the Corporation has caused this Note to be signed in its corporate name and its corporate seal to be hereunto affixed and attested by its officers thereunto duly authorized, all as of the day and year first written above.

§ 1744.20 General.

Recent changes in the telephone industry, including deregulation and technological developments, have caused RUS borrowers and other organizations providing telephone services to consider undertaking projects to provide new telecommunication services. Although certain telecommunication services may not be eligible for financing under the RE Act, these services may nevertheless advance Act objectives where the borrower obtains financing from private lenders. The borrower's financial strength and the assurance of repayment of outstanding Government debt may be improved as a result of providing new telecommunication services. To facilitate the financing of new telecommunication services, RUS is willing to consider accommodating the Government's lien on telephone borrowers' systems or subordinating the Government's lien on after-acquired property of telephone borrowers. This part sets forth RUS policy with respect to such lien accommodations and subordinations. The policies of this part will also be utilized by the Governor of the Rural Telephone Bank in carrying out the Rural Telephone Bank's loan program.

§ 1744.21 Definitions.

Accommodation means sharing the Government's lien on a *pari passu* or pro rata basis with a private lender.

7 CFR Ch. XVII (1-1-97 Edition)

Act means the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 *et seq.*)

Administrator means the Administrator of RUS. See 7 CFR part 1735.

Advance means transferring funds from RUS or FFB to the borrower's construction fund.

After-acquired property means property which is to be acquired by the borrower and which would be subject to the lien of the Government's mortgage when acquired.

Borrower means any organization that has an outstanding loan made or guaranteed by RUS, or that is seeking such financing. See 7 CFR part 1735.

Construction Fund means the RUS Construction Fund Account required by section 2.4 of the Loan Contract into which all RUS loan funds are advanced.

Disbursement means the paying of money by the borrower out of the construction fund for approved loan purposes.

FFB means the Federal Financing Bank.

FRS means RUS Form 481 (OMB-No. 0572-0023) Financial Requirement Statement.

Hardship loan means a loan made by RUS under section 305(d)(1) of the RE Act bearing interest at a rate of 5 percent per year.

Interim Construction means the purchase of equipment or the conduct of construction under an RUS-approved plan of interim financing. See 7 CFR part 1737.

Interim Financing means funding for a project which RUS has acknowledged will be included in a loan, should said loan be approved, but for which RUS loan funds have not yet been made available.

Loan (RUS Loan) means any loan made or guaranteed by RUS. See 7 CFR part 1735.

Loan Documents means the loan contract, note and mortgage between the borrower and RUS and any associated document pertinent to a loan.

Loan Funds (RUS Loan Funds) means funds provided by RUS through direct or guaranteed loans.

Private lender means any lender other than the Rural Utilities Service, the

Rural Utilities Service, USDA

§ 1744.40

Rural Telephone Bank or the Federal Financing Bank.

RUS cost-of-money loan means a loan made under section 305(d)(2) of the RE Act bearing an interest rate as determined under 7 CFR 1735.31(c). RUS cost-of-money loans are made concurrently with RTB loans.

RTB means the Rural Telephone Bank.

Subordination means granting a lien which a private lender has on specific property priority over the Government's lien on such property.

Telecommunication services means any service for the transmission, emission, or reception of signals, sounds, images, or intelligence of any nature by optical waveguide, wire, radio, or other electromagnetic systems and shall include all facilities used in providing such service as well as the development, manufacture, sale, and distribution of such facilities.

[51 FR 32430, Sept. 12, 1986. Redesignated at 55 FR 39396, Sept. 27, 1990. Further redesignated and amended at 59 FR 43716, Aug. 25, 1994]

§§ 1744.22—1744.29 [Reserved]

§ 1744.30 Act purposes.

(a) Borrowers are encouraged to submit requests for accommodation of the Government's lien on the borrower's system in order to facilitate obtaining financing from private lenders for purposes provided in the RE Act.

(b) The Administrator will consider requests for the subordination of the Government's lien on after-acquired property which will enable borrowers to obtain financing from private lenders for purposes provided in the Act: Provided, however, that property integral to the operation of projects financed with loans made or guaranteed by RUS shall be financed with funds obtained through lien accommodations instead of lien subordinations, unless the Administrator determines that it is in the Government's interest to do otherwise.

§§ 1744.31—1744.39 [Reserved]

§ 1744.40 Non-act purposes.

(a) The Administrator will consider requests for the accommodation of the

Government's lien on the borrower's system or the subordination of the Government's lien on after-acquired property which will enable the borrowers to obtain financing from private lenders for the purpose of providing new telecommunication services which may not be eligible for financing under the Act if the Administrator is satisfied that:

(1) The borrower will have the ability to repay its existing and proposed indebtedness;

(2) The security for outstanding Government loans and guarantees is reasonably adequate and will not be adversely affected by the accommodation or subordination; and

(3) Approval of the request is in the interests of the Government. Generally, it would not be in the Government's interest if the accommodation or subordination is being requested to enable the borrower to avoid complying with such RUS policies or procedures, as competitive bid procedures or purchasing equipment acceptable to RUS, under 7 CFR part 1753.

(b) In determining that the security for outstanding Government loans and guarantees is reasonably adequate and will not be adversely affected by the accommodation or subordination the Administrator will consider, among other matters, when applicable, the following:

(1) Market forecasts for the project;

(2) Projected revenues, expenses and net income of the borrower's existing system and the project;

(3) Maximum debt service on indebtedness of both the borrower's system and the project;

(4) Projected rate of return on the borrower's investment in the project;

(5) Fair market value of property acquired by the borrower as part of the project;

(6) Impact of the project on the ratio of the borrower's secured debt to assets;

(7) Projected growth in borrower's system and project equity; and

(8) Amount of funds available for plant additions, replacements and other similar costs of the system and the project.

(c) In determining whether the accommodation or subordination is in

§ 1744.50

the interests of the Government, the Administrator may consider, among other matters, whether the project will improve the borrower's financial strength and the assurance of repayment of Government debt.

[51 FR 32430, Sept. 12, 1986. Redesignated at 55 FR 39396, Sept. 27, 1990, and amended at 59 FR 43716, Aug. 25, 1994]

§§ 1744.41—1744.49 [Reserved]

§ 1744.50 Application procedures.

(a) Requests for information regarding applications for lien accommodations or subordination under this part should be addressed to the Assistant Administrator—Telephone Rural Utilities Service, Washington, DC 20250–1500.

(b) An application for a lien accommodation or subordination shall include the following supporting information:

(1) A board Resolution from the applicant requesting the lien accommodation or subordination and stating the general purpose for which the funds from the private lender will be used, the proposed amount of the loan, and the proposed terms and conditions of the loan;

(2) An opinion from counsel representing the applicant that the applicant has the authority under its articles of incorporation, bylaws, and under applicable state law to undertake the project;

(3) Engineering and pertinent studies related to the projects or purposes to be financed, when applicable;

(4) Feasibility studies with pro forma financial statements showing the ability to repay the loan and provide an appropriate margin or net income;

(5) Such information regarding the environmental impacts of the project as may be required pursuant to 7 CFR part 1794; and

(6) Any other information or documentation deemed pertinent by the borrower or the Administrator in support of the application.

(c) When the Administrator makes a determination that an application for an accommodation or subordination will not be approved the Administrator shall set forth the reasons therefor in writing and furnish such determination

7 CFR Ch. XVII (1–1–97 Edition)

and reasons to the borrower within 30 days of the determination.

§§ 1744.51—1744.59 [Reserved]

Subpart C—Advance and Disbursement of Funds

SOURCE: 54 FR 12186, Mar. 24, 1989, unless otherwise noted. Redesignated at 55 FR 39396, Sept. 27, 1990.

§ 1744.60 General.

(a) The standard loan documents (as defined in 7 CFR part 1758) contain provisions regarding advances and disbursements of loan funds by telephone borrowers. This part implements certain of the provisions by setting forth requirements and procedures to be followed by borrowers in obtaining advances and making disbursements of loan and nonloan funds.

(b) This part supersedes any sections of RUS Bulletins with which it is in conflict.

§ 1744.61 [Reserved]

§ 1744.62 Introduction.

RUS is under no obligation to make or approve advances of loan funds unless the borrower is in compliance with all terms and conditions of the loan documents. The borrower shall use funds in its construction fund only to make disbursements approved by RUS.

§ 1744.63 The telephone loan budget.

When the loan is made, RUS provides the borrower a Telephone Loan Budget, RUS Form 493. This budget divides the loan into budget accounts such as “Engineering.” When a contract or other document is approved by RUS, funds are encumbered from the appropriate budget account. See 7 CFR part 1753.

§ 1744.64 Budget adjustment.

(a) If more funds are required than are available in a budget account, the borrower may request RUS's approval of a budget adjustment to use funds from another account. The request shall include an explanation of the change, the budget account to be used, and a description of how the adjustment will affect loan purposes. RUS will not approve a budget adjustment

Rural Utilities Service, USDA

§ 1744.66

that affects other loan purposes unless the borrower satisfies RUS that the additional funds are available from another source, requests a deficiency loan, or scales back the project.

(b) RUS may make a budget adjustment without a formal request by the borrower when a budget account is insufficient to encumber funds for a contract that otherwise would be approved by RUS. See 7 CFR part 1753.

§ 1744.65 The construction fund.

(a) The construction fund is used by the borrower primarily to hold advances until disbursed.

(b) All advances shall be deposited in the construction fund.

(c) RUS may require that other funds be deposited in the construction fund. These may include equity or general fund contributions to construction, service termination payments, proceeds from the sale of property, amounts recovered from insurance for losses during the construction period, and interest received on loan funds in savings or interest bearing checking accounts, and similar receipts. Deposit slips for any deposit to the construction fund shall show the source and amount of funds deposited and be executed by an authorized representative of the bank.

(d) Funds shall be disbursed only up to the amount approved for advance on the FRS as described in § 1744.66. No funds may be withdrawn from the fund except for loan purposes approved by RUS.

(e) The disbursement of nonloan funds requires the same RUS approvals as loan funds.

(f) Disbursements must be evidenced by canceled checks. The invoices and supporting documentation needed for construction contracts are specified in the contracts and in 7 CFR part 1753. Disbursements to reimburse the borrower's general funds shall be documented by a reimbursement schedule, *to be retained in the borrower's files*, that lists the construction fund check number, date, and an explanation of amounts reimbursed by budget account.

§ 1744.66 The financial requirement statement (FRS).

(a) To request advances, the borrower must submit to RUS an FRS, a description of the advances desired, and other information related to the transactions when required by RUS.

(b) The FRS is used by RUS and the borrower to record and control transactions in the construction fund. Approved contracts and other items are shown on the FRS under "Approved Purposes." Except as noted below, the amount approved for advance is 100 percent of the amount encumbered for that item. Funds are approved for advance as follows:

(1) *Construction*—(i) *Construction contracts and force account proposals*. Ninety percent of the encumbered amount (95 percent for outside plant), with the final 10 percent (5 percent) approved when RUS approves the closeout documents. When a contract contains supplement "A" (See 7 CFR part 1753), 90 percent (95 percent) of the contract is approved less materials supplied by the borrower. For the Supplement "A" materials, which are a separate entry on the FRS, 100 percent of the material cost is approved.

(ii) *Work orders*. The portion of the work order summary (See 7 CFR part 1753) determined by RUS to be for approved loan purposes.

(iii) *Work order fund*. Based on a borrower's request as described in 7 CFR part 1753.

(iv) *Real estate*. Upon request by the borrower after submission of evidence of a valid title.

(v) *Right of way procurement*. Based on the borrower's itemized costs.

(vi) *Joint use charges*. Based on copies of invoices from the other utility.

(2) *Engineering*—(i) *Preloan engineering*. Based on a final itemized invoice from the engineer.

(ii) *Postloan engineering contracts*. The amount shown on the engineering estimate, RUS Form 506, less the amount estimated for construction contract closeouts. The balance is approved when the engineering contract is closed.

(iii) *Force account engineering*. Ninety percent of the total amount of the RUS approved force account engineering proposal. The balance is approved when

§ 1744.67

7 CFR Ch. XVII (1–1–97 Edition)

the force account engineering proposal is closed.

(3) *Office equipment, vehicles and work equipment.* Based on copies of invoices for the equipment.

(4) *General*—(i) *Organization and loan expenditures.* Based on an itemized list of requirements prepared by the borrower.

(ii) *Construction overhead.* Based on an itemized list of expenditures. If funds are required for employee salaries, the itemization shall include the employee's position, the period covered, total compensation for the period, and the portion of compensation attributable to the itemized construction.

(iii) *Legal fees.* Based on itemized invoices from the attorney.

(iv) *Bank stock.* Based on the requirements for purchase of class B Rural Telephone Bank stock established in the loan. Funds for class B stock will be advanced in an amount equal to 5 percent of the amount, exclusive of the amount for class B stock, of each loan advance, at the time of such advance.

(5) *Operating expenses*—(i) *Working capital—new system.* Based on the borrower's itemized estimate.

(ii) *Current operating deficiencies.* Based on a current and projected balance sheet submitted by the borrower.

(6) *Debt retirement and refinancing.* Upon release of the loan, based on the amount in the approved budget.

(7) *Acquisitions.* Based on final itemized costs, but cannot exceed the amount in the approved loan budget.

(c) Funds other than loan funds deposited in the construction fund, which shall include proceeds from the sale of property on which RUS has a lien, (lines 10 and 11 on the FRS) are reported as a credit under total disbursements. Disbursements of these funds are subject to the same RUS approvals as loan funds.

(d) The borrower shall request advances as needed to meet its obligations promptly. Generally, RUS does not approve an advance requested more than 60 days before the obligation is payable.

(e) Funds should be disbursed for the item for which they were advanced. If the borrower needs to pay an invoice for which funds have not been ad-

vanced, and disbursement of advanced funds for another item has been delayed, the latter funds may be disbursed to pay the invoice up to the amount approved for advance for that item on the FRS. The borrower shall make erasable entries on the next FRS showing the changes under "Total Advances to Date" and shall explain the changes in writing before RUS will process the next FRS.

(f) Advances will be rounded down to the nearest thousands of dollars except for final amounts.

(g) The certification on each of the three copies of the FRS sent to RUS shall be signed by a corporate officer of manager authorized by resolution of the board of directors to sign such statements. At the time of such authorization a certified copy of the resolution and one copy of RUS Form 675, Certificate of Authority, shall be submitted to RUS.

(h) The documentation required for the FRS transactions are the deposit slips, the canceled construction fund checks and the supporting invoices or reimbursement schedules. These shall be kept in the borrower's files for periodic audits by RUS.

[54 FR 12186, Mar. 24, 1989. Redesignated at 55 FR 39396, Sept. 27, 1990, as amended at 56 FR 26600, June 10, 1991]

§ 1744.67 Temporary excess construction funds.

(a) When unanticipated events delay the borrower's disbursement of advanced funds, the funds may be used as follows:

(1) With RUS loan funds for loans approved prior to November 1, 1993, or hardship loan funds, the borrower may invest the funds in 5 percent Treasury Certificates of Indebtedness—RUS Series.

(2) With RUS cost-of-money, FFB or RTB loan funds, the following apply:

(i) The borrower may invest the funds in short term securities issued by the United States Treasury.

(ii) If permitted by state law, the borrower may deposit the funds in savings accounts, including certificates of deposit, of federally insured savings institutions.

(3) Funds advanced by a guaranteed lender other than the FFB may, if so

Rural Utilities Service, USDA

§ 1744.68

permitted by such lender, be invested under the terms and conditions described above for FFB advances.

(4) Any security or investment made under this authorization shall identify the borrower by its corporate name followed by the words "Trustee, Rural Utilities Service."

(5) All temporary investments and all income derived from them shall be considered part of the construction fund and be subject to the same controls as cash in that account.

(6) Securities and other investments shall have maturity dates or liquidating provisions that ensure the availability of funds as required for the completion of projects and the payment of obligations.

(7) Any instrument evidencing a security or other investment herein authorized to be purchased or made, may not be sold, discounted, or pledged as collateral for a loan or as security for the performance of an obligation or for any other purpose.

(8) The Administrator may, at his sole discretion, require a borrower to pledge any security or other evidence of investment authorized hereby by forwarding to him all pertinent instruments and related documentation as he may reasonably require.

(9) Borrowers shall be responsible for the safekeeping of securities and other investments.

(b) All interest and income received from investments of temporary excess funds, as described in this section, shall be deposited in the Construction Fund.

(c) The borrower shall account for investment proceeds on the next FRS submitted to RUS. RUS will make the necessary adjustments on budgetary records.

(d) The Administrator reserves the right to suspend any borrower's authorization to invest temporary excess funds contained herein if the borrower does not comply with the requirements.

(e) For RUS loans approved prior to October 1, 1991, the borrower may return advanced funds to RUS as a refund of an advance. Interest stops accruing on the refunded advance upon receipt by RUS. A refunded advance may be re-advanced. A refund of an advance shall

be sent to the Rural Utilities Service, United States Department of Agriculture, Collections and Custodial Section, Washington, DC, 20250. The borrower should clearly indicate that this is a refund of an advance, and not a loan payment or prepayment.

[54 FR 12186, Mar. 24, 1989. Redesignated at 55 FR 39395, Sept. 27, 1990, and amended at 58 FR 66257, Dec. 20, 1993]

§ 1744.68 Order and method of advances of telephone loan funds.

(a) Borrowers may specify the sequence of advances of funds under any combination of approved telephone loans from RUS, RTB, or FFB, except that for all loans approved on or after November 1, 1993, the borrower may use loan funds:

(1) Only for purposes for which that type of loan (i.e. Hardship, RUS cost-of-money, RTB, or FFB) may be made; and

(2) Only in exchanges that qualify for the type of loan from which the funds are drawn.

(b) The first or subsequent advances of loan funds may be conditioned on the satisfaction of certain requirements stated in the borrower's loan contract.

(c) Normally, only one payment is made by the Automatic Clearing House (ACH) for an advance of funds.

(d) Borrowers of RUS and RTB funds may request advances by wire service only for amounts greater than \$500,000 or for advances to borrowers outside the Continental United States. FFB advances in any amount over \$100,000 can be sent by wire service.

(e) The following information shall be included with the FRS:

(1) Name and address of borrower's bank.

(2) If borrower's bank is not a member of the Federal Reserve System, the name and address of its correspondent bank that is a member of the Federal Reserve System.

(3) American Bankers Association (ABA) nine digit identifier of the receiving banks (routing number and check digit).

(4) Borrower's bank account title and number.

§ 1744.200

(5) Any other necessary identifying information.

[54 FR 12186, Mar. 24, 1989. Redesignated at 55 FR 39395, Sept. 27, 1990, and amended at 58 FR 66257, Dec. 20, 1993]

§ 1744.69 [Reserved]

Subpart D—[Reserved]

Subpart E—Borrower Investments

SOURCE: 58 FR 52642, Oct. 12, 1993, unless otherwise noted.

§ 1744.200 General statement.

(a) RUS telephone borrowers are encouraged to utilize their own funds to participate in the economic development of rural areas, provided that such activity does not impair a borrower's ability to provide modern telecommunications services at reasonable rates or to repay its indebtedness to RUS and other lenders. When considering loans, investments, or guarantees, borrowers are expected to act in accordance with prudent business practices and in conformity with the laws of the jurisdictions in which they serve.

(b) This subpart E applies to both RUS and RTB borrowers. For the purposes of RTB borrowers, as used in this subpart E, if a borrower has received a loan from the RTB, RUS means RTB, and Administrator means Governor unless the text indicates otherwise.

§ 1744.201 Definitions.

As used in this subpart:

Administrator means the Administrator of the Rural Utilities Service (RUS) and, as provided in § 1744.200(b), the Governor of the Rural Telephone Bank (RTB).

Advance means any funds provided of which repayment is expected.

Affiliated company means any organization that directly, or indirectly through one or more intermediaries, controls or is controlled by, or is under common control with, the borrower.

Borrower means any organization which has an outstanding loan made by RUS or RTB, or guaranteed by RUS, or which is seeking such financing.

7 CFR Ch. XVII (1–1–97 Edition)

Extension of credit means to make loans or advances.

Guarantee means to undertake collaterally to answer for the payment of another's debt or the performance of another's duty, liability, or obligation, including, without limitation, the obligations of affiliated companies. Some examples of such guarantees would include:

(1) Guarantees of payment or collection on a note or other debt instrument;

(2) Issuing performance bonds or completion bonds; or

(3) Cosigning leases or other obligations of third parties.

Maximum investment ratio means that the aggregate of all qualified investments by the borrower including the proposed qualified investment shall not be more than one-third of the net worth of the borrower.

Minimum total assets ratio means the borrower's net worth is at least twenty percent of its total assets including the proposed qualified investment.

Net plant means the sum of the balances of the following accounts of the borrower:

Account Names	Number
(1) Telecommunications plant in service	2001
(2) Property held for future telecommunications use	2002
(3) Telecommunications plant under construction-short term	2003
(4) Telecommunications plant under construction-long term	2004
(5) Telecommunications plant adjustment	2005
(6) Nonoperating plant	2006
(7) Goodwill	2007
(8) Less accumulated depreciation	3100 through 3300s
(9) Less accumulated amortization	3400 through 3600s

NOTE: All references to account numbers are to the Uniform System of Accounts (47 CFR part 32).

Net worth means the sum of the balances of the following accounts of the borrower:

Account Names	Number
(1) Capital stock	4510
(2) Additional paid-in capital	4520
(3) Treasury stock	4530
(4) Other capital	4540
(5) Retained earnings	4550

NOTE: For nonprofit organizations, owners' equity is shown in subaccounts of 4540 and 4550. All references regarding account numbers are to the Uniform System of Accounts (47 CFR part 32).

Rural Utilities Service, USDA

§ 1744.202

Qualified investment is defined in § 1744.202(b).

RE Act means the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 *et seq.*).

REA means the Rural Electrification Administration formerly an agency of the United States Department of Agriculture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs.

RTB means the Rural Telephone Bank, an agency and instrumentality of the United States within the United States Department of Agriculture.

Rural development investment is defined in § 1744.202(d).

RUS means the Rural Utilities Service, an agency of the United States Department of Agriculture established pursuant to Section 232 of the Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994 (Pub. L. 103-354, 108 Stat. 3178), successor to REA with respect to administering certain electric and telephone programs. See 7 CFR 1700.1.

RUS mortgage means the instrument creating a lien on or security interest in the borrower's assets in connection with a loan made or guaranteed under the RE Act.

Total assets means the sum of the balances of the following accounts of the borrower:

Account Names	Number
(1) Current assets	1100s through 1300s
(2) Noncurrent assets	1400s through 1500s
(3) Total telecommunications plant	2001 through 2007
(4) Less accumulated depreciation	3100 through 3300s
(5) Less accumulated amortization	3400 through 3600s

NOTE: All references regarding account numbers are to the Uniform System of Accounts (47 CFR part 32).

Uniform System of Accounts means the Federal Communications Commission Uniform System of Accounts for Telecommunications Companies (47 CFR part 32) as supplemented by 7 CFR Part 1770, Accounting Requirements for RUS Telephone Borrowers.

[58 FR 52642, Oct. 12, 1993, as amended at 59 FR 66440, Dec. 27, 1994]

§ 1744.202 Borrowers may make qualified investments without prior approval of the Administrator.

(a) A borrower that equals or exceeds the minimum total assets ratio may make a qualified investment, defined in paragraph (b) of this section without prior written approval of the Administrator.

(b) A qualified investment is a rural development investment, defined in paragraph (d) of this section meeting the following criteria:

(1) Unless the borrower's commitment is a guarantee, extension of credit, or advance, the borrower receives any financial return accruing to such investment, or the borrower's proportionate share of such return;

(2) Unless the borrower's commitment is a guarantee, extension of credit, or advance, the borrower retains title to any asset acquired with such investment, or the borrower's proportionate share of such title; and

(3) The funds committed are the borrower's own funds. As used in this subpart, the term own funds shall not include proceeds of loans made, guaranteed or lien accommodated by RUS; funds necessary to make timely payments of principal and interest on loans made, guaranteed or lien accommodated by RUS; and funds on deposit in the cash construction fund-trustee account, as defined in the borrower's loan contract with RUS.

(c) A rural development investment will not be considered to be a qualified investment to the extent that the amount of such investments exceeds the borrower's maximum investment ratio.

(d) A rural development investment is an investment, extension of credit, advance, or guarantee by a borrower for a period longer than one year and for one or more of the following purposes:

(1) Improve the economic well-being of rural residents and alleviate the problems of low income, elderly, minority, and otherwise disadvantaged rural residents;

(2) Improve the business and employment opportunities, occupational training and employment services, health care services, educational opportunities, energy utilization and

§ 1744.203

availability, housing, transportation, community services, community facilities, water supplies, sewage and solid waste management systems, credit availability, and accessibility to and delivery of private and public financial resources in the maintenance and creation of jobs in rural areas;

(3) Improve state and local government management capabilities, institutions, and programs related to rural development and expand educational and training opportunities for state and local officials, particularly in small rural communities;

(4) Strengthen the family farm system; or

(5) Maintain and protect the environment and natural resources of rural areas.

(e) As used in paragraph (d) of this section, the term rural development investment shall include investments by a borrower in its own name, in affiliated companies, and in entities not affiliated with the borrower.

§ 1744.203 Establishing amount of rural development investment.

For purposes of determining whether a rural development investment is within the limits of the borrower's maximum investment ratio or the minimum total assets ratio, the amount of the qualified investment shall be the total amount of funds committed to the rural development project as of the date of determination. The total amount of funds committed to the rural development project includes:

(a) The principal amount of loans and advances made by the borrower;

(b) Guarantees made by the borrower; and

(c) A reasonable estimate of the amount the borrower is committed to provide to the rural development project in future years.

§ 1744.204 Rural development investments that do not meet the ratio requirements.

(a) Each borrower is authorized to make investments other than qualified investments only in accordance with the provisions of the borrower's mortgage with RUS. Without RUS's approval, the portion of any investment of funds or commitment to invest funds

7 CFR Ch. XVII (1-1-97 Edition)

for any rural development investment that will exceed the borrower's maximum investment ratio or cause the borrower to fall below the minimum total assets ratio, must comply with the provisions of the RUS mortgage.

(b) RUS will consider, on a case-by-case basis, requests for approval of rural development investments not constituting qualified investments. RUS may condition such approval, if granted, on such requirements and restrictions as RUS may determine to be in the best interests of the Government, including, without limitation, the borrower's agreement to limit dividends or distributions of capital by an amount specified by RUS. Requests for such approvals must be submitted in writing to the relevant RUS regional office and shall include:

(1) A description of the rural development project and the type of investment to be made, such as a loan, guarantee, stock purchase or equity investment;

(2) A reasonable estimate of the amount the borrower is committed to provide to the rural development project including investments that may be required in the future; and

(3) A pro forma balance sheet and cash flow statement for the period covering the borrower's future commitments to the rural development project.

(c) In determining whether to approve a rural development investment that may cause the borrower to exceed the maximum investment ratio or to fall below the minimum total assets ratio in the future, RUS will consider annual increases to the borrower's net worth and total assets as might be reasonably anticipated from the borrower's normal operations.

§ 1744.205 Determinations and application of limitations described in § 1744.202.

(a) RUS will not include qualified investments, including qualified investments in affiliated companies, in calculating the amount of dividend or capital distributions a borrower may make under its RUS mortgage.

(b) A borrower's investment in its net plant shall not be considered a rural development investment for purposes

Rural Utilities Service, USDA

§ 1744.210

of calculating the maximum investment ratio or the minimum total assets ratio.

(c) The borrower's net worth and total assets shall be determined using the balances of the respective accounts of the borrower as of December 31 of the last complete calendar year preceding the date on which the borrower's maximum investment ratio and minimum total assets ratio are calculated.

(d) All determinations required to be made under 7 U.S.C. 926 or this subpart will be made in accordance with the Uniform System of Accounts (USoA)(47 CFR part 32). References to specific USoA accounts shall include revised or replacement accounts.

§ 1744.206 Effect of subsequent failure to maintain ratios.

If an expenditure constitutes a qualified investment under the terms of this subpart, it does not cease to be a qualified investment merely because subsequently the borrower fails to maintain the maximum investment ratio or the minimum total assets ratio.

§ 1744.207 Investment not to jeopardize loan security.

A borrower shall not make a qualified investment or a rural development investment which jeopardizes:

(a) The security of loans made or guaranteed by RUS; or

(b) The borrower's ability to repay such loans under the terms and conditions as agreed.

§ 1744.208 Rural development investments before November 28, 1990.

All investments made by a borrower shall be subject to the provisions of this subpart, regardless of when the investment was made or whether it has been approved by RUS. Any restrictions required by RUS as a condition to approving a rural development investment before November 28, 1990, shall continue to be in effect to the extent that such investment exceeds the maximum investment ratio or causes the borrower to fall below the minimum total assets ratio.

§ 1744.209 Records.

(a) The records of borrowers, including records relating to qualified invest-

ments, shall be subject to the auditing procedures prescribed in part 1773 of this chapter. RUS reserves the right to review the records of the borrower relating to qualified investments to determine if the borrower is in compliance with this subpart.

(b) Borrowers shall report to RUS on the end-of-year operating report, RUS Form 479, the current status and principal amount of each qualified investment it has made or is committed to make pursuant to § 1744.202.

(Approved by the Office of Management and Budget under control number 0572-0098.)

§ 1744.210 Effect of this subpart on RUS loan contract and mortgage.

(a) Except as expressly provided in this subpart, the borrower shall comply with all provisions of its loan contract with RUS, its notes issued to RUS, and the RUS mortgage, including all provisions thereof relating to investments not covered by this subpart.

(b) Nothing in this subpart shall affect any rights of supplemental lenders under the RUS mortgage, or other creditors of the borrower, to limit a borrower's investments, loans and guarantees to levels below those permitted in § 1744.202.

(c) As used in paragraph (b) of this section, supplemental lender means a creditor of the borrower, other than RUS, whose loan to the borrower is secured by the RUS mortgage.

Subpart A—General

§ 1746.1 General.

(a) This part establishes specific post-loan policies, procedures and requirements that apply to guaranteed telephone loans. Pre-loan policies, procedures and requirements are in 7 CFR part 1739.

(b) Additional post-loan policies, procedures and requirements that apply to both guaranteed and insured loans are set forth in 7 CFR part 1744. Borrowers must also comply with all other applicable RUS regulations.

(c) This part supersedes those portions of RUS Bulletin 320-22, Guarantee of Loans for Telephone Facilities, and supplements thereto that are in conflict.

§ 1746.2 Definitions.

The definitions in 7 CFR parts 1735, 1737 and 1744 are applicable to this part.

§§ 1746.3—1746.49 [Reserved]

Subpart B—Section 314 Loan Guarantees—Private Sector

§ 1746.50 Legal authority.

Pursuant to section 314 of the RE Act, RUS may provide financial assistance to borrowers for the purposes set forth in section 201 of the RE Act by providing 90 percent guarantees of loans made by any legally organized lending agency is defined in 7 CFR 1739.52. RUS may not provide a guarantee under this subpart for a loan made by the Federal Financing Bank, the Rural Telephone Bank, or any other lending agency that is an agency or instrumentality of the United States.

§ 1746.51 Purpose.

This subpart sets forth post-loan policies and procedures relating to an executed Lender's Agreement between RUS and a private lender for a telephone loan guaranteed under section 314 of the RUS Act.

7 CFR Ch. XVII (1-1-97 Edition)

§ 1746.52 Loan servicing.

(a) The lender shall be responsible for the following:

(1) Servicing the entire loan in accordance with the Lender's Agreement, notwithstanding the fact that another party may hold all or part of the guaranteed portion of the loan.

(2) Ensuring that all obligations of the borrower to the lender under the lender's loan agreement, Loan Note, and the security instrument have been fulfilled.

(3) Ensuring that it has obtained RUS approval to advance funds prior to each advance of funds. Such approvals will relate to RUS's interests and responsibilities and will not be intended in any way to represent or protect the interests of the lender.

(4) Billing and collecting loan payments from the borrower.

(5) Notifying the RUS Area Operations Branch promptly, in writing, when any default in the payment of principal or interest due on a loan has been in effect for five calendar days or more. (See 7 CFR 1700.1 for a listing of states served by each Area Operations Branch.) In the case of such monetary defaults, the lender shall contact the borrower to determine the nature of the problem, and subsequently submit the following to the RUS Area Operations Branch:

(i) A report, submitted promptly, setting forth the lender's views as to the reasons for the default, how long the borrower is expected to be in default, and the corrective actions being taken by the borrower to achieve a current debt service position; and

(ii) A proposal, submitted promptly for RUS's approval, outlining actions to be taken by the lender and the borrower to cure the default if the default has been in effect for 30 calendar days or more. Such proposal must be delivered to RUS within 35 calendar days of the date of the default.

(6) Notifying the RUS Area Operations Branch promptly, in writing, if the borrower:

(i) Has failed to pay any local, state or federal taxes owed; or

(ii) Does not have adequate property and liability insurance based on prudent business practice.

Rural Utilities Service, USDA

§ 1746.53

(7) Reviewing the borrower's annual audited financial statement and providing a summary evaluation to the RUS Area Operations Branch within 60 days of receipt of the document.

(8) Notifying the RUS Area Operations Branch promptly if the borrower has not provided the required annual audited financial statement.

(9) Notifying the RUS Area Operations Branch promptly of a prepayment of all or a portion of the Loan Note by the borrower.

(10) Providing written quarterly loan statement reports to the Director, Financial Operations Division, RUS, within 10 working days of the end of the quarter. The reports shall include the amount of funds advanced for each Loan Note during the quarter, the date of each advance, applicable variable or fixed interest rates for the current quarter, record of variable interest rates for the past quarter, outstanding principal at the beginning and end of the quarter, accrued interest, the amount of principal and interest paid during the quarter, and other information that RUS may require.

(11) Assuring that the funds are used for the purposes approved in the loan, except that the lender may rely on RUS for said assurance if RUS has agreed in advance in writing.

(b) In the event of a monetary default, if RUS does not agree with the proposal submitted by the lender to cure the default, RUS will work with the lender in an effort to develop a mutually satisfactory plan. The plan, including any initiative to accelerate the Loan Note, is subject to the written approval of RUS.

(c) Upon notice to the lender, RUS may assume loan servicing responsibilities for the entire loan or the guaranteed portion, or require the lender to assign such responsibilities to a different entity, if the lender fails to perform its loan servicing responsibilities under the Lender's Agreement, or if the lender becomes insolvent, makes an admission in writing of its inability to pay its debts generally as they become due, or becomes the subject of proceedings commenced under the Bankruptcy Reform, Act of 1978 (11 U.S.C. 101 *et seq.*) or any similar applicable Federal or state law, or is no

longer is in good standing with its licensing authority, or ceases to meet the eligibility requirements of 7 CFR 1739.52. Such negligent servicing is defined as the failure to perform those services which a reasonably prudent lender would perform in servicing its own portfolio of loans that are not guaranteed, and includes not only a failure to act but also not acting in a timely manner.

(d) If loan servicing is assumed by RUS or reassigned to another entity, the lender shall cease collecting loan servicing fees for that portion of the loan for which servicing has been assumed or reassigned, and loan servicing fees shall be paid to RUS or such other entity.

(e) If RUS determines that a lender is negligent in its required loan servicing responsibilities under the Lender's Agreement, such negligent servicing will cause the guarantee to be unenforceable by the lender to the extent such negligent servicing is determined to have caused a loss. If all or part of the guaranteed portion of the loan has been assigned to a holder, such negligent servicing shall not affect the holder's rights under the Assignment Guarantee Agreement, except that RUS's guarantee does not extend to guaranteeing that a lender will remit to a holder the holder's legitimate share of any payments made by the borrower.

(f) The lender shall reimburse RUS for any payments made to a holder under the guarantee on account of negligent servicing.

§ 1746.53 Secondary transactions.

(a) As set forth in 7 CFR 1739.62, lenders are authorized to assign to a holder up to 100 percent of the guaranteed portion of a loan, provided the loan is not in payment default.

(b) The initial assignment by a lender requires prior written approval from RUS. Subsequent assignments by holders do not require RUS approval.

(c) An assignment shall entitle the holder to all of the lender's rights under the Loan Note Guarantee to the extent of the guaranteed loan purchased. However, the lender shall remain responsible for servicing the entire loan and shall continue to be

§ 1746.54

bound by all obligations under the Loan Note Guarantee and the Lender's Agreement.

(d) The borrower, its principal officers, members of the borrower's board of directors, and members of the immediate families of said officials shall not be a holder of the borrower's loan.

(e) An Assignment Guarantee Agreement, prepared by the lender using appendix B to 7 CFR part 1739 as a guide to the extent practicable, will be executed between RUS, the lender and the holder evidencing the amount of the guaranteed portion of the loan assigned. The lender shall send the original of the Assignment Guarantee Agreement to the holder and a conformed copy to RUS.

(f) The holder, and any subsequent holder, with prior written approval of the lender, may reassign its unpaid guaranteed portion of the loan. The lender shall maintain adequate records to enable verification, at any time, as to the legal holder of the assigned portion of the loan.

(g) The assigned portion of a loan may be held by only one holder at a time. This, however, does not prohibit two or more entities from consolidating into a single entity as holder.

(h) As set forth in 7 CFR 1739.53, holders are prohibited from obtaining any part of the guaranteed portion of the loan with proceeds from any obligation the interest on which is excludable from income under chapter I of the Internal Revenue Code of 1986 (26 U.S.C. 501(c)(21) *et seq.*).

§ 1746.54 Borrower prepayments.

(a) Loans under this subpart may be prepaid in full or in part in accordance with the terms of the Loan Note or loan agreement. Any prepayment must be on both the guaranteed and unguaranteed portions of the loan, in proportion to the outstanding principal balances of said portions. Depending on the lender, there may be a premium associated with such prepayment.

(b) Prepayment of a guaranteed loan under this subpart shall be accompanied by a simultaneous prepayment of any other loan made concurrently with such loan, including any RUS insured or guaranteed loan, or any Rural Telephone Bank loan, if requested by

7 CFR Ch. XVII (1–1–97 Edition)

the RTB. Such prepayment shall be on a pro rata basis according to the outstanding principal balances of said loans and in accordance with the specific terms of the joint mortgage or other security instrument that provides common security for such loans.

§ 1746.55 Refinancing.

With RUS approval, loans under this subpart may be refinanced under the Loan Note Guarantee if, in RUS's sole judgment, such refinancing will not increase RUS's loan guarantee risk or otherwise adversely affect the government's interests.

§ 1746.56 Payments under lender's agreement.

(a) In the case of both monetary and non-monetary events of default, RUS will work with the borrower and the lender in an effort to eliminate the borrower's default as soon as possible.

(b) Non-monetary defaults will not trigger any payments by RUS.

(c) RUS's guarantee is limited to paying the amount by which payments made by the borrower, any amounts received from set-offs, and any proceeds received from liquidation are less than the principal and scheduled interest owed on the guaranteed portion of the loan. RUS's guarantee does not cover penalty interest or a lender's collection costs, although certain reasonable liquidation costs approved by RUS may be deducted from the gross proceeds from the liquidation of collateral, as provided in the Lender's Agreement.

(d) In the event of a monetary default by the borrower;

(1) Any payments made by the borrower on any loan or other obligations of the borrower held by the lender shall be applied pro rata to said obligations secured under the mortgage based on the outstanding principal balances thereof; and

(2) Any payments made by the borrower on the guaranteed loan, any amounts received from set-offs, and any proceeds received from liquidation shall be applied first to reimburse RUS for any payments made under the guarantee. Any amounts remaining after said application shall be applied first to the guaranteed portion of the loan, up to the full amount owned on said

Rural Utilities Service, USDA

§ 1746.58

portion, and second to the unguaranteed portion of the loan.

(e) If a holder has been assigned all or any part of the guaranteed portion of the loan, payment to the holder will proceed as follows:

(1) After a monetary event of default has been in effect for 60 calendar days from the payment due date, the holder may request in writing that the lender repurchase the assigned portion of the loan. Within 30 calendar days of receipt of such demand, the lender shall either repurchase the assigned portion of the loan or inform the holder and RUS in writing that it does not intend to repurchase said portion.

(2) RUS encourages lenders to repurchase the assigned portion of a loan in monetary default. Such repurchase will enhance a lender's ability to pursue payment remedies, with RUS's approval, including but not limited to principal deferments, changes in interest rates, or reamortization of payments.

(3) If the lender does not repurchase the loan from the holder as provided in paragraph (e) (1) of this section, upon written demand by the holder RUS will, in accordance with the Assignment Guarantee Agreement, either:

(i) Pay the outstanding principal balance owed, plus accrued interest, that the borrower has failed to pay with respect to the portion of the guaranteed loan held by the holder; or

(ii) Pay that portion of principal and interest payments owed the holder that the borrower has failed to pay, plus such principal and interest payments owed the holder, as due, that the borrower fails to pay in the future.

(4) RUS will make payment under paragraph (e) (3) of this section within 30 calendar days of receiving the written demand of the holder and verification of the identity of the legal holder and the amounts owed.

(5) Payments by RUS will be made to the lender, who shall be responsible for paying the holder.

(6) RUS's obligation to make payments, as set forth in the Assignment Guarantee Agreement, relates only to the failure of a borrower to make principal and interest payments required under the guaranteed Loan Note. RUS's guarantee does not extend to

guaranteeing that the lender will remit to the holder principal and interest payments made by the borrower, or by RUS under the guarantee. Nor does RUS guarantee any premiums that may be associated with secondary transactions.

(f) If the lender holds any part of the guaranteed portion of the loan and a monetary event of default has been in effect for 180 calendar days from the payment due date, and the lender has not been able to work out a satisfactory cure of the default, RUS will make payment to the lender under one of the methods set forth below within 30 calendar days of written demand by the lender, provided the lender has taken all reasonable steps in an attempt to cure the default and has met all of its obligations under the Lender's Agreement:

(1) Pay the lender the outstanding principal balance, plus accrued interest, that the borrower has failed to pay with respect to the portion of the guaranteed loan held by the lender; or

(2) Pay the lender that portion of principal and interest payments owed on the guaranteed portion of the loan held by the lender that the borrower has failed to pay, plus such principal and interest payments owed on said guaranteed portion, as due, that the borrower fails to pay in the future.

(g) In considering its payment options, RUS will select, on a case by case basis, the option that is in the best interest of the Government.

(h) When RUS has made a payment under the Loan Note Guarantee, it will establish in its accounts the amount of the payment as due and payable from the borrower, with interest accruing on all amounts owed, at the rate of interest specified in the Loan Note.

§ 1746.57 Obligations of borrower.

(a) Borrowers must meet the applicable requirements of this subpart, subpart B of 7 CFR part 1739, and all other RUS regulations.

(b) A borrower must provide the lender with information that is reasonably required to make and service the loan.

§ 1746.58 Replacement of documents.

RUS may issue a replacement Loan Note Guarantee, Lender's Agreement

§ 1751.100

or Assignment Guarantee Agreement that has been lost, stolen, destroyed, mutilated or defaced upon receipt of documentation, satisfactory to RUS, evidencing the loss of the original document. The lender shall coordinate the replacement of the document and submit the following documentation to RUS:

(a) A certificate of loss properly notarized which shall include:

(1) The legal name and address of lender and the capacity of the person certifying.

(2) The legal name and present address of the owner who is requesting the replacement document.

(3) Identification of the document, including the name of the borrower, face amount of Loan Note, date of the Loan Note, present balance of the loan, and percentage of guarantee. If an assignment is involved, identification shall also include the name of the current holder and any previous holders and the percentage of the guaranteed portion of the loan assigned. If the current holder is not the same as the original holder, a copy of the endorsement of each previous holder in the chain of transfer shall be included.

(4) A full statement of the circumstances of the loss, theft or destruction of the document.

(b) An indemnity bond acceptable to RUS shall accompany the request for replacement of the document. The bond shall be with surety except when the outstanding principal balance and accrued interest due the holder is less than \$1,000,000. Such outstanding balance shall be certified by the lender in writing. All indemnity bonds shall be issued or payable to the United States of America acting through the RUS. The bond shall be in an amount not less than the unpaid principal and interest. The bond shall save RUS harmless against any claim or demand that might arise or against any damage, loss, costs or expenses that might be sustained or incurred by reasons of the loss or replacement of the instruments.

Subpart A—[Reserved]

§§ 1751.1—1751.99 [Reserved]

Subpart B—State Telecommunications Modernization Plan

§ 1751.100 Definitions.

As used in this subpart:

Bit rate. The rate of transmission of telecommunications signals or intelligence in binary (two state) form in bits per unit time, e.g., Mb/s (megabits per second), kb/s (kilobits per second), etc.

Borrower. Any organization that has received an RUS loan designation number and which has an outstanding telephone loan made by RUS or the Rural Telephone Bank, or guaranteed by RUS, or which has a completed loan application with RUS.

Rural Utilities Service, USDA

§1751.101

Emerging technologies. New or not fully developed methods of telecommunications.

Modernization Plan (State Telecommunications Modernization Plan). A State plan, which has been approved by RUS, for improving the telecommunications network of those Telecommunications Providers covered by the plan. A Modernization Plan must conform to the provisions of this subpart.

New facilities. Facilities which are wholly or partially constructed or reconstructed after a short- or medium-term requirements start date, as appropriate. This does not include connections or capacity extensions within the wired capacity of existing plant such as adding line cards to existing equipment.

Plan Developer. The entity creating the Modernization Plan for the State, which may be the State PUC, the State legislature, or a numeric majority of the RUS Borrowers within the State. When this part refers to the PUC as the Plan Developer, this includes the State legislature.

PUC (Public Utilities Commission). The public utilities commission, public service commission or other State body with such jurisdiction over rates, service areas or other aspects of the services and operation of providers of telecommunications services as vested in the commission or other body authority, to the extent provided by the State, to guide development of telecommunications services in the State. When this part refers to the PUC as the Plan Developer, this includes the State legislature.

RE Act. The Rural Electrification Act of 1936, as amended (7 U.S.C. 901 *et seq.*).

REA. The Rural Electrification Administration, formerly an agency of the United States Department of Agriculture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs.

RELRA. The Rural Electrification Loan Restructuring Act of 1993 (107 Stat. 1356).

RUS. The Rural Utilities Service, an agency of the United States Department of Agriculture established pursuant to Section 232 of the Federal Crop Insurance Reform and Department of

Agriculture Reorganization Act of 1994 (Pub. L. 103-354, 108 Stat. 3178 (7 U.S.C. 6941 *et seq.*)), successor to REA with respect to administering certain electric and telephone programs. See 7 CFR 1700.1.

RUS cost-of-money loan. A loan made under section 305(d)(2) of the RE Act bearing interest as determined under 7 CFR 1735.31(c). RUS cost-of-money loans are made concurrently with RTB loans.

RUS hardship loan. A loan made by RUS under section 305(d)(1) of the RE Act bearing interest at a rate of 5 percent per year.

RTB loan. A loan made by the Rural Telephone Bank (RTB) under section 408 of the RE Act bearing interest as determined under 7 CFR 1610.10. RTB loans are made concurrently with RUS cost-of-money loans.

State. Each of the 50 states of the United States, the District of Columbia, and the territories and insular possessions of the United States. This does not include countries in the Compact of Free Association.

Telecommunications. The transmission or reception of voice, data, sounds, signals, pictures, writings, or signs of all kinds, by wire, fiber, radio, light, or other visual or electromagnetic means.

Telecommunications providers. RUS Borrowers and if the Plan Developer is a PUC, such other entities providing telecommunications services as the developer of the Modernization Plan (See §1751.101) may determine.

Wireline Service. Telecommunications service provided over telephone lines. It is characterized by a wire or wirelike connection carrying electricity or light between the subscriber and the rest of the telecommunications network. Wireline Service implies a physical connection. Although radio may form part of the circuit, it is not the major method of transmission as in radiotelephone.

§1751.101 General.

(a) It is the policy of RUS that every State have a Modernization Plan which provides for the improvement of the State's telecommunications network.

(b) A proposed Modernization Plan must be submitted to RUS for approval. RUS will approve the proposed

§ 1751.102

Modernization Plan if it conforms to the provisions of this subpart. Once obtained, RUS's approval of a Modernization Plan cannot be rescinded.

(c) The Modernization Plan shall not interfere with RUS's authority to issue such other telecommunications standards, specifications, requirements, and procurement rules as may be promulgated from time to time by RUS including, without limitation, those set forth in 7 CFR part 1755.

(d) The Modernization Plan must, at a minimum, apply to RUS Borrowers' wireline service areas. If a Modernization Plan is developed by the PUC, RUS encourages, but does not require, that the Modernization Plan's requirements apply to the rural service areas of all providers of telecommunications services in the State. A PUC's decision not to include non-RUS Borrowers will not prejudice RUS approval of that PUC's Modernization Plan. The PUC may also, at its option, extend coverage of the Modernization Plan to all service areas of all providers of telecommunications services in the State. In addition, while the requirements and goals contained in § 1751.106 apply only to wireline services, the PUC, at its discretion, may extend coverage of Modernization Plans to wireless or other communications services in the State as it deems appropriate. Borrower-developed Modernization Plans apply only to Borrowers.

§ 1751.102 Modernization Plan Developer; eligibility.

(a) Each PUC is eligible until February 13, 1996 to develop a proposed Modernization Plan and deliver it to RUS. RUS will review and consider for approval all PUC-developed Modernization Plans received by RUS within this one year period. The review and approval, if any, may occur after the one year period ends even though the PUC is no longer eligible to submit a proposed Modernization Plan.

(b) The PUC must notify all Telecommunications Providers in the State and other interested parties of its intent to develop a proposed Modernization Plan. The PUC is encouraged to consider all Telecommunications Providers' and interested parties' views and incorporate these views into the

7 CFR Ch. XVII (1-1-97 Edition)

Modernization Plan. In the event that the PUC does not intend to develop a proposed Modernization Plan, RUS requests that the PUC inform RUS of this decision as soon as possible.

(c)(1) If the PUC is no longer eligible to develop a Modernization Plan or has informed RUS that it will not develop a Modernization Plan, as described in paragraphs (a) and (b) of this section, a majority of the Borrowers within the State may develop the Modernization Plan. If a majority of Borrowers develops the Modernization Plan, the following apply:

(i) All Borrowers shall be given reasonable notice of and shall be encouraged to attend and contribute to all meetings and other proceedings relating to the development of the Modernization Plan; and

(ii) Borrowers developing a Modernization Plan are encouraged to solicit the views of other providers of telecommunications services and interested parties in the State.

(2) There is no time limit placed on Borrowers to develop a Modernization Plan. Borrowers should be aware that certain types of loans may be restricted until a Modernization Plan is approved. See § 1751.103.

§ 1751.103 Loan and loan advance requirements.

(a) For information about loan eligibility requirements in relation to the Modernization Plan, see 7 CFR part 1735. In particular, beginning February 13, 1996, RUS will make RUS hardship loans, RUS cost-of-money loans, and RTB loans for facilities and other RE Act purposes in a State only if:

(1) The State has an RUS approved Modernization Plan; and

(2) The Borrower to whom the loan is to be made is participating in the Modernization Plan for the State. A Borrower is considered to be participating if, in RUS's opinion, the purposes of the loan requested by the Borrower are consistent with the Borrower achieving the requirements stated in the Modernization Plan within the timeframe stated in the Modernization Plan unless RUS has determined that achieving the requirements is not technically or economically feasible.

(b) With regard to the three types of loans discussed in paragraph (a), only loans approved after the date the State has an RUS approved Modernization Plan are subject to complying with the Modernization Plan.

(c) For loans subject to complying with the Modernization Plan, advances will not be made if, in RUS's opinion, the advances are not consistent with achieving the requirements of the Modernization Plan.

§1751.104 Obtaining RUS approval of a proposed Modernization Plan.

(a) To obtain RUS approval of a proposed Modernization Plan, the Plan Developer must submit the following to RUS:

(1) A certified copy of the statute or PUC order, if the PUC is the Plan Developer, or a written request for RUS approval of the proposed Modernization Plan signed by an authorized representative of the Plan Developer, if a majority of Borrowers is the Plan Developer; and

(2) Three copies of the proposed Modernization Plan.

(b) Generally, RUS will review the proposed Modernization Plan within (30) days and either:

(1) Approve the Modernization Plan if it conforms to the provisions of this subpart in which case RUS will return a copy of the Modernization Plan with notice of approval to the Plan Developer; or

(2) Not approve the proposed Modernization Plan if it does not conform to the provisions of this subpart. In this event, RUS will return the proposed Modernization Plan to the Plan Developer with specific written comments and suggestions for modifying the proposed Modernization Plan so that it will conform to the provisions of this subpart. If the Plan Developer remains eligible, RUS will invite the Plan Developer to submit a modified proposed Modernization Plan for RUS consideration. This process can continue until the Plan Developer gains approval of a proposed Modernization Plan unless the Plan Developer is a PUC whose eligibility has expired. If a PUC's eligibility has expired, RUS will return the proposed Modernization Plan unapproved. Because RUS does

not have authority to extend the term of a PUC's eligibility, RUS recommends that the PUC submit a proposed Modernization Plan at least 90 days in advance of February 13, 1996 to allow time for this process.

§1751.105 Amending a Modernization Plan.

(a) RUS understands that changes in standards, technology, regulation, and the economy could indicate that an RUS-approved Modernization Plan should be amended.

(b) The Plan Developer of the Modernization Plan may amend the Modernization Plan if RUS finds the proposed changes continue to conform to the provisions of this subpart.

(c) The procedure for requesting approval of an amended Modernization Plan is identical to the procedure for a proposed Modernization Plan except that there are no time limits on the eligibility of the Plan Developer.

(d) The existing Modernization Plan remains in force until RUS has approved the proposed amended Modernization Plan.

(e) RUS may from time to time revise these regulations to incorporate newer technological and economic standards that RUS believes represent more desirable goals for the future course of telecommunications services. Such revisions will be made in accordance with the Administrative Procedure Act. These revisions shall not invalidate Modernization Plans approved by RUS but shall be used by RUS to determine whether to approve amendments to Modernization Plans presented for RUS approval after March 15, 1995.

§1751.106 Modernization Plan; requirements.

(a) The requirements for a Modernization Plan as stated in RELRA are:

(1) The plan must provide for the elimination of party line service.

(2) The plan must provide for the availability of telecommunications services for improved business, educational, and medical services.

§ 1751.106

7 CFR Ch. XVII (1–1–97 Edition)

(3) The plan must encourage and improve computer networks and information highways for subscribers in rural areas.

(4) The plan must provide for—

(i) Subscribers in rural areas to be able to receive through telephone lines—

(A) Conference calling;

(B) Video images; and

(C) Data at a rate of at least 1,000,000 bits of information per second; and

(ii) The proper routing of information to subscribers.

(5) The plan must provide for uniform deployment schedules to ensure that advanced services are deployed at the same time in rural and nonrural areas.

(6) The plan must provide for such additional requirements for service standards as may be required by the Administrator.

(b) To implement the requirements of the law described in paragraph (a) of this section, RUS has set minimum requirements as described in paragraphs (i) and (j) of this section. They are grouped into short-term and medium-term requirements. RUS has also included long-term goals which are not requirements. The Modernization Plan must meet all of the statutory requirements of RELRA and shall provide that short- and medium-term requirements be implemented as set forth in this section of the regulation except that the PUC, if it is the Plan Developer, or RUS, if a majority of Borrowers is the Plan Developer, may approve extensions of time if the required investment is not economically feasible or if the best available telecommunications technology lacks the capability to enable the Telecommunications Provider receiving the extension to comply with the Modernization Plan. Extensions shall be granted only on a case-by-case basis and generally shall not exceed a total of five years from the first such extension granted to the Telecommunications Provider.

(c) Each State's Modernization Plan shall be a strategic development proposal for modernizing the telecommunications network of the Telecommunications Providers covered by the Modernization Plan. In addition to implementing the requirements described in paragraphs (a), (i), and (j) of

this section, the Modernization Plan shall include a short engineering description of the characteristics of a future telecommunications structure that would enable all Telecommunications Providers to achieve the requirements and goals of the Modernization Plan.

(d) Within the scope of § 1751.101(d), if the Plan Developer is the PUC, the Modernization Plan shall name the Telecommunications Providers in the State, in addition to Borrowers, that are covered by the Modernization Plan.

(e) The Modernization Plan must require that the design of the network provided by Telecommunications Providers allow for the expeditious deployment and integration of such emerging technologies as may from time to time become commercially feasible.

(f) The Modernization Plan must provide guidelines to Telecommunications Providers for the development of affordable tariffs for medical links and distance learning services.

(g) With regard to the uniform deployment requirement of the law restated in paragraph (a)(5) of this section, if services cannot be deployed at the same time, only the minimum feasible interval of time shall separate availability of the services in rural and nonrural areas.

(h) The Modernization Plan must make provision for reliable powering of ordinary voice telephone service operating over those portions of the telecommunications network which are not network powered. In the event of electric utility power outages, an alternative source of power must be available to ensure reliable voice service.

(i) *Short-term requirements.* (1) The "short-term requirements start date" is the date one year after the date RUS approves the Modernization Plan for the State.

(2) All New Facilities providing Wireline Service after the short-term requirements start date, even if the construction began before such date, shall be constructed so that:

(i) Every subscriber can be provided 1-party service.

(ii) The New Facilities are suitable, as built or with additional equipment, to provide transmission and reception

Rural Utilities Service, USDA

Pt. 1753

of data at a rate no lower than 1 Mb/sec.

(3) All switching equipment installed by a Telecommunications Provider after the short-term requirements start date shall be capable of:

(i) Providing custom calling features. At a minimum, custom calling features must include call waiting, call forwarding, abbreviated dialing, and three-way calling; and

(ii) Providing E911 service for areas served by the Telecommunication Provider when requested by the government responsible for this service.

(j) *Medium-term requirements.* (1) The “medium-term requirements start date” is the date six years after the date RUS approves the Modernization Plan for the State, or such earlier date as the Modernization Plan shall provide.

(2) All New Facilities providing Wireline Service after the medium-term requirements start date, even if the construction began before such date, shall be capable, as built or with additional equipment, of transmitting video to a subscriber. The video must be capable of depicting a reasonable representation of motion. The frame rate, resolution, and other measures of audio and video quality shall be determined by the Plan Developer.

(3) No later than the medium-term requirements start date, all switching equipment of Telecommunications Providers covered by the Modernization Plan must be capable of providing E911 service when requested by the government responsible for this service.

(4) No later than five years after the medium-term requirements start date, one-party service must be provided upon demand to any subscriber of a Telecommunications Provider covered by the Modernization Plan.

(k) *Long-term goals.* RUS suggests, but does not require, that the provisions of each Modernization Plan be consistent with the accomplishment of the following:

(1) The elimination of party line service.

(2) For subscribers that desire the service, universal availability of:

(i) digital voice and data service (56–164 kb/sec).

(ii) service that provides transmission and reception of high bit rate (no less than 1 Mb/sec) data.

(iii) service that provides reception of video as described in paragraph (j)(2) of this section.

PART 1753—TELECOMMUNICATIONS SYSTEM CONSTRUCTION POLICIES AND PROCEDURES

Subpart A—General

Sec.

1753.1 General.

1753.2 Definitions.

1753.3 Preconstruction review.

1753.4 Major and minor construction.

1753.5 Methods of major construction.

1753.6 Standards, specifications, and general requirements.

1753.7 Plans and specifications (P&S).

1753.8 Contract construction procedures.

1753.9 Subcontracts.

1753.10 Preconstruction conference.

1753.11 Contract amendments.

1753.12—1753.14 [Reserved]

Subpart B—Engineering Services

1753.15 General.

1753.16 Architectural services.

1753.17 Engineering services.

1753.18—1753.20 [Reserved]

EDITORIAL NOTE: Nomenclature changes to part 1753 appear at 55 FR 39397, Sept. 27, 1990.

7 CFR Ch. XVII (1-1-97 Edition)

Subpart A—General

SOURCE: 54 FR 39267, Sept. 25, 1989, unless otherwise noted. Redesignated at 55 FR 39396, Sept. 27, 1990.

§ 1753.1 General.

(a) The standard RUS Telephone Loan Documents contain provisions regarding procurement of materials and equipment and construction of telecommunication facilities by telephone borrowers. This part 1753 implements certain of the provisions by setting forth the requirements and procedures to be followed by borrowers for purchasing materials and equipment and construction of telecommunication facilities by contract or force account.

(b) The typical procedure followed in constructing a project financed by an RUS loan begins with the prospective borrower obtaining the necessary preloan engineering and developing a complete loan application, including an LD (See 7 CFR part 1737). If a loan is approved and all prerequisites to advance of funds are satisfied, the borrower may proceed with the purchase and installation of materials and equipment and the construction of telephone facilities pursuant to this part 1753. Subpart A describes

(1) RUS's general requirements with respect to steps to be taken after the loan is approved and before construction begins (See § 1753.3),

(2) RUS requirements with respect to methods of construction (See §§ 1753.5 and 1753.6),

(3) RUS requirements regarding sealed competitive bidding and negotiated bidding of construction contracts (See §§ 1753.6 and 1753.9),

(4) RUS standards for materials, equipment, and construction financed with loan funds (See § 1753.7), and

(5) RUS requirements for subcontracts and contract amendments covering construction financed with loan funds (See §§ 1753.10 and 1753.12).

(c) Each borrower is responsible for the construction of its facilities and for the procurement of materials and equipment that are best suited to its needs.

(d) If contracts, P&S, or other methods of procurement are subject to RUS approval pursuant to the provisions of

Rural Utilities Service, USDA

§ 1753.2

the loan contract, as implemented by this part, RUS will review the documents or proposals submitted and notify the borrower in writing of approval or disapproval. RUS may withhold approval if, in RUS's judgment:

(1) The P&S or contract will not accomplish loan purposes.

(2) Provisions of the P&S or contract will add unnecessary expense to the project.

(3) The proposal, method of procurement, or P&S do not conform to RUS engineering criteria or construction standards, or if they present unacceptable loan security risks to RUS.

(4) The P&S or contract have been modified.

(e) The requirements and procedures covering procurement of architectural and engineering services are described in subpart B of this part.

(f) Single copies of RUS forms cited in this part are available from Administrative Services Division, Rural Utilities Service, United States Department of Agriculture, Washington, DC 20250-1500. These RUS forms may be reproduced.

§ 1753.2 Definitions.

For the purpose of this part 1753:

Alternate—A solicitation for a bid adjustment for a specified deviation from the Plans and Specifications.

Architect—A person registered as an architect in the state where construction is performed, or a person on the borrower's staff, approved by RUS, authorized to perform architectural services.

Bid guarantee—A bid bond or certified check required of contractors bidding on construction work to ensure that the bidder, if successful, will furnish a satisfactory performance bond ensuring completion of work.

Central office building—The facility housing the central office equipment.

Central office equipment—Switching and signaling equipment that performs call origination and completion functions for subscribers.

Closeout documents—The documents required to certify satisfactory completion of all obligations under a contract or force account proposal.

Construction—Purchase and installation of telecommunications facilities

in a borrower's system using loan funds.

Contract—The agreement between the borrower and an independent contractor covering the purchase, construction, or both of telephone facilities to be included in the borrower's telephone system.

Contract construction—Construction and installations performed using an RUS contract form. See 7 CFR 1755.93.

Engineer—A person registered as an engineer in the state where construction is performed, or a person on the borrower's staff, approved by RUS, authorized to perform engineering services.

FAP (force account proposal)—The borrower's detailed plans submitted to RUS for force account construction.

Force account construction—Construction performed by the borrower's employees under an RUS approved FAP, with the borrower furnishing all materials, equipment, tools, and transportation.

FRS—RUS Form 481 (OMB control number 0572-0023), Financial Requirement Statement.

GFR—RUS General Field Representative.

Installation—The act of setting up or placing in position equipment for service or use in the borrower's system.

Interim construction—The purchase of equipment or the conduct of construction under an RUS-approved plan of interim financing. See 7 CFR part 1737.

Interim financing—Funding for a project which RUS has acknowledged may be included in a loan, should said loan be approved, but for which RUS loan funds have not yet been made available.

Labor and materials—All the labor and materials required for construction.

LD (loan design)—Supporting data for a loan application. See 7 CFR part 1737.

Loan—Any loan made or guaranteed by RUS. See 7 CFR part 1735.

Loan funds—Funds provided by RUS through direct or guaranteed loans. See 7 CFR part 1744 subpart C.

Major construction—A telephone plant project estimated to cost more than \$100,000, including all labor and materials.

§ 1753.3

7 CFR Ch. XVII (1–1–97 Edition)

Minor construction—A telephone plant project estimated to cost \$100,000 or less, including all labor and materials.

Minor errors or irregularities—A defect or variation in a seller's bid that is a matter of form and not of substance. Errors or irregularities are "minor" if they can be corrected or waived without being prejudicial to other bidders and when they do not affect the price, quantity, quality, or timeliness of construction. Unless otherwise noted, the borrower determines whether an error or irregularity is "minor."

Modernization plan. A plan, which has been approved by RUS, for improving the public switched network of a state. The modernization plan must conform to the provisions of 7 CFR part 1751, subpart B, and applies to all telecommunications providers in the state.

Negotiation—Any form of purchasing or contracting other than sealed competitive bidding. Any contract awarded without using the sealed competitive bidding procedure is a negotiated contract.

Outside plant—The facilities that conduct electrical or optical signals between the central office and the subscriber's network interface or between central offices.

Performance bond—A surety bond on a form satisfactory to RUS guaranteeing the contractor's faithful performance of a contract.

P&S (plans and specifications)—An RUS contract form, the appropriate specifications, and such additional information and documents needed to provide a clear, accurate, and complete understanding of the installations to be made or construction to be performed.

Project—The construction or installation described in the P&S.

Responsive bid—A bid that complies with the requirements of the plans and specifications.

Sealed competitive bidding—A method of contracting that employs sealed competitive bids, public opening of bids, and award of the contract to the bidder submitting the lowest responsive bid. See § 1753.8.

Single source negotiation—Negotiating with a single source (contractor or seller).

Special equipment—Equipment used primarily for the transmission and enhancement of voice, data, carrier, radio and light signals, and other equipment and facilities, including incidental cable and other transmission equipment.

Subcontract—A secondary contract undertaking some of the obligations of a primary contract. Under all RUS forms of contract, the primary contractor bears full responsibility for the performance of the subcontractor.

Unbalanced bid—A bid which contains pricing for a task or material that is significantly higher or lower than pricing for similar tasks or materials.

Work order construction—Minor construction performed by the borrower's employees, pursuant to its work order procedure, with the borrower furnishing all materials, equipment, tools, and transportation.

[54 FR 39267, Sept. 25, 1989, unless otherwise noted. Redesignated at 55 FR 39396, Sept. 27, 1990, and amended at 58 FR 66259, Dec. 20, 1993; 59 FR 17464, Apr. 13, 1994]

§ 1753.3 Preconstruction review.

(a) Prior RUS approval must be obtained for any construction that does not conform to RUS standards and specifications or the approved LD, such as construction of extensions to serve subscribers in areas not included in the LD (See 7 CFR part 1737). For loans approved after RUS approval of the modernization plan in the borrower's state, the proposed construction must conform to the modernization plan, as required by 7 CFR part 1751, subpart B. To obtain approval, the borrower shall submit a written proposal containing:

(1) A description of the work, indicating any deviations from the approved LD or RUS standards and specifications.

(2) An engineering study covering the deviations if there are changes in the design.

(3) A cost estimate for labor, engineering, materials, and overheads.

(4) If applicable, a brief analysis from the borrower demonstrating that the proposed changes conform to the modernization plan.

(b) Before any construction, including interim construction, is initiated, the GFR shall meet with the borrower

Rural Utilities Service, USDA

§ 1753.6

to review the LD to determine if any significant changes have occurred since its approval by RUS. It is important that the design and construction of the proposed facilities be based on the latest information on subscriber needs.

(c) If the borrower and GFR agree that there have been no significant changes, the borrower may proceed.

(d) If the GFR finds that the LD is no longer satisfactory, the borrower shall prepare an amendment to the LD incorporating the necessary revisions (See 7 CFR part 1737). The borrower must obtain RUS approval of the LD amendment before proceeding with engineering activities on any project to be financed with loan funds.

[54 FR 39267, Sept. 25, 1989. Redesignated at 55 FR 39396, Sept. 27, 1990, and amended at 58 FR 66259, Dec. 20, 1993; 59 FR 17464, Apr. 13, 1994]

§ 1753.4 Major and minor construction.

RUS's general requirements for construction are set forth in this subpart A. Additional requirements and procedures for different types of major construction are presented in subparts D, E, F, G, and H (OMB control number 0572-0062). The requirements and procedures for minor construction are presented in subpart I. Borrowers may, at their option, follow the procedures in subparts D, E, F, G, and H for any minor construction.

§ 1753.5 Methods of major construction.

(a) All major construction projects financed by loan funds shall be performed pursuant to a contract approved by RUS and awarded through sealed competitive bidding unless

(1) A specific exception is granted in subparts D, E, F, G, or H, or

(2) Written RUS approval is obtained.

(b) *Contract construction.* (1) Whether the contractor is selected through sealed competitive bidding or negotiation, as approved by RUS, award of the contract is subject to RUS approval.

(2) The requirements and procedures for sealed competitive bidding are presented in § 1753.8(a). The requirements and procedures for negotiation are presented in § 1753.8(b).

(c) *Force account construction.* To obtain RUS approval of the force account method for major construction the borrower must demonstrate its ability to perform major construction based on past force account construction which fully met RUS construction standards and was as cost-effective as contract construction in the area. If the borrower has no record of past performance to support its request, but has adequate equipment and experienced personnel to perform the proposed construction, RUS may approve a small trial project. The requirements and procedures for force account construction are presented in subparts D, E, G, and H.

[54 FR 39267, Sept. 25, 1989. Redesignated at 55 FR 39396, Sept. 27, 1990, and amended at 59 FR 43716, Aug. 25, 1994]

§ 1753.6 Standards, specifications, and general requirements.

(a) Materials, equipment, and construction financed with loan funds must meet the standards and specifications established by RUS. 7 CFR part 1755 lists the RUS Bulletins containing the standards and specifications for telephone facilities. Materials and equipment meeting these standards are included on the List of Material Acceptable for Use on Telephone Systems of RUS Borrowers, RUS Bulletin 344-2. This bulletin may be obtained by subscription from the Superintendent of Documents, Government Printing Office, Washington, DC 20402.

(b) The borrower may use RUS loan funds to finance nonstandard construction materials or equipment only if approved by RUS in writing prior to purchase or commencement of construction.

(c) Only new materials and equipment may be financed with loan funds, unless otherwise approved by RUS.

(d) All materials and equipment financed with loan funds are subject to the "Buy American" provision (7 U.S.C. 901 *et seq.* as amended in 1938).

[54 FR 39267, Sept. 25, 1989. Redesignated at 55 FR 39396, Sept. 27, 1990, and amended at 59 FR 43716, Aug. 25, 1994]

§ 1753.7

7 CFR Ch. XVII (1–1–97 Edition)

§ 1753.7 Plans and specifications (P&S).

(a) The P&S consist of an RUS contract form, the appropriate RUS specifications, and such additional information and documents needed to provide a clear, accurate, and complete understanding of what is included in the construction.

(b) 7 CFR 1755.93 provides a list of the RUS forms of telecommunications contracts for use in purchasing telephone materials and equipment and for constructing telephone facilities with loan funds. Also listed is the source where copies may be obtained.

(c) The appropriate standards and specifications listed in 7 CFR part 1755 shall be included in the P&S. When RUS has not prepared standards and specifications, the borrower shall use general engineering requirements and functional specifications prepared by the borrower's engineer and approved by RUS.

(d) The P&S shall be based on the LD approved by RUS. Section 1753.3 presents the requirements and procedures for obtaining RUS approval for construction that does not conform to the LD approved by RUS.

(e) RUS approval of the P&S is required for major construction but not for minor construction, except as noted in subpart D.

(f) RUS will approve only contracts that will provide for at least the following requirements.

(1) *Equal employment opportunity provision.* If this provision is not already in the contract, RUS Contract Form 270, Equal Opportunity Addendum, shall be attached and made a part of the contract.

(2) *Liquidated damages provision.* (i) If not covered by the contract, an appropriate liquidated damages provision, in a form prescribed by RUS, shall be included and made a part of the contract

(ii) The liquidated damages must be based upon the borrower's best estimate of the damages it would incur as a result of the contractor's default.

(3) *Insurance and bond requirements.* (i) The insurance provision shall provide coverage as required by 7 CFR 1788.

(ii) A contractor's bond shall be furnished as required by 7 CFR part 1788.

(iii) The borrower is responsible for ensuring that its contractor complies with the insurance and bond requirements.

(4) Telecommunications software license provision. If the borrower is required to enter into a software license agreement in order to use the equipment, the contract must contain the RUS prepared Software License Agreement as an Addendum.

[54 FR 39267, Sept. 25, 1989. Redesignated at 55 FR 39396, Sept. 27, 1990, and amended at 59 FR 17679, Apr. 14, 1994]

§ 1753.8 Contract construction procedures.

(a) Sealed, competitive bidding—(1) *Bid opening date:* Upon approval of the P&S by RUS, the borrower shall schedule a bid opening date. In setting the date sufficient time should be allowed for bidders to examine the project site and prepare their bids. The borrower shall notify the GFR of the bid date selected and invite the GFR to attend.

(2) *Invitations to bid:* The borrower is responsible for sending invitations to prospective bidders and taking any other action necessary to procure full, free, and competitive bidding. The borrower should obtain from its engineer a list of prospective bidders and a recommendation indicating which bidders are considered qualified. The minimum number of contractors to be invited to bid on contracts for various types of facilities is set forth in subparts D, E, F, or H.

(3) *Qualifying bidders:* If the notice and instructions to bidders require that bidders show evidence of meeting certain requirements, the borrower shall qualify bidders before issuing P&S to them. Procedures for qualifying bidders are contained in subparts D, E, and F.

(4) *Receipt of bids:* The borrower shall write on the outside envelope of any bid or bid amendment, the date and time the bid was received. Any bid received from an unqualified bidder or after the time specified for opening shall be returned promptly to the bidder unopened.

(5) *Procedure when fewer than three bids are received:* If fewer than three valid bids are received, the borrower shall consult with RUS to determine

Rural Utilities Service, USDA

§ 1753.8

whether the bids are to be opened or returned unopened. RUS requires that the project be rebid if fewer than three bids are received and RUS determines that one or more other bidders with an express interest in bidding is available and could meet the bid requirements, but was not invited to bid. RUS shall also require rebidding if it is found that qualified bidders were discouraged from bidding by unreasonable bid requirements (such as late notification to bidders) or if the borrower fails to follow the bid procedure.

(6) *Conduct of bid openings:* The borrower shall conduct bid openings open to the public. The borrower should be able to contact its attorney for immediate consultation.

(7) *Review of bids:* The borrower shall review all bids prior to reading any bid results to determine that:

- (i) The bid guarantees are adequate.
- (ii) All minor errors or irregularities made through inadvertence are corrected or waived. Failing this, the bid shall be rejected as nonresponsive.
- (iii) In the event of non-minor errors or irregularities, the bid is rejected and the bid price not disclosed.

(8) *Reading of bids:* Bid prices shall not be read until the borrower has reviewed all bids to determine if there are any minor errors or irregularities that may affect the recommendation as to award. These shall be made public at the same time the bid price is announced.

(9) *Evaluating bids:* The borrower shall consider the same alternates in all bids in determining the low bid.

(10) *Rejection:* The borrower shall reject:

- (i) All bids if quoted prices are not acceptable or if the specifications were ambiguous and resulted in bidders having different interpretations of the requirements.
- (ii) Any bid that is not responsive, or is incomplete, or submitted by an unqualified bidder, or unbalanced between labor and materials or other respects.

(11) *Award of contract:* (i) The borrower shall obtain from the engineer the determination of the lowest responsive bid, a tabulation of all bids and the engineer's recommendation for award of the contract.

(ii) If an award is made, the borrower shall award the contract to the lowest responsive bidder, subject to RUS approval. The borrower may award the contract immediately upon determination of the lowest responsive bidder if the following conditions are met:

(A) The project is included in an approved loan and adequate funds were budgeted in the loan and are available.

(B) All applicable RUS procedures were followed, including those in the Notice and Instructions to Bid in the standard forms of contract.

(iii) The borrower shall send to RUS for consideration of approval of the award:

- (A) Two copies of the low bid.
- (B) The engineer's recommendation and the tabulation of all bids.
- (C) Evidence of acceptance of the low bid by the borrower, such as:
 - (1) Certified copy of board resolution or
 - (2) letter or telegram to RUS signed by a properly authorized corporate official.

(12) *Execution of contract:* (i) Upon approval by RUS of the award of contract by the borrower, the borrower shall submit to RUS three original counterparts of the contract executed by the contractor and borrower.

(ii) If RUS approves the contract, it shall return one copy to the borrower and send one copy to the contractor.

(b) *Negotiated construction contracts.* (1) For the construction of certain facilities the borrower may negotiate a contract rather than solicit sealed competitive bids. Refer to the appropriate subparts E, F, or H for specific requirements and procedures.

(2) For negotiated purchases, borrowers shall use RUS contract forms, standards, and specifications.

(3) For all contract forms except RUS Form 773:

(i) After a satisfactory negotiated proposal has been obtained, the borrower shall submit it to RUS for approval, along with the engineer's recommendation, and evidence of acceptance by the borrower.

(ii) If RUS approves the negotiated proposal, the borrower shall submit three copies of the contract, executed by the contractor and borrower, to RUS for approval.

§ 1753.9

(iii) If RUS approves the contract, RUS shall return one copy of the contract to the borrower and one copy to the contractor.

(4) For RUS Form 773, the borrower is responsible for negotiating a satisfactory proposal, executing contracts, and closing the contract. See subparts F and I of this part for requirements for major and minor construction, respectively, on Form 773.

[54 FR 39267, Sept. 25, 1989. Redesignated at 55 FR 39396, Sept. 27, 1990, and amended at 59 FR 43716, Aug. 25, 1994]

§ 1753.9 Subcontracts.

(a) RUS construction contract Forms 257, 397, 515, and 525 contain provisions for subcontracting. Reference should be made to the individual contracts for the amounts and conditions under which a contractor may subcontract work under the contract.

(b) RUS Form 282, Subcontract, shall be used for subcontracts under construction and installation contracts.

(1) Minor modifications or additions may be made to the subcontract form, as long as they do not change the intent of the primary contract. Any alterations to the subcontract shall be initialed and dated by the persons executing the subcontract.

(2) Subcontracts shall be prepared in quadruplicate and all copies executed by the contractor and subcontractor and consented to by the borrower and surety, if any.

(3) Four executed copies of the subcontract shall be forwarded to RUS for approval. Upon approval, one copy each will be sent to the borrower, contractor, and subcontractor.

(c) As stated in contract Forms 257, 397, 515, and 525, the contractor shall bear full responsibility for the acts and omissions of the subcontractor and is not relieved of any obligations to the borrower and to the Government under the contract.

(d) As stated in the contract, construction shall not be performed by the subcontractor before approval of the subcontract by RUS.

[54 FR 39267, Sept. 25, 1989. Redesignated at 55 FR 39396, Sept. 27, 1990, and amended at 59 FR 43716, Aug. 25, 1994]

7 CFR Ch. XVII (1–1–97 Edition)

§ 1753.10 Preconstruction conference.

The borrower shall conduct a conference, attended by the borrower, contractor, and resident engineer prior to the beginning of construction to provide an opportunity to discuss and agree on responsibilities, procedures, practices, and methods before the work begins. The borrower shall provide each participant with a copy of the conference results. The GFR shall be invited to attend this conference.

§ 1753.11 Contract amendments.

(a) The borrower must obtain RUS approval before execution of any amendment to a contract if

(1) The amendment alters the terms and conditions of the contract or changes the scope of the project covered by the contract regardless of the amount of the contract before amendment,

(2) The amendment increases the amount to be paid under the contract by 20% or more, or

(3) After amendment, the amount of the contract will be \$100,000 or more.

(b) Prior RUS approval to execute other contract amendments is not required. These amendments are to be submitted after execution to RUS for approval.

(c) For each amendment executed, the borrower shall make certain that:

(1) The contractor's bond covers the additional work to be performed. If the amendment by itself (or together with preceding amendments) increases the original contract price by 20% or more, a bond extension will be required to bring the penal sum of the bond to the total amended contract price.

(2) If an amendment covers construction in a county or state not included in the original contract, the borrower and contractor are licensed to do business in that location.

(d) Amendments are to be submitted in triplicate to RUS for approval with a copy of the board resolution or a letter signed by an authorized corporate official.

Rural Utilities Service, USDA

§ 1753.15

§§ 1753.12—1753.14 [Reserved]

Subpart B—Engineering Services

SOURCE: 54 FR 3984, Jan. 27, 1989, unless otherwise noted. Redesignated at 55 FR 39397, Sept. 27, 1990.

§ 1753.15 General.

(a)(1) The standard RUS Loan Documents (See 7 CFR part 1758) contain provisions regarding engineering and architectural services performed by or for RUS telephone borrowers. This part implements certain of the provisions by setting forth the requirements and procedures to be followed by borrowers in selecting architects and engineers and obtaining architectural and engineering services by contract or by force account.

(2) Preloan architectural and engineering services may be provided by qualified personnel on the borrower's staff or by consultants. Neither the selection of a preloan architect or engineer by a borrower, nor the contractual arrangements with them, requires RUS approval.

(3) Postloan architectural and engineering services shall be obtained by borrowers from registered architects and engineers licensed in the State in which the facilities will be located, except where RUS has approved the borrower to provide these services by the force account method. When the extent of the proposed major or minor construction is such that the postloan engineering involved is within the capabilities of employees on the borrower's staff, the borrower may request RUS approval to provide such services. This method of providing engineering services is referred to as force account engineering. Refer to § 1753.17(c).

(4)(i) For major construction, services provided by architects and engineers not on the borrower's staff must be provided under Form 165, Architectural Services Contract—Telephone, or Form 217, Postloan Engineering Service Contract—Telephone. These contracts require RUS approval.

(ii) For minor construction, borrowers may use the contracts in § 1753.15(a)(4)(i) for postloan architectural or engineering services or any other form of contract, such as Form

245, Engineering Service Contract, Special Services—Telephone. RUS approval of contracts for postloan architectural or engineering services associated with minor construction, except for buildings covered in § 1753.15(a)(5), is not required.

(5) For buildings to be constructed with RUS funds, postloan architectural or engineering services shall be obtained if (1) the construction cost exceeds \$50,000 (prefab buildings using manufacturer's specifications approved by RUS are exempt from this requirement) or (2) soil or seismic conditions require special design considerations.

(b) For the purpose of this subpart B:

(1) *Contract*—The services contract between the borrower and its architect or engineer.

(2) *Force Account Engineering*—Any preloan or postloan engineering services performed by the borrower's staff.

(3) *Postloan engineering services*—The design, procurement, and inspection of construction to accomplish the objectives of a loan as stated in a LD approved by RUS.

(4) *Preloan engineering services*—The planning and design work performed in preparing a LD. This consists of helping the borrower determine the objectives for a loan, including consideration of RUS's requirements relating to the modernization plan, selecting the most effective and efficient methods of meeting loan objectives, and preparing the LD which describes the objectives and presents the method selected to meet them.

(c) Single copies of RUS forms and publications cited in this part are available free from Administrative Services Division, Rural Utilities Service, United States Department of Agriculture, Washington, DC 20250-1500. These forms and publications may be reproduced.

(d)(1) All outside architects and engineers employed by RUS telephone borrowers shall have insurance coverage as required by 7 CFR part 1788.

(2) Borrowers shall ensure that their architects and engineers comply with the insurance requirements of their contracts. See 7 CFR 1788.54.

(e)(1) Borrowers shall make prompt payments to architects and engineers as required by the contract.

§ 1753.16

7 CFR Ch. XVII (1–1–97 Edition)

(2) RUS shall not make loan funds available for late payment interest charges.

[54 FR 3984, Jan. 27, 1989. Redesignated at 55 FR 39397, Sept. 27, 1990, and amended at 58 FR 66259, Dec. 20, 1993; 59 FR 17464, Apr. 13, 1994]

§ 1753.16 Architectural services.

(a) The borrower shall be responsible for selecting an architect to perform the architectural services required in the design and construction of buildings.

(b)(1) When contracting for architectural services for major construction, the borrower shall use Form 165, except for unattended central office buildings, in which case either Form 165 or Form 217 shall be used. Except for preloan studies (see 7 CFR part 1737), the borrower shall incur no obligation for architectural services until RUS has approved this agreement. A borrower shall not enter into the architectural services contract for major construction before RUS has approved the borrower's LD.

(2) Reasonable modifications or additions to the terms and provisions in Form 165 may be made in order to obtain the specific services needed for a particular undertaking. Changes shall not be made that relieve the architect of any of the responsibilities set forth in the standard form. Borrowers should obtain assistance from their legal counsel to ensure that the contracts are properly prepared and executed.

(3) If the fee schedule has to be modified in order for the borrower to obtain adequate architectural services, the borrower shall obtain written RUS approval of the revised fee schedule prior to executing contracts.

(4) Three copies of Form 165 executed by the borrower and the architect shall be sent to the GFR to be forwarded to RUS for approval. If RUS approves the contract, one copy will be sent to the architect and one to the borrower.

(5) Loan funds will not be available to pay for the preliminary architectural services if a loan is not made for the construction project, or if the construction project is abandoned.

(6) Subpart D of 7 CFR part 1753 sets forth the requirements and procedures to be followed by borrowers construct-

ing central office, warehouse, and garage buildings with RUS loan funds.

(c)(1) RUS telephone borrowers shall obtain two copies of a completed Form 284, Final Statement of Architect's Fees, when all services and obligations required under the architectural services contract have been completed. All fees shown on the statement shall be supported by detailed information where appropriate. For example: out-of-pocket expense, cost plus, and per diem types of compensation shall be listed separately with labor, transportation, etc., itemized for each service involving these types of compensation.

(2) If Form 284 and supporting data are satisfactory, the borrower shall approve the statement, sign both copies, and send one copy to the GFR.

(3) Upon approval of Form 284 by RUS, the borrower shall promptly make final payment to the architect.

[54 FR 3984, Jan. 27, 1989. Redesignated at 55 FR 39397, Sept. 27, 1990, and amended at 59 FR 43717, Aug. 25, 1994]

§ 1753.17 Engineering services.

(a)(1) All engineering services required by a borrower to support its application for a loan shall be rendered by a qualified engineer selected by the borrower or by qualified employees on the borrower's staff. The selection of the preloan engineer, the form of preloan engineering service contract, and the contract itself, are not subject to RUS approval. Borrowers, however, should discuss their proposed method of obtaining preloan engineering services with the GFR before proceeding with any arrangements.

(2) Form 835, Preloan Engineering Service Contract, Telephone System Design, is a suggested form of preloan engineering service contract. While use of this form of contract is not required, it will be helpful in determining the tasks to be performed. Any form of contract used shall specify that preloan engineering services conform to RUS requirements for preloan studies. See subpart D of 7 CFR part 1737.

(b)(1) *Major construction.* (i) Three copies of Form 217 executed by the borrower and the engineer shall be sent to the GFR to forward to RUS for approval. The engineer's estimate of the

Rural Utilities Service, USDA

§ 1753.17

engineering fees, on Form 506, shall be included.

(ii) RUS will review the contract terms and conditions. RUS will not approve the contract if, in RUS's judgment:

(A) Unacceptable modifications have been made to the contract form.

(B) The contract will not accomplish loan purposes.

(C) The engineering service fees are unreasonable.

(D) The contract presents unacceptable loan security risk to RUS. (See 7 CFR part 1758).

(2) *Minor construction.* When a borrower contracts for an engineering firm to inspect and certify construction accounted for under the work order procedure or the Contract for Miscellaneous Construction Work and Maintenance Services, Form 773 (See 7 CFR part 1753 subpart I), the borrower shall require that the certification be signed by a licensed engineer.

(c)(1) *Major construction.* When the extent and complexity of the proposed construction is such that the engineering involved is within the capabilities of employees on the borrower's staff, borrowers may request RUS approval to provide such services.

(i) The request shall include:

(A) A description of services to be performed.

(B) The name and qualifications of the employee to be in charge. RUS requires this employee to meet the State experience requirements for registered engineers. In the absence of specific State experience requirements, the employee must have at least eight years experience in the design and construction of telecommunication facilities, with at least two years of the work experience at a supervisory level. RUS does not require professional registration of this employee, but this does not relieve the borrower from compliance with applicable State registration requirements which may require a licensed individual to perform such services.

(C) The names, qualifications, and responsibilities of other principal employees who will be associated with providing the engineering services. Form 179 may be used to submit the employee qualifications.

(D) A letter signed by an authorized representative of the borrower authorizing the engineering services to be performed by force account and certifying the information supporting the request.

(ii) RUS shall notify the borrower by letter of approval or disapproval to perform force account engineering. The letter shall set forth any conditions associated with an approval or the reasons for disapproval.

(iii) RUS's approval of force account engineering for major construction shall be only for the specific projects named in the notice of approval.

(2) *Minor construction.* (i) When the borrower proposes to perform the inspection and certification of minor construction, the following shall be submitted to the RUS:

(A) A copy of the employee's qualifications and experience record on Form 179, unless previously submitted. RUS requires a minimum of four years of construction and inspection experience. The employee cannot be engaged in the actual construction.

(B) A letter signed by an authorized representative of the borrower authorizing the performance of these services by the employee, subject to RUS approval, and certifying the supporting information.

(ii) RUS shall notify the borrower by letter of approval or disapproval of the borrower's staff employee to perform the inspection and certification of construction. The approval shall be limited to the employee's area of expertise.

(d)(1) Subject to the requirements of this part and other applicable regulations, RUS will make loan funds available for the architectural and engineering services up to the amounts included in the approved loan.

(2) Advance of funds shall be requested on an FRS as set forth in 7 CFR part 1744 subpart C.

(e) The borrower shall obtain status of contract and force account proposal reports from the engineer once each month. The report shall show for each contract or FAP the approved contract or FAP amount, the date of approval, the scheduled date construction was to begin and the actual date construction began, the scheduled completion date,

§ 1753.25

the estimated or actual completion date, the estimated or actual date of submission of closeout documents, and an explanation of delays or other pertinent data relative to progress of the project. One copy of this report shall be submitted to the GFR.

(f)(1) Upon completion of all services required under the engineering service contract Form 217, the borrower shall obtain from the engineer four copies of the Final Statement of Engineering Fee, Form 506.

(2) If the statement is satisfactory, the borrower shall sign all copies and send three to the GFR.

(3) After RUS approval of Form 506, one copy shall be sent to the borrower and one copy sent to the engineer.

(4) The borrower shall promptly make final payment to the engineer.

[54 FR 3984, Jan. 27, 1989. Redesignated at 55 FR 39397, Sept. 27, 1990, and amended at 59 FR 43717, Aug. 25, 1994]

§§ 1753.18—1753.20 [Reserved]

Subpart C—[Reserved]

Subpart D—Construction of Buildings

SOURCE: 54 FR 39267, Sept. 25, 1989, unless otherwise noted. Redesignated at 55 FR 39396, Sept. 27, 1990.

§ 1753.25 General.

(a) This subpart implements and explains the provisions of the Loan Documents setting forth the requirements and the procedures to be followed by borrowers in constructing central office, warehouse, and garage buildings with loan funds.

(b) Terms used in this subpart are defined in § 1753.2.

(c) All plans and specifications for buildings to be constructed with loan funds are subject to the approval of RUS. Refer to § 1753.26 for further instructions.

(d) RUS Contract Form 257, Contract to Construct Buildings, shall be used for the construction of all central office, warehouse, and garage buildings with loan funds. Refer to § 1753.26 (b) and (c) for further instructions.

7 CFR Ch. XVII (1–1–97 Edition)

(e) The borrower shall use the sealed competitive bid procedure for all building construction, except for:

(1) Minor construction using subpart I procedures.

(2) Major construction, where the borrower has received advanced approval to perform the construction by force account.

Refer to §§ 1753.27 and 1753.29 for further instructions.

(f) The site location, design, and construction of the facilities must comply with all applicable laws and regulations, including:

(1) Pub. L. 90–480 (42 U.S.C. 4151) (Access to Physically Handicapped), which requires certain buildings financed with Federal funds be designed and constructed to be accessible to the physically handicapped.

(2) Pub. L. 91–596 (29 U.S.C. 651) the Occupational Safety and Health Act of 1970. OSHA issues rules and regulations covering occupational safety and health standards for buildings. These regulations are codified in 29 CFR chapter XVII.

(3) 7 CFR part 1794, which provides for compliance with the National Environmental Policy Act (NEPA) and Council on Environmental Quality (CEQ) regulations (40 CFR parts 1500–1508) implementing the procedural provisions of NEPA, as well as RUS's conformance with other laws, regulations, and Executive Orders regarding environmental protection.

(4) 7 CFR part 1792, subpart C, which requires that the building design comply with applicable seismic design criteria. Prior to the design of buildings, borrowers shall submit to RUS a written acknowledgement from the architect or engineer that the design will comply.

(g) All construction pertaining to the building structure shall be performed under one contract. Separate contracts may be used for planting shrubbery, surfacing of roads and parking areas, and other identifiable parts of the project not pertaining to the building structure. These separate contracts shall also be subject to RUS approval as described in this subpart D.

(h) The borrower is responsible for submitting evidence, satisfactory to RUS, establishing that clear title to

Rural Utilities Service, USDA

§ 1753.28

the building site has been obtained. RUS will not approve the construction contract until it has given title clearance.

[54 FR 39267, Sept. 25, 1989. Redesignated at 55 FR 39396, Sept. 27, 1990, and amended at 59 FR 43717, Aug. 25, 1994]

§ 1753.26 Plans and specifications (P&S).

(a) The borrower shall prepare P&S for construction of all buildings. Each set of P&S shall include:

(1) RUS Contract Form 257, Contract to Construct Buildings, completed to the extent explained in § 1753.26(b).

(2) Complete and detailed specifications covering materials and workmanship.

(3) A detailed building plan. Where the building is to house electronic apparatus, the detailed plan or specifications shall include the equipment environmental requirements and special equipment required.

(4) A site plan for each building showing the building location and giving the legal description of the site. Sufficient information must be provided for the site so that it can be identified as the same property on which title opinion was submitted to RUS. The legal description shall be typed on the site plan. The borrower shall also furnish topographical information and a description of any proposed site development work and show proposed connections for public utilities.

(b) RUS Contract Form 257 shall be completed as follows:

(1) *List of names or kinds of buildings and locations*—Site plan and specifications must be identified with the appropriate building.

(2) *Alternates*—The borrower shall keep the number of alternates to a minimum. Items for which alternates are to be taken shall be fully described on a separate sheet in the specifications and the details shown on the plans, when necessary, and identified by the alternate number. The Notice and Instructions to Bidders shall explain how bids will be evaluated with respect to alternates.

(3) *Time for construction*—A reasonable time for completion of construction, considering local conditions, shall be determined by the borrower and in-

serted in the space provided. Too short a construction period may discourage bidders or influence their bids. Completion of the building, where central office equipment is involved, shall be coordinated with delivery of the equipment. The time of completion shall allow adequate drying time before the central office equipment is stored or installed in the building.

(c) The plans and specifications shall show the identification and date of the model code used for seismic safety design considerations, and the seismic factor used. See 7 CFR part 1792, subpart C.

(d) Two sets of the building plans and specifications shall be prepared and submitted to the GFR.

[54 FR 39267, Sept. 25, 1989. Redesignated at 55 FR 39396, Sept. 27, 1990, and amended at 59 FR 43717, Aug. 25, 1994]

§ 1753.27 Bidding procedure.

Upon RUS approval of the P&S, the borrower shall proceed as follows:

(a) Bid documents shall consist of a copy of the approved P&S, including RUS Contract Form 257, completed in accordance with the instructions on the cover of the form and the plot plans showing site development details. For contracts in amounts of \$100,000 or less, the borrower must specify in the Notice and Instructions to Bidders whether the contractor will be required to furnish a performance bond or a builder's risk policy.

(b) The borrower shall determine that title to the real estate has been approved by RUS before the invitations to bid are released.

(c) The borrower shall set the time for opening of bids, allowing ample time for bidders to prepare bids.

(d) The borrower shall solicit bids as set forth in § 1753.8(a)(2). Invitations shall be sent to at least six prospective bidders.

(e) The borrower shall conduct bid opening and award of contract in accordance with the procedure set forth in § 1753.8(a).

§ 1753.28 Contract amendments.

(a) The general requirements for contract amendments are set forth in § 1753.11.

§ 1753.29

(b) The borrower shall prepare construction contract amendments on RUS Contract Form 238, Construction or Equipment Contract Amendments. See 7 CFR 1755.93 to obtain copies of Form 238.

§ 1753.29 Force account procedures.

(a) The borrower must obtain RUS approval of the force account method of construction of buildings in advance in order to obtain RUS financing.

(b) The borrower shall prepare the P&S in accordance with § 1753.26.

(c) Prior to any construction activity or the purchase of materials or equipment, the borrower shall submit the FAP in duplicate to RUS, accompanied by a resolution indicating approval of the board of directors of the borrower or a letter signed by an authorized corporate official. The proposal shall include:

(1) A Copy of the P&S.

(2) An itemized list of all items of materials required for construction.

(3) A construction schedule showing the estimated construction period for each major construction item.

(4) An estimate of the material and labor and other costs for any construction item not provided for in the approved loan.

(d) Force Account construction to be financed with loan funds shall not be started until RUS approval has been received by the borrower.

[54 FR 39267, Sept. 25, 1989. Redesignated at 55 FR 39396, Sept. 27, 1990, and amended at 59 FR 43717, Aug. 25, 1994]

§ 1753.30 Closeout procedures.

(a) This section outlines the procedure to be followed to close out RUS Contract Form 257 (Contract to Construct Buildings) and construction or rehabilitation performed by the force account method.

(b) *RUS Form 257 contract.* (1) Whenever changes were made in the plans and specifications which did not require an amendment under conditions set forth in § 1753.11 a final contract amendment showing the changes shall be prepared and submitted to RUS with the closeout documents.

(2) Immediately after completion of contract construction, including clean-up, the borrower shall:

7 CFR Ch. XVII (1–1–97 Edition)

(i) Arrange with its architect or engineer, contractor, and the GFR for final inspection of the project.

(ii) Furnish the contractor a summary of corrections or additions required to complete the project in accordance with the plans and specifications and the contract, and any contract amendments required to cover the corrections or additions.

(iii) Arrange, upon completion of the corrections by the contractor, to have its engineer prepare or obtain the documents listed in appendix A which are required for closeout of contract construction.

(iv) Make distribution of the completed documents as indicated in appendix A.

(c) Upon completion of force account construction, the borrower shall:

(1) Arrange with its architect or engineer and the GFR for final inspection of the project.

(2) Complete, with the assistance of its architect or engineer, the documents listed in appendix A of this part that are required for the closeout of force account construction.

(3) Make distribution of the completed documents as indicated in appendix A.

(d) Final payment shall not be made until RUS has approved the closeout documents.

[54 FR 39267, Sept. 25, 1989. Redesignated at 55 FR 39396, Sept. 27, 1990, and amended at 59 FR 43717, Aug. 25, 1994]

§§ 1753.31–1753.35 [Reserved]

Subpart E—Purchase and Installation of Central Office Equipment

SOURCE: 54 FR 39267, Sept. 25, 1989, unless otherwise noted. Redesignated at 55 FR 39397, Sept. 27, 1990.

§ 1753.36 General.

(a) This subpart implements and explains the provisions of the Loan Documents setting forth the requirements and the procedures to be followed by borrowers in purchasing and installing central office equipment financed with loan funds.

Rural Utilities Service, USDA

§ 1753.38

(b) Terms used in this subpart are defined in § 1753.2 and RUS Contract Forms 525 and 545.

(c) Borrowers shall use RUS Contract Form 525, Central Office Equipment Contract (Including Installation), when the firm supplying the equipment will install it and RUS Contract Form 545, Central Office Equipment Contract (Not Including Installation) when the supplier of the equipment will not be installing it. In either case the appropriate specifications shall be included in the contract.

(d) Alternates, if any, specified in the P&S shall be kept to a minimum.

(e) The borrower shall take sealed competitive bids for all central office equipment to be purchased under RUS Contract Form 525 or 545 using the procedure set forth in § 1753.38(a), unless RUS approval to negotiate is obtained.

(f) The borrower may request permission to negotiate with a single supplier for additional central offices to standardize equipment on a system basis. RUS approval to negotiate must be obtained before release of the plans and specifications to the supplier. Except for remote switching terminals associated with an existing central office, RUS will not approve negotiation with a non-domestic manufacturer for the purpose of standardization because such a purchase does not meet the RE Act "Buy American" provisions.

(g) Materials and equipment must meet the standards and general specifications approved by RUS. Materials and equipment included in RUS Bulletin 344-2 "List of Materials Acceptable for Use on Telephone Systems of RUS Borrowers" have been accepted as meeting these requirements. If the equipment is not included in the "List of Materials" but has been approved for field trial installation, the borrower must in each instance obtain field trial approval from RUS prior to entering into any agreement with a supplier.

(h) Only new equipment shall be purchased unless otherwise approved by RUS.

(i) All purchases of materials and equipment are subject to the "Buy American" requirements.

(j) If the sealed competitive bid procedure is followed, negotiation after bid opening will not be permitted.

§ 1753.37 Plans and specifications (P&S).

(a) *General.* (1) Prior to the preparation of P&S, the borrower shall review with the GFR the current and future requirements for central office equipment.

(2) The P&S shall specify the delivery and completion time required for each exchange.

(3) The P&S shall provide for a complement of spare parts to be provided to the borrower. The quantity and type of spare parts shall be determined in accordance with the provisions in RUS Form 522 "General Specification for Digital, Stored Program Controlled Central Office Equipment."

(4) P&S for equipment to be provided under a Form 545 contract shall require the supplier to provide specific installation information and a detailed bonding and grounding plan to be utilized by the engineer, borrower, and others responsible for the installation of the equipment.

(b) *Preparation of P&S.* (1) The P&S shall include RUS Contract Form 525 or 545, Notice and Instructions to Bidders, specifications for the required equipment for each exchange, provision for spare parts, and all other pertinent data needed by the bidder to complete its proposal.

(2) Guidelines for the preparation of the detailed equipment specifications are contained in the Telecommunications Engineering and Construction Manual (TE&CM), which is available from RUS.

(c) *Submission of P&S.* (1) Two sets of the P&S shall be submitted to the GFR for RUS review.

(2) RUS will review the P&S and notify the borrower of approval or disapproval.

(3) After approval of the P&S, one copy will be returned to the borrower.

§ 1753.38 Procurement procedures.

(a) *Sealed competitive bidding.* Sealed competitive bidding of central office equipment shall be in two steps: presentation and evaluation of suppliers' technical proposals, and compliance with the sealed competitive bidding procedure set forth in § 1753.8(a). The procedure is as follows:

(1) *Solicitation of bids.* (i) After RUS approval of the specifications and equipment requirements, the borrower shall send “Notice and Instructions to Bidders” to suppliers selected by the borrower with central office equipment included in the current “List of Materials Acceptable for Use on Telephone Systems of RUS Borrowers.” This “Notice” may also be sent to suppliers of non-domestic equipment currently accepted by RUS as meeting RUS technical standards. With RUS written approval, the “Notice” may also be sent to suppliers of central office equipment accepted for field trial.

(ii) The “Notice” must set forth the method of evaluating bids and must require the submission of equipment lists and traffic calculations with the bids.

(iii) RUS Contract Forms 525 or 545 shall be used, except that the “Notice” shall state that prior to the bid opening a technical session will be conducted with each supplier to resolve any questions related to the technical proposal submitted by the supplier. The suppliers’ technical proposals should be requested for presentation 30 days in advance of the bid opening to enable sufficient time to make the technical evaluation.

(iv) The borrower shall solicit bids as set forth in § 1753.8(a)(2). The “Notice” shall be sent to at least three prospective bidders. A copy of the “Notice” and a list of such bidders shall be sent to RUS.

(v) At the request of an invited supplier, the borrower shall provide two copies of the approved P&S.

(2) *Technical Sessions.* (i) The borrower shall schedule individual technical sessions by the suppliers, notify each supplier of its scheduled date and time, and request the following be available at the technical session:

(A) Lists of equipment, material and software.

(B) Proposed floor plan.

(C) Power and heat dissipation calculations.

(D) List of exceptions to plans and specifications.

(E) Protection and grounding requirements.

(F) Description of how office administration, maintenance and traffic col-

lection are handled with step-by-step examples and printouts.

(G) Explanation of processor and/or memory expansion required to meet ultimate size. This shall include discussions of software, processor memory, and hardware additions needed for line additions and the introduction of various future services; the relative costs of installing the necessary hardware and software initially as compared with the anticipated cost if installed at the time when the future services are to be offered.

(H) Description of how special equipment such as loop tests, volunteer fire alarm circuit, line load control, etc., will function.

(I) Description of method for translating initial office administration information into machine language, and proposal as to whether it will be done by the borrower or by the supplier.

(J) A software license agreement (if required by the manufacturer) in the form indicated in § 1753.38(c).

(K) Any other items pertinent to the technical proposal, such as information regarding changes that have been made in hardware and software of the equipment that is of like manufacture to that presently in operation in the borrower’s system. This shall include requirements for additional spare parts or training which have developed as a result of significant change in system device technology.

(ii) The borrower shall review in detail all exceptions to the P&S. No exceptions will be accepted unless all bidders are notified, in writing, of the change in the specifications and permitted to incorporate the change in their proposal.

(iii) If the technical proposal is not responsive, the borrower shall notify the supplier, in writing, that its proposal will not be given further consideration and why.

(iv) Changes in the P&S resulting from the technical sessions shall be subject to RUS’s review and approval.

(v) After evaluation of the technical proposals and RUS approval of changes to the P&S, sealed bids shall be solicited from only those bidders whose technical proposals meet the P&S requirements. When fewer than three bidders are qualified to bid, RUS approval

Rural Utilities Service, USDA

§ 1753.38

must be obtained to proceed. Generally, RUS will grant this approval only if all suppliers currently listed in the "List of Materials Acceptable for Use on Telephone Systems of RUS Borrowers" were invited to submit technical proposals.

(vi) The borrower shall invite the GFR to attend the technical sessions.

(3) *Bidding and award of contract:* (i) All bids must be completed, dated, and signed prior to submission.

(ii) The bid opening and award of contract shall be conducted in accordance with the procedure set forth in § 1753.8(a).

(iii) The spare parts bid shall always be priced separately and added to the base bid when determining the low bidder.

(b) *Single source negotiated procurement.* If RUS has approved the borrower's request to procure central office equipment through single source negotiation in accordance with requirements contained in § 1753.36(f), the borrower shall proceed in accordance with this subsection.

(1) After RUS approval of the P&S and equipment requirements, the borrower shall send two complete copies of the approved P&S to the supplier and request that a proposal be submitted.

(2) The borrower shall schedule a time and date for a technical session by the supplier and request that the items listed in § 1753.38(a)(2)(i) be available at the technical session. In addition to these items, the supplier shall be requested to provide a description of the exact differences in hardware and software between the borrower's existing equipment and the proposed equipment so that the borrower can determine spare parts interchangeability, need for retraining, and the compatibility of administration of the old and new equipment.

(3) Changes in the P&S resulting from the technical session shall be subject to RUS's review and approval.

(4) The submitted proposal shall be based on the agreed-upon results of the technical evaluation and must be complete, dated, and signed.

(5) The borrower shall obtain an award recommendation from its engineer based upon the engineer's detailed review of the proposal.

(6) The following shall be sent to RUS for review and approval:

(i) A copy of the engineer's recommendation to the borrower, and

(ii) Evidence of acceptance of the proposal by the borrower, such as

(A) A certified copy of the board resolution, or

(B) A letter to RUS signed by an authorized corporate official.

(7) RUS approval of the proposal will be conditioned upon the borrower obtaining prices that are consistent with current competitive prices. Upon RUS approval of the proposal, three copies of the contract shall be prepared with all specifications and proposal documents, and performance bonds, to be executed by the supplier and borrower.

(8) The three complete, executed contracts shall be sent to the RUS Area Engineering Branch Chief for approval.

(9) If RUS approves the contract, one copy will be returned to the borrower and one copy will be sent to the supplier.

(10) Installation of the central office equipment and materials provided under RUS Contract Form 545 may be made in accordance with subpart I, if applicable, or by an approved Force Account Proposal (FAP).

(c) *Software license agreement (Addendum 2).* The Addendum in this paragraph to RUS Form 525, Central Office Equipment Contract (Including Installation), and RUS Form 545, Central Office Equipment Contract (Not Including Installation), must be used with any central office equipment contract that requires a software license agreement and for which RUS financial assistance is to be provided.

Addendum 2—Software License Agreement

(1) *Definitions.* For the purpose of this Software License Agreement—

Contract means the RUS Form 525 Central Office Equipment Contract (Including Installation) or RUS Form 545 Central Office Equipment Contract (Not Including Installation),

dated _____, between

(the Licensee) and

(the Licensor).

Days means calendar days.

Licensed Software means the computer programs, furnished for the operation of the

System(s) provided under the Contract, whether contained on a tape, disc, semiconductor device, or other memory device or system memory consisting of logic instructions and instruction sequences in machine-readable object code, which manipulate data in the central processor, control and perform input/output operations, perform error diagnostic and recovery routines, control call processing, and perform peripheral control, administrative and maintenance functions; as well as Licensor's standard customer documentation, excluding source code, used to describe, maintain and use the programs provided under the Contract.

Licensee and *Licensor*, respectively, mean the parties signing the software license agreement as the licensee and licensor.

Right-to-Use Fee is defined in section (2).

Specifications means the RUS Form 522, General Specification for Digital, Stored Program Controlled Central Office Equipment, which is part of the Contract.

System means the stored program controlled central office and associated remote switching terminal or terminals which use the Licensed Software covered by this License.

(2) *Software License Provisions.* The Licensor may charge a fee, herein referred to as a Right-to-Use Fee, for use of the Licensed Software. The Right-to-Use Fee shall be included in the Total Base Bid as defined in the Contract. In consideration of the Right-to-Use Fee, the Licensor hereby grants the Licensee the right to use all Licensed Software, solely in connection with the System provided under this Contract, so that the System performs in accordance with the Contract and the Specifications.

(i) The Licensee's right to use the Licensed Software is non-exclusive and limited to use or operation in the United States of America, including its Territories, the Federated States of Micronesia, the Marshall Islands, Palau and the Commonwealth of Puerto Rico, with the System for which the Licensed Software is provided by the Licensor. The Licensee may reuse the equipment and its accompanying Licensed Software at another location within the Licensee's System without obtaining additional approvals from Licensor, provided, however, that the Licensee notify the Licensor, within ten (10) days, of the change in location of the equipment and Licensed Software.

(ii) The Licensee and any successor to the Licensee's title in the System may, without further consent of the Licensor, transfer the Licensed Software and all of the Licensee's rights and interests under this Software License to any transferee who acquires legal title to the System, provided that such transferee first agrees in writing to the Licensor to abide by all of the terms and conditions of this License including, without limitation, the territorial limitation stated in

section (2)(i) and the restrictions on decompiling or reverse assembly stated in section (2)(iii). Licensee shall give Licensor written notice thirty (30) days prior to any transfer. The Licensor shall not place any additional conditions on the transferee's use of the System or the Licensed Software. If the provisions of this section (2)(ii) are satisfied, thereafter the Licensee shall bear no responsibility for transferee's failure to abide by the terms and conditions of this License.

(iii) The Licensee shall take reasonable steps to protect the confidentiality of the Licensed Software and shall not decompile or reverse assemble all or any part of the Licensed Software to generate source code. The Licensee shall not make the Licensed Software available to any person except on a need to know basis. The obligations of the Licensee hereunder shall not extend to any information or data relating to the Licensed Software which is now available to the general public or becomes available by reason of the acts of the Licensor or third parties.

(iv) The Licensee may reproduce or copy the Licensed Software and related materials solely for the purpose of archival backup, in-house training and operating, maintaining, and administering the System provided under this Contract. In such reproduction, the Licensee shall include, upon all such copies of the Licensed Software, all proprietary notices, including the copyright notice within the Licensed Software program and related documentation in the form in which it is received from the Licensor.

(v) The Licensee acknowledges that the Licensed Software program is the property of the Licensor, and shall not do, or cause to be done, anything to activate any of the subsisting nonactivated computer instruction steps therein unless authorized in writing by the Licensor. The Licensor shall have the exclusive right to activate, or authorize the activation of, the subsisting nonactivated program instruction steps in the Licensed Software. In this event Licensee shall pay any additional Right-To-Use Fee(s) agreed to by Licensee and Licensor.

(vi) In the event the Licensor develops significant improvements to the Licensed Software, the Licensor may market the improvements as a separate offering requiring payment of an additional Right-to-Use Fee.

(vii) The Licensee shall not modify or otherwise change the Licensed Software other than at the direction of the Licensor. This provision shall not apply to:

(A) Changes to the Licensed Software which are necessary to preserve or restore service. Licensee shall use all reasonable efforts to contact Licensor before making any such changes. If the Licensor is unable to make the necessary changes promptly to the Licensed Software to preserve or restore service, then the Licensee may make only such changes to the Licensed Software as are

Rural Utilities Service, USDA

§ 1753.38

necessary to preserve or restore service. In such event, Licensee shall promptly notify Licensor of the changes made by Licensee.

(B) Changes made by the Licensee to its own database; and

(C) Changes made by the Licensee in connection with the exercise of its rights under section (2)(xi).

(viii) Within thirty (30) days after written notice that a program or a release thereof has been discontinued and is no longer required for the operation of the System and the Licensor has furnished the Licensee with a new program that is fully satisfactory to the Licensee, the Licensee agrees to return the original and all copies of the discontinued program and specified related documents. If such return is impossible or impractical, the Licensee shall destroy said program and documents and provide the Licensor with a written notice of such destruction.

(ix) The Licensor warrants to the Licensee that any Software licensed under this Software License shall function for a period of five (5) years from the warranty start date defined in the Contract in accordance with the Specifications and any written or printed technical material provided by the Licensor to explain the operation of the Licensed Software and aid in its use. The Licensor shall correct all deficiencies within thirty (30) days from the date of receipt by the Licensor of written notice of such deficiencies from the Licensee. An extension of this thirty (30) day period may be allowed only if agreed upon by the Licensee and RUS. It shall be the Licensor's obligation to insert and thoroughly test, at no charge to the Licensee, any software amendment or alteration provided to satisfy the obligations of this section (2)(ix). If a deficiency is detected or a correction made within the final ninety (90) days of the warranty, the warranty shall be extended to a date ninety (90) days after the deficiency has been corrected.

(x) The Licensor shall hold harmless and indemnify the Licensee from any and all claims, suits, and proceedings for the infringement of any patent, copyright, trademark, or violation of trade secrets covering any Licensed Software used with the System, except for items of the Licensee's design or selection. If the Licensee's use of the Licensed Software is enjoined, the Licensor shall promptly, at its own expense, place the Licensee in a position where it is able to use the System in accordance with the Specifications, whether by:

(A) Modifying the Licensed Software or portion thereof so that it no longer infringes but remains functionally equivalent,

(B) Replacing the Licensed Software with noninfringing equivalent software,

(C) Obtaining for the Licensee a license or other right to use, or

(D) Such other actions as may be required. This shall be in addition to any other rights or claims which the Licensee may have. The Licensor shall, at its own expense, (and the Licensee agrees to permit the Licensor to do so) defend any suits which may be instituted by any party against the Licensee for alleged infringement of patents, copyright, trademark, or violation of trade secrets relative to the Licensor's performance hereunder. Either party shall notify the other promptly of any such claims, and the Licensee shall give to the Licensor full authority and opportunity to settle such claims, and shall reasonably cooperate with the Licensor in obtaining information relative to such claims.

(xi) In the event the Licensor becomes unwilling or unable to furnish support required by the Contract for the Licensed Software, the Licensor shall, upon written request of the Licensee, provide with the greatest possible dispatch all Licensed Software back-up documentation including proprietary information other than agreed excluded documentation. In this event, (1) the Licensee shall be permitted full use of all Licensed Software and documentation as long as the System is operational and (2) the Licensee may modify, or have modified, the Licensed Software for feature enhancement or proper equipment operation and becomes the owner of such modifications for all purposes, including patenting, copywriting, sale, or license thereof. Agreed excluded documentation is Licensed Software back-up documentation described in the first sentence of this section (2)(xi) which (A) is proprietary information of a third party, (B) was specifically described at the pre-bid technical session and individually identified in an attachment to the Bid, and (C) RUS and the Licensee agree, before bids are opened, may be excluded from the requirements of this section (2)(xi). In the event the Licensor furnishes agreed excluded documentation and the Licensee exercises its rights under this section (2)(xi), the Licensor shall use its best efforts to provide such agreed excluded information to the Licensee, or obtain continuing support agreements from the parties retaining legal rights to the excluded documentation. Licensor agrees that certain Licensed Software cannot be excluded from the requirements of this section (2)(xi) including, but not limited to, software, the absence or improper operation of which would significantly impair the operation of the System, would significantly impair the ability of the Licensee to generate revenue, or would pose a risk to RUS loan security.

(xii) A breach of this License by the Licensor is a breach of the Contract. Therefore, the remedies specified in the Contract shall apply.

(xiii) The Licensee shall have thirty (30) days after receipt of written notice from the

§ 1753.39

7 CFR Ch. XVII (1–1–97 Edition)

Licensor to correct any breach of this License. Damages payable by the Licensee for its breach of this License shall not exceed the total Contract price. The Licensor shall not terminate this License unless:

(A) The Licensor has given RUS sixty (60) days notice before termination; and

(B) RUS agrees with the Licensor that termination is the only method available to prevent significant harm to the Licensor from additional Licensee defaults.

(xiv) The obligations of Licensee and Licensor and any successors in title under this Agreement shall survive the termination of this Agreement and continue after any termination of rights granted hereunder.

(xv) Licensee and Licensor agree that it will not, without the prior written permission of the other party, use in advertising, publicity, packaging, labeling, or otherwise, any trade name, trademark, trade device, service mark, symbol, or any other identification or any abbreviation, contraction, or simulation thereof owned by the other party or any of its affiliates or used by the other party or any of its affiliates to identify any of their products or services, unless otherwise agreed by the parties.

(xvi) This Software License Agreement shall prevail notwithstanding any conflicting terms or legends which may appear on or in the Licensed Software.

(xvii) If any Section or part thereof, in this Agreement shall be held to be invalid or unenforceable in any jurisdiction in which this Agreement is being performed, then the meaning of such section or part shall be construed so as to render it enforceable, to the extent feasible; and if no feasible interpretation would save such section or part, it shall be severed from this Agreement and the remainder shall remain in full force and effect. However, in the event such section or part is considered an essential element of this Agreement, the parties shall promptly negotiate a replacement therefor.

(xviii) This Software License and any amendments thereto, or revisions thereof, are subject to RUS approval.

[End of clause]

(d) *Contract amendments.* (1) The general requirements for contract amendments are set forth in § 1753.11.

(2) Equipment contract amendments shall be prepared on RUS Contract Form 238, Construction or Equipment Contract Amendments.

(e) *Additions.* When additions to existing central office equipment are required:

(1) A proposal shall be requested from the supplier.

(2) The borrower shall prepare a plan containing an outline of the proposed use of the equipment, the proposal from the supplier and an estimate of the installation cost, and submit it to the GFR.

(3) After RUS approval of the supplier's proposal and the borrower's plan, the purchase may be made using RUS Contract Form 545 or, when applicable, the procedures contained in subpart I.

(4) If the purchase is to be made by contract, three executed copies of the contract with attachments are to be submitted to the RUS.

(5) Installation of the central office equipment and materials procured by RUS Contract Form 545 may be made in accordance with subpart I, if applicable, or by an approved FAP.

(f) *Preinstallation conference.* RUS recommends, but does not require, that the borrower hold a preinstallation conference, attended by the borrower, its engineer, equipment installers, and if possible the GFR, prior to the beginning of the installation of the central office equipment.

[54 FR 39267, Sept. 25, 1989. Redesignated at 55 FR 39397, Sept. 27, 1990, and amended at 59 FR 17679, Apr. 14, 1994]

§ 1753.39 Closeout documents.

Closeout of RUS Contract Form 525, Central Office Equipment Contract (Including Installation), and RUS Contract Form 545, Central Office Equipment Contract (Not Including Installation), shall be conducted as follows:

(a) *Contract amendments.* The borrower shall prepare and arrange for the execution and submission to RUS of any required contract amendments so that any changes in either contract will have been approved prior to the

time the closeout documents are prepared. RUS Contract Form 238, Construction or Equipment Contract Amendment, shall be used for this purpose.

(b) *Taxes.* Under the terms of RUS Contract Forms 525 and 545, the bid prices do not include any amounts which are or may be payable by the bidder or the borrower on account of taxes imposed upon the sale, purchase or use of equipment, material and software covered by the contracts. If any such tax is paid by the bidder, the contract requires that the amount is to be stated separately on all invoices and paid by the borrower.

(c) *Acceptance tests.* The borrower will perform acceptance tests in accordance with guidelines contained in the applicable TE&CM sections, as a part of the partial closeout and final closeout of RUS Contract Form 525.

(d) *Grounding system audit.* A grounding system audit shall be performed and found acceptable for equipment provided under Form 525 and 545 Contracts, prior to placing a central office or remote switching terminal into full service operation. The audits are to be conducted in accordance with guidelines contained in the applicable sections of RUS Form 522 "General Specification for Digital, Stored Program Controlled Central Office Equipment." The audits shall be performed by the contractor and borrower for Form 525 equipment and by the borrower for Form 545 equipment.

(e) *Partial Closeout Procedure.* Under conditions set forth in RUS Contract Form 525, a contractor may, when approved by the borrower, receive payment in full for central offices and their respective associated remote switching terminals upon completion of the installation without awaiting completion of the project where the contractor is to receive such payment, the procedure contained in the applicable sections of RUS Contract Form 525 shall be followed. In addition to complying with the appropriate partial closeout procedure contained in RUS Contract Form 525, the borrower shall:

(1) Assemble and distribute the closeout documents specified in appendix B.

(2) Submit one copy of Form 754 to RUS with the FRS, requesting the re-

maining funds due the contractor on the central offices and associated remote switching terminals involved.

(3) On receipt of the advance of loan funds, make prompt payment to the contractor.

(f) *Final Contract Closeout Procedure.* The documents required for the final closeout of the central office equipment contracts, RUS Contract Forms 525 and 545, are listed in appendix B, which also indicates the number of copies and their distribution. The procedure to be followed is outlined below:

(1) The borrower shall:

(i) Immediately following completion of the last central office equipment installation, arrange with the contractor's installer, connecting company (where necessary), and the GFR for performance of the acceptance tests of offices not previously tested. The date for testing should be established so that the installer will not be required to return to the site for the sole purpose of assisting in these tests. Acceptance tests shall be performed within 30 days of completion of the installation, unless otherwise requested in writing by the contractor and approved in writing by the borrower.

(ii) When the acceptance tests have been satisfactorily completed and the contractor has corrected all the discrepancies:

(A) Prepare and assemble the documents listed in appendix B, Documents Required to Close Out Central Office Equipment Contracts.

(B) Notify the GFR that the project is ready for final RUS inspection.

(iii) Make the documents listed in appendix B available for GFR review on the date of final inspection.

(iv) Distribute the documents as indicated in appendix B, including submission to the GFR of all documents required by RUS.

(2) The documents required and the procedure to be used for equipment purchased and/or installations made using the method of minor construction are set forth in subpart I.

§ 1753.46

(g) Final payment shall be made according to the payment terms of the contract.

[54 FR 39267, Sept. 25, 1989. Redesignated at 55 FR 39397, Sept. 27, 1990, and amended at 59 FR 31126, June 17, 1994; 59 FR 43717, Aug. 25, 1994]

§§ 1753.40—1753.45 [Reserved]

Subpart F—Outside Plant Major Construction by Contract

SOURCE: 54 FR 39267, Sept. 25, 1989, unless otherwise noted. Redesignated at 55 FR 39397, Sept. 27, 1990.

§ 1753.46 General.

(a) This subpart implements and explains the provisions of the loan documents setting forth the requirements and procedures to be followed by borrowers when outside plant major construction by contract is financed by loan funds. Terms used in this subpart are defined in § 1753.2 and RUS Contract Form 515.

(b) The contract method for major construction is described in § 1753.5(b).

(c) The two contract forms which may be used for major outside plant construction are Form 515 and Form 773. Limitations on the applicability of these forms shall be as follows:

(1) Form 515 shall be used for major outside plant construction projects which will be competitively bid. The contract contains plans and specifications and has no dollar limitation. See §§ 1753.47, 1753.48 and 1753.49.

(2) A Form 515 contract which is for less than \$200,000, may, at the borrower's option, be negotiated. See § 1753.48(b).

(3) Form 773 shall be used for major outside plant projects which may not be competitively bid, and which cannot be designed and staked at the time of contract execution. Projects of this nature include routine line extensions and placement of subscriber drops. The Form 773 contract is limited to a maximum of \$200,000. In any twelve month period, RUS will not finance more than \$400,000, or ten per cent (10%) of the borrower's previous year's outside plant total construction, whichever is greater, in Form 773 contracts for a borrower. This limitation includes all

7 CFR Ch. XVII (1–1–97 Edition)

major and minor outside plant construction performed under Form 773 contracts, and is determined by the date the Form 773 contract is executed. See 7 CFR § 1753.50.

[54 FR 39267, Sept. 25, 1989. Redesignated at 55 FR 39397, Sept. 27, 1990, and amended at 59 FR 43717, Aug. 25, 1994]

§ 1753.47 Plans and specifications (P&S).

(a) *General.* (1) Prior to the preparation of P&S for the construction project:

(i) A review shall be made of the outside plant requirements, and the Loan Design (LD) shall be revised to reflect any needed changes (See § 1753.3).

(ii) Deviations from the approved LD (7 CFR part 1737) must be approved by RUS (See § 1753.3).

(2) The standard RUS specifications required for construction of outside plant facilities are:

(i) RUS Form 515a (Bulletin 345–150)—Specifications and Drawings for Construction of Direct Buried Plant.

(ii) RUS Form 515c (Bulletin 345–151)—Specifications and Drawings for Conduit and Manhole Construction.

(iii) RUS Form 515d (Bulletin 345–152)—Specifications and Drawings for Underground Cable Installation.

(iv) RUS Form 515f (Bulletin 345–153)—Specifications and Drawings for Construction of Pole Lines and Aerial Cables.

(v) RUS Form 515g (Bulletin 345–154)—Specifications and Drawings for Service Entrance and Station Protector Installation.

(b) *Preparation of plans and specifications.* Each set of plans and specifications shall include:

(1) RUS Contract Form 515, “Telephone System Construction Contract (Labor and Materials).”

(2) The specifications described in paragraph (a)(2) of this section as specified by the borrower in the RUS Contract Form 515.

(3) Description of special assembly units and guide drawings, if any.

(4) Key, detail, and cable layout maps.

(5) RUS Contract Form 787, “Supplement A to Construction Contract, RUS Contract Form 515,” when the borrower proposes to provide any materials to

the contractor. The borrower shall not order materials for a contractor without RUS approval. In such cases the borrower must attach Form 787 and a "List of Owner's Materials on Hand" and/or a "List of Materials Ordered by Owner but Not Delivered" to contract Form 515 (See § 1753.48(f) of this part). Any materials furnished under Supplement A shall be listed in RUS Bulletin 344-2 unless special RUS approval has been received by the borrower to use unlisted materials.

(c) *Submission of plans and specifications to RUS.* (1) Two sets of the plans and specifications and one copy of the "Check List for Review of Plans and Specifications," RUS Form 553, OMB control number 0572-0062, signed by the borrower's engineer, shall be furnished to the GFR.

(2) If RUS approves the P&S, RUS will return one set to the borrower.

[54 FR 39267, Sept. 25, 1989. Redesignated at 55 FR 39397, Sept. 27, 1990, 55 FR 53488, Dec. 31, 1990]

§ 1753.48 Procurement procedures.

(a) *Sealed competitive bidding*—(1) *Qualifying bidders.* (i) The borrower is responsible for selecting qualified contractors to bid on the project. See § 1753.8(a)(3). Questions relating to bidders' qualifications shall be resolved prior to the pre-bid conference.

(ii) RUS Form 274 or its equivalent, supplemented by RUS Form 276, shall be used for the submission of bidders' qualifications for all types of construction and for the required information on the bidder and subcontractors.

(2) *Invitations to bid*—The borrower shall solicit bids as set forth in § 1753.8(a)(2). Invitations shall be sent to at least 6 prospective bidders.

(3) *Pre-bid conference.* (i) Representatives of the borrower and its engineer shall be present at the pre-bid conference at the time and place designated in the Notice to Bidders. The borrower shall invite the GFR to attend the pre-bid conference.

(ii) The purpose of the pre-bid conference is to acquaint the bidders with the scope and special considerations of the project and to clarify any concerns the bidders may have.

(iii) No proposals shall be considered from bidders that do not attend the

pre-bid conference unless the bidder has been notified by the engineer that such bidder's attendance has been waived. Attendance can be waived if, in the judgment of the engineer, the bidder would gain no additional understanding of the construction project by attending the pre-bid conference.

(iv) The borrower shall obtain from the engineer the minutes of the pre-bid conference and shall distribute them to all potential bidders.

(v) When fewer than three bidders have been qualified to submit bids, RUS written approval must be obtained to proceed with requesting bids.

(4) *Bid openings.* (i) Bid openings and award of contract shall be conducted in accordance with § 1753.8(a).

(ii) Two copies of the assembly unit sections of the apparent lowest responsive bid accepted by the borrower shall be sent to RUS.

(b) *Negotiated bidding.* (1) Competitive bids are not required for outside plant construction that is estimated to cost less than \$200,000 labor and materials. The borrower shall obtain RUS approval of the plans and specifications before it selects the contractor for negotiated bidding.

(2) The procedures to be followed are contained in § 1753.8(b) and paragraphs (3) and (4) of this section.

(3) *Negotiation conference.* (i) The borrower shall schedule a conference to be attended by representatives of the engineer, the borrower and the contractor selected for negotiations. The borrower shall invite the GFR to attend this conference.

(ii) The purpose of the negotiation conference is to acquaint the contractor with the scope and special considerations of the project and to answer any questions.

(iii) The borrower shall obtain from the engineer notes covering the negotiation conference and shall distribute them to all attendees.

(4) Two copies of the assembly unit sections of the negotiated contractor's proposal shall be sent to the GFR for approval.

(c) *Contract amendments.* The borrower shall prepare contract amendments in accordance with § 1753.11 on RUS Contract Form 526, Construction Contract Amendment.

§ 1753.49

7 CFR Ch. XVII (1–1–97 Edition)

(d) *Subcontracts.* The RUS requirements for subcontracts and the procedures to be followed are set forth in § 1753.9.

(e) *Preconstruction conference.* The borrower shall conduct a conference, attended by the borrower, contractor, subcontractors, resident engineer, and the GFR, prior to the beginning of cable placement, to resolve any questions pertaining to the construction. Results of the conference shall be provided to each conference participant (See § 1753.10).

(f) *Owner-furnished materials.* When the borrower furnishes materials under RUS Contract Form 787, Supplement A to Construction Contract, these steps shall be followed:

(1) Materials on hand to be furnished by the borrower shall be released to the contractor at the start of construction. Materials on order but not received shall be provided to the contractor as they become available. The borrower shall obtain from the contractor a written receipt for all such materials delivered.

(2) Materials on hand, until released to the contractor, shall be covered by fire and either wind-storm or extended coverage insurance, exclusive of materials stored in the open and not within 100 feet of any building. Poles, wherever stored, shall be covered by fire insurance. All insured values must be at least 80 percent of the cash value of the property insured.

(3) Subject to adjustment at the time of final settlement, the borrower shall obtain from the contractor monthly invoices that show credit to the borrower, at the prices quoted in Form 787, Supplement A, for all materials furnished by the borrower and installed by the contractor during the preceding month.

(4) Any materials furnished by the borrower remaining as surplus at the completion of construction shall be returned to the borrower. For such materials, the borrower shall furnish a written receipt to the contractor and credit the contractor at the prices quoted in Supplement A.

(g) *Changes or corrections in construction.* (1) When changes or corrections in construction are necessary, and the cost of such changes or corrections is

properly chargeable to the borrower, the borrower shall have its engineer prepare and sign four copies of a Construction Change Order, RUS Form 216, obtain borrower's approval and forward the four copies to the contractor. Receipt of the executed Construction Change Order by the contractor will constitute authorization to proceed with the changes or corrections.

(2) When the changes or corrections have been made, the borrower shall have the contractor complete the form, itemizing the costs in accordance with the terms of the contract, and return three copies to the borrower's engineer. A copy of each change order shall be attached to each copy of the construction inventory required to close out the contract.

§ 1753.49 Closeout documents.

(a) *General.* The borrower shall be responsible for preparing the closeout documents with, if necessary, the assistance of the GFR.

(b) *Documents required.* Appendix C lists the documents required to close-out the Form 515 construction contract.

(c) *Closeout procedure:* (1) After construction has been completed in accordance with the plans and specifications, and acceptance tests have been made, the borrower shall arrange the time for a final inspection to be made by the borrower's engineer, the contractor, the GFR and a representative of the borrower.

(2) After inspection, the borrower shall prepare and distribute the final inventory documents as indicated on appendices C and D. The documents listed for RUS shall be submitted to the GFR. The approved final inventory is considered the final contract amendment. An extension to the contractor's bond is required when the total inventory price exceeds the maximum contract by more than 20 percent.

(3) Final payment shall be made according to the payment provisions of Article III of Form 515.

[54 FR 39267, Sept. 25, 1989. Redesignated at 55 FR 39397, Sept. 27, 1990, and amended at 59 FR 43717, Aug. 25, 1994]

Rural Utilities Service, USDA

§ 1753.57

§ 1753.50 Construction by Form 773 contract.

(a) The borrower shall prepare the contract form and provide such details of construction as may be available. Compensation may be based upon unit prices, hourly rates, or another mutually agreeable basis.

(b) Neither the selection of the contractor nor the contract requires RUS approval.

(c) Borrowers are urged to obtain quotations from several contractors before entering into a contract to be assured of obtaining the lowest cost.

(d) The borrower must ensure that the contractor selected meets all Federal and State requirements, and that the contractor maintains the insurance coverage required by the contract for the duration of the work. See 7 CFR part 1788.

(e) The borrower shall finance major construction under the Form 773 contract with general funds and obtain reimbursement with loan funds when construction is completed and an executed Form 771 has been submitted to RUS.

(f) If the contract exceeds \$100,000, a contractor's bond shall be required. See 7 CFR part 1788.

(g) When the construction is completed to the borrower's satisfaction, the borrower shall obtain from the contractor a final invoice and an executed copy of RUS Form 743, Certificate of Contractor and Indemnity Agreement.

(h) The closeout document for the Form 773 contract is RUS Form 771. See § 1753.81 for the requirements for completing Form 771.

(i) An original and two copies of Form 771 shall be sent to the GFR. The GFR may inspect the construction, and will initial and return the original and one copy to the borrower.

(j) The original Form 771 shall be submitted with an FRS to RUS only in conjunction with a request for an advance of loan funds for the work.

[59 FR 43717, Aug. 25, 1994]

§§ 1753.51—1753.55 [Reserved]

Subpart G—Outside Plant Major Construction by Force Account

SOURCE: 55 FR 3572, Feb. 2, 1990, unless otherwise noted. Redesignated at 55 FR 39397, Sept. 27, 1990.

§ 1753.56 General.

(a) This subpart implements and explains the provisions of the loan documents setting forth the requirements and the procedures to be followed by borrowers for outside plant major construction by the force account method with RUS loan funds. Terms used in this subpart are defined in § 1753.2 and RUS Contract Form 515.

(b) A borrower shall not use the force account method for construction financed with loan funds unless prior RUS approval has been obtained.

(c) Generally, RUS will not approve the force account method for major outside plant construction for the initial loan to a borrower.

(d) The Force Account Proposals (FAPs) are subject to review and approval by RUS.

(e) The FAP is approved by RUS on the basis of estimated labor and material costs. The FAP is closed based on the borrower's actual cost of performing the construction. RUS will provide loan funds only up to the amount determined by the completed assembly units priced at the unit prices in the approved FAP.

(Approved by the Office of Management and Budget under control number 0572-0062)

§ 1753.57 Procedures.

(a) *The request.* (1) The borrower shall submit to RUS a certified copy of the board resolution or a letter signed by an authorized corporate official requesting approval to use the force account method of construction. The request shall state the advantages of the force account method of construction and provide the following information:

(i) The scope of the construction to be undertaken, stating briefly the facilities and equipment to be installed and other pertinent data.

(ii) The name and qualifications of the construction supervisor who will be directly in charge of construction, the names and qualifications of the construction foremen, and the availability of qualified construction personnel. The construction supervisor must have at least 5 years outside plant construction experience with at least 2 years at the supervisory level on RUS financed projects. Construction foremen must have at least 3 years of outside plant construction experience.

(iii) The availability of equipment for construction, exclusive of equipment needed for normal operation and maintenance.

(b) *Force Account Proposal (FAP)*. Upon receiving RUS approval to use the force account method, the borrower, prior to any construction activity or the purchase of materials or equipment, shall submit to RUS two copies of its FAP. The FAP shall consist of:

(1) The RUS Contract Form 515 and appropriate supporting attachments that normally would be provided as plans and specifications for contract construction. See § 1753.47.

(2) The cost estimate, using Form 515 as a convenient means of showing the following:

(i) The quantity and cost estimates of the various assembly units required. “Labor and other” cost will not include the cost of engineering, legal, and other professional services, interest during construction, preliminary survey and investigation charges, and right-of-way easement procurement costs.

(ii) A list identifying materials or construction for which loan funds will not be requested.

(3) The estimated completion time.

(c) *Storage of materials*. All materials ordered for the construction shall be stored separate from normal maintenance materials.

(d) *Construction*—(1) *Preconstruction conference*. The borrower shall arrange a conference, attended by the manager, construction supervisor, construction foremen, resident engineer and the

GFR prior to the beginning of construction to clarify any questions pertaining to the construction. Notes of the conference shall be provided to each conference participant.

(2) *Construction schedule and progress reports*. The borrower shall obtain from the engineer a construction schedule and submit one copy to the GFR. The schedule shall include the starting date and a statement indicating that materials are either delivered or deliveries are assured to permit construction to proceed in accordance with the construction schedule. The borrower shall obtain from the engineer progress reports and submit one copy of each to the GFR. RUS Form 521 may be used for the construction schedule and the progress report.

(3) *Borrower’s management responsibilities*. (i) Obtain all right-of-way easements, permits, etc., prior to construction.

(ii) Maintain records on all expenditures for materials, labor, transportation, and other costs of construction, in order that all costs may be fully accounted for upon completion of construction.

(iii) Ensure that all the required inspections and tests are made.

(4) *Engineer’s responsibilities*. (i) Inspect and inventory construction as completed.

(ii) Require timely corrections and cleanup.

(iii) Perform acceptance tests as construction is completed.

(iv) Provide “as built” staking sheets of completed construction when the final inspections are made.

(v) Maintain accurate and current inventories of completed construction.

(5) *Construction supervisor’s responsibilities*. (i) Correct construction errors as construction progresses.

(ii) Maintain an accurate inventory of completed construction.

(iii) Perform cleanup as construction is completed.

(iv) Perform all the inspections and acceptance tests a contractor would be required to make under the construction contract.

(v) Promptly perform cleanup required after final inspection.

§ 1753.58 Closeout documents.

(a) *General.* (1) This section outlines the procedure to be followed in the preparation of closeout documents for the FAP.

(2) The period between the completion of construction and submission of the closeout documents to RUS should not exceed 60 days.

(b) *Documents.* The documents required to close the FAP are listed in appendix E. The following is a brief description of the closeout documents:

(1) Final Inventory and Certificate of Engineer, RUS Forms 817, 817a, and 817b are prepared by the engineer.

(i) Assembly units inventoried on Form 817a shall be grouped according to the applicable plant account classification as specified in 7 CFR part 1770, Revision and Codification of RUS's Accounting System Requirements for Telephone Borrowers of the Rural Utilities Service.

(ii) On Form 817, the engineer provides a comparison between the final inventory total price (based on assembly prices in the approved FAP) and the actual cost of construction (from the borrower's accounting records).

(iii) The actual costs from the borrower's accounting records are not to include costs for (a) engineering, legal and other professional services, (b) interest during construction and (c) preliminary survey charges.

(2) Certificate, "Buy American," RUS Form 213.

(3) Key Map, prepared by the engineer, is a permanent record of the general location of the lines and facilities of the borrower's system.

(4) Detail Maps, prepared by the engineer, show the details of the outside plant of the telephone system, the location of subscribers and other pertinent operating details.

(5) Staking Sheets, prepared by the engineer, show by assembly units the outside plant constructed, and serve as the permanent outside plant record.

(6) Tabulation of Staking Sheets, prepared by the engineer, is a summary of the assembly units shown on the staking sheets for preparing the final inventory.

(7) Treated Forest Products Inspection Reports, prepared by an RUS approved inspection company, certify

that wood products furnished for construction meet all requirements of the RUS specifications.

(c) *Closeout procedures.* (1) The borrower shall notify the GFR when the project is ready for final inspection.

(2) The GFR shall make the final inspection accompanied by the engineer and the borrower.

(3) The borrower shall correct all deficiencies found during the final inspection.

(4) The borrower may request the assistance of an RUS field accountant to review the borrower's record of construction expenditures and assist the borrower with any accounting problems in connection with construction expenditures.

(5) After inspection, the final inventory documents shall be assembled and distributed as indicated on appendix E. The documents listed for RUS are to be submitted to the GFR.

(6) Upon approval of the closeout documents, RUS will notify the borrower of approval and of any adjustments to be made in funds advanced in connection with the construction.

(d) The above are not intended to be a complete description of the requirements of the documents relating to RUS's closeout procedure. Refer to the documents for additional requirements.

§§ 1753.59—1753.65 [Reserved]**Subpart H—Purchase and Installation of Special Equipment**

SOURCE: 54 FR 39267, Sept. 25, 1989, unless otherwise noted. Redesignated at 55 FR 39397, Sept. 27, 1990.

§ 1753.66 General.

(a) This subpart implements and explains the provisions of the Loan Documents setting forth the requirements and the procedures to be followed by borrowers in purchasing and installing special equipment financed with loan funds.

(b) Terms used in this subpart are defined in § 1753.2 and RUS Contract Forms 397 and 398.

(c) Special equipment purchased with loan funds must be included in the List of Materials Acceptable for Use on

§ 1753.67

Telephone Systems of RUS Borrowers (See Bulletin 344-2) and meet RUS's standards and specifications (See 7 CFR part 1755) unless otherwise approved by RUS.

(d) Borrowers must obtain RUS review and approval of the LD for their telephone systems. Applications of special equipment not included in an approved LD must conform to the modernization plan as required by 7 CFR part 1751, subpart B, and must be submitted to RUS for review and approval.

(e) RUS Form 397 and applicable specifications shall be used for the purchase of special equipment for major construction on a furnish and install basis.

(f) RUS Form 398 and applicable specifications shall be used for the purchase of equipment for major construction on a furnish only basis. The procedures provided in subpart I, if applicable, or a FAP approved by RUS may be used for the installation of special equipment purchased with a Form 398 contract.

(g) For special equipment purchases for minor construction, the borrower may at its option use the Methods of Minor Construction procedures contained in subpart I or the purchase procedures contained in this subpart H.

(h) Some types of special equipment contain software. See subpart E for RUS software licensing requirements.

[54 FR 39267, Sept. 25, 1989. Redesignated at 55 FR 39397, Sept. 27, 1990, and amended at 58 FR 66259, Dec. 20, 1993; 59 FR 17464, Apr. 13, 1994]

§ 1753.67 Contracts and specifications.

(a) Special Equipment Contract, RUS Form 397 shall be used to purchase equipment on a furnish and install basis.

(b) Special Equipment Contract, RUS Form 398 shall be used to purchase equipment on a furnish only basis.

(c) The equipment specifications must accompany the selected contract form.

(1) Each specification consists of performance specifications, installation requirements (if applicable) and application engineering requirements.

(2) RUS specifications for the Special Equipment Contract are listed in 7 CFR part 1755.

7 CFR Ch. XVII (1-1-97 Edition)

§ 1753.68 Purchasing special equipment.

(a) *General.* (1) Equipment purchases are categorized as initial equipment purchase, equipment additions to existing systems and new system additions.

(i) An initial equipment purchase is a first time purchase by a borrower of a complete system of special equipment.

(ii) Equipment additions to existing systems are additions of components to complete operating systems to increase system capacity that require components made by the manufacturer of the existing system.

(iii) New system additions are purchases of complete systems of special equipment when the purpose can be accomplished either with equipment of the same type and manufacture as other complete operating systems in the borrower's system, or with complete systems of special equipment from other manufacturers.

(iv) Where equipment is obtained under a Form 398 Contract, the borrower shall require the supplier to provide a detailed proposed bonding and grounding plan and detailed installation information. The installation information is to enable acceptance testing by the borrower upon completion of the installation.

(2) For initial equipment purchases that qualify as major construction, the borrower shall obtain proposals from at least three suppliers of equipment of different manufacturers.

(3) For equipment additions to increase the capacity of existing systems, the borrower may negotiate for equipment of a specific type and manufacture. RUS approval to negotiate in this instance is not required if these additions were specifically described in the LD approved by RUS.

(4) For new system additions, the borrower may request RUS approval to negotiate for additional equipment for the purpose of standardization on a system basis, provided RUS approved the procurement method used for the initial equipment purchase. RUS approval to negotiate must be obtained before release of the P&S to the seller.

(5) RUS will not approve negotiation with a seller of non-domestic equipment for the purpose of standardization, because such a purchase does not meet the "Buy American" provision.

(6) RUS recommends, but does not require, that borrowers include installation by the seller for initial installations of special equipment that qualify as major construction.

(7) Special equipment may be installed by the borrower if it has qualified personnel and test equipment available to install the equipment and make the required acceptance tests, and written approval is given by RUS.

(8) Installations, whether by the borrower or the seller, must meet the installation requirements of Form 397 specifications. A copy of the acceptance tests results must be attached to the closeout documents or work order summary.

(9) Detailed considerations and guidelines for the preparation of the specifications for the various applications of special equipment can be found in RUS Telecommunications Engineering and Construction Manuals.

(10) The borrower must obtain authorization from the Federal Communications Commission (FCC) to construct and operate radio transmitting equipment. Evidence of FCC authorization is required for RUS contract approval. Where required, the borrower must obtain approval of state regulatory bodies regarding tariffs and related matters.

(b) *Procurement procedures*—(1) *General*. The following are the procurement procedure steps required for the purchase of special equipment by borrowers.

(2) *Initial equipment purchase*. (i) The borrower prepares the P&S and sends two copies to the GFR for approval.

(ii) RUS approves the P&S in writing (or notifies the borrower of any reason for withholding approval).

(iii) The borrower obtains proposals from three or more sellers.

(iv) The borrower selects the proposal to be accepted and sends notification of this selection supported by a summary of all proposals and an engineer's recommendation to RUS for approval.

(v) RUS approves the proposal selection in writing (or notifies the bor-

rower of any reason for withholding approval).

(vi) The borrower sends three executed contracts including specifications to RUS for approval.

(vii) After RUS approval of the contract, one copy will be returned to the borrower and one copy will be sent to the seller.

(3) *Equipment additions to existing systems*. Purchase procedures for equipment additions to existing systems are the same as for initial system purchase except that the borrower may negotiate for equipment of a specific type and manufacture instead of obtaining proposals from three or more sellers.

(4) *New system additions*. (i) The borrower prepares the P&S and sends two copies to the GFR for approval. The borrower may request RUS approval to negotiate for the purpose of standardization on a system basis.

(ii) RUS notifies the borrower in writing of RUS's decision as to whether to approve the P&S and whether to allow the borrower to negotiate for specific equipment.

(iii) The remainder of the purchase procedure for new system additions is the same as for initial equipment purchase.

(c) *Contract amendments*. (1) The general requirements for contract amendments are set forth in §1753.11.

(2) The borrower shall prepare any required amendments to special equipment contracts, arrange for the execution by all parties, and submit these amendments to RUS, so that any changes in the contract will have been submitted by the time closeout documents are submitted. RUS Form 238, Construction or Equipment Contract Amendment shall be used for this purpose.

(d) *Closeout procedures*—(1) *Acceptance tests for Form 397*. (i) Immediately upon completion of the installation and alignment of the equipment, the borrower shall arrange with the contractor's installer and the GFR for acceptance tests.

(ii) The borrower shall obtain from the contractor, in writing, the results of all inspections and tests made by the contractor as required in the specifications. The borrower will analyze the test results and determine whether the

§ 1753.76

performance of the equipment meets the contract specifications.

(2) *Acceptance tests for Form 398.* (i) Upon completion of the installation and alignment of the equipment (under this contract the installation alignment will be by other than the seller) the borrower shall perform all the inspections and tests outlined in the specifications.

(3) *Closeout documents.* (i) When the acceptance tests have been completed and all deficiencies have been corrected, the borrower shall:

(A) Assemble the documents listed in appendix F that are required for the closeout of the special equipment contract.

(B) Notify the GFR that the installation is ready for final acceptance.

(C) Make available for the GFR the documents listed in appendix F.

(ii) The GFR reviews the final documents and distributes all the documents as indicated in appendix F.

(iii) Final payment shall be made according to the payment terms of the contract.

[54 FR 39267, Sept. 25, 1989. Redesignated at 55 FR 39397, Sept. 27, 1990, and amended at 59 FR 43718, Aug. 25, 1994]

§§ 1753.69—1753.75 [Reserved]

Subpart I—Minor Construction

SOURCE: 55 FR 3573, Feb. 2, 1990, unless otherwise noted. Redesignated at 55 FR 39397, Sept. 27, 1990.

§ 1753.76 General.

(a) This subpart implements and explains the provisions of the Loan Documents (as defined in 7 part CFR 1758) setting forth the requirements and procedures to be followed by borrowers for minor construction of telecommunications facilities using RUS loan funds. Terms used in this subpart are defined in § 1753.2.

(Approved by the Office of Management and Budget under control number 0572-0062)

§ 1753.77 Methods of minor construction.

Minor construction may be performed by contract using RUS Contract Form 773. “Miscellaneous Con-

7 CFR Ch. XVII (1-1-97 Edition)

struction Work and Maintenance Services”, or by work order construction.

§ 1753.78 Construction by contract.

(a) RUS Form 773 shall be used for minor construction by contract. Compensation may be based upon unit prices, hourly rates, or another basis agreed to in advance by the borrower and the contractor. A single work project may require more than one contractor.

(b) The borrower shall prepare the contract form and attach any diagrams, sketches and tabulations necessary to specify clearly the work to be performed and who shall provide which materials. Neither the selection of the contractor nor the contract requires RUS approval.

(c) Borrowers are urged to obtain quotations from several contractors before entering into a contract to be assured of obtaining the lowest cost. The borrower must ensure that the contractor selected meets all Federal and State licensing and bonding requirements, and that the contractor maintains the insurance coverage required by the contract for the duration of the work. (See 7 part CFR 1788)

(d) Upon completion and final inspection of the construction the borrower shall obtain from the Contractor a final invoice and an executed copy of RUS Form 743, Certificate of Contractor and Indemnity Agreement.

(e) RUS Contract Form 773 may also be used to contract for the maintenance and repair of telephone equipment and facilities. Generally, RUS will not finance maintenance and repair contracts.

[55 FR 3573, Feb. 2, 1990. Redesignated at 55 FR 39397, Sept. 27, 1990, and amended at 59 FR 43718, Aug. 25, 1994]

§ 1753.79 Construction by force account.

The borrower shall require that:

(a) Minor construction by the force account method be supervised by a competent foreman. The work shall be performed in accordance with all regulatory and safety codes.

(b) Daily time and material reports, referenced by the work project number, shall be kept to record labor and materials used as construction is performed.

Rural Utilities Service, USDA

§ 1753.81

(c) The construction foreman shall maintain a tabulation of all construction units installed.

§ 1753.80 Minor construction procedure.

(a) If the borrower performs minor construction financed with loan funds, the borrower's regular work order procedure shall be used to administer construction activities that may be performed entirely by a contractor under Form 773 contract, by work order, or jointly by work order and one or more contractors under Form 773 contracts.

(b) RUS financing under Form 773 contracts is limited in any twelve month period to the following amounts for the following discrete categories of minor construction. A borrower could, for example, receive financing of Form 773 contracts in a twelve month period in amounts up to \$400,000 of central office equipment and \$200,000 of special equipment and \$200,000 of buildings. The date of the Form 773 contract is the date the Form 773 contract is executed.

(1) For outside plant construction, the limit is \$400,000 or ten per cent (10%) of the borrower's previous calendar year's outside plant total construction, whichever is greater.

(2) For central office equipment, the limit is \$400,000.

(3) For special equipment, the limit is \$200,000.

(4) For buildings, the limit is \$200,000.

(c) A single minor construction project may be a discrete element of a somewhat larger overall project, such as the provision and installation of a standby power generator or heating/air conditioning equipment in connection with a building modification or expansion project or the splicing on a major cable placement project. It cannot be a portion, by dividing into smaller segments, of a discrete major construction project, such as the placement of a continuous cable facility.

(d) RUS approval must be obtained in advance for minor construction unless all of the following conditions are met:

(1) RUS has approved the engineering design.

(2) All standard RUS procedures are followed, including use of new materials listed in the List of Materials for

Use on Telephone Systems of RUS Borrowers (Bul. 344-2) and the application of RUS construction practices. (See § 1753.6)

(3) The Standard Form 773 contract is used without modification.

(e) The borrower shall determine the scope of each proposed construction project and decide how it will be constructed. A work project number shall be assigned to which all charges for that project are referenced.

(f) The borrower shall maintain accounting and plant records sufficient to document the cost and location of all construction and to support loan fund advances and disbursements.

(g) Normally the borrower will finance minor construction with general funds and obtain reimbursement with loan funds when construction is completed and executed Form 771 has been submitted to RUS. If a borrower satisfies RUS of its inability to finance the construction temporarily with general funds, RUS may establish, on a case by case basis, a work order fund for specific construction projects. The work order fund will be closed upon receipt of an FRS and the executed Forms 771 for the specific projects for which the work order fund was established.

(h) RUS will advance funds to finance minor construction work projects only if all necessary documents, including an FRS and supporting data covering the project, are received within one year of the date construction of the project is completed.

[55 FR 3573, Feb. 2, 1990. Redesignated at 55 FR 39397, Sept. 27, 1990, and amended at 59 FR 43718, Aug. 25, 1994]

§ 1753.81 Inspection and certification.

(a) Upon completion and prior to closeout, minor construction must be inspected and certified to be in compliance with RUS construction standards, to be reasonable in cost, and to meet applicable codes. The certification is made by an experienced telephone engineer who is either licensed in the state where the inspection will be performed, or is a borrower's staff engineer, who meets the requirements of the "employee in charge" of force account engineering as described in subpart B of this part. The GFR will periodically audit the inspection of minor

§ 1753.82

construction to ensure integrity of the procedure. RUS borrowers with less than 2000 subscribers may use the above procedure or have construction inspection performed by the GFR.

(b) Engineering services for minor construction may be contracted using RUS Form 245, Engineering Service Contract—Special Services. Costs for these services may be included in the costs for construction on the Form 771. (See subpart B of this part.)

(c) Upon completion of construction, the borrower shall obtain the engineer's certification on RUS Form 771. An official of the borrower, designated by the board of directors, shall also execute the borrower's certification on Form 771.

[54 FR 39267, Sept. 25, 1989. Redesignated at 55 FR 39397, Sept. 27, 1990, and amended at 55 FR 53488, Dec. 31, 1990]

§ 1753.82 Minor construction closeout.

(a) For minor construction inspected by the borrower's engineer, an original and two copies of Form 771 shall be sent to the GFR. The GFR will initial and return the original and one copy.

(b) When funds are requested for minor construction, the original Form 771 signed or initialed by the GFR, shall be submitted with the FRS. Forms 771 should be submitted only with the FRS which they support. RUS does not encumber funds pursuant to Forms 771 unless an advance is made to the borrower. (See 7 CFR part 1744 subpart C).

§§ 1753.83—1753.90 [Reserved]

Subpart J—Construction Certification Program

SOURCE: 55 FR 3574, Feb. 2, 1990, unless otherwise noted. Redesignated at 55 FR 39397, Sept. 27, 1990.

§ 1753.91 General.

(a) This subpart implements and explains the provisions of the loan documents setting forth the requirements and procedures to be followed by borrowers accepting nomination for the construction certification program. Terms used in this subpart are defined in § 1753.2.

7 CFR Ch. XVII (1–1–97 Edition)

(b) [Reserved]

(Approved by the Office of Management and Budget under control number 0572–0062)

§ 1753.92 Policies and requirements.

(a) It is RUS policy that, as borrowers gain in experience and maturity, the advice and assistance rendered by RUS shall progressively diminish. Prior to approval of a loan, RUS may nominate certain borrowers to fulfill the responsibilities for administration and construction of projects financed with RUS loans. Borrowers who accept this nomination will be known as “certification borrowers,” and the program in which they participate will be known as the “certification program.”

(b) Generally, initial loan borrowers are not eligible for the certification program.

(c) Generally, the factors which RUS will consider in selecting borrowers for the certification program will include:

(1) The experience of the staff of the borrower.

(2) The RUS assessment of the borrower's ability to handle the certification program requirements considering the size and complexity of the proposed construction in the LD.

(3) The history of the borrower in following RUS's policies and procedures.

(4) Other factors deemed relevant by RUS.

(d) Except as specifically stated in this subpart, certification borrowers must comply with all requirements applicable to other borrowers.

(e) RUS reserves the right at any time to require submission of construction documents or to remove the borrower from the certification program.

§ 1753.93 Responsibilities.

(a) *Responsibilities transferred to certification borrowers.* (1) Approval of engineering and architectural service contracts.

(2) Approval of P&S.

(3) Approval of price quotations and bids, except where the low price bid is not accepted.

(4) Approval of award of construction contracts and amendments.

(5) Approval of FAP's if RUS has approved the force account method of construction for the construction project.

(6) Inspection and certification of construction.

(7) Approval of closeout documents.

(8) Other responsibilities as may be specifically granted in writing by RUS.

(b) *Responsibilities retained by RUS.* (1) Approval to deviate from RUS requirements, except as provided in (a) above.

(2) Approval of use of loan funds for projects other than those included in the loan construction budget. See 7 CFR part 1744 subpart C.

(3) Approval of use of loan funds in excess of amounts included in the loan budget.

(4) Approval of force account methods of engineering and construction.

(5) Approval to make significant deviations from the work plan approved by RUS.

(6) Approval of interim construction.

(7) Approval to use materials not listed in the List of Materials Acceptable for Use on Telephone Systems of RUS Borrowers.

(8) Approval of field trials.

(9) Approval to modify or alter standard forms and contracts.

(10) Approval to open bids when fewer than the required number have been received.

(11) Approval of outside plant layouts.

(12) "Buy American" determinations.

(13) Other responsibilities not specifically transferred by this subpart or in writing by RUS.

§ 1753.94 Procedures.

(a) Certification borrowers shall appoint three certification officials. These appointments shall be subject to RUS approval.

(1) The "Certifying Officer" shall be an officer or employee of the borrower who is authorized to execute binding agreements. This officer shall sign all contracts, amendments, closeout documents and the certification on RUS Form 158, Certification of Contract or Force Account Proposal Approval, and RUS Form 159, Summary of Completed Construction.

(2) The "Construction Certifier" shall be an experienced telephone engineer who is either licensed in the state where the inspection will be performed, or is a borrower's staff engineer who meets the requirements of the "em-

ployee in charge" of force account engineering as described in subpart B of this part. RUS may determine that it will accept the certification only for matters within the staff engineer's area of specialization. In such cases the position of "Construction Certifier" shall be filled by more than one engineer. This official is responsible for certifying that the construction complies with all technical and code requirements.

(3) The "Certification Coordinator" shall administer the certification program and serve as the official point of contact for RUS. The certifying officer or construction certifier may also serve as the certification coordinator.

(b) Certification borrowers, shall submit and obtain RUS approval of a work plan before construction and related engineering begin.

(1) The work plan shall provide a description of the proposed construction and methods of purchasing in such detail as to enable RUS to monitor the construction program to ensure to its satisfaction that loan purposes are accomplished in an organized construction program.

(2) The work plan shall include the following:

(i) The names and qualifications of the proposed certification officials defined in § 1753.94(a).

(ii) A listing of the proposed work projects to accomplish the loan purposes showing the estimated cost, method of performing the construction, and the proposed commencement and completion dates for each work project. The proposed work projects shall be summarized on RUS Form 157, Construction Work Plan and Cost Distribution, or a form providing essentially the same information.

(iii) The proposed source of funds for meeting cost overruns if the total estimated cost of work projects exceeds the loan budget.

(iv) A statement signed by the borrower's certification officials and the GFR that the work plan is accurate and complete.

(c) Under the certification program, the borrower shall follow all standard RUS postloan engineering and construction procedures except that the approvals shown in § 1753.93(a) will be

§ 1753.95

made by certification officials rather than RUS. The approvals noted in § 1753.93(a)(1), (4) and (5) will be reported immediately to RUS using RUS Form 158. Approval of closeouts, § 1753.93(a) (6) and (7), will be reported immediately on RUS Form 159.

(d) As the construction program progresses, the certification borrower shall request, by letter, RUS approval of any significant changes in work plan schedules and budgets and in certification officials.

§ 1753.95 Advance of loan funds.

Advance of loan funds needed to meet the certification borrower's current financial obligations are to be requested on RUS Form 481 for construction and engineering items supported by appropriate RUS Forms 158 and 159. For items other than construction or engineering, other supporting data shall be submitted. (See 7 CFR part 1744 subpart C.)

§ 1753.96 Certification addendum.

The certification borrower shall modify standard RUS forms of contract for use under the certification program by inserting an executed copy of the fol-

7 CFR Ch. XVII (1–1–97 Edition)

lowing certification addendum in each copy of the contract.

CERTIFICATION ADDENDUM

Permission has been obtained by the Owner to proceed with this contract under 7 CFR part 1753 subpart J, pursuant to which the references in the RUS construction document requiring approvals and other actions of the RUS Administrator will not apply unless RUS gives specific notice in writing to the affected parties that designated approval(s) or action(s) will be required. Certifications by the Contractor of amounts due and certifications of completions of work under the contract are to be construed to be rendered for the purpose of inducing the Rural Utilities Service or Rural Telephone Bank to advance funds to the Owner to make, or reimburse the Owner for, payments under this contract.

APPENDIX D—STEP-BY-STEP PROCEDURE FOR CLOSING OUT TELEPHONE CONSTRUCTION
CONTRACT-LABOR AND MATERIALS, RUS FORM 515

Sequence		By	Procedure
Step No.	When		
1	Prior to completion of construction.	Borrower's Engineer	Receives instructions from the GFR concerning the closeout procedure.
2	Upon completion of construction.	Borrower's Engineer	Prepares the following: 1 set of Key Maps, when applicable, which show work done under the construction contract marked with red pencil. 1 set of Detail Maps, which show work done under the construction contract marked with red pencil. 1 copy of Tabulation of Staking Sheets. 1 copy of tentative Final Inventory, RUS Forms 724, 724a.
3	After construction has been completed and acceptance tests made.	Borrower's Engineer	Forwards letter to the borrower with copies to the GFR stating that the project is ready for final inspection.
4	Upon receipt of letter from borrower's engineer.	GFR	Promptly arranges with borrower, borrower's engineer, and contractor for final inspection of construction. It is contemplated that final inspections will be made on sections of line as construction is completed, leaving a minimum amount to be inspected at this time.
5	When requested by the GFR.	RUS Field Accountant	Audits RUS Form 281, if borrower supplied part of the materials.
6	Inspection date scheduled	Borrower's Engineer	Shall have the following documents available for the GFR: 1 set of "as constructed" Key Maps (when applicable). 1 set of "as constructed" Detail Maps. 1 copy of the List of Construction Change Orders. 1 set of Final Staking Sheets. 1 copy of Tabulation Staking Sheets. 1 copy of Treated Forest Products Inspection Reports or Certificates of Compliance. 1 copy of tentative Final Inventory RUS Form 724, 724a. 1 copy of tentative Tabulation, RUS Form 231, if borrower furnished part of material. 1 copy of Report on Results of Acceptance Tests.
7	During inspection	Borrower's Engineer	Issues instructions to contractor covering corrections in construction found during inspection by GFR in the company of the borrower's engineer and the contractor or his/her representative.
8	During inspection	Contractor	Corrects defects in construction on basis of instructions from the borrower's engineer. The corrections should proceed closely behind the inspection in order that the borrower's engineer can check the corrections before leaving the system.
9	During inspection	Borrower's Engineer	With GFR inspects and approves corrected construction.
10	During inspection	Borrower's Engineer	Marks inspected areas on the Key Map, if available, otherwise on the Detail Maps.
11	Upon completion of inspection.	Borrower's Engineer	Prepares or obtains all the closeout documents listed in Appendix C. Makes distribution of the copies of the documents as indicated in Appendix C. Forwards the documents for RUS to the GFR.
12	After reviewing final documents.	RUS GFR	Reviews documents and distributes copies as indicated in Appendix C.
13	After signing final inventory	Borrower	Prepares and submits Financial Requirement Statement, RUS Form 481, requesting amount necessary to make final payment due under contract.
14	On receipt of final advance	Borrower	Promptly forwards check for final payment to contractor.
15	During next loan fund audit review after final payment to contractor.	RUS Field accountant	Makes an examination of borrowers construction records for (1) compliance with the construction contract and Subpart F and (2) RUS Form 281, Tabulation of Materials Furnished by Borrowers, if any, for appropriate costs.

PART 1755—TELECOMMUNICATIONS STANDARDS AND SPECIFICATIONS FOR MATERIALS, EQUIPMENT AND CONSTRUCTION

Sec.

- 1755.1—1755.2 [Reserved]
- 1755.3 Field trials.
- 1755.4—1755.92 [Reserved]
- 1755.93 List of standard forms of telecommunications contracts.
- 1755.94—1755.96 [Reserved]
- 1755.97 Incorporation by reference of telephone standards and specifications.
- 1755.98 List of telephone standards and specifications included in other 7 CFR parts.
- 1755.99—1755.199 [Reserved]
- 1755.200 RUS standard for splicing copper and fiber optic cables.
- 1755.201—1755.369 [Reserved]
- 1755.370 RUS specification for seven wire galvanized steel strand.
- 1755.371—1755.389 [Reserved]
- 1755.390 RUS specifications for filled telephone cables.
- 1755.391—1755.396 [Reserved]
- 1755.397 RUS performance specification for line concentrators.
- 1755.398—1755.521 [Reserved]
- 1755.522 RUS general specification for digital, stored program controlled central office equipment.
- 1755.523—1755.524 [Reserved]
- 1755.525 Form 525, central office equipment contract (including installation.)
- 1755.526—1755.699 [Reserved]
- 1755.700 RUS specification for aerial service wires.
- 1755.701 Scope.
- 1755.702 Copper coated steel reinforced (CCSR) aerial service wire.
- 1755.703 Nonmetallic reinforced (NMR) aerial service wire.
- 1755.704 Requirements applicable to both CCSR and NMR aerial service wires.
- 1755.705—1755.859 [Reserved]
- 1755.860 RUS specification for filled buried wires.
- 1755.861—1755.869 [Reserved]
- 1755.870 RUS specification for terminating cables.
- 1755.871—1755.889 [Reserved]
- 1755.890 RUS specification for filled telephone cables with expanded insulation.
- 1755.900 RUS specification for filled fiber optic cables.
- 1755.910 RUS specification for outside plant housings and serving area interface systems.

AUTHORITY: 7 U.S.C. 901 *et seq.*, 1921 *et seq.*, 6941 *et seq.*

EDITORIAL NOTE: Nomenclature changes to part 1755 appear at 55 FR 39397, Sept. 27, 1990.

§§ 1755.1—1755.2 [Reserved]

§ 1755.3 Field trials.

(a) Except as covered in Bulletin 345-3, no loan funds shall be advanced for any product if any item to be included in the project is not included in the "List of Materials Acceptable for Use on Telephone Systems of RUS Borrowers," RUS Bulletin 344-2. When new items of materials or equipment are considered for acceptance by RUS or when a previously accepted item has been subjected to such major modifications that its suitability cannot be determined based on laboratory data and/or field experience, a field trial shall be required if RUS so determines. This field trial consists of limited field installations of the materials or equipment in closely monitored situations designed to determine, to RUS's satisfaction, their operational effectiveness under actual field conditions. Field trials are to be used only as a means for determining, to RUS's satisfaction, the operational effectiveness of a new or revised product under actual field conditions. Both the manufacturer and borrower are responsible for assuring that the field trial is carried out and that the required information on the product's performance is received by RUS in a timely manner. The use of materials or equipment derived from new inventions or concepts untried within the telephone industry is defined as "an experiment" and shall be handled as a special case using procedures considered appropriate by RUS to meet the individual experiment.

(b) To qualify for a field trial, the new and improved materials and equipment must appear to RUS to offer one or more of the following benefits:

- (1) Improved performance.
- (2) Decreased cost.
- (3) Broader application.

(c) The item of material or equipment subject to field trial may be only part of the total amount of materials or equipment included in a bid or it may be the key component of the facility or system provided; therefore, RUS shall have authority to require that a satisfactory plan be provided to maintain or restore service in the event that the materials and equipment fail

§ 1755.3

7 CFR Ch. XVII (1–1–97 Edition)

to meet established performance requirements. RUS shall limit the quantity of new materials and equipment installed on any field trial and shall also limit the number of field trials for a given product to what RUS considers reasonable to provide the necessary information.

(d) A borrower may participate in a field trial only if, in RUS's opinion, the borrower possesses:

(1) Adequate financial resources so that no delay in the project will result from lack of funds.

(2) The financial stability to overcome difficulties which may result from an unsuccessful field trial. The borrower must be able to restore and maintain service until the manufacturer meets its financial obligations with respect to the field trial.

(3) Qualified personnel to enable it to discharge its responsibilities.

(4) A record satisfactory to RUS for maintaining equipment and plant facilities and for providing RUS with information when requested.

(5) Willingness to participate in the field trial and awareness of the effort and responsibility this entails.

(e) The test site for the field trial shall be, in RUS's opinion, readily accessible and provide the conditions, such as temperature extremes, high probability of lightning damage, etc., for which the product is being evaluated. The material or equipment involved shall be covered by an RUS specification or a suitable standard acceptable to RUS. The supplier is required to submit test data to show conformance with the applicable specification or standard. Further testing shall be performed if required by RUS personnel.

(f) A field trial shall normally continue for a minimum of six months, or for a longer period of time determined by RUS to be required to obtain conclusive data that the item either fulfills all requirements or is unacceptable. Either the borrower or supplier may terminate a field trial at any time, in accordance with their contractual agreement. Such termination, if prior to the time required by RUS, shall constitute withdrawal of the product from consideration by RUS. RUS has authority to terminate field

trials based on its determination that the equipment is not performing satisfactorily and that this lack of performance may, in RUS's opinion, cause service degradation or hazards to life or property.

(g) Field trials shall be conducted in accordance with the instructions set forth in this regulation and the agreement relating to the specific application. Both the supplier and the borrower shall agree, and obtain RUS approval before the start of the trial, on the following:

(1) The specific purpose of the field trial;

(2) Ownership of items during trial;

(3) Starting date and duration;

(4) Responsibility for costs and removal of items in the event of non-compliance with the specification or purpose intended and arrangements for service continuity or restoration;

(5) Responsibility for testing, test equipment and normal operation and maintenance during the trial period;

(6) Availability of test equipment on site during the trial period; and

(7) Responsibility for spare parts and components consumed during the trial period.

(h) Both the supplier and the borrower shall keep RUS informed of the status of a field trial. These reports shall not be limited to details of problems of failures encountered during installation and subsequent operation but shall include information on progress of the field trial. If these reports are not received in accordance with the requirements of the RUS Form 399b, RUS shall have the authority to deny or suspend loan funds related to these products until the delinquent reports are received.

(i) Before a borrower purchases materials or equipment that require a field trial, prior approval must be obtained from RUS and RUS Form 399b, RUS Telecommunications Equipment Field Trial (available from the Director, Administrative Services Division, Rural Utilities Service, Room 0175, South Building, U.S. Department of Agriculture, Washington, DC 20250) will be completed by RUS and must be signed by both the borrower and supplier as an indication that they understand their

responsibilities in the field trial. Assurance must also be obtained from RUS that the “particular item” that is the subject of the field test is eligible for a field trial. To obtain this assurance, any proposal for use of an item on a field trial basis shall be forwarded to the Chief, Area Engineering Branch, for review and approval.

(j) Procedures for establishing field trials for the various categories of equipment after RUS has approved the 399b:

(1) *Electronic transmission equipment.* The procedure set forth in Bulletin 385-2 “Purchasing and Installing Special Electronic Equipment” shall be followed except that the Special Equipment Contract (Including Installation), RUS Form 397, shall be used in all purchases of electronic equipment for field trials. In addition, the borrower and supplier shall execute three copies of a “Supplemental Agreement to Equipment Contract for Field Trial,” RUS Form 399, or a “Supplemental Agreement to Equipment Contract for Field Trial (Secondary—Delivery, Installation, Operation)”, RUS Form 399a, as well as three copies of the RUS Form 399b, “RUS Telecommunications Equipment Field Trial”, and forward them, together with three copies of the executed contract and specifications, to the Chief, Area Engineering Branch. A limited number of copies of RUS Forms 399, 399a, and 399b are available from RUS upon request from the Director, Administrative Services Division, Rural Utilities Service, Room 0175, South Building, U.S. Department of Agriculture, Washington, DC 20250. Additional copies may be reproduced by the user as needed. This category includes:

- (i) Voice frequency repeaters;
- (ii) Trunk carriers;
- (iii) Subscriber carrier;
- (iv) Point-to-point radio (Micro-wave);
- (v) Coaxial cable system electronics;
- (vi) Fiber optic cable system electronics;
- (vii) Multiplex equipment;
- (viii) Mobile and fixed radio-telephone; and
- (ix) Other items of electronic equipment associated with transmission.

(2) *Central office equipment.* The procedure set forth in Bulletin 384-1 “Purchasing and Installing Central Office Equipment” shall be followed except that “The Central Office Equipment Contract (Including Installation)”, RUS Form 525, shall be used to purchase switching equipment for field trials. In addition, the borrower and supplier shall execute three copies of a “Supplemental Agreement to Equipment Contract for Field Trial,” RUS Form 399, or a “Supplemental Agreement to Equipment Contract for Field Trial (Secondary—Delivery, Installation, Operation)”, RUS Form 399a, as the case may be, as well as three copies of the RUS Form 399b, “RUS Telecommunications Equipment Field Trial”, and forward them, together with three copies of the executed contract and specification to the Chief, Area Engineering Branch. This category includes:

- (i) Central office dial equipment;
- (ii) Direct distance dialing equipment;
- (iii) Automatic number identification equipment;
- (iv) Line concentrators;
- (v) Remote switching equipment; and
- (vi) All other items of equipment associated with switching equipment, such as loop extenders.

(3) Protection equipment and materials, outside plant equipment and materials, and all other equipment and materials, which includes all items not covered in paragraph (j) (1) or (2) of this section, shall be handled as described in Bulletin 344-1 “Methods of Purchasing Materials and Equipment for Use on Systems of Telephone Borrowers” except that the borrower’s purchase order form is to be used for purchasing materials and equipment in these categories. In addition, the borrower and supplier shall execute three copies of the “Supplemental Agreement to Equipment Contract for Field Trial,” RUS Form 399, or a “Supplemental Agreement to Equipment Contract for Field Trial (Secondary—Delivery, Installation, Operation)”, RUS Form 399a, as the case may be, as well as three copies of the RUS Form 399b, “RUS Telecommunications Equipment Field Trial”, and forward them, together

§ 1755.93

with three copies of the purchase order to the Chief, Area Engineering Branch.

(k) For all items except Electronic Central Office Equipment, suppliers and manufacturers must furnish warranties or guarantees satisfactory to RUS against the failure of the material and equipment used in the field trial. Terms of this warranty must not be less than the provisions of the standard warranty included in the "Telephone System Construction Contract", RUS Form 515, or the warranty provided for similar materials and equipment included in the "List of Materials Acceptable for Use on Telephone Systems of RUS Borrowers", RUS Bulletin 344-2. In lieu of a warranty, materials and equipment are sometimes furnished to RUS borrowers on a reduced or no cost basis. Terms of such arrangements are subject to RUS approval and should be fully covered in field trial proposals forwarded by borrowers to the Chief, Area Engineering Branch for review and approval. For the purchase of electronic central office equipment, suppliers and manufacturers are to provide warranties as provided in the applicable RUS contract form: RUS Form 397 for electronic equipment and RUS Form 525 for central office equipment.

7 CFR Ch. XVII (1-1-97 Edition)

Forms 399 and 399a, which apply to field trials of these devices, specify that the term of the warranty does not begin until the satisfactory conclusion of the field trial.

[49 FR 28394, July 12, 1984. Redesignated at 55 FR 39397, Sept. 27, 1990]

§§ 1755.4—1755.92 [Reserved]

§ 1755.93 List of standard forms of telecommunications contracts.

Following is a list of the current standard forms of contracts that RUS prepared for use by telephone borrowers when procuring engineering and architectural services, purchasing telephone materials and equipment, and constructing telephone facilities with RUS loan funds. Copies of the contract forms are available from the sources indicated in the listing. A notice of any change in these contract forms will be published in the FEDERAL REGISTER. The terms "RUS form", "RUS standard form", "RUS specification", and "RUS bulletin" have the same meanings as the terms "REA form", "REA standard form", "REA specification", and "REA bulletin", respectively, unless otherwise indicated.

RUS Form No.	Issue date	Title	Purpose	Source of copies
165	9-69	Architectural Services Contract—Telephone.	Used to engage the services of an architect.	RUS. ¹
168b	3-62	Contractor's Bond	Used in RUS Form 515 when the contract exceeds \$100,000.	Copy in the Form 515 Contract.
168c	4-79	Contractor's Bond	Used when the contractor's surety has accepted a Small Business Administration guarantee and the contract is for \$1 million or less.	RUS. ¹
217	7-81	Postloan Engineering Service Contract, Telephone System and Construction.	Used to engage the services of a consulting engineer to perform the postloan engineering services.	RUS. ¹
238	4-72	Construction or Equipment Contract Amendment.	Amending the Building Contract RUS Form 257; Special Equipment Contracts, RUS Forms 397 and 398; Telephone Equipment Contract (Installation Only), RUS Form 400; Central Office Equipment Contracts, RUS Forms 525 and 545.	RUS. ¹
242	11-58	Assignment of Engineering Service Contract.	Used to transfer the responsibilities of completing the performance of the engineering service contract to another company.	RUS. ¹
245	11-75	Engineering Service Contract, Special Services—Telephone.	Used to engage a consulting engineer to perform special services.	RUS. ¹
257	3-73	Contract to Construct Buildings	Building construction	Supt. of Doc., GPO, Wash., DC 20402. ²
257a	10-69	Contractor's Bond	Used in RUS Form 257	Copy in the Form 257 Contract.
270	7-70	Equal Opportunity Addendum	Addendum to Construction and Equipment Contracts not having current equal opportunity provisions.	RUS. ¹

Rural Utilities Service, USDA
§ 1755.93

RUS Form No.	Issue date	Title	Purpose	Source of copies
282	11-53	Subcontract	Subcontracting a portion of construction under a construction contract requires approval of the borrower, surety and RUS prior to sub-contracting.	RUS. ¹
307	4-60	Bid Bond	Bid proposals on RUS Forms 257, 515, and 525 require either a bid bond or a certified check in an amount equal to ten percent of the maximum bid price.	Copies in each of the contracts.
397	12-67	Special Equipment Contract (Including Installation).	Purchase and installation of voice frequency repeaters, trunk carrier, subscriber carrier, microwave, mobile radio, line concentrators, and other items of electronic equipment associated with transmission.	RUS. ¹
397f	2-63	Contractor's Bond (Special Telephone Equipment).	Used in RUS Form 397 when the contract exceeds \$100,000.	Copy in the Form 397 Contract.
No form number.	7-78	Addendum No. 1 to RUS Form 397, Special Equipment Contract (Including Installation).	Incorporates the liquidated damages provision into the 397 contract.	RUS. ¹
398	11-62	Special Equipment Contract (Not Incl. Installation).	Purchase and deliver voice frequency repeaters, trunk carrier, subscriber carrier, microwave, mobile radio, line concentrators, and other items of electronic equipment associated with transmission.	RUS. ¹
399	8-82	Supplemental Agreement to Equipment Contract for Field Trial.	Used in any contract that contains material or equipment that requires a field trial and has primary status.	RUS. ¹
399a	8-82	Supplemental Agreement to Equipment Contract for Field Trial (Secondary—Delivery, Installation, Operation).	Used in any contract that contains material or equipment that requires a field trial and is the secondary field trial category.	RUS. ¹
400	10-65	Telephone Equipment Contract (Installation Only).	Used where the contract will cover only the installation of equipment.	RUS. ¹
400a	10-65	Contractor's Bond (Telephone Equipment Contract—Installation Only).	Used in RUS Form 400 when the contract exceeds \$100,000.	Copy in the Form 400 Contract.
515	1-90	Telephone System Construction Contract (Labor and Materials).	Telephone outside plant construction, including direct buried plant, conduit and manholes, underground cable, pole lines, aerial cable, service entrances and station protector.	Supt. of Doc., GPO, Wash DC 20402. ²
525	7-94	Central Office Equipment Contract (Including Installation).	Purchase and Installation of central office switching equipment.	RUS. ¹
525a	10-62	Contractor's Bond (Central Office Equipment).	Used in RUS Form 525 when the contracts exceed \$100,000.	Copy in the Form 525 Contract.
No form number.	8-79	Addendum No. 1 to RUS Form 525, Central Office Equipment Contract (Including Installation).	Incorporates the liquidated damages provision into the 525 contract.	RUS. ¹
526	8-66	Construction Contract Amendment	Amending the Telephone System Construction Contract (Labor and Material), RUS Form 515.	RUS. ¹
545	9-66	Central Office Equipment Contract (Not Including Installation).	Purchase and deliver central office equipment.	RUS. ¹
756	3-63	Telephone Line Extension Construction Contract (Labor and Materials).	Construction of system improvements and line extensions where scope of the project is not known.	RUS. ¹
773	12-90	Miscellaneous Construction Work and Maintenance Service Contract..	Minor construction by contract and maintenance and repair of telephone system facilities..	RUS. ¹
787	8-63	Supplement A to Construction Contract RUS Form 515.	Used in RUS Form 515 when borrower furnishes any material for construction of the project.	RUS. ¹
No form number.	5-94	Addendum No. 2 to RUS Forms 525 and 545 Central Office Equipment Contracts.	Incorporates the Software License Agreement into RUS Forms 525 and 545.	RUS. ¹

¹A limited number of copies of the publication will be furnished by RUS upon request. As this document is produced by the Federal Government and is, therefore, in the public domain, additional copies may be duplicated locally by any user as desired. Requests for copies should be sent the Director, Administrative Services Division, U.S. Department of Agriculture, Rural Utilities Service, Washington, DC 20250. The telephone number of the RUS Publication Office is (202) 720-8674.

§ 1755.97

²This contract form is for sale by the Superintendent of Documents, Government Printing Office, Washington, DC 20402. RUS Form 33, Order Blank for RUS Contract Forms from the Government Printing Office should be used to order the publication. Follow the procedure under (4) to obtain copies of Form 33 from RUS.

[53 FR 15546, May 2, 1988; as amended at 55 FR 2510, Jan. 25, 1990. Redesignated at 55 FR 39397, Sept. 27, 1990, as amended at 56 FR 1484, Jan. 15, 1991; 59 FR 17681, Apr. 14, 1994; 59 FR 31126, June 17, 1994; 59 FR 66440, Dec. 27, 1994]

§§ 1755.94–1755.96 [Reserved]

§ 1755.97 Incorporation by reference of telephone standards and specifications.

The following telephone Bulletins have been approved for incorporation by reference by the Director of the Office of the Federal Register on December 30, 1983. Bulletin 345–150 (Form 515a) containing the specifications and drawings for construction of buried cables and wires may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. The remaining Bulletins containing construction standards and specifications for materials and equipment may be obtained from the Rural

Utilities Service, Administrative Services Division, Room 0175–S, Washington, DC 20250. The bulletins are available for inspection at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. These materials are incorporated as they exist on the date of the approval and a notice of any change in these materials will be published in the FEDERAL REGISTER. The terms “RUS form”, “RUS standard form”, “RUS specification”, and “RUS bulletin” have the same meanings as the terms “REA form”, “REA standard form”, “REA specification”, and “REA bulletin”, respectively, unless otherwise indicated.

RUS Bulletin No.	Specification No.	Date last issued	Title of standard or specification
345–22	PE–26	Jan. 1989	RUS specification for voice frequency loading coils.
345–39		Aug. 19, 1985	RUS specification for telephone station protectors.
345–50	PE–60	Sept. 1979	RUS specification for trunk carrier systems.
345–52	PC–5A	Jan. 1980	RUS standard for service entrance and station protector installations.
345–54	PE–52	Dec. 1971	RUS specification for telephone cable splicing connectors.
345–55	PE–61	Dec. 1973	RUS specification for central office loop extenders and loop extender voice frequency repeater combinations.
345–63	PC–4	May 1976	RUS standard for acceptance tests and measurements of telephone plant.
345–65	PE–65	Mar. 22, 1985	Specification for shield bonding connectors.
345–66	PE–64	Sept. 1979	RUS specification for subscriber carrier systems.
345–69	PE–29	Jan. 1978	RUS specification for two-wire voice frequency repeater equipment.
345–72	PE–74	Oct. 1985	RUS specification for filled splice closures.
345–78	PE–78	Feb. 1980	RUS specification for carbon arrester assemblies for use in protectors.
345–150	Form 515a	July 1989	RUS specifications and drawings for construction of direct buried plant.
345–151	Form 515c	July 1989	RUS specifications and drawings for conduit and manhole construction.
345–152	Form 515d	July 1989	RUS specifications and drawings for underground cable installation.
345–153	Form 515f	July 1989	RUS specifications and drawings for construction of pole line and aerial cables.
345–154	Form 515g	July 1989	RUS specifications and drawings for service entrance and station protection installation.
345–180	Form 397a	Jan. 1963	RUS specifications for voice frequency repeaters and voice frequency repeatered trunks.
345–183	Form 397d	June 1970	RUS design specifications for point-to-point microwave radio systems.
345–184	Form 397e	May 1971	RUS design specifications for mobile and fixed dial radio telephone equipment.
1728F–700		9-2-93	RUS Specification for Wood Poles, Stubs and Anchor Logs

§ 1755.200

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 1755.97, see the List of CFR Sections Affected in the Finding Aids section of this volume.

§ 1755.98 List of telephone standards and specifications included in other 7 CFR parts.

The following standards and specifications are included throughout 7 CFR chapter XVII. These standards and specifications are not incorporated by reference elsewhere in the chapter. The terms “RUS form”, “RUS standard form”, “RUS specification”, and “RUS bulletin” have the same meanings as the terms “REA form”, “REA standard form”, “REA specification”, and “REA bulletin”, respectively, unless otherwise indicated.

Section	Issue date	Title
1728.202	9-2-93	RUS Specification for Quality Control and Inspection of Timber Products.
1755.200	1-26-95	RUS Standard for Splicing Copper and Fiber Optic Cables.
1755.370	1-19-90	RUS Specification for Seven Wire Galvanized Steel Strand.
1755.390	6-21-93	RUS Specification for Filled Telephone Cables.
1755.397	3-6-90	RUS Design Specification for Digital Lightwave Transmission Systems, RUS Form 397h.
1755.522	6-28-93	RUS General Specification for Digital, Stored Program Controlled Central Office Equipment.
1755.525	7-18-94	RUS Form 525, Central Office Equipment Contract (Including Installation).
1755.700 through 1755.704.	6-24-96	RUS Specification for Aerial Service Wires.
1755.860	12-20-93	RUS Specification for Filled Buried Wires.
1755.870	7-14-94	RUS Specification for Terminating Cables.
1755.890	6-21-93	RUS Specification for Filled Telephone Cables with Expanded Insulation.
1755.900	8-4-94	RUS Specification for Filled Fiber Optic Cables.
1755.910	11-21-94	RUS Specification for Outside Plant Housings and Serving Area Interface Systems.

[58 FR 41410, Aug. 3, 1993, as amended at 59 FR 53044, Oct. 21, 1994; 59 FR 66440, Dec. 27, 1994; 60 FR 1712, Jan. 5, 1995; 60 FR 5097, Jan. 26, 1995; 61 FR 26074, May 24, 1996]

§§ 1755.99—1755.199 [Reserved]

§ 1755.200 RUS standard for splicing copper and fiber optic cables.

(a) *Scope.* (1) This section describes approved methods for splicing plastic insulated copper and fiber optic cables. Typical applications of these methods include aerial, buried, and underground splices.

(2) American National Standard Institute/National Fire Protection Association (ANSI/NFPA) 70, 1993 National Electrical Code (NEC) referenced in this section is incorporated by reference by RUS. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. A copy of the ANSI/NFPA 1993 NEC standard is available for inspection during normal business hours at RUS, room 2845, U.S. Department of Agriculture, Washington, DC 20250-1500 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. Copies are available from NFPA, Batterymarch Park, Quincy, Massachusetts 02269, telephone number 1 (800) 344-3555.

(3) American National Standard Institute/Institute of Electrical and Electronics Engineers, Inc. (ANSI/IEEE), 1993 National Electrical Safety Code (NESC) referenced in this section is incorporated by reference by RUS. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. A copy of the ANSI/IEEE 1993 NESC standard is available for inspection during normal business hours at RUS, room 2845, U.S. Department of Agriculture, Washington, DC 20250-1500 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. Copies are available from IEEE Service Center, 455 Hoes Lane, Piscataway, New Jersey 08854, telephone number 1 (800) 678-4333.

(b) *General.* (1) Only Rural Utilities Service (RUS) accepted filled cable and splicing materials shall be used on outside plant projects financed by RUS.

(2) The installation instructions provided by the manufacturer of splicing materials shall be followed except where those instructions conflict with the procedures specified in this section.

(3) Precautions shall be taken to prevent the ingress of moisture and other contaminants during all phases of the splicing installation. When an uncompleted splice must be left unattended, it shall be sealed to prevent the ingress of moisture and other contaminants.

(4) Minor sheath damage during construction may be repaired if the repair is completed immediately and approved by the borrower's resident project representative. Minor damage is typically repaired by:

(i) Scuffing the cable sheath associated with the damaged area;

(ii) Applying several layers of DR tape over the scuffed and damaged area;

(iii) Applying several layers of plastic tape over the DR tape; and

(iv) If damage is severe enough to rupture the cable shield, a splice closure shall be installed.

(5) All splice cases installed on RUS toll trunk and feeder cables shall be filled, whether aerial, buried, or underground.

(c) *Splicing considerations for copper cables—*(1) *Preconstruction testing.* It is desirable that each reel of cable be tested for grounds, opens, shorts, crosses, and shield continuity before the cable is installed. However, manufacturer supplied test results are acceptable. All cable pairs shall be free from electrical defects.

(2) *Handling precautions.* The cable manufacturer's instructions concerning pulling tension and bending radius shall be observed. Unless the cable manufacturer's recommendation is more stringent, the minimum bending radius shall be 10 times the cable diameter for copper cables and 20 times the cable diameter for fiber optic cables.

(3) *Cable sheath removal.* (i) The length of cable sheath to be removed shall be governed by the type of splicing hardware used. Follow the splice

case manufacturer's recommendations. For pedestals or large pair count splice housings, consider removing enough cable sheath to allow the conductors to extend to the top of the pedestal and then to hang downward to approximately 15 centimeters (cm) (6 inches (in.)) above the baseplate.

(ii) Caution shall be exercised to avoid damaging the conductor insulation when cutting through the cable shield and removing the shield. Sharp edges and burrs shall be removed from the cut end of the shield.

(4) *Shield bonding and grounding.* For personnel safety, the shields of the cables to be spliced shall be bonded together and grounded before splicing activities are started. (See paragraphs (g)(2), and (g)(5)(i) through (g)(5)(iii) of this section for final bonding and grounding provisions.)

(5) *Binder group identification.* (i) Color coded plastic tie wraps shall be placed loosely around each binder group of cables before splicing operations are attempted. The tie wraps shall be installed as near the cable sheath as practicable and shall conform to the same color designations as the binder ribbons. Twisted wire pig-tails shall not be used to identify binder groups due to potential transmission degradation.

(ii) The standard insulation color code used to identify individual cable pairs within 25-pair binder groups shall be as shown in Table 1:

TABLE 1.—CABLE PAIR IDENTIFICATION WITHIN BINDER GROUPS

Pair No.	Color	
	Tip	Ring
1	White	Blue.
2	White	Orange.
3	White	Green.
4	White	Brown.
5	White	Slate.
6	Red	Blue.
7	Red	Orange.
8	Red	Green.
9	Red	Brown.
10	Red	Slate.
11	Black	Blue.
12	Black	Orange.
13	Black	Green.
14	Black	Brown.
15	Black	Slate.
16	Yellow	Blue.
17	Yellow	Orange.
18	Yellow	Green.
19	Yellow	Brown.

Rural Utilities Service, USDA

§ 1755.200

TABLE 1.—CABLE PAIR IDENTIFICATION WITHIN BINDER GROUPS—Continued

Pair No.	Color	
	Tip	Ring
20	Yellow	Slate.
21	Violet	Blue.
22	Violet	Orange.
23	Violet	Green.
24	Violet	Brown.
25	Violet	Slate.

(iii) The standard binder ribbon color code used to designate 25-pair binder groups within 600-pair super units shall be as shown in Table 2:

TABLE 2.—CABLE BINDER GROUP IDENTIFICATION

Group No.	Color of bindings	Group pair count
1	White-Blue	1–25
2	White-Orange	26–50
3	White-Green	51–75
4	White-Brown	76–100
5	White-Slate	101–125
6	Red-Blue	126–150
7	Red-Orange	151–175
8	Red-Green	176–200
9	Red-Brown	201–225
10	Red-Slate	226–250
11	Black-Blue	251–275
12	Black-Orange	276–300
13	Black-Green	301–325
14	Black-Brown	326–350
15	Black-Slate	351–375
16	Yellow-Blue	376–400
17	Yellow-Orange	401–425
18	Yellow-Green	426–450
19	Yellow-Brown	451–475
20	Yellow-Slate	476–500
21	Violet-Blue	501–525
22	Violet-Orange	526–550
23	Violet-Green	551–575
24	Violet-Brown	576–600

(iv) Super-unit binder groups shall be identified in accordance with Table 3:

TABLE 3.—SUPER-UNIT BINDER COLORS

Pair numbers	Binder color
1–600	White.
601–1200	Red.
1201–1800	Black.
1801–2400	Yellow.
2401–3000	Violet.
3001–3600	Blue.
3601–4200	Orange.
4201–4800	Green.
4801–5400	Brown.
5401–6000	Slate.

(v) Service pairs in screened cables shall be identified in accordance with Table 4:

TABLE 4.—SCREENED CABLE SERVICE PAIR IDENTIFICATION

Service pair No.	Color	
	Tip	Ring
1	White	Red.
2	White	Black.
3	White	Yellow.
4	White	Violet.
5	Red	Black.
6	Red	Yellow.
7	Red	Violet.
8	Black	Yellow.
9	Black	Violet.

(6) *Cleaning conductors.* It is not necessary to remove the filling compound from cable conductors before splicing. However, it is permissible to wipe individual conductors with clean paper towels or clean cloth rags. No cleaning chemicals, etc., shall be used. Caution shall be exercised to maintain individual cable pair and binder group identity. Binder group identity shall be maintained by using color coded plastic tie wraps. Individual pair identification shall be maintained by carefully twisting together the two conductors of each pair.

(7) *Expanded plastic insulated conductor (PIC) precautions.* Solid PIC and expanded (foam or foam skin) PIC are spliced in the same manner, using the same tools and materials and, in general, should be treated the same. However, the insulation on expanded PIC is much more fragile than solid PIC. Twisting or forming expanded PIC into extremely compact splice bundles and applying excessive amounts of tension when tightening tie wraps causes shiners and, thus shall be avoided.

(8) *Splice connectors.* (i) Only RUS accepted filled splice connectors shall be used on outside plant projects financed by RUS.

(ii) Specialized connectors are available for splicing operations such as butt splices, in line splices, bridge taps, clearing and capping, and multiple pair splicing operations. The splice connector manufacturer's recommendations shall be followed concerning connector selection and use.

(iii) Caution shall be exercised to maintain conductor and pair association both during and after splicing operations.

(iv) Splicing operations that involve pairs containing working services shall

§ 1755.200

utilize splice connectors that permit splicing without the interruption of service.

(9) *Piecing out conductors.* Conductors may be pieced-out to provide additional slack or to repair damaged conductors. However, the conductors shall be pieced-out with conductors having the same gauge and type and color of insulation. The conductors used for piecing-out shall be from cables having RUS acceptance.

(10) *Splice organization.* Spliced pair bundles shall be arranged in firm lay-ups with minimum conductor tension in accordance with the manufacturer's instructions.

(11) *Binder tape.* Perforated nonhygroscopic and nonwicking binder tape should be applied to splices housed in filled splice cases. The binder tape allows the flow of filling compound while holding the splice bundles near the center of the splice case to allow adequate coverage of filling compound.

(12) *Cable tags.* Cables shall be identified by a tag indicating the cable manufacturer's name, cable size, date of placement, and generic route information. Information susceptible to changes caused by future cable throws and rearrangements should not be included. Tags on load coil stubs shall include the serial number of the coil case, the manufacturer's name, and the inductance value.

(13) *Screened cable.* Screened PIC cable is spliced in the same manner as nonscreened PIC cable. However, special considerations are necessary due to differences in the cable design. The transmit and receive bundles of the cable shall be separated and one of the bundles shall be wrapped with shielding material in accordance with the cable manufacturer's recommendations. When acceptable to the cable manufacturer, it is permissible to use either the scrap screening tape removed from the cable during the sheath opening process provided the screening tape is edge coated or new pressure sensitive aluminum foil tape over polyethylene tape.

(14) *Service wire connections.* (i) Buried service wires may be spliced directly to cable conductors inside pedestals using the same techniques required for branch cables. Buried service wires

7 CFR Ch. XVII (1–1–97 Edition)

may also be terminated on terminal blocks inside pedestals in areas where high service order activity or fixed count cable administration policies require terminal blocks. However, only RUS accepted terminal blocks equipped with grease or gel filled terminations to provide moisture and corrosion resistance shall be used.

(ii) Only filled terminal blocks having RUS acceptance shall be used on aerial service wire connections.

(15) *Copper cable testing.* Copper cable testing shall be performed in accordance with RUS Bulletin 345–63, "RUS Standard for Acceptance Tests and Measurements of Telephone Plant," PC-4, (Incorporated by reference at § 1755.97).

(16) *Cable acceptance.* Installed cable shall be tested and pass the inventory and acceptance testing specified in the Telephone System Construction Contract (Labor and Materials), RUS Form 515. The tests and inspections shall be witnessed by the borrower's resident project representative. All conductors shall be free from grounds, shorts, crosses, splits, and opens.

(d) *Splice arrangements for copper cables—*(1) *Service distribution closures.* (i) Ready access closures permit cable splicing activities and the installation of filled terminal blocks for service wire connections in the same closure. Ready access designs shall allow service technicians direct access to the cable core as well as the terminal block.

(ii) Fixed count terminals shall restrict service technician access to the cable core. Predetermined cable pairs shall be spliced to the terminal leads or stub cable in advance of service assignments.

(2) *Aerial splices.* Aerial splice cases accommodate straight splices, branch splices, load coils, and service distribution terminals. Aerial splicing arrangements having more than 4 cables spliced in the same splice case are not recommended. Stub cabling to a second splice case to avoid a congested splice is acceptable.

(3) *Buried splices.* (i) Direct buried splice cases accommodate straight splices, branch splices, and load coils. Direct buried splices shall be filled and

shall be used only when above ground splicing in pedestals is not practicable.

(ii) A treated plank or equivalent shall be placed 15 cm (6 in.) above the buried splice case to prevent damage to the splice case from future digging. Where a firm base for burying a splice cannot be obtained, a treated plank or equivalent shall be placed beneath the splice case.

(iii) Each buried splice shall be identified for future locating. One method of marking the splice point is the use of a warning sign. Another method is the burying of an electronic locating device.

(4) *BD-type pedestals.* (i) BD-type pedestals are housings primarily intended to house, organize, and protect cable terminations incorporating splice connectors, ground lugs, and load coils. Activities typically performed in pedestals are cable splicing, shield bonding and grounding, loading, and connection of subscriber service drops.

(ii) The recommended splice capacities for BD-type pedestals are shown in Table 5. However, larger size pedestals are permissible if service requirements dictate their usefulness. Table 5 is as follows:

TABLE 5.—SPlice CAPACITIES FOR BD-TYPE PEDESTALS

Pedestal type	Maximum straight splice pair capacity using single pair connectors or multiple pair splice modules	Maximum load splice pair capacity using single pair connectors or multiple pair splice modules (see note 1)
BD3, BD3A	100 Pair	50 Pair.
BD4, BD4A	200 Pair	100 Pair.
BD5, BD5A	600 Pair	300 Pair.
BD7	1200 Pair	600 Pair.
BD14, BD14A	100 Pair	50 Pair.
BD15, BD15A	400 Pair	200 Pair.
BD16, BD16A	600 Pair	300 Pair.

Note 1: This table refers to load coil cases that are to be direct buried with stub cables extending into the pedestal for splicing. Requirements involving individual coil arrangements inside the pedestal should be engineered on a case-by-case basis.

(iii) Special distribution pedestals having a divider plate for mounting filled terminal blocks are available. Distribution pedestals are also equipped with service wire channels for installation of buried service wires without disturbing the cabling and gravel inside the base of the pedestal. Distribution pedestals are recommended in locations where the connection of service wires is required.

(5) *Large pair count splice housings.* Large pair count splice housings are recommended for areas not suitable for man-holes. The recommended capacities are shown in Table 6:

TABLE 6.—SPlice CAPACITIES FOR LARGE COUNT HOUSINGS

Housing type	Maximum straight splice pair capacity using single pair connectors or multiple pair splice modules	Maximum load splice pair capacity using single pair connectors or multiple pair splice modules (see note 1)
BD 6000	6,000 Pair	3,000 Pair.
BD 8000	8,000 Pair	4,000 Pair.
BD 10000	10,000 Pair	5,000 Pair.

(6) *Pedestal restricted access inserts.* Restricted access inserts may be used to protect splices susceptible to unnecessary handling where subsequent work activities are required or expected to occur after splices have been completed. Restricted access inserts also provide moisture protection in areas susceptible to temporary flooding. A typical restricted access insert is shown in Figure 1:

FIGURE 1
PEDESTAL RESTRICTED ACCESS INSERT

Rural Utilities Service, USDA

§ 1755.200

(7) *Serving Area Interface (SAI) Systems.* SAI systems provide the cross-connect point between feeder and distribution cables. Connection of feeder to distribution pairs is accomplished by placing jumpers between connecting blocks. Only RUS accepted connecting

blocks having grease or gel filled terminations to provide moisture and corrosion resistance shall be used.

(8) *Buried cable splicing arrangements.* Typical buried cable splicing arrangements are illustrated in Figures 2 through 5:

FIGURE 2
SERVICE WIRE CONNECTION TO BURIED CABLE

Note: See Figures 13 through 16 for cable tags, tie wraps, and bonding and grounding details.

FIGURE 3
TYPICAL SPLICE USING SINGLE PAIR CONNECTORS

Note: Cable tags, bonding and grounding details, and plastic tie wraps have been omitted for clarity. See Figures 13 through 16 for cable tags, tie wraps, and bonding and grounding details.

FIGURE 4

LARGE SPLICE USING MULTIPLE PAIR CONNECTORS

Note: Cable tags, bonding and grounding details, and plastic tie wraps have been omitted for clarity. See Figures 13 through 16 for cable tags, tie wraps, and bonding and grounding details.

FIGURE 5

LARGE SPLICE USING MULTIPLE PAIR CONNECTORS
MOUNTED ON ORGANIZER RACKS

Note: Cable tags, bonding and grounding details, and plastic tie wraps have been omitted for clarity. See Figures 13 through 16 for cable tags, tie wraps, and bonding and grounding details.

(9) *Underground splices (manholes).* Underground splice cases accommodate straight splices, branch splices, and load coils. Underground splices shall be filled.

(10) *Central office tip cable splices.* (i) Filled cable or filled splices are not recommended for use inside central offices, except in cable vault locations. Outside plant cable sheath and cable filling compound are susceptible to fire and will support combustion. Fire, smoke, and gases generated by these materials during burning are detrimental to telephone switching equipment.

(ii) Tip cables should be spliced in a cable vault. However, as a last resort, tip cables may be spliced inside a central office if flame retardant splice cases or a noncombustible central office splice housing is used to contain the splice.

(iii) Splices inside the central office shall be made as close as practical to the point where the outside plant ca-

bles enter the building. Except in cable vault locations, outside plant cables within the central office shall be wrapped with fireproof tape or enclosed in noncombustible conduit.

(e) *Splicing considerations for fiber optic cables*—(1) *Connection characteristics.* Splicing efficiency between optical fibers is a function of light loss across the fiber junctions measured in decibels (dB). A loss of 0.2 dB in a splice corresponds to a light transmission efficiency of approximately 95.5 percent.

(2) *Fiber core alignment.* Fiber splicing techniques shall be conducted in such a manner that the cores of the fibers will be aligned as perfectly as possible to allow maximum light transmission from one fiber to the next. Without proper alignment, light will leave the fiber core and travel through the fiber cladding. Light outside the fiber core is not a usable light signal. Core misalignment is illustrated in Figure 6:

FIGURE 6
CORE MISALIGNMENT

Rural Utilities Service, USDA

§ 1755.200

(3) *Splice loss.* (i) Splice loss can also be caused by fiber defects such as non-identical core diameters, cores not in center of the fiber, and noncircular cores. Such defects are depicted in Figure 7:

FIGURE 7
SPLICE LOSS CAUSED BY FIBER MANUFACTURE

Note: There is no light loss if the light travels from a smaller to a larger core.

(ii) Undesirable splice losses are caused by poor splicing techniques including splicing irregularities such as improper cleaves and dirty splices. Typical cleave problems are illustrated in Figure 8:

FIGURE 8
IMPROPER CLEAVES VERSUS PROPER CLEAVE

Angled End

End Spur

Fractured End

Properly Cleaved Fiber

(4) *Handling precautions.* The following precautions shall be observed:

(i) Avoid damaging the cable during handling operations prior to splicing. Minor damage may change the transmission characteristics of the fibers to the extent that the cable section will have to be replaced;

(ii) The cable manufacturer's recommendations concerning pulling tension shall be observed. The maximum pulling tension for most fiber optic cable is 2669 newtons (600 pound-force);

(iii) The cable manufacturer's recommendations concerning bending radius shall be observed. Unless the cable manufacturer's recommendation is more stringent, the minimum bending radius for fiber optic cable shall be 20 times the cable diameter;

(iv) The cable manufacturer's recommendations concerning buffer tube bending radius shall be observed. Unless the cable manufacturer's recommendation is more stringent, the minimum bending radius for buffer tubes is usually between 38 millimeters (mm) (1.5 in.) and 76 mm (3.0 in.). The bending limitations on buffer tubes are intended to prevent kinking. Buffer tube kinking may cause excessive optical loss or fiber breakage; and

(v) Handle unprotected glass fibers carefully to avoid introducing flaws such as scratched or broken fibers.

(5) *Personnel safety.* The following safety precautions shall be observed:

(i) Safety glasses shall be worn when handling glass fibers;

(ii) Never view open-ended fibers with the naked eye or a magnifying device. Improper viewing of a fiber end that is transmitting light may cause irreparable eye damage; and

(iii) Dispose of bare scrap fibers by using the sticky side of a piece of tape to pick up and discard loose fiber ends. Fiber scraps easily penetrate the skin and are difficult to remove.

(6) *Equipment requirements.* (i) Fiber optic splices shall be made in areas where temperature, humidity, and cleanliness can be controlled. Both fusion and mechanical splicing techniques may require a splicing vehicle equipped with a work station that will allow environmental control.

(ii) Both fusion and mechanical splicing techniques are permitted on RUS

financed projects. When using the mechanical splicing technique, only RUS accepted mechanical fiber optic splice connectors can be used.

(iii) Fusion splicing machines shall be kept in proper working condition. Regular maintenance in accordance with the machine manufacturer's recommendations shall be observed.

(iv) Mechanical splicing tools shall be in conformance with the tool manufacturer's recommendations.

(v) An optical time domain reflectometer (OTDR) shall be used for testing splices. The OTDR shall be stationed at the central office or launch point for testing individual splices as they are made and for end-to-end signature tests for the fiber optic link.

(vi) An optical power meter shall be used for end-to-end cable acceptance tests.

(vii) A prerequisite for the successful completion of a fiber optic splicing endeavor is the presence of a talk circuit between the splicing technician in the splicing vehicle and the operator of the OTDR in the central office. The splicing technician and the OTDR operator shall have access to communications with each other in order to inform each other as to:

(A) Which splices meet the loss objectives;

(B) The sequence in which buffer tubes and fibers are to be selected for subsequent splicing operations; and

(C) The timing required for the performance of OTDR testing to prevent making an OTDR test at the same time a splice is being fused.

(7) *Cable preparation.* (i) Engineering work prints shall prescribe the cable slack needed at splice points to reach the work station inside the splicing vehicle. Consideration should be given to the slack required for future maintenance activity as well as initial construction activities. The required slack may be different for each splice point, depending on the site logistics. However, the required slack is seldom less than 15 meters (50 feet). The amount of slack actually used shall be recorded for each splice point to assist future maintenance and restoration efforts.

(ii) The splice case manufacturer's recommendations concerning the amount of cable sheath to be removed

Rural Utilities Service, USDA

§ 1755.200

shall be followed to facilitate splicing operations. The length of the sheath opening shall be identified with a wrap of plastic tape.

(iii) If the cable contains a rip cord, the cable jacket shall be ring cut approximately 15 cm (6 in.) from the end and the 15 cm (6 in.) of cable jacket shall be removed to expose the rip cord. The rip cord shall be used to slit the jacket to the tape mark.

(iv) If the cable does not contain a rip cord, the cable jacket shall be slit using a sheath splitter. No cuts shall be made into the cable core nor shall the buffer tubes be damaged.

(v) If the cable contains an armor sheath, the outer jacket shall be opened along the slit and the jacket shall be removed exposing the armor sheath. The armor shall be separated at the seam and pulled from the cable exposing the inner jacket. The armor shall be removed making allowances for a shield bond connector. The inner sheath shall be slit using a sheath splitter or rip cord. The cable core shall not be damaged nor shall there be any damage to the buffer tubes. The jacket shall be peeled back and cut at the end of the slit. The exposed buffer tubes shall not be cut, kinked, or bent.

(vi) After the cable sheath has been removed, the binder tape shall be removed from the cable. The cable shall not be crushed or deformed.

(vii) The buffer tubes shall be unstranded one at a time. The buffer tubes shall not be kinked.

(viii) If the cable is equipped with a strength member, the strength member shall be cut to the length recommended by the splice case manufacturer.

(ix) Each buffer tube shall be inspected for kinks, cuts, and flat spots. If damage is detected, an additional length of cable jacket shall be removed and all of the buffer tubes shall be cut off at the point of damage.

(x) The cable preparation sequence shall be repeated for the other cable end.

(8) *Shield bonding and grounding.* For personnel safety, the shields and metallic strength members of the cables to be spliced shall be bonded together and grounded before splicing activities are started. (See paragraphs (g)(4), and (g)(5)(i) through (g)(5)(iii) of this sec-

tion for final bonding and grounding provisions).

(9) *Fiber optic color code.* The standard fiber optic color code for buffer tubes and individual fibers shall be as shown in Table 7:

TABLE 7.—FIBER AND BUFFER TUBE IDENTIFICATION

Buffer tube and fiber No.	Color
1	Blue.
2	Orange.
3	Green.
4	Brown.
5	Slate.
6	White.
7	Red.
8	Black.
9	Yellow.
10	Violet.
11	Rose.
12	Aqua.
13	Blue/Black Tracer.
14	Orange/Black Tracer.
15	Green/Black Tracer.
16	Brown/Black Tracer.
17	Slate/Black Tracer.
18	White/Black Tracer.
19	Red/Black Tracer.
20	Black/Yellow Tracer.
21	Yellow/Black Tracer.
22	Violet/Black Tracer.
23	Rose/Black Tracer.
24	Aqua/Black Tracer.

(10) *Buffer tube removal.* (i) The splice case manufacturer's recommendation shall be followed concerning the total length of buffer tube to be removed. Identify the length to be removed with plastic tape.

(ii) Experiment with a scrap buffer tube to determine the cutting tool adjustment required to ring cut a buffer tube without damaging the fibers.

(iii) Buffer tubes shall be removed by carefully ring cutting and removing approximately 15 to 46 cm (6 to 18 in.) of buffer tube at a time. The process shall be repeated until the required length of buffer tube has been removed, including the tape identification marker.

(11) *Coated fiber cleaning.* (i) Each coated fiber shall be cleaned. The cable manufacturer's recommendations shall be followed concerning the solvent required to clean the coated fibers. Reagent grade isopropyl alcohol is a commonly used cleaning solvent.

(ii) A tissue or cotton ball shall be soaked in the recommended cleaning solvent and the coated fibers shall be carefully wiped one at a time using a clean tissue or cotton ball for each

§ 1755.200

coated fiber. Caution shall be exercised to avoid removing the coloring agent from the fiber coating.

(12) *Fiber coating removal.* (i) Fiber coatings shall be removed. In accordance with the splicing method used, the splice case manufacturer's recommendation shall be followed concerning the length of fiber coating to be removed.

(ii) The recommended length of fiber coating shall be removed only on the two fibers to be spliced. Fiber coating removal shall be performed on a one-fiber-at-a-time basis as each splice is prepared.

(13) *Bare fiber cleaning.* After the fiber coating has been removed, the bare fibers shall be cleaned prior to splicing. Each fiber shall be wiped with a clean tissue or cotton ball soaked with the cleaning solvent recommended by the cable manufacturer. The bare fiber shall be wiped one time to minimize fiber damage. Aggressive wiping of bare fiber shall be avoided as it lowers the fiber tensile strength.

(14) *Fiber cleaving.* Cleaving tools shall be clean and have sharp cutting edges to minimize fiber scratches and improper cleave angles. Cleaving tools that are recommended by the manufacturer of the splicing system shall be used.

(15) *Cleaved fiber handling.* The cleaved and cleaned fiber shall not be allowed to touch other objects and shall be inserted into the splicing device.

7 CFR Ch. XVII (1–1–97 Edition)

(16) *Completion of the splice.* (i) In accordance with the method of splicing selected by the borrower, the splice shall be completed by either fusing the splice or by applying the mechanical connector.

(ii) Each spliced fiber shall be routed through the organizer tray one at a time as splices are completed. The fibers shall be organized one at a time to prevent tangled spliced fibers. The splice case manufacturer's recommendation shall be followed concerning the splice tray selection.

(17) *Fiber optic testing.* Fiber optic testing shall be performed in accordance with RUS Bulletin 345-63, "RUS Standard for Acceptance Tests and Measurements of Telephone Plant," PC-4, (Incorporated by reference at § 1755.97).

(18) *Cable acceptance.* Installed cable shall be tested and pass the inventory and acceptance testing specified in the Telephone System Construction Contract (Labor and Materials), RUS Form 515. The tests and inspections shall be witnessed by the borrower's resident project representative.

(f) *Splice arrangements for fiber optic cables—(1) Aerial splices.* Cable slack at aerial splices shall be stored either on the messenger strand, on the pole, or inside a pedestal at the base of the pole. A typical arrangement for the storage of slack cable at aerial splices is shown in Figure 9:

FIGURE 9
AERIAL SPLICE STORED INSIDE PEDESTAL

Note: See Figure 11 for details concerning storage of splice case inside pedestal.

§ 1755.200

7 CFR Ch. XVII (1–1–97 Edition)

(2) *Buried splices.* Buried splices shall be installed in handholes to accommodate the splice case and the required splicing slack. An alternative to the

handhole is a pedestal specifically designed for fiber optic splice cases. Typical arrangements for buried cable splices are shown in Figures 10 and 11:

FIGURE 10
BURIED SPLICE STORED INSIDE HANDHOLE

Note: Ground wires omitted for clarity. See Figure 19 for bonding and grounding details.

FIGURE 11
BURIED SPLICE STORED INSIDE PEDESTAL HOUSING

(3) *Underground manhole splices.* Underground splices shall be stored in manholes on cable hooks and racks fastened to the manhole wall. The cable slack shall be stored on cable hooks and racks as shown in Figure 12:

FIGURE 12
MANHOLE SPLICE STORAGE

(4) *Central office cable entrance.* (i) Filled cable or filled splices are not recommended for use inside central offices except in cable vault locations. Outside plant cable sheath and cable filling compound are susceptible to fire and will support combustion. Fire, smoke, and gases generated by these materials during burning are detrimental to telephone switching equipment.

(ii) As a first choice, the outside plant fiber optic cable shall be spliced to an all-dielectric fire retardant cable in a cable vault with the all-dielectric cable extending into the central office and terminating inside a fiber patch panel.

(iii) As a second choice, the outside plant cable may be spliced inside the central office if a flame retardant fiber optic splice case or a noncombustible central office splice housing equipped with organizer trays is used to contain the splice.

(iv) In cases referenced in paragraphs (f)(4)(ii) and (f)(4)(iii) of this section, as a minimum the fire retardant all-dielectric cable used to provide the connection between the cable entrance splice and the fiber patch panel shall be listed as Communication Riser Cable (Type CMR) in accordance with Sections 800–50 and 800–51(b) of the 1993 National Electrical Code.

(v) Splices inside the central office shall be made as close as practicable to

the point where the outside plant cables enter the building. Except in cable vault locations, outside plant cables within the central office shall be wrapped with fireproof tape or enclosed in noncombustible conduit.

(g) *Bonding and grounding fiber optic cable, copper cable, and copper service wire—*(1) *Bonding.* Bonding is electrically connecting two or more metallic items of telephone hardware to maintain a common electrical potential. Bonding may involve connections to another utility.

(2) *Copper cable shield bond connections.* (i) Cable shields shall be bonded at each splice location. Only RUS accepted cable shield bond connectors shall be used to provide bonding and grounding connections to metallic cable shields. The shield bond connector manufacturer's instructions shall be followed concerning installation and use.

(ii)(A) Shield bonding conductors shall be either stranded or braided tinned copper wire equivalent to a minimum No. 6 American Wire Gauge (AWG) and shall be RUS accepted. The conductor connections shall be tinned or of a compatible bimetallic design to avoid corrosion problems associated with dissimilar metals. The number of shield bond connectors required per pair size and gauge shall be as shown in Table 8:

TABLE 8.—SHIELD BOND CONNECTORS PER PAIR SIZE AND GAUGE

19 AWG	Pair size and gauge			No. of shield bond connectors
	22 AWG	24 AWG	26 AWG	
0–25	0–100	0–150	0–200	1
50–100	150–300	200–400	300–600	2
150–200	400–600	600–900	900–1500	3
300–600	900–1200	1200–2100	1800–3600	4

(B) It is permissible to strap across the shield bond connectors of several cables with a single length of braided wire. However, both ends of the braid shall be terminated on the pedestal ground bracket to provide a bonding

loop. Shield bond connection methods for individual cables are shown in Figures 13 through 15, and the bonding of several cables inside a pedestal using the bonding loop is shown in Figure 16:

FIGURE 13
BONDING AND GROUNDING CABLES INSIDE PEDESTALS

FIGURE 14
BONDING AND GROUNDING OF LARGE CABLES INSIDE PEDESTALS
USING MULTIPLE SHIELD BOND CONNECTORS AND HARNESS WIRES

Note: The maximum number of harness wires that can be installed on each stud of the ground bracket shall be in accordance with the manufacturer's instructions.

FIGURE 16
ALTERNATIVE METHOD OF BONDING AND GROUNDING SEVERAL
CABLES IN PEDESTALS USING SHIELD BOND CONNECTORS
AND 6 AWG WIRE BRAID LOOP

Rural Utilities Service, USDA**§ 1755.200**

(3) *Buried service wire shield bond connections.* Buried service wire shields shall be connected to the pedestal bonding and grounding system. Typical buried service wire installations are shown in Figures 17 and 18. In addition to the methods referenced in Figures 17 and 18, the shields of buried service wires may also be connected to the pedestal bonding and grounding system

using buried service wire bonding harnesses listed on Page 3.3.1, Item “gs-b,” of RUS Bulletin 1755I-100. RUS Bulletin 1755I-100 may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. When those harnesses are used they shall be installed in accordance with the manufacturer’s instructions. Figures 17 and 18 are as follows:

FIGURE 17
GROUNDING SERVICE WIRE SHIELDS USING SERVICE WIRE CLAMP

Note: Provide a loop in service drops to allow for movement of the drops without damage to the grounding connection.

FIGURE 18
ALTERNATIVE METHOD OF GROUNDING BURIED
SERVICE WIRES INSIDE PEDESTALS

(4) *Fiber optic cable bond connections.*

(i) The cable shield and metallic strength members shall be bonded at each splice location. Only RUS accepted fiber optic cable shield bond connectors shall be used to provide bonding connections to the metallic cable shields. The shield bond connector manufacturer's instructions shall be followed concerning installation and use.

(ii) Shield bonding conductors shall be either stranded or braided tinned copper wire equivalent to a minimum No. 6 American Wire Gauge (AWG) and shall be RUS accepted. The conductor connections shall be tinned or of a compatible bimetallic design to avoid corrosion problems associated with dissimilar metals.

(5) *Grounding.* (i) Grounding is electrically connecting metallic telephone hardware to a National Electrical Safety Code (NESC) acceptable grounding electrode. Acceptable grounding electrodes are defined in the Rule 99A of the NESC.

(ii) The conductor used for grounding metallic telephone hardware shall be a minimum No. 6 AWG solid, bare, copper conductor.

(iii) For copper and fiber optic cable plant, all cable shields, all metallic strength members, and all metallic hardware shall be:

(A) Grounded at each splice location to a driven grounding electrode (ground rod) of:

(1) At least 1.5 meters (5 feet) in length where the local frost level is normally less than 0.30 meters (1 foot) deep; or

(2) At least 2.44 meters (8 feet) in length where the local frost level is normally 0.30 meters (1 foot) or deeper; and

(B) Bonded to a multi-grounded power system neutral when the splice is within 1.8 meters (6 feet) of access to the grounding system of the multi-grounded neutral system. Bonding to the multi-grounded neutral of a parallel power line may help to minimize telephone interference on long exposures with copper cable plant. Consideration, thus, should be given to completing such bonds, at least four (4) times each mile, when splices are greater than 1.8 meters (6 feet) but less than 4.6 meters (15 feet) from access to the multi-grounded neutral.

(6) *Bonding and grounding splice cases.*

(i) Splice cases are equipped with bonding and grounding devices to ensure that cable shields and metallic strength members maintain electrical continuity during and after cable splicing operations. The splice case manufacturer's recommendations shall be followed concerning the bonding and grounding procedures. Conductors used for bonding shall be either stranded or braided tinned copper wire equivalent to 6 AWG. Conductors used for grounding shall be a solid, bare, copper wire equivalent to minimum No. 6 AWG.

(ii) Buried splice cases installed in either handholes or pedestals shall be grounded such that the cable shield grounds are attached to a common ground connection that will allow the lifting of a ground on the cable shield in either direction to permit efficient cable locating procedures. As a first choice, buried grounding conductor(s) shall be bare. However, if two or more grounding conductors are buried in the s they shall be insulated to avoid shorts when a locating tone is applied.

(iii) A typical bonding and grounding method for fiber optic splices is shown in Figure 19:

FIGURE 19
BONDING AND GROUNDING BURIED FIBER OPTIC SPLICES

§ 1755.370

(7) *Bonding and grounding central office cable entrances.* The RUS Telecommunications Engineering and Construction Manual (TE&CM) Section 810 provides bonding and grounding guidance for central office cable entrances. Splicing operations shall not be attempted before all metallic cable shield and strength members are bonded and grounded.

[60 FR 5097, Jan. 26, 1995; 60 FR 9079, Feb. 16, 1995]

§§ 1755.201—1755.369 [Reserved]

§ 1755.370 RUS specification for seven wire galvanized steel strand.

(a) RUS incorporates by reference ASTM A475-78, Standard Specification for Zinc-Coated Steel Wire Strand, issued May 1978. All seven wire galvanized steel strand purchased after April 1, 1990, for use on telecommunications systems financed by RUS loan funds must conform to this standard. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51 on January 19, 1990. Copies of ASTM A475-78 are available for inspection during normal business hours at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC, and at the Rural Utilities Service, Administrative Services Division, room 0175-S, U.S. Department of Agriculture, Washington, DC 20250, telephone 202-382-9551. Copies are available from the American Society for Testing and Materials, 1916 Race Street, Philadelphia, PA 19103, telephone 215-299-5400.

(b) In addition to the requirements of ASTM 475-78, all coils and reels having Class B or C coatings shall be marked with a 3-inch wide and 6-inch long deep-colored stripe, green or orange, respectively, to identify the class of galvanized coating of the strand. This marking shall be applied to the exposed convolutions of the strand in the eye of the coils and located near the midpoint on the outside layer of strand on the reels. The marking shall not cover any welded joint markings.

[55 FR 1792, Jan. 19, 1990; 55 FR 3685, Feb. 2, 1990. Redesignated at 55 FR 39397, Sept. 27, 1990]

7 CFR Ch. XVII (1-1-97 Edition)

§§ 1755.371—1755.389 [Reserved]

§ 1755.390 RUS specification for filled telephone cables.

(a) *Scope.* (1) This section covers the requirements for filled telephone cables intended for direct burial installation either by trenching or by direct plowing, for underground application by placement in a duct, or for aerial installations by attachment to a support strand.

(i) The conductors are solid copper, individually insulated with an extruded solid insulating compound.

(ii) The insulated conductors are twisted into pairs which are then stranded or oscillated to form a cylindrical core.

(iii) For high frequency applications, the cable core may be separated into compartments with screening shields.

(iv) A moisture resistant filling compound is applied to the stranded conductors completely covering the insulated conductors and filling the interstices between pairs and units.

(v) The cable structure is completed by the application of suitable core wrapping material, a flooding compound, a shield or a shield/armor, and an overall plastic jacket.

(2) The number of pairs and gauge size of conductors which are used within the RUS program are provided in the following table:

AWG	19	22	24	26
Pairs	6	6	6	
	12	12	12	
	18	18	18	
	25	25	25	25
		50	50	50
		75	75	75
		100	100	100
		150	150	150
		200	200	200
		300	300	300
		400	400	400
			600	600
				900

NOTE: Cables larger in pair sizes than those shown in this table must meet all requirements of this section.

(3) Screened cable, when specified, must meet all requirements of this section. The pair sizes of screened cables used within the RUS program are referenced in paragraph (e)(2)(i) of this section.

Rural Utilities Service, USDA

§ 1755.390

(4) All cables sold to RUS borrowers for projects involving RUS loan funds under this section must be accepted by RUS Technical Standards Committee "A" (Telephone). For cables manufactured to the specification of this section, all design changes to an accepted design must be submitted for acceptance. RUS will be the sole authority on what constitutes a design change.

(5) Materials, manufacturing techniques, or cable designs not specifically addressed by this section may be allowed if accepted by RUS. Justification for acceptance of modified materials, manufacturing techniques, or cable designs must be provided to substantiate product utility and long-term stability and endurance.

(6) The American National Standard Institute/Insulated Cable Engineers Association, Inc. (ANSI/ICEA) S-84-608-1988 Standard For Telecommunications Cable, Filled, Polyolefin Insulated, Copper Conductor Technical Requirements referenced throughout this section is incorporated by reference by RUS. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of ANSI/ICEA S-84-608-1988 are available for inspection during normal business hours at RUS, room 2845, U.S. Department of Agriculture, Washington, DC 20250 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. Copies are available from ICEA, P. O. Box 440, South Yarmouth, MA 02664, telephone number (508) 394-4424.

(7) American Society for Testing and Materials specifications (ASTM) A 505-87, Standard Specification for Steel, Sheet and Strip, Alloy, Hot-Rolled and Cold-Rolled, General Requirements For; ASTM B 193-87, Standard Test Method for Resistivity of Electrical Conductor Materials; ASTM B 224-80, Standard Classification of Coppers; ASTM B 694-86, Standard Specification for Copper, Copper Alloy, and Copper-Clad Stainless Steel Sheet and Strip for Electrical Cable Shielding; ASTM D 4565-90a, Standard Test Methods for Physical and Environmental Performance Properties of Insulations and Jackets for Telecommunications Wire and Cable; and ASTM D 4566-90, Stand-

ard Test Methods for Electrical Performance Properties of Insulations and Jackets for Telecommunications Wire and Cable referenced in this section are incorporated by reference by RUS. These incorporations by references were approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of the ASTM standards are available for inspection during normal business hours at RUS, room 2845, U.S. Department of Agriculture, Washington, DC 20250 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. Copies are available from ASTM, 1916 Race Street, Philadelphia, PA 19103-1187, telephone number (215) 299-5585.

(b) *Conductors and conductor insulation.* (1) The gauge sizes of the copper conductors covered by this specification must be 19, 22, 24, and 26 American Wire Gauge (AWG).

(2) Each conductor must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 2.1.

(3) Factory joints made in conductors during the manufacturing process must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 2.2.

(4) The raw materials used for conductor insulation must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraphs 3.1 through 3.1.3.

(5) The finished conductor insulation must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraphs 3.2.1 and 3.3.

(6) Insulated conductors must not have an overall diameter greater than 2 millimeters (mm) (0.081 inch (in.)).

(7) A permissible overall performance level of faults in conductor insulation must average not greater than one fault per 12,000 conductor meters (40,000 conductor feet) for each gauge of conductor.

(i) All insulated conductors must be continuously tested for insulation faults during the twinning operation with a method of testing acceptable to RUS. The length count and number of faults must be recorded. The information must be retained for a period of 6 months and be available for review by RUS when requested.

§ 1755.390

7 CFR Ch. XVII (1–1–97 Edition)

(ii) The voltages for determining compliance with the requirements of this section are as follows:

AWG	Direct Current Voltages (kilovolts)
19	8.0
22	6.0
24	5.0
26	4.0

(8) Repairs to the conductor insulation during manufacture are permissible. The method of repair must be accepted by RUS prior to its use. The repaired insulation must be capable of meeting the relevant electrical requirements of this section.

(9) All repaired sections of insulation must be retested in the same manner as originally tested for compliance with paragraph (b)(7) of this section.

(10) The colored insulating material removed from or tested on the conductor, from a finished cable, must meet the performance requirements specified in ANSI/ICEA S-84-608-1988, paragraphs 3.4.1, 3.4.2, 3.4.4, 3.4.5, and 3.4.6.

(c) *Identification of pairs and twisting of pairs.* (1) The insulation must be colored to identify:

(i) The tip and ring conductor of each pair; and

(ii) Each pair in the completed cable.

(2) The colors to be used in the pairs in the 25 pair group, together with the pair numbers must be in accordance with the table specified in ANSI/ICEA S-84-608-1988, paragraph 3.5.

(3) Positive identification of the tip and ring conductors of each pair by marking each conductor of a pair with the color of its mate is permissible. The method of marking must be accepted by RUS prior to its use.

(4) Other methods of providing positive identification of the tip and ring conductors of each pair may be employed if accepted by RUS prior to its use.

(5) The insulated conductors must be twisted into pairs.

(6) In order to provide sufficiently high crosstalk isolation, the pair twists must be designed to enable the cable to meet the capacitance unbalance and crosstalk loss requirements of paragraphs (k)(5), (k)(6), and (k)(8) of this section.

(7) The average length of pair twists in any pair in the finished cable, when measured on any 3 meter (10 foot) length, must not exceed the requirement specified in ANSI/ICEA S-84-608-1988, paragraph 3.5.

(d) *Forming of the cable core.* (1) Twisted pairs must be assembled in such a way as to form a substantially cylindrical group.

(2) When desired for lay-up reasons, the basic group may be divided into two or more subgroups called units.

(3) Each group, or unit in a particular group, must be enclosed in bindings of the colors indicated for its particular pair count. The pair count, indicated by the colors of insulation, must be consecutive as indicated in paragraph (d)(6) of this section through units in a group.

(4) The filling compound must be applied to the cable core in such a way as to provide as near a completely filled core as is commercially practical.

(5) Threads and tapes used as binders must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraphs 4.2 and 4.2.1.

(6) The colors of the bindings and their significance with respect to pair count must be as follows:

Group No.	Color of Bindings	Group Pair Count
1	White-Blue	1–25
2	White-Orange	26–50
3	White-Green	51–75
4	White-Brown	76–100
5	White-Slate	101–125
6	Red-Blue	126–150
7	Red-Orange	151–175
8	Red-Green	176–200
9	Red-Brown	201–225
10	Red-Slate	226–250
11	Black-Blue	251–275
12	Black-Orange	276–300
13	Black-Green	301–325
14	Black-Brown	326–350
15	Black-Slate	351–375
16	Yellow-Blue	376–400
17	Yellow-Orange	401–425
18	Yellow-Green	426–450
19	Yellow-Brown	451–475
20	Yellow-Slate	476–500
21	Violet-Blue	501–525
22	Violet-Orange	526–550
23	Violet-Green	551–575
24	Violet-Brown	576–600

(7) The use of the white unit binder in cables of 100 pairs or less is optional.

(8) When desired for manufacturing reasons, two or more 25 pair groups

Rural Utilities Service, USDA

§ 1755.390

may be bound together with nonhygroscopic and nonwicking threads or tapes into a super-unit. Threads or tapes must meet the requirements specified in paragraph (d)(5) of this section. The group binders and the super-unit binders must be color coded such that the combination of the two binders must positively identify each 25 pair group from every other 25 pair group in the cable. Super-unit binders must be of the color shown in the following table:

Super-Unit Binder Colors

Pair Numbers	Binder Color
1-600	White
601-1200	Red
1201-1800	Black
1801-2400	Yellow
2401-3000	Violet

(9) Color binders must not be missing for more than 90 meters (300 feet) from any 25 pair group or from any subgroup used as part of a super-unit. At any cable cross-section, no adjacent 25 pair groups and no more than one subgroup of any super-unit may have missing binders. In no case must the total number of missing binders exceed three. Missing super-unit binders must not be permitted for any distance.

(10) Any reel of cable which contains missing binders must be labeled indicating the colors and location of the binders involved. The labeling must be applied to the reel and also to the cable.

(e) *Screened cable.* (1) Screened cable must be constructed such that a metallic, internal screen(s) must be provided to separate and provide sufficient isolation between the compartments to meet the requirements of this section.

(2) At the option of the user or manufacturer, identified service pairs providing for voice order and fault location may be placed in screened cables.

(i) The number of service pairs provided must be one per twenty-five operating pairs plus two for a cable size up to and including 400 pairs, subject to a minimum of four service pairs. The pair counts for screened cables are as follows:

Screened Cable Pair Counts

Carrier Pair Count	Service Pairs	Total Pair Count
24	4	28
50	4	54
100	6	106
150	8	158
200	10	210
300	14	314
400	18	418

(ii) The service pairs must be equally divided among the compartments. The color sequence must be repeated in each compartment.

(iii) The electrical and physical characteristics of each service pair must meet all the requirements set forth in this section.

(iv) The colors used for the service pairs must be in accordance with the requirements of paragraph (b)(5) of this section. The color code used for the service pairs together with the service pair number are shown in the following table:

Color Code For Service Pairs

Service Pair No.	Color	
	Tip	Ring
1	White	Red
2	"	Black
3	"	Yellow
4	"	Violet
5	Red	Black
6	"	Yellow
7	"	Violet
8	Black	Yellow
9	"	Violet

(3) The screen tape must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraphs 5.1 through 5.4.

(4) The screen tape must be tested for dielectric strength by completely removing the protective coating from one end to be used for grounding purposes.

(i) Using an electrode, over a 30 centimeter (1 foot) length, apply a direct current voltage at the rate of rise of 500 volts/second until failure.

(ii) No breakdown should occur below 8 kilovolts.

(f) *Filling compound.* (1) After or during the stranding operation and prior to application of the core wrap, filling compound must be applied to the cable core. The compound must be as nearly colorless as is commercially feasible

§ 1755.390

7 CFR Ch. XVII (1–1–97 Edition)

and consistent with the end product requirements and pair identification.

(2) The filling compound must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraphs 4.4 through 4.4.4.

(3) The individual cable manufacturer must satisfy RUS that the filling compound selected for use is suitable for its intended application. The filling compound must be applied to the cable in such a manner that the cable components will not be degraded.

(g) *Core wrap.* (1) The core wrap must comply with the requirements specified in ANSI/ICEA-S-84-608-1988, paragraph 4.3.

(2) If required for manufacturing reasons, white or colored binders of non-hygroscopic and nonwicking material may be applied over the core and/or wrap. When used, binders must meet the requirements specified in paragraph (d)(5) of this section.

(3) Sufficient filling compound must be applied to the core wrap so that voids or air spaces existing between the core and the inner side of the core wrap are minimized.

(h) *Flooding compound* (1) Sufficient flooding compound must be applied on all sheath interfaces so that voids and air spaces in these areas are minimized. When the optional armored design is used, the flooding compound must be applied between the core wrap and shield, between the shield and armor, and between the armor and the jacket so that voids and air spaces in these areas are minimized. The use of floodant over the outer metallic substrate is not required if uniform bonding, per paragraph (i)(7) of this section, is achieved between the plastic-clad metal and the jacket.

(2) The flooding compound must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 4.5 and the jacket slip test requirements of appendix A, paragraph (III)(5) of this section.

(3) The individual cable manufacturer must satisfy RUS that the flooding compound selected for use is acceptable for the application.

(i) *Shield and optional armor* (1) A single corrugated shield must be applied longitudinally over the core wrap.

(2) For unarmored cable the shield overlap must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.3.2. Core diameter is defined as the diameter under the core wrap and binding.

(3) For cables containing the coated aluminum shield/coated steel armor (CACSP) sheath design, the coated aluminum shield must be applied in accordance with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.3.2, Dual Tape Shielding System.

(4) General requirements for application of the shielding material are as follows:

(i) Successive lengths of shielding tapes may be joined during the manufacturing process by means of cold weld, electric weld, soldering with a nonacid flux, or other acceptable means.

(ii) Shield splices must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.3.3.

(iii) The corrugations and the application process of the coated aluminum and copper bearing shields must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.3.1.

(iv) The shielding material must be applied in such a manner as to enable the cable to pass the cold bend test specified in paragraph (l)(3) of this section.

(5) The following is a list of acceptable materials for use as cable shielding. Other types of shielding materials may also be used provided they are accepted by RUS prior to their use.

Standard Cable	Gopher Resistant Cable
8-mil Coated Aluminum ¹	10-mil Copper
5-mil Copper	6-mil Copper-Clad Stainless Steel
	5 mil Copper-Clad Stainless Steel
	5 mil Copper-Clad Alloy Steel
	7-mil Alloy 194
	6-mil Alloy 194
	8-mil Coated Aluminum ¹ and 6-mil Coated Steel ¹

¹Dimensions of uncoated metal

(i) The 8-mil aluminum tape must be plastic coated on both sides and must comply with the requirements of ANSI/ICEA S-84-608-1988, paragraph 6.2.2.

(ii) The 5-mil copper tape must comply with the requirements specified in

ANSI/ICEA S-84-608-1988, paragraph 6.2.3.

(iii) The 10-mil copper tape must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.2.4.

(iv) The 6-mil copper clad stainless steel tape must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.2.5.

(v) The 5-mil copper clad stainless steel tape must be in the fully annealed condition and must conform to the requirements of American Society for Testing and Materials (ASTM) B 694-86, with a cladding ratio of 16/68/16.

(A) The electrical conductivity of the clad tape must be a minimum of 28 percent of the International Annealed Copper Standard (IACS) when measured per ASTM B 193-87.

(B) The tape must be nominally 0.13 millimeter (0.005 inch) thick with a minimum thickness of 0.11 millimeter (0.0045 inch).

(vi) The 5-mil copper clad alloy steel tape must be in the fully annealed condition and the copper component must conform to the requirements of ASTM B 224-80 and the alloy steel component must conform to the requirements of ASTM A 505-87, with a cladding ratio of 16/68/16.

(A) The electrical conductivity of the copper clad alloy steel tape must comply with the requirement specified in paragraph (i)(5)(v)(A) of this section.

(B) The thickness of the copper clad alloy steel tape must comply with the requirements specified in paragraph (i)(5)(v)(B) of this section.

(vii) The 6-mil and 7-mil 194 copper alloy tapes must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.2.6.

(6) The corrugation extensibility of the coated aluminum shield must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.4.

(7) When the jacket is bonded to the plastic coated aluminum shield, the bond between the jacket and shield must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 7.2.6.

(8) A single plastic-coated steel corrugated armor must be applied longitudinally directly over the coated aluminum shield listed in paragraph (i)(5)

of this section with an overlap complying with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.3.2, Outer Steel Tape.

(9) Successive lengths of steel armoring tapes may be joined during the manufacturing process by means of cold weld, electric weld, soldering with a nonacid flux, or other acceptable means. Armor splices must comply with the breaking strength and resistance requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.3.3.

(10) The corrugations and the application process of the coated steel armor must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.3.1.

(i) The corrugations of the armor tape must coincide with the corrugations of the coated aluminum shield.

(ii) Overlapped portions of the armor tape must be in register (corrugations must coincide at overlap) and in contact at the outer edge.

(11) The armoring material must be so applied to enable the cable to pass the cold bend test as specified in paragraph (l)(3) of this section.

(12) The 6-mil steel tape must be electrolytic chrome-coated steel (ECCS) plastic coated on both sides and must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.2.8.

(13) When the jacket is bonded to the plastic-coated steel armor, the bond between the jacket and armor must comply with the requirement specified in ANSI/ICEA-S-84-608-1988, paragraph 7.2.6.

(j) *Cable jacket.* (1) The jacket must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 7.2.

(2) The raw materials used for the cable jacket must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 7.2.1.

(3) Jacketing material removed from or tested on the cable must meet the performance requirements specified in ANSI/ICEA S-84-608-1988, paragraphs 7.2.3 and 7.2.4.

(4) The thickness of the jacket must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 7.2.2.

(k) *Electrical requirements*—(1) *Conductor resistance*. The direct current resistance of any conductor in a completed cable and the average resistance of all conductors in a Quality Control Lot must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.1.

(2) *Resistance unbalance*. (i) The direct current resistance unbalance between the two conductors of any pair in a completed cable and the average resistance unbalance of all pairs in a completed cable must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.2.

(ii) The resistance unbalance between tip and ring conductors shall be random with respect to the direction of unbalance. That is, the resistance of the tip conductors shall not be consistently higher with respect to the ring conductors and vice versa.

(3) *Mutual capacitance*. The average mutual capacitance of all pairs in a completed cable and the individual mutual capacitance of any pair in a completed cable must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.3.

(4) *Capacitance difference*. (i) The capacitance difference for completed cables having 75 pairs or greater must comply with the requirement specified in ANSI/ICEA S-84-608-1988, paragraph 8.4.

(ii) When measuring screened cable, the inner and outer pairs must be selected from both sides of the screen.

(5) *Pair-to-pair capacitance unbalance*—(i) *Pair-to-pair*. The capacitance unbalance as measured on the completed cable must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.5.

(ii) *Screened cable*. In cables with 25 pairs or less and within each group of multigroup cables, the pair-to-pair capacitance unbalance between any two pairs in an individual compartment must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.5. The pair-to-pair capacitance unbalances to be considered must be:

(A) Between pairs adjacent in a layer in an individual compartment;

(B) Between pairs in centers of 4 pairs or less in an individual compartment; and

(C) Between pairs in adjacent layers in an individual compartment when the number of pairs in the inner (smaller) layer is 6 or less. The center is counted as a layer.

(iii) In cables with 25 pairs or less, the root-mean-square (rms) value must include all the pair-to-pair unbalances measured for each compartment separately.

(iv) In cables containing more than 25 pairs, the rms value must include the pair-to-pair unbalances in the separate compartments.

(6) *Pair-to-ground capacitance unbalance*—(i) *Pair-to-ground*. The capacitance unbalance as measured on the completed cable must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.6.

(ii) When measuring pair-to-ground capacitance unbalance all pairs except the pair under test are grounded to the shield and/or shield/armor except when measuring cables containing super units in which case all other pairs in the same super unit must be grounded to the shield.

(iii) The screen tape must be left floating during the test.

(iv) Pair-to-ground capacitance unbalance may vary directly with the length of the cable.

(7) *Attenuation*. (i) For nonscreened and screened cables, the average attenuation of all pairs on any reel when measured at 150 and 772 kilohertz must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.7, Solid Column.

(ii) For T1C type cables over 12 pairs, the maximum average attenuation of all pairs on any reel must not exceed the values listed below when measured at a frequency of 1576 kilohertz at or corrected to a temperature of $20 \pm 1^\circ\text{C}$. The test must be conducted in accordance with ASTM D 4566-90.

AWG	Maximum Average Attenuation decibel/kilometer (dB/km) (decibel/ mile)
19	13.4 (21.5)
22	18.3 (29.4)
24	23.1 (37.2)

(8) *Crosstalk loss.* (i) The equal level far-end power sum crosstalk loss (FEXT) as measured on the completed cable must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.8, FEXT Table.

(ii) The near-end power sum crosstalk loss (NEXT) as measured on completed cable must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.8, NEXT Table.

(iii) *Screened cable.* (A) For screened cables the NEXT as measured on the completed cable must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraphs 8.9 and 8.9.1.

(B) For T1C screened cable the NEXT as measured on the completed cable must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraphs 8.9 and 8.9.2.

(9) *Insulation resistance.* The insulation resistance of each insulated conductor in a completed cable must comply with the requirement specified in ANSI/ICEA S-84-608-1988, paragraph 8.11.

(10) *High voltage test.* (i) In each length of completed cable, the insulation between conductors must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.12, Solid Column.

(ii) In each length of completed cable, the dielectric between the shield and/or armor and conductors in the core must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.13, Single Jacketed, Solid Column. In screened cable the screen tape must be left floating.

(iii) *Screened cable.* (A) In each length of completed screened cable, the dielectric between the screen tape and the conductors in the core must comply with the requirement specified in ANSI/ICEA S-84-608-1988, paragraph 8.14.

(B) In this test, the cable shield and/or armor must be left floating. (11) *Electrical variations.* (i) Pairs in each length of cable having either a ground, cross, short, or open circuit condition will not be permitted.

(ii) The maximum number of pairs in a cable which may vary as specified in paragraph (k)(11)(iii) of this section from the electrical parameters given in

this section are listed below. These pairs may be excluded from the arithmetic calculation.

Nominal Pair Count	Maximum Number of Pairs With Allowable Electrical Variation
6-100	1
101-300	2
301-400	3
401-600	4
601 and above	6

(iii) *Parameter variations.* (A) *Capacitance unbalance-to-ground.* If the cable fails either the maximum individual pair or average capacitance unbalance-to-ground requirement and all individual pairs are 3937 picofarad/kilometer (1200 picofarad/1000 feet) or less, the number of pairs specified in paragraph (k)(11)(ii) of this section may be eliminated from the average and maximum individual calculations.

(B) *Resistance unbalance.* Individual pair of 7 percent for all gauges.

(C) *Conductor resistance, maximum.* The following table shows maximum conductor resistance:

AWG	ohms/kilometer	(ohms/1000 feet)
19	29.9	(9.1)
22	60.0	(18.3)
24	94.5	(28.8)
26	151.6	(46.2)

NOTE: RUS recognizes that in large pair count cable (600 pair and above) a cross, short or open circuit condition occasionally may develop in a pair which does not affect the performance of the other cable pairs. In these circumstances rejection of the entire cable may be economically unsound or repairs may be impractical. In such circumstances the manufacturer may desire to negotiate with the customer for acceptance of the cable. No more than 0.5 percent of the pairs may be involved.

(1) *Mechanical requirements—*(1) *Compound flow test.* All cables manufactured in accordance with the requirements of this section must be capable of meeting the compound flow test specified in ANSI/ICEA S-84-608-1988, paragraph 9.1 using a test temperature of $80 \pm 1^\circ\text{C}$.

(2) *Water penetration.* All cables manufactured in accordance with the requirements of this section must be capable of meeting the water penetration test specified in ANSI/ICEA S-84-608-1988, paragraph 9.2.

(3) *Cable cold bend test.* All cables manufactured in accordance with the

requirements of this section must be capable of meeting the cable cold bend test specified in ANSI/ICEA S-84-608-1988, paragraph 9.3.

(4) *Cable impact test.* All cables manufactured in accordance with the requirements of this section must be capable of meeting the cable impact test specified in ANSI/ICEA S-84-608-1988, paragraph 9.4.

(5) *Jacket notch test (CACSP sheath only).* All cables utilizing the coated aluminum/coated steel sheath (CACSP) design manufactured in accordance with the requirements of this section must be capable of meeting the jacket notch test specified in ANSI/ICEA S-84-608-1988, paragraph 9.5.

(6) *Cable torsion test (CACSP sheath only).* All cables utilizing the coated aluminum/coated steel sheath (CACSP) design manufactured in accordance with the requirements of this section must be capable of meeting the cable torsion test specified in ANSI/ICEA S-84-608-1988, paragraph 9.6.

(m) *Sheath slitting cord (optional).* (1) Sheath slitting cords may be used in the cable structure at the option of the manufacturer unless specified by the end user.

(2) When a sheath slitting cord is used it must be nonhygroscopic and nonwicking, continuous throughout a length of cable and of sufficient strength to open the sheath without breaking the cord.

(n) *Identification marker and length marker.* (1) Each length of cable must be identified in accordance with ANSI/ICEA S-84-608-1988, paragraphs 10.1 through 10.1.4. The color of the ink used for the initial outer jacket marking must be either white or silver.

(2) The markings must be printed on the jacket at regular intervals of not more than 0.6 meter (2 feet).

(3) The completed cable must have sequentially numbered length markers in accordance with ANSI/ICEA S-84-608-1988, paragraph 10.1.5. The color of the ink used for the initial outer jacket marking must be either white or silver.

(o) *Preconnectorized cable (optional).* (1) At the option of the manufacturer and upon request by the purchaser, cables 100 pairs and larger may be factory terminated in 25 pair splicing modules.

(2) The splicing modules must meet the requirements of RUS Bulletin 345-54, PE-52, RUS Specification for Telephone Cable Splicing Connectors (Incorporated by reference at §1755.97), and be accepted by RUS prior to their use.

(p) *Acceptance testing and extent of testing.* (1) The tests described in appendix A of this section are intended for acceptance of cable designs and major modifications of accepted designs. What constitutes a major modification is at the discretion of RUS. These tests are intended to show the inherent capability of the manufacturer to produce cable products having long life and stability.

(2) For initial acceptance, the manufacturer must submit:

(i) An original signature certification that the product fully complies with each section of the specification;

(ii) Qualification Test Data, per appendix A of this section;

(iii) To periodic plant inspections;

(iv) A certification that the product does or does not comply with the domestic origin manufacturing provisions of the “Buy American” requirements of the Rural Electrification Act of 1938 (7 U.S.C. 901 *et seq.*);

(v) Written user testimonials concerning field performance of the product; and

(vi) Other nonproprietary data deemed necessary by the Chief, Outside Plant Branch (Telephone).

(3) For requalification acceptance, the manufacturer must submit an original signature certification that the product fully complies with each section of the specification, excluding the Qualification Section, and a certification that the product does or does not comply with the domestic origin manufacturing provisions of the “Buy American” requirements of the Rural Electrification Act of 1938 (7 U.S.C. 901 *et seq.*), for acceptance by August 30 of each year. The required data must have been gathered within 90 days of the submission. If the initial acceptance of a product to this specification was within 180 days of August 30, then requalification for that product will not be required for that year.

(4) Initial and requalification acceptance requests should be addressed to:

Chairman, Technical Standards Committee "A" (Telephone), Telecommunications Standards Division, Rural Utilities Service, Washington, DC 20250-1500.

(5) *Tests on 100 percent of completed cable.* (i) The shield and/or armor of each length of cable must be tested for continuity in accordance with ANSI/ICEA S-84-608-1988, paragraph 8.16.

(ii) The screen tape of each length of screened cable must be tested for continuity in accordance with ANSI/ICEA S-84-608-1988, paragraph 8.16.

(iii) Dielectric strength between conductors and shield and/or armor must be tested to determine freedom from grounds in accordance with paragraph (k)(10)(ii) of this section.

(iv) Dielectric strength between conductors and screen tape must be tested to determine freedom from grounds in accordance with paragraph (k)(10)(iii) of this section.

(v) Each conductor in the completed cable must be tested for continuity in accordance with ANSI/ICEA S-84-608-1988, paragraph 8.16.

(vi) Dielectric strength between conductors must be tested to insure freedom from shorts and crosses in each length of completed cable in accordance with paragraph (k)(10)(i) of this section.

(vii) Each conductor in the completed preconnectorized cable must be tested for continuity.

(viii) Each length of completed preconnectorized cable must be tested for split pairs.

(ix) The average mutual capacitance must be measured on all cables. If the average mutual capacitance for the first 100 pairs tested from randomly selected groups is between 50 and 53 nanofarad/kilometer (nF/km) (80 and 85 nanofarad/mile), the remainder of the pairs need not be tested on the 100 percent basis (See paragraph (k)(3) of this section).

(6) *Capability tests.* Tests on a quality assurance basis must be made as frequently as is required for each manufacturer to determine and maintain compliance with:

(i) Performance requirements for conductor insulation, jacketing material, and filling and flooding compounds;

(ii) Bonding properties of coated or laminated shielding and armoring ma-

terials and performance requirements for screen tape;

(iii) Sequential marking and lettering;

(iv) Capacitance difference, capacitance unbalance, crosstalk, and attenuation;

(v) Insulation resistance, conductor resistance and resistance unbalance;

(vi) Cable cold bend and cable impact tests;

(vii) Water penetration and compound flow tests; and

(viii) Jacket notch and cable torsion tests.

(q) *Summary of records of electrical and physical tests.* (1) Each manufacturer must maintain suitable summary records for a period of at least 3 years of all electrical and physical tests required on completed cable by this section as set forth in paragraphs (p)(5) and (p)(6) of this section. The test data for a particular reel must be in a form that it may be readily available to the purchaser or to RUS upon request.

(2) Measurements and computed values must be rounded off to the number of places or figures specified for the requirement according to ANSI/ICEA S-84-608-1988, paragraph 1.3.

(r) *Manufacturing irregularities.* (1) Repairs to the shield and/or armor are not permitted in cable supplied to end users under this section.

(2) Minor defects in jackets (defects having a dimension of 3 millimeters (0.125 inch) or less in any direction) may be repaired by means of heat fusing in accordance with good commercial practices utilizing sheath grade compounds.

(s) *Preparation for shipment.* (1) The cable must be shipped on reels. The diameter of the drum must be large enough to prevent damage to the cable from reeling or unreeling. The reels must be substantial and so constructed as to prevent damage to the cable during shipment and handling.

(2) The thermal wrap must comply with the requirements of ANSI/ICEA S-84-608-1988, paragraph 10.3. When a thermal reel wrap is supplied, the wrap must be applied to the reel and must be suitably secured in place to minimize thermal exposure to the cable during storage and shipment. The use of the thermal reel wrap as a means of reel

§ 1755.390

protection will be at the option of the manufacturer unless specified by the end user.

(3) The outer end of the cable must be securely fastened to the reel head so as to prevent the cable from becoming loose in transit. The inner end of the cable must be securely fastened in such a way as to make it readily available if required for electrical testing. Spikes, staples, or other fastening devices which penetrate the cable jacket must not be used. The method of fastening the cable ends must be accepted by RUS prior to its use.

(4) Each length of cable must be wound on a separate reel unless otherwise specified or agreed to by the purchaser.

(5) The arbor hole must admit a spindle 63 millimeters (2.5 inches) in diameter without binding. Steel arbor hole liners may be used but must be accepted by RUS prior to their use.

(6) Each reel must be plainly marked to indicate the direction in which it should be rolled to prevent loosening of the cable on the reel.

(7) Each reel must be stenciled or labeled on either one or both sides with the information specified in ANSI/ICEA S-84-608-1988, paragraph 10.4 and the RUS cable designation:

Cable Designation

BFC

Cable Construction

Pair Count

Conductor Gauge

A = Coated Aluminum Shield

C = Copper Shield

Y = Gopher Resistant Shield

X = Armored, Separate Shield

H = T1 Screened Cable

H1C = T1C Screened Cable

P = Preconnectorized

Example: BFCXH100-22

Buried Filled Cable, Armored (w/separate shield), T1 Screened Cable, 100 pair, 22 AWG.

(8) When cable manufactured to the requirements of this section is shipped, both ends must be equipped with end caps acceptable to RUS.

(9) When preconnectorized cables are shipped, the splicing modules must be protected to prevent damage during shipment and handling. The protection method must be acceptable to RUS and accepted prior to its use.

7 CFR Ch. XVII (1-1-97 Edition)

(10) All cables ordered for use in underground duct applications must be equipped with a factory-installed pulling-eye on the outer end in accordance with ANSI/ICEA S-84-608-1988, paragraph 10.5.2.

(The information and recordkeeping requirements of this section have been approved by the Office of Management and Budget (OMB) under the control number 0572-0059)

APPENDIX A TO 7 CFR 1755.390— QUALIFICATION TEST METHODS

(I) The test procedures described in this appendix are for qualification of initial designs and major modification of accepted designs. Included in (V) of this appendix are suggested formats that may be used in submitting the test results to RUS.

(II) *Sample selection and preparation.* (1) All testing must be performed on lengths removed sequentially from the same 25 pair, 22 gauge jacketed cable. This cable must not have been exposed to temperatures in excess of 38°C since its initial cool down after sheathing. The lengths specified are minimum lengths and if desirable from a laboratory testing standpoint longer lengths may be used.

(a) Length A shall be 10 ± 0.2 meters (33 $\pm$ 0.5 feet) long and must be maintained at $23 \pm 3^\circ\text{C}$. One length is required.

(b) Length B shall be 12 ± 0.2 meters (40 $\pm$ 0.5 feet) long. Prepare the test sample by removing the jacket, shield or shield/armor and core wrap for a sufficient distance on both ends to allow the insulated conductors to be flared out. Remove sufficient conductor insulation so that appropriate electrical test connections can be made at both ends. Coil the sample with a diameter of 15 to 20 times its sheath diameter. Three lengths are required.

(c) Length C shall be one meter (3 feet) long. Four lengths are required.

(d) Length D shall be 300 millimeters (1 foot) long. Four lengths are required.

(e) Length E must be 600 millimeters (2 feet) long. Four lengths are required.

(f) Length F shall be 3 meters (10 feet) long and must be maintained at $23 \pm 3^\circ\text{C}$ for the duration of the test. Two lengths are required.

(2) *Data reference temperature.* Unless otherwise specified, all measurements must be made at $23 \pm 3^\circ\text{C}$.

(III) *Environmental tests—(1) Heat aging test—(a) Test samples.* Place one sample each of lengths B, C, D and E in an oven or environmental chamber. The ends of Sample B must exit from the chamber or oven for electrical tests. Securely seal the oven exit holes.

(b) *Sequence of tests.* The samples are to be subjected to the following tests after conditioning:

- (i) Water Immersion Test outlined in (III)(2) of this appendix;
- (ii) Water Penetration Test outlined in (III)(3) of this appendix;
- (iii) Insulation Compression Test outlined in (III)(4) of this appendix; and
- (iv) Jacket Slip Strength Test outlined in (III)(5) of this appendix.

(c) *Initial measurements.* (i) For Sample B measure the open circuit capacitance for each odd numbered pair at 1, 150, and 772 kilohertz, and the attenuation at 150 and 772 kilohertz after conditioning the sample at the data reference temperature for 24 hours. Calculate the average and standard deviation for the data of the 13 pairs on a per kilometer or (on a per mile) basis.

(ii) The attenuation at 150 and 772 kilohertz may be calculated from open circuit admittance (Y_{oc}) and short circuit impedance (Z_{sc}) or may be obtained by direct measurement of attenuation.

(iii) Record on suggested formats in (V) of this appendix or on other easily readable formats.

(d) *Heat conditioning.* (i) Immediately after completing the initial measurements, condition the sample for 14 days at a temperature of $65 \pm 2^\circ\text{C}$.

(ii) At the end of this period note any exudation of cable filler. Measure and calculate the parameters given in (III)(1)(c) of this appendix. Record on suggested formats in (V) of this appendix or on other easily readable formats.

(iii) Cut away and discard a one meter (3 foot) section from each end of length B.

(e) *Overall electrical deviation.* (i) Calculate the percent change in all average parameters between the final parameters after conditioning and the initial parameters in (III)(1)(c) of this appendix.

(ii) The stability of the electrical parameters after completion of this test must be within the following prescribed limits:

(A) *Capacitance.* The average mutual capacitance must be within 5 percent of its original value;

(B) The change in average mutual capacitance must be less than 5 percent over frequency 1 to 150 kilohertz; and

(C) *Attenuation.* The 150 and 772 kilohertz attenuation must not have increased by more than 5 percent over their original values.

(2) *Water immersion electrical test—(a) Test sample selection.* The 10 meter (33 foot) section of length B must be tested.

(b) *Test sample preparation.* Prepare the sample by removing the jacket, shield or shield/armor, and core wrap for sufficient distance to allow one end to be accessed for test connections. Cut out a series of 6 millimeter (0.25 inch) diameter holes along the

test sample, at 30 centimeters (1 foot) intervals progressing successively 90 degrees around the circumference of the cable. Assure that the cable core is exposed at each hole by slitting the core wrapper. Place the prepared sample in a dry vessel which when filled will maintain a one meter (3 foot) head of water over 6 meters (20 feet) of uncoiled cable. Extend and fasten the ends of the cable so they will be above the water line and the pairs are rigidly held for the duration of the test.

(c) *Capacitance testing.* Measure the initial values of mutual capacitance of all odd pairs in each cable at a frequency of 1 kilohertz before filling the vessel with water. Be sure the cable shield or shield/armor is grounded to the test equipment. Fill the vessels until there is a one meter (3 foot) head of water on the cables.

(i) Remeasure the mutual capacitance after the cables have been submerged for 24 hours and again after 30 days.

(ii) Record each sample separately on suggested formats in (V) of this appendix or on other easily readable formats.

(d) *Overall electrical deviation.* (i) Calculate the percent change in all average parameters between the final parameters after conditioning with the initial parameters in (III)(2)(c) of this appendix.

(ii) The average mutual capacitance must be within 5 percent of its original value.

(3) *Water penetration testing.* (a) A watertight closure must be placed over the jacket of length C. The closure must not be placed over the jacket so tightly that the flow of water through pre-existing voids of air spaces is restricted. The other end of the sample must remain open.

(b) Test per Option A or Option B—(i) *Option A.* Weigh the sample and closure prior to testing. Fill the closure with water and place under a continuous pressure of 10 ± 0.7 kilopascals (1.5 ± 0.1 pounds per square inch gauge) for one hour. Collect the water leakage from the end of the test sample during the test and weigh to the nearest 0.1 gram. Immediately after the one hour test, seal the ends of the cable with a thin layer of grease and remove all visible water from the closure, being careful not to remove water that penetrated into the core during the test. Reweigh the sample and determine the weight of water that penetrated into the core. The weight of water that penetrated into the core must not exceed 8 grams.

(ii) *Option B.* Fill the closure with a 0.2 gram sodium fluorescein per liter water solution and apply a continuous pressure 10 ± 0.7 kilopascals (1.5 ± 0.1 pounds per square inch gauge) for one hour. Catch and weigh any water that leaks from the end of the cable during the one hour period. If no water leaks from the sample, carefully remove the water from the closure. Then carefully remove the jacket, shield or shield/armor and core wrap

one at a time, examining with an ultraviolet light source for water penetration. After removal of the core wrap, carefully dissect the core and examine for water penetration within the core. Where water penetration is observed, measure the penetration distance. The distance of water penetration into the core must not exceed 127 millimeters (5.0 inches).

(4) *Insulation compression test*—(a) *Test Sample D*. Remove jacket, shield or shield/armor, and core wrap being careful not to damage the conductor insulation. Remove one pair from the core and carefully separate, wipe off core filler, and straighten the insulated conductors. Retwist the two insulated conductors together under sufficient tension to form 10 evenly spaced 360 degree twists in a length of 10 centimeters (4 inches).

(b) *Sample testing*. Center the mid 50 millimeters (2 inches) of the twisted pair between 2 smooth rigid parallel metal plates that are 50 millimeters $\times$ 50 millimeters (2 inches $\times$ 2 inches). Apply a 1.5 volt direct current potential between the conductors, using a light or buzzer to indicate electrical contact between the conductors. Apply a constant load of 67 newtons (15 pound-force) on the sample for one minute and monitor for evidence of contact between the conductors. Record results on suggested formats in (V) of this appendix or on other easily readable formats.

(5) *Jacket slip strength test*—(a) *Sample selection*. Test Sample E from (III)(1)(a) of this appendix.

(b) *Sample preparation*. Prepare test sample in accordance with the procedures specified in ASTM D 4565–90a.

(c) *Sample conditioning and testing*. Remove the sample from the tensile tester prior to testing and condition for one hour at $50 \pm 2^\circ\text{C}$. Test immediately in accordance with the procedures specified in ASTM D 4565–90a. A minimum jacket slip strength of 67 newtons (15 pound-force) is required. Record the highest load attained.

(6) *Humidity exposure*. (a) Repeat steps (III)(1)(a) through (III)(1)(c)(iii) of this appendix for separate set of samples B, C, D, and E which have not been subjected to prior environmental conditioning.

(b) Immediately after completing the measurements, expose the test sample to 100 temperature cyclings. Relative humidity within the chamber must be maintained at 90 ± 2 percent. One cycle consists of beginning at a stabilized chamber and test sample temperature of $52 \pm 1^\circ\text{C}$, increasing the temperature to $57 \pm 1^\circ\text{C}$, allowing the chamber and test samples to stabilize at this level,

then dropping the temperature back to $52 \pm 1^\circ\text{C}$.

(c) Repeat steps (III)(1)(d)(ii) through (III)(5)(c) of this appendix.

(7) *Temperature cycling*. (a) Repeat steps (III)(1)(a) through (III)(1)(c)(iii) of this appendix for separate set of samples B, C, D, and E which have not been subjected to prior environmental conditioning.

(b) Immediately after completing the measurements, subject the test sample to the 10 cycles of temperature between a minimum of -40°C and $+60^\circ\text{C}$. The test sample must be held at each temperature extreme for a minimum of 1 1/2 hours during each cycle of temperature. The air within the temperature cycling chamber must be circulated throughout the duration of the cycling.

(c) Repeat steps (III)(1)(d)(ii) through (III)(5)(c) of this appendix.

(IV) *Control sample*—(1) *Test samples*. A separate set of lengths A, C, D, E, and F must have been maintained at $23 \pm 3^\circ\text{C}$ for at least 48 hours before the testing.

(2) Repeat steps (III)(2) through (III)(5)(c) of this appendix except use length A instead of length B.

(3) *Surge Test*. (a) One length of sample F must be used to measure the breakdown between conductors while the other length of F must be used to measure the core to shield breakdown.

(b) The samples must be capable of withstanding without damage, a single surge voltage of 20 kilovolts peak between conductors, and a 35 kilovolts peak surge voltage between conductors and the shield or shield/armor as hereinafter described. The surge voltage must be developed from a capacitor discharged through a forming resistor connected in parallel with the dielectric of the test sample. The surge generator constants must be such as to produce a surge of 1.5×40 microsecond wave shape.

(c) The shape of the generated wave must be determined at a reduced voltage by connecting an oscilloscope across the forming resistor with the cable sample connected in parallel with the forming resistor. The capacitor bank is charged to the test voltage and then discharged through the forming resistor and test sample. The test sample will be considered to have passed the test if there is no distinct change in the wave shape obtained with the initial reduced voltage compared to that obtained after the application of the test voltage.

(V) The following suggested formats may be used in submitting the test results to RUS:

Rural Utilities Service, USDA

[58 FR 29338, May 20, 1993; 58 FR 32749, June 11, 1993; as amended at 60 FR 1711, Jan. 5, 1995]

§§ 1755.391—1755.396 [Reserved]

§ 1755.397 RUS performance specification for line concentrators.

(a) *General.* (1) This section covers general requirements for a line concentrator (LC) system. This system shall operate in accordance with the manufacturer's specifications. Reliability shall be of prime importance in the design, manufacture and installation of the equipment. The equipment shall automatically provide for:

(i) Terminating subscriber lines at a location remote from the serving central office;

(ii) Concentrating the subscriber lines over a few transmission and supervisory paths to the serving central office; and

(iii) Terminating the lines at the central office without loss of individual identity. A subscriber connected to a line concentrator shall be capable of having essentially the same services as a subscriber connected directly to the central office equipment (COE). Intra-unit calling among subscribers connected to the concentrator may be provided, but is not required.

(2) Industry standards, or portions thereof, referred to in this paragraph (a) are incorporated by reference by RUS. This incorporation by reference was approved by the Director of the

7 CFR Ch. XVII (1–1–97 Edition)

Federal Register in accordance with 5 U.S.C. 552 (a) and 1 CFR part 51. Copies of these standards are available for inspection during normal business hours at RUS, room 2838, U.S. Department of Agriculture, Washington, DC 20250 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(3) American National Standards Institute (ANSI) standards are available from ANSI Inc., 11 West 42nd Street, 13th floor, New York, NY 10036, telephone 212-642-4900.

(i) ANSI Standard S1.4-1983, Specification for Sound Level Meters, including Amendment S1.4A-1985.

(ii) [Reserved]

(4) American Society for Testing Materials (ASTM) are available from 1916 Race Street, Philadelphia, PA 19103, telephone 215-299-5400.

(i) ASTM Specification B33-91, Standard Specifications for Tinned Soft or Annealed Copper Wire for Electrical Purposes.

(ii) [Reserved]

(5) Bell Communications Research (Bellcore) standards are available from Bellcore Customer Service, 8 Corporate Place, Piscataway, NJ 08854, telephone 1-800-521-2673.

(i) TR-TSY-000008, Issue 2, August 1987, Digital Interface between the SLC 96 Digital Loop Carrier System and a Local Digital Switch.

(ii) Bell Communications Research (Bellcore) document TR-TSY-000057, Issue 1, April 1987, including Revision 1, November 1988, Functional Criteria for Digital Loop Carrier Systems.

(iii) Bell Communications Research (Bellcore) Document TR-NWT-000303, Issue 2, December 1992, including Revision 1, December 1993, Integrated Digital Loop Carrier System Generic Requirements, Objectives, and Interface.

(6) Federal Standard H28, Screw-Thread Standards for Federal Services, March 31, 1978, including Change Notice 1, May 28, 1986; Change Notice 2, January 20, 1989; and Change Notice 3, March 12, 1990. Copies may be obtained from the General Services Administration, Specification Section, 490 East L'Enfant Plaza SW, Washington, DC 20407, telephone 202-755-0325.

(7) IEEE standards are available from IEEE Service Center, 445 Hoes Lane,

Rural Utilities Service, USDA

§ 1755.397

P.O. Box 1331, Piscataway, NJ 08854, telephone 1-800-521-2673.

(i) IEEE Standard 455-1985, Standard Test Procedure for Measuring Longitudinal Balance of Telephone Equipment Operating in the Voice Band.

(ii) [Reserved]

(8) RUS standards are available from Publications and Directives Management Branch, Administrative Services Division, Rural Utilities Service, room 0180, South Building, U.S. Department of Agriculture, Washington, DC 20250-1500.

(i) RUS Bulletin 345-50, PE-60 (Sept 1979), RUS Specification for Trunk Carrier Systems.

(ii) [Reserved]

(b) *Types of requirements.* (1) Unless otherwise indicated, the requirements listed in this section are considered to be fixed requirements.

(2) The concentrator system shall communicate with standard T1 digital transmission format at a minimum between the concentrator and central office terminals. Analog conversion functions at remote and central office terminals shall be capable of being eliminated to accommodate end-to-end digital transmission.

(3) The LC shall operate properly as an integral part of the telephone network when connected to physical or carrier derived circuits and central offices meeting RUS specifications and other generally accepted telecommunications practices, such as Bellcore documents TR-NWT-000303, Integrated Digital Loop Carrier System Generic Requirements, Objectives and Interface; TR-TSY-000008, Digital Interface between the SLC 96 Digital Loop Carrier System and a Local Digital Switch; and TR-TSY-000057, Functional Criteria for Digital Loop Carrier Systems.

(4) For RUS acceptance consideration of a LC, the manufacturer must certify and demonstrate that all requirements specified in this section are available and in compliance with this section.

(5) Certain requirements are included in this section for features which may not be needed for every application. Such features are identifiable by the inclusion in the requirements of some such phrase as "when specified by the owner" or "as specified by the owner."

In some cases where an optional feature will not be required by an owner, either now or in the future, a system which does not provide this feature shall be considered to be in compliance with the specification for the specific installation under consideration, but not in compliance with the entire specification.

(6) The owner may properly request bids from any supplier of an RUS accepted LC whose system provides all the features which will be required for a specific installation.

(7) When required by the owner, the supplier shall state compliance to the Carrier Serving Area (CSA) requirements, as stated in Bell Communications Research (Bellcore) Standard TR-TSY-000057, Functional Criteria for Digital Loop Carrier Systems.

(c) *Reliability.* (1) The failure rate of printed circuit boards shall not exceed an average of 2.0 percent per month of all equipped cards in all system terminals during the first 3 months after cutover, and shall not exceed an average of 1.0 percent per month of all equipped cards in all system terminals during the second 3-month period. The failure rate for the equipment shall be less than 0.5 percent per month of all equipped cards in all system terminals after 6 months. A failure is considered to be the failure of a component on the PC board which requires it to be repaired or replaced.

(2) The line concentrator terminal units shall be designed such that there will be no more than 4 hours of total outages in 20 years.

(d) *System type acceptance tests.* General test results will be required on each system type. Any system provided in accordance with this section shall be capable of meeting any requirement in this section on a spot-check basis.

(e) *Features required.* The network control equipment and peripheral equipment shall be comprised of solid-state and integrated circuitry components as far as practical and in keeping with the state-of-the-art and economics of the subject system.

(f) *Subscriber lines*—(1) *General.* (i) The remote LC units shall operate satisfactorily with subscriber lines which meet all of the conditions under the bidder's specifications and all the requirements

of this section. This section recognizes that the loop limit of the line concentrator is dependent upon the transmission facility between the LC central office termination and the LC remote unit. When voice frequency (physical) circuits are used, the loop limit from the COE to the subscriber shall be 1900 ohms (including the telephone set). When electronically derived circuits (carrier, lightwave, etc.) are used, the loop limits of the electronic system will control. The bidder shall identify the loop limits of the equipment to be supplied.

(ii) There should be provisions for such types of lines as ground start, loop start, regular subscriber, pay stations, etc.

(2) *Dialing.* (i) *General.* The line concentrator remote and central office

terminal equipment shall satisfactorily transmit dialing information when used with subscriber dials having a speed of operation between 8 and 12 dial pulses per second and a break period of 55 to 65% of the total signaling period.

(ii) *Subscriber dial interdigital time.* The remote and central office LC equipment shall permit satisfactory telecommunications operation when used with subscriber rotary dial interdigital times of 200 milliseconds minimum, and pushbutton dialing with 50 milliseconds minimum.

(iii) *Subscriber line pushbutton dialing frequencies.* The frequency pairs assigned for pushbutton dialing when provided by the central office shall be as listed in this paragraph (f)(2)(iii), with an allowable variation of ± 1.5 percent:

Low group frequencies (Hz)	High group frequencies (Hz)			
	1209	1336	1477	1633
697	1	2	3	Spare.
770	4	5	6	Spare.
852	7	8	9	Spare.
941	*	0	#	Spare.

(3) *Ringling.* (i) When LC ringing is generated at the remote end, it shall be automatic and intermittent and shall be cut off from the called line upon removal of the handset at the called station during either the ringing or silent period.

(ii) When ringing generators are provided in the LC on an ancillary basis, they shall be accepted or technically accepted by RUS.

(iii) Where ringing is generated at the remote end, the ringing system shall provide sufficient ringing on a bridged basis over the voltage and temperature limits of this specification and over subscriber loops within the limits stated by the manufacturer. The manufacturer shall state the minimum number (not less than two) of main station ringers that can be used for each ringing option available.

(g) *Traffic.* (1)(i) The minimum grade of service for traffic in the line concentrator shall be $B=.005$ using the Traffic Table, based on the Erlang Lost-Calls-Cleared Formula. Required grade of service, traffic assumptions and calculations for the particular ap-

plication being implemented shall be supplied by the bidder.

(ii) Service to customers served by a traffic sensitive LC should not be noticeably different than the service to customers served by the dedicated physical pairs from the central office so that uniform grade of service will be provided to all customers in any class of service. Reference § 1755.522(p)(1)(i), RUS General Specification for Digital, Stored Program Controlled Central Office Equipment.

(2) *Traffic and Plant Registers.* Traffic measurements consist of three types—peg count, usage, and congestion. A peg count register scores one count per call attempt per circuit group such as trunks, digit receivers, senders, etc. Usage counters measure the traffic density in networks, trunks and other circuit groups. Congestion registers score the number of calls which fail to find an idle circuit in a trunk group or to find an idle path through the switching network when attempting to connect two given end points. These conditions constitute “network blocking.”

Rural Utilities Service, USDA

§1755.397

(3) When required, traffic data will be stored in electronic storage registers or a block of memory consisting of one or more traffic counters for each item to be measured. The bidder shall indicate what registers are to be supplied, their purpose and the means for displaying the information locally (or at a remote location when available).

(h) *Transmission requirements.* (1) *General.* Unless otherwise stated, the requirements in paragraphs (h) (2) through (20) of this section are specified in terms of analog measurements made from Main Distributing Frame (MDF) terminals to MDF terminals excluding cabling loss.

(2) *Telephone transmitter battery supply.* A minimum of 20 milliamperes, dc, shall be provided for the transmitter of the telephone set at the subscriber station under all loop conditions specified by the bidder. The telephone set is assumed to have a resistance of 200 ohms.

(3) *Impedance—subscriber loops.* For the purpose of this section, the input impedance of all subscriber loops served by the equipment is arbitrarily considered to be 900 ohms in series with 2.16 microfarad capacitor at voice frequencies.

(4) *Battery noise.* Noise across the remote terminal battery at power panel distribution bus terminals shall not exceed 35 dBrnC during the specified busy hour.

(5) *Stability.* The long-term allowable variation in loss through the line concentrator system shall be ± 0.5 dB from the loss specified by the bidder.

(6) *Return loss.* The specified return loss values are determined by the service and type of port at the measuring end. Two-wire ports are measured at 900 ohms in series with 2.16 microfarads, and 4-wire ports are measured at 600 ohms resistive. When other balance networks are supplied, test equipment arranged for operation with the supplied network(s) may be used. The requirement given shall meet the following cited values on each balance network available in the system:

Line-to-Line or Line-to-Trunk (2-Wire)
Echo Return Loss (ERL)—18 dB, Minimum
Singing Return Loss (SRL)—Low—15 dB, Minimum
Singing Return Loss (SRL)—High—18 dB, Minimum

(7) *Longitudinal balance.* The minimum longitudinal balance, with dc loop currents between 20 to 70 mA, shall be 60 dB at all frequencies between 60 and 2000 Hz, 55 dB at 2700 Hz and 50 dB at 3400 Hz. The method of measurement shall be as specified in the IEEE standard 455, "Standard Testing Procedure for Measuring Longitudinal Balance of Telephone Equipment Operating in the Voice Band." Source voltage level shall be 10 volts root mean square (rms) where conversation battery feed originates at the remote end.

(8) *60 hz longitudinal current immunity.* The LC 60 Hz longitudinal current immunity shall be measured in accordance with Figure 1 of this section. Under test conditions cited on Figure 1 of this section, the system noise shall be 23 dBrnC or less as follows:

Figure 1

Measuring the Effects of Low Frequency Induction

Notes:

1. Wilcom T194C or Equivalent (900 ohm termination, C-message weighting, hold coil off)
2. SNC Noise Choke 35 W, or equivalent
3. Test at 0.020 Adc and 0.070 Adc
4. 2 ± 0.001 microfarad, 150 Vdc

Rural Utilities Service, USDA

§ 1755.397

(9) *Steady noise (idle channel at 900 ohm impedance).* Steady noise: Measure on terminated call. Noise measurements shall comply with the following:

Maximum—23 dBrnC0

Average—18 dBrnC0 or Less

3KHz Flat—Less than 35 dBrnO as an Objective

(10) *Impulse noise.* LC central office terminal equipment shall have an impulse noise limit of not more than five counts exceeding 54 dBrnC0 voice band weighted in a 5-minute period on six such measurements made during the busy hour. A WILCOM T-194C Transmission Test Set, or equivalent, should be used for the measurements. The measurement shall be made by establishing a normal connection from the noise counter through the switching equipment in its off-hook condition to a quiet termination of 900 ohms impedance. Office battery and signaling circuit wiring shall be suitably segregated from voice and carrier circuit wiring, and frame talking battery filters provided, if and as required, in order to meet these impulse noise limits.

(11) *Crosstalk coupling.* Worst case equal level crosstalk shall be 65 dB minimum in the range 200 to 3400 Hz. This shall be measured between any two paths through the system by connecting a 0 dBm0 level tone to the disturbing pair.

(12) *Digital error rate.* The digital line concentrator shall not introduce more than one error in 10^8 bits averaged over a 5-minute period, excluding the least significant bit.

(13) *Quantizing distortion.* (i) The system shall meet the following requirements:

Input level (dBm0) 1004 or 1020 Hz	Minimum signal to distortion with C-message weighting
0 to -30	33 dB
-30 to -40	27 dB
-40 to -45	22 dB

(ii) Due to possible loss of the least significant bit on direct digital connections, a signal to distortion degradation of up to 2 dB may be allowed where adequately justified by the bidder.

(14) *Overload level.* The overload level shall be +3 dBm0.

(15) *Gain tracking (linearity)* shall meet the following requirements:

Input signal level ¹	Maximum gain deviation
+3 to -37 dBm0	±0.5 dB
-37 to -50 dBm0	±1 dB

¹1004 Hz reference at 0 dBm0.

(16) *Frequency response (loss relative to 1004 Hz)* for line-to-line (via trunk group or intra-link) connections shall meet the following requirements:

Frequency (Hz)	Loss at 0 dBm0 input ¹
60	20 dB Min. ²
300	-1 to +3 dB
600 to 2400	+1 dB
3400	-1 to +3 dB

¹(-) means less loss and (+) means more loss.

²Transmit End.

(17) *Envelope delay distortion.* On any properly established connection, the envelope delay distortion shall not exceed the following limits:

Frequency (Hz)	Microseconds
1000 to 2600	190
800 to 2800	350
600 to 3000	500
400 to 3200	700

(18) *Absolute delay.* The absolute one-way delay through the line concentrator, excluding delays associated with the central office switching equipment, shall not exceed 1000 microseconds analog-to-analog measured at 1800 Hz.

(19) *Insertion loss.* The insertion loss in both directions of transmission at 1004 Hz shall be included in the insertion loss requirements for the connected COE switch and shall not increase the overall losses through the combined equipment beyond the values for the COE alone, when operated through a direct digital interface. Systems operated with a (VF) line circuit interface may introduce up to 3 dB insertion loss. Reference § 1755.522(q)(3).

(20) *Detailed requirements for direct digital connections.* (i) This paragraph (h)(20) covers the detailed requirements for the provision of interface units which will permit direct digital connection between the host central office and line concentrator subscriber terminals over digital facilities. The digital

transmission system shall be compatible with T1 type span lines using a DS1 interface and other digital interfaces that may be specified by the owner. The RUS specification for the T1 span line equipment is PE-60. Other span line techniques may also be used. Diverse span line routing may be used when specified by the owner.

(ii) The output of a digital-to-digital port shall be Pulse Code Modulation (PCM), encoded in eight-bit words using the μ -255 encoding law and D3 encoding format, and arranged to interface with a T1 span line.

(iii) Signaling shall be by means of Multifrequency (MF) or Dual Pulsing (DP) and the system which is inherent in the A and B bits of the D3 format. In the case where A and B bits are not used for signaling or system control, these bits shall only be used for normal voice and data transmission.

(iv) When a direct digital interface between the span line and the host central office equipment is to be implemented, the following requirements shall be met:

(A) The span line shall be terminated in a central office as a minimum a DS1 (1.544Mb/s) shall be provided;

(B) The digital central office equipment shall be programmed to support the operation of the digital port with the line concentrator subscriber terminal;

(C) The line concentrator subscriber terminal used with a direct digital interface shall be interchangeable with the subscriber terminal used with a central office terminal.

(i) *Alarms.* The system shall send alarms for such conditions as blown fuses, blocked controls, power failure in the remote terminal, etc., along with its own status indication and status of dry relay contact closures or solid-state equivalent to the associated

central office alarm circuits. Sufficient system alarm points shall be provided from the remote terminal to report conditions to the central office alarm system. The alarms shall be transmitted from the remote terminal to the central office terminal as long as any part of the connecting link is available for this transmission. Fuses shall be of the alarm and indicator type, and their rating designated by numerals or color code on fuse positions.

(j) *Electrical protection*—(1) *Surge protection.* (i) Adequate electrical protection of line concentrator equipment shall be included in the design of the system. The characteristics and application of protection devices must be such that they enable the line concentrator equipment to withstand, without damage or excessive protector maintenance, the dielectric stresses and currents that are produced in line-to-ground and tip-to-ring circuits through the equipment as a result of induced or conducted lightning or power system fault-related surges. All wire terminals connected to outside plant wire or cable pairs shall be protected from voltage and current surges.

(ii) Equipment must pass laboratory tests, simulating a hostile electrical environment, before being placed in the field for the purpose of obtaining field experience. For acceptance consideration RUS requires manufacturers to submit recently completed results (within 90 days of submittal) of data obtained from the prescribed testing. Manufacturers are expected to detail how data and tests were conducted. There are five basic types of laboratory tests which must be applied to exposed terminals in an effort to determine if the equipment will survive. Figure 2 of this section, Summary of Electrical Requirements and Tests, identifies the tests and their application as follows:

FIGURE 2.—SUMMARY OF ELECTRICAL REQUIREMENTS AND TESTS

Test	Application criteria	Peak voltage or current	Surge waveshape	Number of applications and maximum time between	Comments
Current surge	Low impedance paths exposed to surges.	500A or lesser current (see fig. 4).	10×1000 μ s	5 each polarity at 1 minute intervals.	None.
60 Hz current carrying	High or low impedance paths exposed to surges.	10A rms or lesser current (see fig. 6).	11 Cycles of 60 Hz (0.183 Sec.).	3 each at 1 minute intervals	None.
AC Power service surge voltage.	AC power service connection	2500V or +3 σ clamping V of arrester employed at 10kV/ μ s.	1.2×50 μ s	5 each polarity at 1 minute intervals.	AC arrester, if used, must be removed. Communications line arresters, if used, remain in place.
Voltage surge	High impedance paths exposed to surges.	1000V or +3 σ dc breakdown of arrester employed.	10×1000 μ s	5 each polarity at 1 minute intervals.	All primary arresters, if used, must be removed.
Arrester response delay.	Paths protected by arresters, such as gas tubes, with breakdown dependent on V. rate of rise.	+3 σ breakdown of arrester employed at 100V/ μ s of rise.	100V/ μ s rise decay to $\frac{1}{2}$ V. in tube's delay time.	5 each polarity at 1 minute intervals.	All primary arresters, if used, must be removed.

§ 1755.397

(iii) Electrical protection requirements for line concentrator equipment can be summarized briefly as follows:

(A) Current surge tests simulate the stress to which a relatively low impedance path may be subjected before main frame protectors break down. Paths with a 100 Hz impedance of 50 ohms or less shall be subjected to current surges, employing a 10 x 1000 microsecond waveshape as defined in Figure 3 of this section, Surge Waveshape. For the purpose of determining this impedance, arresters which

7 CFR Ch. XVII (1-1-97 Edition)

are mounted within the equipment are to be considered zero impedance. The crest current shall not exceed 500A; however, depending on the impedance of the test specimen this value of current may be lower. The crest current through the sample, multiplied by the sample's 100 Hz impedance, shall not exceed 1000 V. Where sample impedance is less than 2 ohms, peak current shall be limited to 500A as shown in Figure 4 of this section, Current Surge Tests. Figures 3 and 4 follow:

Figure 3

Explanation of Surge Waveshape

Surge Waveshape is defined as follows:

Rise Time x Time to Decay to Half Crest Value
(For example, 10 x 1000 μ s)

Notes: T_1 = Time to determine the rate of rise. The rate of rise is determined as the slope between 10% and 90% of peak voltage or current.

T_2 = Time to 50% of peak voltage (decay to half value).

Figure 4

Current Surge Test

V_L = Not to exceed 1000V

V_B = Charging Voltage

Z_{100} = Test Specimen Impedance to be measured at 100 Hz.

R_P = Parallel Resistance (Waveshape)

R_S = Series Resistance (Current Limiting)

Z_{100}	R_S	R_P	V_B
0	5	∞	2500
1	4	∞	2500
2	3	∞	2500
3	2	∞	1670
4	1	∞	1250
5	0	∞	1000
7.5	0	15	1000
10	0	10	1000
15	0	7.5	1000
20	0	6.7	1000
25	0	6.25	1000
30	0	6	1000
40	0	5.7	1000
50	0	5.5	1000

Rural Utilities Service, USDA

§ 1755.397

(B) Sixty Hertz (60 Hz) current carrying tests shall be applied to simulate an ac power fault which is conducted to the unit over the cable pairs. The test shall be limited to 10 amperes Root Mean Square (rms) of 60 Hz ac for a period of 11 cycles (0.1835 seconds) and shall be applied longitudinally from line to ground.

(C) AC power service surge voltage tests shall be applied to the power input terminals of ac powered devices to simulate switching surges or lightning-induced transients on the ac power system. The test shall employ a 1.2 x 50 microsecond waveshape with a crest voltage of 2500 V. Communications line protectors may be left in place for these tests.

(D) Voltage surge tests which simulate the voltage stress to which a relatively high impedance path may be subjected before primary protectors break down and protect the circuit. To

ensure coordination with the primary protection while reducing testing to the minimum, voltage surge tests shall be conducted at a 1000 volts with primary arresters removed for devices protected by carbon blocks, or the +3 sigma dc breakdown voltage of other primary arresters. Surge waveshape should be 10 x 1000 microseconds.

(E) Arrester response delay tests are designed to stress the equipment in a manner similar to that caused by the delayed breakdown of gap type arresters when subjected to rapidly rising voltages. Arresters shall be removed for these tests, the peak surge voltage shall be the +3 sigma breakdown voltage of the arrester in question on a voltage rising at 100 V per microsecond, and the time for the surge to decay to half voltage shall equal at least the delay time of the tube as explained in Figure 5 of this section, Arrester Response Delay Time as follows:

Figure 5

Explanation of Arrester Response Delay Time

Note: The delay time is that period of time when the potential across an arrester exceeds its dc firing level.

Rural Utilities Service, USDA

§ 1755.397

(iv) Tests shall be conducted in the following sequence. As not all tests are required in every application, non-applicable tests should be omitted:

- (A) Current Impulse Test;
- (B) Sixty Hertz (60 Hz) Current Carrying Tests;
- (C) AC Power Service Impulse Voltage Test;
- (D) Voltage Impulse Test; and
- (E) Arrester Response Delay Time Test.

(v) A minimum of five applications of each polarity for the surge tests and three for the 60 Hz Current Carrying Tests are the minimum required. All tests shall be conducted with not more than 1 minute between consecutive applications in each series of three or five applications to a specific configuration so that heating effects will be cumulative. See Figure 6 of this section, 60 Hz Current Surge Tests as follows:

Figure 6

60 Hz Current Surge Test

V - 700 Volts root mean square (rms) (Approximately 1000V Peak).

Z_{60} - Test specimen impedance to be measured at 60 Hz.

R_S - Series Resistance (current limiting) in each side of line. (Source impedance never less than 50 Ω longitudinal.)

$Z_{60 \text{ Hz}}$	R_S
0	140
10	120
20	100
50	100
Over 50	100

(vi) Tests shall be applied between each of the following terminal combinations for all line operating conditions:

- (A) Line tip to ring;
- (B) Line ring to ground;
- (C) Line tip to ground; and
- (D) Line tip and ring tied together to ground.

(2) *Dielectric strength.* (i) Arresters shall be removed for all dielectric strength tests.

(ii) Direct current potentials shall be applied between all line terminals and the equipment chassis and between these terminals and grounded equipment housings in all instances where the circuitry is dc open circuit from the chassis, or connected to the chassis through a capacitor. The duration of all dielectric strength tests shall be at least 1 second. The applied potential shall be at a minimum equal to the plus 3 sigma dc breakdown voltage of the arrester, provided by the line concentrator manufacturer.

(3) *Insulation resistance.* Following the dielectric tests, the insulation resistance of the installed electrical circuits between wires and ground, with the normal equipment grounds removed, shall not be less than 10 megohms at 500 volts dc at a temperature of 68 °F (20 °C) and at a relative humidity of approximately 50 percent. The measurement shall be made after the meter stabilizes, unless the requirement is met sooner. Arresters shall be removed for these tests.

(4) *Self-protection.* (i) All components shall be capable of being continuously energized at rated voltage without injury. Design precautions must be taken to prevent damage to other equipment components when a particular component fails.

(ii) Printed circuit boards or similar equipment employing electronic components should be self-protecting against external grounds applied to the connector terminals. Board components and coatings applied to finished products shall be of such material or so treated that they will not support combustion.

(iii) Every precaution shall be taken to protect electrostatically sensitive components from damage during han-

dling. This shall include written instructions and recommendations.

(k) *Miscellaneous—(1) Interconnect wire.* All interconnect wire shall be of soft annealed tinned copper wire meeting the requirements of ASTM Specification B33-91 and of suitable cross-section to provide safe current carrying capacity and mechanical strength. The insulation of installed wire, connected to its equipment and frames, shall be capable of withstanding the same insulation resistance and dielectric strength requirements as given in paragraphs (j)(2) and (j)(3) of this section at a temperature of 120°F (49°C), and a relative humidity of 90 percent.

(2) *Wire wrapped terminals.* These terminals are preferred and where used shall be of a material suitable for wire wrapping. The connections to them shall be made with a wire wrapping tool with the following minimum number of successive non-overlapping turns of bare tinned copper wire in contact with each terminal:

- (i) 6 turns of 30 gauge;
- (ii) 6 turns of 26 gauge;
- (iii) 6 turns of 24 gauge; or
- (iv) 5 turns of 22 gauge.

(3) *Protection against corrosion.* All metal parts of equipment frames, distributing frames, cable supporting framework and other exposed metal parts shall be constructed of corrosion resistant materials or materials plated or painted to render them adequately corrosion resistant.

(4) *Screws and bolts.* Screw threads for all threaded securing devices shall be of American National Standard form in accordance with Federal Standard H28, unless exceptions are granted to the manufacturer of the switching equipment. All bolts, nuts, screws, and washers shall be of nickel-copper alloy, steel, brass or bronze.

(5) *Environmental requirements.* (i) The bidder shall specify the environmental conditions necessary for safe storage and satisfactory operation of the equipment being bid. If requested, the bidder shall assist the owner in planning how to provide the necessary environment for the equipment.

(ii) To the extent practicable, the following temperature range objectives shall be met:

(A) For equipment mounted in central office and subscriber buildings, the carrier equipment shall operate satisfactorily within an ambient temperature range of 32 °F to 120 °F (0 °C to 49 °C) and at 80 percent relative humidity between 50 °F and 100 °F (10 °C and 38 °C); and

(B) Equipment mounted outdoors in normal operation (with cabinet doors closed) shall operate satisfactorily within an ambient temperature range (external to cabinet) of –40 °F to 140 °F (–40 °C to 60 °C) and at 95 percent relative humidity between 50 °F to 100 °F (10 °C to 38 °C). As an alternative to the (60 °C) requirement, a maximum ambient temperature of 120 °F (49 °C) with equipment (cabinet) exposed to direct sunlight may be substituted.

(6) *Stenciling.* Equipment units and terminal jacks shall be adequately designated and numbered. They shall be stenciled so that identification of equipment units and leads for testing or traffic analysis can be made without unnecessary reference to prints or descriptive literature.

(7) *Quantity of equipment bays.* Consistent with system arrangements and ease of maintenance, space shall be provided on the floor plan for an orderly layout of future equipment bays. Readily accessible terminals will be provided for connection to interbay and frame cables to future bays. All cables, interbay and intrabay (excluding power), if technically feasible, shall be terminated at both ends by connectors.

(8) *Radio and television interference.* Measures shall be employed by the bidders to limit the radiation of radio frequencies generated by the equipment so as not to interfere with radio, television receivers, or other sensitive equipment.

(9) *Housing.* (i) When housed in a building supplied by the owner, a complete floor plan including ceiling height, floor loading, power outlets, cable entrances, equipment entry and travel, type of construction, and other pertinent information shall be supplied.

(ii) In order to limit corrosion, all metal parts of the housing and mounting frames shall be constructed of suitable corrosion resistant materials or materials protectively coated to render

them adequately resistant to corrosion under the climatic and atmospheric conditions existing in the area in which the housing is to be installed.

(10) *Distributing frame.* (i) The line concentrator terminal equipment located at the central office shall be protected by the central office main distribution frame. The bidder may supply additional protection capability as appropriate. All protection devices (new or existing) shall be arranged to operate in a coordinated manner to protect equipment, limit surge currents, and protect personnel.

(ii) The distributing frame shall provide terminals for terminating all incoming cable pairs. Arresters shall be provided for all incoming cable pairs, or for a smaller number of pairs if specified.

(iii) The current carrying capacity of each arrester and its associated mounting shall coordinate with a #22 gauge copper conductor without causing a self-sustaining fire or permanently damaging other arrester positions. Where all cable pairs entering the housing are #24 gauge or finer, the arresters and mountings need only coordinate with #24 gauge cable conductors.

(iv) Remote terminal protectors may be mounted and arranged so that outside cable pairs may be terminated on the left or bottom side of protectors (when facing the vertical side of the MDF) or on the back surface of the protectors. Means for easy identification of pairs shall be provided.

(v) Protectors shall have a “dead front” (either insulated or grounded) where live metal parts are not readily accessible.

(vi) Protectors shall be provided with an accessible terminal of each incoming conductor which is suitable for the attachment of a temporary test lead. They shall also be constructed so that auxiliary test fixtures may be applied to open and test the subscriber's circuit in either direction. Terminals shall be suitable for wire wrapped connections or connectorized.

(vii) If specified, each protector group shall be furnished with a factory assembled tip cable for splicing to the outside cable; the tip cable shall be 20 feet (6.1 m) in length, unless otherwise

Rural Utilities Service, USDA

§ 1755.397

specified. Tip cable used shall be RUS accepted.

(viii) Protector makes and types used shall be RUS accepted.

(1) *Power equipment*—(1) *General*. When specified, batteries and charging equipment shall be supplied for the remote terminal of the line concentrator.

(2) *Operating voltage*. (i) The nominal operating voltage of the central office and remote terminal shall be 48 volts dc, provided by a battery with the positive side tied to system ground.

(ii) Where equipment is dc powered, it must operate satisfactorily over a range of 50 volts $\pm$ 6 volts dc.

(iii) Where equipment is ac powered, it must operate satisfactorily over a range of 120 $\pm$ 10 volts or 220 $\pm$ 10 volts ac.

(3) *Batteries*. (i) Unless otherwise specified by the owner, sealed batteries shall be supplied for the remote line concentrator terminal.

(ii) The batteries shall have an ampere hour load capacity of no less than 8 busy hours. When an emergency ac supply source is available, the battery reserve may be reduced to 3 busy hours.

(iii) The batteries shall be sealed when they are mounted in the cabinet with the concentrator equipment.

(iv) When specified by the owner, battery heaters shall be supplied in a bidder-furnished housing.

(4) *Charging equipment*. (i) One charger capable of carrying the full dc power

load of the remote terminal shall be supplied unless otherwise specified by the owner.

(ii) Charging shall be on a full float basis. The rectifiers shall be of the full wave, self-regulating, constant voltage, solid-state type and shall be capable of being turned on and off manually.

(iii) When charging batteries, the voltage at the battery terminals shall be adjustable and shall be set at the value recommended for the particular battery being charged, provided it is not above the maximum operating voltage of the central office switching equipment. The voltage shall not vary more than $\pm$ 0.02 volt dc per cell between 10% load and 100% load. Between 3% and 10% load, the output voltage shall not vary more than $\pm$ 0.04 volt dc per cell. Beyond full load current the output voltage shall drop sharply. The above output voltage shall be maintained with input line voltage variations of plus or minus 10 percent. Provision shall be made to manually change the output voltage of the rectifier to 2.25 volts per cell to provide an equalization charge on the battery.

(iv) The charger noise, when measured with a suitable noise measuring set and under the rated battery capacitance and load conditions, shall not exceed 22 dBrnC. See Figure 7 of this section, Charger Noise Test as follows:

Figure 7

Charger Noise Test

Note (1) The manufacturer may elect to eliminate the capacitor C from the measurement.

Capacitance C in μF = 30,000 μF per ampere-hour per cell. For example, 25 cells at 100 ampere-hour would be equivalent to a capacitance of:

$$(30,000 \times 100)/25 = 120,000 \mu\text{F}$$

- (2) The value of the resistive load R is determined by the nominal battery voltage in volts divided by the full load rating in amperes. For example, for a 48 volt battery and a full load current of 24 amperes, the load resistance R is $48/24 = 2$ ohms of appropriate power handling capacity.

(v) The charging equipment shall be provided with a means for indicating a failure of charging current whether due to ac power failure, an internal failure in the charger, or to other circumstances which might cause the output voltage of the charger to drop below the battery voltage. Where a supplementary constant current charger is used, an alarm shall be provided to indicate a failure of the charger.

(vi) Audible noise developed by the charging equipment shall be kept to a minimum. Acoustic noise resulting from operation of the rectifier shall be expressed in terms of dB indicated on a sound level meter conforming to American National Standards Institute S1.4, and shall not exceed 65 dB (A-weighting) measured at any point 5 feet (1.5m) from any vertical surface of the rectifier.

(vii) The charging equipment shall be designed so that neither the charger nor the central office equipment is subject to damage in case the battery circuit is opened for any value of load within the normal limits.

(5) *Power panel.* (i) Battery and charger control switches, dc voltmeters, dc ammeters, fuses and circuit breakers, supervisory and timer circuits shall be provided as required. Portable or panel mounted frequency meters or voltmeters shall be provided as specified by the owner.

(ii) Power panels, cabinets and shelves, and associated wiring shall be designed initially to handle the line concentrator terminal when it reaches its ultimate capacity as specified by the owner.

(iii) The power panel shall be of the "dead front" type.

(6) *Ringling equipment.* The ringling system shall provide sufficient ringling on a bridged basis over the voltage and temperature limits of this section and over subscriber drops within the limits stated by the bidder. The ringling system shall be without operational problems such as bell tapping during dialing. The bidder shall state the minimum number (not less than two) of main station ringers that can be used for each ringling option available.

(7) *Interrupter equipment.* The interrupter may be an integral part of the system or may be part of the associ-

ated central office equipment connected to the line concentrator central office terminal.

(8) *Special systems.* Manufacturers of LC systems that operate by extending ringing current from the central office shall state their required input ringing (voltage and frequency) and the limitations on the connected subscriber loop.

(m) *Fusing requirements—(1) General.*

(i) The equipment shall be completely wired and equipped with fuses, trouble signals, and all associated equipment for the wire capacity of the frames or cabinets provided.

(ii) Design precautions shall be taken to prevent the possibility of equipment damage arising from the insertion of an electronic package into the wrong connector or the removal of a package from any connector or improper insertion of the correct card in its connector.

(2) *Fuses.* Fuses and circuit breakers shall be of an alarm and indicator type, except where the fuse or breaker location is indicated on the alarm printout. Their rating shall be designated by numerals or color codes on the fuse or the panel.

(n) *Trouble location and test—(1)*

Equipment. (i) Trouble indications in the system may be displayed in the form of lights on the equipment units or printed circuit boards.

(ii) When required, a jack or other connector shall be provided to connect a fault or trouble recorder (printer or display).

(2) *Maintenance system.* (i) The maintenance system shall monitor and maintain the system operation without interruption of call processing except for major failures.

(ii) The maintenance system shall be arranged to provide the ability to determine trouble to an individual card, functional group of cards, or other equipment unit.

(o) *Spare parts.* Lists of spare parts and maintenance tools as recommended by the bidder shall be provided. The cost of such tools and spare parts shall be indicated and shall not be included in the base price.

(p) *Drawings and printed material.* (1) The bidder shall supply instructional material for each line concentrator system involved at the time of delivery

of the equipment. It is not the intent of this section to require system documentation necessary for the repair of individual circuit boards.

(2) Three complete sets of legible drawings shall be provided for each central office to be accessed. Each set shall include all of the following:

(i) Drawings of major equipment items such as frames, with the location of major component items of equipment shown therein;

(ii) Wiring diagrams indicating the specific method of wiring used on each item of equipment and interconnection wiring between items of equipment;

(iii) Maintenance drawings covering each equipment item that contains replaceable parts, appropriately identifying each part by name and part number; and

(iv) Job drawings including all drawings that are individual to the particular line concentrator involved such as mainframe, power equipment, etc.

(3) The following information shall also be furnished:

(i) A complete index of required drawings;

(ii) An explanation of electrical principles of operation of overall concentrator system;

(iii) A list of tests which can be made with each piece of test equipment furnished and an explanation of the method of making each test;

(iv) A sample of each form recommended for use in keeping records;

(v) The criteria for analyzing results of tests and determining appropriate corrective action;

(vi) A set of general notes on methods of isolating equipment faults to specific printed circuit cards in the equipment;

(vii) A list of typical troubles which might be encountered, together with general indications as to probable location of each trouble; and

(viii) All special line concentrator system grounding requirements.

(4) When installation is to be done by the bidder a complete set of drawings shall be provided by the owner, such as floor plans, lighting, grounding and ac power access.

(q) *Installation and acceptance*—(1) *General.* Paragraphs (q)(2)(i) through (q)(3)(xxi) of this section covers the

general requirements for the installation of line concentrator equipment by the bidder, and outlines the general conditions to be met by the owner in connection with such installation work. The responsibilities apply in both the central office installation and remote terminal installations, unless otherwise noted.

(2) *Responsibilities of owner.* The owner shall:

(i) Allow the bidder and its employees free access to the premises and facilities at all hours during the progress of the installation;

(ii) Provide access to the remote site and any other site for development work needed during the installation;

(iii) Take such action as necessary to ensure that the premises are dry and free from dust and in such condition as not to be hazardous to the installation personnel or the material to be installed (not required when remote terminal is not installed in a building);

(iv) Provide heat or air conditioning when required and general illumination in rooms in which work is to be performed or materials stored;

(v) Provide suitable openings in buildings to allow material to be placed in position (not required when a remote terminal is not installed in a building);

(vi) Provide the necessary conduit and commercial and dc-ac inverter output power to the locations shown on the approved floor plan drawings;

(vii) Provide 110 volts a.c., 60 Hz commercial power equipped with a secondary arrester and a reasonable number of outlets for test, maintenance and installation equipment;

(viii) Provide suitable openings or channels and ducts for cables and conductors from floor to floor and from room to room;

(ix) Provide suitable ground leads, as designated by the bidder (not required when remote terminal is not installed in a building);

(x) Provide the necessary wiring, central office ground and commercial power service, with a secondary arrester, to the location of an exterior remote terminal installation based on the voltage and load requirements furnished voltage and load requirements furnished by the bidder;

(xi) Test at the owners expense all lines and trunks for continuity, leakage and loop resistance and ensure that all lines and trunks are suitable for operation with the central office and remote terminal equipment specified;

(xii) Make alterations and repairs to buildings necessary for proper installation of material, except to repair damage for which the bidder or its employees are responsible;

(xiii) Connect outside cable pairs on the distributing frame (those connected to protectors);

(xiv) Furnish all line, class of service assignment, and party line assignment information to permit bidder to program the data base memory within a reasonable time prior to final testing;

(xv) Release for the bidder's use, as soon as possible, such portions of the existing plant as are necessary for the proper completion of such tests as require coordination with existing facilities including facilities for T1 span lines with properly installed repeaters between the central office and the remote terminal installations;

(xvi) Make prompt inspections as it deems necessary when notified by the bidder that the equipment, or any part thereof, is ready for acceptance;

(xvii) Provide adequate fire protection apparatus at the remote terminal, including one or more fire extinguishers or fire extinguishing systems of the gaseous type, that has low toxicity and effect on equipment;

(xviii) Provide necessary access ports for cable, if underfloor cabling is selected;

(xix) Install equipment and accessory plant devices mounted external to the central office building and external to the repeater and other outside housings including filters, repeater housings, splicing of repeater cable stubs, externally mounted protective devices and other such accessory devices in accordance with written instructions provided by the bidder; and

(xx) Make all cross connections (at the MDF or Intermediate Distribution Frame IDF) between the physical trunk or carrier equipment and the central office equipment unless otherwise specified in appendix A of this section.

(3) *Responsibilities of bidder.* The bidder shall:

(i) Allow the owner and its representatives access to all parts of the building at all times;

(ii) Obtain the owner's permission before proceeding with any work necessitating cutting into or through any part of the building structure such as girders, beams, concrete or tile floors, partitions or ceilings (does not apply to the installation of lag screws, expansion bolts, and similar devices used for fastening equipment to floors, columns, walls, and ceilings);

(iii) Be responsible for and repair all damage to the building due to carelessness of the bidder's workforce, exercise reasonable care to avoid any damage to the owner's switching equipment or other property, and report to the owner any damage to the building which may exist or may occur during its occupancy of the building;

(iv) Consult with the owner before cutting into or through any part of the building structure in all cases where the fireproofing or moisture proofing may be impaired;

(v) Take necessary steps to ensure that all fire fighting apparatus is accessible at all times and all flammable materials are kept in suitable places outside the building;

(vi) Not use gasoline, benzene, alcohol, naphtha, carbon tetrachloride or turpentine for cleaning any part of the equipment;

(vii) Be responsible for delivering the CO and remote terminal equipment to the sites where they will be needed;

(viii) Install the equipment in accordance with the specifications for the line concentrator;

(ix) Have all leads brought out to terminal blocks on the MDF (or IDF if stated in appendix A of this section) and have all terminal blocks identified and permanently labeled;

(x) Use separate shielded type leads grounded at one end only unless otherwise specified by the owner or bidder or tip cables meeting RUS cable crosstalk requirements for carrier frequencies inside the central office;

(xi) Group the cables to separate carrier frequency, voice frequency, signaling, and power leads;

(xii) Make the necessary power and ground connections (location as shown in appendix A of this section) to the purchaser's power terminals and ground bus unless otherwise stated in appendix A of this section (ground wire shall be 6 AWG unless otherwise stated);

(xiii) Place the battery in service in compliance with the recommendations of the battery manufacturer;

(xiv) Make final charger adjustments using the manufacturer's recommended procedure;

(xv) Run all jumpers, except line and trunk jumpers (those connected to protectors) unless otherwise specified in appendix A of this section;

(xvi) Establish and update all data base memories with subscriber information as supplied by the owner until an agreed turnover time;

(xvii) Give the owner notice of completion of the installation at least one week prior to completion;

(xviii) Permit the owner or its representative to conduct tests and inspections after installation has been completed in order that the owner may be assured the requirements for installation are met;

(xix) Allow access, before turnover, by the owner or its representative, upon request, to the test equipment which is to be turned over as a part of the delivered equipment, to permit the checking of the circuit features which are being tested and to permit the checking of the amount of connected equipment to which the test circuits have access;

(xx) Notify the owner promptly of the completion of work of the central office terminals, remote terminals or such portions thereof as are ready for inspection; and

(xxi) Correct promptly all defects for which the bidder is responsible.

(4) *Information to be furnished by bidder.* The bidder shall accompany its bid with the following information:

(i) Two copies of the equipment list and the traffic calculations from which the quantities in the equipment list are determined;

(ii) Two copies of the traffic tables from which the quantities are determined, if other than the Erlang B traffic tables;

(iii) A block diagram of the line concentrator and associated maintenance equipment will be provided;

(iv) A prescribed method and criteria for acceptance of the completed line concentrator which will be subject to review;

(v) This special grounding requirements including the recommended configuration, suggested equipment and installation methods to be used to accomplish them;

(vi) The special handling and equipment requirements to avoid damage resulting from the discharge of static electricity (see paragraph (j) (4) (iii) of this section) or mechanical damage during transit installation and testing;

(vii) The location of technical assistance service, its availability and conditions for owner use and charges for the service by the bidder; and

(viii) The identification of the subscriber loop limits available beyond the line concentrator.

(5) *Installation requirements.* (i) All work shall be done in a neat, workmanlike manner. Equipment frames or cabinets shall be correctly located, carefully aligned, anchored, and firmly braced. Cables shall be carefully laid with sufficient radius of curvature and protected at corners and bends to ensure against damage from handling or vibration. Exterior cabinet installations for remote terminals shall be made in a permanent, eye-pleasing manner.

(ii) All multiple and associated wiring shall be continuous, free from crosses, reverses, and grounds and shall be correctly wired at all points.

(iii) An inspection shall be made by the owner or its representatives prior to performing operational and performance tests on the equipment, but after all installing operations which might disturb apparatus adjustments have been completed. The inspection shall be of such character and extent as to disclose with reasonable certainty any unsatisfactory condition of apparatus or equipment. During these inspections, or inspections for apparatus adjustments, or wire connections, or in testing of equipment, a sufficiently detailed examination shall be made throughout the portion of the equipment within which such condition is

Rural Utilities Service, USDA

§ 1755.397

observed, or is likely to occur, to disclose the full extent of its existence, where any of the following conditions are observed:

(A) Apparatus or equipment units failing to compare in quantity and type to that specified for the installation;

(B) Apparatus or equipment units damaged or incomplete;

(C) Apparatus or equipment affected by rust, corrosion or marred finish; and

(D) Other adverse conditions resulting from failure to meet generally accepted standards of good workmanship.

(6) *Operational tests.* (i) Operational tests shall be performed on all circuits and circuit components to ensure their proper functioning in accordance with appropriate explanation of the operation of the circuit.

(ii) All equipment shall be tested to ensure proper operation with all components connected in all possible combinations and each line shall be tested for proper ring, ring trip and supervision.

(iii) All fuses shall be verified for continuity and correct rating. Alarm indication shall be demonstrated for each equipped fuse position. An already failed fuse compatible with the fuse position may be used.

(iv) Each alarm or signal circuit shall be checked for correct operation.

(v) A sufficient quantity of locally originating and incoming calls shall be made to demonstrate the function of the line concentrator including all equipped transmission paths. When intra-link calling is supplied, all intra-link transmission paths shall be demonstrated.

(7) *Acceptance tests and data required.*

(i) Data shall be supplied to the owner by the bidder in writing as a part of the final documents in closing out the contract as follows:

(A) A detailed cross connect drawing of alarm to power board, central office battery to physical trunks or carrier system, wiring options used in terminals, channels, filters, repeaters, etc., marked in the owner's copy of the equipment manual or supplied separately;

(B) The measured central office supply voltages applied to the equipment terminals or repeaters at the time the jack and test point readings are made

and ac supply voltages where equipment is powered from commercial ac sources;

(C) A list of all instruments, including accessories, by manufacturer and type number, used to obtain the data; and

(D) The measurements at all jack or test points recommended by the manufacturer, including carrier frequency level measurements at all carrier terminals and repeaters where utilized.

(ii) Data in the form of a checklist or other notations shall be supplied showing the results of the operational tests.

(iii) The bidder shall furnish to the owner a record of the battery cell or multicell unit voltages measured at the completion of the installation of the switching system before it is placed in commercial service. This is not required at a site where the owner furnishes dc power.

(8) *Joint inspection requirements.* (i) The bidder shall notify the owner in writing at least one week before the date the complete system will be ready for inspection and tests. A joint inspection shall be made by the bidder and the owner (or owner's engineer) to determine that the equipment installation is acceptable. The inspection shall include physical inspection, a review of acceptance test data, operational tests, and sample measurements.

(A) The owner shall review the acceptance test data and compare it to the requirements of this section.

(B) Sample measurements shall be made on all systems installed under this contract. Test methods should follow procedures described in paragraph (g)(5) of this section.

(C) A check shall be made of measured test point and jack readings for compliance with the manufacturer's specifications. This applies also to channels, terminals, carrier frequency repefault locating circuits.

(ii) In the event that the measured data or operational tests show that equipment fails to meet the requirements of this section, the deficiencies are to be resolved as set forth in Article II of the 397 Special Equipment Contract. (Copies are available from RUS, room 0174, U.S. Department of Agriculture, Washington, DC 20250-1500.) The reports of the bidder

§ 1755.397

and the owner shall be detailed as to deficiencies, causes, corrective action necessary, corrective action to be taken, completion time, etc.

(The information and recordkeeping requirements of this section have been approved by the Office of Management and Budget (OMB) under the control number 0572-0059.)

APPENDIX A TO § 1755.397—SPECIFICATION FOR LINE CONCENTRATOR DETAILED EQUIPMENT REQUIREMENTS

(Information To Be Supplied by Owner)

Telephone Company (Owner)

Name: _____

Location: _____

Number of LC's Required: _____

Line Concentrator Locations:

Location	No. of Lines	Central Office
.....		
.....		
.....		
.....		

1. General

1.1 Notwithstanding the bidder's equipment lists, the equipment and materials furnished by the bidder must meet the requirements of paragraphs (a) through (p) of this section, and this appendix A.

1.2 Paragraph (a) through (p) of this section cover the minimum general requirements for line concentrator equipment.

1.3 Paragraph (q) of this section covers the requirements for installation, inspection and testing when such service is included as part of the contract.

1.4 This appendix A covers the technical data for application engineering and detailed equipment requirements insofar as they can be established by the owner. This appendix A shall be filled in by the owner.

1.5 Appendix B of this section covers detailed information on the line concentrator equipment, information on system reliability and traffic capacity as proposed by the bidder. Appendix B of this section is to be filled in by the bidder and must be presented with the bid.

Office Name

(By Location) _____

LC Designation _____

2. Number of Subscriber Lines

	Equipped	Wired only
Single-Party		
Pay Station (Type: _____)		
Other (Describe: _____)		
Total		

7 CFR Ch. XVII (1-1-97 Edition)

3. Loop Resistance

3.1 Number of non-pay station lines having a loop resistance, including the telephone set as follows:

3.1.1 For physical trunks between the remote and the office units, the loop resistance is to include the resistance of the trunk.

	No. of lines
1200-1900 ohms	
1901-3200 ohms	
3201-4500 ohms	

3.1.2 Number of pay station lines having a loop resistance, excluding the telephone set, greater than:

	No. of lines
1200 ohms (Prepay)	
1000 ohms (Semi-Postpay)	

When physical trunks are used, these resistances include that of the facility between the CO and the remote.

3.1.3 Range extension equipment, if required, is to be provided:

_____ By Bidder

_____ By Owner

(Quantity and Type) _____

4. Traffic Data

4.1 Average combined originating and terminating hundred call seconds (CCS) per line in the busy hour:

_____ CCS/Line. (Assume originating & terminating equal.)

4.2 Percent Intra-Calling _____

4.3 Total Busy Hour Calls _____

5. TYPE or RINGING

5.1 Frequency No. 1. 2. 3. 4.

Frequency (Hz)
Max. No. of Phones/Freq. ..

5.2 Minimum ringing generator capacity to be supplied shall be sufficient to serve _____ lines (each frequency).

6. Central Office Equipment Interface

6.1 COE will be:

6.1.1 COE Manufacturer _____

Type _____

Year _____

Generic _____

6.1.2 _____ See digital central office specification for the switchboard at _____.

6.2 Interface will be:

6.2.1 _____ Line Circuit(s)

Rural Utilities Service, USDA**§1755.397**

- 6.2.2 _____ Direct Digital Interface
6.2.3 _____ Other (Describe)

6.3 Mounting rack for line concentrator furnished by:

_____ Bidder
_____ Owner

(Specify width and height of rack available)
(Width) (Height)

6.4 Equipment to be installed in existing building:

_____ Yes (Attach detailed plan)
_____ No

7. Transmission Facilities

7.1 Transmission facilities between the central office and remote terminals shall be:

7.1.1 Type:
_____ VF Carrier Derived Circuits
_____ Digital Span Line (DS1)
_____ Other

(Attach a layout of the transmission facilities between the central office and the remote terminals describing transmission and signaling parameters, routing and resistance where applicable.)

7.1.2 Utilizes physical plant
_____ Cable Pairs (Existing/New)
_____ Other

NOTE: Unless otherwise stated, physical plant will be supplied by the owner.

7.1.3 Terminal equipment for transmission facility to be supplied by:

_____ Owner
_____ Bidder
7.1.3.1 Carrier e/w voice terminations
_____ Yes _____ No

Manufacturer and type _____
Central office voice terminations Equipped _____, Wired Only _____

7.1.3.2 Digital span line (DS1) supplied by
_____ Owner
_____ Bidder

Manufacturer and Type _____
7.1.3.3 Number of repeaters (per span line)

7.1.3.4 Diverse (alternate) span line routing required

_____ Yes (Describe in Item 11) _____ No
7.1.3.5 Span line terminations only
_____ Yes _____ No

7.1.3.6 Span line power required (CO and Remote Terminals) _____ Yes _____ No

7.1.3.7 Physical facility between CO and remote Loop Resistance _____ ohms, Length _____ meters

8. Power Equipment Requirements**8.1 Central Office Terminal**

8.1.1 Owner-furnished -48 volt dc power
_____ Yes _____ No

8.1.2 Other (Describe)

8.1.3 Standby power is available
_____ Yes _____ No

8.2 Remote Terminal

8.2.1 Owner-furnished -48 vdc power
_____ Yes _____ No

8.2.2 Bidder-furnished power supply
_____ Yes _____ No

8.2.3 AC power available at site:

_____ 110 vac, 60 Hz, single-phase
_____ Other (Describe in Item 11)

8.2.4 A battery reserve of _____ busy hours shall be provided for this line concentrator terminal when it reaches _____ lines at the traffic rates specified.

8.2.5 Batteries supplied shall be:

_____ Lead Calcium
_____ Stabilized Electrolyte
_____ Sealed Lead Acid
_____ Other (Describe in item 11)
8.2.6 Standby power is available
_____ Yes _____ No

9. Remote Terminal**9.1 Mounting**

9.1.1 _____ Outside Housing (To be furnished by bidder)

9.1.2 _____ Concrete Slab to be furnished by owner (Bidder to supply construction details after award.)

9.1.3 _____ Manhole, environmentally controlled (Describe in Item 11)

9.1.4 _____ Pedestal Mounting

9.1.5 _____ Pole Mounting (Owner-furnished installed pole)

9.1.6 _____ Prefab Building (Owner-furnished site)

9.2 Equipment is to be installed in an existing building.

_____ Yes _____ No
(Attach detailed plan.)

6. Explanatory Notes

[60 FR 44729, Aug. 29, 1995]

§§ 1755.398—1755.521 [Reserved]

§ 1755.522 RUS general specification for digital, stored program controlled central office equipment.

(a) *General.* (1) This section covers general requirements for a digital telephone central office switching system, which is fully electronic and controlled by stored program processors. A digital switching system transfers information which is digitally encoded from any input port to a temporarily addressed exit port. The information may enter the system in either analog or digital form and may or may not be converted to analog at the exit port depending on the facility beyond. The switching system shall operate properly as an integral part of the telephone network when connected to physical and carrier derived circuits meeting RUS specifications and other generally accepted telecommunications practices.

(2) The output of a digital-to-digital port shall be Pulse Code Modulation (PCM), encoded in eight-bit words using the mu-255 encoding law and D3

encoding format, and arranged to interface with a T1 span line.

(3) American National Standards Institute (ANSI) Standard S1.4-1983, Specification for Sound Level Meters, is incorporated by reference by RUS. This includes S1.4A-1985 that is also incorporated by reference. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from ANSI Inc., 11 West 42nd Street, 13th Floor, New York, NY 10036, telephone 212-642-4900. Copies may be inspected during normal business hours at RUS, room 2838-S, U.S. Department of Agriculture, Washington, DC 20250 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(4) American Society for Testing Materials (ASTM) Specification B 33-91, Standard Specification for Tinned Soft or Annealed Copper Wire for Electrical Purposes, is incorporated by reference by RUS. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from ASTM, 1916 Race Street, Philadelphia, PA, telephone 215-299-5400. Copies may be inspected during normal business hours at RUS, room 2838-S, U.S. Department of Agriculture, Washington, DC 20250 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(5) Bell Communications Research (Bellcore) document SR-TSV-002275, BOC Notes on the LEC Networks—1990, March 1991, is incorporated by reference by RUS. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR Part 51. Copies may be obtained from Bellcore Customer Service, 60 New England Avenue, Piscataway, NJ 08854, telephone 1-800-521-2673. Copies may be inspected during normal business hours at RUS, room 2838-S, U.S. Department of Agriculture, Washington, DC 20250 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(6) Bellcore TR-TSY-000508, Automatic Message Accounting, July 1987,

is incorporated by reference by RUS. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Bellcore Customer Service, 60 New England Avenue, Piscataway, NJ 08854, telephone 1-800-521-2673. Copies may be inspected during normal business hours at RUS, room 2838-S, U.S. Department of Agriculture, Washington, DC 20250 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(7) Federal Standard H28, Screw-Thread Standards for Federal Services, March 31, 1978, is incorporated by reference by RUS. This includes: Change Notice 1, Federal Standard, Screw-Thread Standards for Federal Services, May 28, 1986; Change Notice 2, Federal Standard, Screw-Thread Standards for Federal Services, January 20, 1989; and Change Notice 3, Federal Standard, Screw-Thread Standards for Federal Services, March 12, 1990. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from the General Services Administration, Specification Section, 490 East L'Enfant Plaza SW, Washington, DC 20407, telephone 202-755-0325. Copies may be inspected during normal business hours at RUS, room 2838-S, U.S. Department of Agriculture, Washington, DC 20250 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(8) Institute of Electrical and Electronics Engineers (IEEE) Std 455-1985, IEEE Standard Test Procedure for Measuring Longitudinal Balance of Telephone Equipment Operating in the Voice Band, is incorporated by reference by RUS. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from IEEE Service Center, 445 Hoes Lane, P. O. Box 1331, Piscataway, NJ 08854, telephone (201) 981-0060. Copies may be inspected during normal business hours at RUS, room 2838-S, U.S. Department of Agriculture, Washington, DC 20250 or at the Office of the Federal Register,

800 North Capitol Street, NW., suite 700, Washington, DC.

(9) Institute of Electrical and Electronics Engineers (IEEE) Std 730–1989, IEEE Standard for Software Quality Assurance Plans, is incorporated by reference by RUS. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from IEEE Service Center, 445 Hoes Lane, P. O. Box 1331, Piscataway, NJ 08854, telephone (201) 981–0060. Copies may be inspected during normal business hours at RUS, room 2838-S, U.S. Department of Agriculture, Washington, DC 20250 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(10) RUS Bulletin 345–50, PE-60, RUS Specification for Trunk Carrier Systems, September 1979, is incorporated by reference by RUS. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552 (a) and 1 CFR part 51. Copies may be obtained from the Rural Utilities Service, Administrative Services Division, room 0175-S, Washington, DC 20250. The bulletin may be inspected at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(11) RUS Bulletin 345–55, PE-61, Central Office Loop Extenders and Loop Extender Voice Frequency Repeater Combinations, December 1973, is incorporated by reference by RUS. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552 (a) and 1 CFR part 51. Copies may be obtained from the Rural Utilities Service, Administrative Services Division, room 0175-S, Washington, DC 20250. The bulletin may be inspected at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(12) RUS Bulletin 345–87, PE-87, RUS Specification for Terminating (TIP) Cable, December 1983, is incorporated by reference RUS. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552 (a) and 1 CFR part 51. Copies may be obtained from the Rural Utilities Service, Ad-

ministrative Services Division, room 0175-S, Washington, DC 20250. The bulletin may be inspected at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(b) *Reliability.* (1) Quality control and burn-in procedures shall be sufficient so the failure rate of printed circuit boards does not exceed an average of 1.0 percent per month of all equipped cards in the central office during the first three months after cutover, and an average of 0.5 percent per month of all equipped cards in the central office during any 6-month period thereafter. A failure is considered to be the failure of a component on the PC board which requires it to be repaired or replaced.

(2) The central office switching system shall be designed such that the expected individual line downtime does not exceed 30 minutes per year. This is the interval that the customer is out of service as a result of all failure types, excluding dispatch and travel time, i.e., hardware, software, and procedural errors.

(3) The central office switching system shall be designed such that there will be no more than 1 hour of total outages in 20 years, excluding dispatch and travel time for unattended offices.

(c) *System type acceptance tests.* (1) System type acceptance tests (general acceptance tests) are performed for the purpose of determining whether or not a type of switching system should be added or retained as an RUS accepted system. While general acceptance tests will be required on each system type, they will not be expected to cover every requirement in this section. However, any installation of a system provided in accordance with this section shall be capable of meeting any requirement in this section on a spot-check basis.

(2) A “completed call” test shall be made part of these system type acceptance tests. There shall be no more than two in 10,000 locally originating and incoming calls misdirected, unsuccessfully terminated, prematurely disconnected or otherwise failing as a result of equipment malfunction and/or equipment failures, or as a result of transients, noise or design deficiencies. This test shall be made with a load box with no less than 10 lines access and 10

subscriber numbers for completion, or equivalent, with no other traffic in the system. If there is a failure in the equipment during this test, the cause shall be repaired and the test restarted at zero calls.

(3) System type acceptance testing applies basically to factory type testing, and not to owner acceptance testing for individual installations. The overall installed and operating system shall also meet these requirements, except for unusual circumstances or where specifically excluded by this or other RUS requirements.

(d) *Types of requirements.* (1) Unless otherwise indicated, the requirements listed in this section are fixed requirements.

(2) Optional requirements are those which may not be needed for every office and are identifiable by a phrase such as, "when specified by the owner," or, "as specified by the owner."

(3) In some cases where an optional feature specified in paragraph (e) of this section will not be required by an owner, either now or in the future, a system which does not provide this feature will be considered to be in compliance with this section for the specific installation under consideration, but not in compliance with the entire section.

(4) The owner may request bids from any RUS accepted supplier whose system provides all the features which will be required for a specific installation.

(5) The Application Guide, RUS TE&CM 322, provides information about the economic and service factors involved in all optional features, as well as instructions for the completion of appendices A and B of this section.

(e) *General requirements.* (1) The equipment shall provide for terminating and automatically interconnecting subscriber lines and trunks in response to dial pulses (or pushbutton dialing signals, if specified) without the aid of an operator.

(2) Complete flexibility shall be provided for assigning any subscriber directory number to any central office line equipment by the use of internal programmed memory. Thus, any subscriber line and/or directory number

may be moved to another terminal to distribute traffic loads, if the line equipment hardware is compatible with the service provided.

(3) The system shall be arranged to interface with interexchange carrier trunks and networks using single digit or multi-digit access codes. The system shall be equipped to handle at least 20-digit subscriber dialed numbers. All subscriber directory numbers in the office shall be seven-digit numbers.

(4) The network and the control equipment shall be comprised of solid-state and integrated circuitry components. Peripheral equipment shall be comprised of solid-state and integrated circuitry components as far as practical and consistent with the state-of-the-art and economics of the subject system.

(5) The basic switching system shall include the provision of software programming and necessary hardware, including memory, for optional custom calling services such as call waiting, call forwarding, three-way calling, and abbreviated dialing. It shall be possible to provide these services to any individual line (single-party) subscriber. The addition of these services shall not reduce the anticipated ultimate engineered line, trunk, and traffic capacity of the switching system as specified in appendix A of this section.

(6) The requirements in this specification apply only to single party lines. Although only single frequency ringing is required, other types may be requested in appendix A of this section.

(7) Provision shall be made for local automatic message accounting (LAMA), and for traffic service position system (TSPS) trunks, or equivalent, to the operator's office when required either initially or in the future.

(8) Tandem switching features shall be provided if specified in appendix A of this section.

(9) The system shall be arranged to serve a minimum of eight All Number Calling (ANC) office codes per office, with discrimination on terminating calls by trunk group, numbering plan, or programmed memory and class mark, if specified in appendix A of this section.

(10) Busy hour load handling capacity is an important feature when an office

approaches capacity. The delays which may occur in call completion during busy hour periods may prove to be excessive in some system designs. Accordingly, each bidder shall provide, in appendix C of this section, data satisfactory to RUS regarding the busy hour load handling capacity and traffic delays of the system.

(11) Provision shall be made for hotel-motel arrangements, as required by the owner, to permit the operation of message registers at the subscriber's premises to record local outdial calls by guests (see Item 10.5, appendix A of this section).

(12) Provision shall be made to identify the calling line or incoming trunk on nuisance calls (see paragraph (g)(10) of this section for details).

(13) Full access from every subscriber line to every interoffice trunk shall be provided.

(14) Facilities shall be provided to implement service orders, make traffic studies, and perform switching and transmission tests by means of remote control devices if such operations are specified in Items 11.2 and 11.3 of appendix A of this section.

(15) Provision shall be made for the addition of facilities to record all subscriber originated calls based on dialed directory number, time of day, and duration of conversation. They shall be such that the additional equipment (if any is required) may be added to an in-service system without interruption of service and a minimum of equipment, wiring and software modifications.

(16) The system shall be capable of distributed switching operation where groups of subscriber lines can be remotely located from the central office. The remotely situated units are known as "Remote Switching Terminals" (RST's) (see paragraph (w) of this section). This does not eliminate the use of pair gain devices such as direct digitally connected concentrators, regular concentrators or subscriber carrier equipment, where specifically ordered by the owner and its engineer.

(17) The switching system shall have means to synchronize its clock with switches above it in the network hierarchy, when specified by the owner in item 3, appendix A of this section (see paragraph (j) of this section).

(18) Consistent with system arrangements and ease of maintenance, space shall be provided on the floor plan for an orderly layout of future equipment bays that will be required for anticipated traffic when the office reaches its ultimate size. Readily accessible terminals shall be provided for connection to interbay and frame cables to future bays. All cables, interbay and intrabay (excluding power), if technically feasible, shall be terminated at both ends by use of connectors.

(19) When specified in appendix A of this section, the system shall be capable of processing emergency calls to a 911 service bureau connected either by a group of one-way 911 lines or a trunk group.

(i) It shall be possible to reach the service bureau by dialing 911, 1+911, or a 7-digit number.

(ii) The system shall select an idle 911 line or trunk.

(iii) The system shall provide usual ringing and ringback signal until the called 911 line answers.

(iv) If the calling line goes on-hook first, the system shall hold the connection from the called 911 line and return steady low tone to the service bureau. The system shall then begin a 45-minute timeout, after which the calling line is disconnected and an alarm message is printed on a TTY. If the calling line goes off-hook before timeout, the system shall reestablish the conversation path.

(v) If the calling line does not disconnect, the service bureau attendant shall have the ability to force a disconnect of the established connection with the calling party.

(vi) When the 911 call is answered, the equipment shall be arranged so that coin lines are not charged for the call. Similarly, if some form of local call charging is used, there shall be no charge for the 911 call.

(vii) If the 911 service bureau is holding a calling line, it shall be possible for the 911 line to cause the equipment to ring back the calling line. This is done by providing a flash of on-hook signal from the 911 line lasting from 200 to 1,100 milliseconds. The signal to the calling line shall be ringing current if the line is on-hook, or receiver off-hook (ROH) tone if the line is off-hook.

Rural Utilities Service, USDA

§1755.522

(viii) Calls shall not be originated from the service bureau via the dedicated 911 lines. If an attempt is made to originate a call, it shall receive reorder tone. After 6 minutes, the system shall print an alarm message.

(ix) If 911 calls pass through intermediate switching, the forced-hold control, emergency ringback, and calling line status monitoring capabilities are lost.

(f) *Line circuit requirements*—(1) *General*. (i) The range of direct current (dc) resistances of subscriber loops, measured from the main frame in the central office and including the telephone set shall be at least 0–1900 ohms without loop extension and 1900–3600 ohms with loop extenders, or equivalent. The range when using extension equipment may be significantly reduced for straight line ringers. These limits apply under maximum adverse environmental and manufacturing variation tolerance conditions. Central office voltage shall be stabilized at a value necessary to provide at least a nominal 21 milliamperes current with a nontreated loop of at least 1900 ohms. Minimum loop insulation resistance without loop extenders shall be 25,000 ohms between conductors or from either conductor or both conductors in parallel to ground. Loop insulation resistance for loop extension devices may be 100,000 ohms minimum between conductors or from either conductor or both conductors in parallel to ground.

(ii) In addition to operating on non-loaded cable pairs and subscriber carrier, the equipment shall function properly with D-66 and H-88 loaded cable pairs, including any provisions the equipment must control for the purposes of proper transmission.

(2) *Dialing*—(i) *Subscriber dial speed*. The line equipment and central office equipment (COE) in tandem shall operate satisfactorily when used with subscriber dials having a speed of operation between eight and twelve impulses per second and a break period of 55 to 65 percent of the total impulse period.

(ii) *Subscriber dial interdigital time*. The line equipment and central office equipment shall operate satisfactorily with subscriber rotary dial interdigital times of 200 milliseconds minimum,

and with pushbutton dialing interdigital times of 50 milliseconds minimum.

(iii) *Subscriber line pushbutton dialing frequencies*. (A) The frequency pairs assigned for pushbutton dialing shall be as follows, with an allowable variation of ± 1.5 percent:

Low Group Frequencies (Hz)	High Group Frequencies (Hz)			
	1209	1336	1477	1633
697	1	2	3	Spare
770	4	5	6	Spare
852	7	8	9	Spare
941	*	0	#	Spare

(B) The receiver shall comply with the operating parameters of the dual-tone multifrequency (DTMF) central office receiver as described in section 6 of Bell Communications Research (Bellcore) document SR-TSV-002275, BOC Notes on the LEC Networks—1990.

(3) *Impedance*. For the purpose of this section, the input impedance of all subscriber loops served by the equipment is arbitrarily considered to be 900 ohms at voice frequencies.

(4) *Lockout*. (i) All line circuits shall be arranged for line lockout. When a permanent condition occurs prior to placing a line into lockout, a timed low level warning followed by a timed high level receiver off-hook (ROH) tone (see paragraph (i)(2)(xi) of this section) or a howler circuit (see paragraph (o)(2)(iii)(C) of this section) shall be applied to the line.

(ii) The line on lockout shall be reconnected automatically to the central office when the permanent off-hook condition is cleared.

(5) *Pay stations*. Pay stations may be prepay, or semi-postpay, as specified by the owner.

(6) *Loop extension*. (i) The number of lines which exceed 1900 ohms will be specified by the owner. When requested by the owner, the bidder shall furnish equipment to guarantee satisfactory operation of all lines.

(ii) Working limits for subscriber lines with loop extenders are covered in RUS Bulletin 345–55, PE-61, Central Office Loop Extenders and Loop Extender Voice Frequency Repeater Combinations.

(iii) Ringing from RUS accepted loop extenders, or their equivalent, shall be cut off from the called line when the

handset at the called station is removed during the ringing or the silent interval.

(7) *Private branch exchange (PBX) lines.* PBX trunk hunting shall be available. It will not be necessary to segregate PBX lines to certain line groups.

(8) *Quantity.* A sufficient number of terminations shall be provided, in addition to the quantity specified by the owner for subscriber line service, to meet the requirements of the system for equipment testing, alarm checking, tone transfer, loop around test and other features.

(9) *Types.* There shall be provisions for types of lines such as ground start, loop start, regular subscriber, pay stations, etc.

(g) *Intraoffice switching requirements.* (1) The switching system shall:

(i) Provide dial tone in response to origination of a call by a subscriber, except on special lines where the application of dial tone is not applicable, such as manual and hot lines;

(ii) Remove dial tone immediately after the first digit has been dialed;

(iii) Recognize the class of service of the calling subscriber;

(iv) Register the digits dialed by the calling subscriber where the rotary dial or pushbutton dialing characteristics and the minimum interdigital times are as specified;

(v) Perform the necessary translation functions when the required number of digits have been registered, and select a channel to a proper outgoing trunk, if one is available, to the designated interexchange carrier;

(vi) Provide a transmission path from the calling subscriber line to the selected trunk, if an idle one is found;

(vii) Provide for more than one alternate route to the desired destination when specified by the owner, select an idle outgoing trunk in the first or second choice alternate route trunk group, if all trunks in the higher choice groups are busy, and provide a reorder signal (see paragraph (i)(2)(iv) of this section) to the subscriber if no trunks are available in the last choice alternate route;

(viii) Translate the proper part of the registered incoming routing data on tandem calls into an identification of

an outgoing trunk group, select an idle trunk in that group, initiate the connection of the incoming trunk to the outgoing trunk, set the trunks in the proper configuration for tandem operation, and transmit information as required to permit completion to the desired destination in the distant office;

(ix) Transmit the proper stored information over the selected trunk to permit completion of outgoing calls to the desired destination by the distant office or offices, and provide multifrequency (MF) outpulsing when specified;

(x) Register all the digital information on calls incoming from a distant office, when dial or MF pulsing characteristics and interdigital times are as specified;

(xi) Translate internally a registered directory number into line equipment location, ringing code and terminating class (such as “PBX hunting”) on incoming or intraoffice calls;

(xii) Test the called line for a busy condition;

(xiii) Connect the incoming trunk or locally originated call to the called line if the called line is idle;

(xiv) Permit any type of ringing voltage available in the central office to be associated with any Subscriber Directory Number (SDN), cause the proper type of ringing voltage to be connected to the called line, and remove ringing from the line upon answer whether in the ringing or silent period; and

(xv) Test and monitor the switching system continually during periods of low traffic using the maintenance and diagnostic subsystem.

(2) The switching system shall offer at least the following originating and terminating class-of-service indications on a per-line basis to subscribers, as specified by the owner:

(i) Flat rate individual line, bridged ringing;

(ii) Flat rate PBX and trunk hunting numbers, bridged ringing;

(iii) Pay station;

(iv) Message rate subscriber line;

(v) Wide Area Telephone Service (WATS);

(vi) Extended Area Service (EAS);

(vii) Data service;

(viii) Hotel-Motel capability;

(ix) Denied originating;

(x) Denied terminating;

- (xi) Custom calling features;
- (xii) Special interexchange carrier accesses; and
- (xiii) Presubscription to designated interexchange carrier.

(3) The switching system shall provide PBX hunting.

(i) At least one trunk hunting group in each 100 SDN's equipped shall be provided. More may be provided as specified by the owner.

(ii) PBX groups shall be of a reasonable size commensurate with the ultimate size of the switching system.

(iii) Any available SDN may be used for PBX trunk hunting.

(iv) Each PBX group shall have the capability of being assigned one or more nonhunting SDN's for night service.

(v) If the called line is a PBX hunting line, the switching system shall test all assigned lines in the hunting group for a busy condition.

(vi) If the called PBX group is busy, line busy tone, as specified in paragraph (i)(2)(iii) of this section, shall be returned to the originating end of the connection.

(4) The switching system shall provide pay stations which may be prepay or semi-postpay. The system shall be arranged so that an operator and emergency service (911) may be reached from prepay or semi-postpay coin lines without the use of a coin, when the proper pay station equipment is provided.

(5) To meet dialing requirements, the switching system shall:

(i) Initiate the line lockout function after a delay, as specified in paragraph (r)(3) of this section, if dial or pushbutton dialing pulses are not received after initiation of a call, preferably routing the subscriber line to a holding circuit for tones and then automatically to lockout;

(ii) Connect 120 interruptions per minute (IPM) paths busy tone, recorded message, or other distinctive tone to the calling subscriber if an interval longer than that specified in paragraph (r)(4) of this section elapses between dialed digits;

(iii) Register the standard tone calling signals received from a subscriber station arranged for pushbutton dialing if specified by the owner, provide

arrangements to function properly with 12-button pushbutton dialing sets, and return a reorder signal to the subscriber upon receipt of signal from the 11th or 12th buttons if neither of these buttons is assigned functions; and

(iv) Connect the incoming trunk to the digit register equipment within 120 milliseconds after seizure where direct dialing is received on calls from a distant office, cancel the bid for a register, and return reorder tone to the calling end if dial pulses are received before a register is attached.

(6) The switching system shall provide for appropriate circuit usage.

(i) To avoid inefficient utilization of the switching network, that portion of the common equipment that establishes the connection on intramachine calls shall not require more than 500 milliseconds, exclusive of ringing and ring trip, to complete its function under no-delay conditions.

(ii) The switching system shall provide for duplication in a load sharing or redundant configuration any circuit elements or components, the failure of which would reduce the grade of service of 100 or more lines by more than 25 percent of the traffic carrying capacity.

(iii) The switching system shall ensure that failure of access to a high choice circuit will not prevent subsequent calls from being served by lower choice circuits, wherever possible.

(iv) Where only two circuits of a type are provided, circuits shall be designed so that failure of one circuit will not permanently block any portion of the system for the duration of the failure.

(v) Where more than two circuits of a type are provided, successive usages should be on a rotational or random basis rather than the step-up selection with the possible exception of a last choice trunk.

(vi) The system shall be designed so that, in the event of a network failure, the system shall immediately or simultaneously use a redundant portion of the network to complete the call.

(7) The switching system shall provide busy verification facilities with the method of access specified by the owner.

§ 1755.522

(i) Only an operator or a switchman shall be able to override a busy line condition.

(ii) If the called line is busy, off-hook supervision shall be given the operator or switchman.

(iii) The responsibility of restricting subscribers in distant offices from having access to busy verification shall be on the distant office personnel when the toll trunks are used for both toll connecting and verification traffic.

(iv) When a verification code is used, all digits of the code must be dialed before cut-through to the called line can be accomplished.

(8) The switching system shall provide intercept facilities.

(i) All unused numbering plan area codes, home numbering plan area office codes, service codes and subscriber directory numbers (SDN's) shall be routed to intercept. All intercept administration shall be by changes in memory administrable by telephone company personnel. Maximum machine time to place a subscriber on intercept shall be 15 seconds.

(ii) Unequipped SDN's intercept shall be effective if the processor memory does not have information concerning the SDN in question.

(iii) The intercept equipment shall be arranged so that specific SDN's can be routed to a separate intercept circuit for changed numbers.

(iv) When an intercept call is answered, either by an operator or by a recorded announcement, an off-hook or charge supervision signal shall not be returned, even momentarily, to the originating end.

(v) When intercepting service is to be handled over the regular interoffice toll trunks, a distinctive identifying tone shall be transmitted when the operator answers. This tone shall be of the frequency and duration specified in paragraph (i)(2)(x) of this section.

(9) The switching system shall provide nuisance call trap facilities which, when activated, provide a permanent record of the calling and called numbers complete with date and time of day. Where the call originates over an interoffice trunk, the actual trunk number shall be recorded. There shall be provision for the called subscriber to hold the connection and for the posi-

7 CFR Ch. XVII (1-1-97 Edition)

tive trace of the call from origination to termination within the office.

(10) The switching system shall follow appropriate release procedures.

(i) The office shall be arranged so a connection to a terminating channel other than assistance operator shall be released under control of the calling party so that the channel can be re-seized, unless the call is to emergency 911 service or other termination arranged for called party control.

(ii) If the called party disconnects first, the channel used in the originally established connection shall be held until the calling party disconnects or until the timing interval specified in paragraph (r)(7) of this section has elapsed. This feature shall not interfere with the normal operation of calls to intercept, fire alarm, or other special services.

(11) The switching system shall provide line load control facilities, when specified by the owner, to give preference for originating service to a limited group of subscribers during emergencies.

(i) These facilities may be activated manually by input-output (I/O) device or automatically after a manual setting of a key (or equivalent) to put line load control into effect, as determined by the bidder. The automatic procedure is preferable.

(ii) Procedures shall be established to avoid the unauthorized use of the line load control facilities.

(iii) Where automatic activation is provided, service may be provided to small groups of nonemergency subscribers on limited grade of service whenever the office load becomes low enough to permit this to be done safely.

(h) *Interoffice trunk circuit requirements*—(1) *General.* (i) The bidder shall supply, as requested by the owner, solid-state technology type trunk and signaling circuits of any of the types described in RUS TE&CM 319, Interoffice Trunking and Signaling, or, with the approval of RUS, any other more recent and desirable types not as yet covered in the manual. For dc signaling, the duplex (DX) and loop types of signaling are preferred.

(ii) Trunks shall not be directly driven from the subscriber's dial on outward calls.

(iii) In order to reduce the spares inventory and minimize incidence of improper maintenance replacement of circuit assemblies, the types of trunk circuits shall be kept to a minimum. Variation in assemblies should be mainly limited to variation in signaling modes.

(iv) Trunk circuits which connect with carrier or 4-wire transmission facilities shall be arranged for 4-wire transmission to avoid an intermediate 2-wire interface between a 4-wire switching system and trunk facilities.

(2) *Quantity.* Trunk quantities shall be as specified in appendix A of this section. Sufficient space shall be provided for an orderly layout of trunks. Trunks of a certain type going to the same destination may be grouped together on the original installation.

(3) *Requirements for interoffice connections.* (i) When operator trunks are used in common for both coin and noncoin lines, they shall be arranged to provide an indication to the operator by means of a visual signal or tone when calls are from pay stations. When a tone is used, it shall be of the type specified in paragraph (i)(2)(v) of this section and shall be connected to be heard only by the operator upon answer. It shall be possible to repeat the tone signal.

(ii) There are no requirements for trunks arranged for manual re-ring by a toll operator, either with the receiver on or off the hook, except to coin stations with the receiver on the hook.

(iii) On calls from subscribers to the assistance operator, the release of the connection shall be under control of the last party to disconnect. An exception is operator control of disconnect that is used on outgoing trunks to a TSP/TSPS system.

(iv) On calls originated by an operator, the release of the connection shall be under control of the operator.

(v) Where trunks with E and M lead signaling are used, the trunk circuits for Type I signaling shall be arranged to place ground on the M lead during the on-hook condition and battery on the M lead in the off-hook condition. For E and M Type II, only a make contact between the MA and MB lead will

be required. In either type, current limiting shall be provided in the E lead of the trunk circuit itself, as required for proper operation. It shall be assumed that connection equipment in the form of trunk carrier, multiplex, or associated signaling apparatus furnishes only a contact closure to ground (Type I) or to a signal ground lead (Type II) for an off-hook condition on the E lead.

(vi) Where answer supervision is used to determine the initiation of the charging interval for a call, such answer supervision shall not be effective for charging until after the elapse of the timing interval listed in paragraph (r)(5) of this section.

(vii) When necessary, provision shall be made for reception of start and stop dial signals on toll trunk equipment.

(viii) When trunks arranged for automatic message accounting (AMA), toll ticketing, or centralized automatic message accounting (CAMA) are specified by the owner, these trunks shall provide the pertinent features described in paragraph (k) of this section applicable to such functions.

(4) *Requirements for direct digital connections.* (i) Interface units which will permit direct digital connection to other digital switches, channel banks and remote line and/or trunk circuits over digital facilities shall be provided when specified by the owner. The digital transmission system shall be compatible with T1 type span lines using a DS1 interface and other digital interfaces that may be specified by the owner. The RUS specification for the span line equipment is Bulletin 345-50, PE-60, RUS Specification for Trunk Carrier Systems.

(ii) Each interface circuit shall connect 24 voice channels to the switching system from a 1.544 megabit per second DS1 bit stream. The DS1 bit stream entering or exiting the system shall be in the D3 format and the voice signals shall be encoded in 8 bit mu-255 PCM. The format and processing of the bit stream must be compatible with characteristics of the D3 channel bank such as alarm and maintenance characteristics. Loss of receive signal (DS1) shall be detected and the equivalent of a carrier group alarm shall be executed in

2.5 ± 0.5 seconds. Loss of synchronization shall be detected by slips, timing jitter, and wander in accordance with industry standards.

(iii) Signaling shall be by means of MF or dial pulse (DP) and the system which is inherent in the A and B bits of the D3 format. In the case where they are not used for signaling, the A and B bits shall be used only for normal voice and data transmission.

(i) *Tone requirements*—(1) *General*. Tones shall be provided to indicate the progress of a call through the office. Tone generators should be an integral part of the switching systems. The tones should be introduced digitally by the application of the appropriate bit stream to the line or trunk circuit via the digital switching network. The necessary precautions shall be made to ensure tone sources automatically if the primary sources fail.

(2) *Tone specifications*. (i) Dial tone shall consist of 350 Hz plus 440 Hz at a composite level of -10 dBm0 which equates to -13 dBm0 per frequency. This is the precise tone suitable for use with pushbutton dialing.

(ii) Low tone shall consist of 480 Hz plus 620 Hz at a composite level of -21 dBm0 which equates to -24 dBm0 per frequency.

(iii) Line busy tone shall be low tone interrupted at 60 IPM, with tone on 0.5 seconds and off 0.5 seconds.

(iv) Reorder, all paths busy, and no circuit tone shall be low tone interrupted at 120 IPM, with tone on 0.25 seconds and off 0.25 seconds.

(v) Identifying tone on calls from coin lines shall be uninterrupted low tone.

(vi) High tone shall consist of 480 Hz at -17 dBm0.

(vii) Audible ringback tone shall consist of 440 plus 480 Hz at a composite level of -16 dBm0 which equates to -19 dBm0 per frequency.

(viii) The call progress tones listed in this section are described in Bellcore document SR-TSV-002275, BOC Notes on the LEC Networks—1990, section 6. The 350, 440, 480, and 620 Hz tones shall be held at ± 0.5 percent frequency tolerance and ± 3 dB amplitude variation. The amplitude levels specified are to be measured at the main distributing frame, excluding cable loss.

(ix) Distinctive tone, when required for alarm calls, or other features, shall consist of high tone interrupted at 200 IPM with tone on 150 ms and off 150 ms.

(x) Identifying tone on intercepted calls shall consist of uninterrupted high tone impressed on the trunk circuit 300 to 600 milliseconds following the operator's answer of intercepted calls.

(xi) An ROH circuit shall have output tones which do not interfere with the pushbutton or multifrequency signaling tones. The ROH tone may be introduced digitally internal to the system near the overload level of +3 dBm0. No power adjustment will be required. The frequency of the output shall be distinctive and urgent in order to attract the subscriber's attention to an off-hook situation. (Warning: In order to determine the signal level, a frequency selective voltmeter must be used to determine the level of each signal component and mathematical power addition used to combine these measurements into a single level value.)

(xii) During application of tones, office longitudinal balance shall be maintained within 15 dB of that specified in paragraph (q)(8) of this section.

(j) *System clock*. (1) The central office clock and network synchronization system shall have the ability to be synchronized with external clocks for network synchronization, including detection of slips, timing, jitter and wander, in a digital-to-digital environment or operate initially in an independent network (refer to Bellcore document SR-TSV-002275, BOC Notes on the LEC Networks—1990, section 11).

(2) The end office central office system clock shall be a Stratum 3 clock with:

(i) A minimum long-term accuracy of $\pm 4.6 \times 10^{-6}$ (± 7 Hz @ 1.544 MHz);

(ii) A minimum stability of 3.7×10^{-7} day upon loss of all frequency references; and

(iii) A "Pull-In Range" for the capability of synchronizing to a clock with accuracy of $\pm 4.6 \times 10^{-6}$.

(3) The access tandem central office system clock shall be a Stratum 2 clock with:

(i) A minimum long-term accuracy of $\pm 1.6 \times 10^{-8}$ (± 0.025 Hz @ 1.544 MHz);

(ii) A minimum stability of 1×10^{-10} /day upon loss of all frequency references; and

(iii) A "Pull-In Range" for the capability of synchronization to a clock with accuracy of $\pm 1.6 \times 10^{-8}$.

(k) *Switched access service arrangements*—(1) *General*. The equipment shall be capable of providing Feature Group A, Feature Group B, Feature Group C, and Feature Group D switched access service arrangements, as described in Bellcore document SR-TSV-002275, BOC Notes on the LEC Networks—1990, section 6 and section 15, including arrangements for automatic number identification (ANI).

(2) *Operation*. (i) All equipment shall be arranged for Feature Group A (Line Side Connection).

(ii) All equipment shall be arranged for Feature Group B given that appendix A of this section requires the equipment of the necessary trunks (Trunk Side Connection).

(iii) The equipment shall be arranged for Feature Group C on the trunk groups specified in appendix A of this section. Even though appendix A of this section specifies Feature Group D or some other trunk group, it shall be possible through software commands available to the owner to use Feature Group C signaling protocols on a trunk group basis until such time that the trunk group in question converts to Feature Group D signaling protocols.

(iv) The equipment shall be arranged for Feature Group D on the trunk groups specified in appendix A of this section.

(v) Calls originating from coin lines toward switched access service shall be arranged either to provide signaling protocols for TSPS, or in the absence of TSPS-type service, such calls shall be blocked.

(vi) The equipment shall be arranged for forwarding routing information, calling party identification, and called party numbers in the proper feature group protocols, by trunk group as specified in appendix A of this section.

(vii) The equipment shall be arranged for AMA data collection as specified in appendix A of this section by trunk group. Unless otherwise specified by the owner, the equipment shall be arranged to collect the billing data in the

Bellcore AMA format as described in Bellcore document TR-TSY-000508, Automatic Message Accounting.

(viii) If specified in Item 9.4, appendix A of this section, the equipment shall be arranged to store the billing data in a pollable system. If specified in Item 9.5, appendix A of this section, equipment shall be furnished to poll the pollable systems associated with the contract.

(l) *Fusing and protection requirements*—(1) *General*. (i) The equipment shall be completely wired and equipped with fuses, trouble signals, and arranged for printout of fault conditions, with all associated equipment for the wired capacity of the frames or cabinets provided.

(ii) Design precautions shall be taken to prevent the possibility of equipment damage arising from the insertion of an electronic package into the wrong connector, the removal of a package from any connector, or the improper insertion of the correct card in its connector.

(2) *Fuses*. Fuses and circuit breakers shall be of an alarm and indicator type, except where the fuses or breaker location is indicated on the alarm printout. Their rating shall be designated by numerals or color code on the fuse panel, where feasible.

(3) *Components*. (i) Insofar as possible, all components shall be capable of being continuously energized at rated voltage without injurious results. Insofar as possible, design precautions shall be taken to prevent damage to other equipment and components when a particular component fails.

(ii) Printed circuit boards or similar equipment employing electronic components shall be self-protecting against external grounds applied to the connector terminals, where feasible. Board components and coatings applied to finished products shall be of such material or treated so they will not support combustion.

(iii) Every precaution shall be taken to protect electrostatically sensitive components from damage during handling. This shall include written instructions and recommendations (see Item 6.1,h of appendix C of this section).

(m) *Switching network requirements—*
(1) *The network.* (i) All networks shall be comprised of solid-state components.

(ii) The switching network shall employ time division digital switching and be compatible for connection to D3 type PCM channel banks without conversion to analog.

(iii) Equipment shall be available as required to connect analog lines and trunks, analog or digital service circuits, digital carriers to RST's, D3 channel banks or other digital switching units.

(2) *Network quantity.* Where the number of stages in the switching network and their control varies with the capacity of the system, sufficient equipment and wiring shall be supplied initially in order that there will be no service interruptions when additions are made up to the ultimate capacity as specified in appendix A of this section. This does not imply the necessity of supplying empty cabinets unless this is the only way the necessary wiring can be accomplished.

(n) *Stored program control (SPC) equipment requirements.* (1) The system shall provide redundancy in call processing such that the failure of a call processing unit does not degrade the call processing capabilities of the switching system nor result in the loss of established calls.

(2) Programs shall be modular, flexible and structured. In the interest of more dependable and more easily read programs, it is desirable to use a language which is more person-oriented leaving the detailed machine-oriented problems to a compiler program. Quality assurance of all software programs shall be in accordance with IEEE Std 730–1989, IEEE Standard for Software Quality Assurance Plans, or equivalent.

(3) The office administration program shall have checks within it to prevent failure due to erroneous or inconsistent input data. It shall safeguard against the possibility of upsetting machine performance with improper instructions or information. In addition, modular structure shall allow the use of a variety of human-engineered service order formats. Service changes may be performed remotely if

so desired. Average machine time for service change shall be 15 seconds or less. Service changes shall not be registered in permanent memory until verified. The access to the service change shall not have access to generic program.

(4) The switching system shall be able to offer, by request, at least the following printouts of its routine stored data for administrative purposes:

(i) A list of all assigned directory numbers, in numerical order, with their assigned class of service and line terminal numbers;

(ii) A list of all directory numbers, in numerical order, associated with a class of service;

(iii) A list of all unassigned line terminals;

(iv) Traffic data in proper form for separation studies in accordance with the revenue separations procedures current at the time of the contract;

(v) All lines on lockout;

(vi) All lines assigned to intercept;

(vii) All available (unassigned) directory numbers in the working thousands group; and

(viii) A list of equipment busied out for maintenance.

(5) The printouts in paragraph (n)(4) of this section may be delayed to times of light traffic.

(6) Maintenance diagnostics shall be performed by a fault recognition system utilizing both software and hardware, each being used where they are most effective for maintenance and reliability. In the economic interests of providing early and efficient fault detection and accurate pinpointing of faulty areas, it is desirable to have a comprehensive person-machine interface supported by extensive automatic fault detection and analysis, involving diagnostic software for fault resolution and automatic recovery mechanisms to maintain continuous service. Maintenance messages may be channeled to a remote maintenance center if so desired.

(7) Information in memory, having no requirement for changes to be introduced in the maintenance or operation of the system, may be stored in memory devices such as programmable

Rural Utilities Service, USDA

§ 1755.522

read-only memory (PROM) or other devices that cannot be reprogrammed in the field.

(o) *Maintenance facilities*—(1) *Alarm features, including alarm sending.* (i) The equipment shall be arranged to provide audible and visual alarms indicating fuse operation or other circuit malfunctions resulting from component failure, crosses or open wiring, or any other conditions affecting service which can be detected economically.

(ii) The alarms shall be classified in accordance with their effect on the system.

(A) Catastrophic alarms demand immediate attention and require notification of the highest level of supervisory personnel. Conditions such as loss of service, loss of one or more remote line switches or line concentrators connected through Direct Digital Interface, loss of network control, and loss of computer program in all processors shall produce catastrophic alarms.

(B) Major alarms demand rapid action. Conditions such as loss of one or more groups of subscribers or trunk ports, blown fuses for common groups of channels, loss of control to groups of channels, failure of one or both redundant units, and total loss of battery charging current for more than 15 minutes shall produce major alarms.

(C) Minor alarms indicate non-emergency conditions which cause degraded service or fault conditions which causes the system to operate within less-than-optimum performance. Conditions discovered in automatic routing which have not shown in the operation of the equipment but require attention and cumulative line lockout (level adjustable) are examples of minor alarm conditions.

(iii) When the office is arranged for unattended operation, facilities shall be provided for extending the alarm indications to an attended point.

(iv) When the use of a separate outside plant facility for alarm sending is specified, the nature of the alarm may be indicated to the distant point by machine printout or other display device.

(v) When alarm sending is accomplished over a regular operator office trunk, the operator shall be apprised that the call is an alarm indication by

a distinctive tone, as specified by the owner in appendix A of this section. It shall be possible for the operator to determine at any time the presence of a trouble condition by dialing a number set aside for that purpose. This number shall also be accessible from lines classmarked for this feature.

(vi) When the alarm sending circuit seizes an interoffice operator trunk, the operator must dial the alarm checking code over another trunk before the first trunk can be released except where the alarm condition has disappeared first.

(vii) The alarm sending circuit shall have access to two or more trunks if the trunks are used for subscriber traffic.

(viii) An alarm indication of higher priority shall supersede an original alarm indication and reseize an interoffice operator trunk.

(ix) In any group of offices purchased under one contract, the same codes shall be used in each office for alarm checking and test.

(x) When the alarm checking number is dialed, the alarm indications received shall be as follows:

(A) Catastrophic alarm—No tone.

(B) Major alarm—Continuous busy tone 60 IPM, unless alarm is overridden.

(C) Minor alarm—Continuous 1-ring code ringback tone, unless alarm is overridden.

(D) No trouble—Continuous 2-ring code ringback tone, unless alarm is overridden.

(xi) Audible and visual local alarms and transmitted alarms shall be provided as follows:

Classification	Delay Interval	
	Local Alarms	Alarms Transmitted
Catastrophic	0	0
Major	0	0 ¹
Minor	0	0–30 Min.

¹Except no charge alarm delayed 15 minutes.

(xii) The central office alarm circuits shall be arranged to provide optional wiring to transmit either a minor alarm or a major alarm and a printout to accommodate various types of trunk and subscriber carrier systems, microwave, mobile radio, other transmission systems, and environmental protection

systems with different priorities when a set of contacts is closed in the equipment of such systems and the alarm checking code is dialed. The alarm relay shall be furnished by the supplier of the carrier multiplex and/or mobile radio equipment. The option or options shall be specified by the owner.

(2) *Trouble location and test.* (i) *Equipment.* (A) A maintenance center shall be provided with a fault recorder (printer and/or display) for troubles. Here, system and sub-system visual trouble indications are shown for maintenance aid.

(B) The fault recorder shall provide a permanent or semi-permanent record of the circuit elements involved whenever a trouble is encountered. It shall be arranged to recognize an existing fault condition and not cause multiple printouts of the same fault, except during test routine.

(ii) *Maintenance system.* (A) The maintenance system shall monitor and maintain the system operation without interruption of call processing, except for major failures.

(B) The maintenance system shall provide both specialized maintenance hardware circuits and an extensive software package to enable maintenance to determine trouble to an individual card or functional group of cards.

(C) Maintenance programs may be both on-line and off-line. On-line maintenance programs are activated by system errors and shall be scheduled to execute call tests during low traffic periods and periodic hardware tests at specific time intervals. Programs shall provide diagnostic tools for the maintenance personnel and be initiated by them.

(D) Scheduled periodic hardware tests shall automatically detect faults and alert maintenance personnel via alarm or appropriate input/output device(s) at local and/or remote locations.

(E) Facilities shall be provided so that test calls can be set up using pre-selected items of switching equipment.

(F) The maintenance personnel shall be able to make tests to determine if every trunk and every item of switching equipment are functioning properly. Also, it shall be possible to make

each trunk and each SPC equipment, or part thereof, busy to service calls. Where possible, equipment which is made busy to service calls shall still be accessible for test calls.

(iii) *Outside plant and subscriber stations.* (A) A subscriber loop test set or equivalent shall be provided either as a separate set or as a part of the maintenance center, as specified in item 11.2 of appendix A of this section. This circuit shall include a high resistance volt-ohm meter, wiring to tip and ring terminals to permit a portable wheatstone bridge to be used, an operator's telephone circuit, a dial circuit (and pushbutton dialing keys, if specified), outgoing trunks to dial equipment for access to lines under test without use of the main distributing frame (MDF) test shoe and the necessary test keys. No dry cell batteries shall be accepted for test potentials. Circuits shall be designed so that alternating current (ac) induction on the line will have no effect on dc measurements. All functions shall be under control of lever or pushbutton keys. As a minimum the test system shall:

(1) Test for bridged foreign electromotive force (EMF);

(2) Test for regular line battery;

(3) Test for booster battery voltage and polarity using the test shoe;

(4) Test for open circuits, short, tip ground, and ring ground;

(5) Test for tip or ring negative potential;

(6) Test for capacitance of a subscriber's line;

(7) Supply talking battery to the line with and without booster battery;

(8) Ring the subscriber through the test access circuit or through a test shoe;

(9) Test in and out of the central office; and

(10) Supply a reverse polarity key for voltage readings, except when positive or negative values are displayed directly.

(B) An acceptable arrangement for making the tests shown in paragraph (o)(2)(iii)(A) of this section is to have them under software control with results displayed at one of the system's I/O ports.

(C) A howler circuit for maintenance purposes, if ordered by the owner, shall

have output tones which do not interfere with the pushbutton or multifrequency signaling tones. The harmonics of the output tones shall be attenuated at least 26 dB below the fundamental frequency for all load conditions. The frequency stability shall be 2 percent or less for all output tones when the unit is operated in the specified load and environmental range. It shall be possible to vary the output voltage (power) of the howler circuit. It shall remove tone and restore the line to service when the telephone instrument receiver is placed on-hook. The frequency of the output shall be chosen to be distinctive and urgent in order to attract the subscriber's attention to an off-hook situation.

(D) When a dial speed test facility is specified by the owner, it shall be accessed by dialing a special code and shall return to the calling station readily identifiable signals to indicate that the dial speed is slow, normal, or fast.

(E) When the office is arranged for pushbutton dialing, optional facilities shall be provided for testing the pushbutton dialing equipment at the subscriber station.

(F) When a system for testing subscriber lines in remote offices from a test position in a centrally located office is specified by the owner, it shall be capable of working with all the central offices and RST's in the remote areas. This testing equipment shall preferably be solid-state with a minimum of electromechanical devices and shall operate from central office battery. It shall be capable of working over any voice grade telephone circuit and shall not require a dedicated trunk. There shall be no interference to or from "in-band" voice channel tones. When used over a network, the verification or access shall be guarded to prevent unauthorized access by subscribers. Access to this system shall only be available to the test operator in all cases.

(3) *Transmission testing.* (i) When transmission test circuits are specified in Item 11.3 of appendix A of this section, they shall permit testing of trunks by a distant office without any assistance in the local dial office. Analog test ports shall meet appropriate trunk requirements. If Centralized

Automatic Reporting on Trunks (CAROT), or equivalent, is to be used, the equipment at the end office shall comply with Bellcore document SR-TSV-002275, BOC Notes on the LEC Networks—1990, section 8, Item 2.

(ii) Transmission test circuits are available with a variety of options. These include single frequency and multifrequency tone generators with one or more generator output terminals, quiet terminations, and loop around test arrangements for both one-way and two-way trunks.

(iii) Where multifrequency generators are used, they are usually arranged to provide a minimum of three frequencies. With some equipment, up to seven additional frequencies may be provided if needed. No industry standardization of test frequencies is as yet provided. Therefore, it is important that the selection of frequencies, the order in which they are applied and the time interval for application of each frequency be agreed upon by the connecting company and the RUS borrower and listed in appendix A of this section in those situations where connecting companies request the installation of multifrequency generators in borrowers' central offices.

(iv) The milliwatt generator shall be solid-state and generate the analog or digital equivalent of 1004 Hz. The milliwatt generator shall be assigned to a 4-wire analog test port or be digitally generated. All 2-wire and 4-wire voice frequency ports are at a nominal 0 dBm0 level. The level of the 1004 Hz tone generator shall appear at outgoing 2-wire and 4-wire ports at 0 dBm $\pm$ 0.5 dB. For direct digital connections, the encoded output shall be the digital equivalent of a 0 dBm0 $\pm$ 0.5 dB signal.

(v) Reference tone generators can be used individually or they can be part of a loop around test arrangement. If both single frequency and multifrequency reference tone generators are to be provided, only one can be arranged as part of a loop around test. Where a loop around arrangement is provided, the generator output can be obtained by dialing singly one of the two line terminals. By dialing the other line terminal singly, usually a 900 ohm resistor in series with a 2.16 microfarad capacitor is connected to the circuit under test to

act as a “quiet termination” for noise measurements and other tests. Whenever both line terminals are held simultaneously, both the milliwatt supply and the quiet termination shall be lifted off and a “loop around” condition established. This permits the overall loss to be determined from the distant office by going out over one trunk, looping around in the end office and returning over the other trunk. The insertion loss of this test arrangement when used in a loop around configuration should not exceed 0.1 dB at the frequencies specified for the milliwatt supply. Unless otherwise specified, continuous off-hook supervision is to be provided on both line terminals to prevent collusive calling without charge. It will be permissible to accomplish the quiet termination by opening the 4-wire path internally and to accomplish the loop around by digital switching.

(vi) Provision shall be made so that the milliwatt supply can be manually patched to circuits.

(vii) Test jack access shall be provided for all interoffice trunks of the voice frequency type. The jack access shall be properly designated for line, drop, monitor, and signaling leads plus any other jacks as requested by the owner. This may be accomplished by a set of jacks located at the maintenance center which have access to each trunk on a switching basis.

(p) *Traffic—(1) General engineering guidelines.* (i) The Traffic Table, based on the Erlang Lost-Calls-Cleared Formula, shall be used for determining the quantity of intraoffice paths, registers, and senders where full availability conditions apply. The following table shows the traffic capacity in CCS for 1 to 200 trunks at nine grades of service.

(ii) The traffic capacity for all inter-office trunks shall be based on full availability, even though the distant office itself is not engineered to provide full availability access.

(iii) The Traffic Table may also be used to determine the approximate traffic capacity of high-usage intertoll trunks. The traffic offered to high-usage groups may be read at B.10, signifying that 10 percent of the traffic overflows to the alternate route. This approximates the HU12 table used by AT&T.

(iv) In reading the trunk quantity from the table, the higher quantity shall be used when the CCS load is three or more CCS over the lower quantity. For example, the number of trunks justified for 294 CCS at B.005 is 16, but for 295 CCS 17 trunks are justified.

(v) Limited availability is not permitted.

(vi) The traffic capacity in the following table should be used for small trunk groups such as pay station, spe-

cial service trunks, intercept, and PBX trunks, unless otherwise specified in appendix A of this section:

Number of Circuits	Permissible CCS
1	10
2	20
3	30
4	40

(vii) The percentage of lines equipped for pushbutton dialing is to be used to determine the number of tone receivers. Local registers, if required, shall be supplied on the basis of all dial pulse.

(2) *Grade of service.* (i) Grade of service specifies the expected performance when there are adequate service facilities for an assumed volume of traffic. It is expressed as a portion of the total traffic during a busy hour that cannot be terminated immediately or within a predetermined time period due to congestion. This places responsibility on the traffic engineers to specify facilities which will be entirely satisfactory to the users and which can be equipped

Rural Utilities Service, USDA

§ 1755.522

at a price which will be accepted as reasonable.

(ii) The number of calls encountering dial tone delay in excess of 3 seconds, measured over the busy hour of the four high-consecutive week (4HW) period, shall not be more than 1.5 percent.

(iii) The average post dialing delay objective for an intraoffice call shall not exceed 1 second. This includes all connect, operate, and translation time.

(iv) The line to line (intraoffice) network matching loss objective shall be 0.02 or less.

(v) The blocking probabilities related to trunks include both "mismatch" probability and probability of "all trunks busy." It is likely that the "mismatch" will be negligible in that many digital central offices have essentially nonblocking switching characteristics. The objectives for trunk connections are as follows:

(A) Subscriber to outgoing trunk objective 0.01 or less;

(B) Incoming trunk to subscriber objective 0.02 or less; and

(C) Local trunk tandem objective 0.01 or less.

(vi) Groups of common service circuits are to be engineered utilizing the full availability traffic tables that appear in paragraph (p)(1)(i) of this section at the following stipulated probabilities:

(A) Outgoing trunks to 2/6 MF or dial pulse senders at B.001;

(B) Incoming trunks to 2/6 MF receivers at B.001;

(C) Incoming nondelay dial trunks to receivers at B.001; and

(D) Incoming trunks with start dial at B.01.

(vii) Remote Switching Terminals (RST's) shall meet the same grade of service objectives as the host.

(3) *Holding times.* For the purpose of estimating the quantity of common control circuits, the following average holding times may be used. These holding times are conservative and represent the average effective and ineffective call. If these holding times are to be used, it must be so stated in appendix A of this section.

(i) The following average call holding times (HT) may be used.

Type of Call	HT—Seconds
Intraoffice	120
EAS	150
Special Service, Intercept, Verification	60
Toll, CLR	300
Toll, S-S	24
Toll, PPCS	270

(ii) The following average subscriber dialing holding times may be used (times used to dial digits do not include machine time).

	Digits Dialed	DP Sec.	Push-button Sec.
Operator, Non-Pay Station	1	4.7	3.4
Special Service	3	7.7	5.0
Local	7	13.7	8.2
EAS	7	13.7	8.2
DDD: 1/0+7	8	15.2	9.0
DDD: 1/0+10	11	19.7	11.4
Dialing Time Per Digit	-	1.5	0.8
Dial Tone Response	-	3.2	2.6

(iii) The following average incoming register holding times may be used (times for digit registrations do not include machine time).

	Basic		Additional Per Digit
	Holding Time (Sec.)	Digits	
MF Receiver from:			
No. 5 Crossbar—Non-LAMA	1.4	4	0.14
No. 5 Crossbar—LAMA	2.3	4	0.14
Crossbar Tandem & 4A Toll	3.1	4	0.14
No. 1 ESS	1.4	4	0.14
Key Pulsing Switchboard	5.2	4	0.60
DP Receivers—10 PPS from:

DP Senders—10 PPS:			
With Overlap Pulsing ²	9.1	Up to 6	1.8

§ 1755.522

7 CFR Ch. XVII (1–1–97 Edition)

	Basic		Additional Per Digit
	Hold-ing Time (Sec.)	Digits	
Without Overlap Pulsing	4.6	4	1.2

¹Add 1.3 seconds for ANI outpulsing on special toll (0+) calls and on DDD calls if AMA is not provided.

²Assumes overlap outpulsing starting on receiving of third digit; applies only to calls handled on direct trunk groups.

(4) *Traffic data requirements.* (i) Traffic measurements are composed of primarily two types—counts and usage. The following types of traffic data recording are required:

(A) *Peg count* registers shall be incremented when a successful network connection is established to a particular circuit group such as trunks, senders, digital receivers, etc.

(B) *Overflow count* registers shall be incremented when access to a particular circuit group is denied due to all resource busy condition.

(C) *Network blockage count* registers shall be incremented due to an unavailability of a path in an access or switching matrix network.

(D) *Usage* measurements of the length of time associated with a particular setup event or network connection shall be made. Usage data measurements are normally collected by scanning circuit groups resources every 10 or 100 seconds to determine busy/idle states. Measurements are accumulated and read directly in CCS (hundred call seconds).

(E) *Service delay* measurements shall provide percentage counts of the calls for a particular service that are delayed beyond a specified interval of time, e.g., calls not receiving dial tone within 3 seconds after call origination.

(ii) Traffic data shall be stored in electronic storage registers or block of memory consisting of one or more traffic counters for each item to be measured. The registers listed in paragraph (p)(4)(i) of this section shall be associated with the interoffice trunks, switching network and central control equipment in such a manner that the register readings can be used to determine the traffic load and flow to, from and within the system. Two-way trunks shall be metered to indicate inward and outward seizures. The bidder

shall indicate what registers are to be supplied and their purpose.

(iii) The measured data shall be shown on a printout. It should be possible to have local or remote printout, or both. Arrangement shall be made for automatic data printout on command for 15-, 30-, or 60-minute intervals as required, and be arranged for automatic start-stop and in accordance with revenue separation procedures current at the time of contract.

(iv) All traffic records shall have dates and times and office identification.

(q) *Transmission*—(1) *General.* The transmission characteristics will be governed by the fact that the switching matrix will be based on digital operation. Unless otherwise stated, the requirements are in terms of analog measurements made from Main Distributing Frame (MDF) to MDF terminals, excluding cabling loss.

(2) *Impedance.* For the purpose of this section, the nominal input impedance of analog ports in an end office shall be 900 ohms for 2-wire ports and 600 ohms for 4-wire ports. Where the connecting facility or equipment is other than this impedance, suitable impedance matching shall be provided by the bidder when specified by the owner.

(3) *Insertion loss.* The insertion loss in both directions of transmission at 1004 Hz shall meet the following requirements when measured with a 0 dBm input signal at 900 ohms (or 600 ohms, when required) at a temperature of 77°F ± 9°F (25°C ± 5°C).

(i) *Trunk-to-trunk or trunk-to-line.* The loss shall be set between 0 and 0.5 dB for 2-wire to 2-wire, 2-wire to 4-wire, or 4-wire to 4-wire voice frequency connections.

(ii) *Line-to-line.* The loss shall be set between 0 and 2 dB.

(iii) *Direct digital interface.* On a direct digital interface, the loss through the office shall be adjusted to the proper level in the receive side.

(iv) *Stability.* The long-term allowable variation in loss through the office shall be ± 0.5 dB from the loss specified by the bidder.

(4) *Frequency response (loss relative to 1004 hz)* shall meet the following requirements.

(i) *Trunk-to-trunk.*

Rural Utilities Service, USDA

§ 1755.522

Frequency (Hz)	Loss at 0 dBm0 Input ¹	
	2-Wire to 2-Wire	4-Wire to 4-Wire
60	20 dB Min. ²	16 dB Min. ²
200	0 to 5 dB	0 to 3 dB
300–3000	–0.5 dB to 1 dB	–0.3 to +0.3 dB
3300	1.5 dB Max.	1.5 dB Max.
3400	0 to 3 dB	0 to 3 dB

¹(–) means less loss and (+) means more loss.

²Transmit End

(ii) Line-to-line.

Frequency (Hz)	Loss at 0 dBm0 Input ¹
60	20 dB Min. ²
300	–1 to +3 dB
600–2400	±1 dB
3200	–1 to +3 dB

¹(–) means less loss and (+) means more loss.

²Transmit End

(iii) *Trunk-to-line*. The trunk-to-line frequency response requirements shall be a compromise between those values specified in paragraphs (q)(4)(i) and (q)(4)(ii) of this section.

(5) *Overload level*. The overload level at 900 ohm impedance shall be +3 dBm0.

(6) *Gain tracking (linearity)* shall meet the following requirements.

Input Signal Level ¹	Maximum Gain Deviation
+3 to –37 dBm0	±0.5 dB
–37 to –50 dBm0	±1 dB

¹1004 Hz reference at 0 dBm0.

(7) *Return loss*. (i) The specified return loss values are determined by the service and type of port at the measuring (near) end. Two-wire ports are measured (near end) at 900 ohms in series with 2.16 microfarads and 4-wire ports are measured at 600 ohms resistive.

(ii) Far end test terminations shall be as follows:

(A) Loaded line circuit—1650 ohms in parallel with the series combination of .005 microfarads and 100 ohms;

(B) Nonloaded line circuit—800 ohms in parallel with the series combination of .05 microfarads and 100 ohms;

(C) Special service line circuit including electronic lines and carrier lines—900 ohms in series with 2.16 microfarads;

(D) Two-wire trunk—900 ohms in series with 2.16 microfarads; and

(E) Four-wire trunk—600 ohms.

(iii) For trunk-to-trunk (2-wire or 4-wire) connections the echo return loss (ERL) shall be 27 dB, minimum and the singing return loss (SRL) shall be 20 dB, minimum low and 23 dB, minimum high.

(iv) For trunk-to-line (2-wire or 4-wire) connections the ERL shall be 24 dB, minimum and the SRL shall be 17 dB, minimum low and 20 dB, minimum high.

(v) For line-to-line or line-to-trunk (2-wire or 4-wire) connections the ERL shall be 18 dB, minimum and the SRL shall be 12 dB, minimum low and 15 dB, minimum high.

(8) *Longitudinal balance*. The minimum longitudinal balance, with dc loop currents of 20 to 70 mA, shall be 60 dB at all frequencies between 60 and 2000 Hz, 55 dB at 2700 Hz and 50 dB at 3400 Hz. The method of measurement shall be as specified in the IEEE Std 455–1985, IEEE Standard Test Procedure for Measuring Longitudinal Balance of Telephone Equipment Operating in the Voice Band. Source voltage level shall be 10 volts root-mean-square (rms).

(9) *60 hz longitudinal current immunity*. Under test conditions with 60 Hz, the system noise shall be no greater than 23 dBmC0 as measured using the configuration in Figure 1.

FIGURE 1—MEASURING THE EFFECTS OF LOW FREQUENCY INDUCTION

NOTES:

1. 900 ohm termination, C-message weighting, hold coil off
2. SNC Noise Choke 35 W, or equivalent
3. Test at 0.020 Adc and 0.070 Adc
4. 2 ± 0.001 microfarad, 150 Vdc

(10) *Steady noise* (idle channel at 900 ohms impedance) measured on a terminated call shall be 23 dBrnC0 maximum and average 18 dBrnC0 or less. The 3K Hz Flat noise should be less than 35 dBrnC0 as an objective.

(11) *Impulse noise*. The central office switching equipment shall be capable of meeting an impulse noise limit of not more than five counts exceeding 54 dBrnC0 voice band weighted in a 5-minute period on six such measurements made during the busy hour. A Northeast Electronics Company TTS 4002 Impulse Noise Counter, Wilcom T194C, Hewlett Packard 4945, or equivalent, should be used for the measurements. The measurement shall be made by establishing a normal connection from the noise counter through the switching equipment in its off-hook condition to a quiet termination of 900

ohms impedance. Office battery and signaling circuit wiring shall be suitably segregated from voice and carrier circuit wiring, and frame talking battery filters provided, if and as required, in order to meet these impulse noise limits.

(12) *Crosstalk coupling*. Worst case equal level crosstalk is to be 75 dB minimum in the range 200–3400 Hz. This is to be measured between any two paths through the system connecting a 0 dBm0 level tone to the disturbing pair.

(13) *Quantizing distortion*. (i) The switching system shall meet the following requirements.

Input Level (dBm0) 1004 or 1020 Hz	Minimum Signal to Distortion with C-Message Weighting
0 to -30	33 dB
-30 to -40	27 dB
-40 to -45	22 dB

(ii) Due to the possible loss of the least significant bit on direct digital connections, a signal to distortion degradation of up to 2 dB may be allowed where adequately justified by the bidder.

Rural Utilities Service, USDA**§ 1755.522**

(14) *Absolute delay.* The absolute one-way delay through the switching system, excluding delays associated with RST switching, shall not exceed 1000 microseconds analog-to-analog measured at 1800 Hz.

(15) *Envelope delay distortion.* On any properly established connection, the envelope delay distortion shall not exceed the following limits.

Frequency Range (Hz)	Microseconds
1000 to 2600	190
800 to 2800	350
600 to 3000	500
400 to 3200	700

(16) *Digital error rate.* The digital switching system shall not introduce an error into digital connections which is worse than one error in 10^8 bits averaged over a 5-minute period.

(17) *Battery noise.* Noise across battery at power board distribution bus terminals shall not exceed 35 dBrnC during the busy hour.

(18) *Radio and television interference.* The central office switching equipment shall be designed and installed so that radiation of high frequency noise will be limited so as not to interfere with radio and television receivers.

(r) *Timing intervals*—(1) *Type of equipment required.* The equipment for providing the specified timing intervals shall be solid-state.

(2) *Tolerance.* Where a range of time is specified as minimum and maximum, the lower limits shall be considered as controlling and the variation between this minimum and the actual maximum shall be kept as small as practicable. In no case shall the quoted upper limit be exceeded.

(3) *Permanent signal timing.* Lockout shall occur after an interval of 20 to 30 seconds after receipt of dial tone if a “permanent” condition occurs prior to the transmission of dial pulses or push-button dialing signals. This interval may be reduced appreciably during periods of heavy traffic.

(4) *Partial dial timing.* Partial dial timing shall be within 15 to 37 seconds. This timing may be reduced appreciably during periods of heavy traffic.

(5) *Charge delay timing.* Charge delay timing shall be within 2 seconds.

(6) *Called party disconnect timing.* Timed disconnect of a terminating path under control of the called party shall be 10 to 32 seconds.

(7) *Timing intervals for signals involved in distance dialing.* Timing intervals shall be provided to meet the requirements for distance dialing equipment, which have been established in Bellcore document SR-TSV-002275, BOC Notes on the LEC Networks—1990. Some of the more important times which this document specifies are for:

- (i) Disconnect signal;
- (ii) Wink signal;
- (iii) Start dialing signal;
- (iv) Pulse delay signal;
- (v) Go signal;
- (vi) Digit timing; and
- (vii) Sender, register, and link attachment timing.

(s) *Power requirements and equipment*—(1) *Operating voltage.* The nominal operating voltage of the central office shall be 48 volts dc, provided by a battery with the positive side tied to system ground.

(2) *Batteries.* (i) When battery cells of the lead antimony type are specified, the pasted plate type shall be considered adequate.

(ii) When lead calcium cells are specified, no cell shall differ from the average voltage of the string of fully charged cells by more than ± 0.03 volt when measured at a charging rate in amperes equivalent to 10 percent of the ampere hour capacity of the cells. Similarly, when cells are fully charged and floating between 2.30 and 2.33 volts per cell, the cell voltage of any cell in a given string shall not differ more than ± 0.03 volt from the average. These requirements are for test purposes only and do not apply to operating conditions.

(iii) Voltage readings shall be corrected by a temperature coefficient of 0.0033 volt per degree F (0.006 per degree C), whenever temperature variations exist between cells in a given string. This correction factor shall also be applied when comparing cell voltages taken at different times and at different temperatures. The correction factor shall be added to the measured voltage when the temperature is above 77°F (25°C) and subtracted when the temperature is below 77°F (25°C).

§ 1755.522

7 CFR Ch. XVII (1–1–97 Edition)

(iv) The specific gravity readings of lead antimony cells at full charge shall be $1.210 \pm .010$ at 77°F (25°C) at maximum electrolyte height.

(v) When counter cells are supplied by the bidder, they shall be the dry counter electromotive force (CEMF) type.

(vi) When lead antimony batteries are specified, they shall be designed to last a minimum of 10 years when maintained on a full float operation between 2.15 and 2.17 volts per cell. When lead calcium batteries are specified, they shall be designed to last a minimum of 20 years when maintained on full float operation between 2.17 and 2.25 volts per cell. The battery shall be clearly designated as “antimony” or “calcium” by means of stencils, decals or other devices.

(vii) Each battery cell shall be equipped with an explosion control device.

(viii) The battery size shall be calculated in accordance with standard procedures. The battery in no case shall have a reserve capacity in ampere hours less than four times the current capacity of the largest charger.

(3) *Charging equipment.* (i) Charging shall be on a full float basis. The rec-

tifiers shall be of the full wave, self-regulating, constant voltage, solid-state type and shall be capable of being turned on and off manually.

(ii) When charging batteries, the voltage at the battery terminals shall be adjustable and shall be set at the value recommended for the particular battery being charged, providing it is not above the maximum operating voltage of the switching system equipment. The voltage shall not vary more than plus or minus 0.02 volt per cell between 10 percent load and 100 percent load. Between 3 percent and 10 percent load, the output voltage shall not vary more than plus or minus 0.04 volt per cell. Beyond full load current, the output voltage shall drop sharply. The output voltage shall be maintained with the line voltage variations of plus or minus 10 percent. Provision shall be made to change the output voltage of the rectifier manually to 2.25 volts per cell to provide an equalization charge on the battery.

(iii) The charger noise shall not exceed 22 dBrnC when measured with a suitable noise measuring set and under the rated battery capacitance and load conditions as determined in Figure 2.

FIGURE 2—CHARGER NOISE TEST

The manufacturer may elect to eliminate the capacitor C from the measurement.

A. Capacitance in μF = 30,000 μF per ampere-hour per cell. For example, 25 cells at 100 ampere-hour would be equivalent to a capacitance of:

$$(30,000 \times 100)/25 = 120,000 \mu\text{F}$$

B. The value of the resistive load R is determined by the nominal battery voltage in volts divided by the full load rating in amperes. For example, for a 48 volt battery and a full load current of 24 amperes, the load resistance R is $48/24 = 2$ ohms of appropriate power handling capacity.

(iv) The charging equipment shall indicate a failure of charging current, whether due to ac power failure, an internal failure in the charger, or to other circumstances which might cause the output voltage of the charger to drop below the battery voltage. Where a supplementary constant current charger is used, an alarm shall be provided to indicate a failure of the charger.

(v) Audible noise developed by the charging equipment shall be kept to a minimum. Acoustic noise resulting from operation of the rectifier shall be expressed in terms of dB indicated on a sound level meter conforming to ANSI S1.4-1983, Specification for Sound Level Meters, and shall not exceed 65 dB (A-weighting) measured at any point 5 feet (152.4 cm) from any vertical surface of the rectifier.

(vi) The charging equipment shall be designed so that neither the charger nor the central office switching equipment is subject to damage in case the battery circuit is opened for any value of load within the normal limits.

(vii) The charging equipment shall have a capacity to meet the requirements of central office size and special requirements of the owner in appendix A of this section.

(viii) Minimum equipment requirement for chargers is one of the following:

(A) Two chargers either capable of carrying the full office load as specified in Item 12 of appendix A of this section; or

(B) Three chargers each capable of carrying half the office load as specified in Item 12 of appendix A of this section.

(4) *Miscellaneous voltage supplies.* (i) Any power supply required for voltages other than the primary battery voltage shall be provided by either a solid-state dc-to-dc converter or dc-to-ac inverter, operating from the central office battery or from a separate battery and charger. These power supplies shall meet the noise limit specified for chargers in paragraph (s)(3)(iii) of this section, except the capacitor “C” shall be eliminated and the resistive load “R” shall be determined by the nominal output voltage in volts divided by the full load current rating in amperes. This requirement does not preclude the use of commercial ac power to operate input/output devices.

(ii) Power converters required for the purpose of providing various operating voltages to printed circuit boards or similar equipment employing electronic components shall be provided in duplicate with each unit capable of immediately assuming the full operating load upon failure of a unit. An exception to the duplicate power converter requirement permits nonduplicated power converter(s) to be utilized where there is full compliance with the following criteria.

(A) The failure of any single nonduplicated power converter shall not reduce the grade of service of common control and service circuits to any individual line or trunk by more than 50 percent.

(B) The failure of any single nonduplicated power converter shall not reduce the traffic carrying capacity of any interoffice trunk group by more than 50 percent.

(C) In central office switching systems of 400 or more equipped lines, any single nonduplicated power converter failure shall not cause a complete loss of service to more than 100 equipped lines.

(D) In central office switching systems of less than 400 equipped lines, any single nonduplicated power con-

verter failure shall not cause a complete loss of service to more than 25 percent of the total equipped lines.

(5) *Ringling generators.* Ringling generators supplied on an ancillary basis shall be selected from RUS Bulletin 1755I-100, List of Materials Acceptable for Use on Telephone Systems of RUS Borrowers. Regardless of whether the ringling is generated on an ancillary basis or is generated integrally to the switching system, the ringling equipment shall meet the requirements of this section.

(i) *Ringling equipment provisioning.* (A) Redundant ringling equipment shall be provided. There shall be automatic transfer to the redundant equipment within the period of one ringling cycle, in case of failure of the equipment in use (either regular or standby). Automatic transfer shall not take place under any other conditions. Manual transfer in each direction shall be provided.

(B) An exception to the redundant ringling equipment requirement permits nonredundant ringling equipment to be utilized where there is full compliance with the following service criteria.

(1) In a central office switching system of 400 or more equipped lines, a single nonduplicated ringling source failure shall not cause the complete loss of ringling capability to more than 100 lines.

(2) In a central office switching system of less than 400 equipped lines, a single nonredundant ringling source failure shall not cause the complete loss of ringling capability to more than 25 percent of the total equipped lines.

(ii) *Output voltage.* (A) The ringling generators shall have an output voltage which approximates a sine wave and, as a minimum, shall be suitable for ringling straight-line ringers. Although not a requirement for RUS listing, decimonic, synchromonic, or harmonic ringling may also be specified in appendix A of this section.

(B) The ringling generator shall obtain its energy from the nominal 48-volt office battery.

(C) The output of each generator shall have three or more voltage taps or a single tap with associated variable control. Taps or control shall be easily

accessible as installed in the field. Software control of ringing generator outputs via I/O devices may be provided in lieu of taps. The taps, or equivalent, shall be designated L, M, and H. The variable control shall have a locking device to prevent accidental readjustment. The outputs at the terminals of the generators with a voltage input of 52.1 volts and rated full resistive load shall be as follows for the ringing frequencies provided:

Frequency Range (Hz)	Output Volts rms (Tolerance 3 Volts)		
	L	M	H
16 2/3 through 20	90	105	120
21 through 30	95	110	120
31 through 42	100	115	130
43 through 54	110	125	140

(D) No voltages in excess of the values in column H of the table in paragraph (s)(5)(ii)(C) of this section shall be provided at the output taps. Additional intermediate and/or lower taps may be provided without restriction.

(iii) *Voltage regulation.* (A) The output voltage for resistive, capacitive power factor of 0.8, and inductive power factor of 0.5 loads from no load to full rated output with 52.1 volts input battery shall not vary more than ± 3 percent from the output voltage measured at 1/2 rated output, 1.0 power factor with 52.1 volts dc input applied.

(B) The output voltage for resistive, capacitive power factor of 0.8, and inductive power factor of 0.5 loads from no load to full rated output with input battery variations between 48–56 volts dc shall not vary more than ± 10 percent from the output voltage measured at 1/2 rated output and 1.0 power factor with 52.1 volts dc input applied.

(C) The output voltage for resistive, capacitive power factor of 0.8, and inductive power factor of 0.5 loads from no load to full rated output and with input battery variations between 44–56 volts dc shall not vary more than ± 10 –15 percent from the output voltage measured at 1/2 rated output and 1.0 power factor with 52.1 volts dc input applied.

(iv) *Cross ringing.* Unwanted voltage caused by harmonic distortion or intermodulation distortion shall not exceed 15 volts rms when measured within ± 5 Hz of any other assigned ringing fre-

quency under any condition of load or input battery specified by paragraph (s)(5)(iii) of this section.

(v) *Frequency stability.* At ambient temperature of $70^{\circ} \pm 5^{\circ}\text{F}$ ($21^{\circ} \pm 0.3^{\circ}\text{C}$), for any combination of capacitive power factor of 0.8, inductive power factor of 0.5, and resistive loads with variations in input battery ranging from 44 to 56 volts, the output frequency shall not vary more than $\pm 1/3$ Hz or ± 1 percent, whichever is less stringent. At temperatures between 15°F (4°C) to 130°F (54°C), and for any combination of resistive load and variations in input battery ranging from 44–56 volts, the output frequency shall not vary more than $\pm 1/3$ Hz or ± 1 percent, whichever is less stringent.

(vi) *Self-protection on overloads.* The ringing generator equipment shall be capable of withstanding a short circuit across any pair of output terminals for a period of 5 minutes without fuse operation or damage.

(6) *Interrupter equipment.* (i) The interrupter shall be an integral part of the switching system and shall be controlled by any call processor or equivalent.

(ii) The ringing cycle provided by the interrupter equipment shall not exceed 6 seconds in length. The ringing period shall be 2 seconds.

(7) *Power panels.* (i) Battery and charger control switches, dc voltmeters, dc ammeters, fuses and circuit breakers, supervisory and timer circuits shall be provided as required. Voltmeters shall be provided as specified by the owner.

(ii) Portable or panel mounted frequency meters shall be provided as specified by the owner unless the system is equipped to measure actual ringing generator voltage and frequency outputs internally. If the system is equipped to make such measurements and print the results, the bidder is not required to provide a frequency meter.

(iii) Power panels, cabinets and shelves, and associated wiring shall be designed initially to handle the exchange when it reaches its ultimate capacity as specified by the owner.

(iv) The power panel shall be of the “dead front” type.

(t) *Main distributing frames.* (1) The main distributing frame shall provide terminals for terminating all incoming cable pairs. Arresters shall be provided for all incoming cable pairs, or for a smaller number of pairs if specified, provided an acceptable means of temporarily grounding all terminated pairs which are not equipped with arresters is furnished.

(2) The current carrying capacity of each arrester and its associated mounting shall coordinate with a #22 gauge copper conductor without causing a self-sustaining fire or permanently damaging other arrester positions. Where all cable pairs entering the central office are #24 gauge or finer, the arresters and mountings need only coordinate with #24 gauge cable conductors. Item 13 of appendix A of this section designates the gauge of the cable conductors serving the host office. Item 7 of appendix B of this section designates the gauge of the cable conductors serving the RST(s).

(3) Central office protectors shall be mounted and arranged so that outside cable pairs may be terminated on the left side of protectors (when facing the vertical side of the MDF) or on the back surface of the protectors. Means for easy identification of pairs shall be provided.

(4) Protectors shall have a “dead front” (either insulated or grounded) whereby live metal parts are not readily accessible.

(5) Protectors shall be provided with an accessible terminal of each incoming conductor which is suitable for the attachment of a temporary test lead. They shall also be constructed so that auxiliary test fixtures may be applied to open and test the subscriber’s circuit in either direction. Terminals shall be tinned or plated and shall be suitable for wire wrapped, insulation displacement or connectorized connections.

(6) If specified in appendix A of this section, each protector group shall be furnished with a factory assembled tip cable for splicing to the entrance cable; the tip cable to be 20 feet (610 cm) in length unless otherwise specified. Factory assembled tip cable shall be #22 gauge and selected from RUS Bulletin 1755I-100, List of Materials Acceptable

for Use on Telephone Systems of RUS Borrowers. Tip cable requirements are provided in RUS Bulletin 345-87, PE-87, RUS Specification for Terminating (TIP) Cable. Cables having other kinds of insulation and jackets which have equivalent resistance to fire and which produce less smoke and toxic fumes may be used if specifically approved by RUS.

(7) Protectors shall be mounted on vertical supports, with centers not exceeding 9 inches (22.9 cm). The space between protector units shall be adequate for terminating conductors.

(8) Cable supporting framework shall be provided between the cable entrance and the MDF when overhead cable entrance is specified in Item 14.3.3 of appendix A of this section.

(9) The main distributing frame shall be equipped with a copper ground bus bar having the conductivity of a #6 American Wire Gauge (AWG) copper conductor or a greater conductivity, or may consist of another metal if specifically approved, provided it has adequate cross-sectional area to provide conductivity equivalent to, or better than, bare copper. A guardrail or equivalent shall also be furnished.

(10) Other features not specified in paragraph (t) of this section may be required at the option of the owner, if checked in Item 13.4 of appendix A of this section.

(11) Main frame protector makes and types shall be selected only from RUS Bulletin 1755I-100, List of Materials Acceptable for Use on Telephone Systems of RUS Borrowers. Protectors shall be capable of easy removal.

(u) *Electrical protection*—(1) *Surge protection.* (i) Adequate electrical protection of central office switching equipment shall be included in the design of the system. The characteristics and application of protection devices shall be such that they enable the central office switching equipment to withstand, without damage or excessive protector maintenance, the dielectric stresses and currents that are produced in line-to-ground and tip-to-ring circuits through the equipment as a result of induced or conducted lightning or power system fault-related surges. All wire terminals connected to outside

plant wire or cable pairs shall be protected from voltage and current surges.

(ii) Central office switching equipment shall pass laboratory tests, simulating the hostile electrical environment, before being placed in the field for the purpose of obtaining field experience.

There are five basic types of laboratory tests which shall be applied to exposed terminals in an effort to determine if the equipment will survive. Figure 3 summarizes these tests and the minimum acceptable levels of protection for equipment to pass them.

FIGURE 3—SUMMARY OF ELECTRICAL REQUIREMENTS AND TESTS

Test	Application Criteria	Peak Voltage or Current	Surge Waveshape	No. of Applications & Max. Time Between	Comments
Current Surge	Low Impedance Paths Exposed to Surges	500A or Lesser Current (See Fig. 5)	10x1000 μ s	5 each Polarity at 1 minute intervals	
60 Hz Current Carrying	High or Low Impedance paths Exposed to Surges	10A rms or Lesser Current (See Fig. 6)	11 Cycles of 60 Hz (0.183 Sec.)	3 each Polarity at 1 minute intervals	
AC Power Service Surge Voltage	AC Power Service Connection	2500V or +3 σ clamping V of arrester employed at 10kV/ μ s	1.2x50 μ s	5 each Polarity at 1 minute intervals	AC arrester, if used, must be removed. Communications line arresters, if used, remain in place.
Voltage Surge	High Impedance Paths Exposed to Surges	1000V or +3 σ dc breakdown of arrester employed	10x1000 μ s	Same	All primary arresters, if used, must be removed.
Arrester Response Delay	Paths protected by arresters, such as gas tubes, with breakdown dependent on V. rate of rise.	+3 σ breakdown of arrester employed at 100V/ μ s of rise	100V/ μ s rise decay to 1/2 V. in tube's delay time	Same	Same

(iii) *Two categories of surge tests.* (A) Current surge tests simulate the stress to which a relatively low impedance path may be subjected before main frame protectors break down. Paths with a 100 Hz impedance of 50 ohms or less shall be subjected to current surges, employing a 10×1000 microseconds waveshape as defined in Figure 4. For the purpose of determining this impedance, arresters which are mount-

ed within the equipment are to be considered zero impedance. The crest current shall not exceed 500A; however, depending on the impedance of the test specimen this value of current may be lower. The crest current through the sample, multiplied by the sample's 100 Hz impedance, shall not exceed 1000 volts (V). Where sample impedance is less than two ohms, crest current shall be limited to 500A as shown in Figure 5.

FIGURE 4—EXPLANATION OF SURGE WAVESHAPE

Surge Waveshape is defined as follows:
 Rise Time $\times$ Time to Decay to Half Crest
 Value
 (For example, $10 \times 1000 \mu\text{s}$)
 Notes:

T_1 = Time to determine the rate of rise.
 The rate of rise is determined as the
 slope between 10% and 90% of peak volt-
 age or current.
 T_2 = Time to 50% of peak voltage (decay to
 half value).

FIGURE 5—EXPLANATION OF SURGE WAVESHAPE

V_L = Not to exceed 1000V
 V_B = Charging Voltage
 Z_{100} = Test Specimen Impedance to be measured at 100 Hz.
 R_P = Parallel Resistance (Waveshape)
 R_S = Series Resistance (Current Limiting)

Z_{100}	R_S	R_P	V_B
0	5	∞	2500
1	4	∞	2500
2	3	∞	2500
3	2	∞	1670
4	1	∞	1250
5	0	∞	1000
7.5	0	15	1000
10	0	10	1000
15	0	7.5	1000
20	0	6.7	1000
25	0	6.25	1000
30	0	6	1000
40	0	5.7	1000
50	0	5.5	1000

(B) Sixty Hertz (60 Hz) current-carrying tests should be applied to simulate an ac power fault which is conducted to the unit over the cable pairs. The test should be limited to 10 amperes rms at 60 Hz for a period of 11 cycles (0.1835 seconds) and should be applied longitudinally from line to ground (see Figures 3 and 6 of this section).

FIGURE 6—60 HZ CURRENT SURGE TEST

V—700 Volts RMS (Approximately 1000V Peak).
Z₆₀—Test specimen impedance to be measured at 60 Hz.
R_S—Series Resistance (current limiting) in each side of line. (Source impedance never less than 50 Ω longitudinal.)

Z ₆₀ Hz	R _S
0	140
10	120
20	100
50	100
Over 50	100

(C) AC power service surge voltage tests should be applied to the power input terminals of ac powered devices to simulate switching surges or lightning-induced transients on the ac power system. The test shall employ a 1.2×50 microseconds waveshape with a crest voltage of 2500V. Communications line protectors may be left in place for this test. Borrowers are urged to install commercially available surge pro-

tectors at the ac service entrance as part of their COE building program.
(D) Voltage surge tests simulate the voltage stress to which a relatively high impedance path may be subjected before primary protectors break down and protect the circuit. To assure coordination with the primary protection while reducing testing to the minimum, voltage surge tests should be conducted at a 1000 volts with primary arresters removed for devices protected by carbon blocks, or the +3 sigma dc breakdown of other primary arresters. Surge waveshape should be 10×1000 microseconds.
(E) Arrester response delay tests are designed to stress the equipment in a manner similar to that caused by the delayed breakdown of gap type arresters when subjected to rapidly rising voltages. Arresters shall be removed for these tests, the peak surge voltage should be the +3 sigma breakdown of the arrester in question on a voltage rising at 100V per microsecond and the

time for the surge to decay to half time of the tube, as explained in Figure 7.
voltage shall equal at least the delay

FIGURE 7—EXPLANATION OF ARRESTER RESPONSE DELAY TIME

$$D = T_2 - T_1 = \text{Delay time of tube}$$

The delay time is that period of time when the potential across an arrester exceeds its dc firing level.

(iv) Five applications of each polarity for the surge tests and three for the 60 Hz Current Carrying Test are the minimum required. All tests should be conducted with not more than 1 minute between consecutive applications in each series of three or five to a specific configuration so that heating effects will be cumulative. As not all tests are required in every application, non-applicable tests should be omitted. Tests should be conducted in the following sequence.

- (A) Current Impulse Test.
- (B) Sixty Hertz (60 Hz) Current Carrying Test.
- (C) AC Power Service Impulse Voltage Test.
- (D) Voltage Impulse Test.

(E) Arrester Response Delay Test.

(v) Tests should be applied between each of the following terminal combinations for all line operating conditions.

- (A) Line tip to ring.
- (B) Line ring to ground.
- (C) Line tip to ground.
- (D) Line tip to ring tied together to ground.

(2) *Extraordinary surge protection.* A central office or RST may be located in an area where ground conditions prevent the reasonable economic achievement of a low resistance to ground and/or there exists a greater than average probability of surge damage. Such an unusually hostile operating environment shall be recognized and taken into consideration by the bidder in the engineering and specification of the central office switching system and

line protection. This subject of operating environment, ground conditions, etc., should be discussed at the time of technical presentation to assure the owner that adequate system protection will be provided by the bidder.

(3) *Dielectric strength.* Arresters shall be removed for all dielectric strength tests. The duration of all dielectric strength tests shall be at least 1 second. The applied potential shall equal or exceed the +3 sigma dc breakdown voltage of the arrester, provided by the COE manufacturer. Direct current potentials shall be applied between all line terminals and equipment chassis and between these terminals and grounded equipment housings in all instances where the circuitry is dc open circuit from the chassis, or connected to the chassis through a capacitor.

(4) *Insulation resistance.* Following the dielectric tests, the insulation resistance of the installed electrical circuits between wires and ground, with the normal equipment grounds removed, shall not be less than 10 megohms at 500 volts dc at approximately room temperature (68°F (20°C)) and at a relative humidity of approximately 50 percent. The measurement shall be made after the meter stabilizes, unless the requirement is met sooner. Arresters shall be removed for these tests.

(5) *Self-protection.* (i) All components shall be of the self-protecting type, capable of being continuously energized at rated voltage without injurious results.

(ii) The unit equipment shall not be permanently damaged by accidental short circuits of any duration across either the central office side tip and ring or the line side tip and ring. A test is to be made with the unit energized at the highest recommended voltages.

(6) *Static discharge.* Assemblies subject to damage by static discharge shall be identified and special handling instructions shall be supplied.

(v) *Miscellaneous—(1) Office wire.* All office wire shall be of soft annealed tinned copper wire meeting the requirements of ASTM Specification B 33–91, Standard Specification for Tinned Soft or Annealed Copper Wire for Electrical Purposes, and of suitable cross-section to provide safe current carrying capacity and mechanical

strength. The insulation of installed wire, connected to its equipment and frames, shall be capable of withstanding the same insulation resistance and dielectric strength requirements as given in paragraphs (u)(3) and (u)(4) of this section at a temperature of 120°F (49°C) and a relative humidity of 90 percent.

(2) *Wire wrapped terminals.* These terminals are preferred and where used shall be of a material suitable for wire wrapping. The connections to them shall be made with a wire wrapping tool with the following minimum number of successive nonoverlapping turns of bare tinned copper wire in contact with each terminal.

(i) 6 Turns of 30 Gauge.

(ii) 6 Turns of 26 Gauge.

(iii) 6 Turns of 24 Gauge.

(iv) 5 Turns of 22 Gauge.

(3) *Protection against corrosion.* All metal parts of equipment frames, distributing frames, cable supporting framework, and other exposed metal parts shall be constructed of corrosion resistant materials or materials plated or painted to render them adequately corrosion resistant.

(4) *Screws and bolts.* Screw threads for all threaded securing devices shall be of American National Standard form in accordance with Federal Standard H28, Screw-Thread Standards for Federal Services, unless exceptions are granted to the manufacturer of the switching equipment. All bolts, nuts, screws, and washers shall be of nickel-copper alloy, steel, brass or bronze.

(5) *Temperature and humidity range.* The supplier shall furnish the operating temperature and humidity ranges of the equipment being provided in order that adequate heating and cooling may be supplied (see Items 5.2.1 and 5.2.2 of appendix C of this section).

(6) *Stenciling.* Equipment units and terminal jacks shall be adequately designated and numbered. They shall be stenciled so that identification of equipment units and leads for testing or traffic analysis can be made without unnecessary reference to prints or descriptive literature.

(7) *Equipment frame design.* For newly designed systems, consideration should be given to the desirability of providing frames which can be installed in

rooms of normal ceiling height [up to 10 feet (305 cm)]. Where feasible, frames and equipment units shall be designed for ready portability and high salvage value.

(8) *Quantity of equipment bays.* Consistent with system arrangements and ease of maintenance, space shall be provided on the floor plan for an orderly layout of future equipment bays that will be required for anticipated traffic when the office reaches its ultimate size. Readily accessible terminals shall be provided for connection to interbay and frame cables to future bays. All cables, interbay and intrabay (excluding power), if technically feasible, shall be terminated at both ends by use of connectors.

(w) *Remote switching terminal (RST)*—
(1) *General.* The RST is a remotely located digital switching terminal which is placed at a subordinate wire center for subscriber lines and is a part of the host central office from a switching standpoint, and has hardware interchangeable with the host office, except for items that are applicable only to RST control and associated peripheral equipment. This does not preclude the use of existing in-service remote units on a new or upgraded host central office of the latest series generic or release.

(2) *Span line.* The RST is to be connected to the host central office via a means compatible with T1 type span lines using a DS-1 interface. This connection will be for control supervision and subscriber communication. The RUS equipment specification for a span line is PE-60.

(3) *Switching.* (i) The RST may have its switching functions controlled either by the host central office stored program control processors or by local subordinate processors which communicate with the host office processors.

(ii) As long as the connecting span line is intact, the subscribers served by the RST shall have all features, traffic capacity, and services including busy verification, available to all other subscribers in the system.

(iii) The RST shall have available an emergency call processing option which permits calling among all subscribers and from subscribers to emergency numbers within the RST if con-

trol link connections to the host central office are severed or otherwise disabled. The RST shall be capable of rerouting normally used emergency numbers, such as 911, to predetermined line terminations in this emergency stand-alone operating condition. This RST emergency call processing option shall be provided only when specified by the owner in Item 6.1 of appendix B of this section.

(4) *Subscriber line test.* (i) Means shall be available on an optional basis to the maintenance personnel to make subscriber line tests from a common location for all subscriber lines including the RST.

(ii) If tests in paragraph (w)(4)(i) of this section are not requested by the owner for a particular installation, a subscriber loop test set (see paragraph (o)(2)(iii)(A) of this section) shall be supplied at the RST with a means to access all lines.

(5) *Housing.* When housed in a building supplied by the owner, a complete floor plan including ceiling height, power outlets, cable entrances, equipment entry and travel, type of construction, and other pertinent dimensions shall be supplied with this section.

(6) *Power*—(i) *Chargers.* A single charger meeting the requirements of paragraph (s)(3) of this section (with the exception of paragraph (s)(3)(viii) of this section) is required. An additional charger capable of carrying the full load or a combination of three chargers each capable of carrying half the load shall be supplied if redundant chargers are specified in appendix B of this section.

(ii) *Ringling equipment provisioning.* (A) Ringing sources shall be supplied in duplicate.

(B) An exception to the duplicated ringing source requirement permits nonduplicated ringing source(s) to be utilized where there is full compliance with the following service criteria.

(1) In a remote switching terminal (RST) of 400 or more equipped lines, a single nonduplicated ringing source failure shall not cause the complete loss of ringing capability to more than 100 lines.

(2) In a remote switching terminal (RST) of less than 400 equipped lines, a

single nonredundant ringing source failure shall not cause the complete loss of ringing capability to more than 25 percent of the total equipped lines.

(iii) *Power converter.* (A) Power converters required for the purpose of providing various operating voltages to printed circuit boards or similar equipment employing electronic components shall be provided in duplicate with each unit capable of immediately assuming the full operating load upon failure of a unit.

(B) An exception to the duplicate power converter requirement permits nonduplicated power converter(s) to be utilized where there is full compliance with the following criteria.

(1) The failure of any single nonduplicated power converter shall not reduce the grade of service of common control and service circuits to any individual line or trunk by more than 50 percent.

(2) The failure of any single nonduplicated power converter shall not reduce the traffic carrying capacity of any trunk group or service links to a host office by more than 50 percent.

(3) In a remote switching terminal (RST) of 400 or more equipped lines, any single nonduplicated power converter failure shall not cause a complete loss of service to more than 100 equipped lines.

(4) In a remote switching terminal (RST) of less than 400 equipped lines, any single nonduplicated power converter failure shall not cause a complete loss of service to more than 25 percent of the total equipped lines.

(7) *Alarm.* Sufficient system alarm points shall be provided from the RST to report conditions to the host alarm system.

(x) *Responsibilities of the bidder—*(1) *Central office layout.* (i) The successful bidder shall furnish tentative floor plan layout drawings showing the arrangement of the equipment and the dimensions of major equipment units. These drawings shall include minimum door dimensions and ceiling heights required for installation, maintenance and ventilation. If requested by the owner, the floor plan shall be such that the battery, charger, power board, main distributing frame and wire chief's test equipment are isolated

from the other equipment by a partition.

(ii) The layout drawings shall also show provision for the ultimate capacity of the central office as specified by the owner.

(iii) After approval by the owner of the tentative floor plan, and within 10 calendar days after approval of the contract by the Administrator, the owner shall furnish the bidder the necessary data on the actual floor plan. Within 20 calendar days after receiving the necessary building data, the bidder shall then supply floor plan drawings showing exact locations of all equipment, both initial and ultimate, including points where connection to commercial power are required, with voltage and wattage indicated at each point. Within 20 calendar days after receiving the floor plan drawings from the bidder, the owner shall approve these drawings or take the necessary steps to have the drawings changed to meet his approval. The layout planning must be so coordinated between the owner and the bidder as not to delay the scheduled equipment installation date.

(2) *Shipment of main distributing frame (MDF).* The bidder shall ship the MDF equipment, with all necessary instructions to permit its installation by the owner, at the time requested by the owner in writing, provided such time is not earlier than 90 days prior to the date specified for the shipment of the rest of the central office equipment. If the owner or the owner's agent installs the main distributing frame, the owner shall assume the responsibility and the expense of proper installation according to information furnished by the bidder.

(3) *Drawings and printed material.* (i) The bidder shall supply instructional material for each exchange involved at the time of delivery of the equipment. It is not the intent of this section to require system documentation necessary for the repair of individual circuit boards. The bidder shall supply three complete sets of legible drawings, each set to include all of the following drawings and documentation:

Rural Utilities Service, USDA

§ 1755.522

(A) A floor plan showing exact dimensions and location of each equipment frame or item to a convenient scale;

(B) A block schematic drawing showing the various equipment components in the system, and their identifying circuit number (e.g., MDF, line circuits, memory, trunks, etc.);

(C) Drawings of major equipment items such as frames, with the location of major component items of equipment shown;

(D) Individual functional drawings for electrical circuits in the system;

(E) A detailed description of the operation of each circuit down to a circuit package level;

(F) Wiring diagrams indicating the specific method of wiring used on each item of equipment and interconnection wiring between items of equipment;

(G) Sufficient software documentation to maintain and service the system, including drawings showing principal aspects of the software architecture;

(H) Individual maintenance drawings covering each equipment item that contains replaceable parts, appropriately identifying each part by name and part number, or, complete ordering instructions for all replaceable parts if individual item drawings are not provided; and

(I) Job drawings including all drawings that are individual to the particular office involved, such as main frame, power panel, test board, etc.

(ii) The following information shall also be furnished:

(A) Complete index of the required drawings;

(B) Explanation of electrical principles of operation of the overall switching system;

(C) List of tests which can be performed with each piece of test equipment furnished, and explanation of the method of performing each test;

(D) Sample of each form recommended for use in keeping records of tests;

(E) Criteria for analyzing results of tests and determining appropriate corrective action;

(F) General notes on the methods of isolating equipment faults to specific printed circuit cards in the equipment;

(G) List of typical troubles which might be encountered, together with general indications as to the probable location of each trouble;

(H) Special office grounding requirements;

(I) A site specific central office ground system acceptance checklist that is consistent with industry practice; and

(J) A site specific layout of the master ground bar (MGB) showing assignment of P, A, N, and I equipment areas.

(4) *Distributing frame wire.* The bidder shall provide sufficient tinned copper conductor distributing frame wire for the initial installation. The insulation of this wire shall be such that it will not support combustion. The insulation shall have good abrasion resistance and cut-through properties, exhibit good solder heat resistance, and be suitable for wire wrap connections or insulation displacement connections.

(5) *Technical assistance service.* A technical assistance service shall be made available to assist the owner and its maintenance personnel on a 24-hour, 7 days a week basis. There is to be assistance available for both hardware and software problems. The necessary interface devices shall be supplied by the bidder.

(6) *Spare parts.* (i) The spare parts bid price shall be based upon the required quantities of spares shown in Item 6.2 of appendix C of this section, and shall be added to the base bid for comparison purposes in awarding the bid. It is the supplier's responsibility to provide all spares required by this section. If the supplier neglects to list certain spare parts in Item 6.2 of appendix C of this section, but they are necessary to comply with this section, they shall be provided by the supplier at no additional cost to the owner.

(A) "Units" are defined as user replaceable components used in the central office equipment. "Spare Parts" are direct replacements for units. Spare parts are necessary for the maintenance and diagnostic operations where the suspected faulty unit may be removed and a spare part substituted in anticipation that the trouble will be cleared.

(B) Examples of units for which spare parts should be furnished are printed circuit cards; circuit pack assemblies; fuses; and power supplies.

(C) Spare parts are not required as part of this addendum for items such as connectorized cables, nuts, bolts, and similar hardware; nor for items which can be obtained from sources other than the bidder such as battery cells, chargers, powerboards, magnetic tape transport assemblies, disk drives, ringing machines, recorded announcement machines, loop extenders and voice frequency repeaters, fire bars, teletype writers, and video monitors.

(D) When 100 or more like units are used in the hosts and RST's to be bid, the quantity of spares to be furnished is determined by multiplying the total number of like units in the contract by .05 or .03, as applicable, and rounding off to the next lowest integer. For example, 119 Class 1 units require five spares; 120 require six.

(E) When alternates are required, the price of the spare parts for the alternates shall be included with the price of the alternate.

(F) For equipment in which the line cards consist of a number of plug-in "daughter" boards on a "mother" board, the line card is defined as the "daughter" board unit. In a similar manner for those designs which have line cards backed up by a "control card," the "control card" is not, by definition, a line card.

(G) The quantities of spare parts determined in paragraph (x)(6)(vi) of this section are a minimum quantity. The bidder may add quantities of spare parts to bring the number of spare parts up to the bidder's list of spare parts necessary for proper operation in the field.

(ii) A Class 1 unit does not have automatic transfer to a redundant or standby pool of identical units, and provides any function for 24 or more lines or trunks or for all trunks in a group. Nonredundant digital trunk interfaces are included in this category.

(iii) A Class 2 unit has automatic transfer to a redundant or standby pool of identical units, and provides any function for 24 or more lines or trunks or for all trunks in a group. Redundant digital trunk interfaces and units of a

redundant stored program processor are included in this category.

(iv) A Class 3 unit does not have automatic transfer to a redundant or standby pool of identical units and provides any function for no more than 23 lines or trunks or for less than all trunks in a group. Nonredundant analog trunks are included in this category. Excluded from this category are line cards, which are in Class 4.

(v) A Class 4 unit has automatic transfer to a redundant or standby pool of identical units and provides any function for no more than 23 lines or trunks or for less than all trunks in a group. Also, any line cards are in Class 4.

(vi) The spare parts for all of the hosts and the RST's included in this contract shall be provided as follows:

Quantity of Units used in the CO's & RST's To Be Bid	Required Quantity of Spares By Class of Unit			
	1	2	3	4
Class —>				
1 through 9	1	1	0	0
10 through 24	2	2	1	0
25 through 49	3	2	2	0
50 through 99	4	3	2	0
100 or More	5%	3%	3%	0

(vii) As a part of the response to the bid, the supplier shall furnish a list of units used by class and a list of spare parts to be furnished with this contract. This list shall be placed in Item 6.2 of appendix C of this section for only one of the host specifications included in the entire contract.

(7) *Environmental requirements.* The bidder shall specify the environmental conditions necessary for safe storage and satisfactory operation of the equipment being bid. If requested, the bidder shall assist the owner in planning how to provide the necessary environment for the equipment.

(8) *Unit costs for cost separation purposes.* The successful bidder shall present a cost breakdown of the central office equipment on a discrete element basis 90 days after installation completion. This shall include the various frames, switching and transmission components, and software.

(9) *Single-point grounding system acceptance.* Qualified representatives of the central office system supplier and the owner are to conduct a thorough

joint acceptance audit of the grounding system prior to the central office being placed into service. A grounding system acceptance checklist provided by RUS, which is consistent with standard industry practice, will be used in conducting this audit. All required grounding system corrections are to be made prior to placing the central office system into full service operation. The successful completion of this grounding system audit will constitute an acceptance on the part of both parties, the owner and the central office supplier (refer to paragraph (y)(5) of this section, and appendix D of this section).

(y) *Installation.* The following responsibilities apply to the central office equipment installation and Remote Switching Terminal (RST) installations, unless otherwise noted.

(1) *Responsibilities of owner.* The owner shall:

(i) Allow the bidder and its employees free access to the premises and facilities at all hours during the progress of the installation;

(ii) Take such action as necessary to ensure that the premises are dry and free from dust and in such condition as not to be hazardous to the installation personnel or the material to be installed (not required for an RST installed in a self-contained environmentally controlled cabinet);

(iii) Provide heat or air conditioning when required and general illumination in rooms in which work is to be performed or materials stored (not required for an RST installed in a self-contained environmentally controlled cabinet);

(iv) Provide suitable openings in buildings to allow material to be placed in position (not required for an RST installed in a self-contained environmentally controlled cabinet);

(v) Provide the necessary conduit and commercial and dc-ac inverter output power to the locations shown on the approved floor plan drawings; provide 120 volts, 60 Hz commercial power equipped with a secondary arrester and a reasonable number of outlets for test, maintenance and installation equipment; provide suitable openings or channels and ducts for cables and conductors, from floor to floor and from

room to room; provide an acceptable central office grounding system and at a ground resistance level that is reasonable for office site conditions (not required for an RST installed in a self-contained environmentally controlled cabinet);

(vi) Provide the necessary wiring, central office grade ground and commercial power service, with a secondary arrester, to the location of an exterior RST installation based on the voltage and load requirements furnished by the bidder;

(vii) Test at the owner's own expense all lines and trunks for continuity, leakage and loop resistance and ensure that all lines and trunks are suitable for operation with the central office equipment specified;

(viii) Make alterations and repairs to buildings necessary for proper installation of material, except to repair damage for which the bidder or its employees are responsible;

(ix) Connect outside cable pairs on the distributing frame and run all line and trunk jumpers (those connected to protectors);

(x) Furnish all trunk, line, and party assignment information to permit the bidder to program the data base memory within a reasonable time prior to final testing;

(xi) Release for the bidder's use such portions of the existing plant as are necessary for the proper completion of such tests as require coordination with existing facilities including facilities for T1 span lines with properly installed repeaters between the central office and the RST installations;

(xii) Make prompt inspections as it deems necessary when notified by the bidder that the equipment, or any part of the equipment, is ready for acceptance;

(xiii) Provide and install adequate fire protection apparatus, including one or more fire extinguishers or fire extinguishing systems of the gaseous type that has low toxicity and effect on equipment; and

(xiv) Provide necessary access ports for cable, if underfloor cable is selected.

(2) *Responsibilities of bidder.* The bidder shall:

(i) Allow the owner and its representatives access to all parts of the buildings at all times during the installation;

(ii) Obtain the owner's permission before cutting into or through any part of the building structure such as girders, beams, concrete or tile floors, partitions or ceilings (not applicable to the installation of lag screws, expansion bolts, and similar devices used for fastening equipment to floors, columns, walls and ceilings);

(iii) Be responsible for reporting to the owner any damage to the building which may exist or may occur during its occupancy of the building, repairing all damage to the building due to carelessness of the bidder's workforce, and exercising reasonable care to avoid any damage to the owner's property;

(iv) Consult with the owner before cutting into or through any part of the building structure where the fireproofing or moisture proofing may be impaired;

(v) Take necessary steps to ensure that all fire fighting apparatus is accessible at all times and all flammable materials are kept in suitable places outside the building;

(vi) Not use gasoline, benzene, alcohol, naphtha, carbon tetrachloride or turpentine for cleaning any part of the equipment;

(vii) Install the equipment in accordance with the specifications for the office;

(viii) Run all jumpers, except line and trunk jumpers (those connected to protectors);

(ix) Establish and update all data base memories with subscriber and trunk information as supplied by the owner until an agreed turnover time;

(x) Give the owner notice of completion of the installation at least 1 week prior to completion;

(xi) Permit the owner or its representative to conduct tests and inspections after installation has been completed in order that the owner may be assured that the requirements for installation are met;

(xii) Allow access, before turnover, by the owner or its representative, upon request, to the test equipment which is to be turned over as a part of the office equipment, to permit the

checking of the circuit features which are being tested and to permit the checking of the amount of connected equipment to which the test circuits have access;

(xiii) Make final charger adjustments using the manufacturer's recommended procedure;

(xiv) Notify the owner promptly of the completion of work of the central office, or such portions as are ready for inspection;

(xv) Correct promptly all defects for which the bidder is responsible;

(xvi) Provide the owner with one set of marked prints, or strapping prints, showing which of the various options and figures are in use on each switching system as specified in paragraph (x)(3)(i) of this section;

(xvii) Place the battery in service in compliance with the recommendations of the battery manufacturer; and

(xviii) Furnish the owner with a record of the cell voltages and specific gravity readings made at the completion of the installation of the switching system and before it is placed in commercial service.

(3) *Installation requirements.* (i) All work shall be done in a neat, workmanlike manner. Equipment frames or cabinets shall be correctly located, carefully aligned, anchored and firmly braced. Cables shall be carefully laid with sufficient radius of curvature and protected at corners and bends to ensure against damage from handling or vibration. Exterior cabinet installations for RST's shall be made in a permanent, eye-pleasing manner.

(ii) All multiple and associated wiring shall be continuous, free from crosses, reverses and grounds and shall be correctly wired at all points.

(iii) An inspection shall be made by the owner or its representatives prior to performing operational and performance tests on the equipment. However, this inspection shall be made after all installing operations which might disturb apparatus adjustments have been completed. The inspection shall be of such character and extent as to disclose with reasonable certainty any unsatisfactory condition of apparatus or equipment. During these inspections, or inspections for apparatus adjustments, or soldering, or in testing of

Rural Utilities Service, USDA

§ 1755.522

equipment, a sufficiently detailed examination shall be made throughout the portion of the equipment within which such condition is observed, or is likely to occur, to disclose the full extent of its existence, where any of the following conditions are observed:

(A) Apparatus or equipment units failing to compare in quantity and code with that specified for the installation;

(B) Apparatus or equipment units damaged or incomplete;

(C) Apparatus or equipment affected by rust, corrosion or marred finish; or

(D) Other adverse conditions resulting from failure to meet generally accepted standards of good workmanship.

(4) *Operational test requirements.* (i) Operational tests shall be performed on all circuits and circuit components to ensure their proper functioning in accordance with appropriate applicable documents supplied by the bidder.

(ii) A sufficient quantity of overall tests shall be made to ensure proper operation of all specified features.

(iii) A sufficient quantity of locally originating and incoming calls shall be made to prove the switching system can accept and process calls to completion.

(5) *Grounding system audit.* (i) A grounding system audit shall be performed to ensure that a viable single-point grounding system is in place prior to the time the switching system is placed into full service operation. It is suggested that such an audit be conducted at the time the switching system is ready for turnover to the owner.

(ii) This single-point grounding system audit is to be conducted by authorized representatives of the supplier and owner, and with the RUS general field representative participating at his discretion.

(iii) The single-point grounding system audit is to be conducted using the checklist contained in appendix D of this section.

(iv) Appendix D of this section shall be the principal single-point grounding system audit guideline document. A supplemental checklist may be prepared and provided by the switching system supplier which recognizes unique grounding requirements related to their particular switching system. The scope of this supplier checklist is

to be confined to unique and specific switching system requirements only. Acceptable supplier supplemental grounding checklist must have prior approval of and be on file with the Central Office Equipment Branch of the Telecommunications Standards Division of RUS.

(v) It is the responsibility of the central office supplier to ensure that the grounding system evaluation criteria contained in the combination of the appendix D checklist of this section and their optional supplemental checklist adequately fulfill requirements for warranty coverage.

(vi) All deficiencies in the single-point grounding system are to be corrected prior to the switching system being placed into full service operation. Exceptions are permitted only by mutual agreement of the owner and supplier and with written approval of the RUS general field representative.

(vii) The acceptance statement facesheet of the audit checklist in appendix D of this section shall be signed by authorized representatives of the supplier and owner to indicate mutual approval of the single-point grounding system. Copies of all completed grounding system audit documents are to be provided to the supplier, owner and appropriate RUS telephone program regional offices.

(The information and recordkeeping requirements of this section have been approved by the Office of Management and Budget (OMB) under the control number 0572-0059)

APPENDIX A TO 7 CFR 1755.522—SPECIFICATION FOR DIGITAL, STORED PROGRAM CONTROLLED CENTRAL OFFICE EQUIPMENT DETAILED REQUIREMENTS (HOST)

(Information To Be Supplied by Owner)

Telephone Company Name _____

Location _____

Central Office Name (By Location) _____

Town _____

County _____

State _____

_____Attended

_____Unattended

_____Remotes

§ 1755.522

1. General

1.1 Notwithstanding the bidder's equipment lists, the equipment and materials furnished by the bidder must meet the requirements of paragraphs (a) through (x), Appendix A and Appendix B of § 1755.522.

1.2 Paragraphs (a) through (x) of § 1755.522 cover the minimum general requirements for digital, stored program controlled central office switching equipment.

1.3 Paragraph (y) of § 1755.522 covers requirements for installation, inspection, and testing when such service is included as part of the contract.

1.4 Appendices A and B of § 1755.522 cover the technical data for application engineering and detailed equipment requirements insofar as they can be established by the owner. These appendices are to be filled in by the owner.

1.5 Appendix C of § 1755.522 covers detailed information on the switching network equipment and the common control equipment, and information as to system reliability and heavy traffic delays as proposed by the bidder. This appendix is to be filled in by the bidder and must be presented with the bid.

1.6 Appendix D of § 1755.522 is the single-point grounding system audit checklist.

2. Numbering Scheme

2.1 This office shall be arranged to serve the following area and office code(s):

If more than one code is to be served, discrimination shall be determined by the following:

Number Translation ____

Separate Trunk Groups ____

Both (Explain in Item 16, Appendix A) ____

2.2 This office shall be arranged to provide EAS service to the following:

Connecting office	Code	Connecting office	Code

2.2.1 Seven digits shall be dialed for all local and EAS calls.

2.3 Additional dialing procedures to be provided include the following:

7 CFR Ch. XVII (1–1–97 Edition)

Feature	Required
Station Paid Toll (Including Coin):	
Home Numbering Plan Area (HNPA):	
"1" + 7 Digits	
"1" + 10 Digits	
Other (Explain in Item 16, Appendix A)	
Foreign Numbering Plan Area (FNPA):	
"1" + 10 Digits	
Other (Explain in Item 16, Appendix A)	

10XXX Dialing to Interexchange Carriers:

Name	Access code

Feature	Required
Person, Special (Including Coin):	
HNPA—"0" + 7 Digits	
"0" + 10 Digits	
FNPA "0" + 10 Digits	
Other (Explain in Item 16, Appendix A)	
Directory Assistance:	
HNPA Local—411	
"1" + 411	
HNPA Toll "1" + 555–1212	
FNPA Toll "1" + NPA + 555–1212	
IDDD:	
Operator Serviced 01	
Station-Station 011	

Other service codes	No. to be dialed
Wire Chief	
Repair Service	
Business Office	
Emergency Calls to 911 Lines	
Emergency Calls to 911 Trunks

Weather	
100 Test Line	
102 Test Line	
105 Test Line	

Rural Utilities Service, USDA

§ 1755.522

Other service codes	No. to be dialed
Other (Explain in Item 16, Appendix A)	

2.4 Assistance calls are answered: (Check appropriate items)

2.4.1 At the operator office in _____

2.4.1.1 By means of the regular interoffice toll trunks _____

2.4.1.2 By means of the regular interoffice EAS trunks _____

2.4.1.3 By means of a separate special service trunk group _____

2.4.1.4 Locally _____

Explain:

3. Office Clock

3.1 This office is to be slave clock synchronized with another office:

_____ Yes _____ No

(Explain details in Appendix A, Item 16 if "Yes".)

3.2 This office is to be a master clock office to provide synchronization timing for other offices:

_____ Yes _____ No

(Explain details in Appendix A, Item 16 if "Yes".)

4. Interoffice Trunking Diagram

4.1 A sketch showing relative location of exchanges, RST's, and number of circuits shall be included, also the office and area codes of the direct trunk points. The diagram should indicate whether toll or EAS trunk groups are "High Usage" or "Final." Alternate routes should be included. Indicate whether the trunk termination is direct digital or analog.

5. Translator Function Chart

Called point	Subscriber dials	First route			Alternate routes		
		Translator action	Send		Translator action	Send	
		Deletes	Prefixes		Deletes	Prefixes	

6. Line Circuit Requirements (Includes all lines associated with RST's.)

6.1 *Types of Lines*

	No. of lines in group	No. of groups	Direct in dial *	Restricted service at COE	Type		No. of lines		No. of EAS areas	Total No. of lines re-quired
					Ground start	Loop start	Local service only	Both local and EAS service		
6.1.1 Individual—Flat Rate										
6.1.2 Individual—Message Rate										
6.1.3 Pay Station										
6.1.4 Telephone Company Official Lines										
6.1.5 Wire Chief										
6.1.6 911 Emergency Service Bureau Lines										
6.1.7 Number Hunting PBX Groups:										

*Furnish translation information under Item 5.

Rural Utilities Service, USDA**§ 1755.522**

6.1.8 WATS Lines (Give details in Appendix A, Item 16)

Number of Inward WATS Lines _____

Number of Outward WATS Lines _____

6.1.9 Special Lines Required _____ (Explain in Item 16, Appendix A)

6.1.10 Total Number of Lines Required _____

Host _____ (Incl. DDI Concentrator Lines)

RST 1 _____

RST 2 _____

RST 3 _____

Total _____

6.1.11 Total Director Numbers Required _____

(Including RST's) (see Item 7.1, Appendix A)

6.1.12 Pay Station

Type _____

New _____ Reused _____

(Describe in Item 16, Appendix A)

6.1.13 Line Concentrator

6.1.13.1 Supplied by Owner (see Item 16, Appendix A, for details)

_____ Yes _____ No

6.1.13.2 Supplied by Bidder (If "Yes", attach REA Form 397g, Performance Specification for Line Concentrators)

_____ Yes _____ No

6.2. *Data on Lines Required Range Extension*

6.2.1 Number of non-pay station lines having a loop resistance, including the telephone set, as follows:

	No. of lines
1901–3200 ohms	_____
3201–3600 ohms	_____

6.2.2 Number of pay station lines having loop resistance, excluding the telephone set, greater than:

	No. of lines
1200 ohms (For Prepay)	_____
1000 ohms (For Semi-Postpay Operation).	_____

6.2.3 Range extension equipment is to be provided:

6.2.3.1 Loop Extenders: Total Quantity _____

By Bidder—Quantity _____

By Owner—Quantity _____

(Explain in Item 16, Appendix A)

6.2.3.2 VF Repeaters: Total Quantity _____

By Bidder—Quantity _____

(Bidder must have information on loading and cable size.)

By Owner—Quantity _____

(Explain in Item 16, Appendix A)

6.2.3.3 Range extension may be furnished as an extended range line circuit at the option of the supplier. If this option is used, the quantities of loop extenders and VF repeaters will be different from the quantities listed above (see Item 6.1.a, Appendix C).

_____ Yes _____ No

17. Traffic Data—Line Originating and Terminating Traffic

7.1 Originating Line Traffic—Estimated per Busy Hour (Includes all Lines Associated With RST's):

	(a) CCS per Main Station	(b) No. of Main Stations	(axb) Total CCS	No. of Lines Required ¹
Ind.—Res				
Ind.—Bus				
Special Lines				
Pay Station				
Telco Official				
Wire Chief				
No. Htg. or PBX	(²)	(³)		
WATS				
Data Service				
911 Emerg. Service				
Total		(c)	(d)	(e)

¹ See Appendix A, Item 6.1.
² This figure is the CCS per PBX trunk.
³ This figure is the number of PBX trunks.
⁴ This is the total number of line equipments required. The number to be provided will be determined by the equipment design of the system of the selected bidder. See Appendix C, Item 3.1.1.2.

Rural Utilities Service, USDA

§ 1755.522

7.2 Average Originating CCS per Line per Busy Hour

(d)/(e)=___/___=___ CCS/Line

This office shall be engineered to handle an initial average originating busy hour traffic of ___ CCS per line. It is anticipated that the average originating busy hour traffic will increase to ___ CCS per line.

Originating Traffic Attributed to Host Only ___ CCS/Line

7.3 Terminating Traffic—Estimated CCS per Busy Hour

It is assumed that the total CCS for terminating traffic is the same as for originating traffic. Since digital switch networks

are on a terminal per line basis, the terminating CCS per line will be the same as the originating CCS per line as shown in Item 7.2, Appendix A.

Terminating Traffic Attributed to Host Only ___ CCS/Line

7.4 Percent of Pushbutton Lines ___

7.5 Anticipated Ultimate Capacity (20 years)

7.5.1 Subscriber Lines

Host _____ (Incl. DDI Concentrator Lines)

RST 1 _____

RST 2 _____

11.4.2 Owner supplied equipment

Yes _____
No _____

11.4.2.1 Vendor supplied interface only

Yes _____
No _____

If supplied by owner, explain in Item 16, Appendix A, including manufacturer, model, location.

11.5 Remote Control

11.5.1 Remote control of the system shall be provided.

Yes _____
No _____

If required, explain in Item 16, Appendix A, including number, type and location.

12. Power Equipment Requirements (Host Office Only)**12.1 Central Office Battery**

12.1.1 A battery reserve of _____ busy hours shall be provided for this office when it reaches _____ lines at the ultimate anticipated traffic rates specified in Item 7.2, Appendix A.

12.1.1.1 The owner will furnish a standby generator, permanently installed in this office, with capacity sufficient to power air conditioning equipment required for cooling of the central office equipment and to maintain an adequate dc supply in the event of a failure of the commercial ac supply.

Yes _____
No _____

12.1.2 Type of battery: (Check One)

Lead Calcium _____
Lead Antimony _____

12.1.3 Voltmeter (portable 3-60-150 volt scale, 1% accuracy) shall be furnished.

Yes _____
No _____

12.1.4 Hydrometer in a hydrometer holder with glass or plastic drop cup shall be furnished.

Yes _____
No _____

12.1.5 Type of battery rack required: (Check One)

Two Tier _____
Other _____
Explain: _____

12.1.6 Special equipment power requirements (carrier, voice frequency repeaters, etc.). Drain in amperes _____

12.1.6.1 Supply all necessary equipment to provide the following 48-volt battery taps:

Number of circuits	Fuse (or circuit breaker) size
.....	
.....	

§ 1755.522

Number of circuits	Fuse (or circuit breaker) size
.....	
.....	

12.2 Charging Equipment

12.2.1 Charging equipment shall be provided capable of charging the office battery on a full float basis when the office reaches ____ lines at the ultimate anticipated traffic rates specified in Item 7.2, Appendix A.

12.2.2 Charger input rating shall be:

	3-Phase Connection:
Voltage ____	3-Wire ____
Phase ____	4-Wire ____
Frequency ____	Delta ____
.....	Y ____

12.3 Ringing Equipment

12.3.1 Solid-state ringing equipment in accordance with paragraph (s)(5)(i) of §1755.522 shall be provided for generating the frequencies specified by check marks in the following table. Ringing generator sets serving the entire office shall each be sized to carry the full office ringing load when the office size reaches ____ lines at the ultimate anticipated traffic rates specified in Item 7.2, Appendix A.

12.3.2 Ringing frequencies to be supplied:

	Frequency in Hz		Maximum No. of telephones
Single Frequency	20		
Decimonic	20		
	30		
	40		
	50		
Harmonic	16⅔		
	25		
	33⅓		
	50		
Synchromonic	20		
	30		
	42		
	54		

12.3.3 Furnish frequency meter (accurate within 1.3 Hz) and voltmeter (5% accuracy) for ringing measurements (see paragraph (s)(7)(ii) of §1755.522). Check One:

Panel Mounted ____

Portable ____

Not Required ____

12.4 Power Board

The power panel and associated wiring shall be of ample size to meet the load requirements when this office reaches ____ lines at the ultimate anticipated traffic rates specified in Item 7.2, Appendix A.

7 CFR Ch. XVII (1-1-97 Edition)

13. Distributing Frame Requirements (Host Office Only)

- 13.1 Total number of outside plant cable pairs to be terminated
 13.1.1 Gauge of outside plant cable pairs
 13.2 Number of outside plant cable pairs to be protected
 13.3 Number of additional protector pair units to be provided on MDF
 Explain:

13.4 Main Frame Details

- Is present MDF to be reused?
 Yes ____
 No ____
 If "Yes," Type ____
 Reused protectors are:
 ____ (Mfgr.)
 ____ (Type)
 13.4.1 Number of pairs of arrester units (switching equipment) ____
 13.4.2 Number of pairs of gas tube arrester units (special equipment) ____
 13.4.2.1 Gas tubes to be:
 ____ light,
 ____ medium,
 ____ heavy,
 ____ max. duty units
 13.4.2.2 Fail shorted/low breakdown failure mode required
 Yes ____
 No ____
 13.4.2.3 Breakdown voltage of gas tube arresters ____
 13.4.3 Number of terminated pairs to be grounded ____
 13.4.4 Factory assembled tip cable
 Yes ____
 No ____
 13.4.4.1 Tip cable length [if other than 20 feet (610 cm)]

 13.4.4.2 Tip cable formed
 Up ____
 Down ____
 13.4.5 Pairs per vertical ____
 13.4.6 Height of vertical ____ feet ____ inches

14. Building and Floor Plan Information (Host Office Only)

- 14.1 Equipment is to be installed in an existing building (Attach detailed plan.) ____
 14.2 A new building is planned ____
 14.2.1 Tentative plan (Note to Engineer: Show sketch without dimensions.)
 14.3 Detailed Arrangements
 14.3.1 Partition required (to isolate space containing battery, charger, power board, test panel, main distributing frame and subscriber's loop test circuit (wire chief's test desk) from that of the remaining equipment).
 Yes ____

Rural Utilities Service, USDA**§ 1755.522**

No _____
14.3.2 Vestibule required
Yes _____
No _____
14.3.3 Cable entrance
Overhead _____
Underground _____
14.3.4 Additional floor space will be required for the following equipment which is being furnished by the owner or by the connecting company:

14.3.5 The office will be arranged for
Overhead Interbay Cabling _____
Underfloor (Computer Room Type) Interbay Cabling _____
14.3.6 Is earthquake bracing required?
Yes _____
No _____

(If "Yes," explain zone and criteria used for zone in Item 16, Appendix A.)

14.3.7 Office ground will be _____ ohms or less (Refer to Item 4.6.3 of RUS TE&CM 810.)

14.3.8 The office is considered to be in the following category for lightning damage probability based on the Figure 1 map of RUS TE&CM 823 (see paragraph (u)(2) of 1755.522).

____ Very High
____ Higher than Average
____ Average
____ Lower than Average
____ Very Low

14.3.9 The following is additional information regarding operating environment conditions which should be considered in determining system protection requirements (tower in vicinity, high exposure, etc.):

15. Alternate Requests

16. Explanatory Notes (Include a detailed description of any equipment to be reused, or otherwise supplied by the owner, loop extenders, subscriber carrier, VF repeaters, etc.)

APPENDIX B TO 7 CFR 1755.522—DETAILED INFORMATION ON REMOTE SWITCHING TERMINALS (RST'S)**(Complete One Form For Each RST)**

1. Number of Subscriber Lines (These lines included in totals in Item 6, Appendix A).

1.1 Single-Party: _____ Flat Rate _____ Message Rate.

1.2 Semi-Postpay Pay Station _____.

1.3 Prepay Pay Station _____.

1.4 PABX Lines _____ Loop Start _____ Ground Start _____ Restricted at Office _____ Other _____ (Describe in Item 12, Appendix B)

1.5 Number of lines to be pushbutton _____

1.6 911 Emergency Lines _____
1.7 Anticipated ultimate capacity (20-Year) _____

2. Traffic

2.1 Originating traffic per line—CCS/BH: _____ Initial _____ Ultimate.

2.2 Terminating traffic per line—CCS/BH: _____ Initial _____ Ultimate

2.2.1 Terminating will be made equal to originating if it is not known to be different.

3. Subscriber Loop Resistance

3.1 Number of subscriber lines having loop resistance, including the telephone set of:

No. of Lines
1501-1900 Ohms _____
1901-3200 Ohms _____

3.2 Number of pay station lines having loop resistance, excluding the telephone set, greater than:

No. of Lines
1200 Ohms (For Prepay) _____
1000 Ohms (For Semi-Post Pay Operation) _____

4. Range Extension

4.1 If no standby power is available at the site, loop extenders may be required on 1501 to 1900 ohms loops.

4.2 Loop extenders: Total Quantity _____ By Bidder—Quantity _____ By Owner—Quantity _____ (Explain in Item 12, Appendix B)

4.3 VF repeaters: Total Quantity _____ By Bidder—Quantity _____ By Owner—Quantity _____ (Explain in Item 12, Appendix B)

5. Power Supply**5.1 Power Board.**

5.1.1 The power board and associated wiring shall be of ample size to meet the load requirements when this RST reaches _____ lines at the ultimate anticipated traffic rates specified in Item 2, Appendix B.

5.2 Charger input rating shall be: Voltage _____ Phase _____ Frequency _____

3-Phase Connection:

3-Wire _____
4-Wire _____
Delta _____
Y _____

5.2.1 Charger shall be capable of charging the RST battery on a full float basis when the RST reaches _____ lines at ultimate traffic rate specified in Item 2, Appendix B.

5.2.2 Charger shall be redundant _____.

5.3 Battery reserve shall be _____ busy hours when the RST reaches _____ lines at the ultimate anticipated traffic specified in Item 2, Appendix B.

5.4 Standby power is available. Yes _____ No _____.

§ 1755.522

5.5 Special equipment power requirements _____ amps.

5.6 *Ringling.*

5.6.1 Type of Ringing.

5.6.2 Frequency

No. 1. 2. 3. 4.

Frequency HZ

Max. No. Phones/

Frequency

5.6.3 Wattage to be sized for _____ lines.

5.6.4 Frequency Meter (see Item 12.3.3, Appendix A). Panel Mounted _____ Not Required _____.

6. Emergency Operation

6.1 If path to central office is opened, the RST shall be able to complete calls between subscribers in its own system: Yes _____ No _____

Further requirements should be listed under Item 12, Appendix B.

7. RST Distribution Frame Requirements

7.1 Total number of outside plant cable pairs to be terminated _____.

7.1.1 Gauge of outside plant cable pairs _____.

7.2 Number of outside plant cable pairs to be protected _____.

7.3 Number of additional protector pair units to be provided on MDF _____.

Explain:

7.4 *Main Frame Details*

7.4.1 Present MDF to be reused Yes _____ No _____.

If "Yes", Type _____.

Reused protectors are: _____ (Mfr.) _____ (Type).

7.4.2 Number of pairs of arrester units (switching equipment) _____.

7.4.3 Number of pairs of gas tube arrester units (special equipment) _____.

7.4.3.1 Gas tubes to be: _____ light, _____ medium, _____ heavy, _____ maximum duty units.

7.4.3.2 Fail shorted/low breakdown failure mode required Yes _____ No _____.

7.4.3.3 Breakdown voltage of gas tube arresters _____.

7.4.4 Number of terminated pairs to be grounded _____.

7.4.5 Factory assembled tip cable Yes _____ No _____.

7.4.5.1 Tip cable length [if other than 20 feet (610 cm)] _____.

7.4.5.2 Tip cable formed Up _____ Down _____.

7.4.6 Pairs per vertical _____.

7.4.7 Height of vertical _____ feet _____ inches.

8. Building and Floor Plan Information

8.1 RST to be mounted in building _____.

8.1.1 Earthquake bracing required Yes _____ No _____ (see Item 14.3.6, Appendix A).

8.1.2 Supply building floor plan.

8.2 RST to be mounted in cabinet out of doors _____.

8.2.1 Cabinet to be mounted _____ on pole _____ on ground.

9. Subscriber Line Test

9.1 Remote testing of subscriber lines is required Yes _____ No _____.

9.2 Subscriber loop test set _____.

10. Span Lines to Host Central Office

10.1 To be supplied by Owner _____.

10.2 To be supplied by Bidder _____.

10.2.1 When the bidder is to supply the span lines, an RUS Form 397b, Trunk Carrier Systems, with the applicable parts completed must be attached with a physical layout of the span line.

11. Grounding Considerations

11.1 The RST ground will be _____ ohms or less. (Refer to Item 4.6.3 of RUS TE&CM 810.)

11.2 This RST is considered to be in the following category for lightning damage probability based on the Figure 1 map of RUS TE&CM 823. _____ Very High _____ Higher than Average _____ Average _____ Lower than Average _____ Very Low

11.3 The following is additional information regarding operating environment conditions which should be considered in determining system protection requirements (tower in vicinity, high exposure, etc.):

12. Explanatory Notes

APPENDIX C TO 7 CFR 1755.522—SPECIFICATIONS FOR DIGITAL, STORED PROGRAM CONTROLLED CENTRAL OFFICE EQUIPMENT DETAILED REQUIREMENTS—BIDDER SUPPLIED INFORMATION

Telephone Company

Name _____

Location _____

Central Office Name (By Location)

Town _____

County _____ State _____

Attended _____ Unattended _____

1. General

1.1 The equipment and materials furnished by the bidder must meet the requirements of paragraphs (a) through (x), Appendix A, and Appendix B of §1755.522.

1.2 Paragraphs (a) through (x) of §1755.522 cover the minimum general requirements for digital, stored program controlled central office switching equipment.

1.3 Paragraph (y) of §1755.522 covers requirements for installation, inspection, and

Rural Utilities Service, USDA

§ 1755.522

testing when such service is included as part of the contract.

1.4 Appendices A and B of §1755.522 cover the technical data for application engineering and detailed equipment requirements insofar as they can be established by the owner. These appendices are to be filled in by the owner.

1.5 Appendix C of §1755.522 covers detailed information on the switching network equipment and the stored program controlled equipment, and information as to system reliability and heavy traffic delays as proposed by the bidder. This appendix is to be filled in by the bidder and must be presented with the bid.

1.6 Appendix D of §1755.522 is the single-point grounding system audit checklist.

2. Performance Objectives

2.1 *Reliability* (see paragraph (b) of §1755.522).

2.2 *Busy Hour Load Capacity and Traffic Delay* (see paragraph (e)(10) of §1755.522. Describe basis for traffic analysis).

3. Equipment Quantities Dependent on System Design

3.1 *Switch Frames and Circuits.*

3.1.1 Number of Lines.

3.1.1.1 The number of lines to be provided shall include the number required for the termination of subscriber lines, Item 7, Appendix A, plus the number required for routine testing plus any additional to meet the minimum switch increment of the selected system.

3.1.1.2 The number of lines provided for this office will be _____

3.1.2 Number of Ports Used for Trunks

3.1.2.1 The number of trunk ports to be provided shall be based on the trunk quantities required (Item 8, Appendix A) as modified by the minimum increment of the selected system. Provision shall be made for at least 5 percent additional inlet and outlet ports over those required initially. The additional ports shall be used for connecting additional trunks that may be required in the future.

3.1.2.2 The number of trunk ports provided for this office will be _____

3.1.3 Number of Subscriber Directory Numbers

3.1.3.1 The number of directory numbers provided shall be based on the total directory numbers required (Item 6.1.11, appendix A), as modified by the memory increment of the proposed system.

3.1.3.2 The number of subscriber directory numbers provided for this office will be _____

4. RST

4.1 Information for RST's must be supplied for each RST to be furnished.

4.2 Number of line terminals for this RST will be _____.

4.3 Number of span line terminations to the central office being supplied _____.

4.4 If the emergency operation option is required, it will provide the following service when connection to the main office is severed:

4.5 The ac power drain at the remote end will be:

Initial _____ Ultimate _____
Voltage: Single-Phase _____ Three-Phase _____

4.6 Special environmental requirements for the remote end:

5. Power

5.1 *AC Power Drain Watts*

Initial _____ Ultimate _____

5.2 *Heat Dissipation Watts*

Provide the initial and ultimate equipment dissipation for each equipment room.

5.2.1 Operating Temperature Range

Minimum _____ Maximum _____

5.2.2 Operating Humidity Range

Minimum _____ Maximum _____

6. Additional Information to be Furnished by Bidder

6.1 The bidder shall accompany its bid with the following information:

a. Two copies of the equipment list and the calculations from which the quantities in the equipment list are determined;

b. Two copies of the traffic tables from which the quantities are determined, other than the full availability tables shown in paragraph (p)(1)(i) of §1755.522;

c. Two copies of detailed switching diagram showing the traffic on each route, the grade of service, the quantity of circuits, and main distributing frames;

§ 1755.522

7 CFR Ch. XVII (1–1–97 Edition)

- d. Block diagram of stored program control and associated maintenance equipment;
- e. A prescribed method and criteria for acceptance of the completed central office, which is subject to review;
- f. Location of technical assistance service with 24-hour maintenance, and conditions when owner will be charged for access to the service;
- g. Calculations showing the method by which ringing machine sizes were derived;
- h. Precautions to be taken against static discharge;

- i. Details of central office grounding requirements, recognizing local grounding conditions;
- j. Details concerning traffic measurement capabilities and formats; and
- k. Details concerning AMA features and formats to be provided.

6.2 As a part of the response to the bid, the bidder must also list information concerning the types and quantities of spare parts to be furnished. All units, excluding those units described in paragraph (x)(6)(i)(C) of §1755.522, must fall into one of the four classes. The information must be in the following format:

Unit No.	Unit name	Quantity of units in the CO's and RST's which are bid				Quantity of spare parts furnished with this bid			
		Class 1	Class 2	Class 3	Class 4	Class 1	Class 2	Class 3	Class 4

7. Explanatory Notes

APPENDIX D TO 7 CFR 1755.522—ACCEPTANCE CHECKLIST—SINGLE-POINT GROUNDING SYSTEM

1. Approval Statement

Telephone Company: _____
 RUS Borrower Designation: _____
 RUS Contract Number: _____
 N/A _____
 Name: _____
 Central Office: _____
 Remote: _____
 Date of Inspection: _____
 Names of Inspectors: _____
 Owner Representative _____
 Central Office Supplies _____
 Consulting Engineer _____
 Mutually Approved Exceptions: _____

Grounding System Approval:
 Name (Owner Representative) _____
 Signature _____
 Title _____
 Date _____
 Name (Supplier Representative) _____
 Signature _____
 Title _____
 Date _____

2. General Survey

2.1 This office is considered to be in the following category for probability of lightning damage based on the Figure 1 map in

RUS TE&CM 823 (also refer to paragraph (u)(2) of §1755.522)

___ Very High ___ Higher than Average
 ___ Average ___ Lower than Average
 ___ Very low

2.2 Central office ground field (COGF) to be inspected for proper bonding of conductors to ground rods, etc. COGF to earth grounding reading is _____ ohms. (Refer to RUS TE&CM 802, Appendices C and D, Measurement Techniques.) Is this resistance reading acceptable? (Refer to RUS TE&CM 810, Items 1.6, 4.6.2 and 4.6.3 for protection considerations.)

Acceptable: ___ Yes ___ No

Comments: _____

2.3 Ground connection to be inspected from the master ground bar (MGB) to the central office ground field (COGF) to ensure it is properly sized and installed by most direct route with no sharp bends. (Refer to RUS TE&CM 810, Item 4.3.2 and section 8.1.)

Acceptable: ___ Yes ___ No

Comments: _____

2.4 Building structure grounds (steel rebar in footings, ironwork, etc.) are to be properly bonded and connected to the MGB. (Refer to RUS TE&CM 810, Item 4.3.4.)

Acceptable: ___ Yes ___ No

Comments: _____

2.5 Metallic central office door(s) are to be painted with metallic paint with door-knobs left bare. Door(s) and frames are to be

Rural Utilities Service, USDA**§1755.522**

grounded to the building structural ground or the MGB.

Acceptable: ☐ Yes ☐ No

Comments: _____

2.6 Metallic fences within 6 feet (183 cm) of the exchange building, storage facilities ground field, etc. are to be properly bonded to the COGF outside of the central office building. Handhole enclosure is to be used for the COGF connection to permit inspection and disconnect for earth resistance testing. (Refer to RUS TE&CM 810, Appendix C, Item 4.6.1.)

Acceptable: ☐ Yes ☐ No

Comments: _____

2.7 Lightning rod systems are to be grounded by a separate dedicated ground field. A bond should be provided between the COGF and the lightning rod ground field. Handhole enclosure is to be used for the COGF connection to permit inspection and disconnect for earth resistance testing. (Refer to RUS TE&CM 810, Item 4.3.2.1.)

Acceptable: ☐ Yes ☐ No

Comments: _____

2.8 Radio/microwave tower ground grid is to be properly bonded to the COGF by a direct outside connection. Handhole enclosure is to be used for the COGF connection to permit inspection and disconnect for earth resistance testing. (Refer to RUS TE&CM 810, Item 4.3.2 and section 10.)

Acceptable: ☐ Yes ☐ No

Comments: _____

2.9 If a qualified metallic water system is present, inspect the MGB connecting conductor to ensure that it is properly sized and installed by the most direct route with no sharp bends and that it is clamped solidly on the water pipes. (Refer to RUS TE&CM 810, Item 4.3.3 for details on metallic water system grounding.)

Acceptable: ☐ Yes ☐ No

Comments: _____

2.10 All power and grounding conductors are to be continuous, end to end, with no splices, size discontinuity or intermediate terminations. If an exception is necessary, unusual care must be taken to assure proper

bonding between the two sections. (Refer to RUS TE&CM 810, Appendix C, section 5.)

Acceptable: ☐ Yes ☐ No

Comments: _____

2.11 All ground conductors should be void of sharp bends along their entire lengths. (Refer to RUS TE&CM 810, Item 8.2.2.)

Acceptable: ☐ Yes ☐ No

Comments: _____

2.12 Ground conductors should only be placed in nonmetallic conduit. Those routed through metallic conduit require that both ends of the conduit be bonded to the ground conductor. (Refer to RUS TE&CM 810, Item 8.2.4.)

Acceptable: ☐ Yes ☐ No

Comments: _____

2.13 Ground conductors should not be encircled by metallic clamp. Metallic straps are to be removed and replaced with non-metallic clamps. (Refer to RUS TE&CM 810, Item 8.2.4.)

Acceptable: ☐ Yes ☐ No

Comments: _____

2.14 If metallic conduit is used, it is to be insulated from all ironwork.

Acceptable: ☐ Yes ☐ No

Comments: _____

2.15 Inspect to determine if the required central office supplier electrostatic discharge plates, wrist wraps, antistatic floor mats, etc. are available and properly installed. (Refer to RUS TE&CM 810, Item 12.3.)

Acceptable: ☐ Yes ☐ No

Comments: _____

2.16 Ground conductors, except green wires, should not be routed close and parallel to other conductors so as to minimize induction on surges into equipment wiring. It is also better not to route these ground conductors through cable racks or troughs, or within the confines of any iron work. (Refer to RUS TE&CM 810, Item 8.2.3.)

Acceptable: ☐ Yes ☐ No

Comments: _____

3. Master Ground Bar (MGB)

3.1 The designated P, A, N, and I segments of the master ground bar (MGB) should be clearly identified. (Refer to RUS TE&CM 810, Figure 1 for MGB segmentation arrangement.)

Acceptable: ☐ Yes ☐ No

Comments: _____

3.2 Check for appearance and proper location of following on MGB:

- (a) R—Interior radio equipment¹
- (b) C—Cable entrance ground bar¹
- (c) M—MDF ground bar¹
- (d) G—Standby power equipment frame ground¹
- (e) N—Commercial power MGN²
- (f) B—Building structure ground²
- (g) L—Central office ground field²
- (h) W—Water pipe system²
- (i) N¹—Battery Return³
- (j) N²—Outside IGZ: _____³
- (k) N³—Outside IGZ: _____³
- (l) I¹—Ground window bar⁴
- (m) I²—Ground window bar⁴

Acceptable: ☐ Yes ☐ No

Comments: _____

3.3 All connections to MGB are to be two-hole bolted down copper crimped or compression type terminal lugs. (NOTE: No solder connections are permitted.)

Acceptable: ☐ Yes ☐ No

Comments: _____

3.4 MGB is to be properly insulated from the mounting surface.

Acceptable: ☐ Yes ☐ No

Comments: _____

3.5 All connections are to be tight.

Acceptable: ☐ Yes ☐ No

Comments: _____

3.6 The MGB is to have an anticorrosion coating of the type which enhances conductivity.

Acceptable: ☐ Yes ☐ No

¹ Surge Producer—(P)

² Surge Absorber—(A)

³ Grounds to non-IGZ Equipment—(N)

⁴ Grounds to IGZ Equipment (GWB's)—(I)

Comments: _____

3.7 Bar is to be clearly stenciled or legibly labeled "MGB."

Acceptable: ☐ Yes ☐ No

Comments: _____

3.8 All ground leads are to be properly sized and labeled as to point of origin. (Refer to RUS TE&CM 810, Item 8.3.1 and section 8.1.)

Acceptable: ☐ Yes ☐ No

Comments: _____

4. Ground Window Bar (GWB)

4.1 All equipment grounds that originate inside of an Isolated Ground Zone (IGZ) are to be terminated on the GWB which is preferably located physically inside the IGZ and insulated from its support. (Refer to RUS TE&CM 810, Item 5.1.)

Acceptable: ☐ Yes ☐ No

Comments: _____

4.2 Each GWB is to be connected to the MGB by the most direct route with a conductor of 2/0-gauge or coarser, or resistance of less than 0.005 ohms. Parallel conductors for redundancy if required by the supplier. (Refer to RUS TE&CM 810, Item 8.1.2.)

Acceptable: ☐ Yes ☐ No

Comments: _____

4.3 The metal framework grounds of only that switching equipment and associated electrical equipment located inside of the IGZ should be connected to the GWB as required by the central office equipment supplier. (Refer to RUS TE&CM 810, Item 5.5.)

Acceptable: ☐ Yes ☐ No

Comments: _____

4.4 GWB is to be clearly stenciled or labeled "GWB."

Acceptable: ☐ Yes ☐ No

Comments: _____

4.5 All connections are to be tight.

Acceptable: ☐ Yes ☐ No

Comments: _____

5. Isolated Ground Zone (IGZ)

5.1 IGZ areas are to be clearly marked on the floor or in some other easily recognizable manner. (Refer to RUS TE&CM 810, Item 6.1.1)

Acceptable: ☐ Yes ☐ No

Comments: _____

5.2 Confirm that all framework, cabinets, etc., within the IGZ are ground connected only to the GWB. (Refer to RUS TE&CM 810, Item 5.5.)

Acceptable: ☐ Yes ☐ No

Comments: _____

5.3 All cable racks, ground mats, switching and transmission equipment within the IGZ are to have ground leads *only* to the GWB. (Refer to RUS TE&CM 810, Item 5.5.2.)

Acceptable: ☐ Yes ☐ No

Comments: _____

5.4 Review ac power feed arrangement within the IGZ for acceptable receptacle type and confirm that all green wires are properly connected. (Refer to RUS TE&CM 810, Item 5.5.4.)

Acceptable: ☐ Yes ☐ No

Comments: _____

5.5 All ironwork, metallic conduit, and other equipment associated with the switch are to be properly insulated at the IGZ boundary as stipulated by the supplier. (Refer to RUS TE&CM 810, Item 6.2.)

Acceptable: ☐ Yes ☐ No

Comments: _____

5.6 With the GWB disconnected from the MGB, the resistance reading of _____ ohms between the GWB and the MGB indicates adequate isolation. (CAUTION: Test is to be conducted only with the approval and under the direction of the central office supplier.)

Acceptable: ☐ Yes ☐ No

Comments: _____

6. Entrance and Tip Cables

6.1 When neither a cable vault nor a splicing trough exists, the outside plant cable should be brought into the central office and spliced to tip cables with a PVC outer jacket (ALVYN[®]) or equivalent as close as practical to the cable entrance. (Refer to RUS TE&CM 810, Item 7.3.4.)

Acceptable: ☐ Yes ☐ No

Comments: _____

6.2 All outside entrance cables and all tip cable shields are to be separated by at least a 3-inch (7.6 cm) gap between shield ends.

Acceptable: ☐ Yes ☐ No

Comments: _____

6.3 All entrance cable shields are to be bonded separately to #6 AWG or larger insulated wire or bonding ribbon and connected to the Cable Entrance Ground Bar (CEGB) by most direct route with minimum bends.

Acceptable: ☐ Yes ☐ No

Comments: _____

6.4 Outside plant cable shields are to be connected only to the CEGB, and the tip cable shields are to be connected only to the Main Distributing Frame Bar (MDFB).

Acceptable: ☐ Yes ☐ No

Comments: _____

7. Cable Entrance Ground Bar (CEGB)

7.1 The CEGB is to be properly insulated from the mounting surface. (Refer to TE&CM 810, Item 4.2.1.)

Acceptable: ☐ Yes ☐ No

Comments: _____

7.2 The CEGB is to be located as close as possible to the physical ends of the entrance cable shields.

Acceptable: ☐ Yes ☐ No

Comments: _____

7.3 All connections are to use two-hole bolted down copper crimped or compression type terminal lugs. (NOTE: No solder connections are permitted.)

Acceptable: ☐ Yes ☐ No

Comments: _____

§ 1755.522

7 CFR Ch. XVII (1–1–97 Edition)

7.4 All connections are to be tight.
Acceptable: ☐ Yes ☐ No
Comments: _____

7.5 Bar is to be clearly stenciled or legibly labeled “CEGB.”
Acceptable: ☐ Yes ☐ No
Comments: _____

7.6 All ground leads are to be properly sized and labeled.
Acceptable: ☐ Yes ☐ No
Comments: _____

7.7 The CEGB is to have an anticorrosion coating of the type which enhances conductivity.
Acceptable: ☐ Yes ☐ No
Comments: _____

7.8 The CEGB is to be connected to the MGB by a properly sized conductor and by the most direct route. (Refer to RUS TE&CM 810, section 8.1.)
Acceptable: ☐ Yes ☐ No
Comments: _____

8. Main Distributing Frame (MDF)

8.1 RUS strongly recommends that MDF protectors be furnished without heat coils. (Refer to RUS TE&CM 810, section 7.6.)
Acceptable: ☐ Yes ☐ No
Comments: _____

8.2 Incoming cable pairs terminated on MDF protector assemblies should be protected with protector modules. These modules should contain white coded carbon blocks or orange coded gas tube arrestors that are included in the RUS List of Materials. (Refer to RUS TE&CM 810, Item 7.4)
Acceptable: ☐ Yes ☐ No
Comments: _____

7 _____
8.3 All incoming subscriber cable pairs are to be properly terminated at either a protector equipped terminal or connected to ground.

Acceptable: ☐ Yes ☐ No
Comments: _____

8.4 MDF protector assemblies may be mounted directly on the vertical frame ironwork. Protector assemblies on each vertical are interconnected with each other and the Main Distributing Frame Bar (MDFB) with a #6 copper grounding conductor. Alternative means of connecting to the MDFB are also acceptable which do not rely on the frame ironwork for conducting surge currents to ground. (Refer to RUS TE&CM 810, section 7.)

Acceptable: ☐ Yes ☐ No
Comments: _____

8.5 Protective “ground connections” should be provided between the MDFB and the frame ironwork for personnel protection regardless of the type of protector assembly used. Protective ground leads should be 14-gauge, less than 12 inches (30.5 cm) in length with paint thoroughly removed at point of connection to the ironwork. (Refer to RUS TE&CM 810, Item 7.1.3.)

Acceptable: ☐ Yes ☐ No
Comments: _____

8.6 The MDFB should be insulated from the frame ironwork in all cases where it is used as a Master Ground Bar (MGB). (Refer to RUS TE&CM 810, Item 7.1.2.)

Acceptable: ☐ Yes ☐ No
Comments: _____

8.7 Where the MDFB is used as the MGB in very small offices the protective “ground connections” should be connected on the N section of the bar. The MDF line protector assembly grounds should be connected to the P section of the bar. (Refer to RUS TE&CM 810, Item 7.1.4.)

Acceptable: ☐ Yes ☐ No
Comments: _____

8.8 The MDFB is to be connected to the MGB by the most direct path with minimum bends and proper conductor size. (Refer to RUS TE&CM 810, Item 8.1.4.)

Acceptable: ☐ Yes ☐ No
Comments: _____

Rural Utilities Service, USDA

§ 1755.522

8.9 The MDFB should be free of all other ground leads when not used as an MGB.

Acceptable: ☐ Yes ☐ No
Comments: _____

8.10 Alternative arrangements which insulate the line protector assemblies and MDFB from the frame ironwork may require a direct ground connection of the frame ironwork to the MGB for personnel protection. Conductor is properly sized and tightened with paint removal on main frame ironwork at point of connection.

Acceptable: ☐ Yes ☐ No
Comments: _____

9. Power Service Protection and Grounding

9.1 The ground conductor between the ac power system multigrounded neutral (MGN) at the main ac disconnect panel and the master ground bar (MGB) is to be properly sized and connected. (Refer to RUS TE&CM 810, Items 2.19, 4.3.1 and 8.1.3.)

Acceptable: ☐ Yes ☐ No
Comments: _____

9.2 If there is a non-MGN ac power system, there is to be a properly sized and connected insulated conductor bond between the power service ground electrode and the MGB. (Refer to RUS TE&CM 810, Item 4.3.1.1.)

Acceptable: ☐ Yes ☐ No
Comments: _____

9.3 AC conductors including ground conductors serving 120-volt ac electric convenience receptacles and all direct wire peripheral equipment, located in the IGZ, should be sized in accordance with normal "green wire" criteria. (Refer to RUS TE&CM 810, Items 5.5.4, 5.5.5, and 5.5.6.)

Acceptable: ☐ Yes ☐ No
Comments: _____

9.4 Minimum protection for ac power serving the central office buildings should consist of an RUS accepted secondary arrester at the service entrance. (Refer to RUS TE&CM 810, section 9.)

Acceptable: ☐ Yes ☐ No
Comments: _____

9.5 A properly sized conductor for ground bonding between the standby power plant framework (not separately derived) and the MGB is to be provided to equalize framework voltages for personnel safety reasons. (Refer to RUS TE&CM 810, Item 4.2.4.)

Acceptable: ☐ Yes ☐ No
Comments: _____

10. Miscellaneous

10.1 All non-IGZ equipment frames, relay racks, cable racks and other ironwork are to be properly connected to the MGB. (Refer to TE&CM 810, Item 4.4.)

Acceptable: ☐ Yes ☐ No
Comments: _____

10.2 Shields on high frequency intra-office cables are to be properly isolated and connected only to an isolation ground bar in the relay rack. All shielded cables entering the IGZ should only be referenced at the IGZ termination point as given by the manufacturer. (Refer to RUS TE&CM 810, Item 7.2.1.2.)

Acceptable: ☐ Yes ☐ No
Comments: _____

10.3 Isolation ground bars in the relay racks are to be properly connected to the MGB with appropriate sized conductor with no sharp bends.

Acceptable: ☐ Yes ☐ No
Comments: _____

10.4 All radio equipment cabinet(s) are to be at least 10 feet (305 cm) from the IGZ.

Acceptable: ☐ Yes ☐ No
Comments: _____

10.5 The metal spare parts cabinet is to be grounded with a #6 AWG or larger insulated wire to non-IGZ cable rack, etc. or directly to the MGB.

Acceptable: ☐ Yes ☐ No
Comments: _____

[58 FR 30938, May 28, 1993; 58 FR 36252, July 6, 1993; as amended at 60 FR 1711, Jan. 5, 1995; 60 FR 64312, 64314, Dec. 15, 1995]

§ 1755.525

7 CFR Ch. XVII (1–1–97 Edition)

§§ 1755.523–1755.524 [Reserved]

§ 1755.525 Form 525, central office equipment contract (including installation.)

The RUS Form 525, Central Office Equipment Contract (Including Installation), in this section shall be used for all purchases of central office equipment (other than such purchases of special equipment using Form 397) using RUS financial assistance when the equipment is supplied and installed by the seller or installed by a firm under contract with the seller as defined in 7 CFR part 1753, subparts E and H. The RUS Form 525 Central Office Equipment Contract follows:

**CENTRAL OFFICE EQUIPMENT CONTRACT
(INCLUDING INSTALLATION)**

Notice and Instructions to Bidders; Central Office Equipment Project (Including Installation)

1. Sealed Proposals for the engineering, furnishing, delivery, and installation of central office equipment, materials and software for the

(hereinafter called the “Owner”) which is to be part of the system known as

to be financed pursuant to a loan contract between the Owner and the United States of America (hereinafter called the “Government”) by the Administrator of the Rural Utilities Service (hereinafter called the “Administrator”) will be received by the Owner on or before _____ o’clock, _____M.,

at _____

at which time and place the Proposals will be publicly opened and read. The Rural Telephone Bank may also be a party to the loan contract.

2. The Bid Documents (composed of plans, specifications and drawings), together with all necessary forms and other documents for Bidders, may be obtained from the Owner or from the Engineer, at the latter’s office at _____

The Specifications may be examined at the office of the Owner or at the office of the Engineer. A copy of the loan contract between the Owner and the Government may be examined at the office of the Owner.

Each set of Bid Documents will have a serial number, assigned by the Engineer, and the number of each set with the name of the Bidder will be recorded by the Engineer. Bids will be accepted only from original Bidders, or from some other qualified Bidder to whom such a set has been transferred by the original Bidder with the approval of the Engineer prior to the pre-bid technical session.

3. A pre-bid technical session will be held with each Bidder during the week of _____, 19____ at _____

for the purpose of receiving the Bidder’s Technical Proposal, discussing details of the Project(s), and considering suggestions from Bidders. The Owner shall attach to this Notice a list of the information required in the Bidder’s Technical Proposal. Each Bidder will be given a specific time period for the pre-bid technical session. At the pre-bid technical session, the Bidder shall fully describe to the Owner any exceptions to the Specifications the Bidder may request. In addition, the Bidder shall identify all features and capabilities that are not fully developed or do not have a verifiable satisfactory field performance record. If the Owner decides to incorporate any changes into the Specifications, the Owner shall furnish all prospective Bidders a copy of the Specifications containing such revisions (the “Revised Specifications”) and all Bids shall be made on the basis of the Revised Specifications. At this session, the Bidder shall identify all documentation and materials that it claims constitute agreed excluded documentation under section (2)(xi) of the Software License. The Bidder shall claim as agreed excluded documentation only those items it may be unable to provide to the Borrower as required by said section (2)(xi). The Engineer shall immediately provide a list of all items so identified to [appropriate RUS office]. The Engineer shall inform the Bidder at least _____ days before the scheduled bid opening whether either the Engineer or [RUS] will reject the Bid because of items so identified. Licensor agrees that certain Licensed Software cannot be excluded from the requirements of said section (2)(xi), including but not limited to software that would significantly impair the operation of the System, would significantly impair the ability of the Owner to generate revenue, or would pose a risk to RUS loan security. If allowed, the agreed excluded documentation shall be individually identified in an attachment to the Bid. No bid shall be accepted from a Bidder who fails to attend the pre-bid technical session or fails to demonstrate to the Owner that its equipment meets the requirements of the Plans and Specifications.

4. Proposals shall be submitted on the forms furnished by the Owner and must be delivered in a sealed envelope addressed to

Rural Utilities Service, USDA

§ 1755.525

the Owner. The name and address of the Bidder, its license number, if a license is required for bidding on a project by the State, and the date and hour of the opening of bids must appear on the envelope in which the Proposal is submitted. Proposals must be in ink or typewritten. No alterations or interlineations will be permitted, unless made, initialed, and dated before submission.

5. Prior to the submission of the Proposal, the Bidder shall make and shall be deemed to have made a careful examination of the Specifications, forms of Bidder's Proposal and Acceptance, and Contractor's Bond attached hereto, and shall become informed as to the location and characteristics of the proposed central office and remote terminal installations, features and services, the transportation facilities, the kind of facilities required before and during the delivery and installation of the equipment and materials, the general local conditions and all other matters that may affect the cost and the time of completion of the installations. Bidders will be required to comply with all applicable statutes, codes, and regulations, including those pertaining to the licensing of contractors and the "Anti Kick-Back Acts," as amended, (40 U.S.C. 276c; 41 U.S.C. 51 *et seq.*) and regulations issued pursuant thereto, and 18 U.S.C. 287, 874, 1001, as amended.

6. Each Proposal must be accompanied by a Bid Bond, in the form attached, or a certified check on a bank that is a member of the Federal Deposit Insurance Corporation, payable to the order of the Owner, in an amount equal to ten percent (10%) of the maximum possible bid price. The maximum possible bid price is the sum of the total base bid, spare parts, maintenance tools and all positive amounts for alternates. Each Bidder agrees that, if its Proposal is one of the three low Proposals, its Bid Bond or check shall be held by the Owner until a Proposal is accepted and Contractor's Bond, when required, is furnished by the successful Bidder and such acceptance has been approved by the Administrator, or for a period not to exceed ninety (90) days from the date hereinbefore set for the opening of Proposals whichever period shall be the shorter. If such Proposal is not one of the three low Proposals, the Bid Bond or check will be returned to the Bidder within a period of thirty (30) days.

7. The successful Bidder will be required to furnish to the Owner a Contractor's Bond in conformance with the requirements of 7 CFR part 1788, subpart C, Insurance for Contractors, Engineers, and Architects.

8. Should the successful Bidder fail or refuse to furnish a Contractor's Bond within thirty (30) days after written notification of the award of the Contract by the Owner, the Bidder will be considered to have abandoned the Proposal. In such event, the Owner shall be entitled (a) to enforce the Bid Bond in ac-

cordance with its terms, or (b) if a certified check has been delivered with the Proposal, to retain from the proceeds of the certified check the difference (not exceeding the amount of the certified check) between the amount of the Proposal and such larger amount for which the Owner may in good faith contract with another party to construct the Project(s). The term "successful Bidder" shall be deemed to include any Bidder whose Proposal is accepted after another Bidder has previously refused or has been unable to execute the Contract or to furnish a Contractor's Bond.

9. If requested by the Owner or the Administrator, the Bidder shall furnish evidence, satisfactory to the Owner and the Administrator, that the Bidder has the necessary facilities, ability, and financial resources to perform the Contract.

10. The Contract, when executed, shall be deemed to include the entire agreement between the parties thereto and neither party shall claim any modification thereof resulting from any representation or promise made at any time by any officer, agent, or employee of the other or by any other person.

11. The Owner reserves the right to waive minor irregularities or minor errors in any Proposal, if it appears to the Owner that such irregularities or errors were made through inadvertence. Any such irregularities or errors so waived must be corrected on the Proposal in which they occur prior to the execution of any Contract which may be awarded thereon. Failure to provide a Bid Bond or check as specified in item six (6) above is not a minor irregularity.

12. The Owner reserves the right to reject any or all Proposals.

13. The equipment to be furnished for all central offices and remote switching terminals included in the Proposal is to be of one and the same basic design. A Proposal submitted on any other basis will not be considered.

14. Equal Opportunity and Employment

(a) The Offeror's or Bidders's attention is called to the "Equal Opportunity Clause" and the "Standard Federal Equal Employment Specifications" set forth herein.

(b) The goals and timetables for minority and female participation, expressed in percentage terms for the Contractor's aggregate workforce in each trade on all construction work in the covered area, are as follows:

Timetables	Goals for minority participation for each trade	Goals for female participation in trade
	(Insert goals for each year)	(Insert goals for each year)

These goals are applicable to all the Contractor's construction work (whether or not it is federal or federally assisted) performed

§ 1755.525

7 CFR Ch. XVII (1–1–97 Edition)

in the covered area. If the Contractor performs construction work in a geographical area located outside of the covered area, it shall apply the goals established for such geographical area where work is actually performed. With regard to this second area, the Contractor also is subject to the goals for both its federally involved and nonfederally involved construction.

The Contractor's compliance with Executive Order 11246 (3 CFR, 1963–1965 Comp., p. 340) and the regulations in 41 CFR part 60–4 shall be based on its implementation of the Equal Opportunity Clause, specific affirmative action obligations required by the specifications set forth in 41 CFR 60–4.3(a), and its efforts to meet the goals. The hours of minority and female employment and training must be substantially uniform throughout the length of the contract, and in each trade, and the Contractor shall make a good faith effort to employ minorities and women evenly on each of its projects. Transfer of minority or female employees or trainees from Contractor to Contractor or from project to project for the sole purpose of meeting the Contractor's goals shall be a violation of the contract, Executive Order 11246 and the regulations in 41 CFR part 60–4. Compliance with the goals will be measured against the total work hours performed.

(c) The Contractor shall provide written notification to the Director of the Office of Federal Contract Compliance Programs within 10 working days of award of any construction subcontract in excess of \$10,000 at any tier for construction work under the contract resulting from this solicitation. The notification shall list the name, address and telephone number of the subcontractor; employer identification number of the subcontractor; estimated dollar amount of the subcontract; estimated starting and completion dates of the subcontract; and the geographical area in which the subcontract is to be performed.

(d) As used in this Notice, and in the contract resulting from this solicitation, the “covered area” is

(insert description of the geographical areas where the contract is to be performed giving the state, county and city, if any).

NOTE: Paragraph 14 is applicable to the extent required by law. If applicable, certain information needs to be inserted at subpara-

graphs (b) and (d). In determining whether and how this paragraph is applicable, reference should be made to Office of Federal Contract Compliance Programs regulations (41 CFR Chapter 60).

Title _____

Bidder's Proposal to Engineer, Furnish, Deliver, and Install Equipment, Materials and Software

(Proposal shall be submitted in ink or type-written)

To: _____

(Hereinafter called the “Owner”)

The undersigned (hereinafter called the “Bidder”) hereby proposes to engineer, furnish, deliver, and install the equipment, materials and software for each Project listed under Column 1, “Project,” in Article I, section 1, and described in the plans, specifications and drawings (hereinafter called the “Specifications”) prepared by the Owner and attached hereto and made a part hereof, financed by a loan to the Owner made or guaranteed by the United States of America, acting through the Administrator of the Rural Utilities Service (hereinafter called the “Administrator”), or by loans to the Owner by the United States of America and by the Rural Telephone Bank, and designated

The Bidder has become informed as to the location and characteristics of the proposed installations, has become informed as to the kind of facilities required before and during the delivery and installation of the equipment, material, and software and has become acquainted with the labor conditions which would affect the work.

The Bidder agrees that if its bid is accepted the following terms and conditions shall govern.

If, in submitting this Proposal, the Bidder has taken any exception to the form of proposal furnished by the Owner, the Bidder understands that the Owner and the Administrator may evaluate the effect of such change as they see fit and they may exclude the Proposal from consideration in determining the award of the Contract.

§ 1755.525

[Section 1. Bid Price. The Bidder will engineer, furnish, deliver, and install the equipment, materials, and software described in the Specifications for the following sums:]

Note 1: If a remote switching terminal, so designate and list after host office.

Note 1: If a remote switching terminal, so designate and list after host office.

Note 2: All items included in a Project shall have the same completion schedule.

Note 3: Each Project shall be separated by a blank line.

Note 4: Time in calendar days for Completion of the Project shall be 60 days after the time established for Completion of Installation.

Section 2. Acceptable Equipment. Unless otherwise specified by the Owner (and agreed to in advance in writing by RUS), the Bidder agrees to furnish under this Proposal only equipment which is currently covered by a letter of acceptance issued by the Chairman, Committee “A” (Telephone). [Note: for convenience of borrowers and others, domestically manufactured products are included in RUS Bulletin 17551–100.] The Bidder agrees also to furnish only materials, equipment and software which are new and of most recent issue and manufacture, as of the date of the bid opening, or of near future release for which the Bidder can assure timely delivery.

Section 3. Changes in Project. The Owner, with the approval of the Administrator, may from time to time during the performance of the Contract effected by the acceptance of this Proposal, make reasonable changes, additions to or subtractions from the Specifications which are part of the Proposal as conditions may warrant. However, if substantial changes in the Project shall require an extension of time, a reasonable extension will be granted if the Bidder shall make a written request therefor to the Owner within thirty (30) days after any such change is made. Further, if the cost to the Bidder shall be increased or decreased by any such change or addition, the Contract price shall be increased or decreased by a reasonable amount in accordance with a contract amendment signed by the Owner and the Bidder and approved by the Administrator. No claim for additional compensation for any such change or addition will be considered unless the Bidder shall have made a written request therefor to the Owner prior to the commencement of work in connection with such change or addition. The Delivery or Completion of Installation times specified under Columns 5, “Delivery”, and 6, “Completion of Installation,” in Article I, section 1, can only be changed by a Contract amendment approved by the Bidder, the Owner and RUS.

Section 4. Taxes. The bid prices herein set forth do not include any amounts payable by the Bidder or the Owner on account of taxes imposed by any taxing authority upon the sale, purchase or use of materials, supplies, equipment or software to be incorporated in the Project(s). If any such tax is applicable to the sale, purchase or use of materials, supplies, equipment or software hereunder, the amount thereof shall be stated separately on all invoices and paid by the Owner.

ARTICLE II

Delivery and Installation

Section 1. Time of Completion of Installation. The time of delivery of materials, equipment, and software and of Completion of Installation are of the essence of this Contract. The Bidder shall deliver the materials, equipment, and software required hereunder

for each Project upon the time intervals established under Column 5, “Delivery,” in Article I, section 1, after the Administrator shall have approved this Contract in writing, and shall prosecute diligently and complete the installation of materials, equipment and software for each Project in accordance with the terms of this Contract and Specifications to the satisfaction of the Owner and the Administrator within the number of calendar days specified under Column 6, “Completion of Installation,” in Article I, section 1. The times for such Delivery or such Completion of Installation shall be extended for the period of any reasonable delay due exclusively to causes beyond the control and without the fault of the Bidder, including, but not limited to, acts of God, fires, strikes, floods, changes in the Specifications as herein provided, and acts or omissions of the Owner with respect to matters for which the Owner is solely responsible. However, no such extension of time shall be granted the Bidder unless within thirty (30) days after Bidder becomes aware of the happening of any event relied upon by the Bidder for such an extension of time the Bidder shall have made a request therefor in writing to the Owner. Further, no delay in such time for delivery of materials, equipment and software or Completion of Installation or in the progress of the work shall result in any liability on the part of the Owner, except that the Owner shall be responsible for and shall pay the Bidder on demand all additional, supportable costs and expenses incurred by the Bidder due to delays to the extent such delays are caused by the Owner's failure to perform its obligations under this Contract unless the Owner's failure to perform is caused by forces beyond its control.

Section 2. Sequence of Installation. All Projects shall be completed in the sequence in which they are listed under Column 1, “Project,” in Article I, section 1.

Section 3. Supervision and Inspection. The Bidder shall give sufficient supervision to the work at the site of the Project(s), using the Bidder's best skill and attention. The Bidder shall carefully study and compare all drawings, specifications, and other instructions and shall promptly report to the Owner any error, inconsistency or omission which Bidder may discover. The Bidder shall keep on the Project(s) during its progress a competent superintendent (hereinafter called the “Superintendent”) and any necessary qualified assistants, all satisfactory to the Owner. The Superintendent shall represent the Bidder and all directions given to the Superintendent by the Owner shall be as binding as if given to the Bidder. When requested by the Bidder, such directions shall be confirmed in writing.

Section 4. Inspection and Tests. The installation of materials, equipment and software hereunder and all materials, equipment and

software used therein shall be subject to the inspection, test and approval of the Owner and Administrator, in accordance with the Specifications. The Bidder shall furnish all pertinent information required concerning the nature or source of materials. The Owner and the Administrator shall have the right to inspect pertinent records (other than manufacturing cost information) of the Bidder and of any subcontractor relevant to this Project(s). The Bidder shall provide all reasonable facilities necessary for such inspection and tests, except that the Bidder is not required to provide test equipment for the Owner's tests unless specifically required in the Specifications. Failure of the Owner to make inspections shall not release the Bidder from performance required hereunder.

The Bidder shall notify the Owner in writing upon Completion of Installation of each Project and provide a copy of the results of tests, if any, conducted by the Bidder.

The Owner shall make inspections and tests of each Project for compliance with the Specifications and provide the Bidder the results of such inspections and tests on RUS Form 517, Results of Acceptance Tests. If the Owner has not completed its inspections and tests and provided the Bidder the results on RUS Form 517 within thirty (30) days after the written notification of Completion of Installation from the Bidder, the Owner shall (1) pay to the Bidder the costs incurred by the Bidder as a result of this delay, and (2) grant an extension of time for the Completion of the Project equal to the number of days from the date of the end of the thirty (30) day period until the date the Owner provides the RUS Form 517 to the Bidder.

Within thirty (30) days of receipt of the RUS Form 517 from the Owner, the Bidder shall correct all deficiencies, if any, listed on the RUS Form 517 and notify the Owner in writing of such corrections and deliver to the Owner the documents set forth in Article III, section 2, at which time a final Owner's inspection and test of each Project shall be conducted. If tests subsequent to this are made necessary by the Bidder's failure to satisfactorily resolve all such deficiencies as previously listed on the RUS Form 517, the Bidder shall pay the Owner for the cost incurred by the Owner for all such subsequent tests.

Section 5. Delivery of Possession and Control to the Owner. The Bidder shall deliver to the Owner, and the Owner shall accept, full possession and control of each Project on the date of Completion of the Project or on an earlier date if agreed under Article IV, section 2.

Section 6. Employees. The Owner shall have the right to require the removal of any employee of the Bidder from the Project site if in the judgment of the Owner such removal is necessary in order to protect the interest of the Owner.

Section 7. Defective Workmanship, Materials or Software. Throughout the warranty period defined below the Bidder shall, within thirty (30) days of written notice from the Owner, and without charge to the Owner, at the Bidder's option, either remedy or replace any materials, equipment or software found to be defective in material, workmanship or installation, or not in conformity with the Specification. This is subject to the following definitions and conditions:

(a) The warranty start date for a Project is the date of delivery of possession and control by the Bidder to the Owner of that Project included in the Contract. Refer to Article II, section 5. The warranty period is twelve (12) months from the warranty start date, or six (6) months from Completion of the Project, whichever results in the longer period of coverage.

(b) Without regard to the expiration of the warranty period set forth above, the Bidder warrants to the Owner that any Software furnished under this Contract shall function, for a period of five (5) years from the warranty start date defined in the Contract, in accordance with the specifications and any written or printed technical material provided by the Bidder to explain the operation of the Software and aid in its use. The Bidder shall correct all deficiencies within thirty (30) days from the date of receipt by the Bidder of written notice of such deficiencies from the Owner. An extension of this thirty (30) day period may be allowed only if agreed upon by the Owner. It shall be the Bidder's obligation to insert and thoroughly test, at no charge to the Owner, any software amendment or alteration provided to satisfy the obligations of this Section 7. If a deficiency is detected or a correction made within the final ninety (90) days of the warranty, the warranty shall be extended to a date ninety (90) days after the deficiency has been corrected.

(c) The Owner shall pay the Bidder for any use of the Bidder's technical assistance center except for usage to diagnose defects covered by this warranty.

(d) This warranty is not diminished by the acceptance of workmanship, materials, equipment, or software, or by the issuing of any certificate with respect to Completion of the Project.

(e) This warranty does not cover defects in materials, equipment or software that are caused by modifications to or abuse of materials, equipment or software by the Owner.

(f) The Owner shall bear the cost and risk of shipping defective components to the Bidder's designated repair center. The Bidder shall bear the cost and risk of shipping new or repaired replacement components to the Owner.

ARTICLE III

Payments and Releases of Lien

Section 1. Payment to Bidder.

(a) The Owner shall pay the Bidder upon the basis of written estimates of the materials, equipment, and software delivered at the site of the Project, presented by the Bidder, and approved by the Owner, the following percentages of the price of the materials, equipment, and software for each Project set forth under Column 2, "Materials, Equipment, and Software," in Article I, Section 1, as and if revised:

(i) Forty-five percent (45%) when fifty percent (50%) of the materials, equipment, and software for each Project has been delivered at the site of the Project, and

(ii) Ninety percent (90%) when all the materials, equipment, and software required to place each Project into operation has been delivered at the site of the Project.

(b) Upon written notification of the Completion of Installation of each Project, the Owner shall pay the Bidder ninety percent (90%) of the Base Bid plus accepted alternates for that Project.

(c) Upon the Completion of Installation, but prior to the payment to the Bidder of any amount in excess of ninety percent (90%) of the Total Contract Price, the Owner shall inspect the work performed hereunder and if the work shall be found to be in accordance with the Specifications and all provisions hereunder, the Owner shall certify as to that fact and as to the amount of the balance found to be due to the Bidder. No later than thirty (30) days after Completion of the Contract, as defined in Article VII, section 1, "Definitions," the Owner shall submit such final certificate to the Administrator for approval and when such approval has been given, the Owner shall pay to the Bidder all unpaid amounts to which the Bidder shall be entitled hereunder; provided, however, such final payments shall be made not later than sixty (60) days after Completion of the Contract unless approval by the Administrator shall be withheld or delayed due to Bidder's actions or failure to act.

(d) Payment on undisputed invoices submitted by the Bidder shall be due thirty (30) days after receipt. Any amounts of these invoices not paid when due shall accrue interest at a rate one and one-half percent (1½%) higher than the "Prime Rate" published in the Wall Street Journal in its first issue of the month in which payment becomes due and changing each subsequent month with the first issue published in the respective month.

(e) Notwithstanding other provisions of this Article III, the Bidder, shall, at its request in writing, receive payment in full for each Project upon Completion of Installation of such and upon:

(i) Completion of the final acceptance tests of such Project as certified on RUS Form 754, Certificate of Completion, Central Office(s) and approved by the Owner.

(ii) Submission to the Owner and Administrator of the releases of lien and Certificate of Contractor referred to in section 2 hereof or in lieu thereof, where the Bidder is the manufacturer, the execution of the Certificate of Contractor and Indemnity Agreement on RUS Form 754, all in respect of such Project.

(iii) Approval by the Administrator of the Certificate of Completion, RUS Form 754 in respect of such Project.

Ten percent (10%) of the contract price of one central office shall be retained until the Bidder shall have furnished the certificates and releases of lien or indemnity agreement in respect of the Project required by section 2 of this Article III.

(This Section 1(e) is to be used only if (1) the Contract includes at least one central office and (2) the Owner wishes to allow the partial closeout procedure. The Owner shall strike out this Section 1(e) if the partial closeout procedure is not to be allowed)

(f) Acceptance by the Owner of equipment, materials, workmanship or software while the Bidder is in default under any provision of this Contract shall not be construed as a waiver by the Owner of any right hereunder including, without limitation, any right to liquidated damages the Owner may have by virtue of Article V, section 2.

Section 2. Release of Liens. Upon the Completion of Installation by the Bidder, but prior to the payment to the Bidder of any amount in excess of ninety percent (90%) of the Total Contract Price, except as specified in Article III, section 1(e), the Bidder shall deliver to the Owner (a) two original Waiver and Release of Lien in the form attached hereto, from manufacturers, material suppliers and subcontractors who have furnished materials or services for the work, and (b) two original Certificate of Contractor, in the form attached hereto, to the effect that all labor has been paid and that all such releases have been submitted to the Owner; and the Owner shall deliver to the Administrator for approval one of the originals of each such release and certificate.

In lieu of releases of lien where the Bidder is the manufacturer of the equipment, the Bidder may deliver to the Owner, in duplicate in the form attached hereto, a Certificate of Contractor and Indemnity Agreement, stating that all manufacturers, material suppliers and subcontractors who have furnished materials or services for the Project(s) have been paid in full, and agreeing to indemnify the Owner against any liens arising out of the Bidder's performance hereunder which may have been or may be filed against the Owner.

Rural Utilities Service, USDA

§ 1755.525

In this Article III “manufacturer” shall mean a Bidder who makes, produces, or manufactures the equipment and whose interest, including non-contracted installation, represent more than fifty percent (50%) of the value of the Total Contract Price.

ARTICLE IV

Particular Undertakings of the Bidder

Section 1. Protection to Persons and Property. At all times when equipment and materials are being delivered and installed the Bidder shall exercise reasonable precautions for the safety of employees on the job and of the public and shall comply with all applicable provisions of Federal, State and Municipal safety laws and building and construction codes. All machinery and equipment and other physical hazards shall be guarded in accordance with the “Manual of Accident Prevention in Construction” of the Associated General Contractors of America unless such instructions are incompatible with Federal, State or Municipal laws or regulations. The following provisions shall not limit the generality of the above requirements:

(a) The Bidder shall at all times keep the premises free from accumulations of waste material or rubbish caused by its employees or work, and at the completion of the work the Bidder shall remove all rubbish from and about the Project(s) and all its tools, scaffolding and surplus materials and shall leave its work “broom clean.”

(b) The work, from its commencement to completion, or to such earlier date or dates when the Owner may take possession and control, shall be under the charge and control of the Bidder and during such period of control by the Bidder all risks in connection therewith, and in connection with the equipment, materials and software to be used therein, shall be borne by the Bidder. The Bidder shall make good and fully repair all injuries and damages to the equipment, materials and software under the control of the Bidder by reasons of any act of God, or any other casualty or cause whether or not the same shall have occurred by reason of the Bidder’s negligence. The Bidder shall hold the Owner harmless from any and all claims for injuries of persons or for damage to property happening by reason of any negligence on the part of the Bidder or any of the Bidder’s agents, subcontractors or employees during the control by the Bidder of the Project(s) or any part thereof. The Owner shall promptly notify the Bidder in writing of any such claims received and, except where the Owner is the claimant, shall give to the Bidder full authority and opportunity to settle such claims, and reasonably cooperate with the Bidder in obtaining information relative to such claims.

(c) Monthly reports of all accidents shall be promptly submitted to the Owner by the

Bidder giving such data as may be prescribed by the Owner.

Section 2. Termination of Bidder’s Risks and Obligations. The Bidder shall deliver to the Owner, and the Owner shall accept, full possession and control of each Project on the date of Completion of the Project. However, at any time after payment by the Owner to the Bidder of ninety percent (90%) of the Total Base Bid plus accepted alternates for that Project, but prior to Completion of the Project, the Owner and the Bidder may agree in writing to an earlier date of delivery of possession and control. Upon such delivery of possession and control of any Project the Bidder’s risks and obligations as set forth in Article IV, section 1(b), pertaining to such Project shall be terminated; provided, however, that nothing herein contained shall relieve the Bidder of its obligation for full performance under the Specifications, or its liability with respect to defective workmanship or materials as specified in Article II, section 7 hereof. The equipment shall not be placed in service until delivery of possession and control to the Owner has been accomplished, as set forth above.

Section 3. Insurance. During the Bidder’s performance hereunder, the Bidder shall take out and maintain fully paid insurance providing not less than the minimum coverage required by 7 CFR part 1788, subpart C.

The Owner shall have the right to require public liability insurance and property damage liability insurance in an amount greater than those required in 7 CFR part 1788, subpart C. If this requirement is included in the plans and specifications used for bidding, the added costs shall be included in the bid price. If the requirement is added after the Contract is approved, the additional premium or premiums payable solely as the result of such additional insurance shall be added to the Contract price, by Contract amendment.

Upon request by the Administrator, the Bidder shall furnish to the Administrator a certificate in such form as the Administrator may prescribe evidencing compliance with the foregoing requirements.

Section 4. Purchase of Materials. The Bidder shall purchase all materials and supplies except software outright and not subject to any conditional sales agreements, bailment lease or other agreement reserving unto the seller any right, title or interest therein. Materials and supplies other than software shall become the property of the Owner as the Owner makes payments therefor to the Bidder in accordance with Article III, Section 1(a).

Section 5. Software License. The software licensing agreement, if required, covering the rights, terms and conditions of the use and assignability of all software integral to the operation of the Project(s), shall be in the form of Addendum 1 to this Contract.

Section 6. Assignment of Guarantees. All guarantees of materials, equipment, workmanship and software running in favor of the Bidder shall be transferred and assigned to the Owner upon Completion of the Project and at such time as the Bidder receives final payment. Any such guarantees shall be in addition to the Bidder's warranty defined in Article II, section 7. This provision may be modified with respect to a particular warranty if the Bidder demonstrates to the satisfaction of RUS and the Owner that a transfer is not possible.

Section 7. Patent, Copyright, Trademark and Trade Secret Infringement. The Bidder shall hold harmless and indemnify the Owner from any and all claims, suits, and proceedings for the infringement of any patent, copyright, trademark or violation of trade secrets covering any equipment or software used in the work, except for items of the Owner's design or selection. If the Owner's use of equipment or software is enjoined, the Bidder shall promptly, at its own expense, modify or replace the infringing equipment or software so that it no longer infringes but remains functionally equivalent, or obtain for the Owner a license or other right to use. This shall be in addition to any other rights or claims which the Owner may have. The Bidder shall, at its own expense, (and the Owner agrees to permit Bidder to do so,) defend any suits which may be instituted by any party against the Owner for alleged infringement of patents, copyright, trademark or violation of trade secrets relative to the Bidder's performance hereunder. Either party shall notify the other promptly of any such claims, and the Owner shall give to the Bidder full authority and opportunity to settle such claims, and shall reasonably cooperate with the Bidder in obtaining information relative to such claims.

Section 8. Compliance with Statutes and Regulations. The Bidder shall comply with all applicable laws, statutes, ordinances, rules and regulations. The Bidder acknowledges that it is familiar with the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 *et seq.*), the Anti-Kickback Acts, as amended (40 U.S.C. 276c; 41 U.S.C. 51 *et seq.*), and any rules and regulations issued pursuant thereto, and 18 U.S.C. 201, 286, 287, 641, 666, 874, 1001, 1361 and 1366, as amended. The Bidder understands that the obligations of the parties hereunder are subject to the applicable regulations and orders of the Governmental agencies having jurisdiction in the premises.

The Bidder represents that to the extent required by Executive Orders 12549 (3 CFR, 1985-1988 Comp., p. 189) and 12689 (3 CFR, 1989 Comp., p. 235), Debarment and Suspension, and 7 CFR part 3017, it has submitted to the Owner a duly executed certification in the form prescribed in 7 CFR part 3017.

The Bidder represents that, to the extent required, it has complied with the requirements of Public Law 101-121, section 319, 103 Stat. 701, 750-765 (31 U.S.C. 1352), entitled "Limitation on use of appropriated funds to influence certain Federal contracting and financial transactions," and any rules and regulations issued pursuant thereto.

ARTICLE V

Remedies

Section 1. Completion on Bidder's Default. If default shall be made by the Bidder in the performance of any of the work hereunder, the Owner, without in any manner limiting its legal and equitable remedies in the circumstances, may serve upon the Bidder and the surety or sureties upon the Bidder's Bond or Bonds a written notice requiring the Bidder to cause such default to be corrected forthwith. Unless within thirty (30) days after the service of such notice upon the Bidder such default shall be corrected or arrangements for the correction thereof, satisfactory to both the Owner and the Administrator, shall have been made by the Bidder or its surety or sureties, the Owner may take over the performance of the Bidder's obligations hereunder and prosecute the same to completion by contract or otherwise for the account and at the expense of the Bidder, and the Bidder and its surety or sureties shall be liable to the Owner for any supportable cost or expense in excess of the bid price occasioned thereby. In such event, the Owner may take possession of and utilize, in completing the Project(s), any tools, supplies, equipment, appliances and plant belonging to the Bidder which may be situated at the site of the Project(s). The Owner, in such contingency, may exercise any rights, claims or demands which the Bidder may have against third persons in connection herewith and for such purpose the Bidder does hereby assign, transfer and set over unto the Owner all such rights, claims and demands.

Section 2. Liquidated Damages. Should the Bidder fail to complete any Project as shown under Column 7, "Completion of the Project," in Article I, Section 1, within the time herein agreed upon, after giving effect to extensions of time, if any, herein provided, then, in that event and in view of the difficulty of estimating with exactness damages caused by such delay, the Owner shall, so long as the subject Project shall not have been placed in service, have the right to deduct from and retain out of such moneys which may be then due, or which may become due and payable to the Bidder, the sum of:

dollars (\$_____)

for _____
(Project)

Rural Utilities Service, USDA

§ 1755.525

for _____
dollars (\$ _____)

for _____
(Project)
dollars (\$ _____)

for _____
per day for each and every day that such completion is delayed beyond the scheduled time for Completion of the Project, as liquidated damages and not as a penalty, up to the amount of the respective Base Bid plus accepted alternates for the affected Project: *Provided*, however, that the Owner shall promptly notify the Bidder in writing of the manner in which the amount claimed as liquidated damages was computed. The Bidder shall pay to the Owner the amount necessary to effect such payment in full. Such payment is not to be reduced by the value of any partial performance by the Bidder.

At the technical sessions, each Bidder shall identify all features and capabilities that are not fully developed or do not have a verifiable satisfactory field performance record. If the Owner allows these features to be bid as separate Projects, then they are to be individually listed under Columns 1 through 10, in Article I, section 1. These unproven features and capabilities are to be individually listed in this section 2 also, with liquidated damages amounts determined by the Owner and stated for each. If a Bidder neglects to identify any such feature at the technical session, delay in providing the feature is considered a delay in completing the associated Project and the Owner may assess liquidated damages listed for that Project regardless of whether the Project is placed in service.

Section 3. Consequential Damages. In no event shall the Bidder's liability for incidental or consequential loss or damage, except for personal injury or tangible property damage, exceed the amount of ten times the total contract price, as amended.

Section 4. Enforcement of Remedies by Administrator. The Administrator may on behalf of the Owner exercise any right or enforce any remedy which the Owner may exercise or enforce hereunder.

Section 5. Cumulative Remedies. Every right or remedy herein conferred upon or reserved to the Owner or the Administrator shall be cumulative and shall be in addition to every right and remedy now or hereafter existing at law or in equity or by statute and the pursuit of any right or remedy shall not be construed as an election. *Provided*, however, that the provisions of section 2 of this Article V shall be the exclusive measure of damages for failure by the Bidder to have effected the Completion of Project within the time herein agreed upon.

Article VI

Equal Employment

Section 1. The Bidder.

(a) The Bidder represents that:

(1) It has, _____ does not have _____, 100 or more employees, and if it has, that

(2) It has _____, has not _____, furnished the Equal Employment Opportunity Employers Information Report EEO-1, Standard Form 100, required of employers with 100 or more employees pursuant to Executive Order 11246 and Title VII of the Civil Rights Act of 1964.

(b) The Bidder agrees that it will obtain, prior to the award of any subcontract for more than \$10,000 hereunder to a subcontractor with 100 or more employees, a statement, signed by the proposed subcontractor, that the proposed subcontractor has filed a current report on Standard Form 100.

(c) The Bidder agrees that if it has 100 or more employees and has not submitted a report on Standard Form 100 for the current reporting year and that if this contract will amount to more than \$10,000, the Bidder will file such report, as required by law, and notify the Owner in writing of such filing prior to the Owner's acceptance of this Proposal.

(d) The Bidder certifies that it does not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Bidder certifies further that it will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it will not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Bidder agrees that a breach of this certification is a violation of the Equal Opportunity Clause in this contract. As used in this certification, the term "segregated facilities" means any waiting rooms, work areas, restrooms and washrooms, restaurants and other eating areas, timeclocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise. The Bidder agrees that (except where it has obtained identical certifications from proposed subcontractors for specific time periods) it will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding \$10,000 which are not exempt from the provisions of the Equal Opportunity Clause, and that it will retain such certifications in its files.

Section 2. During the performance of this contract, the Contractor agrees as follows:

(a) The Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex or national origin. The Contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex or national origin. Such action shall include, but not be limited to, the following: employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The Contractor agrees to post in conspicuous places available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.

(b) The Contractor will, in all solicitations or advertisements for employees placed by or on behalf of the Contractor, state that all qualified applicants shall receive consideration for employment without regard to race, color, religion, sex or national origin.

(c) The Contractor will send to each labor union or representative of workers with which the Bidder has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representative of the Contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(d) The Contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations and relevant orders of the Secretary of Labor.

(e) The Contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations and orders of the Secretary of Labor, or pursuant thereto, and will permit access to the Contractor's books, records and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations and orders.

(f) In the event of the Contractor's non-compliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations or orders, this contract may be canceled, terminated or suspended in whole or in part and the Contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions as may be imposed and remedies invoked as provided in the said Executive Order 11246 of September 24, 1965, or by rule,

regulation or order of the Secretary of Labor, or as otherwise provided by law.

(g) The Contractor will include the portion of the sentence immediately preceding paragraph (a) and the provisions of paragraphs (a) through (g) in every subcontract or purchase order unless exempted by rules, regulations or orders of the Secretary of Labor issued pursuant to Section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The Contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including actions for noncompliance: *Provided, however*, that in the event a contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the Contractor may request the United States to enter into such litigation to protect the interests of the United States.

Section 3. Equal Employment Opportunity Specifications.

(a) As used in these specifications:

"Covered area" means the geographical area described in the solicitation from which this contract resulted;

"Director" means Director, Office of Federal Contract Compliance Programs, United States Department of Labor, or any person to whom the Director delegates authority;

"Employer identification number" means the Federal Social Security number used on the Employer's Quarterly Federal Tax Return, U.S. Treasury Department Form 941; and

"Minority" includes:

(i) Black (all persons having origins in any of the Black African racial groups not of Hispanic origin);

(ii) Hispanic (all persons of Mexican, Puerto Rican, Cuban, Central or South American or other Spanish Culture or origin, regardless of race);

(iii) Asian and Pacific Islander (all persons having origins in any of the original peoples of the Far East, Southeast Asia, the Indian Subcontinent, or the Pacific Islands); and

(iv) American Indian or Alaskan Native (all persons having origins in any of the original peoples of North America and maintaining identifiable tribal affiliations through membership and participation or community identification).

(b) Whenever the Contractor, or any Subcontractor at any tier, subcontracts a portion of the work involving any construction trade, it shall physically include in each subcontract in excess of \$10,000 the provisions of these specifications and the Notice which contains the applicable goals for minority and female participation and which is set forth in the solicitations from which this contract resulted.

Rural Utilities Service, USDA

§ 1755.525

(c) If the Contractor is participating (pursuant to 41 CFR 60-4.5) in a Hometown Plan approved by the U.S. Department of Labor in the covered area either individually or through an association, its affirmative action obligations on all work in the Plan area (including goals and timetables) shall be in accordance with that Plan for those trades which have unions participating in the Plan. Contractors must be able to demonstrate their participation in and compliance with the provisions of any such Hometown Plan. Each Contractor or Subcontractor participating in an approved Plan is individually required to comply with its obligations under the EEO clause, and to make a good faith effort to achieve each goal under the Plan in each trade in which it has employees. The overall good faith performance by other Contractors or Subcontractors toward a goal in an approved Plan does not excuse any covered Contractor's or Subcontractor's failure to take good faith efforts to achieve the Plan goals and timetables.

(d) The Contractor shall implement the specific affirmative action standards provided in paragraphs (g) (i) through (xvi) of these specifications. The goals set forth in the solicitation from which this contract resulted are expressed as percentages of the total hours of employment and training of minority and female utilization the Contractor should reasonably be able to achieve in each construction trade in which it has employees in the covered area. Covered construction contractors performing construction work in geographical areas where they do not have a federal or federally assisted construction contract shall apply the minority and female goals established for the geographical area where the work is being performed. Goals are published periodically in the FEDERAL REGISTER in notice form, and such notices may be obtained from any Office of Federal Contract Compliance Programs office or from Federal procurement contracting officers. The Contractor is expected to make substantially uniform progress in meeting its goals in each craft during the period specified.

(e) Neither the provisions of any collective bargaining agreement, nor the failure by a union with whom the Contractor has a collective bargaining agreement, to refer either minorities or women shall excuse the Contractor's obligations under these specifications, Executive Order 11246, or the regulations promulgated pursuant thereto.

(f) In order for the nonworking training hours of apprentices and trainees to be counted in meeting the goals, such apprentices and trainees must be employed by the Contractor during the training period, and the Contractor must have made a commitment to employ the apprentices and trainees at the completion of their training, subject to the availability of employment opportuni-

ties. Trainees must be trained pursuant to training programs approved by the U.S. Department of Labor.

(g) The Contractor shall take specific affirmative actions to ensure equal employment opportunity. The evaluation of the Contractor's compliance with these specifications shall be based upon its effort to achieve maximum results from its actions. The Contractor shall document these efforts fully, and shall implement affirmative action steps at least as extensive as the following:

(i) Ensure and maintain a working environment free of harassment, intimidation, and coercion at all sites, and in all facilities at which the Contractor's employees are assigned to work. The Contractor, where possible, will assign two or more women to each construction project. The Contractor shall specifically ensure that all foremen, superintendents, and other on-site supervisory personnel are aware of and carry out the Contractor's obligation to maintain such a working environment, with specific attention to minority or female individuals working at such sites or in such facilities.

(ii) Establish and maintain a current list of minority and female recruitment sources, provide written notification to minority and female recruitment sources and to community organizations when the Contractor or its unions have employment opportunities available, and maintain a record of the organizations' responses.

(iii) Maintain a current file of the names, addresses and telephone numbers of each minority and female off-the-street applicant and minority or female referral from a union, a recruitment source or community organization and of what action was taken with respect to each such individual. If such individual was sent to the union hiring hall for referral and was not referred back to the Contractor by the union or, if referred, not employed by the Contractor, this shall be documented in the file with the reason therefore, along with whatever additional actions the Contractor may have taken.

(iv) Provide immediate written notification to the Director when the union or unions with which the Contractor has a collective bargaining agreement has not referred to the Contractor a minority person or woman sent by the Contractor, or when the Contractor has other information that the union referral process has impeded the Contractor's efforts to meet its obligations.

(v) Develop on-the-job training opportunities and/or participate in training programs for the area which expressly include minorities and women, including upgrading programs and apprenticeship and trainee programs relevant to the Contractor's employment needs, especially those programs funded or approved by the Department of Labor. The Contractor shall provide notice of these

programs to the sources compiled under (g)(ii) above.

(vi) Disseminate the Contractor's EEO policy by providing notice of the policy to unions and training programs and requesting their cooperation in assisting the Contractor in meeting its EEO obligations; by including it in any policy manual and collective bargaining agreement; by publicizing it in the company newspaper, annual report, etc.; by specific review of the policy with all management personnel and with all minority and female employees at least once a year; and by posting the company EEO policy on bulletin boards accessible to all employees at each location where construction work is performed.

(vii) Review, at least annually, the company's EEO policy and affirmative action obligations under these specifications with all employees having any responsibility for hiring, assignment, layoff, termination or other employment decisions including specific review of these items with onsite supervisory personnel such as Superintendents, General Foremen, etc., prior to the initiation of construction work at any job site. A written record shall be made and maintained identifying the time and place of these meetings, persons attending, subject matter discussed, and disposition of the subject matter.

(viii) Disseminate the Contractor's EEO policy externally by including it in any advertising in the news media, specifically including minority and female news media, and providing written notification to and discussing the Contractor's EEO policy with other Contractors and Subcontractors with whom the Contractor does or anticipates doing business.

(ix) Direct its recruitment efforts, both oral and written, to minority, female and community organizations, to schools with minority and female students and to minority and female recruitment and training organizations serving the Contractor's recruitment area and employment needs. Not later than one month prior to the date for the acceptance of applications for apprenticeship or other training by any recruitment source, the Contractor shall send written notification to organizations such as the above, describing the openings, screening procedures, and tests to be used in the selection process.

(x) Encourage present minority and female employees to recruit other minority persons and women and, where reasonable, provide after school, summer and vacation employment to minority and female youth both on the site and in other areas of a Contractor's work force.

(xi) Validate all tests and other selection requirements where there is an obligation to do so under 41 CFR Part 60–3.

(xii) Conduct, at least annually, an inventory and evaluation at least of all minority and female personnel for promotional oppor-

tunities and encourage these employees to seek or to prepare for, through appropriate training, etc., such opportunities.

(xiii) Ensure that seniority practices, job classifications, work assignments and other personnel practices, do not have a discriminatory effect by continually monitoring all personnel and employment related activities to ensure that the EEO policy and the Contractor's obligations under these specifications are being carried out.

(xiv) Ensure that all facilities and company activities are nonsegregated except that separate or single-user toilet and necessary changing facilities shall be provided to assure privacy between the sexes.

(xv) Document and maintain a record of all solicitations of offers for subcontracts from minority and female construction contractors and suppliers, including circulation of solicitations to minority and female contractor associations and other business associations.

(xvi) Conduct a review, at least annually, of all supervisors' adherence to and performance under the Contractor's EEO policies and affirmative action obligations.

(h) Contractors are encouraged to participate in voluntary associations which assist in fulfilling one or more of their affirmative action obligations (g) (i) through (xvi). The efforts of a contractor association, joint contractor-union, contractor-community, or other similar group of which the Contractor is a member and participant, may be asserted as fulfilling any one or more of its obligations under (g) (i) through (xvi) of these specifications provided that the Contractor actively participates in the group, makes every effort to assure that the group has a positive impact on the employment of minorities and women in the industry, ensures that the concrete benefits of the program are reflected in the Contractor's minority and female workforce participation, makes a good faith effort to meet its individual goals and timetables, and can provide access to documentation which demonstrates the effectiveness of actions taken on behalf of the Contractor. The obligation to comply, however, is the Contractor's and failure of such a group to fulfill an obligation shall not be a defense for the Contractor's noncompliance.

(i) A single goal for minorities and a separate single goal for women have been established. The Contractor, however, is required to provide equal employment opportunity and to take affirmative action for all minority groups, both male and female, and all women, both minority and non-minority. Consequently, the Contractor may be in violation of Executive Order 11246 if a particular group is employed in a substantially disparate manner (for example, even though the Contractor has achieved its goals for women

Rural Utilities Service, USDA

§ 1755.525

generally, the Contractor may be in violation of Executive Order 11246 if a specific minority group of women is underutilized).

(j) The Contractor shall not use the goals and timetables or affirmative action standards to discriminate against any person because of race, color, religion, sex, or national origin.

(k) The Contractor shall not enter into any Subcontract with any person or firm debarred from Government contracts pursuant to Executive Order 11246.

(l) The Contractor shall carry out such sanctions and penalties for violation of these specifications and of the Equal Opportunity Clause, including suspension, termination and cancellation of existing subcontracts as may be imposed or ordered pursuant to Executive Order 11246, as amended, and its implementing regulations, by the Office of Federal Contract Compliance Programs. Any Contractor who fails to carry out such sanctions and penalties shall be in violation of these specifications and Executive Order 11246, as amended.

(m) The Contractor, in fulfilling its obligations under these specifications, shall implement specific affirmative action steps, at least as extensive as those standards prescribed in paragraph (g) of these specifications, so as to achieve maximum results from its efforts to ensure equal employment opportunity. If the Contractor fails to comply with the requirements of Executive Order 11246, the implementing regulations, or these specifications, the Director shall proceed in accordance with 41 CFR 60-4.8.

(n) The Contractor shall designate a responsible official to monitor all employment related activity to ensure that the company EEO policy is being carried out, to submit reports relating to the provisions hereof as may be required by the Government and to keep records. Records shall at least include for each employee the name, address, telephone numbers, construction trade, union affiliation if any, employee identification number when assigned, social security number, race, sex, status (e.g., mechanic, apprentice, trainee, helper, or laborer), dates of changes in status, hours worked per week in the indicated trade, rate of pay, and locations at which the work was performed. Records shall be maintained in an easily understandable and retrievable form; however, to the degree that existing records satisfy this requirement, contractors shall not be required to maintain separate records.

(o) Nothing herein provided shall be construed as a limitation upon the application of other laws which establish different standards of compliance or upon the application of requirements for the hiring of local or other area residents (e.g. those under the Public Works Employment Act of 1977 and the Community Development Block Grant Program).

Section 4. In this Article VI—

(a) The term “Contractor” shall also mean “Bidder” or “Subcontractor” as applicable.

(b) The provisions of sections 2 & 3 are applicable to the extent required by law. In determining whether these Sections are applicable, reference should be made to Office of Federal Contract Compliance Programs regulations (41 CFR part 60).

Article VII

Miscellaneous

Section 1. Definitions.

The term “Completion of the Contract” shall mean accomplishment of Completion of the Project for all central offices (and associated remote switching terminals), features and services listed under Column 1, “Project,” in Article I, Section 1, and all alternates accepted by the Owner, on the Owner’s Acceptance.

The term “Completion of Installation” shall mean full performance by the Bidder of the Bidder’s obligation under the Contract and all amendments and revisions thereof, for a Project, except that it shall not include the acceptance tests nor performance of the Bidder’s obligations in respect of (i) releases of lien and Certificate of Contractor under Article III, section 2, hereof and (ii) other final documents. The actual date of Completion of Installation shall be the date the Bidder submits to the Owner written notification that the Project is completed in conformance with the Specifications and ready for the Owner’s acceptance inspection and tests as provided for under Article II, section 4.

The term “Completion of the Project” shall mean full performance by the Bidder of the Bidder’s obligations herein set out and all amendments and revisions thereof for a central office (and all associated remote switching terminals), feature or service. The scheduled date for Completion of the Project is sixty (60) days after Completion of Installation as specified under Column 7, “Completion of Installation,” in Article I, section 1, as amended or adjusted under Article II, section 1, and section 4. The scheduled date for Completion of the Project is the date from which liquidated damages are computed. The actual date of Completion of the Project shall be the date of the receipt by the Owner from the Bidder of (a) all documents listed in Article III, section 2, (b) other final documents, and (c) written notification that all deficiencies listed on the RUS Form 517, Results of Acceptance Test, have been corrected; provided, that the final inspection and tests by the Owner finds the deficiencies satisfactorily resolved. If the deficiencies have not been satisfactorily resolved, the actual date of Completion of the Project shall be the date that the deficiencies are fully and satisfactorily resolved as determined by subsequent Owner’s tests. The Certificate of

§ 1755.525

Completion approved and signed by the Owner and approved in writing by the Administrator shall be conclusive evidence as to the fact of Completion of the Project and the date thereof. Full compliance with the procedure for "Completion of the Project" and an individual Certificate of Completion is required for each Project listed under Column 1, "Project," in Article I, section 1.

The Contract shall consist of the Notice and Instructions to Bidders, the Bidder's Proposal and the Owner's Acceptance, the Contractor's Bond and the Specifications.

The term "days" shall mean calendar days.

The term "minor errors or irregularities" shall mean a defect or variation in a Bidder's bid that is a matter of form and not of substance. Errors or irregularities are "minor" if they can be corrected or waived without being prejudicial to other Bidders and when they do not affect the price, quantity, quality, or timeliness of construction. Unless otherwise noted, the borrower determines whether an error or irregularity is "minor."

The term "placed in service" shall mean used by the Owner to earn revenue.

The term "Project" shall mean a central office and all associated remote switching terminals (if any), a remote switching terminal if purchased without a supporting central office, a feature (or group of features), or a service (or group of services), which is listed under Column 1, "Project," in Article I, section 1. The only instance in which a remote switching terminal can constitute a separate Project is where such remote switching terminal is purchased with associated modifications to its supporting host switch but no other modifications to the host switch are specified. A Project will have a single completion schedule listed under Column 7, "Completion of Installation," in Article I, section 1, and a single liquidated damages amount shown in Article V, section 2. The Contract may consist of one or more Projects.

The term "Software" shall mean computer programs contained on a tape, disc, semiconductor device or other memory device or system memory consisting of logic instructions and instruction sequences in machine-readable object code, which manipulate data in the central processor, control and perform input/output operations, perform error diagnostic and recovery routines, control call processing, and perform peripheral control, and administrative and maintenance functions; as well as associated documentation, excluding source code, used to describe, maintain and use the programs provided under the Contract.

The term "Specifications" shall mean the minimum performance requirements of the Owner as contained in the documents listed below, which are either attached or become a part of the Contract by reference, as amended by specific written exceptions contained

7 CFR Ch. XVII (1-1-97 Edition)

in the Bidder's proposal and accepted by the Owner and the Administrator:

RUS Form _____, dated _____

RUS Form _____, dated _____

Section 2. Continuing Equipment Support—Parts, Service, and Software. In addition to warranty repairs and replacement, the Bidder shall offer repair service and repair parts to the Owner in accordance with the Bidder's practices and terms then in effect, for the Bidder's manufactured equipment furnished pursuant to this Agreement. Such repair service or repair parts shall be available for as long as the Bidder is manufacturing or stocking such equipment, or for no less than eight (8) years after the Bidder has ceased manufacturing or offering for sale such equipment. The Bidder shall also offer software support services to the Owner in accordance with the Bidder's practices, terms, and charges then in effect, but in any event for no less than five (5) years after the Bidder has ceased manufacturing or offering for sale such software.

Section 3. Materials and Supplies. The Bidder shall use only such unmanufactured articles, materials and supplies as have been mined or produced in the United States, Mexico or Canada and only such manufactured articles, materials and supplies as have been manufactured in the United States, Mexico or Canada substantially all from articles, materials or supplies mined, produced or manufactured, as the case may be, in the United States, Mexico or Canada; provided that foreign articles, materials or supplies may be used in the event and to the extent that the Administrator shall expressly authorize in writing such use pursuant to the provisions of the Rural Electrification Act of 1938, being Title IV of Public Resolution No. 122, 75th Congress, approved June 21, 1938. The Bidder agrees to submit to the Owner such certificate or certificates, signed by the Bidder and all subcontractors, with respect to compliance with the foregoing provision as the Administrator from time to time may require.

Section 4. Bond. The Bidder shall furnish to the Owner a Contractor's Bond in conformance with the requirements of 7 CFR part 1788, subpart C.

Section 5. Confidentiality. All information supplied by the Bidder to the Owner which bears a legend or notice restricting its use, copying, or dissemination, except insofar as it may be in the public domain through no acts attributable to the Owner, shall be treated by the Owner as confidential information, and the Owner shall not reproduce any such information except for its own internal use and as authorized by this Contract, and shall use any information only for archival backup, in-house training, operating, maintenance and administrative purposes and in conjunction with its use of the

Rural Utilities Service, USDA

§ 1755.525

equipment, materials and software furnished hereunder. All information supplied to the Bidder by the Owner which bears a legend or notice restricting its use, copying, or dissemination, except insofar as it may be in the public domain through no acts attributable to the Bidder, shall be treated by the Bidder as confidential information, and shall not be used by the Bidder for any purpose adverse to the interests of the Owner, and shall not be reproduced or distributed by the Bidder except for the Bidder's use in its performance under this Contract. The foregoing confidentiality obligations do not apply to information which is independently developed by the receiving party or which is lawfully received by the receiving party free of restriction from another source having a right to so furnish such information, or is already known to the receiving party at the time of disclosure free of restriction. If the Bidder has failed to provide continuing equipment support as described in Article VII, section 2, the Owner is released from this obligation. This provision does not restrict release of information by the United States of America pursuant to the Freedom of Information Act or other legal process.

Section 6. Entire Agreement. The terms and conditions of this Contract as approved by RUS supersede all prior oral or written understandings between the parties. There are no understandings or representations, expressed or implied, not expressly set forth herein.

Section 7. Survival of Obligations. The rights and obligations of the parties, which by their nature, would continue beyond the termination, cancellation, or expiration of this Contract, shall survive such termination or expiration.

Section 8. Non-Waiver. No waiver of any terms or conditions of this Contract, or the failure of either party to enforce strictly any such term or condition on one or more occasions, shall be construed as a waiver of the same or of any other terms or conditions of this Contract on any other occasion.

Section 9. Releases Void. Neither party shall require releases or waivers of any personal rights from representatives or employees of the other in connection with visits to its premises, nor shall such parties plead such releases or waivers in any action or proceeding.

Section 10. License. The Bidder shall comply with all applicable construction codes.

(a) The Bidder warrants that it possesses contractor's license number _____ issued to it by the State of _____ in which the project(s) is located, and said license expires on _____, 19____.

(b) The Bidder warrants that no license is required in the state in which the Project(s) is located.

(Bidder shall cross out that subsection that does not apply)

Section 11. Nonassignment of Contract. The Bidder shall not assign the Contract, effected by acceptance of this Proposal, or any part hereof, or enter into any contract with any person, firm or corporation, for the performance of the Bidder's obligations hereunder, or any part hereof, without the approval in writing of the Owner, the Surety, and the Administrator. However, the Bidder may subcontract the whole or any part of the installation work to be performed at the installation site, (as distinguished from furnishing and delivery of equipment and materials), provided that; (a) the Bidder shall remain responsible for the performance thereof and (b) the Bidder shall obtain the consent of the surety to such subcontract. A copy of such consent shall be submitted to the Owner and the Administrator.

Section 12. Choice of Law. The rights and obligations of the parties and all interpretations and performance of this Contract shall be governed in all respects by the laws of the State of _____ except for its rules with respect to the conflict of laws.

Section 13. Approval of the Administrator. The acceptance of this proposal by the Owner shall not create a contract unless such acceptance shall be approved in writing by the Administrator within ninety (90) days after the date hereof:

By _____
(Signature of Bidder)

(Name—Type or Print)

(Title)

(Company Name of Bidder)

(Address of Bidder)

Attest: _____

(Secretary)

(Date)

The Proposal must be signed with the full name of the Bidder. In the case of a partnership the Proposal must be signed in the firm name by each partner. In the case of a corporation the Proposal must be signed in the corporate name by a duly authorized officer and the Corporate seal affixed and attested by the Secretary of the Corporation.

(If executed by other than the President, a Vice-President, a partner or the individual owner, a power of attorney or other legally acceptable document authorizing execution shall accompany this contract, unless such power of attorney is on file with RUS.)

§ 1755.700

Acceptance

DATE OF ACCEPTANCE

[End of clause]

(The information collection and record-keeping requirements of this section have been approved by the Office of Management and Budget (OMB) under control number 0572-0059)

[59 FR 31126, June 17, 1994, as amended at 60 FR 1711, Jan. 5, 1995]

§§ 1755.526—1755.699 [Reserved]

§ 1755.700 RUS specification for aerial service wires.

§§ 1755.701 through 1755.704 cover the requirements for aerial service wires.

[61 FR 26074, May 24, 1996]

§ 1755.701 Scope.

(a) This section covers the requirements for aerial service wires intended for aerial subscriber drops.

(b) The aerial service wires can be either copper coated steel reinforced or nonmetallic reinforced designs.

(c) For the copper coated steel reinforced design, the reinforcing members are the conductors.

(1) The conductors are solid copper-covered steel wires.

(2) The wire structure is completed by insulating the conductors with an overall extruded plastic insulating compound.

7 CFR Ch. XVII (1–1–97 Edition)

(d) For the nonmetallic reinforced design, the conductors are solid copper individually insulated with an extruded solid insulating compound.

(1) The insulated conductors are either laid parallel (two conductor design only) or twisted into pairs (a star-quad configuration is permitted for two pair wires).

(2) The wire structure is completed by the application of nonmetallic reinforcing members and an overall plastic jacket.

(e) All wires sold to RUS borrowers for projects involving RUS loan funds under §§ 1755.700 through 1755.704 must be accepted by RUS Technical Standards Committee “A” (Telecommunications). For wires manufactured to the specification of §§ 1755.700 through 1755.704, all design changes to an accepted design must be submitted for acceptance. RUS will be the sole authority on what constitutes a design change.

(f) Materials, manufacturing techniques, or wire designs not specifically addressed by §§ 1755.700 through 1755.704 may be allowed if accepted by RUS. Justification for acceptance of modified materials, manufacturing techniques, or wire designs must be provided to substantiate product utility and long term stability and endurance.

[61 FR 26074, May 24, 1996]

§ 1755.702 Copper coated steel reinforced (CCSR) aerial service wire.

(a) *Conductors.* (1) Each conductor shall comply with the requirements specified in the American National Standard Institute/Insulated Cable Engineers Association, Inc. (ANSI/ICEA) S-89-648-1993, paragraphs 2.1 through 2.1.5. The ANSI/ICEA S-89-648-1993 Standard For Telecommunications Aerial Service Wire, Technical Requirements (approved by ANSI July 11, 1994) is incorporated by reference in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of ANSI/ICEA S-89-648-1993 are available for inspection during normal business hours at RUS, room 2845, U.S. Department of Agriculture, Washington, DC 20250-1500 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. Copies are available from ICEA, P. O. Box 440, South Yarmouth,

Rural Utilities Service, USDA

§1755.702

MA 02664, telephone number (508) 394-4424.

(2) Factory joints in conductors shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 2.1.6.

(b) *Conductor insulation.* (1) The raw materials used for the conductor insulation shall comply with the requirements specified in ANSI/ICEA S-89-648-1993, paragraph 3.1.1.

(2) The raw materials shall be accepted by RUS prior to their use.

(3) The finished conductor insulation shall be free from holes, splits, blisters, or other imperfections and shall be as smooth as is consistent with best commercial practice.

(4) The finished conductor insulation shall comply with the requirements specified in ANSI/ICEA S-89-648-1993, paragraphs 3.1.5 through 3.1.5.4.

(5) The insulation shall have a minimum spot thickness of not less than 0.9 millimeters (mm) (0.03 inches (in.)) at any point.

(c) *Wire assembly.* (1) The two conductors shall be insulated in parallel to form an integral configuration.

(2) The finished wire assembly shall be either a flat or a notched oval. Other finished wire assemblies may be used provided that they are accepted by RUS prior to their use.

(3) The overall dimensions of the finished wire assembly shall be in accordance with the following requirements:

Diameter	Dimensions	
	Minimum mm (in.)	Maximum mm (in.)
Major	5.5 (0.22)	8.0 (0.31)
Minor	3.0 (0.12)	5.0 (0.19)

(d) *Conductor marking.* The insulated conductors of a finished wire shall be marked in accordance with the requirements specified in ANSI/ICEA S-89-648-1993, paragraph 3.1.4.

(e) *Electrical requirements.*—(1) *Conductor resistance.* The direct current (dc) resistance of each conductor in a completed CCSR aerial service wire shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 7.1.2.

(2) *Wet mutual capacitance.* The wet mutual capacitance of the completed CCSR aerial service wire shall comply with the requirement specified in

ANSI/ICEA S-89-648-1993, paragraph 7.1.3.

(3) *Wet attenuation.* The wet attenuation of the completed CCSR aerial service wire shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 7.1.4.

(4) *Wet insulation resistance.* The wet insulation resistance of the completed CCSR aerial service wire shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 7.1.5.

(5) *Dielectric strength.* (i) The wet dielectric strength between conductors and between each conductor of the completed CCSR aerial service wire and the surrounding water shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 7.1.6.

(ii) The dry dielectric strength between conductors of the completed CCSR aerial service wire shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 7.1.7.

(6) *Fusing coordination.* The completed CCSR aerial service wire shall comply with the fusing coordination requirement specified in ANSI/ICEA S-89-648-1993, paragraph 7.1.8.

(7) *Insulation imperfections.* Each length of completed CCSR aerial service wire shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 7.1.9.

(f) *Mechanical requirements.*—(1) *Impact test.* (i) All CCSR aerial service wires manufactured in accordance with this section shall comply with the unaged impact test specified in ANSI/ICEA S-89-648-1993, paragraph 8.1.2.

(ii) All CCSR aerial service wires manufactured in accordance with this section shall comply with the aged impact test specified in ANSI/ICEA S-89-648-1993, paragraph 8.1.3.

(2) *Abrasion resistance test.* All CCSR aerial service wires manufactured in accordance with this section shall comply with the abrasion resistance test specified in ANSI/ICEA S-89-648-1993, paragraph 8.1.4.

(3) *Static load test.* All CCSR aerial service wires manufactured in accordance with this section shall comply with the static load test specified in

§ 1755.703

ANSI/ICEA S-89-648-1993, paragraph 8.1.5.

(4) *Plasticizer compatibility test.* All CCSR aerial service wires manufactured in accordance with this section shall comply with the plasticizer compatibility test specified in ANSI/ICEA S-89-648-1993, paragraph 8.1.8.

(g) *Environmental requirements.*—(1) *Cold temperature handling test.* (i) All CCSR aerial service wires manufactured in accordance with this section shall comply with the unaged cold temperature handling test specified in ANSI/ICEA S-89-648-1993, paragraph 8.2.1.

(ii) All CCSR aerial service wires manufactured in accordance with this section shall comply with the aged cold temperature handling test specified in ANSI/ICEA S-89-648-1993, paragraph 8.2.2.

(2) *Light absorption test.* All CCSR aerial service wires manufactured in accordance with this section shall comply with the light absorption test specified in ANSI/ICEA S-89-648-1993, paragraph 8.2.3.

(3) *Low temperature separation test.* All CCSR aerial service wires manufactured in accordance with this section shall comply with the low temperature separation test specified in ANSI/ICEA S-89-648-1993, paragraph 8.2.4.

(4) *Flammability test.* All CCSR aerial service wires manufactured in accordance with this section shall comply with the flammability test specified in ANSI/ICEA S-89-648-1993, paragraph 8.3.

(5) *Wire listing.* All CCSR aerial service wires manufactured in accordance with this section shall comply with the listing requirements specified in ANSI/ICEA S-89-648-1993, paragraph 8.4.

(h) *Identification marker.* Each length of CCSR aerial service wire shall be identified in accordance with ANSI/ICEA S-89-648-1993, paragraph 9.1.4. When surface marking is employed, the color of the initial marking shall be either white or silver.

(i) *Length marking (optional).* (1) Sequentially numbered length marking of the completed CCSR aerial service wire may be used at the option of the manufacturer unless specified by the end user.

(2) When sequentially numbered length markings are used, the length

7 CFR Ch. XVII (1–1–97 Edition)

markings shall be in accordance with ANSI/ICEA S-89-648-1993, paragraph 9.1.5. The color of the initial marking shall be either white or silver.

(j) *Durability of marking.* The durability of the marking of the CCSR aerial service wire shall comply with the requirements specified in ANSI/ICEA S-89-648-1993, paragraph 9.1.6.

[61 FR 26075, May 24, 1996]

§ 1755.703 Nonmetallic reinforced (NMR) aerial service wire.

(a) *Conductors.* (1) Each conductor shall comply with the requirements specified in ANSI/ICEA S-89-648-1993, paragraphs 2.2 and 2.2.1. The ANSI/ICEA S-89-648-1993 Standard For Telecommunications Aerial Service Wire, Technical Requirements (approved by ANSI July 11, 1994) is incorporated by reference in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of ANSI/ICEA S-89-648-1993 are available for inspection during normal business hours at RUS, room 2845, U.S. Department of Agriculture, Washington, DC 20250-1500 or at the Office of the FEDERAL REGISTER, 800 North Capitol Street, NW., suite 700, Washington, DC. Copies are available from ICEA, P. O. Box 440, South Yarmouth, MA 02664, telephone number (508) 394-4424.

(2) Factory joints made in the conductors during the manufacturing process shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 2.2.2.

(b) *Conductor insulation.* (1) The raw materials used for the conductor insulation shall comply with the requirements specified in ANSI/ICEA S-89-648-1993, paragraphs 3.2 through 3.2.2.

(2) The finished conductor insulation shall comply with the requirements specified in ANSI/ICEA S-89-648-1993, paragraph 3.2.3.

(3) The dimensions of the insulated conductors shall comply with the requirements specified in ANSI/ICEA S-89-648-1993, paragraph 3.2.3.1.

(4) The colors of the insulation shall comply with the requirements specified in ANSI/ICEA S-89-648-1993, paragraph 3.2.3.2.

(5) A permissible overall performance level of faults in conductor insulation shall comply with the requirement specified in ANSI/ICEA S-89-648-1993,

paragraph 3.2.4.6. The length count and number of faults shall be recorded. The information shall be retained for a period of 6 months and be available for review by RUS when requested.

(6) Repairs to the conductor insulation during manufacture are permissible. The method of repair shall be accepted by RUS prior to its use. The repaired insulation shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 3.2.3.3.

(7) All repaired sections of insulation shall be retested in the same manner as originally tested for compliance with paragraph (b)(5) of this section.

(8) The colored insulating material removed from or tested on the conductor, from a finished wire shall comply with the requirements specified in ANSI/ICEA S-89-648-1993, paragraphs 3.2.4 through 3.2.4.5.

(c) *Identification of pairs and layup of pairs.* (1) The insulation shall be colored coded to identify:

(i) The tip and ring conductor of each pair; and

(ii) Each pair in the completed wire.

(2) The colors to be used in the pairs together with the pair numbers shall be in accordance with the table specified in ANSI/ICEA S-89-648-1993, paragraph 4.1.1.

(3) The insulated conductors shall be either layed parallel (two conductor design only) or twisted into pairs.

(4) When using parallel conductors for the two conductor design, the parallel conductors shall be designed to enable the wire to meet the electrical requirements specified in paragraph (g) of this section.

(5) When twisted pairs are used, the following requirements shall be met:

(i) The pair twists shall be designed to enable the wire to meet the electrical requirements specified in paragraph (g) of this section; and

(ii) The average length of pair twists in any pair in the finished wire, when measured on any 3 meter (10 foot) length, shall not exceed the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 4.1.

(6) An alternative method of forming the two-pair wire is the use of a star-quad configuration.

(i) The assembly of the star-quad shall be such as to enable the wire to

meet the electrical requirements specified in paragraph (g) of this section.

(ii) The star-quad configuration shall be assembled in accordance with ANSI/ICEA S-89-648-1993, paragraph 4.1.2.

(iii) The average length of twist for the star-quad in the finished wire, when measured on any 3 meter (10 foot) length, shall not exceed the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 4.1.

(iv) The color scheme used to provide identification of the tip and ring conductors of each pair in the star-quad shall comply with the table specified in ANSI/ICEA S-89-648-1993, paragraph 4.1.2.

(d) *Strength members.* The strength members shall comply with the requirements specified in ANSI/ICEA S-89-648-1993, paragraphs 6.1 and 6.1.1.

(e) *Wire jacket.* (1) The jacket shall comply with the requirements specified in ANSI/ICEA S-89-648-1993, paragraphs 5.1 and 5.1.1.

(2) The jacket raw materials shall be accepted by RUS prior to their use.

(f) *Wire assembly.* The finished wire assembly shall be in accordance with ANSI/ICEA S-89-648-1993, paragraph 5.1.3 and Figure 5-1.

(g) *Electrical requirements.*—(1) *Conductor resistance.* The dc resistance of each conductor in a completed NMR aerial service wire shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 7.2.2.

(2) *Resistance unbalance.* (i) The dc resistance unbalance between the two conductors of any pair in a completed NMR aerial service wire and the average resistance unbalance of all pairs in a Quality Control Lot shall comply with the requirements specified in ANSI/ICEA S-89-648-1993, paragraph 7.2.3.

(ii) The resistance unbalance between tip and ring conductors shall be random with respect to the direction of unbalance. That is, the resistance of the tip conductors shall not be consistently higher with respect to the ring conductors and vice versa.

(3) *Dry mutual capacitance.* The dry mutual capacitance of the completed NMR aerial service wire shall comply with the requirements specified in ANSI/ICEA S-89-648-1993, paragraph 7.2.4, Type 1.

(4) *Pair-to-pair capacitance unbalance.* The pair-to-pair capacitance unbalance as measured on the completed NMR aerial service wire shall comply with the requirements specified in ANSI/ICEA S-89-648-1993, paragraph 7.2.5.

(5) *Attenuation.* (i) The dry attenuation of the completed NMR aerial service wire shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 7.2.7.

(ii) The wet attenuation of the completed NMR aerial service wire shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 7.2.8.

(6) *Insulation resistance.* (i) The dry insulation resistance of the completed NMR aerial service wire shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 7.2.9.

(ii) The wet insulation resistance of the completed NMR aerial service wire shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 7.2.10.

(7) *Wet dielectric strength.* The wet dielectric strength between conductors and between each conductor of the completed NMR aerial service wire and the surrounding water shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 7.2.11.

(8) *Fusing coordination.* The completed NMR aerial service wire shall comply with the fusing coordination requirement specified in ANSI/ICEA S-89-648-1993, paragraph 7.2.13.

(9) *Crosstalk loss.* (i) The output-to-output far-end crosstalk loss (FEXT) for any pair of completed NMR aerial service wire shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 7.2.14.

(ii) The input-to-input near-end crosstalk loss (NEXT) for any pair of completed NMR aerial service wire shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 7.2.14.

(h) *Mechanical requirements—(1) Impact test.* (i) All NMR aerial service wires manufactured in accordance with this section shall comply with the unaged impact test specified in § 1755.702(f)(1)(i).

(ii) All NMR aerial service wires manufactured in accordance with this section shall comply with the aged impact test specified in § 1755.702(f)(1)(ii).

(2) *Abrasion resistance test.* All NMR aerial service wires manufactured in accordance with this section shall comply with the abrasion resistance test specified in § 1755.702(f)(2).

(3) *Static load test.* All NMR aerial service wires manufactured in accordance with this section shall comply with the static load test specified in § 1755.702(f)(3).

(4) *Elongation test.* All NMR aerial service wires manufactured in accordance with this section shall comply with the elongation test specified in ANSI/ICEA S-89-648-1993, paragraph 8.1.7.

(5) *Plasticizer compatibility test.* All NMR aerial service wires manufactured in accordance with this section shall comply with the plasticizer compatibility test specified in § 1755.702(f)(4).

(i) *Environmental requirements.—(1) Cold temperature handling test.* (i) All NMR aerial service wires manufactured in accordance with this section shall comply with the unaged cold temperature handling test specified in § 1755.702(g)(1)(i).

(ii) All NMR aerial service wires manufactured in accordance with this section shall comply with the aged cold temperature handling test specified in § 1755.702(g)(1)(ii).

(2) *Light absorption test.* All NMR aerial service wires manufactured in accordance with this section shall comply with the light absorption test specified in § 1755.702(g)(2).

(3) *Flammability test.* All NMR aerial service wires manufactured in accordance with this section shall comply with the flammability test specified in § 1755.702(g)(4).

(4) *Wire listing.* All NMR aerial service wires manufactured in accordance with this section shall comply with the listing requirements specified in § 1755.702(g)(5).

(j) *Ripcord (optional).* (1) A ripcord may be used in the NMR aerial service wire structure at the option of the manufacturer unless specified by the end user.

(2) When a ripcord is used it shall comply with the requirements specified

Rural Utilities Service, USDA

§1755.704

in ANSI/ICEA S-89-648-1993, paragraphs 4.2 through 4.2.3.

(k) *Identification marker.* Each length of NMR aerial service wire shall be identified in accordance with ANSI/ICEA S-89-648-1993, paragraphs 9.1 through 9.1.4. When surface marking is employed, the color of the initial marking shall be either white or silver.

(l) *Length marking (optional).* (1) Sequentially numbered length marking of the completed NMR aerial service wire may be used at the option of the manufacturer unless specified by the end user.

(2) When sequentially numbered length markings are used, the length markings shall be in accordance with in accordance with §1755.702(i)(2).

(m) *Durability of marking.* The durability of the marking of the NMR aerial service wire shall comply with the requirements specified in §1755.702(j).

[61 FR 26076, May 24, 1996]

§1755.704 Requirements applicable to both CCSR and NMR aerial service wires.

(a) *Acceptance testing.* (1) The tests described in §§1755.700 through 1755.704 are intended for acceptance of wire designs and major modifications of accepted designs. What constitutes a major modification is at the discretion of RUS. These tests are intended to show the inherent capability of the manufacturer to produce wire products having long life and stability.

(2) For initial acceptance, the manufacturer shall:

(i) Certify that the product fully complies with each paragraph in §§1755.700 through 1755.704;

(ii) Agree to periodic plant inspections by RUS;

(iii) Certify whether the product complies with the domestic origin manufacturing provisions of the "Buy American" requirements of the Rural Electrification Act of 1938 (7 U.S.C. 903 note), as amended (the "REA Buy-American provision");

(iv) Submit at least three written user testimonials concerning field performance of the product; and

(v) Provide any other nonproprietary data deemed necessary by the Chief, Outside Plant Branch (Telecommunications).

(3) In order for RUS to consider a manufacturer's request that a product be requalified, the manufacturer shall certify not later than June 30 of the year in which requalification is required, that the product:

(i) Fully complies with each paragraph in §§1755.700 through 1755.704; and

(ii) Does or does not comply with the domestic origin manufacturing provisions of the REA Buy American provisions. The required certifications shall be dated within 90 days of the submission.

(4) Initial and requalification acceptance requests should be addressed to: Chairman, Technical Standards Committee "A" (Telecommunications), Telecommunications Standards Division, Rural Utilities Service, AG Box 1598, Washington, DC 20250-1598.

(b) *Extent of testing—(1) Tests on 100 percent of completed wire.* (i) Each conductor in the completed CCSR and NMR aerial service wire shall be tested for continuity in accordance with ANSI/ICEA S-89-648-1993, paragraphs 7.1.1 and 7.2.1, respectively. The ANSI/ICEA S-89-648-1993 Standard For Telecommunications Aerial Service Wire, Technical Requirements (approved by ANSI July 11, 1994) is incorporated by reference in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of ANSI/ICEA S-89-648-1993 are available for inspection during normal business hours at RUS, room 2845, U.S. Department of Agriculture, Washington, DC 20250-1500 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. Copies are available from ICEA, P. O. Box 440, South Yarmouth, MA 02664, telephone number (508) 394-4424.

(ii) Each conductor in the completed CCSR and NMR aerial service wire shall be tested for shorts in accordance with ANSI/ICEA S-89-648-1993, paragraphs 7.1.1 and 7.2.1, respectively.

(iii) Each length of completed CCSR and NMR aerial service wire shall be tested for insulation imperfections in accordance with §1755.702(e)(7) and §1755.703(b)(5), respectively.

(2) *Capability tests.* Tests on a quality assurance basis shall be made as frequently as is required for each manufacturer to determine and maintain compliance with:

- (i) Performance of the conductors;
- (ii) Performance of the conductor insulation and jacket material;
- (iii) Sequential marking and lettering;
- (iv) Mutual capacitance, capacitance unbalance, attenuation, and crosstalk;
- (v) Conductor resistance, resistance unbalance, and insulation resistance;
- (vi) Dielectric strength and fusing coordination;
- (vii) Impact, abrasion, static load, elongation, and plasticizer compatibility tests; and
- (viii) Cold temperature handling, light absorption, low temperature separation, and flammability tests.

(c) *Summary of records of electrical and physical tests.* (1) Each manufacturer shall maintain suitable summary records for a period of at least 3 years of all electrical and physical tests required on completed wire as set forth in paragraph (b) of this section. The test data for a particular lot of aerial service wire shall be in a form such that it may be readily available to the purchaser or to RUS upon request.

(2) Measurements and computed values shall be rounded off to the number of places or figures specified for the requirement according to ANSI/ICEA S-89-648-1993, paragraph 1.3.

(d) *Manufacturing irregularities.* (1) Repairs to the insulation of CCSR aerial service wires are not permitted in wires supplied to end users under §§ 1755.700 through 1755.704.

(2) Repairs to the jacket of NMR aerial service wires are not permitted in wires supplied to end users under §§ 1755.700 through 1755.704.

(e) *Splicing.* Splicing of completed CCSR and NMR aerial service wires shall comply with the requirement specified in ANSI/ICEA S-89-648-1993, paragraph 8.1.1.

(f) *Preparation for shipment.* (1) CCSR and NMR aerial service wire shall be shipped either in coils or on reels.

(2) When CCSR and NMR aerial service wires are shipped on reels the following provisions shall apply:

(i) The diameter of the drum shall be large enough to prevent damage to the wire from reeling or unreeling. The reels shall be substantial and so constructed as to prevent damage to the wire during shipment and handling;

(ii) A waterproof corrugated board or other suitable means of protection accepted by RUS prior to its use may be applied to the reel. If the waterproof corrugated board or other suitable material is used for protection, it shall be suitably secured in place to prevent damage to the wire during storage and handling. The use of the waterproof corrugated board or other suitable means of protection shall be at the option of the manufacturer unless specified by the end user;

(iii) The outer end of the wire shall be securely fastened to the reel head so as to prevent the wire from becoming loose in transit. The inner end of the wire shall be securely fastened in such a way as to make it readily available if required for electrical testing. Spikes, staples, or other fastening devices which penetrate the conductor insulation of the CCSR aerial service wire and the jacket of the NMR aerial service wire shall not be used. The method of fastening the wire ends shall be accepted by RUS prior to their use;

(iv) Each length of wire shall be wound on a separate reel;

(v) Each reel shall be plainly marked to indicate the direction in which it should be rolled to prevent loosening of the wire on the reel; and

(vi) Each reel shall be stenciled or labeled on either one or both sides with the following information:

(A) Customer order number;

(B) Manufacturer's name and product code;

(C) Factory reel number and year of manufacture;

(D) Gauge of conductors and pair size of wire;

(E) Length of wire; and

(F) RUS designation letter "K."

(3) When CCSR and NMR aerial service wires are shipped in coils the following provisions shall apply:

(i) The diameter of the coil shall be large enough to prevent damage to the wire from coiling or uncoiling;

(ii) The nominal length of the wire in a coil shall be 305 meters (1,000 feet). No coil shall be less than 290 meters (950 feet) long or more than 460 meters (1,500 feet) long; however, 25 percent of the total number of coils may be less than 305 meters (1,000 feet);

Rural Utilities Service, USDA

§1755.860

(iii) The coils of wire shall be wound securely with strong tape in four separate evenly spaced places;

(iv) The coils may be protected from damage by wrapping the coil with heavy paper, burlap, or other suitable material accepted by RUS prior to its use. The use of the heavy paper, burlap, or other suitable means of protection shall be at the option of the manufacturer unless specified by the end user; and

(v) Each coil shall be tagged with the following information:

(A) Customer order number;

(B) Manufacturer's name and product code;

(C) Year of manufacture;

(D) Gauge of conductors and pair size of wire;

(E) Length of wire; and

(F) RUS designation letter "K."

(4) In lieu of wrapping the coil with heavy paper, burlap, or other suitable material, the coil may be packaged in a moisture resistant carton.

(5) When the coils are shipped in moisture resistant cartons, each carton shall be marked with the information specified in paragraphs (f)(3)(v)(A) through (f)(3)(v)(F) of this section.

(6) Other methods of shipment may be used if accepted by RUS prior to their use.

(7) When NMR aerial service wire is shipped, the ends of the wire shall be sealed in accordance with ANSI/ICEA S-89-648-1993, paragraph 9.2.

[61 FR 26077, May 24, 1996]

§§1755.705—1755.859 [Reserved]

§1755.860 RUS specification for filled buried wires.

(a) *Scope.* (1) This section covers the requirements for filled buried wires intended for direct burial as a subscriber drop and/or distribution wire.

(i) The conductors are solid copper, individually insulated with an extruded solid insulating compound.

(ii) The insulated conductors are twisted into pairs (a star-quad configuration is permitted for the two pair wires) which are then stranded or oscillated to form a cylindrical core.

(iii) A moisture resistant filling compound is applied to the stranded conductors completely covering the in-

sulated conductors and filling the interstices between the pairs.

(iv) The wire structure is completed by the application of an optional core wrapping material, an inner jacket, a flooding compound, a shield, a flooding compound, and an overall plastic jacket.

(2) The number of pairs and gauge size of conductors which are used within the RUS program are provided in the following table:

American Wire Gauge (AWG)	22	24
Pairs	2	2
	3	3

(3) All wires sold to RUS borrowers for projects involving RUS loan funds under this section must be accepted by RUS Technical Standards Committee "A" (Telephone). For wires manufactured to the specification of this section, all design changes to an accepted design must be submitted for acceptance. RUS will be the sole authority on what constitutes a design change.

(4) Materials, manufacturing techniques, or wire designs not specifically addressed by this section may be allowed if accepted by RUS. Justification for acceptance of modified materials, manufacturing techniques, or wire designs must be provided to substantiate product utility and long term stability and endurance.

(5) The American National Standards Institute/Electronic Industries Association (ANSI/EIA) 359-A-84, EIA Standard Colors for Color Identification and Coding, referenced in this section is incorporated by reference by RUS. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of ANSI/EIA 359-A-84 are available for inspection during normal business hours at RUS, room 2845, U.S. Department of Agriculture, Washington, DC 20250-1500 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. Copies are available from EIA, 2001 Pennsylvania Avenue, NW., suite 900, Washington, DC 20006, telephone number (202) 457-4966.

(6) American Society for Testing and Materials specifications (ASTM) A 505-87, Standard Specification for Steel,

§ 1755.860

Sheet and Strip, Alloy, Hot-Rolled and Cold-Rolled, General Requirements for; ASTM B 3-90, Standard Specification for Soft or Annealed Copper Wire; ASTM B 193-87, Standard Test Method for Resistivity of Electrical Conductor Materials; ASTM B 224-91, Standard Classification of Coppers; ASTM B 694-86, Standard Specification for Copper, Copper Alloy, and Copper-Clad Stainless Steel Sheet and Strip for Electrical Cable Shielding; ASTM D 150-87, Standard Test Methods for A-C Loss Characteristics and Permittivity (Dielectric Constant) of Solid Electrical Insulating Materials; ASTM D 257-91, Standard Test Methods for D-C Resistance or Conductance of Insulating Materials; ASTM D 1238-90b, Standard Test Method for Flow Rates of Thermoplastics by Extrusion Plastometer; ASTM D 1248-84(1989), Standard Specification for Polyethylene Plastics Molding and Extrusion Materials; ASTM D 1535-89, Standard Test Method for Specifying Color by the Munsell System; ASTM D 3349-86, Standard Test Method for Absorption Coefficient of Carbon Black Pigmented Ethylene Plastic; ASTM D 4101-82(1988), Standard Specification for Propylene Plastic Injection and Extrusion Materials; ASTM D 4565-90a, Standard Test Methods for Physical and Environmental Performance Properties of Insulations and Jackets for Telecommunications Wire and Cable; ASTM D 4566-90, Standard Test Methods for Electrical Performance Properties of Insulations and Jackets for Telecommunications Wire and Cable; ASTM D 4568-86, Standard Test Methods for Evaluating Compatibility between Cable Filling and Flooding Compounds and Polyolefin Cable Materials; ASTM D 4872-88, Standard Test Method for Dielectric Testing of Wire and Cable Filling Compounds; ASTM E 8-91, Standard Test Methods of Tension Testing of Metallic Materials; and ASTM E 29-90, Standard Practice for Using Significant Digits in Test Data to Determine Conformance with Specifications, referenced in this section are incorporated by reference by RUS. These incorporations by references were approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of the

7 CFR Ch. XVII (1-1-97 Edition)

ASTM standards are available for inspection during normal business hours at RUS, room 2845, U.S. Department Agriculture, Washington, DC 20250-1500 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. Copies are available from ASTM, 1916 Race Street, Philadelphia, Pennsylvania 19103-1187, telephone number (215) 299-5585.

(b) *Conductors and conductor insulation.* (1) Each conductor must be a solid round wire of commercially pure annealed copper. Conductors must meet the requirements of the American Society for Testing and Materials (ASTM) B 3-90 except that requirements for *Dimensions and Permissible Variations* are waived and elongation requirements are superseded by this section.

(2) The minimum conductor elongation in the final wire must comply with the following limits when tested in accordance with ASTM E 8-91.

Conductor—AWG	Minimum Elongation—Percent
22	20
24	16

(3) Joints made in conductors during the manufacturing process may be brazed, using a silver alloy solder and nonacid flux, or they may be welded using either an electrical or cold welding technique. In joints made in uninsulated conductors, the two conductor ends must be butted. Splices made in insulated conductors need not be butted but may be joined in a manner acceptable to RUS.

(4)(i) The tensile strength of any section of a conductor containing a factory joint must not be less than 85 percent of the tensile strength of an adjacent section of the solid conductor of equal length without a joint.

(ii) *Engineering Information:* The sizes of wire used and their nominal diameters shall be as shown in the following table:

Rural Utilities Service, USDA

§ 1755.860

AWG	Nominal Diameter	
	Millimeters (mm)	(Inches (in.))
22	0.643	(0.0253)
24	0.511	(0.0201)

AWG	Direct Current Voltages (Kilovolts)
22	6.0
24	5.0

(5) Each conductor must be insulated with either a colored, solid, insulating grade, high density polyethylene or crystalline propylene/ethylene copolymer or with a solid natural primary layer and a colored, solid outer skin using one of the insulating materials listed in paragraphs (b)(5)(i) through (b)(5)(ii) of this section.

(i) The polyethylene raw material selected to meet the requirements of this section must be Type III, Class A, Category 4 or 5, Grade E9, in accordance with ASTM D 1248-84(1989).

(ii) The crystalline propylene/ethylene raw material selected to meet the requirements of this section must be Class PP 200B 40003 E11 in accordance with ASTM D 4101-82(1988).

(iii) Raw materials intended as conductor insulation furnished to these requirements must be free from dirt, metallic particles, and other foreign matter.

(iv) All insulating raw materials must be accepted by RUS prior to their use.

(6) All conductors in any single length of wire must be insulated with the same type of material.

(7) A permissible overall performance level of faults in conductor insulation must average not greater than one fault per 12,000 conductor meters (40,000 conductor feet) for each gauge of conductor.

(i) All insulated conductors must be continuously tested for insulation faults during the twinning operation with the method of test acceptable to RUS. The length count and number of faults must be recorded. The information must be retained for a period of 6 months and be available for review by RUS when requested.

(ii) The voltages for determining compliance with the requirements of this section are as follows:

(8) Repairs to the conductor insulation during manufacturing are permissible. The method of repair must be accepted by RUS prior to its use. The repaired insulation must be capable of meeting the relevant electrical requirements of this section.

(9) All repaired sections of insulation must be retested in the same manner as originally tested for compliance with paragraph (b)(7) of this section.

(10) Colored insulating material removed from or tested on the conductor, from a finished wire, must be capable of meeting the following performance requirements:

Property	Polyethylene	Crystalline Propylene/Ethylene Copolymer
Melt Flow Rate		
Percent increase from raw material, Maximum.		
<0.5 (Initial Melt Index).	50	—
0.5–2.00 (Initial Melt Index).	25	—
≤5.0 (Initial Melt Index).	—	110
Tensile Strength—Minimum		
Megapascals (MPa).	16.5	21.0
(Pounds per Square Inch (psi)).	(2,400)	(3,000)
Ultimate Elongation		
Minimum, Percent.	300	300
Cold Bend		
Failures, Maximum.	0/10	0/10
Shrinkback		
Maximum, mm (in.).	10 (0.375)	10 (0.375)
Oxygen Induction Time		
Minimum, Minutes.	20	20

(11) *Testing procedures.* The procedures for testing the insulation samples for compliance with paragraph (b)(10) of this section must be as follows.

(i) *Melt flow rate.* The melt flow rate must be determined as described in ASTM D 1238–90b. Condition E must be used for polyethylene. Condition L must be used for crystalline propylene/ethylene copolymer. The melt flow test must be conducted prior to the filling operation.

(ii) *Tensile strength and ultimate elongation.* Samples of the insulation material, removed from the conductor, must be tested in accordance with ASTM D 4565–90a using the following conditions. The minimum length of unclamped specimen must be 50 mm (2.0 in.). The minimum speed of jaw separation must be 25 mm (1.0 in.) per minute per 25 mm (1.0 in.) of unclamped specimen. The temperature of specimens and surrounding shall be $23 \pm 1^\circ\text{C}$.

NOTE: Quality assurance testing at a jaw separation speed of 500 mm/min (20 in./min) is permissible. Failures at this rate must be retested at the 50 mm/min (2 in./min) rate to determine section compliance.

(iii) *Cold bend.* Samples of the insulation material on the conductor must be tested in accordance with ASTM D 4565–90a at a temperature of $-40 \pm 1^\circ\text{C}$ with a mandrel diameter equal to 3 times the outside diameter of the insulated conductor. There must be no cracks visible to normal or corrected-to-normal vision.

(iv) *Shrinkback.* Samples of insulation must be tested for four hours in accordance with ASTM D 4565–90a. The temperature for the type of material is listed as follows:

Material	Temperature
Polyethylene	$115 \pm 1^\circ\text{C}$
Crystalline propylene/ethylene Copolymer	$130 \pm 1^\circ\text{C}$

(v) *Oxygen induction time.* Samples of insulation, which have been conditioned in accordance with paragraph 17.3 of ASTM D 4565–90a, must be tested in accordance with the procedures of ASTM D 4565–90a using copper pans and a test temperature of $199 \pm 1^\circ\text{C}$.

(12) Other methods of testing may be used if acceptable to RUS.

(c) *Identification of pairs and twisting of pairs.* (1) The insulation must be colored to identify:

(i) The tip and ring conductor of each pair; and

(ii) Each pair in the completed wire.

(2) The colors to be used to provide identification of the tip and ring conductor of each pair are shown in the following table:

Pair No.	Color	
	Tip	Ring
1	White	Blue
2	White	Orange
3	White	Green

(3) *Standards of color.* The colors of the insulated conductors supplied in accordance with this section are specified in terms of the Munsell Color System (ASTM D 1535–89) and must comply with the “Table of Wire and Cable Limit Chips” as defined in ANSI/EIA-359-A-84. (Visual color standards meeting these requirements may be obtained directly from the Munsell Color Company, Inc., 2441 North Calvert Street, Baltimore, Maryland 21218).

(4) Positive identification of the tip and ring conductors of each pair by marking each conductor of a pair with the color of its mate is permissible. The method of marking must be accepted by RUS prior to its use.

(5) Other methods of providing positive identification of the tip and ring conductors of each pair may be employed if accepted by RUS prior to its use.

(6) The insulated conductors must be twisted into pairs.

(7) In order to provide sufficiently high crosstalk isolation, the pair twists must be designed to enable the wire to meet the capacitance unbalance and the crosstalk loss requirements of paragraphs (m)(2), (m)(3), and (m)(4) of this section.

(8) The average length of pair twists in any pair in the finished wire, when measured on any 3 meter (m) (10 foot(ft)) length, must not exceed 152 mm (6 in.).

(9) An alternative method of forming the two pair wire is the use of a star-quad configuration.

(i) The assembly of the star-quad must be such as to enable the wire to

meet the capacitance unbalance and the crosstalk loss requirements of paragraphs (m)(2), (m)(3), and (m)(4) of this section.

(ii) The four individual insulated conductors must be twisted together to form a star-quad configuration with the tip and ring conductors of each pair diagonally opposite each other in the quad.

(iii) The average length of twist for the star-quad in the finished wire, when measured on any 3 m (10 ft) length, must not exceed 152 mm (6 in.).

(iv) The following color scheme must be used to provide identification of the tip and ring conductor of each pair in the star-quad:

Pair No.	Color	
	Tip	Ring
1	White with blue stripe.	Blue
2	White with orange stripe.	Orange

(v) If desired, the blue and orange conductors may contain a white stripe. The stripes in this case must be narrow enough so that the tip and ring identification is obvious.

(d) *Forming of the wire core.* (1) Twisted pairs or star-quad configuration must be assembled in such a way as to form a substantially cylindrical group.

(2) The filling compound must be applied to the wire core in such a way as to provide a completely filled core as is commercially practical.

(3) If desired for manufacturing reasons, white or colored binders of nonhygroscopic and nonwicking material may be applied over the core.

(e) *Filling compound.* (1) After or during the stranding operation and prior to application of the optional core wrap and inner jacket, a homogeneous filling compound free of agglomerates must be applied to the wire core. The compound must be as nearly colorless as is commercially feasible and consistent with the end product requirements and pair identification.

(2) The filling compound must be free from dirt, metallic particles, and other foreign matter. It must be applied in such a way as to fill the space within the wire core.

(3) The filling compound must be nontoxic and present no dermal hazards.

(4) The filling compound must exhibit the following dielectric properties at a temperature of $23 \pm 3^\circ\text{C}$ when measured in accordance with ASTM D 150-87 or ASTM D 4872-88.

(i) The dissipation factor must not exceed 0.0015 at a frequency of 1 megahertz (MHz).

(ii) The dielectric constant must not exceed 2.30.

(5) The volume resistivity must not be less than 10^{12} ohm-cm at a temperature of $23 \pm 3^\circ\text{C}$ when measured in accordance with ASTM D 257-91 or ASTM D 4872-88.

(6) The individual wire manufacturer must satisfy RUS that the filling compound selected for use is suitable for its intended application. The filling compound must be compatible with the wire components when tested in accordance with ASTM D 4568-86 at a temperature of 80°C .

(f) *Core wrap (optional).* (1) When a core wrap is used, it must consist of a layer of nonhygroscopic and nonwicking dielectric material. The wrap must be applied with an overlap.

(2) The core wrap must provide a sufficient heat barrier to prevent visible evidence of conductor insulation deformation or adhesion between conductors, caused by adverse heat transfer during the inner jacketing operation.

(3) If required for manufacturing reasons, white or colored binders of nonhygroscopic and nonwicking material may be applied over the core wrap.

(4) Sufficient filling compound must be applied to the core wrap that voids or air spaces existing between the core and inner side of the core wrap are minimized.

(g) *Inner jacket.* (1) An inner jacket must be applied over the core and/or core wrap.

(2) The jacket must be free from holes, splits, blisters, or other imperfections and must be as smooth and concentric as is consistent with the best commercial practice.

(3) The inner jacket material and test requirements must be as specified for the outer jacket material per paragraphs (j)(3) through (j)(5)(iv) of this section.

(4) The inner jacket thickness at any point must not be less than 0.5 mm (0.020 in.). The thickness must be determined from measurements on 50 mm (2 in.) samples taken not less than 0.3 m (1 ft) from either end of the wire. The average must be determined from 4 readings taken approximately 90° apart on any cross section of the samples. The maximum and minimum points must be determined by exploratory measurements. The maximum thickness minus the minimum thickness at any cross section must not exceed 43 percent of the average thickness at that cross section.

(h) *Flooding compound.* (1) Sufficient flooding compound must be applied on all sheath interfaces so that voids and air spaces in these areas are minimized.

(2) The flooding compound must be compatible with the jacket when tested in accordance with ASTM D 4568–86 at a temperature of 80°C. The floodant must exhibit adhesive properties sufficient to prevent jacket slip when tested in accordance with the requirements of appendix A, paragraph (III)(5), of this section.

(3) The individual wire manufacturer must satisfy RUS that the flooding compound selected for use is acceptable for the application.

(i) *Shield.* (1) A shield must be applied either longitudinally or helically over the inner jacket.

(i) If the shield is applied longitudinally, it must be corrugated.

(ii) If the shield is applied helically, it must be smooth.

(2) The overlap for longitudinally applied shields must be a minimum of 2 mm (0.075 in.) The overlap for helically applied shields must be a minimum of 23 percent of the tape width.

(3) General requirements for application of the shielding material are as follows:

(i) Successive lengths of shielding tapes may be joined during the manufacturing process by means of cold weld, electric weld, soldering with a nonacid flux, or other acceptable means;

(ii) Where two ends of a metal shield are to be joined together, care shall be taken to clean the metal surfaces in

order to provide for a good mechanical and electrical connection;

(iii) The shields of each length of wire must be tested for continuity. A one meter (3 ft) section of shield containing a factory joint must exhibit not more than 110 percent of the resistance of a shield of equal length without a joint;

(iv) The breaking strength of any section of a shield tape containing a factory joint must not be less than 80 percent of the breaking strength of an adjacent section of the shield of equal length without a joint;

(v) The reduction in thickness of the shielding material due to the corrugating or application process must be kept to a minimum and must not exceed 10 percent at any spot; and

(vi) The shielding material must be applied in such a manner as to enable the wire to pass the bend test as specified in paragraph (n)(3) of this section.

(4) The following materials are acceptable for use as wire shielding:

Standard Wire	Gopher Resistant Wire
Copper Alloy 220 (Bronze). 0.1016 ± 0.0076 mm (0.0040 ± 0.0003 in.)	Copper-Clad Stainless Steel 0.1270 ± 0.0127 mm (0.0050 ± 0.0005 in.)
Copper Alloy 220 (Bronze). 0.1270 ± 0.0127 mm (0.0050 ± 0.0005 in.)	Copper Alloy 664 0.1397 ± 0.0127 mm (0.0055 ± 0.0005 in.) Copper-Clad Alloy Steel 0.1270 ± 0.0127 mm (0.0050 ± 0.0005 in.)

(i) The copper-clad steels and copper alloy 664 shielding tapes must be capable of meeting the following performance requirements prior to application to the wire:

Property	Requirement
Tensile Strength Minimum, MPa (psi)	379 (55,000)
Tensile Yield Minimum, MPa (psi)	241 (35,000)
Elongation Minimum, percent in 50 mm (2 in.).	15

(ii) *Copper alloy 220.* The shielding material, prior to application to the wire, must be in the fully annealed

Rural Utilities Service, USDA

§ 1755.860

condition and shall conform to the requirements of ASTM B 694-86 for C22000 commercial bronze.

(iii) *Copper-clad stainless steel.* In addition to meeting the requirements of paragraph (i)(4)(i) of this section, the shielding material, prior to application to the wire, must be in the fully annealed condition and must conform to the requirements of ASTM B 694-86, with a cladding ratio of 16/68/16 and must have a minimum electrical conductivity of 28 percent IACS when measured in accordance with ASTM B 193-87.

(iv) *Copper alloy 664.* In addition to meeting the requirements of paragraph (i)(4)(i) of this section, the shielding material, prior to application to the wire, must be annealed temper and must conform to the requirements of ASTM B 694-86 and must have a minimum electrical conductivity of 28 percent IACS when measured in accordance with ASTM B 193-87.

(v) *Copper-clad alloy steel.* In addition to meeting the requirements of paragraph (i)(4)(i) of this section, the shielding material, prior to application to the wire, must be in the fully annealed condition and the copper component must conform to the requirements of ASTM B 224-91 and the alloy steel component must conform to the requirements of ASTM A 505-87, with a cladding ratio of 16/68/16, and must have a minimum electrical conductivity of 28 percent IACS when measured in accordance with ASTM B 193-87.

(j) *Outer jacket.* (1) The outer jacket must provide the wire with a tough, flexible, protective covering which can withstand exposure to sunlight, to atmospheric temperatures and stresses reasonably expected in normal installation and service.

(2) The jacket must be free from holes, splits, blisters, or other imperfections and must be as smooth and

concentric as is consistent with the best commercial practice.

(3) The raw material used for the outer jacket must be one of the five types listed in paragraphs (j)(3)(i) through (j)(3)(v) of this section. The raw material must contain an antioxidant to provide long term stabilization and the materials must contain a 2.60 ± 0.25 percent concentration of furnace black to provide ultraviolet shielding. Both the antioxidant and furnace black must be compounded into the material by the raw material supplier.

(i) Low density, high molecular weight polyethylene (LDHWMW) must conform to the requirements of ASTM D 1248-84(1989), Type I, Class C, Category 4 or 5, Grade J3.

(ii) Low density, high molecular weight ethylene copolymer (LDHWMW) must conform to the requirements of ASTM D 1248-84 (1989), Type I, Class C, Category 4 or 5, Grade J3.

(iii) Linear low density, high molecular weight polyethylene (LLDHW) must conform to the requirements of ASTM D 1248-84(1989), Type I, Class C, Category 4 or 5, Grade J3.

(iv) High density polyethylene (HD) must conform to the requirements of ASTM D 1248-84(1989), Type III, Class C, Category 4 or 5, Grade J4.

(v) Medium density polyethylene (MD) must conform to the requirements of ASTM D 1248-84(1989), Type II, Class C, Category 4 or 5, Grade J4.

(vi) Particle size of the carbon selected for use must not average greater than 20 nanometers.

(vii) Absorption coefficient must be a minimum of 400 in accordance with the procedures of ASTM D 3349-86.

(4) The outer jacketing material removed from or tested on the wire must be capable of meeting the following performance requirements:

Property	LLDHW, Ethylene Co- polymer	LDHWMW Poly- ethylene	HD or MD Pol- yethylene
Melt Flow Rate Percent increase from raw material Maximum		50	50
<0.41 (Initial Melt Index)	100	—	—
0.41–2.00 (Initial Melt Index)	50	—	—
Tensile Strength Minimum, MPa (psi)	12.0 (1,700)	12.0 (1,700)	16.5 (2,400)
Ultimate Elongation Percent, Minimum	400	400	300
Shrinkback Percent of Length, Maximum	5	5	5

Property	LLDHMW, Ethylene Co- polymer	LDHMW Poly- ethylene	HD or MD Pol- yethylene
Impact Failures, Maximum	2/10	2/10	2/10

(5) *Testing procedures.* The procedures for testing the jacket samples for compliance with paragraph (j)(4) of this section must be as follows:

(i) *Melt flow rate.* The melt flow rate must be as determined by ASTM D 1238–90b, Condition E. Jacketing material must be free from flooding and filling compound.

(ii) *Tensile strength and ultimate elongation.* Test in accordance with ASTM D 4565–90a, using a jaw separation speed of 500 mm/min (20 in./min) for low density material and 50 mm/min (2 in./min) for high and medium density materials.

(iii) *Shrinkback.* Test in accordance with the procedures specified in ASTM D 4565–90a using a test temperature of $100 \pm 1^\circ\text{C}$ for low density material and a test temperature of $115 \pm 1^\circ\text{C}$ for high and medium density materials.

(iv) *Impact.* The test must be performed in accordance with ASTM D 4565–90a using an impact force of 4 newton-meter (3 pound force-foot) at a temperature of $-20 \pm 2^\circ\text{C}$. The cylinder must strike the sample at the shield overlap. A crack or split in the jacket constitutes failure.

(6) *Jacket thickness.* The minimum jacket thickness must be 0.64 mm (0.025 in.) except that the minimum thickness over the sheath slitting cord, if present, must be 0.46 mm (0.018 in.). The minimum point must be determined by exploratory measurements. The average thickness at any cross section must be determined from four readings including the minimum point, taken approximately 90° apart. The thickness measurement must exclude any jacket material that has formed into the corrugation. The maximum thickness at any cross section must not be greater than 155 percent of the minimum thickness.

(7) *Eccentricity.* The eccentricity of the jacket must not exceed 43 percent when calculated using the formula as follows:

$$\frac{\text{Maximum Thickness} - \text{Minimum Thickness}}{\text{Average Thickness}} \times 100 \text{ Percent}$$

(k) *Sheath slitting cord (optional).* (1) Sheath slitting cords may be used in the wire structure at the option of the manufacturer.

(2) When a sheath slitting cord is used it must be nonhygroscopic and nonwicking, continuous throughout a length of wire, and of sufficient strength to open the sheath without breaking the cord.

(3) Sheath slitting cords must be capable of consistently slitting the jacket(s) and/or shield for a continuous length of 0.6 m (2 ft) when tested in accordance with the procedure specified in appendix B of this section.

(1) *Identification marker and length marker.* (1) Each length of wire must be permanently identified as to manufacturer and year of manufacture.

(2) The number of conductor pairs and their gauge size must be marked on the jacket.

(3) The marking must be printed on the jacket at regular intervals of not more than 1.5 m (5 ft).

(4) An alternative method of marking may be used if accepted by RUS prior to its use.

(5) The completed wire must have sequentially numbered length markers in FEET OR METERS at regular intervals of not more than 1.5 m (5 ft) along the outside of the jacket.

(6) The method of length marking must be such that for any single length of wire, continuous sequential numbering must be employed.

(7) The numbers must be dimensioned and spaced to produce good legibility and must be approximately 3 mm (0.125 in.) in height. An occasional illegible marking is permissible if there is a legible marking located not more than 1.5 m (5 ft) from it.

(8) The method of marking must be by means of suitable surface markings producing a clear, distinguishable, contrasting marking acceptable to RUS. Where direct or transverse printing is employed, the characters should be indented to produce greater durability of marking. Any other method of length marking must be acceptable to RUS as producing a marker suitable for the field. Size, shape and spacing of numbers, durability, and overall legibility of the marker will be considered in acceptance of the method.

(9) The accuracy of the length marking must be such that the actual length of any wire section is never less than the length indicated by the marking and never more than one percent greater than the length indicated by the marking.

(10) The color of the initial marking must be white or silver. If the initial marking fails to meet the requirements of the preceding paragraphs, it will be permissible to either remove the defective marking and re-mark with the white or silver color or leave the defective marking on the wire and re-mark with yellow. No further re-marking is permitted. Any re-marking must be on a different portion of the wire circumference than any existing marking when possible and have a numbering sequence differing from any other existing marking by at least 5,000.

(11) Any reel of wire which contains more than one set of sequential markings must be labeled to indicate the color and sequence of marking to be used. The labeling must be applied to the reel and also to the wire.

(m) *Electrical requirements*—(1) *Mutual capacitance and conductance*. (i) The average mutual capacitance (corrected for length) of all pairs in any reel must not exceed 52 ± 4 nanofarad/kilometer (nF/km) (83 ± 7 nanofarad/mile (nF/mile)) when tested in accordance with ASTM D 4566-90 at a frequency of 1.0 ± 0.1 kilohertz (kHz) and a temperature of $23 \pm 3^\circ\text{C}$.

(ii) The mutual conductance (corrected for length and gauge) of any pair must not exceed 2 micromhos/kilometer (micromhos/km) (3.3 micromhos/mile) when tested in accordance with

ASTM D 4566-90 at a frequency of 1.0 ± 0.1 kHz and a temperature of $23 \pm 3^\circ\text{C}$.

(2) *Pair-to-pair capacitance unbalance*. The capacitance unbalance between any pair of the completed wire must not exceed 145 picofarad/kilometer (pF/km) (80 picofarad/1000 ft (pF/1000 ft)) when tested in accordance with ASTM D 4566-90 at a frequency of 1.0 ± 0.1 kHz and a temperature of $23 \pm 3^\circ\text{C}$.

(3) *Pair-to-ground capacitance unbalance*—(i) *Pair-to-ground*. The capacitance unbalance as measured on the individual pairs of the completed wire must not exceed 2625 pF/km (800 pF/1000 ft) when tested in accordance with ASTM D 4566-90 at a frequency of 1.0 ± 0.1 kHz and a temperature of $23 \pm 3^\circ\text{C}$.

(ii) When measuring pair-to-ground capacitance unbalance, all pairs, except the pair under test, are grounded to the shield.

(iii) Pair-to-ground capacitance unbalance may vary directly with the length of the wire.

(4) *Far-end crosstalk loss*. (i) The output-to-output far-end crosstalk loss (FEXT) between any pair combination of a completed wire when measured in accordance with ASTM D 4566-90 at a test frequency of 150 kHz must not be less than 58 decibel/kilometer (dB/km) (63 decibel/1000 ft). If the loss K_o at a frequency F_o for length L_o is known, then K_x can be determined for any other frequency F_x or length L_x by:

$$\text{FEXT loss } (K_x) = K_o - 20 \log 10 \frac{F_x}{F_o} - 10 \log 10 \frac{L_x}{L_o}$$

(5) *Attenuation*. The attenuation of any individual pair on any reel of wire must not exceed the following limits when measured at or corrected to a temperature of $20 \pm 1^\circ\text{C}$ and a test frequency of 150 kHz. The test must be conducted in accordance with ASTM D 4566-90.

Conductor AWG	Individual Pair Attenuation dB/km (decibel/mile (dB/mile))	
	Maximum	Minimum
22	6.8 (11.0)	5.0 (8.1)
24	8.7 (14.0)	6.6 (10.7)

(6) *Insulation resistance.* Each insulated conductor in each length of completed wire, when measured with all other insulated conductors and the shield grounded, must have an insulation resistance of not less than 1600 megohm-kilometer (1000 megohm-mile) at $20 \pm 1^\circ\text{C}$. The measurement must be made in accordance with the procedures of ASTM D 4566–90.

(7) *High voltage test.* (i) In each length of completed wire, the insulation between conductors when tested in accordance with ASTM D 4566–90 must withstand for 3 seconds a direct current (dc) potential whose value is not less than:

(A) 5.0 kilovolts for 22-gauge conductors; and

(B) 4.0 kilovolts for 24-gauge conductors.

(ii) In each length of completed wire, the dielectric strength between the shield and all conductors in the core must be tested in accordance with ASTM D 4566–90 and must withstand, for 3 seconds, a dc potential whose value is not less than 20 kilovolts.

(8) *Conductor resistance.* The dc resistance of any conductor must be measured in the completed wire in accordance with ASTM D 4566–90 and must not exceed the following values when measured at or corrected to a temperature of $20 \pm 1^\circ\text{C}$.

AWG	Maximum Resistance	
	ohms/kilometer	(ohms/1000 ft)
22	57.1	(17.4)
24	90.2	(27.5)

(9) *Resistance unbalance.* (i) The difference in dc resistance between the two conductors of any pair in the completed wire must not exceed 5.0 percent when measured in accordance with the procedures of ASTM D 4566–90.

(ii) The resistance unbalance between tip and ring conductors shall be random with respect to the direction of unbalance. That is, the resistance of the tip conductors shall not be consistently higher with respect to the ring conductors and vice versa.

(n) *Mechanical requirements—(1) Defective wire.* Pairs in each length of wire will not be permitted to have either a

ground, cross, short or open circuit condition.

(2) *Wire breaking strength.* The breaking strength of the completed wire must not be less than 890 newtons (200 pound-force) when tested in accordance with ASTM D 4565–90a using a jaw separation speed of 25 mm/min (1.0 in./min).

(3) *Wire bending test.* The completed wire must be capable of meeting the requirements of ASTM D 4565–90a after conditioning at $-20 \pm 2^\circ\text{C}$ and at $23 \pm 2^\circ\text{C}$.

(4) *Water penetration test.* (i) A one meter (3 ft) length of completed wire must be stabilized at $23 \pm 2^\circ\text{C}$ and tested in accordance with ASTM D 4565–90a using a one meter (3 ft) water head over the sample or placed under the equivalent continuous pressure for one hour.

(ii) After the one hour period, there must be no water leakage in the sheath interfaces, under the core wrap or between any insulated conductors in the core.

(iii) If water leakage is detected in the first sample, one 3 m (10 ft) additional adjacent sample from the same reel of wire must be tested in accordance with paragraph (n)(4)(ii) of this section. If the second sample exhibits water leakage, the entire reel of wire is to be rejected. If the second sample exhibits no leakage, the entire reel of wire is considered acceptable.

(5) *Compound flow test.* The completed wire must be capable of meeting the compound flow test specified in ASTM D 4565–90a when exposed for a period of 24 hours at a temperature of $80 \pm 1^\circ\text{C}$. At the end of this test period, there must be no evidence of flowing or dripping of compound from either the core or sheath interfaces.

(o) *Acceptance testing and extent of testing.* (1) The tests described in appendix A of this section are intended for acceptance of wire designs and major modifications of accepted designs. RUS decides what constitutes a major modification. These tests are intended to show the inherent capability of the manufacturer to produce wire products having long life and stability.

(2) For initial acceptance, the manufacturer must submit:

Rural Utilities Service, USDA

§ 1755.860

(i) An original signature certification that the product fully complies with each requirement of this section;

(ii) Qualification Test Data, per appendix A of this section;

(iii) To periodic plant inspections;

(iv) A certification that the product does or does not comply with the domestic origin manufacturing provisions of the "Buy American" requirements of the Rural Electrification Act of 1938 (7 U.S.C. 901 *et seq.*);

(v) Written user testimonials concerning performance of the product; and

(vi) Other nonproprietary data deemed necessary by the Chief, Outside Plant Branch (Telephone).

(3) For requalification acceptance, the manufacturer must submit an original signature certification that the product fully complies with each section of the specification, excluding the Qualification Section, and a certification that the product does or does not comply with the domestic origin manufacturing provisions of the "Buy American" requirements of the Rural Electrification Act of 1938 (7 U.S.C. 901 *et seq.*) for acceptance by June 30 every three years. The required data and certification must have been gathered within 90 days of the submission.

(4) Initial and requalification acceptance requests should be addressed to: Chairman, Technical Standards, Committee "A" (Telephone), Telecommunications Standards Division, Rural Utilities Service, Washington, DC 20250-1500.

(5) Tests on 100 percent of completed wire. (i) The shield of each length of wire must be tested for continuity using the procedures of ASTM D 4566-90.

(ii) Dielectric strength between all conductors and the shield must be tested to determine freedom from grounds in accordance with paragraph (m)(7)(ii) of this section.

(iii) Each conductor in the completed wire must be tested for continuity using the procedures of ASTM D 4566-90.

(iv) Dielectric strength between conductors must be tested to ensure freedom from shorts and crosses in accordance with paragraph (m)(7)(i) of this section.

(v) The average mutual capacitance must be measured on all wires.

(6) *Capability tests.* Tests on a quality assurance basis must be made as frequently as is required for each manufacturer to determine and maintain compliance with:

(i) Performance requirements for conductor insulation and jacket material;

(ii) Performance requirements for filling and flooding compounds;

(iii) Sequential marking and lettering;

(iv) Capacitance unbalance and crosstalk;

(v) Insulation resistance;

(vi) Conductor resistance and resistance unbalance;

(vii) Wire bending and wire breaking strength tests;

(viii) Mutual conductance and attenuation; and

(ix) Water penetration and compound flow tests.

(p) *Summary of records of electrical and physical tests.* (1) Each manufacturer must maintain suitable summary of records for a period of at least 3 years for all electrical and physical tests required on completed wire by this section as set forth in paragraphs (o)(5) and (o)(6) of this section. The test data for a particular reel shall be in a form that it may be readily available to the purchaser or to RUS upon request.

(2) Measurements and computed values must be rounded off to the number of places of figures specified for the requirement according to ASTM E 29-90.

(q) *Manufacturing irregularities.* (1) Repairs to the inner jacket and shield are not permitted in wire supplied to the end user under this section.

(2) Minor defects in the outer jackets (defects having a dimension of 3 mm (0.125 in.) or less in any direction) may be repaired by means of heat fusing in accordance with good commercial practices utilizing sheath grade compound.

(r) *Preparation for shipment.* (1) The wire must be shipped on reels. The diameter of the drum must be large enough to prevent damage to the wire from reeling or unreeling. The reels must be substantial and so constructed as to prevent damage to the wire during shipment and handling.

§ 1755.860

(2) The thermal wrap must comply with the requirements of appendix C of this section. When a thermal reel wrap is supplied, the wrap must be applied to the reel and must be suitably secured in place to minimize thermal exposure to the wire during storage and shipment. The use of the thermal reel wrap as a means of reel protection will be at the option of the manufacturer unless specified by the end user.

(3) The outer end of the wire must be securely fastened to the reel head so as to prevent the wire from becoming loose in transit. The inner end of the wire must be securely fastened in such a way as to make it readily available if required for electrical testing. Spikes, staples, or other fastening devices which penetrate the wire jacket must not be used. The method of fastening the wire ends must be accepted by RUS prior to it being used.

(4) Each length of wire must be wound on a separate reel unless otherwise specified or agreed to by the purchaser.

(5) Each reel must be plainly marked to indicate the direction in which it should be rolled to prevent loosening of the wire on the reel.

(6) Each reel must be stenciled or labeled on either one or both sides with the name of the manufacturer, year of manufacture, actual shipping length, an inner and outer end sequential length marking, description of the wire, reel number and the RUS wire designation:

Wire Designation

BFW

Wire Construction

Pair Count

Conductor Gauge

N = Copper Alloy 220 (Bronze) Shield

Y = Gopher Resistant Shields

Example: BFWY 3-24

Buried Filled Wire, Gopher Resistant Shield, 3 pair, 24 AWG

(7) Both ends of the filled buried wire, manufactured to the requirements of this section, must be equipped with end caps which are acceptable to RUS.

(The information and recordkeeping requirements of this section have been approved by the Office of Management and Budget (OMB) under the control number 0572-0059)

7 CFR Ch. XVII (1-1-97 Edition)

APPENDIX A TO 7 CFR 1755.860— QUALIFICATION TEST METHODS

(I) The test procedures described in this appendix are for qualification of initial designs and major modifications of accepted designs. Included in (V) of this appendix are suggested formats that may be used in submitting test results to RUS.

(II) *Sample Selection and Preparation.* (1) All testing must be performed on lengths removed sequentially from the same 3 pair, 22 gauge jacketed wire. This wire must not have been exposed to temperatures in excess of 38°C since its initial cool down after sheathing. The lengths specified are minimum lengths and if desirable from a laboratory testing standpoint longer lengths may be used.

(a) Length A shall be 10 ± 0.2 meters (33 ± 0.5 feet) long and must be maintained at $23 \pm 3^\circ\text{C}$. One length is required.

(b) Length B shall be 12 ± 0.2 meters (40 ± 0.5 feet) long. Prepare the test sample by removing the inner and outer jacket, shield, and core wrap, if present, for a sufficient distance on both ends to allow the insulated conductors to be flared out. Remove sufficient conductor insulation so that appropriate electrical test connections can be made at both ends. Coil the specimen with a diameter of 15 to 20 times its sheath diameter. Three lengths are required.

(c) Length C shall be one meter (3 feet) long. Four lengths are required.

(d) Length D shall be 300 millimeters (1 foot) long. Four lengths are required.

(e) Length E shall be 600 millimeters (2 feet) long. Four lengths are required.

(f) Length F shall be 3 meters (10 feet) long and must be maintained at $23 \pm 3^\circ\text{C}$ for the duration of the test. Two lengths are required.

(2) *Data Reference Temperature.* Unless otherwise specified, all measurements shall be made at $23 \pm 3^\circ\text{C}$.

(III) *Environmental Tests*—(1) *Heat Aging Test*—(a) *Test Samples.* Place one sample each of lengths B, C, D, and E in an oven or environmental chamber. The ends of sample B must exit from the chamber or oven for electrical tests. Securely seal the oven exit holes.

(b) *Sequence of Tests.* After conditioning the samples are to be subjected to the following tests:

(i) Water Immersion Test outlined in (III)(2) of this appendix;

(ii) Water Penetration Test outlined in (III)(3) of this appendix; .

(iii) Insulation Compression Test outlined in (III)(4) of this appendix; and

(iv) Jacket Slip Strength Test outlined in (III)(5) of this appendix.

(c) *Initial Measurements.* (i) For sample B, measure the open circuit capacitance and

conductance for each pair at 1 and 150 kilohertz and the attenuation at 150 kilohertz after conditioning the sample at the data reference temperature for 24 hours. Calculate the average and standard deviation for the data of the 3 pairs on a per kilometer (per mile) basis.

(ii) The attenuation at 150 kilohertz may be calculated from open circuit admittance (Y_{oc}) and short circuit impedance (Z_{sc}) or may be obtained by direct measurement of attenuation.

(iii) Record on suggested formats attached in (V) of this appendix or on other easily readable formats.

(d) *Heat Conditioning.* (i) Immediately after completing the initial measurements, condition the sample for 14 days at a temperature of $65 \pm 2^\circ\text{C}$.

(ii) At the end of this period note any exudation of filling compound. Measure and calculate the parameters given in (III)(1)(c) of this appendix. Record on suggested formats attached in (V) of this appendix or on other easily readable formats.

(iii) Cut away and discard a one meter (3 foot) section from each end of length B.

(e) *Overall Electrical Deviation.* (i) Calculate the percent change in all average parameters between the final parameters after conditioning with the initial parameters in (III)(1)(c) of this appendix.

(ii) The stability of the electrical parameters after completion of this test must be within the following prescribed limits:

(A) *Capacitance.* The average mutual capacitance must be within 5 percent of its original value;

(B) The change in average mutual capacitance must be less than 5 percent over the frequency range of 1 to 150 kilohertz;

(C) *Conductance.* The average mutual conductance must not exceed 2 micromhos/kilometer (3.3 micromhos/mile) at a frequency of 1 kilohertz; and

(D) *Attenuation.* The attenuation must not have increased by more than 5 percent over its original value.

(2) *Water Immersion Electrical Test—(a) Test Sample Selection.* The 10 meter (33 foot) section of length B must be tested.

(b) *Test Sample Preparation.* Prepare the sample by removing the inner and outer jacket, shield, and core wrap, if present, for a sufficient distance to allow one end to be accessed for test connections. Cut out a series of 2.5 millimeter by 13 millimeter (0.1 inch by 0.5 inch) rectangular slots along the test sample, at 300 millimeter (1 foot) intervals progressing successively 90 degrees around the circumference of the wire. Assure that the wire core is exposed at each slot by slitting the inner jacket and core wrap if present. Place the prepared sample in a dry vessel which when filled will maintain a one meter (3 foot) head of water over 6 meters (20 feet) of uncoiled wire. Extend and fasten the

ends of the wire so they will be above the water line and the pairs are rigidly held for the duration of the test.

(c) *Capacitance and Conductance Testing.* Measure the initial values of mutual capacitance and conductance of all pairs in each wire at a frequency of 1 kilohertz before filling the vessel with water. Be sure the wire shield is grounded to the test equipment. Fill the vessel until there is a one meter (3 foot) head of water on the wires.

(i) Remeasure the mutual capacitance and conductance after the wires have been submerged for 24 hours and again after 30 days.

(ii) Record each sample separately on the suggested formats attached in (V) of this appendix or on other easily readable formats.

(d) *Overall Electrical Deviation.* (i) Calculate the percent change in all average parameters between the final parameters after conditioning with the initial parameters in (III)(2)(c) of this appendix.

(ii) The stability of the electrical parameters after of the test must be within the following prescribed limits:

(A) *Capacitance.* The average mutual capacitance must be within 5 percent of its original value; and

(B) *Conductance.* The average mutual conductance must not exceed 2 micromhos/kilometer (3.3 micromhos/mile) at a frequency of 1 kilohertz.

(3) *Water Penetration Testing.* (a) A watertight closure must be placed over the jacket of length C. The closure must not be placed over the jacket so tightly that the flow of water through preexisting voids or air spaces is restricted. The other end of the sample must remain open.

(b) Test per Option A or Option B. (i) *Option A.* Weigh the sample and closure prior to testing. Fill the closure with water and place under a continuous pressure of 10 ± 0.7 kilopascals (1.5 ± 0.1 pounds per square inch gauge) for one hour. Collect the water leakage from the end of the test sample during the test and weigh to the nearest 0.1 gram. Immediately after the one hour test, seal the ends of the wire with a thin layer of grease and remove all visible water from the closure, being careful not to remove water that penetrated into the core during the test. Reweigh the sample and determine the weight of water that penetrated into the core. The weight of water that penetrated into the core must not exceed 1 gram.

(ii) *Option B.* Fill the closure with a 0.2 gram sodium fluorescein per liter water solution and apply a continuous pressure of 10 ± 0.7 kilopascals (1.5 ± 0.1 pounds per square inch gauge) for one hour. Catch and weigh any water that leaks from the end of the wire during the one hour period. If no water leaks from the sample, carefully remove the water from the closure. Then carefully remove the outer jacket, shield, inner jacket

and core wrap, if present, one at a time, examining with an ultraviolet light source for water penetration. After removal of the inner jacket and core wrap, if present, carefully dissect the core and examine for water penetration within the core. Where water penetration is observed, measure the penetration distance. The distance of water penetration into the core must not exceed 127 millimeters (5.0 inches).

(4) *Insulation Compression Test.* (a) *Test Sample D.* Remove inner and outer jacket, shield, and core wrap, if present, being careful not to damage the conductor insulation. Remove one pair from the core and carefully separate, wipe off core filler and straighten the insulated conductors. Retwist the two insulated conductors together under sufficient tension to form 10 evenly spaced 360 degree twists in a length of 100 millimeters (4 inches).

(b) *Sample Testing.* Center the mid 50 millimeters (2 inches) of the twisted pair between two smooth rigid parallel metal plates measuring 50 millimeters (2 inches) in length or diameter. Apply a 1.5 volt direct current potential between the conductors, using a light or buzzer to indicate electrical contact between the conductors. Apply a constant load of 67 newtons (15 pound-force) on the sample for one minute and monitor for evidence of contact between the conductors. Record results on suggested formats attached in (V) of this appendix or on other easily readable formats.

(5) *Jacket Slip Strength Test*—(a) *Sample Selection.* Test sample E from (III)(1)(a) of this appendix.

(b) *Sample Preparation.* Prepare test sample in accordance with the procedures specified in ASTM D 4565–90a.

(c) *Sample Conditioning and Testing.* Remove the sample from the tensile tester prior to testing and condition for one hour at $50 \pm 2^\circ\text{C}$. Test immediately in accordance with the procedure specified in ASTM D 4565–90a. A minimum outer jacket slip strength of 67 newtons (15 pound-force) is required. Record the load attained.

(6) *Humidity Exposure.* (a) Repeat steps (III)(1)(a) through (III)(1)(c)(iii) of this appendix for separate set of samples B, C, D and E which have not been subjected to prior environmental conditioning.

(b) Immediately after completing the measurements, expose the test sample to 100 temperature cyclings. Relative humidity within the chamber must be maintained at 90 ± 2 percent. One cycle consists of beginning at a stabilized chamber and test sample temperature of $52 \pm 1^\circ\text{C}$, increasing the tem-

perature to $57 \pm 1^\circ\text{C}$, allowing the chamber and test samples to stabilize at this level, then dropping the temperature back to $52 \pm 1^\circ\text{C}$.

(c) Repeat steps (III)(1)(d)(ii) through (III)(5)(c) of this appendix.

(7) *Temperature Cycling.* (a) Repeat steps (III)(1)(a) through (III)(1)(c)(iii) of this appendix for separate set of samples B, C, D and E which have not been subjected to prior environmental conditioning.

(b) Immediately after completing the measurements, subject the test sample to 10 cycles of temperature between -40°C and $+60^\circ\text{C}$. The test sample must be held at each temperature extreme for a minimum of 1 1/2 hours during each cycle of temperature. The air within the temperature cycling chamber must be circulated throughout the duration of the cycling.

(c) Repeat steps (III)(1)(d)(ii) through (III)(5)(c) of this appendix.

(IV) *Control Sample*—(1) *Test Samples.* A separate set of lengths for samples A, C, D, and E must have been maintained at $23 \pm 3^\circ\text{C}$ for at least 48 hours before the testing.

(2) Repeat steps (III)(2) through (III)(5)(c) of this appendix except use length A instead of length B.

(3) *Surge Test.* (a) One length of sample F must be used to measure the breakdown between conductors while the other length of F must be used to measure core to shield breakdown.

(b) The samples must be capable of withstanding, without damage, a single surge voltage of 20 kilovolts peak between conductors, and 35 kilovolts peak between conductors and the shield as hereinafter described. The surge voltage must be developed from a capacitor discharge through a forming resistor connected in parallel with the dielectric of the test sample. The surge generator constants must be such as to produce a surge of 1.5×40 microseconds wave shape.

(c) The shape of the generated wave must be determined at a reduced voltage by connecting an oscilloscope across the forming resistor with the wire sample connected in parallel with the forming resistor. The capacitor bank is charged to the test voltage and then discharged through the forming resistor and test sample. The test sample will be considered to have passed the test if there is no distinct change in the wave shape obtained with the initial reduced voltage compared to that obtained after the application of the test voltage.

(V) The following suggested formats may be used in submitting the test results to RUS:

**APPENDIX B TO 7 CFR 1755.860—SHEATH
SLITTING CORD QUALIFICATION**

(I) The test procedures described in this appendix are for qualification of initial and subsequent changes in sheath slitting cords.

(II) *Sample Selection.* All testing must be performed on two 1.2 meters (4 feet) lengths of wire removed sequentially from the same 3 pair, 22 gauge jacketed wire. This wire must not have been exposed to temperatures in excess of 38°C since its initial cool down after sheathing.

(III) *Test Procedure.* (1) Using a suitable tool, expose enough of sheath slitting cord to permit grasping with needle nose pliers.

(2) The prepared test specimens must be maintained at a temperature of $23 \pm 1^\circ\text{C}$ for at least 4 hours immediately prior to and during the test.

(3) Wrap the sheath slitting cord around the plier jaws to ensure a good grip.

(4) Grasp and hold the wire in a convenient position while gently and firmly pulling the sheath slitting cord longitudinally in the direction away from the wire end. The angle of pull may vary to any convenient and functional degree. A small starting notch is permissible.

(5) The sheath slitting cord is considered acceptable if the cord can slit the jacket and/

7 CFR Ch. XVII (1–1–97 Edition)

or shield for a continuous length of 0.6 meter (2 feet) without breaking the cord.

**APPENDIX C TO 7 CFR 1755.860—THERMAL
REEL WRAP QUALIFICATION**

(I) The test procedures described in this appendix are for qualification of initial and subsequent changes in thermal reel wraps.

(II) *Sample Selection.* All testing must be performed on two 450 millimeter (18 inch) lengths of wire removed sequentially from the same 3 pair, 22 gauge jacketed wire. This wire must not have been exposed to temperatures in excess of 38°C since its initial cool down after sheathing.

(III) *Test Procedure.* (1) Place the two samples on an insulating material such as wood, etc.

(2) Tape thermocouples to the jackets of each sample to measure the jacket temperature.

(3) Cover one sample with the thermal reel wrap.

(4) Expose the samples to a radiant heat source capable of heating the uncovered jacket sample to a minimum of 71°C. A 600 watt photoflood lamp or an equivalent lamp having the light spectrum approximately that of the sun shall be used.

(5) The height of the lamp above the jacket shall be 380 millimeters (15 inches) or a height that produces the 71°C jacket temperature on the unwrapped sample.

(6) After the samples have stabilized at the temperature, the jacket temperatures of the samples must be recorded after one hour of exposure to the heat source.

(7) Compute the temperature difference between the jackets.

(8) For the thermal reel wrap to be acceptable to RUS, the temperature differences between the jacket with the thermal reel wrap and the jacket without the reel wrap must be greater than or equal to 17°C.

[58 FR 61004, Nov. 19, 1993, as amended at 60 FR 1711, Jan. 5, 1995]

§§ 1755.861—1755.869 [Reserved]

§ 1755.870 RUS specification for terminating cables.

(a) *Scope.* (1) This section establishes the requirements for terminating cables used to connect incoming outside plant cables to the vertical side of the main distributing frame in a telephone central office.

(i) The conductors are solid tinned copper, individually insulated with extruded solid dual insulating compounds.

(ii) The insulated conductors are twisted into pairs which are then

Rural Utilities Service, USDA**§1755.870**

stranded or oscillated to form a cylindrical core.

(iii) The cable structure is completed by the application of a core wrap, a shield, and a polyvinyl chloride jacket.

(2) The number of pairs and gauge size of conductors which are used within the RUS program are provided in the following table:

American Wire Gauge (AWG)	22	24
Number of Pairs	12	12
	50	50
	100	100
	200	200
	300	300
	400	400
	600	600
	800	800

NOTE: Cables larger in pair sizes from those shown in this table shall meet all the requirements of this section.

(3) All cables sold to RUS borrowers for projects involving RUS loan funds under this section must be accepted by RUS Technical Standards Committee "A" (Telephone). For cables manufactured to the specification of this section, all design changes to an accepted design must be submitted for acceptance. RUS will be the sole authority on what constitutes a design change.

(4) Materials, manufacturing techniques, or cable designs not specifically addressed by this section may be allowed if accepted by RUS. Justification for acceptance of modified materials, manufacturing techniques, or cable designs shall be provided to substantiate product utility and long term stability and endurance.

(5) The American National Standard Institute/Electronic Industries Association (ANSI/EIA) 359-A-84, EIA Standard Colors for Color Identification and Coding, referenced in this section is incorporated by reference by RUS. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of ANSI/EIA 359-A-84 are available for inspection during normal business hours at RUS, room 2845, U.S. Department of Agriculture, Washington, DC 20250-1500 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. Copies are available from Global Engineering Documents, 15 Inverness Way East, Engle-

wood, CO 80112, telephone number (303) 792-2181.

(6) American Society for Testing and Materials Specifications (ASTM) B 33-91, Standard Specification for Tinned Soft or Annealed Copper Wire for Electrical Purposes; ASTM B 736-92a Standard Specification for Aluminum, Aluminum Alloy and Aluminum-Clad Steel Cable Shielding Stock; ASTM D 1248-84 (1989), Standard Specification for Polyethylene Plastics Molding and Extrusion Materials; ASTM D 1535-89, Standard Test Method for Specifying Color by the Munsell System; ASTM D 2287-81 (Reapproved 1988), Standard Specification for Nonrigid Vinyl Chloride Polymer and Copolymer Molding and Extrusion Compounds; ASTM D 2436-85, Standard Specification for Forced-Convection Laboratory Ovens for Electrical Insulation; ASTM D 2633-82 (Reapproved 1989), Standard Methods of Testing Thermoplastic Insulations and Jackets for Wire and Cable; ASTM D 4101-82 (1988), Standard Specification for Propylene Plastic Injection and Extrusion Materials; ASTM D 4565-90a, Standard Test Methods for Physical and Environmental Performance Properties of Insulations and Jackets for Telecommunications Wire and Cable; ASTM D 4566-90, Standard Test Methods for Electrical Performance Properties of Insulations and Jackets for Telecommunications Wire and Cable; and ASTM E 29-90, Standard Practice for Using Significant Digits in Test Data to Determine Conformance with Specifications, referenced in this section are incorporated by reference by RUS. These incorporations by references were approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of the ASTM standards are available for inspection during normal business hours at RUS, room 2845, U.S. Department of Agriculture, Washington, DC 20250-1500 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. Copies are available from ASTM, 1916 Race Street, Philadelphia, Pennsylvania 19103-1187, telephone number (215) 299-5585.

(7) American National Standards Institute/National Fire Protection Association (ANSI/NFPA), NFPA 70-1993

§ 1755.870

National Electrical Code referenced in this section is incorporated by reference by RUS. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. A copy of the ANSI/NFPA standard is available for inspection during normal business hours at RUS, room 2845, U.S. Department of Agriculture, Washington, DC 20250-1500 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. Copies are available from NFPA, Batterymarch Park, Quincy, Massachusetts 02269, telephone number 1 (800) 344-3555.

(8) Underwriters Laboratories Inc. (UL) 1666, Standard Test for Flame Propagation Height of Electrical and Optical-Fiber Cables Installed Vertically in Shafts, dated January 22, 1991, referenced in this section is incorporated by reference by RUS. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. A copy of the UL standard is available for inspection during normal business hours at RUS, room 2845, U.S. Department of Agriculture, Washington, DC 20250-1500 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. Copies are available from UL Inc., 333 Pfingsten Road, Northbrook, Illinois 60062-2096, telephone number (708) 272-8800.

(b) *Conductors and conductor insulation.* (1) Each conductor shall be a solid round wire of commercially pure annealed tin coated copper. Conductors shall meet the requirements of the American Society for Testing and Materials (ASTM) B 33-91 except that requirements for *Dimensions and Permissible Variations* are waived.

(2) Joints made in conductors during the manufacturing process may be brazed, using a silver alloy solder and nonacid flux, or they may be welded using either an electrical or cold welding technique. In joints made in uninsulated conductors, the two conductor ends shall be butted. Splices made in insulated conductors need not be butted but may be joined in a manner acceptable to RUS.

7 CFR Ch. XVII (1-1-97 Edition)

(3) The tensile strength of any section of a conductor, containing a factory joint, shall not be less than 85 percent of the tensile strength of an adjacent section of the solid conductor of equal length without a joint.

(4) Engineering Information: The sizes of wire used and their nominal diameters shall be as shown in the following table:

AWG	Nominal diameter	
	Millimeters	(Inches)
22	0.643	(0.0253)
24	0.511	(0.0201)

(5) Each conductor shall be insulated with a primary layer of natural or white solid, insulating grade, high density polyethylene or crystalline propylene/ethylene copolymer and an outer skin of colored, solid, insulating grade, polyvinyl chloride (PVC) using one of the insulating materials listed in paragraphs (b)(5)(i) through (iii) of this section.

(i) The polyethylene raw material selected to meet the requirements of this section shall be Type III, Class A, Category 4 or 5, Grade E9, in accordance with ASTM D 1248-84 (1989).

(ii) The crystalline propylene/ethylene raw material selected to meet the requirements of this section shall be Class PP 200B 40003 E11 in accordance with ASTM D 4101-82 (1988).

(iii) The PVC raw material selected to meet the requirements of this section shall be either Type PVC-64751E3XO, Type PVC-76751E3XO, or Type PVC-77751E3XO in accordance with ASTM D 2287-81 (1988).

(iv) Raw materials intended as conductor insulation furnished to these requirements shall be free from dirt, metallic particles, and other foreign matter.

(v) All insulating raw materials shall be accepted by RUS prior to their use.

(6) All conductors in any single length of cable shall be insulated with the same type of material.

(7) A permissible overall performance level of faults in conductor insulation when using the test procedures in paragraph (b)(8) of this section shall average not greater than one fault per 12,000 conductor meters (40,000 conductor feet) for each gauge of conductor.

Rural Utilities Service, USDA

§1755.870

(8) The test used to determine compliance with paragraph (b)(7) of this section shall be conducted as follows:

(i) Samples tested shall be taken from finished cables selected at random from standard production cable. The samples tested shall contain a minimum of 300 conductor meters (1,000 conductor feet) for cables sizes less than 50 pairs and 1,500 conductor meters (5,000 conductor feet) for cables sizes greater than or equal to 50 pairs. No further sample need be taken from the same cable production run within 6,000 cable meters (20,000 cable feet) of the original test sample from that run.

(ii) The cable sample shall have its jacket, shield, and core wrap removed and its core shall be immersed in tap water for a minimum period of 6 hours. In lieu of removing the jacket, shield, and core wrap from the core, the entire cable may be tested. In this case, the core shall be completely filled with tap water, under pressure; then the cable assembly shall be immersed for a minimum period of 6 hours. With the cable core still fully immersed, except for end connections, the insulation resistance (IR) of all conductors to water shall be measured using a direct current (dc) voltage of 100 volts to 550 volts.

(iii) An IR value of less than 500 megohms for any individual insulated conductor tested at or corrected to a temperature of 23 °C is considered a failure. If the cable sample is more than 7.5 meters (25 feet) long, all failing conductors shall be retested and reported in 7.5 meter (25 foot) segments.

(iv) The pair count, gauge, footage, and number of insulation faults shall be recorded. This information shall be retained on a 6 month running basis for review by RUS when requested.

(v) A fault rate, in a continuous length in any one reel, in excess of one fault per 3,000 conductor meters (10,000 conductor feet) due to manufacturing defects is cause for rejection. A minimum of 6,000 conductor meters (20,000 conductor feet) is required to develop a noncompliance in a reel.

(9) Repairs to the conductor insulation during manufacturing are permissible. The method of repair shall be accepted by RUS prior to its use. The repaired insulation shall be capable of

meeting the relevant electrical requirements of this section.

(10) All repaired sections of insulation shall be retested in the same manner as originally tested for compliance with paragraph (b)(7) of this section.

(11) The colored composite insulating material removed from or tested on the conductor, from a finished cable, shall be capable of meeting the following performance requirements:

Property	Composite insulation
Tensile Strength, Minimum Megapascals (MPa) (Pounds per square inch (psi))	16.5 (2400)
Ultimate Elongation Percent, Minimum	125
Cold Bend Failures, Maximum	0/10
Shrinkback, Maximum Millimeter (mm) (Inches (in.))	9.5 (3/8)
Adhesion, Maximum Newtons (N) (Pound-force (lbf))	13.3 (3)
Compression Minimum, N (lbf)	1780 (400)

(12) *Testing procedures.* The procedures for testing the composite insulation samples for compliance with paragraph (b)(11) of this section shall be as follows:

(i) *Tensile strength and ultimate elongation.* Samples of the insulation material, removed from the conductor, shall be tested in accordance with ASTM D 2633-82(1989), except that the speed of jaw separation shall be 50 millimeters/minute (50 mm/min) (2 inches/minute (2 in./min)).

NOTE: Quality assurance testing at a jaw separation speed of 500 mm/min (20 in./min) is permissible. Failures at this rate shall be retested at the 50 mm/min (2 in./min) rate to determine specification compliance.

(ii) *Cold bend.* Samples of the insulation material on the conductor shall be tested in accordance with ASTM D 4565-90a at a temperature of -40 ± 1 °C with a mandrel diameter of 6 mm (0.25 in.). There shall be no cracks visible to normal or corrected-to-normal vision.

(iii) *Shrinkback.* Samples of insulation shall be tested for four hours at a temperature of 115 ± 1 °C in accordance with ASTM D 4565-90a.

(iv) *Adhesion.* Samples of insulation material on the conductor shall be tested in accordance with ASTM D 4565-90a with a crosshead speed of 50 mm/min (2 in./min).

(v) *Compression.* Samples of the insulation material on the conductor shall be tested in accordance with ASTM D

§ 1755.870

7 CFR Ch. XVII (1–1–97 Edition)

4565–90a with a crosshead speed of 5 mm/min (0.2 in./min).

(13) Other methods of testing may be used if acceptable to RUS.

(c) *Identification of pairs and twisting of pairs.* (1) The PVC skin shall be colored to identify:

(i) The tip and ring conductor of each pair; and

(ii) Each pair in the completed cable.

(2) The colors used to provide identification of the tip and ring conductor of each pair shall be as shown in the following table:

Pair No.	Color	
	Tip	Ring
1	White	Blue
2	White	Orange
3	White	Green
4	White	Brown
5	White	Slate
6	Red	Blue
7	Red	Orange
8	Red	Green
9	Red	Brown
10	Red	Slate
11	Black	Blue
12	Black	Orange
13	Black	Green
14	Black	Brown
15	Black	Slate
16	Yellow	Blue
17	Yellow	Orange
18	Yellow	Green
19	Yellow	Brown
20	Yellow	Slate
21	Violet	Blue
22	Violet	Orange
23	Violet	Green
24	Violet	Brown
25	Violet	Slate

(3) *Standards of color.* The colors of the insulated conductors supplied in accordance with this section are specified in terms of the Munsell Color System (ASTM D 1535–89) and shall comply with the “Table of Wire and Cable Limit Chips” as defined in ANSI/EIA–359–A–84. (Visual color standards meeting these requirements may be obtained directly from the Munsell Color Company, Inc., 2441 North Calvert Street, Baltimore, Maryland 21218).

(4) Positive identification of the tip and ring conductors of each pair by marking each conductor of a pair with the color of its mate is permissible. The method of marking shall be accepted by RUS prior to its use.

(5) Other methods of providing positive identification of the tip and ring conductors of each pair may be em-

ployed if accepted by RUS prior to its use.

(6) The insulated conductors shall be twisted into pairs.

(7) In order to provide sufficiently high crosstalk isolation, the pair twists shall be designed to enable the cable to meet the capacitance unbalance and the crosstalk loss requirements of paragraphs (h)(2), (h)(3), and (h)(4) of this section.

(8) The average length of pair twists in any pair in the finished cable, when measured on any 3 meter (m) (10 foot (ft)) length, shall not exceed 152 mm (6 in.).

(d) *Forming of the cable core.* (1) Twisted pairs shall be assembled in such a way as to form a substantially cylindrical group.

(2) When desired for lay-up reasons, the basic group may be divided into two or more subgroups called units.

(3) Each group, or unit in a particular group, shall be enclosed in bindings of the colors indicated for its particular pair count. The pair count, indicated by the color of insulation, shall be consecutive as indicated in paragraph (d)(5) of this section through units in a group.

(4) Threads or tapes used as binders shall be nonhygroscopic and nonwicking. The threads shall consist of a suitable number of ends of each color arranged as color bands. When tapes are used as binders, they shall be colored. Binders shall be applied with a lay of not more than 100 mm (4 in.). The colored binders shall be readily recognizable as the basic intended color and shall be distinguishable from all other colors.

(5) The colors of the bindings and their significance with respect to pair count shall be as shown in the following table:

Group No.	Color of bindings	Group pair count
1	White-Blue	1–25
2	White-Orange	26–50
3	White-Green	51–75
4	White-Brown	76–100
5	White-Slate	101–125
6	Red-Blue	126–150
7	Red-Orange	151–175
8	Red-Green	176–200
9	Red-Brown	201–225
10	Red-Slate	226–250
11	Black-Blue	251–275
12	Black-Orange	276–300

Rural Utilities Service, USDA

§1755.870

Group No.	Color of bindings	Group pair count
13	Black-Green	301-325
14	Black-Brown	326-350
15	Black-Slate	351-375
16	Yellow-Blue	376-400
17	Yellow-Orange	401-425
18	Yellow-Green	426-450
19	Yellow-Brown	451-475
20	Yellow-Slate	476-500
21	Violet-Blue	501-525
22	Violet-Orange	526-550
23	Violet-Green	551-575
24	Violet-Brown	576-600

(6) The use of the white unit binder in cables of 100 pair or less is optional.

(7) When desired for manufacturing reasons, two or more 25 pair groups may be bound together with nonhygroscopic and nonwicking threads or tapes into super-units. The group binders and the super-unit binders shall be colored such that the combination of the two binders shall positively identify each 25 pair group from every other 25 pair group in the cable.

(8) Super-unit binders shall be of the colors shown in the following table:

SUPER-UNIT BINDER COLORS

Pair No.	Binder color
1-600	White
601-1200	Red

(e) *Core wrap.* (1) The core shall be completely covered with a layer of nonhygroscopic and nonwicking dielectric material. The core wrap shall be applied with an overlap.

(2) The core wrap shall provide a sufficient heat barrier to prevent visible evidence of conductor insulation deformation or adhesion between conductors, caused by adverse heat transfer during the jacketing operation.

(3) Engineering Information: If required for manufacturing reasons, white or uncolored binders of nonhygroscopic and nonwicking material may be applied over the core and/or core wrap.

(f) *Shield.* (1) An aluminum shield, plastic coated on one side, shall be applied longitudinally over the core wrap.

(2) The shield may be applied over the core wrap with or without corrugations (smooth) and shall be bonded to the outer jacket.

(3) The shield overlap shall be a minimum of 3 mm (0.125 in.) for cables with

core diameters of 15 mm (0.625 in.) or less and a minimum of 6 mm (0.25 in.) for cables with core diameters greater than 15 mm (0.625 in.). The core diameter is defined as the diameter under the core wrap and binding.

(4) General requirements for application of the shielding material shall be as follows:

(i) Successive lengths of shielding tapes may be joined during the manufacturing process by means of cold weld, electric weld, soldering with a nonacid flux, or other acceptable means;

(ii) The metal shield with the plastic coating shall have the coating removed prior to joining the metal ends together. After joining, the plastic coating shall be restored without voids using good manufacturing techniques;

(iii) The shields of each length of cable shall be tested for continuity. A one meter (3 ft) section of shield containing a factory joint shall exhibit not more than 110 percent of the resistance of a shield of equal length without a joint;

(iv) The breaking strength of any section of a shield tape containing a factory joint shall not be less than 80 percent of the breaking strength of an adjacent section of the shield of equal length without a joint;

(v) The reduction in thickness of the shielding material due to the corrugating or application process shall be kept to a minimum and shall not exceed 10 percent at any spot; and

(vi) The shielding material shall be applied in such a manner as to enable the cable to pass the bend test as specified in paragraph (i)(1) of this section.

(5) The dimensions of the uncoated aluminum tape shall be 0.2030±0.0254 mm (0.0080±0.0010 in.).

(6) The aluminum tape shall conform to either Alloy AA-1100-0, AA-1145-0, or AA-1235-0 as covered in the latest edition of Aluminum Standards and Data, issued by the Aluminum Association, except that requirements for tensile strength are waived.

(7) The single-sided plastic coated aluminum shield shall conform to the requirements of ASTM B 736-92a, Type I Coating, Class 1 or 2, or Type II Coating, Class 1. The minimum thickness of the Type I Coating shall be 0.038 mm

(0.0015 in.). The minimum thickness of the Type II Coating shall be 0.008 mm (0.0003 in.).

(8) The plastic coated aluminum shield shall be tested for resistance to water migration by immersing a one meter (3 ft) length of tape under a one meter (3 ft) head of water containing a soluble dye plus 0.25 percent (%) wetting agent.

(i) After a minimum of 5 minutes, no dye shall appear between the interface of the shield tape and the plastic coating.

(ii) The actual test method shall be acceptable to RUS.

(9) The bond between the plastic coated shield and the jacket shall conform to the following requirements:

(i) Prepare test strips approximately 200 mm (8 in.) in length. Slit the jacket and shield longitudinally to produce 4 strips evenly spaced and centered in 4 quadrants on the jacket circumference. One of the strips shall be centered over the overlapped edge of the shielding tape. The strips shall be 13 mm (0.5 in.) wide. For cable diameters less than 19 mm (0.75 in.) make two strips evenly spaced.

(ii) Separate the shield and jacket for a sufficient distance to allow the shield and jacket to be fitted in the upper and lower jaws of a tensile machine. Record the maximum force required to separate the shield and jacket to the nearest newton (pound-force). Repeat this action for each test strip.

(iii) The force required to separate the jacket from the shield shall not be less than 9 N (2 lbf) for any individual strip when tested in accordance with paragraph (f)(9)(ii) of this section. The average force for all strips of any cable shall not be less than 18 N (4 lbf).

(g) *Cable jacket and extraneous material.* (1) The jacket shall provide the cable with a tough, flexible, protective covering which can withstand stresses reasonably expected in normal installation and service.

(2) The jacket shall be free from holes, splits, blisters, or other imperfections and shall be as smooth and concentric as is consistent with the best commercial practice.

(3) The raw material used for the cable jacket shall be one of the following four types:

(i) Type PVC-55554EOXO in accordance with ASTM D 2287-81(1988);

(ii) Type PVC-65554EOXO in accordance with ASTM D 2287-81(1988);

(iii) Type PVC-55556EOXO in accordance with ASTM D 2287-81(1988); or

(iv) Type PVC-66554EOXO in accordance with ASTM D 2287-81(1988).

(4) The jacketing material removed from or tested on the cable shall be capable of meeting the following performance requirements:

Property	Jacket performance
Tensile Strength-Unaged Minimum, MPa (psi)	13.8 (2000)
Ultimate Elongation-Unaged Minimum, Percent (%)	200
Tensile Strength-Aged Minimum, % of original value	80
Ultimate Elongation-Aged Minimum, % of original value	50
Impact Failures, Maximum	2/10

(5) *Testing procedures.* The procedures for testing the jacket samples for compliance with paragraph (g)(4) of this section shall be as follows:

(i) *Tensile strength and ultimate elongation-unaged.* The test shall be performed in accordance with ASTM D 2633-82(1989), using a jaw separation speed of 50 mm/min (2 in./min).

NOTE: Quality assurance testing at a jaw separation speed of 500 mm/min (20 in./min) is permissible. Failures at this rate shall be retested at the 50 mm/min (2 in./min) rate to determine specification compliance.

(ii) *Tensile strength and ultimate elongation-aged.* The test shall be performed in accordance with paragraph (g)(5)(i) of this section after being aged for 7 days at a temperature of 100±1 °C in a circulating air oven conforming to ASTM D 2436-85.

(iii) *Impact.* The test shall be performed in accordance with ASTM D 4565-90a using an impact force of 4 newton-meter (3 pound force-foot) at a temperature of -10±1 °C. The cylinder shall strike the sample at the shield overlap. A crack or split in the jacket constitutes failure.

(6) *Jacket thickness.* The nominal jacket thickness shall be as specified in the following table. The test method used shall be either the End Sample Method (paragraph (g)(6)(i) of this section) or the Continuous Uniformity Thickness Gauge Method (paragraph (g)(6)(ii) of this section):

No. of pairs	Nominal jacket thickness mm (in.)
25 or less	1.4 (0.055)
50	1.5 (0.060)
100	1.7 (0.065)
200	1.9 (0.075)
300	2.2 (0.085)
400	2.4 (0.095)
600	2.9 (0.115)
800 and over	3.3 (0.130)

(i) *End sample method.* The jacket shall be capable of meeting the following requirements:

Minimum Average Thickness—90% of nominal thickness

Minimum Thickness—70% of nominal thickness

(ii) *Continuous uniformity thickness gauge method.* (A) The jacket shall be capable of meeting the following requirements:

Minimum Average Thickness—90% of nominal thickness

Minimum (Min.) Thickness—70 % of nominal thickness

Maximum (Max.) Eccentricity—55%
Eccentricity=Max. Thickness—Min. Thickness (Average Thickness)×100

(B) *Maximum and minimum thickness values.* The maximum and minimum thickness values shall be based on the average of each axial section.

(7) The color of the jacket shall be either black or dark grey in conformance with the Munsell Color System specified in ASTM D 1535–89.

(8) There shall be no water or other contaminants in the finished cable which would have a detrimental effect on its performance or its useful life.

(h) *Electrical requirements—(1) Mutual capacitance and conductance.* (i) The average mutual capacitance (corrected for length) of all pairs in any reel shall not exceed the following when tested in accordance with ASTM D 4566–90 at a frequency of 1.0 ± 0.1 kilohertz (kHz) and a temperature of $23 \pm 3^\circ\text{C}$:

Number of cable pairs	Mutual capacitance	
	Nanofarad/kilometer	(Nanofarad/mile)
12	52±4	(83±7)
Over 12	52±2	(83±4)

(ii) The root mean square (rms) deviation of the mutual capacitance of all pairs from the average mutual capaci-

tance of that reel shall not exceed 3.0 % when calculated in accordance with ASTM D 4566–90.

(iii) The mutual conductance (corrected for length and gauge) of any pair shall not exceed 3.7 micromhos/kilometer (micromhos/km) (6.0 micromhos/mile) when tested in accordance with ASTM D 4566–90 at a frequency of 1.0 ± 0.1 kHz and a temperature of $23 \pm 3^\circ\text{C}$.

(2) *Pair-to-pair capacitance unbalance.* The capacitance unbalance as measured on the completed cable shall not exceed 45.3 picofarad/kilometer (pF/km) (25 picofarad/1000 ft (pF/1000 ft)) rms when tested in accordance with ASTM D 4566–90 at a frequency of 1.0 ± 0.1 kHz and a temperature of $23 \pm 3^\circ\text{C}$.

(3) *Pair-to-ground capacitance unbalance.* (i) The average capacitance unbalance as measured on the completed cable shall not exceed 574 pF/km (175 pF/1000 ft) when tested in accordance with ASTM D 4566–90 at a frequency of 1 ± 0.1 kHz and a temperature of $23 \pm 3^\circ\text{C}$.

(ii) When measuring pair-to-ground capacitance unbalance all pairs except the pair under test are grounded to the shield except when measuring cable containing super-units in which case all other pairs in the same super-unit shall be grounded to the shield.

(iii) Pair-to-ground capacitance unbalance may vary directly with the length of the cable.

(4) *Crosstalk loss.* (i) The rms output-to-output far-end crosstalk loss (FEXT) measured on the completed cable in accordance with ASTM D 4566–90 at a test frequency of 150 kHz shall not be less than 68 decibel/kilometer (dB/km) (73 decibel/1000 ft (dB/1000 ft)). The rms calculation shall be based on the combined total of all adjacent and alternate pair combinations within the same layer and center to first layer pair combinations.

(ii) The FEXT crosstalk loss between any pair combination of a cable shall not be less than 58 dB/km (63 dB/1000 ft) at a frequency of 150 kHz. If the loss K_o at a frequency F_o for length L_o is known, then K_x can be determined for any other frequency F_x or length L_x by:

$$\text{FEXT loss (K}_x\text{)} = K_o - 20 \log 10 \frac{F_x}{F_o} - 10 \log 10 \frac{L_x}{L_o}$$

(iii) The near-end crosstalk loss (NEXT) as measured within and between units of a completed cable in accordance with ASTM D 4566–90 at a frequency of 772 kHz shall not be less than the following mean minus sigma (M–S) crosstalk requirement for any unit within the cable:

Unit size	M–S decibel (dB)
Within Unit:	
12 and 13 pairs	56
18 and 25 pairs	60
Between Unit:	
Adjacent 13 pairs	65
Adjacent 25 pairs	66
Nonadjacent (all)	81

Where M–S is the Mean near-end coupling loss based on the combined total of all pair combinations, less one Standard Deviation, Sigma, of the mean value.

(5) *Insulation resistance.* Each insulated conductor in each length of completed cable, when measured with all other insulated conductors and the shield grounded, shall have an insulation resistance of not less than 152 megohm-kilometer (500 megohm-mile) at 20±1°C. The measurement shall be made in accordance with the procedures of ASTM D 4566–90.

(6) *High voltage test.* (i) In each length of completed cable, the dielectric strength of the insulation between conductors shall be tested in accordance with ASTM D 4566–90 and shall withstand, for 3 seconds, a direct current (dc) potential whose value is not less than:

(A) 3.6 kilovolts for 22-gauge conductors; or

(B) 3.0 kilovolts for 24-gauge conductors.

(ii) In each length of completed cable, the dielectric strength between the shield and all conductors in the core shall be tested in accordance with ASTM D 4566–90 and shall withstand, for 3 seconds, a dc potential whose value is not less than 10 kilovolts.

(7) *Conductor resistance.* The dc resistance of any conductor shall be measured in the completed cable in accordance with ASTM D 4566–90 and shall not exceed the following values when measured at or corrected to a temperature of 20±1°C:

AWG	Maximum resistance	
	ohms/kilometer	(ohms/1000 ft)
22	60.7	(18.5)
24	95.1	(29.0)

(8) *Resistance unbalance.* (i) The difference in dc resistance between the two conductors of a pair in the completed cable shall not exceed the values listed in this paragraph when measured in accordance with the procedures of ASTM D 4566–90:

AWG	Resistance unbalance	Maximum for any reel
	Average percent	Individual pair percent
22	1.5	4.0
24	1.5	5.0

(ii) The resistance unbalance between tip and ring conductors shall be random with respect to the direction of unbalance. That is, the resistance of the tip conductors shall not be consistently higher with respect to the ring conductors and vice versa.

(9) *Electrical variations.* (i) Pairs in each length of cable having either a ground, cross, short, or open circuit condition shall not be permitted.

(ii) The maximum number of pairs in a cable which may vary as specified in paragraph (h)(9)(iii) of this section from the electrical parameters given in this section are listed in this paragraph. These pairs may be excluded from the arithmetic calculation:

Nominal pair count	Maximum No. of pairs with allowable electrical variation
12–100	1
101–300	2
301–400	3
401–600	4

Nominal pair count	Maximum No. of pairs with allow- able elec- trical vari- ation
601 and above	6

(iii) *Parameter variations*—(A) *Capacitance unbalance-to-ground*. If the cable fails either the maximum individual pair or average capacitance unbalance-to-ground requirement and all individual pairs are 3280 pF/km (1000 pF/1000 ft) or less the number of pairs specified in paragraph (h)(9)(ii) of this section may be eliminated from the average and maximum individual calculations.

(B) *Resistance unbalance*. Individual pair of not more than 7 percent for all gauges.

(C) *Far end crosstalk*. Individual pair combination of not less than 52 dB/km (57 dB/1000 ft).

NOTE: RUS recognizes that in large pair count cables (600 pair and above) a cross, short, or open circuit condition occasionally may develop in a pair which does not affect the performance of the other cable pairs. In these circumstances rejection of the entire cable may be economically unsound or repairs may be impractical. In such circumstances the manufacturer may desire to negotiate with the customer for acceptance of the cable. No more than 0.5 percent of the pairs may be involved.

(i) *Mechanical requirements*—(1) *Cable cold bend test*. The completed cable shall be capable of meeting the requirements of ASTM D 4565–90a after conditioning at -20 ± 2 °C except the mandrel diameters shall be as specified below:

Cable outside diameter	Mandrel diameter
<40 mm (1.5 in.)	15x
≥40 mm (1.5 in.)	20x

(2) *Cable flame test*. The completed cable shall be capable of meeting a maximum flame height of 3.7 m (12.0 ft) when tested in accordance with Underwriters Laboratories (UL) 1666 dated January 22, 1991.

(3) *Cable listing*. All cables manufactured to the specification of this section at a minimum shall be listed as Communication Riser Cable (Type CMR) in accordance with Sections 800–

50 and 800–51(b) of the 1993 National Electrical Code.

(j) *Sheath slitting cord* (optional). (1) Sheath slitting cords may be used in the cable structure at the option of the manufacturer.

(2) When a sheath slitting cord is used it shall be nonhygroscopic and nonwicking, continuous throughout a length of cable, and of sufficient strength to open the sheath without breaking the cord.

(3) Sheath slitting cords shall be capable of consistently slitting the jacket and/or shield for a continuous length of 0.6 m (2 ft) when tested in accordance with the procedure specified in appendix B of this section.

(k) *Identification marker and length marker*. (1) Each length of cable shall be permanently identified as to manufacturer and year of manufacture.

(2) The number of conductor pairs and their gauge size shall be marked on the jacket.

(3) The marking shall be printed on the jacket at regular intervals of not more than 1.5 m (5 ft).

(4) An alternative method of marking may be used if accepted by RUS prior to its use.

(5) The completed cable shall have sequentially numbered length markers in FEET OR METERS at regular intervals of not more than 1.5 m (5 ft) along the outside of the jacket.

(6) The method of length marking shall be such that for any single length of cable, continuous sequential numbering shall be employed.

(7) The numbers shall be dimensioned and spaced to produce good legibility and shall be approximately 3 mm (0.125 in.) in height. An occasional illegible marking is permissible if there is a legible marking located not more than 1.5 m (5 ft) from it.

(8) The method of marking shall be by means of suitable surface markings producing a clear, distinguishable, contrasting marking acceptable to RUS. Where direct or transverse printing is employed, the characters should be indented to produce greater durability of marking. Any other method of length marking shall be acceptable to RUS as producing a marker suitable for the field. Size, shape and spacing of numbers, durability, and overall legibility

§ 1755.870

of the marker shall be considered in acceptance of the method.

(9) The accuracy of the length marking shall be such that the actual length of any cable section is never less than the length indicated by the marking and never more than one percent greater than the length indicated by the marking.

(10) The color of the initial marking for a black colored jacket shall be either white or silver. The color of the initial marking for a dark grey colored jacket shall be either red or black. If the initial marking of the black colored jacket fails to meet the requirements of the preceding paragraphs, it will be permissible to either remove the defective marking and re-mark with the white or silver color or leave the defective marking on the cable and re-mark with yellow. If the initial marking of the dark grey colored jacket fails to meet the requirements of the preceding paragraphs, it will be permissible to either remove the defective marking and re-mark with the red or black color or leave the defective marking on the cable and re-mark with yellow. No further re-marking is permitted. Any re-marking shall be on a different portion of the cable circumference than any existing marking when possible and have a numbering sequence differing from any other existing marking by at least 5,000.

(11) Any reel of cable which contains more than one set of sequential markings shall be labeled to indicate the color and sequence of marking to be used. The labeling shall be applied to the reel and also to the cable.

(1) *Preconnectorized cable* (optional).

(1) At the option of the manufacturer and upon request by the purchaser, cables 100 pairs and larger may be factory terminated in 25 pair splicing modules.

(2) The splicing modules shall meet the requirements of RUS Bulletin 345-54, PE-52, RUS Specification for Telephone Cable Splicing Connectors (Incorporated by Reference at §1755.97), and be accepted by RUS prior to their use.

(m) *Acceptance testing and extent of testing.* (1) The tests described in appendix A of this section are intended for acceptance of cable designs and major modifications of accepted designs. RUS

7 CFR Ch. XVII (1-1-97 Edition)

decides what constitutes a major modification. These tests are intended to show the inherent capability of the manufacturer to produce cable products having long life and stability.

(2) For initial acceptance, the manufacturer shall submit:

(i) An original signature certification that the product fully complies with each section of the specification;

(ii) Qualification Test Data, per appendix A of this section;

(iii) To periodic plant inspections;

(iv) A certification that the product does or does not comply with the domestic origin manufacturing provisions of the "Buy American" requirements of the Rural Electrification Act of 1938 (7 U.S.C. 901 *et seq.*);

(v) Written user testimonials concerning performance of the product; and

(vi) Other nonproprietary data deemed necessary by the Chief, Outside Plant Branch (Telephone).

(3) For requalification acceptance, the manufacturer shall submit an original signature certification that the product fully complies with each section of the specification, excluding the Qualification Section, and a certification that the product does or does not comply with the domestic origin manufacturing provisions of the "Buy American" requirements of the Rural Electrification Act of 1938 (7 U.S.C. 901 *et seq.*) for acceptance by June 30 every three years. The required data and certification shall have been gathered within 90 days of the submission.

(4) Initial and requalification acceptance requests should be addressed to: Chairman, Technical Standards Committee "A" (Telephone), Telecommunications Standards Division, Rural Utilities Service, Washington, DC 20250-1500.

(5) *Tests on 100 percent of completed cable.* (i) The shield of each length of cable shall be tested for continuity using the procedures of ASTM D 4566-90.

(ii) Dielectric strength between all conductors and the shield shall be tested to determine freedom from grounds in accordance with paragraph (h)(6)(ii) of this section.

(iii) Each conductor in the completed cable shall be tested for continuity

using the procedures of ASTM D 4566–90.

(iv) Dielectric strength between conductors shall be tested to ensure freedom from shorts and crosses in accordance with paragraph (h)(6)(i) of this section.

(v) Each conductor in the completed preconnectorized cable shall be tested for continuity.

(vi) Each length of completed preconnectorized cable shall be tested for split pairs.

(vii) The average mutual capacitance shall be measured on all cables. If the average mutual capacitance for the first 100 pairs tested from randomly selected groups is between 50 and 53 nF/km (80 to 85 nF/mile), the remainder of the pairs need not to be tested on the 100 percent basis. (See paragraph (h)(1) of this section).

(6) *Capability tests.* Tests on a quality assurance basis shall be made as frequently as is required for each manufacturer to determine and maintain compliance with:

(i) Performance requirements for conductor insulation and jacket material;

(ii) Bonding properties of coated or laminated shielding materials;

(iii) Sequential marking and lettering;

(iv) Capacitance unbalance and crosstalk;

(v) Insulation resistance;

(vi) Conductor resistance and resistance unbalance;

(vii) Cable cold bend and cable flame tests; and

(viii) Mutual conductance.

(n) *Summary of records of electrical and physical tests.* (1) Each manufacturer shall maintain a suitable summary of records for a period of at least 3 years for all electrical and physical tests required on completed cable by this section as set forth in paragraphs (m)(5) and (m)(6) of this section. The test data for a particular reel shall be in a form that it may be readily available to the purchaser or to RUS upon request.

(2) Measurements and computed values shall be rounded off to the number of places of figures specified for the requirement according to ASTM E 29–90.

(o) *Manufacturing irregularities.* (1) Repairs to the shield are not permitted

in cable supplied to the end user under this section.

(2) No repairs or defects in the jacket are allowed.

(p) *Preparation for shipment.* (1) The cable shall be shipped on reels unless otherwise specified or agreed to by the purchaser. The diameter of the drum shall be large enough to prevent damage to the cable from reeling or unreeling. The reels shall be substantial and so constructed as to prevent damage to the cable during shipment and handling.

(2) A waterproof corrugated board or other means of protection acceptable to RUS shall be applied to the reel and shall be suitably secured in place to prevent damage to the cable during storage and shipment.

(3) The outer end of the cable shall be securely fastened to the reel head so as to prevent the cable from becoming loose in transit. The inner end of the cable shall be securely fastened in such a way as to make it readily available if required for electrical testing. Spikes, staples, or other fastening devices which penetrate the cable jacket shall not be used. The method of fastening the cable ends shall be accepted by RUS prior to it being used.

(4) Each length of cable shall be wound on a separate reel unless otherwise specified or agreed to by the purchaser.

(5) The arbor hole shall admit a spindle 63 mm (2.5 in.) in diameter without binding. Steel arbor hole liners may be used but shall be acceptable to RUS prior to their use.

(6) Each reel shall be plainly marked to indicate the direction in which it should be rolled to prevent loosening of the cable on the reel.

(7) Each reel shall be stenciled or labeled on either one or both sides with the name of the manufacturer, year of manufacture, actual shipping length, an inner and outer end sequential length marking, description of the cable, reel number and the RUS cable designation:

Cable Designation

CT

Cable Construction

Pair Count

Conductor Gauge

A = Coated Aluminum Shield

P = Preconnectorized Cable

Example: CTAP 100–22

Terminating Cable, Coated Aluminum Shield, Preconnectorized, 100 pairs, 22 AWG.

(8) When preconnectorized cable is shipped, the splicing modules shall be protected to prevent damage during shipment and handling. The protection method shall be acceptable to RUS prior to its use.

(The information collection and record-keeping requirements of this section have been approved by the Office of Management and Budget (OMB) under control number 0572–0059)

APPENDIX A TO 7 CFR 1755.870—
QUALIFICATION TEST METHODS

(I) The test procedures described in this appendix are for qualification of initial designs and major modifications of accepted designs. Included in paragraph (V) of this appendix are suggested formats that may be used in submitting test results to RUS.

(II) *Sample Selection and Preparation.* (1) All testing shall be performed on lengths removed sequentially from the same 25 pair, 22 gauge jacketed cable. This cable shall not have been exposed to temperatures in excess of 38 °C since its initial cool down after sheathing. The lengths specified are minimum lengths and if desirable from a laboratory testing standpoint longer lengths may be used.

(a) Length A shall be 12 ± 0.2 meters (40 $\pm$ 0.5 feet) long. Prepare the test sample by removing the jacket, shield, and core wrap for a sufficient distance on both ends to allow the insulated conductors to be flared out. Remove sufficient conductor insulation so that appropriate electrical test connections can be made at both ends. Coil the sample with a diameter of 15 to 20 times its sheath diameter. Two lengths are required.

(b) Length B shall be 300 millimeters (1 foot) long. Three lengths are required.

(c) Length C shall be 3 meters (10 feet) long and shall be maintained at 23 ± 3 °C for the duration of the test. Two lengths are required.

(2) *Data Reference Temperature.* Unless otherwise specified, all measurements shall be made at 23 ± 3 °C.

(III) *Environmental Tests*—(1) *Heat Aging Test*—(a) *Test Samples.* Place one sample each of lengths A and B in an oven or environmental chamber. The ends of sample A shall

exit from the chamber or oven for electrical tests. Securely seal the oven exit holes.

(b) *Sequence of Tests.* Sample B referenced in paragraph (III)(1)(a) of this appendix shall be subjected to the insulation compression test outlined in paragraph (III)(2) of this appendix.

(c) *Initial Measurements.* (i) For sample A, measure the open circuit capacitance and conductance for each odd pair at 1, 150, and 772 kilohertz after conditioning the sample at the data reference temperature for 24 hours. Calculate the average and standard deviation for the data of the 13 pairs on a per kilometer (per mile) basis.

(ii) Record on suggested formats in paragraph (V) of this appendix or on other easily readable formats.

(d) *Heat Conditioning.* (i) Immediately after completing the initial measurements, condition the sample for 14 days at a temperature of 65 ± 2 °C.

(ii) At the end of this period. Measure and calculate the parameters given in paragraph (III)(1)(c) of this appendix. Record on suggested formats in paragraph (V) of this appendix or on other easily readable formats.

(e) *Overall Electrical Deviation.* (i) Calculate the percent change in all average parameters between the final parameters after conditioning with the initial parameters in paragraph (III)(1)(c) of this appendix.

(ii) The stability of the electrical parameters after completion of this test shall be within the following prescribed limits:

(A) *Capacitance.* The average mutual capacitance shall be within 10 percent of its original value;

(B) The change in average mutual capacitance shall be less than 10 percent over the frequency range of 1 to 150 kilohertz; and

(C) *Conductance.* The average mutual conductance shall not exceed 3.7 micromhos/kilometer (6 micromhos/mile) at a frequency of 1 kilohertz.

(2) *Insulation Compression Test*—(a) *Test Sample B.* Remove jacket, shield, and core wrap being careful not to damage the conductor insulation. Remove one pair from the core and carefully separate and straighten the insulated conductors. Retwist the two insulated conductors together under sufficient tension to form 10 evenly spaced 360 degree twists in a length of 100 millimeters (4 inches).

(b) *Sample Testing.* Center the mid 50 millimeters (2 inches) of the twisted pair between two smooth rigid parallel metal plates measuring 50 millimeters (2 inches) in length or diameter. Apply a 1.5 volt direct current potential between the conductors, using a light or buzzer to indicate electrical contact between the conductors. Apply a constant load of 67 newtons (15 pound-force) on the sample for one minute and monitor for evidence of contact between the conductors. Record results on suggested formats in paragraph (V)

Rural Utilities Service, USDA

§ 1755.870

of this appendix or on other easily readable formats.

(3) *Temperature Cycling.* (a) Repeat paragraphs (III)(1)(a) through (III)(1)(c)(ii) of this appendix for a separate set of samples A and B which have not been subjected to prior environmental conditioning.

(b) Immediately after completing the measurements, subject the test samples to 10 cycles of temperature between -40°C and $+60^{\circ}\text{C}$. The test samples shall be held at each temperature extreme for a minimum of 1.5 hours during each cycle of temperature. The air within the temperature cycling chamber shall be circulated throughout the duration of the cycling.

(c) Repeat paragraphs (III)(1)(d)(ii) through (III)(2)(b) of this appendix.

(IV) *Control Sample—(1) Test Samples.* One length of sample B shall have been maintained at $23 \pm 3^{\circ}\text{C}$ for at least 48 hours before the testing.

(2) Repeat paragraphs (III)(2) through (III)(2)(b) of this appendix.

(3) *Surge Test.* (a) One length of sample C shall be used to measure the breakdown between conductors while the other length of C shall be used to measure core to shield breakdown.

(b) The samples shall be capable of withstanding, without damage, a single surge voltage of 20 kilovolts peak between conductors, and 35 kilovolts peak between conductors and the shield as hereinafter described. The surge voltage shall be developed from a capacitor discharge through a forming resistor connected in parallel with the dielectric of the test sample. The surge generator constants shall be such as to produce a surge of 1.5×40 microseconds wave shape.

(c) The shape of the generated wave shall be determined at a reduced voltage by connecting an oscilloscope across the forming resistor with the cable sample connected in parallel with the forming resistor. The capacitor bank is charged to the test voltage and then discharged through the forming resistor and test sample. The test sample shall be considered to have passed the test if there is no distinct change in the wave shape obtained with the initial reduced voltage compared to that obtained after the application of the test voltage.

(V) The following suggested formats may be used in submitting the test results to RUS:

APPENDIX B TO 7 CFR 1755.870—SHEATH
SLITTING CORD QUALIFICATION

(I) This test procedure described in this appendix is for qualification of initial and subsequent changes in sheath slitting cords.

(II) *Sample selection.* All testing shall be performed on two 1.2 m (4 ft) lengths of cable removed sequentially from the same 25 pair, 22 gauge jacketed cable. This cable shall not have been exposed to temperatures in excess of 38 °C since its initial cool down after sheathing.

(III) *Test procedure.* (1) Using a suitable tool, expose enough of the sheath slitting

cord to permit grasping with needle nose pliers.

(2) The prepared test specimens shall be maintained at a temperature of 23 ± 1 °C for at least 4 hours immediately prior to and during the test.

(3) Wrap the sheath slitting cord around the plier jaws to ensure a good grip.

(4) Grasp and hold the cable in a convenient position while gently and firmly pulling the sheath slitting cord longitudinally in the direction away from the cable end. The angle of pull may vary to any convenient and functional degree. A small starting notch is permissible.

(5) The sheath slitting cord is considered acceptable if the cord can slit the jacket and/or shield for a continuous length of 0.6 m (2 ft) without breaking the cord.

[59 FR 30507, June 14, 1994; 59 FR 34899, July 7, 1994, as amended at 60 FR 1711, Jan. 5, 1995]

Rural Utilities Service, USDA

§ 1755.890

§§ 1755.871—1755.889 [Reserved]

§ 1755.890 RUS specification for filled telephone cables with expanded insulation.

(a) *Scope.* (1) This section covers the requirements for filled telephone cables intended for direct burial installation either by trenching or by direct plowing, for underground application by placement in a duct, or for aerial installation by attachment to a support strand.

(i) The conductors are solid copper, individually insulated with an extruded cellular insulating compound which may be either totally expanded or expanded with a solid skin coating.

(ii) The insulated conductors are twisted into pairs which are then stranded or oscillated to form a cylindrical core.

(iii) For high frequency applications, the cable core may be separated into compartments with screening shields.

(iv) A moisture resistant filling compound is applied to the stranded conductors completely covering the insulated conductors and filling the interstices between pairs and units.

(v) The cable structure is completed by the application of suitable core wrapping material, a flooding compound, a shield or a shield/armor, and an overall plastic jacket.

(2) The number of pairs and gauge size of conductors which are used within the RUS program are provided in the following table:

AWG	19	22	24	26
Pairs	6	6	6	
	12	12	12	
	18	18	18	
	25	25	25	25
		50	50	50
		75	75	75
		100	100	100
		150	150	150
		200	200	200
		300	300	300
		400	400	400
		600	600	600
		900	900	900
		1000	1000	1000
			1200	1200
			1500	1500
			1800	1800
				2100
				2400
				2700

NOTE: Cables larger in pair sizes than those shown in this table must meet all requirements of this section.

(3) Screened cable, when specified, must meet all requirements of this section. The pair sizes of screened cables used within the RUS program are referenced in paragraph (e)(2)(i) of this section.

(4) All cables sold to RUS borrowers for projects involving RUS loan funds under this section must be accepted by RUS Technical Standards Committee "A" (Telephone). For cables manufactured to the specification of this section, all design changes to an accepted design must be submitted for acceptance. RUS will be the sole authority on what constitutes a design change.

(5) Materials, manufacturing techniques, or cable designs not specifically addressed by this section may be allowed if accepted by RUS. Justification for acceptance of modified materials, manufacturing techniques, or cable designs must be provided to substantiate product utility and long-term stability and endurance.

(6) The American National Standard Institute/Insulated Cable Engineers Association, Inc. (ANSI/ICEA) S-84-608-1988, Standard For Telecommunications Cable, Filled, Polyolefin Insulated, Copper Conductor Technical Requirements referenced throughout this section is incorporated by reference by RUS. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies

§ 1755.890

7 CFR Ch. XVII (1–1–97 Edition)

of ANSI/ICEA S-84-608-1988 are available for inspection during normal business hours at RUS, room 2845, U.S. Department of Agriculture, Washington, DC 20250 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. Copies are available from ICEA, P. O. Box 440, South Yarmouth, MA 02664, telephone number (508) 394-4424.

(7) American Society for Testing and Materials specifications (ASTM) A 505-87, Standard Specification for Steel, Sheet and Strip, Alloy, Hot-Rolled and Cold-Rolled, General Requirements For; ASTM B 193-87, Standard Test Method for Resistivity of Electrical Conductor Materials; ASTM B 224-80, Standard Classification of Coppers; ASTM B 694-86, Standard Specification for Copper, Copper Alloy, and Copper-Clad Stainless Steel Sheet and Strip for Electrical Cable Shielding; ASTM D 4565-90a, Standard Test Methods for Physical and Environmental Performance Properties of Insulations and Jackets for Telecommunications Wire and Cable; and ASTM D 4566-90, Standard Test Methods for Electrical Performance Properties of Insulations and Jackets for Telecommunications Wire and Cable referenced in this section are incorporated by reference by RUS. These incorporations by references were approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of the ASTM standards are available for inspection during normal business hours at RUS, room 2845, U.S. Department of Agriculture, Washington, DC 20250 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. Copies are available from ASTM, 1916 Race Street, Philadelphia, PA 19103-1187, telephone number (215) 299-5585.

(b) *Conductors and conductor insulation.* (1) The gauge sizes of the copper conductors covered by this section must be 19, 22, 24, and 26 American Wire Gauge (AWG).

(2) Each conductor must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 2.1.

(3) Factory joints made in conductors during the manufacturing process must comply with the requirements specified

in ANSI/ICEA S-84-608-1988, paragraph 2.2.

(4) The raw materials used for conductor insulation must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraphs 3.1 through 3.1.3.

(5) The finished conductor insulation must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraphs 3.2.2, 3.2.3, and 3.3.

(6) Insulated conductor must not have an overall diameter greater than 2 millimeters (mm) (0.081 inch (in.)).

(7) A permissible overall performance level of faults in conductor insulation must average not greater than one fault per 12,000 conductor meters (40,000 conductor feet) for each gauge of conductor.

(i) All insulated conductors must be continuously tested for insulation faults during the twinning operation with a method of testing acceptable to RUS. The length count and number of faults must be recorded. The information must be retained for a period of 6 months and be available for review by RUS when requested.

(ii) The voltages for determining compliance with the requirements of this section are as follows:

AWG	Direct Current Voltages (kilovolts)
19	4.5
22	3.6
24	3.0
26	2.4

(8) Repairs to the conductor insulation during manufacture are permissible. The method of repair must be accepted by RUS prior to its use. The repaired insulation must be capable of meeting the relevant electrical requirements of this section.

(9) All repaired sections of insulation must be retested in the same manner as originally tested for compliance with paragraph (b)(7) of this section.

(10) The colored insulating material removed from or tested on the conductor, from a finished cable, must meet the performance requirements specified in ANSI/ICEA S-84-608-1988, paragraphs 3.4.1 through 3.4.6.

(c) *Identification of pairs and twisting of pairs.* (1) The insulation must be colored to identify:

Rural Utilities Service, USDA**§ 1755.890**

(i) The tip and ring conductor of each pair; and

(ii) Each pair in the completed cable.

(2) The colors to be used in the pairs in the 25 pair group, together with the pair numbers must be in accordance with the table specified in ANSI/ICEA S-84-608-1988, paragraph 3.5.

(3) Positive identification of the tip and ring conductors of each pair by marking each conductor of a pair with the color of its mate is permissible. The method of marking must be accepted by RUS prior to its use.

(4) Other methods of providing positive identification of the tip and ring conductors of each pair may be employed if accepted by RUS prior to its use.

(5) The insulated conductors must be twisted into pairs.

(6) In order to provide sufficiently high crosstalk isolation, the pair twists must be designed to enable the cable to meet the capacitance unbalance and crosstalk loss requirements of paragraphs (k)(5), (k)(6), and (k)(8) this section.

(7) The average length of pair twists in any pair in the finished cable, when measured on any 3 meter (10 foot) length, must not exceed the requirement specified in ANSI/ICEA S-84-608-1988, paragraph 3.5.

(d) *Forming of the cable core.* (1) Twisted pairs must be assembled in such a way as to form a substantially cylindrical group.

(2) When desired for lay-up reasons, the basic group may be divided into two or more subgroups called units.

(3) Each group, or unit in a particular group, must be enclosed in bindings of the colors indicated for its particular pair count. The pair count, indicated by the colors of insulation, must be consecutive as indicated in paragraph (d)(6) of this section through units in a group.

(4) The filling compound must be applied to the cable core in such a way as to provide as near a completely filled core as is commercially practical.

(5) Threads and tapes used as binders must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraphs 4.2 and 4.2.1.

(6) The colors of the bindings and their significance with respect to pair count must be as follows:

Group No.	Color of Bindings	Group Pair Count
1	White-Blue	1-25
2	White-Orange	26-50
3	White-Green	51-75
4	White-Brown	76-100
5	White-Slate	101-125
6	Red-Blue	126-150
7	Red-Orange	151-175
8	Red-Green	176-200
9	Red-Brown	201-225
10	Red-Slate	226-250
11	Black-Blue	251-275
12	Black-Orange	276-300
13	Black-Green	301-325
14	Black-Brown	326-350
15	Black-Slate	351-375
16	Yellow-Blue	376-400
17	Yellow-Orange	401-425
18	Yellow-Green	426-450
19	Yellow-Brown	451-475
20	Yellow-Slate	476-500
21	Violet-Blue	501-525
22	Violet-Orange	526-550
23	Violet-Green	551-575
24	Violet-Brown	576-600

(7) The use of the white unit binder in cables of 100 pairs or less is optional.

(8) When desired for manufacturing reasons, two or more 25 pair groups may be bound together with nonhygroscopic and nonwicking threads or tapes into a super-unit. Threads or tapes must meet the requirements specified in paragraph (d)(5) of this section. The group binders and the super-unit binders must be color coded such that the combination of the two binders must positively identify each 25 pair group from every other 25 pair group in the cable. Super-unit binders must be of the color shown in the following table:

Super-Unit Binder Colors

Pair Numbers	Binder Color
1-600	White
601-1200	Red
1201-1800	Black
1801-2400	Yellow
2401-3000	Violet
3001-3600	Blue
3601-4200	Orange
4201-4800	Green
4801-5400	Brown
5401-6000	Slate

(9) Color binders must not be missing for more than 90 meters (300 feet) from any 25 pair group or from any subgroup used as part of a super-unit. At any cable cross-section, no adjacent 25 pair groups and no more than one subgroup

§ 1755.890

of any super-unit may have missing binders. In no case must the total number of missing binders exceed three. Missing super-unit binders must not be permitted for any distance.

7 CFR Ch. XVII (1–1–97 Edition)

(10) Any reel of cable which contains missing binders must be labeled indicating the colors and location of the binders involved. The labeling must be applied to the reel and also to the cable.

(e) *Screened cable.* (1) Screened cable must be constructed such that a metallic, internal screen(s) must be provided to separate and provide sufficient isolation between the compartments to meet the requirements of this section.

(2) At the option of the user or manufacturer, identified service pairs providing for voice order and fault location may be placed in screened cables.

(i) The number of service pairs provided must be one per twenty-five operating pairs plus two for a cable size up to and including 400 pairs, subject to a minimum of four service pairs. The pair counts for screened cables are as follows:

Screened Cable Pair Counts

Carrier Pair Count	Service Pairs	Total Pair Count
24	4	28
50	4	54
100	6	106
150	8	158
200	10	210
300	14	314
400	18	418

(ii) The service pairs must be equally divided among the compartments. The color sequence must be repeated in each compartment.

(iii) The electrical and physical characteristics of each service pair must meet all the requirements set forth in this section.

(iv) The colors used for the service pairs must be in accordance with the requirements of paragraph (b)(5) of this section. The color code used for the service pairs together with the service pair number are shown in the following table:

Color Code For Service Pairs

Service Pair No.	Color	
	Tip	Ring
1	White	Red
2	"	Black
3	"	Yellow
4	"	Violet
5	Red	Black
6	"	Yellow
7	"	Violet
8	Black	Yellow
9	"	Violet

(3) The screen tape must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraphs 5.1 through 5.4.

(4) The screen tape must be tested for dielectric strength by completely removing the protective coating from one end to be used for grounding purposes.

(i) Using an electrode, over a 30 centimeter (1 foot) length, apply a direct current (dc) voltage at the rate of rise of 500 volts/second until failure.

(ii) No breakdown should occur below 8 kilovolts.

(f) *Filling compound.* (1) After or during the stranding operation and prior to application of the core wrap, filling compound must be applied to the cable core. The compound must be as nearly colorless as is commercially feasible and consistent with the end product requirements and pair identification.

(2) The filling compound must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraphs 4.4 through 4.4.4.

(3) The individual cable manufacturer must satisfy RUS that the filling compound selected for use is suitable for its intended application. The filling compound must be applied to the cable in such a manner that the cable components will not be degraded.

(g) *Core wrap.* (1) The core wrap must comply with the requirements specified in ANSI/ICEA-S-84-608-1988, paragraph 4.3.

(2) If required for manufacturing reasons, white or colored binders of non-hygroscopic and nonwicking material may be applied over the core and/or wrap. When used, binders must meet the requirements specified in paragraph (d)(5) of this section.

(3) Sufficient filling compound must have been applied to the core wrap so

that voids or air spaces existing between the core and the inner side of the core wrap are minimized.

(h) *Flooding compound.* (1) Sufficient flooding compound must be applied on all sheath interfaces so that voids and air spaces in these areas are minimized. When the optional armored design is used, the flooding compound must be applied between the core wrap and shield, between the shield and armor, and between the armor and the jacket so that voids and air spaces in these areas are minimized. The use of floodant over the outer metallic substrate is not required if uniform bonding, per paragraph (i)(7) of this section, is achieved between the plastic-clad metal and the jacket.

(2) The flooding compound must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 4.5 and the jacket slip test requirements of appendix A, paragraph (III)(5) of this section.

(3) The individual cable manufacturer must satisfy RUS that the flooding compound selected for use is acceptable for the application.

(i) *Shield and optional armor.* (1) A single corrugated shield must be applied longitudinally over the core wrap.

(2) For unarmored cable the shield overlap must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.3.2. Core diameter is defined as the diameter under the core wrap and binding.

(3) For cables containing the coated aluminum shield/coated steel armor (CACSP) sheath design, the coated aluminum shield must be applied in accordance with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.3.2, Dual Tape Shielding System.

(4) General requirements for application of the shielding material are as follows:

(i) Successive lengths of shielding tapes may be joined during the manufacturing process by means of cold weld, electric weld, soldering with a nonacid flux or other acceptable means.

(ii) Shield splices must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.3.3.

(iii) The corrugations and the application process of the coated aluminum and copper bearing shields must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.3.1.

(iv) The shielding material must be applied in such a manner as to enable the cable to pass the cold bend test specified in paragraph (1)(3) of this section.

(5) The following is a list of acceptable materials for use as cable shielding. Other types of shielding materials may also be used provided they are accepted by RUS prior to their use.

Standard Cable	Gopher Resistant Cable
8-mil Coated Aluminum ¹ 5-mil Copper	10-mil Copper 6-mil Copper-Clad Stainless Steel 5 mil Copper-Clad Stainless Steel 5 mil Copper-Clad Alloy Steel 7-mil Alloy 194 6-mil Alloy 194 8-mil Coated Aluminum ¹ and 6-mil Coated Steel ¹

¹Dimensions of uncoated metal.

(i) The 8-mil aluminum tape must be plastic coated on both sides and must comply with the requirements of ANSI/ICEA S-84-608-1988, paragraph 6.2.2.

(ii) The 5-mil copper tape must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.2.3.

(iii) The 10-mil copper tape must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.2.4.

(iv) The 6-mil copper clad stainless steel tape must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.2.5.

(v) The 5-mil copper clad stainless steel tape must be in the fully annealed condition and must conform to the requirements of American Society for Testing and Materials (ASTM) B 694-86, with a cladding ratio of 16/68/16.

(A) The electrical conductivity of the clad tape must be a minimum of 28 percent of the International Annealed Copper Standard (IACS) when measured per ASTM B 193-87.

(B) The tape must be nominally 0.13 millimeter (0.005 inch) thick with a minimum thickness of 0.11 millimeter (0.0045 inch).

(vi) The 5-mil copper clad alloy steel tape must be in the fully annealed condition and the copper component must conform to the requirements of ASTM B 224-80 and the alloy steel component must conform to the requirements of ASTM A 505-87, with a cladding ratio of 16/68/16.

(A) The electrical conductivity of the copper clad alloy steel tape must comply with the requirement specified in (5)(v)(A) of this section.

(B) The thickness of the copper clad alloy steel tape must comply with the requirements specified in (5)(v)(B) of this section.

(vii) The 6-mil and 7-mil 194 copper alloy tapes must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.2.6.

(6) The corrugation extensibility of the coated aluminum shield must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.4.

(7) When the jacket is bonded to the plastic coated aluminum shield, the bond between the jacket and shield must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 7.2.6.

(8) A single plastic coated steel corrugated armor must be applied longitudinally directly over the coated aluminum shield listed in paragraph (i)(5) of this section with an overlap complying with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.3.2, Outer Steel Tape.

(9) Successive lengths of steel armoring tapes may be joined during the manufacturing process by means of cold weld, electric weld, soldering with a nonacid flux or other acceptable means. Armor splices must comply with the breaking strength and resistance requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.3.3.

(10) The corrugations and the application process of the coated steel armor must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.3.1.

(i) The corrugations of the armor tape must coincide with the corrugations of the coated aluminum shield.

(ii) Overlapped portions of the armor tape must be in register (corrugations must coincide at overlap) and in contact at the outer edge.

(11) The armoring material must be so applied to enable the cable to pass the cold bend test specified in paragraph (l)(3) of this section.

(12) The 6-mil steel tape must be electrolytic chrome coated steel (ECCS) plastic coated on both sides and must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 6.2.8.

(13) When the jacket is bonded to the plastic coated steel armor, the bond between the jacket and armor must comply with the requirement specified in ANSI/ICEA S-84-608-1988, paragraph 7.2.6.

(j) *Cable jacket.* (1) The jacket must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 7.2.

(2) The raw materials used for the cable jacket must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 7.2.1.

(3) Jacketing material removed from or tested on the cable must meet the performance requirements specified in ANSI/ICEA S-84-608-1988, paragraphs 7.2.3 and 7.2.4.

(4) The thickness of the jacket must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 7.2.2.

(k) *Electrical requirements*—(1) *Conductor resistance.* The direct current resistance of any conductor in a completed cable and the average resistance of all conductors in a Quality Control Lot must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.1.

(2) *Resistance unbalance.* (i) The direct current resistance unbalance between the two conductors of any pair in a completed cable and the average resistance unbalance of all pairs in a completed cable must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.2.

(ii) The resistance unbalance between tip and ring conductors shall be random with respect to the direction of unbalance. That is, the resistance of the tip conductors shall not be consistently higher with respect to the ring conductors and vice versa.

(3) *Mutual capacitance.* The average mutual capacitance of all pairs in a completed cable and the individual mu-

tual capacitance of any pair in a completed cable must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.3.

(4) *Capacitance difference.* (i) The capacitance difference for completed cables having 75 pairs or greater must comply with the requirement specified in ANSI/ICEA S-84-608-1988, paragraph 8.4.

(ii) When measuring screened cable, the inner and outer pairs must be selected from both sides of the screen.

(5) *Pair-to-pair capacitance unbalance*—(i) *Pair-to-pair.* The capacitance unbalance as measured on the completed cable must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.5.

(ii) *Screened cable.* In cables with 25 pairs or less and within each group of multigroup cables, the pair-to-pair capacitance unbalance between any two pairs in an individual compartment must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.5. The pair-to-pair capacitance unbalances to be considered must be:

(A) Between pairs adjacent in a layer in an individual compartment;

(B) Between pairs in centers of 4 pairs or less in an individual compartment; and

(C) Between pairs in adjacent layers in an individual compartment when the number of pairs in the inner (smaller) layer is 6 or less. The center is counted as a layer.

(iii) In cables with 25 pairs or less, the root-mean-square (rms) value is to include all the pair-to-pair unbalances measured for each compartment separately.

(iv) In cables containing more than 25 pairs, the rms value must include the pair-to-pair unbalances in the separate compartments.

(6) *Pair-to-ground capacitance unbalance*—(i) *Pair-to-ground.* The capacitance unbalance as measured on the completed cable must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.6.

(ii) When measuring pair-to-ground capacitance unbalance all pairs except the pair under test are grounded to the shield and/or shield/armor except when measuring cables containing super

§ 1755.890

7 CFR Ch. XVII (1–1–97 Edition)

units in which case all other pairs in the same super unit must be grounded to the shield.

(iii) The screen tape must be left floating during the test.

(iv) Pair-to-ground capacitance unbalance may vary directly with the length of the cable.

(7) *Attenuation.* (i) For nonscreened and screened cables, the average attenuation of all pairs on any reel when measured at 150 and 772 kilohertz must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.7, Foam and/or Foam-Skin Column.

(ii) For T1C type cables over 12 pairs, the maximum average attenuation of all pairs on any reel must not exceed the values listed below when measured at a frequency of 1576 kilohertz at or corrected to a temperature of $20 \pm 1^\circ\text{C}$. The test must be conducted in accordance with ASTM D 4566-90.

AWG	Maximum Average Attenuation decibel/kilometer (dB/km) (decibel/ mile)
19	14.9 (24.0)
22	21.6 (34.8)
24	27.2 (43.8)

(8) *Crosstalk loss.* (i) The equal level far-end power sum crosstalk loss (FEXT) as measured on the completed cable must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.8, FEXT Table.

(ii) The near-end power sum crosstalk loss (NEXT) as measured on completed cable must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.8, NEXT Table.

(iii) *Screened cable.* (A) For screened cables the NEXT as measured on the completed cable must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraphs 8.9 and 8.9.1.

(B) For T1C screened cable the NEXT as measured on the completed cable must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraphs 8.9 and 8.9.2.

(9) *Insulation resistance.* The insulation resistance of each insulated conductor in a completed cable must comply with the requirement specified in ANSI/ICEA S-84-608-1988, paragraph 8.11.

(10) *High voltage test.* (i) In each length of completed cable, the insulation between conductors must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.12, Foam and/or Foam-Skin Column.

(ii) In each length of completed cable, the dielectric between the shield and/or armor and conductors in the core must comply with the requirements specified in ANSI/ICEA S-84-608-1988, paragraph 8.13, Single Jacketed, Foam and/or Foam-Skin Column. In screened cable the screen tape must be left floating.

(iii) *Screened cable.* (A) In each length of completed screened cable, the dielectric between the screen tape and the conductors in the core must comply with the requirement specified in ANSI/ICEA S-84-608-1988, paragraph 8.14.

(B) In this test, the cable shield and/or armor must be left floating.

(11) *Electrical variations.* (i) Pairs in each length of cable having either a ground, cross, short, or open circuit condition will not be permitted.

(ii) The maximum number of pairs in a cable which may vary as specified in paragraph (k)(11)(iii) of this section from the electrical parameters given in this section are listed below. These pairs may be excluded from the arithmetic calculation.

Nominal Pair Count	Maximum Number of Pairs With Allowable Electrical Variation
6–100	1
101–300	2
301–400	3
401–600	4
601 and above	6

(iii) *Parameter variations.* (A) *Capacitance unbalance-to-ground.* If the cable fails either the maximum individual pair or average capacitance unbalance-to-ground requirement and all individual pairs are 3937 picofarad/kilometer (1200 picofarad/1000 feet) or less, the number of pairs specified in paragraph (k)(11)(ii) of this section may be eliminated from the average and maximum individual calculations.

(B) *Resistance unbalance.* Individual pair of 7 percent for all gauges.

Rural Utilities Service, USDA

§1755.890

(C) *Conductor resistance, maximum.* The following table shows maximum conductor resistance:

AWG	ohms/ kilo- meter	(ohms/ 1000 feet)
19	29.9	(9.1)
22	60.0	(18.3)
24	94.5	(28.8)
26	151.6	(46.2)

NOTE: RUS recognizes that in large pair count cable (600 pair and above) a cross, short, or open circuit condition occasionally may develop in a pair which does not affect the performance of the other cable pairs. In these circumstances rejection of the entire cable may be economically unsound or repairs may be impractical. In such circumstances the manufacturer may desire to negotiate with the customer for acceptance of the cable. No more than 0.5 percent of the pairs may be involved.

(1) *Mechanical requirements—(1) Compound flow test.* All cables manufactured in accordance with the requirements of this section must be capable of meeting the compound flow test specified in ANSI/ICEA S-84-608-1988, paragraph 9.1 using a test temperature of $80 \pm 1^\circ\text{C}$.

(2) *Water penetration test.* All cables manufactured in accordance with the requirements of this section must be capable of meeting the water penetration test specified in ANSI/ICEA S-84-608-1988, paragraph 9.2.

(3) *Cable cold bend test.* All cables manufactured in accordance with the requirements of this section must be capable of meeting the cable cold bend test specified in ANSI/ICEA S-84-608-1988, paragraph 9.3.

(4) *Cable impact test.* All cables manufactured in accordance with the requirements of this section must be capable of meeting the cable impact test specified in ANSI/ICEA S-84-608-1988, paragraph 9.4.

(5) *Jacket notch test (CACSP sheath only).* All cables utilizing the coated aluminum/coated steel sheath (CACSP) design manufactured in accordance with the requirements of this section must be capable of meeting the jacket notch test specified in ANSI/ICEA S-84-608-1988, paragraph 9.5.

(6) *Cable torsion test (CACSP sheath only).* All cables utilizing the coated aluminum/coated steel sheath (CACSP) design manufactured in accordance with the requirements of this section must be capable of meeting the cable torsion test specified in ANSI/ICEA S-84-608-1988, paragraph 9.6.

(m) *Sheath slitting cord (optional).* (1) Sheath slitting cord may be used in the cable structure at the option of the manufacturer unless specified by the end user.

(2) When a sheath slitting cord is used it must be nonhygroscopic and nonwicking, continuous throughout a length of cable and of sufficient strength to open the sheath without breaking the cord.

(n) *Identification marker and length marker.* (1) Each length of cable must be identified in accordance with ANSI/ICEA S-84-608-1988, paragraphs 10.1 through 10.1.4. The color of the ink used for the initial outer jacket marking must be either white or silver.

(2) The markings must be printed on the jacket at regular intervals of not more than 0.6 meter (2 feet).

(3) The completed cable must have sequentially numbered length markers in accordance with ANSI/ICEA S-84-608-1988, paragraph 10.1.5. The color of the ink used for the initial outer jacket marking must be either white or silver.

(o) *Preconnectorized cable (optional).* (1) At the option of the manufacturer and upon request by the purchaser, cables 100 pairs and larger may be factory terminated in 25 pair splicing modules.

(2) The splicing modules must meet the requirements of RUS Bulletin 345-54, PE-52, RUS Specification for Telephone Cable Splicing Connectors (Incorporated by Reference at §1755.97), and be accepted by RUS prior to their use.

(p) *Acceptance testing and extent of testing.* (1) The tests described in appendix A of this section are intended for acceptance of cable designs and major modifications of accepted designs. What constitutes a major modification is at the discretion of RUS. These tests are intended to show the inherent capability of the manufacturer to produce cable products having long life and stability.

(2) For initial acceptance, the manufacturer must submit:

(i) An original signature certification that the product fully complies with each section of the specification;

(ii) Qualification Test Data, per appendix A of this section;

(iii) To periodic plant inspections;

(iv) A certification that the product does or does not comply with the domestic origin manufacturing provisions of the “Buy American” requirements of the Rural Electrification Act of 1938 (7 U.S.C. 901 *et seq.*);

(v) Written user testimonials concerning field performance of the product; and

(vi) Other nonproprietary data deemed necessary by the Chief, Outside Plant Branch (Telephone).

(3) For requalification acceptance, the manufacturer must submit an original signature certification that the product fully complies with each section of the specification, excluding the Qualification Section, and a certification that the product does or does not comply with the domestic origin manufacturing provisions of the “Buy American” requirements of the Rural Electrification Act of 1938 (7 U.S.C. 901 *et seq.*), for acceptance by August 30 of each year. The required data must have been gathered within 90 days of the submission. If the initial acceptance of a product to this specification was within 180 days of August 30, then requalification for that product will not be required for that year.

(4) Initial and requalification acceptance requests should be addressed to:

Chairman, Technical Standards Committee
“A” (Telephone), Telecommunications
Standard Division, Rural Utilities Service,
Washington, DC 20250–1500.

(5) *Tests on 100 percent of completed cable.* (i) The shield and/or armor of each length of cable must be tested for continuity in accordance with ANSI/ICEA S-84–608–1988, paragraph 8.16.

(ii) The screen tape of each length of screened cable must be tested for continuity in accordance with ANSI/ICEA S-84–608–1988, paragraph 8.16.

(iii) Dielectric strength between conductors and shield and/or armor must be tested to determine freedom from grounds in accordance with paragraph (k)(10)(ii) of this section.

(iv) Dielectric strength between conductors and screen tape must be tested to determine freedom from grounds in accordance with paragraph (k)(10)(iii) of this section.

(v) Each conductor in the completed cable must be tested for continuity in

accordance with ANSI/ICEA S-84–608–1988, paragraph 8.16.

(vi) Dielectric strength between conductors, in each length of completed cable, must be tested to insure freedom from shorts and crosses in each length of completed cable in accordance with paragraph (k)(10)(i) of this section.

(vii) Each conductor in the completed preconnectorized cable must be tested for continuity.

(viii) Each length of completed preconnectorized cable must be tested for split pairs.

(ix) The average mutual capacitance must be measured on all cables. If the average mutual capacitance for the first 100 pairs tested from randomly selected groups is between 50 and 53 nanofarads/kilometer (nF/km) (80 and 85 nanofarad/mile), the remainder of the pairs need not be tested on the 100 percent basis (See paragraph (k)(3) of this section).

(6) *Capability tests.* Tests on a quality assurance basis must be made as frequently as is required for each manufacturer to determine and maintain compliance with:

(i) Performance requirements for conductor insulation, jacketing material, and filling and flooding compounds;

(ii) Bonding properties of coated or laminated shielding and armoring materials and performance requirements for screen tape;

(iii) Sequential marking and lettering;

(iv) Capacitance difference, capacitance unbalance, crosstalk, and attenuation;

(v) Insulation resistance, conductor resistance, and resistance unbalance;

(vi) Cable cold bend and cable impact tests;

(vii) Water penetration and compound flow tests; and

(viii) Jacket notch and cable torsion tests.

(q) *Summary of records of electrical and physical tests.* (1) Each manufacturer must maintain suitable summary records for a period of at least 3 years of all electrical and physical tests required on completed cable by this section as set forth in paragraphs (p)(5) and (p)(6) of this section. The test data for a particular reel must be in a form

Rural Utilities Service, USDA

§ 1755.890

that it may be readily available to the purchaser or to RUS upon request.

(2) Measurements and computed values must be rounded off to the number of places or figures specified for the requirement according to ANSI/ICEA S-84-608-1988, paragraph 1.3.

(r) *Manufacturing irregularities.* (1) Repairs to the shield and/or armor are not permitted in cable supplied to end users under this section.

(2) Minor defects in jackets (defects having a dimension of 3 millimeters (0.125 inch.) or less in any direction) may be repaired by means of heat fusing in accordance with good commercial practices utilizing sheath grade compounds.

(s) *Preparation for shipment.* (1) The cable must be shipped on reels. The diameter of the drum must be large enough to prevent damage to the cable from reeling or unreeling. The reels must be substantial and so constructed as to prevent damage to the cable during shipment and handling.

(2) The thermal wrap must comply with the requirements of ANSI/ICEA S-84-608-1988, paragraph 10.3. When a thermal reel wrap is supplied, the wrap must be applied to the reel and must be suitably secured in place to minimize thermal exposure to the cable during storage and shipment. The use of the thermal reel wrap as a means of reel protection will be at the option of the manufacturer unless specified by the end user.

(3) The outer end of the cable must be securely fastened to the reel head so as to prevent the cable from becoming loose in transit. The inner end of the cable must be securely fastened in such a way as to make it readily available if required for electrical testing. Spikes, staples, or other fastening devices which penetrate the cable jacket must not be used. The method of fastening the cable ends must be acceptable to RUS and accepted prior to its use.

(4) Each length of cable must be wound on a separate reel unless otherwise specified or agreed to by the purchaser.

(5) The arbor hole must admit a spindle 63 millimeters (2.5 inches) in diameter without binding. Steel arbor hole liners may be used but must be accepted by RUS prior to their use.

(6) Each reel must be plainly marked to indicate the direction in which it should be rolled to prevent loosening of the cable on the reel.

(7) Each reel must be stenciled or labeled on either one or both sides with the information specified in ANSI/ICEA S-84-608-1988, paragraph 10.4 and the RUS cable designation:

Cable Designation

BFCE

Cable Construction

Pair Count

Conductor Gauge

E = Expanded Insulation

A = Coated Aluminum Shield

C = Copper Shield

Y = Gopher Resistant Shield

X = Armored, Separate Shield

H = T1 Screened Cable

H1C = T1C Screened Cable

P = Preconnectorized

Example: BFCEXH100-22

Buried Filled Cable, Expanded Insulation, Armored (w/separate shield), T1 Screened Cable, 100 pair, 22 AWG.

(8) When cable manufactured to the requirements of this specification is shipped, both ends must be equipped with end caps acceptable to RUS.

(9) When preconnectorized cables are shipped, the splicing modules must be protected to prevent damage during shipment and handling. The protection method must be acceptable to RUS and accepted prior to its use.

(10) All cables ordered for use in underground duct applications must be equipped with a factory-installed pulling-eye on the outer end in accordance with ANSI/ICEA S-84-608-1988, paragraph 10.5.2.

(The information and recordkeeping requirements of this section have been approved by the Office of Management and Budget (OMB) under the control number 0572-0059)

APPENDIX A TO 7 CFR 1755.890— QUALIFICATION TEST METHODS

(I) The test procedures described in this appendix are for qualification of initial cable designs and major modifications of accepted designs. Included in (V) of this appendix are suggested formats that may be used in submitting test results to RUS.

(II) *Sample selection and preparation.* (1) All testing must be performed on lengths removed sequentially from the same 25 pair, 22 gauge jacketed cable. This cable must not have been exposed to temperatures in excess of 38°C since its initial cool down after

sheathing. The lengths specified are minimum lengths and if desirable from a laboratory testing standpoint longer lengths may be used.

(a) Length A must be 10 ± 0.2 meters (33 $\pm$ 0.5 feet) long and must be maintained at $23 \pm 3^\circ\text{C}$. One length is required.

(b) Length B must be 12 ± 0.2 meters (40 $\pm$ 0.5 feet) long. Prepare the test sample by removing the jacket, shield or shield/armor, and core wrap for a sufficient distance on both ends to allow the insulated conductors to be flared out. Remove sufficient conductor insulation so that appropriate electrical test connections can be made at both ends. Coil the sample with a diameter of 15 to 20 times its sheath diameter. Three lengths are required.

(c) Length C must be one meter (3 feet) long. Four lengths are required.

(d) Length D must be 300 millimeters (1 foot) long. Four lengths are required.

(e) Length E must be 600 millimeters (2 feet) long. Four lengths are required.

(f) Length F must be 3 meters (10 feet) long and must be maintained at $23 \pm 3^\circ\text{C}$ for the duration of the test. Two lengths are required.

(2) *Data reference temperature.* Unless otherwise specified, all measurements must be made at $23 \pm 3^\circ\text{C}$.

(III) *Environmental tests*—(1) *Heat aging test*—(a) *Test samples.* Place one sample each of lengths B, C, D, and E in an oven or environmental chamber. The ends of Sample B must exit from the chamber or oven for electrical tests. Securely seal the oven exit holes.

(b) *Sequence of tests.* The samples are to be subjected to the following tests after conditioning:

(i) Water Immersion Test outlined in (III)(2) of this appendix;

(ii) Water Penetration Test outlined in (III)(3) of this appendix;

(iii) Insulation Compression Test outlined in (III)(4) of this appendix; and

(iv) Jacket Slip Strength Test outlined in (III)(5) of this appendix.

(c) *Initial Measurements.* (i) For Sample B measure the open circuit capacitance for each odd numbered pair at 1, 150, and 772 kilohertz, and the attenuation at 150 and 772 kilohertz after conditioning the sample at the data reference temperature for 24 hours. Calculate the average and standard deviation for the data of the 13 pairs on a per kilometer or (on a per mile) basis.

(ii) The attenuation at 150 and 772 kilohertz may be calculated from open circuit admittance (Y_{oc}) and short circuit impedance (Z_{sc}) or may be obtained by direct measurement of attenuation.

(iii) Record on suggested formats in (V) of this appendix or on other easily readable formats.

(d) *Heat conditioning.* (i) Immediately after completing the initial measurements, condition the sample for 14 days at a temperature of $65 \pm 2^\circ\text{C}$.

(ii) At the end of this period note any exudation of cable filler. Measure and calculate the parameters given in (III)(1)(c) of this appendix. Record on suggested formats in (V) of this appendix or other easily readable formats.

(iii) Cut away and discard a one meter (3 foot) section from each end of length B.

(e) *Overall electrical deviation.* (i) Calculate the percent change in all average parameters between the final parameters after conditioning and the initial parameters in (III)(1)(c) of this appendix.

(ii) The stability of the electrical parameters after completion of this test must be within the following prescribed limits:

(A) *Capacitance.* The average mutual capacitance must be within 5 percent of its original value;

(B) The change in average mutual capacitance must be less than 5 percent over frequency 1 to 150 kilohertz; and

(C) *Attenuation.* The 150 and 772 kilohertz attenuation must not have increased by more than 5 percent over their original values.

(2) *Water immersion electrical test*—(a) *Test sample selection.* The 10 meter (33 foot) section of length B must be tested.

(b) *Test sample preparation.* Prepare the sample by removing the jacket, shield or shield/armor, and core wrap for sufficient distance to allow one end to be accessed for test connections. Cut out a series of 6 millimeter (0.25 inch.) diameter holes along the test sample, at 30 centimeters (1 foot) intervals progressing successively 90 degrees around the circumference of the cable. Assure that the cable core is exposed at each hole by slitting the core wrapper. Place the prepared sample in a dry vessel which when filled will maintain a one meter (3 foot) head of water over 6 meters (20 feet) of uncoiled cable. Extend and fasten the ends of the cable so they will be above the water line and the pairs are rigidly held for the duration of the test.

(c) *Capacitance testing.* Measure the initial values of mutual capacitance of all odd pairs in each cable at a frequency of 1 kilohertz before filling the vessel with water. Be sure the cable shield or shield/armor is grounded to the test equipment. Fill the vessels until there is a one meter (3 foot) head of water on the cables.

(i) Remeasure the mutual capacitance after the cables have been submerged for 24 hours and again after 30 days.

(ii) Record each sample separately on suggested formats attached or on other easily readable formats.

(d) *Overall electrical deviation.* (i) Calculate the percent change in all average parameters

between the final parameters after conditioning with the initial parameters in (III)(2)(c) of this appendix.

(ii) The average mutual capacitance must be within 5 percent of its original value.

(3) *Water penetration testing.* (a) A water-tight closure must be placed over the jacket of length C. The closure must not be placed over the jacket so tightly that the flow of water through pre-existing voids of air spaces is restricted. The other end of the sample must remain open.

(b) Test per Option A or Option B—(i) *Option A.* Weigh the sample and closure prior to testing. Fill the closure with water and place under a continuous pressure of 10 ± 0.7 kilopascals (1.5 ± 0.1 pounds per square inch gauge) for one hour. Collect the water leakage from the end of the test sample during the test and weigh to the nearest 0.1 gram. Immediately after the one hour test, seal the ends of the cable with a thin layer of grease and remove all visible water from the closure, being careful not to remove water that penetrated into the core during the test. Reweigh the sample and determine the weight of water that penetrated into the core. The weight of water that penetrated into the core must not exceed 6 grams.

(ii) *Option B.* Fill the closure with a 0.2 gram sodium fluorescein per liter water solution and apply a continuous pressure 10 ± 0.7 kilopascals (1.5 ± 0.1 pounds per square inch gauge) for one hour. Catch and weigh any water that leaks from the end of the cable during the one hour period. If no water leaks from the sample, carefully remove the water from the closure. Then carefully remove the jacket, shield or shield/armor, and core wrap one at a time, examining with an ultraviolet light source for water penetration. After removal of the core wrap, carefully dissect the core and examine for water penetration within the core. Where water penetration is observed, measure the penetration distance. The distance of water penetration into the core must not exceed 127 millimeters (5.0 inches).

(4) *Insulation compression test*—(a) *Test sample D.* Remove jacket, shield or shield/armor, and core wrap being careful not to damage the conductor insulation. Remove one pair from the core and carefully separate, wipe off core filler and straighten the insulated conductors. Retwist the two insulated conductors together under sufficient tension to form 10 evenly spaced 360 degree twists in a length of 10 centimeters (4 inches).

(b) *Sample testing.* Center the mid 50 millimeters (2 inches) of the twisted pair between 2 smooth rigid parallel metal plates that are 50 millimeters $\times$ 50 millimeters (2 inches $\times$ 2 inches). Apply a 1.5 volt direct current potential between the conductors, using a light or buzzer to indicate electrical contact between the conductors. Apply a constant load of 67 newtons (15 pound-force) on the sample

for one minute and monitor for evidence of contact between the conductors. Record results on suggested formats in (V) of this appendix or on other easily readable formats.

(5) *Jacket slip strength test*—(a) *Sample selection.* Test Sample E from (II)(1)(a) of this appendix.

(b) *Sample preparation.* Prepare test sample in accordance with the procedures specified in ASTM D 4565-90a.

(c) *Sample conditioning and testing.* Remove the sample from the tensile tester prior to testing and condition for one hour at $50 \pm 2^\circ\text{C}$. Test immediately in accordance with the procedures specified in ASTM D 4565-90a. A minimum jacket slip strength of 67 newtons (15 pound-force) is required. Record the highest load attained.

(6) *Humidity exposure.* (a) Repeat steps (III)(1)(a) through (III)(1)(c)(iii) of this appendix for separate set of samples B, C, D, and E which have not been subjected to prior environmental conditioning.

(b) Immediately after completing the measurements, expose the test sample to 100 temperature cyclings. Relative humidity within the chamber must be maintained at 90 ± 2 percent. One cycle consists of beginning at a stabilized chamber and test sample temperature of $52 \pm 1^\circ\text{C}$, increasing the temperature to $57 \pm 1^\circ\text{C}$, allowing the chamber and test samples to stabilize at this level, then dropping the temperature back to $52 \pm 1^\circ\text{C}$.

(c) Repeat steps (III)(1)(d)(ii) through (III)(5)(c) of this appendix.

(7) *Temperature cycling.* (a) Repeat steps (III)(1)(a) through (III)(1)(c)(iii) of this appendix for separate set of samples B, C, D, and E which have not been subjected to prior environmental conditioning.

(b) Immediately after completing the measurements, subject the test sample to the 10 cycles of temperature between a minimum of -40°C and $+60^\circ\text{C}$. The test sample must be held at each temperature extreme for a minimum of 1 1/2 hours during each cycle of temperature. The air within the temperature cycling chamber must be circulated throughout the duration of the cycling.

(c) Repeat steps (III)(1)(d)(ii) through (III)(5)(c) of this appendix.

(IV) *Control sample*—(1) *Test samples.* A separate set of lengths A, C, D, E, and F must have been maintained at $23 \pm 3^\circ\text{C}$ for at least 48 hours before the testing.

(2) Repeat steps (III)(2) through (III)(5)(c) of this appendix except use length A instead of length B.

(3) *Surge test.* (a) One length of sample F must be used to measure the breakdown between conductors while the other length of F must be used to measure the core to shield breakdown.

(b) The samples must be capable of withstanding without damage, a single surge

§ 1755.890

voltage of 15 kilovolts peak between conductors, and a 25 kilovolts peak surge voltage between conductors and the shield or shield/armor as hereinafter described. The surge voltage must be developed from a capacitor discharged through a forming resistor connected in parallel with the dielectric of the test sample. The surge generator constants must be such as to produce a surge of 1.5×40 microsecond wave shape.

(c) The shape of the generated wave must be determined at a reduced voltage by connecting an oscilloscope across the forming resistor with the cable sample connected in parallel with the forming resistor. The capacitor bank is charged to the test voltage and then discharged through the forming resistor and test sample. The test sample will be considered to have passed the test if there is no distinct change in the wave shape obtained with the initial reduced voltage compared to that obtained after the application of the test voltage.

(V) The following suggested formats may be used in submitting the test results to RUS:

§ 1755.900 RUS specification for filled fiber optic cables.

(a) *Scope.* (1) This section covers the requirement for filled fiber optic cables intended for aerial installation either by attachment to a support strand or by an integrated self-supporting arrangement, for underground application by placement in a duct, or for buried installations either by trenching or by direct plowing.

(i) The optical waveguides are glass fibers having directly-applied protective coatings, and are called “fibers”, herein. These fibers may be assembled in either loose fiber bundles with a protective core tube, encased in several

protective buffer tubes, or in tight buffer tubes.

(ii) Fillers, strength members, core wraps, and bedding tapes may complete the cable core.

(iii) The core or buffer tubes containing the fibers and the interstices between the buffer tubes, fillers, and strength members in the core structure are filled with a suitable material to exclude water.

(iv) The cable structure is completed by an extruded overall plastic jacket. This jacket may have strength members embedded in it, in some designs.

(v) Buried installation requires an armor under the outer jacket.

(vi) For self-supporting cable the outer jacket may be extruded over the support messenger and cable core.

(2) The cable is fully color coded so that each fiber is distinguishable from every other fiber. A basic color scheme of twenty-four colors allows individual fiber identification. Colored tubes, binders, threads, stripings, or markings provide fiber group identification.

(3) Cable manufactured to this section must demonstrate compliance with the qualification testing requirements to ensure satisfactory end-use performance characteristics for the intended applications.

(4) Optical cable designs not specifically addressed by this section may be allowed if accepted by RUS. Justification for acceptance of a modified design must be provided to substantiate product utility and long term stability and endurance.

(5) All cables sold to RUS borrowers for projects involving RUS loan funds under this section must be accepted by RUS Technical Standards Committee "A" (Telephone). For cables manufactured to the specification of this section, all design changes to an accepted design must be submitted for acceptance. RUS will be the sole authority on what constitutes a design change.

(6) The American National Standard Institute/Institute of Electrical and Electronics Engineers, Inc (ANSI/IEEE), 1993 National Electrical Safety Code (NESC) referenced in this section is incorporated by reference by RUS. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C.

552(a) and 1 CFR part 51. Copies of ANSI/IEEE 1993 NESC are available for inspection during normal business hours at RUS, room 2845, U.S. Department of Agriculture, Washington, DC 20250–1500 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. Copies are available from IEEE Service Center, 445 Hoes Lane, Piscataway, NJ 08854, telephone number 1 (800) 678–4333.

(7) American Society for Testing and Materials Specifications (ASTM) A 640–91, Standard Specification for Zinc-Coated Steel Strand for Messenger Support of Figure 8 Cable; ASTM B 736–92a, Standard Specification for Aluminum, Aluminum Alloy, and Aluminum-Clad Steel Cable Shielding Stock; ASTM D 1238–90b, Standard Test Method for Flow Rates of Thermoplastics by Extrusion Plastometer; ASTM D 1248–84 (1989), Standard Specification for Polyethylene Plastic Molding and Extrusion Materials, ASTM D 1535–89, Standard Test Method for Specifying Color by the Munsell System; ASTM D 3349–86, Standard Test Method for Absorption Coefficient of Carbon Black Pigmented Ethylene Plastic; ASTM D 4565–90a, Standard Test Methods for Physical and Environmental Performance Properties of Insulations and Jackets for Telecommunications Wire and Cable; ASTM D 4566–90, Standard Test Methods for Electrical Performance Properties of Insulations and Jackets for Telecommunications Wire and Cable; ASTM D 4568–86, Standard Test Methods for Evaluating Compatibility Between Cable Filling and Flooding Compounds and Polyolefin Cable Materials; and ASTM E 29–90, Standard Practice for Using Significant Digits in Test Data to Determine Conformance with Specifications, referenced in this section are incorporated by reference by RUS. munications Systems; EIA/TIA-455-55B, End-View Methods for Measuring Coating and Buffer Geometry of Optical Fibers; EIA/TIA-455-58A, Core Diameter Measurement of Graded-Index Optical Fibers; EIA/TIA-455-59, Measurement of Fiber Point Defects Using an OTDR; EIA/TIA-455-61, Measurement of Fiber or Cable Attenuation Using an OTDR; EIA/TIA-455-78A, Spectral-Attenuation Cutback Measurement for Single-Mode Optical Fibers; EIA/TIA-455-81A, Compound Flow (Drip) Test for Filled Fiber Optic Cable; EIA/TIA-455-82B, Fluid Penetration Test for Fluid-Blocked Fiber Optic Cable; EIA/TIA-455-85A, Fiber Optic Cable Twist Test; EIA/TIA-455-104A, Fiber Optic Cable Cyclic Flexing Test; EIA/TIA-455-164A, Single-Mode Fiber, Measurement of Mode Field Diameter by Far-Field Scanning; EIA/TIA-455-165A, Mode Field Diameter Measurement Near Field Scanning Technique; EIA/TIA-455-167A, Mode Field Diameter, Variable Aperture in the Far Field; EIA/TIA-455-168A, Chromatic Dispersion Measurement of Multimode Graded-Index and Single-Mode Optical Fibers by Spectral Group Delay Measurement in the Time Domain; EIA/TIA-455-169A, Chromatic Dispersion Measurement of Single-Mode Optical Fibers by the Phase-Shift Method; EIA/TIA-455-170, Cable Cutoff Wavelength of Single-Mode Fiber by Transmitted Power; EIA/TIA-455-173, Coating Geometry Measurement for Optical Fiber Side-View Method; EIA/TIA-455-175A, Chromatic Dispersion Measurement of Single-Mode Optical Fibers by the Differential Phase Shift Method; EIA/TIA-455-176, Method for Measuring Optical Fiber Cross-Sectional Geometry by Automated Grey-Scale Analysis; EIA/TIA-455-177A, Numerical Aperture Measurement of Graded-Index Optical Fibers; EIA/TIA-455-178, Measurements of Strip Force Required for Mechanically Removing Coatings from Optical Fibers; and EIA/TIA-598, Color Coding of Fiber Optic Cables, referenced in this section are incorporated by reference by RUS. These incorporations by references were approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of EIA/TIA standards

§ 1755.900

7 CFR Ch. XVII (1–1–97 Edition)

are available for inspection during normal business hours at RUS, room 2845, U.S. Department of Agriculture, Washington, DC 20250–1500 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. Copies are available from Global Engineering Documents, 15 Inverness Way East, Englewood, CO 80112, telephone number (303) 792–2181.

(10) RUS intends that the optical fibers contained in the cables manufactured in accordance with this section have characteristics that will allow signals, having a range of wavelengths, to be carried simultaneously.

(b) *Optical fibers.* (1) The solid glass optical fibers must consist of a cylindrical core and cladding covered by either an ultraviolet-cured acrylate or other suitable coating.

(2) The optical fiber types must be one of the following:

(i) Dispersion-unshifted single mode fiber EIA Class IVa;

(ii) Dispersion-shifted single mode fiber EIA Class IVb;

(iii) 50/125 micrometer multimode fiber EIA Class Ia; or

(iv) 62.5/125 micrometer multimode fiber EIA Class Ia.

(3) The dispersion-unshifted single mode fiber core must have either a matched or depressed clad step refractive index profile with a mode-field diameter of 9.0 ± 1.0 micrometers when measured at 1300 nanometers and 10.5 ± 1.0 micrometers/ -1.5 micrometers when measured at 1550 nanometers in accordance with any one of the following test methods:

(i) EIA/TIA–455–164A;

(ii) EIA/TIA–455–165A;

(iii) EIA/TIA–455–167A; or

(iv) EIA–455–174.

(4) The dispersion-shifted single mode fiber core must have either a segmented core design or depressed clad step refractive index profile with a mode-field diameter of 7.5 ± 1.5 micrometers/ -1.3 micrometers when measured at 1550 nanometers in accordance with any one of the test procedures specified in paragraph (b)(3) of this section.

(5) The core clad off-set of the dispersion-unshifted and dispersion-shifted single mode fibers must not be greater than 1.0 micrometer when measured in

accordance with either EIA/TIA–455–45B or EIA/TIA–455–176.

(6) The multimode fiber cores must have graded (parabolic) refractive index profiles with core diameters of 50.0 ± 3.0 micrometers or 62.5 ± 3.0 micrometers when measured in accordance with either EIA/TIA–455–58A, or EIA/TIA–455–176.

(7) The core noncircularity of multimode fibers must not exceed 6 percent when measured in accordance with either EIA/TIA–455–45B or EIA/TIA–455–176.

(8) The outside diameter of the glass fiber for both single mode and multimode fibers must be 125 ± 2.0 micrometers when measured in accordance with any one of the following test methods:

(i) EIA/TIA–455–45B;

(ii) EIA/TIA–455–176; or

(iii) EIA/TIA–455–48B, Methods A or B.

(9) The outside diameter of the glass fiber must be nominally concentric with the fiber core as is consistent with the best commercial practice.

(10) The individual fibers must be proof tested at a minimum tensile stress of 0.35 gigapascal for approximately one second when measured in accordance with EIA/TIA–455–31B.

(11) Factory splices of fibers are allowed provided that prior acceptance from RUS is obtained for the splice technique, that all splices are documented and reported to the customer and that the spliced fiber meets all requirements of this section.

(12) The optical fiber must be coated with a suitable material to preserve the intrinsic strength of the glass having an outside diameter of 250 ± 15 micrometers when measured in accordance with either EIA/TIA–455–55B or EIA/TIA–455–173.

(13) The maximum force required to remove 25 millimeters of protective fiber coating must not exceed 13 newtons when measured in accordance with EIA/TIA–455–178.

(14) All optical fibers in any single length of cable must be of the same type.

(c) *Buffer/coating.* (1) The optical fibers contained in a tube buffer (loose tube), an inner jacket (unit core), a channel or otherwise loosely packaged

Rural Utilities Service, USDA

§ 1755.900

must have a clearance between the fibers and the inside of the container sufficient to allow for thermal expansions without constraining the fibers. The protective container must be manufactured from a material having a coefficient of friction sufficiently low to allow the fibers free movement.

(2) Optical fibers covered in near contact with an extrusion (tight tube) must have an intermediate soft buffer to allow for thermal expansions and minor pressures.

(3) All protective coverings in any single length of cable must be continuous and be of the same material except at splice locations.

(4) The protective coverings must be free from holes, splits, blisters, and other imperfections and must be as smooth and concentric as is consistent with the best commercial practice.

(5) Repairs to the fiber coatings are not allowed except at splice locations.

(6) Both loose tube and tight tube coverings of each color and other fiber package types removed from the finished cable must meet the following shrinkback and cold bend performance requirements. The fibers may be left in the tubes.

(i) *Shrinkback*. Testing must be conducted in accordance with ASTM D 4565-90a, paragraph 14.1, using a talc bed at a temperature of 95 °C. Shrinkback must not exceed 5 percent of the original 150 millimeter length of the specimen. The total shrinkage of the specimen must be measured.

(ii) *Cold bend*. Testing must be conducted on at least one tube from each color in the cable. Stabilize the specimen to -20 ± 1 °C for a minimum of four hours. While holding the specimen and mandrel at the test temperature, wrap the tube in a tight helix ten times around a mandrel with a diameter not greater than five times the tube diameter. The tube must show no evidence of cracking when observed with normal or corrected-to-normal vision.

NOTE: Channel cores and similar slotted single component core designs need not be tested for cold bend.

(d) *Fiber and buffer tube identification*. (1) The colors designated for identification of loose buffer tubes, tight tube buffer fibers and individual fibers in

multifiber tubes, slots or bundles are shown in the following table:

Buffer tube and fiber No.	Color
1	Blue.
2	Orange.
3	Green.
4	Brown.
5	Slate.
6	White.
7	Red.
8	Black.
9	Yellow.
10	Violet.
11	Rose.
12	Aqua.
13	Blue/Black Tracer.
14	Orange/Black Tracer.
15	Green/Black Tracer.
16	Brown/Black Tracer.
17	Slate/Black Tracer.
18	White/Black Tracer.
19	Red/Black Tracer.
20	Black/Yellow Tracer.
21	Yellow/Black Tracer.
22	Violet/Black Tracer.
23	Rose/Black Tracer.
24	Aqua/Black Tracer.

(2) *Standards of color*. Except for the aqua color, the colors of fibers and tubes supplied in accordance with this section are specified in terms of the Munsell Color System (ASTM D 1535-89) and must comply with the color limits as defined in EIA/TIA-598. (A visual color standard meeting these requirements and entitled "Munsell Color Charts for Color Coding," may be obtained from the Munsell Color Company, Inc., 2441 North Calvert Street, Baltimore, Maryland 21218. The latest edition of the color standard should be used.)

(i) The aqua color limits using the Munsell Color System must be as follows:

MUNSELL NOTATION	
Symbol	Aqua color
Centroid	10BG 7/6
H++	5B 7/6
H- -	5BG 7/6
V++	10BG 8/4
V- -	10BG 6/6
C++	None
C- -	10BG 7/4

(ii) Other coloring schemes used for providing identification of buffer tubes and optical fibers which deviate from the requirements of paragraph (d)(1) of this section will not be accepted by RUS.

(e) *Strength members.* (1) Strength members must be an integral part of the cable construction, but are not considered part of the support messenger for self-supporting optical cable.

(2) The combined strength of all the strength members must be sufficient to support the stress of installation and to protect the cable in service.

(3) Strength members may be incorporated into the core as a central support member or filler, as fillers between the fiber packages, as an annular serving over the core, as an annular serving over the intermediate jacket, embedded in the outer jacket or as a combination of any of these methods.

(4) The central support member or filler must contain no more than one splice per kilometer of cable. Individual fillers placed between the fiber packages and placed as annular servings over the core must contain no more than one splice per kilometer of cable. Cable sections having central member or filler splices must meet the same physical requirements as unspliced cable sections.

(5) Strength member materials and splicing techniques must be accepted by RUS prior to their use.

(6) In each length of completed cable having a metallic central member, the dielectric strength between the armor and the metallic center member must withstand at least 15 kilovolts direct current for 3 seconds.

(f) *Forming the cable core.* (1) Protected fibers must be assembled with the optional central support member, fillers and strength members in such a way as to form a cylindrical group.

(2) The standard cylindrical group or core designs shall consist of 4, 6, 8, 10, 12, 16, 18, 20, or 24 fibers. Cylindrical groups or core designs larger than the sizes shown above must meet all the requirements of this section.

(3) When threads or tapes are used as core binders, they must be colored either white or natural and must be a nonhygroscopic and nonwicking dielectric material.

(4) When threads or tapes are used as unit binders to define optical fiber units in loose tube, tight tube, slotted, or bundled cored designs, they must be colored in accordance with the table listed below and must be a nonhygro-

scopic and nonwicking dielectric material or be rendered such by the filling compound. The colors of the binders must be in accordance with paragraphs (d)(2) introductory text and (d)(2)(i) of this section.

Unit No.	Binder color
1	Blue.
2	Orange.
3	Green.
4	Brown.
5	Slate.
6	White.
7	Red.
8	Black.
9	Yellow.
10	Violet.
11	Rose.
12	Aqua.
13	Blue-Black.
14	Orange-Black.
15	Green-Black.
16	Brown-Black.
17	Slate-Black.
18	White-Black.
19	Red-Black.
20	Black-Black-Yellow.
21	Yellow-Yellow-Black.
22	Violet-Black.
23	Rose-Black.
24	Aqua-Black.

(g) *Filling compound.* (1) To prevent the ingress of water into the core, a filling compound must be applied into the interior of the loose fiber tubes and into the interstices of the core. When a core wrap is used, the filling compound must also be applied to the core wrap, over the core wrap and between the core wrap and inner jacket when required.

(2) The materials must be homogeneous and uniformly mixed; free from dirt, metallic particles and other foreign matter; easily removed; nontoxic and present no dermal hazards.

(3) The individual cable manufacturer must satisfy RUS that the filling compound selected for use is suitable for its intended application. The filling compound must be compatible with the cable components when tested in accordance with ASTM D 4568–86 at a temperature of 80° C.

(h) *Core wrap (optional).* (1) At the option of the manufacturer, one or more layers of nonhygroscopic and nonwicking dielectric material may be applied over the core.

(2) The core wrap(s) can be used to provide a heat barrier to prevent deformation or adhesion between the fiber

tubes or can be used to contain the core.

(3) When core wraps are used, sufficient filling compound must be applied to the core wraps so that voids or air spaces existing between the core wraps and between the core the inner side of the core wrap are minimized.

(i) *Inner jacket.* (1) Inner jackets may be applied directly over the core or over the strength members.

(i) For armored cable an inner jacket is optional but recommended. The inner jacket may absorb stresses in the cable core that may be introduced by armor application or by armored cable installation.

(ii) For unarmored cable an inner jacket is optional.

(2) The inner jacket material and test requirements must be as for the outer jacket material per paragraphs (m)(3) introductory text through (m)(3)(v) of this section, except that either black or natural polyethylene may be used. In the case of natural polyethylene, the requirements for absorption coefficient and the inclusion of furnace black are waived.

(j) *Flooding compound.* (1) Sufficient flooding compound must be applied between the inner jacket and armor and between the armor and outer jacket so that voids and air spaces in these areas are minimized. The use of floodant between the armor and outer jacket is not required when uniform bonding, per paragraph (k)(10) of this section, is achieved between the plastic-clad armor and the outer jacket.

(2) The flooding compound must be compatible with the jacket when tested in accordance with ASTM D 4568-86 at a temperature of 80° C. The floodant must exhibit adhesive properties sufficient to prevent jacket slip when tested in accordance with the requirements of appendix A, paragraph (III)(3), of this section.

(3) The individual cable manufacturer must satisfy RUS that the flooding compound selected for use is acceptable for the application.

(4) In lieu of a flooding compound, water blocking tapes may be applied between the inner jacket and armor and between the armor and outer jacket to prevent water migration. The use of the water blocking tape between the

armor and outer jacket is not required when uniform bonding, per paragraph (k)(10) of this section, is achieved between the plastic-clad armor and the outer jacket.

(k) *Armor.* (1) A steel armor, plastic coated on both sides, is required for direct buried cable manufactured under the provisions of this section. An armor is optional for duct and aerial cable as required by the purchaser. The plastic coated steel armor must be applied longitudinally directly over the core wrap or the intermediate jacket and have a minimum overlap of 3.0 millimeters.

(2) The uncoated steel tape must be electrolytic chrome coated steel (ECCS) with a thickness of 0.155 ± 0.015 millimeters.

(3) The reduction in thickness of the armoring material due to the corrugating or to the application process must be kept to a minimum and must not exceed 10 percent at any spot.

(4) The armor of each length of cable must be electrically continuous with no more than one joint or splice allowed per kilometer of cable. This requirement does not apply to a joint or splice made in the raw material by the raw material manufacturer.

(5) The breaking strength of any section of an armor tape, containing a factory splice joint, must not be less than 80 percent of the breaking strength of an adjacent section of the armor of equal length without a joint.

(6) For cables containing no floodant over the armor, the overlap portions of the armor tape must be bonded in cables having a flat, noncorrugated armor to meet the requirements of paragraphs (q)(1) through (q)(7)(ii) of this section. If the tape is corrugated, the overlap portions of the armor tape must be sufficiently bonded and the corrugations must be sufficiently in register to meet the requirements of paragraphs (q)(1) through (q)(7)(ii) of this section.

(7) The armor tape must be so applied as to enable the cable to pass the bend test as specified in paragraph (q)(1) of this section.

(8) The protective coating on the steel armor must meet the Bonding-to-Metal, Heat Sealability, Lap-Shear and Moisture Resistance requirements of

Type I, Class 2 coated metals in accordance with ASTM B 736-92a.

(9) The ability of the plastic-clad metal to resist the flooding compound must be determined as required by ASTM D 4568-86 using a one meter length of coated steel which must be aged for 7 days at 68 ± 1 °C. There must be no delamination of the coating from the steel at the conclusion of the test.

(10) When the jacket is bonded to the plastic coated armor, the bond between the plastic coated armor and the outer jacket must not be less than 525 newtons per meter over at least 90 percent of the cable circumference when tested in accordance with ASTM D 4565-90a. For cables with strength members embedded in the jacket, and residing directly over the armor, the area of the armor directly under the strength member is excluded from the 90 percent calculation.

(l) *Optional support messenger (aerial cable).* (1) When a self-supporting aerial cable containing an integrated support messenger is supplied, the support messenger must comply with the requirements specified in paragraphs (l)(2) introductory text through (l)(6) of this section.

(2) The fully flooded, stranded support messenger must be 6.35 millimeters diameter, 7 wire, extra high strength grade, Class A galvanized steel strand conforming to ASTM A 640-91 with exceptions and additional provisions as follows:

(i) The maximum lay of the individual wires of the strand must be 140 millimeters.

(ii) Any section of a completed strand containing a joint must have minimum tensile strength and elongation of 29,500 newtons and 3.5 percent, respectively, when tested in accordance with the procedures specified ASTM A 640-91.

(iii) The individual wires from a completed strand which contain joints must not fracture when tested according to the "Ductility of Steel" procedures specified in ASTM A 640-91 except that the mandrel diameter must be equal to 5 times the nominal diameter of the individual wires.

(3) The support strand must be completely covered with a corrosion pro-

TECTIVE floodant. The floodant must be homogeneous and uniformly mixed.

(4) The floodant must be nontoxic and present no dermal hazard.

(5) The floodant must be free from dirt, metallic particles, and other foreign matter that may interfere with the performance of the cable.

(6) The floodant must be compatible with the polyethylene outer jacket and must be acceptable to RUS.

(7) Other methods of providing self-supporting cable specifically not addressed in this section may be allowed if accepted by RUS. Justification for acceptance of a modified design must be provided to substantiate product utility and long term stability and endurance.

(m) *Outer jacket.* (1) The outer jacket must provide the cable with a tough, flexible, protective covering which can withstand exposure to sunlight, to atmosphere temperatures and to stresses reasonably expected in normal installation and service.

(2) The jacket must be free from holes, splits, blisters, or other imperfections and shall be as smooth and concentric as is consistent with the best commercial practice.

(3) The raw material used for the outer jacket must be one of the five types listed in paragraphs (m)(3)(i) through (m)(3)(v) of this section. The raw material must contain an antioxidant to provide long term stabilization and the materials must contain a 2.60 ± 0.25 percent concentration of furnace black to provide ultraviolet shielding. Both the antioxidant and furnace black must be compounded into the material by the raw material supplier.

(i) Low density, high molecular weight polyethylene (LDHMW) must conform to the requirements of ASTM D 1248-84(1989), Type I, Class C, Category 4 or 5, Grade J3.

(ii) Low density, high molecular weight ethylene copolymer (LDHMW) must conform to the requirements of ASTM D 1248-84(1989), Type I, Class C, Category 4 or 5, Grade J3.

(iii) Linear low density, high molecular weight polyethylene (LLDHMW) must conform to the requirements of ASTM D 1248-84(1989), Type I, Class C, Category 4 or 5, Grade J3.

Rural Utilities Service, USDA

§ 1755.900

(iv) High density polyethylene (HD) must conform to the requirements of ASTM D 1248–84(1989), Type III, Class C, Category 4 or 5, Grade J4.

(v) Medium density polyethylene (MD) must conform to the requirements of ASTM D 1248–84(1989), Type II, Class C, Category 4 or 5, Grade J4.

(vi) Particle size of the carbon selected for use must not average greater than 20 nanometers.

(vii) Absorption coefficient must be a minimum of 400 in accordance with the procedures of ASTM D 3349–86.

(4) The outer jacketing material removed from or tested on the cable must be capable of meeting the following performance requirements:

Property	LLDHMW, ethylene copolymer	LDHMW poly- ethylene	HD or MD poly- ethylene
Melt Flow Rate:			
Percent increase from raw material, Maximum		50	50
<0.41 (Initial Melt Index)	100		
0.41–2.00 (Initial Melt Index)		50	
Tensile Strength:			
Minimum, Megapascals	12	12	16.5
Ultimate Elongation:			
Minimum, Percent	400	400	300
Environmental Stress Cracking:			
Maximum, Failures	0/10	2/10	2/10
Shrinkback:			
Maximum, Percent	5	5	5
Impact:			
Maximum, Failures	2/10	2/10	2/10

(5) *Testing procedures.* The procedures for testing jacket specimens for compliance with paragraph (m)(4) of this section must be as follows:

(i) *Melt flow rate.* The melt flow rate must be determined by ASTM D 1238–90b, Condition E. Jacketing material must be free from flooding and filling compound.

(ii) *Tensile strength and ultimate elongation.* Test in accordance with EIA–455–89A, using a jaw separation speed of 500 millimeters per minute for low density material and 50 millimeters per minute for high and medium density materials.

(iii) *Environmental stress cracking.* Test in accordance with ASTM D 4565–90a.

(iv) *Shrinkback.* Test in accordance with the procedures specified in EIA–455–86 using a temperature of $100 \pm 1^\circ \text{C}$ for a 4 hour period for low density material and a test temperature of $115 \pm 1^\circ \text{C}$ for a 4 hour period for high and medium density materials.

(v) *Impact.* The test must be performed in accordance with ASTM D 4565–90a using an impact force of 4 newton-meters at a temperature of $-20 \pm 2^\circ$

C. A cracked or split jacket constitutes failure.

(6) *Jacket thickness.* The nominal outer jacket thickness must not be less than 1.3 millimeters. The test method used must either be the End Sample Method (paragraph (m)(6)(i) of this section) or the Continuous Uniformity Thickness Gauge Method (paragraph (m)(6)(ii) of this section).

(i) *End sample method.* The jacket must be capable of meeting the following requirements:

Minimum Average Thickness: 90 percent (%) of nominal thickness

Minimum Spot Thickness: 70 % of nominal thickness

(ii) *Continuous uniformity thickness gauge.* (A) The jacket must be capable of meeting the following requirements:

Minimum Average Thickness: 75 % of nominal thickness

Minimum Thickness: 70 % of nominal thickness

Maximum Eccentricity: 40 % of nominal thickness

$$\text{Eccentricity} = \frac{\text{Max. Thickness} - \text{Min. Thickness}}{\text{Average Thickness}} \times 100$$

(B) The maximum and minimum thickness values shall be based on the average of each axial section.

(7) For jackets having embedded strength members, the jacket thickness must meet the requirements of paragraph (m)(6) of this section except that the jacket thickness over the strength members must not be less than 0.50 millimeters.

(8) The minimum jacket thickness at any point over the support messenger for self-supporting aerial cable utilizing such an element must be 1.1 millimeters.

(9) The web dimension for self-supporting aerial cable utilizing such a feature must be as follows:

Height: 2.29 ± 0.750 millimeters

Width: $1.52^{+0.51}_{-0.25}$ millimeters

(n) *Sheath slitting cord (optional)*. (1) A sheath slitting cord is optional.

(2) When a sheath slitting cord is used it must be nonhygroscopic and nonwicking or be rendered such by the filling or flooding compound, continuous throughout a length of cable and of sufficient strength to open the sheath over at least a one meter length without breaking the cord at a temperature of 23 ± 5 °C.

(o) *Identification marker and length marker*. (1) Each length of cable must be permanently labeled either Optical Cable, OC, Optical Fiber Cable, or OF on the outer jacket and identified as to manufacturer and year of manufacture.

(2) Each length of cable intended for direct burial installation shall be marked with a telephone handset in compliance with Rule 350G of the 1993 National Electrical Safety Code (NESC).

(3) Mark the number of fibers on the jacket.

(4) The markings must be printed on the jacket at regular intervals of not more than 2 meters.

(5) An alternative method of marking may be used if acceptable to RUS.

(6) The completed cable must have sequentially numbered length markers in Meters or Feet at regular intervals of not more than 2 meters along the outside of the jacket.

(7) Continuous sequential numbering must be employed in a single length of cable.

(8) The numbers must be dimensioned and spaced to produce good legibility and must be approximately 3 millimeters in height. An occasional illegible marking is permissible if there is a legible marking located not more than 2 meters from it.

(9) The method of marking must be by means of suitable surface markings producing a clear distinguishable contrasting marking acceptable to RUS. Where direct or transverse printing is employed, the characters should be indented to produce greater durability of marking. Any other method of length marking must be acceptable to RUS as producing a marker suitable for the field. Size, shape and spacing of numbers, durability and overall legibility of the marker will be considered in acceptance of the method.

(10) Agreement between the actual length of the cable and the length marking on the cable jacket must be within the limits of +1 percent, –0 percent.

(11) The color of the initial marking must be white or silver. If the initial marking fails to meet the requirements of the preceding paragraphs, it will be permissible to either remove the defective marking and re-mark with the white or silver color or leave the defective marking on the cable and re-mark with yellow. No further re-marking is permitted. Any re-marking must be on a different portion of the cable circumference than any existing marking when possible and have a numbering sequence differing from any other existing marking by at least 3,000.

(12) Any reel of cable that contains more than one set of sequential markings must be labeled to indicate the

color and sequence of marking to be used. The labeling must be applied to the reel and also to the cable.

(p) *Optical performance.* (1) The optical performance of the single mode fibers must be in accordance with the requirements specified in paragraphs (p)(1)(i) through (p)(1)(viii) of this section.

(i) The attenuation values of the single mode fibers within the cable must not exceed 0.5 decibel per kilometer (dB/km) for dispersion-unshifted single mode fiber at 1310 and 1550 nanometers and must not exceed 0.5 dB/km for dispersion-shifted single mode fiber at 1550 nanometers. The test method used for measuring the attenuation must be in accordance with either:

(A) EIA/TIA-455-78A; or

(B) EIA/TIA-455-61.

(ii) The attenuation values for wavelengths between 1285 and 1330 nanometers and between 1525 and 1575 nanometers for dispersion-unshifted fibers must not exceed the attenuation at 1310 and 1550 nanometers by more than 0.1 dB/km. The attenuation values for wavelengths between 1525 and 1575 nanometers for dispersion-shifted fibers must not exceed the attenuation at 1550 nanometers by more than 0.1 dB/km. The test method used for measuring the attenuation must be in accordance with any one of the methods specified in paragraph (p)(1)(i) of this section.

(iii) Attenuation discontinuities in the fiber's length must not exceed 0.1 decibel (dB) for dispersion-unshifted fiber at 1310 ± 20 and 1550 ± 20 nanometers and must not exceed 0.1 dB for dispersion-shifted fiber at 1550 ± 20 nanometers when measured in accordance with EIA/TIA-455-59.

(iv) Measurement of the attenuation must be conducted at the wavelength specified for application and must be expressed in decibels per kilometer.

(v) Because the accuracy of attenuation measurements for single mode fibers becomes questionable when measured on short cable lengths, attenuation measurements are to be made utilizing characterization cable lengths. If the ship length of cable is less than one kilometer, the attenuation values measured on longer lengths of cable (characterization

length of cable) before cutting to the ship lengths of cable may be applied to the ship lengths.

(vi) For dispersion-unshifted fiber the zero dispersion wavelength must be between 1300 and 1322 nanometers, and the value of the dispersion slope at the zero-dispersion wavelength must not be greater than 0.092 picosecond per nanometer squared times kilometer ($\text{ps}/(\text{nm}^2 \cdot \text{km})$) when measured in accordance with either:

(A) EIA/TIA-455-168A;

(B) EIA/TIA-455-169A; or

(C) EIA/TIA-455-175A.

(vii) For dispersion-shifted fiber, the dispersion over the wavelength range between 1525 and 1575 nanometers must not exceed 3.5 picosecond per nanometer times kilometer ($\text{ps}/(\text{nm} \cdot \text{km})$) and must have a maximum dispersion slope of $0.095 \text{ ps}/(\text{nm}^2 \cdot \text{km})$ at the zero dispersion wavelength when measured in accordance with any one of the test procedures specified in paragraph (p)(1)(vi) of this section.

(viii) The cut off wavelength of the dispersion-unshifted and the dispersion-shifted fibers in a cable must be less than 1260 nanometers when measured in accordance with EIA/TIA-455-170.

(2) The optical performance of the multimode fibers must be in accordance with the requirements specified in paragraphs (p)(2)(i) through (p)(2)(vi) of this section.

(i) The attenuation values of the 50/125 and 62.5/125 micrometer multimode fibers within the cable must not exceed 1.5 dB/km at 1300 nanometers when measured in accordance with either:

(A) EIA/TIA-455-46A;

(B) EIA/TIA-455-53A; or

(C) EIA/TIA-455-61.

(ii) Attenuation discontinuities in the fiber's length must not exceed 0.2 dB for both multimode fiber types at 1300 ± 20 nanometers when measured in accordance with EIA/TIA-455-59.

(iii) Measurement of the attenuation must be conducted at the wavelength specified for application and must be expressed in decibels per kilometer.

(iv) Because the accuracy of attenuation measurements for multimode fibers becomes questionable when measured on short cable lengths, attenuation measurements are to be made

utilizing characterization cable lengths. If the ship length of cable is less than one kilometer, the attenuation values measured on longer lengths of cable (characterization length of cable) before cutting to the ship lengths of cable may be applied to the ship lengths.

(v) The bandwidth of the multimode fibers at the -3 dB optical power of the optical fibers within the cable must be within the limits prescribed in the purchase order.

(vi) The test methods used to measure bandwidth must be in accordance with either EIA/TIA-455-30B or EIA/TIA-455-51A.

(3) Numerical aperture (NA) for each multimode optical fiber in the cable must be 0.20 ± 0.015 for the 50/125 micrometer design and 0.275 ± 0.015 for the 62.5/125 micrometer design when measured in accordance with EIA/TIA-455-177A.

(q) *Mechanical requirements*—(1) *Cable bend test.* (i) All cables manufactured in accordance with the requirements of this section must be capable of meeting the following bend test without exhibiting an increase in fiber attenuation greater than 0.10 dB for single mode fibers and 0.40 dB for multimode fibers.

(ii) Measure the attenuation of dispersion-unshifted single mode fibers at 1310 ± 20 and 1550 ± 20 nanometers, dispersion-shifted single mode fibers at 1550 ± 20 nanometers and multimode fibers at 1300 ± 20 nanometers.

(iii) After measuring the attenuation of the optical fibers, test the cable sample in accordance with EIA/TIA-455-37A, Test Condition E, Turns Test Level 3. The following detailed test conditions shall apply:

(A) Section 4.2—Mandrel diameter must be 20 times the cable diameter.

(B) Section 4.5—Measure the attenuation increase of the wound sample at the test temperature and specified wavelengths in accordance with EIA-455-20.

(C) For armored cable, the armor overlap must be on the outside of the bend.

(D) For self-supporting cable, the jacketed support messenger and connection web must be removed prior to testing.

(iv) The cable may be allowed to warm to room temperature before visual inspection. The bent area of the cable must show neither visible evidence of fracture of the jacket nor delamination of the bond at the overlap and to the outer jacket in non-flooded cable. After removal of the jacket, there must be no visible evidence of fracture of the armor, when present, and of the components in the core.

(2) *Cable impact test.* (i) All cables manufactured in accordance with the requirements of this section must be capable of meeting the following impact test without exhibiting an increase in fiber attenuation greater than 0.10 dB for single mode fibers and 0.40 dB for multimode fibers, and without cracking or splitting of the cable jacket.

(ii) Measure the attenuation of the optical fibers in accordance with paragraph (q)(1)(ii) of this section.

(iii) After measuring the attenuation of the optical fibers, test the cable in accordance with EIA/TIA-455-25A.

(3) *Cable compression test.* (i) All cables manufactured in accordance with the requirements of this section must be capable of meeting the following compressive strength test without exhibiting an increase in fiber attenuation greater than 0.10 dB for single mode fibers and 0.4 dB for multimode and without cracking or splitting of the cable jacket when subjected to a minimum compressive load of 440 newtons per centimeter for armored cable and 220 newtons per centimeter for nonarmored cable.

(ii) Measure the attenuation of the optical fibers in accordance with paragraph (q)(1)(ii) of this section.

(iii) After measuring the attenuation of the optical fibers, test the cable in accordance with EIA-455-41 using a rate of 3 millimeters to 20 millimeters per minute and maintaining the load for 10 minutes.

(4) *Cable twist test.* (i) All cables manufactured in accordance with the requirements of this section must be capable of meeting the following twist test without exhibiting an increase in fiber attenuation greater than 0.10 dB for single mode fibers and 0.40 dB for

Rural Utilities Service, USDA

§1755.900

multimode fibers, and without cracking or splitting of the cable jacket.

(ii) Measure the attenuation of the optical fibers in accordance with paragraph (q)(1)(ii) of this section.

(iii) After measuring the attenuation of the optical fibers, test the cable in accordance with EIA/TIA-455-85A, using a maximum cable twisting length of 4 meters.

(5) *Cable flex test.* (i) All cables manufactured in accordance with the requirements of this section must be capable of meeting the following flex test without exhibiting an increase in fiber attenuation greater than 0.10 dB for single mode fibers and 0.40 dB for multimode fibers.

(ii) Measure the attenuation of the optical fibers in accordance with paragraph (q)(1)(ii) of this section.

(iii) After measuring the attenuation of the optical fibers, test the cable in accordance with EIA/TIA-455-104A, Test Conditions I and II, flexed for 25 cycles using a sheave diameter not less than 20 times the cable diameter (Test condition letter B).

(iv) After completion of the test, the bent area of the cable must show neither visible evidence of fracture of the jacket nor delamination of the bond at the overlap and to the outer jacket in nonflooded cable. After removal of the jacket, there must be no visible evidence of fracture of the armor, when present, and of the components in the core.

(6) *Water penetration test.* (i) A one meter length of completed fiber optic cable must be preconditioned for 24 hours at 23 ± 5 °C and then tested in accordance with EIA/TIA-455-82B using a one meter water head over the sample or placed under the equivalent continuous pressure for one hour.

(ii) After the one hour period, there must be no water leakage through the sheath interfaces, under the core wrap, between the cable core interstices or through the fiber buffers.

(iii) If water leakage is detected in the first sample, one additional 3 meter sample from EACH END of the same reel must be tested in accordance with paragraph (q)(6)(i) of this section. If either sample exhibits water leakage, the entire reel of cable is to be rejected. If the samples exhibit no leakage, the en-

tire reel of cable is considered acceptable.

(7) *Compound flow test.* (i) Three 300 millimeter long test samples must be preconditioned for 24 hours at 23 ± 5 °C and then tested in accordance with EIA/TIA-455-81A using a test temperature of 80 ± 1 °C.

(ii) The amount of filling or flooding compounds that flowed or dripped from any of the suspended cable specimens must be less than or equal to 0.5 grams of material. The measurement of an amount greater than 0.5 grams for any of the suspended cable specimens constitutes failure.

(r) *Preconnectorized cable (optional).* (1) At the option of the manufacturer and upon request by the purchaser, the cable may be factory terminated with connectors acceptable to RUS.

(2) All connectors must be accepted by RUS prior to their use.

(s) *Acceptance testing and extent of testing.* (1) The tests described in appendix A of this section are intended for acceptance of cable designs and major modifications of accepted designs. What constitutes a major modification is at the discretion of RUS. These tests are intended to show the inherent capability of the manufacturer to produce cable products that have satisfactory performance characteristics, long life and long-term optical stability but are not intended as field tests.

(2) For initial acceptance, the manufacturer must submit:

(i) An original signature certification that the product fully complies with each section of the specification;

(ii) Qualification Test Data, per appendix A of this section;

(iii) A set of instructions for handling the cable;

(iv) OSHA Material Safety Data Sheets for all components;

(v) Agree to periodic plant inspections;

(vi) A certification that the product does or does not comply with the domestic origin manufacturing provisions, of the "Buy American" requirements of the Rural Electrification Act of 1938 (52 Stat. 818);

(vii) Written user testimonials concerning field performance of the product; and

(viii) Other nonproprietary data deemed necessary by the Chief, Outside Plant Branch (Telephone).

(3) For requalification acceptance, the manufacturer must submit an original signature certification that the product fully complies with each section of the specification, excluding the Qualification Section, and a certification that the product does or does not comply with the domestic origin manufacturing provisions of the “Buy American” requirements of the Rural Electrification Act of 1938 (52 Stat. 818), for acceptance by September 30 every three years. The required data and certification must have been gathered within 90 days of the submission.

(4) Initial and requalification acceptance requests should be addressed to: Chairman, Technical Standards Committee “A” (Telephone), Telecommunications Standards Division, Rural Utilities Service, Washington, DC 20250–1500.

(5) *Tests on 100 percent of completed cable.* (i) The armor for each length of cable must be tested for continuity using the procedures of ASTM D 4566–90.

(ii) Attenuation for each optical fiber in the cable must be measured.

(iii) Optical discontinuities must be isolated and their location and amplitude recorded.

(6) *Capability tests.* Tests on a quality assurance basis must be made as frequently as is required for each manufacturer to determine and maintain compliance with:

(i) Numerical aperture and bandwidth of multimode fibers;

(ii) Cut off wavelength of single mode fibers;

(iii) Dispersion of single mode fibers;

(iv) Shrinkback and cold testing of loose tube and tight tube buffers;

(v) Adhesion properties of the protective fiber coating;

(vi) Dielectric strength between the armor and the metallic central member;

(vii) Performance requirements for the inner and outer jacketing materials;

(viii) Performance requirements for the filling and flooding compounds;

(ix) Bonding properties of the coated armoring material;

(x) Sequential marking and lettering;

(xi) Cable bend and cable impact tests;

(xii) Water penetration and compound flow tests;

(xiii) Cable twist, cable flex, and cable compression tests; and

(xiv) Performance requirements of support messenger.

(t) *Records of optical and physical tests.*

(1) Each manufacturer must maintain suitable summary records for a period of at least 3 years of all optical and physical tests required on completed cable by this section as set forth in paragraphs (s)(5) and (s)(6) of this section. The test data for a particular reel must be in a form that it may be readily available to RUS upon request. The optical data must be furnished to the purchaser on a suitable and easily readable form.

(2) Measurements and computed values must be rounded off to the number of places or figures specified for the requirement according to ASTM E 29–90.

(u) *Manufacturing irregularities.* (1) Repairs to the armor, when present, are not permitted in cable supplied to end users under this section.

(2) Minor defects in the inner and outer jacket (defects having a dimension of 3 millimeter or less in any direction) may be repaired by means of heat fusing in accordance with good commercial practices utilizing sheath grade compounds.

(3) Buffer tube repair is permitted only in conjunction with fiber splicing.

(v) *Packaging and preparation for shipment.* (1) The cable must be shipped on reels. The diameter of the drum must be large enough to prevent damage to the cable from reeling and unreeling. The reels must be substantial and so constructed as to prevent damage during shipment and handling.

(2) A circumferential thermal wrap or other means of protection complying with the requirements of appendix B of this section must be secured between the outer edges of the reel flange to protect the cable against damage during storage and shipment.

(3) Cable manufactured to the requirements of this section must be sealed at the ends to prevent entrance of moisture. The method of sealing

Rural Utilities Service, USDA

§ 1755.900

must be accepted by RUS prior to its use.

(4) The end-of-pull (outer end) of the cable must be securely fastened to prevent the cable from coming loose during transit. The start-of-pull (inner end) of the cable must project through a slot in the flange of the reel, around an inner riser, or into a recess on the reel flange near the drum and fastened in such a way to prevent the cable from becoming loose during installation.

(5) Spikes, staples or other fastening devices must be used in a manner which will not result in penetration of the cable.

(6) The arbor hole must admit a spindle 63.5 millimeters in diameter without binding. Steel arbor hole liners may be used but must be accepted by RUS prior to their use.

(7) Each reel must be plainly marked to indicate the direction in which it should be rolled to prevent loosening of the cable on the reel.

(8) Each reel must be stenciled or lettered with the name of the manufacturer.

(9) The following information must be either stenciled on the reel or on a tag firmly attached to the reel:

Optical Cable
Number of Fibers
Armored or Nonarmored
Year of Manufacture
Name of Cable Manufacturer
Length of Cable
Reel Number
RUS 7 CFR 1755.900

Example:

Optical Cable
4 fiber
Armored
1988
XYZ Company
1050 meters
Reel Number 3
RUS 7 CFR 1755.900

(10) When preconnectorized cable is shipped, the splicing modules must be protected to prevent damage during shipment and handling. The protection method must be accepted by RUS prior to its use.

(The information collection and record-keeping requirements of this section have been approved by the Office of Management and Budget (OMB) under control number 0572-0059)

APPENDIX A TO 7 CFR 1755.900— QUALIFICATION TESTS METHODS

(I) The test procedures described in this appendix are for qualification of initial cable designs and major modifications of accepted designs. Included in (V) of this appendix are suggested formats that may be used in submitting test results to RUS.

(II) Sample selection and preparation. (1) All testing must be performed on lengths removed sequentially from any of the same cables listed below. The cables must not have been exposed to temperatures in excess of 38°C since their initial cool downs after sheathing. The lengths specified are minimum lengths and if desirable from a laboratory testing standpoint longer lengths may be used:

(a) 12 single mode fiber jacketed cable consisting of 6 single mode dispersion-unshifted fibers and 6 single mode dispersion-shifted fibers.

(b) 12 multimode fiber jacketed cable consisting of 6 50/125 micrometer multimode fibers and 6 62.5/125 micrometer multimode fibers.

(c) 24 fiber jacketed combination cable consisting of 6 single mode dispersion-unshifted fibers; 6 single mode dispersion-shifted fibers; 6 50/125 micrometer multimode fibers; and 6 62.5/125 micrometer multimode fibers.

(2) Length A shall be a minimum of 500 meters long. Coil the sample with a diameter of 50 to 75 times its sheath diameter. Three lengths are required if only requesting acceptance for either single mode fiber cable (a), multimode fiber cable (b), or using the combination fiber cable (c). Six lengths, 3 lengths of single mode fiber cable (a), and 3 lengths of multimode fiber cable (b), are required if requesting acceptance for both single mode and multimode fiber cables.

(3) Length B shall be one meter long. Four lengths of either single mode fiber cable (a), multimode fiber cable (b) or the combination fiber cable (c) are required.

(4) Length C shall be 600 millimeters long. Four lengths of either single mode fiber cable (a), multimode fiber cable (b) or the combination fiber cable (c) are required.

(5) Data reference temperature. Unless otherwise specified, all measurement shall be made at 23±5°C.

(III) *Environmental tests*—(1) *Heat aging test.* (a) *Test samples.* Place one or two samples of length A and one sample each of lengths B and C in an oven or environmental chamber. The ends of sample A must exit from the chamber or oven for optical tests. Securely seal the oven exit holes.

(b) *Sequence of tests.* The samples are to be subjected to the following tests after conditioning:

(i) Water Penetration Test outlined in paragraph (III) (2) of this appendix; and

(ii) Jacket Slip Strength Test outlined in paragraph (III) (3) of this appendix. (For Flooded Designs Only)

(c) *Initial measurements.* (i) For sample(s) A measure the attenuation for the single mode dispersion-unshifted fibers at 1310 and 1550 nanometers, for single mode dispersion-shifted fibers at 1550 nanometers and/or for multimode fibers at 1300 nanometers at a temperature of $23 \pm 5^\circ\text{C}$. Also measure the bandwidth of the multimode fibers. Calculate the attenuation data on a per kilometer basis. Calculate the bandwidth data on a megahertz-kilometer (MHz-km) basis.

(ii) Record on suggested formats in (V) of this appendix or on other easily readable formats.

(d) *Heat conditioning.* (i) Immediately after completing the initial measurements, condition the sample(s) for 14 days at a temperature of $65 \pm 2^\circ\text{C}$.

(ii) At the end of this period note any exudation of cable filler. Measure the parameters given in paragraph (III)(1)(c) of this appendix. Record on suggested formats in (V) of this appendix or on other easily readable formats.

(e) *Overall optical deviation.* (i) Calculate the change in all parameters between the final parameters after conditioning with initial parameters in paragraph (III)(1)(c) of this appendix.

(ii) The stability of the optical parameters after completion of this test must be within the following prescribed limits:

(A) *Attenuation.* The attenuation of each multimode fiber must not change by more than 0.3 dB/km and the attenuation of each single mode fiber must not change by more than 0.1 dB/km.

(B) *Bandwidth.* The bandwidth of each multimode fiber must not change by more than 15 percent from their original values.

(2) *Water penetration testing.* (a) A watertight closure must be placed over the jacket of length B from paragraph (III)(1)(a) of this appendix. The closure must not be placed over the jacket so tightly that the flow of water through pre-existing voids or air spaces is restricted. The other end of the sample must remain open.

(b) Test per Option A or Option B. (i) *Option A.* Weigh the sample and closure prior to testing. Fill the closure with water and place under a continuous pressure of 10 ± 0.7 kilopascals for one hour. Collect the water leakage from the end of the test sample during the test and weigh to the nearest 0.1 gram. Immediately after the one hour test, seal the ends of the cable with a thin layer of grease and remove all visible water from the closure, being careful not to remove water that penetrated into the core during the test. Reweigh the sample and determine the weight of water that penetrated into the core.

(ii) *Option B.* Fill the closure with a 0.2 gram sodium fluorescein per liter water solution and apply a continuous pressure of 10 ± 0.7 kilopascals for one hour. Catch and weigh any water that leaks from the end of the cable during the one hour period. If no water leaks from the sample, carefully remove the water from the closure. Then carefully remove the outer jacket, armor, if present, inner jacket, if present, and core wrap one at a time, examining with an ultraviolet light source for water penetration. After removal of the core wrap, carefully dissect the core and examine for water penetration within the core. Where water penetration is observed, measure the penetration distance.

(3) *Jacket slip strength test.* (For Flooded Design Only) (a) *Sample selection.* Test sample C from paragraph (III)(1)(a) of this appendix.

(b) *Sample preparation.* Prepare test sample in accordance with the procedures specified in ASTM D 4565–90a.

(c) *Sample conditioning and testing.* Remove the sample from the tensile tester prior to testing and condition for one hour at $50 \pm 2^\circ\text{C}$. Test immediately in accordance with the procedures specified in ASTM D 4565–90a. A minimum jacket slip strength of 67 newtons is required. Record the load attained on the suggested formats in (V) of this appendix or on other easily readable formats.

(4) *Temperature and humidity exposure.* (a) Repeat paragraphs (III)(1)(a) through (III)(1)(c)(ii) of this appendix for separate set of samples A, B and C which have not been subjected to prior environmental conditioning.

(b) Immediately after completing the measurements, expose the test sample to 100 temperature cyclings. Relative humidity within the chamber shall be maintained at 90 ± 2 percent. One cycle consists of beginning at a stabilized chamber and test sample temperature of $52 \pm 2^\circ\text{C}$, increasing the temperature to $57 \pm 2^\circ\text{C}$, allowing the chamber and test samples to stabilize at this level, then dropping the temperature back to $52 \pm 2^\circ\text{C}$.

(c) Repeat paragraphs (III)(1)(d)(ii) through (III)(3)(c) of this appendix.

(5) *Temperature cycling.* (a) Repeat paragraphs (III)(1)(a) through (III)(1)(c)(ii) of this appendix for separate set of samples A, B, and C which have not been subjected to prior environmental conditioning.

(b) Immediately after completing the measurements, subject the test sample to 10 cycles of temperature between -40°C and $+60^\circ\text{C}$. The test sample must be held at each temperature extreme for a minimum of $1\frac{1}{2}$ hours during each cycle of temperature. The air within the temperature cycling chamber must be circulated throughout the duration of the cycling.

(c) Repeat paragraphs (III)(1)(d)(ii) through (III)(3)(c) of this appendix.

(IV) *Control sample—(a) Test samples.* A separate set of lengths B and C must have been

Rural Utilities Service, USDA**§ 1755.900**

maintained at $23 \pm 5^{\circ}\text{C}$ for at least 48 hours before the testing. (V) The following suggested formats may be used in submitting the test results to

(b) Repeat paragraphs (III)(2) through (III)(3)(c) of this appendix for these samples. RUS:

APPENDIX B TO 7 CFR 1755.900—THERMAL
REEL WRAP QUALIFICATION

(I) The test procedures described in this appendix are only for qualification of initial and subsequent changes in thermal reel wraps.

(II) *Sample selection.* All testing must be performed on two 450 millimeter lengths of cable removed sequentially from the same fiber jacketed cable. This cable must not have been exposed to temperatures in excess

of 38 °C since its initial cool down after sheathing.

(III) *Test procedure.* (1) Place the two samples on an insulating material such as wood.

(2) Tape thermocouples to the jackets of each sample to measure the jacket temperature.

(3) Cover one sample with the thermal reel wrap.

(4) Expose the samples to a radiant heat source capable of heating the uncovered jacket sample to a minimum of 71 °C. A GE 600 watt photoflood lamp or an equivalent lamp having the light spectrum approximately that of the sun shall be used.

(5) The height of the lamp above the jacket shall be 380 millimeters or an equivalent height that produces the 71 °C jacket temperature on the unwrapped sample shall be used.

(6) After the samples have stabilized at the temperature, the jacket temperatures of the samples shall be recorded after one hour of exposure to the heat source.

(7) Compute the temperature difference between jackets.

(8) For the thermal reel wrap to be acceptable to RUS, the temperature difference between the jacket with the thermal reel wrap and the jacket without the reel wrap shall be greater than or equal to 17 °C.

[59 FR 34360, July 5, 1994; 59 FR 44795, Aug. 30, 1994, as amended at 60 FR 1711, Jan. 5, 1995]

§1755.910 RUS specification for outside plant housings and serving area interface systems.

(a) *Scope.* (1) The purpose of this specification is to inform manufacturers and users of outside plant housings and serving area interface (SAI) systems of the engineering and technical requirements that are considered necessary for satisfactory performance in outside plant environments. Included are the mechanical, electrical, and environmental requirements, desired design features, and test methods for evaluation of the product.

(2) The housing and terminal requirements reflect the best engineering judgment available at the present time and may be subject to change due to advances in technology, economic conditions, or other factors.

(3) The test procedures described in this section are required by RUS to demonstrate the functional reliability of the product. However, other standard or unique test procedures may serve the same function. In such cases, RUS shall evaluate the test procedures and results on an individual basis.

(4) The test procedures specified herein satisfy the requirements of housings as well as the requirements of terminals that may be installed within housings. Some of the requirements are interrelated to several tests designed to determine the performance aspects of terminals and are directly affected by testing required for housings. Therefore, the manufacturer should carefully review all the test requirements in order to develop a testing schedule that is comprehensive, efficient in terms of the number of test specimens required and can be accomplished in an orderly and logical sequence.

(5) The specified tests may require special facilities to comply with Federal, State, or local regulatory requirements. Some test procedures are potentially hazardous to personnel because of the high voltages and mechanical forces involved. Safety precautions are necessary to prevent injury.

(6) Underwriters Laboratories, Inc. (UL) 94, Tests for Flammability of Plastic Materials for Parts in Devices and Appliances, fourth edition, dated June 18, 1991, referenced in this section is incorporated by reference by RUS. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. A copy of the UL standard is available for inspection during normal business hours at RUS, room 2845-S, U.S. Department of Agriculture, Washington, DC 20250-1500 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. Copies are available from UL Inc., 333 Pfingsten Road, Northbrook, Illinois 60062-2096, telephone number (708) 272-8800.

(7) The American Society for Testing and Materials Specifications (ASTM) A 109-91, Standard Specification for Steel, Strip, Carbon, Cold-Rolled; ASTM A 153-82 (Reapproved 1987), Standard Specification for Zinc Coating (Hot-Dip) on Iron and Steel Hardware; ASTM A 366/A 366M-91, Standard Specification for Steel, Sheet, Carbon, Cold-Rolled, Commercial Quality; ASTM A 525-91b, Standard Specification for General Requirements for Steel Sheet, Zinc-Coated (Galvanized) by the Hot-Dip Process; ASTM A 526/A

§ 1755.910

526M-90, Standard Specification for Steel Sheet, Zinc-Coated (Galvanized) by the Hot-Dip Process, Commercial Quality; ASTM A 569/A 569M-91a, Standard Specification for Steel, Carbon (0.15 Maximum, Percent), Hot-Rolled Sheet and Strip Commercial Quality; ASTM A 621/A 621M-92, Standard Specification for Steel, Sheet and Strip, Carbon, Hot-Rolled, Drawing Quality; ASTM B 117-90, Standard Test Method of Salt Spray (Fog) Testing; ASTM B 539-90, Standard Test Methods for Measuring Contact Resistance of Electrical Connections (Static Contacts); ASTM B 633-85, Standard Specification for Electrodeposited Coatings of Zinc on Iron and Steel; ASTM D 523-89, Standard Test Method for Specular Gloss; ASTM D 610-85 (Reapproved 1989), Standard Test Method for Evaluating Degree of Rusting on Painted Steel Surfaces; ASTM D 822-89, Standard Practice for Conducting Tests on Paint and Related Coatings and Materials using Filtered Open-Flame Carbon-Arc Light and Water Exposure Apparatus; ASTM D 1535-89, Standard Test Method for Specifying Color by the Munsell System; ASTM D 1654-92, Standard Test Method for Evaluation of Painted or Coated Specimens Subjected to Corrosive Environments; ASTM D 1693-70 (Reapproved 1988), Standard Test Method for Environmental Stress-Cracking of Ethylene Plastics; ASTM D 2197-86 (Reapproved 1991), Standard Test Method for Adhesion of Organic Coatings by Scrape Adhesion; ASTM D 2247-92, Standard Practice for Testing Water Resistance of Coatings in 100% Relative Humidity; ASTM D 2565-92, Standard Practice for Operating Xenon Arc-Type Light-Exposure Apparatus With and Without Water for Exposure of Plastics; ASTM D 2794-92, Standard Test Method for Resistance of Organic Coatings to the Effects of Rapid Deformation (Impact); ASTM D 3928-89, Standard Test Method for Evaluation of Gloss or Sheen Uniformity; ASTM D 4568-86, Standard Test Methods for Evaluating Compatibility Between Cable Filling and Flooding Compounds and Polyolefin Cable Materials; ASTM G 21-90, Standard Practice for Determining Resistance of Synthetic Polymeric Materials to Fungi; and ASTM G 23-90, Standard

7 CFR Ch. XVII (1-1-97 Edition)

Practice for Operating Light-Exposure Apparatus (Carbon-Arc Type) With and Without Water for Exposure of Non-metallic Materials, referenced in this section are incorporated by reference by RUS. These incorporations by references were approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 7 CFR part 51. Copies of the ASTM standards are available for inspection during normal business hours at RUS, room 2845-S, U.S. Department of Agriculture, Washington, DC 20250-1500 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. Copies are available from ASTM, 1916 Race Street, Philadelphia, Pennsylvania 19103-1187, telephone number (215) 299-5585.

(b) *General information.* (1) Outside plant housings are fabricated of either metallic or nonmetallic materials in different sizes and configurations to suit a variety of applications. The purpose of a housing is to protect its contents from environmental elements, rodents, insects, or vandalism and unauthorized access. Housings are designed with internal brackets for accommodating splicing, bonding and grounding connections, cable terminals, cross-connect facilities, load coils, and optical and electronic equipment.

(2) Pedestals are housings primarily intended to house, organize, and protect cable terminations incorporating terminal blocks, splice connectors and modules, ground lugs and load coils. Activities typically performed in a pedestal are cable splicing, shield bonding and grounding, inductive loading, and connection of subscriber drops.

(3) Serving area interface (SAI) cabinets are housings intended to perform some of the same functions as pedestals but are primarily intended to serve as the connecting terminal between feeder cable and distribution cables.

(4) Outside plant housings shall be manufactured in accordance with National Electrical Code (NEC) requirements, Underwriters' Laboratories (UL) requirements, Department of Labor, Occupational Safety and Health Administration Standards (OSHA), and all other applicable Federal, State, and local requirements including, but not

Rural Utilities Service, USDA

§1755.910

limited to, statutes, rules, regulations, orders, or ordinances otherwise imposed by law.

(c) *General documentation requirements*—(1) *Installation and maintenance instructions.* (i) Each product shall have available a set of instructions designed to provide sufficient information for the successful installation of the housing, cables, auxiliary equipment, and the associated splice preparation. The instructions shall be of sufficient size to be easily read and shall be printed using waterproof ink. Pedestal instruction sheets shall include a list of miscellaneous replacement parts that may be purchased locally. SAI systems shall be supplied with complete instructions for installation and use.

(ii) When requested by RUS, or an RUS borrower, the manufacturer shall prepare a training package for the purpose of training technicians in the use and installation of the product and its auxiliary equipment.

(iii) The manufacturer shall provide ordering information for repair parts. Repair parts shall be obtainable through a local distributor or shall be easily obtainable. Information describing equivalent parts and their sources should be provided for those parts that may also be obtained from other sources.

(2) *Quality assurance.* The manufacturer shall demonstrate the existence of an ongoing quality assurance program that includes controls, procedures, and standards used for vendor certification, source inspection, incoming inspection, manufacture, in process testing, calibration and maintenance of tools and test equipment, final product inspection and testing, periodic qualification testing and control of non-conforming materials and products. The manufacturer shall maintain quality assurance records for five years.

(3) *RUS acceptance applications.* (i) The tests described in this specification are required for acceptance of product designs and major modifications of accepted designs. All modifications shall be considered major unless otherwise declared by RUS. The tests are intended to show the inherent capability of the manufacturer to produce products which have an expected service life of 30 years.

(ii) For initial acceptance the manufacturer shall:

(A) Submit an original signature certification that the product complies with each section of the specification;

(B) Provide qualification test data;

(C) Provide OSHA Material Safety Data Sheets for the product;

(D) Provide a detailed explanation concerning the intended use and capacity of the product;

(E) Provide a complete set of instructions, recommendations for equipment organization and splicing;

(F) Agree to periodic plant inspections;

(G) Provide a certification that the product does or does not comply with the domestic origin manufacturing provisions of the “Buy American” requirements of the Rural Electrification Act of 1938 (52 Stat. 818);

(H) Provide user testimonials concerning field performance of the product;

(I) Provide product samples if requested by RUS; and

(J) Provide any other data required by the Chief, Outside Plant Branch (Telephone).

(iii) Each requirement of this section must be addressed in submissions for acceptance. The designation N/A may be entered when the requirements do not apply.

(iv) Acceptance requests should be addressed to: Chairman, Technical Standards, Committee “A” (Telephone), Telecommunications Standards Division, Rural Utilities Service, Washington, DC 20250-1500.

(d) *Functional design criteria for housings*—(1) *General requirements.* (i) The functional requirements for housings concern materials, finishes, environmental factors, and design features that are applicable to most above ground housings used in the outside plant.

(ii) Housings shall be of sufficient size to permit easily managed installation, operational, testing, and maintenance operations. The general shape of outside plant housings is usually comparable to that of a rectangular column or cylinder, with the shape of any particular housing being left to the manufacturer’s discretion. Each design is subject to acceptance by RUS.

§ 1755.910

7 CFR Ch. XVII (1–1–97 Edition)

(2) *Housing types and capacities.* (i) Housings used in outside plant are either the smaller housings generally known as pedestals or larger housings known as equipment or splice cabinets. Both categories may have designs intended for stake mounting, pole mounting, or pad mounting.

(ii) The classifications of pedestals are the general purpose channel Type (H) and the dome Type (M). The Type H pedestal has either front only access or back and front access while the Type M pedestal has top only access. Pedestals are further designated as follows:

Stake mount- ed	Type	Pole mount- ed	Pole mount- ed (extra high)
BD3	H	BD3A	
BD4	H	BD4A	
BD5	H	BD5A	
BD7	H	BD7A	
BD14	M	BD14A	BD14AG
BD15	M	BD15A	BD15AG
BD16	M	BD16A	BD16AG

(iii) The minimum volume associated with the pedestal designations shall be as shown in the following table:

Pedestal ¹ housing designation	Minimum volume	
	Cubic centi- meters cm ³	(Cubic Inches) (in. ³)
BD3, BD3A ²	9,000	(550)
BD4, BD4A ²	15,000	(900)
BD5, BD5A ²	35,000	(2,100)
BD7 ⁽²⁾	72,000	(4,400)
BD14, BD14A, BD14AG ³	9,000	(550)
BD15, BD15A, BD15AG ³	27,000	(1,600)
BD16, BD16A, BD16AG ³	38,000	(2,300)

Note 1: Housings designed for unique purposes will be evaluated on a case-by-case basis.

Note 2: For Type H pedestals, the minimum volume is that space as measured 5 centimeters (cm) (2 inches (in.)) below the top of the housing to a point 40 cm (16 in.) above the bottom of the lower cover plate.

Note 3: The minimum volume of the Type M pedestals shall be the space within the dome measured from the lower edge of the dome to a point 5 cm (2 in.) from the top.

(iv) Equipment cabinets intended for use as SAI housings shall be assigned size designations according to their maximum pair termination capacities. The capacity will vary depending on the type of terminating equipment used. SAI cabinets shall be suffix designated with an “A” for pole mounting, “X” for pad mounting, and “S” for stake mounting.

(v) Large pair count splice cabinets are classified according to their splice capacity. Approximately 48 cm³ (3.0

in.³) of splice area per pair straight spliced shall be permitted.

(vi) The minimum volume associated with large pair count splice cabinets shall be as shown in the following table:

Splice cabinet ¹ designa- tion	Minimum volume		Maxi- mum splice capacity (pairs)
	(cm. ³)	(in. ³)	
BD6000	295,000	(18,000)	6,000
BD8000	393,000	(24,000)	8,000
BD10000	491,000	(30,000)	10,000

Note 1: Additional sizes of splice cabinets shall be considered by RUS on a case-by-case basis.

(3) *Design and fabrication requirements for housings.* (i) Type H pedestal housings may consist of an enclosed channel incorporating an integrally mounted stake that serves as a backplate, or they may be designed for universal mounting on stakes or poles. The body of the housing shall have two major components; an upper cover and a base cover. The upper cover shall have a top, front and back plate with the front cover removable to permit entry and provide increased work space. The base cover shall consist of a front plate and back plate. The base cover back plate may be an extension of the upper back plate cover.

(ii) Type M pedestal housings shall consist of a one piece upper sleeve designed to fit over the base cover trapping air to prohibit water from entering the splice area when installed in locations prone to temporary flooding. Pedestals designed to be mounted extra high on poles for locations susceptible to deep snow shall have a bottom close-off option available to prohibit the ingress of birds, rodents and insects.

(iii) The external housing components on all outside plant housings shall provide reasonable protection against accidental removal or vandalism. Housings shall be equipped with a cover plate retaining bolt and cup washer that may be opened only with an industry accepted socket type can wrench. Housings may be equipped with provisions to allow the purchaser to install a padlock.

(iv) Installed housings shall resist the disassembling force of frost heaving applied to the bottom of ground line cover plates. The base cover must

remain stationary to stabilize the contents of the housing cavity.

(v) In an effort to provide protection against dust penetration, blowing snow, rain, and ultraviolet light degradation of internal components, all mechanical gaps shall be restricted. The use of seals, overlaps, gaskets, and/or dovetailing is required to assure satisfactory protection of housed equipment.

(vi) Knockouts, cutouts, or notches designed to accommodate aerial service drops shall not be permitted. A design option for housings intended to accommodate service drops shall include a separate channel or equivalent in the base cover to allow future additions of service drops without the removal of gravel or the moisture barrier in the base of the housing. Service wire channels must be designed to prevent the entry of birds, reptiles, rodents and insects.

(vii) Minimal venting of SAI housings may be necessary to relieve internal pressure and condensation.

(viii) There shall be no aluminum housing components that will become buried in the soil when the housing is properly installed.

(ix) Housing components may be assembled using rivets, welds, glue, bolts and nuts, or other techniques suitable for the materials involved.

(x) Housings and their components that require field assembly must be capable of being assembled with tools normally available to outside plant technicians.

(xi) Hinged doors on SAI housings and large pair count splice housings shall be equipped with a device that restrains the doors in the open position.

(xii) Outside plant housings shall be free of sharp edges, burrs, etc., that could present a safety hazard to personnel involved in installation and use of the product or to the general public. Surfaces inside housings must not allow pinching of conductors during installation of cover plates or the opening and closing of doors.

(xiii) A ground line mark shall be provided, approximately 15 cm (6 in.) below the top edge of the housing base cover plate on housings intended for ground level mounting. Base cover

plates shall have a minimum height of 31 cm (12 in.).

(xiv) Any housing, which weighs in excess of 91 kilograms (kg) (200 pounds (lb)), including its contents, shall be equipped with lifting brackets for attaching hoisting cables or chains.

(xv) Housing stakes shall be a minimum of 107 cm (42 in.) in length. If fabricated from steel, they shall have a minimum thickness of No. 13 gauge as measured according to American Society for Testing and Materials (ASTM) A 525-91b. Stakes shall be formed into a "U" channel with a minimum depth of 2 cm (0.75 in.). The stake shall be a single part of suitable design strength for driving 91 cm (36 in.) into the soil with hand tools without damage such as bending or warping. The stake shall have adequate mounting holes having a minimum separation of 15 cm (6 in.) for mounting the housing baseplate. The stake material must resist corrosion and deterioration when exposed to soil and atmospheric conditions.

(xvi) The housing design must permit a logical progression of installation steps that would normally be encountered in typical field installations.

(xvii) Provisions for attaching housings to stakes, poles, walls, other housings, or pads shall be provided for each design intended for those purposes. Locations of holes for mounting attachments may be provided by knockouts on above ground components. Mounting hole locations for below ground components may be predrilled.

(xviii) Pole mounting hardware shall provide at least 1.3 cm (0.5 in.) clearance from the pole to the housing. Pole mounting brackets shall accommodate the wide range of pole sizes used in the telephone industry.

(xix) Pad-mounted housings shall have hardware available for anchoring the housing base to the pad. A template may be provided to assist in the location of mounting attachment details for pad preparation.

(xx) Housings equipped with stub cables shall have strain relief devices to permit shipping and handling of the housing without damage to the housing or stub cables. Only RUS accepted cable shall be used for stub cables. The cable manufacturer's recommendations

§ 1755.910

concerning minimum bend radius shall be observed. The minimum bend radius for most copper cables is 10 times the cable diameter.

(xxi) Cable supports shall be provided near the top of the ground line cover and other appropriate locations within the housing to provide cable stability consistent with the intended use and capacity of the housing. Cable supports shall be capable of holding a minimum load of 23 kg (50 lb).

(xxii) An adequate supply of non-metallic retainer clips or tie wraps capable of supporting a minimum load of 23 kg (50 lb) shall be provided with the housing. Adequate spaces for installation of the clips or tie wraps must be provided on the housing backplate and cable supports.

(xxiii) Housing chambers designed for splicing operations shall be equipped with insulated supporting straps or rods suitable for supporting splice bundles. The insulation on the straps or rods shall extend for the entire length of the device and shall have a dielectric strength of 15 kilovolts (kv) direct current (dc) minimum. Housings having an "H" frame design where both front and rear covers may be removed may incorporate insulated tie bars to be used as cable supports.

(xxiv) Housings designed to contain equipment in addition to splices shall be equipped with a device for physically separating the splice area from the service area of the housing.

(xxv) A dielectric shield rated at 15 kv dc shall be provided to enclose the cable splice area. The shield shall extend from the lower cable supports to within 2.5 cm (1 in.) of the top of the housing. The shield shall be equipped with Velcro or equivalent fastening devices designed to hold the shield in both the open or closed positions. The fastening devices shall extend along the entire vertical edge of the dielectric shield.

(xxvi) Mounting arrangements for a variety of terminal blocks and other equipment shall be provided by means of good housekeeping panels or other devices that may enhance the service aspect of the housing.

(xxvii) Housings designed for SAI cabinets may be shipped with terminal blocks installed and stub cables at-

7 CFR Ch. XVII (1-1-97 Edition)

tached. If this option is exercised, the stub cables and terminal blocks must be RUS accepted. In all cases, SAI cabinets must be equipped with appropriate mounting devices for installing the peripheral equipment required for a serving area interface.

(xxviii) SAI cabinets shall be designed to provide physical separation between the splicing area and the area provided for running cross-connect jumpers.

(xxix) SAI cabinets and large splice housings must have an external feature for attaching a padlock to prevent unauthorized entry.

(xxx) Each housing shall have a tinned or zinc electroplated copper alloy or equivalent connector plate or bar to be used for terminating ground and cable shield bond connections. The device shall be equipped with captive studs and nuts with captive lock washers designed for attaching 6 American Wire Gauge (AWG) copper bonding harness wire or braid and a 6 AWG copper ground wire. Connector plates shall be equipped with enough studs and nuts to provide individual connections equivalent to the maximum number of cable sheaths recommended for the housing. Housings shall incorporate design features that enable the field installation of at least one additional connector plate for service conditions that require numerous connections. A bonding and grounding system capable of providing support and strain relief for service wires shall be provided for housings intended for use as distribution points. The bonding system shall be designed to provide sheath continuity as cable and service wires are installed, and prior to any other operation being performed. The bonding arrangement shall provide electrical continuity between all bonds and the ground connector plate. The bonding and grounding arrangement shall permit the lifting of individual cable ground connections for testing and cable locating activities without jeopardizing the grounding potential of other cables that may enter the housing. The bonding and grounding system shall be capable of conducting a current of 1000 amperes for at least 20 seconds.

Rural Utilities Service, USDA

§ 1755.910

(4) *Warning sign.* (i) A buried cable warning sign shall be securely attached to the outside of each housing. The lettering information on the sign shall be permanent.

(ii) For pedestals, the sign shall be centered horizontally on the front cover and the top of the sign shall be not more than 10 cm (4 in.) from the top of the housing.

(iii) For SAI cabinets, the sign shall be centered horizontally and vertically on the door. If there are two doors, the sign shall be mounted on the left door.

(iv) Deviations from warning sign location requirements are permitted only for housing design constraints. Alternate sign locations will be considered by RUS.

(v) The RUS standard sign design is shown in Figure 1.

(5) *Housing materials.* (i) Materials used in housings shall present no environmental or safety hazard as defined by industry standards or Federal, State, or local laws and regulations. Figure 1 is as follows:

FIGURE 1
WARNING SIGN

Rural Utilities Service, USDA

§ 1755.910

(ii) All materials are required to have fire resistance ratings consistent with recognized industry standards. External materials must be flame resistant.

(iii) All materials used in the manufacture of housings or component parts must achieve the required strength properties, resist deterioration when exposed to outdoor conditions, and be acceptable to RUS for the specific application. New materials or materials not familiar to the RUS staff shall be supported by test and performance data which demonstrates their suitability for the intended use.

(iv) Nonmetallic housing materials shall have a fungus growth rating no greater than one according to ASTM G 21-90.

(v) Metallic components shall be either corrosion resistant or protected against corrosion and must not produce galvanic corrosion in wet or humid conditions on other metals that may be present in the housing environment.

(vi) Mill galvanized steel used in the manufacture of housings shall comply with the appropriate requirements of one of the following standards:

- (A) ASTM A 109-91;
- (B) ASTM A 366/A 366M-91;
- (C) ASTM A 525-91b; or
- (D) ASTM A 526/A 526M-90.

(vii) Hot rolled steel shall comply with the appropriate requirements of one of the following standards:

- (A) ASTM A 569/A 569M-91a; or
- (B) ASTM A 621/A 621M-92.

(viii) Cold rolled steel shall comply with the appropriate requirements of one of the following standards:

- (A) ASTM A 109-91; or
- (B) ASTM A 366/A 366M-91.

(ix) Steel parts used for internal housing brackets shall be hexavalent chromate coated or zinc plated in accordance with ASTM B 633-85.

(x) Hardware items used for assembling or fastening housing components shall be 300 series or passivated 400 series stainless steel or hot dip galvanized in accordance with ASTM A 153-82 (1987). Other materials will be considered by RUS on an individual basis.

(xi) Aluminum components shall be fabricated from alloy types 5052 or 6061 or other types that have been recognized as having acceptable corrosion

resistance and formability and weldability features.

(xii) Nonmetallic parts must be resistant to solvents and stress cracking and shall be compatible with metals and other materials such as conductor insulations and filling compounds used in the manufacture of cable. Plastic materials must be noncorrosive to metals and resist deterioration when exposed to industrial chemical pollutants, ultra-violet rays, road salts, cleaning agents, insecticides, fertilizers, or other detrimental elements normally encountered in the outdoor environment.

(xiii) Housing door seals and gaskets may be manufactured from rubber or synthetic rubber-like elastomer materials. Seals and gaskets shall exhibit a high degree of weatherability with an effective life of at least 30 years in the outdoor environment. The material shall be tear resistant and have a low compression set.

(6) *Housing finish requirements.* (i) All interior and exterior surfaces of housings shall be free from blisters, wrinkles, cracks, scratches, dents, heat marks, and other defects.

(ii) There shall be inherent design provisions to prevent objectionable deterioration of the housing such as rusting, exposure of fiber or delamination. Secondary protection, such as galvanizing over steel per ASTM A 526/A 526M-90 or anodizing over aluminum, shall be provided to ensure reliability over the projected 30 year design life of the housing.

(iii) Painted metal housings shall have a minimum gloss of 60 (60° specular) in accordance with ASTM D 523-89.

(iv) All painted surfaces shall have a uniform color and texture in accordance with ASTM D 3928-89. Nonmetallic housings shall meet recognized industry standards concerning optical appearance for gloss and haze as applicable for the material.

(v) The colors of housings that RUS will consider for acceptance shall be as follows:

Color	Standard
Gray-Green	Munsell 6.5 GY 6.03/1.6 Munsell 4.4 GY 6.74/1.5
Green	Munsell 8.8 G 2.65/5.3
Orange	Federal Standard 595A Color Number 12246

§ 1755.910

Color	Standard
Chocolate	Munsell 0.15YR 5.26/13.15 Munsell 5.27YR 2.40/2.60 Color Number 835

(7) *Installation requirements.* (i) The design of the housing must provide for a logical and normal installation sequence, i.e., excavation, installation of a foundation or base and anchoring devices, addition of hardware, installation and bonding of cables, splicing, addition of service, and final closing.

(ii) No special tools or equipment other than that usually carried by outside plant technicians and construction crews must be required for installation of the housing. Security devices are the exception to this requirement.

(iii) Installation hardware shall maintain housings in an erect and stable position when subjected to normal storm loads. Pad-mounted designs must accommodate precast or cast-in-place reinforced concrete or other suitable prefabricated material. Brackets, inserts for fastening, conduit openings, or other items necessary for a pad-mounted installation must be provided. The manufacturer shall provide detailed drawings or a template for locating inserts, conduit openings, or slots for cast-in-place pad construction.

(e) *Performance criteria and test procedures for housings—(1) General information.* (i) The housing manufacturer shall perform adequate inspections and tests to demonstrate that housings and housing components comply with RUS requirements.

(ii) Testing shall be performed at a room temperature of 24 ± 3 °C (75 ± 5 °C).

7 CFR Ch. XVII (1–1–97 Edition)

Temperatures for testing performed at other than room temperature shall be determined as near the center of the product under test as practical.

(2) *Description of test housing.* (i) Each distinctly designed and configured family of housings intended to perform a particular function shall be tested.

(ii) The typical test sample shall consist of the exterior housing components such as covers, backplates, good house-keeping panels, cap assembly, anchor posts, decals, etc. Interior components must include the bonding and grounding hardware for cables and service wires and the dielectric shield. The housing may include terminal blocks or cross-connect modules, cable splices, or the typical outside plant equipment the housing is designed to contain and protect.

(3) *Environmental requirement for housings—(i) Thermal shock.* The test housing shall be placed in a test chamber and exposed to the temperature cycle of Figure 2 for five complete cycles. The step function nature of the temperature changes may be achieved by insertion and removal of the test housing from the chamber. The soak time at each temperature shall be four hours. The housing shall be removed from the test chamber at the conclusion of the five-cycle period. After the test housing temperature has stabilized to room temperature, the housing must be inspected for deterioration of materials and satisfactory operation of mechanical functions. Figure 2 is as follows:

FIGURE 2
THERMAL SHOCK TEMPERATURE CYCLE

§ 1755.910

7 CFR Ch. XVII (1–1–97 Edition)

(ii) *Thermal shock and humidity.* The test housing shall be placed in an environmental test chamber at 95 ± 3 percent (%) relative humidity (RH) and temperature cycled per Figure 3 for a period of 30 days. At the end of the test there shall be no rust or corrosion of

any closure components. Minor corrosion due to surface scratches, nicks, etc. is permitted. If the closure is made of a nonmetallic material, there shall be no signs of degradation. Figure 3 is as follows:

FIGURE 3
ENVIRONMENTAL TEST CHAMBER
TEMPERATURE CYCLE

Note: Relative Humidity = 95% $\pm$ 3%

(iii) *Humidity and condensation.* Test panels shall be placed in an environmental chamber and subjected to 1,008 hours (42 cycles) of exposure per ASTM D 2247–92. One cycle consists of 24 hours of 100% humidity (with condensation on the panels) at a cabinet temperature of 38 ± 1 °C (100 ± 2 °F) and an ambient temperature of 25 ± 1 °C (77 ± 2 °F) without heat input. Upon completion of cycling, the test panels shall be subjected to an 11 newton-meter (N-m) (100 pound-inches (lb-in.)) impact test using the Gardner-Impact Tester or equivalent. Test panels shall show no substrate or coating cracking or loss of coating adhesion on either side.

(iv) *Weatherability.* Three test panels shall be tested for weatherability in accordance with the appropriate procedures of either ASTM D 822–89 or ASTM G 23–90. Total exposure time shall be a minimum of 800 hours. Failure is defined as fading, cracking, blistering, or delamination on any of the three test panels.

(v) *Low temperature durability.* Low temperature durability shall be proven by exposing the three test panels from (e)(3)(iv) of this section to at least 25 continuous cycles of the following test sequence:

(A) To insure complete saturation of the three test panels, soak them for 96 hours in a container of distilled water 22 ± 2 °C (71.6 ± 4 °F);

(B) Lower the temperature of the water and the immersed test panels to -28 ± 2 °C (-18.4 ± 4 °F) and stabilize for 24 hours;

(C) Thaw the water with the samples to 22 ± 2 °C (71.6 ± 4 °F) and stabilize for 24 hours;

(D) Repeat the procedure 24 times. Any cracking, crazing, deforming, or delaminating on any of the three test panels shall be considered a failure; and

(E) Remove the samples from the water and impact test the three panels by delivering a force of 11.3 N-m (100 lb-in.) using a Gardner-Impact Tester to each specimen at 71, 22, and -28 ± 2 °C (159.8, 71.6, and -18.4 ± 4 °F), after stabilizing them at those temperatures for at least two hours. Visual inspection shall reveal no deformation or perforations on any of the test panels.

(vi) *Corrosion resistance.* Corrosivity shall be tested in accordance with the requirements of ASTM B 117–90. Both scribed and unscribed panels shall be evaluated following the procedures of ASTM D 1654–92. Scribed panels shall have a rating of at least six, following 500 hours of exposure to salt fog, and the unscribed panels shall have a rating no lower than 10, after 1,000 hours exposure. Visual rust inspection shall confirm no more than 0.03% rusting (rust grade 9) of the surface area of the test sample when evaluated in accordance with ASTM D 610–85(1989). The unscribed samples shall be impacted with an 11.3 N-m (100 lb-in.) force, using a Gardner-Impact Tester or equivalent. Visual inspection of the impacted samples shall reveal no loss of adhesion between the base material and the coating or cracking at the finish on the test panels.

(vii) *Fungi resistance.* Fungi resistance of nonmetallic housing materials shall be tested according to the procedures of ASTM G 21–90. Any rating greater than one shall be considered a failure.

(viii) *Stress crack resistance.* The stress cracking characteristics of nonmetallic housing components shall be tested in accordance with ASTM D 1693–70 (Reapproved 1988). The tests shall be performed at $49\pm2\frac{1}{2}$ °C ($120\pm4\frac{1}{2}$ °F) for 14 days and exposed to the following materials:

(A) Industry recognized filling compounds;

(B) Isopar M;

(C) Industry recognized solvents;

(D) Industry recognized encapsulants; and

(E) Commonly used insect, pest, and weed control products and agricultural fertilizers.

(ix) *Chemical resistance.* (A) Chemical resistance shall be determined by immersing representative nonmetallic material samples in each of the following solutions for 72 hours at 22 ± 2 °C (71.6 ± 4 °F):

(1) 3% sulfuric acid;

(2) 100 parts per million (ppm) trichloroethane in water;

(3) 0.2 N sodium hydroxide; and

(4) Unleaded high octane gasoline.

(B) There shall be no swelling, deformation, or softening of the material

Rural Utilities Service, USDA

§ 1755.910

samples or any discoloration of the solution.

(x) *Ultraviolet resistance.* Test panels of metallic and nonmetallic outer housing materials shall be subjected to 700 hours exposure per ASTM D 2565-92 using the type BH apparatus. The panels shall not exhibit fading, blistering, checking, or delamination.

(xi) *Weathertightness.* The housing shall be mounted in its typical field installation position and sprayed with water. The temperature of the water shall be adjusted to be equal to or warmer than the temperature of the cabinet interior to avoid the possibility of condensation. A water spray head shall be used to direct water at the housing so that the water stream will strike the assembly at a downward angle of 45 degrees. The flow of the water shall be 3.8 liters per minute (one gallon per minute), with 276 kilopascals (40 pounds per square inch) head of pressure. The spray head shall be held 1.8 meters (m) (6 feet (ft)) from the test cabinet. The spray head shall be adjusted so that water impinges uniformly over the housing surface. The duration of the test shall be five minutes. All vertical cabinet surfaces shall be tested by this procedure. The exterior of the cabinet shall be thoroughly

dried with towels (no heat drying) prior to examination of the housing interior. The interior of the housing shall be checked for presence of water. Wetting of over-lapping surfaces is permitted. There shall be no presence of water inside the housing.

(xii) *Wind Resistance.* (A)(1) Stub pole or wall mounted SAI and large pair count splice housings shall be subjected to a load (F) as shown in Figure 4 and the following table to simulate the turning moment equivalent to a uniform wind load of 161 kilometers per hour (km/h) (100 miles per hour (mi/h)) perpendicular to the largest surface area.

Maximum area of largest surface square centimeters cm ² (Square inches) (in. ²)	Load	
	kg	(lb)
5,200 (800) or less	18	(40)
5,201 to 9,100 (801 to 1,400)	32	(70)
9,101 to 13,000 (1,401 to 2,000)	45	(100)
13,001 to 16,200 (2,001 to 2,500)	57	(125)

Note: The procedures for housings with larger surface area will be evaluated by RUS on a case-by-case basis.

(2) The housing shall remain in its original mounting position throughout the test and exhibit no mechanical deformation.

(3) Figure 4 is as follows:

FIGURE 4
TURNING MOMENT – POLE MOUNTED HOUSINGS

Rural Utilities Service, USDA

§ 1755.910

(B)(1) Pad or ground mounted SAI or splice housings shall be subjected to a load (F) as shown in Figure 5 and the following table to simulate the over- turning moment equivalent to a uniform wind load of 161 km/h (100 mi/h) perpendicular to the largest surface area.

Height cm (in.)	Maximum area of largest surface cm ² (in. ²)	Load	
		kg	(lb)
122 (48) or less	11,000 (1,700) or less	91	(200)
	11,001–13,000 (1,701–2,000)	104	(230)
	13,001–14,900 (2,001–2,300)	118	(260)
123–152 (49–60)	11,700 (1,800) or less	91	(200)
	11,701–14,300 (1,801–2,200)	109	(240)
	14,301–16,200 (2,201–2,500)	127	(280)
	16,201–18,800 (2,501–2,900)	145	(320)
	18,801–20,800 (2,901–3,200)	163	(360)
	20,801–23,400 (3,201–3,600)	181	(400)
153–183 (61–72)	14,300 (2,200) or less	109	(240)
	14,301–16,900 (2,201–2,600)	127	(280)
	16,901–19,500 (2,601–3,000)	150	(330)
	19,501–22,700 (3,001–3,500)	172	(380)
	22,701–25,300 (3,501–3,900)	190	(420)
	25,301–27,900 (3,901–4,300)	213	(470)

Note: The procedures for housings with larger surface areas will be evaluated by RUS on a case-by-case basis

(2) The housing shall remain in its original mounting position throughout the test and exhibit no mechanical deformation.

(3) Figure 5 is as follows:

FIGURE 5
OVERTURNING MOMENT, PAD MOUNTED HOUSINGS

Notes:

1. The load "F" shall be applied perpendicular to the cabinet width where the width is greater than the depth.
2. If a foundation is used, the load "F" shall be applied toward the edge nearest to the cabinet.

(xiii) *Fire resistance.* (A) The test housing shall be installed in a manner typical of field installation. U.S. No. 1 wheat straw shall be placed on the ground around the housing base in an one meter (3 ft) radius at an approximate depth of 10 cm (4 in.). The straw shall be ignited and permitted to burn fully. After the housing has cooled, its contents shall be inspected for evidence of ignition, melting, burning, or structural damage. Damage sufficient to impair service constitutes failure.

(B) Polymeric materials shall be tested in accordance with the Underwriters Laboratories Publication (UL) 94, dated June 18, 1991. Materials used in housing components shall have a rating of 94V-0 or 94V-1 and shall not sustain combustion when an open flame source is removed.

(4) *Mechanical requirements for housings—(i) Impact resistance.* The test housing shall be subjected to the following impacts according to its minimum volume or minimum width and depth as shown in the following table:

Minimum volume cm ³ (in. ³)	Minimum width or depth cm (in.)	Impact force	
		N-m	(lb-ft)
Less than 35,000 (2,100).	Less than 13 (5)	68	(50)
35,000 (2,100) or greater.	13 (5) or greater	136	(100)

(A) The impact force shall be delivered to the front, back, and top surfaces. Circular housings shall be impacted on side surfaces 180° apart and on the top. The device used to deliver the force shall be spherical and approximately 25 to 31 cm (10 to 12 in.) in diameter. A typical test procedure may include the use of a hard rubber bowling ball, weighing 6 to 7 kg (13 to 16 lb), enclosed in a mesh bag, attached to a rope with a metal ring. The load shall

be dropped vertically on the top surface and applied to the sides with a pendulum motion using the appropriate height and extension arm to achieve the required impact force. The housing must be impacted at the approximate mid-point of the surface area.

(B) Housings shall be conditioned for a minimum of eight hours at -40°C (-40°F) in an environmental chamber prior to testing. If the chamber is insufficient in size to conduct tests within the chamber, the housing may be removed and shall be tested within 10 minutes after removal.

(C) After impact testing, the housing shall not exhibit fractured or ruptured surfaces sufficient to allow the ingress of moisture or dust. The housing shall not exhibit mechanical damage that would impair the functioning of hinges, latches, locks, etc.

(ii) *Load deflection.* Free standing buried plant housings shall be tested for load deflection in accordance with Figure 6. The assembled housing shall be rigidly held in place by a mechanical means to simulate a normal field installation. A length of wire or cable, or other suitable material, shall be placed around the top section of the housing and deadended. The wire or cable shall be initially tensioned to 23 kg (50 lb). A measurement shall then be taken of the deflection of the housing at the top as shown in Figure 6. The deflection shall be recorded at incremental loads of 23 kg (50 lb) until destruction of the housing occurs. The average load for the three directions shall not be less than 136 kg (300 lb) and the minimum load in any direction shall be 113 kg (250 lb). Failure is defined as housing component fracture or crazing of the housing's surface finish. Figure 6 is as follows:

FIGURE 6
MEASURING LOAD DEFLECTION

Notes:

1. One pedestal-mounted housing of each BD classification shall be tested to failure in each of the directions shown above.
2. A total of three pedestal-mounted housings of each BD classification shall be subjected to the required loads in each direction.
3. The average load for the three directions shall not be less than 136 kilograms (300 pounds). The minimum load shall be 113 kilograms (250 pounds).
4. Pole mounted housings shall be subjected to the same loading criteria.

Rural Utilities Service, USDA

§ 1755.910

(iii) *Vibration requirements.* The test housing and its contents shall be subjected to acceleration at a sine wave frequency sweep rate as shown in Figure 7 for a housing packaged for shipment and Figure 8 for an unpackaged housing. The frequency sweep may be performed continually or sequentially.

The test shall be conducted once along each of three mutually perpendicular axes of the housing. There shall be no mechanical or electrical degradation of the housing or its contents. Noticeable damage to the housing constitutes failure. Figure 7 and Figure 8 are as follows:

FIGURE 7
VIBRATION TEST FOR PACKAGED HOUSINGS

FIGURE 8
VIBRATION TEST FOR UNPACKAGED HOUSINGS

§ 1755.910

(iv) *Drop test requirements.* Housings shall be subjected to appropriate drop tests according to their weight. The drop tests shall be performed on housings and their contents as normally packaged as well as on unpackaged housings. The tests shall be conducted on a smooth level concrete floor or similar unyielding surface. For corner drops, the packaged housing and its contents shall be oriented at impact such that a straight line drawn through the struck corner and package geometric center is approximately perpendicular to the impact surface.

(A) Packaged housings and their contents weighing 91 kg (200 lb) or less shall be capable of enduring a single drop on each face or corner without damage from a height specified as follows:

Packaged housing including contents weight kg (lb)	Drop height cm (in.)
0 to 9 (0 to 20)	76 (30)
10 to 23 (21 to 50)	61 (24)
24 to 45 (51 to 100)	53 (21)

7 CFR Ch. XVII (1–1–97 Edition)

Packaged housing including contents weight kg (lb)	Drop height cm (in.)
46 to 91 (101 to 200)	46 (18)

(B) Packaged housings and their contents weighing more than 91 kg (200 lb) shall be capable of enduring a single drop on each of two diagonally opposite corners of the package without significant damage from a height specified as follows:

Packaged housing including contents weight kg (lb)	Drop height cm (in.)
92 to 453 (201 to 1000)	30 (12)
Over to 453 (1000)	15 (6)

(1) The packaged housing and contents shall be placed on its normal shipping base with one corner supported 15 cm (6 in.) above the floor and the other corner of the same end supported 30 cm (12 in.) above the floor as shown in Figure 9. The unsupported end of the package shall be raised so that the lowest corner reaches the height listed above and then allowed to fall freely. Figure 9 is as follows:

FIGURE 9
CORNER DROP TESTS FOR PACKAGED HOUSINGS
WEIGHING MORE THAN 91 KILOGRAMS (200 POUNDS)

§ 1755.910

7 CFR Ch. XVII (1–1–97 Edition)

(2) The procedure of paragraph (e)(4)(iv)(B)(1) of this section shall be repeated for the diagonally opposite corner.

(3) The packaged housing and contents shall be capable of enduring a single drop on each edge of the base of its normal shipping position from the required height without damage and

shall remain operational without function impairment. The packaged housing and contents shall be placed on its base with one edge supported on a sill 15 cm (6 in.) high and the unsupported edge raised to the required height as shown in Figure 10 and allowed to fall freely. Figure 10 is as follows:

FIGURE 10
EDGE DROP TEST FOR PACKAGED HOUSINGS
WEIGHING MORE THAN 91 KILOGRAMS (200 POUNDS)

§ 1755.910

(4) The procedure of (e)(4)(iv)(B)(3) of this section shall be repeated for all edges of the base.

(C) Unpackaged housings and their contents weighing 23 kg (50 lb) or less shall be capable of enduring a single drop on each face and adjacent corners without significant damage from a height specified as follows:

Packaged housing including contents weight kg (lb)	Drop height cm (in.)
0 to 9 (0 to 20)	10 (4)
10 to 23 (21 to 50)	8 (3)

7 CFR Ch. XVII (1–1–97 Edition)

(D)(1) Unpackaged housings and their contents weighing more than 23 kg (50 lb) shall be capable of enduring a single drop without significant damage when lifted by its normal hoisting supports as shown in Figure 11 and with its lowest point at a height specified as follows:

Packaged housing including contents weight kg (lb)	Drop height cm (in.)
23 to 45 (51 to 100)	5 (2)

(2) Figure 11 is as follows:

FIGURE 11

DROP TEST FOR UNPACKAGED HOUSINGS
WEIGHING MORE THAN 23 KILOGRAMS (50 POUNDS)

Hoisting Drop Test

Edge and Corner Drop Test

§ 1755.910

(v) *Firearms resistance.* All housings shall be tested for resistance to penetration by direct impact from a 12 gauge shotgun equipped with a modified choke and the use of a 3¾ dram equivalent powder charge and 35 grams #6 lead shot fired from a distance of 15 m (50 ft). The 12 gauge shotgun shall be fired from a normal standing position at the front side of the housing. Penetration through the housing wall by the lead shot shall constitute failure.

(vi) *Lifting hardware requirements.* The lifting hardware on housings and their contents that weigh more than 91 kg (200 lb) shall be tested. The housing shall be fastened to a restraining device such as a concrete slab and subjected to loading through the lifting attachments to simulate the lifting load. For the first test a lifting line equipped with a dynamometer shall be attached to the housing lifting hardware and a load applied equal to three times the weight of a fully equipped housing. Deformation or damage to the housing or lifting hardware constitutes failure. A second test shall be conducted with the same arrangements as for the first except that a load shall be applied equal to six times the weight of a fully equipped housing. There shall be no catastrophic failure of the lifting hardware or housing.

(vii) *Stub cable strain relief tests.* Housings equipped with cable stubs and cable shipping retainer shall be tested by lifting a test housing, with the maximum length and weight of cable orderable, in a manner causing the full weight of the cable to be supported by the cabinet. Examination of the cable sheath after lifting shall reveal no tearing, rupturing, or other damage. The cable conductors and shield shall be tested for shorts and opens. Electrical defects to the stub cable or damage to the housing constitutes failure.

(viii) *Door restrainer evaluation.* (A) The housing shall be positioned with the door held in the open position by the door restraining device. A load, determined in accordance with the following table, shall be applied to the center of the door, perpendicular to the door and in each of the opening and closing directions.

7 CFR Ch. XVII (1–1–97 Edition)

Maximum area of door surface cm ² (in. ²)	Load kg (lb)
5,200 (800) or less	72 (160)
5,201 to 9,100 (801 to 1,400)	127 (280)
9,101 to 13,000 (1,401 to 2,000)	181 (400)

Note: Test procedures for housings with larger doors will be evaluated by RUS on a case-by-case basis.

(B) There shall be no functional failure of the restraining device nor mechanical damage to the housing.

(ix) *Security evaluation.* The security locking device shall be capable of withstanding a maximum torque of 2.8 N-m (25 lb-in.) without incurring physical damage to the closure, thereby resulting in a condition where the closure cannot be either accessed or locked.

(5) *Electrical requirements for housings.* Each bonding stud and nut location shall be evaluated by attaching one lead from a dc or alternating current (ac) power source to a bonding stud with the nut torqued as specified by its manufacturer and the other power source lead connected to the closure grounding conductor connector. The current path thus established must be capable of sustaining a current of 1,000 amperes root-mean-square for at least 20 seconds without fusing or causing any damage to the closure or its contents.

(6) *Finish requirements—(i) Impact resistance.* The finish on painted metal surfaces shall not exhibit radial cracking on the impact surface (intrusion) when indented at 18 N-m (160 lb-in.) with a 1.6 cm (0.6 in.) diameter spherical indenter. This test shall be performed in accordance with ASTM D 2794–92 with the exception that the test panel shall be of the same material, thickness, and finish as the pedestal housing being evaluated.

(ii) *Finish adhesion.* Painted finishes shall be tested for adhesion of finish in accordance with ASTM D 2197–86 (Reapproved 1991), Method A. There shall be no gouging in the top coat when tested with an 8 kg (17.7 lb) load. Gouging is defined as removal or separation of paint particles or breaking of the finish by the scraping loop to the extent of exposing base metal.

(iii) *Color evaluation.* The color of the housing finish should be compared against the Munsell system of color notation, as described in ASTM D 1535–89

to determine color consistency with that desired.

(iv) *Gloss evaluation.* The finish on painted housings shall be tested on two approximately 20 cm × 20 cm (8 in. × 8 in.) samples for each color used in accordance with the procedures of ASTM D 523-89. The finish shall have a minimum gloss of 60 (60° Specular).

(v) *Secondary finish evaluation.* Evidence of secondary protection shall be required for RUS acceptance. Typical secondary protection is galvanizing per ASTM A 526/A 526M-90 for steel surfaces.

(f) *Functional design criteria for binding post terminal blocks used in SAI cabinets—*(1) *General description.* A conventional binding post terminal consists of a metallic element or post, one end of which is configured for the permanent connection of 22, 24, or 26 AWG solid copper conductors and the opposite end is configured for recurring connections and disconnections of solid copper cross-connect wire using a threaded screw or stud and nut combination for gripping the wire. The terminal is usually housed in a SAI cabinet. However, the terminal may receive limited use in smaller pedestal-type housings and pole mounted cabinets in the outside plant environment.

(2) *Design and fabrication requirements.*

(i) Terminal blocks used in outside plant housings are expected to perform satisfactorily for a nominal design life of 30 years.

(ii) All individual terminals or terminal fields must be enclosed and the terminal enclosure must be totally filled with an encapsulating grease or gel which prevents connection degradation caused by moisture and corrosion. The encapsulant must provide complete encapsulation of terminal metallic connections and surfaces and totally fill all voids and cavities within individual terminal enclosures or terminal field enclosures to prevent ingress of moisture. The encapsulant must not restrict access to the terminal or restrict craft personnel from making connections. The encapsulant must be compatible with the standard materials used in cross-connect hardware and wiring.

(iii) Binding post terminals shall not be susceptible to damage under normal

use of standard tools used by outside plant technicians such as screwdrivers and test set clips. In addition, use of other tools such as scissors, diagonal cutters and long nose pliers for tightening and loosening screws shall not result in damage to the terminal.

(iv) Terminals shall be designed so that a typical technician using customary tools shall be able to terminate cross-connect wire on a pair of terminals, or to remove it, without causing an electrical short between any two terminals or any other adjacent terminals.

(v) The terminal count sequence shall be indicated using numerals of at least 0.25 cm (0.10 in.) in height.

(vi) A means shall be provided to distinguish feeder terminals from distribution terminals.

(vii) A means shall be provided to identify tip terminals and ring terminals in a terminal field. The identification convention shall indicate tip on the left with ring on the right for horizontal spacing and tip on the top with ring on the bottom for vertical spacing.

(viii) The preferred height of the highest terminal in the connector field in a ground mounted SAI unit shall be 168 cm (66 in.) or less as measured from the top surface of the mounting pad. The bottom or lowest terminals in the connector field shall be at least 46 cm (18 in.) from the top surface of the pad.

(ix) Pole mounted aerial units shall be 84 cm (33 in.) or less in width. The maximum allowable height of the highest terminals in a pole mounted aerial unit is 168 cm (66 in.) as measured from the top surface of the standard balcony seat used with the interface. For computation purposes, 15 cm (6 in.) shall be allowed for the distance between the bottom of the interface and the top of the balcony seat.

(3) *Auxiliary features.* (i) SAI cabinets with terminal designs which do not permit direct attachment of common test instrument clips to terminal pairs without the occurrence of shorts shall be equipped with single pair auxiliary test contacts. The auxiliary test contacts shall attach to a terminal pair and provide a set of secondary terminals which will accept typical test instrument clips without the occurrence of shorts. Wire used to connect the

§ 1755.910

7 CFR Ch. XVII (1–1–97 Edition)

auxiliary test contacts to the secondary terminals shall be 20 gauge minimum stranded conductor copper wire with a minimum dielectric strength between conductors of 15 kv. The test connector shall be functional on all terminal pairs.

(ii) A 25 or 50 pair test connector shall be available which can be used to make reliable electrical contact to terminals associated with discrete 25 pair binder groups. The multi-pair test connector shall be provided with a minimum of 1.8 m (6 ft) of suitable cabling terminated to a connector, for interfacing with test sets common to the industry. The multi-pair test connector shall be functional on all terminal groups.

(iii) A special service marker shall be available which must attach to a binding post terminal to identify special circuits and insulate exposed metal parts from accidental shorts from tools and wires. A supply of 25 special service markers shall be provided with each SAI cabinet. The color of special service markers shall be red.

(iv)(A) A supply of twisted pair cross-connect wire shall be supplied with housings that are equipped with cross-connect terminals or that have provisions for mounting cross-connect terminals. The minimum length of cross-connect wire supplied is dependent on the SAI cabinet terminal capacity as follows:

Cabinet termination capacity (pairs)	Wire length
1 to 600	60 m (200 ft)
601 to 1200	120 m (400 ft)
Over 1200	180 m (600 ft)

(B) The cabinet shall be equipped to store the length of wire in a manner designed for convenient dispensing. The cross-connect wire supply shall be easily replaceable.

(g) *Performance criteria and test procedures for binding post terminal blocks used in SAI cabinets*—(1) *General*. Many of the tests described in this section require that the terminal block be installed in an appropriate housing in its typical field configuration.

(2) *Environmental requirements*—(i) *Insulation resistance/high humidity and salt fog exposure*. A test specimen shall consist of a standard ground or pole mounted housing equipped with a full complement of binding post terminals equipped with 25 special service markers. The minimum number of terminals to be tested shall be 100 pair (100 tips and 100 associated rings). The test terminals shall be selected to form a terminal array of approximate square dimensions. A 1 cm (36 in.) length of cross-connect wire shall be installed on each test terminal. All tips shall be joined together and all rings shall be joined together with a 48 volt dc potential applied as shown in Figure 12 during the high humidity/salt fog and simulated rain exposures. The 48 volt dc may be temporarily removed from the test samples during the measurement process and the ring terminal being measured shall be isolated from the remaining ring terminals. The terminal insulation resistance shall be measured at a potential of 100 volts dc using suitable instrumentation with a minimum measurement range of 10^4 to 10^{12} ohms. Figure 12 is as follows:

FIGURE 12
BINDING POST ARRANGEMENT FOR
INSULATION RESISTANCE TESTING

Note: 5 pair specimen arrangement shown is typical for entire (100 pair specimen minimum) test population.

(A) *High humidity.* The test housing shall be placed in an environmental test chamber at $95\pm 3\%$ RH and the temperature cycled as shown in Figure 3 in paragraph (e)(3)(ii) of this section for a period of 30 days. The cabinet doors shall remain in the fully open position. The insulation resistance between the ring terminal of each sample and all the common tip terminals shall be measured each 24 hours when the temperature is between 38 and 57 °C (100 and 135 °F) and increasing. The minimum insulation resistance when measured in accordance with paragraph (g)(2)(i) of this section shall not be less than 1×10^6 ohms.

(B) *Salt fog.* A test housing with its doors closed shall be placed in a salt fog 35 °C (95 °F) test chamber and exposed to a salt fog spray per ASTM B 117–90 for a period of 30 days. The insulation resistance should be measured every 24 hours as indicated in paragraph (g)(2)(i) of the section and shall not be less than 1×10^6 ohms. The special service markers shall exhibit no sign of fading, corrosion, swelling, warping, running color, or other signs of deterioration.

(ii) *Insulation resistance/simulated rain exposure.* (A) A test housing as described in paragraph (g)(2)(i) of this section shall be tested for water infiltration. The test shall be conducted using the method described in paragraph (e)(3)(xi) of this section. The cabinet doors shall remain closed for the duration of the test. The insulation resistance between the ring terminals and the common tip terminals shall be measured during and immediately following the spray application as indicated in paragraph (g)(2)(i) of this section and shall not be less than 1×10^6 ohms.

(B) With the cabinet doors open, a spray of tap water at a rate of 3.8 liters per minute (1 gallon per minute) at 276 kilo-pascals (40 pounds per square inch) shall be directed on the terminal array for a period of 1 minute saturating all of the terminals. Following the spray application the doors shall be closed. The cabinet shall be maintained in a temperature environment of 26 to 28 °C (78 to 82 °F) at $95\pm 3\%$ RH for 6 hours. The insulation resistance shall then be measured as specified in paragraph

(g)(2)(i) of this section. The minimum insulation resistance shall not be less than 1×10^6 ohms.

(iii) *Contact resistance.* A minimum of 100 terminals equipped with cross-connect wire that has been installed in a manner typical of that used in the industry shall be temperature cycled.

(A) The test shall consist of eight-hour temperature cycles with one-hour dwells at extreme temperatures of -40 °C to $+60$ °C (-40 °F to $+140$ °F), and temperature changes at an average rate of 16 °C (60 °F) per hour between the extremes. The relative humidity shall be maintained at $95\pm 3\%$. The eight-hour test shall be conducted for 512 cycles. Millivolt drop measurements shall be made initially and after 2, 8, 16, 32, 64, 256, and 512 cycles with the samples at room temperature. The resistance measurement technique must conform to ASTM B 539–90. The measurement method must have an accuracy of at least ± 30 microohms for resistances less than 50 milliohms. The change in contact resistance shall not exceed 2 milliohms.

(B) A minimum of 100 terminals equipped with cross-connect wire installed in a manner typical of the industry shall be maintained at 118 °C (245 °F) during the test period, except during disturbance measurement periods where each wire connection to the terminals shall have a 0.23 kg (0.5 lb) force momentarily applied in a manner to stress the connection. Initial millivolt measurements shall be made without disturbing the joints in accordance with paragraph (g)(2)(iii)(A) of this section with the samples at room temperature. After initial measurement each sample shall be disturbed followed by a millivolt drop measurement after 1, 2, 4, 8, 16, and 33 days. The change in contact resistance should be less than 2 milliohms when compared to the initial measurement.

(iv) *Fire resistance.* A fully equipped cabinet including a full complement of cross-connect jumpers shall be installed in the standard field arrangement and tested for fire resistance in accordance with paragraphs (e)(3)(xiii) introductory text through (e)(3)(xiii)(B) of this section. After cooling, the cabinet, terminals, and associated wiring shall be inspected for

signs of ignition, melting, burning, or structural damage of sufficient consequences such that the results are service affecting.

(v) *Encapsulant material compatibility.* The terminal connection encapsulant compound must be compatible with the standard materials used in cross-connect hardware and wiring when aged in accordance with ASTM D 4568-86 at a temperature of 80 ± 1 °C (176 ± 2 °F). The conductor insulation shall retain a minimum of 85% of its unaged tensile strength and elongation values. The cross-connect hardware shall exhibit no visible material degradation.

(vi) *Encapsulant flow test.* Terminal connection encapsulant must remain stable at 80 ± 1 °C (176 ± 2 °F) when tested in an environmental chamber. Test specimens shall be suspended in a preheated oven over a glass dish or other drip-catching medium for a period of 24 hours. At the end of the test period, the glass dish shall be examined for evidence of flowing or dripping of encapsulant from the cross-connect terminal. More than 0.5 gram of encapsulant in the dish at the end of the test constitutes failure.

(3) *Mechanical requirements*—(i) *Vibration.* A test housing equipped with a full complement of cross-connect terminals and jumper wiring shall be subjected to vibration testing in accordance with paragraph (e)(4)(iii) of this section.

(ii) *Torsional capacity of binding posts.* The test specimens shall consist of the complete binding post terminal consisting of the screw or nut, washers if required, and threaded post or stud respectively.

(A) Test specimens shall include the terminals along the matrix edge at

mid-span locations as well as centrally located terminals. Tests shall be conducted using a torque indicating screwdriver, or wrench, with an accuracy of ± 0.17 N-m (± 1.5 lb-in.) or better. The torque indicating device shall be used to tighten a screw or nut until failure of the screw or nut is achieved. Tests shall be conducted while the test specimen is stabilized at temperatures of -40 °C, 20 °C, and 71 °C (-40 °F, $+68$ °F, and at $+160$ °F). Record the torques at terminal failure. At least 10 test specimens shall be tested at each temperature. The failure torque shall not be less than 2.8 N-m (25.0 lb-in.) for each temperature.

(B) The post or stud of the binding post terminal shall not fail before the screw or nut when increasing torque. The faceplate or receptacle restraining the post or stud shall not fail before the screw or nut when increasing torque.

(iii) *Lateral loading capacity of binding posts.* A minimum of three sets of 25 terminals shall be tested with the test specimens stabilized at temperatures of -40 °C, 20 °C and 71 °C (-40 °F, $+68$ °F, and 100 °F). The test arrangement shall include the terminals along the matrix edge at mid-span locations as well as centrally located terminals. A force measuring device, such as a dynamometer, shall be attached to the end of a binding post terminal and a 16 kg (35 lb) force applied orthogonally to the terminal axis in 4 perpendicular directions as shown in Figure 13. Permanent deformation in excess of 0.08 cm (0.03 in.) or any structural damage in either the terminal or faceplate constitutes a failure. Figure 13 is as follows:

FIGURE 13
LATERAL LOADING OF BINDING POST TERMINALS

Note: Apply load P in N, E, S, and W directions

Rural Utilities Service, USDA

§ 1755.910

(iv) *Axial pullout resistance.* A minimum of three sets of 25 terminals shall be tested with the test specimens stabilized at temperatures of -40°C , 20°C , and 71°C (-40°F , $+68^{\circ}\text{F}$, and 100°F).

The test arrangement shall include the terminals along the matrix edge at mid-span locations as well as centrally

located terminals. A force measuring device, such as a dynamometer, shall be attached to a terminal and a force of 16 kg (35 lb) applied on axis as shown in Figure 14. There shall be no permanent deformation in excess of 0.08 cm (0.03 in.), any structural damage, or terminal pull-out in either the terminal or the faceplate. Figure 14 is as follows:

FIGURE 14
AXIAL PULLOUT OF BINDING POST TERMINALS

(v) *Test connector reliability.* (A) A single pair connector shall be capable of making a minimum of 100 successive connections to binding post terminals without the occurrence of an open circuit. The test shall include terminals along the matrix edge, center, top, and bottom.

(B) A multi-pair test connector shall be attached to the binding post terminal field and tests for opens between the binding post terminals and the test connector shall be conducted. All circuits must prove good. The test shall be repeated along the terminal matrix edges, center, top, and bottom.

(vi) *Service cycle reliability.* A torque indicating device or wrench with an accuracy of ± 0.17 N-m (± 1.5 lb-in.) or better shall be used to tighten the terminal screw or nut as appropriate to 1.7 N-m (15.0 lb-in.). The terminal nut or screw is then loosened and retightened to 1.7 N-m (15 lb-in.). After 50 repeated connections and disconnections, the terminal shall be placed in an environmental chamber at 95% RH where the temperature shall be cycled as indicated in Figure 3 in paragraph (e)(3)(ii) of this section for a duration of 72 hours. The terminal shall then be momentarily removed from the chamber and the test procedure repeated. After a total of 250 loosening and retightening cycles have accumulated, the terminal must be capable of withstanding a torque of 1.7 N-m (15 lb-in.).

(4) *Dielectric strength.* All housing components in the vicinity of unsheathed field cable conductors, unsheathed housing stub cable or harness conductors, terminals, or cross-connect wire paths shall have a minimum dielectric strength of 500 volts ac to the cabinet grounding and bonding bracket. Dielectric strength is tested by connecting one lead from a 500-volt ac at 0.5 ampere source to the cabinet ground connector and the other lead is passed along the surfaces of all cabinet components in the vicinity of unsheathed cable or harness conductors, cross-connect wire paths, and in the splice area where unsheathed field cable conductors may be located. Sparkover constitutes failure.

(5) *Operational requirements—(i) Durability.* In order to verify the durability requirements while minimizing the

number of test housings required to complete the test program, the binding posts selected for tests shall be separately identified and then checked to establish compliance after the various tests have been conducted.

(ii) Twenty-five jumper connections shall be made on each of two binding post connectors chosen at random from a representative sample in an assembled interface unit. After exposure to this test, these and adjacent connectors shall be inspected for damage such as cracks or chips in metal or plastic parts. Failure consists of structural damage, open circuits through the connector, or inability to pass the torsional, lateral loading, or axial pullout tests described in paragraphs (g)(3)(ii) through (g)(3)(iv) of this section.

(iii) Select six binding posts at random in a representative interface. On each connector, attach any test cord included with the unit and then remove the test cord as follows. On binding post sample 1, remove the cord normally ten times. On binding post sample 2, remove the cord ten times by jerking the test leads straight out. In these and the remaining tests, do this without releasing any manual attachment mechanisms. On sample 3, remove ten times by jerking downward at 45° from horizontal; sample 4, upward at 45° ten times; sample 5, left 45° ten times; sample 6, right 45° ten times. Check for opens and damage in the test cord, clips, and connectors. Failure consists of structural damage, open circuits through the connector, or inability of the terminal blocks to pass the torsional, lateral loading, axial pullout, test connector reliability, or dielectric strength tests described in paragraphs (g)(3)(ii) through (g)(3)(v)(B), and paragraph (g)(4) of this section.

(iv) Use craft tools such as scissors, diagonal cutters, and long nose pliers to loosen and tighten screws where the binding post design does not prohibit the possibility. Failure consists of severe structural damage.

(h) *Functional design criteria for insulation displacement type cross-connect modules used in SAI cabinets—(1) General*

description. Cross-connect modules normally consist of multiple metallic contact elements that are retained by non-metallic fixtures. The contact elements are spliced with permanent wire leads compatible for splicing to 22, 24, or 26 gauge cable on one side and configured for the acceptance of recurring connections and disconnections of plastic insulated cross-connect wire on the other side. Cross-connect modules are usually housed in a SAI cabinet. However, modules may receive limited usage in smaller pedestal-type housings and cabinets in the outside plant environment.

(2) *Design and fabrication requirements.*

(i) All individual terminals or terminal fields must be enclosed and the terminal enclosures must be totally filled with an encapsulating grease or gel which prevents connection degradation caused by moisture and corrosion. The encapsulant must provide complete encapsulation of terminal metallic connections and surfaces and totally fill all voids and cavities within individual terminal enclosures or terminal field enclosures to prevent ingress of moisture. The encapsulant must not restrict access to the terminal or restrict craft personnel from making connections. The encapsulant must be compatible with the standard materials used in cross-connect hardware and wiring.

(ii) The cross-connect module manufacturer shall make available any non-standard tools and test apparatus which are required for splicing, placing of jumpers, and the performance of maintenance operations.

(iii) The module shall be designed so that a typical outside plant technician using tools shall be able to terminate cross-connect wire on terminals, or to remove them without causing electrical shorts between any other terminals.

(iv) The pair count sequence terminated on a module shall be easily visible and shall have numerals of at least 0.25 cm (0.10 in.) in height.

(v) Feeder terminations shall be easily distinguished from distribution terminations.

(vi) Tip and ring terminations shall be easily visible and shall be identifi-

able as described in paragraph (f)(2)(vi) of this section.

(vii) The preferred locations for cross-connect modules to be mounted inside a housing is the same as those for terminals and are described in paragraphs (f)(2)(vii) and (f)(2)(viii) of this section.

(3) *Auxiliary features.* (i) Housings equipped with cross-connect modules shall be equipped with auxiliary test contacts as described in paragraphs (f)(3)(i) and (f)(3)(ii) of this section.

(ii) Special service markers shall be available for cross-connect modules as described in paragraph (f)(3)(iii) of this section.

(iii) Housings equipped with, or designed for, cross-connect modules shall contain a supply of cross-connect wire as described in paragraph (f)(3)(iv) of this section.

(i) *Performance criteria and test procedures for insulation displacement type cross-connect modules—(1) General.* Many of the tests described in this section require that the cross-connect module be installed in an appropriate housing in its typical field configuration for testing. Resistance measurements should be made with an electrical device which measures changes in resistance for each test parameter measured. The tests specified provide an indication of the stability of the electrical connections under the test conditions encountered.

(2) *Environmental requirements.* (i) A fully equipped arrangement of cross-connect modules having approximately 25 special service markers shall successfully complete environmental testing in accordance with paragraphs (e)(3) introductory text through (e)(3)(xiii)(B) of this section.

(ii) *Insulation resistance/high humidity and salt fog exposure.* Insulation resistance measurements shall not be less than 1×10^6 ohms when cross-connect modules are tested by a procedure similar to that described in paragraphs (g)(2)(i) introductory text through (g)(2)(i)(B) of this section.

(iii) *Insulation resistance/simulated rain exposure.* Insulation resistance measurements shall not be less than 1×10^6 ohms when cross-connect modules are tested by a procedure similar to that described in and paragraphs

(g)(2)(ii) introductory text through (g)(2)(ii)(B) of this section.

(iv) *Contact resistance.* The change in contact resistance should not exceed 2 milliohms when cross-connect modules are tested by a procedure similar to that described in paragraphs (g)(2)(iii) introductory text through (g)(2)(iii)(B) of this section.

(v) *Fire resistance.* A housing fully equipped with cross-connect modules and jumper wiring shall be tested for fire resistance by a procedure similar to that described in paragraph (g)(2)(iv) of this section.

(vi) *Encapsulant material compatibility.* Cross-connect wire insulation and cross-connect hardware shall exhibit no visible material degradation when tested by the procedure described in paragraph (g)(2)(v) of this section.

(vii) *Encapsulant flow test.* The cross-connect contact encapsulant shall drip no more than 0.5 gram when tested by the procedure described in paragraph (g)(2)(vi) of this section.

(3) *Mechanical requirements*—(i) *Vibration.* A housing fully equipped with cross-connect modules shall be vibration tested in accordance with paragraph (g)(3)(i) of this section.

(ii) *Test connector reliability.* The test connectors supplied with housings intended for cross-connect modules shall successfully complete 100 successive connections as described in paragraphs (g)(3)(v) introductory text through (g)(3)(v)(B) of this section.

(iii) *Service cycle reliability.* A combination of multiple insertions of jumper wires, vibration, and temperature cycling shall be performed on cross-connect modules. The multiple insertions on approximately 100 connections shall be accomplished by 300 operations consisting of insertion, removal and reinsertion of new jumper wire. Contact resistance shall be measured and the final insertion of jumper wire shall not be removed from the connectors but must be subjected to vibration testing in accordance with paragraph (g)(3)(i) of this section and temperature cycled as indicated in Figure 3 in paragraph (e)(3)(ii) of this section for a duration of 72 hours. After vibration and temperature cycling, the average change in contact resistance shall be no greater than 2 milliohms.

(iv) *Jumper wire pull-out resistance.* Test modules that have received no prior conditioning shall be equipped with 100 38 cm (15 in.) jumper connections of the gauges recommended for use with the module using the insertion tool recommended by the cross-connect module manufacturer. With the test samples suitably supported, wires from each sample shall be pulled, one at a time, by a tensile machine at a cross-head speed of 6 centimeters per minute (cm/min) (2.4 inches per minute (in./min)). Wires shall be pulled both perpendicular and parallel to the plane of the cross-connect field and shall withstand a load of at least 1.1 kg (2.5 lb) before pulling out.

(v) *Cable conductor pull-out resistance.* Test modules that have received no prior conditioning shall be equipped with 100 26, 24, and 22 AWG 38 cm (15 in.) cable conductors using the insertion tool recommended by the cross-connect module manufacturer. With the test samples suitably supported, conductors from each sample shall be pulled, one at a time, by a tensile machine at a cross-head speed of 6 cm/min (2.4 in./min). Wires shall be pulled both perpendicular and parallel to the plane of the face of the splice module and shall withstand a load of at least 1.1 kg (2.5 lb) before pulling out.

(4) *Electrical requirements*—(i) *Dielectric strength.* A housing fully equipped with cross-connect modules shall be tested for dielectric strength in accordance with (g)(4) of this section.

(ii) The dielectric strength of a contact within the cross-connect module to contacts on either side shall be tested. The module shall be tested in a dry environment with an ac power source capable of supplying 8 kv at a rate of increase of 500 volts per second, a circuit breaker to open at breakdown, and a voltmeter to record the breakdown potential. Cross-connect modules shall be prepared in accordance with industry accepted splicing techniques with leads trimmed to approximately 38 cm (15 in.). The dielectric strength of each contact to the contacts on either side shall have an average dielectric strength of approximately 5.0 kv.

(5) *Operational requirements*—(i) *Durability.* In order to verify the durability requirements while minimizing the

number of test housings required to complete the test program, the contacts selected for tests shall be separately identified and then checked to establish compliance after the various tests have been conducted.

(ii) Twenty-five jumper connections shall be made on each of two contacts chosen at random from a representative sample in an assembled interface unit. After this test, these and surrounding contacts shall be inspected for damage such as cracks or chips in metal or plastic parts. Failure consists of structural damage, open circuits through the connector, or inability to pass the jumper wire pullout tests described in paragraph (i)(3)(iv) of this section.

(iii) Select six contacts at random in a representative interface. On each of these contacts attach any test cord included with the unit as specified under normal use of that cord and then remove the test cord as follows. On sample 1, remove the cord normally ten times. On sample 2, remove the clip ten times by jerking the test leads straight out. In these and the remaining tests, do this without releasing any manual attachment mechanisms. On sample 3, remove ten times by jerking downward at 45° from horizontal; sample 4, upward 45° ten times; sample 5, left 45° ten times; sample 6, right 45° ten times. Check for opens and damage in the test cord, clips, and cross-connect modules. Failure consists of structural damage, open circuits through the connector, or inability of module to pass the test connector reliability, jumper wire pullout, and dielectric strength tests described in paragraphs (i)(3)(ii), (i)(3)(iv), and (i)(4)(ii) of this section.

(j) *Packaging and identification requirements*—(1) *Product identification*. (i) Each housing, terminal block, or cross-connect module shall be permanently marked with the manufacturer's name or trade mark.

(ii) The date of manufacture, model number, serial number and RUS assigned designations shall be placed on a decal inside housings. The product identification nomenclature must correspond with the nomenclature used in the manufacturer's quality assurance program.

(2) *Packaging requirements*. (i) Buried plant housings shall be packaged securely in an environmentally safe container to prevent either deterioration or physical damage to the unit during shipment, handling and storage.

(ii) The product with all the necessary parts shall be shipped in one container unless significant advantages to the user can be obtained otherwise. Packaging of parts in the carton shall be such that the parts become available in the order in which they are needed. The package should be clearly marked as to which end to open. Packages shall be clearly labeled, and correspond to the names given in the instructions.

(iii) Products packed in shipping containers shall be cushioned, blocked, braced, and anchored to prevent movement and damage.

(iv) All products shall be secured to pallets with non-metallic strapping. The strapping and the manner employed shall be of sufficient quantity, width, and thickness to preclude failure during transit and handling.

(v) The use of shrink or stretch film to secure the load to the pallet is permitted. However, such film must be applied over the required strapping.

(vi) Containers that are too large or heavy to be palletized, such as crates, shall be shipped in their own containers. When practical, these containers shall be provided with skids to facilitate fork-lift handling.

(vii) When packaged, the outer cartons shall meet the requirements of the Uniform Freight Classification and the National Motor Freight Classification.

(3) *Container marking requirements*. (i) The package shall be readily identifiable as to the manufacturer, model number, date of manufacture, and serial number.

(ii) The RUS assigned housing designation shall be stamped or marked on the outside of the package container with letter and number sizes large enough for easy identification.

(iii) Each package shall be marked with its approximate gross weight.

(iv) All containers carrying delicate or fragile items shall be marked to clearly identify this condition.

Rural Utilities Service, USDA

§ 1767.10

(v) All marking shall be clear, legible, and as large as space permits.

(The information and recordkeeping requirements of this section have been approved by the Office of Management and Budget under control number 0572-0059)

Subpart A—General [Reserved]

§§ 1767.1—1767.9 [Reserved]

Subpart B—Uniform System of Accounts

§ 1767.10 Definitions.

As used in this part:

Accounting borrower is an RUS borrower.

Accounts are the accounts prescribed in this system of accounts.

Actually issued as applied to securities issued or assumed by the utility, are those which have been sold to bona fide purchasers for a valuable consideration, those issued as dividends on stock, and those which have been issued in accordance with contractual requirements direct to trustees of sinking funds.

Actually outstanding as applied to securities issued or assumed by the utility, are those which have been actually issued and are neither retired nor held by or for the utility; provided, however, that securities held by trustees shall be considered as actually outstanding.

Amortization is the gradual extinguishment of an amount in an account by distributing such amount over a fixed period, over the life of the asset or liability to which it applies, or over the period during which it is anticipated the benefit will be realized.

Associated (affiliated) companies are companies or persons that directly, or indirectly through one or more intermediaries, control, or are controlled by, or under common control with, the accounting company.

Book Cost means the amount at which property is recorded in these accounts without deduction of related provisions for accrued depreciation, amortization, or for other purposes.

Capital lease is a lease of property used in utility or nonutility operations, which meets one or more of the criteria stated in § 1767.15 (s).

§ 1767.10

7 CFR Ch. XVII (1–1–97 Edition)

CFC is the National Rural Utilities Cooperative Finance Corporation.

Continuing Property Records are company plant records for retirement units and mass property that provide, as either a single record, or in separate records readily obtainable by references made in a single record, the following information:

(1) For each retirement unit:

(i) The name or description of the unit, or both;

(ii) The location of the unit;

(iii) The date the unit was placed in service;

(iv) The cost of the unit as set forth in § 1767.16 (b) and (c); and

(v) The plant control account to which the cost of the unit is charged.

(2) For each category of mass property:

(i) A general description of the property and quantity;

(ii) The quantity placed in service by vintage year;

(iii) The average cost as set forth in § 1767.16 (b) and (c); and

(iv) The plant control account to which the costs are charged.

Control (including the terms *controlling*, *controlled by*, and *under common control with*) is the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a company, whether such power is exercised through one or more intermediary companies, or alone, or in conjunction with, or pursuant to an agreement, and whether such power is established through a majority or minority ownership or through voting of securities; common directors, officers, or stockholders; voting trusts; holding trusts; associated companies; contracts; or any other direct or indirect means.

Cost is the amount of money actually paid for property or services. When the consideration given is other than cash in a purchase and sale transaction, as distinguished from a transaction involving the issuance of common stock in a merger or a pooling of interest, the value of such consideration shall be determined on a cash basis.

Cost of removal is the cost of demolishing, dismantling, tearing down or otherwise removing electric plant, in-

cluding the cost of transportation and handling incidental thereto.

Customer is a consumer or patron.

Debt expense includes all expenses incurred in connection with the issuance and initial sale of evidence of debt, such as fees for drafting mortgages and trust deeds; fees and taxes for issuing or recording evidences of debt; costs of engraving and printing bonds and certificates of indebtedness; fees paid to trustees; specific costs of obtaining governmental authority; fees for legal services; fees and commissions paid underwriters, brokers, and salesmen for marketing such evidences of debt; fees and expenses of listing on exchanges; and other like costs.

Depreciation, as applied to depreciable electric plant, is the loss in service value, not restored by current maintenance, incurred in connection with the consumption or prospective retirement of electric plant in the course of service from causes which are known to be in current operation and against which the utility is not protected by insurance. Among the causes to be given consideration are wear and tear, decay, action of the elements, inadequacy, obsolescence, changes in the art, changes in demand and requirements of public authorities.

Discount, as applied to the securities issued or assumed by the utility, is the excess of the par (stated value of no-par stocks) or face value of the securities plus interest or dividends accrued at the date of the sale over the cash value of the consideration received from their sale.

FASB is the Financial Accounting Standards Board.

G&T is a generation and transmission cooperative.

Investment advances are advances, represented by notes or by book accounts only, with respect to which it is mutually agreed or intended between the creditor and debtor that they shall be settled by the issuance of securities or shall not be subject to current settlement.

Minor items of property are the associated parts or items of which retirement units are composed.

Net salvage value is the salvage value of property retired less the cost of removal.

Nominally issued, as applied to securities issued or assumed by the utility, are those which have been signed, certified, or otherwise executed, and placed with the proper officer for sale and delivery, or pledged, or otherwise placed in some special funds of the utility, but which have not been sold, or issued direct to trustees of sinking funds in accordance with contractual requirements.

Nominally outstanding, as applied to securities issued or assumed by the utility, are those which, after being actually issued, have been reacquired by or for the utility under circumstances which require them to be considered as held alive and not retired, provided, however, that securities held by trustees shall be considered as actually outstanding.

NRECA is the National Rural Electric Cooperative Association.

Operating lease is a lease of property used in utility or nonutility operations, which does not meet any of the criteria stated in § 1767.15 (s).

Original cost, as applied to electric plant, is the cost of such property to the person first devoting it to public service.

Person is an individual, a corporation, a partnership, an association, a joint stock company, a business trust, or any organized group of persons, whether incorporated or not, or any receiver or trustee.

Premium, as applied to securities issued or assumed by the utility, is the excess of the cash value of the consideration received from their sale over the sum of their par (stated value of no-par stocks) or face value and interest or dividends accrued at the date of sale.

Project is a complete unit of improvement or development, consisting of a power house, all water conduits, all dams and appurtenant works and structures (including navigation structures) which are a part of said unit, and all storage, diverting, or forebay reservoirs directly connected therewith, the primary line or lines transmitting power therefrom to the point of junction with the distribution system or with the interconnected primary transmission system, all miscellaneous structures used and useful

in connection with said unit or any part thereof, and all water rights, rights of way, ditches, dams, reservoirs, lands, or interest in lands the use and occupancy of which are necessary or appropriate in the maintenance and operation of such unit.

Property retired, as applied to electric plant, is property which has been removed, sold, abandoned, destroyed, or which for any cause has been withdrawn from service.

REA means the Rural Electrification Administration formerly an agency of the United States Department of Agriculture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs.

Regulatory Assets and Liabilities are assets and liabilities that result from rate actions of regulatory agencies. Regulatory assets and liabilities arise from specific revenues, expenses, gains, or losses that would have been included in net income determinations in one period under the general requirements of the Uniform System of Accounts but for it being probable:

(1) That such items will be included in a different period(s) for purposes of developing the rates the utility is authorized to charge for its utility services; or

(2) In the case of regulatory liabilities, that refunds to customers, not provided for in the other accounts, will be required.

Replacing (including replacement) when not otherwise indicated in the context, is the construction or installation of electric plant in place of property retired, together with the removal of the property retired.

Research, Development, and Demonstration (RD&D) includes all expenditures incurred by borrowers either directly or through another person or organization (such as a research institute, industry association, foundation, university, engineering company or similar contractor) in pursuing research, development, and demonstration activities including experiment, design, installation, construction, or operation. This definition includes expenditures for the implementation or development of new and/or existing concepts until technically feasible and commercially feasible operations are

§1767.11

verified. Such research, development, and demonstration costs should be reasonably related to the existing or future utility business, broadly defined, of the borrower or in the environment in which it operates or expects to operate. The term includes, but is not limited to, all such costs incidental to the design, development or implementation of an experimental facility, a plant process, a product, a formula, an invention, a system or similar items, and the improvement of already existing items of a like nature; amounts expended in connection with the proposed development and/or proposed delivery of alternate sources of electricity; and the costs of obtaining its own patent, such as attorney's fees expended in making and perfecting a patent application. The term includes preliminary investigations and detailed planning of specific projects for securing for customers non-conventional electric power supplies that rely on technology that has not been verified previously to be feasible. The term does not include expenditures for efficiency surveys; studies of management, management techniques, and organization; or consumer surveys, advertising, promotions, or items of a like nature.

Retirement units are those items of electric plant which, when retired with or without replacement, are accounted for by crediting the book cost thereof to the electric plant accounts in which included.

RUS means the Rural Utilities Service, an agency of the United States Department of Agriculture established pursuant to Section 232 of the Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994 (Pub. L. 103-354, 108 Stat. 3178), successor to REA with respect to administering certain electric and telephone programs. See 7 CFR 1700.1.

RUS Form 7 is the August 1988 revision (or the revision of any other date which may be specified) of such RUS Form 7, Financial and Statistical Report, or any later revision which shall have been at the time prescribed for use by RUS.

RUS Form 12 is the November 1979 revision (or the revision of any other date which may be specified) of such RUS Form 12, Operating Report—Fi-

7 CFR Ch. XVII (1-1-97 Edition)

nancial, or any later revision which shall have been at the time prescribed for use by RUS.

RUS USoA is the USoA prescribed in this subpart.

Salvage value is the amount received for property retired, less any expenses incurred in connection with the sale or in preparing the property for sale; or, if retained, the amount at which the material recovered is chargeable to materials and supplies, or other appropriate accounts.

Service life is the time between the date electric plant is includible in electric plant in service, or electric plant leased to others, and the date of its retirement. If depreciation is accounted for on a production basis rather than on a time basis, service life should be measured in terms of the appropriate unit of production.

Service value is the difference between original cost and net salvage value of electric plant.

State is a State admitted to the Union, the District of Columbia, and any organized Territory of the United States.

Subsidiary company is a company which is controlled by the utility through ownership of voting stock. (See the definition of control in §1767.10.) A corporate joint venture in which a corporation is owned by a small group of businesses as a separate and specific business or project for the mutual benefit of the members of the group is a subsidiary company for the purposes of this system of accounts.

Utility is an RUS borrower.

Work order is an order authorizing the construction of utility plant. It serves as the basis for the accounts or subaccounts in which costs are recorded.

[58 FR 59825, Nov. 10, 1993, as amended at 59 FR 66440, Dec. 27, 1994]

§1767.11 Purpose.

(a) The standard form of RUS loan documents for electric borrowers requires that the borrower keep books, records, and accounts in which full and true entries will be made of all of the dealings, business and affairs of the borrower in accordance with the methods and principles of accounting of this part.

(b) This subpart implements these provisions of the RUS loan documents by prescribing the RUS USoA for electric borrowers and by providing accounting methodologies and procedures which are applicable to particular situations.

§ 1767.12 Accounting system requirements.

(a) Each RUS electric borrower must maintain and keep its books of accounts and all other books and records that support the entries in such books of accounts in accordance with §§ 1767.18–1767.31.

(b) Each RUS electric borrower shall maintain and keep its books of accounts and all other books and records which support the entries in such books of accounts in accordance with § 1767.41, Accounting Methods and Procedures Required of All RUS Borrowers, herein, which prescribes accounting principles to be applied to specific factual circumstances.

§ 1767.13 Departures from the prescribed RUS Uniform System of Accounts.

(a) No departures are to be made to the prescribed RUS USoA without the prior written approval of RUS. Requests for departures from the RUS USoA shall be addressed, in writing, to the Director, Borrower Accounting Division (BAD).

(b) RUS borrowers subject to the jurisdiction of a state regulatory authority with jurisdiction over rates and/or accounting for electric utilities will not:

(1) Request approval of such authority to use accounting methodologies and principles that depart from the provisions herein; or

(2) File with such authority, any documents or information, including without limitation, any filings associated with the borrower's rates, based upon accounting methods and principles inconsistent with the provisions of this part.

(c) If any state regulatory authority with jurisdiction over an RUS borrower prescribes accounting methods or principles for the borrower that are inconsistent with the provisions of this part, the borrower must immediately notify

the Director, BAD, and provide such documents, information, and reports as RUS may request to evaluate the impact that such accounting methods or principles may have on the interests of RUS.

(1) If RUS determines that the accounting methods and principles do not adversely impact RUS interests, RUS will permit the borrower to use the accounting methods and principles as prescribed by the state regulatory authority to comply with the provisions of the RUS loan documents.

(2) If RUS determines that the accounting methods and principles may adversely impact RUS's interests, RUS may require that, for the purposes of complying with provisions of RUS loan documents, including, without limitation, those provisions relating to financial coverage standards (e.g. "TIER"), the borrower continue to maintain books, records, and accounts in accordance with this subpart.

(i) RUS may, however, approve requests by the borrower to maintain such additional books, records, and accounts as necessary to comply with the requirements of the state regulatory authority.

(ii) Such approval will not waive, modify or amend the requirements of the RUS loan documents or of this subpart.

(d) RUS borrowers will not implement the provisions of Statement of Financial Accounting Standards (SFAS) No. 71, Accounting for the Effects of Certain Types of Regulation, SFAS No. 90, Regulated Enterprises—Accounting for Abandonments and Disallowances of Plant Costs, SFAS No. 92, Regulated Enterprises—Accounting for Phase-in Plans, without the prior written approval of RUS. Requests for approval shall be addressed, in writing, to the Director, BAD.

(e) RUS will consider approval of specific departures from this part upon submission of:

(1) A detailed description of the proposed departure;

(2) The specific accounting journal entries that will be used including the account number and title, and the dollar amounts where appropriate;

(3) The total dollar amount of the departure and the impact on margins

§ 1767.14

during the time period of the departure; and

(4) Any additional information RUS may deem necessary to adequately evaluate the borrower's request.

(f) RUS will, within 90 days of final receipt of this information, render a decision on the borrower's request for a departure from the prescribed RUS USoA.

(1) If, due to extenuating circumstances, RUS is unable to reach a decision within the required time period, RUS will notify the borrower of the delay within this same 90-day period, and provide a projected decision date.

(2) The requested departure from the prescribed RUS USoA must not be implemented until final approval is granted by RUS.

[58 FR 59825, Nov. 10, 1993, as amended at 60 FR 55429, Nov. 1, 1995]

§ 1767.14 Interpretations of the RUS Uniform System of Accounts.

To maintain uniformity in accounting, borrowers must submit questions concerning interpretations of the RUS USoA, in writing, to the Director, BAD, for consideration and decision.

(Approved by the Office of Management and Budget under control number 0572-0002)

[60 FR 55429, Nov. 1, 1995]

§ 1767.15 General instructions.

(a) *Records.* (1) Each utility shall keep its books of account, and all other books, records, and memoranda which support the entries in such books of account so as to be able to furnish readily full information as to any item included in any account.

(2) Each entry shall be supported by such detailed information as will permit ready identification, analysis, and verification of all facts relevant thereto.

(3) The books and records referred to herein include not only accounting records in a limited technical sense, but all other records, such as minute books, stock books, reports, correspondence, memoranda, etc., which may be useful in developing the history of or facts regarding any transaction.

(4) No utility shall destroy any such books or records unless the destruction

7 CFR Ch. XVII (1-1-97 Edition)

thereof is permitted by the rules and regulations of RUS in 7 CFR chapter XVII.

(5) In addition to the prescribed accounts, clearing accounts, temporary or experimental accounts, and subdivisions of any accounts, may be kept, provided the integrity of the prescribed accounts is not impaired.

(6) All amounts included in the accounts prescribed herein for electric plant and operating expenses shall be just and reasonable and any payments or accruals by the utility in excess of just and reasonable charges shall be included in Account 426.5, Other Deductions.

(7) The arrangement or sequence of the accounts prescribed herein shall not be controlling as to the arrangement or sequence in report forms which may be prescribed by RUS.

(b) *Numbering system.* (1) The account numbering plan used herein consists of a system of three-digit whole numbers as follows:

100-199 Assets and other debits.

200-299 Liabilities and other credits.

300-399 Plant accounts.

400-432, 434-435 Income accounts.

433, 436-439 Retained earnings accounts.

440-459 Revenue accounts.

500-599 Production, transmission, and distribution expenses.

900-949 Customer accounts, customer service and informational, sales, and general and administrative expenses.

(2) In certain instances, numbers have been skipped in order to allow for possible later expansion or to permit better coordination with the numbering system for other utility departments.

(3) The numbers prefixed to account titles are to be considered as parts of the titles.

(i) Each utility, however, may adopt, for its own purposes, a different system of account numbers provided that the numbers herein prescribed shall appear in the descriptive headings of the ledger accounts and in the various sources of original entry.

(ii) If a utility uses a different group of account numbers and it is not practicable to show the prescribed account numbers in the various sources of original entry, such reference to the prescribed account numbers may be

Rural Utilities Service, USDA

§ 1767.15

omitted from the various sources of original entry.

(iii) Each utility using different account numbers for its own purposes shall keep readily available, a list of such account numbers which it uses and a reconciliation of such account numbers with the account numbers provided herein.

(iv) The utility's records shall be so kept as to permit ready analysis by prescribed accounts (by direct reference to sources of original entry to the extent practicable) and to permit preparation of financial and operating statements directly from such records at the end of each accounting period according to the prescribed accounts.

(c) *Accounting period.* (1) Each utility shall keep its books on a monthly basis so that for each month, all transactions applicable thereto, as nearly as may be ascertained, shall be entered in the books of the utility.

(2) Amounts applicable or assignable to specific utility departments shall be so segregated monthly.

(3) Each utility shall close its books at the end of each fiscal year unless otherwise authorized by RUS.

(d) *Submission of questions.* To maintain uniformity of accounting, utilities shall submit questions of doubtful interpretation to RUS for consideration and decision.

(e) *Item lists.* (1) Lists of "items" appearing in the texts of the accounts or elsewhere herein are for the purpose of more clearly indicating the application of the prescribed accounting.

(2) The lists are intended to be representative, but not exhaustive.

(3) The appearance of an item in a list warrants the inclusion of the item in the account mentioned only when the text of the account also indicates inclusion inasmuch as the same item frequently appears in more than one list.

(4) The proper entry in each instance must be determined by the texts of the accounts.

(f) *Extraordinary items.* (1) Net income shall reflect all items of profit and loss during the period with the exception of prior period adjustments as described in § 1767.15 (g) and long-term debt as described in § 1767.15 (q).

(2) Those items related to the effects of events and transactions which have occurred during the current period and which are not typical or customary business activities of the company shall be considered extraordinary items.

(3) They will be events and transactions of significant effect which would not be expected to recur frequently and which would not be considered as recurring factors in any evaluation of the ordinary operating processes of business.

(i) In determining significance, items of a similar nature should be considered in the aggregate.

(ii) Dissimilar items should be considered individually; however, if they are few in number, they may be considered in the aggregate.

(iii) To be considered as extraordinary under the above guidelines, an item should be more than approximately 5 percent of income, computed before extraordinary items.

(iv) RUS approval must be obtained to treat an item of less than 5 percent, as extraordinary. (See Accounts 434 and 435.)

(g) *Prior period items.* (1) Items of profit and loss related to the following shall be accounted for as prior period adjustments and excluded from the determination of net income for the current year:

(i) Correction of an error in the financial statements of a prior year

(ii) Adjustments that result from realization of income tax benefits of preacquisition operating loss carryforwards of purchased subsidiaries.

(2) All other items of profit and loss recognized during the year shall be included in the determination of net income for that year.

(h) *Unaudited items.* (1) Whenever a financial statement is required by RUS, if it is known that a transaction has occurred which affects the accounts but the amount involved in the transaction and its effect upon the accounts cannot be determined with absolute accuracy, the amount shall be estimated and such estimated amount included in the proper accounts.

(2) The utility is not required to anticipate minor items which would not appreciably affect the accounts.

(i) *Distribution of pay and expenses of employees.* Charges to electric plant, operating expense, and other accounts for services and expenses of employees engaged in activities chargeable to various accounts, such as construction, maintenance, and operations, shall be based upon the actual time engaged in the respective classes of work, or in case that method is impracticable, upon the basis of a study of the time actually engaged during a representative period.

(j) *Payroll distribution.* (1) Underlying accounting data shall be maintained so that the distribution of the cost of labor charged direct to the various accounts will be readily available.

(2) Such underlying data shall permit a reasonably accurate distribution to be made of the cost of labor charged initially to clearing accounts so that the total labor cost may be classified among construction, cost of removal, electric operating functions (steam generation, nuclear generation, hydraulic generation, transmission, distribution, etc.) and nonutility operations.

(k) *Accounting on an accrual basis.* (1) The utility is required to keep its accounts on the accrual basis.

(i) This requires the inclusion, in its accounts, of all known transactions of appreciable amount which affect the accounts.

(ii) If bills covering such transactions have not been received or rendered, the amounts shall be estimated and appropriate adjustments made when the bills are received.

(2) When payments are made in advance for items such as insurance, rents, taxes, or interest, the amount applicable to future periods shall be charged to Account 165, Prepayments, and spread over the periods to which applicable, by credits to Account 165, and charges to the accounts appropriate for the expenditure.

(l) *Records for each plant.* (1) Separate records shall be maintained by electric plant accounts of the book cost of each plant owned, including additions by the utility to plant leased from others, and

of the cost of operating and maintaining each plant owned or operated.

(2) The term "plant" as used herein includes each generating station and each transmission line or appropriate group of transmission lines.

(m) *Accounting for other departments.* (1) If the utility also operates other utility departments, such as gas or water, it shall keep such accounts for the other departments as may be prescribed by proper authority and in the absence of prescribed accounts, it shall keep such accounts as are proper or necessary to reflect the results of operating each such department.

(2) It is not intended that proprietary and similar accounts which apply to the utility as a whole shall be departmentalized.

(n) *Transactions with associated companies.* (1) Each utility shall keep its accounts and records so as to be able to furnish accurately and expeditiously statements of all transactions with associated companies.

(2) The statements may be required to show the general nature of the transactions, the amounts involved therein and the amounts included in each account prescribed herein with respect to such transactions. Transactions with associated companies shall be recorded in the appropriate accounts for transactions of the same nature. Nothing herein contained, however, shall be construed as restraining the utility from subdividing accounts for the purpose of recording separately transactions with associated companies.

(o) *Contingent assets and liabilities.* (1) Contingent assets represent a possible source of value to the utility contingent upon the fulfillment of conditions regarded as uncertain.

(2) Contingent liabilities include items which may, under certain conditions, become obligations of the utility but which are neither direct nor assumed liabilities at the date of the balance sheet. The utility shall be prepared to give a complete statement of significant contingent assets and liabilities (including cumulative dividends on preference stock) in its audited financial statements; its RUS Form 7, Financial and Statistical Report, or its RUS Form 12, Operating

Rural Utilities Service, USDA

§ 1767.15

Report—Financial; and at such other times as may be requested by RUS.

(p) *Separate accounts or records for each licensed project.* The accounts or records of each borrower shall be so kept as to show for each project (including pumped storage) under license:

(1) The actual legitimate original cost of the project, including the original cost of the original project, the original cost of additions thereto and betterments thereof, and credits for property retired from service, as determined under RUS's regulations in 7 CFR chapter XVII;

(2) The charges for operation and maintenance of the project property directly assignable to the project;

(3) The credits and debits to the depreciation and amortization accounts, and the balances in such accounts; and

(4) The credits and debits to the operating revenue, income, and retained earnings accounts that can be identified with and directly assigned to the project.

NOTE: The purpose of this instruction is to insure that accounts or records are currently maintained by each borrower from which reports may be made to RUS for use in determining the net investment in each licensed project. The instruction covers only the debit and credit items appearing in the borrower's accounts which may be identified with and assigned directly to any project. In the determination of the net investment, allocations of items affecting the net investment may be required where direct assignment is not practicable.

(q) *Long-term debt: premium, discount and expense, and gain or loss on reacquisition—*(1) *Premium, discount and expense.* (i) A separate premium, discount and expense account shall be maintained for each class and series of long-term debt (including receivers' certificates) issued or assumed by the utility.

(ii) The premium will be recorded in Account 225, Unamortized Premium on Long-Term Debt, the discount will be recorded in Account 226, Unamortized Discount on Long-Term Debt—Debit, and the expense of issuance shall be recorded in Account 181, Unamortized Debt Expense.

(iii) The premium, discount and expense shall be amortized over the life of the respective issues under a plan which will distribute the amounts equitably over the life of the securities.

(A) The amortization shall be charged or credited on a monthly basis with the amounts relating to discount and expense charged to Account 428, Amortization of Debt Discount and Expense.

(B) The amounts relating to premium shall be credited to Account 429, Amortization of Premium on Debt—Credit.

(2) *Reacquisition, without refunding.* (i) When long-term debt is reacquired or redeemed without being converted into another form of long-term debt and when the transaction is not in connection with a refunding operation (primarily redemptions for sinking fund purposes), the difference between the amount paid upon reacquisition and the face value; plus any unamortized premium less any related unamortized debt expense and reacquisition costs; or less any unamortized discount, related debt expense and reacquisition costs applicable to the debt redeemed, retired and cancelled, shall be included in Account 189, Unamortized Loss on Reacquired Debt, or Account 257, Unamortized Gain on Reacquired Debt, as appropriate.

(ii) The utility shall amortize the recorded amounts equally on a monthly basis over the remaining life of the respective security issues (old original debt).

(iii) The amount so amortized shall be charged to Account 428.1, Amortization of Loss on Reacquired Debt, or credited to Account 429.1, Amortization of Gain on Reacquired Debt—Credit, as appropriate.

(3) *Reacquisition, with refunding.* (i) When the redemption of one issue or series of bonds or other long-term obligations is financed by another issue or series before the maturity date of the first issue, the difference between the amount paid upon refunding and the face value; plus any unamortized premium less related debt expense or less any unamortized discount and related debt expense, applicable to the debt refunded, shall be included in Account 189, Unamortized Loss on Reacquired Debt, or Account 257, Unamortized Gain on Reacquired Debt, as appropriate.

(ii) The utility may elect to account for such amounts as follows:

(A) Write them off immediately when the amounts are insignificant;

(B) Amortize them by equal monthly amounts over the remainder of the original life of the issue retired; or

(C) Amortize them by equal monthly amounts over the life of the new issue.

(iii) Once an election is made, it shall be applied on a consistent basis.

(iv) The amounts in paragraphs (q)(3)(ii)(A), (B), or (C) of this section shall be charged to Account 428.1, Amortization of Loss on Reacquired Debt, or credited to Account 429.1, Amortization of Gain on Reacquired Debt—Credit, as appropriate.

(4) Under methods in paragraphs (q)(3)(ii)(B) and (C) of this section, the increase or reduction in current income taxes resulting from the reacquisition should be apportioned over the remainder of the original life of the issued retired or over the life of the new issue, as appropriate, as directed more specifically in paragraphs (q)(5) and (6) of this section.

(5) When the utility recognizes the loss in the year of reacquisition as a tax deduction, Account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, shall be debited and Account 283, Accumulated Deferred Income Taxes—Other, shall be credited with the amount of the related tax effect, such amount to be allocated to the periods affected in accordance with the provisions of Account 283.

(6) When the utility chooses to recognize the gain in the year of reacquisition as a taxable gain, Account 411.1, Provision for Deferred Income Taxes—Credit, Utility Operating Income, shall be debited with the amount of the related tax effect, such amount to be allocated to the periods affected in accordance with the provisions of Account 190, Accumulated Deferred Income Taxes.

(7) When the utility chooses to use the optional privilege of deferring the tax on the gain attributable to the reacquisition of debt by reducing the depreciable basis of utility property for tax purposes, pursuant to Section 108 of the Internal Revenue Code (26 U.S.C. 108), the related tax effects shall be deferred as the income is recognized for accounting purposes, and the deferred amounts shall be amortized over the

life of the associated property on a vintage year basis.

(i) Account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, shall be debited, and Account 282, Accumulated Deferred Income Taxes—Other Property, shall be credited with an amount equal to the estimated income tax effect applicable to the portion of the income, attributable to reacquired debt, recognized for accounting purposes during the period.

(ii) Account 282 shall be debited and Account 411.1, Provision for Deferred Income Taxes—Credit, Utility Operating Income, shall be credited with an amount equal to the estimated income tax effects, during the life of the property, attributable to the reduction in the depreciable basis for tax purposes.

(8) The tax effects relating to gain or loss shall be allocated as above to utility operations except in cases where a portion of the debt reacquired is directly applicable to nonutility operations.

(i) In that event, the related portion of the tax effects shall be allocated to nonutility operations.

(ii) Where it can be established that reacquired debt is generally applicable to both utility and nonutility operations, the tax effects shall be allocated between utility and nonutility operations based on the ratio of net investment in utility plant to net investment in nonutility plant.

(9) Premium, discount, or expense on debt shall not be included as an element in the cost of construction or acquisition of property (tangible or intangible), except under the provisions of Account 432, Allowance for Borrowed Funds Used During Construction—Credit.

(10) *Alternate method.* Where a regulatory authority or a group of regulatory authorities having prime rate jurisdiction over the utility specifically disallows the rate principle of amortizing gains or losses on reacquisition of long-term debt without refunding, and does not apply the gain or loss to reduce interest charges in computing the allowed rate of return for rate purposes, the following alternate method may be used to account for gains or losses relating to reacquisition of long-term debt, with or without refunding:

Rural Utilities Service, USDA

§ 1767.15

(i) The difference between the amount paid upon reacquisition of any long-term debt and the face value, adjusted for unamortized discount, expenses or premium, as the case may be, applicable to the debt redeemed shall be recognized currently in income and recorded in Account 421, Miscellaneous Nonoperating Income, or Account 426.5, Other Deductions.

(ii) When this alternate method of accounting is used, the utility shall include a footnote to each financial statement, prepared for public use, explaining why this method is being used along with the treatment given for ratemaking purposes.

(r) *Comprehensive interperiod income tax allocation.* (1) Where there are timing differences between the periods in which transactions affect taxable income and the periods in which they enter into the determination of pretax accounting income, the income tax effects of such transactions are to be recognized in the periods in which the differences between book accounting income and taxable income arise and in the periods in which the differences reverse using the deferred tax method.

(2) Comprehensive interperiod tax allocation should be followed whenever transactions enter into the determination of pretax accounting income for the period even though some transactions may affect the determination of taxes payable in a different period.

(3) Utilities are not required to utilize comprehensive interperiod income tax allocation until the deferred income taxes are included as an expense in the rate level by the regulatory authority having rate jurisdiction over the utility.

(4) Where comprehensive interperiod tax allocation accounting is not practiced the utility shall include as a note to each financial statement, prepared for public use, a footnote explanation setting forth the utility's accounting policies with respect to interperiod tax allocation and describing the treatment for rate making purposes of the tax timing differences by regulatory authorities having rate jurisdiction.

(5) Should the utility be subject to more than one agency having rate jurisdiction, its accounts shall appropriately reflect the ratemaking treat-

ment (deferral or flow through) of each jurisdiction.

(6) Once comprehensive interperiod tax allocation has been initiated either in whole or in part it shall be practiced on a consistent basis and shall not be changed or discontinued without prior RUS approval.

(7) Tax effects deferred currently will be recorded as deferred debits or deferred credits in Accounts 190, Accumulated Deferred Income Taxes; 281, Accumulated Deferred Income Taxes—Accelerated Amortization Property; 282, Accumulated Deferred Income Taxes—Other Property, and 283, Accumulated Deferred Taxes—Other, as appropriate.

(8) The resulting amounts recorded in these accounts shall be disposed of as prescribed in this system of accounts or as otherwise authorized by RUS.

(s) *Criteria for classifying leases.* (1) If, at its inception, a lease meets one or more of the following criteria, the lease shall be classified as a capital lease:

(i) The lease transfers ownership of the property to the lessee by the end of the lease term.

(ii) The lease contains a bargain purchase option.

(iii) The lease term is equal to 75 percent or more of the estimated economic life of the leased property. However, if the beginning of the lease term falls within the last 25 percent of the total estimated economic life of the leased property, including earlier years of use, this criterion shall not be used for purposes of classifying the lease.

(iv) The present value at the beginning of the lease term of the minimum lease payments, excluding that portion of the payments representing executory costs such as insurance, maintenance, and taxes to be paid by the lessor, including any profit thereon, equals or exceeds 90 percent of the excess of the fair value of the leased property to the lessor at the inception of the lease over any related investment tax credit retained by the lessor and expected to be realized by lessor.

(A) However, if the beginning of the lease term falls within the last 25 percent of the total estimated economic life of the leased property, including earlier years of use, this criterion shall

§ 1767.15

7 CFR Ch. XVII (1–1–97 Edition)

not be used for purposes of classifying the lease.

(B) The lessee utility shall compute the present value of the minimum lease payments using its incremental borrowing rate, unless it is practicable for the utility to learn the implicit rate computed by the lessor, and the implicit rate computed by the lessor is less than the lessee's incremental borrowing rate. If both of those conditions are met, the lessee shall use the implicit rate.

(2) If, at any time, the lessee and lessor agree to change the provisions of the lease, other than by renewing the lease or extending its term, in a manner that would have resulted in a different classification of the lease under the criteria in paragraph (s)(1) of this section had the changed terms been in effect at the inception of the lease, the revised agreement shall be considered as a new agreement over its term, and the criteria in paragraph (s)(1) of this section shall be applied for purposes of the expiration of the existing lease term, such as the exercise of a lease renewal option other than those already included in the lease term, shall be considered as a new agreement and shall be classified according to the above provision. Changes in estimates (for example, changes in estimates of the economic life or of the residual value of the leased property) or changes in circumstances (for example, default by the lessee) shall not give rise to a new classification of a lease for accounting purposes.

(t) *Accounting for leases.* (1) All leases shall be classified as either capital or operating leases.

(2) The utility shall record a capital lease as an asset in Account 101.1, Property Under Capital Leases, and Account 120.6, Nuclear Fuel Under Capital Leases; as appropriate, and an obligation in Account 227, Obligations Under Capital Leases—Noncurrent, or Account 243, Obligations Under Capital Leases—Current, at an amount equal to the present value at the beginning of the lease term of minimum lease payments during the lease term, excluding that portion of the payments representing executory costs such as insurance, maintenance, and taxes to be paid by the lessor, together with any

profit thereon. However, if the amount so determined exceeds the fair value of the leased property at the inception of the lease, the amount recorded as the asset and obligation shall be the fair value.

(3) Rental payments on all leases shall be charged to rent expense, fuel expense, construction work in progress, or other appropriate accounts as they become payable.

(4) For a capital lease, for each period during the lease term, the amounts recorded for the asset and obligation shall be reduced by an amount equal to the portion of each lease payment that would have been allocated to the reduction of the obligation, if the payment had been treated as a payment on an installment obligation (liability) and allocated between interest expense and a reduction of the obligation so as to produce a constant periodic rate of interest on the remaining balance.

(u) *Allowances.* (1) Title IV of the Clean Air Act Amendments of 1990, Pub. L. 101–549, 104 Stat. 2399, 2584 (42 U.S.C. 7407 and 42 U.S.C. 7651), provides for the issuance of allowances as a means to limit the emissions of certain airborne pollutants by various entities, including utilities. Utilities owning allowances, other than those acquired for speculative purposes, shall account for such allowances at cost in Account 158.1, Allowance Inventory, or Account 158.2, Allowances Withheld, as appropriate. Allowances acquired for speculative purposes and identified as such in contemporaneous records at the time of purchase shall be accounted for in Account 124, Other Investments.

(2) When purchased, allowances become eligible for use in different years, and the allocation of the purchase cost cannot be determined by fair value, the purchase cost allocated to allowances of each vintage shall be determined through use of a present-value based measurement. The interest rate used in the present-value measurement shall be the utility's incremental borrowing rate, in the month in which the allowances are acquired, for a loan with a term similar to the period that it will hold the allowances and in an amount equal to the purchase price.

(3) The underlying records supporting Account 158.1 and Account 158.2 shall

Rural Utilities Service, USDA

§ 1767.16

be maintained in sufficient detail so as to provide the number of allowances and the related cost by vintage year.

(4) Issuances from inventory included in Account 158.1 and Account 158.2 shall be accounted for on a vintage basis using a monthly weighted-average method of cost determination. The cost of eligible allowances not used in the current year shall be transferred to the vintage for the immediately following year.

(5) Account 158.1 shall be credited and Account 509, Allowances, debited so that the cost of the allowances to be remitted for the year is charged to expense monthly based on each month's emissions. This may, in certain circumstances, require allocation of the cost of an allowance between months on a fractional basis.

(6) In any period in which actual emissions exceed the amount allowable based on eligible allowances owned, the utility shall estimate the cost to acquire the additional allowances needed and charge Account 158.1 with the estimated cost. This estimated cost of future allowance acquisitions shall be credited to Account 158.1 and charged to Account 509 in the same accounting period as the related charge to Account 158.1. Should the actual cost of these allowances differ from the estimated cost, the differences shall be recognized in the then-current period's inventory issuance cost.

(7) Any penalties assessed by the Environmental Protection Agency for the emission of excess pollutants shall be charged to Account 426.3, Penalties.

(8) Gains on dispositions of allowances, other than allowances held for speculative purposes, shall be accounted for as follows. First, if there is uncertainty as to the regulatory treatment, the gain shall be deferred in Account 254, Other Regulatory Liabilities, pending resolution of the uncertainty. Second, if there is certainty as to the existence of a regulatory liability, the gain will be credited to Account 254, with subsequent recognition in income when reductions in charges to customers occur or the liability is otherwise satisfied. Third, all other gains will be credited to Account 411.8, Gains from Disposition of Allowances. Losses on disposition of allowances,

other than allowances held for speculative purposes, shall be accounted for as follows. Losses that qualify as regulatory assets shall be charged directly to Account 182.3, Other Regulatory Assets. All other losses shall be charged to Account 411.9, Losses from Disposition of Allowances. (See the definition of regulatory assets and liabilities.) Gains or losses on disposition of allowances held for speculative purposes shall be recognized in Account 421, Miscellaneous Nonoperating Income, or Account 426.5, Other Deductions, as appropriate.

(9) The costs and benefits of exchange-traded allowance futures contracts used to protect the utility from the risk of unfavorable price changes ("hedging transactions") shall be deferred in Account 186, Miscellaneous Deferred Debits, or Account 253, Other Deferred Credits, as appropriate. Such deferred amounts shall be included in Account 158.1, Allowance Inventory, in the month in which the related allowances are acquired, sold or otherwise disposed of. Where the costs or benefits of hedging transactions are not identifiable with specific allowances, the amounts shall be included in Account 158.1 when the futures contract is closed. The costs and benefits of exchange-traded allowance futures contracts entered into as a speculating activity shall be charged or credited to Account 421, Miscellaneous Nonoperating Income, or Account 426.5, Other Deductions, as appropriate.

§ 1767.16 Electric plant instructions.

(a) *Classification of electric plant at effective date of system of accounts.* (1) The electric plant accounts provided herein are the same as those contained in the prior system of accounts except for inclusion of accounts for nuclear production plant and some changes in classification in the general equipment accounts. Except for these changes, the balances in the various plant accounts, as determined under the prior system of accounts, should be carried forward. Any remaining balance of plant which has not yet been classified, pursuant to the requirements of the prior system, shall be classified in accordance with the following instructions.

(2) The cost to the utility of its unclassified plant shall be ascertained by analysis of the utility's records. Adjustments shall not be made to record in utility plant accounts amounts previously charged to operating expenses or to income deductions in accordance with the USoA in effect at the time or in accordance with the discretion of management as exercised under a USoA, or under accounting practices previously followed.

(3) The detailed electric plant accounts (301 to 399, inclusive) shall be stated on the basis of cost to the utility of plant constructed by it and the original cost, estimated if not known, of plant acquired as an operating unit or system. The difference between the original cost, as above, and the cost to the utility of electric plant after giving effect to any accumulated provision for depreciation or amortization shall be recorded in Account 114, Electric Plant Acquisition Adjustments. The original cost of electric plant shall be determined by analysis of the utility's records or those of the predecessor or vendor companies with respect to electric plant previously acquired as operating units or systems and the difference between the original cost so determined, less accumulated provisions for depreciation and amortization and the cost to the utility with necessary adjustments for retirements from date of acquisition, shall be entered in Account 114, Electric Plant Acquisition Adjustments. Any difference between the cost of electric plant and its book cost, when not properly includible in other accounts, shall be recorded in Account 116, Other Electric Plant Adjustments.

(b) *Electric plant to be recorded at cost.*

(1) All amounts included in the accounts for electric plant acquired as an operating unit or system, except as otherwise provided in the texts of the intangible plant accounts, shall be stated at the cost incurred by the person who first devoted the property to utility service. All other electric plant shall be included in the accounts at the cost incurred by the utility except for property acquired by lease which qualifies as capital lease property under § 1767.15 (s), Criteria for Classifying Leases, and is recorded in Account

101.1, Property Under Capital Lease, or Account 120.6, Nuclear Fuel Under Capital Leases. Where the term "cost" is used in the detailed plant accounts, it shall have the meaning stated in this paragraph (b).

(2) When the consideration given for property is other than cash, the value of such consideration shall be determined on a cash basis (see, however, the definition of cost in § 1767.10). In the entry recording such transition, the actual consideration shall be described with sufficient particularity to identify it. The utility shall be prepared to furnish RUS the particulars of its determination of the cash value of the consideration if other than cash.

(3) When property is purchased under a plan involving deferred payments, no charge shall be made to the electric plant accounts for interest, insurance, or other expenditures occasioned solely by such form of payment.

(4) The electric plant accounts shall not include the cost or other value of electric plant contributed to the company. Contributions in the form of money or its equivalent toward the construction of electric plant shall be credited to accounts charged with the cost of such construction. Plant constructed from contributions of cash or its equivalent shall be shown as a reduction to gross plant constructed when assembling cost data in work orders for posting to plant ledgers of accounts. The accumulated gross costs of plant accumulated in the work order shall be recorded as a debit in the plant ledger of accounts along with the related amount of contributions concurrently be recorded as a credit.

(c) *Components of construction cost.* The cost of construction properly includible in the electric plant accounts shall include, where applicable, the direct and overhead costs as listed and defined hereunder:

(1) *Contract work* includes amounts paid for work performed under contract by other companies, firms, or individuals, costs incident to the award of such contracts, and the inspection of such work.

(2) *Labor* includes the pay and expenses of employees of the utility engaged on construction work, and related workmen's compensation insurance,

Rural Utilities Service, USDA

§ 1767.16

payroll taxes, and similar items of expense. It does not include the pay and expenses of employees which are distributed to construction through clearing accounts nor the pay and expenses included in other items hereunder.

(3) *Materials and supplies* includes the purchase price at the point of free delivery plus customs duties, excise taxes, the cost of inspection, loading and transportation, the related stores expenses, and the cost of fabricated materials from the utility's shop. In determining the cost of materials and supplies used for construction, proper allowance shall be made for unused materials and supplies, for materials recovered from temporary structures used in performing the work involved, and for discounts allowed and realized in the purchase of materials and supplies.

NOTE: The cost of individual items of equipment of small value (for example, \$500 or less) or of short life, including small portable tools and implements, shall not be charged to utility plant accounts unless the correctness of the accounting therefor is verified by current inventories. The cost shall be charged to the appropriate operating expense or clearing accounts, according to the use of such items, or, if such items are consumed directly in construction work, the cost shall be included as part of the cost of the construction.

(4) *Transportation* includes the cost of transporting employees, materials and supplies, tools, purchased equipment, and other work equipment (when not under own power) to and from points of construction. It includes amounts paid to others as well as the cost of operating the utility's own transportation equipment. (See Item in paragraph (c)(5) of this section.)

(5) *Special machine service* includes the cost of labor (optional), materials and supplies, depreciation, and other expenses incurred in the maintenance, operation and use of special machines, such as steam shovels, pile drivers, derricks, ditchers, scrapers, material unloaders, and other labor saving machines; also expenditures for rental, maintenance and operation of machines of others. It does not include the cost of small tools and other individual items of small value or short life which are included in the cost of materials and supplies. (See Item in paragraph

(c)(3) of this section.) When a particular construction job requires the use for an extended period of time of special machines, transportation or other equipment, the net book cost thereof, less the appraised or salvage value at time of release from the job, shall be included in the cost of construction.

(6) *Shop service* includes the proportion of the expense of the utility's shop department assignable to construction work except that the cost of fabricated materials from the utility's shop shall be included in "materials and supplies."

(7) *Protection* includes the cost of protecting the utility's property from fire or other casualties and the cost of preventing damages to others, or to the property of others, including payments for discovery or extinguishment of fires, cost of apprehending and prosecuting incendiaries, witness fees in relation thereto, amounts paid to municipalities and others for fire protection, and other analogous items of expenditures in connection with construction work.

(8) *Injuries and damages* includes expenditures or losses in connection with construction work on account of injuries to persons and damages to the property of others; also the cost of investigation of and defense against actions for such injuries and damages. Insurance recovered or recoverable on account of compensation paid for injuries to persons incident to construction shall be credited to the account or accounts to which such compensation is charged. Insurance recovered or recoverable on account of property damages incident to construction shall be credited to the account or accounts charged with the cost of the damages.

(9) *Privileges and permits* includes payments for and expenses incurred in securing temporary privileges, permits or rights in connection with construction work, such as for the use of private or public property, streets, or highways, but it does not include rents, or amounts chargeable as franchises and consents for which see Account 302, Franchises and Consents.

(10) *Rents* includes amounts paid for the use of construction quarters and office space occupied by construction forces and amounts properly includible

§ 1767.16

7 CFR Ch. XVII (1–1–97 Edition)

in construction costs for such facilities jointly used.

(11) *Engineers and supervision* includes the portion of the pay and expenses of engineers, surveyors, draftsmen, inspectors, superintendents and their assistants applicable to construction work.

(12) *General administration capitalized* includes the portion of the pay and expenses of the general officers and administrative and general expenses applicable to construction work.

(13) *Engineering services* includes amounts paid to other companies, firms, or individuals engaged by the utility to plan, design, prepare estimates, supervise, inspect, or give general advice and assistance in connection with construction work.

(14) *Insurance* includes premiums paid or amounts provided or reserved as self-insurance for the protection against loss and damages in connection with construction, by fire or other casualty, injuries or deaths of persons other than employees, damages to property of others, defalcation of employees and agents, and the non-performance of contractual obligations of others. It does not include workmen's compensation or similar insurance on employees included as "labor" in Item in paragraph (c)(2) of this section.

(15) *Law expenditures* includes the general law expenditures incurred in connection with construction and the court and legal costs directly related thereto, other than law expenses included in "Protection," Item in paragraph (c)(7) of this section, and in Injuries and damages, Item in paragraph (c)(8) of this section.

(16) *Taxes* includes taxes on physical property (including land) during the period of construction and other taxes properly includible in construction costs before the facilities become available for service.

(17) *Allowance for funds used during construction* includes the net cost for the period of construction of borrowed funds used for construction purposes and a reasonable rate on other funds when so used, not to exceed, without prior approval of RUS, allowances computed in accordance with the formula prescribed in Item in paragraph (c)(17)(i) of this section. No allowance for funds used during construction charges shall be included in these accounts upon expenditures for construction projects which have been abandoned.

(i) The formula and elements for the computation of the allowance for funds used during construction shall be:

$$A_i = s \left(\frac{S}{W} \right) + d \left(\frac{D}{D+P+C} \right) \left(1 - \frac{S}{W} \right)$$

$$A_c = \left[1 - \frac{S}{W} \right] \left[P \left(\frac{P}{D+P+C} \right) + c \left(\frac{C}{D+P+C} \right) \right]$$

Where:

A_i = Gross allowance for borrowed funds used during construction rate.

A_c = Allowance for other funds used during construction rate.

S = Average short-term debt.

s = Short-term debt interest rate.

D = Long-term debt.

d = Long-term debt interest rate.

P = Preferred stock.

p = Preferred stock cost rate.

C = Patronage capital assigned.

c = Entity's incremental borrowing rate.

W = Average balance in construction work in progress plus nuclear fuel in process of refinement, conversion, enrichment, and fabrication.

(ii) The rate shall be determined annually.

(A) The balance for long-term debt, preferred stock, and patronage capital assigned shall be the actual book balances as of the end of the prior year.

Rural Utilities Service, USDA

§ 1767.16

(B) The cost rate for long-term debt and preferred stock shall be the weighted average cost.

(C) The cost rate for patronage capital assigned shall be the entity's incremental borrowing rate.

(D) The short-term debt balances and related cost and the average balance for construction work in progress plus nuclear fuel in process of refinement, conversion, enrichment, and fabrication shall be estimated for the current year with appropriate adjustments as actual data becomes available.

NOTE: When only a portion of a plant or project is placed in operation or is completed and ready for service but the construction work as a whole is incomplete, that part of the cost of the property placed in operation or ready for service shall be treated as "Electric Plant in Service," and an allowance for funds used during construction thereon as a charge to construction shall cease. Allowance for funds used during construction on that part of the cost of the plant which is incomplete may continue to be charged to construction until such time as it is placed in operation or is ready for service, except as limited in Item in paragraph (c)(17) of this section.

(18) *Earnings and expenses during construction.* The earnings and expenses during construction shall constitute a component of construction costs.

(i) The earnings shall include revenues received or earned for power produced by generating plants during the construction period and sold or used by the utility.

(A) Where such power is sold to an independent purchaser before intermingling with power generated by other plants, the credit shall consist of the selling price of the energy.

(B) Where the power generated by a plant under construction is delivered to the utility's electric system for distribution and sale, or is delivered to an associated company, or is delivered to and used by the utility for purposes other than distribution and sale (for example, the credit shall be the fair value of the energy so delivered).

(C) Revenue shall also include rentals for lands, buildings, and other property, and miscellaneous receipts not properly includible in other accounts.

(ii) Expenses shall consist of the cost of operating the power plant, and other

costs incident to the production and delivery of the power for which construction is credited under paragraph (c)(18)(i) of this section, including the cost of repairs and other expenses of operating and maintaining lands, buildings, and other property, and other miscellaneous and like expenses not properly includible in other accounts.

(19) *Training costs.* (i) When it is necessary that employees be trained to operate or maintain plant facilities that are being constructed and such facilities are not conventional in nature, or are new to the company's operations, these costs may be capitalized as a component of construction cost.

(ii) Once plant is placed in service, the capitalization of training costs shall cease and subsequent training costs shall be expensed. (See § 1767.17 (d).)

(20) *Studies.* (i) Studies include the costs of studies such as nuclear operational, safety, or seismic studies, or environmental studies mandated by regulatory bodies relative to plant under construction.

(ii) Studies relative to facilities in service shall be charged to Account 183, Preliminary Survey and Investigation Charges.

(d) *Overhead construction costs.* (1) All overhead construction costs, such as engineering, supervision, general office salaries and expenses, construction engineering and supervision performed by others than the accounting utility, law expenses, insurance, injuries and damages, relief and pensions, taxes and interest, shall be charged to particular jobs or units on the basis of the amounts of such overheads reasonably applicable thereto, to the end that each job or unit shall bear its equitable proportion of such costs and that the entire cost of the unit, both direct and overhead, shall be deducted from the plant accounts as the time the property is retired.

(2) As far as practicable, the determination of payroll charges includible in construction overheads shall be based on time card distributions thereof.

(i) Where this procedure is impractical, special studies shall be made periodically of the time of supervisory

§ 1767.16

7 CFR Ch. XVII (1–1–97 Edition)

employees devoted to construction activities to the end that only such overhead costs as have a definite relation to construction shall be capitalized.

(ii) The addition to direct construction cost of arbitrary percentages or amounts to cover assumed overhead costs is not permitted.

(3) The records supporting the entries for overhead constructions costs shall be so kept as to show:

(i) The total amount of each overhead for each year;

(ii) The nature and amount of each overhead expenditure charged to each construction work order and to each electric plant account; and

(iii) The bases of distribution of such costs.

(e) *Electric plant purchased or sold.* (1) When electric plant constituting an operating unit or system is acquired by purchase, merger, consolidation, liquidation, or otherwise, after the effective date of this system of accounts, the costs of acquisition, including expenses incidental thereto properly includible in electric plant, shall be charged to Account 102, Electric Plant Purchased or Sold.

(2) The accounting for the acquisition shall then be completed as follows:

(i) The original cost of plant, estimated if not known, shall be credited to Account 102, Electric Plant Purchased or Sold, and concurrently charged to the appropriate electric plant in service accounts and to Account 104, Electric Plant Leased to Others; Account 105, Electric Plant Held for Future Use; and Account 107, Construction Work in Progress—Electric, as appropriate.

(ii) The depreciation and amortization applicable to the original cost of the properties purchased shall be charged to Account 102, Electric Plant Purchased or Sold, and concurrently credited to the appropriate account for accumulated provision for depreciation or amortization.

(iii) The cost to the utility of any property includible in Account 121, Nonutility Property, shall be transferred thereto.

(iv) The amount remaining in Account 102, Electric Plant Purchased or Sold, shall then be closed to Account

114, Electric Plant Acquisition Adjustments.

(3) If property acquired in the purchase of an operating unit or system is in such physical condition when acquired that it is necessary to substantially rehabilitate it in order to bring the property up to the standards of the utility, the cost of such work, except replacements, shall be accounted for as a part of the purchase price of the property.

(4) When any property acquired as an operating unit or system includes duplicate or other plant which will be retired by the accounting utility in the reconstruction of the acquired property or its consolidation with previously owned property, the proposed accounting for such property shall be presented to RUS.

(5) In connection with the acquisition of electric plant constituting an operating unit or system, the utility shall procure, if possible, all existing records relating to the property acquired or certified copies thereof, and shall preserve such records in conformity with regulations or practices governing the preservation of records of its own construction.

(6) When electric plant constituting an operating unit or system is sold, conveyed, or transferred to another by sale, merger, consolidation, or otherwise, the book cost of the property sold or transferred to another shall be credited to the appropriate utility plant accounts, including amounts carried in Account 114, Electric Plant Acquisition Adjustments, and the amounts (estimated if not known) carried with respect thereto in the accounts for accumulated provision for depreciation and amortization and in Account 252, Customer Advances for Construction, shall be charged to such accounts and contra entries made to Account 102, Electric Plant Purchased or Sold. Unless otherwise ordered by RUS, the difference, if any, between:

(i) The net amount of debits and credits, and

(ii) The consideration received for the property (less commissions and other expenses of making the sale) shall be included in Account 421.1, Gain on Disposition of Property, or Account 421.2, Loss on Disposition of Property.

Rural Utilities Service, USDA

§ 1767.16

(See Account 102, Electric Plant Purchased or Sold.)

NOTE: In cases where existing utilities merge or consolidate because of financial or operating reasons or statutory requirements rather than as a means of transferring title of purchased properties to a new owner, the accounts of the constituent utilities, with the approval of RUS, may be combined. In the event original cost has not been determined, the resulting utility shall proceed to determine such cost as outlined herein.

(f) *Expenditures on leased property.* (1) The cost of substantial initial improvements (including repairs, rearrangements, additions, and betterments) made in the course of preparing for utility service property leased for a period of more than one year, and the cost of subsequent substantial additions, replacements, or betterments to such property, shall be charged to the electric plant account appropriate for the class of property leased.

(i) If the service life of the improvements is terminable by action of the lease, the cost, less net salvage, of the improvements shall be spread over the life of the lease by charges to Account 404, Amortization of Limited-Term Electric Plant.

(ii) If the service life is not terminated by action of the lease but by depreciation proper, the cost of the improvements, less net salvage, shall be accounted for as depreciable plant. The provisions of (1) are applicable to property leased under either capital leases or operating leases.

(2) If improvements made to property leased for a period of more than one year are of relatively minor cost, or if the lease is for a period of not more than one year, the cost of the improvements shall be charged to the account in which the rent is included, either directly or by amortization thereof.

(g) *Land and land rights.* (1) The accounts for land and land rights shall include the cost of land owned in fee by the utility and rights, interests, and privileges held by the utility in land owned by others, such as leaseholds, easements, water and water power rights, diversion rights, submersion rights, rights-of-way, and other like interests in land.

(i) Do not include in the accounts for land and land rights and rights-of-way costs incurred in connection with first

clearing and grading of land and rights-of-way and the damage costs associated with the construction and installation of plant.

(ii) Such costs shall be included in the appropriate plant accounts directly benefited.

(2) Where special assessments for public improvements provide for deferred payments, the full amount of the assessments shall be charged to the appropriate land account and the unpaid balance shall be carried in an appropriate liability account.

(i) Interest on unpaid balances shall be charged to the appropriate interest account.

(ii) If any part of the cost of public improvements is included in the general tax levy, the amount thereof shall be charged to the appropriate tax account.

(3) The net profit from the sale of timber, cord wood, sand, gravel, other resources or other property acquired with the rights-of-way or other lands shall be credited to the appropriate plant accounts to which related. Where land is held for a considerable period of time and timber and other natural resources on the land at the time of purchase increase in value, the net profit (after giving effect to the cost of the natural resources) from the sale of timber or its products or other natural resources shall be credited to the appropriate utility operating income account when such land has been recorded in Account 105, Electric Plant Held for Future Use, or classified as plant in service, otherwise to Account 421, Miscellaneous Nonoperating Income.

(4) Separate entries shall be made for the acquisition, transfer, or retirement of each parcel of land, and each land right (except rights-of-way for distribution lines), or water right, having a life of more than one year.

(i) A record shall be maintained showing the nature of ownership, full legal description, area, map reference, purpose for which used, city, county, and tax district on which situated, from whom purchased or to whom sold, payment given or received, other costs, contract date and number, date of recording of deed, and book and page of record.

(ii) Entries transferring or retiring land or land rights shall refer to the original entry recording its acquisition.

(5) Any difference between the amount received from the sale of land or land rights, less agents' commissions and other costs incident to the sale, and the book cost of such land or rights, shall be included in Account 411.6, Gains from Disposition of Utility Plant, or 411.7, Losses from Disposition of Utility Plant, when such property has been recorded in Account 105, Electric Plant Held for Future Use, otherwise to Account 421.1, Gain on Disposition of Property, or 421.2, Loss on Disposition of Property, as appropriate, unless a reserve therefor has been authorized and provided. Appropriate adjustments of the accounts shall be made with respect to any structures or improvements located on land sold.

(6) The cost of buildings and other improvements (other than public improvements) shall not be included in the land accounts. If, at the time of acquisition of an interest in land, such interest extends to buildings or other improvements (other than public improvements) which are then devoted to utility operations, the land and improvements shall be separately appraised and a cost allocated to land and buildings or improvements on the basis of the appraisals. If the improvements are removed or wrecked without being used in operations, the cost of removing or wrecking shall be charged and the salvage credited to the account in which the cost of land is recorded.

(7) When the purchase of land for electric operations requires the purchase of more land than needed for such purposes, the charge to the specific land account shall be based upon the cost of the land purchased, less the fair market value of that portion of the land which is not to be used in utility operations. The portion of the cost measured by the fair market value of the land not to be used shall be included in Account 105, Electric Plant Held for Future Use, or Account 121, Nonutility Property, as appropriate.

(8) Provisions shall be made for amortizing amounts carried in the accounts for limited-term interest in land so as to apportion equitably the

cost of each interest over the life thereof. (See Account 111, Accumulated Provision for Amortization of Electric Utility Plant, and Account 404, Amortization of Limited-Term Electric Plant.)

(9) The items of cost to be included in the accounts for land and land rights are as follows:

(i) Bulkheads, buried, not requiring maintenance or replacement;

(ii) First cost of acquisition including mortgages and other liens assumed (but not subsequent interest thereon);

(iii) Condemnation proceedings, including court and counsel costs;

(iv) Consents and abutting damages;

(v) Conveyancers' and notaries' fees;

(vi) Fees, commissions, and salaries to brokers, agents, and other in connection with the acquisition of the land or land rights;

(vii) Leases, cost of voiding upon purchase to secure possession of land;

(viii) Removing, relocating, or reconstructing property of others, such as buildings, highways, railroads, bridges, cemeteries, churches, telephone and power lines, etc., in order to acquire quiet possession;

(ix) Retaining walls unless identified with structures;

(x) Special assessments levied by public authorities for public improvements on the basis of benefits for new roads, new bridges, new sewers, new curbing, new pavements, and other public improvements, but not taxes levied to provide for the maintenance of such improvements;

(xi) Surveys in connection with the acquisition, but not amounts paid for topographical surveys and maps where such costs are attributable to structures or plant equipment erected or to be erected or installed on such land;

(xii) Taxes assumed, accrued to date of transfer of title;

(xiii) Title, examining, clearing, insuring, and registering in connection with the acquisition and defending against claims relating to the period prior to the acquisition;

(xiv) Appraisals prior to closing title;

(xv) Cost of dealing with distributees or legatees residing outside of the state or county, such as recording power of

Rural Utilities Service, USDA

§ 1767.16

attorney, recording will or exemplification of will, recording satisfaction of state tax;

(xvi) Filing satisfaction of mortgage;

(xvii) Documentary stamps;

(xviii) Photographs of property at acquisition;

(xix) Fees and expenses incurred in the acquisition of water rights and grants;

(xx) Cost of fill to extend bulkhead line over land under water, where riparian rights are held, which is not occasioned by the erection of a structure;

(xxi) Sidewalks and curbs constructed by the utility on public property; and

(xxii) Labor and expenses in connection with securing rights of way, where performed by company employees and company agents.

(h) *Structures and improvements.* (1) The accounts for structures and improvements shall include the cost of all buildings and facilities to house, support, or safeguard property or persons, including all fixtures permanently attached to and made a part of buildings and which cannot be removed therefrom without cutting into the walls, ceilings, or floors, or without in some way impairing the buildings, and improvements of a permanent character on or to land.

(2) Also include those costs incurred in connection with the first clearing and grading of land and rights-of-way and the damage costs associated with construction and installation of plant.

(3) The cost of specially provided foundations not intended to outlast the machinery or apparatus for which provided, and the cost of angle irons, and castings installed at the base of an item of equipment, shall be charged to the same account as the cost of the machinery, apparatus, or equipment.

(4) Minor buildings and structures, such as valve towers, patrolmen's towers, telephone stations, fish and wildlife, and recreation facilities which are used directly in connection with or form a part of a reservoir, dam or waterway shall be considered a part of the facility in connection with which constructed or operated and the cost thereof accounted for accordingly.

(5) Where furnaces and boilers are used primarily for furnishing steam for

some particular department and only incidentally for furnishing steam for heating a building and operating the equipment therein, the entire cost of such furnaces and boilers shall be charged to the appropriate plant account, and no part to the building account.

(6) Where the structure of a dam forms also the foundation of the power plant building, such foundation shall be considered a part of the dam.

(7) The cost of disposing of materials excavated in connection with construction of structures shall be considered as a part of the cost of such work, except when such material is used for filling, the cost of loading, hauling, and dumping shall be equitably apportioned between the work in connection with which the removal occurs and the work in connection with which the material is used; and when such material is sold, the net amount realized from such sales shall be credited to the work in connection with which the removal occurs. If the amount realized from the sale of excavated materials exceeds the removal costs and the costs in connection with the sale, the excess shall be credited to the land account in which the site is carried.

(8) Lighting or other fixtures temporarily attached to building for purposes of display or demonstration shall not be included in the cost of the building but in the appropriate equipment account.

(9) The items of cost to be included in the accounts for structures and improvements are as follows:

(i) Architects' plans and specifications including supervision;

(ii) Ash pits (when located within the building);

(iii) Athletic field structures and improvements;

(iv) Boilers, furnaces, piping, wiring, fixtures, and machinery for heating, lighting, signaling, ventilating, and air conditioning systems, plumbing, vacuum cleaning systems, incinerator and smoke pipe, flues, etc;

(v) Bulkheads, including dredging, riprap fill, piling, decking, concrete, fenders, etc., when exposed and subject to maintenance and replacement;

(vi) Chimneys;

(vii) Coal bins and bunkers;

§ 1767.16

7 CFR Ch. XVII (1–1–97 Edition)

- (viii) Commissions and fees to brokers, agents, architects and others;
- (ix) Conduit (not to be removed) with its contents;
- (x) Damages to abutting property during construction;
- (xi) Docks;
- (xii) Door checks and door stops;
- (xiii) Drainage and sewerage systems;
- (xiv) Elevators, cranes, hoists, etc., and the machinery for operating them;
- (xv) Excavation, including shoring, bracing, bridging, refill and disposal of excess excavated material, cofferdams around foundation, pumping water from cofferdams during construction and test borings;
- (xvi) Fences and fence curbs (not including protective fences isolating items of equipment, which shall be charged to the appropriate equipment accounts);
- (xvii) Fire protection systems when forming a part of a structure;
- (xviii) Flagpole;
- (xix) Floor covering (permanently attached);
- (xx) Foundations and piers for machinery, constructed as a permanent part of a building or other item listed herein;
- (xxi) Grading and clearing when directly occasioned by the building of a structure;
- (xxii) Intrasite communication system, poles, pole fixtures, wires, and cable;
- (xxiii) Landscaping, lawns, shrubbery, etc.;
- (xxiv) Leases, voiding upon purchase to secure possession of structures;
- (xxv) Leased property, expenditures on;
- (xxvi) Lighting fixtures and outside lighting system;
- (xxvii) Mailchutes when part of a building;
- (xxviii) Marquee, permanently attached to the building;
- (xxix) Painting, first cost;
- (xxx) Permanent paving, concrete, brick, flagstone, asphalt, etc., within the property lines;
- (xxxi) Partitions, including movable;
- (xxxii) Permits and privileges;
- (xxxiii) Platforms, railings and gratings when constructed as a part of a structure;
- (xxxiv) Power boards for services to a building;
- (xxxv) Refrigerating systems for general use;
- (xxxvi) Retaining walls except when identified with land;
- (xxxvii) Roadways, railroads, bridges, and trestles intrasite except railroads provided for in equipment accounts;
- (xxxviii) Roofs;
- (xxxix) Scales, connected to and forming a part of a structure;
- (xl) Screens;
- (xli) Sewer systems, for general use;
- (xlii) Sidewalks, culverts, curbs and streets constructed by the utility on its property;
- (xliii) Sprinkling systems;
- (xliv) Sump pumps and pits;
- (xlv) Stacks—brick, steel, or concrete, when set on foundation forming part of general foundation and steelwork of a building;
- (xlvi) Steel inspection during construction;
- (xlvii) Storage facilities constituting a part of a building;
- (xlviii) Storm doors and windows;
- (xlix) Subways, areaways, and tunnels, directly connected to and forming part of a structure;
- (l) Tanks, constructed as part of a building or as a distinct structural unit;
- (li) Temporary heating during construction (net cost);
- (lii) Temporary water connection during construction (net cost);
- (liii) Temporary shanties and other facilities used during construction (net cost);
- (liv) Topographical maps;
- (lv) Tunnels, intake and discharge, when constructed as part of a structure, including sluice gates, and those constructed to house mains;
- (lvi) Vaults constructed as part of a building;
- (lvii) Watchmen's sheds and clock systems (net cost when used during construction only);
- (lviii) Water basins or reservoirs;
- (lix) Water front improvements;
- (lx) Water meters and supply system for a building or for general company purposes;
- (lxi) Water supply piping, hydrants, and wells;
- (lxii) Wharves;

Rural Utilities Service, USDA

§ 1767.16

- (lxiii) Window shades and ventilators;
- (lxiv) Yard drainage system;
- (lxv) Yard lighting system; and
- (lxvi) Yard surfacing, gravel, concrete, or oil (First cost only).

NOTE: Structures and improvements accounts shall be credited with the cost of coal bunkers, stacks, foundations, subways, and tunnels, the use of which has terminated with the removal of the equipment with which they are associated even though they have not been physically removed.

(i) *Equipment.* (1) The cost of equipment chargeable to the electric plant accounts, unless otherwise indicated in the text of an equipment account, includes the net purchase price thereof, sales taxes, investigation and inspection expenses necessary to such purchase, expenses of transportation when borne by the utility, labor employed, materials, and supplies consumed, and expenses incurred by the utility in unloading and placing the equipment in readiness to operate.

(2) Also include those costs incurred in connection with the first clearing and grading of land and rights-of-way and the damage costs associated with construction and installation of plant.

(3) Exclude from equipment accounts hand and other portable tools, which are likely to be lost or stolen or which have relatively small value (for example, \$500 or less) or short life, unless the correctness of the accounting therefor as electric plant is verified by current inventories.

(i) Special tools acquired and included in the purchase price of equipment shall be included in the appropriate plant accounts.

(ii) Portable drills and similar tool equipment when used in connection with the operation and maintenance of a particular plan or department, such as production, transmission, or distribution or in "stores", shall be charged to the plant accounts appropriate for their use.

(4) The equipment accounts shall include angle irons and similar items which are installed at the base of an item of equipment, but piers and foundations which are designed to be as permanent as the buildings which house the equipment, or which are constructed as a part of the building and which cannot be removed without cut-

ting into the walls, ceilings, or floors or, without in some way impairing the building, shall be included in the building accounts.

(5) The equipment accounts shall include the necessary costs of testing or running a plant or parts thereof during an experimental or test period prior to such plant becoming ready for or placed in service.

(i) The utility shall furnish RUS with full particulars of and justification for any test or experimental run extending beyond a period of 120 days for nuclear plant, and a period of 90 days for all other plant.

(ii) Such particulars shall include a detailed operational and downtime log showing days of production, gross kilowatts generated by hourly increments, types, and periods of outages by hours with explanation thereof, beginning with the first date the equipment was either tested or synchronized on the line to the end of the test period.

(6) The cost of efficiency or other tests made subsequent to the date equipment becomes available for service shall be charged to the appropriate expense accounts, except that tests to determine whether equipment meets the specifications and requirements as to efficiency, or performance guaranteed by manufacturers, made after operations have commenced and within the period specified in the agreement or contract of purchase, may be charged to the appropriate electric plant accounts.

(j) *Additions and retirements of electric plant.* (1) For the purpose of avoiding undue refinement in accounting for additions to and retirements and replacements of electric plant, all property shall be considered as consisting of retirement units and minor items of property.

(2) The addition and retirement of retirement units shall be accounted for as follows:

(i) When a retirement unit is added to electric plant, the cost thereof shall be added to the appropriate electric plant account, except that when units are acquired in the acquisition of any electric plant constituting an operating system, they shall be accounted for as provided in paragraph (e) of this section.

(ii) When a retirement unit is retired from electric plant, with or without replacement, the book cost thereof shall be credited to the electric plant account in which it is included, determined in the manner set forth in Item in paragraph (j)(4) of this section. If the retirement unit is of a depreciable class, the book cost of the unit retired and credited to electric plant shall be charged to the accumulated provision for depreciation applicable to such property. The cost of removal and the salvage shall be charged or credited, as appropriate, to such depreciation account.

(3) The addition and retirement of minor items of property shall be accounted for as follows:

(i) When a minor item of property which did not previously exist is added to plant, the cost thereof shall be accounted for in the same manner as for the addition of a retirement unit, as set forth in Item in paragraph (j)(2)(i) of this section, if a substantial addition results, otherwise the charge shall be to the appropriate maintenance expense account.

(ii) When a minor item of property is retired and not replaced, the book cost thereof shall be credited to the electric plant account in which it is included; and, in the event the minor item is a part of depreciable plant, the account for accumulated provision for depreciation shall be charged with the book cost and cost of removal and credited with the salvage. If, however, the book cost of the minor item retired and not replaced has been or will be accounted for by its inclusion in the retirement unit of which it is a part when such unit is retired, no separate credit to the property account is required when such minor item is retired.

(iii) When a minor item of depreciable property is replaced independently of the retirement unit of which it is a part, the cost of replacement shall be charged to the maintenance account appropriate for the item, except that if the replacement effects a substantial betterment (the primary aim of which is to make the property affected more useful, more efficient, of greater durability, or of greater capacity), the excess cost of the replacement over the estimated cost at current prices of re-

placing without betterment shall be charged to the appropriate electric plant accounts.

(4) The book cost of electric plant retired shall be the amount at which such property is included in the electric plant accounts, including all components of construction costs. The book cost shall be determined from the utility's records and if this cannot be done, it shall be estimated. When it is impracticable to determine the book cost of each unit, due to the relatively large number or small cost thereof, an appropriate average book cost of the units with due allowance for any differences in size and character, shall be used as the book cost of the units retired.

(5) The book cost of land retired shall be credited to the appropriate land accounts. If the land is sold, the difference between the book cost (less any accumulated provision for depreciation or amortization therefore which has been authorized and provided) and the sale price of the land (less commissions and other expenses of making the sale) shall be recorded in Account 411.6, Gains from Disposition of Utility Plant, or Account 411.7, Losses from Disposition of Utility Plant, when the property has been recorded in Account 105, Electric Plant Held for Future Use, otherwise to Accounts 421.1, Gain on Disposition of Property, or 421.2, Loss on Disposition of Property, as appropriate. If the land is not used in utility service but is retained by the utility, the book cost shall be charged to Account 105, Electric Plant Held for Future Use, or Account 121, Nonutility Property, as appropriate.

(6) The book cost less net salvage of depreciable electric plant retired shall be charged in its entirety to Account 108, Accumulated Provision for Depreciation of Electric Utility Plant in Service. Any amounts which, by approval or order of RUS, are charged to Account 182.1, Extraordinary Property Losses, shall be credited to Account 108.

(7) The accounting for the retirement of amounts included in Account 302, Franchises and Consents, and Account 303, Miscellaneous Intangible Plant, and the items of limited-term interest in land included in the accounts for

Rural Utilities Service, USDA

§ 1767.16

land and land rights, shall be as provided for in the text of Account 111, Accumulated Provision for Amortization of Electric Utility Plant in Service; Account 404, Amortization of Limited-Term Electric Plant; and Account 405, Amortization of Other Electric Plant.

(k) *Work order and property record system required.* (1) Each utility shall record all construction and retirements of electric plant by means of work orders or job orders. Separate work orders may be opened for additions to and retirements of electric plant or the retirements may be included with the construction work order, provided, however, that all items relating to the retirements shall be kept separate from those relating to construction and provided, further, that any maintenance costs involved in the work shall likewise be segregated.

(2) Each utility shall keep its work order system so as to show the nature of each addition to or retirement of electric plant, the total cost thereof, the source or sources of costs, and the electric plant account or accounts to which charged or credited. Work orders covering jobs of short duration may be cleared monthly.

(3) Each utility shall maintain records in which, for each plant account, the amounts of the annual additions and retirements are classified so as to show the number and cost of the various record units or retirement units.

(l) *Transfers of property.* When property is transferred from one electric plant account to another, from one utility department to another, such as from electric to gas, from one operating division or area to another, to or from Account 101, Electric Plant in Service; Account 104, Electric Plant Leased to Others; Account 105, Electric Plant Held for Future Use, and Account 121, Nonutility Property, the transfer shall be recorded by transferring the original cost thereof from the one account, department, or location to the other. Any related amounts carried in the accounts for accumulated provision for depreciation or amortization shall be transferred in accordance with the segregation of such accounts.

(m) *Common utility plant.* (1) If the utility is engaged in more than one

utility service, such as electric, gas, and water, and any of its utility plant is used in common for several utility services or for other purposes to such an extent and in such manner that it is impracticable to segregate it by utility services currently in the accounts, such property, with the approval of RUS, may be designated and classified as "common utility plant."

(2) The book amount of utility plant designated as common plant shall be included in Account 118, Other Utility Plant, and if applicable in part to the electric department, shall be segregated and accounted for in sub-accounts as electric plant is accounted for in Accounts 101 to 107, inclusive, and electric plant adjustments in Account 116, Other Electric Plant Adjustments; any amounts classifiable as common plant acquisition adjustments or common plant adjustments shall be subject to disposition as provided in Paragraphs C and B of Accounts 114 and 116, respectively, for amounts classified in those accounts. The original cost of common utility plant in service shall be classified according to the detailed utility plant accounts appropriate for the property.

(3) The utility shall be prepared to show, at any time, and to report to RUS annually, or more frequently, if required, and by utility plant accounts (301 to 399) the book cost of common utility plant, the allocation of such cost to the respective departments using the common utility plant, and the basis of the allocation.

(4) The accumulated provision for depreciation and amortization of the utility shall be segregated so as to show the amount applicable to the property classified as common utility plant.

(5) The expenses of operation, maintenance, rents, depreciation and amortization of common utility plant shall be recorded in the accounts prescribed herein, but designated as common expenses, and the allocation of such expenses to the departments using the common utility plant shall be supported in such manner as to reflect readily the basis of allocation used.

(n) *Transmission and distribution plant.* For the purpose of this system of accounts:

§ 1767.17

(1) *Transmission system* is all land, conversion structures, and equipment employed at a primary source of supply (i.e. generating station, or point of receipt in the case of purchased power) to change the voltage or frequency of electricity for the purpose of its more efficient or convenient transmission; all land, structures, lines, switching and conversion stations, high tension apparatus, and their control and protective equipment between a generating or receiving point and the entrance to a distribution center or wholesale point; and all lines and equipment whose primary purpose is to augment, integrate or tie together the sources of power supply.

(2) *Distribution system* is all land, structures, conversion equipment, lines, line transformers, and other facilities employed between the primary source of supply (i.e. generating station, or point of receipt in the case of purchased power) and of delivery to customers, which are not includible in transmission system, as defined in Item in paragraph (n)(1) of this section, whether or not such land, structures, and facilities are operated as part of a transmission system or as part of a distribution system.

NOTE: Stations which change electricity from transmission to distribution voltage shall be classified as distribution stations.

(3) Where poles or towers support both transmission and distribution conductors, the poles, towers, anchors, guys, and rights-of-way shall be classified as transmission system. The conductors, cross-arms, braces, grounds, tie wire, and insulators shall be classified as transmission or distribution facilities, according to the purpose for which used.

(4) Where underground conduit contains both transmission and distribution conductors, the underground conduit and right-of-way shall be classified as distribution system. The conductors shall be classified as transmission or distribution facilities according to the purpose for which used.

(5) Land (other than rights-of-way) and structures used jointly for transmission and distribution purposes shall be classified as transmission or distribution according to the major use thereof.

7 CFR Ch. XVII (1–1–97 Edition)

(o) *Hydraulic production plant.* For purpose of this system of accounts hydraulic production plant is all land and land rights, structures and improvements used in connection with hydraulic power generation, reservoirs, dams and waterways, water wheels, turbines, generators, accessory electric equipment, roads, railroads, and bridges and structures and improvements used in connection with fish and wildlife, and recreation.

(p) *Nuclear fuel records required.* Each utility shall keep all the necessary records to support the entries to the various nuclear fuel plant accounts classified under “Assets and Other Debts,” Utility Plant Accounts 120.1 through 120.5, inclusive; Account 518, Nuclear Fuel Expense; and Account 157, Nuclear Materials Held for Sale. These records shall be so kept as to readily furnish the basis of the computation of the net nuclear fuel costs.

§ 1767.17 Operating expense instructions.

(a) *Supervision and engineering.* The supervision and engineering includible in the operating expense accounts shall consist of the pay and expenses of superintendents, engineers, clerks, other employees, and consultants engaged in supervising and directing the operation and maintenance of each utility function. Whenever allocations are necessary in order to arrive at the amount to be included in any account, the method and basis of allocation shall be reflected by underlying records.

(1) Labor items:

(i) Special tests to determine efficiency of equipment operation;

(ii) Preparing or reviewing budgets, estimates, and drawings relating to operation or maintenance for departmental approval;

(iii) Preparing instructions for operations and maintenance activities;

(iv) Reviewing and analyzing operating results;

(v) Establishing organizational setup of departments and executing changes therein;

(vi) Formulating and reviewing routines of departments and executing changes therein;

(vii) General training and instruction of employees by supervisors whose pay

Rural Utilities Service, USDA

§1767.17

is chargeable hereto. Specific instructions and training in a particular type of work is chargeable to the appropriate functional account (See §1767.16 (c) (19));

(viii) Secretarial work for supervisory personnel, but not general clerical and stenographic work chargeable to other accounts.

(2) Expense items:

(i) Consultants' fees and expenses;

(ii) Meals, traveling and incidental expenses.

(b) *Maintenance.* (1) The cost of maintenance chargeable to the various operating expense and clearing accounts includes labor, materials, overheads and other expenses incurred in maintenance work. A list of work operations applicable generally to utility plant is included hereunder. Other work operations applicable to specific classes of plant are listed in functional maintenance expense accounts.

(2) Materials recovered in connection with the maintenance of property shall be credited to the same account to which the maintenance cost was charged.

(3) If the book cost of any property is carried in Account 102, Electric Plant Purchased or Sold, the cost of maintaining such property shall be charged to the accounts for maintenance of property of the same class and use, the book cost of which is carried in other electric plant in service accounts. Maintenance of property leased from others shall be treated as provided in paragraph (c) of this section.

(4) Items:

(i) Direct field supervision of maintenance;

(ii) Inspecting, testing, and reporting on condition of plant specifically to determine the need for repairs, replacements, rearrangements and changes and inspecting and testing the adequacy of repairs which have been made;

(iii) Work performed specifically for the purpose of preventing failure, restoring serviceability or maintaining life of plant;

(iv) Rearranging and changing the location of plant not retired;

(v) Repairing for reuse materials recovered from plant;

(vi) Testing for, locating, and clearing trouble;

(vii) Net cost of installing, maintaining, and removing temporary facilities to prevent interruptions in service; and

(viii) Replacing or adding minor items of plant which do not constitute a retirement unit.

(c) *Rents.* (1) The rent expense accounts provided under the several functional groups of expense accounts shall include all rents, including taxes paid by the lessee on leased property, for property used in utility operations, except minor amounts paid for occasional or infrequent use of any property or equipment and all amounts paid for use of equipment that, if owned, would be includible in plant Accounts 391 to 398 inclusive, which shall be treated as an expense item and included in the appropriate function account and rents which are chargeable to clearing accounts, and distributed therefrom to the appropriate account.

(2) If rents cover property used for more than one function such as production and transmission, or by more than one department, the rents shall be apportioned to the appropriate rent expense or clearing accounts of each department on an actual, or if necessary, an estimated basis.

(3) When a portion of property or equipment rented from others for use in connection with utility operations is subleased, the revenue derived from such subleasing shall be credited to the rent revenue account in operating revenues; provided, however, that in case the rent was charged to a clearing account, amounts received from subleasing the property shall be credited to such clearing account.

(4) The cost, when incurred by the lessee, of operating and maintaining leased property, shall be charged to the accounts appropriate for the expense if the property were owned.

(5) The cost incurred by the lessee of additions and replacements to electric plant leased from others shall be accounted for as provided in §1767.16 (f).

(d) *Training costs.* (1) When it is necessary that employees be trained to specifically operate or maintain plant facilities that are being constructed, the related costs shall be accounted for as a current operating and maintenance expense.

§ 1767.18

(2) These expenses shall be charged to the appropriate functional accounts currently as they are incurred.

(3) When the training costs involved relate to facilities which are not conventional in nature, or are new to the company's operations, see § 1767.16 (c) (19), for the accounting.

§ 1767.18 Assets and other debits.

The asset and other debits accounts identified in this section shall be used by all RUS borrowers.

ASSETS AND OTHER DEBITS

Utility Plant

101 Electric Plant in Service

A. This account shall include the original cost of electric plant, included in Accounts 301 to 399, prescribed herein, owned and used by the utility in its

electric utility operations, and having an expectation of life in service of more than one year from date of installation, including such property owned by the utility but held by nominees.

B. (See also Account 106 for unclassified construction costs of completed plant actually in service.)

C. The cost of additions to and betterments of property leased from others, which are includible in this account, shall be recorded in subdivisions separate and distinct from those relating to owned property. (See §1767.16 (f).)

101.1 Property Under Capital Leases

A. This account shall include the amount recorded under capital leases for plant leased from others and used by the utility in its utility operations.

B. The electric property included in this account shall be classified separately according to the detailed accounts (301 to 399) prescribed for electric plant in service.

C. Records shall be maintained with respect to each capital lease reflection: (1) name of lessor, (2) basic details of lease, (3) terminal date, (4) original cost or fair market value of property leased, (5) future minimum lease payments, (6) executory costs, (7) present value of minimum lease payments, (8) the amount representing interest and the interest rate used, and (9) expenses paid.

102 Electric Plant Purchased or Sold

A. This account shall be charged with the cost of electric plant acquired as an operating unit or system by purchase, merger, consolidation liquidation, or otherwise, and shall be credited with the selling price of like property transferred to others pending the distribution to appropriate accounts in accordance with §1767.16 (e).

B. Within 6 months from the date of acquisition or sale of property recorded herein, the borrower shall file with RUS the proposed journal entries to clear from this account the amounts recorded herein.

§ 1767.18

7 CFR Ch. XVII (1–1–97 Edition)

**103 Experimental Electric Plant
Unclassified**

A. This account shall include the cost of electric plant which was constructed as a research, development, and demonstration plant under the provisions of Paragraph C, Account 107, Construction Work in Progress—Electric, and due to the nature of the plant, it is desirous to operate it for a period of time in an experimental status.

B. Amounts in this account shall be transferred to Account 101, Electric Plant in Service, or Account 121, Non-utility Property, as appropriate when the project is no longer considered as experimental.

C. The depreciation on property in this account shall be charged to Account 403, Depreciation Expense, and credited to Account 108, Accumulated Provision for Depreciation of Electric Utility Plant. The amounts herein shall be depreciated over a period which would correspond to the estimated useful life of the relevant project considering the characteristics involved. However, when projects are transferred to Account 101, Electric Plant in Service, a new depreciation rate based upon the remaining service life and undepreciated amounts, will be established.

D. Records shall be maintained with respect to each unit of experiment so that full details may be obtained as to the cost, depreciation, and the experimental status.

E. Should it be determined that experimental plant recorded in this account will fail to satisfactorily perform its function, the costs thereof shall be accounted for as directed or authorized by RUS.

104 Electric Plant Leased to Others

A. This account shall include the original cost of electric plant owned by the utility, but leased to others as operating units or systems, where the lessee has exclusive possession.

B. The property included in this account shall be classified according to the detailed accounts (301 to 399) prescribed for electric plant in service and this account shall be maintained in such detail as though the property

were used by the owner in its utility operations.

105 Electric Plant Held for Future Use

A. This account shall include the original cost of electric plant (except land and land rights) owned and held for future use in electric service under a definite plan for such use, to include: (1) Property acquired (except land and land rights) but never used by the utility in electric service, but held for such service in the future under a definite plan, and (2) property (except land and land rights) previously used by the utility in service but retired from such service and held pending its reuse in the future, under a definite plan, in electric service.

B. This account shall also include the original cost of land and land rights owned and held for future use in electric service under a plan for such use, to include land and land rights: (1) Acquired but never used by the utility in electric service, but held for such service in the future under a plan, and (2) previously held by the utility in service, but retired from such service and held pending its reuse in the future under a plan, in electric service. (See § 1767.16 (g).)

C. In the event that property recorded in this account shall no longer be needed or appropriate for future utility operations, the borrower shall notify RUS of such condition and request approval of journal entries to remove such property from this account.

D. Gains or losses from the sale of land and land rights or other disposition of such property previously recorded in this account and not placed in utility service shall be recorded directly in Accounts 411.6 or 411.7, as appropriate, except when determined to be significant by RUS. Upon such a determination, the amounts shall be transferred to Account 256, Deferred Gains from Disposition of Utility Plant, or Account 187, Deferred Losses from Disposition of Utility Plant, and amortized to Account 411.6, Gains from Disposition of Utility Plant, or Account 411.7, Losses from Disposition of Utility Plant, as appropriate.

E. The property included in this account shall be classified according to

Rural Utilities Service, USDA

§ 1767.18

the detail accounts (301 to 399) prescribed for electric plant in service and the account shall be maintained in such detail as though the property were in service.

NOTE: Materials and supplies, meters and transformers held in reserve, and normal spare capacity of plant in service shall not be included in this account.

106 Completed Construction not Classified—Electric

At the end of the year or such other date as a balance sheet may be required by RUS, this account shall include the total of the balances of work orders for electric plant which has been completed and placed in service but which work orders have not been classified for transfer to the detailed electric plant accounts.

NOTE: For the purpose of reporting to RUS, the classification of electric plant in service by accounts is required, the utility shall also report the balance in this account tentatively classified as accurately as practicable according to prescribed account classifications. The purpose of this provision is to avoid any significant omissions in reported amounts of electric plant in service.

107 Construction Work in Progress—Electric

A. This account shall include the total of the balances of work orders for electric plant in process of construction.

B. Work orders shall be cleared from this account as soon as practicable, after completion of the job. Further, if a project, such as a hydroelectric project, a steam station, or a transmission line, is designed to consist of two or more units or circuits which may be placed in service at different dates, any expenditures which are common to and which will be used in the operation of the project as a whole shall be included in electric plant in service upon the completion and the readiness for service of the first unit. Any expenditures which are identified exclusively with units of property not yet in service shall be included in this account.

C. Expenditures on research, development, and demonstration projects for construction of utility facilities are to be included in a separate subdivision in

this account. Records must be maintained to show separately each project along with complete detail of the nature and purpose of the research, development, and demonstration project together with the related costs.

D. Account 107 shall be subaccounted as follows:

107.1 Construction Work in Progress—Contract

107.2 Construction Work in Progress—Force Account

107.3 Construction Work in Progress—Special Equipment

108 Accumulated Provision for Depreciation of Electric Utility Plant

A. This account shall be credited with the following:

1. Amounts charged to Account 403, Depreciation Expense, or to clearing accounts for current depreciation expense for electric plant in service.

2. Amounts charged to Account 421, Miscellaneous Nonoperating Income, for depreciation expense on property included in Account 105, Electric Plant Held for Future Use. Include, also, the balance of accumulated provision for depreciation on property when transferred to Account 105, Electric Plant Held for Future Use, from other property accounts. Normally, Account 108 will not be used for current depreciation provision because, as provided herein, the service life during which depreciation is computed commences with the date property is includible in electric plant in service; however, if special circumstances indicate the propriety of current accruals for depreciation, such charges shall be made to Account 421, Miscellaneous Nonoperating Income.

3. Amounts charged to Account 413, Expenses of Electric Plant Leased to Others, for electric plant included in Account 104, Electric Plant Leased to Others.

4. Amounts charged to Account 416, Costs and Expenses of Merchandising, Jobbing, and Contract Work, or to clearing accounts for current depreciation expense.

5. Amounts of depreciation applicable to electric properties acquired as operating units or systems. (See § 1767.16 (e).)

§ 1767.18

6. Amounts charged to Account 182.1, Extraordinary Property Losses, when authorized by RUS.

7. Amounts of depreciation applicable to electric plant donated to the utility.

The utility shall maintain separate subaccounts for depreciation applicable to electric plant in service, electric plant leased to others, and electric plant held for future use.)

B. At the time of retirement of depreciable electric utility plant, this account shall be charged with the book cost of the property retired and the cost of removal and shall be credited with the salvage value and any other amounts recovered, such as insurance. When retirement, costs of removal and salvage are entered originally in retirement work orders, the net total of such work orders may be included in a separate subaccount hereunder. Upon completion of the work order, the proper distribution to subdivisions of this account shall be made as provided in the following paragraph.

C. Account 108 shall be subaccounted as follows:

- 108.1 Accumulated Provision for Depreciation of Steam Production Plant
- 108.2 Accumulated Provision for Depreciation of Nuclear Production Plant
- 108.3 Accumulated Provision for Depreciation of Hydraulic Production Plant
- 108.4 Accumulated Provision for Depreciation of Other Production Plant
- 108.5 Accumulated Provision for Depreciation of Transmission Plant
- 108.6 Accumulated Provision for Depreciation of Distribution Plant
- 108.7 Accumulated Provision for Depreciation of General Plant
- 108.8 Retirement Work in Progress

These subsidiary records shall reflect the current credits and debits to this account in sufficient detail to show separately for each such functional classification: (1) the amount of accrual for depreciation, (2) the book cost of property retired, (3) cost of removal, (4) salvage, and (5) other items, including recoveries from insurance.

D. When transfers of plant are made from one electric plant account to another, or from or to another utility department, or from or to nonutility property accounts, the accounting for depreciation shall be as provided in § 1767.16 (l).

7 CFR Ch. XVII (1–1–97 Edition)

E. The utility is restricted in its use of the accumulated provision for depreciation to the purposes set forth above. It shall not transfer any portion of this account to retained earnings or make any other use thereof without authorization by RUS.

109 [Reserved]

110 [Reserved]

111 Accumulated Provision for Amortization of Electric Utility Plant

A. This account shall be credited with the following:

1. Amounts charged to Account 404, Amortization of Limited-Term Electric Plant, for the current amortization of limited-term electric plant investments.

2. Amounts charged to Account 421, Miscellaneous Nonoperating Income, for amortization expense on property included in Account 105, Electric Plant Held for Future Use. Include also the balance of accumulated provision for amortization on property when transferred to Account 105, Electric Plant Held for Future Use, from other property accounts. See also Paragraph A(2), Account 108, Accumulated Provision for Depreciation of Electric Utility Plant.

3. Amounts charged to Account 405, Amortization of Other Electric Plant.

4. Amounts charged to Account 413, Expenses of Electric Plant Leased to Others, for the current amortization of limited-term or other investments subject to amortization included in Account 104, Electric Plant Leased to Others.

5. Amounts charged to Account 425, Miscellaneous Amortization, for the amortization of intangible or other electric plant which does not have a definite or terminable life and is not subject to charges for depreciation expense, with RUS approval.

(The utility shall maintain subaccounts of this account for the amortization applicable to electric plant in service, electric plant leased to others and electric plant held for future use.)

B. When any property to which this account applies is sold, relinquished, or otherwise retired from service, this account shall be charged with the amount previously credited in respect

Rural Utilities Service, USDA

§ 1767.18

to such property. The book cost of the property so retired less the amount chargeable to this account and less the net proceeds realized at retirement shall be included in Account 421.1, Gain on Disposition of Property, or Account 421.2, Loss on Disposition of Property, as appropriate.

C. For general ledger and balance sheet purposes, this account shall be regarded and treated as a single composite provision for amortization. For purposes of analysis, however, each utility shall maintain subsidiary records in which this account is segregated according to the following functional classification for electric plant: (1) Steam production, (2) Nuclear production, (3) Hydraulic production, (4) Other production, (5) Transmission, (6) Distribution, and (7) General. These subsidiary records shall reflect the current credits and debits to this account in sufficient detail to show separately for each such functional classification: (1) the amount of accrual for amortization, (2) the book cost of property retired, (3) cost of removal, (4) salvage, and (5) other items, including recoveries from insurance.

D. The utility is restricted in its use of the accumulated provision for amortization to the purposes set forth above. It shall not transfer any portion of this account to retained earnings or make any other use thereof without authorization by RUS.

112 [Reserved]

113 [Reserved]

114 Electric Plant Acquisition Adjustments

A. This account shall include the difference between the cost to the accounting utility of electric plant acquired as an operating unit or system by purchase, merger, consolidation, liquidation, or otherwise, and the original cost, estimated, if not known, of such property, less the amount or amounts credited by the accounting utility at the time of acquisition to accumulated provisions for depreciation and amortization and contributions in aid of construction with respect to such property.

B. With respect to acquisitions after the effective date of this system of accounts, this account shall be subdivided so as to show the amounts included herein for each property acquisition and to electric plant in service, electric plant held for future use, and electric plant leased to others. (See § 1767.16 (e).)

C. Debit amounts recorded in this account related to plant and land acquisition may be amortized to Account 425, Miscellaneous Amortization, over a period not longer than the estimated remaining life of the properties to which such amounts relate. Amounts related to the acquisition of land only may be amortized to Account 425 over a period of not more than 15 years. Should a utility wish to account for debit amounts in this account in any other manner, it shall petition RUS for authority to do so. Credit amounts recorded in this account shall be accounted for as directed by RUS.

115 Accumulated Provision for Amortization of Electric Plant Acquisition Adjustments

This account shall be credited or debited with amounts which are includible in Account 406, Amortization of Electric Plant Acquisition Adjustments, or Account 425, Miscellaneous Amortization, for the purpose of providing for the extinguishment of amounts in Account 114, Electric Plant Acquisition Adjustments, in instances where the amortization of Account 114 is not being made by direct write-off of the account.

116 Other Electric Plant Adjustments

A. This account shall include the difference between the original cost, estimated if not known, and the book cost of electric plant to the extent that such difference is not properly includible in Account 114, Electric Plant Acquisition Adjustments. (See § 1767.16 (a) (3))

B. Amounts included in this account shall be classified in such manner as to show the origin of each amount and shall be disposed of as RUS may approve or direct.

NOTE: The provisions of this account shall not be construed as approving or authorizing

§ 1767.18

the recording of appreciation of electric plant.

118 Other Utility Plant

This account shall include the balances in accounts for utility plant, other than electric plant, such as gas, or railway.

119 Accumulated Provision for Depreciation and Amortization of Other Utility Plant

This account shall include the accumulated provision for depreciation and amortization applicable to utility property other than electric plant.

120.1 Nuclear Fuel in Process of Refinement, Conversion, Enrichment, and Fabrication

A. This account shall include the original cost to the utility of nuclear fuel materials while in process of refinement, conversion, enrichment, and fabrication into nuclear fuel assemblies and components, including processing, fabrication, and necessary shipping costs. This account shall also include the salvage value of nuclear materials which are actually being reprocessed for use and were transferred from Account 120.5, Accumulated Provision for Amortization of Nuclear Fuel Assemblies. (See § 1767.10 (a) (27).)

B. This account shall be credited and Account 120.2, Nuclear Fuel Materials and Assemblies—Stock Account, shall be debited for the cost of completed fuel assemblies delivered for use in refueling or to be held as spares. In the case of the initial core loading, the transfer shall be made directly to Account 120.3, Nuclear Fuel Assemblies in Reactor, upon the conclusion of the experimental or test period of the plant prior to its becoming available for service.

Items

1. Cost of natural uranium, uranium ores concentrates or other nuclear fuel sources, such as thorium, plutonium, and U-233.
2. Value of recovered nuclear materials being reprocessed for use.
3. Milling process costs.
4. Sampling and weighing, and assaying costs.

7 CFR Ch. XVII (1–1–97 Edition)

5. Purification and conversion process costs.

6. Costs of enrichment by gaseous diffusion or other methods.

7. Costs of fabrication into fuel forms suitable for insertion in the reactor.

8. All shipping costs of materials and components, including shipping of fabricated fuel assemblies to the reactor site.

9. Use charges on leased nuclear materials while in process of refinement, conversion, enrichment, and fabrication.

120.2 Nuclear Fuel Materials and Assemblies—Stock Account

A. This account shall be debited and Account 120.1, Nuclear Fuel in Process of Refinement, Conversion, Enrichment and Fabrication, shall be credited with the cost of fabricated fuel assemblies delivered for use in refueling or to be carried in stock as spares. It shall also include the original cost of fabricated fuel assemblies purchased in completed form. This account shall also include the original cost of partially irradiated fuel assemblies being held in stock for reinsertion in a reactor which had been transferred from Account 120.3, Nuclear Fuel Assemblies in Reactor.

B. When fuel assemblies included in this account are inserted in a reactor, this account shall be credited and Account 120.3, Nuclear Fuel Assemblies in Reactor, debited for the cost of such assemblies.

C. This account shall also include the cost of nuclear materials and byproduct materials being held for future use and not actually in process in Account 120.1, Nuclear Fuel in Process of Refinement, Conversion, Enrichment and Fabrication.

120.3 Nuclear Fuel Assemblies in Reactor

A. This account shall include the cost of nuclear fuel assemblies when inserted in a reactor for the production of electricity. The amounts included herein shall be transferred from Account 120.2, Nuclear Fuel Materials and Assemblies—Stock Account, except for the initial core loading which will be transferred directly from Account

Rural Utilities Service, USDA

§ 1767.18

120.1, Nuclear Fuel in Process of Refinement, Conversion, Enrichment and Fabrication.

B. Upon removal of fuel assemblies from a reactor, the original cost of the assemblies removed shall be transferred to Account 120.4, Spent Nuclear Fuel, or Account 120.2, Nuclear Fuel Materials and Assemblies—Stock Account, as appropriate.

120.4 Spent Nuclear Fuel

A. This account shall include the original cost of nuclear fuel assemblies, in the process of cooling, transferred from Account 120.3, Nuclear Fuel Assemblies in Reactor, upon removal from a reactor pending reprocessing.

B. This account shall be credited and Account 120.5, Accumulated Provision for Amortization of Nuclear Fuel Assemblies, debited for fuel assemblies, after the cooling period is over, at the cost recorded in this account.

120.5 Accumulated Provision for Amortization of Nuclear Fuel Assemblies

A. This account shall be credited and Account 518, Nuclear Fuel Expense, shall be debited for the amortization of the net cost of nuclear fuel assemblies used in the production of energy. The net cost of nuclear fuel assemblies subject to amortization shall be the original cost of nuclear fuel assemblies, plus or less the expected net salvage value of uranium, plutonium, and other by-products.

B. This account shall be credited with the net salvage value of uranium, plutonium, and other nuclear by-products when such items are sold, transferred or otherwise disposed. Account 120.1, Nuclear Fuel in Process of Refinement, Conversion, Enrichment and Fabrication, shall be debited with the net salvage value of nuclear materials to be reprocessed. Account 157, Nuclear Materials Held for Sale, shall be debited for the net salvage value of nuclear materials not to be reprocessed but to be sold or otherwise disposed of and Account 120.2, Nuclear Fuel Materials and Assemblies—Stock Account, will be debited with the net salvage value of nuclear materials that will be held for future use and not actually in process, in Account 120.1, Nuclear Fuel

in Process of Refinement, Conversion, Enrichment, and Fabrication.

C. This account shall be debited and Account 120.4, Spent Nuclear Fuel, shall be credited with the cost of fuel assemblies at the end of the cooling period.

120.6 Nuclear Fuel Under Capital Leases

A. This account shall include the amount recorded under capital leases for nuclear fuel leased from others for use by the utility in its utility operations.

B. Records shall be maintained with respect to each capital lease reflecting: (1) name of lessor, (2) basic details of lease, (3) terminal date, (4) original cost or fair market value of nuclear fuel leased, (5) future minimum lease payments, (6) the amount representing interest and the interest rate used, and (7) expenses paid.

Other Property and Investments

121 Nonutility Property

A. This account shall include the book cost of land, structures, equipment, or other tangible or intangible property owned by the utility, but not used in utility service and not properly includible in Account 105, Electric Plant Held for Future Use.

B. This account shall also include the amount recorded under capital leases for property leased from others and used by the utility in its nonutility operations. Records shall be maintained with respect to each lease reflecting: (1) name of lessor, (2) basic details of lease, (3) terminal date, (4) original cost or fair market value of property leased, (5) future minimum lease payments, (6) executory costs, (7) present value of minimum lessee payments, (8) the amount representing interest and the interest rate used, and (9) expenses paid.

C. This account shall be subdivided so as to show the amount of property used in operations which are nonutility in character but nevertheless constitute a distinct operating activity of the company (such as operation of an ice department where such activity is not classed as a utility) and the amount of miscellaneous property not

§ 1767.18

used in operations. The records in support of each subaccount shall be maintained so as to show an appropriate classification of the property.

NOTE: The gain from the sale or other disposition of property included in this account which had been previously recorded in Account 105, Electric Plant Held for Future Use, shall be accounted for in accordance with Paragraph C of Account 105.

122 Accumulated Provision for Depreciation and Amortization of Nonutility Property

This account shall include the accumulated provision for depreciation and amortization applicable to nonutility property.

123 Investment in Associated Companies

A. This account shall include the book cost of investments in securities issued or assumed by associated companies and investment advances to such companies, including interest accrued thereon when such interest is not subject to current settlement, provided that the investment does not relate to a subsidiary company. (If the investment relates to a subsidiary company, it shall be included in Account 123.11, Investment in Subsidiary Companies.) Include herein the offsetting entry to the recording of amortization of discount or premium on interest bearing investments. (See Account 419, Interest and Dividend Income.)

B. This account shall be maintained in such manner as to show the investment in securities of, and advances to, each associated company together with full particulars regarding any of such investments that are pledged.

NOTE A: Securities and advances of associated companies owned and pledged shall be included in this account, but such securities, if held in special deposits or in special funds, shall be included in the appropriate deposit or fund account. A complete record of securities pledged shall be maintained.

NOTE B: Securities of associated companies held as temporary cash investments are includible in Account 136, Temporary Cash Investments.

NOTE C: Balances in open accounts with associated companies, which are subject to current settlement, are includible in Account 146, Accounts Receivable from Associated Companies.

7 CFR Ch. XVII (1–1–97 Edition)

NOTE D: The utility may write down the cost of any security in recognition of a decline in the value thereof. Securities shall be written off or written down to a nominal value if there is no reasonable prospect of substantial value. Fluctuations in market value shall not be recorded but a permanent impairment in the value of securities shall be recognized in the accounts. When securities are written off or written down, the amount of the adjustment shall be charged to Account 426.5, Other Deductions, or to an appropriate account for accumulated provisions for loss in value established as a separate subdivision of this account.

C. Account 123 shall be subaccounted as follows:

123.1 Patronage Capital from Associated Cooperatives

123.3 Investment in Associated Organizations—Federal Economic Development Loans

123.4 Investment in Associated Organizations—Non-Federal Economic Development Loans

123.11 Investment in Subsidiary Companies

123.21 Subscriptions to Capital Term Certificates—Supplemental Financing

123.22 Investment in Capital Term Certificates—Supplemental Financing

123.23 Other Investments in Associated Organizations

123.1 Patronage Capital from Associated Cooperatives

This account shall include patronage capital credits allocated to the accounting borrower by G&T cooperatives. It shall also include capital credits, deferred patronage refunds, or like items from other associated cooperatives. The account shall be maintained so as to reflect separately, the allocations of patronage capital and patronage refunds from each organization that makes such allocations to the borrower.

123.3 Investment in Associated Organizations—Federal Economic Development Loans

This account shall include investment advances of Federal funds received from a Rural Economic Development Grant to associated organizations for authorized rural economic development projects.

Rural Utilities Service, USDA

§ 1767.18

123.4 Investment in Associated Organizations—Non-Federal Economic Development Loans

This account shall include investment advances of non-Federal funds from the Rural Economic Development Grant revolving fund to associated organizations for authorized rural economic development projects.

123.11 Investment in Subsidiary Companies

A. This account shall include the cost of investments in securities issued or assumed by subsidiary companies and investment advances to such companies, including interest accrued thereon when such interest is not subject to current settlement, plus the equity in undistributed earnings or losses of such subsidiary companies since acquisition. This account shall be credited with any dividends declared by such subsidiaries.

B. This account shall be maintained in such a manner as to show separately for each subsidiary: the cost of such investments in the securities of the subsidiary at the time of acquisition; the amount of equity in the subsidiary's undistributed net earnings or net losses since acquisition; advances or loans to such subsidiary; and full particulars regarding any such investments that are pledged.

123.21 Subscriptions to Capital Term Certificates—Supplemental Financing

This account shall include the total subscriptions to capital term certificates of CFC. When subscriptions are paid, this account shall be credited and Account 123.22, Investments in Capital Term Certificates—Supplemental Financing, debited.

123.22 Investments in Capital Term Certificates—Supplemental Financing

This account shall include paid subscriptions in capital term certificates of CFC or other supplemental lenders.

123.23 Other Investments in Associated Organizations

This account shall include investments in capital stock, securities, membership fees, and investment advances to associated organizations other than provided for elsewhere. This account shall be maintained in such a manner as to show the investment in stock and securities of and advances to each associated organization.

Items

1. Investments in capital stock of associated organizations.
2. Investments in securities issued by associated organizations.
3. Membership fees in associated organizations, including NRECA, and Statewide associations of RUS-financed borrowers.
4. Investment advances to associated organizations.

124 Other Investments

A. This account shall include the book cost of investments in securities issued or assumed by nonassociated companies, investment advances to such companies, and any investments not accounted for elsewhere. Include also the offsetting entry to the recording of amortization of discount or premium on interest bearing investments. (See Account 419, Interest and Dividend Income.)

B. The records shall be maintained in such manner as to show the amount of each investment and the investment advances to each person.

C. Account 124 shall be subaccounted as follows:

124.1 Other Investments—Federal Economic Development Loans

124.2 Other Investments—Non-Federal Economic Development Loans

NOTE A: Securities owned and pledged shall be included in this account, but securities held in special deposits or in special funds shall be included in appropriate deposit or fund accounts. A complete record of securities pledged shall be maintained.

NOTE B: Securities held as temporary cash investments shall not be included in this account.

§ 1767.18

NOTE C: See Note D of Account 123.

124.1 Other Investments—Federal Economic Development Loans

This account shall include investment advances of Federal funds received from a Rural Economic Development Grant to nonassociated organizations for authorized rural economic development projects.

124.2 Other Investments—Non-Federal Economic Development Loans

This account shall include investment advances of non-Federal funds from the Rural Economic Development Grant revolving fund to nonassociated organizations for authorized rural economic development projects.

125 Sinking Funds

This account shall include the amount of cash and book cost of investments held in sinking funds. A separate account, with appropriate title, shall be kept for each sinking fund. Transfers from this account to special deposit accounts, may be made as necessary for the purpose of paying matured sinking fund obligations, or obligations called for redemption but not presented, or the interest thereon.

126 Depreciation Fund

This account shall include the amount of cash and the book cost of investments which have been segregated in a special fund for the purpose of identifying such assets with the accumulated provisions for depreciation.

128 Other Special Funds

This account shall include the amount of cash and book cost of investments which have been segregated in special funds for insurance, employee pensions, savings, relief, hospital, and other purposes not provided for elsewhere. A separate account, with appropriate title, shall be kept for each fund.

NOTE: Amounts deposited with a trustee under the terms of an irrevocable trust agreement for pensions or other employee benefits shall not be included in this account.

7 CFR Ch. XVII (1–1–97 Edition)

Current and Accrued Assets

Current and accrued assets are cash, those assets which are readily convertible into cash or are held for current use in operations or construction, current claims against others, payment of which is reasonably assured, and amounts accruing to the utility which are subject to current settlement, except such items for which accounts other than those designated as current and accrued assets are provided. There shall not be included in the category of accounts designated as current and accrued assets any item, the amount or collectibility of which is not reasonably assured, unless an adequate provision for possible loss has been made therefor. Items of current character but of doubtful value may be written down, and for record purposes carried in these accounts at nominal value.

131 Cash

A. This account shall include the amount of current cash funds except working funds.

B. Account 131 shall be subaccounted as follows:

131.1 Cash—General

131.2 Cash—Construction Fund—Trustee

131.3 Cash—Installation Loan and Collection Fund

131.4 Transfer of Cash

131.12 Cash—General—Economic Development Loan Funds

131.13 Cash—General—Economic Development Grant Funds

131.14 Cash—General—Economic Development Non-Federal Revolving Funds

131.1 Cash—General

This account shall include all cash of the organization not provided for elsewhere. Separate subaccounts may be maintained for each bank account in which general cash is maintained. Funds held by others for current obligations shall be recorded in Account 134, Other Special Deposits.

131.2 Cash—Construction Fund— Trustee

This account shall include the cash received from the Rural Utilities Service, CFC, and any other source of supplemental financing for financing the construction, purchase, and operation

Rural Utilities Service, USDA

§ 1767.18

of electric facilities. RUS construction loan fund advances shall be charged to this account and credited to Account 224.4, RUS Notes Executed—Construction—Debit. CFC and other supplemental lender construction loan fund advances shall be charged to this account and credited to Account 224.13, Supplemental Financing Notes Executed—Debit.

131.3 Cash—Installation Loan and Collection Fund

A. This account shall include the cash advanced on installation loans made subsequent to September 13, 1957. Such advances shall be debited to this account as received and credited to Account 224.10, RUS Notes Executed—Installation—Debit. This account shall also include interest and principal collections received on consumers' loans financed from RUS loans made subsequent to September 13, 1957.

B. Payments shall be made from this account solely for financing consumers' loans for the purpose of wiring of consumers' premises, and the acquisition and installation of electrical and plumbing appliances and equipment by consumers. The cash in this account is also used for the payment of principal and interest on installation loans made by RUS, subsequent to September 13, 1957, in accordance with the terms of the loan agreement.

131.4 Transfer of Cash

This account shall be used in transferring funds from one bank account to another. This account is charged when the check is drawn for the transfer and entered in the check register, and credited when the amount transferred is entered in the cash receipts book. This account is to be used as a clearing account and should not have a balance at the end of an accounting period.

131.12 Cash—General—Economic Development Funds

This account shall include the cash received from the Rural Utilities Service for Rural Economic Development Loans. Economic development loan advances shall be charged to this account and credited to Account 224.17, RUS

Notes Executed—Economic Development—Debit.

131.13 Cash—General—Economic Development Grant Funds

This account shall include cash received from the Rural Utilities Service for Rural Economic Development Grants. Economic development grant funds shall be charged to this account and credited to Account 224.18, Other Long-Term Debt—Grant Funds; Account 208, Donated Capital; or Account 421, Miscellaneous Nonoperating Income, as appropriate. This account shall be credited and either Account 123.3, Investment in Associated Organizations—Federal Economic Development Loans, or Account 124.1, Other Investments—Federal Economic Development Loans, shall be debited, as appropriate, with the amount of an economic development revolving fund loan.

131.14 Cash—General—Economic Development Non-Federal Revolving Funds

This account shall include all non-Federal funds comprising the economic development revolving fund. It shall include all funds supplied by the borrower as well as all cash received from the repayment of loans made from the economic development revolving fund. This account shall be credited and either Account 123.4, Investment in Associated Organizations—Non-Federal Economic Development Loans, or Account 124.2, Other Investments—Non-Federal Economic Development Loans, shall be debited, as appropriate, with the amount of an economic development revolving fund loan.

132 Interest Special Deposits

This account shall include special deposits with fiscal agents or others for the payment of interest.

133 Dividend Special Deposits

This account shall include special deposits with fiscal agents or others for the payment of dividends.

134 Other Special Deposits

This account shall include deposits with fiscal agents or others for special

§ 1767.18

purposes other than the payment of interest and dividends. Such special deposits may include cash deposited with Federal, state, or municipal authorities as a guaranty for the fulfillment of obligations; cash deposited with trustees to be held until mortgaged property sold, destroyed, or otherwise disposed of is replaced; and cash realized from the sale of the accounting utility's securities and deposited with trustees to be held until invested in property of the utility. Entries to this account shall specify the purpose for which the deposit is made.

NOTE: Assets available for general corporate purposes shall not be included in this account. Further, deposits for more than one year, which are not offset by current liabilities, shall not be charged to this account but to Account 128, Other Special Funds.

135 Working Funds

This account shall include cash advanced to officers, agents, employees, and others as petty cash or working funds.

136 Temporary Cash Investments

A. This account shall include the book cost of investments, such as demand and time loans, bankers' acceptances, United States Treasury certificates, marketable securities, and other similar investments, acquired for the purpose of temporarily investing cash.

B. This account shall be so maintained as to show separately temporary cash investments in securities of associated companies and of others. Records shall be kept of any pledged investments.

141 Notes Receivable

A. This account shall include the book cost, not includible elsewhere, of all collectible obligations in the form of notes receivable and similar evidences (except interest coupons) of money due on demand or within one year from the date of issue, except, however, notes receivable from associated companies. (See Account 136, Temporary Cash Investments, and Account 145, Notes Receivable from Associated Companies.)

NOTE: The face amount of notes receivable discounted, sold, or transferred without releasing the utility from liability as endorser

7 CFR Ch. XVII (1-1-97 Edition)

thereon, shall be credited to a separate subdivision of this account and appropriate disclosure shall be made in the financial statements of any contingent liability arising from such transactions.

B. Account 141 shall be subaccounted as follows:

141.1 Accumulated Provision for Uncollectible Notes—Credit

141.1 Accumulated Provision for Uncollectible Notes—Credit

This account shall be credited with amounts provided for losses on notes receivable which may become uncollectible, and also with collections on notes previously charged hereto. Concurrent charges shall be made to Account 904, Uncollectible Accounts.

142 Customer Accounts Receivable

A. This account shall include amounts due from customers for utility service and for merchandising, jobbing, and contract work. This account shall not include amounts due from associated companies.

B. This account shall be maintained so as to permit ready segregation of the amounts due for merchandising, jobbing, and contract work.

C. Account 142 shall be subaccounted as follows:

142.1 Customer Accounts Receivable—Electric

142.2 Customer Accounts Receivable—Other

142.1 Customer Accounts Receivable—Electric

This account shall include amounts due from customers for utility service.

142.2 Customer Accounts Receivable—Other

This account shall include amounts due from customers for merchandising, jobbing, and contract work.

143 Other Accounts Receivable

A. This account shall include amounts due the utility upon open accounts, other than amounts due from associated companies and from customers for utility services and merchandising, jobbing and contract work.

B. This account shall be maintained so as to show separately amounts due on subscriptions to capital stock and

Rural Utilities Service, USDA

§ 1767.18

from officers and employees. The account shall not include amounts advanced to officers or others as working funds. (See Account 135, Working Funds.)

144 Accumulated Provision for Uncollectible Accounts—Credit

A. This account shall include amounts provided for losses on accounts receivable which may become uncollectible, and also with collections on accounts previously charged hereto. Concurrent charges shall be made to Account 904, Uncollectible Accounts, for amounts applicable to utility operations, and to corresponding accounts for other operations. Records shall be maintained so as to show the write-offs of accounts receivable for each utility department.

B. Account 144 shall be subaccounted as follows:

144.1 Accumulated Provision for Uncollectible Customer Accounts—Credit

144.2 Accumulated Provision for Uncollectible Merchandising Accounts—Credit

144.3 Accumulated Provision for Uncollectible Accounts, Officers and Employees—Credit

144.4 Accumulated Provision for Other Uncollectible Accounts—Credit

144.1 Accumulated Provision for Uncollectible Customer Accounts—Credit

This account shall be credited with amounts provided for losses on accounts receivable which may become uncollectible, and also with collections on accounts previously charged hereto. Concurrent charges shall be made to Account 904, Uncollectible Accounts.

144.2 Accumulated Provision for Uncollectible Merchandising Accounts—Credit

This account shall be credited with amounts provided for losses on merchandising, jobbing, and contract work which may become uncollectible, and also with collections on accounts previously charged hereto. Concurrent charges shall be made to Account 904, Uncollectible Accounts, for amounts applicable to utility operations, and to

corresponding accounts for other operations.

144.3 Accumulated Provision for Uncollectible Accounts, Officers and Employees—Credit

This account shall be credited with amounts provided for losses on accounts receivable from officers and employees which may become uncollectible and also with collections on accounts previously charged hereto. Concurrent charges shall be made to Account 904, Uncollectible Accounts.

144.4 Accumulated Provision for Other Uncollectible Accounts—Credit

This account shall be credited with amounts provided for losses on accounts receivable which may become uncollectible and for which the recording of this credit has not been provided for elsewhere. This account shall also be credited with collections on accounts previously charged hereto. Concurrent charges shall be made to Account 904, Uncollectible Accounts, for amounts applicable to utility operations and to corresponding accounts for other operations.

145 Notes Receivable from Associated Companies

This account shall include notes upon which associated companies are liable, and which mature and are expected to be paid in full not later than one year from the date of issue, together with any interest thereon, and debit balances subject to current settlement in open accounts with associated companies. Items which do not bear a specified due date but which have been carried for more than twelve months and items which are not paid within twelve months from due date shall be transferred to Account 123, Investment in Associated Companies.

NOTE: The face amount of notes receivable discounted, sold or transferred without releasing the utility from liability as endorser thereon, shall be credited to a separate subdivision of this account and appropriate disclosure shall be made in the financial statements of any contingent liability arising from such transactions.

§ 1767.18

146 Accounts Receivable from Associated Companies

This account shall include drafts upon which associated companies are liable, and which mature and are expected to be paid in full not later than one year from the date of issue, together with any interest thereon, and debit balances subject to current settlement in open accounts with associated companies. Items which do not bear a specified due date but which have been carried for more than twelve months and items which are not paid within twelve months from due date shall be transferred to Account 123, Investment in Associated Companies.

NOTE: On the balance sheet, accounts receivable from an associated company may be offset against accounts payable to the same company.

151 Fuel Stock

This account shall include the book cost of fuel on hand.

Items

1. Invoice price of fuel less any cash or other discounts.
2. Freight, switching, demurrage, and other transportation charges, not including, however, any charges for unloading from the shipping medium.
3. Excise taxes, purchasing agents' commissions, insurance, and other expenses directly assignable to cost of fuel.
4. Operating, maintenance and depreciation expenses, and ad valorem taxes on utility-owned transportation equipment used to transport fuel from the point of acquisition to the unloading point.
5. Lease or rental costs of transportation equipment used to transport fuel from the point of acquisition to the unloading point.

152 Fuel Stock Expenses Undistributed

A. This account may include the cost of labor and of supplies used and expenses incurred in unloading fuel from the shipping medium and in the handling thereof prior to its use, if such expenses are sufficiently significant in amount to warrant being treated as a part of the cost of fuel inventory rather

7 CFR Ch. XVII (1–1–97 Edition)

than being charged direct to expense as incurred.

B. Amounts included herein shall be charged to expense as the fuel is used to the end that the balance herein shall not exceed the expenses attributable to the inventory of fuel on hand.

Items

Labor:

1. Procuring and handling of fuel.
2. All routine fuel analyses.
3. Unloading from shipping facility and placing in storage.
4. Moving of fuel in storage and transferring from one station to another.
5. Handling from storage or shipping facility to first bunker, hopper, bucket, tank, or holder of boiler house structure.
6. Operation of mechanical equipment such as locomotives, trucks, cars, boats, barges, and cranes.

Supplies and Expenses:

1. Tools, lubricants and other supplies.
2. Operating supplies for mechanical equipment.
3. Transportation and other expenses in moving fuel.
4. Stores expenses applicable to fuel.

153 Residuals

This account shall include the book cost of any residuals produced in the production or manufacturing processes.

154 Plant Materials and Operating Supplies

A. This account shall include the cost of materials purchased primarily for use in the utility business for construction, operation and maintenance purposes. It shall also include the book cost of materials recovered in connection with construction, maintenance, or the retirement of property, such materials being credited to construction, maintenance, or accumulated depreciation provision, respectively, and included herein as follows:

1. Reusable materials consisting of large individual items shall be included in this account at original cost, estimated if not known. The cost of repairing such items shall be charged to the

Rural Utilities Service, USDA

§1767.18

maintenance account appropriate for the previous use.

2. Reusable materials consisting of relatively small items, the identity of which (from the date of original installation to the final abandonment or sale thereof) cannot be ascertained without undue refinement in accounting, shall be included in this account at current prices new for such items. The cost of repairing such items shall be charged to the appropriate expense account as indicated by previous use.

3. Scrap and nonusable materials included in this account shall be carried at the estimated net amount realizable therefrom. The difference between the amounts realized for scrap and nonusable materials sold and the net amount at which the materials were carried in this account, as far as practicable, shall be adjusted to the accounts credited when the materials were charged to this account.

B. Materials and supplies issued shall be credited hereto and charged to the appropriate construction, operating expense, or other account on the basis of a unit price determined by the use of cumulative average, first-in-first-out, or such other method of inventory accounting as conforms with accepted accounting standards consistently applied.

Items

1. Invoice price of materials less cash or other discounts.

2. Freight, switching, or other transportation charges when practicable to include as part of the cost of particular materials to which they relate.

3. Customs duties and excise taxes.

4. Costs of inspection and special tests prior to acceptance.

5. Insurance and other directly assignable charges.

NOTE: Where expenses applicable to materials purchased cannot be directly assigned to particular purchases, they shall be charged to Account 163, Stores Expense Undistributed.

155 Merchandise

This account shall include the book cost of materials and supplies and appliances and equipment held primarily for merchandising, jobbing, and contract work. The principles prescribed

in accounting for utility materials and supplies shall be observed with respect to items carried in this account.

156 Other Materials and Supplies

This account shall include the book cost of materials and supplies held primarily for nonutility purposes. The principles prescribed in accounting for utility materials and supplies shall be observed with respect to items carried in this account.

157 Nuclear Materials Held for Sale

This account shall include the net salvage value of uranium, plutonium, and other nuclear materials held by the company for sale or other disposition that are not to be reused by the company in its electric utility operations. This account shall be debited and Account 120.5, Accumulated Provision for Amortization of Nuclear Fuel Assemblies, credited for such net salvage value. Any difference between the amount recorded in this account and the actual amount realized from the sale of materials shall be debited or credited, as appropriate, to Account 518, Nuclear Fuel Expense, at the time of such sale.

158.1 Allowance Inventory

A. This account shall include the cost of allowances owned by the utility and not withheld by the Environmental Protection Agency. See §1767.15 (u) and Account 158.2, Allowances Withheld.

B. This account shall be credited and Account 509, Allowances, shall be debited concurrent with the monthly emission of sulfur dioxide.

C. Separate subdivisions of this account shall be maintained so as to separately account for those allowances usable in the current year and in each subsequent year. The underlying records of these subdivisions shall be maintained in sufficient detail so as to identify each allowance included; the origin of each allowance; and the acquisition cost, if any, of the allowance.

158.2 Allowances Withheld

A. This account shall include the cost of allowances owned by the utility but withheld by the Environmental Protection Agency. (See §1767.15 (u).)

§ 1767.18

7 CFR Ch. XVII (1–1–97 Edition)

B. The inventory cost of the allowances released by the Environmental Protection Agency for use by the utility shall be transferred to Account 158.1, Allowance Inventory.

C. The underlying records of this account shall be maintained in sufficient detail so as to identify each allowance included; the origin of each allowance; and the acquisition cost, if any, of the allowances.

163 Stores Expense Undistributed

A. This account shall include the cost of supervision, labor, and expenses incurred in the operation of general storerooms, including purchasing, storage, handling, and distribution of materials and supplies.

B. This account shall be cleared by adding to the cost of materials and supplies issued, a suitable loading charge which will distribute the expense equitably over stores issues. The balance in the account at the close of the year shall not exceed the amount of stores expenses reasonably attributable to the inventory of materials and supplies, exclusive of fuel, as any amount applicable to fuel costs should be included in Account 152, Fuel Stock Expenses Undistributed.

Items

Labor:

1. Inspecting and testing materials and supplies when not assignable to specific items.
2. Unloading from shipping facility and placing in storage.
3. Supervision of purchasing and stores department to extent assignable to materials handled through stores.
4. Getting materials from stock and in readiness to go out.
5. Inventorying stock received or stock on hand by stores employees but not including inventories by general department employees as part of internal or general audits.
6. Purchasing department activities in checking material needs, investigating sources of supply, analyzing prices, preparing and placing orders, and related activities to extent applicable to materials handled through stores. (Optional: Purchasing department ex-

penses may be included in administrative and general expenses.)

7. Maintaining stores equipment.

8. Cleaning and tidying storerooms and stores offices.

9. Keeping stock records, including the recording and posting of material receipts and issues and maintaining inventory records of stock.

10. Collecting and handling scrap materials in stores.

Supplies and Expenses:

1. Adjustments of inventories of materials and supplies but not including large differences which can readily be assigned to important classes of materials and equitably distributed among the accounts to which such classes of materials have been charged since the previous inventory.

2. Cash and other discounts not practically assignable to specific materials.

3. Freight and express charges when not assignable to specific items.

4. Heat, light, and power for storerooms and store offices.

5. Brooms, brushes, sweeping compounds and other supplies used in cleaning and tidying storerooms and stores offices.

6. Injuries and damages.

7. Insurance on materials and supplies and on stores equipment.

8. Losses due to breakage, leakage, evaporation, fire or other causes, less credits for amounts received from insurance, transportation companies, or others in compensation of such losses.

9. Postage, printing, stationery, and office supplies.

10. Rent of storage space and facilities.

11. Communication service.

12. Excise and other similar taxes not assignable to specific materials.

13. Transportation expense on inward movement of stores and on transfer between storerooms but not including charges on materials recovered from retirements which shall be accounted for as part of the cost of removal.

NOTE: A physical inventory of each class of materials and supplies shall be made at least every two years.

165 Prepayments

A. This account shall include amounts representing prepayments of insurance, rents, taxes, interest, and

Rural Utilities Service, USDA

§ 1767.18

miscellaneous items, and shall be kept or supported in such manner as to disclose the amount of each class of prepayment.

B. Account 165 shall be subaccounted as follows:

165.1 Prepayments—Insurance

165.2 Other Prepayments

171 Interest and Dividends Receivable

This account shall include the amount of interest on bonds, mortgages, notes, commercial paper, loans, open accounts, and deposits, the payment of which is reasonably assured, and the amount of dividends declared or guaranteed on stocks owned.

NOTE A: Interest which is not subject to current settlement shall not be included herein but in the account in which the associated principle is recorded.

NOTE B: Interest and dividends receivable from associated companies shall be included in Account 146, Accounts Receivable from Associated Companies.

172 Rents Receivable

This account shall include rents receivable or accrued on property rented or leased by the utility to others.

NOTE: Rents receivable from associated companies shall be included in Account 146, Accounts Receivable from Associated Companies.

173 Accrued Utility Revenues

At the option of the utility, the estimated amount accrued for service rendered, but not billed at the end of any accounting period, may be included herein. If accruals are made for unbilled revenues, accruals shall also be made for unbilled expenses, such as the purchase of energy.

174 Miscellaneous Current and Accrued Assets

This account shall include the book cost of all other current and accrued assets, appropriately designated and supported so as to show the nature of each asset included herein.

Deferred Debits

181 Unamortized Debt Expense

This account shall include expenses related to the issuance or assumption

of debt securities. Amounts recorded in this account shall be amortized over the life of each respective issue under a plan which will distribute the amount equitably over the life of the security. The amortization shall be on a monthly basis, and the amounts thereof shall be charged to Account 428, Amortization of Debt Discount and Expense. Any unamortized amounts outstanding at the time that the related debt is prematurely reacquired shall be accounted for as indicated in § 1767.15 (q).

182.1 Extraordinary Property Losses

A. When authorized or directed by RUS, this account shall include extraordinary losses which could not reasonably have been anticipated and which are not covered by insurance or other provisions, such as unforeseen damages to property.

B. Application to RUS for permission to use this account shall be accompanied by a statement giving a complete explanation with respect to the items which it is proposed to include herein, the period over which, and the accounts to which it is proposed to write off the charges, and other pertinent information.

182.2 Unrecovered Plant and Regulatory Study Costs

A. This account shall include: (1) nonrecurring costs of studies and analyses mandated by regulatory bodies related to plants in service, transferred from Account 183, Preliminary Survey and Investigations Charges, and not resulting in construction; and (2) when authorized by RUS, significant unrecovered costs of plant facilities where construction has been cancelled or which have been prematurely retired.

B. This account shall be credited and Account 407, Amortization of Property Losses, Unrecovered Plant and Regulatory Study Costs, shall be debited over the period specified by RUS.

C. Any additional costs incurred, relative to the cancellation or premature retirement, may be included in this account and amortized over the remaining period of the original amortization period. Should any gains or recoveries be realized relative to the cancelled or prematurely retired plant, such amounts shall be used to reduce the

§ 1767.18

unamortized amount of the costs recorded herein.

D. In the event that the recovery of costs included herein is disallowed in the rate proceedings, the disallowed costs shall be charged to Account 426.5, Other Deductions, in the year of such disallowance.

182.3 Other Regulatory Assets

A. This account shall include the amounts of regulatory-created assets, not includable in other accounts, resulting from the ratemaking actions of regulatory agencies. (See the definition of regulatory assets and liabilities.)

B. The amounts included in this account are to be established by those charges which would have been included in net income determinations in the current period under the general requirements of the Uniform System of Accounts but for it being probable that such items will be included in a different period(s) for purposes of developing the rates that the utility is authorized to charge for its utility services. When specific identification of the particular source of a regulatory asset cannot be made, such as in plant phase-ins, rate moderation plans, or rate levelization plans, Account 407.4, Regulatory Credits, shall be credited. The amounts recorded in this account are generally to be charged, concurrently with the recovery of the amounts in rates, to the same account that would have been charged if included in income when incurred, except all regulatory assets established through the use of Account 407.4 shall be charged to Account 407.3, Regulatory Debits, concurrent with the recovery of the amounts in rates.

C. If rate recovery of all or part of an amount included in this account is disallowed, the disallowed amount shall be charged to Account 426.5, Other Deductions, or Account 435, Extraordinary Deductions, in the year of the disallowance.

D. The records supporting the entries to this account shall be kept so that the utility can furnish full information as to the nature and amount of each regulatory asset included in this account, including justification for inclusion of such amounts in this account.

7 CFR Ch. XVII (1–1–97 Edition)

183 Preliminary Survey and Investigation Charges

A. This account shall be charged with all expenditures for preliminary surveys, plans, and investigations made for the purpose of determining the feasibility of utility projects under contemplation. If construction results, this account shall be credited and the appropriate utility plant account charged. If the work is abandoned, the charge shall be made to Account 426.5, Other Deductions, or to the appropriate operating expense account.

B. This account shall also include costs of studies and analyses mandated by regulatory bodies related to plant in service. If construction results from such studies, this account shall be credited and the appropriate utility plant account charged with an equitable portion of such study costs directly attributable to new construction. The portion of such study costs not attributable to new construction or the entire cost if construction does not result shall be charged to Account 182.2, Unrecovered Plant and Regulatory Study Costs, or the appropriate operating expense account. The costs of such studies relative to plant under construction shall be included directly in Account 107, Construction Work in Progress—Electric.

C. The records supporting the entries to this account shall be so kept that the utility can furnish complete information as to the nature and the purpose of the survey, plans, or investigations, and the nature and amounts of the several charges.

NOTE: The amount of preliminary survey and investigation charges transferred to utility plant shall not exceed the expenditures which may reasonably be determined to contribute directly and immediately and without duplication to utility plant.

184 Clearing Accounts

A. This caption shall include undistributed balances in clearing accounts at the date of the balance sheet. Balances in clearing account shall be substantially cleared not later than the end of the calendar year unless items held therein relate to a future period.

B. Account 184 shall be subaccounted as follows:

Rural Utilities Service, USDA

§ 1767.18

- 184.1 Transportation Expense—Clearing
- 184.2 Clearing Accounts—Other

185 Temporary Facilities

This account shall include amounts shown by work orders for plant installed for temporary use in utility service for periods of less than one year. Such work orders shall be charged with the cost of temporary facilities and credited with payments received from customers and net salvage realized on removal of the temporary facilities. Any net credit or debit resulting shall be cleared to Account 451, Miscellaneous Service Revenues.

186 Miscellaneous Deferred Debits

This account shall include all debits not elsewhere provided for, such as miscellaneous work in progress, and unusual or extraordinary expenses, not included in other accounts, which are in process of amortization and items the proper final disposition of which is uncertain.

187 Deferred Losses from Disposition of Utility Plant

This account shall include losses from the sale or other disposition of property previously recorded in Account 105, Electric Plant Held for Future Use, under the provisions of Paragraphs B, C, and D thereof, where such losses are significant and are to be amortized over a period of 5 years, unless otherwise authorized by RUS. The amortization of the amounts in this account shall be made by debits to Account 411.7, Losses from Disposition of Utility Plant. (See Account 105, Electric Plant Held for Future Use.)

188 Research, Development, and Demonstration Expenditures

A. This account shall be charged with the cost of all expenditures coming within the meaning of Research, Development, and Demonstration (RD&D) of this USoA (See § 1767.10 (a) (34)) except those expenditures properly chargeable to Account 107, Construction Work in Progress—Electric.

B. Costs that are minor or of a general or recurring nature shall be transferred from this account to the appropriate operating expense function or if

such costs are common to the overall operations or cannot be feasibly allocated to the various operating accounts, such costs shall be recorded in Account 930.2, Miscellaneous General Expenses.

C. In certain instances, a company may incur large and significant research, development, and demonstration expenditures which are non-recurring and which would distort the annual research, development, and demonstration charges for the period. In such a case, the portion of such amounts that cause the distortion may be amortized to the appropriate operating expense account over a period not to exceed 5 years unless otherwise authorized by RUS.

D. The entries in this account must be so maintained as to show separately each project along with complete detail of the nature and purpose of the research, development, and demonstration project together with the related costs.

189 Unamortized Loss on Reacquired Debt

This account shall include the losses on long-term debt reacquired or redeemed. The amounts in this account shall be amortized in accordance with § 1767.15 (q).

190 Accumulated Deferred Income Taxes

A. This account shall be debited and Account 411.1, Provision for Deferred Income Taxes—Credit, Utility Operating Income, or Account 411.2, Provision for Deferred Income Taxes—Credit, Other Income and Deductions, as appropriate, shall be credited with an amount equal to that by which income taxes payable for the year are higher because of the inclusion of certain items in income for tax purposes, which items for general accounting purposes will not be fully reflected in the utility's determination of annual net income until subsequent years.

B. This account shall be credited and Account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, or Account 410.2, Provision for Deferred Income Taxes, Other Income and Deductions, as appropriate, shall be debited with an amount equal to

§ 1767.19

that by which income taxes payable for the year are lower because of prior payment of taxes as provided by Paragraph A above, because of difference in timing for tax purposes of particular items of income or income deductions from that recognized by the utility for general accounting purposes. Such credit to this account and debit to Account 410.1 or Account 410.2 shall, in general, represent the effect on taxes payable in the current year of the smaller amount of book income recognized for tax purposes as compared to the amount recognized in the utility's current accounts with respect to the item or class of items for which deferred tax accounting by the utility was authorized by RUS.

C. Vintage year records with respect to entries to this account, as described above, and the account balance, shall be so maintained as to show the factor of calculation with respect to each annual amount of the item or class of items for which deferred tax accounting by the utility is utilized.

D. The utility is restricted in its use of this account to the purpose set forth above. It shall not make use of the balance in this account or any portion thereof except as provided in the text of this account, without prior approval of RUS. Any remaining deferred tax account balance with respect to an amount for any prior year's tax deferral, the amortization of which or other recognition in the utility's income accounts has been completed, or other disposition made, shall be debited to Account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, or Account 410.2, Provision for Deferred Income Taxes, Other Income and Deductions, as appropriate, or otherwise disposed of as RUS may authorize or direct. (See § 1767.15 (t).)

[58 FR 59825, Nov. 10, 1993, as amended at 59 FR 27436, May 27, 1994; 60 FR 55429, 55430, Nov. 1, 1995]

§ 1767.19 Liabilities and other credits.

The liabilities and other credit accounts identified in this section shall be used by all RUS borrowers.

LIABILITIES AND OTHER CREDITS*Margins and Equities***200 Memberships**

A. This account shall include the total amount of memberships issued and subscribed.

B. Account 200 shall be subaccounted as follows:

- 200.1 Memberships Issued
- 200.2 Memberships Subscribed But Unissued

200.1 Memberships Issued

A. This account shall include the face value of membership certificates outstanding. A detailed record shall be maintained to show for each member, the name, address, date of payment, amount paid, and certificate number.

B. If membership fees are applied against energy bills, this account shall be debited for the full amount of the membership with the offsetting credit to the appropriate accounts receivable, and to accounts payable for any refundable amounts. Any balances that cannot be refunded, due to inability to locate the member or because of bylaw restrictions, shall be credited to Account 208, Donated Capital. If determination of the ultimate disposition of the fees cannot be made immediately, the amount involved should be transferred to Account 253, Other Deferred Credits, until the determination is made.

C. When a transfer fee is collected, the transaction shall be recorded by

§ 1767.19

debiting Account 131.1, Cash—General, and crediting Account 451, Miscellaneous Service Revenues, with the fee collected.

200.2 Memberships Subscribed But Unissued

This account shall include the face value of memberships subscribed for but not issued. When certificates are issued, the amount of the memberships shall be transferred to Account 200.1, Memberships Issued.

201 Patronage Capital

A. This account shall include the total amount of patronage capital assignable and assigned.

B. Account 201 shall be subaccounted as follows:

201.1 Patronage Capital Credits

201.2 Patronage Capital Assignable

201.1 Patronage Capital Credits

A. This account shall include the amounts of patronage capital which have been assigned to individual patrons. A subsidiary record, “patronage capital ledger,” shall be maintained, containing an account for each patron who has furnished capital under a capital credits plan.

B. When the return of patrons’ capital to individual patrons has been authorized by the board of directors (or trustees), the amounts authorized shall be transferred to Account 238.1, Patronage Capital Payable. (See also Account 217, Retired Capital Credits-Gain.)

201.2 Patronage Capital Assignable

A. This account shall include all amounts transferred from Account 219.1, Operating Margins; Account 219.2, Nonoperating Margins; Account 219.3, Other Margins; and Account 219.4, Other Margins and Equities—Prior Periods, which are assignable to individual patrons’ capital accounts.

B. Entries to this account shall be made so as to clearly disclose the nature and source of each transaction. Amounts so assigned shall be trans-

7 CFR Ch. XVII (1–1–97 Edition)

ferred to Account 201.1, Patronage Capital Credits.

202 [Reserved]

203 [Reserved]

204 [Reserved]

205 [Reserved]

206 [Reserved]

207 [Reserved]

208 Donated Capital

This account shall include credits arising from forfeiture of membership fees and from donations of capital not otherwise provided for. Entries to this account shall be made so as to clearly disclose the nature and source of each transaction.

209 [Reserved]

210 [Reserved]

211 Consumers’ Contributions for Debt Service

This account shall include the amounts billed to consumers as “amortization charges” for the purpose of servicing long-term debt.

212 [Reserved]

213 [Reserved]

214 [Reserved]

215 Appropriated Margins

This account shall include all amounts appropriated as reserves from margins. The account shall be so maintained as to show the amount of each separate reserve and the nature and amounts of the debits and credits thereto.

215.1 Unrealized Gains and Losses—Debt and Equity Securities

This account shall include the unrealized holding gains and losses for available-for-sale securities.

Rural Utilities Service, USDA

§ 1767.19

216 [Reserved]

216.1 Unappropriated Undistributed Subsidiary Earnings

This account shall include the balances, either debit or credit, of undistributed retained earnings of subsidiary companies since their acquisition. When dividends are received from subsidiary companies relating to amounts included in this account, this account shall be debited and Account 219.2, Nonoperating Margins, credited.

217 Retired Capital Credits—Gain

A. This account shall include credits resulting from the retirement of patronage capital through settlement of individual patrons' capital credits at less than 100 percent of the capital assigned to the patron. The portion of patronage capital not returned to the patrons, under such settlements, shall be debited to Account 201.1, Patronage Capital Credits, and credited to this account.

B. This account shall also include amounts representing patronage capital authorized to be retired to patrons who cannot be located. Returned checks issued for retirements of patronage capital, after an appropriate waiting period, shall be credited to this account, and a record maintained adequate to enable the cooperative to make payment to the patron if and when a claim has been established by the consumer.

218 Capital Gains and Losses

No entries shall be made to this account without the prior approval of RUS unless it is to distribute past capital gains and losses as capital credits or to eliminate accumulated capital losses in conformance with the bylaws of the cooperative.

219 Other Margins and Equities

A. This account shall include total amount of margins and equities from all sources.

B. Account 219 shall be subaccounted as follows:

219.1 Operating Margins

219.2 Nonoperating Margins

219.3 Other Margins

219.4 Other Margins and Equities—Prior Periods

219.1 Operating Margins

This account shall be debited or credited with the balances arising from transactions, the details of which have been recorded in Accounts 400, 401, 402, 403, 404, 405, 406, 407, 408, 412, 413, 414, 423, 424, 425, 426, 427, 428, and 431. Accounts 400, 401, and 402 are control accounts and, at the option of the borrower may or may not be used. If they are not used, the detailed revenue and expense accounts shall be closed directly to this account.

219.2 Nonoperating Margins

This account shall be debited or credited with the balances arising from transactions, the details of which have been recorded in Accounts 415, 416, 417, 417.1, 418, 419, 419.1, 421, 421.1, 421.2, 422, 434, and 435.

219.3 Other Margins

No entries shall be made to this account unless it is to distribute or eliminate prior balances in conformance with the bylaws of the cooperative.

219.4 Other Margins and Equities— Prior Periods

A. This account shall include significant nonrecurring transactions relating to prior periods. To be significant, the transaction must be of sufficient magnitude to justify redistribution of patronage capital credits already allocated for such prior periods.

B. All entries to this account must receive RUS prior approval.

C. These transactions are limited to items to (1) correct an error in the financial statements of a prior year, and (2) make adjustments that result from realization of income tax benefits of preacquisition operating loss carryforwards. This account shall also include the related income taxes (state and Federal) on items included herein.

D. Amounts in this account shall be transferred at the end of the year to Account 219.1, Operating Margins, or Account 219.2, Nonoperating Margins, as appropriate. Also, at the end of the

§ 1767.19

year, these amounts should be transferred from Account 219.1, or Account 219.2 to Account 201.2, Patronage Capital Assignable, when appropriate.

Long-Term Debt

221 Bonds

This account shall include, in a separate subdivision for each class and series of bonds, the face value of the actually issued and unmatured bonds which have not been retired or cancelled; also the face value of such bonds issued by others, the payment of which has been assumed by the utility.

222 Reacquired Bonds

A. This account shall include the face value of bonds actually issued or assumed by the utility and reacquired by it and not retired or cancelled. The account for reacquired debt shall not include securities which are held by trustees in sinking or other funds.

B. When bonds are reacquired, the difference between face value, adjusted for unamortized discount, expenses or premium, and the amount paid upon reacquisition, shall be included in Account 189, Unamortized Loss on Reacquired Debt, or Account 257, Unamortized Gain on Reacquired Debt, as appropriate. (See § 1767.15 (q).)

223 Advances from Associated Companies

A. This account shall include the face value of notes payable to associated companies and the amount of open book accounts representing advances from associated companies. It does not include notes and open accounts representing indebtedness subject to current settlement which are includible in Account 233, Notes Payable to Associated Companies, or Account 234, Accounts Payable to Associated Companies.

B. The records supporting the entries to this account shall be so kept that the utility can furnish complete information concerning each note and open account.

224 Other Long-Term Debt

A. This account shall include, until maturity, all long-term debt not other-

7 CFR Ch. XVII (1-1-97 Edition)

wise provided for. This covers such items as receivers' certificates, real estate mortgages executed or assumed, assessments for public improvements, notes and unsecured certificates of indebtedness not owned by associated companies, receipts outstanding for long-term debt, and other obligations maturing more than one year from the date of issue or assumption.

B. Account 224 shall be subaccounted as follows:

- 224.1 Long-Term Debt—RUS Construction Loan Contract
- 224.2 RUS Loan Contract—Construction—Debit
- 224.3 Long-Term Debt—RUS Construction Notes Executed
- 224.4 RUS Notes Executed—Construction—Debit
- 224.5 Interest Accrued—Deferred—RUS Construction
- 224.6 Advance Payments Unapplied—RUS Long-Term Debt—Debit
- 224.7 Long-Term Debt—Installation Loan Contract
- 224.8 RUS Loan Contract—Installation—Debit
- 224.9 Long-Term Debt—Installation Notes Executed
- 224.10 RUS Notes Executed—Installation—Debit
- 224.11 Other Long-Term Debt—Subscriptions
- 224.12 Other Long-Term Debt—Supplemental Financing
- 224.13 Supplemental Lender Notes Executed—Debit
- 224.14 Other Long-Term Debt—Miscellaneous
- 224.15 Notes Executed—Other—Debit
- 224.16 Long-Term Debt—RUS Economic Development Notes Executed
- 224.17 RUS Notes Executed—Economic Development—Debit

224.1 Long-Term Debt—RUS Construction Loan Contract

A. This account shall include the contractual obligation to RUS on construction loans covered by loan contract but not by executed notes.

B. This account is to be used at the option of the borrower.

224.2 RUS Loan Contract—Construction—Debit

A. This account shall include the total loans (for construction purposes) which are covered by loan contract but not by executed notes.

Rural Utilities Service, USDA

§ 1767.19

B. This account is to be used at the option of the borrower.

224.3 Long-Term Debt—RUS Construction Notes Executed

This account shall include the contractual liability to RUS on construction notes executed. Records shall be maintained to show separately for each class of obligation all details as to the date of obligation, date of maturity, interest date and rate, and securities for the obligation.

224.4 RUS Notes Executed— Construction—Debit

This account shall include the total amount of the unadvanced RUS loans for construction purposes, which are covered by executed notes. When advances are received from the RUS for construction, this account shall be credited and Account 131.2, Cash—Construction Fund—Trustee, debited with the amount of cash advanced.

224.5 Interest Accrued—Deferred— RUS Construction

This account shall include interest on RUS construction obligations deferred by the terms of mortgage notes or extension agreements.

224.6 Advance Payments Unapplied— RUS Long-Term Debt—Debit

A. This account shall include principal payments on mortgage notes paid in advance of the date due and not applied to a specific note. Also, include in this account interest savings which are accrued and added to the advance payment unapplied.

B. At such time as these payments are applied to a specific note or loan balances, this account shall be credited and the long-term debt account debited with the amount so applied.

224.7 Long-Term Debt—Installation Loan Contract

A. This account shall include the contractual obligation to RUS on installation loans covered by loan contract but not covered by executed notes.

B. This account is to be used at the option of the borrower.

224.8 RUS Loan Contract— Installation—Debit

A. This account shall include the total loans for installation purposes which are covered by loan contract but not by executed notes.

B. This account is to be used at the option of the borrower.

224.9 Long-Term Debt—Installation Notes Executed

This account shall include the contractual liability to RUS on installation notes executed.

224.10 RUS Notes Executed— Installation—Debit

This account shall include the total amount of unadvanced loans for installation purposes, which are covered by executed note. When advances are received from RUS, this account shall be credited and Account 131.3, Cash—Installation Loan and Collection Fund, debited with the amount of cash advanced.

224.11 Other Long-Term Debt— Subscriptions

This account shall include the contractual obligation to purchase CFC Capital Term Certificates and any other similar obligation relating to supplemental financing.

224.12 Other Long-Term Debt— Supplemental Financing

This account shall include the contractual liability to CFC or other supplemental lenders for that portion of funds borrowed which mature in more than one year.

224.13 Supplemental Financing Notes Executed—Debit

This account shall include the total amount of the unadvanced loans for construction purposes, which are covered by executed notes to CFC or other supplemental lender. This account shall be debited with the face amount of notes executed. When advances are received from a supplemental lender for construction, this account shall be credited and Account 131.2, Cash—Construction Fund—Trustee, debited with the amount of cash advanced.

§ 1767.19

224.14 Other Long-Term Debt— Miscellaneous

This account shall include the amount of other long-term debt not provided for elsewhere.

224.15 Notes Executed—Other—Debit

This account shall include the total amount of the unadvanced loans for construction purposes, which are covered by executed notes to others not included in the foregoing accounts. When advances are received from such supplemental lender, this account shall be credited and Account 131.2, Cash—Construction Fund—Trustee, debited with the amount of cash so advanced.

224.16 Long-Term Debt—RUS Economic Development Notes Executed

This account shall include the contractual liability to RUS on rural economic development notes executed. Records shall be maintained to show separately for each class of obligation all details as to the date of obligation, date of maturity, interest rate and rate, and securities for the obligation.

224.17 RUS Notes Executed—Economic Development—Debit

This account shall include the total amount of the unadvanced RUS loans for rural economic development purposes, which are covered by executed notes. When advances are received from the RUS for rural economic development projects, this account shall be credited and Account 131.12, Cash—General—Economic Development Funds, debited with the amount of cash advanced.

225 Unamortized Premium on Long-Term Debt

A. This account shall include the excess of the cash value of consideration received over the face value upon the issuance or assumption of long-term debt securities.

B. Amounts recorded in this account shall be amortized over the life of each respective issue under a plan which will distribute the amount equitably over the life of the security. The amortization shall be on a monthly basis, with the amounts thereof to be credited

7 CFR Ch. XVII (1–1–97 Edition)

to Account 429, Amortization of Premium on Debt—Credit. (See § 1767.15 (q).)

226 Unamortized Discount on Long-Term Debt—Debit

A. This account shall include the excess of the face value of long-term debt securities over the cash value of consideration received therefor, related to the issue or assumption of all types and classes of debt.

B. Amounts recorded in this account shall be amortized over the life of the respective issues under a plan which will distribute the amount equitably over the life of the securities. The amortization shall be on a monthly basis, with the amounts thereof charged to Account 428, Amortization of Debt Discount and Expense. (See § 1767.15 (q).)

Other Noncurrent Liabilities

227 Obligations Under Capital Leases—Noncurrent

This account shall include the portion not due within one year, of the obligations recorded for the amounts applicable to leased property recorded as assets in Account 101.1, Property Under Capital Leases; Account 120.6, Nuclear Fuel Under Capital Leases; or Account 121, Nonutility Property.

SPECIAL INSTRUCTIONS

No amounts shall be credited to Accounts 228.1 through 228.4 unless authorized by a regulatory authority or authorities to be collected in the utility's rates.

228.1 Accumulated Provision for Property Insurance

A. This account shall include amounts reserved by the utility for losses through accident, fire, flood, or other hazards to its own property or property leased from others, not covered by insurance. The amounts charged to Account 924, Property Insurance, or other appropriate accounts to cover such risks shall be credited to this account. A schedule of risks covered shall be maintained, giving a description of the property involved, the character of the risks covered and the rates used.

Rural Utilities Service, USDA

§ 1767.19

B. Charges shall be made to this account for losses covered, not to exceed the account balance. Details of these charges shall be maintained according to the year the casualty occurred which gave rise to the loss.

228.2 Accumulated Provision for Injuries and Damages

A. This account shall be credited with amounts charged to Account 925, Injuries and Damages, or other appropriate accounts, to meet the probable liability, not covered by insurance, for deaths or injuries to employees and others and for damages to property neither owned nor held under lease by the utility.

B. When liability for any injury or damage is admitted by the utility either voluntarily or because of the decision of a court or other lawful authority, such as a workmen's compensation board, the admitted liability shall be charged to this account and credited to the appropriate current liability account. Details of these charges shall be maintained according to the year the casualty occurred which gave rise to the loss.

NOTE: Recoveries or reimbursements for losses charged to this account shall be credited hereto; the cost of repairs to property of others, if provided for herein, shall be charged to this account.

228.3 Accumulated Provision for Pensions and Benefits

A. This account shall include provisions made by the utility and amounts contributed by employees for pensions, accident and death benefits, savings, relief, hospital, and other provident purposes, where the funds are included in the assets of the utility either in general or in segregated fund accounts.

B. Amounts paid by the utility for the purpose for which this liability is established shall be charged hereto.

C. A separate account shall be kept for each kind of provision included herein.

NOTE: If employee pension or benefit plan funds are not included among the assets of the utility but are held by outside trustees, payments into such funds, or accruals therefor, shall not be included in this account.

228.4 Accumulated Miscellaneous Operating Provisions

A. This account shall include all operating provisions which are not provided for elsewhere.

B. This account shall be maintained in such a manner as to show the amount of each separate provision and the nature and amounts of the debits and credits thereto.

NOTE: This account includes only provisions as may be created for operating purposes and does not include any reservations of income, the credits for which should be recorded in Account 215, Appropriated Margins.

229 Accumulated Provision for Rate Refunds

A. This account shall be credited with amounts charged to Account 449.1, Provision for Rate Refunds, to provide for estimated refunds where the utility is collecting amounts in rates subject to refund.

B. When a refund of any amount recorded in this account is ordered by a regulatory authority, such amount shall be charged hereto and credited to Account 242, Miscellaneous Current and Accrued Liabilities.

C. Records supporting the entries to this account shall be kept so as to identify each amount recorded by the respective rate filing docket number.

Current and Accrued Liabilities

Current and accrued liabilities are those obligations which have either matured or which become due within 1 year from the date thereof; except however, bonds, receivers' certificates, and similar obligations which shall be classified as long-term debt until date of maturity; accrued taxes, such as income taxes, which shall be classified as accrued liabilities even though payable more than one year from date; compensation awards, which shall be classified as current liabilities regardless of date due; and minor amounts payable in installments which may be classified as current liabilities. If a liability is due more than 1 year from the date of issuance or assumption by the utility, it shall be credited to a long-term debt account appropriate for the transaction; except however, the

§ 1767.19

current liabilities previously mentioned.

231 Notes Payable

This account shall include the face value of all notes, drafts, acceptances, or other similar evidences of indebtedness, payable on demand or within a time not exceeding 1 year from the date of issue, to other than associated companies.

232 Accounts Payable

A. This account shall include all amounts payable by the utility within 1 year, which are not provided for in other accounts.

B. Account 232 shall be subaccounted as follows:

- 232.1 Accounts Payable—General
- 232.2 Accounts Payable—RUS Construction
- 232.3 Accounts Payable—Other

233 Notes Payable to Associated Companies

This account shall include amounts owing to associated companies on notes, drafts, acceptances, or other similar evidences of indebtedness payable on demand or not more than 1 year from the date of issue or creation.

NOTE: Notes which are includible in Account 223, Advances from Associated Companies, shall be excluded from this account.

234 Accounts Payable to Associated Companies

This account shall include amounts owing to associated companies on open accounts payable on demand.

NOTE: Accounts which are includible in Account 223, Advances from Associated Companies, shall be excluded from this account.

235 Customer Deposits

This account shall include all amounts deposited with the utility by its customers as security for the payment of bills.

236 Taxes Accrued

A. This account shall be credited with the amount of taxes accrued during the accounting period, corresponding debits being made to the appropriate accounts for tax charges. Such credits may be based upon estimates,

7 CFR Ch. XVII (1–1–97 Edition)

but from time to time during the year as the facts become known, the amount of the periodic credits shall be adjusted so as to include, as nearly as can be determined in each year, the taxes applicable thereto. Any amount representing a prepayment of taxes applicable to the period subsequent to the date of the balance sheet, shall be shown under Account 165, Prepayments.

B. If accruals for taxes are found to be insufficient or excessive, correction therefor shall be made through current tax accruals.

C. Accruals for taxes shall be based upon the net amounts payable after credit for any discounts, and shall not include any amounts for interest on tax deficiencies or refunds. Interest received on refunds shall be credited to Account 419, Interest and Dividend Income, and interest paid on deficiencies shall be charged to Account 431, Other Interest Expense.

D. Account 236 shall be subaccounted as follows:

- 236.1 Accrued Property Taxes
- 236.2 Accrued U.S. Social Security Tax—Unemployment
- 236.3 Accrued U.S. Social Security Tax—F.I.C.A.
- 236.4 Accrued State Social Security Tax—Unemployment
- 236.5 Accrued State Sales Tax—Consumers
- 236.6 Accrued Gross Revenue or Gross Receipts Tax
- 236.7 Accrued Taxes—Other

237 Interest Accrued

This account shall include the amount of interest accrued but not matured on all liabilities of the utility not including, however, interest which is added to the principal of the debt on which incurred. Supporting records shall be maintained so as to show the amount of interest accrued on each obligation.

238 Patronage Capital and Patronage Refunds Payable

A. This account shall include the total amount of patronage capital authorized to be returned and paid to patrons.

B. Account 238 shall be subaccounted as follows:

- 238.1 Patronage Capital Payable
- 238.2 Patronage Refunds Payable

Rural Utilities Service, USDA

§ 1767.19

238.1 Patronage Capital Payable

This account shall include the amount of patronage capital which has been authorized to be returned to the patron.

238.2 Patronage Refunds Payable

This account shall include the amount of patronage refunds which have been authorized to be paid to patrons.

239 Matured Long-Term Debt

This account shall include the amount of long-term debt (including any obligation for premiums) matured and unpaid, without specific agreement for extension of the time of payment and bonds called for redemption but not presented.

240 Matured Interest

This account shall include the amount of matured interest on long-term debt or other obligations of the utility at the date of the balance sheet unless such interest is added to the principal of the debt on which incurred.

241 Tax Collections Payable

This account shall include the amount of taxes collected by the utility through payroll deductions or otherwise, pending transmittal of such taxes to the proper taxing authority.

NOTE: Do not include liabilities for taxes assessed directly against the utility which are accounted for as part of the utility's own tax expense.

242 Miscellaneous Current and Accrued Liabilities

A. This account shall include the amount of all other current and accrued liabilities not provided for elsewhere appropriately designated and supported so as to show the nature of each liability.

B. Account 242 shall be subaccounted as follows:

242.1 Accrued Rentals

242.2 Accrued Payroll

242.3 Accrued Employees' Vacations and Holidays

242.4 Accrued Insurance

242.5 Other Current and Accrued Liabilities

242.1 Accrued Rentals

This account shall include unpaid joint use pole rentals and other rentals. The records supporting the entries to this account shall be maintained so as to show for each class of rental, the amount accrued, the basis for the accrual, the accounts to which charged, and the amount of rentals paid.

242.2 Accrued Payroll

This account shall include the accrued liability for salaries and wages at the end of an accounting period for which the appropriate expense or other accounts have been charged. This account is to be used whether salaries and wages are paid on a weekly, semi-monthly, or monthly basis.

242.3 Accrued Employees' Vacations and Holidays

This account shall include the liability for accrued wages for employees' vacation, holidays, and sick leave.

242.4 Accrued Insurance

A. This account shall most commonly be used in case of workmen's compensation and public liability insurance for recording the excess amounts of earned premium over the advance premiums. Earned premiums are computed each month by applying the insurance rates to the actual payrolls.

B. Until the amount of the advance premiums is exhausted, the earned premium is credited to Account 165, Prepayments. Earned premiums in excess of the advance premiums are credited to this account.

242.5 Other Current and Accrued Liabilities

This account shall include current and accrued liabilities not provided for elsewhere.

243 Obligations Under Capital Leases—Current

This account shall include the portion, due within 1 year, of the obligations recorded for the amounts applicable to leased property recorded as assets in Account 101.1, Property Under Capital Leases; Account 120.6, Nuclear

§ 1767.19**7 CFR Ch. XVII (1–1–97 Edition)**

Fuel Under Capital Leases; or Account 121, Nonutility Property.

Deferred Credits

251 [Reserved]

252 Customer Advances for Construction

This account shall include consumer advances for construction which are to be refunded either wholly or in part. When a customer is refunded the entire amount to which he is entitled, according to the agreement or rule under which the advance was made, the balance, if any, remaining in this account shall be credited to the respective plant accounts.

253 Other Deferred Credits

This account shall include advance billings and receipts and other deferred credit items, not provided for elsewhere, including amounts which cannot be entirely cleared or disposed of until additional information has been received.

253.1 Other Deferred Credits—
Consumers' Energy Prepayments

This account shall include the amount of advance payments made by consumers in connection with electric service.

254 Other Regulatory Liabilities

A. This account shall include the amounts of regulatory liabilities, not includible in other accounts, imposed on the utility by the ratemaking actions of regulatory agencies.

B. The amounts included in this account are to be established by those credits which would have been included in net income determinations in the current period under the general requirements of the Uniform System of Accounts but for it being probable that: (1) such items will be included in a different period(s) for purposes of developing the rates that the utility is authorized to charge for its utility services; or (2) refunds to customers, not provided for in other accounts, will be required. When specific identification of the particular source of the regulatory liability cannot be made or

when the liability arises from revenues collected pursuant to tariffs on file at a regulatory agency, Account 407.3, Regulatory Debits, shall be debited. The amounts recorded in this account generally are to be credited to the same account that would have been credited if included in income when earned except: (1) all regulatory liabilities established through the use of Account 407.3 shall be credited to Account 407.4, Regulatory Credits; and (2) in the case of refunds, a cash account or other appropriate account should be credited when the obligation is satisfied.

C. If it is later determined that the amounts recorded in this account will not be returned to customers through rates or refunds, such amounts shall be credited to Account 421, Miscellaneous Nonoperating Income, or Account 434, Extraordinary Income, as appropriate, in the year such determination is made.

D. The records supporting the entries to this account shall be kept in such a manner that the utility can furnish full information as to the nature and amount of each regulatory liability included in this account, including justification for inclusion of such amounts in this account.

255 Accumulated Deferred Investment Tax Credits

A. This account shall be credited with all investment tax credits deferred by companies which have elected to follow deferral accounting, partial or full, rather than recognizing, in the income statement, the total benefits of the tax credit as realized. After such election, a company may not transfer amounts from this account, except as authorized herein and in Account 411.4, Investment Tax Credit Adjustments, Utility Operations; Account 411.5, Investment Tax Credit Adjustments, Nonutility Operations; and Account 420, Investment Tax Credits, or with approval of RUS.

B. Where the company's accounting provides that investment tax credits are to be passed on to customers, this account shall be debited and Account 411.4 credited with a proportionate amount determined in relation to the average useful life of electric utility

Rural Utilities Service, USDA

§ 1767.19

property to which the tax credits relate or such lesser period of time as allowed by a regulatory agency having rate jurisdiction. If, however, the deferral procedure provides that investment tax credits are not to be passed on to customers, the proportionate restorations to income shall be credited to Account 420.

C. Subdivisions of this account, by department, shall be maintained for deferred investment tax credits that are related to nonelectric utility or other operations. Contra entries affecting such account subdivisions shall be appropriately recorded in Account 413, Expenses of Electric Plant Leased to Others; or Account 414, Other Utility Operating Income. Use of deferral or nondeferral accounting procedures adopted for nonelectric utility or other operations are to be followed on a consistent basis.

D. Separate records for electric and nonelectric utility or other operations shall be maintained identifying the properties giving rise to the investment tax credits for each year with the weighted-average service life of such properties and any unused balances of such credits. Such records are not necessary unless the tax credits are deferred.

256 Deferred Gains from Disposition of Utility Plant

This account shall include gains from the sale or other disposition of property previously recorded in Account 105, Electric Plant Held for Future Use, under the provisions of Paragraphs B, C, and D thereof, where such gains are significant and are to be amortized over a period of 5 years, unless otherwise authorized by RUS. The amortization of the amounts in this account shall be made by credits to Account 411.6, Gains from Disposition of Utility Plant. (See Account 105, Electric Plant Held for Future Use.)

257 Unamortized Gain on Reacquired Debt

This account shall include the amounts of discount realized upon reacquisition or redemption of long-term debt. The amounts in this account shall be amortized in accordance with § 1767.15 (q).

SPECIAL INSTRUCTIONS

Accumulated Deferred Income Taxes

Before using the deferred tax accounts provided below, refer to § 1767.15 (r), Comprehensive Interperiod Income Tax Allocation. The text of these accounts are designed primarily to cover deferrals of Federal income taxes. However, they are also to be used when making deferrals of state and local income taxes. Utilities and licensees which, in addition to an electric utility department, have another utility department, gas or water and nonutility property, and which have deferred taxes on income with respect thereto shall separately classify such deferrals in the accounts provided below so as to allow ready identification of items relating to each utility deductions.

281 Accumulated Deferred Income Taxes—Accelerated Amortization Property

A. This account shall include tax deferrals resulting from adoption of the principles of comprehensive interperiod tax allocation described in § 1767.15 (s) that relate to property for which the utility has availed itself of the use of accelerated (5-year) amortization of (1) certified defense facilities as permitted by Section 168 of the Internal Revenue Code, and (2) certified pollution control facilities as permitted by Section 169 of the Internal Revenue Code.

B. This account shall be credited and Account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, or Account 410.2, Provision for Deferred Income Taxes, Other Income and Deductions, as appropriate, shall be debited with tax effects related to property described in Paragraph A above where taxable income is lower than pretax accounting income due to differences between the periods in which revenue and expense transactions affect taxable income and the periods in which they enter into the determination of pretax accounting income.

C. This account shall be debited and Account 411.1, Provision for Deferred Income Taxes—Credit, Utility Operating Income, or Account 411.2, Provision for Deferred Income Taxes—Credit,

§ 1767.19

Other Income and Deductions, as appropriate, shall be credited with taxes related to property described in Paragraph A above where taxable income is higher than pretax accounting income due to differences between the periods in which revenue and expense transactions affect taxable income and the periods in which they enter into the determination of pretax accounting income.

D. The utility is restricted in its use of this account to the purposes set forth above. It shall not transfer the balance in this account or any portion thereof to retained earnings or make any use thereof except as provided in the text of this account without prior approval of RUS. Upon the disposition by sale, exchange, transfer, abandonment, or premature retirement of plant on which there is a related balance therein, this account shall be charged with an amount equal to the related income tax expense, if any, arising from such disposition and Account 411.1, Provision for Deferred Income Taxes—Credit, Utility Operating Income, or Account 411.2, Provision for Deferred Income Taxes—Credit, Other Income and Deductions, as appropriate, shall be credited. When the remaining balance, after consideration of any related income tax expense, is less than \$25,000, this account shall be charged and Account 411.1 or Account 411.2, as appropriate, credited with such balance. If after consideration of any related income tax expense, there is a remaining amount of \$25,000 or more, RUS shall authorize or direct how such amount shall be accounted for at the time approval for the disposition of accounting is granted. When plant is disposed of by transfer to a wholly owned subsidiary, the related balance in this account shall also be transferred. When the disposition relates to retirement of an item or items under a group method of depreciation where there is no tax effect in the year of retirement, no entries are required in this account if it can be determined that the related balances would be necessary to be retained to offset future group item tax deficiencies.

7 CFR Ch. XVII (1–1–97 Edition)

282 Accumulated Deferred Income Taxes—Other Property

A. This account shall include the tax deferrals resulting from adoption of the principle of comprehensive interperiod income tax allocation described in § 1767.15 (r) which are related to all property other than accelerated amortization property.

B. This account shall be credited and Account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, or Account 410.2, Provision for Deferred Income Taxes, Other Income and Deductions, as appropriate, shall be debited with tax effects related to property described in Paragraph A above where taxable income is lower than pretax accounting income due to differences between the periods in which revenue and expense transactions affect taxable income and the periods in which they enter into the determination of pretax accounting income.

C. This account shall be debited and Account 411.1, Provision for Deferred Income Taxes—Credit, Utility Operating Income, or Account 411.2, Provision for Deferred Income Taxes—Credit, Other Income and Deductions, as appropriate, shall be credited with tax effects related to property described in Paragraph A above where taxable income is higher than pretax accounting income due to differences between the periods in which revenue and expense transactions affect taxable income and the periods in which they enter into the determination of pretax accounting income.

D. The utility is restricted in its use of this account to the purposes set forth above. It shall not transfer the balance in this account or any portion thereof to retained earnings or make any use thereof except as provided in the text of this account without prior approval of RUS. Upon the disposition by sale, exchange, transfer, abandonment, or premature retirement of plant on which there is a related balance herein, this account shall be charged with an amount equal to the related income tax expense, if any, arising from such disposition and Account 411.1, Provision for Deferred Income Taxes—Credit, Utility Operating Income, or Account 411.2, Provision for Deferred

Rural Utilities Service, USDA

§1767.19

Income Taxes—Credit, Other Income and Deductions, shall be credited. When the remaining balance after consideration of any related tax expenses, is less than \$25,000, this account shall be charged and Account 411.1 or Account 411.2, as appropriate, credited with such balance. If after consideration any related income tax expense, there is a remaining amount of \$25,000 or more, RUS shall authorize or direct how such amount shall be accounted for at the time approval for the disposition of accounting is granted. When plant is disposed of by transfer to a wholly owned subsidiary, the related balance in this account shall also be transferred. When the disposition relates to retirement of an item or items under a group method of depreciation where there is no tax effect in the year of retirement, no entries are required in this account if it can be determined that the related balance would be necessary to be retained to offset future group item tax deficiencies.

283 Accumulated Deferred Income Taxes—Other

A. This account shall include all credit tax deferrals resulting from the adoption of the principles of comprehensive interperiod income tax allocation described in §1767.15 (r) other than those deferrals which are includible in Account 281, Accumulated Deferred Income Taxes—Accelerated Amortization Property, and Account 282, Accumulated Deferred Income Taxes—Other Property.

B. This account shall be credited and Account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, or Account 410.2, Provision for Deferred Income Taxes, Other Income and Deductions, as appropriate, shall be debited with tax effects related to items described in Paragraph A above where taxable income is lower than pretax accounting income due to differences between the periods in which revenue and expense transactions affect taxable income and the periods in which they enter into the determination of pretax accounting income.

C. This account shall be debited and Account 411.1, Provision for Deferred Income Taxes—Credit, Utility Operating Income or Account 411.2, Provision

for Deferred Income Taxes—Credit, Other Income and Deductions, as appropriate, shall be credited with tax effects related to items described in Paragraph A above where taxable income is higher than pretax accounting income due to differences between the periods in which revenue and expense transactions affect taxable income and the periods in which they enter into the determination of pretax accounting income.

D. Records with respect to entries to this account, as described above, and the account balance, shall be so maintained as to show the factors of calculation with respect to each annual amount of the item or class of items.

E. The utility is restricted in its use of this account to the purposes set forth above. It shall not transfer the balance in the account or any portion thereof to retained earnings or to any other account or make any use thereof except as provided in the text of this account, without prior approval of RUS. Upon the disposition by sale, exchange, transfer, abandonment, or premature retirement of items on which there is a related balance herein, this account shall be charged with an amount equal to the related income tax effect, if any, arising from such disposition and Account 411.1, Provision For Deferred Income Taxes—Credit, Utility Operating Income, or Account 411.2, Provision For Deferred Income Taxes—Credit, Other Income and Deductions, as appropriate, shall be credited. When the remaining balance, after consideration of any related tax expenses, is less than \$25,000, this account shall be charged and Account 411.1 or Account 411.2, as appropriate, credited with such balance. If after consideration of any related income tax expense, there is a remaining amount of \$25,000 or more, RUS shall authorize or direct how such amount shall be accounted for at the time approval for the disposition of accounting is granted.

When plant is disposed of by transfer to a wholly owned subsidiary, the related balance in this account shall also be transferred. When the disposition relates to retirement of an item or items under a group method of depreciation where there is no tax effect in the year

§ 1767.20

of retirement, no entries are required in this account if it can be determined that the related balance would be necessary to be retained to offset future group item tax deficiencies.

[58 FR 59825, Nov. 10, 1993, as amended at 59 FR 27436, May 27, 1994; 60 FR 55430, Nov. 1, 1995]

§ 1767.20 Plant accounts.

The plant accounts identified in this section shall be used by all RUS borrowers.

INTANGIBLE PLANT**301 Organization**

This account shall include all fees paid to Federal or state governments for the privilege of incorporation and expenditures incident to organizing the corporation, partnership, or other enterprise and putting it into readiness to do business.

Items

1. Cost of obtaining certificates authorizing an enterprise to engage in the public-utility business.
2. Fees and expenses for incorporation.
3. Fees and expenses for mergers or consolidations.
4. Office expenses incident to organizing the utility.
5. Stock and minute books and corporate seal.

NOTE A: This account shall not include any discounts upon securities issued or assumed; nor shall it include any costs incident to negotiating loans, selling bonds or other evidences of debt or expenses in connection

Rural Utilities Service, USDA

§ 1767.20

with the authorization, issuance, or sale of capital stock.

NOTE B: Exclude from this account and include in the appropriate expense account the cost of preparing and filing papers in connection with the extension of the term of incorporation unless the first organization costs have been written off. When charges are made to this account for expenses incurred in mergers, consolidations, or reorganizations, amounts previously included herein or in similar accounts in the books of the companies concerned shall be excluded from this account.

302 Franchises and Consents

A. This account shall include amounts paid to the Federal Government, to a state or to a political subdivision thereof in consideration for franchises, consents, water power licenses, or certificates, running in perpetuity or for a specified term of more than one year, together with necessary and reasonable expenses incident to procuring such franchises, consents, water power licenses, or certificates of permission and approval, including expenses of organizing and merging separate corporations, where statutes require, solely for the purpose of acquiring franchises.

B. If a franchise, consent, water power license, or certificate is acquired by assignment, the charge to this account in respect thereof shall not exceed the amount paid therefor by the utility to the assignor, nor shall it exceed the amount paid by the original grantee, plus the expense of acquisition to such grantee. Any excess of the amount actually paid by the utility over the amount above specified shall be charged to Account 426.5, Other Deductions.

C. When any franchise has expired, the book cost thereof shall be credited hereto and charged to Account 426.5, Other Deductions, or to Account 111, Accumulated Provision for Amortization of Electric Utility Plant, as appropriate.

D. Records supporting this account shall be kept so as to show separately the book cost of each franchise or consent.

NOTE: Annual or other periodic payments under franchises shall not be included herein but in the appropriate operating expense account.

303 Miscellaneous Intangible Plant

A. This account shall include the cost of patent rights, licenses, privileges, and other intangible property necessary or valuable in the conduct of utility operations and not specifically chargeable to any other account.

B. When any item included in this account is retired or expires, the book cost thereof shall be credited hereto and charged to Account 426.5, Other Deductions, or Account 111, Accumulated Provision for Amortization of Electric Utility Plant, as appropriate.

C. This account shall be maintained in such a manner that the utility can furnish full information with respect to the amounts included herein.

PRODUCTION PLANT

Steam Production

310 Land and Land Rights

This account shall include the cost of land and land rights used in connection with steam-power generation. (See § 1767.16 (g).)

311 Structures and Improvements

This account shall include the cost, in place, of structures and improvements used in connection with steam-power generation. (See § 1767.16 (h).)

NOTE: Include steam production roads and railroads in this account.

312 Boiler Plant Equipment

This account shall include the cost installed of furnaces, boilers, coal and ash handling and coal preparing equipment, steam and feed water piping, boiler apparatus, and accessories used in the production of steam, mercury, or other vapor, to be used primarily for generating electricity.

Items

1. Ash handling equipment, including hoppers, gates, cars, conveyors, hoists, sluicing equipment, including pumps and motors, sluicing water pipe and fittings, sluicing trenches and accessories, except sluices which are a part of a building.

2. Boiler feed system, including feed water heaters, evaporator condensers, heater drain pumps, heater drainers,

§ 1767.20

deaerators, and vent condensers, boiler feed pumps, surge tanks, feed water regulators, feed water measuring equipment, and all associated drives.

3. Boiler plant cranes and hoists and associated drives.

4. Boilers and equipment, including boilers and baffles, economizers, superheaters, soot blowers, foundations and settings, water walls, arches, grates, insulation, blowdown system, drying out of new boilers, also associated motors or other power equipment.

5. Breeching and accessories, including breeching, dampers, soot spouts, hoppers and gates, cinder eliminators, breeching insulation, soot blowers and associated motors.

6. Coal handling and storage equipment, including coal towers, coal lorries, coal cars, locomotives and tracks when devoted principally to the transportation of coal, hoppers, downtakes, unloading and hoisting equipment, skip hoists and conveyors, weighing equipment, magnetic separators, cable ways, and housings and supports for coal handling equipment.

7. Draft equipment, including air preheaters and accessories, induced and forced draft fans, air ducts, combustion control mechanisms, and associated motors or other power equipment.

8. Gas-burning equipment, including holders, burner equipment and piping, and control equipment.

9. Instruments and devices, including all measuring, indicating, and recording equipment for boiler plant service together with mountings and supports.

10. Lighting systems.

11. Oil-burning equipment, including tanks, heaters, pumps with drive, burner equipment and piping, and control equipment.

12. Pulverized fuel equipment, including pulverizers, accessory motors, primary air fans, cyclones and ducts, dryers, pulverized fuel bins, pulverized fuel conveyors and equipment, burners, burner piping, priming equipment, air compressors, and motors.

13. Stacks, including foundations and supports, stack steel and ladders, stack brickwork, stack concrete, stack lining, stack painting (first), when set on separate foundations, independent of substructures or superstructures of building.

7 CFR Ch. XVII (1-1-97 Edition)

14. Station piping, including pipe, valves, fittings, separators, traps, desuperheaters, hangers, excavation, and covering for station piping system, including all steam, condensate, boiler feed and water supply piping, but not condensing water, plumbing, building heating, oil, gas, air piping or piping specifically provided for in Account 313.

15. Stoker or equivalent feeding equipment, including stokers and accessory motors, clinker grinders, fans and motors.

16. Ventilating equipment.

17. Water purification equipment, including softeners and accessories, evaporators and accessories, heat exchanges, filters, tanks for filtered or softened water, pumps, and motors.

18. Water-supply systems, including pumps, motors, strainers, raw-water storage tanks, boiler wash pumps, intake and discharge pipes, and tunnels not a part of a building.

19. Wood fuel equipment, including hoppers, fuel hogs and accessories, elevators and conveyors, bins and gates, spouts, measuring equipment and associated drives.

NOTE: When the system for supplying boiler or condenser water is elaborate, and when it includes a dam, reservoir, canal, pipe line, cooling ponds, or where gas or oil is used as a fuel for producing steam and is supplied through a pipe line system owned by the utility, the cost of such special facilities shall be charged to a subdivision of Account 311, Structures and Improvements.

**313 Engines and Engine Driven
Generators**

This account shall include the cost installed of steam engines, reciprocating or rotary, and their associated auxiliaries; and engine-driven main generators, except turbogenerator units.

Items

1. Air cleaning and cooling apparatus, including blowers, drive equipment, air ducts, not a part of building, louvers, pumps, and hoods.

2. Belting, shafting, pulleys, and reduction gearing.

3. Circulating pumps, including connections between condensers and intake and discharge tunnels.

Rural Utilities Service, USDA

§ 1767.20

4. Cooling system, including towers, pumps, tank, and piping.

5. Condensers, including condensate pumps, air and vacuum pumps, ejector unloading valves and vacuum breakers, expansion devices, and screens.

6. Cranes and hoists, including items wholly identified with items listed herein.

7. Engines, reciprocating or rotary.

8. Fire-extinguishing systems.

9. Foundations and settings, especially constructed for and not expected to outlast the apparatus for which provided.

10. Generators-Main, a.c. or d.c., including field rheostats and connections for self-excited units, and excitation systems when identified with the generating unit.

11. Governors.

12. Lighting systems.

13. Lubricating systems, including gauges, filters, tanks, pumps, piping, and motors.

14. Mechanical meters, including gauges, recording instruments, sampling and testing equipment.

15. Piping-main exhaust, including connections between generator and condenser and between condenser and hotwell.

16. Piping-main steam, including connections from main throttle valve to turbine inlet.

17. Platforms, railings, steps, and gratings appurtenant to apparatus listed herein.

18. Pressure oil system, including accumulators, pumps, piping, and motors.

19. Throttle and inlet valve.

20. Tunnels, intake and discharge, for condenser system, when not a part of a structure.

21. Water screens and motors.

314 Turbogenerator Units

This account shall include the cost installed of main turbine-driven units and accessory equipment used in generating electricity by steam.

Items

1. Air leaning and cooling apparatus, including blowers, drive equipment, air ducts not a part of building, louvers, pumps, and hoods.

2. Circulating pumps, including connections between condensers and intake and discharge tunnels.

3. Condensers, including condensate pumps, air and vacuum pumps, ejectors, unloading valves and vacuum breakers, expansion devices, and screens.

4. Generator hydrogen, gas piping, and detrainment equipment.

5. Cooling system, including towers, pumps, tanks, and piping.

6. Cranes and hoists, including items wholly identified with items listed herein.

7. Excitation system, when identified with main generating units.

8. Fire-extinguishing systems.

9. Foundations and settings, especially constructed for and not expected to outlast the apparatus for which provided.

10. Governors.

11. Lighting systems.

12. Lubricating systems, including gauges, filters, water separators, tanks, pumps, piping, and motors.

13. Mechanical meters, including gauges, recording instruments, sampling and testing equipment.

14. Piping-main exhaust, including connections between turbogenerator and condenser and between condenser and hotwell.

15. Piping-main steam, including connections from main throttle valve to turbine inlet.

16. Platforms, railings, steps, and gratings appurtenant to apparatus listed herein.

17. Pressure oil systems, including accumulators, pumps, and piping motors.

18. Steelwork, specially constructed for apparatus listed herein.

19. Throttle and inlet valve.

20. Tunnels, intake and discharge, for condenser system, when not a part of structure, and water screens.

21. Turbogenerators-main, including turbine and generator, field rheostats and electric connections for self-excited units.

22. Water screens and motors.

23. Moisture separator for turbine steam.

24. Turbine lubricating oil (initial charge).

§ 1767.20

7 CFR Ch. XVII (1–1–97 Edition)

315 Accessory Electric Equipment

This account shall include the cost installed of auxiliary generating apparatus, conversion equipment, and equipment used primarily in connection with the control and switching of electric energy produced by steam power, and the protection of electric circuits and equipment, except electric motors used to drive equipment included in other accounts. Such motors shall be included in the account in which the equipment with which they are associated is included.

Items

1. Auxiliary generators, including boards, compartments, switching equipment, control equipment, and connections to auxiliary power bus.

2. Excitation system, including motor, turbine and dual-drive exciter sets and rheostats, storage batteries and charging equipment, circuit breakers, panels and accessories, knife switches and accessories, surge arresters, instrument shunts, conductors and conduit, special supports for conduit, generator field and exciter switch panels, exciter bus tie panels, generator and exciter rheostats and special housing and protective screens.

3. Generator main connections, including oil circuit breakers and accessories, disconnecting switches and accessories, operating mechanisms and interlocks, current transformers, potential transformers, protective relays, isolated panels and equipment, conductors and conduit, special supports for generator main leads, grounding switch, and special housings and protective screens.

4. Station buses including main, auxiliary, transfer, synchronizing and fault ground buses, including oil circuit breakers and accessories, disconnecting switches and accessories, operating mechanisms and interlocks, reactors and accessories, voltage regulators and accessories, compensators, resistors, starting transformers, current transformers, potential transformers, protective relays, storage batteries and charging equipment, isolated panels and equipment, conductors and conduit, special supports, special housings, concrete pads, general station ground-

ing system, special fire-extinguishing system, and test equipment.

5. Station control system, including station switchboards with panel wiring, panels with instruments and control equipment only, panels with switching equipment mounted or mechanically connected, truck-type boards complete, cubicles, station supervisory control boards, generator and exciter signal stands, temperature recording devices, frequency-control equipment, master clocks, watt-hour meters and synchronoscope in the turbine room, station totalizing wattmeter, boiler-room load indicator equipment, storage batteries, panels and charging sets, instrument transformers for supervisory metering, conductors and conduit, special supports for conduit, switchboards, batteries, special housing for batteries, protective screens, and doors.

NOTE A: Do not include in this account transformers and other equipment used for changing the voltage or frequency of electricity for the purposes of transmission or distribution.

NOTE B: When any item of equipment listed herein is used wholly to furnish power to equipment included in another account, its cost shall be included in such other account.

316 Miscellaneous Power Plant Equipment

This account shall include the cost installed of miscellaneous equipment in and about the steam generating plant devoted to general station use, and which is not properly includible in any of the foregoing steam-power production accounts.

Items

1. Compressed air and vacuum cleaning systems, including tanks, compressors, exhausters, air filters, and piping.

2. Cranes and hoisting equipment, including cranes, cars, crane rails, monorails, and hoists with electric and mechanical connections.

3. Fire-extinguishing equipment for general station use.

4. Foundations and settings specially constructed for and not expected to outlast the apparatus for which provided.

5. Locomotive cranes not includible elsewhere.

Rural Utilities Service, USDA

§ 1767.20

6. Locomotives not includible elsewhere.

7. Marine equipment, including boats and barges.

8. Miscellaneous belts, pulleys, and countershafts.

9. Miscellaneous equipment, including atmospheric and weather indicating devices, intrasite communication equipment, laboratory equipment, signal systems, callophones, emergency whistles and sirens, fire alarms, insect-control equipment, and other similar equipment.

10. Railway cars not includible elsewhere.

11. Refrigerating systems, including compressors, pumps, and cooling coils.

12. Station maintenance equipment, including lathes, shapers, planers, drill presses, hydraulic presses, and grinders with motors, shafting, hangers, and pulleys.

13. Ventilating equipment, including items wholly identified with apparatus listed herein.

NOTE: When any item of equipment listed herein is wholly used in connection with equipment included in another account, its cost shall be included in such other account.

Nuclear Production

320 Land and Land Rights

This account shall include the cost of land and land rights used in connection with nuclear power generation. (See § 1767.16(g).)

321 Structures and Improvements

This account shall include the cost, in place, of structures and improvements used and useful in connection with nuclear power generation. (See § 1767.16(h).)

NOTE: Include vapor containers and nuclear production roads and railroads in this account.

322 Reactor Plant Equipment

This account shall include the installed cost of reactors, reactor fuel handling and storage equipment, pressurizing equipment, coolant charging equipment, purification and discharging equipment, radioactive waste treatment and disposal equipment, boilers, steam and feed water piping, reactor and boiler apparatus and accessories

and other reactor plant equipment used in the production of steam to be used primarily for generating electricity, including auxiliary superheat boilers and associated equipment in systems which change temperatures or pressure of steam from the reactor system.

Items

1. Auxiliary superheat boilers and associated fuel storage handling preparation and burning equipment. (See Account 312, Boiler Plant Equipment, for items, but exclude water supply, water flow lines, and steam lines, as well as other equipment not strictly within the superheat function.)

2. Boiler feed system, including feed water heaters, evaporator condensers, heater drain pumps, heater drainers, deaerators, and vent condensers, boiler feed pumps, surge tanks, feed water regulators, feed water measuring equipment, and all associated drivers.

3. Boilers and heat exchangers.

4. Instruments and devices, including all measuring, indicating, and recording equipment for reactor and boiler plant service together with mountings and supports.

5. Lighting systems.

6. Moderators, such as heavy water, and graphite, initial charge.

7. Reactor coolant; primary and secondary systems, initial charge.

8. Radioactive waste treatment and disposal equipment, including tanks, ion exchangers, incinerators, condensers, chimneys, and diluting fans and pumps.

9. Foundations and settings, especially constructed for and not expected to outlast the apparatus for which provided.

10. Reactor including shielding, control rods and mechanisms.

11. Reactor fuel handling equipment, including manipulating and extraction tools, underwater viewing equipment, seal cutting and welding equipment, fuel transfer equipment, and fuel disassembly machinery.

12. Reactor fuel element failure detection system.

13. Reactor emergency poison container and injection system.

14. Reactor pressuring and pressure relief equipment, including pressurizing tanks and immersion heaters.

§ 1767.20

7 CFR Ch. XVII (1–1–97 Edition)

15. Reactor coolant or moderator circulation charging, purification, and discharging equipment, including tanks, pumps, heat exchangers, demineralizers, and storage.

16. Station piping, including pipes, valves, fittings, separators, traps, desuperheaters, hangers, excavation, and covering for station piping system, including all-reactor coolant, steam, condensate, boiler feed and water supply piping, but not condensing water, plumbing, building heating, oil, gas, or air piping.

17. Ventilating equipment.

18. Water purification equipment, including softeners, demineralizers and accessories, evaporators and accessories, heat exchangers, filters, tanks for filtered or softened water, pumps, and motors.

19. Water supply systems, including pumps, motors, strainers, raw-water storage tanks, boiler wash pumps, intake and discharge pipes and tunnels not a part of a building.

20. Reactor plant cranes and hoists, and associated drives.

NOTE: When the system for supplying boiler or condenser water is elaborate, as when it includes a dam, reservoir, canal, pipe lines, or cooling ponds, the cost of such special facilities shall be charged to a subdivision of Account 321, Structures and Improvements.

323 Turbogenerator Units

This account shall include the cost installed of main turbine-driven units and accessory equipment used in generating electricity by steam.

Items

1. Air cleaning and cooling apparatus, including blowers, drive equipment, air ducts, not a part of building, louvers, pumps, and hoods.

2. Circulating pumps, including connections between condensers, and intake and discharge tunnels.

3. Condensers, including condensate pumps, air and vacuum pumps, ejectors, unloading valves and vacuum breakers, expansion devices, and screens.

4. Generator hydrogen gas piping system and hydrogen detrainment equipment, and bulk hydrogen gas storage equipment.

5. Cooling system, including towers, pumps, tanks, and piping.

6. Cranes and hoists, including items wholly identified with items listed herein.

7. Excitation system, when identified with main generating units.

8. Fire extinguishing systems.

9. Foundations and settings, especially constructed for and not expected to outlast the apparatus for which provided.

10. Governors.

11. Lighting systems.

12. Lubricating systems, including gauges, filters, water separators, tanks, pumps, piping, and motors.

13. Mechanical meters, including gauges, recording instruments, sampling and testing equipment.

14. Piping-main steam, including connections between turbogenerator and condenser and between condenser and hotwell.

15. Piping-main steam, including connections from main throttle valve to turbine inlet.

16. Platforms, railings, steps, and gratings appurtenant to apparatus listed herein.

17. Pressure oil systems, including accumulators, pumps, piping, and motors.

18. Steelwork, specially constructed for apparatus listed herein.

19. Throttle and inlet valve.

20. Tunnels, intake and discharge, for condenser system, when not a part of structure, and water screens.

21. Turbogenerators-main, including turbine and generator, field rheostats and electric connections for self-excited units.

22. Water screens and motors.

23. Moisture separators for turbine steam.

24. Turbine lubricating oil, initial charge.

324 Accessory Electric Equipment

This account shall include the cost installed of auxiliary generating apparatus, conversion equipment, and equipment used primarily in connection with the control and switching of electric energy produced by nuclear power, and the protection of electric circuits and equipment, except electric

Rural Utilities Service, USDA

§ 1767.20

motors used to drive equipment included in other accounts. Such motors shall be included in the account in which the equipment with which they are associated is included.

NOTE: Do not include in this account transformers and other equipment used for changing the voltage or frequency of electric energy for the purpose of transmission or distribution.

Items

1. Auxiliary generators, including boards, compartments, switching equipment, control equipment, and connections to auxiliary power bus.

2. Excitation system, including motor, turbine and dual-drive exciter sets and rheostats, storage batteries, and charging equipment, circuit breakers, panels and accessories, knife switches and accessories, surge arresters, instrument shunts, conductors and conduit, special supports for conduit, generator field and exciter switch panels, exciter bus tie panels, generator and exciter rheostats and special housing and protective screens.

3. Generator main connections, including oil circuit breakers and accessories, disconnecting switches and accessories, operating mechanisms and interlocks, current transformers, potential transformers, protective relays, isolated panels and equipment, conductors and conduit, special supports for generator main leads, grounding switch, special housings and protective screens.

4. Station buses, including main, auxiliary, transfer, synchronizing and fault ground buses, including oil circuit breakers and accessories, operating mechanisms and interlocks, reactors and accessories, voltage regulators and accessories, compensators, resistors, starting transformers, current transformers, potential transformers, protective relays, storage batteries and charging equipment, isolated panels and equipment, conductors and conduit, special supports, special housings, concrete pads, general station grounding system, fire-extinguishing system, and test equipment.

5. Station control system, including station switchboards with panel wiring, panels with instruments and control equipment only, panels with

switching equipment mounted or mechanically connected, truck-type boards complete, cubicles, station supervisory control boards, generator and exciter signal stands, temperature recording devices, frequency-control equipment, master clocks, watt-hour meters and synchroscope in the turbine room, station totalizing wattmeter, boiler-room load indicator equipment, storage batteries, panels and charging sets, instrument transformers for supervisory metering, conductors and conduit, special supports for conduit, switchboards, batteries, special housing for batteries, protective screens, and doors.

NOTE: When any item of equipment listed herein is used wholly to furnish power to equipment included in another account, its cost shall be included in such other account.

325 Miscellaneous Power Plant Equipment

This account shall include the cost installed of miscellaneous equipment in and about the nuclear generating plant devoted to general station use, which is not properly includible in any of the foregoing nuclear-power production accounts.

Items

1. Compressed air and vacuum cleaning systems, including tanks, compressors, exhausters, air filters, and piping.

2. Cranes and hoisting equipment, including cranes, cars, crane rails, mono-rails, and hoists with electric and mechanical connections.

3. Fire-extinguishing equipment for general station and site use.

4. Foundations and settings specially constructed for and not expected to outlast the apparatus for which provided.

5. Locomotive cranes not includible elsewhere.

6. Locomotives not included elsewhere.

7. Marine equipment, including boats and barges.

8. Miscellaneous belts, pulleys, and countershafts.

9. Miscellaneous equipment, including atmospheric and weather recording devices, intrasite communication equipment, laboratory equipment, signal systems, callophones, emergency

§ 1767.20

whistles and sirens, fire alarms, insect-control equipment, and other similar equipment.

10. Railway cars or special shipping containers not includible elsewhere.

11. Refrigerating systems, including compressors, pumps, and cooling coils.

12. Station maintenance equipment, including lathes, shapers, planers, drill presses, hydraulic presses, and grinders with motors, shafting, hangers, and pulleys.

13. Ventilating equipment, including items wholly identified with apparatus listed herein.

14. Station and area radiation monitoring equipment.

NOTE: When any item of equipment listed herein is wholly used in connection with equipment included in another account, its cost shall be included in such other account.

Hydraulic Production

330 Land and Land Rights

This account shall include the cost of land and land rights used in connection with hydraulic power generation. (See § 1767.16 (g).) It shall also include the cost of land and land rights used in connection with (1) the conservation of fish and wildlife, and (2) recreation. Separate subaccounts shall be maintained for each of the above.

331 Structures and Improvements

This account shall include the cost, in place, of structures and improvements used in connection with hydraulic power generation. (See § 1767.16 (h).) It shall also include the cost, in place, of structures and improvements used in connection with (1) the conservation of fish and wildlife, and (2) recreation. Separate subaccounts shall be maintained for each of the above.

332 Reservoirs, Dams, and Waterways

This account shall include the cost in place of facilities used for impounding, collecting, storage, diversion, regulation, and delivery of water used primarily for generating electricity. It shall also include the cost in place of facilities used in connection with (1) the conservation of fish and wildlife, and (2) recreation. Separate subaccounts shall be maintained for each of the above. (See § 1767.16 (h)(3).)

7 CFR Ch. XVII (1–1–97 Edition)

Items

1. Bridges and culverts, when not a part of roads or railroads.

2. Clearing and preparing land.

3. Dams, including wasteways, spillways, flash boards, spillway gates with operating and control mechanisms, tunnels, gate houses, and fish ladders.

4. Dikes and embankments.

5. Electric system, including conductors, control system, transformers, and lighting fixtures.

6. Excavation, including shoring, bracing, bridging, refill, and disposal of excess excavated material.

7. Foundations and settings specially constructed for and not expected to outlast the apparatus for which provided.

8. Intakes, including trash racks, rack cleaners, control gates and valves with operating mechanisms, and intake house when not a part of station structure.

9. Platforms, railings, steps, and gratings appurtenant to structures listed herein.

10. Power line wholly identified with items included herein.

11. Retaining walls.

12. Water conductors and accessories, including canals, tunnels, flumes, penstocks, pipe conductors, forebays, tailraces, navigation locks and operating mechanisms, water-hammer and surge tanks, and supporting trestles and structures.

13. Water storage reservoirs, including dams, flashboards, spillway gates and operating mechanisms, inlet and outlet tunnels, regulating valves and valve towers, silt and mud sluicing tunnels with valve or gate towers, and all other structures wholly identified with any of the foregoing items.

333 Water Wheels, Turbines and Generators

This account shall include the cost installed of water wheels and hydraulic turbines (from connection with penstock or flume to tailrace) and generators driven thereby devoted to the production of electricity by water power or for the production of power for industrial or other purposes, if the equipment used for such purposes is a

Rural Utilities Service, USDA

§ 1767.20

part of the hydraulic power plant works.

Items

1. Exciter water wheels and turbines, including runners, gates, governors, pressure regulators, oil pumps, operating mechanisms, scroll cases, draft tubes, and draft-tube supports.
2. Fire-extinguishing equipment.
3. Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided.
4. Generator cooling system, including air cooling and washing apparatus, air fans and accessories, and air ducts.
5. Generators-main, a.c. or d.c., including field rheostats and connections for self-excited units and excitation system when identified with the generating unit.
6. Lighting systems.
7. Lubricating systems, including gauges, filters, tanks, pumps, and piping.
8. Main penstock valves and appurtenances, including main valves, control equipment, bypass valves and fittings, and other accessories.
9. Main turbines and water wheels, including runners, gates, governors, pressure regulators, oil pumps, operating mechanisms, scroll cases, draft tubes, and draft-tube supports.
10. Mechanical meters and recording instruments.
11. Miscellaneous water-wheel equipment, including gauges, thermometers, meters, and other instruments.
12. Platforms, railings, steps, and gratings appurtenant to apparatus listed herein.
13. Scroll case filling and drain system, including gates, pipe, valves, and fittings.
14. Water-actuated pressure-regulator system, including tanks and housings, pipes, valves, fittings and insulators, piers and anchorage, and excavation and backfill.

334 Accessory Electric Equipment

This account shall include the cost installed of auxiliary generating apparatus, conversion equipment, and equipment used primarily in connection with the control and switching of electric energy produced by hydraulic

power and the protection of electric circuits and equipment, except electric motors used to drive equipment included in other accounts, such motors being included in the account in which the equipment with which they are associated is included.

Items

1. Auxiliary generators, including boards, compartments, switching equipment, control equipment, and connections to auxiliary power bus.
2. Excitation system, including motor, turbine, and dual-drive exciter sets and rheostats, storage batteries and charging equipment, circuit breakers, panels and accessories, knife switches and accessories, surge arresters, instrument shunts, conductors and conduit, special supports for conduit, generator field and exciter switch panels, exciter bus tie panels, generator and exciter rheostats and special housings and protective screens.
3. Generator main connections, including oil circuit breakers and accessories, disconnecting switches and accessories, operating mechanisms and interlocks, current transformers, potential transformers, protective relays, isolated panels and equipment, conductors and conduit, special supports for generator main leads, grounding switch, and special housings and protective screens.
4. Station buses, including main, auxiliary, transfer, synchronizing, and fault ground buses, including oil circuit breakers and accessories, disconnecting switches and accessories, operating mechanisms and interlocks, reactors and accessories, voltage regulators and accessories, compensators, resistors starting transformers, current transformers, potential transformers, protective relays, storage batteries, and charging equipment, isolated panels and equipment, conductors and conduit, special supports, special fire-extinguishing system, and test equipment.
5. Station control system, including station switchboards with panel wiring, panels with instruments and control equipment only, panels with switching equipment mounted for mechanically connected, truck-type

§ 1767.20

boards complete, cubicles, station supervisory control devices, frequency control equipment, master clocks, watt-hour meter, station totalizing watt-meter, storage batteries, panels and charging sets, instrument transformers for supervisory metering, conductors and conduit, special supports for conduit, switchboards, batteries, special housings for batteries, protective screens, and doors.

NOTE A: Do not include in this account transformers and other equipment used for changing the voltage or frequency of electricity for the purpose of transmission or distribution.

NOTE B: When any item of equipment listed herein is used wholly to furnish power to equipment, it shall be included in such equipment account.

335 Miscellaneous Power Plant Equipment

This account shall include the cost installed of miscellaneous equipment in and about the hydroelectric generating plant which is devoted to general station use and is not properly includible in other hydraulic production accounts. It shall also include the cost of equipment used in connection with (1) the conservation of fish and wildlife, and (2) recreation. Separate sub-accounts shall be maintained for each of the above.

Items

1. Compressed air and vacuum cleaning systems, including tanks, compressors, exhausters, air filters, and piping.
2. Cranes and hoisting equipment, including cranes, cars, crane rails, mono-rails, and hoists with electric and mechanical connections.
3. Fire-extinguishing equipment for general station use.
4. Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided.
5. Locomotive cranes not includible elsewhere.
6. Locomotives not includible elsewhere.
7. Marine equipment, including boats and barges.
8. Miscellaneous belts, pulleys, and countershafts.

7 CFR Ch. XVII (1-1-97 Edition)

9. Miscellaneous equipment, including atmospheric and weather indicating devices. Intrasite communication equipment, laboratory equipment, insect control equipment, signal systems, callophones, emergency whistles and sirens, fire alarms, and other similar equipment.

10. Railway cars, not includible elsewhere.

11. Refrigerating system, including compressors, pumps, and cooling coils.

12. Station maintenance equipment, including lathes, shapers, planers, drill presses, hydraulic presses, and grinders with motors, shafting, hangers, and pulleys.

13. Ventilating equipment, including items wholly identified with apparatus listed herein.

NOTE: When any item of equipment, listed herein, is used wholly in connection with equipment included in another account, its cost shall be included in such other account.

336 Roads, Railroads, and Bridges

This account shall include the cost of roads, railroads, trails, bridges, and trestles used primarily as production facilities. It also includes those roads necessary to connect the plant with highway transportation systems, except when such roads are dedicated to public use and maintained by public authorities.

Items

1. Bridges, including foundations, piers, girders, trusses, and flooring.
2. Clearing land.
3. Railroads, including grading, ballast, ties, rails, culverts, and hoists.
4. Roads, including grading, surfacing, and culverts.
5. Structures, constructed and maintained in connection with items listed herein.
6. Trails, including grading, surfacing, and culverts.
7. Trestles, including foundations, piers, girders, trusses, and flooring.

NOTE A: Roads intended primarily for connecting employees' houses with the power plant, and roads used primarily in connection with fish and wildlife, and recreation activities, shall not be included herein but in Account 331, Structures and Improvements.

Rural Utilities Service, USDA

§ 1767.20

NOTE B: The cost of temporary roads and bridges necessary during the period of construction but abandoned or dedicated to public use upon completion of the plant, shall not be included herein but shall be charged to the accounts appropriate for the construction.

Other Production

340 Land and Land Rights

This account shall include the cost of land and land rights used in connection with other power generation. (See § 1767.16 (g).)

341 Structures and Improvements

This account shall include the cost in place of structures and improvements used in connection with other power generation. (See § 1767.16 (h).)

342 Fuel Holders, Producers, and Accessories

This account shall include the cost installed of fuel handling and storage equipment used between the point of fuel delivery to the station and the intake pipe through which fuel is directly drawn to the engine, also the cost of gas producers and accessories devoted to the production of gas for use in prime movers driving main electric generators.

Items

1. Blower and fans.
2. Boilers and pumps.
3. Economizers.
4. Exhauster outfits.
5. Flues and piping.
6. Pipe system.
7. Producers.
8. Regenerators.
9. Scrubbers.
10. Steam injectors.
11. Tanks for storage of oil and gasoline.
12. Vaporizers.

343 Prime Movers

This account shall include the cost installed of Diesel or other prime movers devoted to the generation of electric energy, together with their auxiliaries.

Items

1. Air-filtering system.
2. Belting, shafting, pulleys, and reduction gearing.
3. Cooling system, including towers, pumps, tanks, and piping.
4. Cranes and hoists, including items wholly identified with apparatus listed herein.
5. Engines, Diesel, gasoline, gas, or other internal combustion.
6. Foundations and settings specially constructed for and not expected to outlast the apparatus for which provided.
7. Governors.
8. Ignition system.
9. Inlet valve.
10. Lighting systems.
11. Lubricating systems, including filters, tanks, pumps, and piping.
12. Mechanical meters, including gauges, recording instruments, sampling, and testing equipment.
13. Mufflers.
14. Piping.
15. Starting systems, compressed air, or other, including compressors and drives, tanks, piping, motors, boards and connections, and storage tanks.
16. Steelwork, specially constructed for apparatus listed herein.
17. Waste heat boilers and antifiuctuators.

344 Generators

This account shall include the cost installed of Diesel or other power driven main generators.

Items

1. Cranes and hoists, including items wholly identified with such apparatus.
2. Fire-extinguishing equipment.
3. Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided.
4. Generator cooling system, including air cooling and washing apparatus, air fans and accessories, and air ducts.
5. Generators-main, a.c. or d.c., including field rheostats and connections for self-excited units and excitation system when identified with the generating unit.
6. Lighting systems.

§ 1767.20

7. Lubricating system, including tanks, filters, strainers, pumps, piping, and coolers.

8. Mechanical meters and recording instruments.

9. Platforms, railings, steps, and gratings appurtenant to apparatus listed herein.

NOTE: If prime movers and generators are so integrated that it is not practical to classify them separately, the entire unit may be included in Account 344, Generators.

345 Accessory Electric Equipment

This account shall include the cost installed of auxiliary generating apparatus, conversion equipment, and equipment used primarily in connection with the control and switching of electric energy produced in other power generating stations, and the protection of electric circuits and equipment, except electric motors used to drive equipment included in other accounts. Such motors shall be included in the account in which the equipment with which it is associated is included.

Items

1. Auxiliary generators, including boards, compartments, switching equipment, control equipment, and connections to auxiliary power bus.

2. Excitation system, including motor, turbine and dual-drive exciter sets and rheostats, storage batteries and charging equipment, circuit breakers, panels and accessories, knife switches and accessories, surge arresters, instrument shunts, conductors and conduit, special supports for conduit, generator field and exciter switch panels, exciter bus tie panels, generator and exciter rheostats and special housings and protective screens.

3. Generator main connections, including oil circuit breakers and accessories, disconnecting switches and accessories, operating mechanisms and interlocks, current transformers, potential transformers, protective relays, isolated panels and equipment, conductors and conduit, special supports for generator main leads, grounding switch, and special housing and protective screens.

4. Station control system, including station switchboards with panel wiring, panels with instruments and con-

7 CFR Ch. XVII (1-1-97 Edition)

trol equipment only, panels with switching equipment mounted or mechanically connected, trunk-type boards complete, cubicles, station supervisory control boards, generator and exciter signal stands, temperature-recording devices, frequency control equipment, master clocks, watt-hour meter, station totalizing wattmeter, storage batteries, panels and charging sets, instrument transformers for supervisory metering, conductors and conduit, special supports for conduit, switchboards, batteries, special housing for batteries, protective screens, and doors.

5. Station buses, including main, auxiliary, transfer, synchronizing and fault ground buses, including oil circuit breakers and accessories, disconnecting switches and accessories, operating mechanisms and interlocks, reactors and accessories, voltage regulators and accessories, compensators, resistors, starting transformers, current transformers, potential transformers, protective relays, storage batteries and charging equipment, isolated panels and equipment, conductors and conduit, special supports, special housings, concrete pads, general station ground system, special fire-extinguishing system, and test equipment.

NOTE A: Do not include in this account transformers and other equipment used for changing the voltage or frequency of electric energy for the purpose of transmission or distribution.

NOTE B: When any item of equipment listed herein is used wholly to furnish power to equipment included in another account, its cost shall be included in such other account.

346 Miscellaneous Power Plant Equipment

This account shall include the cost installed of miscellaneous equipment in and about the other power generating plant, devoted to general station use, and not properly includible in any of the foregoing other power production accounts.

Items

1. Compressed air and vacuum cleaning systems, including tanks, compressors, exhausters, air filters, and piping.

Rural Utilities Service, USDA

§ 1767.20

2. Cranes and hoisting equipment, including cranes, cars, crane rails, mono-rails, and hoists with electric and mechanical connections.

3. Fire-extinguishing equipment for general station use.

4. Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided.

5. Miscellaneous equipment, including atmospheric and weather indicating devices, intrasite communication equipment, laboratory equipment, signal systems, callophones, emergency whistles and sirens, fire alarms, and other similar equipment.

6. Miscellaneous belts, pulleys, and countershafts.

7. Refrigerating systems including compressors, pumps, and cooling coils.

8. Station maintenance equipment, including lathes, shapers, planers, drill presses, hydraulic presses, and grinders with motors, shafting, hangers, or pulleys.

9. Ventilating equipment, including items wholly identified with apparatus listed herein.

NOTE: When any item of equipment, listed herein is used wholly in connection with equipment included in another account, its cost shall be included in such other account.

TRANSMISSION PLANT

350 Land and Land Rights

This account shall include the cost of land and land rights used in connection with transmission operations. (See § 1767.16 (g).)

351 [Reserved]

352 Structures and Improvements

This account shall include the cost, in place, of structures and improvements used in connection with transmission operations. (See § 1767.16 (h).)

353 Station Equipment

This account shall include the cost installed of transforming, conversion, and switching equipment used for the purpose of changing the characteristics of electricity in connection with its transmission or for controlling transmission circuits.

Items

1. Bus compartments, concrete, brick, and sectional steel, including items permanently attached thereto.

2. Conduit, including concrete and iron duct runs not a part of a building.

3. Control equipment, including batteries, battery charging equipment, transformers, remote relay boards, and connections.

4. Conversion equipment, including transformers, indoor and outdoor, frequency changers, motor generator sets, rectifiers, synchronous converters, motors, cooling equipment, and associated connections.

5. Fences.

6. Fixed and synchronous condensers, including transformers, switching equipment, blowers, motors and connections.

7. Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided.

8. General station equipment, including air compressors, motors, hoists, cranes, test equipment, and ventilating equipment.

9. Platforms, railings, steps, and gratings appurtenant to apparatus listed herein.

10. Primary and secondary voltage connections, including bus runs and supports, insulators, potheads, lightning arresters, cable and wire runs from and to outdoor connections or to manholes and the associated regulators, reactors, resistors, surge arresters, and accessory equipment.

11. Switchboards, including meters, relays, and control wiring.

12. Switching equipment, indoor and outdoor, including oil circuit breakers and operating mechanisms, truck switches, and disconnect switches.

13. Tools and appliances.

354 Towers and Fixtures

This account shall include the cost installed of towers and appurtenant fixtures used for supporting overhead transmission conductors.

Items

1. Anchors, guys, and braces.

2. Brackets.

3. Crossarms, including braces.

§ 1767.20

4. Excavation, backfill, and disposal of excess excavated material.
5. Foundations.
6. Guards.
7. Insulator pins and suspension bolts.
8. Ladder and steps.
9. Railings.
10. Towers.

355 Poles and Fixtures

This account shall include the cost installed of transmission line poles, wood, steel, concrete, or other material, together with appurtenant fixtures used for supporting overhead transmission conductors.

Items

1. Anchors, head arm and other guys, including guy guards, guy clamps, strain insulators, and pole plates.
2. Brackets.
3. Crossarms and braces.
4. Excavation and backfill, including disposal of excess excavated material.
5. Extension arms.
6. Gaining, roofing, stenciling, and tagging.
7. Insulator pins and suspension bolts.
8. Paving.
9. Pole steps.
10. Poles, wood, steel, concrete, or other material.
11. Racks complete with insulators.
12. Reinforcing and stubbing.
13. Settings.
14. Shaving and painting.

356 Overhead Conductors and Devices

This account shall include the cost installed of overhead conductors and devices used for transmission purposes.

Items

1. Circuit breakers.
2. Conductors, including insulated and bare wires and cables.
3. Ground wires and ground clamps.
4. Insulators, including pin, suspension, and other types.
5. Lightning arresters.
6. Switches.
7. Other line devices.

7 CFR Ch. XVII (1–1–97 Edition)

357 Underground Conduit

This account shall include the cost installed of underground conduit and tunnels used for housing transmission cables or wires. (See § 1767.16 (n).)

Items

1. Conduit, concrete, brick or tile, including iron pipe, fiber pipe, Murray duct, and standpipe on pole or tower.
2. Excavation, including shoring, bracing, bridging, backfill, and disposal of excess excavated material.
3. Foundations and settings specially constructed for and not expected to outlast the apparatus for which provided.
4. Lighting systems.
5. Manholes, concrete or brick, including iron or steel, frames and covers, hatchways, gratings, ladders, cable racks and hangers, permanently attached to manholes.
6. Municipal inspection.
7. Pavement disturbed, including cutting and replacing pavement, pavement base and sidewalks.
8. Permits.
9. Protection of street openings.
10. Removal and relocation of sub-surface obstructions.
11. Sewer connections, including drains, traps, tide valves, and check valves.
12. Sumps, including pumps.
13. Ventilating equipment.

358 Underground Conductors and Devices

This account shall include the cost installed of underground conductors and devices used for transmission purposes.

Items

1. Armored conductors, buried, including insulators, insulating materials, splices, potheads, and trenching.
2. Armored conductors, submarine, including insulators, insulating materials, splices in terminal chambers, and potheads.
3. Cables in standpipe, including pothead and connection from terminal chamber of manhole to insulators on pole.
4. Circuit breakers.

Rural Utilities Service, USDA

§ 1767.20

5. Fireproofing, in connection with any items listed herein.

6. Hollow-core oil-filled cable, including straight or stop joints, pressure tanks, auxiliary air tanks, feeding tanks, terminals, potheads and connections, and ventilating equipment.

7. Lead and fabric covered conductors, including insulators, compound filled, oil filled, or vacuum splices, and potheads.

8. Lightning arresters.

9. Municipal inspection.

10. Permits.

11. Protection of street openings.

12. Racking of cables.

13. Switches.

14. Other line devices.

359 Roads and Trails

This account shall include the cost of roads, trails, and bridges used primarily as transmission facilities.

Items

1. Bridges, including foundation piers, girders, trusses, and flooring.

2. Clearing land.

3. Roads, including grading, surfacing, and culverts.

4. Structures, constructed and maintained in connection with items included herein.

5. Trails, including grading, surfacing, and culverts.

NOTE: The cost of temporary roads, and bridges necessary during the period of construction but abandoned or dedicated to public use upon completion of the plant, shall be charged to the accounts appropriate for the construction.

DISTRIBUTION PLANT

360 Land and Land Rights

This account shall include the cost of land and land rights used in connection with distribution operations. (See § 1767.16 (g).)

NOTE: Do not include the cost of permits to erect poles, or towers or to trim trees in this account. (See Account 364, Poles, Towers and Fixtures, and Account 365, Overhead Conductors and Devices.)

361 Structures and Improvements

This account shall include the cost, in place, of structures and improve-

ments used in connection with distribution operations. (See § 1767.16 (h).)

362 Station Equipment

This account shall include the cost installed of station equipment, including transformer banks, which are used for the purpose of changing the characteristics of electricity in connection with its distribution.

Items

1. Bus compartments, concrete, brick and sectional steel, including items permanently attached thereto.

2. Conduit, including concrete and iron duct runs not part of building.

3. Control equipment, including batteries, battery charging equipment, transformers, remote relay boards, and connections.

4. Conversion equipment, indoor and outdoor, frequency changers, motor generator sets, rectifiers, synchronous converters, motors, cooling equipment, and associated connections.

5. Fences.

6. Fixed and synchronous condensers, including transformers, switching equipment, blowers, motors, and connections.

7. Foundations and settings, specially constructed for and not expected to outlast the apparatus for which provided.

8. General station equipment, including air compressors, motors, hoists, cranes, test equipment, and ventilating equipment.

9. Platforms, railings, steps, and gratings appurtenant to apparatus listed herein.

10. Primary and secondary voltage connections, including bus runs and supports, insulators, potheads, lightning arresters, cable and wire runs from and to outdoor connections or to manholes and the associated regulators, reactors, resistors, surge arresters, and accessory equipment.

11. Switchboards, including meters, relays, and control wiring.

12. Switching equipment, indoor and outdoor, including oil circuit breakers and operating mechanisms, truck switches, disconnect switches.

NOTE: The cost of rectifiers, series transformers, and other special station equipment devoted exclusively to street lighting service

§ 1767.20

shall not be included in this account, but in Account 373, Street Lighting and Signal Systems.

363 Storage Battery Equipment is account shall include the cost installed of storage battery equipment used for the purpose of supplying electricity to meet emergency or peak demands.

Items

1. Batteries, including elements, tanks, and tank insulators.
2. Battery room connections, including cable or bus runs and connections.
3. Battery room flooring, when specially laid for supporting batteries.
4. Charging equipment, including motor generator sets and other charging equipment and connections, and cable runs from generator or station bus to battery room connections.
5. Miscellaneous equipment, including instruments, and water stills.
6. Switching equipment, including endcell switches and connections, boards and panels, used exclusively for battery control, not part of general station switchboard.
7. Ventilating equipment, including fans and motors, louvers, and ducts not part of building.

NOTE: Storage batteries used for control and general station purposes shall not be included in this account but in the account appropriate for their use.

364 Poles, Towers and Fixtures

This account shall include the cost installed of poles, towers, and appurtenant fixtures used for supporting overhead distribution conductors and service wires.

Items

1. Anchors, head arm, and other guys, including guy guards, guy clamps, strain insulators, and pole plates.
2. Brackets.
3. Crossarms and braces.
4. Excavation and backfill, including disposal of excess excavated material.
5. Extension arms.
6. Foundations.
7. Guards.
8. Insulator pins and suspension bolts.
9. Paving.
10. Permits for construction.

7 CFR Ch. XVII (1-1-97 Edition)

11. Pole steps and ladders.
12. Poles, wood, steel, concrete, or other material.
13. Racks complete with insulators.
14. Railings.
15. Reinforcing and stubbing.
16. Settings.
17. Shaving, painting, gaining, roofing, stenciling, and tagging.
18. Towers.
19. Transformer racks and platforms.

365 Overhead Conductors and Devices

This account shall include the cost installed of overhead conductors and devices used for distribution purposes.

Items

1. Circuit breakers.
2. Conductors, including insulated and bare wires and cables.
3. Ground wires and clamps.
4. Insulators, including pin, suspension, and other types, and tie wire or clamps.
5. Lightning arresters.
6. Railroad and highway crossing guards.
7. Splices.
8. Switches.
9. Tree trimming, initial cost including the cost of permits therefor.
10. Other line devices.
11. Oil circuit reclosers (OCR).
12. Sectionalizers.
13. Labor costs for installation of OCRs and Sectionalizers, first only.

NOTE: The cost of conductors used solely for street lighting or signal systems shall not be included in this account but in Account 373, Street Lighting and Signal Systems.

366 Underground Conduit

This account shall include the cost installed of underground conduit and tunnels used for housing distribution cables or wires.

Items

1. Conduit, concrete, brick and tile, including iron pipe, fiber pipe, Murray duct, and standpipe on pole or tower.
2. Excavation, including shoring, bracing, bridging, backfill, and disposal of excess excavated material.
3. Foundations and settings specially constructed for and not expected to

Rural Utilities Service, USDA

§ 1767.20

outlast the apparatus for which constructed.

4. Lighting systems.

5. Manholes, concrete or brick, including iron or steel frames and covers, hatchways, gratings, ladders, cable racks, and hangers permanently attached to manholes.

6. Municipal inspection.

7. Pavement disturbed, including cutting and replacing pavement, pavement base, and sidewalks.

8. Permits.

9. Protection of street openings.

10. Removal and relocation of sub-surface obstructions.

11. Sewer connections, including drains, traps, tide valves, and check valves.

12. Sumps, including pumps.

13. Ventilating equipment.

NOTE: The cost of underground conduit used solely for street lighting or signal systems shall be included in Account 373, Street Lighting and Signal Systems.

367 Underground Conductors and Devices

This account shall include the cost installed of underground conductors and devices used for distribution purposes.

Items

1. Armored conductors, buried, including insulators, insulating materials, splices, potheads, and trenching.

2. Armored conductors, submarine, including insulators, insulating materials, splices in terminal chamber, and potheads.

3. Cables in standpipe, including pothead and connection from terminal chamber or manhole to insulators on pole.

4. Circuit breakers.

5. Fireproofing, in connection with any items listed herein.

6. Hollow-core oil-filled cable, including straight or stop joints, pressure tanks, auxiliary air tanks, feeding tanks, terminals, potheads and connections.

7. Lead and fabric covered conductors, including insulators, compound-filled, oil-filled or vacuum splices, and potheads.

8. Lightning arresters.

9. Municipal inspection.

10. Permits.

11. Protection of street openings.

12. Racking of cables.

13. Switches.

14. Other line devices.

NOTE: The cost of underground conductors and devices used solely for street lighting or signal systems shall be included in Account 373, Street Lighting and Signal Systems.

368 Line Transformers

A. This account shall include the cost installed of overhead and underground distribution line transformers and pole-type and underground voltage regulators owned by the utility, for use in transforming electricity to the voltage at which it is to be used by the customer, whether actually in service or held in reserve.

B. When a transformer is permanently retired from service, the original installed cost thereof shall be credited to this account.

C. The records covering line transformers shall be so kept that the utility can furnish the number of transformers of various capacities in service and those in reserve, and the location and the use of each transfer.

Items

1. Installation, labor of (first installation only).

2. Transformer cut-out boxes.

3. Transformer lightning arresters.

4. Transformers, line and network.

5. Capacitors.

6. Network protectors.

7. Voltage regulators.

NOTE: The cost of removing and resetting line transformers shall not be charged to this account but to Account 583, Overhead Line Expenses, or Account 584, Underground Line Expenses, as appropriate. The cost of line transformers used solely for street lighting or signal systems shall be included in Account 373, Street Lighting and Signal Systems.

369 Services

This account shall include the cost installed of overhead and underground conductors leading from a point where wires leave the last pole of the overhead system or the distribution box or manhole, or the top of the pole of the distribution line, to the point of connection with the customer's outlet or

§ 1767.20

wiring. Conduit used for underground service conductors shall be included herein.

Items

1. Brackets.
2. Cables and wires.
3. Conduit.
4. Insulators.
5. Municipal inspection.
6. Overhead to underground, including conduit or standpipe and conductor from last splice on pole to connection with customer's wiring.
7. Pavement disturbed, including cutting and replacing pavement, pavement base, and sidewalks.
8. Permits.
9. Protection of street openings.
10. Service switch.
11. Suspension wire.

370 Meters

A. This account shall include the cost installed of meters or devices and appurtenances thereto, for use in measuring the electricity delivered to its users, whether actually in service or held in reserve.

B. When a meter is permanently retired from service, the installed cost included herein shall be credited to this account.

C. The records covering meters shall be so kept that the utility can furnish information as to the number of meters of various capacities in service and in reserve as well as the location of each meter owned.

Items

1. Alternate current, watt-hour meters.
2. Current limiting devices.
3. Demand indicators.
4. Demand meters.
5. Direct current watt-hour meters.
6. Graphic demand meters.
7. Installation, labor of (first installation only).
8. Instrument transformers.
9. Maximum demand meters.
10. Meter badges and their attachments.
11. Meter boards and boxes.
12. Meter fittings, connections, and shelves (first set).
13. Meter switches and cut-outs.

7 CFR Ch. XVII (1-1-97 Edition)

14. Prepayment meters.
15. Protective devices.
16. Testing new meters.

NOTE A: This account shall not include meters for recording output of a generating station, or substation meters. It includes only those meters used to record energy delivered to customers.

NOTE B: The cost of removing and resetting meters shall be charged to Account 586, Meter Expenses.

371 Installations on Customers' Premises

This account shall include the cost installed of equipment on the customer's side of a meter when the utility incurs such cost and when the utility retains title to and assumes full responsibility for maintenance and replacement of such property. This account shall not include leased equipment. (See Account 372, Leased Property on Customers' Premises.)

Items

1. Cable vaults.
2. Commercial lamp equipment.
3. Foundations and settings specially provided for equipment included herein.
4. Frequency changer sets.
5. Motor generator sets.
6. Motors.
7. Switchboard panels, high or low tension.
8. Wire and cable connections to incoming cables.

NOTE: Do not include in this account any costs incurred in connection with merchandising, jobbing, or contract work activities.

372 Leased Property on Customers' Premises

This account shall include the cost of electric motors, transformers, and other equipment on customers' premises (including municipal corporations), leased or loaned to customers, but not including property held for sale.

NOTE A: The cost of setting and connecting such appliances or equipment on the premises of customers and the cost of resetting or removal shall not be charged to this account but to operating expenses, Account 587, Customer Installations Expenses.

Rural Utilities Service, USDA

§ 1767.20

NOTE B: Do not include in this account any costs incurred in connection with merchandising, jobbing, or contract work activities.

373 Street Lighting and Signal Systems

This account shall include the cost installed of equipment used wholly for public street and highway lighting or traffic, fire alarm, police, and other signal systems.

Items

1. Armored conductors, buried or submarine, including insulators, insulating materials, splices, and trenching.
2. Automatic control equipment.
3. Conductors, overhead or underground, including lead or fabric covered, parkway cables, including splices, and insulators.
4. Lamps, arc, incandescent, or other types, including glassware, suspension fixtures, and brackets.
5. Municipal inspection.
6. Ornamental lamp posts.
7. Pavement disturbed, including cutting and replacing pavement, pavement base, and sidewalks.
8. Permits.
9. Posts and standards.
10. Protection of street openings.
11. Relays or time clocks.
12. Series contactors.
13. Switches.
14. Transformers, pole or underground.

GENERAL PLANT

389 Land and Land Rights

This account shall include the cost of land and land rights used for utility purposes, the cost of which is not properly includible in other land and land rights accounts. (See § 1767.16 (g).)

390 Structures and Improvements

This account shall include the cost, in place, of structures and improvements used for utility purposes, the cost of which is not properly includible in other structures and improvements accounts. (See § 1767.16 (h).)

391 Office Furniture and Equipment

This account shall include the cost of office furniture and equipment owned by the utility and devoted to utility service, and not permanently attached to buildings, except the cost of such furniture and equipment which the utility elects to assign to other plant accounts on a functional basis.

Items

1. Bookcases and shelves.
2. Desks, chairs, and desk equipment.
3. Drafting-room equipment.
4. Filing, storage, and other cabinets.
5. Floor covering.
6. Library and library equipment.
7. Mechanical office equipment, such as accounting machines, and typewriters.
8. Safes.
9. Tables.

392 Transportation Equipment

This account shall include the cost of transportation vehicles used for utility purposes.

Items

1. Airplanes.
2. Automobiles.
3. Bicycles.
4. Electrical vehicles.
5. Motor trucks.
6. Motorcycles.
7. Repair cars or trucks.
8. Tractors and trailers.
9. Other transportation vehicles.

393 Stores Equipment

This account shall include the cost of equipment used for the receiving, shipping, handling, and storage of materials and supplies.

Items

1. Chain falls.
2. Counters.
3. Cranes (portable).
4. Elevating and stacking equipment (portable).
5. Hoists.
6. Lockers.
7. Scales.
8. Shelving.
9. Storage bins.
10. Trucks, hand and power driven.

§ 1767.20**7 CFR Ch. XVII (1–1–97 Edition)****11. Wheelbarrows.****394 Tools, Shop and Garage Equipment**

This account shall include the cost of tools, implements, and equipment used in construction, repair work, general shops and garages and not specifically provided for or includible in other accounts.

Items

1. Air compressors.
2. Anvils.
3. Automobile repair shop equipment.
4. Battery charging equipment.
5. Belts, shafts and countershafts.
6. Boilers.
7. Cable pulling equipment.
8. Concrete mixers.
9. Drill presses.
10. Derricks.
11. Electric equipment.
12. Engines.
13. Forges.
14. Furnaces.
15. Foundations and settings specially constructed for and not expected to outlast the equipment for which provided.
16. Gas producers.
17. Gasoline pumps, oil pumps, and storage tanks.
18. Greasing tools and equipment.
19. Hoists.
20. Ladders.
21. Lathes.
22. Machine tools.
23. Motor-driven tools.
24. Motors.
25. Pipe threading and cutting tools.
26. Pneumatic tools.
27. Pumps.
28. Riveters.
29. Smithing equipment.
30. Tool racks.
31. Vises.
32. Welding apparatus.
33. Work benches.

395 Laboratory Equipment

This account shall include the cost installed of laboratory equipment used for general laboratory purposes and not specifically provided for or includible in other departmental or functional plant accounts.

Items

1. Ammeters.
2. Current batteries.
3. Frequency changers.
4. Galvanometers.
5. Inductometers.
6. Laboratory standard millivolt meters.
7. Laboratory standard volt meters.
8. Meter-testing equipment.
9. Millivolt meters.
10. Motor generator sets.
11. Panels.
12. Phantom loads.
13. Portable graphic ammeters, voltmeters, and wattmeters.
14. Portable loading devices.
15. Potential batteries.
16. Potentiometers.
17. Rotating standards.
18. Standard cell, reactance, resistor, and shunt.
19. Switchboards.
20. Synchronous timers.
21. Testing panels.
22. Testing resistors.
23. Transformers.
24. Voltmeters.
25. Other testing, laboratory, or research equipment not provided for elsewhere.

396 Power Operated Equipment

This account shall include the cost of power operated equipment used in construction or repair work exclusive of equipment includible in other accounts. Include, also, the tools and accessories acquired for use with such equipment and the vehicle on which such equipment is mounted.

Items

1. Air compressors, including driving unit and vehicle.
2. Back filling machines.
3. Boring machines.
4. Bulldozers.
5. Cranes and hoists.
6. Diggers.
7. Engines.
8. Pile drivers.
9. Pipe cleaning machines.
10. Pipe coating or wrapping machines.
11. Tractors-Crawler type.
12. Trenchers.
13. Other power operated equipment.

Rural Utilities Service, USDA

§ 1767.21

NOTE: It is intended that this account include only such large units as are generally self-propelled or mounted on movable equipment.

397 Communication Equipment

This account shall include the cost installed of telephone, telegraph, and wireless equipment for general use in connection with utility operations.

Items

1. Antennae.
2. Booths.
3. Cables.
4. Distributing boards.
5. Extension cords.
6. Gongs.
7. Hand sets, manual and dial.
8. Insulators.
9. Intercommunicating sets.
10. Loading coils.
11. Operators' desks.
12. Poles and fixtures used wholly for telephone or telegraph wire.
13. Radio transmitting and receiving sets.
14. Remote control equipment and lines.
15. Sending keys.
16. Storage batteries.
17. Switchboards.
18. Telautograph circuit connections.
19. Telegraph receiving sets.
20. Telephone and telegraph circuits.
21. Testing instruments.
22. Towers.
23. Underground conduit used wholly for telephone or telegraph wires and cable wires.

398 Miscellaneous Equipment

This account shall include the cost of equipment, and apparatus used in the utility operations, which is not includible in other accounts.

Items

1. Hospital and infirmary equipment.
2. Kitchen equipment.
3. Employees' recreation equipment.
4. Radios.
5. Restaurant equipment.
6. Soda fountains.
7. Operators' cottage furnishings.
8. Other miscellaneous equipment.

NOTE: Miscellaneous equipment of the nature indicated above wherever practicable,

shall be included in the utility plant accounts on a functional basis.

399 Other Tangible Property

This account shall include the cost of tangible utility plant not provided for elsewhere.

§ 1767.21 Operating income.

The operating income accounts identified in this section shall be used by all RUS borrowers.

UTILITY OPERATING INCOME

- 400 Operating Revenues
- 401 Operation Expense
- 402 Maintenance Expense
- 403 Depreciation Expense
- 403.1 Depreciation Expense—Steam Production Plant
- 403.2 Depreciation Expense—Nuclear Production Plant
- 403.3 Depreciation Expense—Hydraulic Production Plant
- 403.4 Depreciation Expense—Other Production Plant
- 403.5 Depreciation Expense—Transmission Plant
- 403.6 Depreciation Expense—Distribution Plant
- 403.7 Depreciation Expense—General Plant
- 404 Amortization of Limited-Term Electric Plant
- 405 Amortization of Other Electric Plant
- 406 Amortization of Electric Plant Acquisition Adjustments
- 407 Amortization of Property Losses, Unrecovered Plant and Regulatory Study Costs
- 407.3 Regulatory Debits
- 407.4 Regulatory Credits
- 408 Taxes Other than Income Taxes

- 412 Revenues from Electric Plant Leased to Others
- 413 Expenses of Electric Plant Leased to Others
- 414 Other Utility Operating Income

UTILITY OPERATING INCOME

400 Operating Revenues

There shall be shown under this caption the total amount included in the electric operating revenue accounts provided herein.

401 Operation Expense

There shall be shown under this caption the total amount included in the electric operation expense accounts provided herein. (See note to § 1767.17 (c).)

402 Maintenance Expense

There shall be shown under this caption the total amount included in the electric maintenance expense accounts provided herein.

403 Depreciation Expense

A. This account shall include the amount of depreciation expense for all classes of depreciable electric plant in service except such depreciation expense as is chargeable to clearing accounts or to Account 416, Costs and Expenses of Merchandising, Jobbing and Contract Work.

B. The utility shall keep such records of property and property retirements as will reflect the service life of property which has been retired and aid in estimating probable service life by mortality, turnover, or other appropriate methods; and also such records as will reflect the percentage of salvage and costs of removal for property

7 CFR Ch. XVII (1–1–97 Edition)

retired from each account, or subdivision thereof, for depreciable electric plant.

NOTE A: Depreciation expense applicable to property included in Account 104, Electric Plant Leased to Others, shall be charged to Account 413, Expenses of Electric Plant Leased to Others.

NOTE B: Depreciation expenses applicable to transportation equipment, shop equipment, tools, work equipment, power operated equipment, and other general equipment may be charged to clearing accounts as necessary in order to obtain a proper distribution of expenses between construction and operation.

NOTE C: Depreciation expense applicable to transportation equipment used for transportation of fuel from the point of acquisition to the unloading point shall be charged to Account 151, Fuel Stock.

C. Account 403 shall be subaccounted as follows:

- 403.1 Depreciation Expense—Steam Production Plant
- 403.2 Depreciation Expense—Nuclear Production Plant
- 403.3 Depreciation Expense—Hydraulic Production Plant
- 403.4 Depreciation Expense—Other Production Plant
- 403.5 Depreciation Expense—Transmission Plant
- 403.6 Depreciation Expense—Distribution Plant
- 403.7 Depreciation Expense—General Plant

404 Amortization of Limited-Term Electric Plant

This account shall include amortization charges applicable to amounts included in the electric plant accounts for limited-term franchises, licenses, patent rights, limited-term interests in land, and expenditures on leased property where the service life of the improvements is terminable by action of the lease. The charges to this account shall be such as to distribute the book cost of each investment as evenly as may be over the period of its benefit to the utility. (See Account 111, Accumulated Provision for Amortization of Electric Utility Plant.)

405 Amortization of Other Electric Plant

A. When authorized by RUS, this account shall include charges for amortization of intangible or other electric

Rural Utilities Service, USDA

§ 1767.21

utility plant which does not have a definite or terminable life and which is not subject to charges for depreciation expense.

B. This account shall be supported in such detail as to show the amortization applicable to each investment being amortized, together with the book cost of the investment and the period over which it is being written off.

406 Amortization of Electric Plant Acquisition Adjustments

This account shall be debited or credited, as appropriate, with amounts includible in operating expenses, pursuant to approval or order of RUS, for the purpose of providing for the extinguishment of the amount in Account 114, Electric Plant Acquisition Adjustments.

407 Amortization of Property Losses, Unrecovered Plant and Recovery Study Costs

This account shall be charged with amounts credited to Account 182.1, Extraordinary Property Losses, when RUS has authorized the amount in the latter account to be amortized by charges to electric operations.

407.3 Regulatory Debits

This account shall be debited, when appropriate, with the amounts credited to Account 254, Other Regulatory Liabilities, to record regulatory liabilities imposed on the utility by the ratemaking actions of regulatory agencies. This account shall also be debited, when appropriate, with the amounts credited to Account 182.3, Other Regulatory Assets, concurrent with the recovery of such amounts in rates.

407.4 Regulatory Credits

This account shall be credited, when appropriate, with the amounts debited to Account 182.3, Other Regulatory Assets, to establish regulatory assets. This account shall also be credited, when appropriate, with the amounts debited to Account 254, Other Regulatory Liabilities, concurrent with the return of such amounts to customers through rates.

408 Taxes Other Than Income Taxes

A. This account shall include the amounts of ad valorem, gross revenue, or gross receipts taxes, state unemployment insurance, franchise taxes, Federal excise taxes, social security taxes, and all other taxes assessed by Federal, state, county, municipal, or other local governmental authorities, except income taxes.

B. These accounts shall be charged in each accounting period with the amounts of taxes which are applicable thereto, with concurrent credits to Account 236, Taxes Accrued, or Account 165, Prepayments, as appropriate. When it is not possible to determine the exact amounts of taxes, the amounts shall be estimated and adjustments made in current accruals as the actual tax levies become known.

C. The charges to these accounts shall be made or supported so as to show the amount of each tax and the basis upon which each charge is made. In the case of a utility rendering more than one utility service, taxes of the kind includible in these accounts shall be assigned directly to the utility department the operation of which gave rise to the tax, in so far as practicable. Where the tax is not attributable to a specific utility department, it shall be distributed among the utility departments or nonutility operations on an equitable basis after appropriate study to determine such basis.

NOTE A: Special assessments for street and similar improvements shall be included in the appropriate utility plant or nonutility property account.

NOTE B: Taxes specifically applicable to construction shall be included in the cost of construction.

NOTE C: Gasoline and other sales taxes shall be charged as far as practicable to the same account as the materials on which the tax is levied.

NOTE D: Social security and other forms of payroll taxes shall be distributed to utility departments and to nonutility functions on a basis related to payroll. Amounts applicable to construction shall be charged to the appropriate plant account.

NOTE E: Interest on tax refunds or deficiencies shall not be included in these accounts but in Account 419, Interest and Dividend Income, or Account 431, Other Interest Expense, as appropriate.

§ 1767.21

D. Account 408 shall be subaccounted as follows:

- 408.1 Taxes—Property
- 408.2 Taxes—U.S. Social Security—Unemployment
- 408.3 Taxes—U.S. Social Security—F.I.C.A.
- 408.4 Taxes—State Social Security—Unemployment
- 408.5 Taxes—State Sales—Consumers
- 408.6 Taxes—Gross Revenue or Gross Receipts Tax
- 408.7 Taxes—Other

409 [Reserved]

SPECIAL INSTRUCTIONS

Accounts 409.1, 409.2, and 409.3

A. These accounts shall include the amount of local, state, and Federal income taxes on income properly accruable during the period covered by the income statement to meet the actual liability for such taxes. Concurrent credits for the tax accruals shall be made to Account 236, Taxes Accrued, and as the exact amounts of taxes become known, the current tax accruals shall be adjusted by charges or credits to these accounts.

B. The accruals for income taxes shall be apportioned among utility departments and to Other Income and Deductions so that, as nearly as practicable, each tax shall be included in the expenses of the utility department or Other Income and Deductions, the income from which gave rise to the tax. The tax effects relating to interest charges shall be allocated between utility and nonutility operations. The basis for this allocation shall be the ratio of net investment in utility plant to net investment in nonutility plant.

NOTE A: Taxes assumed by the utility on interest shall be charged to Account 431, Other Interest Expense.

NOTE B: Interest on tax refunds or deficiencies shall not be included in these accounts but in Account 419, Interest and Dividend Income, or Account 431, Other Interest Expense, as appropriate.

409.1 Income Taxes, Utility Operating Income

This account shall include the amount of those local, state, and Federal income taxes which relate to utility operating income. This account shall be maintained so as to allow

7 CFR Ch. XVII (1–1–97 Edition)

ready identification of tax effects (both positive and negative) relating to Utility Operating Income (by department), Utility Plant Leased to Others, and Other Utility Operating Income.

409.2 Income Taxes, Other Income and Deductions

This account shall include the amount of those local, state, and Federal income taxes (both positive and negative), which relate to Other Income and Deductions.

409.3 Income Taxes, Extraordinary Items

This account shall include the amount of those local, state, and Federal income taxes (both positive and negative), which relate to Extraordinary Items.

410 [Reserved]

SPECIAL INSTRUCTIONS

Accounts 410.1, 410.2, 411.1, and 411.2

A. Accounts 410.1 and 410.2 shall be debited, and Accumulated Deferred Income Taxes, shall be credited, with amounts equal to any current deferrals of taxes on income or any allocations of deferred taxes originating in prior periods, as provided by the texts of Accounts 190, 281, 282, and 283. There shall not be netted against entries required to be made to these accounts any credit amounts appropriately includible in Account 411.1 or Account 411.2.

B. Accounts 411.1 or 411.2 shall be credited, and Accumulated Deferred Income Taxes, shall be debited, with amounts equal to any allocations of deferred taxes originating in prior periods or any current deferrals of taxes on income, as provided by the texts of Accounts 190, 281, 282, and 283. There shall not be netted against entries required to be made to these accounts any debit amounts appropriately includible in Account 410.1 or Account 410.2.

410.1 Provision for Deferred Income Taxes, Utility Operating Income

This account shall include the amounts of those deferrals of taxes and

Rural Utilities Service, USDA

§ 1767.21

allocations of deferred taxes which relate to Utility Operating Income (by department).

410.2 Provision for Deferred Income Taxes, Other Income and Deductions

This account shall include the amounts of those deferrals of taxes and allocations of deferred taxes which relate to Other Income and Deductions.

411 [Reserved]

411.1 Provision for Deferred Income Taxes—Credit, Utility Operating Income

This account shall include the amounts of those allocations of deferred taxes and deferrals of taxes, credit, which relate to Utility Operating Income (by department).

411.2 Provision for Deferred Income Taxes—Credit, Other Income and Deductions

This account shall include the amounts of those allocations of deferred taxes and deferrals of taxes, credit, which relate to Other Income and Deductions.

411.3 [Reserved]

SPECIAL INSTRUCTIONS

Accounts 411.4 and 411.5

A. Account 411.4 shall be debited with the amounts of investment tax credits related to electric utility property that are credited to Account 255, Accumulated Deferred Investment Tax Credits, by companies which do not apply the entire amount of the benefits of the investment credit as a reduction of the overall income tax expense in the year in which such credit is realized. (See Account 255).

B. Account 411.4 shall be credited with the amounts debited to Account 255 for proportionate amounts of tax credit deferrals allocated over the average useful life of electric utility property to which the tax credits relate or such lesser period of time as may be adopted and consistently followed by the company.

C. Account 411.5 shall be debited and credited as directed in paragraphs A

and B, for investment tax credits related to nonutility property.

411.4 Investment Tax Credit Adjustments, Utility Operations

This account shall include the amount of those investment tax credit adjustments related to property used in Utility Operations (by department).

411.5 Investment Tax Credit Adjustments, Nonutility Operations

This account shall include the amount of those investment tax credit adjustments related to property used in Nonutility Operations.

411.6 Gains from Disposition of Utility Plant

This account shall include, as approved by RUS, amounts relating to gains from the disposition of future use utility plant including amounts which were previously recorded in and transferred from Account 105, Electric Plant Held for Future Use, under the provisions of Paragraphs B, C, and D thereof. Income taxes relating to gains recorded in this account shall be recorded in Account 409.1, Income Taxes, Utility Operating Income.

411.7 Losses from Disposition of Utility Plant

This account shall include, as approved by RUS, amounts relating to losses from the disposition of future use utility plant including amounts which were previously recorded in and transferred from Account 105, Electric Plant Held for Future Use, under the provisions of Paragraphs B, C, and D thereof. Income taxes relating to losses recorded in this account shall be recorded in Account 409.1, Income Taxes, Utility Operating Income.

411.8 Gains from Disposition of Allowances

This account shall be credited with the gain on the sale, exchange, or other disposition of allowances in accordance with § 1767.15 (u)(8). Income taxes relating to gains recorded in this account shall be recorded in Account 409.1, Income Taxes, Utility Operating Income.

§ 1767.22

411.9 Losses from Disposition of Allowances

This account shall be debited with the loss on the sale, exchange, or other disposition of allowances in accordance with § 1767.15 (u)(8). Income taxes relating to losses recorded in this account shall be recorded in Account 409.1, Income Taxes, Utility Operating Income.

412 Revenues from Electric Plant Leased to Others

This account shall include revenues from electric property constituting a distinct operating unit or system leased by the utility to others, and which property is properly includible in Account 104, Electric Plant Leased to Others.

NOTE: Related taxes shall be recorded in Account 408, Taxes Other Than Income Taxes, or Account 409.1, Income Taxes, Utility Operating Income, as appropriate.

413 Expenses of Electric Plant Leased to Others

A. This account shall include expenses from electric property constituting a distinct operating unit or system leased by the utility to others, and which property is properly includible in Account 104, Electric Plant Leased to Others.

B. The detail of expenses shall be kept or supported so as to show separately the following:

1. Operation.
2. Maintenance.
3. Depreciation.
4. Amortization.

NOTE: Related taxes shall be recorded in Account 408, Taxes Other Than Income Taxes, or Account 409.1, Income Taxes, Utility Operating Income, as appropriate.

414 Other Utility Operating Income

A. This account shall include the revenues received and expenses incurred in connection with the operations of utility plant, the book cost of which is included in Account 118, Other Utility Plant.

B. The expenses shall include every element of cost incurred in such operations, including depreciation, rents, and insurance.

NOTE: Related taxes shall be recorded in Account 408, Taxes Other Than Income

7 CFR Ch. XVII (1–1–97 Edition)

Taxes, or Account 409.1, Income Taxes, Utility Operating Income, as appropriate.

§ 1767.22 Other income and deductions.

The other income and deductions accounts identified in this section shall be used by all RUS borrowers.

OTHER INCOME AND DEDUCTIONS

- 415 Revenues from Merchandising, Jobbing, and Contract Work
- 416 Costs and Expenses of Merchandising, Jobbing, and Contract Work
- 417 Revenues from Nonutility Operations
- 417.1 Expenses of Nonutility Operations
- 418 Nonoperating Rental Income
- 418.1 Equity in Earnings of Subsidiary Companies
- 419 Interest and Dividend Income
- 419.1 Allowance for Funds Used During Construction
- 420 Investment Tax Credits
- 421 Miscellaneous Nonoperating Income
- 421.1 Gain on Disposition of Property
- 421.2 Loss on Disposition of Property
- 422 Nonoperating Taxes
- 423 Generation and Transmission Cooperative Capital Credits
- 424 Other Capital Credits and Patronage Capital Allocations
- 425 Miscellaneous Amortization
- 426 [Reserved]
- 426.1 Donations
- 426.2 Life Insurance
- 426.3 Penalties
- 426.4 Expenditures for Certain Civic, Political, and Related Activities
- 426.5 Other Deductions

OTHER INCOME AND DEDUCTIONS

415 Revenues from Merchandising, Jobbing and Contract Work

A. This account shall include all revenues derived from the sale of merchandise and jobbing or contract work, including any profit or commission accruing to the utility on jobbing work performed by it as agent under contracts whereby it does jobbing work for another for a stipulated profit or commission. Interest related income from installment sales shall be recorded in Account 419, Interest and Dividend Income.

B. Records in support of this account shall be so kept as to permit ready summarization of revenues by such major items as are feasible.

NOTE: The classification of revenues of merchandising, jobbing, and contract work as nonoperating, and thus included in this

Rural Utilities Service, USDA

§ 1767.22

account, is for accounting purposes. It does not preclude consideration of justification to the contrary for ratemaking or other purposes.

Items

1. Revenues from sale of merchandise and from jobbing and contract work.
2. Discounts and allowances made in settlement of bills for merchandise and jobbing work.

416 Costs and Expenses of Merchandising, Jobbing and Contract Work

- A. This account shall include all expenses derived from the sale of merchandise and jobbing or contract work.
- B. Records in support of this account shall be so kept as to permit ready summarization of costs and expenses by such major items as are feasible.

NOTE: The classification of costs and expenses of merchandising, jobbing, and contract work as nonoperating, and thus included in this account, is for accounting purposes. It does not preclude consideration of justification to the contrary for ratemaking or other purposes.

Items

Labor:

1. Canvassing and demonstrating appliances in homes and other places for the purpose of selling appliances.
2. Demonstrating and selling activities in sales rooms.
3. Installing appliances on customer premises where such work is done only for purchasers of appliances from the utility.
4. Installing wire, piping, or other property work, on a jobbing or contract basis.
5. Preparing advertising materials for appliance sales purposes.
6. Receiving and handling customer orders for merchandise or for jobbing services.
7. Cleaning and tidying sales rooms.
8. Maintaining display counters and other equipment used in merchandising.
9. Arranging merchandise in sales rooms and decorating display windows.
10. Reconditioning repossessed appliances.
11. Bookkeeping and other clerical work in connection with merchandise and jobbing activities.

12. Supervising merchandise and jobbing operations.

13. Advertising in newspapers, periodicals, radio, and television.

14. Cost of merchandise sold and of materials used in jobbing work.

15. Stores expenses on merchandise and jobbing stocks.

16. Fees and expenses of advertising and commercial artists' agencies.

17. Printing booklets, dodgers, and other advertising data.

18. Premiums given as inducement to buy appliances.

19. Light, heat, and power.

20. Depreciation on equipment used primarily for merchandise and jobbing operations.

21. Rent of sales rooms or of equipment.

22. Transportation expense in delivery and pick-up of appliances by utility's facilities or by others.

23. Stationery and office supplies and expenses.

24. Losses from uncollectible merchandise and jobbing accounts.

417 Revenues from Nonutility Operations

This account shall include revenues applicable to operations which are non-utility in character but nevertheless constitute a distinct operating activity of the enterprise as a whole, such as the operation of an ice department where applicable statutes do not define such operation as a utility, or the operation of a servicing organization for furnishing supervision, management, engineering, and similar services to others.

NOTE: Related taxes shall be recorded in Account 408, Taxes Other Than Income Taxes, or Account 409.2, Income Taxes, Other Income and Deductions, as appropriate.

417.1 Expenses of Nonutility Operations

- A. This account shall include expenses applicable to operations which are nonutility in character but nevertheless constitute a distinct operating activity of the enterprise as a whole, such as the operation of an ice department where applicable statutes do not define such operation as a utility, or

§ 1767.22

the operation of a servicing organization for furnishing supervision, management, engineering, and similar services to others.

B. The expenses shall include all elements of costs incurred in such operations, and the accounts shall be maintained so as to permit ready summarization as follows:

1. Operation.
2. Maintenance.
3. Rents.
4. Depreciation.
5. Amortization.

NOTE: Related taxes shall be recorded in Account 408, Taxes Other Than Income Taxes, or Account 409.2, Income Taxes, Other Income and Deductions, as appropriate.

418 Nonoperating Rental Income

A. This account shall include all rent revenues and related expenses of land, buildings, or other property included in Account 121, Nonutility Property, which is not used in operations covered by Account 417 or Account 417.1.

B. The expenses shall include all elements of costs incurred in the ownership and rental of property and the accounts shall be maintained so as to permit ready summarization as follows:

1. Operation.
2. Maintenance.
3. Rents.
4. Depreciation.
5. Amortization.

NOTE: Related taxes shall be recorded in Account 408, Taxes Other Than Income Taxes, or Account 409.2, Income Taxes, Other Income and Deductions, as appropriate.

418.1 Equity in Earnings of Subsidiary Companies

This account shall include the utility's equity in the earnings or losses of subsidiary companies for the year.

419 Interest and Dividend Income

A. This account shall include interest revenues on securities, loans, notes, advances, special deposits, tax refunds, and all other interest-bearing assets, and dividends on stocks of other companies, whether the securities on which the interest and dividends are received are carried as investments or included

7 CFR Ch. XVII (1-1-97 Edition)

in sinking or other special fund accounts.

NOTE A: Related taxes shall be recorded in Account 408, Taxes Other Than Income Taxes, or Account 409.2, Income Taxes, Other Income and Deductions, as appropriate.

NOTE B: Interest accrued, the payment of which is not reasonably assured, dividends receivable which have not been declared or guaranteed, and interest or dividends upon reacquired securities issued or assumed by the utility shall not be credited to this account.

419.1 Allowance for Funds Used During Construction

This account shall include concurrent credits for allowance for funds other than borrowed funds used for construction purposes during the period of construction, based upon a reasonable rate. (See § 1767.16 (c)(17).)

420 Investment Tax Credits

This account shall be credited as follows with investment tax credit amounts not passed on to customers:

1. By amounts equal to debits to Account 411.4, Investment Tax Credit Adjustments, Utility Operations, and Account 411.5, Investment Tax Credit Adjustments, Nonutility Operations, for investment tax credits used in calculating income taxes for the year when the company's accounting provides for non-deferral of all or a portion of such credits.

2. By amounts equal to debits to Account 255, Accumulated Deferred Investment Tax Credits, for proportionate amounts of tax credit deferrals allocated over the average useful life of the property to which the tax credits relate, or such lesser period of time as may be adopted and consistently used by the company.

421 Miscellaneous Nonoperating Income

This account shall include all revenue and expense items, except taxes properly includible in the income account, not provided for elsewhere. Related taxes shall be recorded in Account 408, Taxes Other Than Income Taxes, or Account 409.2, Income Taxes, Other Income and Deductions, as appropriate.

Rural Utilities Service, USDA

§ 1767.22

Items

1. Profit on sale of timber. (See § 1767.16 (g)(3).)

2. Profits from operations of others realized by the utility under contracts.

3. Gains on disposition of investments. Also, gains on reacquisition and resale or retirement of the utility's debt securities when the gain is not amortized or used by a jurisdictional regulatory agency to reduce embedded debt cost in establishing rates. (See § 1767.15 (q).)

421.1 Gain on Disposition of Property

This account shall be credited with the gain on the sale, conveyance, exchange, or transfer of utility or other property to another. Amounts relating to gains on land and land rights held for future use recorded in Account 105, Electric Plant Held for Future Use, will be accounted for as prescribed in Paragraphs B, C, and D thereof. (See § 1767.16 (e)(6), (g)(5), and (j)(5).) Income taxes on gains recorded in this account shall be recorded in Account 409.2, Income Taxes, Other Income and Deductions.

421.2 Loss on Disposition of Property

This account shall be charged with the loss on the sale, conveyance, exchange, or transfer of utility or other property to another. Amounts relating to losses on land and land rights held for future use recorded in Account 105, Electric Plant Held for Future Use, will be accounted for as prescribed in Paragraphs B, C, and D thereof. (See § 1767.16 (e)(6), (g)(5), and (j)(5).) The reduction in income taxes relating to losses recorded in this account shall be recorded in Account 409.2, Income Taxes, Other Income and Deductions.

422 Nonoperating Taxes

This account shall be charged with taxes relating to nonoperating income.

423 Generation and Transmission Cooperative Capital Credits

This account shall be credited with the annual capital furnished the power supply cooperative through payment of power bills. The amount of capital furnished the power supply cooperative

should be recorded in the applicable year even though, in most cases, the power supplier's notice of the allocation will not have been received until after the close of the year to which it relates.

424 Other Capital Credits and Patronage Capital Allocations

This account shall be credited with the capital furnished in connection with patronage of cooperative or mutual-type service organization such as CFC and other financing cooperatives, and insurance, oil product, telephone, and data processing cooperatives. This account should be credited in the year in which the notice of the capital credit or patronage capital allocation is received.

425 Miscellaneous Amortization

This account shall include amortization charges not includible in other accounts which are properly deductible in determining the income of the utility before interest charges. Charges includible herein, if significant in amount, must be in accordance with an orderly and systematic amortization program.

Items

1. Amortization of utility plant acquisition adjustments, or of intangibles included in utility plant in service when not authorized to be included in utility operating expenses by RUS.

2. Other miscellaneous amortization charges allowed to be included in this account by RUS.

426 [Reserved]

SPECIAL INSTRUCTIONS

Accounts 426.1, 426.2, 426.3, 426.4, and 426.5

These accounts shall include miscellaneous expense items which are nonoperating in nature but which are properly deductible before determining total income before interest charges.

NOTE: The classification of expenses as nonoperating and their inclusion in these accounts is for accounting purposes. It does not preclude RUS consideration of proof to the contrary for ratemaking or other purposes.

§ 1767.23

426.1 Donations

This account shall include all payments or donations for charitable, social, or community welfare purposes.

426.2 Life Insurance

This account shall include all payments for life insurance of officers and employees where the company is the beneficiary (net premiums less the increase in the cash surrender value of policies.)

426.3 Penalties

This account shall include payments by the company for penalties or fines for violation of any regulatory statutes by the company or its officials.

426.4 Expenditures for Certain Civic, Political, and Related Activities

This account shall include expenditures for the purpose of influencing public opinion with respect to the election or appointment of public officials, referenda, legislation, or ordinances (either with respect to the possible adoption of new referenda, legislation or ordinances or repeal or modification of existing referenda, legislation or ordinances) or approval, modification, or revocation of franchises; or for the purpose of influencing the decisions of public officials, but shall not include such expenditures which are directly related to appearances before regulatory or other governmental bodies in connection with the reporting utility's existing or proposed operations.

426.5 Other Deductions

This account shall include other miscellaneous expenses which are non-operating in nature, but which are properly deductible before determining total income before interest charges.

Items

1. Loss relating to investments in securities written-off or written-down.
2. Loss on sale of investments.
3. Loss on reacquisition, resale, or retirement of the utility's debt securities, when the loss is not amortized and used by a jurisdictional regulatory agency to increase embedded debt cost in establishing rates. (See § 1767.15 (q).)

7 CFR Ch. XVII (1-1-97 Edition)

4. Preliminary survey and investigation expenses related to abandoned projects, when not written-off to the appropriate operating expense account.

5. Costs of preliminary abandonment costs recorded in Account 182.1, Extraordinary Property Losses, and Account 182.2, Unrecovered Plant and Regulatory Study Costs, not allowed to be amortized to Account 407, Amortization of Property Losses, Unrecovered Plant and Regulatory Study Costs.

§ 1767.23 Interest charges.

The interest charges accounts identified in this section shall be used by all RUS borrowers.

INTEREST CHARGES

- 427 Interest on Long-Term Debt
- 427.3 Interest Charged to Construction—Credit
- 428 Amortization of Debt Discount and Expense
- 428.1 Amortization of Loss on Reacquired Debt
- 429 Amortization of Premium on Debt—Credit
- 429.1 Amortization of Gain on Reacquired Debt—Credit
- 430 Interest on Debt to Associated Companies
- 431 Other Interest Expense
- 432 Allowance for Borrowed Funds Used During Construction—Credit

INTEREST CHARGES

427 Interest on Long-Term Debt

A. This account shall include the amount of interest on outstanding long-term debt issued or assumed by the utility, the liability for which included in Account 221, Bonds, or Account 224, Other Long-Term Debt.

B. This account shall be so kept or supported as to show the interest accruals on each class and series of long-term debt.

NOTE: This account shall not include interest on nominally issued or nominally outstanding long-term debt, including securities assumed.

427.3 Interest Charged to Construction—Credit

This account shall include concurrent credits for interest charged to construction based upon the net cost

Rural Utilities Service, USDA

§ 1767.24

for the period of construction of borrowed funds used for construction purposes.

428 Amortization of Debt Discount and Expense

A. This account shall include the amortization of unamortized debt discount and expense on outstanding long-term debt. Amounts charged to this account shall be credited concurrently to Account 181, Unamortized Debt Expense, and Account 226, Unamortized Discount on Long-Term Debt—Debit.

B. This account shall be so kept or supported as to show the debt discount and expense on each class and series of long-term debt.

428.1 Amortization of Loss on Reacquired Debt

A. This account shall include the amortization of the losses on reacquisition of debt. Amounts charged to this account shall be credited concurrently to Account 189, Unamortized Loss on Reacquired Debt.

B. This account shall be maintained so as to allow ready identification of the loss amortized applicable to each class and series of long-term debt reacquired. (See § 1767.15 (q).)

429 Amortization of Premium on Debt—Credit

A. This account shall include the amortization of unamortized net premium on outstanding long-term debt. Amounts credited to this account shall be charged concurrently to Account 225, Unamortized Premium on Long-Term Debt.

B. This account shall be so kept or supported as to show the premium on each class and series of long-term debt.

429.1 Amortization of Gain on Reacquired Debt—Credit

A. This account shall include the amortization of the gains realized from reacquisition of debt. Amounts credited to this account shall be charged concurrently to Account 257, Unamortized Gain on Reacquired Debt.

B. This account shall be maintained so as to allow ready identification of the amortized gains applicable to each

class and series of long-term debt reacquired. (See § 1767.15 (q).)

430 Interest on Debt to Associated Companies

A. This account shall include the interest accrued on amounts included in Account 223, Advances from Associated Companies, and on all other obligations to associated companies.

B. The records supporting the entries to this account shall be so kept as to show to whom the interest is to be paid, the period covered by the accrual, the rate of interest, and the principal amount of the advances or other obligations on which the interest is accrued.

431 Other Interest Expense

This account shall include all interest charges not provided for elsewhere.

Items

1. Interest on notes payable on demand or maturing one year or less from date and on open accounts, except notes and accounts with associated companies.

2. Interest on customers' deposits.

3. Interest on claims and judgments, tax assessments, and assessments for public improvements past due.

4. Income and other taxes levied upon bondholders of the utility and assumed by it.

432 Allowance for Borrowed Funds Used During Construction—Credit

This account shall include concurrent credits for allowance for borrowed funds used during construction, not to exceed amounts computed in accordance with the formula prescribed in § 1767.16 (c)(17).

§ 1767.24 Extraordinary items.

The extraordinary items accounts identified in this section shall be used by all RUS borrowers.

EXTRAORDINARY ITEMS

434 Extraordinary Income

435 Extraordinary Deductions

435.1 Cumulative Effect on Prior Years of a Change in Accounting Principle

§ 1767.25

EXTRAORDINARY ITEMS

434 Extraordinary Income

This account shall be credited with nontypical, noncustomary, infrequently recurring gains which would significantly distort the current year's income computed before extraordinary items, if reported other than as extraordinary items. Income tax relating to the amounts recorded in this account shall be recorded in Account 409.3, Income Taxes, Extraordinary Items. (See § 1767.15 (g).)

435 Extraordinary Deductions

This account shall be debited with nontypical, noncustomary, infrequently recurring losses which would significantly distort the current year's income computed before extraordinary items, if reported other than as extraordinary items. Income tax relating to the amounts recorded in this account shall be recorded in Account 409.3, Income Taxes, Extraordinary Items. (See § 1767.15 (f).)

435.1 Cumulative Effect on Prior Years of a Change in Accounting Principle

This account shall include the cumulative effect on margins of prior periods as a result of a change in accounting principle from one that is no longer generally accepted to one that is generally accepted.

§ 1767.25 Retained earnings.

The retained earnings accounts identified in this section shall be used by all RUS borrowers.

§ 1767.26 Operating revenue.

The operating revenue accounts identified in this section shall be used by all RUS borrowers.

OPERATING REVENUE

Sales of Electricity

440 Residential Sales
440.1 Residential Sales—Excluding Seasonal
440.2 Residential Sales—Seasonal
441 Irrigation Sales
442 Commercial and Industrial Sales
442.1 Commercial and Industrial Sales—1000 kVA or Less
442.2 Commercial and Industrial Sales—Over 1000 kVA
444 Public Street and Highway Lighting
445 Other Sales to Public Authorities
446 Sales to Railroads and Railways
447 Sales for Resale
447.1 Sales for Resale—RUS Borrowers
447.2 Sales for Resale—Other
448 Interdepartmental Sales
449.1 Provision for Rate Refunds

Other Operating Revenues

450 Forfeited Discounts
451 Miscellaneous Service Revenues
453 Sales of Water and Water Power
454 Rent from Electric Property
455 Interdepartmental Rents
456 Other Electric Revenues

OPERATING REVENUE

Sales of Electricity

440 Residential Sales

A. This account shall include the net billing for electricity supplied for residential or domestic purposes.

NOTE: When electricity supplied through a single meter is used for both residential and commercial purposes, the total revenue shall be included in this account, or Account 442, Commercial and Industrial Sales, according to the rate schedule that is applied. If the same rate schedules apply to residential and commercial and industrial service, classification shall be made according to principal use.

Rural Utilities Service, USDA

§ 1767.26

B. Account 440 shall be subaccounted as follows:

- 440.1 Residential Sales—Excluding Seasonal
- 440.2 Residential Sales—Seasonal

440.1 Residential Sales—Excluding Seasonal

A. This account shall include the net billing for electricity supplied for residential and domestic purposes.

B. This account shall also include net billings for single phase service to schools, churches, lodges, and other public buildings.

C. Records shall be maintained so that the quantity of electricity sold and the revenue received under each rate schedule shall be readily available.

NOTE: Net billings for multiphase service to schools, churches, lodges, and other public buildings shall be included in the appropriate subaccount of Account 442, Commercial and Industrial Sales.

440.2 Residential Sales—Seasonal

This account shall include the net billings for electricity supplied for residential and domestic purposes to seasonal consumers.

441 Irrigation Sales

This account shall include the net billings for electricity supplied for irrigation pumping. It need not be used unless such service is provided under a special irrigation rate.

442 Commercial and Industrial Sales

A. This account shall include the net billing for electricity supplied to customers for commercial and industrial purposes.

NOTE A: If the utility classifies large commercial and industrial customers and related revenues on a lesser basis than 1000 kilowatts of demand, or segregates industrial customers and related revenues according to a recognized definition of an industrial customer, such classifications are acceptable in lieu of those otherwise required by the text of this account on the basis of 1000 kilowatts of demand.

NOTE B: When electricity supplied through a single meter is used for both commercial and residential purposes, the total revenue shall be included in this account, or Account 440, Residential Sales, according to the rate schedule that is applied. If the same rate

schedules apply to residential and commercial and industrial service, classification shall be made according to principal use.

B. Account 442 shall be subaccounted as follows:

442.1 Commercial and Industrial Sales—1000 kVA or Less

442.2 Commercial and Industrial Sales—Over 1000 kVA

442.1 Commercial and Industrial Sales—1000 kVA or Less

A. This account shall include the net billing for electricity supplied to consumers for commercial and industrial purposes requiring transformer capacity of 1000 kVA or less.

B. Records shall be maintained so that the quantity of electricity sold and the revenue received under each rate schedule shall be readily available.

NOTE: When electricity supplied through a single meter is used for both commercial and residential purposes, the total revenue shall be included in this account or in Account 440, Residential Sales, based upon primary use.

442.2 Commercial and Industrial Sales—Over 1000 kVA

A. This account shall include the net billing for electricity supplied to consumers for commercial and industrial purposes requiring transformer capacity in excess of 1000 kVA.

B. Records shall be maintained so that the quantity of electricity sold and the revenue received under each rate schedule shall be readily available.

444 Public Street and Highway Lighting

A. This account shall include the net billing for electricity supplied and services rendered for the purposes of lighting streets, highways, parks, and other public places or for traffic or signal system service, for municipalities or other divisions or agencies of state or Federal Governments.

B. Records shall be maintained so that the quantity of electricity sold and the revenue received from each customer shall be readily available. In addition, the records shall be maintained so as to show the revenues from

§ 1767.26

(1) contracts which include both electricity and services, and (2) contracts which include sales of electricity only.

445 Other Sales to Public Authorities

A. This account shall include the net billing for electricity supplied to municipalities or divisions or agencies of Federal or state governments, under special contracts or agreements or service classifications applicable only to public authorities, except such revenues as are includible in Account 444 and Account 447.

B. Records shall be maintained so as to show the quantity of electricity sold and the revenues received from each customer.

446 Sales to Railroads and Railways

A. This account shall include the net billing for electricity supplied to railroads and interurban and street railways, for general railroad use, including the propulsion of cars or locomotives, where such electricity is supplied under separate and distinct rate schedules.

B. Records shall be maintained so that the quantity of electricity sold and the revenue received from each customer shall be readily available.

NOTE: Revenues from incidental use of electricity furnished under a contract for propulsion of cars or locomotives shall be included herein.

447 Sales for Resale

A. This account shall include the net billing for electricity supplied to other electric utilities or to public authorities for resale purposes.

NOTE: Revenues from electricity supplied to other utilities for use by them and not for distribution, shall be included in Account 442, Commercial and Industrial Sales, unless supplied under the same contracts as and not readily separable from revenues includible in this account.

B. Account 447 shall be subaccounted as follows:

447.1 Sales for Resale—RUS Borrowers

447.2 Sales for Resale—Other

447.1 Sales for Resale—RUS Borrowers

A. This account shall include the net billing for electricity supplied to RUS borrowers for resale.

7 CFR Ch. XVII (1–1–97 Edition)

B. Records shall be maintained so as to show the quantity of electricity sold and the revenue received from each customer.

NOTE: Revenues from electricity supplied to other utilities for use by them and not for distribution, shall be included in Account 442, Commercial and Industrial Sales, unless supplied under the same contract as and not readily separable from revenues includible in this account.

447.2 Sales for Resale—Other

A. This account shall include the net billing for electricity supplied for resale to utilities not financed by RUS.

B. Records shall be maintained so as to show the quantity of electricity sold and the revenue received from each customer.

NOTE: Revenues from electricity supplied to other utilities for use by them and not for distribution, shall be included in Account 442, Commercial and Industrial Sales, unless supplied under the same contract as and not readily separable from revenues includible in this account.

448 Interdepartmental Sales

A. This account shall include amounts charged by the electric department at tariff or other specified rates for electricity supplied by it to other utility departments.

B. Records shall be maintained so that the quantity of electricity supplied each other department and the charges therefor shall be readily available.

449.1 Provision for Rate Refunds

A. This account shall be charged with provisions for the estimated pretax effects on net income of the portions of amounts being collected subject to refund which are estimated to be required to be refunded. Such provisions shall be credited to Account 229, Accumulated Provision for Rate Refunds.

B. This account shall also be charged with amounts refunded when such amounts had not been previously accrued.

C. Income tax effects relating to the amounts recorded in this account shall be recorded in Account 410.1, Provision for Deferred Income Taxes, Utility Operating Income, or Account 411.1, Provision for Deferred Income Taxes—

Rural Utilities Service, USDA

§ 1767.26

Credit, Utility Operating Income, as appropriate.

Other Operating Revenues

450 Forfeited Discounts

This account shall include the amount of discounts forfeited or additional charges imposed because of the failure of customers to pay their electric bills on or before a specified date.

451 Miscellaneous Service Revenues

This account shall include revenues for all miscellaneous services and charges billed to customers which are not specifically provided for in other accounts.

Items

1. Fees for changing, connecting, or disconnecting service.
2. Profit on maintenance of appliances, wiring, piping, or other installations on customers' premises.
3. Net credit or debit (cost less net salvage and less payment from customers) on closing of work orders for plant installed for temporary service of less than one year. (See Account 185, Temporary Facilities.)
4. Recovery of expenses in connection with current diversion cases (billing for the electricity consumed shall be included in the appropriate electric revenue account).

453 Sales of Water and Water Power

A. This account shall include revenues derived from the sale of water for irrigation, domestic, industrial, or other uses or for the development by others of water power or for headwater benefits; also, revenues derived from furnishing water power for mechanical purposes when the investment in the property used in supplying such water or water power is carried as electric plant in service.

B. The records for this account shall be kept in such manner as to permit an analysis of the rates charged and the purposes for which the water was used.

454 Rent from Electric Property

A. This account shall include rents received for the use by others of land,

buildings, and other property devoted to electric operations by the utility.

B. When property owned by the utility is operated jointly with others under a definite arrangement for apportioning the actual expenses among the parties to the arrangement, any amount received by the utility for interest or return or in reimbursement of taxes or depreciation on the property shall be credited to this account.

NOTE: Do not include in this account rents from property constituting an operating unit or system. (See Account 412, Revenues from Electric Plant Leased to Others.)

455 Interdepartmental Rents

This account shall include rents credited to the electric department on account of rental charges made against other departments (gas, water, etc.) of the utility. In the case of property operated under a definite arrangement to allocate the costs among the departments using the property, any reimbursement to the electric department for interest or return and depreciation and taxes shall be credited to this account.

456 Other Electric Revenues

This account shall include revenues derived from electric operations not includible in any of the foregoing accounts. It shall also include, in a separate subaccount, revenues received from operation of fish and wildlife and recreation facilities whether operated by the company or by contract concessionaires, such as revenues from leases or rentals of land for cottages, homes, or campsites.

Items

1. Commission on sale or distribution of electricity of others when sold under rates filed by such others.
2. Compensation for minor or incidental services provided for others such as customer billing, and engineering.
3. Profit or loss on the sale of material and supplies not ordinarily purchased for resale and not handled through merchandising and jobbing accounts.

§ 1767.27

4. Sale of steam, but not including sales made by a steamheating department or transfers of steam under joint facility operations.

5. Revenues from transmission of electricity of others over transmission facilities of the utility.

6. Include in a separate subaccount, revenues in payment for rights and/or benefits received from others which are realized through research, development, and demonstration ventures. In the event the amounts received are so large as to distort revenues for the year in which received (5 percent of net income before application of the benefit), the amounts shall be credited to Account 253, Other Deferred Credits, and amortized by credits to this account over a period not to exceed 5 years.

§ 1767.27 Operation and maintenance expense.

The operation and maintenance expense accounts identified in this section shall be used by all RUS borrowers.

OPERATION AND MAINTENANCE EXPENSE ACCOUNTS

POWER PRODUCTION EXPENSES

Steam Power Generation

(Operation)

500 Operation Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the operation of steam power generating stations. Direct supervision of specific activities, such as fuel handling, boiler-room operations, and generator op-

erations shall be charged to the appropriate account. (See § 1767.17 (a).)

501 Fuel

A. This account shall include the cost of fuel used in the production of steam for the generation of electricity, including expenses in unloading fuel from the shipping media and handling thereof up to the point where the fuel enters the first boiler plant bunker, hopper, bucket, tank, or holder of the boiler-house structure. Records shall be maintained to show the quantity, B.t.u. content and cost of each type of fuel used.

B. The cost of fuel shall be charged initially to Account 151, Fuel Stock, and cleared to this account on the basis of the fuel used. Fuel handling expenses may be charged to this account as incurred or charged initially to Account 152, Fuel Stock Expenses Undistributed. In the latter event, they shall be cleared to this account on the basis of the fuel used. Respective amounts of fuel stock and fuel stock expenses shall be readily available.

Items

Labor:

1. Supervising, purchasing, and handling of fuel.
2. All routine fuel analyses.
3. Unloading from shipping facility and placing in storage.
4. Moving of fuel in storage and transferring fuel from one station to another.
5. Handling from storage or shipping facility to first bunker, hopper, bucket, tank, or holder of boiler-house structure.
6. Operation of mechanical equipment, such as locomotives, trucks, cars, boats, barges, and cranes.

Materials and Expenses:

1. Operating, maintenance, and depreciation expenses and ad valorem taxes on utility-owned transportation equipment used to transport fuel from the point of acquisition to the unloading point.
2. Lease or rental costs of transportation equipment used to transport fuel from the point of acquisition to the unloading point.

§ 1767.27

3. Cost of fuel including freight, switching, demurrage, and other transportation charges.

4. Excise taxes, insurance, purchasing commissions, and similar items.

5. Stores expenses to extent applicable to fuel.

6. Transportation and other expenses in moving fuel in storage.

7. Tools, lubricants, and other supplies.

8. Operating supplies for mechanical equipment.

9. Residual disposal expenses less any proceeds from sale of residuals.

NOTE: Abnormal fuel handling expenses occasioned by emergency conditions shall be charged to expense as incurred.

502 Steam Expenses

This account shall include the cost of labor, materials used, and expenses incurred in production of steam for electric generation. This includes all expenses of handling and preparing fuel beginning at the point where the fuel enters the first boiler plant bunker, hopper, tank, or holder of the boiler-house structure.

Items

Labor:

1. Supervising steam production.
2. Operating fuel conveying, storage, weighing, and processing equipment within boiler plant.
3. Operating boiler and boiler auxiliary equipment.
4. Operating boiler feed water purification and treatment equipment.
5. Operating ash-collecting and disposal equipment located inside the plant.
6. Operating boiler plant electrical equipment.
7. Keeping boiler plant log and records and preparing reports on boiler plant operations.
8. Testing boiler water.
9. Testing, checking, and adjusting meters, gauges, and other instruments and equipment in boiler plant.
10. Cleaning boiler plant equipment when not incidental to maintenance work.
11. Repacking glands and replacing gauge glasses where the work involved is of a minor nature and is performed

7 CFR Ch. XVII (1-1-97 Edition)

by regular operating crews. Where the work is of a major character, such as that performed on high-pressure boilers, the item should be considered as maintenance.

Materials and Expenses:

1. Chemicals and boiler inspection fees.
2. Lubricants.
3. Boiler feed water purchased and pumping supplies.

503 Steam from Other Sources

This account shall include the cost of steam purchased or transferred from another department of the utility or from others under a joint facility operating arrangement for use in prime movers devoted to the production of electricity.

NOTE: The records shall be so kept as to show separately for each company from which steam is purchased, the point of delivery, the quantity, the price, and the total charge. When steam is transferred from another department or from others under a joint operating arrangement, the utility shall be prepared to show full details of the cost of producing such steam, the basis of the charge to electric generation, and the extent and manner of use by each department or party involved.

504 Steam Transferred—Credit

A. This account shall include credits for expenses of producing steam which are charged to others or to other utility departments under a joint operating arrangement. Include also credits for steam expenses chargeable to other electric accounts outside of the steam generation group. Full details of the basis of determination of the cost of steam transferred shall be maintained.

B. If the charges to others or to other departments of the utility include an amount for depreciation, taxes, and return on the joint steam facilities, such portion of the charge shall be credited, in the case of others, to Account 454, Rent from Electric Property, and in the case of other departments of the utility, to Account 455, Interdepartmental Rents.

505 Electric Expenses

This account shall include the cost of labor and materials used, and expenses incurred in operating prime movers,

Rural Utilities Service, USDA

§ 1767.27

generators, and their auxiliary apparatus, switch gear, and other electric equipment to the points where electricity leaves for conversion for transmission or distribution.

Items

Labor:

1. Supervising electric production.
2. Operating turbines, engines, generators, and exciters.
3. Operating condensers, circulating water systems, and other auxiliary apparatus.
4. Operating generator cooling system.
5. Operating lubrication and oil control system, including oil purification.
6. Operating switchboards, switch gear and electric control, and protective equipment.
7. Keeping electric plant log and records and preparing reports on electric plant operations.
8. Testing, checking, and adjusting meters, gauges, and other instruments, relays, controls, and other equipment in the electric plant.
9. Cleaning electric plant equipment when not incidental to maintenance work.
10. Repacking glands and replacing gauge glasses.

Materials and Expenses:

1. Lubricants and control system oils.
2. Generator cooling gases.
3. Circulating water purification supplies.
4. Cooling water purchased.
5. Motor and generator brushes.

506 Miscellaneous Steam Power Expenses

This account shall include the cost of labor and materials used and expenses incurred which are not specifically provided for or not readily assignable to other steam generation operation expense accounts.

Items

Labor:

1. General clerical and stenographic work.
2. Guarding and patrolling plant and yard.

3. Building service.

4. Care of grounds including snow removal, and grass cutting.

5. Miscellaneous labor.

Materials and Expenses:

1. General operating supplies, such as tools, gaskets, packing waste, gauge glasses, hose, indicating lamps, record and report forms.

2. First-aid supplies and safety equipment.

3. Employees' service facilities expenses.

4. Building service supplies.

5. Communication service.

6. Miscellaneous office supplies and expenses, printing, and stationery.

7. Transportation expenses.

8. Meals, traveling, and incidental expenses.

9. Research, development, and demonstration expenses.

507 Rents

This account shall include all rents of property of others used, occupied or operated in connection with steam power generation. (See § 1767.17 (c).)

509 Allowances

This account shall include the cost of allowances expensed concurrent with the monthly emission of sulfur dioxide. (See § 1767.15 (u).)

(Maintenance)

510 Maintenance Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of maintenance of steam generation facilities. Direct field supervision of specific jobs shall be charged to the appropriate maintenance account. (See § 1767.17 (a).)

511 Maintenance of Structures

This account shall include the cost of labor and materials used and expenses incurred in the maintenance of steam structures, the book cost of which is includible in Account 311, Structures and Improvements. (See § 1767.17 (b).)

§ 1767.27

512 Maintenance of Boiler Plant

A. This account shall include the cost of labor and materials used and expenses incurred in the maintenance of steam plant, the book cost of which is includible in Account 312, Boiler Plant Equipment. (See § 1767.17 (b).)

B. For the purpose of making charges hereto and to Account 513, Maintenance of Electric Plant, the point at which steam plant is distinguished from electric plant is defined as follows:

1. Inlet flange of throttle valve on prime mover.
2. Flange of all steam extraction lines on prime mover.
3. Hotwell pump outlet on condensate lines.
4. Inlet flange of all turbine-room auxiliaries.
5. Connection to line side of motor starter for all boiler-plant equipment.

513 Maintenance of Electric Plant

This account shall include the cost of labor and materials used and expenses incurred in the maintenance of electric plant, the book of which is includible in Account 313, Engines and Engine-Driven Generators; Account 314, Turbogenerator Units; and Account 315, Accessory Electric Equipment. (See § 1767.17 (b) and Paragraph B of Account 512.)

514 Maintenance of Miscellaneous Steam Plant

This account shall include the cost of labor and materials used and expenses incurred in maintenance of miscellaneous steam generation plant, the book cost of which is includible in Account 316, Miscellaneous Power Plant Equipment. (See § 1767.17 (b).)

Nuclear Power Generation

(Operation)

517 Operation Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the operation of nuclear power generating stations. Direct supervision of specific activities, such as fuel handling, reac-

7 CFR Ch. XVII (1-1-97 Edition)

tor operations, and generator operations shall be charged to the appropriate account. (See § 1767.17 (a).)

518 Nuclear Fuel Expense

A. This account shall be debited and Account 120.5, Accumulated Provision for Amortization of Nuclear Fuel Assemblies, credited for the amortization of the net cost of nuclear fuel assemblies used in the production of energy. The net cost of nuclear fuel assemblies subject to amortization shall be the cost of nuclear fuel assemblies plus or less the expected net salvage of uranium, plutonium, and other byproducts and unburned fuel. The utility shall adopt the necessary procedures to assure that charges to this account are distributed according to the thermal energy produced in such periods.

B. This account shall also include the costs involved when fuel is leased.

C. This account shall also include the cost of other fuels, used for ancillary steam facilities, including superheat.

D. This account shall be debited or credited as appropriate for significant changes in the amounts estimated as the net salvage value of uranium, plutonium, and other byproducts contained in Account 157, Nuclear Materials Held for Sale, and the amount realized upon the final disposition of the materials. Significant declines in the estimated realizable value of items carried in Account 157 may be recognized at the time of market price declines by charging this account and crediting Account 157. When the declining change occurs while the fuel is recorded in Account 120.3, Nuclear Fuel Assemblies in Reactor, the effect shall be amortized over the remaining life of the fuel.

519 Coolants and Water

This account shall include the cost of labor and materials used and expenses incurred for heat transfer materials and water used for steam and cooling purposes.

Items

Labor:

1. Operation of water supply facilities.

Rural Utilities Service, USDA

§ 1767.27

2. Handling of coolants and heat transfer materials.

Materials and Expenses:

1. Chemicals.
2. Additions to or refining of, fluids used in reactor systems.
3. Lubricants.
4. Pumping supplies and expenses.
5. Miscellaneous supplies and expenses.
6. Purchased Water.

NOTE: Do not include in this account water for general station use or the initial charge for coolants, heat transfer, or moderator fluids, chemicals, or other supplies capitalized.

520 Steam Expenses

This account shall include the cost of labor and materials used and expenses incurred in production of steam through nuclear processes, and similar expenses for operation of any auxiliary superheat facilities.

Items

Labor:

1. Supervising steam production.
2. Fuel handling including removal, insertion, disassembly, and preparation for cooling operations and shipment.
3. Testing instruments and gauges.
4. Health, safety, monitoring, and decontamination activities.
5. Waste disposal.
6. Operating steam boilers and auxiliary steam, superheat facilities.

Materials and Expenses:

1. Chemical supplies.
2. Charts, and logs.
3. Health, safety, monitoring, and decontamination supplies.
4. Boiler inspection fees.
5. Lubricants.

521 Steam from Other Sources

This account shall include the cost of steam purchased or transferred from another department of the utility or from others under a joint facility operating arrangement for use in prime movers devoted to the production of electricity.

NOTE: The records shall be so kept as to show separately for each company from which steam is purchased, the point of delivery, the quantity, the price, and the total charge. When steam is transferred from an-

other operating department, the utility shall be prepared to show full details of the cost of producing such steam, the basis of the charges to electric generation, and the extent and manner of use by each department involved.

522 Steam Transferred—Credit

A. This account shall include credits for expenses of producing steam which are charged to others or to other utility departments under a joint operating arrangement. Include also credits for steam expenses chargeable to other electric accounts outside of the steam generation group. Full details of the basis of determination of the cost of steam transferred shall be maintained.

B. If the charges to others or to other departments of the utility include an amount for depreciation, taxes, and return on the joint steam facilities, such portion of the charge shall be credited in the case of others, to Account 454, Rent from Electric Property, and in the case of other departments of the utility, to Account 455, Interdepartmental Rents.

523 Electric Expenses

This account shall include the cost of labor, materials used, and expenses incurred in operating turbogenerators, steam turbines and their auxiliary apparatus, switch gear, and other electric equipment to the points where electricity leaves for conversion for transmission or distribution.

Items

Labor:

1. Supervising electric production.
2. Operating turbines, engines, generators, and exciters.
3. Operating condensers, circulating water systems, and other auxiliary apparatus.
4. Operating generator cooling system.
5. Operating lubrication and oil control system, including oil purification.
6. Operating switchboards, switch gear, and electric control and protective equipment.
7. Keeping plant log and records and preparing reports on electric plant operations.
8. Testing, checking and adjusting meters, gauges, and other instruments,

§ 1767.27

relays, controls, and other equipment in the electric plant.

9. Cleaning electric plant equipment when not incidental to maintenance.

10. Repacking glands and replacing gauge glasses.

Materials and Expenses:

1. Lubricants and control system oils.

2. Generator cooling gases.

3. Log sheets and charts.

4. Motor and generator brushes.

524 Miscellaneous Nuclear Power Expenses

This account shall include the cost of labor, materials used, and expenses incurred which are not specifically provided for or are not readily assignable to other nuclear generation operation accounts.

Items

Labor:

1. General clerical and stenographic work.

2. Plant security.

3. Building service.

4. Care of grounds, including snow removal, and grass cutting

5. Miscellaneous labor.

Materials and Expenses:

1. General operating supplies, such as tools, gaskets, hose, indicating lamps, records and reports forms.

2. First-aid supplies and safety equipment.

3. Employees' service facilities expenses.

4. Building service supplies.

5. Communication service.

6. Miscellaneous office supplies and expenses, printing and stationery.

7. Transportation expenses.

8. Meals, traveling, and incidental expenses.

9. Research, development, and demonstration expenses.

525 Rents

This account shall include all rents of property of others used, occupied, or operated in connection with nuclear generation. (See § 1767.17 (c).)

7 CFR Ch. XVII (1–1–97 Edition)

(Maintenance)

528 Maintenance Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of maintenance of nuclear generation facilities. Direct field supervision of specific jobs shall be charged to the appropriate maintenance account. (See § 1767.17 (a).)

529 Maintenance of Structures

This account shall include the cost of labor, materials used, and expenses incurred in the maintenance of structures, the book cost of which is includible in Account 321, Structures and Improvements. (See § 1767.17 (b).)

530 Maintenance of Reactor Plant Equipment

This account shall include the cost of labor, materials used, and expenses incurred in the maintenance of reactor plant, the book cost of which is includible in Account 322, Reactor Plant Equipment. (See § 1767.17 (b).)

531 Maintenance of Electric Plant

This account shall include the cost of labor, materials used, and expenses incurred in the maintenance of electric plant, the book cost of which is includible in Account 323, Turbogenerator Units, and Account 324, Accessory Electric Equipment. (See § 1767.17 (b).)

532 Maintenance of Miscellaneous Nuclear Plant

This account shall include the cost of labor, materials used, and expenses incurred in maintenance of miscellaneous nuclear generating plant, the book cost of which is includible in Account 325, Miscellaneous Power Plant Equipment. (See § 1767.17 (b).)

Hydraulic Power Generation

(Operation)

535 Operation Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the

Rural Utilities Service, USDA

§ 1767.27

operation of hydraulic power generating stations. Direct supervision of specific activities, such as hydraulic operation, and generator operation shall be charged to the appropriate account. (See § 1767.17 (a).)

536 Water for Power

This account shall include the cost of water used for hydraulic power generation.

Items

1. Cost of water purchased from others, including water tolls paid reservoir companies.
2. Periodic payments for licenses or permits from any governmental agency for water rights, or payments based on the use of the water.
3. Periodic payments for riparian rights.
4. Periodic payments for headwater benefits or for detriments to others.
5. Cloud seeding.

537 Hydraulic Expenses

This account shall include the cost of labor, materials used, and expenses incurred in operating hydraulic works including reservoirs, dams, and waterways, and in activities directly relating to the hydroelectric development outside the generating station. It shall also include the cost of labor, materials used, and other expenses incurred in connection with the operation of (1) fish and wildlife, and (2) recreation facilities. Separate subaccounts shall be maintained for each of the above.

Items

Labor:

1. Supervising hydraulic operation.
2. Removing debris and ice from trash racks, reservoirs, and waterways.
3. Patrolling reservoirs and waterways.
4. Operating intakes, spillways, sluiceways, and outlet works.
5. Operating bubbler, heater, or other deicing systems.
6. Ice and log jam work.
7. Operating navigation facilities.
8. Operations relating to conservation of game, fish, and forests.
9. Insect control activities.

Materials and Expenses:

1. Insect control materials.
2. Lubricants, packing, and other supplies used in the operation of hydraulic equipment.
3. Transportation expense.

538 Electric Expenses

This account shall include the cost of labor, materials used, and expenses incurred in operating prime movers, generators, and their auxiliary apparatus, switchgear, and other electric equipment, to the point where electricity leaves for conversion for transmission or distribution.

Items

Labor:

1. Supervising electric production.
2. Operating prime movers, generators, and auxiliary equipment.
3. Operating generator cooling system.
4. Operating lubrication and oil control systems, including oil purification.
5. Operating switchboards, switchgear, and electric control and protection equipment.
6. Keeping plant log and records and preparing reports on plant operations.
7. Testing, checking and adjusting meters, gauges, and other instruments, relays, controls, and other equipment in the plant.
8. Cleaning plant equipment when not incidental to maintenance work.
9. Repacking glands.

Materials and Expenses:

1. Lubricants and control system oils.
2. Motor and generator brushes.

539 Miscellaneous Hydraulic Power Generation Expenses

This account shall include the cost of labor, materials used, and expenses incurred which are not specifically provided for or are not readily assignable to other hydraulic generation operation expense accounts.

Items

Labor:

1. General clerical and stenographic work.
2. Guarding and patrolling plant and yard.

§ 1767.27

3. Building service.
4. Care of grounds including snow removal, and grass cutting.
5. Snow removal from roads and bridges.
6. Miscellaneous labor.

Materials and Expenses:

1. General operating supplies, such as tools, gaskets, packing, waste, hose, indicating lamps, record and report forms.
2. First-aid supplies and safety equipment.
3. Employees' service facilities expenses.
4. Building service supplies.
5. Communication service.
6. Office supplies, printing and stationery.
7. Transportation expenses.
8. Fuel.
9. Meals, traveling, and incidental expenses.
10. Research, development, and demonstration expenses.

540 Rents

This account shall include all rents of property of others used, occupied, or operated in connection with hydraulic power generation, including amounts payable to the United States for the occupancy of public lands and reservations for reservoirs, dams, flumes, forebays, penstocks, and power houses but not including transmission right-of-way. (See § 1767.17 (c).)

(Maintenance)

541 Maintenance Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the maintenance of hydraulic power generating stations. Direct field supervision of specific jobs shall be charged to the appropriate maintenance account. (See § 1767.17 (a).)

542 Maintenance of Structures

This account shall include the cost of labor, materials used, and expenses in-

7 CFR Ch. XVII (1–1–97 Edition)

curring in maintenance of hydraulic structures, the book cost of which is includible in Account 331, Structures and Improvements. (See § 1767.17 (b).) However, the cost of labor, materials used, and expenses incurred in the maintenance of fish and wildlife and recreation facilities, the book cost of which is includible in Account 331, Structures and Improvements, shall be charged to Account 545, Maintenance of Miscellaneous Hydraulic Plant.

543 Maintenance of Reservoirs, Dams, and Waterways

This account shall include the cost of labor, materials used, and expenses incurred in maintenance of plant includible in Account 332, Reservoirs, Dams, and Waterways. (See § 1767.17 (b).) However, the cost of labor, materials used, and expenses incurred in the maintenance of fish and wildlife and recreation facilities, the book cost of which is includible in Account 332, Reservoirs, Dams, and Waterways, shall be charged to Account 545, Maintenance of Miscellaneous Hydraulic Plant.

544 Maintenance of Electric Plant

This account shall include the cost of labor, materials used, and expenses incurred in maintenance of plant includible in Account 333, Water Wheels, Turbines and Generators, and Account 334, Accessory Electric Equipment, (See § 1767.17 (b).)

545 Maintenance of Miscellaneous Hydraulic Plant

This account shall include the cost of labor, materials used, and expenses incurred in maintenance of plant, the book cost of which is includible in Account 335, Miscellaneous Power Plant Equipment, and Account 336, Roads Railroads and Bridges. (See § 1767.17 (b).) It shall also include the cost of labor, materials used, and other expenses incurred in the maintenance of (1) fish and wildlife, and (2) recreation facilities. Separate subaccounts shall be maintained for each of the above.

Rural Utilities Service, USDA

§ 1767.27

Other Power Generation

(Operation)

546 Operation Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the operation of other power generating stations. Direct supervision of specific activities, such as fuel handling and engine and generator operation shall be charged to the appropriate account. (See § 1767.17 (a).)

547 Fuel

This account shall include the cost delivered at the station (See Account 151, Fuel Stock) of all fuel, such as gas, oil, kerosene, and gasoline used in other power generation.

548 Generation Expenses

This account shall include the cost of labor, materials used, and expenses incurred in operating prime movers, generators, and electric equipment in other power generating stations, to the point where electricity leaves for conversion for transmission or distribution.

Items

Labor:

1. Supervising other power generation operation.
2. Operating prime movers, generators, and auxiliary apparatus and switching and other electric equipment.
3. Keeping plant log and records and preparing reports on plant operations.
4. Testing, checking, cleaning, oiling, and adjusting equipment.

Materials and Expenses:

1. Dynamo, motor, and generator brushes.
2. Lubricants and control system oils.
3. Water for cooling engines and generators.

549 Miscellaneous Other Power Generation Expenses

This account shall include the cost of labor, materials used, and expenses in-

curred in the operation of other power generating stations which are not specifically provided for or are not readily assignable to other generation expense accounts.

Items

Labor:

1. General clerical and stenographic work.
2. Guarding and patrolling plant and yard.
3. Building service.
4. Care of grounds, including snow removal, and grass cutting.
5. Miscellaneous labor.

Materials and Expenses:

1. Building service supplies.
2. First-aid supplies and safety equipment.
3. Communication service.
4. Employees' service facilities expenses.
5. Office supplies, printing and stationery.
6. Transportation expense.
7. Meals, traveling, and incidental expenses.
8. Fuel for heating.
9. Water for fire protection or general use.
10. Miscellaneous supplies, such as hand tools, drills, saw blades, and files.
11. Research, development, and demonstration expenses.

550 Rents

This account shall include all rents of property of others used, occupied, or operated in connection with other power generation. (See § 1767.17 (c).)

(Maintenance)

551 Maintenance Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the maintenance of other power generating stations. Direct field supervision of specific jobs shall be charged to the appropriate maintenance account. (See § 1767.17 (a).)

§ 1767.27

552 Maintenance of Structures

This account shall include the cost of labor, materials used, and expenses incurred in maintenance of facilities used and expenses incurred in maintenance of facilities used in other power generation, the book cost of which is includible in Account 341, Structures and Improvements, and Account 342, Fuel Holders, Producers and Accessories. (See § 1767.17 (b).)

553 Maintenance of Generating and Electric Equipment

This account shall include the cost of labor, materials used, and expenses incurred in maintenance of plant, the book cost of which is includible in Account 343, Prime Movers; Account 344, Generators; and Account 345, Accessory Electric Equipment. (See § 1767.17 (b).)

554 Maintenance of Miscellaneous Other Power Generation Plant

This account shall include the cost of labor, materials used, and expenses incurred in maintenance of other power generation plant, the book cost of which is includible in Account 346, Miscellaneous Power Plant Equipment. (See § 1767.17 (b).)

OTHER POWER SUPPLY EXPENSES

555 Purchased Power

A. This account shall include the cost at point of receipt by the utility of electricity purchased for resale. It shall also include, net settlements for exchange of electricity or power, such as economy energy, off-peak energy for on-peak energy, and spinning reserve capacity. In addition, the account shall include the net settlements for transactions under pooling or interconnection agreements wherein there is a balancing of debits and credits for energy, or capacity. Distinct purchases and sales shall not be recorded as exchanges and net amounts only recorded merely because debit and credit amounts are combined in the voucher settlement.

B. The records supporting this account shall show, by months, the demands and demand charges, kilowatt-hours and prices thereof under each purchase contract and the charges and

7 CFR Ch. XVII (1–1–97 Edition)

credits under each exchange or power pooling contract.

556 System Control and Load Dispatching

This account shall include the cost of labor and expenses incurred in load dispatching activities for system control. Utilities having an interconnected electric system or operating under a central authority which controls the production and dispatching of electricity may apportion these costs to this account and Account 561, Load Dispatching, and Account 581, Load Dispatching.

Items

Labor:

1. Allocating loads to plants and interconnections with others.
2. Directing switching.
3. Arranging and controlling clearances for construction, maintenance, test, and emergency purposes.
4. Controlling system voltages.
5. Recording loadings, and water conditions.
6. Preparing operating reports and data for billing and budget purposes.
7. Obtaining reports on the weather and special events.

Expenses:

1. Communication service provided for system control purposes.
2. System record and report forms.
3. Meals, traveling, and incidental expenses.
4. Obtaining weather and special events reports.

557 Other Expenses

A. This account shall be charged with any production expenses including expenses incurred directly in connection with the purchase of electricity, which are not specifically provided for in other production expense accounts. Charges to this account shall be supported so that a description of each type of charge will be readily available.

B. Recoveries from insurance companies, under use and occupancy provisions of policies, of amounts in reimbursement of excessive or added productions costs for which the insurance company is liable under the terms of

Rural Utilities Service, USDA

§ 1767.27

the policy shall be credited to this account.

TRANSMISSION EXPENSES

(Operation)

560 Operation Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the operation of the transmission system as a whole. Direct supervision of specific activities, such as station operation and line operation shall be charged to the appropriate account. (See § 1767.17 (a).)

561 Load Dispatching

This account shall include the cost of labor, materials used, and expenses incurred in load dispatching operations pertaining to the transmission of electricity.

Items

Labor:

1. Direct switching.
2. Arranging and controlling clearances for construction, maintenance, test, and emergency purposes.
3. Controlling system voltages.
4. Obtaining reports on the weather and special events.
5. Preparing operating reports and data for billing and budget purposes.

Expenses:

1. Communication service provided for system control purposes.
2. System record and report forms.
3. Meals, traveling, and incidental expenses.
4. Obtaining weather and special events reports.

562 Station Expenses

This account shall include the cost of labor, materials used, and expenses incurred in operating transmission substations and switching stations. If transmission station equipment is located in or adjacent to a generating station, the expenses applicable to transmission station operations shall nevertheless be charged to this account.

Items

Labor:

1. Supervising station operation.
2. Adjusting station equipment where such adjustment primarily affects performance, such as regulating the flow of cooling water, adjusting current in fields of a machine or changing voltage of regulators, changing station transformer taps.
3. Inspecting, testing, and calibrating station equipment for the purpose of checking its performance.
4. Keeping station log and records and preparing records on station operation.
5. Operating switching and other station equipment.
6. Standing watch, guarding, and patrolling station and station yard.
7. Sweeping, mopping, and tidying station.
8. Care of grounds, including snow removal, and grass cutting.

Materials and Expenses:

1. Building service expenses.
2. Operating supplies, such as lubricants, commutator brushes, water, and rubber goods.
3. Station meter and instrument supplies, such as ink and charts.
4. Station record and report forms.
5. Tool expense.
6. Transportation expenses.
7. Meals, traveling, and incidental expenses.

563 Overhead Line Expenses

564 Underground Line Expenses

A. These accounts shall include the cost of labor, materials used, and expenses incurred in the operation of transmission lines.

B. If the expenses are not substantial for both overhead and underground lines, these accounts may be combined.

Items

Labor:

1. Supervising line operation.
2. Inspecting and testing lightning arresters, circuit breakers, switches, and grounds.
3. Load tests of circuits.
4. Routine line patrolling.

§ 1767.27

5. Routine voltage surveys made to determine the condition or efficiency of transmission system.

6. Transferring loads, switching and reconnecting circuits and equipment for operating purposes. (Switching for construction or maintenance purposes is not includible in this account.)

7. Routine inspection and cleaning of manholes, conduit, network, and transformer vaults.

8. Electrolysis surveys.

9. Inspecting and adjusting line-testing equipment, such as voltmeters, ammeters, and wattmeters.

10. Regulation and addition of oil or gas in high-voltage cable systems.

Materials and Expenses:

1. Transportation expenses.

2. Meals, traveling, and incidental expenses.

3. Tool expenses.

4. Operating supplies, such as instrument charts, and rubber goods.

565 Transmission of Electricity by Others

This account shall include amounts payable to others for the transmission of the utility's electricity over transmission facilities owned by others.

566 Miscellaneous Transmission Expenses

This account shall include the cost of labor, materials used, and expenses incurred in transmission map and record work, transmission office expenses, and other transmission expenses not provided for elsewhere.

Items

Labor:

1. General records of physical characteristics of lines and stations, such as capacities.

2. Ground resistance records.

3. Janitor work at transmission office buildings, including care of grounds, snow removal, and grass cutting.

4. Joint pole maps and records.

5. Line load and voltage records.

6. Preparing maps and prints.

7. General clerical and stenographic work.

8. Miscellaneous labor.

7 CFR Ch. XVII (1-1-97 Edition)

Materials and Expenses:

1. Communication service.

2. Building service supplies.

3. Map and record supplies.

4. Transmission office supplies and expenses, printing and stationery.

5. First-aid supplies.

6. Research, development, and demonstration expenses.

567 Rents

This account shall include rents of property of others used, occupied, or operated in connection with the transmission system, including payments to the United States and others for use of public or private lands and reservations for transmission line rights-of-way. (See § 1767.17 (c).)

(Maintenance)

568 Maintenance Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of maintenance of the transmission system. Direct field supervision of specific jobs shall be charged to the appropriate maintenance account. (See § 1767.17 (a).)

569 Maintenance of Structures

This account shall include the cost of labor, materials used, and expenses incurred in the maintenance of structures, the book cost of which is includible in Account 352, Structures and Improvements. (See § 1767.17 (b).)

570 Maintenance of Station Equipment

This account shall include the cost of labor, materials used, and expenses incurred in maintenance of station equipment, the book cost of which is includible in Account 353, Station Equipment. (See § 1767.17 (b).)

571 Maintenance of Overhead Lines

This account shall include the cost of labor, materials used, and expenses incurred in maintenance of transmission plant, the book cost of which is includible in Accounts 354, Towers and Fixtures; 355, Poles and Fixtures; 356, Overhead Conductors and Devices; and 359, Roads and Trails. (See § 1767.17 (b).)

Rural Utilities Service, USDA

§1767.27

Items

1. Work of the following character on poles, towers, and fixtures:
 - a. Installing or removing additional clamps or strain insulators on guys in place.
 - b. Moving line or guy pole in relocation of the same pole or section of line.
 - c. Painting poles, towers, crossarms, or pole extensions.
 - d. Readjusting and changing position of guys or braces.
 - e. Realigning and straightening poles, crossarms braces, and other pole fixtures.
 - f. Reconditioning reclaimed pole fixtures, coating crossarms, racks, brackets, and other fixtures on poles.
 - h. Repairing or realigning pins, racks, or brackets.
 - i. Repairing pole supported platform.
 - j. Repairs by others to jointly owned poles.
 - k. Shaving, cutting rot, or testing poles or crossarms in use or salvaged for reuse.
 - l. Stubbing poles already in service.
 - m. Supporting fixtures and conductors and transferring them to new poles during pole replacements.
 - n. Maintenance of pole signs, stencils, and tags.
2. Work of the following character on overhead conductors and devices:
 - a. Overhauling and repairing line cutouts, line switches, and line breakers.
 - b. Cleaning insulators and bushings.
 - c. Refusing cutouts.
 - d. Repairing line oil circuit breakers and associated relays and control wiring.
 - e. Repairing grounds.
 - f. Resagging, retyping, or rearranging position or spacing of conductors.
 - g. Standing by phones, going to calls, cutting faulty lines clear, or similar activities at times of emergencies.
 - h. Sampling, testing, changing, purifying, and replenishing insulating oil.
 - i. Repairing line testing equipment.
 - j. Transferring loads, switching and reconnecting circuits and equipment for maintenance purposes.
 - k. Trimming trees and clearing brush.
 - l. Chemical treatment of right of way areas when occurring subsequent to construction of line.

3. Work of the following character on roads and trails:

- a. Repairing roadways and bridges.
- b. Trimming trees and brush to maintain previous roadway clearance.
- c. Snow removal from roads and trails.
- d. Maintenance work on publicly owned roads and trails when done by utility at its expense.

572 Maintenance of Underground Lines

This account shall include the cost of labor, materials used, and expenses incurred in maintenance of transmission plant, the book cost of which is includible in Accounts 357, Underground Conduit, and Account 358, Underground Conductors and Devices. (See §1767.17 (b).)

Items

1. Work of the following character on underground conduit:
 - a. Cleaning ducts, manholes, and sewer connections.
 - b. Minor alterations of handholes, manholes, or vaults.
 - c. Refastening, repairing, or moving racks, ladders, hangers in manholes, or vaults.
 - d. Plugging and shelving or replugging ducts.
 - e. Repairs to sewers and drains, walls and floors, rings and covers.
2. Work of the following character on underground conductors and devices:
 - a. Repairing oil circuit breakers, switches, cutouts, and control wiring.
 - b. Repairing grounds.
 - c. Retraining and reconnecting cables in manholes, including transfer of cables from one duct to another.
 - d. Repairing conductors and splices.
 - e. Repairing or moving junction boxes and potheads.
 - f. Refireproofing of cables and repairing supports.
 - g. Repairing electrolysis preventive devices for cables.
 - h. Repairing cable bonding systems.
 - i. Sampling, testing, changing, purifying, and replenishing insulating oil.
 - j. Transferring loads, switching and reconnecting circuits, and equipment for maintenance purposes.
 - k. Repairing line testing equipment.

§ 1767.27

1. Repairs to oil or gas equipment in high-voltage cable system and replacement of oil or gas.

573 Maintenance of Miscellaneous Transmission Plant

This account shall include the cost of labor, materials used, and expenses incurred in maintenance of owned or leased plant which is assignable to transmission operations and is not provided for elsewhere. (See § 1767.17 (b).)

DISTRIBUTION EXPENSES

(Operation)

580 Operation Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of the operation of the distribution system. Direct supervision of specific activities, such as station operation, line operation, and meter department operation shall be charged to the appropriate account. (See § 1767.17 (a).)

581 Load Dispatching

This account (the keeping of which is optional with the utility) shall include the cost of labor, materials used, and expenses incurred in load dispatching operations pertaining to the distribution of electricity.

Items

Labor:

1. Direct switching.
2. Arranging and controlling clearances for construction, maintenance, test, and emergency purposes.
3. Controlling system voltages.
4. Preparing operating reports.
5. Obtaining reports on the weather and special events.

Expenses:

1. Communication service provided for system control purposes.
2. System record and report forms.
3. Meals, traveling, and incidental expenses.

582 Station Expenses

This account shall include the cost of labor, materials used, and expenses in-

7 CFR Ch. XVII (1-1-97 Edition)

curred in the operation of distribution substations.

Items

Labor:

1. Supervising station operation.
2. Adjusting station equipment where such adjustment primarily affects performance, such as regulating the flow of cooling water, adjusting current in fields of a machine, changing voltage of regulators, or changing station transformer taps.
3. Keeping station log and records and preparing reports on station operation.
4. Inspecting, testing, and calibrating station equipment for the purpose of checking its performance.
5. Operating switching and other station equipment.
6. Standing watch, guarding, and patrolling station and station yard.
7. Sweeping, mopping, and tidying station.
8. Care of grounds, including snow removal, and grass cutting.

Materials and Expenses:

1. Building service expenses.
2. Operating, supplies, such as lubricants, commutator brushes, water, and rubber goods.
3. Station meter and instrument supplies, such as ink and charts.
4. Station record and report forms.
5. Tool expense.
6. Transportation expense.
7. Meals, traveling, and incidental expenses.

NOTE: If the utility owns storage battery equipment used for supplying electricity to customers in periods of emergency, the cost of operating labor and of supplies, such as acid, gloves, hydrometers, thermometers, soda, automatic cell fillers, and acid proof shoes shall be included in this account. If significant in amount, a separate subdivision shall be maintained for such expenses.

583 Overhead Line Expenses

584 Underground Line Expenses

These accounts shall include, respectively, the cost of labor materials used, and expenses incurred in the operation of overhead and underground distribution lines.

Rural Utilities Service, USDA

§ 1767.27

Items

Labor:

1. Supervising line operation.
2. Changing line transformer taps.
3. Inspecting and testing lightning arresters, line circuit breakers, switches, and grounds.
4. Inspecting and testing line transformers for the purpose of determining load, temperature, or operation performance.
5. Patrolling lines.
6. Load tests and voltage surveys of feeders, circuits, and line transformers.
7. Removing line transformers and voltage regulators with or without replacement.
8. Installing line transformers or voltage regulators with or without change in capacity provided that the cost of first installation of these items is included in Account 368, Line Transformers.
9. Voltage surveys, either routine or upon request of customers, including voltage tests at customer's main switch.
10. Transferring loads, switching and reconnecting circuits and equipment for operation purposes.
11. Electrolysis surveys.
12. Inspecting and adjusting line testing equipment.

Materials and Expenses:

1. Tool expense.
2. Transportation expense.
3. Meals, traveling, and incidental expenses.
4. Operating supplies, such as instrument charts, and rubber goods.

585 Street Lighting and Signal System Expenses

This account shall include the cost of labor, materials used, and expenses incurred in: (1) The operation of street lighting and signal system plant which is owned or leased by the utility; and (2) the operation and maintenance of such plant owned by customers where such work is done regularly as a part of the street lighting and signal system service.

Items

Labor:

1. Supervising street lighting and signal systems operation.
2. Replacing lamps and incidental cleaning of glassware and fixtures in connection therewith.
3. Routine patrolling for lamp outages, extraneous nuisances, or encroachments.
4. Testing lines and equipment including voltage and current measurement.
5. Winding and inspection of time switch and other controls.

Materials and Expenses:

1. Street lamp renewals.
2. Transportation and tool expense.
3. Meals, traveling, and incidental expenses.

586 Meter Expenses

This account shall include the cost of labor, materials used, and expenses incurred in the operation of customer meters and associated equipment.

Items

Labor:

1. Supervising meter operation.
2. Clerical work on meter history and associated equipment record cards, test cards, and reports.
3. Disconnecting and reconnecting, removing and reinstalling, sealing and unsealing meters and other metering equipment in connection with initiating or terminating services including the cost of obtaining meter readings, if incidental to such operation.
4. Consolidating meter installations due to elimination of separate meters for different rates of service.
5. Changing or relocating meters, instrument transformers, time switches, and other metering equipment.
6. Resetting time controls, checking operation of demand meters and other metering equipment, when done as an independent operation.
7. Inspecting and adjusting meter testing equipment.
8. Inspecting and testing meters, instrument transformers, time switches, and other metering equipment on premises or in shops excluding inspecting and testing incidental to maintenance.

Materials and Expenses:

§ 1767.27

1. Meter seals and miscellaneous meter supplies.
2. Transportation expenses.
3. Meals, traveling, and incidental expenses.
4. Tool expenses.

NOTE: The cost of the first setting and testing of a meter is chargeable to utility plant, Account 370, Meters.

587 Customer Installations Expenses

This account shall include the cost of labor, materials used, and expenses incurred in work on customer installations in inspecting premises and in rendering services to customers of the nature of those indicated by the list of items hereunder.

Items

Labor:

1. Supervising customer installations work.
2. Inspecting premises, including the check of wiring for code compliance.
3. Investigating, locating, and clearing grounds on customers' wiring.
4. Investigating service complaints, including load tests of motors and lighting and power circuits on customers' premises; field investigations of complaints on bills or of voltage.
5. Installing, removing, renewing, and changing lamps and fuses.
6. Radio, television, and similar interference work including erection of new aerials on customers' premises and patrolling of lines, testing of lightning arresters, inspection of pole hardware, and examination on or off premises of customers' appliances, wiring, or equipment to locate cause of interference.
7. Installing, connecting, reinstalling, or removing leased property on customers' premises.
8. Testing, adjusting, and repairing customers' fixtures and appliances in the shop or on premises.
9. Cost of changing customers' equipment due to changes in service characteristics.
10. Investigation of current diversion including setting and removal of check meters and securing special readings thereon; special calls by employees in connection with discovery and settlement of current diversion; changes in

7 CFR Ch. XVII (1-1-97 Edition)

customer wiring; and any other labor cost identifiable as caused by current diversion.

Materials and Expenses:

1. Lamp and fuse renewals.
2. Materials used in servicing customers' fixtures, appliances, and equipment.
3. Power, light, heat, telephone, and other expenses of the appliance repair department.
4. Tool expense.
5. Transportation expense, including pickup and delivery charges.
6. Meals, traveling, and incidental expenses.
7. Rewards paid for discovery of current diversion.

NOTE A: Amounts billed customers for any work, the cost of which is charged to this account, shall be credited to this account. Any excess over costs resulting therefrom, shall be transferred to Account 451, Miscellaneous Service Revenues.

NOTE B: Do not include in this account expenses incurred in connection with merchandising, jobbing, and contract work.

588 Miscellaneous Distribution Expenses

This account shall include the cost of labor, materials used, and expenses incurred in distribution system operation not provided for elsewhere.

Items

Labor:

1. General records of physical characteristics of lines and substations, such as capacities.
2. Ground resistance records.
3. Joint pole maps and records.
4. Distribution system voltage and load records.
5. Preparing maps and prints.
6. Service interruption and trouble records.
7. General clerical and stenographic work except that chargeable to Account 586, Meter Expenses.

Expenses:

1. Operating records covering poles, transformers, manholes, cables, and other distribution facilities. Exclude meter records chargeable to Account 586, Meter Expenses, and station records chargeable to Account 582, Station Expenses, and stores records

Rural Utilities Service, USDA

§ 1767.27

chargeable to Account 163, Stores Expense Undistributed.

2. Janitor work at distribution office buildings including snow removal and grass cutting.

3. Communication service.

4. Building service expenses.

5. Miscellaneous office supplies and expenses, printing and stationery, maps and records, and first-aid supplies.

6. Research, development, and demonstration expenses.

589 Rents

This account shall include rents of property of others used, occupied, or operated in connection with the distribution system, including payments to the United States and others for the use and occupancy of public lands and reservations for distribution line rights of way. (See § 1767.17 (c).)

(Maintenance)

590 Maintenance Supervision and Engineering

This account shall include the cost of labor and expenses incurred in the general supervision and direction of maintenance of the distribution system. Direct field supervision of specific jobs shall be charged to the appropriate maintenance account. (See § 1767.17 (a).)

591 Maintenance of Structures

This account shall include the cost of labor, materials used, and expenses incurred in maintenance of structures, the book cost of which is includible in Account 361, Structures and Improvements. (See § 1767.17 (b).)

592 Maintenance of Station Equipment

This account shall include the cost of labor, materials used, and expenses incurred in maintenance of plant, the book cost of which is includible in Account 362, Station Equipment, and Account 363, Storage Battery Equipment. (See § 1767.17 (b).)

593 Maintenance of Overhead Lines

This account shall include the cost of labor, materials used, and expenses incurred in the maintenance of overhead

distribution line facilities, the book cost of which is includible in Account 364, Poles, Towers and Fixtures; Account 365, Overhead Conductors and Devices; and Account 369, Services. (See § 1767.17 (b).)

Items

1. Work of the following character on poles, towers, and fixtures:

a. Installing additional clamps or removing clamps or strain insulators on guys in place.

b. Moving line or guy pole in relocation of pole or section of line.

c. Painting poles, towers, crossarms, or pole extensions.

d. Readjusting and changing position of guys or braces.

e. Realigning and straightening poles, crossarms, braces, pins, racks, brackets, and other pole fixtures.

f. Reconditioning reclaimed pole fixtures.

g. Relocating crossarms, racks, brackets, and other fixtures on poles.

h. Repairing pole supported platform.

i. Repairs by others to jointly owned poles.

j. Shaving, cutting rot, or treating poles or crossarms in use or salvaged for reuse.

k. Stubbing poles already in service.

l. Supporting conductors, transformers, and other fixtures and transferring them to new poles during pole replacements.

m. Maintaining pole signs, stencils, and tags.

2. Work of the following character on overhead conductors and devices:

a. Overhauling and repairing line cutouts, line switches, line breakers, and capacitor installations.

b. Cleaning insulators and bushings.

c. Refusing line cutouts.

d. Repairing line oil circuit breakers and associated relays and control wiring.

e. Repairing grounds.

f. Resagging, retying, or rearranging position or spacing of conductors.

g. Standing by phones, going to calls, cutting faulty lines clear, or similar activities at times of emergency.

h. Sampling, testing, changing, purifying, and replenishing insulating oil.

§ 1767.27

- i. Transferring loads, switching, and reconnecting circuits and equipment for maintenance purposes.
- j. Repairing line testing equipment.
- k. Trimming trees and clearing brush.
- l. Chemical treatment of right-of-way area when occurring subsequent to construction of line.
- 3. Work of the following character on overhead services:
 - a. Moving position of service either on pole or on customers' premises.
 - b. Pulling slack in service wire.
 - c. Retying service wire.
 - d. Refastening or tightening service bracket.

594 Maintenance of Underground Lines

This account shall include the cost of labor, materials used, and expenses incurred in the maintenance of underground distribution line facilities, the book cost of which is includible in Account 366, Underground Conduit; Account 367, Underground Conductors and Devices; and Account 369, Services. (See § 1767.17 (b).)

Items

- 1. Work of the following character on underground conduit:
 - a. Cleaning ducts, manholes, and sewer connections.
 - b. Moving or changing position of conduit or pipe.
 - c. Minor alterations of handholes, manholes, or vaults.
 - d. Refastening, repairing, or moving racks, ladders, or hangers in manholes or vaults.
 - e. Plugging and shelving ducts.
 - f. Repairs to sewers, drains, walls, and floors, rings, and covers.
- 2. Work of the following character on underground conductors and devices:
 - a. Repairing circuit breakers, switches, cutouts, network protectors, and associated relays and control wiring.
 - b. Repairing grounds.
 - c. Retraining and reconnecting cables in manholes including transfer of cables from one duct to another.
 - d. Repairing conductors and splices.
 - e. Repairing or moving junction boxes and potheads.

7 CFR Ch. XVII (1–1–97 Edition)

- f. Refireproofing cables and repairing supports.
- g. Repairing electrolysis preventive devices for cables.
- h. Repairing cable bonding systems.
- i. Sampling, testing, changing, purifying, and replenishing insulating oil.
- j. Transferring loads, switching and reconnecting circuits and equipment for maintenance purposes.
- k. Repairing line testing equipment.
- l. Repairing oil or gas equipment in high voltage cable systems and replacement of oil or gas.
- 3. Work of the following character on underground services:
 - a. Cleaning ducts.
 - b. Repairing any underground service plant.

595 Maintenance of Line Transformers

This account shall include the cost of labor, materials used, and expenses incurred in maintenance of distribution line transformers, the book cost of which is includible in Account 368, Line Transformers. (See § 1767.17 (b).)

596 Maintenance of Street Lighting and Signal Systems

This account shall include the cost of labor, materials used, and expenses incurred in maintenance of plant, the book cost of which is includible in Account 373, Street Lighting and Signal Systems. (See § 1767.17 (b).)

597 Maintenance of Meters

This account shall include the cost of labor, materials used, and expenses incurred in the maintenance of meters and meter testing equipment, the book cost of which is includible in Account 370, Meters, and Account 395, Laboratory Equipment, respectively. (See § 1767.17 (b).)

598 Maintenance of Miscellaneous Distribution Plant

This account shall include the cost of labor, materials used, and expenses incurred in maintenance of plant, the book cost of which is includible in Accounts 371, Installations on Customers' Premises, and Account 372, Leased Property on Customers' Premises, and any other plant the maintenance of which is assignable to the distribution

Rural Utilities Service, USDA

§ 1767.28

function and is not provided for elsewhere. (See § 1767.17 (b).)

Items

1. Work of similar nature to that listed in other distribution maintenance accounts.

2. Maintenance of office furniture and equipment used by distribution system department.

§ 1767.28 Customer accounts expenses.

The customer accounts expense accounts identified in this section shall be used by all RUS borrowers.

CUSTOMER ACCOUNTS EXPENSES

(Operation)

- 901 Supervision
- 902 Meter Reading Expenses
- 903 Customer Records and Collection Expenses
- 904 Uncollectible Accounts
- 905 Miscellaneous Customer Accounts Expenses

CUSTOMER ACCOUNTS EXPENSES

(Operation)

901 Supervision

This account shall include the cost of labor and expenses incurred in the general direction and supervision of customer accounting and collecting activities. Direct supervision of a specific activity shall be charged to Account 902, Meter Reading Expenses, or Account 903, Customer Records and Collection Expenses, as appropriate. (See 1767.17 (a).)

902 Meter Reading Expenses

This account shall include the cost of labor, materials used, and expenses incurred in reading customer meters, and determining consumption when performed by employees engaged in reading meters.

Items

Labor:

1. Addressing forms for obtaining meter readings by mail.
2. Changing and collecting meter charts used for billing purposes.
3. Inspecting time clocks and checking seals when performed by meter

readers and the work represents a minor activity incidental to regular meter reading routine.

4. Reading meters, including demand meters, and obtaining load information for billing purposes. Exclude and charge to Account 586, Meter Expenses, or to Account 903, Customer Records and Collection Expenses, as applicable, the cost of obtaining meter readings, first and final, if incidental to the operation of removing or resetting, sealing or locking, and disconnecting or reconnecting meters.

5. Computing consumption from meter reader's book or from reports by mail when done by employees engaged in reading meters.

6. Collecting from prepayment meters when incidental to meter reading.

7. Maintaining record of customers' keys.

8. Computing estimated or average consumption when performed by employees engaged in reading meters.

Materials and Expenses:

1. Badges, lamps, and uniforms.
2. Demand charts, meter books and binders and forms for recording readings, but not the cost of preparation.
3. Postage and supplies used in obtaining meter readings by mail.
4. Transportation, meals, and incidental expenses.

903 Customer Records and Collection Expenses

This account shall include the cost of labor, materials used, and expenses incurred in work on customer applications, contracts, orders, credit investigations, billing and accounting, collections and complaints.

Items

Labor:

1. Receiving, preparing, recording, and handling routine orders for service, disconnections, transfers or meter tests initiated by the customer, excluding the cost of carrying out such orders, which is chargeable to the account appropriate for the work called for by such orders.
2. Investigations of customers' credit and keeping of records pertaining thereto, including records of uncollectible accounts written off.

§ 1767.29

3. Receiving, refunding, or applying customer deposits and maintaining customer deposit, line extension, and other miscellaneous records.
4. Checking consumption shown by meter readers' reports where incidental to preparation of billing date.
5. Preparing address plates and addressing bills and delinquent notices.
6. Preparing billing data.
7. Operating billing and bookkeeping machines.
8. Verifying billing records with contracts or rate schedules.
9. Preparing bills for delivery and mailing or delivering bills.
10. Collecting revenues, including collection from prepayment meters, unless incidental to meter-reading operations.
11. Balancing collections, preparing collections for deposit, and preparing cash reports.
12. Posting collections and other credits or charges to customer accounts and extending unpaid balances.
13. Balancing customer accounts and controls.
14. Preparing, mailing, or delivering delinquent notices and preparing reports of delinquent accounts.
15. Final meter reading of delinquent accounts when done by collectors incidental to regular activities.
16. Disconnecting and reconnecting service because of nonpayment bills.
17. Receiving, recording, and handling of inquiries, complaints, and requests for investigations from customers, including preparation of necessary orders, but excluding the cost of carrying out such orders, which is chargeable to the account appropriate for the work called for by such orders.
18. Statistical and tabulating work on customer accounts and revenues, but not including special analyses for sales department, rate department, or other general purposes, unless incidental to regular customer accounting routines.
19. Preparing and periodically rewriting meter reading sheets.
20. Determining consumption and computing estimated or average consumption when performed by employees other than those engaged in reading meters.

Materials and Expenses:

7 CFR Ch. XVII (1–1–97 Edition)

1. Address plates and supplies.
2. Cash overages and shortages.
3. Commissions or fees to others for collecting.
4. Payments to credit organizations for investigations and reports.
5. Postage.
6. Transportation expenses, including transportation of customer bills and meter books under centralized billing procedures.
7. Transportation, meals, and incidental expenses.
8. Bank charges, exchange, and other fees for cashing and depositing customers' checks.
9. Forms for recording orders for services, or removals.
10. Rent of mechanical equipment.

NOTE: The cost of work on meter history and meter location records is chargeable to Account 586, Meter Expenses.

904 Uncollectible Accounts

This amount shall be charged with amounts sufficient to provide for losses from uncollectible utility revenues. Concurrent credits shall be made to Account 144, Accumulated Provision for Uncollectible Accounts—Credit. Losses from uncollectible accounts shall be charged to Account 144.

905 Miscellaneous Customer Accounts Expenses

This account shall include the cost of labor, materials used, and expenses incurred not provided for in other accounts.

Items

Labor:

1. General clerical and stenographic work.
2. Miscellaneous labor.

Materials and Expenses:

1. Communication service.
2. Miscellaneous office supplies and expenses and stationery and printing other than those specifically provided for in Account 902 and Account 903.

§ 1767.29 Customer service and informational expenses.

The customer service and informational expense accounts identified in this section shall be used by all RUS borrowers.

Rural Utilities Service, USDA

§ 1767.29

CUSTOMER SERVICE AND INFORMATIONAL EXPENSES

(Operation)

- 907 Supervision
- 908 Customer Assistance Expenses
- 909 Informational and Instructional Advertising Expenses
- 910 Miscellaneous Customer Service and Informational Expenses

CUSTOMER SERVICE AND INFORMATIONAL EXPENSES

(Operation)

907 Supervision

This account shall include the cost of labor and expenses incurred in the general direction and supervision of customer service activities, the object of which is to encourage safe, efficient, and economical use of the utility's service. Direct supervision of a specific activity within customer service and informational expense classification shall be charged to the account where-in the costs of such activity are included. (See § 1767.17 (a).)

908 Customer Assistance Expenses

This account shall include the cost of labor, materials used, and expenses incurred in providing instructions or assistance to customers, the object of which is to encourage safe, efficient, and economical use of the utility's service.

Items

Labor:

1. Direct supervision of department.
2. Processing customer inquiries relating to the proper use of electric equipment, the replacement of such equipment, and information related to such equipment.
3. Advice directed to customers as to how they may achieve the most efficient and safest use of electric equipment.
4. Demonstrations, exhibits, lectures, and other programs designed to instruct customers in the safe, economical, or efficient use of electric service, and/or oriented toward conservation of energy.
5. Engineering and technical advice to customers, the object of which is to

promote safe, efficient, and economical use of the utility's service.

Materials and Expenses:

1. Supplies and expenses pertaining to demonstrations, exhibits, lectures, and other programs.
2. Loss in value on equipment and appliances used for customer assistance programs.
3. Office supplies and expenses.
4. Transportation, meals, and incidental expenses.

NOTE: Do not include in this account expenses that are provided for elsewhere, such as Accounts 416, Costs and Expenses of Merchandising, Jobbing, and Contract Work; 587, Customer Installations Expenses; and 912, Demonstrating and Selling Expenses.

909 Informational and Instructional Advertising Expenses

This account shall include the cost of labor, materials used, and expenses incurred in activities which primarily convey information as to what the utility urges or suggests customers should do in utilizing electric service to protect health and safety, to encourage environmental protection, to utilize their electric equipment safely and economically, or to conserve electric energy.

Items

Labor:

1. Direct supervision of information activities.
2. Preparing informational materials for newspapers, periodicals, and billboards and preparing and conducting informational motion pictures, radio and television programs.
3. Preparing informational booklets and bulletins used in direct mailings.
4. Preparing informational window and other displays.
5. Employing agencies, selecting media, and conducting negotiations in connection with the placement and subject matter of information programs.

Materials and Expenses:

1. Use of newspapers, periodicals, billboards, and radio for informational purposes.
2. Postage on direct mailings to customers exclusive of postage related to billings.

§ 1767.30

3. Printing of informational booklets, dodgers, and bulletins.

4. Supplies and expenses in preparing informational materials by the utility.

5. Office supplies and expenses.

NOTE A: Exclude from this account and charge to Account 930.2, Miscellaneous General Expenses, the cost of publication of stockholder reports, dividend notices, bond redemption notices, financial statements, and other notices of a general corporate character. Also exclude all expenses of a promotional, institutional, goodwill, or political nature, which are includible in such accounts as 913, Advertising Expenses; 930.1, General Advertising Expenses; and 426.4, Expenditures for Certain Civic, Political and Related Activities.

NOTE B: Entries relating to informational advertising included in this account shall contain or refer to supporting documents which identify the specific advertising message. If references are used, copies of the advertising message shall be readily available.

910 Miscellaneous Customer Service and Informational Expenses

This account shall include the cost of labor, materials used, and expenses incurred in connection with customer service and informational activities which are not includible in other customer information expense accounts.

Items

Labor:

1. General clerical and stenographic work not assigned to specific customer service and informational programs.

2. Miscellaneous labor.

Materials and Expenses:

1. Communication service.

2. Printing, postage, and office supplies expenses.

§ 1767.30 Sales expenses.

The sales expense accounts identified in this section shall be used by all RUS borrowers.

SALES EXPENSES

(Operation)

- 911 Supervision
- 912 Demonstrating and Selling Expenses
- 913 Advertising Expenses
- 916 Miscellaneous Sales Expenses

7 CFR Ch. XVII (1–1–97 Edition)

SALES EXPENSES

(Operation)

911 Supervision

This account shall include the cost of labor and expenses incurred in the general direction and supervision of sales activities, except merchandising. Direct supervision of a specific activity, such as demonstrating, selling, or advertising shall be charged to the account wherein the costs of such activity are included. (See § 1767.17 (a).)

912 Demonstrating and Selling Expenses

This account shall include the cost of labor, materials used, and expenses incurred in promotional, demonstrating, and selling activities, except by merchandising, the object of which is to promote or retain the use of utility services by present and prospective customers.

Items

Labor:

1. Demonstrating uses of utility services.

2. Conducting cooking schools, preparing recipes, and related home service activities.

3. Exhibitions, displays, lectures, and other programs designed to promote use of utility services.

4. Experimental and development work in connection with new and improved appliances and equipment, prior to general public acceptance.

5. Solicitation of new customers or of additional business from old customers, including commissions paid employees.

6. Engineering and technical advice to present or prospective customers in connection with promoting or retaining the use of utility services.

7. Special customer canvasses when their primary purpose is the retention of business or the promotion of new business.

Materials and Expenses:

1. Supplies and expenses pertaining to demonstration, experimental, and development activities.

2. Booth and temporary space rental.

Rural Utilities Service, USDA

§ 1767.30

3. Loss in value on equipment and appliances used for demonstration purposes.

4. Transportation, meals, and incidental expenses.

913 Advertising Expenses

This account shall include the cost of labor, materials used, and expenses incurred in advertising designed to promote or retain the use of utility service, except advertising the sale of merchandise by the utility.

Items

Labor:

1. Direct supervision of department.
2. Preparing advertising material for newspapers, periodicals, and billboards, and preparing and conducting motion pictures, radio, and television programs.
3. Preparing booklets and bulletins used in direct mail advertising.
4. Preparing window and other displays.
5. Clerical and stenographic work.
6. Investigating advertising agencies and media and conducting negotiations in connection with the placement and subject matter of sales advertising.

Materials and Expenses:

1. Advertising in newspapers, periodicals, billboards, and radio for sales promotion purposes, but not including institutional or goodwill advertising includible in Account 930.1, General Advertising Expenses.
2. Materials and services given as prizes or otherwise in connection with civic lighting contests, canning, or cooking contests, and bazaars in order to publicize and promote the use of utility services.
3. Fees and expenses of advertising agencies and commercial artists.
4. Novelties for general distribution.
5. Postage on direct mail advertising.
6. Premiums distributed generally, such as recipe books when not offered as inducement to purchase appliances.
7. Printing booklets, dodgers, and bulletins.
8. Supplies and expenses in preparing advertising material.
9. Office supplies and expenses.

NOTE A: The cost of advertisements which set forth the value or advantages of utility

service without reference to specific appliances, or, if reference is made to appliances, invites the reader to purchase appliances from his dealer or refer to appliances not carried for sale by the utility, shall be considered sales promotion advertising and charged to this account. However, advertisements which are limited to specific makes of appliances sold by the utility and price and terms, thereof, without referring to the value or advantages of utility service, shall be considered as merchandise advertising and the cost shall be charged to Costs and Expenses of Merchandising, Jobbing and Contract Work, Account 416.

NOTE B: Advertisements which substantially mention or refer to the value or advantages of utility service, together with specific reference to makes of appliance sold by the utility and the price, and terms, thereof, and designed for the joint purpose of increasing the use of utility service and the sales of appliances, shall be considered as a combination advertisement and the costs shall be distributed between this account and Account 416 on the basis of space, time, or other proportional factors.

NOTE C: Exclude from this account and charge to Account 930.2, Miscellaneous General Expenses, the cost of publication of stockholder reports, dividend notices, bond redemption notices, financial statements, and other notices of a general corporate character. Also exclude all institutional or goodwill advertising. (See Account 930.1, General Advertising Expenses.)

916 Miscellaneous Sales Expenses

This account shall include the cost of labor, materials used, and expenses incurred in connection with sales activities, except merchandising, which are not includible in other sales expense accounts.

Items

Labor:

1. General clerical and stenographic work not assigned to specific functions.
2. Special analysis of customer accounts and other statistical work for sales purposes not a part of the regular customer accounting and billing routine.
3. Miscellaneous labor.

Materials and Expenses:

1. Communication service.
2. Printing, postage, office supplies, and expenses applicable to sales activities, except those chargeable to Account 913, Advertising Expenses.

§ 1767.31

7 CFR Ch. XVII (1–1–97 Edition)

§ 1767.31 Administrative and general expenses.

The administrative and general expense accounts identified in this section shall be used by all RUS borrowers.

ADMINISTRATIVE AND GENERAL

(Operation)

- 920 Administrative and General Salaries
- 921 Office Supplies and Expenses
- 922 Administrative Expenses Transferred—Credit
- 923 Outside Services Employed
- 924 Property Insurance
- 925 Injuries and Damages
- 926 Employee Pensions and Benefits
- 927 Franchise Requirements
- 928 Regulatory Commission Expenses
- 929 Duplicate Charges—Credit
- 930.1 General Advertising Expenses
- 930.2 Miscellaneous General Expenses
- 931 Rents

(Maintenance)

- 935 Maintenance of General Plant

ADMINISTRATIVE AND GENERAL

(Operation)

920 Administrative and General Salaries

A. This account shall include the compensation (salaries, bonuses, and other consideration for services, but not including directors' fees) of officers, executives, and other employees of the utility properly chargeable to utility operations and not chargeable directly to a particular operating function.

B. This account may be subdivided in accordance with a classification appropriate to the departmental or other functional organization of the utility.

921 Office Supplies and Expenses

A. This account shall include office supplies and expenses incurred in connection with the general administration of the utility's operations which are assignable to specific administrative or general departments and are not specifically provided for in other accounts. This includes the expenses of the various administrative and general departments, the salaries and wages of which are includible in Account 920.

B. This account may be subdivided in accordance with a classification appropriate to the departmental or other functional organization of the utility.

NOTE: Office expenses which are clearly applicable to any category of operating expenses other than the administrative and general category shall be included in the appropriate account in such category. Further, general expenses which apply to the utility as a whole rather than to a particular administrative function, shall be included in Account 930.2, Miscellaneous General Expenses.

Items

1. Automobile service, including charges through clearing account.
2. Bank messenger and service charges.
3. Books, periodicals, bulletins, and subscriptions to newspapers, newsletters, and tax services.
4. Building service expenses for customer accounts, sales, and administrative and general purposes.
5. Communication service expenses.
6. Cost of individual items of office equipment used by general departments which are of small value or short life.
7. Membership fees and dues in trade, technical, and professional associations paid by a utility for employees. (Company memberships are includible in Account 930.2.)
8. Office supplies and expenses.
9. Payment of court costs, witness fees, and other expenses of legal department.
10. Postage, printing, and stationery.
11. Meals, traveling, and incidental expenses.

922 Administrative Expenses Transferred—Credit

This account shall be credited with administrative expenses recorded in Account 920 and Account 921 which are transferred to construction costs or to nonutility accounts. (See § 1767.16 (d).)

923 Outside Services Employed

A. This account shall include the fees and expenses of professional consultants and others for general services which are not applicable to a particular operating function or other accounts. It shall include also the pay

Rural Utilities Service, USDA

§ 1767.31

and expenses of persons engaged for a special or temporary administrative or general purpose in circumstances where the person so engaged is not considered as an employee of the utility.

B. This account shall be so maintained as to permit ready summarization according to the nature of service and the person furnishing the same.

Items

1. Fees, pay, and expenses of accountants and auditors, actuaries, appraisers, attorneys, engineering consultants, management consultants, negotiators, public relations counsel, and tax consultants.

2. Supervision fees and expenses paid under contracts for general management services.

NOTE: Do not include inspection and brokerage fees and commissions chargeable to other accounts or fees and expenses in connection with security issues which are includible in the expenses of issuing securities.

924 Property Insurance

A. This account shall include the cost of insurance or reserve accruals to protect the utility against losses and damages to owned or leased property used in its utility operations. It shall also include the cost of labor and related supplies and expenses incurred in property insurance activities.

B. Recoveries from insurance companies or others for property damages shall be credited to the account charged with the cost of the damage. If the damaged property has been retired, the credit shall be to the appropriate account for accumulated provision for depreciation.

C. Records shall be kept so as to show the amount of coverage for each class of insurance carried, the property covered, and the applicable premiums. Any dividends distributed by mutual insurance companies shall be credited to the accounts to which the insurance premiums were charged.

Items

1. Premiums payable to insurance companies for fire, storm, burglary, boiler explosion, lightning, fidelity, riot, and similar insurance.

2. Amounts credited to Account 228.1, Accumulated Provision for Property Insurance, for similar protection.

3. Special costs incurred in procuring insurance.

4. Insurance inspection service.

5. Insurance counsel, brokerage fees, and expenses.

NOTE A: The cost of insurance or reserve accruals capitalized, shall be charged to construction either directly or by transfer to construction work orders from this account.

NOTE B: The cost of insurance or reserve accruals for the following classes of property shall be charged as indicated.

1. Materials, supplies, and stores equipment to Account 163, Stores Expense Undistributed, or appropriate materials account.

2. Transportation and other general equipment to appropriate clearing accounts that may be maintained.

3. Electric plant leased to others to Account 413, Expenses of Electric Plant Leased to Others.

4. Nonutility property to the appropriate nonutility income account.

5. Merchandise and jobbing property to Account 416, Costs and Expenses of Merchandising, Jobbing and Contract Work.

NOTE C: The cost of labor and related supplies and expenses of administrative and general employees who are only incidentally engaged in property insurance work may be included in Account 920 and Account 921, as appropriate.

925 Injuries and Damages

A. This account shall include the cost of insurance or reserve accruals to protect the utility against injuries and damages claims of employees or others, losses of such character not covered by insurance, and expenses incurred in settlement of injuries and damages claims. It shall also include the cost of labor, related supplies, and expenses incurred in injuries and damages activities.

B. Reimbursements from insurance companies or others for expenses charged hereto on account of injuries, damages, and insurance dividends or refunds shall be credited to this account.

Items

1. Premiums payable to insurance companies for protection against claims from injuries and damages by

§ 1767.31

7 CFR Ch. XVII (1–1–97 Edition)

employees or others, such as public liability, property damages, casualty, employee liability, etc., and amounts credited to Account 228.2, Accumulated Provision for Injuries and Damage, for similar protection.

2. Losses not covered by insurance or reserve accruals on account of injuries or deaths to employees or others and damages to the property of others.

3. Fees and expenses of claim investigators.

4. Payment of awards to claimants for court costs and attorneys' services.

5. Medical and hospital service and expenses for employees as the result of occupational injuries or resulting from claims of others.

6. Compensation payments under workmen's compensation laws.

7. Compensation paid while incapacitated as the result of occupational injuries. (See Note A.)

8. Cost of safety, accident prevention, and similar educational activities.

NOTE A: Payments to or in behalf of employees for accident or death benefits, hospital expenses, medical expenses, or for salaries while incapacitated for service or on leave of absence beyond periods normally allowed, when not the result of occupational injuries, shall be charged to Account 926, Employee Pensions and Benefits. (See also Note B of Account 926.)

NOTE B: The cost of injuries and damages or reserve accruals capitalized shall be charged to construction directly or by transfer to construction work orders from this account.

NOTE C: Exclude herefrom the time and expenses of employees (except those engaged in injuries and damages activities) spent in attendance at safety and accident prevention educational meetings, if occurring during the regular work period.

NOTE D: The cost of labor and related supplies and expenses of administrative and general employees who are only incidentally engaged in injuries and damages activities, may be included in Account 920 and Account 921, as appropriate.

926 Employee Pensions and Benefits

A. This account shall include pensions paid to or on behalf of retired employees or accruals to provide for pensions or payments for the purchase of annuities for this purpose, when the utility has definitely, by contract, committed itself to a pension plan under which the pension funds are ir-

revocably devoted to pension purposes and payments for employee accident, sickness, hospital, and death benefits, or insurance therefor. Include, also, expenses incurred in medical, educational, or recreational activities for the benefit of employees and administrative expenses in connection with employee pensions and benefits.

B. The utility shall maintain a complete record of accruals or payments for pensions and be prepared to furnish full information to RUS of the plan under which it has created or proposes to create a pension fund and a copy of the declaration of trust or resolution under which the pension plan is established.

C. There shall be credited to this account the portion of pensions and benefits expenses which is applicable to nonutility operations or which is charged to construction unless such amounts are distributed directly to the accounts involved and are not included herein in the first instance.

D. Records in support of this account shall be so kept that the total pensions expense, the total benefits expense, the administrative expenses included herein, and the amounts of pensions and benefits expenses transferred to construction or other accounts will be readily available.

Items

1. Payment of pensions under a non-accrual or nonfunded basis.

2. Accruals for or payments to pension funds or to insurance companies for pension purposes.

3. Group and life insurance premiums (credit dividends received).

4. Payments for medical and hospital services and expenses of employees when not the result of occupational injuries.

5. Payments for accident, sickness, hospital, and death benefits or insurance.

6. Payments to employees incapacitated for service or on leave of absence beyond periods normally allowed when not the result of occupational injuries or in excess of statutory awards.

7. Expenses in connection with educational and recreational activities for the benefit of employees.

Rural Utilities Service, USDA

§ 1767.31

NOTE A: The cost of labor and related supplies and expenses of administrative and general employees who are only incidentally engaged in employee pension and benefit activities may be included in Account 920 and Account 921, as appropriate.

NOTE B: Salaries paid to employees during periods of nonoccupational sickness may be charged to the appropriate labor account rather than to employee benefits.

927 Franchise Requirements

A. This account shall include payments to municipal or other governmental authorities and the cost of materials, supplies, and services furnished such authorities without reimbursement in compliance with franchise, ordinance, or similar requirements; provided, however, that the utility may charge to this account at regular tariff rates, instead of cost, utility service furnished without charge under provisions of franchises.

B. When no direct outlay is involved, concurrent credit for such charges shall be made to Account 929, Duplicate Charges—Credit.

C. The account shall be maintained so as to readily reflect the amounts of cash outlays, utility service supplied without charge, and other items furnished without charge.

NOTE A: Franchise taxes shall not be charged to this account, but to Account 408.1, Taxes Other Than Income Taxes, Utility Operating Income.

NOTE B: Any amount paid as initial consideration for a franchise running for more than one year shall be charged to Account 302, Franchises and Consents.

928 Regulatory Commission Expenses

A. This account shall include all expense (except pay of regular employees only incidentally engaged in such work) properly includible in utility operating expenses, incurred by the utility in connection with formal cases before regulatory commissions or other regulatory bodies or cases in which such a body is a party, including payments made to a regulatory commission for fees assessed against the utility for pay and expenses of such commission, its officers, agents, and employees, and also including payments made to the United States for the administration of the Federal Power Act.

B. Amounts of regulatory commission expenses which, by approval or direction of RUS, are to be spread over future periods shall be charged to Account 182.3, Other Regulatory Assets, and amortized by charges to this account.

C. The utility shall be prepared to show the cost of each formal case.

Items

1. Salaries, fees, retainers, and expenses of counsel, solicitors, attorneys, accountants, engineers, clerks, attendants, witnesses, and others engaged in the prosecution of or defence against petitions or complaints presented to regulatory bodies or in the valuation of property owned or used by the utility in connection with such cases.

2. Office supplies and expenses, payments to public service or other regulatory commissions, stationery and printing, traveling expenses, and other expenses incurred directly in connection with formal cases before regulatory commissions.

NOTE A: Exclude from this account and include in other appropriate operating expense accounts, expenses incurred in the improvement of service, additional inspection, or rendering reports which are made necessary by the rules and regulations, or orders, of regulatory bodies.

NOTE B: Do not include in this account amounts includible in Account 302, Franchises and Consents; Account 181, Unamortized Debt Expense; or Account 214, Capital Stock Expense.

929 Duplicate Charges—Credit

This account shall include concurrent credits for charges which may be made to operating expenses or to other accounts for the use of utility service from its own supply. Include, also, offsetting credits for any other charges made to operating expenses for which there is no direct money outlay.

930.1 General Advertising Expenses

This account shall include the cost of labor, materials used, and expenses incurred in advertising and related activities, the cost of which by their content and purpose are not provided for elsewhere.

§ 1767.31

Items

Labor:

1. Supervision.
2. Preparing advertising material for newspapers, periodicals, and billboards and preparing or conducting motion pictures, radio, and television programs.
3. Preparing booklets and bulletins used in direct mail advertising.
4. Preparing window and other displays.
5. Clerical and stenographic work.
6. Investigating and employing advertising agencies, selecting media, and conducting negotiations in connection with the placement and subject matter of advertising.

Materials and Expenses:

1. Advertising in newspapers, periodicals, billboards, and radios.
2. Advertising matter such as posters, bulletins, booklets, and related items.
3. Fees and expenses of advertising agencies and commercial artists.
4. Postage and direct mail advertising.
5. Printing of booklets, dodgers, and bulletins.
6. Supplies and expenses in preparing advertising materials.
7. Office supplies and expenses.

NOTE A: Properly includible in this account is the cost of advertising activities on a local or national basis of a goodwill or institutional nature, which is primarily designed to improve the image of the utility or the industry, including advertisements which inform the public concerning matters affecting the company's operations, such as, the cost of providing service, the company's efforts to improve the quality of service, and the company's efforts to improve and protect the environment. Entries relating to advertising included in this account shall contain or refer to supporting documents which identify the specific advertising message. If references are used, copies of the advertising message shall be readily available.

NOTE B: Exclude from this account and include in Account 426.4, Expenditures for Certain Civic, Political and Related Activities, expenses for advertising activities, which are designed to solicit public support or the support of public officials in matters of a political nature.

7 CFR Ch. XVII (1-1-97 Edition)

930.2 Miscellaneous General Expenses

This account shall include the cost of labor and expenses incurred in connection with the general management of the utility not provided for elsewhere.

Items

Labor:

1. Miscellaneous labor not elsewhere provided for.

Expenses:

1. Industry association dues for company memberships.
2. Contributions for conventions and meetings of the industry.
3. Research, development, and demonstration expenses not charged to other operation and maintenance expense accounts on a functional basis.
4. Communication service not chargeable to other accounts.
5. Trustee, registrar, and transfer agent fees and expenses.
6. Stockholders meeting expenses.
7. Dividend and other financial notices.
8. Printing and mailing dividend checks.
9. Directors' fees and expenses.
10. Publishing and distributing annual reports to stockholders.
11. Public notices of financial, operating, and other data required by regulatory statutes, not including, however, notices required in connection with security issues or acquisitions of property.

931 Rents

This account shall include rents properly includible in utility operating expenses for the property of others used, occupied, or operated in connection with the customer accounts, customer service and informational, sales, general, and administrative functions of the utility. (See § 1767.17 (c).)

(Maintenance)

935 Maintenance of General Plant

A. This account shall include the cost assignable to customer accounts, sales, administrative, and general functions of labor, materials used, and expenses incurred in the maintenance of

Rural Utilities Service, USDA**§ 1767.41**

property, the book cost of which is includible in Account 390, Structures and Improvements; Account 391, Office Furniture and Equipment; Account 397, Communication Equipment; and Account 398, Miscellaneous Equipment. (See § 1767.17 (b).)

B. Maintenance expenses on office furniture and equipment used elsewhere than in general, commercial, and sales offices shall be charged to the following accounts:

1. Steam Power Generation, Account 514
2. Nuclear Power Generation, Account 532
3. Hydraulic Power Generation, Account 545
4. Other Power Generation, Account 554
5. Transmission, Account 573
6. Distribution, Account 598
7. Merchandise and Jobbing, Account 416
8. Garages, Shops, etc., Appropriate clearing account, if used.

NOTE: Maintenance of plant included in other general equipment accounts shall be included herein unless charged to clearing accounts or to the particular functional maintenance expense account indicated by the use of the equipment.

§§ 1767.32—1767.40 [Reserved]**§ 1767.41 Accounting methods and procedures required of all RUS borrowers.**

All RUS borrowers shall maintain and keep their books of accounts and all other books and records which support the entries in such books of accounts in accordance with the accounting principles prescribed in this section.

Relocations of Lines	135	When a minor item of property is re- moved from service and not replaced, a retirement work order is not required except in the case of a conductor. The cost of the minor item shall remain in the appropriate plant account until the retirement unit, of which it is a part, is retired. However, as conductor is re- corded in feet and is not part of any specific retirement unit, conductor shall be retired even though the amount taken down and not replaced is less than a retirement unit (two spans).	
Replacement of a Neutral	103	When minor items of plant are re- moved and not replaced, material salvaged shall be recorded on a mate- rial salvage ticket. Items of material recorded on this ticket shall be charged to the materials and supplies account and credited in the miscellaneous col- umns of the Materials Register to the Accumulated Provision for Deprecia- tion. In this example, it is assumed that the cost of removal is nil. If, how- ever, costs are incurred during the re- moval of minor items of plant, these costs shall reduce the credit to the Ac- cumulated Provision for Depreciation.	
Retirement Units	125	When a staking sheet supporting a single work order reflects a combina- tion of new construction and replace- ments, or system improvements, the predominant cost shall be the govern- ing factor in determining the amount of cost RUS will finance. To illustrate, assume that a service is to be run to a new home near the end of an existing line. On inspection, the pole from which the service is to be run is found to be in very poor physical condition and must be replaced. In addition, a single span of wire and a service are presently connected to this pole which serve no purpose. The home originally

served has been demolished and the existing span, pole, and service were retired. In other words, what started out to be simply the installation of a new service now includes the retirement of a span of wire, a pole, and a service; the replacement of a pole; and the running of a new service. Assuming the replacement of the pole is the costliest part of this project, the construction and retirement activity shall be classified as an ordinary replacement even though the work includes new construction and retirements without replacement.

102 Line Conversion

If it is necessary to move a conductor from one location to another on a pole assembly during the conversion of a line from one phase to another phase, the cost of moving the conductor is capitalizable as a system improvement.

103 Sacrificial Anodes and the Replacement of a Neutral

Many utilities conduct studies to determine whether sacrificial anodes are needed to protect underground cable against corrosion. The following procedures shall be followed to account for sacrificial anodes and the replacement of a neutral:

1. If the study results in the installation of sacrificial anodes, the cost of the study shall be capitalized to Account 367, Underground Conductors and Devices. If the study does not result in the installation of anodes, the cost shall be charged to Account 594, Maintenance of Underground Lines.

2. Costs incurred in the first installation are capitalizable even though anodes are considered minor items of property. However, only the first costs of installation shall be capitalized. All subsequent replacements of anodes shall be expensed.

3. Sacrificial anodes do not constitute a record unit; therefore, the cost of anodes shall be added to the cost of the underground cable unit.

4. Because a neutral is part of an underground cable record unit, and is not, in and of itself, a record unit, the cost to replace a corroded neutral shall be charged to Account 594, Maintenance of Underground Lines.

104 Terminal Facilities

Borrowers are sometimes required to construct terminal facilities in the transmission line of another utility in order to receive power from their power supplier. The document executed between the borrower and the utility is normally referred to as a "License Agreement". The license agreement may stipulate that certain items of the terminal facilities are to be transferred to, and become the property of, the other utility upon completion of the construction. The accounting for this type of transaction shall be as follows:

1. All construction costs incurred shall be charged to a work order. Upon completion of the construction and accumulation of all costs, the cost of the facilities that become the property of another utility shall be transferred from construction work-in-progress to Account 186, Miscellaneous Deferred Debits. The cost of the plant for which the borrower retains title shall be charged to the appropriate plant accounts.

2. The cost of the facilities recorded in Account 186, Miscellaneous Deferred Debits, shall be amortized to Account 557, Other Expenses, over the estimated useful service life of the plant. If the related contract or contracts for this power supply are terminated, the unamortized balance shall be expensed, in the current period, in Account 557.

105 Pole Top Disconnect Switch

The installation of pole top service disconnect switches, where title is retained by the utility, shall be capitalized in Account 371, Installations on Customers' Premises. If a switch cabinet is purchased with a current transformer included as an integral part of the cabinet, the entire cost of the switch shall be charged to Account 371. If the current transformer is installed outside of the switch cabinet, the transformer, meter, and meter base, together with the first installation costs, shall be capitalized, upon purchase, in Account 370, Meters.

Payments received from the customer toward construction costs shall be credited to Account 371, Installations on Customers' Premises. Such payments, together with any amount

§ 1767.41

not financed by RUS, shall be entered in column 9 of the RUS Form 219, Inventory of Work Orders. The associated maintenance costs shall be charged to Account 587, Customer Installations Expenses, or to Account 597, Maintenance of Meters, as appropriate.

When pole top disconnect switches are installed and title is held by the customer, the cost of the material shall be charged to Account 456, Other Electric Revenues and the receipts from the sale of line material shall be credited to Account 456. The portion of the receipts for resale material as well as that for installation shall be credited to Account 415, Revenues from Merchandising, Jobbing, and Contract Work. The cost of resale material sold and the cost of installation shall be charged to Account 416, Costs and Expenses of Merchandising, Jobbing and Contract Work.

Future maintenance costs incurred by the cooperative that are not billed to the customer shall be charged to Account 587, Customer Installations Expenses.

106 Steel Pole Reinforcers

The cost associated with the purchase and installation of steel pole reinforcers shall be charged to Account 593, Maintenance of Overhead Lines.

107 Mobile Substations

Mobile substations shall be accounted for in a manner similar to that for a spare and are, therefore, included as part of transmission or distribution station equipment, depending upon the use of the mobile substation. The mobile substation, together with the trailer on which it is permanently mounted, shall be capitalized upon purchase. A general purpose truck or tractor used to relocate a mobile substation and trailer shall be classified as transportation equipment.

The composite depreciation rate used for transmission plant or distribution plant, as appropriate, shall be applied to the mobile substation.

108 Security Lights

Where a pole supports both a secondary wire and a security light, the cost of the pole shall be charged to Account

7 CFR Ch. XVII (1-1-97 Edition)

364, Poles, Towers, and Fixtures, even though the plant investment in security lights is recorded in Account 371, Installations on Customers' Premises.

109 Joint Use

There are many cases in which an electric utility and a communications utility enter into an agreement that provides for joint use of poles. Under the terms of these agreements, either utility may occupy the poles of the other upon payment of a stipulated annual rental. If such joint occupancy necessitates the use of a higher than standard pole, the new pole shall be provided at the expense of the utility having the need for the higher pole.

When an electric utility replaces, at its own expense, a standard pole belonging to the communications utility with a higher pole, the cost of the higher pole, less net salvage (if any) of the pole replaced, shall be charged to the account in which the pole rental is included.

Contributions made to an electric utility by a communications utility for the costs incurred in stubbing joint use electric poles shall be credited to Account 593, Maintenance of Overhead Lines. The cost of pole stubbing on electric plant distribution facilities shall be charged to Account 593.

An investment in outside plant that is held in joint ownership shall be recorded in the appropriate plant accounts at its cost to the utility. For continuing property record purposes, jointly owned property units shall be priced at their cost to the utility and shall be appropriately segregated in the CPRs to indicate joint ownership.

110 First Clearing and Grading of Land and Rights of Way

Utility accounting practice requires the costs associated with the first clearing and grading of land and rights of way and any resulting damage thereto, to be included in the accounts for structures and improvements or equipment to which such costs relate. Since the first clearing, as well as clearing which is "directly occasioned by the building of a structure," is done, not for the purpose of enhancing the value of the land or the rights of way, but for the purpose of constructing plant,

Rural Utilities Service, USDA

§ 1767.41

these costs are more directly related to the construction of plant than to the purchase of land or rights of way. The accounts shall be charged as follows:

1. For overhead transmission pole lines, Account 356, Overhead Conductors and Devices;
2. For overhead distribution lines, Account 365, Overhead Conductors and Devices; and
3. For underground distribution lines, Account 366, Underground Conduit, for a conduit installation; or Account 367, Underground Conductors and Devices, for a direct burial installation.

111 Engineering Contracts for System Planning

Engineering costs for long-range system plans shall be charged to Account 183, Preliminary Survey and Investigation Charges, as incurred. The cost of engineering services incurred in preparing a long-range system plan represents a legitimate component of the total cost of construction of all system improvements detailed in the plan. The amount of engineering costs to be associated with any specific system improvement is the annual costs incurred up to the time of the allocation (not previously allocated), plus that portion of the initial cost which relates to the particular construction in question. If any major system improvement included in the engineering plan is not constructed, or if the study is superseded by another complete study, the cost of that portion of the original study not resulting in construction shall be charged to Account 182.2, Unrecovered Plant and Regulatory Study Costs, if the costs are to be recovered through future rates. Costs recorded in Account 182.2 shall be amortized to Account 407, Amortization of Property Losses, Unrecovered Plant and Regulatory Study Costs, as the costs are recovered through the rates. Any costs included in Account 182.2 that are disallowed for rate-making purposes shall be charged to Account 426.5, Other Deductions.

The allocation of engineering services to the various construction projects requires the exercise of judgment. In some cases, system improvements are continuous over a period of months or years, thus permitting the

engineering cost to be spread monthly as overhead in relation to the direct costs incurred in construction. (If a substantial amount of retirement work is performed in connection with system improvements, a proportionate share of the engineering cost shall be allocated on the basis of direct retirement labor.) If the system improvements detailed in the plan are not performed in a continuous manner, the engineering cost shall be allocated on the basis of the estimated costs of the various larger system improvement projects which result from the long-range plan.

If construction is performed by contract, the engineering cost applicable thereto shall be transferred from Account 183 to Account 107, Construction Work-in-Progress—Electric, and thereby spread to the appropriate plant accounts on the basis of contract costs.

In the case of system improvement construction performed on the basis of work orders, engineering costs shall be transferred to Account 107, Construction Work-in-Progress—Electric, and included in total work order costs as either overhead or special services. If engineering services are not readily identifiable with individual work orders, they shall be capitalized as overhead. If engineering costs for each work order are readily separable from the engineering costs for all other work orders, they shall be capitalized as special services.

In summarizing system improvement work orders on the RUS Form 219, Inventory of Work Orders, the amount of engineering costs previously approved for advance on the long range plan, if any, shall be deducted to determine the balance of loan funds subject to advance by RUS.

112 Determination of Availability of Service

Costs relating to the determination of availability of service, rates, and similar items for individual applicants shall be charged to Account 912, Demonstrating and Selling Expenses. If it is expected that construction will result, the costs incurred to provide service, including staking, shall be charged to Account 107, Construction Work-in-Progress—Electric. If construction does not result, Account 107 shall be

§ 1767.41

credited and Account 426.5, Other Deductions, shall be charged.

113 Temporary Facilities (Services)

Plant installed for temporary use, a period of less than 1 year, shall be recorded in Account 185, Temporary Facilities, net of any payments received from customers. Upon retirement, this net cost plus cost of removal, less any salvage value, shall be cleared to Account 451, Miscellaneous Service Revenues.

When a temporary service is installed at the site of a building under construction, the location of the permanent service entrance and the load and its characteristics are usually known. The temporary service is of the proper capacity and is so located or has sufficient slack, that it can be relocated to serve the new building as a permanent service. Under these conditions, the service shall be charged to Account 369, Services, when first installed. The cost of moving and attaching the service to the permanent service entrance shall be charged to Account 593, Maintenance of Overhead Lines or Account 594, Maintenance of Underground Lines, as appropriate.

114 Construction Work-in-Progress Damaged or Destroyed by Storm

When installed plant, not yet completed or completed but not yet placed in service, has been damaged or destroyed by storm, the cost of the repair and restoration shall be added to the cost of construction and capitalized if the plant was constructed under force account or work order construction, and the utility paid for the cost of the repairs. If the plant was constructed under contract, the contractor is required to deliver the plant in new condition. Therefore, any repairs required prior to the completion of construction and acceptance by the utility, are ordinarily borne by the contractor.

115 Liquidated Damages

Liquidated damages are amounts paid by or assessed against contractors for the completion of construction after an agreed upon date. Liquidated damages shall be credited to Account 107, Construction Work-in-Progress—

7 CFR Ch. XVII (1–1–97 Edition)

Electric. Since these damages accrue during the construction period, they become one of the components of construction cost. Even though a portion of these damages may compensate the utility for costs which are not “identifiable,” no portion of the damages shall be credited to revenue or expense.

When a contractor has been paid in full from loan funds or from funds to be reimbursed by loan funds without a deduction for liquidated damages, the amount of liquidated damages received shall be deposited in the Construction Fund. This amount shall be reflected by a decrease in column 5, “Total Expenditures to Date,” of the RUS Form 595, Financial Requirement and Expenditure Statement, and as an increase in column 6, “Cash Balance.” If liquidated damages are obtained by withholding an equivalent amount from the contractor’s payment, the net result will be the same.

116 Nonrefundable Payments for Construction

Nonrefundable payments (contributions) from customers and developers for underground construction shall first be credited to Account 107.2, Construction Work-in-Progress—Force Account. When the constructed plant is unitized and distributed to the individual plant accounts, the contributions shall be credited to those plant accounts which gave rise to the contribution.

When a customer or developer furnishes a trench or other service in connection with buried plant, the cooperative shall debit Account 107.2 with the actual or estimated cost of the service performed, and account for the credit as set forth above.

117 Refunds of Overpayments for Materials and Equipment

Refunds of overpayments for materials and equipment previously purchased are occasionally received as the result of legal action brought against electrical suppliers for price fixing in violation of antitrust laws. Such refunds shall be accounted for as follows:

1. The refund shall first be applied to any litigation costs that were incurred.

2. Refunds for special equipment items shall be accounted for, in detail, on the Summary of Special Equipment Costs and credited against the appropriate plant accounts.

3. Other material or equipment items that were installed through work orders or a materials furnished contract shall be adjusted on an amended work order. The amended work order shall include full details of the refund.

4. Continuing property records shall be adjusted to reflect the above transactions.

5. Amounts approved for advance on the RUS Form 595, Financial Requirement and Expenditure Statement, and on the loan budget records, shall be adjusted. For special equipment items, the adjustment shall be requested in a letter to RUS. For materials installed by work order or contract, the adjustments shall be made through credits shown on the RUS Form 219, Inventory of Work Orders.

6. Refunds for material currently in stock shall be credited to Account 154, Plant Materials and Operating Supplies.

7. If the material was used in maintenance activities or operations, the refund shall be credited to the appropriate maintenance or operations expense account.

8. Refunds for materials or equipment financed from loan funds shall be deposited in the Construction Fund—Trustee Account or remitted to RUS as a special payment on a note. Other refunds shall be deposited in the general funds.

118 Load Control Equipment

The primary purpose of a Load Management System is to optimize load dispatch and to reduce or minimize system peaks in order to reduce purchases of power or to delay or eliminate the need for construction of new plant. A Load Management System may be used on integrated systems, or on generation, transmission, or distribution systems separately. The telemetry equipment used for data acquisition and interpretation may be included at various points on a system, such as generation, transmission, or distribution substation, switchyards or on consumers' premises.

An effective load control program should be coordinated with the G&T and requires full participation of all member distribution systems. The G&T monitors the power load of the total member distribution system to predict the time of the system's peak load. An optimal load control strategy is developed by the G&T and is passed on from the G&T computer system to the load control computer systems of the member distribution cooperatives.

The equipment at the member distribution system level is the type actually being used by an integrated power system to operate a load control program. The equipment used may vary from one integrated power system to another. The selection of equipment used is determined by the information needs of the integrated power system, and the method selected to operate the load control system.

Some equipment performs only SCADA-type functions. This equipment is included with the equipment that performs only load control functions because SCADA-type equipment is an integral part of a load control program. An effective load control strategy requires current information on loads so that member distribution systems can determine the actual loads to be shed and the duration of the load control.

The function and location of the load control equipment are the primary factors in determining the account in which the equipment shall be recorded. The following example depicts a common load control system and the associated accounting. Equipment type may vary, thereby necessitating the use of accounts not prescribed below. In all instances, however, the function and location of the equipment shall dictate the appropriate account classification.

G&T Borrower

1. Coordinating System Equipment

Coordinating System Equipment is the data acquisition, processing and control hardware and software used to coordinate the load control efforts of the member distribution system. Generally, this equipment is dedicated to load control use and is not shared with other electric utility activities.

§ 1767.41

The purpose of the G&T load control computer system is to reduce or minimize the peak power requirements of the entire member distribution system. This involves load dispatching to control transmission circuits and breakers. The computer system for load control shall, therefore, be recorded in Account 353, Station Equipment, with the associated operating expenses recorded in Account 561, Load Dispatching, and maintenance expenses recorded in Account 570, Maintenance of Station Equipment.

2. Coordinating System Communications Link

The G&T load control computer system is usually linked to the load control computer system for each member distribution system by a radio or telephone link that is dedicated to that purpose and is not shared with other communication activities. Under such circumstances, communications equipment shall be classified in Account 353, Station Equipment. If the communications equipment is shared with general use or voice communications equipment, however, the equipment shall be classified in Account 397, Communication Equipment.

3. Depreciation

Load control equipment shall be recorded in separate subaccounts of the primary plant accounts detailed above and shall be depreciated based upon the owner's estimate of the equipment's useful service life.

Distribution Borrower

1. Member System Equipment

Member system equipment is the data acquisition, processing and control hardware and software used as a subset to the overall load control efforts by the integrated power system.

The member system computer for each distribution member system accepts the control strategy from the G&T coordinating system and develops the tables that determine the control loads that are to be shed and the duration of the load control. The member system computer for each distribution system monitors the usage at each of its delivery points. This usage data is then transmitted to the G&T coordinating system for use in developing

7 CFR Ch. XVII (1-1-97 Edition)

load projects and evaluating control strategies for the integrated power system. The member system computer is generally dedicated to load control use and is not shared with other electric utility operations.

The member computer system shall be recorded in Account 362, Station Equipment. The associated operating expenses shall be recorded in Account 581, Load Dispatching, and maintenance expenses shall be recorded in Account 592, Maintenance of Station Equipment.

2. Substation Remote Controllers

Substation Remote Controllers are located at the distribution substation. They accept control signals from the member system computer and couple the signal to the portion of the distribution system to which it is connected. Substation Remote Controllers also serve as a receiver of inbound signals from transponders located in the distribution system. They also send data back to the member system computer.

Substation Remote Controllers shall be recorded in Account 362, Station Equipment. The associated operating expenses shall be recorded in Account 582, Station Expenses, and maintenance expenses shall be recorded in Account 592, Maintenance of Station Equipment.

3. Substation Injection Units

Substation Injection Units are used only in power line based systems and are located in distribution substations. A major function of the Substation Injection Unit is to receive load control signals from the member system computer and inject them into the power line based system to be transmitted to the Load Control Receivers. Substation Injection Units can also perform control and SCADA functions similar to those performed by Substation Remote Controllers.

Substation Injection Units shall be recorded in Account 362, Station Equipment. The associated operating expenses shall be recorded in Account 582, Station Expenses, and maintenance expenses shall be recorded in Account 592, Maintenance of Station Equipment.

4. Remote Terminal Units

Rural Utilities Service, USDA

§ 1767.41

Remote Terminal Units perform electric utility SCADA functions in a distribution substation or delivery point. These functions include monitoring equipment for abnormal operating conditions, monitoring analog quantities such as conductor voltage or substation load, and controlling of certain equipment within the substation.

Remote Terminal Units shall be recorded in Account 362, Station Equipment. The associated operating expenses shall be recorded in Account 582, Station Expenses, and maintenance expenses shall be recorded in Account 592, Maintenance of Station Equipment.

5. Line Device Transponder

A Line Device Transponder directly controls a piece of distribution apparatus, such as a voltage regulator or a power factor correction capacitor, located on a distribution feeder and not accessible to a Remote Terminal Unit. The Line Device Transponder actuates the control functions and reports back to the member system computer upon completion of the requested action. This transponder is located at the site of the distribution apparatus being controlled.

Line Device Transponders shall be recorded in Account 368, Line Transformers. The associated operating expense shall be recorded in Account 583, Overhead Line Expenses, or Account 584, Underground Line Expenses, as appropriate, and maintenance expenses shall be recorded in Account 595, Maintenance of Line Transformers.

6. Communications Verification Transponders

Communication Verification Transponders are used to respond to inquiries from Substation Remote Controllers. In power line based systems, these transponders are used to verify the performance of the communications system. They are also used during adverse system operations to isolate sections of the distribution system that are experiencing an outage.

Communication Verification Transponders shall be recorded in Account 362, Station Equipment. The associated operating expenses shall be recorded in Account 582, Station Expenses, and maintenance expenses shall be re-

corded in Account 592, Maintenance of Station Equipment.

7. Load Control Receivers

The Load Control Receiver, also known as a load control switch, is located at the site of the consumer's load. These receivers directly control the electric supply to an end-use appliance, such as an electric water heater, central air conditioning compressor, or irrigation pump. The amount of time that an appliance will be turned off by the load control receiver is preset. When the member system computer determines that load shedding is necessary, it sends a signal to the communication link which then sends signals directly to the Load Control Receivers. In a power line based system, the signal from the communications link is sent by radio or telephone line to the Substation Injection Units, which then signals the Load Control Receivers to shut down the appliances for the present time. In nonpower line based systems, the signal from the communications link is sent by radio directly to the Load Control Receivers.

Load Control Receivers are located on the consumer's side of the meter. When the member distribution system retains title to the Load Control Receivers and assumes full responsibility for maintenance and replacement of the equipment, it shall be classified in Account 371, Installations on Customer's Premises. Load Control Receivers that are donated or given to consumers shall be charged to Account 908, Customer Assistance Expenses.

Operating and maintenance expenses applicable to Load Control Receivers recorded in Account 371 shall be charged to Account 587, Customer Installations Expenses, and Account 598, Maintenance of Miscellaneous Distribution Plant, respectively. Expenses applicable to Load Control Receivers donated or given to consumers shall be recorded in Account 908, Customer Assistance Expenses.

Load Control Receivers may be moved on a continual basis from one customer location to another and are, therefore, considered to be special equipment items. When ownership is maintained by the member distribution cooperative, Load Control Receivers shall be accounted for in accordance

§ 1767.41

with the special equipment procedures outlined in Accounting Interpretation No. 119 of this section.

8. Communication Links

The communication link in the member distribution systems between the Member System Computer, the Substation Remote Controllers or Substation Injection Units, Remote Terminal Units, Line Device Transponders, Communication Verification Transponders, and Load Control Receivers is usually accomplished by radio, telephone line, or power line based system. The communication links are normally dedicated to the SCADA and load control functions being served. Under such circumstances, communications equipment shall be recorded in Account 362, Station Equipment. If, however, the communication equipment used is shared with general use or voice communications equipment, the equipment shall be charged to Account 397, Communication Equipment.

9. Depreciation

Load control equipment shall be recorded in separate subaccounts of the primary plant accounts detailed above and shall be depreciated based upon the manufacturer's estimate of the equipment's useful service life.

119 Special Equipment

Special Equipment items are classified as such because they are continually being moved from one location to another due to load changes and maintenance practices. The USOA provides accounting that differs from that used for other types of materials. The cost, new, of special equipment items shall be capitalized at the time of purchase; it shall not be charged to Account 154 as is the case with other materials. The first installation cost, as well as all incidental costs necessary to prepare the equipment for use, shall be capitalized with the material upon purchase. All subsequent costs of removing, resetting, changing, renewing oil, and repairing constitute operations and maintenance expenses. The capitalized cost of special equipment items, including the first installation, shall be removed from the electric plant accounts only when the items are abandoned or retired from the system.

7 CFR Ch. XVII (1-1-97 Edition)

Meters, line-type transformers, oil circuit reclosers, sectionalizers, current and potential transformers, meter sockets, and other metering equipment listed in Account 370, Meters, as well as pole-type and underground voltage regulators in Account 368, Line Transformers, are considered to be special equipment items. Similarly, load control receivers (load control switches) recorded in Account 371, Installations on Customers' Premises, are considered to be items of special equipment. (See Interpretation No. 118.) Transformers, voltage regulators, metering equipment, and current and potential transformers for substations are not.

Special equipment items which are classified as nonusable shall be segregated in the warehouse and retired from service. The Summary of Special Equipment Costs shall be retitled Summary of Special Equipment Costs Retired and used for this purpose. A journal entry reflecting this information shall be prepared and posted to the books. Since loan funds for special equipment, including first installation costs, are approved for advance by RUS upon receipt of the borrower's written estimate of funds required, and not on the basis of an Inventory of Work Orders, it is improper to take a credit for any salvage involved in the retirement of special equipment on the Inventory of Work Orders.

120 Meter Sockets and Meters

When a utility furnishes meter sockets, ownership by the utility of the meter socket or base, as well as the meter itself, is established by virtue of them being furnished without cost to the consumer by the cooperative. While no agreement as to ownership between the cooperative and the property owner exists, cooperative ownership is implied by long standing practice and tradition in the electric utility industry.

121 Minimum—Maximum Voltmeters

A minimum—maximum voltmeter is used to record the minimum and maximum voltages at a specific line location over a period of time. It is normally installed on a pole in connection with a 1½ kVA transformer, a meter base and connecting wires, and other small items of materials. Meter bases

Rural Utilities Service, USDA

§ 1767.41

are ordinarily set for these voltmeters throughout the system, and a lesser number of voltmeters are rotated among them periodically to obtain voltage readings. An average system may have one voltmeter to two installations, with a maximum of 20 or 25 voltmeters for the whole system.

Minimum—maximum voltmeters shall be recorded, through work orders, in Account 370, Meters, when installed. The cost of the transformers shall remain in Account 368, Line Transformers, with the cost of the meter bases remaining in Account 370, Meters. The miscellaneous material used in installing the transformer and the meter base shall be charged to Account 370, Meters.

Maintenance expense shall be charged to either Account 595, Maintenance of Line Transformers, or Account 597, Maintenance of Meters, as appropriate. Costs associated with reading the voltmeters shall be charged to Account 583, Overhead Line Expenses, and the cost of relocating or changing the complete installation or any part thereof, other than retirement of the meter base, shall be charged to Account 583, Overhead Line Expenses, or Account 586, Meter Expenses.

122 Retrofitting Demand Meters

A demand meter measures the amount of electricity used over a period of time in kilowatt-hours (kWh) and indicates the maximum kilowatts (kW) required at any one time by means of a pointer.

Electronic or solid state demand meters have a direct readout which reads kilowatt demand to two decimal places. The use of a direct readout demand meter may result in increased revenues as pointer readings tend to register lower than actual usages.

The process of retrofitting a demand meter replaces the pointer with a direct readout. The cost of such a replacement is usually expensed as a minor item of property; however, since the use of a direct readout results in a substantial betterment, the excess cost of the replacement over the estimated cost, at current prices, of replacing the pointer without the betterment is capitalized.

123 Transformer Conversions

The conversion of an overhead transformer to an underground transformer constitutes a betterment and shall, therefore, be capitalized.

124 Transclosures

Transclosures are enclosures or cabinets in which line transformers are mounted. The cost of transclosures that are purchased separately from the transformer shall be charged to Account 154, Plant Materials and Operating Supplies, when received, and capitalized, upon installation, to Account 368, Line Transformers, as a separate unit of property. If the case and the transformer are inseparable, the unit is considered a transformer and shall be capitalized upon purchase.

125 Retirement Units

Services

A retirement unit shall consist of a complete service rather than the individual wires comprising that service. If each separate wire of a service were treated as a retirement unit, the retirement unit would represent a comparatively small cost. Such a small unit of property would substantially increase the number of retirement work orders. The complete service shall, therefore, be considered a retirement unit.

Minor Items

When minor items of property are added separately from complete retirement units, the costs of these items shall be included in work orders, and by unitizing all costs of completed construction for a month, these minor items shall be spread to the retirement units of which they normally form a part. For example, to convert a two-phase line to a three-phase line requires the addition of a conductor, an insulator and a pole-top pin. A pole-top pin is typically capitalized as a component of the cost of the pole to which it is attached. Assuming this is the only work order for the month, the cost of this pin shall be charged to the conductor, so that its cost is included in the total cost of the project. In actual practice, however, this does not happen

§ 1767.41

as it is normal to have a number of work orders for a given month, which include the setting of poles. In allocating the cost of all construction projects for the month, part of the cost of pole-top pins shall be allocated to poles even though the work orders on which they were capitalized did not include poles.

The retirement and replacement of isolated single retirement units cannot be charged to maintenance; a retirement and construction work order shall be used.

126 Establishment of Continuing Property Records

The costs of installing a system of continuing property records shall be charged to Account 930.2, Miscellaneous General Expenses, and may include:

1. Labor and expenses incurred in developing an inventory of property;
2. Labor and material costs incurred in connection with developing pole records including map preparation and pole cards; and
3. Labor and material costs (ledger sheets, etc.) incurred in connection with the installation of the record system.

127 Continuing Property Records for Buildings

When establishing continuing property records for a building where there is no detailed breakdown of contract costs, it is necessary to estimate the cost of the each component part. It should be noted that the establishment of continuing property records is not required for buildings; however, if CPRs are not maintained, all repairs including the replacement of major component parts shall be expensed in the period incurred.

128 Sale of Property

All proceeds deposited in the Construction Fund account from the sale of property, regardless of materiality, shall be reflected on the RUS Form 595, Financial Requirement and Expenditure Statement. Proceeds from the sale of property shall be reported on the Form 595, by budget purpose, as a reduction in total expenditures to date,

7 CFR Ch. XVII (1–1–97 Edition)

column 5; and an increase in the cash balance, column 6.

Proceeds from the sale of property shall not be used to maintain an “Employee Fund.” A utility may, pursuant to board policy, use general funds for employee welfare equivalent in amount to proceeds received from the sale of scrap property. If general funds, in an amount equivalent to proceeds received from the sale of scrap property, are used for employee welfare, Account 926, Employee Pensions and Benefits, shall be charged.

129 Gain or Loss on the Sale of an Office Building

A gain on the sale of an office building shall be recorded in Account 421.1, Gain on the Disposition of Property, with a loss recorded in Account 421.2, Loss on the Disposition of Property. If the gain or loss will materially distort current year’s net margins, such gain or loss is reportable as an extraordinary item in Account 434, Extraordinary Income, or Account 435, Extraordinary Deductions.

130 Salvage and Obsolete Material

The value of material salvaged from the retirement of units of property reduces the loss on the retirement and shall be so applied. The value assigned to salvage shall be credited to Account 108.8, Retirement Work-in-Progress, which results in reducing net charges to the provision for depreciation when the work order is completed and cleared.

If salvage is sold, any difference between the realized value and the estimated value of the salvaged material shall be charged or credited to the appropriate provision for depreciation.

Salvage resulting from maintenance where no retirement units are involved shall be debited to the materials and supplies account, and credited to the appropriate maintenance account.

Occasionally a utility will have a loss due to obsolescence of materials on hand. If the loss is due to obsolescence of new material, the loss shall be charged to Account 426.5, Other Deductions. If the loss is due to obsolescence of used material, the loss shall be charged to the appropriate subaccount

Rural Utilities Service, USDA

§ 1767.41

of Account 108, Accumulated Provision for Depreciation.

131 Plant Acquisition Adjustments

Plant acquisition adjustments shall be amortized to the operating expense accounts. These adjustments are recorded in Account 114, Electric Plant Acquisition Adjustments, and amortized to Account 406, Amortization of Electric Plant Acquisition Adjustments, or Account 425, Miscellaneous Amortization, as required by the regulatory commission having jurisdiction. Accounts 406 and 425 shall be closed to operating margins.

132 General Plant

When the unit method of depreciation is used for general plant items, gains and losses on sales, trades or disposals of equipment shall be recorded as such. If the composite method of depreciation is used, gains or losses on the disposal of general plant items shall be recorded in the appropriate depreciation reserve account.

A truck which is used only for transporting power operated equipment mounted thereon shall be charged, together with the installed equipment, to Account 396, Power Operated Equipment. If the same type of truck is used for transporting materials and supplies, tools and work equipment, personnel, or other items, the cost of the truck shall be charged to Account 392, Transportation Equipment.

Depreciation and other expenses relating to power operated equipment shall be accumulated in a subaccount of Account 184, Clearing Accounts, and distributed monthly on an equitable basis to the accounts properly chargeable.

Depreciation expense on vehicles and other work equipment, furniture and office equipment, and other such plant used in the construction of utility plant, is a proper component of construction cost. To avoid a duplicate advance of funds, however, the amount of depreciation on such items that has previously been financed from loan funds shall be deducted from Inventories of Work Orders submitted to RUS. This amount shall be specifically identified, and shown either monthly or annually as a single item in column

9 on the RUS Form 219, Inventory of Work Orders.

133 Plant Abandonments and Disallowances of Plant Costs

In December 1986, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 90, Regulated Enterprises—Accounting for Abandonments (Statement No. 90) and Disallowances of Plant Costs. This section provides an overview of the requirements outlined in Statement No. 90 together with the specific accounts that shall be used to record a plant abandonment or a disallowance of plant costs.

Plant Abandonments

When an abandonment becomes probable, the cost of the abandoned asset shall be removed from Construction Work-in-Progress or Plant-in-Service, as applicable. Before making this transfer, however, a determination must be made as to whether recovery of the allowed cost is likely to be provided with a full return on the investment during the period from the time the abandonment becomes probable, to the time when recovery is completed, or with a partial or no return on the investment. This determination shall be made based upon the facts and circumstances of the specific abandonment, and past practices and current policies of regulatory jurisdiction.

If a full return on the investment is likely to be provided, any disallowance of all or part of the cost of abandoned plant that is both probable and reasonably estimated shall be recognized as a loss in the current year with the carrying basis of the asset reduced by an equal amount. The remaining cost of abandoned plant shall be recorded as a separate new asset.

If partial or no return on the investment is likely to be provided, any disallowance of abandoned plant costs that is both probable and reasonably estimated shall be recognized as a loss. The present value of the future revenues expected to be provided to recover the allowable cost of the abandoned plant and return on the investment, if any, shall be reported as a separate new asset. The discount rate used to compute the present value shall be the

borrower's incremental borrowing rate, which is the rate that the borrower would have to pay to borrow an equivalent amount for a period equal to the expected recovery period. In determining the value of expected future revenues, the borrower shall consider the probable time period before the recovery is expected to begin and the probable time period over which recovery is expected to be provided.

The amount of the new asset shall be adjusted from time to time, as necessary, if new information indicates that the estimates used to record the new asset have changed. The carrying value of the new asset, however, shall not be adjusted for changes in the incremental borrowing rate. The amount of any adjustments shall be recorded as a gain or loss.

During the period between the date on which a new asset is recognized and the date on which recovery begins, the carrying amount shall be increased by accruing a carrying charge. The rate used to accrue the carrying charge shall be:

1. If a full return on the investment is likely, a rate equal to the allowed overall cost of capital in the jurisdiction in which recovery is expected to be provided shall be used.
2. If partial or no return is likely, the asset shall be amortized in a manner that will produce a constant return on the unamortized investment in the new asset equal to the rate at which the expected revenues were discounted.

Due to the nonprofit environment in which electric cooperatives operate, full recovery of interest expense on plant related long-term debt equates to full recovery of the rate of return for an investor-owned utility. Therefore, if a cooperative is permitted full recovery of the interest expense incurred on the long-term debt borrowed to finance construction of an abandoned plant, no discounting of the asset is required nor is accrual of the carrying charge permitted.

If, at the time the provisions of Statement No. 90 are first applied, the borrower elects to restate the financial statements, the financial statements for all periods presented shall be restated and the financial statements shall disclose the nature of the restate-

ment and its effect on margins before extraordinary items, net margins, and patronage capital at the beginning of the earliest period presented. If the borrower elects not to restate the financial statements, the effect of applying Statement No. 90 shall be reported as a change in accounting principle and the financial statements shall disclose the nature of the change and the effect of applying Statement No. 90 on margins before extraordinary items and net margins.

The specific accounts that shall be used to record transactions involving plant abandonments are as follows:

1. In the year of the abandonment, the unrecoverable portion of the cost of abandoned plant included in construction work-in-progress shall be recognized as a loss by a charge to Account 426.5, Other Deductions, and a credit to Account 107, Construction Work-in-Progress.
2. The balance of the cost remaining in the construction work-in-progress account shall be credited to Account 107 and charged to Account 182.2, Unrecovered Plant and Regulatory Study Costs.
3. The difference between the charge to Account 182.2 and the present value of expected future revenues for recovery of the new asset, shall be recorded as a credit to Account 182.2 and a debit to Account 426.5. The credit to Account 182.2 shall be segregated from the amount charged to Account 182.2 by the use of a separate subaccount. Statement No. 90 does not require this segregation; however, it is necessary under the USoA to provide for the appropriate segregation of operating and nonoperating income.
4. During the waiting period for recovery of the new asset to begin, carrying charges shall be accrued by a debit to Account 182.2 with a concurrent credit to Account 421, Miscellaneous Nonoperating Income. Debits to Account 182.2 shall be treated as reductions to the credit subaccount of Account 182.2.
5. The borrower shall amortize the amount debited to Account 182.2 by charges to operating income, consistent with the way the amortized amounts are recovered through rates. These charges to income shall be recorded in Account 407, Amortization of

Rural Utilities Service, USDA

§1767.41

Property Losses, Unrecovered Plant and Regulatory Study Costs.

6. As the recoverable amount recorded in Account 182.2 is recovered through rates, the borrower shall accrue income by charges to Account 182.2 and credits to Account 421, Miscellaneous Nonoperating Income. Accruals shall be computed by applying the same rate used to derive the present value of the asset established in Account 182.2, to the unamortized balance in that account. Accrued amounts charged to Account 182.2 shall be treated as reductions to the credit subaccount within Account 182.2.

Prior to implementing the accounting prescribed above, the borrower shall submit the details of each plant abandonment to RUS for approval.

Disallowances of Costs of Recently Completed Plant

When it becomes probable that a portion of the cost of recently completed plant will be disallowed for rate making purposes and a reasonable estimate of the amount of the disallowance can be made, the estimated amount of the probable disallowance shall be deducted from the reported cost of the plant and recognized as a loss. If a portion of the costs is explicitly, but indirectly disallowed, the equivalent amount of the cost shall be deducted from the reported cost of the plant and recognized as a loss. The specific accounts that shall be used to record transactions involving the disallowance of plant costs are as follows:

1. Estimated disallowed plant costs which the borrower records as a credit to Account 101, Electric Plant-in-Service, shall be charged to Account 426.5, Other Deductions.

2. If the loss qualifies as an extraordinary item under the criteria set forth in General Instruction No. 7 of the USoA, the borrower shall record the loss in Account 435, Extraordinary Deductions. To be considered extraordinary, an item shall be more than five percent of income computed before extraordinary items. If a borrower believes that a loss of less than five percent should be treated as an extraordinary item; the borrower shall, with commission approval, record the loss in Account 435 and report the loss as an

extraordinary item. If the borrower is not subject to state commission jurisdiction, RUS approval is required.

134 Utility Plant Phase-in Plans

In August 1987, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 92, Regulated Enterprises—Accounting for Phase-in Plans (Statement No. 92). This section provides an overview of the requirements outlined in Statement No. 92.

The term phase-in plan is used to refer to any method of recognition of allowable costs in rates that meets all of the following criteria:

1. The method was adopted by the regulator in connection with a major, newly completed plant of the regulated enterprise or one of its suppliers or a major plant scheduled for completion in the near future.

2. The method defers the rates intended to recover allowable costs beyond the period in which those allowable costs would be charged to expense under generally accepted accounting principles applicable to enterprises in general.

3. The method defers the rates intended to recover allowable costs beyond the period in which those rates would have been ordered under the rate-making methods routinely used prior to 1982 by that regulator for similar allowable costs of that regulated enterprise.

If a phase-in plan is ordered by a regulator in connection with a plant on which no substantial physical construction had been performed before January 1, 1988, none of the allowable costs that are deferred for future recovery by the regulator under the plan for rate-making purposes, shall be capitalized for general-purpose financial reporting purposes (financial reporting).

If a phase-in plan is ordered by a regulator in connection with a plant completed before January 1, 1988, or a plant on which substantial physical construction had been performed before January 1, 1988, the criteria specified below shall be applied to that plan. If

the phase-in plan meets all of those criteria, all allowable costs that are deferred for future recovery by the regulator under the plan shall be capitalized for financial reporting purposes as a separate asset (a deferred charge). If any one of those criteria is not met, none of the allowable costs that are deferred for future recovery by the regulator under the plan shall be capitalized for financial reporting. The criteria for determining whether capitalization is appropriate are:

1. The allowable costs in question are deferred pursuant to a formal plan that has been agreed to by the regulator;
2. The plan specifies the timing of recovery of all allowable costs that will be deferred under the plan;
3. All allowable costs deferred under the plan are scheduled for recovery within 10 years of the date when the deferral began; and
4. The percentage increase in rates scheduled under the plan for each future year is no greater than the percentage increase in rates scheduled under the plan for each immediately preceding year. That is, the scheduled percentage increase in year two is no greater than the percentage increase granted in year one, the scheduled percentage increase in year three is no greater than the percentage increase in year two, etc.

By definition, a phase-in plan approved prior to 1982 that contains provisions contrary to those detailed above is not subject to the provisions of Statement No. 92. This exemption, however, only relates to a specific utility and a specific regulator. For example, a utility cannot use a phase-in plan approved by its regulator for a different utility as justification for its phase-in plan exceeding the 10-year limit imposed by Statement No. 92.

A phase-in plan is a method of rate making intended to moderate a sudden increase in rates while providing the regulated enterprise with recovery of its investment and a return on that investment during the recovery period. A disallowance is a rate-making action that prevents the regulated enterprise from recovering either some amount of its investment or some amount of return on its investment. Statement No. 90 specifies the accounting for dis-

allowances of plant costs (see item 133 of this regulation). If a method of rate making that meets the criteria for a phase-in plan includes an indirect disallowance of plant costs, that disallowance shall be accounted for in accordance with Statement No. 90. Cumulative amounts capitalized under phase-in plans shall be reported as a separate asset in the balance sheet. The net amount capitalized in each period or the net amount of previously capitalized allowable costs recovered during each period shall be reported as a separate item of other income or expense in the income statement. Allowable costs capitalized shall not be reported as reductions of other expenses.

The terms of any phase-in plan in effect during the year or ordered for future years shall be disclosed in the financial statements. Statement No. 92 does not permit capitalization for financial reporting of allowable costs deferred for future recovery by the regulator pursuant to a phase-in plan that does not meet the criteria or a phase-in plan related to plant on which substantial physical construction was not completed before January 1, 1988. Nevertheless, the financial statements shall include disclosures of the net amount deferred at the balance sheet date for rate-making purposes, and the net change in deferrals for rate-making purposes during the year for those plans.

If the provisions of Statement No. 92 are applied retroactively, the financial statements of all periods presented shall be restated. In addition, the restated financial statements shall, in the year that Statement No. 92 is first applied, disclose the nature of any restatement and its effect on margins before extraordinary items, net margins, and on patronage capital at the beginning of the earliest period presented. If the financial statements for prior years are not restated, the effects of applying Statement No. 92 to existing phase-in plans shall be reported as a change in accounting principle and the financial statements shall disclose the effect of adopting Statement No. 92 on margins before extraordinary items and net margins.

Rural Utilities Service, USDA

§ 1767.41

The application of Statement No. 92 to an existing phase-in plan shall be delayed if both of the following conditions are met:

1. The enterprise has filed a rate application to have the plan amended to meet the criteria of Statement No. 92 or intends to do so as soon as practicable; and

2. It is reasonably possible that the regulator will change the terms of the phase-in plan so that it will meet the criteria of Statement No. 92.

If the above conditions are met, the provisions of Statement No. 92 shall be applied to the existing phase-in plan on the earlier of the date when one of the conditions ceases to be met or the date when the final rate order is received, amending or refusing to amend the phase-in plan. However, if the enterprise delays filing its application for the amendment or the regulator does not process the application in the normal period of time, the application of Statement No. 92 shall not be further delayed.

In applying the criteria of Statement No. 92 to a plan that was in existence prior to the first fiscal year beginning after December 15, 1987, and that was revised to meet that criteria, the 10-year criterion and the requirement concerning the percentage increase shall be measured from the date of the amendment rather than from the date of the first scheduled deferrals under the original plan. All phase-in plans must receive RUS approval prior to implementation.

135 Accounting for Removal or Relocation of Electric Facilities Resulting from the Action of Others

Under arrangements with another party, a borrower agrees, or is obliged, to remove, relocate, rearrange, or otherwise make changes in utility property, other than for the purpose of rendering utility service to the other party, for which the utility is reimbursed for all or a portion of the costs incurred.

Plant Accounting

The relocation of the line shall be accounted for as follows:

1. If all of the assemblies in the line are retired or completely removed and later reinstalled or if the line is constructed in a new location before the old line is removed, construction and retirement work orders shall be prepared except for the costs relating to special equipment items (transformers, oil circuit reclosers, etc.) which shall be charged to operations expense.

2. If a line is moved in its entirety to a new location except for isolated retirement units (such as at the end of the line) or poles not suitable for resetting, the cost of moving the portion of line that is moved intact shall be charged to maintenance expense while the cost related to the change in isolated retirement units or the replacement of poles not suitable for resetting shall be accounted for through use of construction and retirement work orders.

3. If a line is moved intact without any change in assemblies, the cost shall be charged to maintenance expense.

Reimbursement

If the borrower receives reimbursement for the costs related to the relocation of the line, the reimbursement shall be accounted for by crediting operation and maintenance expenses to the extent of actual expenses occasioned by the plant changes and crediting the remainder to the accumulated provision for depreciation, unless contractual terms definitely characterize residual or specific amounts as applicable to the cost of replacement. In the latter event, appropriate credits shall be entered in the plant accounts.

Reimbursement received from a telephone company for adding a pole or replacing a present pole with a taller pole under joint use contracts falls within this latter category. In this instance, appropriate credits are charged against the plant accounts.

Financing

The total reimbursement, less any portion for operations and maintenance costs, shall be entered in the "Contributions in Aid of Construction" section at the bottom of the Construction Work Order. When the Inventory

of Work Orders (RUS Form 219) is prepared, enter only enough of the contribution in column 9 to reduce to zero the amount in column 10, “Loan Funds Subject to Advance by RUS.” This entry is made although none of the reimbursement received is recorded in the accounting records as a contribution in aid of construction.

136 Storm Damage

As a result of recent hurricane, flood, and ice storm damage, the Rural Utilities Service (RUS) has received several inquiries concerning the proper accounting for storm damage costs and the associated funds received from the Federal Emergency Management Administration (FEMA).

Storm damage costs should be accounted for under the work order procedure. Units of property destroyed or otherwise removed from service must be reflected on retirement work orders and units of property installed must be shown on construction work orders. To ensure that the accounting for construction and retirement costs is as accurate as possible, an effort should be made to accurately accumulate material, labor, and overhead costs. Even when extreme care has been exercised, however, it may still be necessary to use estimates to develop the appropriate cost figures.

When a storm occurs, a utility typically incurs a large retirement loss, all or a part of which should be charged to the accumulated provision for depreciation. Storm damage costs over and above construction and retirement costs represent maintenance expense. Maintenance costs include the costs of resagging lines, straightening poles, and replacing minor items of property. When extensive damage has occurred, the need to restore the property to an operating condition without delay usually results in excessive costs being incurred. Standard property unit costs may be used as a guide in determining the amount to be capitalized. It should be noted, however, that when standard property unit costs are used, all excess costs are charged to maintenance expense.

Because of the storm’s destruction, property is retired prematurely and as a result, extraordinary retirement

losses occur. When such extraordinary losses occur, they should be recorded in the year in which the losses are incurred. If the recording of such losses will materially distort the income statement, such losses may be charged to Account 435, Extraordinary Deductions. These costs may be deferred and amortized to future periods only if the provisions of Statement of Financial Accounting Standards No. 71, Accounting for the Effects of Certain Types of Regulation (Statement No. 71), are applied. Under the provisions of Statement No. 71, a utility may defer certain costs, provided such costs are included in the utility’s rate base and recovered through future rates. If an RUS borrower elects to apply the provisions of Statement No. 71, RUS approval is required. To obtain RUS approval, a borrower must submit:

a. A detailed description of the plan including the nature of the expense item, the amount of the deferral, the specific time period for rate recovery, and justifying support for the time period selected;

b. The accounting journal entries being used by the cooperative to record the expense deferral and amortization of the deferred costs;

c. A copy of the state Commission order authorizing recovery of the deferred costs through future rates, or in the absence of commission jurisdiction, a resolution from the cooperative’s board of directors authorizing such recovery; and

d. A statement from the borrower’s certified public accountant (CPA) or CPA firm indicating that the deferral and amortization of these costs is in accordance with generally accepted accounting principles.

To assist in the restoration of the damaged facilities, the Federal government often provides assistance through FEMA. Under current FEMA procedures, FEMA provides funds for the restoration of facilities based upon the cost estimates submitted by the entity requesting assistance. If the FEMA grant is for less than 100 percent of the cost estimates, FEMA does not specify which costs are to be reimbursed. When the funds are received, therefore, they should be accounted for by crediting construction, retirement, maintenance

Rural Utilities Service, USDA**§ 1767.41**

expense, and administrative expense in direct proportion to the total costs incurred. For example, if total storm damage costs are \$1,000,000 with \$450,000 incurred for maintenance, \$300,000 for retirement, \$200,000 for construction, and \$50,000 for administrative costs, the FEMA reimbursement should be

accounted for by applying 45 percent of the funds received as a credit to maintenance expense, 30 percent as a credit to retirement costs, 20 percent as a credit to construction, and 5 percent as a credit to administrative and general costs.

ACCOUNTING JOURNAL ENTRIES

Dr. 108.8X, Retirement Work in Progress—Storm Damage	\$1,015.17	
Cr. 107.4, Construction Work in Progress—Storm Damage		\$1,015.17

To transfer the removal costs recorded in Column 11 of Retirement Work Order #4401X to Account 108.8X.

Dr. 107.4, Construction Work in Progress—Storm Damage	\$4,141.55	
Cr. 108.8X, Retirement Work in Progress—Storm Damage		\$4,141.55

To remove material salvaged in the _____ rebuild from Account 107.4. The original entry debited Account 154, Plant Materials and Operating Supplies, and credited Account 107.4. (See Column 12 of Retirement Work Order #4401X.)

Dr. 108.8X, Retirement Work in Progress—Storm Damage	\$312,230.41	
Cr. 364, Poles Towers and Fixtures		\$133,377.55
Cr. 365, Overhead Conductors and Devices		59,683.08
Cr. 368, Lines Transformers		19,704.60
Cr. 369, Services		97,651.23
Cr. 373, Street Lighting and Signal Systems		1,813.95

To remove the original cost of property destroyed and retired from the classified plant accounts. This retirement is recorded, in detail, on Retirement Work Order #4401X. It is understood that this retirement covers all distribution property retired or destroyed in the _____ area exclusive of substations and special equipment items (meters, meter sockets, current and potential transformers, transformers, voltage regulators, oil circuit reclosers (OCR), and sectionalizers).

Dr. 108.6, Accumulated Provision for Depreciation of Distribution Plant	\$309,104.03	
Cr. 108.8X, Retirement Work in Progress—Storm Damage		\$309,104.03

To record the net loss due to the retirement of distribution lines in the _____ area. (See Retirement Work Order #4401X.)

Dr. 364, Poles, Towers and Fixtures	\$99,075.40	
Dr. 365, Overhead Conductors and Devices	104,142.22	
Dr. 368, Line Transformers	25,036.07	
Dr. 369, Services	28,865.08	
Dr. 373, Street Lighting and Signal Systems	2,101.60	
Cr. 107.4, Construction Work in Progress—Storm Damage		\$259,220.37

To record, in the proper classified plant accounts, Construction Work Order #4401 covering the _____ rebuild.

This entry includes:

Material Issued	\$150,336.49	
Less: Materials Returned	15,631.39	
Net Material Used	134,705.10	
Labor and overhead estimated by using standard record unit costs	124,515.27	
Total	259,220.37	

Dr. 108.8X, Retirement Work in Progress—Storm Damage	2,384.00	
Cr. 107.4, Construction Work in Progress—Storm Damage		\$2,384.00

§ 1767.41

7 CFR Ch. XVII (1–1–97 Edition)

To transfer the removal costs associated with the retirement of old transmission lines (\$1,966) and substations (\$418) to Account 107.4. This cost is shown in Column 11 of Retirement Work Order #4400X).

Dr. 107.4, Construction Work in Progress—Storm Damage	\$1,939.74	
Cr. 108.8X, Retirement Work in Progress—Storm Damage		\$1,939.74

To remove material salvaged from transmission lines (\$1,545.74) and substations (\$394.00) from Account 107.4. The original entry debited Account 154 and credited Account 107.4. (See Column 12 of Retirement Work Order #4400X.)

Dr. 108.8X, Retirement Work in Progress—Storm Damage	\$162,172.06	
Cr. 355, Poles and Fixtures		\$47,738.45
Cr. 356, Overhead Conductors & Devices		80,304.11
Cr. 362, Station Equipment		34,129.50

To remove the original cost of transmission lines and substations destroyed and retired from the classified plant accounts. (See Retirement Work Order #4400X.) (New substations were built and separately accounted for on Work Order #4406.)

Dr. 108.5, Accumulated Provision for Depreciation of Transmission Plant	\$128,462.82	
Dr. 108.6, Accumulated Provision for Depreciation of Distribution Plant	34,153.50	
Cr. 108.8X, Retirement Work in Progress—Storm Damage		\$162,616.32

To record the net loss due to the retirement of transmission lines (\$128,462.82) and substations (\$34,153.50). (See Retirement Work Order #4400X):

	Substations	Transmission plant
Original Cost	\$34,129.50	\$128,042.56
Add: Cost of Removal	418.00	1,966.00
	34,547.50	130,008.56
Less: Material Salvaged	394.00	1,545.74
Total	34,153.50	128,462.82

Dr. 355, Poles and Fixtures	\$161,784.05	
Dr. 356, Overhead Conductors and Devices	124,704.77	
Cr. 107.4, Construction Work in Progress—Storm Damage		\$286,488.82

To record, in the proper classified plant accounts, the costs of a 69 kV transmission line () as detailed in Work Order #4400. This work order includes construction costs as follows:

Material Used (Net)	\$171,665.62
Labor and overhead estimated by using standard record unit costs	114,823.20
Total	286,488.82

Dr. 107.4, Construction Work in Progress—Storm Damage	\$329.40	
Cr. 108.8X, Retirement Work in Progress—Storm Damage		\$329.40

To correct the journal entry for cash received from the sale of scrapped meters and transformers. The original entry credited Account 107.4 at the time of receipt.

Transformers	\$318.00
Meters	11.40
Net Materials Used	329.40

Dr. 108.8X, Retirement Work in Progress—Storm Damage	\$137,671.22
Cr. 365, Overhead Conductors and Devices	\$4,557.00
Cr. 368, Line Transformers	112,815.22
Cr. 370, Meters	20,299.00

Rural Utilities Service, USDA
\$ 1767.41

To remove the cost of meters, transformers, and OCRs lost or destroyed from the primary plant accounts. (See Retirement Work Order #4402X.)

737 Transformers	\$112,815.22	
31 OCRs	4,557.00	
1,532 Meters	20,299.00	
Total	137,671.22	

Dr. 108.6, Accumulated Provision for Depreciation of Distribution Plant	\$137,341.82	
Cr. 108.8X, Retirement Work in Progress		\$137,341.82

To record the net loss due to the retirement of meters, transformers, and OCRs. (See Retirement Work Order #4402X.)

Original Cost	\$137,671.22	
Salvaged Realized	329.40	
Total	137,341.82	

Dr. 186, Miscellaneous Deferred Debits	\$1,319.85	
Cr. 107.4, Construction Work in Progress—Storm Damage		\$1,319.85

To record the engineering costs associated with future construction work in the area.

Dr. 593, Maintenance of Overhead Lines	\$607.24	
Dr. 595, Maintenance of Line Transformers	19,365.86	
Dr. 597, Maintenance of Meters	6,595.56	
Cr. 107.4, Construction Work in Progress—Storm Damage		\$26,568.66

To charge the costs of repairing damaged meters, transformers, voltage regulators, and OCRs to the appropriate expense accounts. Repair costs were originally charged to Account 107.4.

	593	595	597
Meters			\$6,595.56
Transformers		\$18,869.95	
Voltage Regulators		495.91	
Oil Circuit Reclosers	\$607.24		
Total	607.24	19,365.86	6,595.56

Dr. 921, Office Supplies and Expenses	4,421.69	
Cr. 107.4, Construction Work in Progress—Storm Damage		\$36,421.69

To charge the administrative costs incurred to obtain the FEMA grant to the appropriate expense accounts. Administrative costs were originally charged to Account 107.4.

Salaries	\$32,000.00	
Office Supplies	4,421.69	
Total	\$36,421.69	

Dr. 571, Maintenance of Overhead Lines	\$3,675.60	
Dr. 593, Maintenance of Overhead Lines	33,080.40	
Cr. 107.4, Construction Work in Progress Storm Damage		\$36,756.00

To allocate expenses remaining in Account 107.4 to distribution and transmission maintenance expense. It was estimated that only 10 percent is applicable to transmission.

Dr. 426.5, Other Deductions	\$275,000.00	
Dr. 435, Extraordinary Deductions		
Dr. 182.1, Extraordinary Property Losses		
Cr. 108.5, Accumulated Provision for Depreciation of Transmission Plant		\$35,000.00
Cr. 108.6, Accumulated Provision for Depreciation of Distribution Plant		240,000.00

§ 1767.41**7 CFR Ch. XVII (1–1–97 Edition)**

To restore the accumulated provisions for depreciation to their appropriate levels based upon a study of plant currently in service.

NOTE: Account 426.5, Other Deductions, should be used to record the retirement loss as a current period expense. Account 435, Extraordinary Deductions, may be used when the loss will materially distort the income statement. Account 182.1, Extraordinary Property Losses, should be used when such costs are being deferred under the provisions of Statement No. 71. Costs recorded in this account should be amortized to Account 407, Amortization of Property Losses, as the costs are recovered through rates.

Dr. 131.1, Cash—General	\$1,000,000.00	
Cr. 253, Other Deferred Credits		\$1,000,000.00

To record the receipt of funds from the Federal Emergency Management Administration (FEMA).

Dr. 253, Other Deferred Credits	\$1,000,000.00	
Cr. 108.5, Accumulated Provision for Depreciation of Transmission Plant		\$74,205.00
Cr. 108.6, Accumulated Provision for Depreciation of Distribution Plant		191,575.00

Total	436,000.00

Distribution of FEMA Funds—Administrative

Account 920: 32,000.00÷36,421.69=.8786=87.9%	
Account 921: 4,421.69÷36,421.69=.1213=12.1%	
Account 920: \$29,000.00×87.9%=	\$25,491.00
Account 921: \$29,000.00×12.1%=	3,509.00
Total	29,000.00

201 Supplemental Financing

Many borrowers secure additional financing from sources other than RUS. CFC was established to provide a source of supplemental financing. Although the accounting provided in this section refers to CFC, it is applicable to other sources of supplemental financing as well.

1. Membership Fees

When a membership fee is paid to CFC, the payment shall be recorded as a debit to Account 123.23, Other Investments in Associated Organizations.

2. Subscriptions

The subscription agreement to purchase Capital Term Certificates (CTCs) is a binding obligation to pay an initial subscription in equal annual payments over the first three years and an additional annual subscription payable in the fourth through fifteenth years.

The annual subscriptions to CFC for the fourth through fifteenth years is 2.0 percent of total operating revenues after deducting the cost of power. Using the best data available, each borrower shall estimate the amount of CTCs that are required to be purchased. Estimates are not expected to be precise and adjustments shall be made when future projections indicate a change is needed. When the agreement to purchase CTCs is made, an entry shall be recorded debiting Account 123.21, Subscriptions to Capital Term Certificates—Supplemental Financing, and crediting Account 224.11, Other Long-Term Debt—Subscriptions. When the CTCs are actually purchased, the following entries shall be recorded:

Dr. 224.11, Other Long-Term Debt—Subscriptions	
Cr. 131.1, Cash—General	

Dr. 123.22, Investments in Capital Term Certificates—Supplemental Financing
Cr. 123.21, Subscriptions to Capital Term Certificates—Supplemental Financing

3. Interest Receipts

Interest accrues monthly to the holder of CTCs at a rate in accordance with the terms of the CFC Invitation to Subscribe. The accrual of interest and the receipt of interest proceeds shall be recorded as follows:

Dr. 171, Interest and Dividends Receivable	
Cr. 419, Interest and Dividend Income	
To record the monthly accrual of interest.	
Dr. 131.1, Cash—General	
Cr. 171, Interest and Dividends Receivable	
To record the receipt of interest proceeds from the investment in CTCs.	

NOTE: Any amounts received in excess of the previous accruals shall be credited to Account 419.

Interest penalties may be charged by CFC for late payments on any subscription from the date that the payment was due to the date that the payment was actually received. Such charges shall be expensed to Account 431, Other Interest Expense.

4. Notes

If a note is due more than one year after the date of the note, the appropriate subaccount of Account 224, Other Long-Term Debt, shall be credited. If the note is due less than one year from the date of the note, Account 231, Notes Payable, shall be credited.

When a loan from CFC has been consummated and a note is executed, Account 224.13, Supplemental Financing Notes Executed—Debit, shall be debited; and Account 224.12, Other Long-Term Debt—Supplemental Financing, credited. When a loan from another source has been consummated, Account 224.15, Notes Executed—Other—Debit,

Rural Utilities Service, USDA

§ 1767.41

shall be debited; and Account 224.14, Other Long-Term Debt—Miscellaneous, credited.

5. *Loan Proceeds*

Cash proceeds from unsecured short-term loans shall be deposited into the General Fund Account. Cash proceeds from all secured loans shall be deposited into the Construction Fund Trustee Account.

From two to seven percent, depending upon the class of borrower and its debt-equity ratio, of each CFC loan is applied to the purchase of Capital Term Certificates. At the time of a borrower's first requisition under the CFC loan, the following entry shall be recorded:

Dr. 131.2, Cash—Construction Fund—Trustee
Dr. 123.22, Investments in Capital Term Certificates—Supplemental Financing

Cr. 224.13, Supplemental Financing Notes Executed—Debit

To record the requisition of funds from CFC.

6. *Capital Credits*

As a result of borrowing from CFC or other lenders organized on a cooperative basis, a borrower may receive capital credit allocations. These allocations are usually based upon the borrower's participation in the lending program with participation measured by the amount of interest expense and conversion costs incurred.

To account for patronage capital allocations from cooperative lenders, the following journal entries shall be recorded:

Dr. 123.1, Patronage Capital from Associated Cooperatives

Cr. 424, Other Capital Credits and Patronage Capital Allocations

To record the allocation of capital credits from a cooperative lender.

NOTE: If any portion of the interest expense was capitalized as a component of construction cost, a similar portion of the capital credit allocation shall be credited to construction rather than to Account 424. The portion credited to construction shall be determined by applying the percentage of interest expense charged to construction for that particular lender to the interest expense incurred for that lender.

Dr. 131.1, Cash—General

Cr. 123.1, Patronage Capital from Associated Cooperatives

To record the cash receipt of patronage capital credits from cooperative lenders.

301 Forfeited Customers' Deposits

Customers may be required to make deposits to guarantee payment of amounts billed for electric service. When a customer discontinues service, the customer's deposit shall first be applied to unpaid energy bills, with the balance remitted by check to the customer. If the check is returned, it shall be voided and the original entry that was made when the check was issued shall be reversed.

Unclaimed balances of customer deposits shall remain in Account 235, Customer Deposits, until the legal liability of the cooperative to make such a refund has elapsed. When there is no further legal liability to refund the deposit and if it does not escheat to the state, it shall be transferred to Account 144, Accumulated Provision for Uncollectible Customer Accounts—Credit, retaining full information of all particulars.

401 Computer Software Costs

Computer software consists of programs and routines (sets of computer instructions) which direct the operation of the computer. Software may refer to generalized routines useful in computer operations or to programs for specific applications such as payroll.

The distinction between generalized software and application software is important. Generalized software provides operating support for individual applications. This would include programs for such tasks as making printouts of machine-readable records, sorting records, organizing and maintaining files, translating programs written in a symbolic language into machine-language instructions, and scheduling jobs through the computer. These programs are generally furnished by the manufacturer.

Application software consists of a set of instructions for performing a particular data processing task. Application programs are generally written by the user installation, but are frequently obtained as prewritten packages from software vendors. Application software includes programs such as payroll, billing, general ledger, as well as engineering or managerial applications.

§1767.41

Costs incurred with the purchase or development of computer software shall be accounted for as follows:

1. Capitalize in a subaccount of Account 391, Office Furniture and Equipment, all costs for generalized software. Depreciate the cost over the service life (or remaining life) of the main hardware (i.e., containing central processor). If the purchase invoice does not break out or assign a cost to the “generalized software,” it is appropriate to include the full amount in hardware costs. Capitalize in a separate subaccount of Account 391, all costs for applications software determined to have a service life of over one year. Depreciate the cost over the estimated useful service life of the program. This depreciation period shall not exceed five (5) years. RUS realizes, however, that there may be circumstances that justify a useful life longer than 5 years. When this is the case and it is management’s intent to utilize these programs over an extended period, written justification shall be submitted to RUS for approval.

2. Expense in Account 921, Office Supplies and Expenses, in the period incurred, all costs associated with the maintenance, updating, and conversion of files or revision of all software, and all costs for software with a useful life of less than 1 year. Also expense in Account 921, the unamortized cost of all software determined, during the year, to be no longer used by or useful to the cooperative. Such costs that are clearly applicable to any category of operating expenses other than the administrative and general category, however, shall be included in the appropriate account in such category. In accordance with the USoA, no portion of such costs shall be capitalized to construction or retirement activities.

In determining the total cost of purchased or internally developed software, the following items shall be included:

a. Costs incurred for feasibility studies if they result in the purchase or development of software;

b. All costs related to the actual purchase or development of the software. These costs must be specifically identifiable with the software and properly

supported by time cards, invoices, or other documents; and

c. All costs incurred in “testing and debugging” the software.

Computer software costs are properly chargeable to Account 107, Construction Work in Progress, provided that the following criteria are met:

1. The computer program is specifically dedicated to performing a construction related activity, and

2. The cost of the software is itemized separate and apart from other hardware and software costs.

The cost of software programs meeting the above requirements and having an estimated useful service life in excess of 1 year shall be recorded in Account 186, Miscellaneous Deferred Debits, and amortized to Account 107, Construction Work in Progress, over the estimated service life of the program not to exceed 5 years.

All costs related to training personnel in the use of software shall be expensed as incurred.

The accounting in this section is not intended to apply to immaterial amounts. When it is deemed that the costs of the recordkeeping necessary to amortize these costs outweigh the benefits to the members, software costs shall be expensed in the year incurred.

For computer costs relating to load control equipment, refer to Item 118 of this section.

402 Legal Expenses

Utilities may incur legal expenses which pertain to construction activities, loan activities, or general services. The proper accounting treatment for legal expenses is as follows:

1. Legal fees incurred in connection with a construction project, including the court costs directly related thereto, which can be identified and supported as such, shall be capitalized in Account 107, Construction Work-in-Progress, as a cost of construction.

2. Legal fees specifically identified and properly supported as resulting from activities designed to obtain long-term debt, shall be deferred in Account 181, Unamortized Debt Expense.

3. Legal fees for all other services and fees which cannot be properly identified will require expensing to either Account 417.1, Expenses of Nonutility

Rural Utilities Service, USDA

§ 1767.41

Operations, or Account 923, Outside Services Employed, as appropriate.

To properly support the capitalization or deferral of legal fees, the attorney shall provide an itemization of services performed and the corresponding costs. Only those costs specifically identified by the attorney as being related to construction or loan activities shall be capitalized or deferred as described above.

403 Leases

Lease transactions shall be accounted for as either a capital lease or an operating lease depending upon whether or not the lease meets the criteria for classification as a capital lease. The definitions for capital and operating leases and the criteria used to determine which method shall be used are as follows:

Definitions

1. *Capital Lease:* A lease that transfers substantially all of the benefits and risks inherent in the ownership of the property to the lessee, who accounts for the lease as an acquisition of an asset and the incurrence of a liability.

2. *Operating Lease:* An operating lease is a simple rental agreement which does not meet the criteria for a capital lease. Under the terms of an operating lease, the lessee records the rental payments due over the term of the lease as rent expense.

Criteria

A lease agreement shall be classified as a capital lease if one or more of the following criteria is met:

1. Ownership of the property is transferred to the lessee by the end of the lease term;
2. The lease contains a bargain purchase option;
3. The lease term is equal to 75 percent or more of the estimated useful life of the leased property; or
4. The present value of the lease payments at the inception of the lease equals or exceeds 90 percent of the fair market value of the leased property.

A lease agreement qualifying as a capital lease shall be recorded in either

Account 101.1, Property Under Capital Leases; Account 120.6, Nuclear Fuel Under Capital Leases; or Account 121, Nonutility Property, as appropriate, at the present value (at the beginning of the lease term) of the minimum lease payments. If, however, this amount exceeds the fair value of the leased property at the inception of the lease, the asset shall be recorded at its fair market value. An offsetting credit shall be recorded in Account 227, Obligations Under Capital Leases—Noncurrent, with the current portion recorded in Account 243, Obligations Under Capital Leases—Current. Assets recorded in Account 101.1 shall be classified separately according to the detailed accounts (301–399) provided for electric plant in service.

Monthly payments made under the lease obligation shall be charged to rent expense, fuel expense, or construction work-in-progress as they become payable. Similarly, the leased asset and the associated obligation shall be reduced by the current amount due.

The following journal entries shall be used by the lessee to record capital lease transactions:

Dr. 101.1, Property Under Capital Leases
Cr. 243, Obligations Under Capital Leases—Current
Cr. 227, Obligations Under Capital Leases—Noncurrent
To record the capital lease agreement.
Dr. 550, Rents
Cr. 232, Accounts Payable
Dr. 243, Obligations Under Capital Leases—Current
Cr. 101.1, Property Under Capital Leases
To record the monthly rental payment due.
Dr. 232, Accounts Payable
Cr. 131.1, Cash—General
To record the monthly lease payment.

Operating leases which are simple rental agreements do not require the recording of an asset or a liability. The entries that are required to record an operating lease by the lessee are as follows:

Dr. 550, Rents
Cr. 232, Accounts Payable
To record the monthly rental payment due.
Dr. 232, Accounts Payable
Cr. 131.1, Cash—General
To record the monthly lease payment.

For purposes of illustration, the journal entries presented in this interpretation debit Account 550, Rents. However, Account 507, Rents (steam power

§ 1767.41

generation); Account 525, Rents (nuclear power generation); Account 540, Rents (hydraulic power generation); Account 550, Rents (other power production); Account 567, Rents (transmission expense); Account 589, Rents (distribution expense); and Account 931, Rents (general and administrative), should be charged, as appropriate, depending upon the function of the equipment being leased.

404 Consolidated Financial Statements

In October 1987, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 94, Consolidation of All Majority-Owned Subsidiaries (Statement No. 94). For purposes of reporting to RUS, Statement No. 94 shall be applied as follows:

1. An RUS borrower that is a subsidiary of another entity shall prepare and submit to RUS separate financial statements even though this financial information is presented in the parent's consolidated statements.

2. In those cases in which an RUS borrower has a majority-ownership in a subsidiary, the borrower must prepare consolidated financial statements in accordance with the requirements of Statement No. 94. These consolidated statements must also include supplementary schedules presenting a Balance Sheet and Income Statement for each majority-owned subsidiary included in the consolidated statements.

Although Statement No. 94 requires the consolidation of majority-owned subsidiaries, RUS Forms 7 and 12 must be prepared on an unconsolidated basis.

501 Patronage Capital Assignments

Accounting for patronage capital and margins may vary depending upon the individual cooperative's bylaws. The comments contained in this section relate to the application of the standard bylaw provisions.

The entries required, at year's end, to record patronage capital transactions where there is no major merchandising program are as follows:

Dr. 219.1, Operating Margins

Dr. 219.2, Nonoperating margins

Cr. 201.2, Patronage Capital Assignable

7 CFR Ch. XVII (1-1-97 Edition)

To record the amount of patronage capital assignable.

Dr. 201.2, Patronage Capital Assignable

Cr. 201.1, Patronage Capital Credits

To record the allocation of patronage capital to the patrons' accounts.

The procedure for determining the amount of patronage capital assignable to the individual patron on a total dollar basis is as follows:

1. Determine the total amount to be assigned for the year (Account 201.2).

2. Determine patronage from electric service, the total of consumers' billings (Accounts 440-447).

3. Determine the percentage factor to be used in calculating patronage capital to be credited to each consumer account. Divide "1" by "2".

4. Determine the amount of capital to be credited to each consumer. Multiply the individual consumer's billings for the year by the percentage factor obtained in "3" above.

The procedure for determining the amount of patronage capital assignable to the individual patron on a dollar basis, less the cost of power, is as follows:

1. Determine the total amount to be assigned for the year.

2. Determine the total amount of revenue received from each classification of customers.

3. Determine the total cost of power for each classification of customers. (For example, use cost per kWh sold).

4. For each classification of customers subtract the amount obtained in "3" from the amount obtained in "2," to obtain the total amount received, less cost of power, by classification of customers.

5. Add the amounts obtained in "4" to obtain the total amount of revenue, less cost of power.

6. Divide the total amount received, less cost of power for each classification of customers (amounts obtained in "4"), by the total amount received, less cost of power for all customers (amount obtained in "5") to obtain the prorata percentage for each classification of customers.

7. Multiply the total amount to be allocated (amount obtained in "1") by the prorata percentage for each classification of customers (obtained in "6")

Rural Utilities Service, USDA

§ 1767.41

to obtain the amount to be assigned each classification of customers.

8. Divide the amount to be assigned each classification of customers (amount obtained in "7") by the total amount received from the classification of customers (amount obtained in "2") to obtain the percentage factor for each classification of customers.

9. Determine the total amount received from each individual customer.

10. Multiply the total amount received from each individual customer (amount obtained in "9") by the percentage factor for his classification (amount obtained in "8") to obtain the amount of capital to be assigned each individual customer.

After calculating the patronage capital to be credited to each customer, there is usually a small balance remaining. This small balance shall remain in Account 201.2, Patronage Capital Assignable, and shall be added to the amount to be assigned in the following year.

Proper records shall be maintained to support all capital credit transactions. As a minimum, these records shall show, for each patron, the amount of capital credited for each year as well as the amount and date retired for each year.

The process of transferring capital credits from the Patronage Capital Assignable accounts to the Patrons' Capital Credits Assigned accounts or to the Patrons' Capital Credits accounts and the making of entries to individual patron's records constitutes an assignment of capital credits. This holds true for recordkeeping purposes as well as from a legal point of view. This assignment shall be followed by formal notification to patrons within a reasonable period of time.

In the event that a distribution cooperative incurs a net loss, that loss shall not be allocated to its members (patrons). The loss shall be accumulated and offset by future nonoperating margins.

502 Patronage Capital Retirements

As the board of directors has the responsibility for determining whether the financial condition of the cooperative will permit retirement of capital credits and whether the proposed re-

tirement complies with mortgage and bylaw provisions, the authorization for the retirement shall be set forth in the board minutes. The entries to record the general retirement of capital credits shall be as follows:

Dr. 201.1, Patronage Capital Credits

Cr. 238.1, Patronage Capital Payable

To record the board of directors' authorization to make payments of capital credits.

Dr. 238.1, Patronage Capital Payable

Cr. 131.1, Cash—General.

To record actual cash payments of capital credits.

NOTE: To provide better control over the payment of patronage capital credits, a special checking account should be established in an amount equal to the authorized general retirement. Special prenumbered checks shall be used for each general retirement of patronage capital.

To strengthen internal control and to facilitate the settlement of estates, the board should adopt a policy specifying exactly how payments of capital credits shall be made to the estates of deceased patrons. Payments made to estates shall be recorded as follows:

Dr. 201.1, Patronage Capital Credits

Cr. 131.1, Cash—General

To record the payment of capital credits when an estate is settled by refunding 100 cents on the dollar.

Dr. 201.1, Patronage Capital Credits

Cr. 131.1, Cash—General

Cr. 217, Retired Capital Credits—Gain

To record the payment of capital credits when an estate is settled for less than the full amount of capital credited to the deceased customer's account.

Dr. 217, Retired Capital Credits—Gain

Cr. 201.2, Patronage Capital Assignable

To record the reallocation to current patrons of the amount of the discount, if provided for in the bylaws.

If a capital credit check is returned due to an inability to locate the patron, it shall be held pending a recheck of available records to ascertain the correct address of the patron. If it is determined that the patron cannot be located, the check shall be cancelled and the amount of the check debited to Account 131.1, Cash—General, and credited to Account 217, Retired Capital Credits—Gain. If the state, however, has unclaimed property laws to which the amount is subject, the amount shall be credited to Account 253, Other Deferred Credits, until final disposition has been made. A notation shall be

§ 1767.41

made in the records of the former patron to facilitate payment if his or her whereabouts is subsequently determined.

If the records show that a number of former patrons have moved and left no forwarding address, it is not necessary to prepare a capital credit retirement check for these patrons when a general retirement of capital credits is made. When setting funds aside to make a general retirement, however, appropriate amounts shall be included to cover payments due these patrons. The cooperative shall then make a reasonable effort to locate these patrons through publication of their names in the newsletter or local newspaper. If the patrons are not located, the amounts set aside and the credits to their accounts shall be handled in a manner similar to those for whom payment checks are returned.

Under the standard bylaw provisions recommended by RUS, it is not proper to use capital credits that were assigned to former patrons to liquidate their delinquent bills. When the standard bylaws are in effect and collection efforts have failed, the balance of an uncollectible bill, after application of customers deposits and membership fees, shall be charged against the accumulated provision for uncollectible accounts. If the patron has capital credits assigned to him or her, these remain untouched except for a notation to indicate the amount of the unpaid bill. When a general retirement of capital credits is made at some future date, amounts which would otherwise be due the patron may be applied to satisfy the unpaid bill with the balance refunded to him or her.

503 Operating and Nonoperating Margins

Occasionally questions arise concerning the accounting for the balances in Accounts 218, Capital Gains and Losses; 219.3, Other Margins; 219.4, Other Margins and Equities—Prior Periods; 434, Extraordinary Income; and 435, Extraordinary Deductions. The balance in these accounts shall be accounted for as follows:

1. The balance in Account 219.4, Other Margins and Equities—Prior Periods, shall be transferred, at year's end, to

7 CFR Ch. XVII (1–1–97 Edition)

Account 219.1 or 219.2, as appropriate. Accounts 219.1 and 219.2 are then closed to Account 201.2, Patronage Capital Assignable, unless otherwise provided for in the bylaws.

2. The balances in Account 434, Extraordinary Income, and Account 435, Extraordinary Deductions, shall be cleared to Account 219.2 at year's end.

3. The balances in Account 219.3, Other Margins, and Account 218, Capital Gains and Losses, shall remain in these accounts unless they are allocated to patrons or used to absorb future losses as provided for in the bylaws of the cooperative.

When a cooperative is engaged in a major merchandising activity, all costs properly chargeable to the merchandising activity shall be allocated as such to offset the associated revenue. Nonoperating margins generated from this source shall be prorated annually on a patronage basis and credited to those patrons accounts from whom such amounts were obtained. Merchandising activities of this nature may require a bylaw provision allowing for the allocation of margins generated by a major merchandising activity separate from other operating or nonoperating margins.

If, at the time of the adoption of the bylaw provisions for the allocation of nonoperating margins, there are prior years' losses resulting in debit balances in Accounts 218, Capital Gains and Losses; 219.1, Operating Margins; 219.2, Nonoperating Margins; or 219.3, Other Margins; the credit balances in Accounts 218, 219.2, or 219.3 resulting from prior years' operations shall be transferred, to the extent necessary, to offset such deficits. If the board determines that amounts shall be allocated to prior years' patrons, the credit balances remaining in these accounts shall be transferred to Account 201.2, Patronage Capital Assignable.

If there are current year's losses resulting in debit balances in either Account 219.1 or 219.2, credit balances in Accounts 219.2, 219.3, and 218 shall be transferred, to the extent necessary, to offset such deficits. Remaining credit balances allocable to patrons shall be transferred to Account 1.2.

504 Patronage Capital from G&T Cooperatives

When a cooperative receives capital credits from a G&T cooperative, the transaction shall be recorded by a debit to Account 123.1, Patronage Capital from Associated Cooperatives, and a credit to Account 423, Generation and Transmission Cooperative Capital Credits. This entry shall be made prior to the closing of the cooperative's books even though, in most cases, the notice of the G&T allocation is not received until after the close of the year to which it relates. If precise information cannot be obtained from the G&T within a reasonable time, capital credits shall be recorded on an estimated basis. The difference between the estimated amount and the actual shall be recognized in the following year unless the difference is material.

A distribution cooperative shall not recognize its proportionate share of losses incurred by the G&T. G&T losses shall be accumulated and offset as provided for in the bylaws. Unlike distribution cooperatives, a G&T has the option to offset accumulated losses with future operating and/or non-operating margins.

505 Patronage Capital Furnished by Other Cooperative Service Organizations

Utilities may obtain long-term and short-term loans, telephone or data processing services, or may purchase oil, gasoline, materials, insurance, and various items from cooperative or mutual enterprises. These enterprises often make patronage refunds or provide evidence that an amount equal to such a refund has been credited to the utility as an investment of capital. The refund may be in the form of cash in the year following the purchase or it may be deducted from the next invoice. The notice of patronage credited to the borrower's account may indicate that such capital may be retired at some future date upon certain conditions having been met. The following provides the accounting journal entries for these types of transactions:

1. Insurance policy refunds from mutual companies, in cash or as credits against subsequent purchases, shall be

credited to the appropriate expense account. If sufficient information is not available to credit the refunds to the appropriate expense accounts, they shall be credited to Account 165, Prepayments, and reduce premiums for the current year.

2. Patronage capital allocations from cooperatives, other than mutual insurance companies, shall be credited, in the year that the allocation notice is received, to Account 424, Other Capital Credits and Patronage Allocations, or to construction work-in-progress, as appropriate. The allocation of patronage capital credits between Account 424 and construction work-in-progress shall be made on an equitable basis. For example, patronage capital allocations received from a cooperative money lender are allocated between Account 424 and construction work-in-progress based upon the ratio of interest charged to construction for that particular lender to total interest expense incurred for that lender. Patronage capital allocations received from a material supplier are allocated based upon the ratio of materials charged to construction to total materials purchased.

3. The face amount of patronage capital certificates received by the cooperative from the purchase of goods or services from cooperative money lenders (CFC), oil dealers, material suppliers, pole treating plants, communications services, and others shall be charged to either Account 123.1, Patronage Capital from Associated Cooperatives, or Account 124, Other Investments, as appropriate. Account 123.1 shall include investments in only those cooperatives, or enterprises, that are directly related to the electric utility industry and controlled by the electric cooperatives. These include statewide cooperatives, power cooperatives, and NRECA. Other investments in oil cooperatives and insurance companies shall be charged to Account 124.

506 Forfeited Membership Fees

The bylaws of each cooperative prescribe certain rules and regulations concerning membership in the cooperative. Among these are provisions for forfeiture of membership fees. Some

§ 1767.41

bylaws provide for application of membership fees against any unpaid accounts at the time of termination of service. Any remaining balance may be refunded to the member. Balances that cannot be refunded to the member due to an inability to locate the member or due to bylaw restriction, shall be credited to Account 208, Donated Capital, provided they do not escheat to the state. If disposition of the fees cannot be determined immediately, the amount involved shall be transferred to Account 253, Other Deferred Credits, until the determination is made.

601 Employee Benefits

The costs of employees' fringe benefits (hospitalization, retirement, holiday, sick and vacation pay, etc.) shall be accumulated in an appropriate clearing account and allocated monthly on the basis of payroll. Vacation costs shall be accrued monthly by appropriate credits to an accrual account. These monthly accruals shall be allocated on the basis of direct payroll costs to construction and retirement with the expense portion being charged to Account 926, Employee Pensions and Benefits.

Sick leave costs are not normally accrued unless the employee is entitled to be paid for accumulated sick leave at the termination of employment. Salary payments to an employee who is actually sick shall be charged to the same account or accounts to which his or her salary is normally charged.

602 Compensated Absences

Statement of Financial Accounting Standards No. 43, Accounting for Compensated Absences (Statement No. 43), requires employers to accrue a liability as an employee earns the right to be paid for future absences. Four criteria were established for this accrual:

1. The employer's obligation for payment for future absences is attributable to employees' services already performed.
2. The obligation relates to employee rights which vest or accumulate. Vested rights are considered those for which the employer is obligated to make payment even if the employee terminates. Rights which accumulate

7 CFR Ch. XVII (1-1-97 Edition)

are those earned, but unused rights to compensated absences which may be carried forward to one or more periods subsequent to the period in which they are earned.

3. Payment of the compensation is probable.

4. The amount can be reasonably estimated.

A company's liability shall be estimated based upon payments it expects to make as a result of employees' work already performed. If a reasonable estimate cannot be made, the company shall disclose that fact in the financial statements.

Statement No. 43 does not apply to severance or termination pay, post-retirement benefits, deferred compensation, stock or stock options, group insurance, or other long-term fringe benefits.

The entries required to account for the accrual of compensated absences are as follows:

Dr. 435.1, Cumulative Effect on Prior Years of a Change in Accounting Principle

Cr. 242.3, Accrued Employees' Vacation and Holidays

To record the liability for benefits earned in prior years.

Dr. 107, Construction Work in Progress

Dr. 108.8, Retirement Work in Progress

Dr. 926, Employee Pensions and Benefits

Cr. 242.3, Accrued Employees Vacation and Holidays

To record the liability for benefits earned in the current period.

603 Employee Retirement and Group Insurance

Some borrowers have group insurance or retirement plans or both for their employees. As a general rule the cost of these programs is borne partially by the cooperative and partially by its employees. The cooperative may pay the full cost in advance and recover the employee's share through payroll deductions. The accounting for these transactions is as follows:

1. The cooperative's advanced payment of premiums on insurance and retirement agreements shall be charged to Account 165, Prepayments, for the employers portion, and Account 143, Other Accounts Receivable, for the employee's portion.

Rural Utilities Service, USDA

§ 1767.41

2. The cost of the employer's portion of a retirement and group insurance program shall be charged as follows:

a. If the participating employees work entirely on operations and maintenance, the debit shall be to Account 926, Employees Pensions and Benefits.

b. If the employees' time is charged to construction or retirement activities, the charge shall be prorated between construction, retirement, and Account 926, Employee Pensions and Benefits, in the ratio in which the employees' wages have been distributed.

604 Deferred Compensation

Many utilities participate in the NRECA Deferred Compensation Program. Based upon the provisions of the program, the following accounting entries shall be made:

Dr. 186.XX, Miscellaneous Deferred Debits—Deferred Compensation

Cr. 228.3, Accumulated Provision for Pensions and Benefits

To increase the deferred compensation provision by the amount of the annual deposit to NRECA's Deferred Compensation Fund.

Dr. 128, Other Special Funds—Deferred Compensation

Cr. 131.1, Cash—General

To record the annual deposit to NRECA's Deferred Compensation Fund.

Dr. Construction Work in Progress, Retirement Work in Progress, or Account 926, Employee Pensions and Benefits, as appropriate.

Cr. 186.XX, Miscellaneous Deferred Debits—Deferred Compensation

To record monthly accrual of deferred compensation.

NOTE: If an employee joins the deferred compensation program during the year, use entry #1 to record the additional deposit to the NRECA Deferred Compensation Fund and increase the monthly accrual in entry #2 to reflect this deposit.

NRECA provides borrowers that participate in the deferred compensation program with an annual account statement disclosing the activity for each Homestead Fund investment including the number of shares owned, interest income, dividend income, capital gains/losses, and the value of the shares owned at statement date. Funds may

be invested in the Short-term Bond Fund, the Value Fund, the Short-term Government Securities Fund, and the Daily Income Fund. Depending upon the Homestead Fund selected, invested funds may earn interest and dividend income and may experience unrealized holding gains or losses. Based upon the information provided on the annual statement, the following journal entries shall be recorded to recognize the increase or decrease in the fund assets:

Dr. 128, Other Special Funds—Deferred Compensation

Cr. 419, Interest and Dividend Income

Cr. 421, Miscellaneous Nonoperating Income

To record an increase in the fund value as of December 31, 19xx, resulting from interest and dividend income and from unrecognized holding gains on trading securities.

Dr. 926, Employee Pensions and Benefits

Cr. 228.3, Accumulated Provision for Pensions and Benefits

To record an increase in the liability to the employee resulting from an increase in the investment account.

Dr. 426.5, Other Deductions

Cr. 128, Other Special Funds—Deferred Compensation To record a decrease in fund value as of December 31, 19xx, resulting from unrecognized holding losses on trading securities.

Dr. 228.3, Accumulated Provision for Pensions and Benefits

Cr. 926, Employee Pensions and Benefits

To record a decrease in the liability to the employee resulting from a decrease in the investment account.

Payments made to participating employees because of retirement or separation for other reasons shall be recorded using the following entries:

Dr. 131.1, Cash—General

Cr. 128, Other Special Funds—Deferred Compensation

To record the receipt of funds from NRECA.

and

Dr. 228.3, Accumulated Provision for Pensions and Benefits

Cr. 131.1, Cash—General

§ 1767.41

To record payment to employee for deferred compensation.

If the borrower has elected to bear the market risk of the funds which guarantee that the amount of money an employee receives will not be less than the amount of salary deferred, the following entry shall be recorded if total payment(s) from NRECA are less than the amount of salary deferred:

Dr. 926, Employee Pensions and Benefits

Cr. 131.1, Cash—General

To record payment to employee for deferred compensation. Payment was made because amount returned did not equal salary deferred.

Appropriate disclosure of the terms of the program shall be made in the notes to the financial statements.

605 Life Insurance Premium on Life of a Borrower Employee

Some borrowers insure the life of the manager and/or key employees with the borrower being named as the beneficiary. Such arrangements shall be accounted for as follows:

1. Charge Account 426.2, Life Insurance, for the net amount of the premium paid each year on the insurance policy.

2. At the anniversary date of the policy each year, charge Account 124, Other Investments, and credit Account 426.2, Life Insurance, with the amount of the annual increase in the cash surrender value of the policy; provided such increase is less than the net premium paid for that year. If the annual increase in the surrender value exceeds the net premium paid for the same year, only that portion of the surrender value increase equal to the net premium paid shall be credited to Account 426.2. The remainder is to be credited to Account 419, Interest and Dividend Income.

3. Upon retirement of the insured employee and surrender of the insurance policy, charge Account 131.1, Cash—General, and credit Account 124, Other Investments, for the amount received from the insurance company. If it is decided to grant to the retiring insured employee all, or any portion, of the cash received upon surrender of the policy, Account 926, Employee Pen-

7 CFR Ch. XVII (1–1–97 Edition)

sions and Benefits, shall be charged and Account 131.1 credited for the amount paid to the retiring employee.

4. If the insured employee dies within his term of service, charge Account 131.1, Cash—General, for the face amount of the policy paid by the insurance company. Credit Account 124, Other Investments, for the cash surrender value previously charged thereto, and credit the remainder to Account 421, Miscellaneous Nonoperating Income.

606 Pension Costs

With the issuance of Statement of Financial Accounting Standards No. 87, Employers' Accounting for Pensions (Statement No. 87), there have been significant changes in the accounting and reporting requirements relating to pension costs. This section will highlight the accounting and reporting requirements for the major types of pension plans. It should be noted, however, that the definitions and accounting procedures outlined in this section relate to financial accounting and they may differ from those used for tax accounting.

Defined Benefit Pension Plans

A defined benefit pension plan is a plan that defines an amount of pension benefit to be provided, usually as a function of one or more factors such as age, years of service, or compensation. In a defined benefit plan, the employer promises to provide, in addition to current wages, retirement income payments in future years after the employee retires or terminates service. Generally, the amount of benefit to be paid depends upon a number of future events that are incorporated into the plan's benefit formula, after including how long the employee and any survivors live, how many years of service the employee renders, and the employee's compensation in the years immediately before retirement or termination.

Under a defined benefit plan, the determination of pension costs, assets, liabilities, and the disclosures in the financial statements require many calculations and assumptions to be made. This section provides a general overview of the accounting and reporting

requirements associated with a defined benefit pension plan. Consult Statement No. 87 for guidance in making the necessary calculations and assumption.

The accounting and reporting requirements related to a defined benefit pension plan are as follows:

1. The following components shall be included in the periodic recognition of net pension cost by an employer sponsoring a defined benefit pension plan:

- a. The service cost component recognized in a period shall be determined as the actuarial present value of benefits attributed by the pension plan formula to employee service during that period. The measurement of the service cost component requires use of an attribution method and assumptions.

- b. The interest cost component recognized in a period shall be determined as the increase in the projected benefit obligation due to the passage of time. Measuring the projected benefit obligation as a present value requires accrual of an interest cost at rates equal to the assumed discount rates.

- c. For a funded plan, the actual return on plan assets, if any, shall be determined based upon the fair value of plan assets at the beginning and the end of the period, adjusted for contributions and benefit payments.

- d. Plan amendments (including initiation of a plan) often include provisions that grant increased benefits based upon services rendered in prior period. Because plan amendments are granted with the expectation that the employer will realize economic benefits in future period, Statement No. 87 does not require the cost of providing such retroactive benefits (prior service cost) to be included in net periodic pension cost entirely in the year of the amendment but provides for recognition during the future service periods of those employees active at the date of the amendment who are expected to receive benefits under the plan.

The cost of retroactive benefits (including benefits that are granted to retirees) is the increase in the projected benefit obligation at the date of the amendment. Except as noted below, prior service cost shall be amortized by assigning an equal amount to each future period of service of each employee active at the date of the amendments

who is expected to receive benefits under the plan. If all or almost all of the plan's participants are inactive, the cost of retroactive plan amendments affecting benefits of inactive participants shall be amortized based upon the remaining life expectancy of those participants rather than the remaining service period.

To reduce the complexity and detail of the computations require, consistent use of an alternative amortization approach that more rapidly reduces the unrecognized cost of retroactive amendments is acceptable. For example, a straight-line amortization of the cost over the average remaining service period of employees expected to receive benefits under the plan is acceptable. The alternative method used shall be disclosed.

In some situations, a history of regular plan amendments and other evidence may indicate that the period during which the employee expects to realize economic benefits from an amendment granting retroactive benefits is shorter than the entire remaining service period of the active employees. Identification of such situations requires an assessment of the individual circumstances and the substance of the particular plan situation. In those circumstances, the amortization of prior service cost shall be accelerated to reflect the more rapid expiration of the employer's economic benefits and to recognize the cost in the periods benefited.

A plan amendment can reduce rather than increase the projected benefit obligation. Such a reduction shall be used to reduce an existing unrecognized prior service cost, and the excess, if any, shall be amortized on the same basis as the cost of benefit increases.

- e. Gains and losses are changes in the amount of either the projected benefit obligation or plan assets resulting from experience different from that assumed and changes in assumptions. Gains and losses include amounts that have been realized. Because gains and losses may reflect refinements in estimates as well as real changes in economic values and because some gains in one period may be offset by losses in another or vice versa, the recognition of gains and losses as components of net pension

§ 1767.41

cost of the period in which they arise, is not required.

The expected return on plan assets shall be determined based upon the expected long-term rate of return on plan assets and the market-related value of plan assets. The market-related value of plan assets shall be either fair value or a calculated value that recognizes changes in fair value in a systematic and rational manner over not more than 5 years. Different ways of calculating market-related value may be used for different classes of assets but the manner of determining market-related value shall be applied consistently from year to year for each asset class.

Asset gains and losses are the differences between the actual return on assets during a period and the expected return on assets for that period. Assets gains and losses include both changes reflected in the market-related value of assets and changes not yet reflected in the market-related value (that is, the difference between the fair value of assets and the market-related value). Asset gains and losses not yet reflected in market-related values are not required to be amortized.

As a minimum, amortization of an unrecognized gain or loss (excluding asset gains and losses not yet reflected in market-related value) shall be included as a component of net pension cost for a year if, as of the beginning of the year, that unrecognized net gain or loss exceeds 10 percent of the greater of the projected benefit obligation or the market-related value of plan assets. If amortization is required, the minimum amortization shall be that excess divided by the average remaining service period of active employees expected to receive benefits under the plan. If all or almost all of a plan's participants are inactive, the average remaining life expectancy of the inactive participants shall be used instead of average remaining service life.

Any systematic method of amortization of gains and losses may be used in lieu of the minimum specified in the previous paragraph provided that the minimum is used in any period in which the minimum is greater (reduces the net balance by more), the method is applied consistently, the method is

7 CFR Ch. XVII (1–1–97 Edition)

applied similarly to both gains and losses, and the method is disclosed.

The gain or loss component of net periodic pension cost shall consist of the difference between the actual return on plan assets and the expected return on plan assets and amortization of the unrecognized net gain or loss from previous periods.

2. A liability (unfunded accrued pension cost) shall be recognized if net periodic pension cost recognized pursuant to Statement No. 87 exceeds amounts the employer has contributed to the plan. An asset (prepaid pension cost) shall be recognized if net periodic pension cost is less than amounts the employer has contributed to the plan.

If the accumulated benefit obligation exceeds the fair value of plan assets, the employer shall recognize a liability (including unfunded accrued pension cost) that is at least equal to the unfunded accumulated benefit obligation. Recognition of an additional minimum liability is required if an unfunded accumulated benefit obligation exists and an asset has been recognized as a prepaid pension cost, the liability already recognized as unfunded accrued pension cost is less than the unfunded accumulated benefit obligation, or no accrued or prepaid pension cost has been recognized.

If an additional minimum liability is recognized, an equal amount shall be recognized as an intangible asset, provided that the asset does not exceed the amount of unrecognized prior service cost. If an additional liability required to be recognized exceeds unrecognized prior service cost, the excess (which represents a net loss not yet recognized as a net periodic pension cost) shall be reported as a separate component (reduction) of equity.

When a new determination of the amount of additional liability is made to prepare a balance sheet, the related intangible asset and separate component of equity shall be eliminated or adjusted, as necessary.

3. An employer sponsoring a defined benefit pension plan shall disclose the following information:

a. A description of the plan including employee groups covered, type of benefit formula, funding policy, types of assets held and significant nonbenefit liabilities, if any, and the nature and effect of significant matters affecting comparability of information for all period presented.

b. The amount of net periodic pension cost for the period showing separately the service cost component, the interest cost component, the actual return on assets for the period, and the net total of other components.

c. A schedule reconciling the funded status of the plan with amounts reported in the employer's balance sheet, showing separately, the fair value of plan assets, the projected benefit obligation identifying the accumulated benefit obligation and the vested benefit obligation, the amount of unrecognized prior service cost, the amount of unrecognized net gain or loss including asset gains and losses not yet reflected in market-related value), the amount of any remaining unrecognized net obligation or net asset existing at the date of initial application of Statement No. 87, the amount of any additional liability recognized, and the amount of net pension asset or liability recognized in the balance sheet (which is the net result of combining the previous six items).

d. The weighted-average assumed discount rate and rate of compensation increase (if applicable) used to measure the projected benefit obligation and the weighted-average expected long-term rate of return on plan assets.

e. If applicable, the amount and type of securities of the employer and related parties included in plan assets, and the approximate amount of annual benefits of employees and retirees covered by annuity contracts issued by the employer and related parties. Also, if applicable, the alternative amortization periods used.

f. An employer that sponsors two or more separate defined benefit pension plans shall determine net periodic pension cost, liabilities, and assets by separately applying the provisions of Statement No. 87 to each plan. In particular, unless an employer clearly has a right to use the assets of one plan to pay benefits of another, a liability re-

quired to be recognized for one plan shall not be reduced or eliminated because another plan has assets in excess of its accumulated benefit obligation or because the employer has prepaid pension cost related to another plan.

The required disclosures may be aggregated for all of an employer's single-employer defined benefit plans, or plans may be disaggregated into groups so as to provide the most useful information. Plans with assets in excess of the accumulated benefit obligation, however, shall not be aggregated with plans that have accumulated benefit obligations that exceed plan assets.

Annuity Contracts

An annuity contract is a contract in which an insurance company unconditionally undertakes a legal obligation to provide specified benefits to specific individuals in return for a fixed consideration or premium. An annuity contract is irrevocable and involves the transfer of significant risk from the employer to the insurance company. Some annuity contracts (participating annuity contracts) provide that the purchaser (either the plan or the employer) may participate in the experience of the insurance company. Under these contracts, the insurance company ordinarily pays dividends to the purchaser. If the substance of a participating contract is such that the employer remains subject to all or most of the risks and rewards associated with the benefit obligation covered and the assets transferred to the insurance company, that contract is not an annuity contract for purposes of Statement No. 87.

To the extent that benefits currently earned are covered by annuity contracts, the cost of these benefits shall be the cost of purchasing the contracts, except as noted below. That is, if all benefits attributed by the plan's benefits formula to service in the current period are covered by nonparticipating annuity contracts, the cost of the contracts determines the service cost component of net pension cost for that period.

Benefits provided by the pension benefit formula beyond benefits provided by annuity contracts (for example, benefits related to future compensation

levels) shall be accounted for according to the provisions applicable to plans not involving insurance contracts.

Benefits covered by annuity contracts shall be excluded from the projected benefit obligation and the accumulated benefit obligation. Except as noted below, annuity contracts shall be excluded from plan assets.

Some annuity contracts provide that the purchaser (either the plan or the employer) may participate in the experience of the insurance company. Under these contracts, the insurance company ordinarily pays dividends to the purchaser, the effect of which is to reduce the cost of the plan. The purchase price of a participating annuity contract ordinarily is higher than the price of an equivalent contract without participation rights. The cost of the participation right shall be recognized, at the date of purchase, as an asset. In subsequent periods, the participation right shall be measured at its fair value if the contract is such that the fair value is reasonably estimable. Otherwise, the participation right shall be measured at its amortized cost (not in excess of its net realizable value), and the cost shall be amortized systematically over the expected dividend period under the contract.

Other Contracts with Insurance Companies

Insurance contracts that are, in substance, equivalent to the purchase of annuities shall be accounted for as such. Other contracts with insurance companies shall be accounted for as investments and measured at fair value. For some contracts, the best available evidence of fair value may be contract value. If a contract has a determinable cash surrender value or conversion value, that is presumed to be its fair value.

Defined Contribution Plans

A defined contribution pension plan is a plan that provides pension benefits in return for services rendered, provides an individual account for each participant, and has terms that specify how contributions to the individual's accounts are to be determined rather than the amount of pension benefits the individual is to receive. Under a de-

finer contribution plan, the pension benefits a participant will receive depend only upon the amount contributed to the participant's account, the returns earned on investments of those contributions, and forfeitures of other participants' benefits that may be allocated to the participant's account.

To the extent that a plan's defined contributions to an individual's account are to be made for periods in which that individual renders services, the net pension cost for a period shall be the contribution called for in that period. If a plan calls for contributions for periods after an individual retires or terminates, the estimated cost shall be accrued during the employee's service period.

An employer that sponsors one or more defined contribution plans shall disclose the following separately from its defined benefit plan disclosures:

1. A description of the plan(s) including employee groups covered, the basis for determining contributions, and the nature and effect of significant matters affecting comparability of information for all periods presented.
2. The amount of cost recognized during the period.

A pension plan having characteristics of both a defined benefit plan and a defined contribution plan requires careful analysis. If the substance of the plan is to provide a defined benefit, as may be the case with some "target benefit" plans, the accounting and disclosure requirements shall be determined in accordance with the provisions applicable to a defined benefit plan.

Multiemployer Plans

A multiemployer plan is a pension plan to which two or more unrelated employers contribute, usually pursuant to one or more collective-bargaining agreements. A characteristic of multiemployer plans is that assets contributed by one participating employer may be used to provide benefits to employees of other participating employers since assets contributed by an employer are not segregated in a separate account or restricted to provide benefits only to employees of that employer.

Rural Utilities Service, USDA

§ 1767.41

An employer participating in a multiemployer plan shall recognize as net pension cost, the required contribution for the period and shall recognize as a liability, any contributions due and unpaid. The required contribution includes both current costs and prior service costs. If an employer elects to fund prior service cost in full at the inception of the plan, the total payment becomes the employer's required contribution, and accordingly, its pension cost for the period.

The following provisions are applicable to RUS borrowers participating in a multiemployer pension plan:

1. An electric utility participating in a multiemployer plan may defer current period pension expenses if the provisions of Statement of Financial Accounting Standards No. 71 (Statement No. 71), Accounting for the Effects of Certain Types of Regulation, are applied.

Under the provisions of Statement No. 71, pension costs may be deferred provided such costs are recovered through future rates.

2. An electric utility instituting an amendment to the NRECA Retirement and Security plan enters into a contractual agreement to pay the costs incurred (prior service pension costs) for the amendment. In such cases, the agreement is noncancelable and payable regardless of continued participation in the plan.

Since the utility is unconditionally committed to making these payments and such payments are not contingent upon the utility's continued participation in the plan, the recognition of that liability is appropriate. The costs associated with this liability shall be expensed, in their entirety, when the liability is recognized.

The accounting journal entries required to record the transactions associated with a multiemployer pension plan are as follows:

SAMPLE 1—CURRENT PENSION EXPENSE

The journal entry required to record the normal costs associated with the NRECA Retirement and Security Program is as follows:

Dr. 926, Employee Pensions and Benefits
Dr. 107, Construction Work-in-Progress
Dr. 108.8, Retirement Work-in-Progress
Cr. 131.1, Cash—General

To record the payment of pension costs to NRECA.

NOTE: This entry shall not be recorded during the moratorium.

SAMPLE 2—PRIOR SERVICE PENSION EXPENSE

The journal entries required to record the prior service costs associated with the NRECA Retirement and Security Program are as follows:

1. If the RUS borrower elects to pay the prior service pension costs in full, and there is no deferral of costs under the provision of Statement No. 71, the following entry shall be recorded:

Dr. 926, Employee Pensions and Benefits
Dr. 107, Construction Work-in-Progress
Dr. 108.8, Retirement Work-in-Progress
Cr. 131.1, Cash—General

To record the payment of prior service pension costs to NRECA.

2. If the RUS borrower elects to finance prior service pension costs over a period of years and there is no deferral of costs under the provisions of Statement No. 71, the following entries shall be recorded:

Dr. 926, Employee Pensions and Benefits
Dr. 107, Construction Work-in-Progress
Dr. 108.8, Retirement Work-in-Progress
Cr. 224, Other Long-Term Debt

To record the liability to NRECA for prior service pension costs.

Dr. 224, Other Long-Term Debt
Dr. 427, Interest on Long-Term Debt
Cr. 131.1, Cash—General

To record the annual payment to NRECA for prior service pension costs.

3. If the RUS borrower elects to finance prior service pension costs over a period of years and such costs are being deferred and amortized in accordance with the provisions of Statement No. 71, the following entries shall be recorded:

Dr. 182.3, Other Regulatory Assets
Cr. 224, Other Long-Term Debt

To record the liability to NRECA for prior service pension costs.

Dr. 926, Employee Pension and Benefits
Dr. 107, Construction Work-in-Progress
Dr. 108.8, Retirement Work-in-Progress
Cr. 182.3, Other Regulatory Assets

To record the amortization of deferred prior service pension costs.

Dr. 224, Other Long-Term Debt
Dr. 427, Interest on Long-Term Debt
Cr. 131.1, Cash—General

To record the annual payment to NRECA for prior service pension costs.

4. If the RUS borrower elects to pay the prior service pension costs in full and such costs are being deferred and amortized in accordance with the provisions of Statement No. 71, the following entries shall be recorded:

Dr. 182.3, Other Regulatory Assets
Cr. 131.1, Cash—General

§ 1767.41

To record the payment to NRECA for prior service pension costs.

Dr. 926, Employee Pensions and Benefits

Dr. 107, Construction Work-in-Progress

Dr. 108.8, Retirement Work-in-Progress

Cr. 182.3, Other Regulatory Assets

To record the amortization of deferred prior service pension costs.

It should be noted that although the above entries relate specifically to the NRECA Retirement and Security Program, they are applicable to all multi-employer pension plans.

An employer that participates in one or more multiemployer plans shall disclose the following separately from disclosures for a single-employer plan:

1. A description of the multiemployer plan(s) including the employee groups covered, the type of benefits provided (defined benefit or defined contribution), and the nature and effect of significant matters affecting comparability of information for all periods presented.

2. The amount of cost recognized during the period.

Multiple-Employer Plans

A multiple-employer plan is, in substance, aggregations of single-employer plans combined to pool their assets for investment purposes to reduce the cost of plan administration. Under a multiple-employer plan, assets are segregated and specifically identified to an employer. In addition, such plans may have features that allow participating employers to have different benefit formulas. Such plans shall be considered single-employer plans for financial accounting purposes and each employer's accounting shall be based upon its respective interest in the plan.

607 Unproductive Time

Lost time relating to construction, operations and maintenance shall be allocated on the basis of direct payroll costs to the appropriate construction, operations or maintenance accounts in the month incurred. Lost time is defined as time on duty during which productive work is not performed due to inclement weather conditions, material shortages, machine repairs, or other reasons.

If lost time attributable to construction has a material effect on the con-

7 CFR Ch. XVII (1-1-97 Edition)

struction accounts in any one month, these costs shall be deferred and distributed over a reasonable period of time by means of a predetermined percentage based upon direct labor.

608 Training Costs, Attendance at Meetings, etc.

Utilities engage in many types of training programs. Seminars are conducted for directors, managers, office managers, attorneys, engineers, and others. Bookkeepers and office managers attend accountants' meetings. Safety engineers attend safety schools and subsequently conduct regular safety meetings at the cooperative. Costs incurred for the various types of training activities shall be accounted for as follows:

1. Managers' and directors' expenses to attend the NRECA national and state conventions shall be charged to Account 930.2, Miscellaneous General Expenses.

2. Management or engineering seminar fees, salary time attending such seminars, and the related per diem and expenses shall be charged to Account 926, Employee Pensions and Benefits, if the meeting is primarily for the benefit of the employee. If the meeting is primarily for the benefit of the employer, the functional expense accounts shall be charged for fees and expenses. Salaries paid to employees shall be charged to the appropriate labor expense accounts rather than to Account 926. Fees and expenses for directors' attendance shall be charged to Account 930.2, Miscellaneous General Expenses.

3. When the office manager, bookkeeper, or work order clerk attends a state or regional accounting meeting, their salary time shall be charged to the account to which the employees' time is ordinarily charged.

4. Employees' salary time spent attending regular safety meetings conducted by the cooperative shall be charged to the account to which the employees' time is ordinarily charged.

5. A safety engineer's salary time spent attending a statewide safety school shall be charged to Account 925, Injuries and Damages.

6. The salary time spent by a manager or line foreman conducting weekly safety meetings shall be charged to

Rural Utilities Service, USDA

\$1767.41

the appropriate functional expense accounts including Account 590, Maintenance, Supervision and Engineering, and Account 920, Administrative and General Services.

609 Maintenance and Operations

“Operations” is the general term used to describe activities involved in the delivery of electric service, by means of a distribution system, to the end user. It pertains to the use of the utility’s electric plant facilities and does not include activities intended to prevent or remedy an impending or actual breakdown of those facilities. These activities are classified as maintenance.

“Maintenance” is the general term used to describe the activities involved in the upkeep and repair, but not the enlargement or improvement, of property owned or leased and operated by the company. It does not include the replacement of retirement units.

610 Financial Forecast

Costs incurred and salaries paid to perform a 10-year financial forecast shall be charged to Account 920, Administrative and General Salaries. Related office supplies and expenses shall be charged to Account 921, Office Supplies and Expenses. When a forecast is performed by an outside consultant, the cost shall be charged to Account 923, Outside Services Employed.

611 Advertising Expense

The cost of advertising and the cost of informing the public about the electric cooperative’s activities shall be charged to Account 930.2, Miscellaneous General Expenses.

Most of a cooperative’s advertising is instructional in nature and relates the cooperative’s history and current activities. This type of advertising activity should not be confused with that directed towards the enactment of a specific law or laws directed toward obtaining a specific decision from a regulatory body. Political advertising of the type defined above shall be charged to Account 426.4, Expenditures for Certain Civic, Political, and Related Activities.

612 Special Power Cost Study

A special power cost study is defined as a study to determine whether sufficient power will be available in the future. If additional power or power sources are needed, the study determines whether generation or purchase will supply the lesser cost. The study also indicates when additional power will be needed. As costs are incurred, they shall be charged to a subaccount of Account 186, Miscellaneous Deferred Debits. Upon completion of the study, the costs shall be charged to Account 557, Other Expenses, or amortized to Account 557 over a period of time not to exceed 5 years.

613 Mapping Costs

The purpose of posting completed work orders to system maps is to improve the operation of the system. These costs shall, therefore, be charged to Account 588, Miscellaneous Distribution Expenses. However, the cost of system mapping in the planning stage of construction is an acceptable overhead cost of the resulting construction.

614 Member Relations Costs

Many electric cooperatives hire employees whose duties concern a mixture of power use and member relations activities. The salaries for these employees shall be charged to Account 930.2, Miscellaneous General Expenses, except as provided below:

1. Account 912, Demonstrating and Selling Expenses, shall be charged with all labor, material, advertising, and other expenses incurred in promotional, demonstrating, and selling activities; the objective of which is to promote or retain the use of utility services by present or prospective customers.

2. Account 930.1, General Advertising Expenses, shall be charged with labor, material, and other expenses incurred in advertising and related activities, the cost of which by their content and purpose, are not provided for elsewhere.

3. Account 416, Costs and Expenses of Merchandising, Jobbing, and Contract Work, shall be charged with all costs specifically related to merchandising

§ 1767.41

activities when the utility is engaged in a major merchandising program.

4. Account 426.4, Expenditures for Certain Civic, Political, and Related Activities, shall be charged with expenditures for the purpose of influencing public opinion with respect to the election or appointment of public officials, referenda, legislation, or ordinances (either with respect to the possible adoption of new referenda, legislation or ordinances or repeal or modification of existing referenda, legislation or ordinances); or approval, modification, or revocation of franchises; or for the purpose of influencing the decisions of public officials. Account 426.4 shall not include expenditures which are directly related to appearances before regulatory or other governmental bodies in connection with the borrower's existing or proposed operations.

615 Statewide Fees

Additional fees collected by a statewide association from its members for construction of a statewide building shall be charged to Account 930.2, Miscellaneous General Expenses. Any amounts that are to be repaid by the state association shall be charged to Account 143, Other Accounts Receivable, or Account 123.23, Other Investments in Associated Organizations, depending upon the terms of the repayment.

616 Power Supply/Distribution Cooperative Borrowings

When a power supply cooperative borrows money from a distribution cooperative as the result of a long-term loan agreement, the money shall be recorded on the books of the power supply cooperative as general funds unless restricted to a specific purpose. If restricted, the funds shall be recorded in Account 128, Other Special Funds. The resulting liability shall be recorded in Account 224, Other Long-Term Debt.

The transaction shall be charged to Account 123.23, Other Investments in Associated Organizations, on the books of the distribution cooperative.

7 CFR Ch. XVII (1–1–97 Edition)

617 Rate Discount Allowed by the Power Cooperative to Distribution Cooperatives Owning Connecting Transmission Lines

A distribution cooperative purchases power from a power cooperative. The distribution cooperative owns and operates the transmission line between the power cooperative's facilities and the distribution facilities. Because of this, power is sold at the standard rate at which the power cooperative sells to other distribution cooperatives who do not own their transmission lines, less a discount. The discount or reduction in rate is based upon the distribution cooperative's expense in operating and maintaining its transmission facilities. The contract between the power cooperative and the distribution cooperative must specifically state that the member shall receive a reduced rate or discount from the seller's rate to other member cooperatives.

Under this type of arrangement, the distribution cooperative shall record the cost of purchased power by charging the net amount to Account 555, Purchased Power.

618 Theft Losses not Covered by Insurance

Utilities may suffer losses as a result of thefts of cash, materials and supplies, equipment, or electric plant-in-service that is not covered by insurance. The charges for nominal uninsured losses shall be recorded in the following accounts:

1. Cash—Account 924, Property Insurance, shall be charged.

2. Plant materials and operating supplies—Account 163, Stores Expense Undistributed, shall be charged.

3. Equipment—Account 163, Stores Expense Undistributed, shall be charged for stores equipment; Account 184, Transportation Expense—Clearing, for transportation and garage equipment; and Account 924, Property Insurance, for all other equipment.

4. Electric Plant-in-Service—A retirement work order shall be prepared for electric plant constituting a unit of property. The loss due to retirement

Rural Utilities Service, USDA

§ 1767.41

shall be charged to Account 108.6, Accumulated Provision for Depreciation of Distribution Plant. If the plant does not constitute a retirement unit, the loss shall be charged to the appropriate maintenance expense account.

619 Self Billing

To maintain the books of accounts on an accrual basis, bills for customers who self bill and have not sent in a reading or remittance, shall be estimated. A journal entry shall be made to record the estimated revenue and kWh sold by debiting accounts receivable and crediting the appropriate revenue accounts. The estimated bill shall be posted to the customer's account and identified by an appropriate symbol indicating that it is an estimate. Reconciliation with the general ledger control is made in the usual manner.

620 Purchase Rebates

Some vendors from which electric cooperatives purchase plant materials and supplies and merchandise for resale are making purchase rebates based upon the quantity or dollar volume of purchases. These "quantity discounts" may be in the form of cash or credit memoranda, in the form of prepaid package travel arrangements, or a combination of such methods. The rebate shall be accounted for as a reduction in the cost of the material or appliances upon which it was based.

In some instances, the rebate may be for material or appliances that are no longer in stock or cannot be identified. If the rebate is based upon the purchase of plant materials and operating supplies that are normally charged to Account 154, Plant Materials and Operating Supplies, a credit shall be made to Account 163, Stores Expense Undistributed. If the rebate is based upon appliances and equipment held for merchandising or contract work, the credit shall be spread over the items in Account 155, Merchandise. To avoid materially distorting the cost of the remaining appliances, if a portion of the items upon which the rebate was based are no longer in stock, a portion of the credit shall be prorated to Account 416, Cost and Expenses of Merchandising, Jobbing, and Contract Work, on the

basis of the number of items sold to the quantity remaining in stock.

If the rebate is in the form of a travel package or travel arrangements, the value of the rebate shall be estimated and recorded as a reduction of the cost of the material or appliances upon which it was based in a manner similar to that of the cash rebates discussed above. The beneficiary of the travel or travel allowance shall be designated by or in accordance with policy established by the board of directors. The contra charge to the reduction in cost shall be to an appropriate account depending upon the relationship of the recipient to the cooperative. For employees, this shall be Account 926, Employee Pensions and Benefits; for directors or patrons, Account 930.2, Miscellaneous General Expenses.

621 Integrity Fund

The CFC Integrity Fund was established to assist borrowers in their attempts to stop takeover bids by investor-owned utilities. A borrower makes a contribution to the Integrity Fund in the form of cash or patronage capital refunds. CFC retains the contribution for a 5-year period during which time the borrower earns interest on the balance in its account. Each year, the borrower receives a statement indicating (both for the total fund and the individual borrower's share) the amount contributed, interest earned, disbursements made, and the ending balance. The disbursements from the fund are allocated to each contributing borrower's account based upon their individual account balances. At the end of the 5-year period, the balance in the account, if any, is refunded to the contributing borrower.

Since the contributing borrower will receive a refund only if its funds are not totally disbursed, the contribution shall be charged to expense in Account 426.1, Donations. If any part of the contribution is returned at the end of the 5-year period, the refund shall be credited to Account 421, Miscellaneous Nonoperating Income.

622 In-Substance Defeasance

An in-substance defeasance has been defined as the process whereby a debtor irrevocably places cash or other assets

in a trust to be used solely for the purpose of satisfying scheduled payments of both principal and interest related to a specific debt obligation. Under the structural arrangements of an in-substance defeasance, the probability that the debtor will be required to make additional future debt payments is remote. In these specific circumstances, debt has been determined to be extinguished even though the debtor has not been legally released from his obligations under the debt instrument.

The trust established in a defeasance transaction is restricted as to the nature of the assets held. The trust must be funded with monetary assets that are essentially risk free as to the amount, timing, and collection of interest and principal. For debt denominated in United States dollars, “risk free” assets are limited to:

1. Direct obligations of the United States government;
2. Obligations guaranteed by the United States government; and
3. Securities that are backed by United States government obligations as collateral under an arrangement by which the interest and principal payments on the collateral, flow immediately through to the holder of the security.

The monetary assets of the trust must provide cash flows sufficient to coincide with the scheduled interest and principal payments on the defeased debt. If the trust is expected to pay the costs associated with the defeasance, such as trustee fees, these costs must be considered in determining the amount of funds required by the trust.

The principles of in-substance defeasance apply only to debt with specific maturities and fixed payment schedules and, as such, do not apply to debt with variable terms in which advance determination of debt service requirements is not possible.

Generally accepted accounting principles (GAAP) address the extinguishment of debt in Accounting Principles Board Opinion No. 26, and Statement of Financial Accounting Standard No. 76, Extinguishment of Debt. In accordance with these two statements, debt which has been defeased remains recorded in the regulated books of account as do the assets placed in the irrevocable

trust. They are not, however, recognized as an asset and liability for financial reporting purposes. The transaction, including the total amount of debt outstanding and the total amount of debt that is considered extinguished at the end of the period, must be disclosed in the footnotes to the financial statements as long as the debt remains outstanding.

Debt is frequently extinguished before its scheduled maturity. Debt may be extinguished by the use of the borrower's general funds, or by the reacquisition of another debt issue at a different interest rate or varying terms. As these assets are expected to be revenue producing during those years, both the assets and the revenue they generate may be utilized to meet maturing debt payments. Therefore, in most instances, the dollar value of the assets initially placed in the trust do not equal the dollar value of the outstanding principal balance. The difference represents an “economic” gain or loss to the borrower.

To provide consistency in reporting among all RUS borrowers, any gain or loss that is recognized for financial statement purposes should be reported in accordance with the provisions of General Instruction No. 17 of this part. Therefore, the gain or loss should be amortized (for reporting purposes) in equal monthly amounts over the remaining life of the original debt issue or the remaining life of the new issue. The gain or loss may be reported in the current period only in those instances in which it is immaterial to the financial statements.

The RUS Form 7, Financial and Statistical Report, and the RUS Form 12, Operating Report—Financial, must, however, reflect the actual amounts recorded in the books and records of the borrower.

623 Satellite or Cable Television Services

Many electric borrowers have become involved in either providing satellite or cable television services or obtaining satellite or cable television services for their own use. This section outlines the accounting to be followed when recording transactions involving satellite or cable television services.

Rural Utilities Service, USDA

§ 1767.41

1. *Separate Subsidiary*

If a borrower provides satellite or cable television services through a separate subsidiary, the investment in the subsidiary shall be recorded in Account 123.11, Investment in Subsidiary Companies. The net income or loss of the subsidiary shall be debited or credited to Account 123.11, as appropriate, with an offsetting entry to Account 418.1, Equity in Earnings of Subsidiary Companies.

2. *Segment of Current Operations*

If a borrower provides satellite or cable television services as part of its normal operations, the investment in satellite or cable television equipment shall be recorded in Account 121, Non-utility Property. All income associated with these services shall be recorded in Account 417, Revenues from Nonutility Operations, and the associated expenses shall be charged to Account 417.1, Expenses of Nonutility Operations.

3. *Sale and Installation of Satellite or Cable Television Equipment*

If a borrower sells or installs satellite or cable television equipment, the equipment purchased for resale shall be recorded in Account 156, Other Materials and Supplies, until sold. The revenues generated from such sales or installations shall be recorded in Account 415, Revenues from Merchandising, Jobbing, and Contract Work, and the associated expenses shall be charged to Account 416, Costs and Expenses of Merchandising, Jobbing, and Contract Work.

4. *Equipment Purchased for Own Use*

If a borrower purchases satellite or cable television equipment for its own use, the investment in the equipment shall be recorded in Account 397, Communication Equipment.

624 Pollution Control Bonds

The construction and installation of pollution control facilities are often financed by issuing tax exempt municipal securities. The funds generated from the sale of these securities are deposited into an account that is controlled by a designated trustee. The funds under the control of the trustee

are usually invested, earning interest, until they are needed.

Interest expense accrued on the pollution control bonds during the construction period shall be capitalized in Account 107, Construction Work-in-Progress. After construction is complete, all subsequent accruals of interest expense shall be charged to Account 427, Interest on Long-Term Debt.

Interest income earned during the construction period shall be recorded as a debit to Account 171, Interest and Dividends Receivable, and a credit to Account 107, Construction Work-in-Progress. Upon notification of receipt of the interest in the trustee account, Account 221.XX, Long-Term Debt—Pollution Control Bonds, shall be debited and Account 171, Interest and Dividends Receivable shall be credited. Upon completion of construction, Account 419, Interest and Dividend Income, shall be credited for the amount of interest income earned during the period.

The entries required to account for the transactions associated with the issuance of pollution control bonds are as follows:

Dr. 221.XX, Long-Term Debt—Pollution Control Bonds—Trustee

Cr. Account 221.X1, Long-Term Debt—Pollution Control Bonds

To record the sale of pollution control bonds.

Dr. 107, Construction Work-in-Progress

Cr. 232, Accounts Payable

To record costs incurred in construction of pollution control facilities.

Dr. 131.1, Cash—General Funds

Cr. 221.XX, Long-Term Debt—Pollution Control Bonds—Trustee

To record the transfer of funds from the trustee.

Dr. 107, Construction Work-in-Progress

Cr. 221.XX, Long-Term Debt—Pollution Control Bonds—Trustee

To record interest expense on pollution control bonds.

Dr. 171, Interest and Dividends Receivable

Cr. 107, Construction Work-in-Progress

To record earnings from investments made by the trustee.

Dr. 221.XX, Long-Term Debt—Pollution Control Bonds—Trustee

Cr. 171, Interest and Dividends Receivable

To record receipt of interest income by the trustee account.

Dr. XXX, Various Plant Accounts

Cr. 107, Construction Work-in-Progress

To close completed construction to the primary plant accounts.

§ 1767.41

625 Prepayment of Debt

Many RUS borrowers have decided to redeem (prepay) their issues of long-term debt. As a result of this redemption, the borrower may incur a gain (discount) or a loss (penalty) on the early extinguishment of debt. The accounting for this gain or loss is highlighted in this section.

If debt is redeemed without refunding (paid with general funds), the gain or loss incurred shall be recorded in Account 189, Unamortized Loss on Reacquired Debt, or Account 257, Unamortized Gain on Reacquired Debt, as appropriate. The borrower shall amortize the recorded deferral on a monthly basis over the remaining life of the old debt issue. Amounts so amortized shall be charged to Account 428.1, Amortization of Loss on Reacquired Debt, or credited to Account 429.1, Amortization of Gain on Reacquired Debt—Credit, as appropriate.

If the debt is redeemed with refunding (refinanced), the gain or loss incurred shall be recorded in Account 189 or Account 257, as appropriate. The borrower may elect to account for the deferrals as follows:

1. Write them off immediately when the amounts are insignificant;
2. Amortize them by equal monthly amounts over the remaining life of the old debt issue; or
3. Amortize them by equal monthly amounts over the life of the new debt issue.

Once an election has been made, it shall be applied on a consistent basis. Regardless of the option selected, the amortization shall be charged to either Account 428.1 or 429.1, as appropriate.

Where a regulatory authority having jurisdiction over the borrower specifically disallows the rate principle of amortizing gains or losses on the redemption of long-term debt without refunding, and does not apply the gain or loss to interest charges in computing the borrower's rates, the alternative method may be used to account for gains or losses relating to the redemption of long-term debt with or without refunding. The alternative method requires that gains or losses be recorded in Account 421, Miscellaneous Nonoperating Income, or Account 426.5,

7 CFR Ch. XVII (1–1–97 Edition)

Other Deductions, as incurred. When the alternative method is used, the borrower shall include a footnote to the financial statements stating the reason for using this method and its treatment for rate making purposes.

626 Rural Economic Development Loan and Grant Program

On December 21, 1987, Section 313, Cushion of Credits Payments Program, was added to the Rural Electrification Act. Section 313 establishes a Rural Economic Development Subaccount and authorizes the Administrator of the Rural Utilities Service to provide zero interest loans or grants to RE Act borrowers for the purpose of promoting rural economic development and job creation projects.

Subpart B, Rural Economic Development Loan and Grant Program, 7 CFR Part 1703, sets forth the policies and procedures relating to the zero interest loan program and for approving and administering grants.

The accounting journal entries required to record the transactions associated with a rural economic development loan are as follows:

Dr. 224.17, RUS Notes Executed—Economic Development—Debit

Cr. 224.16, Long-Term Debt—RUS Economic Development Notes Executed

To record the contractual obligation to RUS for the Economic Development Notes.

Dr. 131.12, Cash—General—Economic Development Funds

Cr. 224.17, RUS Notes Executed—Economic Development—Debit

To record the receipt of the economic development loan funds.

Dr. 123, Investment in Associated Organizations or

Dr. 124, Other Investments

Cr. 131.12, Cash—General—Economic Development Funds

To record the disbursement of Economic development loan funds to the project.

Dr. 131.1, Cash—General Funds

Cr. 421, Miscellaneous Nonoperating Income

To record payment received from the project for loan servicing charges.

Rural Utilities Service, USDA

§1767.41

Dr. 171, Interest and Dividends Receivable

Cr. 419, Interest and Dividend Income

To record the interest earned on the investment of rural economic development loan funds.

Dr. 426.1, Donations or

Dr. 426.5, Other Deductions

Cr. 131.1, Cash—General Funds

To record the payment of interest earned in excess of \$500.00 on the investment of rural economic development loan funds.

NOTE: Interest earned in excess of \$500.00 must be used for the rural economic development project for which the loan funds were received or returned to RUS.

Dr. 131.12, Cash—General—Economic Development Funds

Cr. 123, Investment in Associated Organizations or

Cr. 124, Other Investments

To record receipt of the repayment, by the project, of economic development loan funds.

Dr. 224.16, Long-Term Debt—RUS Economic Development Notes Executed

Cr. 131.12, Cash—General—Economic Development Funds

To record the repayment, to RUS, of the economic development loan funds.

The accounting journal entries required to record the transactions associated with a rural economic development grant are as follows:

Dr. 131.13, Cash—General—Economic Development Grant Funds

Cr. 224.18, Other Long-Term Debt—Grant Funds;

Cr. 208, Donated Capital; or

Cr. 421, Miscellaneous Nonoperating Income

To record grant funds disbursed by RUS. If the grant agreement requires repayment of the funds upon termination of the revolving loan program, Account 224.18 should be credited. If the grant agreement states that there is absolutely no obligation for repayment upon termination of the revolving loan program, the funds should be accounted for as a permanent infusion of capital by crediting Account 208. If, however, the grant agreement is silent as to the final disposition of the grant funds, Account 421 should be credited.

Dr. 123.3, Investment in Associated Organizations—Federal Economic Development Loans

Cr. 131.13, Cash—General—Economic Development Grant Funds

To record advances of Federal funds to associated organizations for authorized rural economic development projects.

Dr. 124.1, Other Investments—Federal Economic Development Loans

Cr. 131.13, Cash—General—Economic Development Grant Funds

To record advances of Federal funds to nonassociated organizations for authorized rural economic development projects.

Dr. 171, Interest and Dividends Receivable

Cr. 419, Interest and Dividend Income

To record the accrual of interest on loans made to associated and nonassociated organizations with Federal funds for authorized rural economic development projects.

Dr. 131.14, Cash—General—Economic Development Non-Federal Revolving Funds

Cr. 123.3, Investment in Associated Organizations—Federal Economic Development Loans or

Cr. 124.1, Other Investments—Federal Economic Development Loans

To record repayment of loans made with Federal funds.

Dr. 123.4, Investment in Associated Organizations—Non-Federal Economic Development Loans

Cr. 131.14, Cash—General—Economic Development Non-Federal Revolving Funds

To record advances of non-Federal funds to associated organizations for authorized rural economic development projects.

Dr. 124.2, Other Investments—Non-Federal Economic Development Loans

Cr. 131.14, Cash—General—Economic Development Non-Federal Revolving Funds

To record advances of non-Federal funds to nonassociated organizations for authorized rural economic development projects.

Dr. 171, Interest and Dividends Receivable

Cr. 419, Interest and Dividend Income

§ 1767.41

To record the accrual of interest on loans made to associated and nonassociated organizations with non-Federal funds for authorized rural economic development projects.

Dr. 131.14, Cash—General—Economic Development Non-Federal Revolving Funds

Cr. 123.4, Investment in Associated Organizations—Non-Federal Economic Development Loans or

Cr. 124.2, Other Investments—Non-Federal Economic Development Loans

To record repayment of loans made with non-Federal funds.

627 Postretirement Benefits

Statement of Financial Accounting Standards No. 106, Employers' Accounting for Postretirement Benefits Other than Pensions (Statement No. 106), requires reporting entities to accrue the expected cost of postretirement benefits during the years the employee provides service to the entity. For purposes of applying the provisions of Statement No. 106, members of the board of directors are considered to be employees of the cooperative. Prior to the issuance of Statement No. 106, most reporting entities accounted for postretirement benefit costs on a "pay-as-you-go" basis; that is, costs were recognized when paid, not when the employee provided service to the entity in exchange for the benefits.

As defined in Statement No. 106, a postretirement benefit plan is a deferred compensation arrangement in which an employer promises to exchange future benefits for an employee's current services. Postretirement benefit plans may be funded or unfunded. Postretirement benefits include, but are not limited to, health care, life insurance, tuition assistance, day care, legal services, and housing subsidies provided outside of a pension plan.

This statement applies to both written plans and to plans whose existence is implied from a practice of paying postretirement benefits. An employer's practice of providing postretirement benefits to selected employees under individual contracts with specified terms determined on an employee-by-

7 CFR Ch. XVII (1-1-97 Edition)

employee basis does not, however, constitute a postretirement benefit plan under the provisions of this statement.

Postretirement benefit plans generally fall into three categories: single-employer defined benefit plans, multiple-employer plans, and multiple-employer plans.

The accounting requirements set forth in this interpretation focus on single- and multiple-employer plans. The accounting requirements set forth in Statement No. 106 for multiemployer plans or defined contribution plans shall be adopted for borrowers electing those types of plans.

Under the provisions of Statement No. 106, there are two components of the postretirement benefit cost: the current period cost and the transition obligation. The transition obligation is a one-time accrual of the costs resulting from services already provided. Statement No. 106 allows the transition obligation to be deferred and amortized on a straight-line basis over the average remaining service period of the active employees. If the average remaining service life of the employees is less than 20 years, a 20-year amortization period may be used.

Accounting Requirements

All RUS borrowers must adopt the accrual accounting provisions and reporting requirements set forth in Statement No. 106. The transition obligation and accrual of the current period cost must be based upon an actuarial study. This study must be updated to allow the borrower to comply with the measurement date requirements of Statement No. 106; however, the study must, at a minimum, be updated every five years. RUS will not allow electric borrowers to account for postretirement benefits on a "pay-as-you-go" basis.

The deferral and amortization of the transition obligation does not require RUS approval provided that it complies with the provisions of Statement No. 106. If, however, a borrower elects to expense the transition obligation in the current period and subsequently defer this expense in accordance with Statement of Financial Accounting Standards No. 71, Accounting for the Effects of Certain Types of Regulation,

Rural Utilities Service, USDA

§ 1767.41

the deferral must be approved by RUS. In those states in which the commission will not allow the recovery of the transition obligation through future rates, the transition obligation must be expensed, in its entirety, in the year in which Statement No. 106 is adopted. A portion of the transition obligation may be charged to construction and retirement activities provided such charges are properly supported.

Effective Date and Implementation

For plans outside the United States and for defined benefit plans of employers that (a) are nonpublic enterprises and (b) sponsor defined benefit postretirement plans with no more than 500 plan participants in the aggregate, Statement No. 106 is effective for fiscal years beginning after December 15, 1994. For all other plans, Statement No. 106 is effective for fiscal years beginning after December 15, 1992.

RUS borrowers must comply with the implementation dates set forth in Statement No. 106. At the time of the adoption of Statement No. 106, rates must be in place sufficient to recover the current period expense and any amortization of the transition obligation. A copy of a board resolution or commission order, as appropriate, indicating that the transition obligation and current period expense have been included in the borrower's rates must be submitted to RUS.

Accounting Journal Entries—Transition Obligation

The journal entries required to record the transition obligation are as follows:

1. If the borrower elects to expense the transition obligation in the current period and there is no deferral of costs, the following entry shall be recorded:

Dr. 435.1, Cumulative Effect on Prior Years of a Change in Accounting Principle or
Dr. 926, Employee Pensions and Benefits
Dr. 107, Construction Work in Progress
Dr. 108.8, Retirement Work in Progress
Cr. 228.3, Accumulated Provision for Pensions and Benefits

To record the current period recognition of the transition obligation for postretirement benefits.

NOTE: A portion of the transition obligation may be charged to construction and retirement activities provided such charges are properly supported.

2. If the borrower elects to defer and amortize the transition obligation in accordance with the provisions of Statement No. 71, the following entry shall be recorded:

Dr. 182.3, Other Regulatory Assets
Cr. 228.3, Accumulated Provision for Pensions and Benefits

To record the deferral of the transition obligation under the provisions of Statement No. 71.

Dr. 926, Employee Pensions and Benefits

Dr. 107, Construction Work in Progress
Dr. 108.8, Retirement Work in Progress
Cr. 182.3, Other Regulatory Assets

To record the amortization of postretirement benefits expenses as they are recovered through rates in accordance with Statement No. 71.

3. The deferral and amortization of the transition obligation under the provisions of Statement No. 106 is considered to be an off balance sheet item. If, therefore, the borrower elects to defer and amortize the transition obligation on a straight-line basis over the average remaining service period of the active employees or 20 years in accordance with Statement No. 106, no entry is required. Instead, the transition obligation is recognized as a component of postretirement benefit cost as it is amortized. It should be noted, however, that the amount of the unamortized transition obligation must be disclosed in the notes to the financial statements.

Accounting Journal Entries—Current Period Expense

The current period postretirement expense should be recorded by the following entry:

Dr. 926, Employee Pensions and Benefits
Dr. 107, Construction Work in Progress
Dr. 108.8, Retirement Work in Progress
Cr. 228.3, Accumulated Provision for Pensions and Benefits

§ 1767.41

To record current period postretirement benefit expense.

Dr. 228.3X, Accumulated Provision for Pensions and Benefits—Funded
Cr. 131.1, Cash—General

To record cash payments on a “pay-as-you-go” basis for postretirement benefits.

Accounting Journal Entry—Funding

If a borrower elects to voluntarily fund its postretirement benefits obligation in an external, irrevocable trust, the following entry shall be recorded:

Dr. 228.3X, Accumulated Provision for Pensions and Benefits—Funded
Cr. 131.1, Cash—General

To record the funding of postretirement benefits expense into an external, irrevocable trust.

If a borrower elects to voluntarily fund its postretirement benefits obligation in an investment vehicle other than an external, irrevocable trust, the following entry shall be recorded:

Dr. 128, Other Special Funds
Cr. 131.1, Cash—General

To record the funding of postretirement benefits expense into an investment vehicle other than an external, irrevocable trust.

628 Postemployment Benefits

Statement of Financial Accounting Standards No. 112, Employers’ Accounting for Postemployment Benefits (Statement No. 112) establishes the standards of financial accounting and reporting for employers who provide benefits to former or inactive employees after employment but before retirement. Inactive employees are those who are not currently rendering service to the employer but who have not been terminated, including employees who are on disability leave, regardless of whether they are expected to return to active service. For purposes of applying the provisions of Statement No. 112, former members of the board of directors are considered to be employees of the cooperative.

Postemployment benefits include benefits provided to former or inactive employees, their beneficiaries, and covered dependents. They include, but are not limited to, salary continuation,

7 CFR Ch. XVII (1–1–97 Edition)

supplemental benefits (including workmen’s compensation), health care, job training and counseling, and life insurance coverage. Benefits may be provided in cash or in kind and may be paid upon cessation of active employment or over a specified period of time.

The cost of providing postemployment benefits is considered to be a part of the compensation provided to an employee in exchange for current service and should, therefore, be accrued as the employee earns the right to be paid for future postemployment benefits. Applying the criteria set forth in Statement of Financial Accounting Standards No. 43, Accounting for Compensated Absences, a postemployment benefit obligation is accrued when all of the following conditions are met:

1. The employer’s obligation for payment for future absences is attributable to employees’ services already performed;

2. The obligation relates to employee rights that vest or accumulate. Vested rights are considered those rights for which the employer is obligated to make payment even if the employee terminates. Rights that accumulate are those earned, but unused rights to compensated absences that may be carried forward to one or more periods subsequent to the period in which they are earned;

3. Payment of the compensation is probable; and

4. The amount can be reasonably estimated.

If all of these conditions are not met, the employer must account for its postemployment benefit obligation in accordance with Statement of Financial Accounting Standards No. 5, Accounting for Contingencies (Statement No. 5) when it becomes probable that a liability has been incurred and the amount of that liability can be reasonably estimated.

If an obligation for postemployment benefits is not accrued in accordance with the provisions of Statement No. 5 or Statement No. 43 only because the amount cannot be reasonably estimated, the financial statements should disclose that fact.

Rural Utilities Service, USDA

§ 1767.41

Accounting Requirements

All RUS borrowers must adopt the accrual accounting provisions and reporting requirements set forth in Statement No. 112 as of the statement's implementation date. A portion of the cumulative effect may be charged to construction and retirement activities provided such charges are properly supported. If a borrower elects to defer the cumulative effect of implementing Statement No. 112 in accordance with the provisions of Statement of Financial Accounting Standards No. 71, Accounting for the Effects of Certain Types of Regulation, the deferral must be approved by RUS.

Effective Date and Implementation

Statement No. 112 is effective for fiscal years beginning after December 15, 1993. Previously issued financial statements should not be restated.

RUS borrowers must comply with the implementation date set forth in Statement No. 112. At the time of the adoption of Statement No. 112, rates must be in place sufficient to recover the current period expense.

Accounting Journal Entries

The journal entries required to account for postemployment benefits are as follows:

Dr. 435.1, Cumulative Effect on Prior Years of a Change in Accounting Principle

Dr. 107, Construction Work in Progress
Dr. 108.8, Retirement Work in Progress
Cr. 228.3, Accumulated Provision for Pensions and Benefits

To record the cumulative effect of implementing Statement No. 112.

NOTE: A portion of the cumulative effect may be charged to construction and retirement activities provided such charges are properly supported. Account 435.1 is closed to Account 219.2, Nonoperating Margins.

If the borrower elects to defer and amortize the cumulative effect in accordance with the provisions of Statement No. 71, the following entry shall be recorded:

Dr. 182.3, Other Regulatory Assets
Cr. 228.3, Accumulated Provision for Pensions and Benefits

To record the deferral of the cumulative effect of implementing Statement No. 112 in accordance with the provisions of Statement No. 71.

Dr. 926, Employee Pensions and Benefits

Dr. 107, Construction Work in Progress
Dr. 108.8, Retirement Work in Progress
Cr. 182.3, Other Regulatory Assets

To record the amortization of the cumulative effect of implementing Statement No. 112 as it is recovered through rates in accordance with Statement No. 71.

Dr. 926, Employee Pensions and Benefits

Dr. 107, Construction Work in Progress
Dr. 108.8, Retirement Work in Progress
Cr. 228.3, Accumulated Provision for Pensions and Benefits

To record current period postemployment benefit expense.

NOTE: If postemployment benefits are accrued under the criteria set forth in Statement No. 43, this journal entry is made on a monthly basis. If, however, the accrual is based upon the provisions of Statement No. 5, this is a one-time entry unless the liability is reevaluated and subsequently adjusted.

629 Investments in Debt and Equity Securities

Statement of Financial Accounting Standards No. 115, Accounting for Certain Investments in Debt and Equity Securities (Statement No. 115), establishes the standards of financial accounting and reporting for investments in debt securities and for investments in equity securities that have readily determinable fair values. Statement No. 115 does not apply to investments in equity securities accounted for under the equity method nor to investments in consolidated subsidiaries.

At the time of acquisition, an entity must classify debt and equity securities into one of three categories: held-to-maturity, available-for-sale, or trading. At the balance sheet date, the appropriateness of the classifications must be reassessed.

Investments in debt securities are classified as held-to-maturity and are measured at amortized cost in the balance sheet only if the reporting entity has the positive intent and ability to hold these securities to maturity. Debt

§ 1767.41

securities are not classified as held-to-maturity if the entity has the intent to hold the security only for an indefinite period; for example, if the security would become available for sale in response to changes in market interest rates and related changes in the security's prepayment risk, needs for liquidity, changes in the availability of and the yield on alternative investments, changes in funding sources and terms, and changes in foreign currency risk.

Investments in debt securities that are not classified as held-to-maturity and equity securities that have readily determinable fair values are classified as either trading securities or available-for-sale securities and are measured at fair value in the balance sheet. Trading securities are those securities that are bought and held principally for the purpose of selling them in the near future. Trading generally reflects active and frequent buying and selling and trading securities are generally used with the objective of generating profits on short-term differences in prices. Available-for-sale securities are those investments not classified as either trading securities or held-to-maturity securities.

Statement No. 115 requires unrealized holding gains and losses for trading securities to be included in earnings in the current period. Unrealized holding gains and losses for available-for-sale securities are excluded from earnings; however, they are reported as a net amount in a separate component of shareholders' equity until realized.

For individual securities classified as either available-for sale or held-to-maturity, an entity must determine whether a decline in the security's fair value below the amortized cost is other than temporary. If the decline in fair value is determined to be permanent, that is, it is probable that the entity will not be able to collect all amounts due under the contractual terms of the security, the realized loss is accounted for in earnings of the current period. The new cost basis is not adjusted upward for subsequent recoveries in the fair value. Subsequent increases in the fair value of available-for-sale securities are included in the separate component of equity. Subsequent decreases

7 CFR Ch. XVII (1-1-97 Edition)

are also included in the separate component of equity.

All trading securities are reported as current assets in the balance sheet and individual held-to-maturity and available-for-sale securities are classified as either current or noncurrent, as appropriate. Cash flows from the purchase, sale, or maturity of available-for-sale securities and held-to-maturity securities are classified in the statement of cash flows as cash flows from investing activities and reported gross for each security classification.

Accounting Requirements

All RUS borrowers must adopt the accounting, reporting, and disclosure requirements set forth in Statement No. 115 as of the statement's implementation date. Unrealized holding gains or losses for trading securities shall be recorded in either Account 421, Miscellaneous Nonoperating Income, or Account 426.5, Other Deductions, as appropriate. Unrealized holding gains or losses for available-for-sale securities held by the corporate entity are recognized as a component of stockholder's equity in Account 215.1, Unrealized Gains and Losses—Debt and Equity Securities. A contra account of the investment account shall be debited or credited accordingly. Unrealized gains and losses for available-for-sale securities held in a decommissioning fund shall increase or decrease, as appropriate, the reported value of the fund.

Effective Date and Implementation

Statement No. 115 is effective for fiscal years beginning after December 15, 1993. At the beginning of the entity's fiscal year, the entity must classify its debt and equity securities on the basis of the entity's current intent. This statement may not be applied retroactively to prior years' financial statements. For fiscal years beginning prior to December 16, 1993, reporting entities are permitted to apply Statement No. 115 as of the end of a fiscal year for which annual financial statements have not previously been issued.

Subpart A—General Provisions

§§ 1770.1—1770.9 [Reserved]

Subpart B—Uniform System of Accounts

§ 1770.10 General.

This subpart implements provisions of the standard RUS loan documents with respect to the accounting system accounts to be maintained by tele-

communications borrowers of the Rural Utilities Service.

§ 1770.11 Accounting system requirements.

(a) Each RUS borrower subject to the jurisdiction of the Federal Communications Commission (FCC) or a State regulatory body shall maintain its accounts and records in accordance with the rules and regulations prescribed by that regulatory body.

(b) Each RUS borrower not subject to regulatory control as specified in § 1770.11(a) shall maintain its accounts and records in accordance with the FCC Uniform System of Accounts as set forth in part 32 of the Commission's Rules and Regulations.

(1) RUS borrowers having annual revenues derived from regulated telecommunications operations of \$100,000,000 or more shall maintain the accounts prescribed in part 32 for Class A companies.

(2) RUS borrowers having annual revenues derived from regulated telecommunications operations of less than \$100,000,000 shall maintain the accounts prescribed in part 32 for Class B companies.

(3) RUS borrowers maintaining the accounts prescribed for Class B companies may adopt the Class A accounts if they desire more detailed and sophisticated accounting records.

§ 1770.12 Supplementary accounts.

(a) All borrowers shall maintain the supplementary accounts set forth in § 1770.15. These accounts conform in number and title with accounts prescribed in the FCC Uniform System of Accounts. In those instances in which a State regulatory body having jurisdiction over an RUS borrower has prescribed a system of accounts differing from that of the FCC, the account titles prescribed by RUS in § 1770.15 shall remain unchanged; however, the supplementary account numbers shall be changed to conform with the State's accounting system.

(b) In addition to the accounts set forth in § 1770.15, cooperative or other nonprofit borrowers shall maintain the supplementary accounts set forth in § 1770.16.

§ 1770.13

(c) Borrowers are permitted to deviate from the specific subaccount numbers detailed in §§1770.15 and 1770.16 provided that the primary account numbers and account descriptions conform with those prescribed.

(Approved by the Office of Management and Budget under control number 0572-0003)

§ 1770.13 Accounting requirements.

(a) Each borrower shall maintain its books of accounts on the accrual basis of accounting. All transactions shall be recorded in the period in which they occur and reconciled monthly. The books of accounts shall be closed at the end of each fiscal year and financial statements shall be prepared for the period and audited in accordance with the provisions of 7 CFR part 1773, RUS Policy on Audits of Electric and Telephone Borrowers.

(b) All books of accounts, records, and memoranda shall be maintained in such a manner as to fully support the journal entries to which they relate. The books and records referred to herein shall include records of a nontechnical nature such as minute books, stock and membership records, reports, correspondence, and memoranda.

7 CFR Ch. XVII (1-1-97 Edition)

(c) Interpretations of Federal or State requirements shall be referred to the applicable commission exercising jurisdiction over the borrower.

(d) Interpretations of RUS accounting requirements shall be referred to the appropriate Telephone Area office of RUS.

§ 1770.14 Continuing property records.

Each borrower shall maintain continuing property records which detail the date of placement, location, description of property, and the original cost of the property record units. The continuing property record and other underlying records of construction costs shall be maintained so that upon retirement of one or more retirement units or of minor items without replacement when not included in the costs of retirement units, the actual cost of the plant retired can be determined.

§ 1770.15 Supplementary accounts required of all borrowers.

Accounts prescribed in the Stockholders' Equity and Patronage Capital section shall be maintained by stock companies and cooperatives as appropriate.

1130.1	1120.11	<i>Cash—General Fund</i>
		This account shall include all unrestricted funds derived from revenues and other sources which are on deposit in banks or other financial institutions and available on demand. It shall also include funds in transit to the depository for which customers and agents have received credit on their accounts. Separate subaccounts should be maintained for each bank account in which general fund cash is deposited.
1130.2	1120.12	<i>Cash—Construction Fund Trustee</i>
		This account shall include all loan funds received from RUS, the Rural Telephone Bank, the Federal Financing Bank, the Bank for Cooperatives, the Rural Telephone Finance Cooperative, and all non-loan funds supplied by the borrower under the terms of the loan contract or otherwise required by RUS. The offsetting credit for funds received from RUS shall be to Account 4210.20, RUS Notes—Unadvanced, Dr.; funds received from the Rural Telephone Bank, to Account 4210.21, Telephone Bank Notes—Unadvanced, Dr.; funds received from the Federal Financing Bank, to Account 4210.22, Federal Financing Bank Notes—Unadvanced, Dr.; funds received from the Bank for Cooperatives, to Account 4210.23, Bank for Cooperatives Notes—Unadvanced, Dr.; and funds received from the Rural Telephone Finance Cooperative, to Account 4210.24, Rural Telephone Finance Cooperative Notes—Unadvanced, Dr.
1130.3	1120.13	<i>Cash—Transfer of Funds</i>
		This account shall include all transfers of funds from one bank account to another. This account shall be charged with the amount of a check drawn for the transfer, and credited when the amount transferred is entered into the Cash Receipts Book.
	1120.21	<i>Special Cash Deposits</i>

Rural Utilities Service, USDA
§ 1770.15

Class of company		Account title
Account No.		
A	B	
		This account shall include all cash on special deposit, other than in sinking and other special funds provided for elsewhere, to pay dividends, interest, and other debts, when such payments are due one year or less from the date of deposit; the amount of cash deposited to insure the performance of contracts to be performed within one year from the date of the deposit; and other cash deposits of a special nature not provided for elsewhere. This account shall include the amount of cash deposited with trustees to be held until mortgaged property sold, destroyed, or otherwise disposed of is replaced, and also cash realized from the sale of the company's securities and deposited with trustees to be held until invested in physical property of the company or for disbursement when the purposes for which the securities were sold are accomplished.
1150.1	1120.31	<i>Petty Cash Fund</i> This account shall include funds in the custody of employees or agents for making minor disbursements. The fund shall be operated on an imprest basis. Expenditures shall be supported by receipts, and reimbursements to the fund shall be for the exact amount of such expenditures and shall be charged to the various accounts to which the expenditures are allocable. At all times, the total of the cash on hand and the unreimbursed expenditures shall equal the amount of the fund.
1150.2	1120.32	<i>Change Fund</i> This account shall include funds in the custody of employees or agents for making change. Records shall be kept of the amount held by each person. Disbursements shall not be made from the fund.
1220.1	1220.1	<i>Materials and Supplies*</i> This account shall include the cost of materials and supplies held in stock including plant supplies, motor vehicles supplies, tools, fuel, other supplies and material and articles of the company in process of manufacture for supply stock. Transportation charges and sales and use taxes, as far as practicable, shall be included as a part of the cost of the particular material to which they relate. Transportation and sales and use taxes which are not included as part of the cost of particular material shall be equitably apportioned among the accounts to which material is charged. As far as practicable, cash and other discounts on material shall be deducted in determining cost of the particular material to which they relate or credited to the account to which the material is charged. When such deduction is not practicable, discounts shall be equitably apportioned among the accounts to which material is charged. Material recovered in connection with construction, maintenance or retirement of property shall be charged to this account as follows: —Reusable items that, when installed or in service, were retirement units shall be included in this account at the original cost. —Reusable minor items that, when installed or in service, were not retirement units shall be included in this account at current prices new. —The cost of repairing reusable material shall be charged to the appropriate Plant Specific Operations Expense accounts. —Scrap and nonusable material included in this account shall be carried at the estimated amount which will be received therefor. The difference between the amounts realized for scrap and nonusable material sold, and the amounts at which it is carried in this account shall be adjusted in the accounts credited when the material was taken up in this account. Interest paid on material bills, the payments of which are delayed, shall be charged to Account 7540, Other Interest Deductions. Inventories of materials and supplies shall be taken during each calendar year and the adjustments to this account shall be charged or credited to Account 6512, Provisioning Expense.
1220.2	1220.2	<i>Property Held for Sale or Lease*</i> This account shall include the cost of all items purchased for resale or lease. The cost shall include applicable transportation charges, sales and use taxes, and cash and other purchase discounts. Inventory shortages and overages shall be charged and credited, respectively to Account 7991, Other Nonregulated Revenues. *These accounts shall not include items which are related to a nonregulated activity unless that activity involves joint or common use of assets and resources in the provision of regulated and nonregulated products and services.
1220.3	1220.3	<i>Exempt Materials—Clearing</i> This account shall include the cost of materials and supplies designated as exempt material on the carrier's "Exempt Material List". Charges to this account shall be cleared monthly to the primary plant and maintenance accounts in accordance with percentages developed by the individual carriers. When there is a substantial amount of exempt material on hand at the end of the year, substantial enough to distort net income or margins, a physical inventory may be taken. The cost of the inventory on hand shall be debited to this account and credited to the appropriate primary plant and maintenance accounts on a pro-rata basis related to the original charges to these accounts. This entry shall be reversed at the first of the year.
	1280.1	<i>Prepaid Rents</i>

Class of company		Account title
Account No.		
A	B	
		This account shall include the amount of rents paid in advance of the period in which it is chargeable to income, except amounts chargeable to telecommunications plant under construction and minor amounts which may be charged directly to the final accounts. As the term expires for which the rents are paid, this account shall be credited monthly and the appropriate account charged.
	1280.2	<i>Prepaid Taxes</i> This account shall include the balance of all taxes paid in advance of the period in which they are chargeable to income, except amounts chargeable to telecommunications plant under construction and minor amounts which may be charged directly to the final accounts. As the term expires for which the taxes are paid, this account shall be credited monthly and the appropriate account charged.
	1280.3	<i>Prepaid Insurance</i> This account shall include the amount of insurance premiums paid in advance of the period in which they are chargeable to income, except premiums chargeable to telecommunications plant under construction and minor amounts which may be charged directly to the final accounts. As the term expires for which the premiums are paid, this account shall be credited monthly and the appropriate account charged.
	1280.4	<i>Prepaid Directory Expenses</i> This account shall include the cost of preparing, printing, binding, and delivering directories and the cost of soliciting advertisements for directories, except minor amounts which may be charged directly to Account 6620, Services. Amounts in this account, shall be cleared to Account 6620 by monthly charges representing that portion of the expenses applicable to each month.
	1280.5	<i>Other Prepayments</i> This amount shall include prepayments, other than those includable in Accounts 1280.1 through 1280.4 except minor amounts which may be charged directly to the final accounts. As the term expires for which the payments apply, this account shall be credited monthly and the appropriate account charged.
1402.1	1402.1	<i>Investments in Nonaffiliated Companies—Class B RTB Stock</i> This account shall include the par value of the required purchase of Class B Rural Telephone Bank stock and the par value of the Class B Rural Telephone Bank stock received as a patronage refund. This account shall be debited at the time the refund is received and Account 1402.11, Investments in Nonaffiliated Companies—Class B RTB Stock—Cr., credited. This account shall be credited and Account 1402.11 debited when the patronage refund is redeemed.
1402.11	1402.11	<i>Investments in Nonaffiliated Companies—Class B RTB Stock—Cr.</i> This account shall include the par value of Class B Rural Telephone Bank stock received as a patronage refund. This account shall be credited at the time the refund is received and Account 1402.1, Investments in Nonaffiliated Companies—Class B RTB Stock, debited. This account shall be debited and Account 1402.1 credited when the patronage refund is redeemed.
1402.2	1402.2	<i>Investments in Nonaffiliated Companies—Class C RTB Stock</i> This account shall include the par value of the company's investment in Class C Rural Telephone Bank stock. Cash dividends on Class C stock shall be recorded in Account 7310/7300.1, Dividend Income, when declared.
1402.3	1402.3	<i>Other Investments in Nonaffiliated Companies</i> This account shall include the acquisition cost of the company's investment in securities issued by non-affiliated companies, other than securities held in special funds which shall be charged to Account 1408, Sinking Funds, and also its investment advances to such parties and special deposits of cash for more than one year from the date of deposit. Declines in value of investments shall be charged to Account 4540.41, Other Capital, if temporary and as a current period loss if permanent. Detailed records shall be maintained to reflect unrealized losses for each investment.
2001.1	2001.1	<i>Telecommunications Plant in Service—Classified</i> This account shall include the original cost of the property capitalized in Accounts 2110 through 2690.
2001.2	2001.2	<i>Telecommunications Plant in Service—Unclassified</i> This account shall include the original cost of telecommunications property which has been completed and placed in service but which has not been classified pending completion of final inventories of construction, final cost summaries, etc. The balance in this account is subject to depreciation charges.
2003.1	2003.1	<i>Telecommunications Plant Under Construction—Short Term—Contract</i> This account shall include all costs incurred in the construction of telecommunications plant performed under contract and designed to be completed in one year or less. Included among these costs are contractor payments, and charges for engineering, supervision, taxes, insurance, transportation, and other costs incurred in contract construction. This account shall be maintained such that the various items of costs are readily identifiable.
2003.2	2003.2	<i>Telecommunications Plant Under Construction—Short Term—Force Account</i>

Rural Utilities Service, USDA

§ 1770.15

Class of company		Account title
Account No.		
A	B	
		This account shall include all costs incurred in the construction of telecommunications plant performed by the borrowers' own employees and designed to be completed in one year or less. Included among these costs are charges for material, labor, engineering, supervision, taxes, insurance, transportation, supply expense, and other costs incurred in the construction. This account shall be maintained so that the various items of cost are readily identified. Specific subaccounts should be maintained to distinguish individual projects.
2003.3	2003.3	<i>Telecommunications Plant Under Construction—Short Term—Work Orders</i> This account shall include all costs incurred in the construction of telecommunications plant performed under a work order system or a line extension contract and designed to be completed in one year or less. This type of construction generally includes service installations, subscriber extensions, and minor plant improvements after the completion of the initial system. Included among these costs are charges for labor, materials and supplies, transportation, payroll taxes, insurance, supervision and other costs incurred in the construction. Subsidiary records shall be maintained to reflect the cost of individual jobs. These records shall be reconciled periodically with the general ledger control account. Specific subaccounts should be maintained to accumulate costs incurred under line extension contracts.
2004.1	2004.1	<i>Telecommunications Plant Under Construction—Long Term—Contract</i> This account shall include all costs incurred in the construction of telecommunications plant performed under contract and designed to be completed in more than one year. Included among these costs are contractor payments, and charges for engineering, supervision, taxes, insurance, transportation, interest during construction, and other costs incurred in contract construction. This account shall be maintained such that the various items of cost are readily identified.
2004.2	2004.2	<i>Telecommunications Plant Under Construction—Long Term—Force Account</i> This account shall include all costs incurred in the construction of telecommunications plant performed by the borrowers' own employees and designed to be completed in more than one year. Included among these costs are charges for material, labor, engineering, supervision, taxes, insurance, transportation, supply expense, interest during construction, and other costs incurred in the construction. This account shall be maintained such that the various items of cost are readily identified. Specific subaccounts should be maintained to distinguish individual projects.
2004.3	2004.3	<i>Telecommunications Plant Under Construction—Long Term—Work Orders</i> This account shall include all costs incurred in the construction of telecommunications plant performed under a work order system or a line extension contract and designed to be completed in more than one year. Included among these costs are charges for labor, materials and supplies, transportation, payroll taxes, insurance, supervision, interest during construction, and other costs incurred in the construction. Subsidiary records shall be maintained to reflect the cost of individual jobs. These records shall be reconciled periodically with the general ledger control account. Specific subaccounts should be maintained to accumulate costs incurred under line extension contracts.
	2210.11	<i>Central Office Switching—Analog*</i> This account shall include the original cost of stored program control analog circuit-switching and associated equipment. This account shall also include the original cost of remote analog electronic circuit switches.
	2210.21	<i>Central Office Switching—Digital*</i> This account shall include the original cost of stored program control digital switches and their associated equipment. Included in this account is the original cost of digital switches which utilize either dedicated or non-dedicated circuits. This account shall also include the original cost of remote digital electronic switches.
	2210.31	<i>Central Office Switching—Electro-Mechanical—Step-by-Step*</i> This account shall include the original cost of step-by-step and associated circuit-switching equipment.
	2210.32	<i>Central Office Switching—Electro-Mechanical—Crossbar*</i> This account shall include the original cost of crossbar and associated circuit switching equipment. Also included in this account is the original cost of electronic translator system equipment used in switching.
	2210.33	<i>Central Office Switching—Electro-Mechanical—Other*</i> This account shall include the original cost of all other types of non-electronic circuit-switching equipment such as panel systems and their associated circuit-switching equipment. *Switching plant excludes switchboards which perform operator assistance functions and equipment which is an integral part thereof. It does not exclude equipment used solely for the recording of calling telephone numbers in connection with customer dialed charged traffic, dial tandem switches, and special switchboards used in conjunction with private line service; such equipment shall be classified to the particular switch that it serves.
	2230.11	<i>Central Office Transmission—Radio Systems—Satellite and Earth Station Facilities</i>

Class of company		Account title
Account No.		
A	B	
		This account shall include the original cost of an ownership interest in satellites (including land-side spares), other spare parts, materials, and supplies. It shall include launch insurance and other satellite launch costs. This account shall also include the original cost of earth stations and spare parts, materials, and supplies therefor.
	2230.12	<i>Central Office Transmission—Radio Systems—Other</i> This account shall include the original cost of radio equipment used to provide radio communication channels. Radio equipment is that equipment which is used for the generation, amplification, propagation, reception, modulation, and demodulation of radio waves in free space over which communications channels can be provided. This account shall also include the associated carrier and auxiliary equipment and patch bay equipment which is an integral part of the radio equipment. Such equipment may be located in central office buildings, terminal rooms, or repeater stations or may be mounted on towers, masts, or other supports.
	2230.21	<i>Central Office Transmission—Circuit Equipment</i> This account shall include the original cost of equipment which is used to reduce the number of physical pairs otherwise required to serve a given number of subscribers by utilizing carrier systems, concentration stages or combinations of both. It shall include equipment that provides for simultaneous use of a number of interoffice channels on a single transmission path. This account shall also include the original cost of equipment which is used for the amplification, modulation, regeneration, circuit patching, balancing or control of signals transmitted over interoffice communications transmission channels. This account shall include the original cost of equipment which utilizes the message path to carry signaling information or which utilizes separate channels between switching offices to transmit signaling information independent of the subscribers' communication paths or transmission channels. This account shall also include the original cost of associated material used in the construction of such plant. Circuit equipment may be located in central offices, in manholes, on poles, in cabinets or huts or at other locations. This account excludes carrier and auxiliary equipment and patch bay which are recorded in Account 2230.12, Central Office Transmission—Radio Systems—Other
3100x	3100x	<i>Retirement Work in Progress</i> This account shall be charged with the original cost of property retired from the telecommunications plant accounts. It shall also be charged with all of the costs incurred in removing the retired plant from service. This account shall be credited with the salvage value of materials recovered in the retirement of the telecommunications plant. At such time as the retirement work order is complete, the net income/loss resulting therefrom shall be transferred from this account to the appropriate primary plant depreciation reserve account.
4010.11	4010.11	<i>Accounts Payable to Affiliated Companies</i> This account shall include all amounts currently due to affiliated companies for recurring trade obligations, and not provided for in other accounts, such as those for traffic settlements, material and supplies, repairs to telecommunications plant, matured rents, and interest payable under monthly settlements on short-term loans, advances, and open accounts.
4010.21	4010.21	<i>Accounts Payable to Nonaffiliated Companies</i> This account shall include all amounts currently due to nonaffiliated companies for recurring trade obligations, and not provided for in other accounts, such as those for traffic settlements, materials and supplies, repairs to telecommunications plant, matured rents, and interest payable under monthly settlements on short-term loans, advances, and open accounts.
4010.22	4010.22	<i>Accounts Payable—Employees' Income Tax Withheld</i> This account shall include income taxes payable that have been withheld from employees' salaries.
4010.23	4010.23	<i>Accounts Payable—FICA Taxes Withheld</i> This account shall include FICA taxes payable that have been withheld from employees' salaries.
4010.24	4010.24	<i>Accounts Payable—Federal Excise Taxes</i> This account shall include Federal excise taxes payable.
4010.25	4010.25	<i>Accounts Payable—Payroll</i> This account shall include amounts payable to the company's employees in the form of salaries or wages.
4070.1	4070.1	<i>Income Taxes Accrued—Federal</i> For Class A companies, this account shall be credited and Accounts 7220, 7420, and 7630, as appropriate, shall be debited for the amount of Federal income taxes accrued during the current operating period. For Class B companies, this account shall be credited and Accounts 7220.2, 7400.2, and 7600.3, as appropriate, shall be debited for the amount of Federal income taxes accrued during the current operating period.
4070.2	4070.2	<i>Income Taxes Accrued—State and Local</i>

Rural Utilities Service, USDA
§ 1770.15

Class of company		Account title
Account No.		
A	B	
		For Class A companies, this account shall be credited and Accounts, 7230, 7430, and 7630, as appropriate, shall be debited for the amount of state and local income taxes accrued during the current operating period. For Class B companies, this account shall be credited and Accounts, 7200.3, 7400.3, and 7600.3, as appropriate, shall be debited for the amount of state and local income taxes accrued during the current operating period.
4080.1	4080.1	<i>Other Taxes Accrued—Property</i> This account shall be credited and Account 7240.1/7200.41, Operating Taxes—Property, shall be debited for the amount of property taxes accrued during the current operating period.
4080.2	4080.2	<i>Other Taxes Accrued—Employer's Portion—FICA</i> This account shall be credited and the appropriate construction, depreciation, or expense account shall be debited for the employer's portion of FICA taxes accrued during the current operating period.
4080.3	4080.3	<i>Other Taxes Accrued—Federal Unemployment</i> This account shall be credited and the appropriate construction, removal, or expense account shall be debited for the amount of Federal unemployment taxes accrued during the current operating period.
4080.4	4080.4	<i>Other Taxes Accrued—State Unemployment</i> This account shall be credited and the appropriate construction, removal, or expense account shall be debited for the amount of state unemployment taxes accrued during the current operating period.
4080.5	4080.5	<i>Other Taxes Accrued—Miscellaneous</i> This account shall be credited and Account 7240.2/7200.42, Operating Taxes—Miscellaneous, shall be debited for the amount of all other taxes accrued during the current operating period and not provided for elsewhere such as a gross receipts tax, franchise taxes, and capital stock taxes.
4120.1	4120.1	<i>Unmatured Interest Accrued—RUS Notes</i> This account shall include the interest accrued as of the balance sheet date but not payable until after that date on RUS mortgage notes. Interest expense incurred during the period of construction of telecommunications plant shall be charged to Account 2004, Telecommunications Plant Under Construction—Long Term, and credited to Account 7340/7300.4, Allowance for Funds Used During Construction.
4120.2	4120.2	<i>Unmatured Interest Accrued—Telephone Bank Notes</i> This account shall include the interest accrued as of the balance sheet date but not payable until after that date on Rural Telephone Bank mortgage notes. Interest expense incurred during the period of construction of telecommunications plant shall be charged to Account 2004, Telecommunications Plant Under Construction—Long Term, and credited to Account 7340/7300.4, Allowance for Funds Used During Construction.
4120.3	4120.3	<i>Unmatured Interest Accrued—Federal Financing Bank Notes</i> This account shall include the interest accrued as of the balance sheet date but not payable until after that date on Federal Financing Bank mortgage notes. Interest expense incurred during the period of construction of telecommunications plant shall be charged to Account 2004, Telecommunications Plant Under Construction—Long Term, and credited to Account 7340/7300.4, Allowance for Funds Used During Construction.
4120.4	4120.4	<i>Unmatured Interest Accrued—Bank for Cooperatives Notes</i> This account shall include the interest accrued as of the balance sheet date but not payable until after that date on Bank for Cooperatives mortgage notes. Interest expense incurred during the period of construction of telecommunications plant shall be charged to Account 2004, Telecommunications Plant Under Construction—Long Term, and credited to Account 7340/7300.4, Allowance for Funds Used During Construction.
4120.5	4120.5	<i>Unmatured Interest Accrued—Rural Telephone Finance Cooperative Notes</i> This account shall include the interest accrued as of the balance sheet date but not payable until after that date on Rural Telephone Finance Cooperative mortgage notes. Interest expense incurred during the period of construction of telecommunications plant shall be charged to Account 2004, Telecommunications Plant Under Construction—Long Term, and credited to Account 7340/7300.4, Allowance for Funds Used During Construction.
4120.6	4120.6	<i>Other Accrued Liabilities</i> This account shall include the amount of wages, compensated absences, interest on indebtedness of the company, dividends on capital stock, and rents accrued as of the balance sheet date but not payable until after the date. This account shall not include interest accrued on RUS, Rural Telephone Bank, Bank for Cooperatives, Federal Financing Bank, or Rural Telephone Finance Cooperative debt.
4210.11	4210.11	<i>Funded Debt—Other</i>

§ 1770.15

7 CFR Ch. XVII (1–1–97 Edition)

Class of company		Account title
Account No.		
A	B	
		This account shall include the total face amount of unmatured debt, maturing more than one year from the date of issue, issued by the company and not retired, and the total face amount of similar unmatured debt of other companies, the payment of which has been assumed by the company, including funded debt the maturity of which has been extended by specific agreement. This account shall not include unmatured RUS, Rural Telephone Bank, Federal Financing Bank, Bank for Cooperatives, or Rural Telephone Finance Cooperative debt.
4210.12	4210.12	<i>RUS Notes</i> This account shall include the total face amount of unmatured RUS mortgage notes. Account 4210.20, RUS Notes—Unadvanced, Dr., shall be charged and this account credited upon execution of the notes. If principal installments are not paid at the maturity date, the amount due shall be transferred to Account 4050, Current Maturities—Long-Term Debt.
4210.13	4210.13	<i>Telephone Bank Notes</i> This account shall include the total face amount of unmatured Rural Telephone Bank mortgage notes. Account 4210.21, Telephone Bank Notes—Unadvanced, Dr., shall be charged and this account credited upon execution of the notes. If principal installments are not paid at the maturity date, the amount due shall be transferred to Account 4050, Current Maturities—Long-Term Debt.
4210.14	4210.14	<i>Federal Financing Bank Notes</i> This account shall include the total face amount of unmatured Federal Financing Bank mortgage notes. Account 4210.22, Federal Financing Bank Notes—Unadvanced, Dr., shall be charged and this account credited upon execution of the notes. If principal installments are not paid at the maturity date, the amount due shall be transferred to Account 4050, Current Maturities—Long-Term Debt.
4210.15	4210.15	<i>Bank for Cooperatives Notes</i> This account shall include the total face amount of unmatured Bank for Cooperatives mortgage notes. Account 4210.23, Bank for Cooperatives Notes—Unadvanced, Dr., shall be charged and this account credited upon execution of the notes. If principal installments are not paid at the maturity date, the amount due shall be transferred to Account 4050, Current Maturities—Long-Term Debt.
4210.16	4210.16	<i>Rural Telephone Finance Cooperative Notes</i> This account shall include the total face amount of unmatured Rural Telephone Finance Cooperative mortgage notes. Account 4210.24, Rural Telephone Finance Cooperative Notes—Unadvanced, Dr., shall be charged and this account credited upon execution of the notes. If principal installments are not paid at the maturity date, the amount due shall be transferred to Account 4050, Current Maturities—Long-Term Debt.
4210.17	4210.17	<i>RUS Notes—Deferred Interest</i> This account shall include interest accrued on RUS mortgage notes, the payment of which has been deferred in accordance with the terms of the notes or extension agreements. The offsetting charge shall be to Account 7510, Interest on Funded Debt, for Class A companies and Account 7500, Interest and Related Items, for Class B companies. If interest payments are not made at the due date, this account shall be debited and Account 4010.21, Accounts Payable to Nonaffiliated Companies, credited with the amount of the matured interest.
4210.18	4210.18	<i>RUS Notes—Advance Payments, Dr.</i> This account shall include all payments on RUS mortgage notes made in advance of the due date and not applied to a specific quarterly payment. As these payments are applied to specific notes, this account shall be credited and the long-term debt and interest liability accounts debited.
4210.19	4210.19	<i>Funded Debt—Other—Unadvanced, Dr.</i> This account shall include the total face amount of notes executed to others, for which funds have not been received. This account shall be credited and Account 1130.1/1120.11, Cash—General Funds, debited when funds are received from the lender.
4210.20	4210.20	<i>RUS Notes—Unadvanced, Dr.</i> This account shall include the total face amount of RUS mortgage notes for which funds have not been received. This account shall be credited and Account 1130.2/1120.12, Cash—Construction Fund Trustee, debited when funds are received from RUS.
4210.21	4210.21	<i>Telephone Bank Notes—Unadvanced, Dr.</i> This account shall include the total face amount of Rural Telephone Bank mortgage notes for which funds have not been received. This account shall be credited and Account 1130.2/1120.12, Cash—Construction Fund Trustee, debited when funds are received from the Rural Telephone Bank.
4210.22	4210.22	<i>Federal Financing Bank Notes—Unadvanced, Dr.</i>

Rural Utilities Service, USDA

§ 1770.15

Class of company		Account title
Account No.		
A	B	
4210.23	4210.23	This account shall include the total face amount of Federal Financing Bank mortgage notes for which funds have not been received. This account shall be credited and Account 1130.2/1120.12, Cash—Construction Fund Trustee, debited when funds are received from the Federal Financing Bank. <i>Bank for Cooperatives Notes—Unadvanced, Dr.</i>
		This account shall include the total face amount of Bank for Cooperatives mortgage notes for which funds have not been received. This account shall be credited and Account 1130.2/1120.12, Cash—Construction Fund Trustee, debited when funds are received from the Bank for Cooperatives.
4210.24	4210.24	<i>Rural Telephone Finance Cooperative Notes—Unadvanced, Dr.</i> This account shall include the total face amount of Rural Telephone Finance Cooperative mortgage notes for which funds have not been received. This account shall be credited and Account 1130.2/1120.12, Cash—Construction Fund Trustee, debited when funds are received from the Rural Telephone Finance Cooperative.
4540.11	4540.11	<i>Capital Stock Subscribed.</i> This account shall include the par value of capital stock for which legally enforceable subscriptions have been received but for which, at the date of the balance sheet, stock certificates have not been issued. This account shall be debited and Account 4510, Capital Stock, credited when a subscriber has paid the subscription in full and stock certificates are issued.
4540.12	4540.12	<i>Memberships Subscribed but Unissued.</i> This account shall include the face amount of memberships subscribed but not issued. This account shall be credited at the time the subscription is received and Account 1350.2, Subscriptions to Memberships, debited. This account shall be debited and Account 4540.21, Memberships Issued, credited when a subscriber has paid the subscription in full and the membership certificates are issued.
4540.13	4540.13	<i>Members' Equity Certificates Subscribed but Unissued.</i> This account shall include the face amount of members' equity certificates subscribed but not issued. This account shall be credited at the time the subscription is received and Account 1350.3, Subscriptions to Members' Equity Certificates, debited. This account shall be debited and Account 4540.22, Members' Equity Certificates Issued, credited when a subscriber has paid the subscription in full and the members' equity certificates are issued.
4540.21	4540.21	<i>Memberships Issued.</i> This account shall include the face amount of membership certificates outstanding. A subsidiary membership certificate record shall be maintained to reflect the detail of the balance in this account.
4540.22	4540.22	<i>Member's Equity Certificates Issued.</i> This account shall include the face amount of members' equity certificates outstanding. A subsidiary members' equity certificate record shall be maintained to reflect the detail of the balance in this account.
4540.23	4540.23	<i>Members' Equity—Other.</i> This account shall include credit amounts arising from donations, forfeitures of membership fees, forgiveness of debts of the cooperative, and member's equities not otherwise provided for.
4540.31	4540.31	<i>Installments Paid on Capital Stock.</i> This account shall include the amount of installments paid on capital stock on a partial or installment payment plan by subscribers against whom there is no legally enforceable subscription contract, and who are entitled to be reimbursed the principal amount of their payments, with or without interest, in the event they fail to complete payment for the stock and receive certificates therefore. This account shall be debited and Account 4510, Capital Stock, credited with the par value of capital stock when the total subscription is received and the stock certificates are issued. Any difference between the purchase price of the subscription and the par value of the stock shall be credited to Account 4520, Additional Paid-In Capital. A subsidiary ledger shall be maintained to record for each subscriber, the amount subscribed, payments made, and the balance due. The balance in this account shall be reconciled monthly with the subscription ledger.
4540.32	4540.32	<i>Installments Paid on Memberships Subscribed.</i> This account shall include the amount of installments paid by prospective members on membership subscriptions against whom there is no legally enforceable subscription contract, and who are entitled to be reimbursed for the principal amount of their payments, with or without interest, in the event they fail to complete payment for the membership and receive certificates therefor. This account shall be debited and Account 4540.21, Memberships Issued, credited with the face amount of the membership when the total subscription is received and the membership certificates are issued. A subsidiary ledger shall be maintained to record for each subscriber, the amount subscribed, payments made, and the balance due. The balance in this account shall be reconciled monthly with the subscription ledger.

Class of company		Account title
Account No.		
A	B	
4540.33	4540.33	<i>Installments Paid on Equity Certificates Subscribed</i> This account shall include the amount of installments paid by prospective members on equity certificate subscriptions against whom there is no legally enforceable subscription contract, and who are entitled to be reimbursed for the principal amount of their payments, with or without interest, in the event they fail to complete payment for the membership and receive equity certificates therefor. This account shall be debited and Account 4540.22, Members' Equity Certificates Issued, credited with the face amount of the memberships when the total subscription is received and the equity certificates are issued. A subsidiary ledger shall be maintained to record for each subscriber, the amount subscribed, payments made, and the balance due. The balance in this account shall be reconciled monthly with the subscription ledger.
4540.41	4540.41	<i>Other Capital—Miscellaneous</i> This account shall include amounts which are credits arising from capital recorded upon the reorganization or recapitalization of the company and temporary declines in the value of marketable securities held for investment purposes.
4550.1	4550.1	<i>Operating Margins</i> This account shall include amounts received or receivable from the furnishing of telecommunications service in excess of costs incurred in the furnishing of such service. If costs exceed revenues, the excess cost of furnishing telecommunications service shall be recorded as a debit to this account.
4550.2	4550.2	<i>Nonoperating Margins</i> This account shall include margins arising from transactions or activities not related to the furnishing of telecommunications service. Included in this account are receipts from investments, income from investments, income from nonoperating plant, and revenues derived from services performed for others incident to the company's regulated telecommunications operations.
4550.3	4550.3	<i>Other Margins</i> This account shall include patronage capital credits assigned to the cooperative by other nonprofit organizations prior to January 1, 1970, which were not credited directly to an operating expense account as a reduction in the cost of furnishing telecommunications service. No entries shall be made to this account unless it is to distribute or eliminate prior balances in conformance with the bylaws of the cooperative.
4550.4	4550.4	<i>Patronage Capital Assignable</i> This account shall include all amounts transferred from operating margins, nonoperating margins, and other margin accounts which are assignable to individual patrons.
4550.5	4550.5	<i>Patrons' Capital Credits Assigned</i> This account shall include the amounts of patronage capital which have been credited to individual patrons. A subsidiary patronage capital ledger shall be maintained so as to reflect the amount of capital furnished by each patron and the amount of such capital returned to the patron.
4550.6	4550.6	<i>Gain on the Retirement of Capital Credits</i> This account shall include credits resulting from the retirement of patronage capital through settlement of individual patrons' accounts at less than 100 percent of the capital assigned to the patron. The portion of patronage capital not returned to patrons under such settlements shall be debited to Account 4550.5, Patrons' Capital Credits Assigned, and credited to this account. This account shall also include amounts representing patronage capital authorized to be retired to patrons who cannot be located. Returned checks issued for retirements of patronage capital, after an appropriate waiting period, shall be credited to this account and a record shall be maintained adequate to enable the cooperative to make payment to the patron if and when a claim has been established by the patron.
	6210.11	<i>Analog Electronic Expense</i> This account shall include expenses associated with analog electronic switching.
	6210.21	<i>Digital Electronic Expense</i> This account shall include expenses associated with digital electronic switching.
	6210.31	<i>Electro-Mechanical Expense</i> This account shall include expenses associated with electro-mechanical switching.
	6230.11	<i>Radio Systems Expense</i> This account shall include expenses associated with radio systems.
	6230.21	<i>Circuit Equipment Expense</i> This account shall include expenses associated with circuit equipment.
	6560.1	<i>Depreciation Expense</i> This account shall include the depreciation expense associated with telecommunications plant in service (Accounts 2112 through 2441) and property held for future telecommunications use (Account 2002).

Rural Utilities Service, USDA
§ 1770.15

Class of company		Account title
Account No.		
A	B	
	6560.2	<i>Amortization Expense</i> This account shall include the amortization expense associated with capital leases and leasehold improvements (Accounts 2681 and 2682), intangibles (Account 2690), and telecommunications plant adjustments (Account 2005).
	7200.1	<i>Operating Investment Tax Credits—Net</i> This account shall be charged and Account 4320, Unamortized Operating Investment Tax Credits—Net, shall be credited with investment tax credits generated from qualified expenditures related to regulated operations which the company defers rather than recognizes currently in income. This account shall be credited and Account 4320 shall be charged ratably with the amortization of each year's investment tax credits included in Account 4320 for investment services for ratemaking purposes. Such amortization shall be determined in relation to the period of time used for computing book depreciation on the property with respect to which the tax credits relate.
	7200.2	<i>Operating Federal Income Taxes</i> This account shall be charged and Account 4070.1, Income Taxes Accrued—Federal, shall be credited for the amount of Federal income tax expense incurred in the current operating period. This account shall also reflect subsequent adjustments to amounts previously charged. Taxes should be accrued each month on an estimated basis and adjustments made as later data becomes available.
	7200.3	<i>Operating State and Local Income Taxes</i> This account shall be charged and Account 4070.2, Income Taxes Accrued—State and Local, shall be credited for the amount of state and local income tax expense incurred in the current operating period. This account shall also reflect subsequent adjustments to amounts previously charged. Taxes should be accrued each month on an estimated basis and adjustments made as later data becomes available.
	7240.1	7200.41 <i>Operating Taxes—Property</i> This account shall be charged and Account 4080.1, Other Taxes Accrued—Property, shall be credited for the amount of property tax expense incurred in the current operating period. This account shall also reflect subsequent adjustments to amounts previously charged. Taxes should be accrued each month on an estimated basis and adjustments made as later data becomes available.
	7240.2	7200.42 <i>Operating Taxes—Miscellaneous</i> This account shall be charged and Account 4080.5, Other Taxes Accrued—Miscellaneous, shall be credited for the amount of all other taxes accrued during the current operating period and not provided for elsewhere such as gross receipts, franchise, and capital stock tax expense incurred in the current operating period. This account shall also reflect subsequent adjustments to amounts previously charged. Taxes should be accrued each month on an estimated basis and adjustments made as later data becomes available.
		7200.5 <i>Provision for Deferred Operating Income Taxes—Net</i> This account shall be charged or credited, as appropriate, with contra entries recorded in either Account 4100, Net Current Deferred Operating Income Taxes, or Account 4340, Net Noncurrent Deferred Operating Income Taxes, as appropriate, for income tax expense that has been deferred. Subsidiary record categories shall be maintained to distinguish between property and nonproperty related deferrals and so that the company may separately report the amounts contained herein that relate to Federal, state, and local income taxes.
		7300.1 <i>Dividend Income</i> This account shall include dividends on investments in common and preferred stock, which is the property of the company, whether such stock is owned by the company and held in its treasury, or deposited in trust, or otherwise controlled. This account shall not include dividends or other returns on securities issued or assumed by the company and held by or for it, whether pledged as collateral, or held in its treasury, in special deposits, or in sinking or other funds. Dividends on stocks of other companies held in sinking or other funds shall be credited to Account 7300.3, Income from Sinking and Other Funds. Dividends received and receivable from affiliated companies accounted for on the equity method shall be included in Account 1401, Investments in Affiliated Companies, as a reduction of the carrying value of the investments.
		7300.2 <i>Interest Income</i>

Class of company		Account title
Account No.		
A	B	
		This account shall include interest on securities, including notes and other evidences of indebtedness which are the property of the company, whether such securities are owned by the company and held in its treasury, or deposited in trust (except in sinking or other funds) or otherwise controlled. It shall also include interest on bank balances, certificates of deposits, open accounts, and other analogous items. There shall be included in this account for each month, the applicable amount requisite to extinguish, during the interval between the date of acquisition and the date of maturity, the difference between the purchase price and the par value of securities owned, the income from which is includable in this account. Amounts thus credited or charged shall be concurrently included in the accounts in which the securities are carried. Any such difference remaining unextinguished at the sale or upon the maturity and satisfaction of such securities shall be cleared to Account 7300.6. Other Nonoperating Income and Expense.
7300.3		<i>Income from Sinking and Other Funds</i> This account shall include the income accrued on cash, securities issued by other companies, and other assets (not including securities issued or assumed by the company) held in sinking and other funds. There shall be included in this account for each month the applicable amount requisite to extinguish, during the interval between the date of acquisition and the date of maturity, the difference between the purchase price and the par value of securities held in sinking or other funds. Amounts thus credited or charged shall be concurrently included in the accounts in which the securities are carried. Any such differences remaining unextinguished upon the maturity and satisfaction of such securities shall be cleared to Account 7300.6. Other Nonoperating Income and Expense.
7300.4		<i>Allowance for Funds Used During Construction</i> This account shall be credited with such amounts as are charged to the telecommunications plant accounts for the purpose or recording an allowance for funds used for construction purposes.
7300.5		<i>Gains or Losses from the Disposition of Certain Property</i> This account shall include gains or losses resulting from the disposition of land or artworks; plant with traffic, and nonoperating telecommunications plant not previously used in the provision of telecommunication services.
7300.6		<i>Other Nonoperating Income and Expense</i> This account shall include all other items of income and gains or losses from activities not specifically provided for elsewhere such as gains or losses realized on the sale of temporary cash investments or marketable equity securities; fees collected in connection with the exchange of coupon bonds for registered bonds; uncollectible amounts previously credited to Accounts 7300.1, 7300.2, 7300.3, 7300.4, 7300.5, and 7300.6, gains or losses from the extinguishment of debt made to satisfy sinking fund requirements; gains or losses of a nonoperating nature arising from the exchange or translation of foreign currency; net unrealized losses on investments in current marketable equity securities; write-downs or write-offs of the book costs of investments in equity securities due to permanent impairment; amortization of goodwill; the company's share of earnings or losses of affiliated companies accounted for on the equity method; and the net balance of the revenue from and the expenses of property, plant, and equipment, the cost of which is includable in Account 2006, Nonoperating Plant.
7400.1		<i>Nonoperating Investment Tax Credits—Net</i> This account shall be charged and Account 4330, Unamortized Nonoperating Investment Tax Credits—Net, shall be credited with nonoperating investment tax credits generated from qualified expenditures related to other operations which the company has elected to defer rather than recognize currently in income. This account shall be credited and Account 4330, Unamortized Nonoperating Investment Tax Credits—Net, shall be charged with the amortization of each year's investment tax credits included in such accounts relating to amortization of previously deferred investment tax credits of other property or regulated property, the amortization of which does not serve to reduce costs of service (but the unamortized balance does reduce rate base) for ratemaking purposes. Such amortization shall be determined with reference to the period of time used for computing book depreciation on the property with respect to which the tax credits relate.
7400.2		<i>Nonoperating Federal Income Taxes</i> This account shall be charged and Account 4070.1, Income Taxes Accrued—Federal, shall be credited for the amount of nonoperating Federal income taxes for the current period. This account shall also reflect subsequent adjustments to amounts previously charged. Taxes shall be accrued each month on an estimated basis and adjustments made as later data becomes available. Companies that adopt the flowthrough method of accounting for investment tax credits shall reduce the calculated provision in this account by the entire amount of the credit realized during the year. Tax credits, if normalized, shall be recorded consistent with the accounting for investment tax credits. No entries shall be made to this account to reflect interperiod tax allocation.
7400.3		<i>Nonoperating State and Local Income Taxes</i>

Rural Utilities Service, USDA
§ 1770.16

Class of company		Account title
Account No.		
A	B	
		This account shall be charged and Account 4070.2, Income Taxes Accrued—State and Local, shall be credited for the amount of nonoperating state and local income taxes for the current period. This account shall also reflect subsequent adjustments to amounts previously charged. Taxes shall be accrued each month on an estimated basis and adjustments made as later data becomes available. No entries shall be made to this account to reflect interperiod tax allocation.
	7400.4	<i>Nonoperating Other Taxes</i> This account shall be charged and Account 4080.5, Other Taxes Accrued—Miscellaneous, shall be credited for all nonoperating taxes, other than Federal, state, and local income taxes, and payroll related taxes for the current period. Among the items includable in this account are property, gross receipts, franchise and capital stock taxes. This account shall also reflect subsequent adjustments to amounts previously charged.
	7400.5	<i>Provision for Deferred Nonoperating Income Taxes—Net</i> This account shall be charged or credited, as appropriate, with contra entries recorded in either Account 4110, Net Current Deferred Nonoperating Income Taxes, or Account 4350, Net Noncurrent Deferred Nonoperating Income Taxes, as appropriate, for nonoperating tax expenses that have been deferred. Subsidiary record categories shall be maintained to distinguish between property and nonproperty related deferrals and so that the company may separately report the amounts contained herein that relate to Federal, state, and local income taxes.
	7600.1	<i>Extraordinary Income Credits</i> This account shall be credited with nontypical, noncustomary, and infrequently recurring gains which would significantly distort the current year's income computed before such extraordinary items, if reported other than as extraordinary items. Income tax relating to the amounts recorded in this account shall be recorded in Account 7600.3, Current Income Tax Effect for Extraordinary Items—Net, and Account 7600.4, Provision for Deferred Income Tax Effect of Extraordinary Items—Net.
	7600.2	<i>Extraordinary Income Charges</i> This account shall be debited with nontypical, noncustomary, and infrequently recurring losses which would significantly distort the current year's income computed before such extraordinary items, if reported other than as extraordinary items. Income tax relating to the amounts recorded in this account shall be recorded in Account 7600.3, Current Income Tax Effect for Extraordinary Items—Net, and Account 7600.4, Provision for Deferred Income Tax Effect of Extraordinary Items—Net.
	7600.3	<i>Current Income Tax Effect of Extraordinary Items—Net</i> This account shall be charged or credited and Account 4070.1, Income Taxes Accrued—Federal, or Account 4070.2, Income Taxes Accrued—State and Local, shall be credited or charged, as appropriate, for all current income tax effects (Federal, state, and local) of items included in Account 7600.1, Extraordinary Income Credits, and Account 7600.2, Extraordinary Income Charges.
	7600.4	<i>Provision for Deferred Income Tax Effect of Extraordinary Items—Net</i> This account shall be charged or credited, as appropriate, with a contra amount recorded in Account 4350, Net Noncurrent Deferred Nonoperating Income Taxes, or Account 4110, Net Current Deferred Nonoperating Income Taxes, for the income tax effects (Federal, state, and local) of items included in Account 7600.1, Extraordinary Income Credits, and Account 7600.2, Extraordinary Income Charges, that have been deferred.

[55 FR 3388, Feb. 1, 1990; 55 FR 17352, Apr. 24, 1990, as amended at 55 FR 53488, Dec. 31, 1990]

§ 1770.16 Supplementary Accounts Required of Nonprofit Organizations.

4130.2	4130.2	Other Current Liabilities—Miscellaneous.
		<i>Long-Term Debt</i>
4270.1	4270.1	Members' Redeemable Equity Certificates Subscribed but Unissued.
4270.2	4270.2	Members' Redeemable Equity Certificates Issued.
4270.3	4270.3	Other Long-Term Debt.

Class of company		Account title
Account No.		
A	B	
1350.1	1350.1	<i>Subscriptions to Capital Stock</i> This account shall include the balance due from subscribers upon legally enforceable subscriptions to capital stock. The purchase price of subscriptions shall be charged to this account at the time the subscription is received. The par value of the stock subscribed shall be credited to Account 4540.11, Capital Stock Subscribed, and the difference between the purchase price and the par value shall be credited to Account 4520, Additional Paid-In Capital.
1350.2	1350.2	<i>Subscriptions to Memberships</i> This account shall include the balance due on memberships subscribed. The face amount of memberships subscribed shall be charged to this account at the time the subscription is received. The offsetting credit shall be to Account 4540.12, Memberships Subscribed but Unissued. A subscription ledger shall be maintained to record for each subscriber, the amount subscribed, payments made, and the balance due. The balance in this account shall be reconciled monthly with the subscription ledger.
1350.3	1350.3	<i>Subscriptions to Members' Equity Certificates</i> This account shall include the balance due on member's equity certificates subscribed. The face amount of certificates subscribed shall be charged to this account at the time the subscription is received. The offsetting credit shall be to Account 4540.13, Members' Equity Certificates Subscribed but Unissued, or to Account 4270.1, Members' Redeemable Equity Certificates Subscribed but Unissued. A subscription ledger shall be maintained to record for each subscriber, the amount subscribed, payments made, and the balance due. The balance in this account shall be reconciled monthly with the subscription ledger. The subscription ledger shall be maintained in such a manner as to separately identify redeemable and nonredeemable certificates.
1350.4	1350.4	<i>Other Current Assets</i> This account shall include the amount of all current assets which are not includable in Accounts 1120 through 1350.3.
4130.1	4130.1	<i>Patronage Capital Payable</i> This account shall include the amount of patronage capital which has been authorized to be returned to patrons.
4130.2	4130.2	<i>Other Current Liabilities—Miscellaneous</i> This account shall include liabilities of current character which are not includable in Accounts 4010 through 4130.1.
4270.1	70.1	<i>Members' Redeemable Equity Certificates Subscribed but Unissued</i> This account shall include the face amount of members' equity certificates which are redeemable at some specified future date for which subscriptions have been received but for which certificates have not been issued. This account shall be credited at the time the subscription is received and Account 1350.3, Subscriptions to Members' Equity Certificates, debited. This account shall be debited and Account 4270.2, Members' Redeemable Equity Certificates Issued, credited when a subscriber has paid the subscription in full and the equity certificates are issued.
4270.2	4270.2	<i>Members' Redeemable Equity Certificates Issued</i> This account shall include the face amount of outstanding members' equity certificates which are redeemable at some specified future date. A subsidiary members' redeemable equity certificate record shall be maintained to reflect the detail of the balance in this account.
4270.3	4270.3	<i>Other Long-Term Debt</i> This account shall include long-term debt not provided for elsewhere.

§§ 1770.17—1770.25 [Reserved]

Subpart C—Accounting Interpretations

SOURCE: 61 FR 39847, July 31, 1996, unless otherwise noted.

§ 1770.26 General.

(a) The standard provisions of the security instruments utilized by the

Rural Utilities Service (RUS) and the Rural Telephone Bank (RTB) for all telecommunications borrowers require borrowers to at all times keep and safely preserve, proper books, records, and accounts in which full and true entries will be made of all of the dealings, business, and affairs of the borrower in accordance with the methods and principles of accounting prescribed by the

Rural Utilities Service, USDA

Pt. 1770, Subpt. C, App.

state regulatory body having jurisdiction over the borrower and by the Federal Communications Commission (FCC) in its Uniform System of Accounts for telecommunications companies (47 CFR part 32), as those methods and principles of accounting are supplemented from time to time by RUS.

(b) This subpart implements those standard provisions of the RUS and RTB security instruments by prescribing accounting principles, methodologies, and procedures applicable to all telecommunications borrowers for particular situations.

§ 1770.27 Definitions.

As used in this part:

Borrower is an RUS telecommunications borrower.

Cushion of Credit Account is a 5 percent interest bearing account established by RUS in which all voluntary payments or overpayments on Rural Electric and Telephone Revolving Funds after October 1, 1987, are deposited.

FCC is the Federal Communications Commission.

Part 32 is 47 CFR part 32, Uniform System of Accounts, issued by the Federal Communications Commission.

RAO is the Responsible Accounting Officer of the Federal Communications Commission.

RE Act is the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 *et seq.*).

RETRF is the Rural Electric and Telephone Revolving Fund.

RTB is the Rural Telephone Bank.

RUS is the Rural Utilities Service, an agency of the United States Department of Agriculture, or its predecessor or successor.

§ 1770.28—1770.45 [Reserved]

APPENDIX TO SUBPART C—ACCOUNTING METHODS AND PROCEDURES REQUIRED OF ALL BORROWERS

All borrowers shall maintain and keep their books of accounts and all other books and records which support the entries in such books of accounts in accordance with the accounting principles prescribed in this appendix.

	Postretirement Benefits.	

A. Statement of Financial Accounting Standards No. 106, Employers' Accounting for Postretirement Benefits Other than Pensions (Statement No. 106), requires reporting entities to accrue the expected cost of postretirement benefits during the years the employee provides service to the entity. For purposes of applying the provisions of Statement No. 106, members of the board of directors are considered to be employees of the cooperative. Prior to the issuance of Statement No. 106, most reporting entities accounted for postretirement benefit costs on a "pay-as-you-go" basis; that is, costs were recognized when paid, not when the employee provided service to the entity in exchange for the benefits. (Statement 106 is available from the Financial Accounting Standards Board, 401 Merritt 7, P.O. Box 5116, Norwalk, CT. 06856-5116.)

B. As defined in Statement No. 106, a postretirement benefit plan is a deferred compensation arrangement in which an employer promises to exchange future benefits for an employee's current services. Postretirement benefit plans may be funded or unfunded. Postretirement benefits include, but are not limited to, health care, life insurance, tuition assistance, day care, legal services, and

housing subsidies provided outside of a pension plan.

C. Statement No. 106 applies to both written plans and to plans whose existence is implied from a practice of paying postretirement benefits. An employer's practice of providing postretirement benefits to selected employees under individual contracts with specific terms determined on a employee-by-employee basis does not, however, constitute a postretirement benefit plan under the provisions of this statement.

D. Postretirement benefit plans generally fall into three categories: single-employer defined benefit plans, multiemployer plans, and multiple-employer plans.

E. A single-employer plan is a postretirement benefit plan that is maintained by one employer. The term may also be applied to a plan that is maintained by related parties such as a parent and its subsidiaries. A multiemployer plan is a postretirement benefit plan in which two or more unrelated employers contribute, usually pursuant to one or more collective-bargaining agreements. One characteristic of a multiemployer plan is that the assets contributed by one participating employer may be used to provide benefits to employees of other participating employers since assets contributed by an employer are not segregated in a separate account or restricted to provide benefits only to employees of that employer.

F. A multiple-employer plan is a postretirement benefit plan that is maintained by more than one employer but is not a multiemployer plan. A multiple-employer plan is generally not collectively bargained and is intended to allow participating employers to pool their plan assets for investment purposes and reduce the cost of plan administration. A multiple-employer plan maintains separate accounts for each employer so that contributions provide benefits only for employees of the contributing employer.

G. The accounting requirements set forth in this interpretation focus on single- and multiple-employer plans. The accounting requirements set forth in Statement No. 106 for multiemployer plans or defined contribution plans shall be adopted for borrowers electing those types of plans.

H. Under the provisions of Statement No. 106, there are two components of the postretirement benefit cost: the current period cost and the transition obligation. The transition obligation is a one-time accrual of the costs resulting from services already provided. Statement No. 106 allows the transition obligation to be deferred and amortized on a straight-line basis over the average remaining service period of the active employees. If the average remaining service period of the active employees is less than 20 years, a 20-year amortization period may be used.

I. Accounting Requirements

A. All borrowers shall adopt the accrual accounting provisions and reporting requirements as set forth in Statement No. 106. The transition obligation and accrual of the current period cost must be based upon an actuarial study. This study must be updated to allow the borrower to comply with the measurement date requirements of Statement No. 106; however, the study must, at a minimum, be updated every five years. Borrowers may not account for postretirement benefits on a "pay-as-you-go" basis.

B. Under the provisions of Statement No. 106, an entity may recognize the transition obligation, in its entirety, when Statement No. 106 is first adopted or the entity may elect to delay the recognition of the transition obligation. On December 26, 1991, however, the FCC issued 6 FCC Rcd 7560, which requires telecommunications carriers to recognize the transition obligation on a delayed basis. RUS reviewed this issuance and has determined that borrowers must comply with this ruling and recognize the transition obligation on a delayed basis.

C. The deferral and amortization of the transition obligation on a delayed basis is considered to be an off balance sheet item. As a result, an accounting entry is not required at the time of adoption of Statement No. 106. Instead, the transition obligation is recognized as a component of postretirement benefit cost as it is amortized. The amount of the unamortized transition obligation must be disclosed in the notes to the financial statements.

D. In accordance with the provisions of Responsible Accounting Officer (RAO) Letter 20, released by the FCC on April 24, 1992, Account 4310, Other Long-Term Liabilities, shall be used to record the liability accrued for postretirement benefits. (RAO Letter 20 is available from the Federal Communications Commission, 1919 M Street, NW., Washington, DC 20554.) Borrowers shall credit this account for the net periodic cost of postretirement benefits for the current year and shall debit this account for any fund payments made during the current year.

E. Net periodic postretirement benefit cost includes current period service cost, interest cost, return on plan assets, amortization of prior service cost, gains and losses, and amortization of the transition obligation. If fund payments create a debit balance in the postretirement benefits portion of Account 4310, the debit balance applicable to postretirement benefits shall be reported in Account 1410, Other Noncurrent Assets. Account 1410 shall also be used to record any prepaid postretirement benefit cost.

F. The benefits portion of the expense matrix for the appropriate Part 32 expense accounts shall be used to record the current period service cost component of the current

Rural Utilities Service, USDA

Pt. 1770, Subpt. C, App.

year's net periodic postretirement benefit cost. The interest cost component, return on plan assets, amortization of prior service cost, gains and losses, and amortization of the transition obligation shall be charged to the benefits portion of the expense matrix of Account 6728, Other General and Administrative.

II. Effective Date and Implementation

A. For plans outside the United States and for defined benefit plans of employers that (a) are nonpublic enterprises and (b) sponsor defined benefit postretirement plans with no more than 500 plan participants in the aggregate, Statement No. 106 is effective for fiscal years beginning after December 15, 1994. For all other plans, Statement No. 106 is effective for fiscal years beginning after December 15, 1992.

102 Rural Telephone Bank Stock

A. Capital stock issued by the Rural Telephone Bank consists of Class A, Class B, and Class C stock. Class A stock is issued only to the Administrator of RUS on behalf of the United States in exchange for capital furnished to RTB.

B. Class B stock is issued only to recipients of loans under Section 408 of the Rural Electrification Act (RE Act). Borrowers receiving loan funds pursuant to Section 408(a) (1) or (2) of the RE Act are required to invest 5 percent of the amount of loan funds approved in Class B stock. No dividends are payable on Class B stock. All holders of Class B stock are entitled to patronage refunds in the form of Class B stock under the terms and conditions specified in the bylaws of the RTB.

C. Class C stock is available for purchase by borrowers, corporations, and public bodies eligible to borrow under Section 408 of the RE Act, or by organizations controlled by such borrowers, corporations and public bodies. The payment of dividends is in accordance with the bylaws of the RTB.

Accounting Requirements

A. The purchase of RTB stock required by the RE Act shall be debited to Account 1402.1, Investments in Nonaffiliated Companies—Class B RTB Stock. Patronage refunds in the form of additional shares of RTB Class B Stock shall be debited to Account 1402.1 and credited to Account 1402.11, Investments in Nonaffiliated Companies—Class B RTB Stock—Cr.

B. Purchases of Class C RTB stock shall be debited to Account 1402.2, Investments in Nonaffiliated Companies—Class C RTB Stock. Cash dividends received on Class C RTB stock shall be credited to Account 7310, Dividend Income.

C. Once a borrower has repaid all of its RTB loans, it may request that its Class B

stock be converted to Class C stock. When the conversion is made, Account 1402.2 shall be debited and Account 1402.1 shall be credited for the face value of the stock converted. Account 1402.21, Investments in Nonaffiliated Companies—Class C RTB Stock—Cr., shall be credited and Account 1402.11 shall be debited for the face value of the Class B stock that has been received as patronage refunds.

103 Cushion of Credit Investments

A. The RUS Cushion of Credit account is an investment account bearing an interest rate of 5 percent. All voluntary payments or overpayments on Rural Electric and Telephone Revolving Fund (RETRF) loans made after October 1, 1987, are deposited into this account in the appropriate borrower's name.

Accounting Requirements

A. The following journal entries shall be used by RUS borrowers to record the transactions associated with cushion of credit payment:

1. Dr. 4210.18, RUS Notes—Advance Payments, Dr. Cr. 1130.1/1120.11, Cash—General Fund. To record the cushion of credit payment.
2. Dr. 4210.18, RUS Notes—Advance Payments, Dr. Cr. 7320/7300.2, Interest Income. To record interest earned on cushion of credit deposits.
3. Dr. 4210.12, RUS Notes, Cr. 4210.18, RUS Notes—Advance Payments, Dr. To apply cushion of credit payments (and interest) to the RUS note.

104 Rural Economic Development Loan and Grant Program

A. On December 21, 1987, Section 313, Cushion of Credit Payments Program (7 U.S.C. 901 et seq.), was added to the RE Act. Section 313 establishes a Rural Economic Development Subaccount and authorizes the Administrator of the RUS to provide zero interest loans or grants to RE Act borrowers for the purpose of promoting rural economic development and job creation projects. Effective December 5, 1994, this authority was assigned to the Administrator, Rural Business and Cooperative Development Service.

B. 7 CFR part 1703, Subpart B, Rural Economic Development Loan and Grant Program, sets forth the policies and procedures relating to the zero interest loan program and for approving and administering grants.

Accounting Requirements

A. The accounting journal entries required to record the transactions associated with a Rural Economic Development grant are as follows:

Pt. 1770, Subpt. C, App.

7 CFR Ch. XVII (1–1–97 Edition)

1. Dr. 1130.4/1120.14, Cash—General Fund—Economic Development Grant Funds. Cr. 4210.25, RUS Notes—Economic Development Grant; Cr. 4540.41, Other Capital—Miscellaneous; or Cr. 7360/7300.6, Other Nonoperating Income. To record grant funds disbursed by RUS. If the grant agreement requires repayment of the funds upon termination of the revolving loan program, Account 4210.25 shall be credited. If the grant agreement states that there is absolutely no obligation for repayment upon termination of the revolving loan program, the funds shall be accounted for as a permanent infusion of capital by crediting Account 4540.41. If, however, the grant agreement is silent as to the final disposition of the grant funds, Account 7360/7300.6 shall be credited.
2. Dr. 1401.1, Other Investments in Affiliated Companies—Federal Economic Development Grant Loans or Dr. 1402.4, Other Investments in Nonaffiliated Companies—Federal Economic Development Grant Loans. Cr. 1130.4/1120.14, Cash—General Fund—Economic Development Grant Funds. To record a Federal revolving loan to an economic development project.
3. Dr. 1130.1/1120.11, Cash—General Fund. Cr. 7360/7300.6, Other Nonoperating Income. To record payment of loan servicing fees charged to the economic development project.
4. Dr. 1130.5/1120.15, Cash—General Fund—Economic Development Non-Federal Revolving Funds. Cr. 1401.1, Other Investments in Affiliated Companies—Federal Economic Development Grant Loans or Cr. 1402.4, Other Investments in Nonaffiliated Companies—Federal Economic Development Grant Loans. To record the repayment, by the project, of the Federal revolving loan.
5. Dr. 1401.2, Other Investments in Affiliated Companies—Non-Federal Economic Development Grant Loans or Dr. 1402.5, Other Investments in Nonaffiliated Companies—Non-Federal Economic Development Grant Loans. Cr. 1130.5/1120.15, Cash—General Fund—Economic Development Non-Federal Revolving Funds. To record a Non-Federal revolving loan to an economic development project.
6. Dr. 1210, Interest and Dividends Receivable Cr. 7320/7300.2, Interest Income. To record the interest earned on a Non-Federal revolving loan to an economic development project.
7. Dr. 1130.5/1120.15, Cash—General Fund—Economic Development Non-Federal Revolving Funds. Cr. 1401.2, Other Investments in Affiliated Companies—Non-Federal Economic Development Grant Loans or Cr. 1402.5, Other Investments in Nonaffiliated Companies—Non-Federal Economic Development Grant Loans. To record the repayment, by the project, of the Non-Federal revolving loan.
 - B. The accounting journal entries required to record the transactions associated with a Rural Economic Development loan are as follows:
 1. Dr. 4210.26, Economic Development Notes—Unadvanced, Fr. Cr. 4210.25, Economic Development Notes. To record the contractual obligation to RUS for the Economic Development Notes.
 2. Dr. 1130.6/1120.16, Cash—General Fund—Economic Development Loan Funds Cr. 4210.26, Economic Development Notes—Unadvanced, Dr. To record the receipt of the economic development loan funds.
 3. Dr. 1401.3, Other Investments in Affiliated Companies—Federal Economic Development Loans or Dr. 1402.6, Other Investments in Nonaffiliated Companies—Federal Economic Development Loans. Cr. 1130.6/1120.16, Cash—General Fund—Economic Development Loan Funds. To record the disbursement of economic development loan funds to the project.
 4. Dr. 1130.1/1120.11, Cash—General Fund. Cr. 7360/7300.6, Other Nonoperating Income. To record payment of loan servicing fees charged to the economic development project.
 5. Dr. 1210, Interest and Dividends Receivable Cr. 7320/7300.2, Interest Income. To record the interest earned on the investment of rural economic development loan funds.
 6. Dr. 7370, Special Charges. Cr. 1130.1, Cash—General Funds. To record the payment of interest earned in excess of \$500 on the investment of rural economic development loan funds. NOTE: Interest earned in excess of \$500 must be used for the rural economic development project for which the loan funds were received or returned to RUS.
 7. Dr. 1130.6/1120.16, Cash—General Fund—Economic Development Loan Funds. Cr. 1401.3, Other Investments in Affiliated Companies—Federal Economic Development Loans or Cr. 1402.6, Other Investments in Nonaffiliated Companies—Federal Economic Development Loans. To record repayment, by the project, of the economic development loan.
 8. Dr. 4210.25, Economic Development Notes. Cr. 1130.6/1120.16, Cash—General Fund—Economic Development Loan Funds. To record the repayment, to RUS, of the economic development loan funds.

Rural Utilities Service, USDA

Pt. 1770, Subpt. C, App.

105 *Satellite and Cable Television Services*

A. Many RUS borrowers have become involved in providing either satellite or cable television services to their members and others through subsidiaries, joint ventures, or as segments of their current operations.

Accounting Requirements

A. This section outlines the accounting to be followed when recording transactions involving satellite or cable television services.

1. *Separate Subsidiary.* If a borrower provides satellite or cable television services through a separate subsidiary, the investment in the subsidiary shall be debited to Account 1401, Investments in Affiliated Companies. The net income or loss of the subsidiary shall be debited or credited to Account 1401, as appropriate, with an offsetting entry to Account 7360, Other Nonoperating Income.

2. *Joint Venture.* i. If a borrower provides satellite or cable television services through a joint venture, the borrower's ownership interest dictates the accounting methodology. If the borrower has less than a 20 percent ownership interest in the joint venture, the investment is accounted for under the cost method of accounting in Account 1402, Investments in Nonaffiliated Companies. Under the cost method, the joint venture's net income or loss is not recorded in the borrower's records. Income is recognized only to the extent of any dividends declared by the joint venture. When a dividend is declared, the borrower shall debit Account 1210, Interest and Dividends Receivable, and credit Account 7310, Dividend Income. When the dividend is received in cash, the borrower shall debit Account 1130.1, Cash—General Fund, and credit Account 1210.

ii. If a borrower has a 20-percent or more ownership interest in the joint venture, the investment is accounted for under the equity method in Account 1401, Investments in Affiliated Companies. The borrower's proportionate share of the joint venture's net income or loss shall be debited or credited to Account 1401, as appropriate, with an offsetting entry to Account 7360, Other Nonoperating Income.

3. *Segment of Current Operations.* i. If a borrower provides satellite or cable television service as a segment of its current operations and there are no shared assets between this activity and the regulated telecommunications activities of the borrower, the investment shall be debited to Account 1406.1, Nonregulated Investments—Permanent Investment. The net income or loss from providing such service shall be debited or credited, as appropriate, to Account 1406.3, Nonregulated Investments—Current Net Income, with an offsetting entry to Account 7990, Nonregulated Net Income.

ii. If a borrower provides satellite or cable television service as a segment of current op-

erations and shares assets between this activity and the regulated telecommunications activities of the borrower, the franchise and application fees shall be debited to a subaccount of Account 2690, Intangibles. The cost of the satellite or cable television equipment shall be debited to a subaccount of Account 2231, Radio Systems. Revenues earned from providing satellite or cable service shall be credited to Account 5280, Nonregulated Operating Revenue, while the associated expenses shall be recorded in a subaccount of the applicable regulated expense accounts.

4. *Sale and Installation of Satellite or Cable Television Equipment.* i. If a borrower sells or installs satellite or cable television equipment as a segment of its current operations and there are no shared assets between this activity and the regulated telecommunications activities of the borrower, the purchase of the equipment shall be debited to Account 1406.1, Nonregulated Investments—Permanent Investment. The net income or loss from providing such services shall be debited or credited, as appropriate, to Account 1406.3, Nonregulated Investments—Current Net Income, with an offsetting entry to Account 7990, Nonregulated Net Income.

ii. If a borrower sells or installs satellite or cable television equipment as a segment of its current operations and shares assets between this activity and the regulated telecommunications activities of the borrower, the purchase of the equipment shall be debited to Account 1220.2, Property Held for Sale or Lease. Revenues received for the sale or installation of the equipment shall be credited to Account 5280, Nonregulated Operating Revenue, while the associated expenses shall be debited to a subaccount of the applicable regulated expense accounts.

106 *Consolidated Financial Statements*

A. In October 1987, FASB issued Statement of Financial Accounting Standards No. 94, Consolidation of All Majority-Owned Subsidiaries (Statement No. 94). (Statement 94 is available from the Financial Accounting Standards Board, 401 Merritt 7, P.O. Box 5116, Norwalk, CT 06856-5116.) For purposes of reporting to RUS, Statement No. 94 shall be applied as follows:

1. A borrower that is a subsidiary of another entity shall prepare and submit to RUS separate financial statements even though this financial information is presented in the parent's consolidated statements.

2. In those cases in which a borrower has a majority-ownership in a subsidiary, the borrower shall prepare consolidated financial statements in accordance with the requirements of Statement No. 94. These consolidated statements must also include supplementary schedules presenting a Balance

§ 1773.1

Sheet and Income Statement for each majority-owned subsidiary included in the consolidated statements.

B. Although Statement No. 94 requires the consolidation of majority-owned subsidiaries, the RUS Form 479, Financial and Statistical Report for Telecommunications Borrowers, shall be prepared on an unconsolidated basis by all borrowers.

PART 1773—POLICY ON AUDITS OF RUS BORROWERS

Subpart A—General Provisions

Sec.

1773.1 General.

1773.2 Definitions.

Subpart B—RUS Audit Requirements

1773.3 Annual audit.

Subpart A—General Provisions

§ 1773.1 General.

(a) This part implements those standard provisions of the security instrument utilized by the Rural Utilities Service (RUS) for both electric and telephone borrowers and by the Rural Telephone Bank (RTB) for its telephone borrowers. The provisions require borrowers to prepare and furnish to RUS, at least once during each 12-month period, a full and complete report of its financial condition, operations, and cash flows, in form and substance satisfactory to RUS, audited and certified by an independent certified public accountant (CPA), satisfactory to RUS, and accompanied by a report of such audit, in form and substance satisfactory to RUS.

(b) This part 1773 applies to both RUS and RTB borrowers. For the purposes of RTB borrowers, as used in this part 1773, *RUS* means *RTB* and *Administrator* means *Governor* unless the text indicates otherwise.

(c) This part complies with the 1994 revision of Government Auditing Standards, issued by the Comptroller General of the United States, United States General Accounting Office.

(d) An auditor's report, report on compliance, report on internal controls, and management letter are required to meet the reporting provisions of the RUS security instrument.

(1) The auditor's report must state that the audit was conducted in accordance with generally accepted government auditing standards (GAGAS).

Rural Utilities Service, USDA

§1773.2

(2) The management letter must state that the audit was conducted in accordance with this part.

(3) A report of the audit, in form and substance satisfactory to RUS, cannot be issued unless and until an audit has been performed in accordance with GAGAS and this part.

(4) A borrower is in violation of provisions of its security instrument with RUS if the borrower fails to provide an audit performed in compliance with GAGAS and this part. RUS security instruments normally provide for notice and an opportunity to cure such violations before RUS can exercise certain remedies.

(5) A report prepared in connection with a review or compilation of financial statements, as defined in Statement of Standards for Accounting and Review Services No. 1, Compilation and Review of Financial Statements, does not satisfy the requirements of the RUS security instrument.

(6) A report, as described in Statement on Auditing Standards (SAS) No. 62, entitled "Special Reports", or in SAS No. 35, entitled "Special Reports—Applying Agreed-upon Procedures to Specified Elements, Accounts, or Items of a Financial Statement", does not satisfy the RUS loan security instrument requirements.

(7) An annual report containing audited financial statements does not satisfy the RUS security instrument requirements.

(e) This part further implements those provisions of the standard RUS security instrument by setting forth the criteria for CPAs to be deemed satisfactory to RUS and the audit procedures and documentation standards that must be performed before a report of the audit satisfactory to RUS can be prepared and issued.

[56 FR 63360, Dec. 3, 1991, as amended at 61 FR 107, Jan. 3, 1996]

§1773.2 Definitions.

As used in this part:

Administrator means the Administrator of RUS and, as provided in §1773.2 (b), *Governor*.

AICPA means the American Institute of Certified Public Accountants.

Audit means an examination of financial statements by an independent CPA

for the purpose of expressing an opinion on the fairness with which those statements present financial position, results of operations, and changes in cash flows in conformity with generally accepted accounting principles (GAAP) and for determining whether the borrower has complied with applicable laws, regulations, and contracts for those transactions and events reflected in the financial statements.

BAD means the Borrower Accounting Division of RUS.

CPA means certified public accountant. The terms *CPA* and *CPA firm* are used interchangeably.

FFB means the Federal Financing Bank, an instrumentality and wholly owned corporation of the United States.

GAAP means generally accepted accounting principles.

GAGAS means generally accepted government auditing standards as set forth in Government Auditing Standards, Standards for Audit of Governmental Organizations, Programs, Activities, and Functions, issued by the Comptroller General of the United States.

GAO means the General Accounting Office.

Governor means the Governor of the RTB.

Illegal act has the meaning prescribed in SAS No. 54, entitled "Illegal Acts by Clients".

Irregularity has the meaning prescribed in SAS No. 53, entitled "The Auditor's Responsibility to Detect and Report Errors and Irregularities".

OIG means the Office of Inspector General, United States Department of Agriculture.

OMB means the Office of Management and Budget.

PCPS means the Private Companies Practice Section of the AICPA.

REA means the Rural Electrification Administration formerly an agency of the United States Department of Agriculture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs.

Regulatory asset means an asset resulting from an action of a regulator as prescribed in Statement of Financial Accounting Standards (SFAS) No. 71,

§ 1773.3

entitled “Accounting for the Effects of Certain Types of Regulation”.

Regulatory liability means a liability imposed on a regulated enterprise by an action of a regulator as prescribed in SFAS No. 71, entitled “Accounting for the Effects of Certain Types of Regulation”.

Related party has the meaning prescribed in SFAS No. 57, entitled “Related Party Disclosures”.

Related party transaction has the meaning prescribed in SFAS No. 57, entitled “Related Party Disclosures”.

Reportable condition has the meaning prescribed in SAS No. 60, entitled “Communication of Internal Control Structure Related Matters Noted in an Audit”.

RTB means the Rural Telephone Bank.

RUS means the Rural Utilities Service, an agency of the United States Department of Agriculture established pursuant to Section 232 of the Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994 (Pub. L. 103-354, 108 Stat. 3178), successor to REA with respect to administering certain electric and telephone programs. See 7 CFR 1700.1.

SAS means Statement on Auditing Standards as prescribed by the AICPA.

SEC Practice Section means the Securities and Exchange Commission Practice Section of the AICPA.

SFAS means Statements of Financial Accounting Standards as prescribed by the Financial Accounting Standards Board.

State means any state or territory of the United States, or the District of Columbia.

Uniform System of Accounts means, for telephone borrowers, the Uniform System of Accounts for Telecommunications Companies, prescribed by the Federal Communications Commission and set forth at 47 CFR part 32, as supplemented by RUS pursuant to 7 CFR part 1770, Accounting Requirements for RUS Telephone Borrowers, subpart B, Uniform System of Accounts, and, for electric borrowers, the Uniform System of Accounts Prescribed for Electric Borrowers of the RUS.

[56 FR 63360, Dec. 3, 1991, as amended at 59 FR 66440, Dec. 27, 1994; 60 FR 2874, Jan. 12, 1995]

7 CFR Ch. XVII (1–1–97 Edition)

Subpart B—RUS Audit Requirements

§ 1773.3 Annual audit.

(a) Each borrower must have its financial statements audited annually by a CPA selected by the borrower and approved by RUS as set forth in § 1773.4.

(b) Each borrower must establish an annual as of audit date within twelve months of the date of receipt of the first advance of RUS or FFB loan funds and must prepare financial statements as of the date established.

(c) Until all loans made or guaranteed by RUS have been repaid, the borrower must furnish three copies of the auditor’s report, report on compliance, report on internal controls, and management letter to RUS within 120 days of the as of audit date.

(d) A borrower that qualifies as a unit of state or local government or Indian tribe as such terms are defined in the Single Audit Act of 1984 (31 U.S.C. 7501 *et seq.*) and OMB Circular A-128, Audits of State and Local Governments, must comply with this part as follows:

(1) A borrower that receives total Federal financial assistance equal to or in excess of \$100,000 during the fiscal year, must have an audit performed and submit an auditor’s report meeting the requirements of the Single Audit Act of 1984 (31 U.S.C. 7501 *et seq.*).

(2) A borrower that receives total Federal financial assistance of between \$25,000 and \$100,000 during the fiscal year must have an audit performed in accordance with either the requirements of the Single Audit Act of 1984 (31 U.S.C. 7501 *et seq.*) or this part.

(3) A borrower that receives less than \$25,000 in total Federal financial assistance during the fiscal year must have an audit performed in accordance with the requirements of this part.

(4) A borrower must notify RUS, in writing, within 30 days of the as of audit date, of the total Federal financial assistance received during the audit year and must state whether it will have an audit performed in accordance with the Single Audit Act of 1984 (31 U.S.C. 7501 *et seq.*) or this part.

(i) A borrower that elects to comply with this part must select a CPA that

Rural Utilities Service, USDA

§1773.4

meets the qualifications set forth in §1773.5.

(ii) If an audit is performed in accordance with the Single Audit Act of 1984 (31 U.S.C. 7501 *et seq.*), an auditor's report that meets the requirements of the Single Audit Act of 1984 (31 U.S.C. 7501 *et seq.*) will be sufficient to satisfy that borrower's obligations under this part.

(e) OMB Circular A-133, Audits of Institutions of Higher Education and Other Nonprofit Organizations, does not apply to audits of RUS borrowers.

[56 FR 63360, Dec. 3, 1991, as amended at 59 FR 659, Jan. 6, 1994]

§1773.4 Borrower responsibilities.

(a) *Selection of a qualified CPA.* The borrower's board of directors is responsible for the selection of a qualified CPA that meets the requirements set forth in §1773.5. When selecting a CPA, the borrower should consider, among other matters:

(1) The qualifications of CPAs available to do the work;

(2) The CPA's experience in performing audits of utilities; and

(3) The CPA's ability to complete the audit and submit the reports and management letter within 90 days of the as of audit date.

(b) *Board approval of selection.* The board's approval of a CPA must be recorded by a board resolution that states:

(1) The CPA meets RUS's qualifications to perform an audit; and

(2) The borrower and CPA will enter into an audit agreement in accordance with §1773.6.

(c) *Notification of selection.* When the initial selection or subsequent change of a CPA by a borrower has been made, the borrower must notify RUS, in writing, at least 90 days prior to the as of audit date.

(1) RUS will notify the borrower, in writing, within 30 days of the date of receipt of such notice, if the selection or change in CPA is not satisfactory.

(2) Notification to RUS that the same CPA has been selected for succeeding audits of the borrower's financial statements is not required; however, the procedures outlined in this part must be followed for each new CPA selected, even though such CPA may pre-

viously have been approved by RUS to audit records of other RUS borrowers. Changes in the name of a CPA firm are considered to be a change in the CPA.

(d) *Audit agreement.* The borrower must enter into an audit agreement with the CPA that complies with §1773.6.

(e) *Debarment certification.* The borrower is responsible for the receipt, from the selected CPA, of a lower tier covered transaction certification, as required under the provisions of Executive Orders 12549 and 12689, Debarment and Suspension, and any rules or regulations issued thereunder.

(f) *Submission of auditor's report.* The borrower must submit to RUS the required auditor's report, report on compliance, report on internal controls, and management letter as set forth in §1773.21.

(1) An annual auditor's report, report on compliance, report on internal controls, and management letter that fail to meet the requirements detailed in this part will be returned to the borrower with a written explanation of noncompliance.

(2) The borrower must, within 60 days of the date of the letter detailing the noncompliance, submit corrected reports to RUS.

(3) If corrected reports are not received within 60 days of the date of the letter detailing the noncompliance, RUS may notify the borrower that a default has occurred under its security instrument or take other appropriate action. The default notice will set forth the period of time during which the default will be remedied.

(g) *Submission of plan of corrective action.* The borrower must submit written comments to RUS on the findings and recommendations in the auditor's report, report on compliance, report on internal controls, and management letter. The borrower must also submit to RUS:

(1) A written plan for corrective action taken or planned; and

(2) Comments on the status of corrective action taken on previously reported findings and recommendations.

If corrective action is not necessary, a written statement describing the reason it is not should accompany the auditor's report.

§ 1773.5

7 CFR Ch. XVII (1–1–97 Edition)

§ 1773.5 Qualifications of CPA.

For purposes of the RUS standard security instrument, any CPA that meets the qualifications criteria of this section and enters into an audit agreement with the borrower that complies with § 1773.6, will be considered satisfactory to RUS.

(a) *Certification.* The accountant that audits the financial statements of an RUS borrower must be a CPA in good standing of some state. The CPA does not have to be licensed by the state in which the borrower is located; however, the CPA must abide by the rules and regulations of professional conduct promulgated by the accountancy board of the state in which the borrower is located.

(b) *Independence.* The CPA must be independent. A CPA will be considered independent if the CPA:

(1) Meets the standards for independence contained in the AICPA Code of Professional Conduct in effect at the time the CPA's independence is under review;

(2) Does not have and has not had any direct financial interest or any material indirect financial interest in the borrower during the period covered by the audit; and

(3) Is not and was not, during the period under audit, connected with the borrower as a promoter, underwriter, trustee, director, officer, or employee.

(c) *Peer review requirement.* The CPA must belong to and participate in a peer review program, and must have undergone a satisfactory peer review of the accounting and audit practice conducted by an approved peer review program under paragraph (c)(4) of this section, unless a waiver is granted under paragraph (c)(7) of this section. The reviewing organization must not be affiliated with or have had its most recent peer review conducted by the organization currently being reviewed (reciprocal reviews). After the initial peer review has been performed, the CPA must undergo a peer review of the accounting and audit practice within 42 months of the previous "as of" peer review date or at such additional times as designated by the peer review executive committee.

(1) A CPA that receives an unqualified peer review report will be satisfac-

tory to RUS provided that the CPA meets the other criteria set forth in this section.

(2) If a CPA receives a qualified or adverse peer review report, the CPA must undergo a second peer review within 18 months of the date of the qualified or adverse report. A CPA that receives an unqualified second peer review report will be satisfactory to RUS provided that the CPA meets the other criteria set forth in this section.

(3) A CPA that receives a second qualified or adverse peer review report will not be satisfactory to RUS.

(4) *Approved peer review programs.* The following peer review programs are approved by RUS:

(i) The peer review programs conducted by the AICPA;

(ii) The peer review program conducted by the regulated audit program group of the National Conference of CPA Practitioners; and

(iii) An independent peer review program that, in RUS's determination, requires its members to:

(A) Ensure that the CPA can legally engage in the practice of certified public accounting;

(B) Adhere to the quality control standards established by the AICPA;

(C) Submit to peer reviews of the CPA's accounting and audit practice every 42 months or at such additional times as designated by its own executive committee; and

(D) Ensure that all professionals in the firm, including CPAs and nonCPAs, take part in the qualifying continuing professional education requirements of GAGAS, as set forth in paragraphs (c)(4)(iii)(D)(1) and (c)(4)(iii)(D)(2). A qualified continuing professional education course is one which meets the standards of the AICPA.

(1) An auditor responsible for planning, directing, conducting, or reporting on government audits must complete, every two years, at least eighty hours of continuing education and training which contributes to the auditor's professional proficiency. At least twenty hours must be completed in any one year of the two-year period; and

(2) An individual responsible for planning, directing, and conducting substantial portions of the field work, or reporting on the government audit

Rural Utilities Service, USDA

§1773.6

must complete at least 24 of the 80 hours of continuing education and training in subjects directly related to the government environment and to government auditing. If the audited entity operates in a specific or unique environment, auditors must receive training that is related to that environment.

(5) *Notification.* The CPA must notify the Director, BAD, in writing, of participation in a peer review program. RUS will notify the CPA within 60 days of receipt of this notice if the selected peer review program is acceptable.

(6) *Submission of reports.* The CPA must submit to the Director, BAD, a copy of any peer review report and accompanying letter of comment, if any, within 60 days of the date such report and letter of comment are released by the peer review group.

(i) If the peer review report indicates that a follow-up review will be made, the CPA must submit subsequent reports to the Director, BAD, within 60 days of the date such reports are released by the peer review group.

(ii) A peer review report must be submitted to the Director, BAD, at least once every 42 months, or more frequently, if required by the peer review program.

(iii) A copy of the peer review report, accompanying letter of comment, and the partners' inspections must be made available to OGC, upon request.

(7) *Waiver of the peer review requirement.* (i) A CPA may request that the Administrator, RUS, waive the peer review requirement. To be eligible for a waiver, the following criteria must be met:

(A) The firm has been in existence for less than 1 year from the date of the request and has not been previously organized under a different name;

(B) One of the partners organizing the firm has previously, within 18 months preceding the request, worked for a firm that has been peer reviewed and the partner was partner-in-charge of audits of RUS borrowers in the previous firm;

(C) The firm has enrolled in an approved peer review program; and

(D) The firm agrees to have the peer review conducted within 18 months of the date of the RUS waiver.

(ii) Waiver requests must address each of the criteria in paragraph (c)(7)(i) of this section and should be submitted to the Director, Borrower Accounting Division.

(d) *Audit agreement.* The CPA must enter into an audit agreement with the borrower that complies with §1773.6.

[56 FR 63360, Dec. 3, 1991, as amended at 61 FR 107, Jan. 3, 1996]

§1773.6 Audit agreement.

(a) An audit agreement must be entered into between the CPA and the borrower. The audit agreement must set forth the auditor's responsibilities in a financial statement audit, including the responsibilities for testing and reporting on internal controls and compliance with laws and regulations and the nature of any additional testing of internal controls and compliance required by laws and regulations. These responsibilities should be contrasted with the additional procedures that could be performed that would result in additional assurances or opinions on the internal control structure and compliance with laws and regulations. The audit agreement must also include the following:

(1) The borrower and the CPA acknowledge that the audit is being performed and the auditor's report, report on compliance, report on internal controls, and management letter is being issued in order to enable the borrower to comply with the provisions of RUS's security instrument;

(2) The borrower and CPA acknowledge that RUS will consider the borrower to be in violation of its security instrument with RUS if the borrower fails to have an audit performed and documented in compliance with GAGAS and this part;

(3) The CPA represents that he/she meets the requirements under this part to be satisfactory to RUS;

(4) The CPA will perform the audit and will prepare the auditor's report, report on compliance, report on internal controls, and management letter in accordance with the requirements of this part;

(5) The CPA will document the audit work performed in accordance with GAGAS, the professional standards of

§ 1773.7

the AICPA, and the requirements of this part;

(6) The CPA will make all audit-related documents, including auditor's reports, workpapers, and management letters available to RUS or its representatives (OGC and GAO), upon request, and will permit the photocopying of all audit-related documents; and

(7) The CPA will follow the requirements of reporting irregularities and illegal acts as outlined in § 1773.9.

(b) The audit agreement may include such additional terms and conditions as the CPA and borrower deem appropriate, including, but not limited to:

(1) The CPA will report all audit findings to the board of directors as required in § 1773.20(b); and

(2) The auditor's report, report on compliance, report on internal controls, and management letter with copies for transmittal to RUS, and supplemental lenders, if applicable, will be submitted to the borrower's board of directors within 90 days of the as of audit date;

(c) A copy of the audit agreement must be available at the borrower's office for inspection by RUS personnel. One copy of the current audit agreement must be maintained in the CPA's workpapers or permanent file.

[56 FR 63360, Dec. 3, 1991, as amended at 61 FR 108, Jan 3, 1996]

§ 1773.7 Audit standards.

(a) The audit must be performed in accordance with GAGAS and this part. The audit must be performed in accordance with GAGAS in effect at the audit date unless the borrower is directed otherwise, in writing, by RUS.

(b) The audit must include such tests of the accounting records and such other auditing procedures that are sufficient to enable the CPA to express an opinion on the financial statements and to issue the required reports on compliance and internal controls and the management letter.

(c) Audit scope limitation. (1) The borrower will not limit the scope of the audit to the extent that the CPA is unable to meet RUS's audit requirements or to provide an unqualified opinion that the financial statements are pre-

7 CFR Ch. XVII (1-1-97 Edition)

sented fairly in conformity with GAAP.

(2) The security instrument provision requiring the submission of a report of the audit is not satisfied if the CPA must qualify the opinion in the auditor's report due to limitations placed on the scope of the audit by the borrower.

(3) If the CPA determines during the audit that an unqualified opinion cannot be issued due to a scope limitation imposed by the borrower, the CPA should use professional judgment to determine what levels of the borrower's management should be informed.

(4) After informing the borrower's management, if the scope limitation is not adequately resolved, the CPA should immediately contact the Director, BAD, RUS, U.S. Department of Agriculture, Washington, DC 20250-1500. The Director, BAD, will endeavor to resolve the matter with the borrower.

§ 1773.8 Audit date.

(a) The annual audit must be performed as of the end of the same calendar month each year unless prior approval to change the as of audit date is obtained, in writing, from RUS.

(1) A borrower may request a change in the as of audit date by writing to the appropriate RUS regional office at least 60 days prior to the newly requested as of audit date.

(2) The time period between the prior as of audit date and the newly requested as of audit date must be no longer than twenty-four months. For example, a borrower that wishes to change its as of audit date from December 31, 19X1, to June 30, must make the change effective no later than June 30, 19X3.

(b) Comparative financial statements must be prepared and audited for the twelve months ending as of the new audit date and for the twelve months immediately preceding that period.

(c) A borrower that changes its as of audit date from December 31, 19X1, to June 30, 19X3, must have the CPA report on statements in the following manner:

Rural Utilities Service, USDA

§ 1773.10

Previously issued statements	Statements prepared as of new audit date
12/31/X1; 12/31/X0 (Statements need not be re-issued).	6/30/X3; 6/30/X2

§ 1773.9 Disclosure of irregularities and illegal acts.

(a) In accordance with GAGAS, the CPA must design audit steps and procedures to provide reasonable assurance of detecting errors, irregularities, illegal acts, and noncompliance with the provisions of contracts or grant agreements that could have a direct and material effect on financial statement amounts.

(b) If there is an indication that an irregularity may have occurred or evidence concerning the existence of a possible instance of noncompliance with the provisions of contracts or grant agreements that could have a material direct or indirect effect on the financial statements, the CPA must extend audit steps and procedures to obtain sufficient, competent evidential matter to determine whether, in fact, an irregularity or an instance of noncompliance has occurred and the effect on the borrower's financial statements.

(c) Pursuant to the terms of its audit agreement with the borrower, the CPA must immediately report, in writing, all irregularities and all indications or instances of illegal acts, whether material or not, to:

(1) The president of the borrower's board of directors;

(2) The Director, BAD; and

(3) OIG, as follows:

(i) For the States of Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, West Virginia, Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Puerto Rico, Rhode Island, Vermont and the Virgin Islands, report to USDA-OIG-Audit, Northeast Region, Regional Inspector General, 6505

Belcrest Road, room 428-A, Hyattsville, Maryland 20782;

(ii) For the States of Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee, report to USDA-OIG-Audit, Southeast Region, Regional Inspector General, 401 W. Peachtree Street, NW., room 2328, Atlanta, Georgia 30365-3520;

(iii) For the States of Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin, report to USDA-OIG-Audit, Midwest Region, Regional Inspector General, 111 N. Canal Street, Suite 1130, Chicago, Illinois 60606;

(iv) For the States of Arkansas, Louisiana, New Mexico, Oklahoma, and Texas, report to USDA-OIG-Audit, Southwest Region, Regional Inspector General, 101 South Main, room 324, Temple, Texas 76501;

(v) For the States of Colorado, Iowa, Kansas, Missouri, Montana, Nebraska, North Dakota, South Dakota, Wyoming, and Utah, report to USDA-OIG-Audit, Great Plains Region, Regional Inspector General, P.O. Box 293, Kansas City, Missouri 64141; and

(vi) For the States of Alaska, Arizona, California, Hawaii, Idaho, Nevada, Oregon, Territory of Guam, Trust Territories of Pacific, and Washington, report to USDA-OIG-Audit, Western Region, Regional Inspector General, 555 Battery Street, room 511, San Francisco, California 94111.

[56 FR 63360, Dec. 3, 1991, as amended at 61 FR 108, Jan. 3, 1996]

§ 1773.10 Access to audit-related documents.

Pursuant to the terms of the audit agreement, the CPA must make all audit-related documents, including auditors' reports, workpapers, and management letters available to RUS, or its designated representative, upon request and must permit RUS, or its designated representative, to photocopy all audit-related documents.

§ 1773.20

7 CFR Ch. XVII (1–1–97 Edition)

§§ 1773.11–1773.19 [Reserved]

Subpart C—RUS Requirements for the Submission and Review of the Auditor's Report, Report on Compliance, Report on Internal Controls, and Management Letter

§ 1773.20 CPA's submission of the auditor's report, report on compliance, report on internal controls, and management letter.

(a) *Time limit.* As soon as possible after completion of the audit, but within 90 days of the as of audit date, the CPA should deliver the auditor's report, report on compliance, report on internal controls, and management letter to the president of the borrower's board of directors. As a minimum, copies should be provided for each member of the board of directors and the manager. Further, three copies must be provided to the borrower for transmittal to RUS.

(b) *Communication with the board of directors.* In addition to providing sufficient copies of the auditor's report, report on compliance, report on internal controls, and management letter for each member of the borrower's board of directors, RUS requires that the CPA report all audit findings to the borrower's board of directors. RUS recommends that audit findings be communicated orally; however, the communication may be oral or written, at the borrower's discretion. If the information is communicated orally, the CPA must document the communication by appropriate memoranda or notations in the workpapers. If the CPA communicates in writing, a copy of the written communication must be included in the CPA's audit workpapers or permanent file.

(c) *Matters to be communicated.* Matters communicated to the board of directors must include, but are not limited to the matters to be communicated to the audit committee as prescribed in SAS No. 61, entitled "Communication with Audit Committee";:

(1) The initial selection of and changes in significant accounting policies;

(2) The methods used to account for significant or unusual transactions and

the effects of significant accounting policies in controversial or emerging areas;

(3) The process utilized by management to formulate significant accounting estimates and the basis for the CPA's conclusions regarding the reasonableness of these estimates;

(4) Audit findings and recommendations, including audit adjustments that either individually or in the aggregate have a significant effect on the borrower's financial statements;

(5) The CPA's responsibility for other information presented with the audited financial statements, any audit procedures performed, and the results thereof;

(6) Any disagreements with management, whether or not satisfactorily resolved, concerning matters that individually or in the aggregate may be significant to the borrower's financial statements or the auditor's report, report on compliance, report on internal controls, or management letter;

(7) Significant matters that were the subject of consultations with other accountants;

(8) Significant issues discussed with management with regard to the initial or recurring retention of the CPA; and

(9) Any serious difficulties encountered in dealing with management during the performance of the audit.

[56 FR 63360, Dec. 3, 1991, as amended at 59 FR 659, Jan. 6, 1994]

§ 1773.21 Borrower's review and submission of the auditor's report, report on compliance, report on internal controls, and management letter.

(a) The borrower's board of directors should note and record receipt of the auditor's report, report on compliance, report on internal controls, and management letter and any action taken in response to the reports or management letter in the minutes of the board meeting at which such reports and management letter are presented.

(b) The borrower must furnish RUS with three copies of the auditor's report, report on compliance, report on internal controls, and management letter within 120 days of the as of audit date. Any provision in RUS's security

Rural Utilities Service, USDA

§ 1773.32

instrument that requires such documents to be furnished to RUS in a shorter period of time may be disregarded.

(c) The borrower must furnish RUS with three copies of its plan for corrective action, if any, within 180 days of the as of audit date.

(d) The borrower must furnish RUS, within 120 days of the as of audit date, with a copy of each special report, summary of recommendations or similar communications, if any, received from the CPA as a result of the audit.

[56 FR 63360, Dec. 3, 1991, as amended at 59 FR 659, Jan. 6, 1994]

§§ 1773.22—1773.29 [Reserved]

Subpart D—RUS Reporting Requirements

§ 1773.30 General.

(a) The CPA must prepare the following:

(1) An auditor's report, examples of which are set forth in appendixes A, exhibit 1 (Electric), and B, exhibit 1 (Telephone) of this part 1773;

(2) A report on compliance, examples of which are set forth in appendixes A, exhibits 2 through 4 (Electric) and B, exhibits 2 through 4 (Telephone) of this part 1773;

(3) A report on internal controls, examples of which are set forth in appendixes A, exhibits 5 and 6 (Electric) and B, exhibits 5 and 6 (Telephone) of this part 1773; and

(4) A management letter, an example of which is set forth in appendix C of this part 1773.

(b) The CPA should deliver the auditor's report, report on compliance, report on internal controls, and management letter (with copies as required in § 1773.20) to the borrower as soon as possible after completion of the audit but not more than 90 days after the as of audit date.

§ 1773.31 Auditor's report.

The CPA must prepare a written report on comparative balance sheets, statements of revenue and patronage capital (or income and retained earnings, depending upon the structure of the borrower) and statements of cash flows. This report must be signed by

the CPA, cover all statements presented, and refer to the separate reports on internal controls and on compliance with laws and regulations issued in conjunction with the auditor's report.

[61 FR 108, Jan. 3, 1996]

§ 1773.32 Report on compliance.

(a) As required by GAGAS, the CPA must prepare a written report on the tests performed for compliance with applicable laws, regulations, contracts, and grants. This report must be signed by the CPA and must contain the status of known but uncorrected significant or material findings and recommendations from prior audits that affect the current audit objective.

(b) If, based upon assessments of materiality and audit risk, the CPA concludes that it is not necessary to perform tests of compliance with laws, regulations, and contracts, the CPA must issue a report as illustrated in appendix A, exhibit 2 (Electric) and appendix B, exhibit 2 (Telephone) of this part 1773.

(c) If the CPA determines that testing for compliance with laws, regulations, and contracts is necessary, and no material instances of noncompliance are found, the CPA must issue a report as illustrated in appendix A, exhibit 3 (Electric), and appendix B, exhibit 3 (Telephone) of this part 1773.

(d) If material instances of noncompliance are found, the CPA must issue a report as illustrated in appendix A, exhibit 4 (Electric), and appendix B, exhibit 4 (Telephone) of this part 1773.

(e) Other nonmaterial instances of noncompliance should not be disclosed in the report on compliance but should be reported in a separate communication to the board of directors, preferably in writing. All such communications must be documented in the workpapers.

(f) If the CPA has issued a separate letter detailing immaterial instances of noncompliance, the report on compliance must be modified to include a statement such as:

We noted certain immaterial instances of noncompliance that we have reported to the

§ 1773.33

management of (borrower's name) in a separate letter dated March 2, 19X0.

[56 FR 63360, Dec. 3, 1991, as amended at 61 FR 108, Jan. 3, 1996]

§ 1773.33 Report on internal controls.

As required by GAGAS, the CPA must prepare a written report on the borrower's internal control structure and the assessment of control risk made as part of the financial statement audit. This report must be signed by the CPA and must include, as a minimum:

(a) The scope of the CPA's work to obtain an understanding of the borrower's internal control structure and in assessing the control risk;

(b) A description of the reportable conditions noted which include material weaknesses identified as a result of the CPA's work in understanding and assessing the control risk; and

(c) The status of known but uncorrected, significant or material findings and recommendations from prior audits that affect the current audit objective.

[61 FR 108, Jan. 3, 1996]

§ 1773.34 Management letter.

The CPA must prepare a management letter that includes, at a minimum, comments on:

(a) *Audit procedures.* State whether the audit has been performed in accordance with this part;

(b) *Special reports.* State whether any special reports, summaries of recommendations, or similar communications were furnished to the borrower's management during the course of the audit or during interim audit work, and provide a description of the information furnished;

(c) *Accounting and records.* Comment on the adequacy and effectiveness of the borrower's accounting procedures, discuss the general condition of the records, and outline any recommendations for improvement. Comment on the adequacy and fairness of the methods used in accumulating and recording labor, material, and overhead costs, and the distribution of these costs to construction, retirement, and maintenance or other expense accounts, and where appropriate, include:

7 CFR Ch. XVII (1-1-97 Edition)

(1) Whether subsidiary plant records agree with the controlling general ledger plant accounts;

(2) Whether construction clearing accounts are cleared promptly of costs of completed construction to the proper classified plant accounts and whether depreciation was accrued on such completed construction from the date the plant was placed in service;

(3) Whether retirements of plant are currently and systematically recorded and properly priced;

(4) Whether all costs associated with retirements of plant are properly accounted for in the accumulated provision for depreciation accounts and comment on any unusual charges or credits to such accounts; and

(5) Whether RUS approval was obtained for a sale requiring such approval, and whether receipts from sales of plant, material or scrap were not handled in conformance with RUS requirements.

(d) *Materials control.* Comment on the adequacy of the control over materials and supplies.

(e) *Compliance with RUS loan and security instrument provisions.* State whether the following provisions of RUS's loan and security instruments have been complied with:

(1) For electric borrowers, provisions relating to:

(i) The requirement for funds to be deposited in banks or other depositories designated in the loan documents or approved by RUS. For purposes of this part 1773, funds shall be defined as cash on deposit in demand and time accounts, and certificates of deposit;

(ii) The requirement for a borrower to obtain written approval of mortgagees to enter into any contract for the operation or maintenance of all or any substantial part of its property, or for the use by others of its property. For purposes of this part 1773, the following contracts shall be deemed as requiring RUS approval:

(A) Management contracts in which the borrower has contracted to have another borrower or other entity manage its affairs;

(B) Management contracts in which the borrower has contracted to manage

Rural Utilities Service, USDA

§ 1773.34

another borrower or other utility system;

(C) Operations and maintenance contracts in which the borrower has contracted to have another borrower or other entity operate and/or maintain all or a substantial part (45% or more) of the physical plant facilities of the borrower;

(D) Operations and maintenance contracts in which the borrower has contracted to operate and maintain the physical plant facilities of another borrower or other utility system; and

(E) Contracts between the borrower and its manager; and

(iii) The requirement for a borrower to prepare and furnish mortgagees annual financial and statistical reports on the borrower's financial condition and operations. The CPA must state whether the information represented by the borrower as having been submitted to RUS in its most recent December 31 RUS Form 7 or Form 12 is in agreement with the borrower's audited records, and must comment on any exceptions noted. If the borrower represents that an amended report has been filed as of December 31, the comments must relate to the amended report.

(2) For telephone borrowers, provisions relating to:

(i) The requirement for a borrower to obtain written approval of the mortgagees to enter into any contract for the operation or maintenance of property and for the use of mortgaged property by others, or for services pertaining to toll traffic, operator assistance, or switching. For purposes of this part 1773, the following contracts shall be deemed as requiring RUS approval:

(A) Any contract, agreement or lease between the borrower and an affiliate other than as allowed under 7 CFR part 1744, subpart E;

(B) Any lease of a building or land; and

(C) Any other contract as defined in § 1773.34 (e)(2)(i) except:

(1) Industry standard traffic settlement agreements involving inter-exchange and long distance carriers which, in form and substance, conform with contracts in general use in the telecommunications industry;

(2) Billing and collecting agreements;

(3) Toll pooling arrangements involving National Exchange Carrier Association and state associations;

(4) Directory services agreements; and

(5) Joint use agreements;

(ii) The requirement for funds to be deposited in banks or other depositories designated in the loan documents or approved by RUS. For purposes of this part 1773, funds shall be defined as cash on deposit in demand and time accounts, and certificates of deposit; and

(iii) The requirement for a borrower to prepare and furnish mortgagees annual financial and statistical reports on the borrower's financial condition and operations. The CPA must state whether the information represented by the borrower as having been submitted to RUS in its most recent December 31 RUS Form 479 is in agreement with the borrower's audited records, and must comment on any exceptions noted. If the borrower represents that an amended report has been filed as of December 31, the comments must relate to the amended report;

(f) *Related party transactions.* State whether all material related party transactions have been disclosed in the notes to the financial statements in accordance with SFAS No. 57, entitled "Related Party Disclosures". If the audit did not disclose any related party transactions considered to be material, either individually or in the aggregate, so state;

(g) *Depreciation rates.* For electric borrowers, comment when the depreciation rates used in computing monthly accruals are not in compliance with RUS requirements (See RUS Bulletin 183-1, Depreciation Rates and Procedures), which require the use of depreciation rates that are within the ranges established by RUS for each primary plant account, or with the requirements of the State regulatory body having jurisdiction over the borrower's depreciation rates; and

(h) *Deferred debits and deferred credits.* For electric borrowers, provide a detailed analysis of the totals reported as deferred debits and deferred credits, including, but not limited to, margin stabilization plans, revenue deferral plans, and expense deferrals. The CPA must

§ 1773.38

7 CFR Ch. XVII (1–1–97 Edition)

state whether RUS has approved, in writing, each regulatory asset and liability.

[56 FR 63360, Dec. 3, 1991, as amended at 59 FR 659, Jan. 6, 1994; 61 FR 108, Jan. 3, 1996]

§§ 1773.35–1773.37 [Reserved]

Subpart E—RUS Required Audit Procedures and Documentation

§ 1773.38 Scope of engagement.

(a) RUS requires that the audit procedures set forth in §§ 1773.39 through 1773.45 be performed annually by the CPA during the audit of the RUS borrowers' financial statements, which audit procedures may be in addition to the conduct of a GAGAS audit.

(b) The CPA must exercise professional judgment in determining whether any auditing procedures in addition to those mandated by GAGAS or this part should be performed in order to afford a reasonable basis for rendering the auditor's report, report on compliance, report on internal controls, and management letter.

§ 1773.39 Utility plant and accumulated depreciation.

(a) *General.* The audit of these accounts must include tests of additions, replacements, retirements, and changes. Based upon the CPA's determination of materiality, an appropriate sample of transactions must be selected for testing. The CPA's workpapers must document that he/she:

(1) Examined direct labor and material transactions to determine whether the borrower's accounting records reflect a complete accumulation of costs;

(2) Examined indirect costs and overhead charges to determine if they conform to the Uniform System of Accounts;

(3) Reviewed the costs of completed construction and retirement projects to determine if they were cleared promptly from the work in progress accounts to the classified plant in service accounts and the related depreciation reserves;

(4) Examined direct purchases of special equipment and general plant;

(5) Determined the degree of accuracy and control of costing retire-

ments, including tests of salvage and removal costs;

(6) Reviewed the borrower's work order procedures; and

(7) Reviewed depreciation rates for adequate support, compared them to RUS guidelines, and determined if they are in compliance.

(b) *Construction work in progress.* (1) The workpapers must include a summary of open work orders reconciled to the general ledger. The CPA must note on the summary any unusual or non-typical projects.

(2) Based upon the CPA's determination of materiality, an appropriate sample of work orders must be selected for testing. The CPA's workpapers must document that he/she:

(i) Reviewed equipment purchases charged to work orders, including payments and receiving reports;

(ii) Reviewed contracts showing the scope of the work, the nature of the contract, the contract amount, and scheduled payments and reviewed supporting documents to determine that all services contracted for were in fact rendered;

(iii) Reviewed time cards and pay rates for several employees who allocate their time to work orders;

(iv) Reviewed the nature of material and supplies issued to the project, traced amounts and quantities to supporting documents, and reviewed the reasonableness of clearing rates for assignment of stores expense to the work order;

(v) Reviewed the accuracy of the computation of overheads applied to the work order; and

(vi) Reviewed other costs charged to the work order for support and propriety.

(3) Based upon the CPA's determination of materiality, an appropriate sample of completed contracts must be selected for testing. The CPA's workpapers must document that he/she:

(i) Scheduled payments to contractors and traced to verify payments and supporting invoices;

(ii) Traced contract costs to final closeout documents, to the general ledger, and to the continuing property records; and

(iii) Verified the costs of owner furnished materials, if applicable.

(4) The CPA must review the borrower's procedures for unitization and classification of work order and contract costs. Based upon the CPA's determination of materiality, an appropriate sample of transactions must be selected for testing. The CPA's workpapers must document that he/she:

(i) Reviewed the tabulation of record units for construction from the work order staking sheets to the tabulation of record units, to the unitization sheets, and to the continuing property records;

(ii) Reviewed the procedures for unitizing and distributing costs of completed construction to the plant accounts;

(iii) Verified that standard costs were being used;

(iv) Evaluated the basis for development of standard costs; and

(v) Determined that costs of completed construction were cleared promptly from work in progress accounts.

(c) *Continuing property records.* Based upon the CPA's determination of materiality, an appropriate sample of transactions must be selected for testing. The CPA's workpapers must document that he/she:

(1) Determined whether the subsidiary plant records agree with the controlling general ledger plant accounts;

(2) Noted differences in the workpapers; and

(3) Commented, in the management letter, on any discrepancies.

(d) *Retirement work-in-progress.* Based upon the CPA's determination of materiality, an appropriate sample of transactions must be selected for testing. The CPA's workpapers must document that he/she:

(1) Determined that plant retirements are currently and systematically recorded and priced on the basis of the continuing property records, and determined that costs of removal have been properly accounted for;

(2) Explained the method used in computing the cost of units of plant retired if continuing property records have not been established and deter-

mined whether costs appeared reasonable; and

(3) Determined the manner in which net losses due to retirements were accounted for and traced clearing entries to the depreciation reserve, the plant accounts, and the continuing property records.

(e) *Provision for accumulated depreciation.* The CPA's workpapers must include an analysis of transactions. Based upon the CPA's determination of materiality, an appropriate sample of transactions must be selected for testing. The CPA's workpapers must document that he/she:

(1) Verified the depreciation accruals for the period, including the depreciation base;

(2) Reviewed the basis of the depreciation rates, any change in rates and the reason therefor, and, if appropriate, determined whether the rates are in compliance with RUS requirements or with the requirements of the state regulatory body having jurisdiction over the borrower's depreciation rates;

(3) Reviewed salvage and removal costs; and

(4) Searched for unrecorded retirements.

(f) *Other reserves.* The CPA's workpapers must include an account analysis for all other material plant reserves, such as the reserve for the amortization of plant acquisition adjustments. Based upon the CPA's determination of materiality, an appropriate sample of transactions must be selected for testing. The CPA's workpapers must document that appropriate tests of transactions were performed.

(g) *Narrative.* The CPA must prepare and include in the workpapers a comprehensive narrative on the scope of work performed, observations made, and conclusions reached. Specific matters covered in this narrative must include:

(1) The nature of construction and other additions;

(2) The control over, and the accuracy of pricing retirements;

(3) The accuracy of distributing costs to classified utility plant accounts;

(4) An evaluation of the method of:

(i) Capitalizing the direct loadings on labor and material costs;

§ 1773.40

- (ii) Distributing transportation costs and other expense clearing accounts; and
- (iii) Capitalizing overhead costs;
- (5) The tests of depreciation;
- (6) A review of agreements such as those relating to acquisitions, property sales, and leases which affect the plant accounts; and
- (7) Notations, if applicable, of RUS approval of property sales and the propriety of the disposition of the proceeds.

§ 1773.40 Regulatory assets.

The CPA's workpapers must document whether all regulatory assets comply with the requirements of SFAS No. 71. For electric borrowers only, the CPA's workpapers must document whether all regulatory assets have received RUS approval.

[59 FR 660, Jan. 6, 1994]

§ 1773.41 Extraordinary retirement losses.

The CPA's workpapers must contain an analysis of retirement losses, including any required approval by a regulatory commission with jurisdiction in the matter, or RUS, in the absence of commission jurisdiction.

§ 1773.42 Clearing accounts.

The CPA's workpapers must contain an analysis of all clearing accounts. Based upon the CPA's determination of materiality, an appropriate sample of transactions should be selected for testing. The CPA's workpapers must document that transactions were reviewed for proper allocation between expense and capital accounts.

§ 1773.43 Capital and equity accounts.

(a) *Capital stock.* For privately owned companies, the workpapers must include analyses of all stock transactions during the audit period. Based upon the CPA's determination of materiality, an appropriate sample of transactions must be selected for testing. The CPA's workpapers must document that he/she:

- (1) Reviewed the subsidiary records and reconciled them to the general ledger control account;

7 CFR Ch. XVII (1-1-97 Edition)

(2) Reviewed authorizations and issuances or redemptions of capital stock for proper approvals by the board of directors, stockholders, and regulatory commissions;

(3) Determined that transactions were made in accordance with the appropriate provisions of the articles of incorporation, bylaws, and RUS loan documents; and

(4) Determined that transactions were recorded in accordance with the Uniform System of Accounts.

(b) *Memberships.* For cooperative organizations, the workpapers must include an analysis of the membership transactions during the audit period. Based upon the CPA's determination of materiality, an appropriate sample of transactions must be selected for testing. The CPA's workpapers must document that he/she:

(1) Reviewed the subsidiary records and reconciled them to the general ledger control account; and

(2) Determined that transactions were made in accordance with the appropriate provisions of the articles of incorporation, bylaws, and RUS loan documents.

(c) *Patronage capital, retained earnings, margins, and other equities.* The workpapers must include an analysis of the patronage capital, retained earnings, margins and other equities, and any related reserve accounts. Based upon the CPA's determination of materiality, an appropriate sample of transactions must be selected for testing. The CPA's workpapers must document that he/she:

(1) Determined that the transactions were made in accordance with the appropriate provisions of the articles of incorporation, bylaws, RUS loan documents, Uniform System of Accounts, or orders of regulatory commissions;

(2) Traced payments to underlying support; and

(3) Determined whether, under the terms of the RUS security instrument, restrictions of retained earnings or margins are required and, if so, whether they have been properly recorded.

§ 1773.44 Long-term debt.

The CPA's workpapers must document that he/she:

(a) Confirmed RUS, FFB, and RTB debt to the appropriate confirmation schedule (RUS Form 690, Confirmation Schedule Obligation to the FFB as of; or Form 691, Confirmation Schedule—Long-term Obligation to RUS as of; or RTB Form 12, Confirmation Schedule);

(b) Confirmed other long-term debt directly with the lender;

(c) Examined notes executed or canceled during the audit period; and

(d) Tested accrued interest computations.

§ 1773.45 Regulatory liabilities.

The CPA's workpapers must document whether all regulatory liabilities comply with the requirements of SFAS No. 71. For electric borrowers only, the CPA's workpapers must document whether all regulatory liabilities have received RUS approval.

[59 FR 660, Jan. 6, 1994]

§§ 1773.46—1773.49 [Reserved]

APPENDIX A TO PART 1773—SAMPLE AUDITOR'S REPORT FOR AN ELECTRIC COOPERATIVE

Appendix A includes an example of an auditor's report, report on compliance, report on internal controls, financial statements and accompanying notes for an electric distribution cooperative. The sample auditor's report is intended as a guide only and, while it is recommended that the format be followed, each auditor's report should be prepared to adequately cover the circumstances. To the extent possible, it should be used as a guide in preparing auditors' reports for other types of electric borrowers. For power supply borrowers and for distribution borrowers with production or transmission plant, the same general format should be followed. However, the Statement of Revenue and Patronage Capital must be expanded to show separate totals for operations expenses and maintenance expenses for each class of production plant and for transmission plant.

Exhibit 1—Sample Auditor's Report

Certified Public Accountants, 1600 Main Street, City, State 24105, The Board of Directors, Center County Electric Cooperative:

INDEPENDENT AUDITOR'S REPORT

We have audited the accompanying balance sheets of Center County Electric Cooperative as of December 31, 19X9 and 19X8, and the related statements of revenue and patronage capital, and cash flows for the years

then ended. These financial statements are the responsibility of Center County Electric Cooperative's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audits in accordance with generally accepted auditing standards and Government Auditing Standards issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Center County Electric Cooperative as of December 31, 19X9 and 19X8, and the results of its operations and its cash flows for the years then ended in conformity with generally accepted accounting principles.

In accordance with Government Auditing Standards, we have also issued a report dated March 2, 19X0, on our consideration of Center County Electric Cooperative's internal control structure and a report dated March 2, 19X0, on its compliance with laws and regulations.

Certified Public Accountants

March 2, 19X0

Exhibit 2—Sample Report on Compliance When, Based on Assessments of Materiality and Audit Risk, the CPA Concluded It Was Not Necessary to Perform Tests of Compliance With Laws and Regulations

Certified Public Accountants, 1600 Main Street, City, State 24105, The Board of Directors, Center County Electric Cooperative:

We have audited the financial statements of Center County Electric Cooperative as of and for the years ended December 31, 19X9 and 19X8, and have issued our report thereon dated March 2, 19X0.

We conducted our audits in accordance with generally accepted auditing standards and the Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

Compliance with laws, regulations, contracts, and grants applicable to Center County Electric Cooperative is the responsibility

Pt. 1773, App. A

7 CFR Ch. XVII (1–1–97 Edition)

of Center County Electric Cooperative's management. As part of our audit, we assessed the risk that noncompliance with certain provisions of laws, regulations, contracts, and grants could cause the financial statements to be materially misstated. We concluded that the risk of such material misstatement was sufficiently low that it was not necessary to perform tests of Center County Electric Cooperative's compliance with such provisions of laws, regulations, contracts, and grants.

This report is intended for the information of the audit committee, management, the Rural Utilities Service, and supplemental lenders. However, this report is a matter of public record and its distribution is not limited.

Certified Public Accountants

March 2, 19X0

Exhibit 3—Sample Report on Compliance When, Based on Assessments of Materiality and Audit Risk, the CPA Performed Compliance Testing and Found No Reportable Instances of Noncompliance

Certified Public Accountants, 1600 Main Street, City, State 24105, The Board of Directors, Center County Electric Cooperative:

We have audited the financial statements of Center County Electric Cooperative as of and for the years ended December 31, 19X9 and 19X8, and have issued our report thereon dated March 2, 19X0.

We conducted our audits in accordance with generally accepted auditing standards and Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

Compliance with laws, regulations, contracts, and grants applicable to Center County Electric Cooperative is the responsibility of Center County Electric Cooperative's management. As part of obtaining reasonable assurance about whether the financial statements are free of material misstatement, we performed tests of Center County Electric Cooperative's compliance with certain provisions of laws, regulations, contracts, and grants. However, the objective of our audit of the financial statements was not to provide an opinion on overall compliance with such provisions. Accordingly, we do not express such an opinion.

The results of our tests disclosed no instances of noncompliance that are required to be reported herein under Government Auditing Standards.

This report is intended for the information of the audit committee, management, the Rural Utilities Service, and supplemental lenders. However, this report is a matter of

public record and its distribution is not limited.

Certified Public Accountants

March 2, 19X0

Exhibit 4—Sample Report on Compliance When, Based on Assessments of Materiality and Audit Risk, the CPA Performed Compliance Testing and Found Reportable Instances of Noncompliance

Certified Public Accountants, 1600 Main Street, City, State 24105, The Board of Directors, Center County Electric Cooperative:

We have audited the financial statements of Center County Electric Cooperative as of and for the years ended December 31, 19X9 and 19X8, and have issued our report thereon dated March 2, 19X0.

We conducted our audits in accordance with generally accepted auditing standards and Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

Compliance with laws, regulations, contracts, and grants applicable to Center County Electric Cooperative is the responsibility of Center County Electric Cooperative's management. As part of obtaining reasonable assurance about whether the financial statements are free of material misstatement, we performed tests of Center County Electric Cooperative's compliance with certain provisions of laws, regulations, contracts, and grants. However, the objective of our audit of the financial statements was not to provide an opinion on overall compliance with such provisions. Accordingly, we do not express such an opinion.

The results of our tests disclosed instances of noncompliance that are required to be reported herein under Government Auditing Standards for which the ultimate resolution cannot presently be determined. Accordingly, no provision for any liability that may result has been recognized in Center County Electric Cooperative's 19X9 and 19X8 financial statements.

[Include paragraphs describing the instances of noncompliance noted.]

We considered these instances of noncompliance in forming our opinion on whether Center County Electric Cooperative's 19X9 and 19X8 financial statements are presented fairly, in all material respects, in conformity with generally accepted accounting principles, and this report does not effect our report dated March 2, 19X0, on those financial statements.

This report is intended for the information of the audit committee, management, the Rural Utilities Service, and supplemental lenders. However, this report is a matter of

Rural Utilities Service, USDA

Pt. 1773, App. A

public record and its distribution is not limited.

Certified Public Accountants

March 2, 19X0

Exhibit 5—Sample Report on Internal Controls When Reportable Conditions Were Found

Certified Public Accountants, 1600 Main Street, City, State 24105, The Board of Directors, Center County Electric Cooperative:

We have audited the financial statements of Center County Electric Cooperative as of and for the years ended December 31, 19X9 and 19X8, and have issued our report thereon dated March 2, 19X0.

We conducted our audits in accordance with generally accepted auditing standards and Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

The management of Center County Electric Cooperative is responsible for establishing and maintaining an internal control structure. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of internal control structure policies and procedures. The objectives of an internal control structure are to provide management with reasonable, but not absolute, assurance that the assets are safeguarded against loss from unauthorized use or disposition, and that transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of financial statements in accordance with generally accepted accounting principles. Because of inherent limitations in any internal control structure, errors or irregularities may nevertheless occur and not be detected. Also, projection of any evaluation of the structure to future periods is subject to the risk that procedures may become inadequate because of changes in conditions or that the effectiveness of the design and operation of policies and procedures may deteriorate.

In planning and performing our audit of the financial statements of Center County Electric Cooperative for the years ended December 31, 19X9 and 19X8, we obtained an understanding of the internal control structure. With respect to the internal control structure, we obtained an understanding of the design of relevant policies and procedures and whether they have been placed in operation, and we assessed control risk in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide an opinion on the internal control structure.

Accordingly, we do not express such an opinion.

We noted certain matters involving the internal control structure and its operation that we consider to be reportable conditions under standards established by the American Institute of Certified Public Accountants. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal control structure that, in our judgment, could adversely affect the entity's ability to record, process, summarize, and report financial data consistent with the assertions of management in the financial statements.

[Include paragraphs to describe the reportable conditions noted.]

A material weakness is a reportable condition in which the design or operation of one or more of the specific internal control structure elements does not reduce to a relatively low level the risk that errors or irregularities in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions.

Our consideration of the internal control structure would not necessarily disclose all matters in the internal control structure that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses as defined above. However, we believe none of the reportable conditions described above is a material weakness.

We also noted other matters involving the internal control structure and its operation that we have reported to the management of Center County Electric Cooperative in a separate letter dated March 2, 19X0.

This report is intended for the information of the audit committee, management, the Rural Utilities Service, and supplemental lenders. However, this report is a matter of public record, and its distribution is not limited.

Certified Public Accountants

March 2, 19X0

Exhibit 6—Sample Report on Internal Controls When No Reportable Conditions Were Found

Certified Public Accountants, 1600 Main Street, City, State 24105, The Board of Directors, Center County Electric Cooperative:

We have audited the financial statements of Center County Electric Cooperative, as of and for the years ended December 31, 19X9 and 19X8, and have issued our report thereon dated March 2, 19X0.

We conducted our audits in accordance with generally accepted auditing standards

Pt. 1773, App. A

and Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

The management of Center County Electric Cooperative is responsible for establishing and maintaining an internal control structure. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of internal control structure policies and procedures. The objectives of an internal control structure are to provide management with reasonable, but not absolute, assurance that assets are safeguarded against loss from unauthorized use or disposition, and that transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of financial statements in accordance with generally accepted accounting principles. Because of inherent limitations in any internal control structure, errors or irregularities may nevertheless occur and not be detected. Also, projection of any evaluation of the structure to future periods is subject to the risk that procedures may become inadequate because of changes in conditions or that the effectiveness of the design and operation of policies and procedures may deteriorate.

In planning and performing our audit of the financial statements of Center County Electric Cooperative for the years ended December 31, 19X9 and 19X8, we obtained an understanding of the internal control structure. With respect to the internal control structure, we obtained an understanding of the design of relevant policies and proce-

7 CFR Ch. XVII (1-1-97 Edition)

dures and whether they have been placed in operation, and we assessed control risk in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide an opinion on the internal control structure. Accordingly, we do not express such an opinion.

Our consideration of the internal control structure would not necessarily disclose all matters in the internal control structure that might be material weaknesses under standards established by the American Institute of Certified Public Accountants. A material weakness is a condition in which the design or operation of one or more of the specific internal control structure elements does not reduce to a relatively low level the risk that errors or irregularities in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving the internal control structure and its operations that we consider to be material weaknesses as defined above.

However, we noted other matters involving the internal control structure and its operation that we have reported to the management of Center County Electric Cooperative in a separate letter dated March 2, 19X0.

This report is intended for the information of the audit committee, management, the Rural Utilities Service, and supplemental lenders. However, this report is a matter of public record, and its distribution is not limited.

CENTER COUNTY ELECTRIC COOPERATIVE
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 19X9 AND DECEMBER 31, 19X8

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

Include a brief description of the reporting entity's significant accounting policies in accordance with Accounting Principles Board Opinion No. 22, Disclosure of Accounting Policies.

Disclosure of accounting policies should identify and describe the accounting principles followed by the borrower and the methods of applying those principles that materially affect the determination of financial position, cash flow, and results of operations.

Disclosures of accounting policies do not have to be duplicated in this section if presented elsewhere as an integral part of the financial statements.

2. ASSETS PLEDGED:

Substantially all assets are pledged as security for long-term debt to REA.

3. ELECTRIC PLANT AND DEPRECIATION RATES AND PROCEDURES:

Listed below are the major classes of the electric plant as of December 31, 19X9, and 19X8:

	<u>19X9</u>	<u>19X8</u>
Intangible Plant	\$ 2,194	\$ 2,194
Distribution Plant	9,011,036	8,873,957
General Plant	<u>511,416</u>	<u>489,113</u>
Electric Plant in Service	9,524,646	9,365,264
Construction Work in Progress	<u>407,943</u>	<u>317,166</u>
	<u>\$9,932,589</u>	<u>\$9,682,430</u>

Provision has been made for depreciation of distribution plant at a straight-line composite rate of 2.86 percent per annum.

General Plant depreciation rates have been applied on a straight-line basis as follows:

Structures and Improvement	2.5%
Office Furniture	6.0%
Transportation Equipment	14.0%
Power Operated Equipment	12.0%
Other General Plant	4.0%
Communications Equipment	6.0%

Rural Utilities Service, USDA

Pt. 1773, App. A

4. INVESTMENTS IN ASSOCIATED ORGANIZATIONS:

Investments in associated organizations consisted of the following at December 31, 19X9 and 19X8:

	<u>19X9</u>	<u>19X8</u>
Capital Term Certificates of the National Rural Utilities Cooperative Finance Corporation (NRUCFC)	\$ 385,193	\$ 288,261
NRUCFC Patronage Capital Credits	5,065	3,537
Other	<u>1,000</u>	<u>1,000</u>
	<u>\$ 391,258</u>	<u>\$ 292,798</u>

5. DEFERRED CHARGES:

Following is a summary of amounts recorded as deferred charges as of December 31, 19X9 and 19X8:

	<u>19X9</u>	<u>19X8</u>
Preliminary Surveys 19X0 - X1 Work Plan	\$ 5,666	\$ 1,762

6. PATRONAGE CAPITAL:

At December 31, 19X9 and 19X8, patronage capital consisted of:

	<u>19X9</u>	<u>19X8</u>
Assignable	\$ 255,250	\$ 83,323
Assigned to Date	<u>1,952,448</u>	<u>1,869,125</u>
	2,207,698	1,952,448
Less: Retirements to Date	<u>445,900</u>	<u>425,615</u>
	<u>\$1,761,798</u>	<u>\$1,526,833</u>

Under the provisions of the Mortgage Agreement, until the equities and margins equal or exceed forty percent of the total assets of the cooperative, the return to patrons of contributed capital is generally limited to twenty-five percent of the patronage capital or margins received by the cooperative in the prior calendar year. The equities and margins of the cooperative represent 25.3 percent of the total assets at balance sheet date. Capital credit retirements in the amount of \$20,285 were paid in 19X9.

7. OTHER EQUITIES:

At December 31, 19X9 and 19X8, other equities consisted of:

	<u>19X9</u>	<u>19X8</u>
Retired Capital Credits - Gain	\$ 36,190	\$ 34,990
Donated Capital	<u>17,457</u>	<u>910</u>
	<u>\$ 53,647</u>	<u>\$ 35,900</u>

8. MORTGAGE NOTES - REA:

Long-term debt is represented by mortgage notes payable to the United States of America. Following is a summary of outstanding long-term debt as of December 31, 19X9 and 19X8:

	<u>19X9</u>	<u>19X8</u>
2% Notes due March 31, 19X5	\$1,057,155	\$1,098,700
2% Notes due December 31, 19X6	2,485,927	2,502,370
5% Notes due December 31, 19X6	1,851,033	1,935,315
Less: Current Maturities	<u>(145,000)</u>	<u>(140,000)</u>
	<u>\$5,249,115</u>	<u>\$5,396,385</u>

Unadvanced loan funds of \$285,600 are available to the cooperative on loan commitments from REA.

Principal and interest installments on the above notes are due quarterly in equal amounts of \$99,600. As of December 31, 19X9, annual maturities of long-term debt outstanding for the next five years are as follows:

19X0	\$145,000
19X1	\$150,000
19X2	\$151,500
19X3	\$154,000
19X4	\$155,000

Advance payments of \$252,300 may be applied to the installments.

9. PENSION PLAN:

Substantially all of the employees of the Cooperative are covered by the ABC Retirement and Security Program, a multiemployer plan. Pension expense for the years ended 19X9 and 19X8 was \$22,400.00 and \$20,400.00, respectively.

10. DEFERRED CREDITS:

Following is a summary of the amounts recorded as deferred credits as of December 31, 19X9 and 19X8:

	<u>19X9</u>	<u>19X8</u>
Customer Energy Payments	\$ 6,694	\$ 3,065
Inventory Adjustment	<u>5,210</u>	<u>7,500</u>
	<u>\$ 11,904</u>	<u>\$ 10,565</u>

11. LITIGATION:

The cooperative is a defendant in an action in which the plaintiff claims damages totaling \$200,000 for personal injuries sustained. The action has been dismissed by the District Court, but is on appeal before the State Supreme Court. Management is of the opinion that no liability will be incurred by the cooperative as a result of this action.

12. COMMITMENTS:

Under its wholesale power agreement, the cooperative is committed to purchase its electric power and energy requirements from Central Power Cooperative, Inc., until December 31, 19XX. The rates paid for such purchases are subject to review annually.

[56 FR 63360, Dec. 3, 1991, as amended at 61 FR 109, Jan. 3, 1996]

**APPENDIX B TO PART 1773—SAMPLE
AUDITOR’S REPORT FOR A CLASS A
OR B COMMERCIAL TELEPHONE COM-
PANY**

Appendix B includes an example of a short-form auditor’s report, report on compliance, report on internal controls, financial statements and accompanying notes for a commercial telephone company. The sample auditor’s report is intended as a guide only and, while it is recommended that the format be followed, each auditor’s report should be prepared to adequately cover the circumstances. To the extent possible, it should be used as a guide in preparing auditors’ reports for other types of telephone borrowers.

Exhibit 1—Sample Auditor’s Report

Certified Public Accountants, 1600 Main Street, City, State 24105, The Board of Directors, Center Telephone Company:

INDEPENDENT AUDITOR’S REPORT

We have audited the accompanying balance sheets of Center Telephone Company as of December 31, 19X9 and 19X8, and the related statements of revenue and patronage capital, and cash flows for the years then ended. These financial statements are the responsibility of Center Telephone Company’s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audits in accordance with generally accepted auditing standards and Government Auditing Standards issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Center Telephone Company as of December 31, 19X9 and 19X8, and the results of its operations and its cash flows for the years then ended in conformity with generally accepted accounting principles.

In accordance with Government Auditing Standards, we have also issued a report dated March 2, 19X0, on our consideration of Center Telephone Company’s internal control structure and a report dated March 2,

19X0, on its compliance with laws and regulations.

Certified Public Accountants

March 2, 19X0

Exhibit 2—Sample Report on Compliance When, Based on Assessments of Materiality and Audit Risk, the CPA Concluded It Was Not Necessary to Perform Tests of Compliance With Laws and Regulations

Certified Public Accountants, 1600 Main Street, City, State 24105, The Board of Directors, Center Telephone Company

We have audited the financial statements of Center Telephone Company as of and for the years ended December 31, 19X9 and 19X8, and have issued our report thereon dated March 2, 19X0.

We conducted our audits in accordance with generally accepted auditing standards and the Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

Compliance with laws, regulations, contracts, and grants applicable to Center Telephone Company is the responsibility of Center Telephone Company’s management. As part of our audit, we assessed the risk that noncompliance with certain provisions of laws, regulations, contracts, and grants could cause the financial statements to be materially misstated. We concluded that the risk of such material misstatement was sufficiently low that it was not necessary to perform tests of Center Telephone Company’s compliance with such provisions of laws, regulations, contracts, and grants.

This report is intended for the information of the audit committee, management, the Rural Utilities Service, and supplemental lenders. However, this report is a matter of public record and its distribution is not limited.

Exhibit 3—Sample Report on Compliance When, Based on Assessments of Materiality and Audit Risk, the CPA Performed Compliance Testing and Found No Reportable Instances of Noncompliance

Certified Public Accountants, 1600 Main Street, City, State 24105, The Board of Directors, Center Telephone Company:

We have audited the financial statements of Center Telephone Company as of and for the years ended December 31, 19X9 and 19X8, and have issued our report dated March 2, 19X0.

Rural Utilities Service, USDA

Pt. 1773, App. B

We conducted our audits in accordance with generally accepted auditing standards and Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

Compliance with laws, regulations, contracts, and grants applicable to Center Telephone Company is the responsibility of Center Telephone Company's management. As part of obtaining reasonable assurance about whether the financial statements are free of material misstatement, we performed tests of Center Telephone Company's compliance with certain provisions of laws, regulations, contracts, and grants. However, the objective of our audit of the financial statements was not to provide an opinion on overall compliance with such provisions. Accordingly, we do not express such an opinion.

The results of our tests disclosed no instances of noncompliance that are required to be reported herein under Government Auditing Standards.

This report is intended for the information of the audit committee, management, the Rural Utilities Service, and supplemental lenders. However, this report is a matter of public record and its distribution is not limited.

Certified Public Accountants

March 2, 19X0

Exhibit 4—Sample Report on Compliance When, Based on Assessments of Materiality and Audit Risk, the CPA Performed Compliance Testing and Found Reportable Instances of Noncompliance

Certified Public Accountants, 1600 Main Street, City, State 24105, The Board of Directors, Center Telephone Company:

We have audited the financial statements of Center Telephone Company as of and for the years ended December 31, 19X9 and 19X8, and have issued our report thereon dated March 2, 19X0.

We conducted our audits in accordance with generally accepted auditing standards and Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

Compliance with laws, regulations, contracts, and grants applicable to Center Telephone Company is the responsibility of Center Telephone Company's management. As part of obtaining reasonable assurance about whether the financial statements are free of material misstatement, we performed tests of Center Telephone Company's compliance with certain provisions of laws, regulations,

contracts, and grants. However, the objective of our audit of the financial statements was not to provide an opinion on overall compliance with such provisions. Accordingly, we do not express such an opinion.

The results of our tests disclosed instances of noncompliance that are required to be reported herein under Government Auditing Standards for which the ultimate resolution cannot presently be determined. Accordingly, no provision for any liability that may result has been recognized in Center Telephone Company's 19X9 and 19X8 financial statements.

[Include paragraphs describing the instances of noncompliance noted.]

We considered these instances of noncompliance in forming our opinion on whether Center Telephone Company's 19X9 and 19X8 financial statements are presented fairly, in all material respects, in conformity with generally accepted accounting principles, and this report does not effect our report dated March 2, 19X0, on those financial statements.

This report is intended for the information of the audit committee, management, the Rural Utilities Service, and supplemental lenders. However, this report is a matter of public record and its distribution is not limited.

Certified Public Accountants

March 2, 19X0

Exhibit 5—Sample Report on Internal Controls When Reportable Conditions Were Found

Certified Public Accountants, 1600 Main Street, City, State 24105, The Board of Directors, Center Telephone Company:

We have audited the financial statements of Center Telephone Company as of and for the years ended December 31, 19X9 and 19X8, and have issued our report thereon dated March 2, 19X0.

We conducted our audits in accordance with generally accepted auditing standards and Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

The management of Center Telephone Company is responsible for establishing and maintaining an internal control structure. In fulfilling this responsibility, estimates and judgements by management are required to assess the expected benefits and related costs of internal control structure policies and procedures. The objectives of an internal control structure are to provide management with reasonable, but not absolute, assurance that the assets are safeguarded against loss from unauthorized use or disposition, and that transactions are executed in accordance

with management's authorization and recorded properly to permit the preparation of financial statements in accordance with generally accepted accounting principles. Because of inherent limitations in any internal control structure, errors or irregularities may nevertheless occur and not be detected. Also, projection of any evaluation of the structure to future periods is subject to the risk that procedures may become inadequate because of changes in conditions or that the effectiveness of the design and operation of policies and procedures may deteriorate.

In planning and performing our audit of the financial statements of Center Telephone Company for the years ended December 31, 19X9 and 19X8, we obtained an understanding of the internal control structure. With respect to the internal control structure, we obtained an understanding of the design of relevant policies and procedures and whether they have been placed in operation, and we assessed control risk in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide an opinion on the internal control structure. Accordingly, we do not express such an opinion.

We noted certain matters involving the internal control structure and its operation that we consider to be reportable conditions under standards established by the American Institute of Certified Public Accountants. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal control structure that, in our judgement, could adversely affect the entity's ability to record, process, summarize, and report financial data consistent with the assertions of management in the financial statements.

[Include paragraphs to describe the reportable conditions noted.]

A material weakness is a reportable condition in which the design or operation of one or more of the specific internal control structure elements does not reduce to a relatively low level the risk that errors or irregularities in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions.

Our consideration of the internal control structure would not necessarily disclose all matters in the internal control structure that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses as defined above. However, we believe none of the reportable conditions described above is a material weakness.

We also noted other matters involving the internal control structure and its operation that we have reported to the management of Center Telephone Company in a separate letter dated March 2, 19X0.

This report is intended for the information of the audit committee, management, and Rural Utilities Service, and supplemental lenders. However, this report is a matter of public record, and its distribution is not limited.

Exhibit 6—Sample Report on Internal Controls When No Reportable Conditions Were Found

Certified Public Accountants, 1600 Main Street, City, State 24105, The Board of Directors, Center Telephone Company:

We have audited the financial statements of Center Telephone Company, as of and for the years ended December 31, 19X9 and 19X8, and have issued our report thereon dated March 2, 19X0.

We conducted our audit in accordance with generally accepted auditing standards and Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

The management of Center Telephone Company is responsible for establishing and maintaining an internal control structure. In fulfilling this responsibility, estimates and judgements by management are required to assess the expected benefits and related costs of internal control structure policies and procedures. The objectives of an internal control structure are to provide management with reasonable, but not absolute, assurance that assets are safeguarded against loss from unauthorized use or disposition, and that transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of financial statements in accordance with generally accepted accounting principles. Because of inherent limitations in any internal control structure, errors or irregularities may nevertheless occur and not be detected. Also, projection of any evaluation of the structure to future periods is subject to the risk that procedures may become inadequate because of changes in conditions or that the effectiveness of the design and operation of policies and procedures may deteriorate.

In planning and performing our audit of the financial statements of Center Telephone Company for the years ended December 31, 19X9 and 19X8, we obtained an understanding of the internal control structure. With respect to the internal control structure, we obtained an understanding of the design of

Rural Utilities Service, USDA**Pt. 1773, App. B**

relevant policies and procedures and whether they have been placed in operation, and we assessed control risk in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide an opinion on the internal control structure. Accordingly, we do not express such an opinion.

Our consideration of the internal control structure would not necessarily disclose all matters in the internal control structure that might be material weaknesses under standards established by the American Institute of Certified Public Accountants. A material weakness is a condition in which the design or operation of one or more of the specific internal control structure elements does not reduce to a relatively low level the risk that errors or irregularities in amounts that would be material in relation to the financial statements being audited may occur

and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving the internal control structure and its operations that we consider to be material weaknesses as defined above.

However, we noted other matters involving the internal control structure and its operation that we have reported to the management of Center Telephone Company in a separate letter dated March 2, 19X0.

This report is intended for the information of the audit committee, management, the Rural Utilities Service, and supplemental lenders. However, this report is a matter of public record, and its distribution is not limited.

CENTER TELEPHONE COMPANY
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 19X9 AND DECEMBER 31, 19X8

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

Include a brief description of the reporting entity's significant accounting policies in accordance with Accounting Principles Board Opinion No. 22, Disclosure of Accounting Policies.

Disclosure of accounting policies should identify and describe the accounting principles followed by the borrower and the methods of applying those principles that materially affect the determination of financial position, cash flows, and results of operations.

Disclosures of accounting policies do not have to be duplicated in this section if presented elsewhere as an integral part of the financial statements.

2. ASSETS PLEDGED:

Substantially all assets are pledged as security for the long-term debt to REA.

3. PREPAID EXPENSES:

Following is a summary of the amounts recorded as prepaid items as of December 31, 19X9 and 19X8:

	<u>19X9</u>	<u>19X8</u>
Prepaid Taxes	\$10,000	\$20,000
Prepaid Insurance	3,000	3,000
Prepaid Rent	<u>36,185</u>	<u>39,201</u>
	<u>\$49,185</u>	<u>\$62,201</u>

4. NONREGULATED INVESTMENTS:

	<u>19X9</u>	<u>19X8</u>
CATV Plant in Service	\$430,440	\$420,940
CATV Plant Under Construction	<u>9,051</u>	<u>6,500</u>
Total CATV Plant	439,491	427,440
Less: Accumulated Depreciation	<u>25,980</u>	<u>20,354</u>
Net CATV Plant	<u>\$413,511</u>	<u>\$407,086</u>

CATV plant in service and under construction is stated at cost. The company provides for depreciation on a straight-line basis at annual

rates which will amortize the depreciable property over its estimated useful life.

The offering of CATV services does not involve the joint or shared use of assets in the provision of regulated and nonregulated services.

	<u>19X9</u>	<u>19X8</u>
Nonregulated Customer Premises Equipment - Leased	\$109,699	- 0 -
Less: Accumulated Provisions for Depreciation	<u>6,081</u>	<u>- 0 -</u>
	<u>\$103,618</u>	<u>\$ - 0 -</u>

Nonregulated CPE is stated at cost. The company provides for depreciation on a straight-line basis at an annual rate of depreciation which will amortize the cost of the equipment over its estimated useful life. The leasing of nonregulated customer premises equipment does not involve the joint or shared use of assets in the provision of regulated and nonregulated services.

Following is a summary of net income from nonregulated investments for the year ending December 31, 19X9:

	<u>CATV</u>	<u>Deregulated CPE</u>	<u>Total</u>
Income from Operations	\$32,425	\$9,151	\$41,576
Expenses	<u>18,834</u>	<u>2,840</u>	<u>21,674</u>
	<u>\$13,591</u>	<u>\$6,311</u>	<u>\$19,902</u>

Income tax expense totaled \$3,556, of which \$2,883 was applicable to CATV operations and \$673 was applicable to CPE leasing activities.

DEFERRED CHARGES:

The balance consists of the unamortized portion of the unprovided for loss in service value of plant retired.

<u>Description</u>	<u>Date</u>	<u>Original Balance</u>	<u>Unamortized Balance</u>	
		<u>Net of Income-Tax Savings</u>	<u>19X9</u>	<u>19X8</u>
Aerial Plant	1/1/X7	50,000	40,000	45,000

The Public Utilities Commission granted the company permission to amortize this loss over a ten-year period net of income tax savings of \$10,542.

Rural Utilities Service, USDA

Pt. 1773, App. B

6. INVESTMENT IN TELEPHONE PLANT:

Telephone plant in service and under construction is stated at cost. Listed below are the major classes of the telecommunications plant as of December 31, 19X9 and 19X8:

	<u>19X9</u>	<u>19X8</u>
Land	\$ 64,601	64,601
Motor Vehicles	76,417	76,043
Special Purpose Vehicles	58,908	64,679
Other Work Equipment	43,582	40,022
Buildings	564,509	500,267
Furniture and Office Equipment	87,045	79,039
Central Office Equipment	3,171,162	2,746,871
Customer Premises Wiring	64,231	73,915
Poles, Cables, and Wire	2,458,895	2,300,411
Telecommunications Plant in Service - Unclassified	<u>811,950</u>	<u>704,705</u>
	<u>\$7,401,300</u>	<u>\$6,650,553</u>

The company provides for depreciation on a straight-line basis at annual rates which will amortize the depreciable property over its estimated useful life. Such provision as a percentage of the average balance of telephone plant in service was 7.2 percent in 19X9 and 7.1 percent in 19X8.

Individual plant depreciable rates are as follows:

Motor Vehicles	25%
Special Purpose Vehicles	13%
Other Work Equipment	16%
Buildings	4%
Furniture and Office Equipment	10%
Central Office Equipment	4%
Customer Premises Wiring	10%
Outside Plant - Aerial and Buried Cable	5%
Outside Plant - Pole Lines and Aerial Wire	20%

7. TELEPHONE PLANT ADJUSTMENT:

This adjustment represents the difference between the amount paid for the telephone plant plus associated expenses and the original cost of the plant less the associated depreciation. The company is amortizing the adjustment over a 19 1/2 year period in accordance with an order from the Public Utility Commission.

Annual amortization equals \$9,000.

8. MORTGAGE NOTES:

Long-term debt is represented by mortgage notes payable to the United States of America. Following is a summary of outstanding long-term debt:

	<u>19X9</u>	<u>19X8</u>
5% Notes due December 31, 19X6	\$4,739,304	\$4,274,104
Less: Current Maturities	<u>146,646</u>	<u>145,998</u>
	<u>\$4,592,658</u>	<u>\$4,128,106</u>

As of December 31, 19X9, there were no unadvanced funds.

Principal and interest installments on the above notes are due quarterly in equal amounts of \$63,200. The maturities of long-term debt for each of the five years succeeding the balance sheet date is as follows:

19X0	\$146,649
19X1	\$153,839
19X2	\$155,743
19X3	\$143,000
19X4	\$139,976

The long-term debt agreements contain restrictions on the payment of dividends or redemption of capital stock. The terms of the Mortgage Agreement require the maintenance of defined amounts of member's equity and working capital after payment of dividends. Under these provisions approximately \$293,688 of retained earnings was available for payment of dividends at December 31, 19X9.

9. PENSION PLAN:

Substantially all employees of the company are covered by the XYZ Retirement and Security plan, a multiemployer plan. Pension expense for the years ended 19X9 and 19X8 was \$12,000.00 and \$11,500.00, respectively.

10 INCOME TAXES AND DEFERRED INCOME TAXES:

The company uses a different method of depreciation on plant additions for income tax purposes. As provided by the Economic Recovery Tax Act of 1981, the company has elected to use the Accelerated Cost Recovery System (ACRS) method of depreciation for plant additions after 1980. In addition to the different depreciation practices for book and tax purposes, the company does not capitalize extraordinary maintenance and retirements and cost of removal charges for tax purposes. Provision is made in the statements of income and retained earnings for the taxes deferred as a result of

the above timing differences. The differences between accounting for book and tax purposes pertaining to income taxes and investment tax credits are accounted for using the normalization method of accounting, as is required for property placed in service after December 31, 1980, under the Economic Recovery Tax Act of 1981.

11. INVESTMENT TAX CREDITS:

The company follows the practice of recording investment tax credits as deferred income, to be amortized over the life of the assets providing the credit as required by the Public Service Commission. Accordingly, Federal income tax expense at December 31, 19X9, was reduced \$7,400 by the investment tax credit amortization.

12. COMMITMENTS:

The company has executed contracts for construction programs for approximately \$225,000 at December 31, 19X9. The amount unpaid against these commitments at December 31, 19X9 is \$185,000.

[56 FR 63360, Dec. 3, 1991, as amended at 61 FR 111, Jan. 3, 1996]

Pt. 1773, App. C

7 CFR Ch. XVII (1–1–97 Edition)

APPENDIX C TO PART 1773—ILLUSTRATIVE INDEPENDENT AUDITOR'S MANAGEMENT LETTER

RUS requires that CPAs auditing RUS borrowers provide a management letter in accordance with §1773.34. This letter must be signed by the CPA, bear the same date as the auditor's report, and be addressed to the borrower's board of directors.

**Illustrative Independent Auditor's
Management Letter**

March 15, 19X6

Board of Directors, [Name of Borrower],
[City, State].

We have audited the financial statements of [Name of Borrower] for the year ended December 31, 19X5, and have issued our report thereon dated March 15, 19X6. We conducted our audit in accordance with generally accepted auditing standards, Government Auditing Standards issued by the Comptroller General of the United States, and 7 CFR part 1773, Policy on Audits of Rural Utilities Service (RUS) Borrowers. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

In planning and performing our audit of the financial statements of [Name of Borrower] for the year ended December 31, 19X5, we considered its internal control structure in order to determine our auditing procedures for the purpose of expressing an opinion on the financial statements and not to provide assurance on the internal control structure.

A description of the responsibility of management for establishing and maintaining the internal control structure and the objectives of and inherent limitations in such a structure is set forth in our independent auditors' report on the internal control structure dated March 15, 19X6, and should be read in conjunction with this report.

Our consideration of the internal control structure would not necessarily disclose all matters in the internal control structure that might be material weaknesses under standards established by the American Institute of Certified Public Accountants.

A material weakness is a condition in which the design or operation of the specific internal control structure elements does not reduce to a relatively low level the risk that errors or irregularities in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. However, we noted no matters involving the internal control structure and its operation that we consider to be a material weakness as defined

above. [If a material weakness was noted, refer the reader to the independent auditors' report on internal control structure.]

7 CFR 1773.34 requires comments on specific aspects of the internal control structure, compliance with specific RUS loan and security instrument provisions, and other additional matters. We have grouped our comments accordingly. In addition to obtaining reasonable assurance about whether the financial statements are free from material misstatements, at your request, we performed tests of specific aspects of the internal control structure, of compliance with specific RUS loan and security instrument provisions, and of additional matters. The specific aspects of the internal control structure, compliance with specific RUS loan and security instrument provisions, and additional matters tested include, among other things, the accounting procedures and records, materials control, compliance with specific RUS loan and security instrument provisions set forth in 7 CFR 1773.34 (e)(1), [for telephone borrowers, 7 CFR 1773.34 (e)(2)], related party transactions, and depreciation rates. [For electric borrowers:] The additional matters tested also include a schedule of deferred debits and credits, upon which we express an opinion. In addition, our audit of the financial statements also included the procedures specified in 7 CFR 1773.38–.45. Our objective was not to provide an opinion on these specific aspects of the internal control structure, compliance with specific RUS loan and security instrument provisions, or additional matters, and accordingly, we express no opinion thereon.

No reports (other than our independent auditors' report, our independent auditors' compliance report, and our independent auditors' report on the internal control structure, all dated March 15, 19X6) or summary of recommendations related to our audit have been furnished to management.

Our comments on specific aspects of the internal control structure, compliance with specific RUS loan and security instrument provisions, and other additional matters as required by 7 CFR 1773.34 are presented below.

**Comments on Certain Specific Aspects of the
Internal Control Structure**

We noted no matters regarding [Name of Borrower]'s internal control structure and its operation that we consider to be a material weakness as previously defined with respect to:

- The accounting procedures and records [list other comments];
- The process for accumulating and recording labor, material, and overhead costs, and the distribution of these costs to construction, retirement, and maintenance or

Rural Utilities Service, USDA

Pt. 1773, App. C

other expense accounts [list other comments]; and
—The materials control [list other comments].

Comments on Compliance With Specific RUS Loan and Security Instrument Provisions

Management's responsibility for compliance with laws, regulations, contracts, and grants is set forth in our independent auditors' report on compliance dated March 15, 19X6, and should be read in conjunction with this report. At your request, we have performed the procedures enumerated below with respect to compliance with certain provisions of laws, regulations, and contracts. The procedures we performed are summarized as follows:

—Procedure performed with respect to the requirement to maintain all funds in institutions whose accounts are insured by an Agency of the Federal government:

1. Obtained information from financial institutions with which [Name of Borrower] maintains funds that indicated that the institutions are insured by an Agency of the Federal government.

—Procedures performed with respect to the requirement for a borrower to obtain written approval of the mortgagee to enter into any contract for the operation or maintenance of property, or for the use of mortgaged property by others [see 1773.34 (e)(2)(i) for additional telephone borrower requirements in accordance with 7 CFR 1773.34 (e)] for the year ended December 31, 19X5 of [Name of Borrower]:

1. Obtained and read a borrower prepared schedule of new written contracts entered into during the year for the operation or maintenance of its property, or for the use of its property by others as defined in §1773.34 (e)(1)(ii) [§1773.34 (e)(2)(i) for telephone borrowers]

2. Reviewed Board of Director minutes to ascertain whether board-approved written contracts are included in the borrower-prepared schedule.

3. Noted the existence of written RUS [and other mortgagee] approval of each contract listed by the borrower.

—Procedure performed with respect to the requirement to submit RUS Form 7 or Form 12 [Form 479 for telephone borrowers] to the RUS:

1. Agreed amounts reported in Form 7 or Form 12 [Form 479 for telephone borrowers] to [Name of Borrower]'s records.

The results of our tests indicate that, with respect to the items tested, [Name of Borrower] complied, except as noted below, in all material respects, with the specific RUS loan and security instrument provisions referred to below. With respect to items not tested, nothing came to our attention that

caused us to believe that [Name of Borrower] had not complied, in all material respects, with those provisions. The specific provisions tested, as well as any exceptions noted, include the requirements that:

—The borrower maintains all funds in institutions whose accounts are insured by an Agency of the Federal government [list all exceptions];

—The borrower has obtained written approval of the RUS [and other mortgagees] to enter into any contract for the operation or maintenance of property, or for the use of mortgaged property by others as defined in §1773.34 (e)(1)(ii) [§1773.34 (e)(2)(i) for telephone borrowers] [list all exceptions]; and

—The borrower has submitted its Form 7 or Form 12 [Form 479 for telephone borrowers] to the RUS and the Form 7 or Form 12 [Form 479 for telephone borrowers], Financial and Statistical Report, as of December 31, 19X5, represented by the borrower as having been submitted to RUS is in agreement with the [Name of Borrower]'s audited records in all material respects [list all exceptions].

Comments on Other Additional Matters

In connection with our audit of the financial statements of [Name of Borrower], nothing came to our attention that caused us to believe that [Name of Borrower] failed to comply with respect to:

—The reconciliation of subsidiary plant records to the controlling general ledger plant accounts addressed at 7 CFR 1773.34 (c)(1) [list all exceptions];

—The clearing of the construction accounts and the accrual of depreciation on completed construction addressed at 7 CFR 1773.34 (c)(2) [list all exceptions];

—The retirement of plant addressed at 7 CFR 1773.34 (c)(3) and (4) [list all exceptions];

—Sales of plant material, or scrap addressed at 7 CFR 1773.34 (c)(5) [list all exceptions];

—The disclosure of material related party transactions, in accordance with Statement of Financial Accounting Standards No. 57, Related Party Transactions, for the year ended December 31, 19X5, in the financial statements referenced in the first paragraph of this report addressed at 7 CFR 1773.34 (f) [list all exceptions]; and

—For electric borrowers only: depreciation rates addressed at 7 CFR 1773.34 (g) [list all exceptions].

For Electric Borrowers Only: Detailed Schedule of Deferred Debits and Deferred Credits

Our audit was made for the purpose of forming an opinion on the basic financial statements taken as a whole. The detailed schedule of deferred debits and deferred credits required by 7 CFR 1773.34 (h) and provided

§ 1785.66

below is presented for purposes of additional analysis and is not a required part of the basic financial statements. This information has been subjected to the auditing procedures applied in our audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

[The detailed schedule of deferred debits and deferred credits would be included here. The total amount of deferred debits and deferred credits as reported in the schedule must agree with the totals reported on the Balance Sheet under the specific captions of "Deferred Debits" and "Deferred Credits". Those items that have been approved, in writing, by RUS should be clearly indicated.]

This report is intended solely for the information and use of the board of directors, management, and the RUS and supplemental lenders. However, this report is a matter of public record and its distribution is not limited.

Subpart A—[Reserved]

Subpart B—RUS Cushion of Credit Account Computations and Procedures

SOURCE: 54 FR 13669, Apr. 5, 1989, unless otherwise noted.

7 CFR Ch. XVII (1-1-97 Edition)

§ 1785.66 General.

This subpart B sets forth policies and procedures on the RUS cushion of credit payments program. The cushion of credit payments program will be maintained only for insured loans evidenced by obligations of the Fund. A subaccount within the Fund is hereby established for purposes of promoting rural economic development. It shall be known as the "Rural Economic Development Subaccount." The assets of the subaccount shall be obtained from crediting (on a monthly basis) a sum determined by multiplying the outstanding cushion of credit payments made after October 1, 1987, by the difference (converted on a monthly basis) between the average weighted interest rate paid on outstanding certificates of beneficial ownership issued by the Fund and the 5 percent rate of interest provided to borrowers on cushion of credit payments, repayment of loans made pursuant to Section 313 of the Act, and other sources as provided by law. This subaccount shall be used to provide grants or zero interest loans to borrowers under the Act for the purpose of promoting rural economic development.

§ 1785.67 Definitions.

Accumulated (deferred) interest means interest allowed to accumulate up to, and including, the basis date of RUS notes covering loans approved before June 5, 1957. The accumulated interest is payable in equal periodic installments over the remaining life of the notes.

Act means the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 *et seq.*).

Advance payment means a voluntary unscheduled payment on an RUS note, made prior to October 2, 1987, credited to the advance payment account of a borrower.

Cushion of Credit Payment means a voluntary unscheduled payment on an RUS note made after October 1, 1987, credited to the cushion of credit account of a borrower.

Current interest means interest payable periodically as it accrues.

Fund means the Rural Electrification and Telephone Revolving Fund established pursuant to the Act.

Rural Utilities Service, USDA

§ 1785.70

Interest credit means interest earned on balances in advance payment or cushion of credit accounts. Since the periodic installments are established by the terms of the notes, the interest credits cannot serve to change the total amount of each installment; therefore, an amount equal to the interest credits is added to the principal installment due. On receipt of the full installments, amounts equal to the interest credits (the principal offsets) are added to the respective advance payment accounts.

Prepayment means a voluntary unscheduled payment which the borrower instructs RUS to apply directly and immediately to the principal of an RUS note.

RUS notes means those notes, bonds, or other obligations evidencing indebtedness created by loans made by RUS pursuant to titles I, II, or III of the Act.

Subaccount means the *Rural Economic Development Subaccount* established pursuant to the Act as part of the Fund.

§ 1785.68 Establishing an RUS cushion of credit payment account.

A cushion of credit account shall be automatically established by RUS for each borrower who makes a payment after October 1, 1987, in excess of amounts then due on an RUS note. Such account will bear interest at a rate of 5 percent per annum. All payments on RUS notes which are in excess of required payments and not otherwise designated shall be deposited in the borrowers' respective cushion of credit accounts. Payments received in the month in which an installment is due will be applied to the installment due. However, if the regular installment payment is received at a later date in the month, the first payment received will be applied retroactively to a cushion of credit account and the second will be applied to the installment due.

§ 1785.69 Cushion of credit payment account computations.

(a) *Deposits.* Cushion of credit payments are credited to the borrowers' cushion of credit accounts.

(b) *Interest.* Interest at the rate of 5 percent per annum shall be credited on a quarterly basis to cushion of credit accounts. Interest earned will appear as a reduction in the interest billed on the borrower's RUS notes and will be separately shown on RUS Form 694, "Statement of Interest and Principal Due."

§ 1785.70 Application of RETRF cushion of credit payments.

(a) If a maturing installment on an RUS note or a note which has been guaranteed by RUS is not received by its due date, funds will be withdrawn from the borrower's cushion of credit account and applied as of the installment due date beginning with the oldest of such notes as follows: first, to current interest then due on all notes; second, to the accumulated interest due, if any, on all notes; and third, to the principal then due on all notes. In those instances where a borrower has prior to October 2, 1987, maintained an advance payment account with RUS, its cushion of credit account will be applied in accordance with the provisions of this section prior to using any balance remaining in its advance payment account to pay interest and principal installments on notes. Computations required under this section have been made by RUS as of October 2, 1987; however, on or before May 25, 1989 any borrower may make a one time irrevocable election to have all such computations made as of April 5, 1989, by filing written notice to that effect with Robert D. Ruddy, Director, Fiscal Accounting Division, Rural Utilities Service, Washington, DC 20250-1500.

(b) A borrower may reduce the balance of its cushion of credit account only if the amount obtained from the reduction is used to make scheduled

§ 1785.70

payments on loans made or guaranteed under the Act.

Subpart A—General [Reserved]

§§ 1786.1–1786.24 [Reserved]

Subpart B—Prepayment of RUS Guaranteed Federal Financing Bank Loans Pursuant to Section 306(A) of the RE Act

AUTHORITY: 7 U.S.C. 901–950b; Title I, Subtitle B, Pub. L. 99–509; Title I, Pub. L. 100–202; Pub. L. 100–203; Title VI, Pub. L. 100–460; Pub. L. 103–354, 108 Stat. 3178 (7 U.S.C. 6941 *et seq.*).

SOURCE: 55 FR 1145, Jan. 11, 1990, unless otherwise noted. Redesignated at 55 FR 49250, Nov. 27, 1990.

§ 1786.25 Purpose.

This subpart contains the general regulations of the Rural Utilities Service (RUS) for implementing the provisions of (a) section 306(A) of the Rural Electrification Act of 1936, as amended (RE Act); (b) section 633 of the Rural Development, Agriculture, and Related Agencies Appropriations Act, 1988 (Pub. L. 100–202) (the continuing resolution); and (c) section 637 of the Rural Development, Agriculture, and Related Agencies Appropriations Act, 1989 (Pub. L. 100–460) (the 1989 Appropriations Act) which permit, in certain circumstances, loans made by the Federal Financing Bank (FFB) and guaranteed

by the Administrator of RUS to be prepaid by RUS electric and telephone borrowers by paying the outstanding principal balance due on the FFB loan, using a private loan with the existing RUS guarantees or using internally generated funds.

§ 1786.26 Policy.

It is the policy of RUS to facilitate the prepayment of FFB loans in accordance with the provisions of section 306(A) of the RE Act and section 633 of the continuing resolution as modified by section 637 of the 1989 Appropriations Act. Furthermore, consistent with the RE Act, the continuing resolution and the 1989 Appropriations Act, it is the policy of RUS to implement the objectives of the prepayment program in a manner which does not result in an increase in loan guarantee risk or an inappropriate increase in the administrative burden on RUS.

§ 1786.27 Definitions and Rules of Construction.

(a) *Definitions.* For the purposes of this subpart, the following terms shall have the following meanings:

Administrator means the Administrator of RUS.

Application Category shall have the meaning set forth in § 1786.29(c).

Application period means a period during which RUS is accepting applications to make prepayments pursuant to this subpart, and initially means:

(1) In the case of telephone borrowers, the period commencing on February 12, 1990 and ending on March 12, 1990;

(2) In the case of financially distressed borrowers, the period commencing October 1, 1990 and ending on July 30, 1993; or

(3) In the case of other borrowers, the period to be announced by RUS.

Borrower means any organization which has an outstanding FFB loan guaranteed by RUS under the RE Act.

Business Day means any day other than a Saturday, a Sunday, a legal public holiday under 5 U.S.C. section 6103 for the purposes of statutes relating to pay and leave of employees, or any other day declared to be legal holiday for the purposes of statutes relating to pay and leave of employees by

§ 1786.27

7 CFR Ch. XVII (1–1–97 Edition)

Federal statute or Federal Executive Order.

Continuing Resolution means section 633 of the Rural Development, Agriculture, and Related Agencies Appropriations Act, 1988 (Pub. L. 100–202).

Date Received means the date inscribed on the Notice of Intent to Prepay the Federal Financing Bank, by an authorized official of RUS, as the date the application was received.

Documentation means all or part of the agreements relating to a prepayment under this part, irrespective of whether RUS is a party to each agreement, including all exhibits to such agreements.

Electric Program Applications shall have the meaning specified in § 1786.29(c)(1).

Existing Loan Guarantee means a guarantee of payment issued by RUS to FFB pursuant to the RE Act for an FFB loan made on or before July 2, 1986.

Fees means any fees, costs or charges, incurred in connection with obtaining the private loan used to make the prepayment including without limitation, accounting fees, filing fees, legal fees (including fees and disbursements charged by counsel representing the borrower), printing costs, recording fees, trustee fees, underwriting fees, capital stock purchases or other equity investment requirements of the lender, and other related transaction expenses.

Financially Distressed Borrower means an RUS-financed electric system determined by the Administrator to be either (1) in default or near default on interest or principal payments due on loans made or guaranteed under the RE Act, and is making a good faith effort to increase rates and reduce costs to avoid or mitigate default; or (2) participating in a work out or debt restructuring plan with RUS, either as the borrower being restructured or as a borrower providing assistance as part of the work out or restructuring.

Financially Viable Lender means:

(1) A lender (i) which has a capital and surplus of at least \$50 million; (ii) is a beneficiary of an irrevocable letter of credit, in form and substance satisfactory to the Administrator, payable to it in the amount of \$50 million; (iii) is the beneficiary of a guarantee, in

form and substance satisfactory to the Administrator, in the amount of \$50 million from a lending institution with a capital and surplus of at least \$50 million; or (iv) has other credit support, in form and substance satisfactory to the Administrator, in the amount of \$50 million; or

(2) In the event of a prepayment totalling less than \$100 million, a lender (i) which has a capital and surplus of at least \$10 million; (ii) is a beneficiary of an irrevocable letter of credit, in form and substance satisfactory to the Administrator, payable to it in the amount of \$10 million; (iii) is the beneficiary of a guarantee, in form and substance satisfactory to the Administrator, in the amount of \$10 million from a lending institution with a capital and surplus of at least \$10 million; or (iv) has other credit support, in form and substance satisfactory to the Administrator, in the amount of \$10 million;

FFB means the Federal Financing Bank, an instrumentality and wholly owned corporation of the United States.

FFB Loan means one or more advances, or a part of one or more advances, made on or before July 2, 1986, by FFB on a promissory note or notes executed by a borrower and guaranteed by RUS pursuant to section 306 of the RE Act (7 U.S.C. 936).

Guarantee means the original endorsement, in the form specified by RUS which is executed by the Administrator and shall be an obligation supported by the full faith and credit of the United States and incontestable except for fraud or misrepresentation of which the holder had actual knowledge at the time it became a holder.

Increase in Loan Guarantee Risk means the change in any of the components of loan guarantee risk associated with the private loan which in the judgment of RUS increases the magnitude or duration of the loan guarantee risk currently assumed by RUS in connection with the existing loan guarantee;

Internally Generated Funds means money belonging to the borrower other than: (1) Proceeds of loans made or guaranteed under the RE Act or (2)

Rural Utilities Service, USDA

§ 1786.27

funds on deposit in the cash construction trustee account;

Lender means the organization making and servicing the private loan which is to be guaranteed under the provisions of this subpart and used to prepay the FFB loan. The term *lender* does not include the FFB, or any other Government agency.

Loan Guarantee Agreement means the written contract by and among the lender, the borrower, the Administrator, and such other parties that RUS may require, setting forth the terms and conditions of a guarantee issued pursuant to the provisions of this subpart.

Loan Guarantee Risk means the risk as determined by RUS associated with guaranteeing a loan for a particular borrower. Components of loan guarantee risk include the following:

- (1) The outstanding principal balance of a loan;
- (2) The dollar weighted average interest rate (stated as an annual percentage rate) on a loan;
- (3) The final maturity date of a loan;
- (4) The annual principal amortization of the loan; and
- (5) Any other factor that as determined by RUS increases the magnitude or duration of the guarantee.

Mortgage means the mortgage and security agreements by and among the borrower and RUS, as from time to time supplemented, amended and restated.

1989 Appropriations Act means the Rural Development, Agriculture, and Related Agencies Appropriations Act, 1989 (Pub. L. 100-460).

Notice of Intent to Prepay the Federal Financing Bank means the notice in the form specified in § 1786.33 hereof.

Prepayment Authority shall have the meaning specified in § 1786.29(a).

Private Loan means a loan or loans to be guaranteed under the provisions of this part and used to prepay an FFB loan.

Pro-rated Percentage shall have the meaning specified in § 1786.30(b)(1).

RE Act means the Rural Electrification Act of 1936 (7 U.S.C. 901-950b), as amended.

REA means the Rural Electrification Administration formerly an agency of the United States Department of Agri-

culture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs.

RUS means the Rural Utilities Service, an agency of the United States Department of Agriculture established pursuant to Section 232 of the Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994 (Pub. L. 103-354, 108 Stat. 3178), successor to REA with respect to administering certain electric and telephone programs. See 7 CFR 1700.1.

Service or Servicing means the following activities:

- (1) The billing and collecting of the private loan payments from the borrower;
- (2) Notifying the Administrator promptly of any default in the payment of principal and interest on the private loan and submitting a report, as soon as possible thereafter, setting forth the servicer's views as to the reasons for the default, how long the servicer expects the borrower to be in default, and what corrective actions the borrower states it is taking to achieve a current debt service position;
- (3) Notifying the Administrator of any known violations or defaults by the borrower under the lending agreement, loan guarantee agreement, the mortgage, or related security instruments, or conditions of which the servicer or the lender is aware which might lead to nonpayment, violation or other default; and
- (4) Such other activities as may be specified in the loan guarantee agreement.

Settlement Date means the date the borrower disburses funds to the FFB in order to complete a prepayment pursuant to this subpart, and shall be a date agreed to by RUS, and a date on which both the FFB and the Federal Reserve Bank of New York are open for business.

Standard Electric Program Application shall have the meaning specified in § 1786.29(c)(1).

Telephone Borrower means a borrower that provides telephone service as defined in 7 CFR 1735.2(a).

Telephone Program Applications shall have the meaning specified in § 1786.29(c)(2).

§ 1786.28

7 CFR Ch. XVII (1–1–97 Edition)

(b) *Rules of Construction.* Unless the context shall otherwise indicate, the terms defined in §1786.27(a) hereof include the plural as well as the singular, and the singular as well as the plural. The words “herein,” “hereof” and “hereunder”, and words of similar import, refer to this subpart as a whole.

[55 FR 1145, Jan. 11, 1990, as amended at 55 FR 35426, Aug. 30, 1990. Redesignated at 55 FR 49250, Nov. 27, 1990, and amended at 59 FR 66440, Dec. 27, 1994]

§ 1786.28 Qualifications.

(a) *Borrowers.* To qualify to prepay an FFB loan pursuant to this subpart, the borrower must:

(1) Demonstrate that the FFB loan was outstanding on July 2, 1986;

(2) Prepay the FFB loan by:

(i) Using a private loan with the existing loan guarantee;

(ii) Using internally generated funds; or

(iii) Using a combination of a private loan with the existing loan guarantee and internally generated funds; and

(3) Certify that any savings resulting from such prepayment will be passed on to its customers, or used to improve the financial strength of the borrower in cases of financial hardship.

(b) *Lenders.* To participate pursuant to this subpart, in a borrower's prepayment of an FFB loan by means of a private loan, the lender must:

(1) Be a private legally organized lender, or a lender established pursuant to the Farm Credit Act of 1971, as amended;

(2) (i) Be subject to credit examination and supervision by either an agency of the United States or a state and be in good standing with its licensing authority and have met the requirements, if any, of licensing, lending and loan servicing in the state where the collateral for the Loan is located; (ii) be a financially viable lender; or (iii) be a trust administered by an entity meeting the requirements of paragraph (b)(2) (i) or (ii) of this section; and

(3) Have the capability to adequately service the private loan either by using its own resources or by contracting for such resources with a financially viable lender. Under no circumstances may the borrower or an affiliate of the borrower service the private loan. A quali-

fied lender may participate out each private loan to entities other than a Government agency, the borrower, or an affiliate of the borrower, provided that such participation shall be on terms and conditions satisfactory to the Administrator.

(c) *Private Loans.* A borrower who qualifies pursuant to §1786.28(a) may at its option elect to use a private loan to make a prepayment, or a portion of a prepayment, pursuant to this subpart. Private loans, the proceeds of which are used exclusively to prepay FFB loans, shall be eligible for a guarantee under this subpart. The Administrator shall endorse a guarantee on each note evidencing a qualifying private loan. The private loan shall be structured in a manner which in the judgment of RUS shall not result in an increase in loan guarantee risk and shall comply with the following:

(1) The private loan shall provide for the periodic payment of interest by the borrower not less frequently than annually, at either a variable or fixed rate in a manner which shall not result in an increase in loan guarantee risk. (i.e. The dollar weighted average interest rate on the private loan shall be less than or equal to the dollar weighted average interest rate on the FFB loan being prepaid, so that:

$$C_r = C_o + \frac{\sum_{i=1}^n (C_o - A_i) T_i}{(J - n)}$$

Where,

C_r =The revised interest rate cap;

C_o =The original interest rate cap at the time of prepayment;

A_i =The average interest rate actually charged in the i^{th} period;

T_i =Length of the i^{th} period expressed in years;

n =The number of years that have elapsed since the initial prepayment;

J =The initial term of the private loan, at the time of prepayment;

Subject to the constraint that A_1 must be less or equal to C_o).

(2) Principal payments on the private loan shall be made either quarterly, semiannually, or annually and shall commence on or before the last day of

the calendar year during which the prepayment pursuant to this subpart was made.

(3) With the approval of the Administrator, the lender may refund the private loan with the proceeds of another loan from the same lender, with the existing guarantee and under terms, conditions, and a structure substantially similar to the private loan, on such dates as the lender, the borrower and RUS may agree, provided however, that such a refunding loan shall comply with the provisions of § 1786.28(c) hereof. Additionally, with the approval of the Administrator, the private loan may be prepaid either in whole or in part at any time by the borrower using its general funds.

(4) The private loan and the guaranteed note evidencing the private loan shall not be directly or indirectly part of a transaction the income of which is excluded from gross income for the purposes of Chapter I of the Internal Revenue Code of 1986.

(5) The guaranteed note evidencing the private loan shall not be transferable or assignable except (i) with the written approval of the Administrator; (ii) in the event that the guaranteed note evidencing the private loan is held by a trust, to a similar trust, in connection with a refunding loan made by the lender pursuant to § 1786.28(c)(3); or (iii) as an undivided pro rata interest in a pool of obligations.

(6) The loan documentation shall provide RUS with the right to accelerate the note evidencing the private loan upon the occurrence of any "Event of Default" under the mortgage with the effect that all of the unpaid principal and interest on any such note shall become immediately due and payable to RUS, and RUS shall continue to pay under its guarantee the principal of and interest on such note without taking into account such acceleration. The loan documentation shall also provide RUS with a right, upon the occurrence of such an "Event of Default," to accelerate payment on its guarantee and accelerate payment on the note evidencing the private loan on the earlier of any date the interest rate on the private loan is reset, without premium or penalty; any date the borrower may prepay in accordance with the terms of

the private loan, or the tenth anniversary of the date the private loan first bears interest at a fixed interest rate.

(7) The principal of the private loan shall not include amounts attributable to fees associated with the private loan. At the time it submits its application, a borrower may request that the Administrator approve the inclusion of amounts attributable to fees as part of the interest rate on the private loan, if the net effective interest rate including such fees meets the test contained in § 1786.28(c)(1). For the purposes of these regulations, such financed fees shall be considered "interest".

(8) Private loans and guaranteed notes evidencing private loans shall otherwise be in form and substance satisfactory to the Administrator.

(d) *Prepayments Without a Guarantee.* Qualifying borrowers may elect to utilize internally generated funds without a guarantee to prepay an FFB loan, or partially prepay an FFB loan, pursuant to this subpart, if

(1) The borrower notifies RUS, of its intent to prepay using internally generated funds in accordance with the application procedures set forth in this subpart; and

(2) The borrower submits a certification to RUS that the prepayment does not, materially adversely affect the financial stability of the borrower and its ability to meet all its obligations, including debt service on all loans made, guaranteed or lien accommodated under the RE Act which will remain outstanding after the date of the prepayment.

(e) *The Use of both a Private Loan and Internally Generated Funds.* Qualifying borrowers may elect to utilize a combination of private loans and internally generated funds without a guarantee, to prepay an FFB loan pursuant to this subpart, if

(1) The private loans comply with the provisions of paragraph (c) of this section, and

(2) The borrower complies with paragraph (d) of this section.

(f) *FFB loans.* A borrower's FFB loans that qualify to be prepaid pursuant to this subpart are:

§ 1786.29

7 CFR Ch. XVII (1–1–97 Edition)

(1) *Qualifying Borrowers.* In the case of qualifying borrowers other than financially distressed borrowers, FFB advances with long-term maturity dates may be prepaid pursuant to this subpart; and

(2) *Financially distressed borrowers.* FFB loans that are eligible to be prepaid by utilizing the financially distressed borrowers' reserve are advances with long-term maturity dates, and which in the opinion of the Administrator, if prepaid, would result in an economic savings to the financially distressed borrower.

[55 FR 1145, Jan. 11, 1990, as amended at 55 FR 35426, Aug. 30, 1990. Redesignated at 55 FR 49250, Nov. 27, 1990]

§ 1786.29 Prepayment Authority, Program Allocations, Categories of Prepayment Applications and Financially Distressed Borrowers' Reserve.

(a) *Prepayment Authority.* So long as the aggregate amount of prepayments made after December 22, 1987, including prepayments made pursuant to § 1786.28(d) and § 1786.28(e), under section 306(A) of the RE Act, does not exceed \$2.5 billion, the approval of the Secretary of the Treasury is not required in order to make a prepayment pursuant to this subpart (such amount of prepayments is hereinafter called prepayment authority).

(b) *Program Allocations.* In accordance with the provisions of section 637 of the 1989 Appropriations Act, \$350 million of prepayment authority is allocated to RUS-financed electric systems and \$150 million of prepayment authority is allocated to RUS-financed telephone utilities. The amounts of prepayment authority allocated to electric program borrowers and telephone program borrowers shall not be transferred between programs. Borrowers may not sell, assign, or otherwise transfer prepayment authority to another borrower.

(c) *Categories of Prepayment Applications.* Applications received by RUS from borrowers desiring to prepay pursuant to this subpart will be separated into the following two application categories:

(1) *Electric Program Applications.* Electric program applications are applications to make a prepayment pursuant

to this subpart from RUS-financed electric utilities, that qualify in accordance with § 1786.28(a) hereof and which are received by RUS during the application period. Electric program applications will be further subdivided and classified as being either (i) a financially distressed borrower's application, or (ii) a standard electric program application. Applications received from borrowers determined by the Administrator not to be a financially distressed borrower will be classified and processed as a standard electric program application;

(2) *Telephone Program Applications.* Telephone program applications are applications to make a prepayment pursuant to this subpart from RUS-financed telephone utilities that qualify in accordance with § 1786.28(a) hereof and which are received by RUS during the application period;

(d) *Financially distressed borrowers' reserve.* The \$350 million of prepayment authority allocated for RUS-financed electric utilities, is initially set aside into a financially distressed borrowers' reserve. This reserve of prepayment authority will be available for prepayments pursuant to this subpart by financially distressed borrowers who apply to make such a prepayment during the application period. In the event that a portion of financially distressed borrowers' reserve remains unsubscribed at the end of the initial application period, the unallocated portion of the financially distressed borrowers' reserve will be allocated to other electric borrowers having submitted applications during an application period to be announced by RUS. Such prepayment applications shall be classified as standard electric program applications.

[55 FR 1145, Jan. 11, 1990, as amended at 55 FR 35427, Aug. 30, 1990. Redesignated at 55 FR 49250, Nov. 27, 1990]

§ 1786.30 Processing procedure.

(a) *Priority of Processing.* The determination of the order or method in which applications or portions of applications will be processed by RUS pursuant to this subpart rests solely within the discretion of the Administrator.

Rural Utilities Service, USDA

§ 1786.31

RUS expects that a number of prepayment applications will be processed simultaneously. In the event that it becomes necessary to establish priorities of processing, prepayment applications will be processed without regard to the date received, generally in the following order of priority:

(1) Applications from telephone borrowers;

(2) Applications from financially distressed borrowers;

(3) Applications from all other borrowers. When assigning priority to such applications, RUS will consider a number of factors, including without limitation, (i) the number of prepayment applications being processed by the area office; (ii) the novelty or complexity of the proposed transaction; (iii) the method of prepayment; and (iv) the availability of resources. In the event that RUS receives during the initial application period, prepayment applications from such borrowers in an amount less than remaining prepayment authority for each respective program, RUS will establish a new application period and publish a notice to that effect in the FEDERAL REGISTER.

(b) *Pro-rated Applications.* Standard electric program applications, and telephone program applications will be prorated within their respective application categories to permit partial prepayments in the event that the aggregate amount of prepayment applications received during the application period exceeds the amount of prepayment authority allocated to that application category. In such circumstances, the amount of each borrower's permitted prepayment shall be determined within each respective application category, as follows:

(1) The principal amount of FFB advances under each individual application, which, if prepaid pursuant to this subpart, would result in an economic savings to the borrower, shall be divided by the aggregate principal amount of FFB advances, under all of the applications, which, if prepaid pursuant to this subpart, would result in an economic savings to the borrowers, in order to determine a percentage (hereinafter called a pro-rated percentage) for each borrower;

(2) Each borrower's share of the prepayment authority for its application category shall be equal to the product of (i) the prepayment authority times (ii) the respective pro-rated percentage, and may be used to prepay a portion of any of the borrower's FFB loans listed pursuant to § 1786.31(a)(2);

(3) If any approved prepayment transaction fails to be settled within 180 days of the date the borrower is notified by RUS of its prepayment allocation, RUS may rescind its approval. The unused prepayment authority represented by such a failed transaction is subject to being included in any subsequent notice of a new application period under this subpart; and

(4) In the event that applications from financially distressed borrowers exceed the amount prepayment authority remaining in the financially distressed borrowers' reserve, the Administrator at his discretion shall select one or more of such applications and allocate the reserve. In making such a selection and allocation, the Administrator may consider various factors, including without limitation, (i) the dollar amount of savings to be realized by the proposed prepayment; (ii) the interest rates on the FFB loans proposed to be prepaid; (iii) the magnitude of the default or potential default; and (iv) whether the borrower has previously completed a prepayment under section 306(A).

(c) *Notification of Borrowers' Allocations.* Promptly after allocating the prepayment authority to borrowers and completing any proration calculations that may be necessary, RUS will return to each borrower submitting a prepayment application pursuant to this subpart, a copy of their Notice of Intent to Prepay the Federal Financing Bank specifying the amount of the borrower's prepayment allocation.

[55 FR 1145, Jan. 11, 1990, as amended at 55 FR 49250, Nov. 27, 1990]

§ 1786.31 Application procedure.

Applications to make a prepayment pursuant to this subpart shall be submitted to RUS on such forms as RUS may prescribe in the following manner:

(a) *Application.* Each borrower desiring to make a prepayment pursuant to

§ 1786.31

this subpart shall submit an application to RUS. No application from a borrower will be accepted by RUS prior to the commencement of the application period. An application shall not be deemed submitted to RUS until it is received by RUS, and the "Date Received" has been inscribed on the Notice of Intent to Prepay the Federal Financing Bank by an authorized official of RUS. Incomplete applications may be returned to the borrower at the discretion of RUS and thereafter must be resubmitted in order to be processed. To be considered complete, the application should include the following:

(1) "Notice of Intent to Prepay the Federal Financing Bank" in the form specified in § 1786.33 hereof;

(2) A listing of each FFB loan advance to be prepaid by loan designation, RUS note number, RUS account number, advance date, maturity date, original amount, outstanding balance, and interest rate;

(3) Evidence that the borrower meets the qualification provisions of § 1786.28(a) of these regulations;

(4) The certification set forth in part A of the Notice of Intent to Prepay the Federal Financing Bank executed by the chief executive officer of the borrower;

(5) In the event that a borrower submits a prepayment application which proposes to utilize a portion of the financially distressed borrowers' reserve, a certification signed by the chief executive officer of the system to the effect that the borrower is either (i) in default or near default on interest or principal payments due on loans made or guaranteed under the RE Act, and is making a good faith effort to increase rates and reduce costs to avoid or mitigate default; or (ii) participating in a work out or debt restructuring plan with RUS, either as the borrower being restructured or as a borrower providing assistance as part of the work out or restructuring and stating why the borrower is in default or near default.

(b) *Election of Method of Prepayment.* Prior to requesting RUS to schedule a settlement date, the borrower shall (1) elect whether it will use a private loan, internally generated funds, or a combination of a private loan and internally generated funds to make the pre-

7 CFR Ch. XVII (1-1-97 Edition)

payment, by completing part C of its Notice of Intent to Prepay the Federal Financing Bank; (2) specify in part C of the Notice of Intent to prepay the Federal Financing Bank a date after which a prepayment closing may be scheduled; (3) if appropriate, execute the certification set forth in part C of the Notice of Intent to Prepay the Federal Financing Bank; and (4) return a completed copy of the Notice of Intent to Prepay the Federal Financing Bank to the RUS area office.

(c) *Final Documentation.* All documentation in connection with a proposed prepayment made pursuant to this subpart shall have been submitted to RUS in final form, no later than 5 business days prior to the settlement date agreed to by the borrower and RUS. To be considered complete, the final documentation shall include the following material:

(1) A completed copy of the Notice of Intent to Prepay the Federal Financing Bank;

(2) In the event that a borrower proposes to utilize a private loan in connection with a prepayment or a portion of a prepayment,

(i) Evidence, in form and substance satisfactory to RUS, that the borrower has an irrevocable commitment from the lender to close the private loan on the settlement date at an interest rate that meets the requirements of § 1786.28(c)(1);

(ii) Evidence that the lender meets the qualification provisions of § 1786.28(b);

(iii) Evidence that the private loan meets the qualification provisions of § 1786.28(c); and

(iv) The final documentation for the private loan;

(3) Estimate of fees, and expenses, including any taxes, in connection with the prepayment transaction;

(4) A certified copy of a resolution of the board of directors of the borrower approving the certification cited above and requesting RUS approval of the prepayment.

(5) In the case of financially distressed borrowers, evidence in form and substance satisfactory to the Administrator that the benefits of prepayment will not be used to reduce rates and that any Federal or state regulatory

Rural Utilities Service, USDA

§ 1786.32

body having jurisdiction over the borrower's rates has acknowledged its awareness of this requirement;

(6) In the event that borrower is unable to deliver final documentation or the evidence specified in accordance with, §1786.31(c), RUS may reschedule the settlement date at its discretion.

(Approved by the Office of Management and Budget under control number 0572-0088)

(c) *Procedure for Submission of Prepayment Applications.* An original and three copies of each initial application must be submitted, between the hours of 8:15 a.m. to 4:45 p.m. Washington, DC time, to: Chief, Communications and Records Management Branch, Administrative Service Division, Rural Utilities Service, U.S. Department of Agriculture, Room 0175 South Agriculture Building, Washington, DC 20250-1500. The outside front of the package containing the prepayment application must be clearly marked, "FFB PREPAYMENT APPLICATION." The Notice of Intent to Prepay the Federal Financing Bank must be the first document in the application package. Upon receipt the prepayment application will be opened, logged in, and the Notice of Intent to Prepay the Federal Financing Bank will be inscribed with the date received by an authorized official of RUS. A copy of the Notice of Intent to Prepay the Federal Financing Bank will then be returned to the borrower to acknowledge receipt of the application. Should an application be submitted other than in accordance with the provisions of §1786.31, the date received shall be a date determined by RUS in its sole discretion.

§ 1786.32 Settlement procedure.

(a) *General.* Settlements in connection with prepaying FFB loans pursuant to this subpart shall be conducted in accordance with the provisions of this section.

(b) *Settlement Date.* The prepayment will be settled and if a private loan is utilized, the guarantee will be delivered, on a settlement date agreed upon by the borrower and RUS. Prior to scheduling a settlement date for a borrower's prepayment pursuant to this subpart, RUS shall have received the material specified in §1786.31(b).

(c) *Place of Settlement.* All settlements will take place in Washington, DC, at a location of the borrower's choosing; provided however, if more than one settlement is proposed for the same settlement date, RUS reserves the right to coordinate the date and location of the settlements with borrowers involved.

(d) *Repayment of FFB.* Prior to 1:00 p.m. prevailing local time in New York, New York, on the settlement date, the borrower shall wire immediately available funds to RUS through the Department of the Treasury account at the Federal Reserve Bank of New York or shall provide for payment to RUS in another manner acceptable to RUS and FFB, in an amount sufficient to pay the outstanding principal of the FFB loan being prepaid plus accrued interest from the last payment date to and including the settlement date.

(e) *Documentation.* The borrower shall deliver, or cause to be delivered to RUS and FFB, not less than 3 business days prior to the settlement date, written notice of the settlement date and a complete listing of each FFB loan advance to be prepaid or partially prepaid, in the format required by §1786.31(a)(2). In the event that a private loan is used in connection with the prepayment, the following executed documents, opinions and material shall be delivered at the settlement:

(1) The guaranteed note evidencing the private loan.

(2) The guarantee.

(3) The loan guarantee agreement.

(4) Copy of the private loan agreement between the lender and the borrower.

(5) Evidence that the borrower has received all approvals which are required under Federal or state law, loan agreements, security agreements, existing financing arrangements, or any other agreement to which the borrower is a party.

(6) An amendment in recordable form revising the description of the obligations secured by the mortgage including the obligation of the borrower to reimburse RUS for any amounts that RUS may pay under the guarantee.

(7) An approving opinion of the borrower's legal counsel to the effect that

§ 1786.33

the guaranteed note evidencing the private loan is a valid and legally binding obligation of the borrower which is secured under the mortgage, and the priority of the mortgage, as amended pursuant to paragraph (e)(6) of this section, remains undisturbed.

(8) An approving opinion of the lender's legal counsel to the effect that the loan guarantee agreement is a valid and legally binding obligation of the lender.

(9) Such other opinions of counsel as may be required by the Administrator.

(10) Copies of any other documentation required by the lender.

(11) Copies of any other documentation required by RUS to ensure that the obligations of the borrower to reimburse RUS for any amounts that RUS pays under the guarantee or may advance in connection with the private loan are adequately secured under the mortgage.

(Approved by the Office of Management and Budget under control number 0572-0088)

§ 1786.33 Forms.

Guarantees and loan guarantee agreements executed by RUS pursuant to this subpart will be on forms prescribed by RUS. Such forms will include, without limitation, additional details on servicing, procedures for notifying RUS of a default, the manner for requesting payment on a guarantee. The Notice of Intent to Prepay the Federal Financing Bank shall be substantially in the form specified by RUS. RUS may also prescribe standard forms of certifications to be used in connection with materials required to be furnished pursuant to § 1786.31 of this subpart.

§ 1786.34 Access to records of lenders, servicers, and trustees.

The lender, the servicer, or the trustee will permit representatives of RUS (or other agencies of the U.S. Department of Agriculture authorized by that Department) to inspect and make copies of any of their records pertaining to RUS guaranteed loans. Such inspection and copying may be made during regular office hours of the respective party or any other time the party and RUS find convenient.

7 CFR Ch. XVII (1-1-97 Edition)

§ 1786.35 Loss, theft, destruction, mutilation, or defacement of RUS guarantee.

(a) *Authorized representative.* Except where the evidence of debt was or is a bearer instrument, the RUS Administrator is authorized on behalf of RUS to issue a replacement guarantee(s) for one(s) which may have been lost, stolen, destroyed, mutilated, or defaced. Such replacement(s) shall be issued only to the lender or holder and only upon receipt of an acceptable certificate of loss and an indemnity bond.

(b) *Requirements.* When a guarantee(s) is lost, stolen, destroyed, mutilated, or defaced while in the custody of the lender, or holder, the lender will coordinate the activities of the party who seeks the replacement documents and will submit the required documents to RUS for processing. The requirements for replacement are as follows:

(1) A certificate of loss properly notarized which includes:

(i) Legal name and present address of the owner, requesting the replacement forms;

(ii) Legal name and address of lender of record;

(iii) Capacity of person certifying;

(iv) Full identification of the guarantee, including the name of the borrower, date of the guarantee, face amount of the evidence of debt purchased, date of evidence of debt and present balance of the loan. Any existing parts of the documents to be replaced should be attached to the certificate;

(v) A full statement of circumstances of the loss, theft, or destruction of the guarantee; and

(vi) The lender or holder, shall present evidence demonstrating current ownership of the guarantee and note. If the present holder is not the same as the original lender, a copy of the endorsement of each successive holder in the chain of transfer from the initial private lender to present holder shall be included. If copies of the endorsement cannot be obtained, best available records of transfer shall be presented to RUS (e.g., order confirmation, cancelled checks, etc).

(2) An indemnity bond acceptable to RUS shall accompany the request for replacement except when the holder is

Rural Utilities Service, USDA

§ 1786.51

the United States, a Federal Reserve Bank, a Federal Government Corporation, a state or territory, or the District of Columbia. The bond may be with or without surety. The bond shall be with surety except when the outstanding principal balance and accrued interest due the present holder is less than \$1,000,000 verified by the lender in writing in a letter of certification of balance due. The surety shall be a qualified surety company holding a certificate of authority from the Secretary of the Treasury and listed in Treasury Department Circular 580.

(3) All indemnity bonds shall be issued and/or payable to the United States of America acting through the Administrator of the Rural Utilities Service. The bond shall be in an amount not less than the unpaid principal and interest. The bond shall save RUS harmless against any claim or demand which might arise or against any damage, loss, costs, or expenses which might be sustained or incurred by reasons of the loss or replacement of the instruments.

§ 1786.36 Other prepayments.

Nothing contained in this subpart shall prohibit a borrower from making prepayments of FFB loans in accordance with the terms thereof.

§ 1786.37 Application of regulation to previous prepayments.

Nothing contained in this subpart shall affect the validity of prepayments made or guarantees issued pursuant to previous regulations. Those borrowers, however, that completed a prepayment pursuant to section 306(A) of the RE Act and closed loans prior to February 27, 1988, may, in their discretion request RUS approval and if required by prior regulations the concurrence of the Secretary of the Treasury, of any amendments necessary to make the terms and conditions of such loans consistent with, or to consolidate such loans with, loans guaranteed under these regulations.

§ 1786.38 Judicial review.

This subpart is intended to set forth RUS policies and procedures for the orderly administration of the provisions of section 306(A) of the RE Act, section

633 of the continuing resolution, and section 637 of the 1989 Appropriations Act and is not intended to create any right or benefit, substantive or procedural, enforceable at law by a party against the United States, its agencies, its officers or any person.

§§ 1786.39—1786.49 [Reserved]

Subpart C—Special Discounted Prepayments on RUS Direct/Insured Loans

AUTHORITY: 7 U.S.C. 901–950b; Title I, Subtitle B, Pub. L. 99–509; Pub. L. 103–354, 108 Stat. 3178 (7 U.S.C. 6941 *et seq.*).

SOURCE: 51 FR 46999, Dec. 29, 1986, unless otherwise noted. Redesignated at 55 FR 49250, Nov. 27, 1990.

§ 1786.50 Purpose.

This subpart sets forth the policies and procedures of RUS whereby electric and telephone borrowers may prepay outstanding RUS Notes at the Discounted Present Value of the RUS Notes with private financing.

§ 1786.51 Definitions.

As used in this subpart:

Act means the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 *et seq.*).

Administrator means the Administrator of RUS.

Discounted Present Value shall have the meaning specified in § 1786.53

Fund means the Rural Electrification and Telephone Revolving Fund established pursuant to the Act.

REA means the Rural Electrification Administration formerly an agency of the United States Department of Agriculture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs.

RUS means the Rural Utilities Service, an agency of the United States Department of Agriculture, established pursuant to Section 232 of the Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994 (Pub. L. 103–354, 108 Stat. 3178), successor to REA with respect to administering certain electric and telephone programs. See 7 CFR 1700.1.

RUS Loan Agreement means the agreement between the borrower and RUS

§ 1786.52

providing for loans pursuant to the Act.

RUS Notes means those notes, bonds or other obligations evidencing indebtedness created by loans made pursuant to Titles I, II or III of the Act (7 U.S.C. 901–940).

[51 FR 46999, Dec. 29, 1986. Redesignated at 55 FR 49250, Nov. 27, 1990, as amended at 59 FR 66441, Dec. 27, 1994]

§ 1786.52 Prepayment.

Through September 30, 1987, the Administrator may, pursuant to this sub-

7 CFR Ch. XVII (1–1–97 Edition)

part, permit eligible electric and telephone borrowers to prepay all outstanding RUS Notes issued or assumed by such borrowers and held in the Fund, upon paying the lesser of the outstanding balance or the Discounted Present Value.

§ 1786.53 Discounted present value.

The Discounted Present Value shall be calculated five business days before prepayment is made by summing the present values of all remaining payments by using the following formula:

$$\text{Present Value} = \sum_{k=1}^n \frac{P_k}{\prod_{i=1}^k \left[1.0 + \left(\frac{D1_i}{365} + \frac{D2_i}{366} \right) \times I \right]}$$

Where:

P_k =Total payment including interest, due on the k^{th} payment date following the prepayment date.

n =Total number of remaining payments dates.

I =The discount rate, in decimals, which shall be the average rate on utility bonds bearing a rating of “Aa” as set forth in that issue of Moody’s Public Utility News Reports most recently published prior to the date on which Discounted Present Value is calculated.

$D1_i$ =Number of days in the i^{th} payment period that are in a non-leap year (365 day year).

$D2_i$ =Number of days in the i^{th} payment period that are in a leap year (366 day year).

§ 1786.54 Eligibility criteria.

To be eligible to prepay RUS Notes at the Discounted Present Value a borrower must comply with the following criteria:

(a) The borrower must be current on all payments due on its outstanding RUS Notes and all other payment obligations owed to RUS and the Rural Telephone Bank.

(b) The borrower must agree to prepay all of its outstanding RUS Notes.

(c) The borrower must identify the source of private financing that will be used to refinance its outstanding RUS Notes, which financing may not include obligations the income of which

is exempt from taxation under the Internal Revenue Code of 1986.

(d) The borrower must have expended all funds advanced on account of the RUS Notes for the purposes for which such funds were advanced.

(e) The borrower must agree to a rescission of the unadvanced balance of the RUS Notes.

(f) The borrower must agree that the borrower, its successors or assigns, shall pay to the Government, as a condition of receiving additional loans or loan guarantees pursuant to Titles I, II and III of the Act, an amount equal to the aggregate of the difference with respect to each of the RUS Notes between the amount outstanding on the RUS Note and the Discounted Present Value of the RUS Note upon prepayment with interest accruing quarterly; the interest rates shall be the rates provided in the respective RUS Notes.

(g) If the borrower is a party to a wholesale power contract with a power supplier financed pursuant to the Act, the borrower must provide the Administrator with such assurances as the Administrator may request that it will meet its obligations to the power supplier.

§ 1786.55 Application procedure.

Any borrower seeking to prepay its RUS Notes under this subpart should

Rural Utilities Service, USDA

§ 1786.60

apply to the appropriate RUS Area Director by submitting:

(a) A board resolution that: (1) Requests approval of the prepayment of the borrower's outstanding RUS Notes, and (2) states the intent of the borrower to comply with all eligibility criteria set forth in § 1786.54 of this subpart.

(b) A list of all RUS Notes together with the outstanding amount on such notes.

(c) Such additional information as the Administrator shall request.

§ 1786.56 Approval of applications.

The applications will ordinarily be reviewed and, if satisfactory, approved, and closing schedule based on the order in which executed prepayment agreements are received. The Administrator may limit the number of applications approved and closings scheduled from time to time taking into account, among other matters, the financial interests and administrative considerations of the Government.

§ 1786.57 Prepayment agreement.

Upon approving an application for prepayment under this subpart, the Administrator shall notify the borrower and deliver to the borrower for its execution a prepayment agreement which shall set forth and provide:

(a) The RUS Notes to be prepaid and when the Discounted Present Value will be calculated.

(b) The place and conditions for closing.

(c) Agreement that the unadvanced balance of RUS Notes shall be rescinded.

(d) Agreement that the borrower, or its successors or assigns, shall pay to the Government, as a condition of receiving additional loans or loan guarantees pursuant to Titles I, II and III of the Act, an amount equal to the aggregate of the difference with respect to each of the RUS Notes between the amount outstanding on the RUS Note and the Discounted Present Value of the RUS Note upon prepayment with interest accruing quarterly; the interest rates shall be the rates provided in the respective RUS Notes.

(e) Assurances that the borrower will meet its obligations to any power supplier financed pursuant to the Act.

(f) Such other terms and conditions as the Administrator deems appropriate.

§ 1786.58 Security.

If, after prepayment of RUS Notes, the Government should continue to hold liens on the borrower's property that secure loans made or guaranteed pursuant to the Act, the Administrator of RUS or the Governor of the Rural Telephone Bank, as the case may be, will consider request for the accommodation of such liens for the purpose of providing security for loans the proceeds of which were used to prepay RUS Notes. Such lien accommodations shall be limited in amount to the Discounted Present Value of the RUS Notes plus such costs, as the Administrator shall determine to be reasonable, incurred by the borrower in obtaining such loans.

§ 1786.59 Loan fund audit.

Within 6 months of closing RUS shall have the right to audit transactions involving the RUS construction fund established and maintained by the borrower pursuant to the terms of the RUS Loan Agreement and to inspect all books, records, accounts and other documents and papers of the borrower. Should RUS determine that the borrower has made disbursements of funds advanced pursuant to RUS Notes which do not comply with the requirements of the RUS Loan Agreement, the borrower shall be required to pay to the Government an amount equal to the difference between the amount which the borrower prepaid on such RUS Notes evidencing RUS loan funds which were improperly disbursed and the amount which the borrower would otherwise have been required to return to the Government as a result of non-compliance if the borrower had not prepaid such RUS Notes. (See 7 CFR part 1721)

§ 1786.60 Closing.

(a) The borrower shall be responsible for obtaining all approvals necessary to consummate the transaction as required by the prepayment agreement

§ 1786.61

including such approvals as may be required by regulatory bodies and other lenders.

(b) The RUS Notes shall be prepaid at a closing to be held in accordance with the prepayment agreement; *Provided, however,* That no closing may be scheduled for after September 30, 1987. At closing, a borrower shall prepay the RUS Notes by paying to the Government an amount equal to the Discounted Present Value of the RUS Notes. The closing shall otherwise be conducted as prescribed in the prepayment agreement.

§ 1786.61 Other prepayments.

RUS loan documentation generally permits borrowers to prepay RUS Notes by paying the outstanding balance due thereon. Nothing in this subpart shall prohibit any borrower from prepaying its outstanding RUS Notes in accordance with the terms thereof. The provisions of this subpart shall not be applicable to such prepayment.

§§ 1786.62—1786.74 [Reserved]

Subpart D—RUS Privatization Demonstration Prepayment Program for the State of Alaska

AUTHORITY: 7 U.S.C. 901–950b; Pub. L. 99–591, Pub. L. 103–354, 108 Stat. 3178 (7 U.S.C. 6941 *et seq.*).

SOURCE: 52 FR 2395, Jan. 22, 1987, unless otherwise noted. Redesignated at 55 FR 49250, Nov. 27, 1990.

§ 1786.75 Purpose.

This subpart contains the general regulations of the Rural Utilities Service (RUS) for implementing section 311 of the RE Act which, in certain circumstances, permits loans made by the Federal Financing Bank (FFB) and guaranteed by the Administrator of RUS to be prepaid by RUS Alaska borrowers using private capital with a 90 percent guarantee.

§ 1786.76 Policy.

It is RUS policy to carry out this privatization demonstration program in a manner which will minimize the loan guarantee exposure to RUS and the administrative burden on RUS.

7 CFR Ch. XVII (1–1–97 Edition)

§ 1786.77 Definitions.

For the purpose of this subpart:

Administrator means the Administrator of RUS.

Discounted Present Value shall have the meaning specified in § 1786.82(a).

Existing Loan Guarantee means a guarantee of payment issued by RUS to FFB pursuant to the RE Act.

Fees means any fees, costs or charges, incurred in connection with obtaining the Refund Loan used to make the prepayment including without limitation, accounting fees, filing fees, legal fees, printing costs, recording fees, trustee fees, overheads of the borrower, underwriting fees, capital stock purchases, or other equity investment requirements of the Private Lender.

FFB means the Federal Financing Bank, an instrumentality and wholly-owned corporation of the United States.

FFB Loan means one or more advances made by FFB on a FFB Note.

FFB Note means a promissory note executed in favor of the FFB by a borrower and guaranteed by RUS pursuant to section 306 of the RE Act (7 U.S.C. 936).

Guarantee shall have the meaning specified in § 1786.79.

Internally Generated Funds means money belonging to the borrower other than: (1) Proceeds of loans made or guaranteed under the RE Act or (2) funds on deposit in the cash construction trustee account maintained pursuant to the terms of the RUS loan agreement;

Loan Guarantee Agreement means the written contract by and among the Private Lender, the borrower and the Administrator setting forth the terms and conditions of a Guarantee issued pursuant to the provisions of this subpart.

Mortgage means the mortgage and security agreements by and among the borrower and RUS, as from time to time supplemented, amended and restated.

Private Lender shall have the meaning set forth in § 1786.80(b).

RE Act means the Rural Electrification Act of 1936 (7 U.S.C. 901–950b), as amended.

REA means the Rural Electrification Administration formerly an agency of

Rural Utilities Service, USDA

§ 1786.80

the United States Department of Agriculture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs.

Refunding Loan means the note(s), bond(s) or other obligation(s) evidencing indebtedness created by the Refunding Loan(s).

Refunding Note means the loan or loans used by the borrower to prepay FFB Notes, RUS Notes or RTB Notes pursuant to this subpart.

RTB means the Rural Telephone Bank, a body corporate and instrumentality of the United States established pursuant to 7 U.S.C. 941.

RTB Notes mean those notes, bonds or other obligations evidencing indebtedness created by loans made by the RTB pursuant to Title IV of the RE Act (7 U.S.C. 941–950b).

RUS means the Rural Utilities Service, an agency of the United States Department of Agriculture established pursuant to Section 232 of the Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994 (Pub. L. 103–354, 108 Stat. 3178), successor to REA with respect to administering certain electric and telephone programs. See 7 CFR 1700.1.

RUS Notes mean those notes, bonds or other obligations evidencing indebtedness created by loans made pursuant to Titles I, II, or III of the RE Act (7 U.S.C. 901–940).

Service Area shall have the meaning set forth in § 1786.84(c).

[52 FR 2395, Jan. 22, 1987, as amended at 53 FR 37733, Sept. 28, 1988. Redesignated at 55 FR 49250, Nov. 27, 1990, and amended at 59 FR 66440, Dec. 27, 1994]

§ 1786.78 Demonstration program.

Pursuant to section 311 of the RE Act and this subpart, qualified borrowers may prepay FFB Loans by paying the outstanding principal balance due thereon. Borrowers may refinance FFB Loans with Refunding Loans from qualified Private Lenders. Such Refunding Loans shall be eligible for a Guarantee as hereinafter provided. Participating borrowers shall be required to prepay all other loans made or guaranteed pursuant to the RE Act and otherwise comply with the provisions of this subpart. Because section 311 of the RE Act provides for a dem-

onstration program of limited applicability, many of the terms and conditions for prepayments of FFB Loans and in particular the terms and conditions of Refunding Loans shall be negotiated on a case-by-case basis by RUS, the borrower, and the Private Lender, and any other secured party under the borrower's Mortgage.

§ 1786.79 RUS Guarantee.

For the purposes of this subpart, “Guarantee” means the endorsement in the form specified by RUS. The Guarantee shall provide, among other matters, that in the event of a payment default by the borrower on a Refunding Note bearing a Guarantee, RUS shall pay the Private Lender, when and as due, 90 percent of the unpaid portion of the regularly scheduled debt service payment on such Refunding Note. RUS shall have the right to accelerate, in accordance with § 1786.80(c)(7), such Refunding Note and pay the Private Lender 90 percent of the outstanding principal balance and accrued interest of the loan guaranteed by RUS and be discharged from its Guarantee obligation.

§ 1786.80 Qualifications.

(a) *Borrowers*. To qualify to prepay an FFB Loan pursuant to this subpart, the borrower:

(1) Must be located in the State of Alaska;

(2) Must prepay the FFB loan by using a Refunding Loan with a Guarantee, or by using Internally Generated Funds;

(3) Must prepay all of its outstanding loans made or guaranteed under the RE Act; and

(b) *Private Lenders*. To qualify for a Guarantee pursuant to this subpart, the Private Lender must be an entity or a trust administered by an entity; such entity in either case must also:

(1) Be a private legally organized lender;

(2) Either (i) be subject to credit examination and supervision by either an agency of the United States or a State and be in good standing with its licensing authority and have met the requirements, if any, of licensing, lending and loan servicing in the State where the collateral for the Refunding

Loan is located; (ii) have capital and surplus of at least \$50 million; or (iii) have credit support such as a letter of credit or guarantee, in form and substance satisfactory to the Administrator, in the amount of \$50 million.

(3) Have the capability to adequately service the Refunding Loan by using its own resources. Under no circumstances may the borrower or an affiliate of the borrower service the Refunding Loan. Required servicing shall include:

(i) The billing and collecting of the Refunding Loan payments from the borrower; (ii) notifying the Administrator promptly of any default in the payment of principal and interest on the Refunding Loan and submitting a report, as soon as possible thereafter, setting forth the Private Lender's views as to the reasons for the default, how long the Private Lender expects the borrower to be in default, and what corrective actions the borrower states it is taking to achieve a current debt service position; (iii) notifying the Administrator of any known violations or defaults by the borrower under the lending agreement, Loan Guarantee Agreement, or related security instruments, or conditions of which the Private Lender is aware which might lead to nonpayment, violation or other default; and (iv) such other activities as may be specified in the Loan Guarantee Agreement.

(c) *Refunding Loans.* A qualifying borrower may at its option elect to use a Refunding Loan to make a prepayment pursuant to this subpart. With respect to the prepayment of any one FFB Loan, the Administrator may endorse Guarantees evidencing Refunding Loans in increments not less than \$30 million except where an FFB Loan being prepaid is less than \$150 million in which case the Administrator may endorse Guarantees on not more than five Refunding Notes. RUS shall generally require as a condition to providing a Guarantee that the Refunding Loan and Refunding Note comply with the following:

(1) The principal amount of the Refunding Note may not exceed the outstanding principal balance of the FFB Loan being prepaid.

(2) For the life of the loan the interest rate, whether fixed or variable, on the Refunding Note shall be less than the dollar weighted average interest rate on the FFB Loan being prepaid.

(3) The unguaranteed portion of the Refunding Note may not be severed or "stripped" from the guaranteed portion of the Refunding Note.

(4) The loan documentation shall provide RUS with the right to accelerate the Refunding Loan upon the occurrence of an Event of Default as that term is defined in the Mortgage at the earlier of: (i) Any date the borrower may prepay in accordance with the terms of the Refunding Note, or (ii) the tenth anniversary date of the Refunding Note.

(5) The principal of Refunding Note shall not include amounts attributable to Fees associated with the Refunding Loan. Subject to the approval of the Administrator in connection with the development of loan documentation, the interest rate on the Refunding Note may include amounts attributable to Fees if the net effective interest rate including such Fees meets the tests contained in § 1786.80(c)(2). The borrower, subject to the approval of RUS, may finance the Fees with the proceeds of a loan. Such a loan will not be guaranteed by RUS nor will RUS share first mortgage security to enable another lender to obtain security for such a loan to the borrower.

(6) Refunding Loans and Refunding Notes shall otherwise be in form and substance satisfactory to the Administrator.

(d) *Participation of Refunding Loan.* A qualified Private Lender may participate out each Refunding Loan which bears a Guarantee pursuant to this subpart to entities other than a Government agency, the borrower, or an affiliate of the borrower, provided that such participation shall be on terms and conditions satisfactory to the Administrator. Generally, the Private Lender may utilize any financing structure it desires in obtaining funds to make the Refunding Loan, providing the Refunding Loan meets the requirements of § 1786.80(c).

(e) *Prepayments Without a Guarantee.* A qualifying borrower may utilize Internally Generated Funds without a

Rural Utilities Service, USDA

§ 1786.83

Guarantee to prepay an FFB Loan pursuant to this subpart or may utilize a combination of a Refunding Loan with a Guarantee and Internally Generated Funds without a guarantee.

[52 FR 2395, Jan. 22, 1987, as amended at 53 FR 37733, Sept. 28, 1988. Redesignated and amended at 55 FR 49250, Nov. 27, 1990]

§ 1786.81 Loan security.

(a) *Loan security.* Refunding Notes evidencing Refunding Loans made to the borrower will be secured as follows:

(1) The Refunding Note(s) bearing an RUS Guarantee, will be secured under the Mortgage on a *pari passu* basis with all other secured indebtedness of the borrower. Both the obligation of the borrower to reimburse RUS for any funds advanced by RUS pursuant to the Guarantee and the 10 percent unguaranteed portion of the Refunding Note shall be so secured.

(2) The Refunding Note(s) which do not bear an RUS Guarantee, will be secured, in a principal amount equal to the outstanding principal balance due on the RUS Notes or RTB Notes which are prepaid pursuant to this subpart,

under the Mortgage on a *pari passu* basis with all other secured indebtedness of the borrower.

(3) The Mortgage shall permit additional indebtedness to be secured thereunder on a *pari passu* basis with the approval of the Administrator.

(b) *Mortgage rights and remedies.* The terms of the Mortgage, including the rights and remedies available to RUS, the Private Lenders and other secured parties under the Mortgage will be subject to negotiations between the borrower and such parties.

§ 1786.82 Prepayment of RUS and RTB Notes.

(a) The borrower shall prepay all outstanding RUS Notes within one year after prepayment of FFB Loans at the lesser of the outstanding principal balance due on the loan or the loan's Discounted Present Value. The Discounted Present Value shall be calculated five business days before prepayment is made by summing the present values of all remaining payments by using the following formula:

$$\text{Present Value} = \sum_{k=1}^n \frac{P_k}{\prod_{i=1}^k \left[1.0 + \left(\frac{D1_i}{365} + \frac{D2_i}{366} \right) \times I \right]}$$

Where:

P_k =Total payment, including interest, due on the k^{th} payment date following the prepayment date.

n =Total number of remaining payments dates.

I =The discount rate, in decimals, which shall be the average rate on utility bonds bearing a rating of "Aa" as set forth in that issue of Moody's Public Utility News Reports most recently published prior to the date on which Discounted Present Value is calculated.

$D1_i$ =Number of days in the i^{th} payment period that are in a non-leap year (365 day year).

$D2_i$ =Number of days in the i^{th} payment period that are in a leap year (366 day year).

(b) The borrower shall prepay all RTB Notes within one year after prepayment of the FFB Loans by paying the outstanding principal balance due on the RTB Notes.

(c) The borrower shall prepay all other RUS guaranteed notes in accordance with the terms of such notes.

(d) Except as otherwise provided prepayments of RUS Notes, RTB Notes, and RUS guaranteed notes shall be in such terms and conditions as the Administrator shall prescribe. If the borrower is a party to a wholesale power contract with a power supplier financed pursuant to the RE Act, the borrower must provide the Administrator with such assurances as the Administrator may request that it will meet its obligations to the power supplier.

§ 1786.83 Application procedure.

(a) *Applications.* Applications to make a prepayment pursuant to this subpart

§ 1786.84

must be submitted to the appropriate Area Director not less than 30 business days prior to the projected settlement date for the Refunding Loan and shall be on such forms as RUS may prescribe. The application shall provide among other matters the following:

- (1) Borrower's RUS designation.
 - (2) Borrower's name and address.
 - (3) A certified copy of a resolution of the board of directors of the borrower that: (i) Requests RUS approval of the prepayment and (ii) recognizes that the request results in the borrower being ineligible for additional financial assistance under the RE Act.
 - (4) Listing of each RUS Note, RTB Note or FFB Note or other RUS guaranteed note to be prepaid by loan designation, RUS account number, advance date, maturity date, original amount, and outstanding balance.
 - (5) Evidence that the borrower meets or will be able to meet the qualification provisions of § 1786.80(a) of these regulations including that the borrower has the ability to obtain the financing necessary to prepay its outstanding RUS Notes, RTB Notes, FFB Notes and other RUS guaranteed notes within one year of the prepayment of the first FFB Loan.
 - (6) In the event the borrower proposes to utilize a Refunding Loan with a Guarantee in connection with the FFB prepayment, a proposal for the Refunding Loan from a Lender selected by the borrower.
 - (7) Evidence of the Private Lender's qualifications.
 - (8) Servicing entity's name and address.
 - (9) Evidence that the borrower has received all approvals which can be obtained at the time of application and which are required under Federal or State law, loan agreements, security agreements, existing financing arrangements, or any other agreement to which the borrower is a party.
 - (10) Estimate of Fees and expenses, including any taxes.
 - (11) Description of the area served by the borrower.
- (b) *Notifications.* If a borrower's application has been approved, the Administrator will promptly notify the borrower, the Private Lender and FFB to that effect. If not approved the Admin-

7 CFR Ch. XVII (1-1-97 Edition)

istrator will promptly notify the borrower.

[52 FR 2395, Jan. 22, 1987, as amended at 53 FR 37733, Sept. 28, 1988. Redesignated at 55 FR 49250, Nov. 27, 1990]

§ 1786.84 Future eligibility under the RE Act.

With respect to borrowers which prepay FFB Loans pursuant to this subpart additional loans, loan guarantees and other financial assistance under the RE Act shall be restricted as follows:

(a) *Electric borrowers.* In the case of an electric borrower prepaying under this subpart, after the date of prepayment, no loans, loan guarantees or other financial assistance shall be provided pursuant to the RE Act to the borrower or its successors or for the purpose of financing the construction or operation of generating plants or bulk transmission lines for the purpose of furnishing electric energy in the area served on a retail or wholesale basis by such borrower.

(b) *Telephone borrowers.* In the case of a telephone borrower prepaying under this subpart, after the date of prepayment, no loans, loan guarantees or other financial assistance shall be provided pursuant to the RE Act to the borrower or its successors or for the purpose of furnishing or improving telephone service in the area served by such borrower.

(c) *Service area.* For the purposes of this subpart, the borrower's "Service Area" shall be as determined by the Administrator based upon data as of December 31, of the year preceding the date of prepayment. In determining the Service Area of electric borrowers, the Administrator shall make allowances and adjustments to avoid adversely affecting the eligibility of other borrowers for financial assistance under the RE Act where such borrowers are currently providing electric supply services for retail loads in the same area and which are reasonably expected to continue providing electric supply services for retail loads in such areas.

(d) *Other borrowers.* In the event that the borrower prepaying under this subpart shall be using a majority of its generating capacity to directly serve its retail consumers, other borrowers

Rural Utilities Service, USDA

§ 1786.86

which are purchasing power from such borrower as of September 20, 1986, shall continue to remain eligible for financing under the RE Act for needs in their service area.

(e) *Project participation.* Nothing in this subpart shall prohibit a borrower which has prepaid pursuant to this subpart from participating in generation and transmission projects with borrowers which have not prepaid, so long as the borrower which has prepaid utilizes private capital financing without financial assistance under the RE Act.

(f) *Short-term power purchases.* Nothing in this subpart shall prohibit short-term power purchases by borrowers which have prepaid under this section from borrowers which have not prepaid.

(g) *Lien accommodations.* The Administrator shall consider on a case-by-case basis requests by a borrower which has prepaid under section 311 of the RE Act for an accommodation of the lien of the Mortgage on a *pari passu* basis, to provide security for a lender who provides the borrower with a loan for the purposes of financing electric or telephone facilities within the borrower's Service Area or for other corporate purposes.

§ 1786.85 Settlement procedure.

(a) *Settlement date.* When RUS is satisfied with the documentation, the parties will schedule a settlement date. The Refunding Loan will be settled and the Guarantee delivered on a date and time mutually agreed upon among the parties not earlier than ten business days after receipt by RUS of all final documentation. RUS reserves the right to limit the aggregate dollar amount of and/or the number of prepayments or settlements that take place on any given day.

(b) *Place of settlement.* All settlements involving the Guarantee of Refunding Loans will take place in Washington, DC, at a location of the borrower's choosing.

(c) *Repayment of FFB.* Prior to 1:00 p.m. prevailing local time in New York, New York, on the settlement date, the borrower shall wire immediately available funds to RUS through the Department of the Treasury account at the Federal Reserve Bank of New York in

an amount sufficient to pay the outstanding principal of FFB Loans plus accrued interest from the last payment date to and including the settlement date. In the event the borrower has more than one FFB Loan, all such loans must be prepaid at the same settlement.

(d) *Prepayment of RUS Notes and RTB Notes.* In the event that the borrower chooses not to prepay all its outstanding RUS Notes and RTB Notes simultaneously with the prepayment of the FFB Loans, the borrower shall execute:

(1) An agreement specifying that such RUS Notes and RTB Notes will be prepaid within one year of the settlement date and

(2) A note payable to RUS in an amount equal to the premiums that would have been due under the FFB Notes being prepaid if the FFB Notes had been prepaid in accordance with their terms rather than pursuant to this subpart. This note shall (i) bear interest at a rate equal to the rate on the FFB Notes, (ii) be secured in a manner satisfactory to the Administrator, (iii) be payable on demand one year after the settlement date in the event that the borrower does not prepay all its outstanding RUS Notes, RTB Notes and other RUS guaranteed notes within one year of the date it prepays its FFB Notes, and (iv) be cancelled and returned to the borrower if the borrower's RUS Notes, RTB Notes and other RUS guaranteed notes are prepaid within one year of the date it prepays its FFB Notes.

(e) *Documentation.* The documentation to be delivered at settlement will be agreed upon by the Private Lender, the borrower and RUS. Depending upon the circumstances, RUS may require the borrower to perform a search of title, provide additional title insurance and take such other actions as may be necessary to ensure that the interests of the Government are adequately protected.

§ 1786.86 Other prepayments.

Nothing shall prohibit a borrower from making prepayments of FFB Loans, RUS loans, RTB loans, or other RUS guaranteed loans in accordance with the terms thereof.

§ 1786.95

§§ 1786.87—1786.94 [Reserved]

Subpart E—Discounted Prepayments on RUS Notes in the Event of a Merger of Certain RUS Electric Borrowers

SOURCE: 56 FR 37268, Aug. 6, 1991, unless otherwise noted.

§ 1786.95 Purpose.

This subpart sets forth the policies and procedures of RUS whereby certain electric borrowers may prepay outstanding RUS Notes at the Discounted Present Value of the RUS Notes with private financing.

§ 1786.96 Definitions.

As used in this subpart:

Act means the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 *et seq.*).

Administrator means the Administrator of RUS.

Consolidation means:

(1) The combination, pursuant to state law, of two or more borrower or nonborrower organizations into a new successor organization that takes over the assets and assumes the liabilities of those organizations; or

(2) Any other transaction including an acquisition which has substantially the same effect.

Discounted Present Value shall have the meaning specified in § 1786.98.

Fund means the Rural Electrification and Telephone Revolving Fund pursuant to the Act.

Merger means:

(1) The combination, pursuant to state law, of two or more borrower or nonborrower organizations into an existing survivor organization that takes over the assets and assumes the liabilities of the merged organizations; or

(2) Any other transaction including an acquisition which has substantially the same effect.

REA means the Rural Electrification Administration formerly an agency of the United States Department of Agriculture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs.

RUS means the Rural Utilities Service, an agency of the United States De-

7 CFR Ch. XVII (1–1–97 Edition)

partment of Agriculture established pursuant to Section 232 of the Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994 (Pub. L. 103–354, 108 Stat. 3178), successor to REA with respect to administering certain electric and telephone programs. See 7 CFR 1700.1.

RUS Loan Agreement means the agreement between the borrower and RUS providing for loans pursuant to the Act.

RUS Notes means those notes, bonds or other obligations evidencing indebtedness created by loans made or guaranteed by RUS pursuant to titles I and III of the Act (7 U.S.C. 901–940).

[56 FR 37268, Aug. 6, 1991, as amended at 59 FR 66440, Dec. 27, 1994]

§ 1786.97 Prepayment.

There were 29 former RUS electric borrowers that prepaid their direct or insured loans under section 306B(a) of the Act prior to October 1, 1987. (See subpart C of this part.) These borrowers are listed in appendix A to subpart E of this part. Any RUS electric borrower which is the result of a merger or consolidation involving any of these 29 former borrowers and a borrower with outstanding Notes may, after meeting all requirements of this subpart, prepay all outstanding RUS Notes issued or assumed by the borrower upon paying the lesser of the outstanding balance or the Discounted Present Value. Such prepayment must be made not later than one year after the effective date of the merger or consolidation.

§ 1786.98 Discounted present value.

(a) The Discounted Present Value shall be calculated by RUS before prepayment is made by summing the present values of all remaining payments on all outstanding notes according to the following formula to compute the discounted present value of each note and adjusting as here and after provided for tax exempt financing.

$$\text{Present Value} = \sum_{k=1}^n \frac{P_k}{\prod_{i=1}^k \left[1.0 + \left(\frac{D1_i}{365} + \frac{D2_i}{366} \right) \times I \right]}$$

Where:

P_k =Total payment, including interest, due on the k^{th} payment date following the prepayment date. n =Total number of remaining payment dates. I =The discount rate applied to each transaction will be ascertained by using data specified in the "Federal Reserve Statistical Release" which is published each Monday. (See appendix B to subpart E of this part.) The specific discount rate will be the discount rate(s) specified in the "Treasury Constant Maturities" section of this publication eight working days prior to the closing. In applying the discount rate, the 1-year Treasury rate will be used for all notes with a remaining term of less than 2 years; the 2-year Treasury rate for notes with maturities between 2 and 3 years; the 3-year Treasury rate for all notes with maturities between 3 and 5 years; the 5-year Treasury rate for all notes with maturities between 5 and 7 years; the 7-year Treasury rate for all notes with maturities between 7 and 10 years; the 10-year Treasury rate for all notes with maturities between 10 and 30 years; and the 30-year Treasury rate for all notes with maturities longer than 30 years.

$D1_i$ =Number of days in the i^{th} payment period that are in a non-leap year (365 day year).

$D2_i$ =Number of days in the i^{th} payment period that are in a leap year (366 day year).

(b) Notwithstanding paragraph (a) of this section, in the event that the borrower shall elect to prepay using tax exempt financing, the calculation of the Discounted Present Value shall be adjusted to make the discount the equivalent of fully taxable financing.

§ 1786.99 Eligibility criteria.

To be eligible to prepay RUS Notes at the Discounted Present Value, a borrower must comply with the following criteria:

(a) The borrower must be current on all payments due on its outstanding RUS Notes and all other payment obligations owed to RUS;

(b) The borrower must agree to prepay all of its outstanding RUS Notes;

(c) The borrower must identify the source of financing that will be used directly or indirectly to refinance its outstanding RUS Notes. The borrower must certify in writing whether such financing will be tax exempt and, if so, shall furnish all information on the financing as RUS may request to enable RUS to adjust the discount to the equivalent to fully taxable financing;

(d) The borrower must have expended all funds advanced on account of the RUS Notes for the purposes for which such funds were advanced or repaid RUS for all unexpended funds;

(e) The borrower must agree to a rescission of the unadvanced balance of any RUS Notes outstanding as of the date of its application for prepayment;

(f) The borrower must agree that the borrower, its successors and assigns, shall pay to the Government, as a condition of receiving additional loans or loan guarantees pursuant to titles I and III of the Act, an amount equal to the aggregate of the difference with respect to each of the RUS Notes between the amount outstanding on the RUS Note and the Discounted Present Value of the RUS Note upon prepayment with interest accruing quarterly; the interest rates shall be the rates provided in the respective Notes; and

(g) If the borrower is a party to a wholesale power contract with a power supplier financed pursuant to the Act, the borrower must provide the Administrator with such assurances as the Administrator may request that it will meet its obligations to the power supplier. The borrower must also specifically agree to the following limitation: The borrower agrees that, for so long as the Wholesale Power Contract shall be in effect between the borrower and the power supplier, the borrower will not, without the approval in writing of the power supplier and the Administrator, take or suffer to be taken any steps for reorganization or to consolidate with or merge into any corporation or any other public power district,

§ 1786.100

or to sell, lease or transfer (or make any agreement therefor) all or a substantial portion of its assets, whether now owned or hereafter acquired. Notwithstanding the foregoing, the borrower may take or suffer to be taken any steps for reorganization or to consolidate with or merge into any corporation or any other public power district, or to sell, lease or transfer (or make any agreement therefor) all or a substantial portion of its assets, whether now owned or hereafter acquired, so long as the borrower shall pay such portion of the outstanding indebtedness evidenced by the power supplier's Notes at the time outstanding as shall be determined by the power supplier with the prior written consent of the Administrator and shall otherwise comply with such reasonable terms and conditions as the Administrator and the Power Supplier shall require.

§ 1786.100 Application procedure.

Any borrower seeking to prepay its RUS Notes under this Subpart should apply to the appropriate RUS Area Director not less than 60 days prior to one year after the effective date of the merger or consolidation by submitting:

- (a) A board resolution that:
 - (1) Requests approval of the prepayment of the borrower's outstanding RUS Notes;
 - (2) States the intent of the borrower to comply with all eligibility criteria set forth in § 1786.99 of this subpart; and
 - (3) Identifies the source of financing.
- (b) A list of all RUS Notes together with the outstanding amount on such notes.
- (c) An opinion of counsel as to the effective date of the merger or consolidation.
- (d) Such additional information as the Administrator will request.

§ 1786.101 Approval of application.

The applications will be reviewed and, if satisfactory, approved. Closing will be scheduled upon approval.

§ 1786.102 Prepayment agreement.

Upon approving an application for prepayment under this subpart, the Administrator shall notify the borrower and deliver to the borrower for its exe-

7 CFR Ch. XVII (1-1-97 Edition)

cution a prepayment agreement which shall set forth and provide:

- (a) The RUS Notes to be prepaid and when the Discounted Present Value will be calculated.
- (b) The place, date and conditions for closing.
- (c) Agreement that the unadvanced balance of RUS Notes shall be rescinded.
- (d) Agreement that the borrower, or its successors or assigns, shall pay to the Government, as a condition of receiving additional loans or loan guarantees pursuant to titles I and III of the Act, an amount equal to the aggregate of the difference with respect to each of the RUS Notes between the amount outstanding on the RUS Note and the Discounted Present Value of the prepaid RUS Note; with interest accruing quarterly. The interest rates shall be the rates provided in the respective RUS Notes.
- (e) Assurances that the borrower will meet its obligations to any power supplier financed pursuant to the Act.
- (f) Such other terms and conditions as the Administrator deems appropriate.

§ 1786.103 Security.

If, after prepayment of RUS Notes, the Government should continue to hold liens on the borrower's property, the Administrator of RUS will consider a request for the accommodation of such liens for the purpose of providing security for loans the proceeds of which were used to prepay RUS Notes. Such lien accommodations shall be limited in amount to the Discounted Present Value of the RUS Notes plus such costs, as the Administrator shall determine to be reasonable, incurred by the borrower in obtaining such loans.

§ 1786.104 Loan fund audit.

RUS shall have the right to audit within 6 months of closing, transactions involving the RUS construction fund established and maintained by the borrower pursuant to the terms of the RUS Loan Agreement and to inspect all books, records, accounts and other documents and papers of the borrower. Should RUS determine that the borrower has made disbursements of

Rural Utilities Service, USDA

funds advanced pursuant to RUS Notes which do not comply with the requirements of the RUS Loan Agreement, the borrower shall be required to pay the Government an amount equal to the difference between the amount which the borrower prepaid on such RUS Notes evidencing RUS loans funds which were improperly disbursed and the amount which the borrower would otherwise have been required to return to the Government as a result of non-compliance if the borrower had not prepaid such RUS Notes. (See 7 CFR part 1721, Post-Loan Policies and Procedures for Insured Electric Loans.)

§ 1786.105 Closing.

(a) The borrower shall be responsible for obtaining all approvals necessary to consummate the transaction as required by the prepayment agreement, including such approvals as may be required by regulatory bodies and other lenders.

(b) The RUS Notes shall be prepaid at a closing to be held in accordance with the prepayment agreement. RUS shall designate the date of closing which in no event shall be later than one year after the effective date of the merger or consolidation. At closing, in addition to paying all current interest due on the date of prepayment, a borrower shall prepay the RUS Notes by paying to the Government an amount equal to the lesser of the outstanding balance or the Discounted Present Value of the RUS Notes. The closing shall otherwise be conducted as prescribed in the prepayment agreement.

§ 1786.106 Other prepayments.

RUS loan documentation generally permits borrowers to prepay RUS Notes by paying the outstanding balance due thereon. Nothing in this subpart shall prohibit any borrower from prepaying its outstanding RUS Notes in accordance with the terms thereof. The provisions of this subpart shall not be applicable to such prepayment.

APPENDIX A TO SUBPART E OF PART 1786—LISTING OF ELIGIBLE BORROWERS

State	Borrower name and address
Colorado	Colorado-Ute Electric Assn., Inc., Montrose.

Footnotes:
¹ The daily effective federal funds rate is a weighted average of rates on trades through N.Y. brokers.
² Weekly figures are averages of 7 calendar days ending on Wednesday of the current week; monthly figures include each calendar day in the month.
³ Annualized using a 360-day year or bank interest.
⁴ Quoted on a discount basis.
⁵ An average of offering rates on commercial paper placed by several leading dealers for firms whose bond rating is AA or the equivalent.
⁶ An average of offering rates on paper directly placed by finance companies.
⁷ Representative closing yields for acceptances of the highest rated money center banks.
⁸ An average of dealer offering rates on nationally traded certificates of deposit.
⁹ Bid rates for Eurodollar deposits at 11 a.m. London time.
¹⁰ One of several base rates used by banks to price short-term business loans.
¹¹ Rate for the Federal Reserve Bank of New York.
¹² Auction date for daily data; weekly and monthly averages computed on an issue-date basis.
¹³ Yields on actively traded issues adjusted to constant maturities. Source: U.S. Treasury.
¹⁴ Unweighted average of rates on all outstanding bonds neither due nor callable in less than 10 years, including one very low yielding "flower" bond.
¹⁵ Estimate of the yield on a recently offered, A-rated utility bond with a maturity of 30 years and call protection of 5 years; Friday quotations.
¹⁶ Bond buyer Index, general obligation, 20 years to maturity, mixed quality; Thursday quotations.
¹⁷ Contract interest rates on commitments for fixed-rate first mortgages. Source: FHLMC.
NOTE: Weekly and monthly figures are averages of business days unless otherwise noted.

Description of the Treasury Constant Maturity Series

Yields on Treasury securities at "constant maturity" are interpolated by the U.S. Treasury from the daily yield curve. This curve, which relates the yield on a security to its time to maturity, is based on the closing market bid yields on actively traded Treasury securities in the over-the-counter market. These market yields are calculated from composites of quotations reported by five leading U.S. Government securities dealers to the Federal Reserve Bank of New York. The constant maturity yield values are read from the yield curve at fixed maturities, currently 1, 2, 3, 5, 7, 10, and 30 years. This method provides a yield for a 10-year maturity, for example, even if no outstanding security has exactly 10 years remaining to maturity.

Subpart F—Discounted Prepayments on RUS Electric Loans

AUTHORITY: 7 U.S.C. 901 *et seq.*; Pub. L. 103-354, 108 Stat. 3178 (7 U.S.C. 6941 *et seq.*).

SOURCE: 59 FR 13620, Mar. 22, 1994, unless otherwise noted.

§ 1786.150 Purpose.

This subpart sets forth the policies and procedures of RUS whereby borrowers may prepay, with private financing or internally generated funds, outstanding RUS Notes evidencing electric loans at the Discounted

present value of the RUS Notes, pursuant to the provisions of section 306(B) of the RE Act as amended by Public Law 102-428, 106 Stat. 2183, adopted October 21, 1992.

§ 1786.151 Definitions and rules of construction.

(a) *Definitions.* As used in this subpart:

Administrator means the Administrator of the Rural Utilities Service (RUS).

Borrower means any organization which has an outstanding note(s) evidencing electric loans made by RUS, or has previously prepaid such notes under subparts C and E of this part.

Business day means any day on which both the RUS and the Federal Reserve Bank of New York are open for business.

Construction Fund Account means the Cash—Construction Fund—Trustee Account, maintained by the borrower pursuant to the terms of the outstanding RUS Loan Contract.

Closing shall mean one of the several contemplated closings of the prepayment of the Qualified Notes prescribed by the Prepayment agreement.

Closing date shall mean any business day identified as such by the Government in its preclosing notice delivered to the Company pursuant to § 1786.158.

§ 1786.152

Closing request shall mean a request by the borrower of the Government to schedule a closing for certain Qualified Notes on the date requested therein.

Direct loan means a loan made pursuant to section 4 of the RE Act.

Discounted present value shall have the meaning set forth in § 1786.153.

Distribution borrower means a borrower that sells electric power and energy at retail in rural areas.

Electric loan means a Direct loan or an Insured loan made for the purpose of furnishing electric energy to persons in rural areas.

Final maturity means the final date on which all outstanding principal and accrued interest on an electric loan is due and payable.

Government means the United States of America, acting through the Administrator of the Rural Utilities Service.

Insured loan means a loan made pursuant to Section 305 of the RE Act.

Lien accommodation means the sharing of the Government's (RUS's) lien on property, usually all property, covered by the lien of the RUS Mortgage.

Loan guarantee means a loan guarantee under Section 306 of the RE Act.

Power supply borrower means a borrower that sells or intends to sell electric power at wholesale to distribution or power supply borrowers pursuant to RUS wholesale power contracts.

Preclosing notice shall mean a notice delivered by the Government to the borrower in response to a closing request, identifying the closing date, the Qualified Notes to be prepaid at such closing and documents to be delivered by the borrower to the Government prior to the closing date.

Prepayment agreement shall have the meaning set forth in § 1786.158.

Qualified Notes shall have the meaning set forth in § 1786.154.

RE Act means the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 *et seq.*).

RUS means the Rural Utilities Service, an agency of the United States Department of Agriculture.

RUS Loan Contract means the agreement, as amended, supplemented, or restated from time to time, between a borrower and RUS providing for loans or loan guarantees pursuant to the RE Act.

7 CFR Ch. XVII (1–1–97 Edition)

RUS Mortgage means collectively those mortgages and security agreements made by and among the borrower, the Government, and third parties, if any, securing indebtedness evidencing electric loans or loan guarantees made pursuant to the RE Act.

Rural development loans means loans or grants made pursuant to Rural development programs.

Rural development programs means loan or grant programs under the authority of the Administrator pursuant to sections 313, 501, and 502 of the RE Act.

Supplemental lender means a private lender whose loan to the borrower is secured by the RUS mortgage.

Tax exempt financing means borrowing evidenced by bonds, notes and other evidence of indebtedness the income of which is excluded from gross income for the purposes of Chapter 1 of the Internal Revenue Code of 1986 (26 U.S.C. ch. 1).

(b) *Rules of construction.* Unless the context shall otherwise indicate, the terms defined in paragraph (a) of this section include the plural as well as the singular, and the singular as well as the plural.

§ 1786.152 Prepayments of RUS loans.

An electric loan made under the RE Act shall not be sold or prepaid at a value that is less than the outstanding principal balance, except that, on request of a borrower, an electric loan made under the RE Act, or a portion of such a loan, that was advanced before May 1, 1992, or has been advanced for not less than 2 years, shall be prepaid by the borrower at the lesser of the outstanding principal balance of the loan or the discounted present value thereof.

§ 1786.153 Discounted present value.

(a) The discounted present value shall be calculated by summing the present values of all remaining payments on all Qualified Notes to be prepaid according to the following formula and adjusted as provided in paragraph (b) of this section if tax exempt financing is used.

$$\text{Present Value} = \sum_{k=1}^n \frac{P_k}{\prod_{i=1}^k \left[1.0 + \left(\frac{D1_i}{365} + \frac{D2_i}{366} \right) I \right]}$$

Where:

The Greek letter, Sigma (Σ) means the sum of the following terms.

The Greek letter, Pi (Π) means the product of the following terms.

P_k =Total payment, including interest due on the K^{th} payment date following the prepayment date.

n =Total number of remaining payment dates to final maturity.

$D1_i$ =Number of days in the i^{th} payment period that are in a non-leap year (365-day year).

$D2_i$ =Number of days in the i^{th} payment period that are in a leap year (366-day year).

I =The discount rate applied to each transaction ascertained by using data specified in the "Federal Reserve Statistical Release" (H.15 (519)), which is published each Monday. The availability of this Release will be announced when the information is available by telephone on (202) 452-3206. See adjustment for tax exempt refinancing at paragraph (b) of this section. The specific discount rate will be based on the discount rate(s) specified in the "Treasury Constant Maturities" section of this publication 8 business days prior to the closing and will be interpolated from that information as follows:

Remaining final maturity of RUS loan:		Treasury constant maturities
At least	But less than	
# years	# years	
0	2	1-year.
2	3	2-year.
3	4	3-year.
4	5	(¹)
5	6	5-year.
6	7	(²)
7	8	7-year.
8	9	(³)
9	10	(³)
10	11	10-year.
11	20	(⁴)
20	21	20-year.
21	30	(⁵)

Remaining final maturity of RUS loan:		Treasury constant maturities
At least	But less than	
# years	# years	
30	36	30-year.

Notes: ¹The arithmetic mean between the 3-year. and 5-year. Treasury Constant Maturities; i.e., if 3-year. rate is 3.00% and the 5-year. rate is 4.00% then the rate used would be 3.5%.

²The arithmetic mean between the 5-year and 7-year Treasury Constant Maturities computed as above.

³A straight line interpolated rate between the 7-year rate and the 10-year rate. (See formula below)

⁴A straight line interpolated rate between the 10-year note and the 20-year Bond rate. (See formula below)

⁵A straight line interpolated rate between the 20-year bond and the 30-year bond using the following formula:

$$I = B + \frac{((C - E) \times (A - B))}{F - E}$$

Where:

I =The discount rate interpolated from the cost of money to the Treasury.

A =The Treasury interest rate for the most recently published maturity (in years) that is the shortest Treasury term (in years) which is greater than the borrower's remaining term (in years) to final maturity; i.e., (if the note to be prepaid has a final maturity of more than 10 years then this rate is the 20-year Treasury rate)

B =The Treasury interest rate for the most recently published maturity (in years) that is the longest Treasury term (in years) which is less than the borrower's remaining term (in years) to final maturity; i.e., (if the note to be prepaid has a final maturity of more than 10 years but less than 20 years then this term is the 10-year Treasury rate)

C =The remaining number of full years to the final maturity of the borrower's note. Drop all fractions of a year and use the remaining full years.

E =The published Treasury term (in years) to maturity which is the longest term to maturity for the published term that is less than the

§ 1786.154

remaining term (in years) to final maturity of the borrower's note; i.e., (if the note to be prepaid has remaining years to maturity between 11 and 20 years then this term would be 10 or if the note to be prepaid has remaining years to maturity between 21 years and 30 years then this term would be 20).

F=The published Treasury term (in years) to maturity which is the shortest term to maturity for the published term that is greater than the remaining term (in years) to maturity of the borrower's note; i.e., (if the note to be prepaid has remaining years to maturity between 11 and 20 years then this term would be 20 or if the remaining years to maturity is between 21 and 30 years then this term would be 30).

NOTE: The percentage terms used in the above formula will be truncated to two decimal places. For the purpose of the terms A, B, E, and F above the published Treasury rate and term shall mean the Treasury Constant Maturities from the Federal Reserve Statistical Release for 7 years, 10 years, 20 years, and 30 years.

(b)(1) In the event that the borrower prepays a loan under paragraph (a) of this section using, directly or indirectly, tax exempt financing, the discount shall be adjusted to ensure that the borrower receives a benefit that is no greater than the benefit the borrower would receive if the borrower used financing that was not tax exempt. The borrower shall certify in writing whether the financing will be tax exempt.

(2) The discount rate established in paragraph (a) of this section shall be adjusted for a tax exempt financing by substituting for the "I" term in the discount rate formula, a discount rate equal to the interest rate(s) published pursuant to 7 CFR 1714.5, determination of interest rates on municipal rate loans. This is the interest rate established for the new RUS loan program which is based on municipal interest rates for issues of comparable maturity. No interpolation or average will be used. If a note is to be prepaid under this subpart and is subject to this tax exempt adjustment, the discount rate will be determined from the published

7 CFR Ch. XVII (1-1-97 Edition)

table in the FEDERAL REGISTER. For example, if the note to be discounted matures in the year 1999 then the discount rate will be the interest rate for the year 1999. RUS will publish a schedule of interest rates for municipal rate loans in the FEDERAL REGISTER at the beginning of each calendar quarter. The published rates in effect eight business days prior to closing will be used for the discount rates. All notes to be prepaid that have remaining years to maturity of more than 20 years will be discounted at the interest rate in effect for new RUS municipal rate loans of comparable maturity at the time of closing.

§ 1786.154 Qualified Notes.

An eligible borrower may prepay Qualified Notes under this subpart at the discounted present value. A Qualified Note is a note evidencing an RUS electric loan, all advances of which were made prior to May 1, 1992, or not less than 2 years prior to the date of prepayment closing. See §§ 1786.155(a)(3) and 1786.158 (h) and (j).

§ 1786.155 Eligible borrower.

(a) To be eligible to prepay an electric loan under this subpart, the borrower must be in compliance with the following:

(1) The borrower shall be current on all payment obligations on outstanding loans made or guaranteed by RUS. For the purpose of determining eligibility for prepayment, a default by a power supply borrower from which a distribution borrower purchases wholesale power shall not be considered a default by the distribution borrower;

(2) There shall exist no material defaults under the borrower's RUS Loan Contract and Mortgage;

(3) The borrower shall have expended all funds advanced pursuant to the RUS Loan Contract for the purposes for which such funds were advanced. A borrower will not be eligible to prepay under this subpart if it has any funds advanced pursuant to the RUS Loan Contract in its Construction Fund Account; and

(4) The borrower shall be current on all obligations under any wholesale power contract with an RUS financed power supply borrower.

Rural Utilities Service, USDA

§1786.158

(b) The eligibility of borrowers that have had any indebtedness representing loans made or guaranteed by RUS restructured shall be determined on a case by case basis considering the terms and conditions of the restructuring agreement.

§1786.156 Application procedure.

Any borrower seeking to prepay Qualified Notes under this subpart should apply to the appropriate RUS Regional Director or the Director of the Power Supply Division. The application shall provide the following:

- (a) Borrower's RUS designation;
- (b) Borrower's name and address;
- (c) A certified copy of a resolution of the board of directors of the borrower that the borrower wishes to enter into a prepayment agreement providing for the prepayment of all or a portion of its Qualified Notes;
- (d) Listing of each Qualified Note to be prepaid by loan designation, RUS account number, advance date, maturity date, original amount, and outstanding principal balance;
- (e) Evidence that the borrower has the ability to obtain the financing necessary to prepay its Qualified Notes listed in paragraph (d) of this section and identification of the source of financing and the need if any of obtaining a lien accommodation from RUS; and
- (f) Such additional information as the Administrator may request.

§1786.157 Approval of applications.

- (a) Ordinarily, within 30 days of receipt, an application will be reviewed and the borrower will be notified as to whether the application has been approved. If the application has not been approved, the borrower will be informed as to the reasons. If the application is approved the borrower shall thereafter be provided with a prepayment agreement for execution.
- (b) The Administrator may limit the number of applications approved and closings scheduled from time to time, taking into account, among other matters, administrative considerations of the RUS.

§1786.158 Terms and conditions of prepayment agreement.

Upon receipt of a satisfactory application, RUS shall provide to the borrower for its execution a prepayment agreement, in form and substance satisfactory to RUS, which may include the following:

- (a) Provide for the prepayment of one or more Qualified Notes from time to time, but no more than two closings may be scheduled in any calendar year unless a third closing is for the prepayment of all outstanding electric loans of the borrower;
- (b) Set forth procedures and forms through which the borrower will notify the Government of each election it makes to prepay certain Qualified Notes upon a requested closing date and the Government will notify the borrower of the established closing date and prepayment amount for the Qualified Notes for each closing;
- (c) Reserve to the Administrator the right to reschedule closing dates to meet administrative considerations;
- (d) Set forth closing requirements identifying the location and manner of payment, and all documentation and information to be delivered prior to or at closing, including opinions of counsel and certificates from the borrower;
- (e) Provide for notice by either telephone or facsimile to be given by RUS to the borrower not more than 8 nor less than 3 business days before a scheduled closing date of the amount to be paid at closing which shall include all accrued interest and the discounted present value of the Qualified Notes to be prepaid;
- (f) Provide for notice of the 120 month period during which the borrower's eligibility for direct or insured loans will be restricted;
- (g) Set forth representations and warranties;
- (h) Require the borrower to prepay each Qualified Note specified in full;
- (i) Require the borrower to identify the source of the financing that will be used directly or indirectly to refinance the Qualified Notes. If the source is other than internally generated funds, the borrower must certify in writing whether such financing will be tax exempt, and if tax exempt financing will be used, furnish all information on the

§ 1786.159

terms and conditions of the financing as RUS may require;

(j) Require the borrower to rescind the unadvanced balance of all outstanding electric loans as of the date of initial closing;

(k) Require the borrower, if it is a party to a wholesale power contract with a power supply borrower, to provide the Administrator with such assurances as the Administrator may require that it is in compliance with and will continue to comply with its obligation to such power supply borrower;

(l) Provide RUS, if the Administrator determines it necessary, with security for all outstanding rural development loans and amendments to any outstanding rural development loan agreements in form and substance, and on terms and conditions, satisfactory to RUS;

(m) Prescribe remedies for violating the terms and conditions of the prepayment agreement;

(n) Provide for termination by RUS of the right for the borrower to prepay thereunder;

(o) Provide evidence that any approvals required from any supplemental lender have been obtained; and

(p) Set forth such other terms and conditions as the Administrator shall deem appropriate.

§ 1786.159 Initial closing.

(a) Upon receipt of the prepayment agreement, the borrower may submit, pursuant to the terms of the prepayment agreement, a closing request which shall request a closing date no less than 30 business days from the date of the request.

(b) The Government will respond to the borrower's closing request by delivering a preclosing notice to the borrower not less than 10 business days prior to the date which the Government, after reviewing the borrower's closing request, selects as a closing date.

§ 1786.160 Subsequent closings.

(a) Each subsequent prepayment after the initial closing shall be facilitated with the submission of an additional closing request by the borrower. Each closing request must request a

7 CFR Ch. XVII (1–1–97 Edition)

closing date no less than 30 business days from the date of the request.

(b) The Government will respond to each subsequent closing request by delivering a preclosing notice to the borrower not less than 10 business days prior to the date which the Government, after reviewing the borrower's closing request, selects as a closing date in each case.

§ 1786.161 Return of Qualified Notes and release of lien.

Upon payment to RUS at closing of the full amount specified in the notice delivered by RUS to the borrower pursuant to the terms of the prepayment agreement (see § 1786.158(e)), RUS will deliver to the borrower at closing those Qualified Notes which have been paid in full at such closing, and upon payment and discharge of all outstanding RUS debt obligations by the borrower, RUS will deliver to the borrower at the final closing a release of lien prepared by the borrower pursuant to the terms of the prepayment agreement.

§ 1786.162 Outstanding loan documents.

(a) Except as expressly provided in this subpart, the borrower shall comply with all provisions of its RUS Loan Contract, its outstanding notes issued to RUS, and the RUS Mortgage.

(b) Nothing in this subpart shall affect any rights of supplemental lenders under the RUS Mortgage, or other creditors of the borrower.

(c) Nothing in this subpart shall prohibit a borrower from making prepayments of any loans pursuant to the RE Act in accordance with the terms of such loans.

§ 1786.163 Existing wholesale power contracts.

(a) If the borrower is a party to a wholesale power contract with a power supply borrower financed pursuant to the RE Act, the Administrator may require that the borrower and the power supply borrower enter into a supplement to the outstanding wholesale power contract providing substantially as follows:

Rural Utilities Service, USDA

§ 1786.166

SAMPLE CONTRACT TERMS

So long as any of the notes evidencing secured loans of the power supply borrower are outstanding, the borrower will not, without the approval in writing of the power supply borrower and the Administrator, take or suffer to be taken any steps for reorganization or dissolution, or to consolidate with or merge into any corporation, or to sell, lease or transfer (or make any agreement therefor) all or a substantial portion of its assets, whether now owned or hereafter acquired. The power supply borrower will not unreasonably withhold or condition its consent to any such, reorganization, dissolution, consolidation, or merger, or to any such sale, lease or transfer (or any agreement therefor) of assets. The power supply borrower will not withhold or condition such consent except in cases where to do otherwise would result in rate increases for the other members of the power supply borrower or impair the ability of the power supply borrower to repay its secured loans in accordance with their terms, or adversely affect system performance in a material way. Notwithstanding the foregoing, the borrower may take or suffer to be taken any steps for reorganization or dissolution or to consolidate with or merge into any corporation or to sell, lease or transfer (or make any agreement therefor) all or a substantial portion of its assets, whether now owned or hereafter acquired without the power supply borrower's consent, so long as the borrower shall pay such portion of the outstanding indebtedness on the power supply borrower's notes or other obligations as shall be determined by the power supply borrower with the prior written consent of the Administrator and shall otherwise comply with such reasonable terms and conditions as the Administrator and power supply borrower may require either: (1) To eliminate any adverse effect that such action seems likely to have on the rates of the other members of the power supply borrower, or

(2) To assure that the power supply borrower's ability to repay the secured loans and other obligations of the power supply borrower in accordance with their terms is not impaired.

The Administrator may require, among other things, that any payment owed under (2) of the preceding sentence that represents a portion of the power supply borrower's indebtedness on Notes shall be paid by the borrower in the manner necessary to accomplish a defeasance of those obligations in accordance with the loan documents relating thereto, or be paid directly to the holders of the Notes for application by them as prepayments in accordance with the provisions of such documents, or be paid to the power supply borrower and held and invested in a manner satisfactory to the Administrator.

[End of sample contract terms]

(b) The Administrator may exempt a borrower from the requirement to enter into a supplement to its outstanding wholesale power contract if the Administrator determines that such requirement is burdensome and unnecessary in light of the provisions of the existing wholesale power contract, other security arrangements of the power supply borrower, and any other relevant facts and circumstances. Normally such exemption will be granted only with the concurrence of the power supply borrower.

§ 1786.164 Loan fund audit.

In the event that a borrower shall prepay all its outstanding electric loans RUS shall have the right to audit within six (6) months of closing transactions involving the RUS Construction Fund Account established and maintained by the borrower pursuant to the terms of the RUS Loan Contract and to inspect all books, records, accounts, and other documents and papers of the borrower. Should RUS determine that the borrower has made disbursements of funds advanced pursuant to the RUS Loan Contracts which do not comply with the requirements thereof, the borrower shall be required to pay the RUS an amount equal to the difference between the amount which the borrower prepaid under this subpart with respect to such advances, and the amount which the borrower would otherwise have been required to return to the RUS as a result of noncompliance if the borrower had not prepaid such advances, plus interest. (See 7 CFR part 1721, Post-Loan Policies and Procedures for Insured Electric Loans.)

§ 1786.165 Reporting.

Borrowers that no longer have any loans made or guaranteed by RUS and are considering applying for other financial assistance pursuant to the RE Act are encouraged to file the end-of-year operating report, RUS Form 7.

§ 1786.166 Approvals.

The borrower shall be responsible for obtaining all approvals necessary to consummate the transaction as required by the prepayment agreement,

§ 1786.167

7 CFR Ch. XVII (1–1–97 Edition)

including such approvals as may be required by regulatory bodies and other lenders.

§ 1786.167 Restrictions to additional RUS financing.

(a) No borrower that prepays an electric loan at a discount as provided under this subpart may apply for or receive direct or insured loans during the 120 months from the most recent closing date, except at the discretion of the Administrator. During the 120 month period the Administrator may consider providing an insured loan if, among other matters, it is necessary to assure repayment of, or protect the Government's security for any outstanding loans or loan guarantees, or the borrower's system has suffered severe physical plant related damage due to conditions beyond its control and the borrower is unable to obtain financing at reasonable terms to restore the system from non-RUS sources, including the Federal Emergency Management Agency, and from private sources. Upon expiration of the 120 months, such borrowers may apply for direct or insured loans in the same manner as other borrowers provided that such borrowers may not apply for direct or insured loans for facilities, construction of which commenced prior to the expiration of the 120 months. Special provisions for mergers involving a borrower that has prepaid pursuant to this subpart are in 7 CFR 1717.158.

(b) Borrowers that prepay their direct or insured RUS loans under this subpart remain eligible for certain types of financial assistance under the RE Act, including loan guarantees and rural development loans.

[59 FR 13620, Mar. 22, 1994, as amended at 61 FR 66874, Dec. 19, 1996]

EFFECTIVE DATE NOTE: At 61 FR 66874, Dec. 19, 1996, § 1786.167 was amended by adding a sentence at the end of paragraph (a), effective Jan. 21, 1997.

§ 1786.168 Borrowers who prepaid under this part prior to October 21, 1992.

(a) A borrower that had prepaid, prior to the date of enactment of Public Law 102-428 (106 Stat. 2183) on October 21, 1992, at a discount rate as provided at 7 CFR part 1786, subpart C:

(1) Shall not be eligible except at the discretion of the Administrator as stated in paragraph § 1786.167(a), to apply for or receive direct or insured loans during the 180-month period beginning on the date of the prepayment; and

(2) Shall not be eligible to apply for or receive direct or insured loans from RUS until the borrower has repaid to the RUS the sum of:

(i) The amount (if any) by which the discount the borrower received by reason of the prepayment exceeds the discount the borrower would have received had the discount been based on the cost of funds to the Department of the Treasury as calculated at § 1786.153 at the time of the prepayment; and

(ii) Interest on the amount described in paragraph (a)(2)(i) of this section for the period beginning on the date of the prepayment and ending on the date of the repayment, at a rate equal to the average annual cost of borrowing by the Department of the Treasury. This rate will be calculated first on the date of prepayment and at one year intervals from that date based on the same U.S. Treasury issues published in the Federal Reserve Statistical Release closest to that date. The Treasury rate of interest to be applied for each year will be the rate for the Treasury issue of comparable maturity to the number of years from the prepayment date to the repayment date and at one year intervals thereafter.

(b) If a borrower and the Administrator have entered into an agreement with respect to a prepayment occurring before October 21, 1992, this section shall supersede any provision in the agreement relating to the restoration of eligibility for loans under the RE Act.

(c) Borrowers who prepaid prior to October 1, 1987, are eligible for assistance under the RE Act in the same manner as other borrowers with respect to loan guarantees and the rural development loans.

(d) During the 180 month period described in paragraph (a)(1) of this section the Administrator may consider providing an insured loan, if the conditions described in § 1786.167(a) exist.

(e) Borrowers may not apply for direct or insured loans for facilities, construction of which commenced prior to

Rural Utilities Service, USDA

§1786.201

the expiration of the 180 month period described in paragraph (a)(1) of this section.

§1786.169 Liability.

It is the intent of this subpart that any failure on the part of RUS to comply with any provisions of this subpart, including without limitation, those provisions setting forth specified timeframes for action by RUS on applications for prepayments or closing requests, shall not give rise to liability of any kind on the part of the Government or any employees of the Government including, without limitation, liability for damages, fees, expenses or costs incurred by or on behalf of a borrower, private lender or any other party.

§1786.170 Prepayment of loans approved after December 20, 1993. [Reserved]

§§1786.171—1786.199 [Reserved]

Subpart G—Refinancing and Prepayment of RUS Guaranteed FFB Loans Pursuant to Section 306(c) of the RE Act

AUTHORITY: 7 U.S.C. 901 *et seq.*; Pub. L. 103–354, 108 Stat. 3178 (7 U.S.C. 6941 *et seq.*); sec. 1201(b) of subtitle B of title 1 of Pub. L. 103–66, 107 Stat. 312.

SOURCE: 58 FR 51008, Sept. 30, 1993, unless otherwise noted.

§1786.200 Purpose.

This subpart sets forth the policies and procedures of RUS through the existing FFB program, whereby borrowers may prepay and refinance, outstanding FFB Notes evidencing electric or telephone loans with FFB, pursuant to the provisions of section 306(C) of the RE Act as added by Public Law 103–66, 107 Stat. 312, enacted August 10, 1993.

§1786.201 Definitions and rules of construction.

(a) *Definitions.* As used in this subpart:

Administrator means the Administrator of the Rural Utilities Service (RUS).

Borrower means any organization which has an outstanding note(s) evidencing electric or telephone loans guaranteed by RUS, from FFB.

Business day means any such day on which both the Federal Financing Bank and Federal Reserve Bank—New York are open for business.

Electric loan means a loan made by FFB and guaranteed by RUS under section 306 of the RE Act for electric service.

FFB means the Federal Financing Bank, an instrumentality and wholly owned corporation of the United States.

Government means the United States of America, acting through the Administrator of the Rural Utilities Service.

Loan guarantee means RUS's guarantee under section 306 of the RE Act of a loan from FFB.

Payment date means the date that payment is due and is the last day in a calendar quarter.

Prepayment penalty means the same as prepayment premium.

Prepayment premium shall have the meaning set forth at §1786.207.

RE Act means the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 *et seq.*).

REA means the Rural Electrification Administration formerly an agency of the United States Department of Agriculture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs.

Refinancing note shall have the meaning set forth at §1786.206.

RUS means the Rural Utilities Service, an agency of the United States Department of Agriculture established pursuant to Section 232 of the Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994 (Pub. L. 103–354, 108 Stat. 3178), successor to REA with respect to administering certain electric and telephone programs. See 7 CFR 1700.1.

RUS loan contract means the agreement, as amended, supplemented, or restated from time to time, between a borrower and RUS providing for loans or loan guarantees pursuant to the RE Act.

§ 1786.202

RUS mortgage means collectively those mortgages and security agreements made by and between the borrower and the Government, securing indebtedness evidencing electric and telephone loans or loan guarantees made pursuant to RE Act. The term includes such mortgages regardless whether third parties are mortgagees with RUS.

Supplemental lender means a private lender whose loan to the borrower is secured under an RUS mortgage.

Telephone loan means a loan made by FFB and guaranteed by RUS under section 306 of the RE Act for telephone service.

(b) *Rules of construction.* Unless the context shall otherwise indicate, the terms defined in paragraph (a) of this section include the plural as well as the singular, and the singular as well as the plural. The words “herein,” “hereof” and “hereunder”, and words of similar import, refer to this subpart as a whole.

[58 FR 51008, Sept. 30, 1993, as amended at 59 FR 66440, Dec. 27, 1994]

§ 1786.202 Prepayment and refinancing of RUS guaranteed FFB loans.

The borrower of an electric or telephone loan made by the FFB and guaranteed by RUS under section 306 of the RE Act may, at the option of the borrower, refinance or prepay a loan or an advance on the loan, or any portion of the loan or advance in accordance with section 306C of the RE Act, after meeting certain conditions using the procedures prescribed in the note. After refinancing existing notes under this section, additional prepayments or refinancings will be governed by the terms of the refinancing note(s).

§ 1786.203 Special considerations.

Generally all FFB borrowers with loans guaranteed by RUS whose FFB notes have not been accelerated are eligible to prepay or refinance under this part. All requests for prepayment or refinancing will be processed in accordance with this subpart except that some requests for refinancing and prepayments are more complicated and thus will involve special considerations. These requests will have to be

7 CFR Ch. XVII (1–1–97 Edition)

handled on a case by case basis and include:

(a) Telephone borrowers who are required to meet certain terms of their indenture;

(b) Borrowers who have amended their old form note or have already repriced prior to September 30, 1993;

(c) Borrowers that have been involved in a merger or consolidation;

(d) Borrowers whose obligations to RUS, FFB notes, or security instruments differ from those normally used;

(e) A request to prepay or refinance an amount of less than \$100,000 or an amount of less than the full amount of an advance outstanding; or

(f) A request to prepay or refinance a note that includes unadvanced loan funds.

§ 1786.204 Limitations.

(a) No more than three refinancing notes will be executed for any borrower per calendar year.

(b) The borrower may not select a term for the refinanced advance that ends after the maturity date set for that advance.

§ 1786.205 Application procedure.

(a) Any borrower seeking to prepay or refinance an advance from the FFB under this subpart should apply by letter to the appropriate RUS Regional Director or, in the case of power supply borrowers, to the Director of the Power Supply Division. The borrower will be required to submit applications and elections in a digital format to be supplied by RUS. The application letter shall provide the following:

(1) Borrower's RUS designation;

(2) Borrower's name and address;

(3) Listing of each note to be prepaid by loan designation, RUS note number, RUS account number, advance date, maturity date, original amount, outstanding balance, and date(s) of any substitute FFB note(s) amending the original FFB Note;

(4) A statement of the borrower's intention to finance the premium by an addition to principal balance or to pay the premium in cash or with unsecured debt;

(5) A statement of the maturity options that the borrower wishes to select;

Rural Utilities Service, USDA

§ 1786.207

(6) Such additional information as the Administrator may request.

(b) Requests for refinancing or prepayment will ordinarily be processed in the order that they are received. Borrower's may withdraw an application by notifying the appropriate RUS office in which they filed the application.

(c) When the request for prepayment or refinancing is approved for processing the borrower will be provided with appropriate instructions, documents and forms which may include but are not limited to the following:

- (1) An FFB refinancing note;
- (2) Resolution of Board of Directors;
- (3) Legal Opinion;
- (4) Certificate of Secretary;
- (5) Waiver of Notice;
- (6) Notice to borrower electing an effective date other than a scheduled quarterly payment date (if applicable);
- (7) Documentation of obligations secured pursuant to section 1786.208 if any; and
- (8) Security instrument.

(Approved by the Office of Management and Budget under control number 0572-0032)

§ 1786.206 Refinancing note.

(a) RUS will issue a replacement guaranty for refinancing notes delivered to FFB to replace and substitute for existing FFB notes in connection with any refinancing by FFB pursuant to section 306C of the RE Act.

(b) Generally, refinancing notes will, to the extent practicable, consolidate all of a borrower's existing FFB notes which have been guaranteed by RUS and containing terms and conditions as FFB may require and RUS and the borrower may accept.

(c) Notwithstanding any contrary provision contained in this subpart, RUS will give preference to processing refinancings that utilize a generic form of refinancing note in the event that FFB prescribes one.

[58 FR 51008, Sep. 30, 1993; 58 FR 58729, Nov. 3, 1993]

§ 1786.207 Prepayment premium.

(a) A premium shall be assessed against a borrower that refinances or prepays a loan or loan advance, or any portion of a loan or advance, under this section. RUS will collect the prepay-

ment premium as calculated by FFB. FFB will calculate this premium as described in this section. Except as provided in paragraph (b) of this section, the premium shall be equal to the lesser of:

(1) The difference between the outstanding principal balance of the loan being refinanced and the present value of the loan discounted at a rate equal to the then current cost of funds to the Department of the Treasury for obligations of comparable maturity to the loan being refinanced or prepaid;

(2) 100 percent of the amount of interest for 1 year on the outstanding principal balance of the loan or loan advance, or any portion of the loan or advance, being refinanced, multiplied by the ratio that:

(i) The number of quarterly payment dates between the date of the refinancing or prepayment and the maturity date for the loan advance; bears to

(ii) The number of quarterly payment dates between the first quarterly payment date that occurs 12 years after the end of the year in which the amount being refinanced was advanced and the maturity date of the loan advance; and

(3)(i) The present value of 100 percent of the amount of interest for 1 year on the outstanding principal balance of the loan or loan advance, or any portion of the loan or advance, being refinanced or prepaid; plus

(ii) For the interval between the date of the refinancing or prepayment and the first quarterly payment date that occurs 12 years after the end of the year in which the amount being refinanced or prepaid was advanced, the present value of the difference between:

(A) Each payment scheduled for the interval on the loan amount being refinanced or prepaid; and

(B) The payment amounts that would be required during the interval on the amounts being refinanced or prepaid if the interest rate on the loan were equal to the then current cost of funds to the Department of the Treasury for obligations of comparable maturity to the loan being refinanced or prepaid.

(b)(1) Except as provided in paragraph (b)(2) of this section, the premium provided by paragraph (a)(1) of

§ 1786.208

this section shall be required for refinancing or prepayment under this section.

(2) In the case of a loan advanced under an agreement that permits the refinancing or prepayment of the loan advance based on the payment of 1 year of interest on the outstanding principal balance of the loan advance, a borrower may, in lieu of the premium required by paragraph (a)(1) of this section, pay a premium as provided by:

(i) Paragraph (a)(2) of this section, if the loan advance has reached the 12-year maturity required under the loan agreement for the refinancing or prepayment; or

(ii) Paragraph (a)(3) of this section, if the loan advance has not reached the 12-year maturity required under the loan agreement for the refinancing or prepayment.

§ 1786.208 Increased principal.

A borrower can meet the premium requirements by increasing the outstanding principal balance of the loan advance that is being refinanced. If it does so the borrower shall make a payment at the time of the refinancing equal to 2.5 percent of the amount of the premium that is added to the outstanding principal balance of the loan.

§ 1786.209 Outstanding loan documents.

(a) Except as expressly provided in this subpart, the borrower shall comply with all provisions of its RUS loan contract, its outstanding notes issued to RUS, and the RUS mortgage.

(b) Nothing in this subpart shall affect any rights of supplemental lenders under the RUS mortgage or the rights of any other creditors of the borrower.

(c) Nothing in this subpart shall prohibit a borrower from making prepayments on any loans pursuant to the RE Act in accordance with the terms thereof or as may be otherwise permitted by law.

§ 1786.210 Approvals.

The borrower shall be responsible for obtaining all approvals necessary to consummate the transaction as required by the refinancing note, including such approvals as may be required by regulatory bodies and other lenders.

SOURCE: 51 FR 25855, July 17, 1986, unless
otherwise noted.

Subpart A—General Policies and Procedures

§ 1788.1 General.

This part sets forth general Rural Utilities Service (RUS) policy and requirements for minimum insurance and fidelity coverage for electric and telephone borrowers and provides information for borrowers to meet those requirements.

§ 1788.2 Policy.

(a) *Specific coverages required.* RUS mortgage provisions require that borrowers procure specific minimum insurance and fidelity coverage and that they maintain this coverage as long as the loan or guaranteed loan remains unpaid.

(b) *Evidence of coverage.* Borrowers shall furnish RUS satisfactory evidence that required insurance and fidelity coverage is being continuously maintained.

(c) *Excess coverage.* Borrowers may purchase insurance or fidelity coverage in excess of the RUS requirements.

(d) *Borrower responsibility.* Procurement of insurance and fidelity coverage is the primary responsibility of the borrower.

(1) The borrower shall purchase required coverages from companies of the borrower's choice, provided the companies selected are licensed to do business in the state, or states, in which the borrower operates.

(2) The required insurance and fidelity bond coverage shall be in accordance with acceptable insurance industry types of bonds and policies.

(3) If a borrower fails to purchase or maintain the required insurance and fidelity coverages, the mortgagees may place required insurance and fidelity coverage on behalf and in the name of the borrower. The borrower shall pay the cost of this coverage, as provided in the loan documents.

(e) *Losses not covered.* In the event of a loss not covered because of a deductible provision in an insurance policy, the borrower should treat the loss as an expense in the year in which it occurs if provision has not been made for such losses in an insurance reserve account. If an insurance reserve has been established, the amount of the loss should be charged directly against that account. Ordinarily, losses not covered because of a deductible provision can be absorbed as current operating costs. A reserve account may be established to provide for losses which would be excluded because of a deductible and the following guidelines are recommended:

(1) The reserve balance at any one time should not exceed the total of the deductibles in the borrower's insurance policies.

(2) The annual credit to the reserve account should not exceed one-tenth of the maximum reserve balance, as set forth above, or a lesser amount needed to maintain the reserve at the maximum level.

(3) No reserve should be considered for losses to outside plant or for other coverages not required by RUS.

(4) Accounts used for such reserves shall be as specified in the applicable Uniform System of Accounts.

§ 1788.3 Certification of insurance coverage.

Borrowers shall furnish written evidence to RUS within sixty (60) days of the close of each calendar year stating that during such year all insurance required by this part 1788 was in force and renewals have been obtained for all policies. The annual certification will be subject to audit verification.

§ 1788.4 New borrowers' procedure.

New borrowers shall furnish RUS, by letter, a schedule of their insurance policies in force, showing the name of the insurance company, specific type of policy, policy number, expiration date,

§ 1788.5

and the amounts of coverage. In the case of fire insurance policies, new borrowers shall specify amounts of coverage (building, contents) and a complete description of the locations. For workers' compensation, in those states where a state agency administers the workers' compensation fund, new borrowers shall provide the file or account number in lieu of a policy number.

§ 1788.5 RUS endorsement required.

(a) Each insurance policy, other than fidelity bonds or policies, purchased by borrowers to meet the requirements of RUS shall contain the following RUS Endorsement:

The insurer agrees with the Rural Utilities Service as follows:

1. That this endorsement forms a part of the original policy.
2. Changes in policy forms or endorsements, as a result of approval by a regulatory authority, will be submitted to the Rural Utilities Service prior to use for a borrower of said Administration.
3. That it will mail to said Administration, at least 10 days before the effective date thereof, notice of cancellation or termination of said policy.
4. That each endorsement subsequently issued will become a part of said original policy.

(b) When the RUS Borrower is a subsidiary of a parent corporation, RUS requires the following endorsement for policies covering subsidiary companies be included as a part of each public liability and fire policy.

The Insurer agrees with the Rural Utilities Service, as follows:

1. That this endorsement forms a part of the original policy.
2. Changes in policy forms or endorsements, as a result of approval by a regulatory authority, will be submitted to the Rural Utilities Service prior to use for a borrower of said Administration.
3. That it will mail to said Administration, at least ten days before the effective date thereof, notice of cancellation or termination of said policy, or cessation of coverage for any reason or any affiliate or subsidiary of the assured which is a borrower from the administration.
4. That each endorsement subsequently issued will become a part of said original policy.

(c) In the case of a cooperative or mutual organization, RUS requires that the following: "Endorsement

7 CFR Ch. XVII (1-1-97 Edition)

Waiving Immunity From Tort Liability" be included as a part of each public liability, owned, nonowned, hired automobile, and aircraft liability, employers' liability policy, and boiler policy:

The Insurer agrees with the Rural Utilities Service that such insurance as is afforded by the policy applies subject to the following provisions:

1. The company agrees that it will not use, either in the adjustment of claims or in the defense of suits against the Insured, the immunity of the Insured from tort liability, unless requested by the Insured to interpose such defense.
2. The Insured agrees that the waiver of the defense of immunity shall not subject the company to liability of any portion of a claim, verdict or judgment in excess of the limits of liability stated in the policy.
3. The company agrees that if the Insured is relieved of liability because of its immunity, either by interposition of such defense at the request of the Insured or by voluntary action of a court, the insurance applicable to the injuries on which such suit is based, to the extent to which it would otherwise have been available to the Insured, shall apply to officers and employees of the Insured in their capacity as such; provided that all defenses other than immunity from tort liability which would be available to the company but for said immunity in suits against the Insured or against the company under the policy shall be available to the company with respect to such officers and employees in suits against such officers and employees or against the company under the policy.

§ 1788.6 Analysis of deductibles.

When deductibles are considered, careful analysis should be given to the size of the deductible and its effect on the financial position of the borrower. A periodic review should be made of the policy to determine the economy and advisability of continuing the deductible.

§ 1788.7 Specialized requirements.

Borrowers with specialized requirements or equipment, such as nuclear facilities, private generation connection, hydro, solar, wind, watercraft, and aircraft, or who do not operate their own systems, will be advised of RUS insurance requirements in each specific case.

Rural Utilities Service, USDA

§ 1788.18

§ 1788.8 Procedure for fidelity notices and claims.

Upon discovery by the borrower or RUS of any fraudulent or dishonest act of any officer, employee, or collection agent, the borrower shall notify the bonding company of such discovery promptly in writing. Such notice, a copy of which shall be sent immediately to RUS and each supplemental lender, shall be given on behalf of both the borrower and RUS. If a proof of loss is filed, it shall also be filed on behalf of both the borrower and RUS. A copy of the proof of loss, if any, shall be sent immediately to RUS and each supplemental lender by the borrower.

§ 1788.9 Recovering claims.

The borrower shall, when necessary to protect all rights under the fidelity bond, initiate suit against the insurance company to recover all claims.

§ 1788.10 Reporting accidents.

Borrowers shall promptly provide the insurance company providing coverage a written report of all accidents involving injury to persons, damage to the property of others, or direct damage to the insured property of the borrower and forward at the same time a copy of all reports except those involving only employees of the borrower to RUS and each supplemental lender.

§ 1788.11 Reporting claims to RUS.

The borrower shall furnish RUS and each supplemental lender a copy of any claim submitted to an insurance company seeking recovery of loss for damage or destruction of property.

§ 1788.12 Use of insurance proceeds.

In the event of damage, loss, or destruction of property mortgaged to the government covered by insurance, the borrower shall repair or replace the damaged, lost, or destroyed property so that the property is in substantially the same condition as before the damage, loss, or destruction. Unless mortgagees direct otherwise, the proceeds of the insurance shall be used for that purpose.

§ 1788.13 Package-type policies.

RUS recommends that borrowers secure broad form, package-type policies (special multi-peril, combined fire, and boiler), when possible, combining all or as many as many as possible of the various coverages into a single policy to reduce the number of policies issued by individual insurance companies and to avoid any question between the insurance companies about responsibility.

§ 1788.14 Obtaining minimum cost.

Borrowers should request proposals from several companies, both stock and mutual, for initial and renewal of insurance policies to obtain a minimum cost for their insurance. Borrowers should maintain an accurate loss record for all insurance coverages to establish trends and evaluate the effect of losses on premiums.

§ 1788.15 Type of policies.

RUS recommends term policies, either 1- or 3-years, for insuring buildings, contents, stock, and equipment and reporting policies for insuring fluctuating material inventories.

§ 1788.16 Telephone building rates.

Telephone borrowers should investigate the possibility of having the building fire rate applied to both the buildings and contents in those states that permit the single rate. Buildings and contents coverages should be combined in the same policy.

§ 1788.17 Coinsurance recommended.

RUS recommends coinsurance where it is available. In accepting a policy with a coinsurance clause, the insured agrees to maintain insurance in an amount equal to at least a percentage of the actual cash value stated in the coinsurance clause.

§ 1788.18 Advantageous fire rates.

To eliminate delays and costly alterations, and to secure the most advantageous fire rates for buildings (generation plants, headquarters buildings, etc.) borrowers should have plans and specifications for buildings reviewed by the state fire rating bureau, the insurance agent of record, or competent,

§ 1788.19

independent consultant for their recommendations.

Subpart B—Specific RUS Minimum Requirements

§ 1788.19 General.

This subpart sets forth specific RUS minimum requirements for insurance and fidelity coverages for electric and telephone borrowers.

§ 1788.20 Officers and employees.

Borrowers shall provide fidelity coverage for each officer and employee based on the estimated annual gross revenue of the borrower.

§ 1788.21 Types of coverage.

A new Commercial Crime Policy came into use January 1, 1986. This new policy form should be used in lieu of the Blanket Position Bond or Comprehensive 3D policies.

Under this Commercial Crime Policy the amounts of coverage required are as follows:

Annual gross revenue	Amounts of coverage
Less than \$200,000	\$50,000
\$200,001 to 400,000	100,000
400,001 to 600,000	250,000
600,001 to 800,000	300,000
800,001 to 1,000,000	400,000
1,000,001 and over	500,000

The Rural Utilities Service Endorsement, Exhibit A, is necessary on all separate policies or where the fidelity coverage is added to a package policy. For a municipal borrower, a public employees' blanket bond covering employees and officers responsible for activities of the RUS-financed facilities is acceptable.

§ 1788.22 Collection agents.

Each collection agent of the borrower shall be included in the bond for not less than \$2,500, or 10 percent of the highest amount collected annually by any one collection agent, whichever is greater. When banks are designated as collection agents, borrowers shall advise RUS regarding any special arrangements for fidelity coverage.

When annual gross revenues for a previous twelve-month period exceed the limit for the amount of fidelity

7 CFR Ch. XVII (1–1–97 Edition)

coverage maintained, the borrower shall increase the coverage to the required amount.

§ 1788.23 When revenues exceed \$1 million.

When annual gross revenues exceed \$1 million, RUS recommends that borrowers obtain additional excess fidelity insurance.

§ 1788.24 Single bond provisions.

When the borrower is one of several affiliated companies and this coverage is provided by naming the borrower as one of several insureds under a single policy, the joint insured paragraph under general or insuring agreements shall be amended to include the provisions of the fidelity rider in exhibit B.

§ 1788.25 Responsibilities of borrowers.

(a) *Termination of fidelity coverage.* The new Comprehensive Crime Policy provides for fidelity coverage on a term basis. Borrowers should renew on a timely basis.

(b) *Effect of fraudulent or dishonest acts.* Upon discovery by the borrower or RUS of an fraudulent or dishonest act of any officer or employee, fidelity coverage for this person is automatically cancelled, but remains in effect for all other officers and employees not in collusion with this person. Therefore, borrowers must notify their fidelity insurer of the discovery.

(c) *Effect of borrower's inaction.* Upon discovery of a dishonest act, the borrower's inaction, by its failure to report such acts, whether motivated by restitution or the apparent insignificance of the amount involved, or for any other reason, can affect more than merely the validity of the present claim; it may bar some future loss of real significance caused by the same person.

(d) *Avoiding future risks.* To avoid this risk of future uninsured loss, the borrower shall obtain written assurance of continued coverage for that individual by the same or another bonding company.

(e) *Disclosure of dishonest acts.* Assurance of continued coverage, to be effective, requires the borrower to make full disclosure to the bonding company

Rural Utilities Service, USDA

§ 1788.33

of the dishonest or fraudulent acts. This disclosure, however, need not be of the same degree required to establish a claim under a proof of loss or conviction of a false report violation.

§ 1788.26 Disbursement of recovered sums.

Sums recovered under any fidelity bond by the borrower for a loss of funds advanced under the notes or recovered by the government for any loss under such bond shall, unless otherwise directed by the mortgagees, be applied to the prepayment of indebtedness pro rata on the notes secured by the mortgage or to construct or acquire facilities, approved by the mortgagees, which will become part of the mortgaged property.

§ 1788.27 Requirements of coverage.

Workers' compensation and employers' liability insurance covering all employees of the borrower shall be maintained by borrowers in amounts required by law. If the borrower or any of its employees is not subject to the workers' compensation laws of the state, or states, in which the borrower conducts its operations, then its workers' compensation policy shall provide voluntary compensation coverage to the same extent as though the borrower and its employees were subject to such laws. The policy shall include:

- (a) Occupational disease liability.
- (b) Employers' liability insurance.
- (c) "Additional medical" coverage of not less than \$10,000 in those states where full medical coverage is not statutory.

When employers' liability insurance is provided by a separate policy issued to a cooperative or mutual organization, it shall include "Endorsement Waiving Immunity From Tort Liability." See 1788.5(c).

§ 1788.28 Limits required.

RUS requires that public liability insurance be maintained covering the ownership liability and all operations of the borrower with limits for bodily injury or death of not less than \$1 million each occurrence—\$1 million aggregate per policy period and with limits for property damage of not less than \$1 million per occurrence and \$1 million

aggregate for the policy period. Borrowers have the option to purchase a \$1 million single limit coverage for bodily injury and property damage. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

§ 1788.29 Contractual liability insurance.

Contractual liability insurance shall be included as part of the public liability policy when the borrower executes an agreement or contract in which it assumes additional liability. The provisions of any "hold harmless" agreement should be referred to the borrower's insurance company for specific references in the policy.

§ 1788.30 Provision on explosives.

When explosives are used by employees of the borrower, the property damage exclusion clause for blasting shall be deleted.

§ 1788.31 Buried plant provision.

Borrowers contemplating construction of buried plant shall immediately obtain an endorsement from their insurance carrier deleting the exclusion in the standard public liability insurance policy which provides that the policy does not apply to injury to, or destruction of, wires, pipes, conduits, mains, sewers, or other similar property below the surface of the ground if the injury or destruction is caused by, or occurs during, the use of mechanical equipment for the purpose of excavating or drilling. For electric borrowers the rating classification includes this coverage automatically.

§ 1788.32 Appliance sales coverage.

When there are retail sales, repair, or installations of electrical appliances involved in borrowers' operations, borrowers shall purchase product liability damage.

§ 1788.33 Railroad right-of-way exclusion.

General liability policies in use contain a restriction pertaining to easement agreements involving construction on or adjacent to a railroad which are not automatically covered. Where

§ 1788.34

construction is on a railroad right-of-way under an easement, borrowers shall purchase a general liability policy that specifically includes this necessary insurance coverage.

§ 1788.34 Pollution exclusion.

Liability policy forms exclude coverage for “bodily injury” or “property damage” arising out of the actual, alleged or threatened discharge, dispersal, release or escape of pollutants. Borrowers may wish to discuss this exclusion with their insurance companies.

§ 1788.35 Liability requirements.

RUS requires borrowers have liability insurance on all motor vehicles, trailers, semitrailers, and aircraft used in the conduct of the borrower’s business, whether owned, nonowned, or hired by the borrower, with bodily injury limits of not less than \$1 million for each person and \$1 million for each occurrence, and property damage limits of \$1 million for each occurrence; in connection with aircraft liability, also passenger bodily injury limits of \$1 million per person and \$1 million for each occurrence.

§ 1788.36 Comprehensive requirements.

RUS requires borrowers have comprehensive or separate fire, theft, and windstorm insurance on all owned motor vehicles, trailers, and aircraft having a unit value in excess of \$1,000. The amount of coverage shall not be less than the actual cash value of the property insured.

§ 1788.37 Coverage requirement.

Borrowers shall have fire insurance, including the extended coverage endorsement, on each building and its contents, and on each storage location of materials, supplies, poles, and cross-arms having a value at any one location in excess of \$5,000, or in excess of 1 percent of the total plant value, whichever is larger. Such coverage shall be in an amount of not less than 80 percent of the current cost to replace the property new, less depreciation. Surveys should be conducted periodically, every two years at a mini-

7 CFR Ch. XVII (1–1–97 Edition)

mum, to establish property values on an actual cash value basis.

§ 1788.38 RUS endorsement.

When the borrower is one of several affiliated companies and the coverage is provided by naming the borrower as one of several insureds under a single policy, the policy shall be amended to include the provisions of the RUS Endorsement in § 1788.5(b).

§ 1788.39 Types of fire insurance policies.

A fire insurance policy may be written on the following basis:

(a) Specified amount basis.

(b) Blanket form basis.

(c) Monthly reporting form basis. The reporting type of policy should include the limit of liability for each location. Whenever it appears that the value at any one location may exceed the limit of liability included in the policy, an endorsement to the policy should be promptly secured increasing the limit of liability for that particular location.

(d) Inland Marine Floater basis. Floater form policies on an all-risk basis are recommended to provide coverage for construction equipment, radio/telephone equipment, and pay stations furnished for use by subscribers and located on their premises or vehicles, and for radio or telephone equipment installed in borrowers’ vehicles, for equipment being transported, and for materials stored at various locations.

§ 1788.40 Coverage requirement.

Borrowers shall purchase and maintain flood insurance for buildings in flood hazard areas to the extent available and required under the National Flood Insurance Act of 1968, as amended by the Flood Disaster Protection Act of 1973 (Pub. L. 93–234). The insurance should cover, in addition to the building, any machinery, equipment, fixtures, and furnishings contained in the building.

§ 1788.41 Endorsements required.

The National Flood Insurance Program provides for a standard flood insurance policy; however, other existing insurance policies which provide flood

Rural Utilities Service, USDA

§ 1788.48

coverages may be used where flood insurance is available in lieu of the standard flood insurance policy. Such policies, in order to satisfy the insurance requirements of section 102 of the Flood Disaster Protection Act of 1973, should be endorsed to provide:

(a) That the insurer give 30 days written notice of cancellation or non-renewal to the insured with respect to the flood insurance coverage. To be effective, such notice must be mailed to both the insured and the lender or Federal agency and must include information as to the availability of flood insurance coverage under the National Flood Insurance Program, and

(b) That the flood insurance coverage offered by the insurer is at least as broad as the coverage offered by the Standard Flood Insurance Policy.

§ 1788.42 Coverage requirement.

Electric borrowers having steam generating facilities shall maintain boiler and machinery insurance. Electric borrowers having internal combustion, gas turbine or hydro-generating facilities shall maintain machinery insurance. The limit for each accident shall not be less than the actual current cash value of the property of the borrower and of the adjacent property that would be damaged by explosion or breakdown of the insured object.

§ 1788.43 Suspension notice.

The standard RUS Endorsement, see § 1788.5(a), should be amended to provide written notice of suspension to RUS in the event of suspension of coverage.

§ 1788.44 Annual inspection report.

Borrowers shall provide RUS a copy of the annual inspection report by the insurance company's engineer.

§ 1788.45 Modifications considered.

When requested by the borrower and if loan security is not jeopardized, RUS will consider modifying the boiler and machinery insurance requirements for those borrowers with special or unusual circumstances, such as limited planned annual use of generating facilities, or where the value of generating facilities at a location is less than \$1 million.

Subpart C—Insurance for Contractors, Engineers and Architects

§ 1788.46 General.

This part sets forth RUS policy on minimum insurance requirements for contractors, engineers, and architects performing work under contracts with borrowers, and requirements for bonds to be furnished by contractors.

§ 1788.47 Policy requirements.

(a) Contractors, engineers, and architects performing work for borrowers under construction, engineering and architectural service contracts shall obtain insurance coverage, as required in § 1788.51, and maintain it in effect until work under the contracts is completed.

(b) Contractors entering into construction contracts with borrowers shall furnish a contractors' bond, except as provided for in § 1788.52, covering all of the contractors' undertaking under the contract.

(c) Borrowers shall make sure that their contractors, engineers, and architects comply with the insurance and bond requirements of their contracts.

§ 1788.48 Contract requirements.

Contracts entered into between borrowers and contractors, engineers, and architects shall provide that they take out and maintain throughout the contract period insurance of the following types and minimum amounts:

(a) Workers' compensation and employers' liability insurance, as required by law, covering all their employees who perform any of the obligations of the contractor, engineer, and architect under the contract. If any employer or employee is not subject to the workers' compensation laws of the governing state, then insurance shall be obtained voluntarily to extend to the employer and employee coverage to the same extent as though the employer or employee were subject to the workers' compensation laws.

(b) Public liability insurance covering all operations under the contract shall have limits for bodily injury or death of not less than \$1 million each occurrence, limits for property damage

§ 1788.49

of not less than \$1 million each occurrence, and \$1 million aggregate for accidents during the policy period. A single limit of \$1 million of bodily injury and property damage is acceptable. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

(c) Automobile liability insurance on all motor vehicles used in connection with the contract, whether owned, nonowned, or hired, shall have limits for bodily injury or death of not less than \$1 million per person and \$1 million per occurrence, and property damage limits of \$1 million for each occurrence. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

§ 1788.49 Bond requirements.

Construction contracts for facilities in amounts in excess of \$100,000 shall require contractors to secure a contractors' bond on a form approved by the Administrator attached to the contract in a penal sum of not less than the contract price, which is the sum of all labor and materials including owner-furnished materials installed in the project. RUS Form 168b is for use when the contract exceeds \$100,000. RUS Form 168c is for use when the contractor's surety has accepted a Small Business Administration guarantee and the contract is for \$1 million or less. On line extension contracts under which work will be done in sections and no section will exceed a total cost of \$100,000, the borrower may waive the requirement for a contractors' bond.

§ 1788.50 Acceptable sureties.

Surety companies providing contractors' bonds shall be listed as acceptable sureties in the U.S. Department of Treasury Circular No. 570. A copy of the executed bond shall be furnished RUS. For construction contracts, other than buildings, amounting to \$100,000 or less, the borrower shall determine whether a contractors' bond is required.

§ 1788.51 Borrower options.

For construction contracts for buildings amounting to \$100,000 or less, the

7 CFR Ch. XVII (1-1-97 Edition)

borrower has the option to require the contractors to furnish:

- (a) A contractors' bond, as described in §§ 1788.52 and 1788.53, or
- (b) A builders' risk policy.

§ 1788.52 Builders' risk policy.

The builders' risk policy shall be on a completed value form, effective from the date equipment or material is first delivered to the building site, and shall name both the borrower and the contractors as insureds.

(a) The policy shall insure against loss by fire or lightning and the named perils in the extended coverage endorsement.

(b) The amount of coverage shall be not less than the actual cash value of the property constructed, including all materials to be used in the construction and stored at the site, whether furnished by the borrower or the contractor.

§ 1788.53 Major equipment insurance.

When a borrower contracts for the installation of major equipment by other than the supplier or for the moving of major equipment from one location to another, RUS recommends that these contracts require the contractor to furnish the borrower with an installation floater policy. The policy should cover all risks of damage to the equipment until completion of the installation contract.

§ 1788.54 Compliance with contracts.

It is the responsibility of the borrower to make sure, before the commencement of work, that the engineer, architect, and the contractor have insurance which complies with their contract requirements. Compliance with contract requirements should be a certificate signed by a representative of the insurance company, including a provision that no change in, or cancellation of, any policy listed in the certificate will be made without prior written notice to the borrower.

§ 1788.55 Providing RUS evidence.

When RUS shall specifically so direct, the borrower shall also require the engineer, the architect, or the contractor to forward to RUS evidence of

Rural Utilities Service, USDA

Pt. 1788, Exh. A

compliance with their contract requirements. The evidence shall be in the form of a certificate of insurance signed by a representative of the insurance company and include a provision that no change in, or cancellation of, any policy listed in the certificate will be made without the prior written notice to the borrower and to RUS.

EXHIBIT A TO PART 1788—RURAL UTILITIES SERVICE ENDORSEMENT

POLICY NUMBER: _____

COMMERCIAL CRIME

This endorsement applies to all forms forming part of the Commercial Crime Policy.

Employee Dishonesty Coverage Form

The Employee Dishonesty Coverage Form is amended by deleting the Cancellation As to Any Employee section and by substituting the following:

Cancellation as to any Employee

Coverage for any Employee shall be deemed cancelled (a) immediately upon discovery by you, or by any of your partners or officers thereof not in collusion with such Employee, or by the Administration of any dishonest act on the part of such Employee (b) at 12:01 a.m., standard time, upon the effective date specified in a written notice served upon you and the Administration or sent by registered mail to you and the Administration.

Crime General Provisions Form

B. General Conditions:

1. Section 4 is replaced by the following:

Duties in the Event of Loss

After you or the Rural Utilities Service of the United States of America (the Administration) discover a loss or situation that may result in a loss of, or loss from damage to, Covered Property either you or the Administration must:

- a. Notify us as soon as possible.
- b. Submit to examination under oath at our request and give us a signed statement of answers.
- c. Give us a detailed, sworn proof of loss within four months.
- d. Cooperate with us in the investigation and settlement of any claim.

Prior discovery of loss by you shall not affect the right of the Administration to notify us of loss, and to file proof of loss even though such prior discovery by you may have occurred more than four months prior to the discovery of the loss by the Administration.

2. Section 6 is replaced by the following:

Legal Action Against Us: You or the Administration may not bring legal action against us involving loss:

- a. Unless all the terms of this insurance have been complied with.
- b. Until 60 days after proof of loss has been filed with us.
- c. Unless brought within two years from the date the loss is discovered by you or the Administration.

3. Section 16 is replaced by the following:

Territory: This insurance covers only acts committed or events occurring within the United States of America, U.S. Virgin Islands, Puerto Rico, Canal Zone, Guam, Micronesia, or Canada.

A new section 19 is added to read as follows:

Any action, approval or consent which by the provisions of this Policy is required to be taken or signed by the Administration shall be effective if taken or signed by the Administrator of the Administration or by his authorized representative.

A new section 20 is added to read as follows:

Discovery by you shall be deemed to mean discovery by any officer or employee of the Insured not in collusion with the employee responsible for the loss discovered, and discovery by the Administration shall be deemed to mean discovery by any employee, agent or attorney of the Administration not in collusion with the employee responsible for the loss discovered.

C. General Definitions:

"Employee" also includes non-salaried officers and collection agents in your service.

Common Policy Conditions

A. Cancellation:

1. Paragraph 2 is replaced by the following:
We may cancel this policy by mailing or delivering to the first Named Insured and to the Administration written notice of cancellation at least:

- a. 10 days before the effective date of cancellation if we cancel for nonpayment of premium; or
- b. 30 days before the effective date of cancellation if we cancel for any other reason.

A new section G is added to read as follows:

G. Notices:

1. It is agreed that settlement of any claim under this Policy shall be made check or draft payable to you, but no settlement shall be made without prior written approval of the Administration. It is further agreed if you cancel this Policy, the Administration may, within ten days after we receive such notice from you, advise us that the cancellation notice is inoperative. In such case, coverage shall continue as if such notice of cancellation had never been sent. Notices, approvals, and requests by the provisions of this Policy shall be sent as follows:

Pt. 1788, Exh. B

- a. To us, at our home office.
- b. To you, addressed to you at the city or town at which your principal office is located.
- c. To the Administration, addressed to the Rural Utilities Service, United States Department of Agriculture, South Building, Washington, DC, 20250.

EXHIBIT B TO PART 1788—RURAL UTILITIES SERVICE JOINT INSURED

This Endorsement applies to the CRIME GENERAL PROVISIONS FORM and all Crime Coverage forms forming part of the policy.

PROVISIONS

1. Section 5.a of the the CRIME GENERAL PROVISIONS FORM is amended by adding the following:

Payment by us will be made to the first named insured for the use and benefit of the insured sustaining the loss.

2. Section 5.b is amended by deleting the period at the end thereof and adding the following:

, except that in the case of a borrowing corporation from the Rural Utilities Service knowledge of any information relevant to this insurance shall be deemed knowledge of such information by the Insured sustaining the loss.

3. Section 2.a of the EMPLOYEE DISHONESTY COVERAGE FORM is replaced by the following:

Immediately upon discovery by:

- (1) The Rural Utilities Service;
- (2) The borrowing corporation employing such “employee”; or
- (3) Any of the partners, officers or directors of the Administration or the borrowing corporation not in collusion with the “employee”; of any dishonest act committed by that “employee” whether before or after becoming employed by the borrowing corporation.

Subpart A—Policy and Procedures With Respect to Consultant Services Funded by Borrowers—General

§ 1789.150 Purpose.

This part sets forth policies and the procedures for implementing subsection (c) of section 18 of the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 *et seq.*)(RE Act) which authorizes the Rural Utilities Service (RUS) to use the services of Consultants funded by the Borrowers to facilitate timely action on Applications by Borrowers for financial assistance and other approvals.

§ 1789.151 Definitions.

As used in this part:

Administrator means the Administrator of the Rural Utilities Service (RUS).

Application means a request for financial assistance under the RE Act or such other approvals as may be required of the RUS pursuant to the terms of outstanding loan or security instruments or otherwise.

Borrower means any organization which has an outstanding loan(s) made or guaranteed by RUS or its predecessor agency, the Rural Electrification Administration (REA) under the RE Act or any organization which has submitted or submits an Application before RUS.

Consultant means a person or firm which has been retained pursuant to

Rural Utilities Service, USDA

§ 1789.152

this subpart under a contract to provide financial, legal, engineering, environmental, or other technical advice and services.

Consultant Contract means a contract for the performance of consulting services for RUS, to be paid using funds provided by a Borrower, which may be in the form of a Retainer Contract, purchase order, or other form as may be appropriate.

Escrow Account means an account established pursuant to § 1789.158.

Escrow Agreement means an agreement, between a Borrower, a Consultant and a Third-party Commercial Institution, meeting the requirements of § 1789.167.

Final Invoice means the closing Invoice prepared for a given Task Order.

Financial Consultant means a Consultant retained pursuant to this part to provide financial advisory services.

Funding Agreement means an agreement, between a Borrower and a Consultant, providing for the Borrower to fund the costs of a Task Order and otherwise meeting the requirements of § 1789.166.

Indemnification Agreement means an agreement by a Borrower meeting the requirements of § 1789.162.

Invoice means an invoice prepared by a Consultant pursuant to the terms of a Consultant Contract.

Legal Consultant means any Consultant retained pursuant to this part to provide legal services to RUS.

Notice of Proposal to Fund means a notice meeting the requirements of § 1789.156 provided to RUS by the Borrower.

Organizational conflict of interest means that because of other activities or relationships with other persons, a person is unable or potentially unable to render impartial assistance or advice to the Government, or the person's objectivity in performing the contract work is or might be otherwise impaired, or a person has an unfair competitive advantage.

Retainer Contract means a Consultant Contract providing for a minimum required payment to a Consultant irrespective of whether services are utilized by RUS thereunder.

Task Order means a written request for consultant services pursuant to the terms of a Consultant Contract.

Third-party Commercial Institution means a commercial financial institution mutually acceptable to the Borrower and the Consultant.

§ 1789.152 Policy.

(a) As provided in this subpart, RUS may, at its discretion, use the services of Consultants funded by a Borrower where such services will facilitate timely action on an Application by such Borrower for financial assistance or other approvals. Such Consultants may provide financial, legal, engineering, environmental or other technical advice and services in connection with the review of an Application.

(b) With the approval of RUS, a Borrower may fund the cost of consulting services in connection with the review by RUS of an Application by such Borrower. Such funding shall be provided pursuant to the terms of a Funding Agreement between the Borrower and the Consultant designated by RUS.

(c) RUS may not, without the consent of the Borrower, require, as a condition of processing any Application for approval, that the Borrower agree to pay the costs of a Consultant hired to provide services to RUS.

(d) The government shall retain sole discretion in the selection of Consultants to provide services to RUS and the form of contract utilized. RUS may either use the services of one or more Consultants retained under Retainer Contracts or the government may elect to retain a Consultant not otherwise on retainer. The government shall have sole discretion to prescribe terms and conditions of Consultant Contracts. The Borrower may bring considerations to the attention of the government which the Borrower deems pertinent to the selection process.

(e) RUS shall retain sole discretion as to whether to further pursue use of an outside consultant for the relevant application in the event the Borrower does not enter into the agreements referenced in § 1789.158(c)(3)(iii) within 60 days of the government providing to the Borrower the information set forth in § 1789.158(c)(3).

§ 1789.153

§ 1789.153 Borrower funding.

Borrowers shall use their general funds for the purposes of funding consultant services hereunder. Borrowers may not use the proceeds of loans made or guaranteed under the RE Act for costs incurred by Borrowers pursuant to the funding of consultant services for RUS.

§ 1789.154 Eligible borrowers.

All Borrowers are eligible to fund consultant services under this part.

§ 1789.155 Approval criteria.

RUS will consider approving the use of consultant services funded by a Borrower on a case by case basis taking into account, among other matters, the following:

(a) Whether such services are required to facilitate timely action on a Borrower's Application. RUS shall determine what represents timely action with respect to each Application considering, among other matters, the review period normally required for such projects by RUS and other lenders and the consequences to the Borrower of adjusting the review period.

(b) The availability of staff resources, the priorities of other projects then before RUS, and the efficiencies to be realized from the use of consultant services.

(c) Whether it is in the best interest of RUS to use Borrower-funded Consultants. Certain types of projects, such as those involving issues of program-wide significance, may not be well suited for the use of Borrower funded Consultants.

§ 1789.156 Proposal procedure.

(a) In the event RUS determines that consideration should be given to the use of a Borrower-funded consultant in connection with the review of an Application, the RUS Regional Director or the Director of the Power Supply Division, as appropriate, will discuss with the Borrower the nature of the Application and the projected review period required of RUS. If RUS concludes that the projected review period will not result in timely action on the Application, and after being so notified in writing by RUS the Borrower wishes to

7 CFR Ch. XVII (1–1–97 Edition)

fund consultant services to facilitate RUS review, the Borrower shall submit to the same Director a funding proposal. The proposal shall set forth the following:

(1) Identification in the heading or caption as a Notice of Proposal to Fund Consulting Services;

(2) Borrower's REA/RUS designation;

(3) Borrower's legal name and address;

(4) A description of the Application, critical issues and concerns relating to the Application, time deadlines, and the consequences of any delays in RUS review;

(5) A description of the consulting service(s) that would facilitate timely RUS review of the Application; and

(6) Such additional documents and information as RUS may request.

(b) RUS will review the Notice of Proposal to Fund and any additional information RUS deems relevant in determining whether to proceed with procuring Borrower funded Consultants. If RUS proposes to utilize Legal Consultants, RUS must obtain the concurrence of the Office of General Counsel (OGC) of the Department of Agriculture. RUS will notify the Borrower in writing of its determination.

§ 1789.157 Consultant contract.

(a) The Federal Acquisition Regulation (FAR), 48 CFR Ch. 1, and the Agriculture Acquisition Regulation (AGAR), 48 CFR Ch. 4, shall apply to all Consultant Contracts entered into pursuant to this part except as provided in this section.

(1) Contracts for Legal Consultants shall provide for a technical representative from OGC.

(2) All Consultant Contracts shall provide for an escrow account funding mechanism pursuant to this part and for the government's sole discretion in determining whether payments are to be made from the Escrow Account to the Consultant.

(3) All Consultant Contracts shall provide that payment of all obligations for work performed thereunder must be satisfied by amounts available in the Escrow Account; with the exception of the annual retainer fee, if any, Consultants shall not be entitled to any payments from the government.

Rural Utilities Service, USDA

§ 1789.160

(b) The provisions of paragraph (a) of this section shall be given prominent emphasis in requests for proposals issued under this part.

§ 1789.158 Implementation.

(a) Upon making a determination to go forward with Borrower funding for consulting services, RUS shall initiate a procurement request for a Consultant to provide the services. The government may either contract with a Consultant on a case by case basis or elect to use a Consultant pursuant to an outstanding Retainer Contract. The Borrower will not be informed of the Consultant selected until such time as the government provides the information set forth in paragraph (c)(3) of this section.

(b) If the government determines to contract with a Consultant on a case by case basis, the government shall notify the Borrower of the applicable procedures.

(c) If the government determines to contract with a Consultant under an outstanding Retainer Contract, the following procedures will normally apply:

(1) Pursuant to the terms of the contract, the government will prepare a draft Task Order requesting consultant services in connection with the review of the Borrower's Application. The draft Task Order shall set forth for the Consultant's review and acceptance, a description of the services to be provided and applicable time frames for the provision of such services.

(2) The government will request that the Consultant:

(i) Notify the government as to the acceptability of the form and substance of the draft Task Order;

(ii) Notify the government as to its ability to provide a satisfactory conflict of interest certification consistent with the requirements of the FAR (48 CFR ch. 1); and

(iii) Provide a cost estimate for the draft Task Order.

(3) When the government is satisfied with the response(s) received pursuant to paragraph (c)(2) of this section, the government shall promptly provide to the Borrower:

(i) A copy of the draft Task Order identifying the Consultant;

(ii) The Consultant's cost estimate for the draft Task Order; and

(iii) Contract information required to enable the Borrower to develop a Funding Agreement, an Escrow Agreement and an Indemnification Agreement (the "agreements").

(4) The Borrower shall develop and submit to the government for approval executed originals of:

(i) The agreements; and

(ii) A certified copy of a resolution of the board of directors authorizing the Borrower to enter into the agreements and to take such other action as is necessary to effect the purposes of the agreements.

(5) Upon receiving written RUS approval of the agreements and the form and substance of the board resolution, the Borrower shall:

(i) Establish and fund the Escrow Account; and

(ii) Provide written notice to the government of the Escrow Account number, the funding thereof, and such other information as required pursuant to the agreements.

(6) After the Borrower has funded the Escrow Account, the government shall issue Task Order(s) for consultant services in accordance with the terms and conditions of the applicable Retainer Contract.

§ 1789.159 Contract administration.

The government shall be solely responsible for the administration of a Consulting Contract and shall have complete control over the scope of the Consultant's work, the timetable for performance, the standards to be applied in determining the acceptability of deliverables and the approval of payment of Invoices.

§ 1789.160 Access to information.

The Borrower shall not have rights in nor right of access to the work product of the Consultant. All analyses, studies, opinions, memoranda, and other documents and information provided by the Consultant pursuant to a Consulting Contract may be released and made available to the Borrower only with the approval of RUS. This section does not restrict release of information

§ 1789.161

by RUS pursuant to the Freedom of Information Act (5 U.S.C. 552(a)(2)) or other legal process.

§ 1789.161 Conflicts of interest.

The standard for determining organizational conflicts of interest shall be as set forth in the FAR subpart 9.5 (48 CFR part 9, subpart 9.5); however, the identification of the existence of an organizational conflict of interest may be made by either the Administrator or the cognizant Contracting Officer. In the event an organizational conflict of interest is determined to exist, the cognizant Contracting Officer shall take the actions prescribed at FAR 9.504 (48 CFR 9.504) to attempt to avoid, neutralize or mitigate the conflict. Should these actions be deemed by the Administrator and the Contracting Officer to adequately resolve the conflict, the contracting action with the offeror/contractor may proceed. Should the Administrator or the Contracting Officer determine that an organizational conflict of interest still exists such that contract award or other contracting action cannot be taken (award of task/delivery order, etc.) the offeror/contractor shall be so informed by the Contracting Officer and be provided a reasonable opportunity to respond in accordance with FAR 9.504(e) (48 CFR 9.504(e)). After considering the contractor's response, if it is found by both the Administrator and Contracting Officer to remedy the conflict of interest, the contracting action may proceed. If the Administrator and Contracting Officer determine that the contractor's response does not resolve the conflict of interest, yet continuing with the contracting action with the offeror/contractor in question is considered in the best interest of the United States, a waiver in accordance with FAR 9.503 (48 CFR 9.503) may be executed. This waiver shall be submitted under the Contracting Officer's signature and approved by the Administrator. The Administrator has been delegated Head of Contracting Activity authority by the USDA Senior Procurement Executive solely for the purpose of waiver approval.

7 CFR Ch. XVII (1–1–97 Edition)

§ 1789.162 Indemnification agreement.

As a condition of approving Borrower funding, the government will require the Borrower to enter into an Indemnification Agreement, in form and substance satisfactory to RUS, providing that the Borrower will indemnify and hold harmless the government and any officers, agents or employees of the government from any and all liability, including costs, fees, and settlements arising out of, or in any way connected with the payment of the Consultant's fee pursuant to the Consultant Contract. The Indemnification Agreement may recognize, as a condition of liability thereunder, the rights of the borrower to prompt notice, to use of counsel of its own choosing, and to participation in any settlement of a claim against which indemnification is sought.

§ 1789.163 Waiver.

RUS may waive any requirement or procedure of this subpart by determining that its application in a particular situation would not be in the government's interest, except that certain provision that the subject contracts are subject to the provisions of the FAR (48 CFR ch. 1) and AGAR (48 CFR ch. 4).

§§ 1789.164—1789.165 [Reserved]

Subpart B—Escrow Account Funding and Payments

§ 1789.166 Terms and conditions of funding agreement.

Funding Agreements between the Borrower and a Consultant shall be in form and substance satisfactory to RUS and provide for, among other matters, the following:

- (a) Specific reference by number to the applicable Consulting Contract entered into between the government and the Consultant;
- (b) Specific reference by number to the applicable Task Order (where applicable);
- (c) A brief description of the Application;
- (d) A requirement that Invoices make specific reference to:
 - (1) The applicable contract and Task Order(s); and

Rural Utilities Service, USDA

§ 1792.101

(2) The Escrow Account from which payment is to be made;

(e) A requirement that the Final Invoice for a Task Order be clearly identified as such;

(f) A description of the services to be provided by the Consultant to RUS and the applicable time frames for the provision of such services;

(g) Agreement that the Borrower shall pay for the Consultant services provided to RUS under the applicable contract through an Escrow Account established pursuant to an Escrow Agreement, the Consultant shall not provide services to RUS under the applicable contract unless there are sufficient funds in the Escrow Account to pay for such services, the Consultant shall seek compensation for services provided under the applicable contract from, and only from, funds made available through the Escrow Account, and the Consultant must submit all Invoices to the government for approval.

(h) A form of Escrow Agreement satisfactory to the Borrower, Consultant and the designated Third-party Commercial Institution;

(i) A schedule setting forth when and in what amounts the Borrower shall fund the Escrow Account;

(j) Acknowledgment by the Consultant of the Indemnification Agreement provided by the Borrower to the government; and

(k) The Funding Agreement shall not be effective unless and until approved in writing by RUS.

§ 1789.167 Terms and conditions of escrow agreement.

Escrow Agreements between and among the Borrower, Consultant and Third-party Commercial Institution shall be in form and substance satisfactory to RUS and provide for, among other matters, the following:

(a) Specific reference by number to the applicable contract for services;

(b) Specific reference by number to the applicable Task Order;

(c) Specific reference by number to the Escrow Account into which funds are to be deposited;

(d) Invoices to specifically identify the applicable contract and Task Order(s);

(e) Funds to be held in the Escrow Account by the escrow agent until paid to the Consultant pursuant to the government's authorization;

(f) The Escrow Account to be closed and all remaining funds remitted to the Borrower after payment of the Final Invoice, unless otherwise directed by the government;

(g) The government, the Consultant and the Borrower to have the right to be informed, in a timely manner and in such form as they may reasonably request, as to the status of and activity in the Escrow Account; and

(h) The Escrow Agreement shall not be effective unless and until approved in writing by RUS.

§§ 1789.168—1789.175 [Reserved]

PART 1792—COMPLIANCE WITH OTHER FEDERAL STATUTES, REGULATIONS, AND EXECUTIVE ORDERS

Subparts A and B—[Reserved]

Subpart C—Seismic Safety of Federally Assisted New Building Construction

Sec.

1792.101 General.

1792.102 Definitions.

1792.103 Design and construction standards for seismic safety.

1792.104 Seismic safety certifications.

AUTHORITY: 7 U.S.C. 901 *et seq.*; 42 U.S.C. 7701 *et seq.*; Pub. L. 103-354, 108 Stat. 3178 (7 U.S.C. 6941 *et seq.*); E.O. 12699 (3 CFR, 1990 Comp., p. 269).

SOURCE: 58 FR 32437, June 10, 1993, unless otherwise noted.

Subparts A and B—[Reserved]

Subpart C—Seismic Safety of Federally Assisted New Building Construction

§ 1792.101 General.

(a) The Earthquake Hazards Reduction Act of 1977 (42 U.S.C. 7701 *et seq.*) was enacted to reduce risks to life and property through the establishment and maintenance of an effective earthquake hazards reduction program (the National Earthquake Hazards Reduction Program or NEHRP). The Federal

§ 1792.102

Emergency Management Agency (FEMA) is designated as the agency with the primary responsibilities to plan and coordinate the NEHRP. This program includes the development and implementation of feasible design and construction methods to make structures earthquake resistant. Executive Order 12699 of January 5, 1990, Seismic Safety of Federal and Federally Assisted or Regulated New Building Construction (3 CFR, 1990 Comp., p. 269), requires that measures to assure seismic safety be imposed on federally assisted new building construction.

(b) This subpart identifies acceptable seismic standards which must be employed in new building construction funded by loans, grants, or guarantees made by the Rural Utilities Service (RUS) or the Rural Telephone Bank (RTB) or through lien accommodations or subordinations approved by RUS or RTB. This subpart implements and explains the provisions of the loan contract utilized by the RUS for both electric and telephone borrowers and by the RTB for its telephone borrowers requiring construction certifications affirming compliance with the standards set out in § 1792.103 of this subpart.

(c) This subpart applies to both RUS and RTB borrowers. For the purposes of RTB borrowers, as used in this subpart, RUS means RTB and Administrator means Governor.

(d) This subpart applies to the recipients of RUS grants.

(e) This subpart applies to the federally assisted buildings for which designs are prepared on or after the effective date hereof.

§ 1792.102 Definitions.

As used in this subpart, the following terms have the following meaning:

Administrator—Administrator of RUS or the Governor of the Rural Telephone Bank or his or her designee.

Borrower—An entity which borrows or seeks to borrow money from, or arranges financing with the assistance of RUS through guarantees, lien accommodations or lien subordinations.

Building—Any structure, fully or partially enclosed, used or intended for sheltering persons or property.

Federally assisted—The provision of financing assistance by RUS through

7 CFR Ch. XVII (1–1–97 Edition)

loans, loan guarantees, grants, and lien accommodations and subordinations.

Grant recipient—Any entity which receives a grant from RUS.

Lien accommodation—The consensual sharing of the government's (RUS's) lien on property or the release of government's lien on property.

Lien subordination—Agreement that the government's (RUS) lien on property will rank below the lien of another entity.

NEHRP—National Earthquake Hazards Reduction Program.

REA means the Rural Electrification Administration formerly an agency of the United States Department of Agriculture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs.

Registered—A person licensed by the State(s) or Authority(ies) to perform architectural or engineering services in the State(s) where construction occurs.

RUS means the Rural Utilities Service, an agency of the United States Department of Agriculture established pursuant to Section 232 of the Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994 (Pub. L. 103–354, 108 Stat. 3178), successor to REA with respect to administering certain electric and telephone programs. See 7 CFR 1700.1.

Seismic—To do with or caused by earthquakes.

Seismic factor—The factor used in design based on the seismic zone ($Z = .4, .3, .2$, etc.) or based on acceleration (A_v or A_a , whichever controls) for the location of the building, and given on the seismic maps in the model codes.

State—Each of the 50 States of the United States, the District of Columbia, and territories and possessions of the United States which are authorized to receive loans, loan guarantees, or grants from RUS.

[58 FR 32437, June 10, 1993, as amended at 59 FR 66440, Dec. 27, 1994]

§ 1792.103 Design and construction standards for seismic safety.

(a) Borrowers and grant recipients of grants must utilize in the design and construction of federally assisted buildings, the seismic provisions of the most recent edition of those standards and practices that are substantially

Rural Utilities Service, USDA

§1792.104

equivalent to or exceed the seismic safety level in the most recent or immediately preceding edition of the NEHRP Recommended Provisions for the Development of Seismic Regulation for New Buildings. The NEHRP Recommended Provisions are updated triennially.

(b) Each of the following model codes has been found to provide a level of seismic safety substantially equivalent to that provided by the use of the 1988 NEHRP Recommended Provisions and appropriate for federally assisted new building construction:

(1) 1991 International Conference of Building Officials (ICBO) Uniform Building Code;

(2) 1992 Supplement to the Building Officials and Code Administration, International, Inc. (BOCA) National Building Code; and

(3) 1992 Amendments to the Southern Building Code Congress (SBCC) Standard Building Code.

(c) The model codes identified in §1792.103(b) can be obtained from the following organizations:

(1) *ICBO Uniform Building Code*. International Conference of Building Officials, Austin Regional Office, 9300 Jollyville Road, suite 101, Austin, Texas 78759-7455.

(2) *BOCA National Building Code*. Building Officials and Code Administrators International, Inc., 4051 West Flossmoor Road, Country Club Hills, Illinois 60478-5795.

(3) *SBCC Standard Building Code*. Southern Building Code Congress International, Inc., 900 Montclair Road, Birmingham, Alabama 35213-1206.

(d) The NEHRP Recommended Provisions for the Development of Seismic Regulations for New Building is available from the Office of Earthquakes and Natural Hazards, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472.

§1792.104 Seismic safety certifications.

Borrowers and grant recipients must with respect to federally assisted buildings:

(a) Provide to RUS a written acknowledgement from a registered architect or engineer responsible for the design of such building project stating that the seismic provisions of one of

the model codes listed in §1792.103(b) of this subpart will be used in the design and construction of the building project. This written acknowledgement must include a description of the building project, estimated costs, approximate square footage, the seismic factor for the building location, and the identification and date of the Model Code to be used in the seismic design of the building. The written acknowledgement must be received by RUS prior to the preparation of preliminary plans and specifications for the building.

(b) Include on the final plans and specifications, which are otherwise required to be submitted to RUS, the identification and date of the model code that was used for the seismic design of the building project and the seismic factor for the building location. The plans and specifications must be dated, signed, and sealed by the registered architect or engineer.

(c) Provide to RUS, upon completion of construction, the written certification of the architect or engineer responsible for the design of the project that the building project was designed to meet and that the completed construction meets the seismic requirements set forth in the model code identified in the written acknowledgement required in paragraph (a) of this section. This certification must include the following information:

(1) Project designation and project owner's name;

(2) Name of architectural/engineering firm;

(3) Name and registration no. (for the State in which the building project is located) of the certifying architect or engineer;

(4) Purpose and location of the facility;

(5) Seismic factor for the building location;

(6) The code identity and the date of the model code used for the design and construction of the building project(s);

(7) Total square footage of the building project;

(8) Total cost of the building project; and

(9) Estimated cost of the structural systems affected by the requirements of this subpart.

Pt. 1794

(d) The written acknowledgement required by paragraph (a) of this section, the plans and specifications referred to in paragraph (b) of this section, and the written certification required by paragraph (c) of this section are to be submitted to the appropriate Director of the Regional Electric Division, Power Supply Division, Regional Telephone Division, or Rural Development Assistance Staff. When plans and specifications are not otherwise required to be submitted to the RUS Washington's offices, the data required to be included on the plans and specifications by paragraph (b) of this section must be submitted in letter form to the appropriate Director prior to the release of the plans and specifications for construction purposes.

(The information and recordkeeping requirements of this section have been approved by the Office of Management and Budget (OMB) under the control number 0572-0099.)

APPENDIX A TO PART 1794—PROCEDURE FOR PROPOSALS WHICH NORMALLY REQUIRE AN EIS

Rural Utilities Service, USDA

§ 1794.10

AUTHORITY: National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 *et seq.*); Pub. L. 103-354, 108 stat. 3178 (7 U.S.C. 6941 *et seq.*); Council on Environmental Quality Regulations for Implementing the Procedural Provisions of NEPA (40 CFR parts 1500-1508); Executive Order (EO) 11988, Floodplain Management; and EO 11990, Protection of Wetlands.

SOURCE: 49 FR 9550, Mar. 13, 1984, unless otherwise noted.

Subpart A—General

§ 1794.1 Purpose.

This part contains the policies and procedures of the Rural Utilities Service (RUS) for implementing the National Environmental Policy Act (NEPA), as amended (42 U.S.C. 4321 *et seq.*); the Council on Environmental Quality (CEQ) Regulations for Implementing the Procedural Provisions of NEPA (40 CFR parts 1500-1508); and certain related statutes, regulations and orders. Among those statutes, regulations and orders are the National Historic Preservation Act of 1966, as amended (16 U.S.C. 470 *et seq.*); the Advisory Council on Historic Preservation regulations on Protection of Historic and Cultural Properties (36 CFR Part 800); the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*); Executive Order (EO) 11514, “Protection and Enhancement of Environmental Quality”; EO 11593, “Protection and Enhancement of the Cultural Environment”; EO 11988, “Floodplain Management”; EO 11990, “Protection of Wetlands”; and the Farmland Protection Policy Act (Pub. L. 97-98).

§ 1794.2 Actions requiring environmental review.

The provisions of part 1794 apply to proposed administrative actions by RUS including, without limitation, loans, loan guarantees, reclassification of loan funds, lien accommodations, and approvals provided pursuant to loan contracts and security instruments (*e.g.*, approvals of the use of the general funds).

§ 1794.3 Compliance.

The effective date of provisions contained in part 1794 is the date of publication of the final rule in the FEDERAL REGISTER. Any environmental docu-

ment accepted or prepared by RUS prior to the effective date may be developed in accordance with the RUS environmental requirements in effect at the time the document was accepted or prepared by RUS.

§ 1794.4 Trivial violations.

It is the intent of this part that a trivial violation of its provisions will not give rise to an independent cause of action.

§ 1794.5 Responsible officials.

The agency contact points for environmental matters shall be the Assistant Administrator, Electric or Telephone (as appropriate); Rural Utilities Service; U.S. Department of Agriculture; South Building, Washington, DC 20250. The Assistant Administrators, Electric and Telephone, are responsible for determining the proper definition of proposals and the need for the preparation and approval of draft Environmental Impact Statements (EIS). Final EIS's will be issued and approved by the Administrator.

§ 1794.6 Metric units.

It is RUS's policy to prepare environmental documents using metric units with British system equivalents in parentheses. Environmental documents prepared by or for an RUS borrower (Borrower) should follow the same format.

§ 1794.7 Guidance.

For further guidance in the preparation of notices and environmental documents RUS has prepared an RUS Environmental Guide. A copy of this RUS Environmental Guide is available upon request to the Assistant Administrator, Electric or Assistant Administrator, Telephone; Rural Utilities Service; U.S. Department of Agriculture, Washington, DC 20250.

Subpart B—Implementation of the National Environmental Policy Act

§ 1794.10 Apply NEPA early in the planning process.

The environmental review process requires early coordination with and involvement of RUS. Borrowers should

§ 1794.11

consult with RUS at the earliest stages of planning for any proposal which may require RUS action. Since planning efforts and environmental evaluation for power supply facilities, including power plants, transmission lines, coal or other fuel development, are inter-related, these activities should take place within the same time frame.

§ 1794.11 Consideration of alternatives.

In determining what are reasonable alternatives, RUS will consider a number of factors including, but not limited to, state of the technology, availability of resources and the time frame in which the identified need must be fulfilled.

§ 1794.12 Public involvement.

In carrying out its responsibilities under NEPA, RUS shall make diligent efforts to involve the public in the environmental review process through the following means:

(a) RUS notices required by part 1794 shall be published in the FEDERAL REGISTER and shall describe the nature, location and extent of the proposed action and indicate the availability and location of additional information.

(b) Borrower's notices, when required by this part or otherwise required by RUS, shall consist of both a legal notice and a paid advertisement published in a timely manner in a newspaper or newspapers of general circulation in the counties in which the proposal will take place or such other places as RUS determines. It shall generally describe the nature, location and extent of the Borrower's proposal and indicate the availability and location of additional information. If both the paid advertisement and legal notice appear in the same edition, the advertisement need not be lengthy and can refer the reader to the legal notice for a more detailed explanation. The Borrower shall consult with RUS prior to issuance of Borrower's notices where an EIS or Environmental Assessment (EA) will be prepared.

(c) The Borrower shall submit to RUS, as soon as practicable after publication, copies and publication dates of all Borrower's legal notices and paid advertisements published. A copy of all comments received by the Borrower

7 CFR Ch. XVII (1-1-97 Edition)

(including the Borrower's position, if any) concerning environmental aspects of the proposal shall be provided to RUS in a timely manner.

(d) Public hearings or meetings may be held at reasonable times and locations concerning environmental aspects of a proposed action in all cases where, in the Assistant Administrator's opinion, the need for hearings or meetings is indicated in order to develop adequate information on the environmental implications of the proposed action. The following shall be required in connection with a meeting or a hearing:

(1) Where an environmental document is the subject of the hearing or meeting, that document will be made available to the public at least ten (10) days in advance.

(2) Any person, organization or government body desiring to make a statement at the hearing or meeting may make such statement in writing or orally. Public hearings or meetings normally will be informal and will generally be confined to the environmental aspects of the proposal.

(3) RUS notice shall be published at least thirty (30) days before the hearings or meetings. The Borrower's notice of the hearings or meetings shall be published at least ten (10) days but no more than thirty (30) days before the hearings or meetings. RUS shall determine the counties in which the Borrower's notice shall be published in newspapers of general circulation to assure that persons most likely to be affected by the proposal will be made aware of the hearings. The notice shall present the date, time, location and purpose of the hearing or meeting. If an environmental document is the subject of the hearing or meeting, the notice shall inform the public where it can be obtained or is available for review.

(e) A list of RUS administrative actions for which EIS's and EA's are being prepared or contemplated will be available for public inspection at RUS's offices in Washington, DC.

§ 1794.13 Interagency involvement.

In carrying out its responsibilities under NEPA, RUS shall, to the extent

Rural Utilities Service, USDA

§ 1794.30

practicable, coordinate its environmental review and combine its meetings and hearings with those of other Federal, state and local agencies. The Borrower shall inform RUS of potential involvement of other agencies in the proposal at the earliest practicable time to facilitate such coordination.

Subpart C—Provisions Applicable to EA or EIS Preparation

§ 1794.20 Interagency coordination.

(a) Whenever practicable, RUS will encourage the use of a lead agency in preparation of an EIS or EA so that a single document and review process will cover all Federal agency actions arising from the proposal or directly related group of proposals. It is the policy of RUS to volunteer to act as lead agency in the preparation of an EA or EIS when the Borrower so requests, and when RUS would normally prepare an EA or EIS for the proposal.

(b) Where RUS acts as a cooperating agency, RUS shall rely upon the lead agency's procedures for implementing NEPA and CEQ regulations in the preparation and issuance of an EA or EIS, unless the lead and cooperating agencies agree to a modification of these procedures.

(1) RUS shall request that the lead agency indicate that RUS is a cooperating agency in all NEPA related notices published for the proposal. In addition, RUS shall request that the lead agency permit RUS to review and comment on the EA or draft and final EIS prior to issuance.

(2) The Borrower shall inform RUS in a timely manner of its involvement in a proposal where another Federal agency is preparing an EIS or EA to permit RUS to adequately fulfill its duties as a cooperating agency.

(c) Where practicable and in order to eliminate duplication and delay, RUS will coordinate its NEPA process with state and local environmental procedures. Where state or local agencies control siting of electric transmission lines or electric generating stations, RUS shall consult and coordinate with those state and local agencies in determining what are the reasonable siting and route alternatives.

§ 1794.21 Limitations on actions during the NEPA process.

In determining which Borrower activities related to a proposal requiring development of an EA or EIS may be approved prior to completion of the NEPA process, RUS must determine, among other matters that:

(a) The activity will not have an adverse environmental impact. For example, purchase of water rights, optioning or transfer of land title, or continued use of land as historically employed will not have an adverse environmental impact. However, site preparation or construction at or near the proposed site (*e.g.*, rail spur) or development of a related facility (*e.g.*, opening a captive mine) normally will have an adverse environmental impact.

(b) The expenditure is "minimal." To be minimal the expenditure:

(1) Must not exceed the amount of loss which the borrower could absorb without jeopardizing the government's security interest in the event the proposed project is not approved by the Administrator, and

(2) Must not compromise the objectivity of RUS's environmental review. Notwithstanding other considerations, expenditures up to 10 percent of the proposed project cost normally will not compromise RUS's objectivity.

§ 1794.22 Tiering.

It is RUS's policy to tier EIS's and EA's where:

(a) It is practicable, and

(b) There will be a reduction of delay and paperwork, or where better decisionmaking will be fostered.

[49 FR 9550, Mar. 13, 1984; 49 FR 10083, Mar. 19, 1984]

Subpart D—Classification of Proposals

§ 1794.30 Control.

For environmental review purposes, RUS has identified and set forth categories of Borrower proposals. A Borrower or Borrowers may propose to participate with other parties in the ownership of a project where the Borrowers do not have sufficient control and responsibility to alter the development of the project. In such a case the

proposal will be considered a categorical exclusion regardless of the category into which the proposal would otherwise be included. Where the Borrowers propose to cumulatively own 5 percent or less of a project, the proposal will normally be considered a categorical exclusion. Where the Borrowers propose to cumulatively own 33⅓ percent or more of a project, the proposal will be treated in its usual category. Where the Borrowers propose to cumulatively own more than 5 percent but less than 33⅓ percent of a project, RUS will determine whether the Borrowers have sufficient control and responsibility to alter the development of the project. Consideration will be given to such factors as: (a) Whether construction would be completed regardless of RUS financing assistance; (b) the stage of project planning and construction; (c) total Borrower participation; (d) participation percentage of each utility in the project; and (e) managerial arrangements and contractual provisions.

§ 1794.31 Categorical exclusions (proposals normally requiring neither an EIS nor an EA).

(a) Borrower proposals that do not individually or cumulatively have a significant effect on the environment and do not normally involve significant unresolved conflicts concerning alternate use of available resources, do not require an EIS or EA. In order to provide for extraordinary circumstances, such proposals may require development of a Borrower's Environmental Report (BER) or the equivalent.

(b) Certain types of Borrower proposals do not require a BER. Proposals of this type are subject to the requirements of § 1794.41. Proposals within this classification are:

- (1) Purchase of land where use will remain unchanged.
- (2) Routine approvals made pursuant to loan and security documents (e.g., contracts for bulk commodities, fuel, goods and services, capital credit retirements, technical specifications).
- (3) Agreements for transmission, wheeling, interconnection with, power purchase from, or sale to other utilities where no associated Borrower con-

struction or financing of construction is involved.

(4) Additional or substitute financing assistance for proposals which have previously received environmental review and approval from RUS, provided that environmental considerations have not changed.

(5) Rehabilitation or reconstruction of roads, railroad tracks, roadbed, bridges and other transportation facilities within transportation rights-of-way or generating facility sites where there is no substantial increase in use. A description of the rehabilitation or reconstruction shall be provided to RUS.

(6) Primary fuel or mineral contracts where, considering all the facts and circumstances, the Borrower does not have effective control over or responsibility to alter the development of the specific fuel or mineral source (e.g., mine).

(7) Changes or additions to existing substations or switching stations or external changes to buildings or small structures requiring new physical disturbance or fencing of less than 0.4 hectare (0.99 acre). A description of changes and additions shall be provided to RUS.

(8) Internal modifications or equipment additions (e.g., computer facilities, relocating interior walls) to small structures or buildings.

(9) Internal or minor external changes to electric generating or fuel processing facilities and related support facilities where there is negligible impact on the outside environment. A description of the changes shall be provided to RUS.

(10) Ordinary maintenance or replacement of equipment or small structures (e.g., line support structures, microwave facilities, valves).

(11) The construction of telephone and communication lines and cables at existing power related facilities sites.

(12) Supervisory control and data acquisition systems (SCADA) and energy management systems involving no new external construction.

(13) Testing work (e.g., test borings or cores, water test wells).

Rural Utilities Service, USDA

§ 1794.32

(14) Studies and engineering undertaken to define a proposal or alternatives sufficiently so that environmental effects can be assessed.

(15) The construction of electric power lines within an existing substation, switching station or electric generating facility site. A description of the facilities to be constructed shall be provided to RUS.

(16) Contracts for certain items of equipment which are part of a proposal for which RUS is preparing an EA or EIS, and which meet the limitations on actions during the NEPA process set forth in § 1794.21 (*e.g.*, long lead time items such as turbines or boilers).

(17) Internal RUS administrative actions (*e.g.*, personnel actions, procurement) and RUS bulletins that do not concern environmental matters or substantial facility design, construction or maintenance practices.

(c) Certain types of Borrower proposals normally require Borrower submission of a BER or its equivalent. Proposals of this type are subject to the requirements of § 1794.42. Proposals within this classification are:

(1) The construction of electric power lines and associated facilities designed for or capable of operation at a nominal voltage of either:

(i) Less than 69 kV (low side) or

(ii) Less than 230 kV (low side) if both:

(A) No more than 40 kilometers (24.85 miles) of power line are involved, and

(B) Substations and switching stations require new physical disturbance or fencing of no more than 2 hectares (4.94 acres) at any single site nor more than 4 hectares (9.88 acres) for all sites.

(2) The construction of electric power lines where less than 5 kilometers (3.11 miles) of line are involved.

(3) The construction of telephone and communication lines, cables and facilities.

(4) The construction of other small structures or buildings such as microwave facilities, cooperative headquarters, maintenance facilities, etc., involving no more than 2 hectares (4.94 acres) of physical disturbance or fencing.

(5) Participation by a Borrower(s) in any proposed project where total Borrower financial participation in the un-

derlying project will be five (5) percent or less.

(6) Purchase of existing facilities or a portion thereof where use or operation will remain unchanged and which presently are in compliance with environmental laws and regulations.

(7) Additional bulk commodity storage (*e.g.*, coal, peat, lignite, limestone, etc.) within existing generating station boundaries.

(8) SCADA and energy management systems which require new external construction.

(9) Reconductoring or upgrading of existing telephone or power lines where either the same or substantially equivalent support structures at the approximate existing support structure locations are used.

(10) Proposals designed to reduce the amount of pollutants released into the environment (*e.g.*, precipitators, baghouse or scrubber installation, coal washing plant and equipment) which have no other environmental impact outside of the existing facility site.

(11) Changes or additions to existing substations or switching stations or external changes to buildings or small structures requiring 0.4 hectare (0.99 acre) or more but no more than 2 hectares (4.94 acres) of new physically disturbed land or fenced property.

(12) Construction of diesel electric generating facilities of less than 3 megawatts (MW) (nameplate rating) at an existing generating site. All new associated facilities and electric power lines related to the generating proposal shall be covered in the BER.

(13) Modification of an existing hydroelectric project or dam that will have a total installed capacity of 1.5 MW (nameplate rating) or less and which will result in no change in the normal maximum surface area or normal maximum surface elevation of an existing impoundment. All new associated facilities and electric power lines related to the generating proposal shall be covered in the BER.

§ 1794.32 Proposals normally requiring an EIS.

(a) Actions that may significantly affect the quality of the human environment require preparation of an EIS. An

§ 1794.33

EIS normally will be required in connection with Borrower proposals for construction and operation of the following types of facilities:

(1) New electric generating facilities of 40 MW or more (nameplate rating) other than diesel generators or combustion turbines. All new associated facilities and electric power lines related to the generating proposal shall be covered in the EIS.

(2) A new mining operation when the Borrower or Borrowers have effective control (*e.g.*, dedicated mine or purchase of a substantial portion of the mining equipment).

(b) Proposals of this type are subject to the requirements of §§1794.50 to 1794.55.

§ 1794.33 Proposals normally requiring an Environmental Assessment without scoping.

(a) RUS will normally prepare an EA for all proposals which are neither categorical exclusions (§1794.31) nor are proposals normally requiring an EIS (§1794.32). For certain actions within this class, scoping and document procedures set forth in §§1794.50 to 1794.53 shall be followed (see §1794.34). The following are examples of specific Borrower proposals which normally require an EA without scoping.

(1) Construction of combustion turbine and diesel generating facilities of less than 40 MW (nameplate rating), except for diesel generating facilities of less than 3 MW (nameplate rating) at an existing generating site. All new associated facilities and electric power lines related to the subject generating proposal shall be covered in the EA.

(2) Construction of any other type of new electric generating facilities of less than 5 MW (nameplate rating). All new associated facilities and electric power lines related to the subject generating proposal shall be covered in the EA.

(3) Modification of an existing hydroelectric project or dam if:

(i) The project or dam will have a total installed capacity of more than 1.5 MW (nameplate rating); or

(ii) The modification will result in a change in the normal maximum surface area or normal maximum surface elevation of an existing impoundment.

7 CFR Ch. XVII (1–1–97 Edition)

All new associated facilities and electric power lines related to the generating proposal shall be covered in the EA.

(4) The expansion of a mining or drilling operation or a new drilling operation.

(5) Purchase of existing facilities or a portion thereof which are presently in violation of Federal, state or local environmental laws or regulations.

(6) The construction of electric power lines and related facilities designed for or capable of operation at a nominal voltage of 230 kV or more (low side) not covered by §1794.31 (categorical exclusions) or §1794.34 (normally requiring an EA with scoping).

(7) The construction of electric power lines and related facilities designed for or capable of operation at a nominal voltage of 69 kV or more (low side) but less than 230 kV (low side) where:

(i) More than 40 kilometers (24.85 miles) of power line are involved or

(ii) Substations and switching stations require new physical disturbance of fencing of more than 2 hectares (4.94 acres) at any single site or more than 4 hectares (9.88 acres) for all sites.

(8) Proposals designed to reduce the amount of pollutants released into the environment which may have other environmental impacts outside of the existing facility site.

(9) Issuance of RUS regulations concerning environmental matters or substantial facility design, construction or maintenance practices.

(b) Proposals of this type are subject to the requirements of §§1794.60 to 1794.64.

§ 1794.34 Proposals normally requiring an Environmental Assessment with scoping.

(a) There are certain actions which require the use of a scoping procedure in the development of an EA. After the scoping process is completed and an acceptable Environmental Analysis has been submitted by the Borrower, RUS will determine whether to prepare an EIS or finding of no significant impact (FONSI). The types of proposals falling within this category are:

(1) The construction of electric power lines and related facilities designed for or capable of operation at a nominal

Rural Utilities Service, USDA

§ 1794.51

voltage of 230 kV or more (low side) where:

(i) More than 40 kilometers (24.85 miles) of power line are involved; or

(ii) Substations and switching stations require new physical disturbance or fencing involving a total of more than 2 hectares (4.94 acres) at any single site or more than 8 hectares (19.77 acres) for all sites.

(2) Construction of combustion turbines and diesel generators of 40 MW (nameplate rating) or more; and the construction of any other type of electric generating facilities of 5 or more MW but less than 40 MW (nameplate rating). All new associated facilities and electric power lines related to the subject generating project shall be covered in any EA or EIS prepared.

(b) Proposals of this type are subject to the requirements of §§1794.70 to 1794.73.

§ 1794.35 Work plan proposals.

Borrowers frequently request financing assistance for a number of relatively minor unrelated projects all of which are described in a single “work plan.” In determining the proper environmental classification of construction projects contained in a work plan, RUS will consider as a single proposal all related construction included in the work plan and any additional construction related thereto which, although not included in the work plan, is reasonably foreseeable.

Subpart E—Procedure for Categorical Exclusions

§ 1794.40 General.

The following procedure, which applies to action classified as categorical exclusions in §1794.31 hereof, provides RUS with information necessary to determine if the proposed action meets the criteria for a categorical exclusion. Where, because of extraordinary circumstances, an action may have a significant effect on the quality of the human environment, RUS may require additional environmental documentation.

§ 1794.41 Proposals with no BER.

Normally the Borrower shall not submit a BER for proposals included in

§1794.31(b). However, if so noted in §1794.31(b) the Borrower shall submit a description of the proposal. Such description shall include, where applicable, a plan for erosion and sedimentation control. No public notice is required unless the proposal is located in and may affect wetlands or floodplains.

§ 1794.42 BER proposals.

For proposals included in §1794.31(c) the Borrower normally shall submit a BER or its equivalent which will assist RUS in identifying extraordinary circumstances in which a normally excluded action may have a significant environmental effect. No public notice is required unless the proposal is located in and may affect wetlands or floodplains. RUS shall not permit construction or other activities which would have an environmental effect until it has received, reviewed and accepted an adequate BER.

Subpart F—Procedure for Proposals Normally Requiring an EIS

§ 1794.50 Normal sequence.

Appendix A to part 1794 (Procedure for Proposals which Normally Require an EIS) describes the normal sequence of EIS preparation to be employed by RUS. For proposals normally requiring an EA with scoping (see §1794.34), the NEPA process shall proceed in the same manner as for proposals normally requiring an EIS through the point at which the Environmental Analysis is submitted (see §1794.53). After the Environmental Analysis has been submitted, RUS shall make a judgment to prepare either an EIS or a finding of no significant impact (FONSI).

§ 1794.51 Preparation for scoping.

(a) RUS has developed a general approach to the NEPA process, including scoping, for proposals normally requiring an EIS (§1794.32) and for proposals normally requiring an EA with scoping (§1794.34). Scoping procedures are designed to determine the scope of issues to be addressed and to identify significant issues related to a proposed action. RUS may require scoping procedures to be followed for other proposals where appropriate to achieve the purposes of NEPA.

§ 1794.52

(b) As soon as practicable, RUS will publish its notice of intent to prepare an EIS (see 40 CFR 1508.22). The Borrower shall publish, in a timely manner, a notice similar to RUS's notice. If the proposal is one which normally requires an EA with scoping (§1794.34), the notice shall indicate that: (1) RUS may prepare an EA before or without necessarily preparing an EIS, and (2) the decision whether or not to prepare an EIS will be based on information received from the Borrower, Federal, state and local agencies, organizations and the general public during the scoping process, preparation of the Environmental Analysis, and the review period for a finding of no significant impact (if originally issued).

(c) As part of the early project planning the Borrower should consult with expert and interested Federal, state and local agencies to inform them of the proposed project, and to identify permits and approvals which must be obtained and administrative procedures which must be followed.

(d) Before any scoping meetings are held RUS shall require the Borrower to submit two environmental documents:

(1) Alternative evaluation;

(2) Siting study (for electric generation or new mines) or Macro-Corridor study (for electric transmission).

(e) The Borrower is encouraged to hold additional public information meetings in the general location of the proposed project and any reasonable alternatives when such borrower meetings will make the scoping process more meaningful. A written summary of the comments made at such meetings should be submitted to RUS as soon as practicable after the meetings.

§ 1794.52 Scoping meeting.

(a) Both RUS and the Borrower shall publish a notice of the public scoping meeting which shall:

(1) Provide a brief description of the nature and location of the Borrower's recommended alternative (if any) and reasonable alternatives;

(2) State the intent to hold public scoping meetings, giving the date, time, location and purpose of these meetings;

(3) State where copies of the scoping documents are available for public re-

7 CFR Ch. XVII (1-1-97 Edition)

view, which shall include the Borrower's headquarters, RUS offices in Washington, and other locations as determined by RUS;

(4) Provide the name and address of the person to whom questions and comments should be sent;

(5) Set forth a thirty (30) day period after the scoping meeting(s) to enter comments into the meeting record.

(b) The RUS notice will be published at least thirty (30) days prior to the meeting(s). The Borrower's notice shall be published at least ten (10) days, but not more than thirty (30) days prior to the meeting(s).

(c) The scoping meeting(s) will normally be held in the vicinity of the Borrower's recommended alternative and, where appropriate, the reasonable alternatives or such other places as RUS determines will best afford an opportunity for public involvement. Any person, organization or government body desiring to make a statement at the meeting may make such statement in writing or orally. A record will be made of the scoping meeting.

(d) As soon as practicable after the scoping meetings(s), RUS, as lead agency, shall determine the significant issues to be analyzed in depth and identify and eliminate from detailed study the issues which are not significant or which have been covered by prior environmental review. RUS will develop a proposed scope for further environmental study and review. A copy of this proposed scope will be sent to cooperating agencies and the Borrower, which shall be given thirty (30) days to comment on its adequacy and emphasis. After expiration of the thirty (30) day period RUS will provide formal guidance to the Borrower concerning the scope of environmental study to be performed and information to be gathered.

§ 1794.53 Borrower's environmental analysis.

(a) After scoping procedures have been completed, RUS shall require the Borrower to develop and submit an Environmental Analysis satisfactory in form and substance to RUS. The Environmental Analysis will be prepared under the guidance of the RUS staff and all information set forth therein

Rural Utilities Service, USDA

§ 1794.55

shall be subject to independent verification by RUS.

(b) The Environmental Analysis will normally provide a basis for preparation of RUS's EA or EIS and may be made an appendix to the RUS document. After RUS has reviewed and found an Environmental Analysis to be satisfactory, the Borrower will be required to provide RUS with a sufficient number of copies of the Environmental Analysis to satisfy RUS's distribution plan.

(c) The Environmental Analysis shall include a summary of the construction and operation monitoring and mitigation measures for the proposed project. This summary shall appear in the draft and final EIS. These measures may be revised as appropriate in response to comments on the draft and final EIS and other information. These measures also shall be incorporated by summary or reference into RUS's Record of Decision.

§ 1794.54 EIS.

(a) After a draft or final EIS has been prepared, RUS and the Borrower shall issue a notice of availability for the document. The notice shall:

(1) Provide a brief description of the nature and location of the preferred and reasonable alternatives;

(2) State the availability of a draft or final EIS for public review;

(3) State how copies of the EIS can be obtained and where copies are available for public review which shall include the Borrower's headquarters, RUS offices in Washington, DC, selected libraries in the area of the preferred and reasonable alternatives and such other reasonable places as RUS shall select;

(4) Provide the name and address of the person to whom questions and comments should be sent;

(5) Set forth the time period for review and comment. This time period normally shall be forty-five (45) days for a draft EIS and thirty (30) days for a final EIS, measured from the date that the U.S. Environmental Protection Agency's notice or the Borrower's notices are first published, whichever is later.

RUS and the Borrower notices for the final EIS shall also request persons, organizations or governmental bodies which wish to be notified when the Record of Decision is available to inform RUS of such interest.

(b) In addition to circulation required by 40 CFR 1502.19, draft and final EIS's (or summaries thereof, at RUS's discretion) shall be circulated to the appropriate state, regional, and metropolitan clearinghouses.

(c) Where a final EIS does not require that substantial changes be made in the draft EIS, RUS may document required changes through errata sheets, insertion pages and revised sections to be incorporated into the draft EIS. In such cases, RUS will circulate such changes together with comments on the draft EIS, responses to comments, and other appropriate information, as its final EIS. RUS will not circulate the draft EIS again, although the draft EIS will be provided if requested within thirty (30) days of publication of notice of availability of the final EIS.

(d) In individual situations, upon mutual agreement between RUS and the Borrower, the EIS may be prepared by an independent contractor. If RUS acts as lead agency, the contractor will be chosen by RUS. Under this procedure, the Borrower normally will not be required to submit an Environmental Analysis.

[49 FR 9550, Mar. 13, 1984; 49 FR 10083, Mar. 19, 1984]

§ 1794.55 Timing of agency action.

(a) Where an RUS action requires an EIS, RUS shall prepare a Record of Decision. The Record of Decision will not be prepared, and RUS will not take any action or execute commitments before expiration of the thirty (30) day period starting with either EPA's notice in the FEDERAL REGISTER that the final EIS is available or the Borrower's notices of availability, whichever is later.

(b) For budgetary purposes some financing assistance may be approved conditionally with a stipulation that no funds will be advanced until a Record of Decision has been prepared.

Subpart G—Procedure for Environmental Assessment Proposals Without Scoping

§ 1794.60 General.

The following procedure applies to all actions classified as Environmental Assessment projects in § 1794.33 hereof. Where appropriate to carry out the purposes of NEPA, RUS may require, on a case by case basis, that additional action be taken in connection with preparation of an EA. If at any point in the preparation of an EA, RUS determines that the action will have a significant impact on the environment, the preparation of an EIS will be required and the procedures applicable thereto will be followed.

§ 1794.61 Document requirements.

For those proposals covered by § 1794.33, the Borrower shall submit a BER or its equivalent. The BER may serve as RUS's EA if RUS makes an independent evaluation of the environmental issues and concurs in the BER's scope and content. The BER also may be made an Appendix to RUS's EA to provide information on the proposal and reduce unnecessary paperwork.

§ 1794.62 Notice of availability.

The Borrower shall publish a public notice of availability of the BER.

(a) The Borrower's notice shall:

(1) Provide a brief description of the nature and location of its recommended and reasonable alternatives;

(2) State the availability of the BER for public review;

(3) State how copies of the BER can be obtained and where copies are available for public review, which shall include the Borrower's headquarters, RUS offices in Washington, DC, and other locations as determined by RUS;

(4) Provide the name and address of the person to whom questions and comments should be sent;

(5) Set forth a thirty (30) day time period for review and comment.

(b) The Borrower's notice shall be published after RUS has determined that the BER provides a satisfactory basis for public comment.

[49 FR 9550, Mar. 13, 1984; 49 FR 10083, Mar. 19, 1984]

§ 1794.63 FONSI and notice requirements.

(a) If RUS, after reviewing the EA, finds that the proposal will not have a significant effect on the human environment, RUS shall prepare a FONSI. After the FONSI has been made, RUS shall publish a notice of availability of the EA and FONSI. The Borrower shall have published, in a timely manner, a similar notice.

(b) Both the RUS and Borrower's notice shall:

(1) Provide a brief description of the nature and location of the preferred and reasonable alternatives;

(2) State that an EA and FONSI have been prepared;

(3) State how copies of the EA and FONSI can be obtained, and where copies are available for public review which shall include the Borrower's headquarters, RUS offices in Washington, and other locations as determined by RUS;

(4) Provide the name and address of the person to whom questions and comments should be sent.

(c) RUS shall not permit construction or other activities which would have an environmental effect until it has received, reviewed and accepted an adequate BER and the public notice requirements in paragraphs (a) and (b) of this section have been met.

§ 1794.64 Timing of agency action.

RUS may take its final action on proposals requiring an EA without scoping (§ 1794.33) at any time after publication of the RUS and Borrower notices that a FONSI has been made.

Subpart H—Procedure for Environmental Assessment Proposals With Scoping

§ 1794.70 General.

For those proposals covered by § 1794.34, RUS and the Borrower shall follow the procedures for scoping and the requirements for notices and documents set forth in §§ 1794.50 through 1794.53 of Subpart F, "Procedure for Proposals Normally Requiring an EIS."

§ 1794.71 RUS determination.

After the scoping process and receipt of an acceptable Environmental Analysis, RUS shall make a judgment as to whether or not RUS's action will be a major Federal action significantly affecting the quality of the human environment. If a significant effect is evident, RUS shall continue with the procedures in §§ 1794.54 through 1794.55 of Subpart F, "Procedure for Proposals Normally Requiring an EIS." If a significant effect is not evident, RUS shall develop and prepare an EA and FONSI.

§ 1794.72 Notice requirements for a FONSI determination.

If RUS prepares a FONSI for a proposal covered by § 1794.34, RUS and, in a timely manner, the Borrower shall publish notices of availability of the EA and FONSI. The EA and FONSI shall be made available for public review and comment for at least thirty (30) days, and the RUS and Borrower notices shall solicit public comments. Additional RUS and Borrower notice requirements are included in § 1794.63.

§ 1794.73 Timing of agency action for FONSI determination.

RUS may take its final action at any time after expiration of the thirty (30) day period measured from the date of publication of the RUS notice in the FEDERAL REGISTER. Normally RUS shall wait thirty (30) days after publication of the Borrower's notice before taking a final action.

Subpart I—Adoption of Environmental Documents

§ 1794.80 General.

Where Borrowers participate in projects for which other agencies have already prepared an EIS or EA, RUS will adopt the existing EIS or EA consistent with the provisions of 40 CFR 1506.3.

§ 1794.81 Adoption as a final EIS.

(a) If RUS acted as a cooperating agency, the lead agency's EIS may be adopted as a final EIS without recirculation if RUS has reviewed the comments received on the final EIS and

concluded that comments and suggestions have been adequately considered.

(b) If RUS was not a cooperating agency but determines that another Federal agency's EIS is adequate it will adopt the EIS as its final EIS.

(1) RUS and the Borrower shall publish a notice stating RUS's adoption of the EIS and independent determination of its adequacy. The notices are governed by §§ 1794.12 (general) and 1794.54(a) (EIS).

(2) If the adopted EIS is generally available, RUS will circulate its written finding that the adopted EIS meets the standards for an adequate EIS. The adopted EIS shall be made available to interested parties upon request.

(3) If the adopted EIS is not generally available, RUS will circulate its written finding that the adopted statement is an adequate EIS, along with either the adopted EIS or a summary thereof in accordance with 40 CFR 1502.19. The adopted EIS shall be circulated in the same manner as a final EIS (see § 1794.54(b)).

§ 1794.82 Adoption as a draft EIS.

Where RUS determines that an existing Federal EIS requires additional information to meet the standards for an adequate statement for a proposed RUS action, RUS may adopt all or a portion of the EIS as a part of its draft EIS. The circulation provisions of § 1794.54(b) for draft and final EIS's apply. The general notice provisions (§ 1794.12) and notice provisions for EIS's (§ 1794.54(a)) apply.

§ 1794.83 Adoption of an EA.

RUS may adopt a Federal EIS or EA or a portion thereof as its EA. RUS shall make the EA available and assure that notice is provided in the same manner as if RUS had prepared the EA.

§ 1794.84 Adoption of environmental materials.

RUS may adopt environmental documents or portions thereof prepared by Federal, state or local agencies or other parties independently of the requirements of NEPA. RUS may adopt such materials into its environmental documents. RUS will circulate the adopted document as a part of its environmental assessment or draft and

§ 1794.85

7 CFR Ch. XVII (1–1–97 Edition)

final EIS in the same manner as if prepared by RUS.

§ 1794.85 Timing of agency action.

Where RUS has adopted another agency's environmental documents, the timing of the RUS action shall be subject to the same requirements as if RUS had prepared the required EA or EIS.

Subpart J—Supplemental EIS

§ 1794.90 Circulation and notices.

(a) A supplement to a draft or final EIS shall be prepared, circulated and given notice by RUS and the Borrower in the same manner (exclusive of scoping) as a draft and then final EIS (see § 1794.54).

(b) Normally RUS and the Borrower shall have published notices of intent to prepare a supplement to a final EIS in those cases where a Record of Decision has already been issued.

(c) RUS, at its discretion, may issue an information supplement to a final EIS where RUS determines that the purposes of NEPA are furthered by doing so even though such supplement is not required by 40 CFR 1502.9(c)(1). RUS and the Borrower shall publish a notice of availability. The notice requirements shall be the same as for a final EIS indicated in § 1794.54(a). The information supplement shall be circulated in the same manner as a final EIS (see § 1794.54(b)). RUS shall take no final action on any proposed modification discussed in the information supplement until thirty (30) days after the RUS notice of availability is published or thirty (30) days after the Borrower's notice is published, whichever occurs later.

§ 1794.91 Timing of agency action.

Timing of RUS's action shall be subject to the same requirements as apply to a typical EIS.

Procedure for Proposals Which Normally Require an EIS

Rural Utilities Service, USDA

Pt. 1794, App. A

Diagram Legend

- ◆ On-going activity in the EIS process
- B, C, D, Discrete events in the Siting Study and Environmental Analysis path
- B₁, C₁, Discrete events in the Alternative Evaluation path

As the diagram illustrates, there will be two separate but interrelated study processes leading to the preparation of the EIS. One process B₁ through H, will examine alternatives to building a generating (or transmission or new mining) facility. The other process, B through H will examine a range of potentially acceptable sites for a generating (or transmission or new mining) facility.

In order to facilitate long-range planning and reduce delays, a Borrower may undertake preliminary evaluations of alternative means of providing power and begin the study of a range of potentially acceptable sites for a generation (or transmission or new mining) facility before demonstrating a need for the proposal. However, the obligation to show a need for the proposal will still remain before RUS financing assistance can be obtained.

Equal spacing between points on the diagram is not meant to suggest equal time intervals. Where two letters are the same (except for subscripts), generally the two indicated events should occur within the same time frame. For BD and B₁D₁, this is only true where the Borrower initiates site selection at a time when there is a specific need to be filled. For major transmission projects, events occurring with reference to the Macro-Corridor Study are analogous to the generation and mining Siting Study procedures.

The flow diagram is intended to indicate the normal sequence of events although some variance may be acceptable in individual cases if good cause is demonstrated. However, in all instances RUS shall assure that the requirements of the NEPA and CEQ regulations are fulfilled.

Discrete Events

A: The Borrower presents to RUS the underlying needs which form the basis of its proposal. RUS undertakes for electric generation proposals, when necessary, the preparation or update of the power requirements study (PRS) utilizing RUS procedures. For electric generation and transmission and mining proposals, the need for the proposal shall be presented in the draft and final EIS's (or EA, as applicable).

B and B₁: The Borrower consults with RUS on the procedures and general parameters for the Siting Study and on potential alternative ways to meet the need, including guidance on preparing the Alternative Evaluation. Consultation may be initiated even if a specific need has not been identified.

B̄C̄: Work is performed on the Siting Study by the Borrower and/or consultant. This includes "macroanalysis" in which general criteria, literature search and consultation are used to identify a reasonable range of potentially acceptable sites.

Borrower/consultant contact Soil Conservation Service (SCS), U.S. Environmental Protection Agency (EPA), U.S. Fish and Wildlife Service (FWS), U.S. Army Corps of Engineers (COE), Federal land use agencies and state agencies for early guidance and input.

As soon as practicable during this period, RUS publishes its "Notice of Intent" in the FEDERAL REGISTER and the Borrower publishes similar information in local newspapers of general circulation. (See §1794.51(b)).

B₁C₁: Borrower does research and consultation, contacts other utilities, etc., to determine whether there are reasonable alternatives to a new generating (or transmission or mining facility). The Alternative Evaluation should include discussion, as appropriate, of joint projects, alternate fuels, alternate energy sources, conservation, etc. Alternatives eliminated from detailed study should be identified and reasons given for the elimination. The Borrower should also indicate which alternatives are reasonably available to it if its recommended alternative is not approved.

C and C₁: Borrower submits draft of Siting Study and Alternative Evaluation to RUS for review. RUS reviews each draft for major flaws. If such flaws are not present, RUS submits both the draft Siting Study and Alternative Evaluation to potentially involved Federal and state agencies (including, but not limited to, all agencies invited to the field investigation) for review and comment.

D and D₁: RUS invites other Federal and state agencies to make a field investigation of potentially acceptable siting areas discussed in the draft Siting Study and critique the study methodology, and point out potential problems with these alternative siting areas. The Borrower at this time presents site and nonsite specific alternatives included in the Siting Study and Alternative Evaluation to these agencies for their comments. Participating agencies may critique alternative means of meeting the need and point out potential problems with alternative siting areas. The agencies set up a strategy for conducting the scoping process and tentatively identify the lead and cooperating agencies for the EIS.

DE: Federal agencies are given the opportunity to comment on the potentially acceptable alternatives to point out fatal flaws. During this stage the Borrower may secure land, water or other critical factors for potentially acceptable sites by option or other means (subject to the limitations in §1794.21). If RUS's notice of intent and the

Borrower's notice did not give the date and time of the scoping meeting, scoping meeting notices are published now.

E and E₁: Scoping meeting(s) is held to receive input from the public, interested parties, and Federal, state and local officials and agencies. Among the topics open to discussion are reasonable alternatives to meet the need, potentially acceptable sites, participation projects or conservation, significant issues to be addressed in the EIS, and the need for the project.

EF: Borrower submits revised Siting Study (or addenda if appropriate) to RUS for review after revising it to reflect input from scoping meeting(s). RUS consults with cooperating agencies on the scope of the EIS and gives the Borrower guidance on scope of the Environmental Analysis. Borrower prepares the draft Environmental Analysis which includes a fatal flaw study of potentially acceptable sites and a "microanalysis" in which detailed field work is conducted on the Borrower's recommended site(s). The Borrower continues consultation with RUS and other interested Federal, state, and local agencies, and the public, and reflects their comments in the Environmental Analysis.

D₁F₁: Borrower updates and expands, as necessary, the Alternative Evaluation on the basis of comments received from Federal, State and local officials and agencies, input from participants at the scoping meeting(s), the general public and new developments (e.g., negotiations with other electric power utilities), RUS provides guidance to the Borrower during this period based on cooperating agency and public input.

F and F₁: The Borrower submits draft Environmental Analysis to RUS for review and comment. If the draft Environmental Analysis has no readily apparent critical flaws, RUS distributes copies of the Environmental Analysis to cooperating agencies for review. Borrower submits Alternative Evaluation, which has been updated after the scoping

meeting, and also includes new alternatives, if any, which have developed. RUS submits updated Alternative Evaluation to requesting cooperating agencies. The Environmental Analysis may incorporate the Alternative Evaluation leading to a single review document.

FG and F₁G₁: RUS and cooperating agencies independently evaluate, for accuracy, scope and content, the information submitted to them. RUS collates responses and reconciles them with the Borrower. RUS may begin writing the draft EIS at this point.

H and H₁: RUS Borrower submits, as appropriate, a final revised Environmental Analysis and Alternative Evaluation to RUS.

HJ and H₁J: RUS independently evaluates the revised documents and verifies the information therein before use in the EIS. During this time, RUS prepares the draft EIS, utilizing the borrower—supplied data, interagency expertise, and other information.

J: RUS issues draft EIS for public review and comment publishing notice of availability in the FEDERAL REGISTER.

K: Public comment period ends on draft EIS. This date may be extended in certain instances.

KL: RUS (and cooperating agencies, as appropriate) review comments received on draft EIS and responds, by modifying alternatives, developing alternatives not previously given sufficient consideration, supplementing, improving or modifying the analyses, etc. A final EIS or supplemental draft EIS is prepared, as appropriate, with cooperating agencies' assistance.

M: Record of decision is issued. RUS will take no final action on any loan guarantee, etc., sooner than 30 days after issuance of the final Federal EIS.

MN: Implementation of mitigation measures is checked, as necessary, by RUS and other Federal, state, and local agencies during construction and operation of the project.

AUTHORITY: 7 U.S.C. 1989; 42 U.S.C. 1480; 42 U.S.C. 2942; 5 U.S.C. 301; delegation of authority by the Sec. of Agri., 7 CFR 2.23; delegation of authority by the Asst. Sec. for Rural Development, 7 CFR 2.70; delegations of authority by Dir., OEO 29 FR 14764, 33 FR 9850.

§ 1806.1 General.

(a) *Authority.* This subpart sets forth the policies and procedures regarding insurance requirements on real property which serves as security for a debt under the Farm Credit Programs of the Farm Service Agency (FSA) or the Multi-Family Housing Programs of the Rural Housing Service (RHS). Any references herein to the Farmers Home Administration (FmHA) or its employees are intended to mean FSA or RHS, as applicable, and their employees.

(b) *Borrower to furnish insurance.* The real estate mortgage executed by the borrower provides that he will furnish and continually maintain and pay for insurance on buildings situated or constructed on the property with companies, in amounts, and on terms and conditions satisfactory to the FmHA or its successor agency under Public Law 103-354 until the loan is repaid.

(c) *Borrower's selection of company.* The borrower may select the insurance company provided that the company and insurance policy comply with all the requirements set forth in this Instruction.

(d) *Responsibility.* The County Supervisor is responsible for taking all actions in connection with insurance as may be necessary to protect the security interest of the FmHA or its successor agency under Public Law 103-354. Any unusual situation that may arise with respect to obtaining or servicing insurance should be referred to the State Director. The State Director will refer any questions of a legal nature to the Office of the General Counsel (OGC).

(e) *Use of Form FmHA or its successor agency under Public Law 103-354 426-1, "Valuations of Buildings."* The minimum insurance required will be indicated in the appraisal report by the employee who makes the appraisal of property that includes insurable buildings. In the case where no real estate appraisal is required or the appraisal report does not indicate the minimum insurance coverage, Form FmHA or its successor agency under Public Law 103-354 426-1 will be prepared by the County Supervisor. Reevaluation of the buildings will not be done on appraisal reports; however, when new buildings are constructed or values increase or decrease materially and reevaluation is necessary to properly reflect the buildings' security interest of the FmHA or its successor agency under Public Law 103-354, the County Supervisor will prepare or revise Form FmHA or its successor agency under Public Law 103-354 426-1 as appropriate. Changes made on an existing Form FmHA or its successor agency under Public Law 103-354

426-1 will be dated and initialed. The reason for any deletion will be noted on the Form.

[41 FR 34571, Aug. 16, 1976, as amended at 61 FR 59777, Nov. 22, 1996]

§ 1806.2 Companies and policies.

Property insurance policies or other evidence of insurance will be accepted from borrowers when the requirements outlined herein are complied with fully.

(a) *Companies.* It is desirable that companies be licensed to do business in the particular State or other jurisdiction where the property is located, or that they be otherwise authorized by law to transact business within such State or other jurisdiction (hereinafter called "State"). If the required insurance is not available locally at comparable rates from an insurance company licensed or otherwise authorized to do business in the State, insurance may be accepted from another company if (1) the OGC advises that policies issued by such company will not be rendered unenforceable by virtue of the company's failure to be licensed or otherwise authorized to transact business in the State and that the company is a legal entity which may be sued in the State where the insured property is located, and (2) the State Director determines that the company is reputable and financially sound. In making the above determinations, the State Director will consider all relevant available information such as that which may be obtained from financial statements, Best's Insurance Reports, State insurance authorities, and other lending institutions.

(b) *Insurance policies—(1) Standard policies.* If a standard fire insurance policy has been adopted for the State, it should be used unless State statutes exempt the company from the regulations requiring its use. The standard policy is one containing substantially the same standard provisions adopted or recommended by legislative action or by order of the supervisory insurance authorities of the State in which the security is located.

(2) *Other policies.* To be acceptable, any other insurance policies must conform to the requirements of this Instruction.

(i) "Homeowner's" policies, "All Physical Loss" policies, "Broad Form" policies, and other such all-inclusive policies are acceptable if they otherwise meet the requirements of this Instruction.

(ii) A builder's risk policy naming the borrower as the insured or a builder's risk endorsement for a policy issued to the borrower may be accepted during the period a building is under construction if the policy otherwise meets the requirements of this Instruction. If such a policy or endorsement does not automatically convert to full coverage when the building is completed, acceptable insurance must be obtained simultaneously with the expiration of the builder's risk provisions of the policy.

(iii) A builder's risk insurance policy issued to a contractor only may not be substituted for the property insurance, the borrower is required to provide.

(iv) Borrowers eligible for insurance under the National Flood Insurance Act of 1968, as amended by the Flood Disaster Act of 1973, will be serviced in accordance with subpart B of this part.

(3) *State instructions.* If the State Director and the OGC consider it advisable, a State Instruction may be issued to help County Supervisors identify standard insurance policies adopted for the State. The Instruction should also furnish a guide to assist in identifying other acceptable insurance policy forms that are commonly used by insurance companies in the State, recognizing that such information is not all inclusive.

(4) *Binders.* Whenever there is a justifiable reason for not issuing a policy or endorsement, as required, a written binder will be acceptable for a period not to exceed 60 days from the effective date of the insurance. The written binder must have attached thereto the approved form of mortgage clause. Such a binder will be submitted to the County Supervisor in lieu of an insurance policy or endorsement and the insurance policy or endorsement will be submitted on or before the expiration date of the binder. The State Director, with the advice of the OGC and subject

to prior approval of the National Office, may issue a State Instruction authorizing such binders to be accepted for periods longer than 60 days.

(5) *Submission of Policies.* (i) For Farmer Program (FP) loans secured by a first lien, the original policy or declaration page must be delivered to the County Supervisor. The original policy or declaration page will be returned to the borrower after one year using Form FmHA or its successor agency under Public Law 103–354 426–4, “Notice of Expiration of Insurance.”

(ii) For Single Family Housing (SFH) loans secured by a first lien, the original policy or declaration page must be delivered to the closing agent.

(iii) In cases where an FP or SFH loan is secured by other than a first lien and the mortgage clauses include the names of the prior mortgagees, a certificate of insurance, copy of the policy, or other evidence of insurance is acceptable.

(iv) The County Supervisor will process an advance to pay for insurance only in strict compliance with provisions of § 1806.6 of this subpart.

(6) *Master sets.* If the master sets meet all of the requirements of this Instruction they may be accepted in lieu of an original policy for each FmHA or its successor agency under Public Law 103–354 borrower.

(i) One complete master set of the different insurance forms for policies issued by the insurance company must be on file in each County Office where the company insures property of FmHA or its successor agency under Public Law 103–354 borrowers.

(ii) The “Declaration Page” furnished by the insurance company for each borrower insured, in lieu of a complete policy, will be filed in the borrower’s case folder. When a “Declaration Page” in the form of a computer printout is used by an insurance company an endorsement on every policy issued by that company or a letter from that company will be obtained and attached to the printout. However, a letter signed by an authorized official of the company and addressed to the State Director may cover all policies issued by that company in the State. Any such endorsements or letters should clearly state that the company consid-

ers the printout to be an original “Declaration Page”. Such endorsements or letters are not necessary if the printout itself clearly states that it is an original “Declaration Page.”

(7) *Name and location.* The policy should contain names of all the borrowers who are owners of the property being insured, and it will be returned for correction if it does not do so. The location of the property should be so described in the policy that the property can easily be identified. The complete legal description of the property by metes and bounds is not required. Any deviation from the requirements of this paragraph must first be cleared with the National Office.

(8) *Loss or damage covered.* Buildings must be insured against loss or damage by fire, lightning, windstorm, hail, explosion, riot, civil commotion, aircraft, vehicles, and smoke.

(9) *Effective date of insurance.* If there are insurable buildings located on the property, the borrower will arrange with his agent or company to have adequate insurance in force at the time the loan, assumption, or credit sale is closed so that the policy will properly insure the borrower and the mortgagees. When new buildings are erected or major improvements are made to existing buildings, such insurance will be made effective as of the date materials are delivered to the property. The County Supervisor will make no payments from loan funds for labor or materials until the borrower has furnished adequate insurance to protect the interest of the FmHA or its successor agency under Public Law 103–354 in the buildings being erected or improved.

(10) *Term.* The borrower will be required to furnish insurance for a term of at least one year with evidence that a full year’s premium is paid. The term “premium” as used herein includes any assessments which may be charged to the borrower. If the assessments are of the type imposed only after a loss occurs involving property insured by the insurance company, then the borrower must present evidence (such as a letter from the company) that he currently does not owe any such assessments. The borrower may receive a discount for insuring for a longer period such as three years or five years and with an

annual premium. If the insurance contains an automatic renewal clause, its provision should be substantially the following to be acceptable to FmHA or its successor agency under Public Law 103-354:

This policy will be automatically extended for successive terms at expiration of the original term and of each extension thereof, upon payment of renewal premiums. It is a condition of this policy that if the policy expires or is canceled for nonpayment of premium, or for any other reason, the mortgagee will be given 10 days notice.

(11) *Mortgage clause.* The standard mortgage clause adopted by the State must be attached to or printed in the policy, or Form FmHA or its successor agency under Public Law 103-354 426-2, "Property Insurance Mortgage Clause (Without Contribution)," must be attached to or the provisions thereof printed in the policy. A letter signed by an authorized official of an insurance company to the State Director, stating that all insurance policies the company issues in the State and in which the FmHA or its successor agency under Public Law 103-354 has a mortgage interest incorporates all of the provisions of Form FmHA or its successor agency under Public Law 103-354 426-2 may be accepted in lieu of attaching Form FmHA or its successor agency under Public Law 103-354 426-2 to each policy. If such a blanket letter is used, the FmHA or its successor agency under Public Law 103-354 will be named in the loss payable clause and a State Instruction will be issued, after prior approval is obtained from the National Office, authorizing the use of such method.

(i) If the use of a mortgage clause, other than the standard mortgage clause (without contribution), has been made mandatory by State laws or insurance regulations, a State Instruction will be issued, after prior approval is obtained from the National Office, authorizing the use of such a form.

(ii) When an approved mortgage clause is printed in the policy a "Loss Payable Clause" is acceptable provided the FmHA or its successor agency under Public Law 103-354, as mortgagee, would receive payment in case of loss even though the company would not be liable to the borrower. A "Loss

Payable Clause" which contains the statement that the mortgagee is "subject to all terms and conditions of the policy" is not acceptable.

(iii) Whenever a new mortgage clause including the interest of the FmHA or its successor agency under Public Law 103-354 is issued after the policy has been in force, the new mortgage clause must be signed by an authorized agent or officer of the company that issued the policy. Form FmHA or its successor agency under Public Law 103-354 426-6, "Transmittal of Property Insurance Mortgage Clause," may be used to transmit the mortgage clause to the insurance official.

(iv) The FmHA or its successor agency under Public Law 103-354 and all other mortgagees whose interests are insured by the policy will be shown either in the mortgage clause or in the "Declaration Page" in the order of priority of their mortgages.

(A) "United States of America (Farmers Home Administration or its successor agency under Public Law 103-354)" will be named in the mortgage clause for direct and insured loan mortgages naming FmHA or its successor agency under Public Law 103-354 as mortgagee, whether in its own right or as trustee under a 2(f) or other agreement with a State Rural Rehabilitation Corporation.

(B) "United States of America (Farmers Home Administration or its successor agency under Public Law 103-354), as first mortgagee or as statutory agent and insurer of such mortgagee," will be named in the mortgage clause for insured FO mortgages naming the lender as mortgagee, whether the mortgage is held by the original or a subsequent lender or by the insurance fund or by FmHA or its successor agency under Public Law 103-354 under a trust agreement or declaration of trust.

(C) If the designation is not identical to that set forth in paragraphs (b)(11)(iv)(A) or (B) of this section, whichever is applicable, it will be sufficient if the mortgagee is readily identifiable as the Farmers Home Administration or its successor agency under Public Law 103-354.

(c) *Evidence of premium payment.* (1) When Form FmHA or its successor

agency under Public Law 103–354 426–2 is attached to or the provisions thereof are printed in the policy, or a blanket letter from an insurance company incorporating the provisions of Form FmHA or its successor agency under Public Law 103–354 426–2 in all policies in which the FmHA or its successor agency under Public Law 103–354 has a mortgagee interest in effect, in accordance with paragraph (b)(11) of this section, no evidence of premium or assessment payment is required except for the first year of the loan. When a subsequent FP or section 502 RH loan is made to build, buy or rehabilitate essential buildings an endorsement to the existing policy including coverage for the property improved will be sufficient.

(d) *Policy restrictions.* (1) Any insurance on essential buildings as defined in §1806.3 having restrictions which limit the amount of collectable insurance must meet the FmHA or its successor agency under Public Law 103–354 requirements set forth below (except for the clause described in paragraph (d)(1)(iv) of this section which is never acceptable); otherwise, such restrictions must be eliminated or modified to afford the required protection.

(i) *Coinurance clause.* This clause generally provides that in consideration of a reduced rate, the borrower agrees to maintain insurance on his buildings up to a specified percentage (usually 80 percent) of their value and that the company will not be liable for a greater proportion of any partial loss than the amount of insurance bears to the specified percentage of either the undepreciated replacement value or the depreciated replacement value (actual cash value) of the buildings at the time of the loss. When the buildings are insured for the specified percentage of their value, the company, in the event of a partial loss, will be liable for the full amount of the loss not to exceed the amount of insurance. A coinurance clause can be accepted only where the amount of insurance is at least equal to the specified percentage of either the undepreciated replacement value or the depreciated replacement value (actual cash value). For example, an 80 percent coinurance

clause can be accepted only where the amount of insurance on each insured building is at least equal to 80 percent of the appropriate replacement value of the insured building.

(ii) *Three-fourths' value clause.* This clause provides that the liability of the company shall be limited to three-fourths of the depreciated replacement value of the buildings covered at the time of the loss, not to exceed the amount of insurance. This clause may be accepted if the unpaid balance of the loan is not greater than three-fourths of the depreciated replacement value of the building and the amount of insurance is at least equal to the unpaid balance of the loan and any prior liens and no building is insured for more than three-fourths of its depreciated replacement value.

(iii) *Loss deductible clause.* (A) For all loans other than RRH, RCH, and LH organizations this clause generally provides that loss to each building to the extent of the limitation is not recoverable. The company is liable only for loss to each building in excess of such limitation stated in the clause. This clause may be accepted where the limitation does not exceed \$150, or one percent of the insurance coverage whichever is greater. In no case, however, may the limitation on any one building exceed \$500.00.

(B) For RRH, RCH, and LH organization loans this clause generally provides that loss to each project to the extent of the limitation is not recoverable. The company is liable only for loss to each project in excess of such limitation stated in the clause. This clause may be accepted where the limitation does not exceed the option shown below that is chosen by the borrower and agreed to by the Loan Approving Official and properly annotated in the borrower file. The borrower and FmHA or its successor agency under Public Law 103–354 Official should consider the economic impact to the project when selecting the appropriate option.

(1) Option 1—Up to one-fourth of one percent (0.0025) of the insurable value. Maximum deductible \$5,000.

(2) Option 2—Up to a maximum deductible of \$500 on any project with an insurable value not exceeding \$200,000.

(3) Option 3—Option 1 may be chosen and increased above the maximum deductible by an amount equivalent to funds specifically escrowed in the project replacement reserve account as an offset to the increased deductible.

(4) Option 4—Option 2 may be chosen and increased above the maximum deductible by an amount equivalent to funds specifically escrowed in the project replacement reserve account as an offset to the increased deductible.

(5) The funds used to increase the deductible in Option 3 or Option 4 may be from project funds if it does not create an unsecure financial situation for the project. Also, non-project funds may be used for Option 3 or 4 and then repaid by withdrawal from the project at the rate of 75 percent of the annual insurance premium savings earned by the amount of escrow deposit, up to the amount deposited.

(6) The funds escrowed to increase the authorized deductible will be placed in the project reserve account as an increased amount in and above the amount required by the Loan Agreement/Resolution and so annotated in the borrower's accounting system.

(iv) *Three-fourths' loss clause.* This clause provides that the company will not pay more than three-fourths of any loss, nor more than three-fourths of the amount of insurance in force. This clause is never acceptable and must be eliminated.

(v) *Deferred loss payable clause.* This clause provides that, if the amount payable under the policy for any loss to any building insured shall be in excess of a specified portion, (usually 60 percent) of the amount of insurance on such building, the company will withhold from its initial loss payment any sum in excess of the specified portion of the amount of insurance on such building. If the building sustaining such loss is repaired or replaced within six months from the date of the fire and at or within 300 feet of the original location, as described in the policy, the company upon receipt of evidence to that effect from the insured will pay the full balance withheld from the initial payment, provided the amount expended in repairing or replacing the building damaged or destroyed will equal or exceed the amount of loss as

determined under the terms of the policy. Failure to repair or replace any insured building within the time and manner provided will constitute acceptance of the initial payment as full and final settlement under the policy with respect to the loss. This clause may be accepted if the amount of insurance is for the full depreciated replacement value (actual cash value) of the building and the unpaid balance of the loan and any prior lien(s) is not greater than the initial loss payment made by the company.

(vi) *Construction specifications and use conditions.* If the insurance policy contains clauses which specify certain standards of construction or prescribes certain uses of the property for the insurance to be valid, the policy is acceptable only if the property meets such specifications or conditions at the time of acceptance. For example, if the policy provides that the chimney be constructed of a certain type of material, the County Supervisor should be assured that the required material has been used, or if the policy provides that farming operations are not carried out on the premises he should be assured that this condition is met.

(2) Policies generally will not be accepted if, under the terms of the policies or local laws, contributions or assessments may be made against the FmHA or its successor agency under Public Law 103-354. However, policies which impose assessments on the borrower may be accepted only if the FmHA or its successor agency under Public Law 103-354 mortgage will be recorded prior to any failure of the borrower to pay any such assessments. Policies also will not be accepted if, by their terms or other conditions, loss payments are contingent upon collective action by the Board of Directors, or the stockholders, or the members.

(e) *Buildings on leaseholds.* The policy will indicate that the insured is the lessee or tenant and not the owner of the buildings securing the FmHA or its successor agency under Public Law 103-354 loan; or, if he is the owner of the building on the leased land, the policy will indicate that the insured is the owner of the building, but not of the land. State Directors, with the advice

§ 1806.3

7 CFR Ch. XVIII (1–1–97 Edition)

of the OGC will issue State Instructions to meet any other special requirements needed to conform with the insurance requirements of the State to enable leaseholders to obtain property insurance for buildings which are security for FmHA or its successor agency under Public Law 103–354 loans.

§ 1806.3 Coverage requirements.

The County Supervisor should encourage the borrower for his own protection to insure for their depreciated replacement value (actual cash value) all essential buildings. Essential buildings include the dwelling and any other buildings that are necessary for the operation of the property or that provide income to assure orderly repayment of the loan. If insurance is for less than the depreciated replacement value of all essential buildings, the County Supervisor will see that the coverage is obtained on one or more of the most essential buildings. The minimum amount of coverage will be furnished as prescribed below:

(a) *Loans secured by a first lien.* (1) When the unpaid balance of the FmHA or its successor agency under Public Law 103–354 loan secured by a first lien is equal to or greater than the depreciated replacement value of the essential buildings, or the cost of adequate essential buildings which can be constructed for amounts less than the depreciated replacement value of the existing buildings, the essential buildings will be insured, to the nearest multiple of insurance that is available, for the lesser of (i) their depreciated replacement value, or (ii) the cost of constructing adequate essential buildings. For example, if insurance is available in only multiples of \$1,000, the minimum insurance required on an essential building valued at \$6,600 would be

\$7,000, and that required on an essential building valued at \$6,400 would be \$6,000.

(2) When the unpaid balance of the loan is less than the sum of the depreciated replacement value of the essential buildings to be insured, the total amount of insurance must be at least equal to the lesser of (i) the unpaid balance of the loan, or (ii) the cost of adequate essential buildings which can be constructed for amounts less than the depreciated replacement value of the existing buildings to be insured.

(3) When, by the use of loan funds or otherwise, buildings are erected or substantial improvements are made to essential buildings, the amount of insurance will be adjusted in accordance with paragraphs (a)(1) or (2) of this section, whichever is applicable.

(b) *Loans secured by other than first liens.* The amount of insurance on buildings in the case of FmHA or its successor agency under Public Law 103–354 loans secured by other than a first lien will be the same as required in paragraph (a) of this section, with the understanding that the unpaid balance of the loan will be deemed for this purpose to be the amount of the total real estate mortgage indebtedness owed all prior mortgagees named in the mortgage clause, plus the debt to the FmHA or its successor agency under Public Law 103–354 which is secured by real estate mortgage.

(c) *Exception of buildings from insurance.* (1) Insurance will not be required on a building:

(i) That is not essential.

(ii) In such a state of disrepair that the cost of insurance would be prohibitive.

(iii) Which has a depreciated replacement value of \$2,500 or less.

(iv) Which is being or has been repaired with a section 504 loan of \$7,500 or less. Families receiving section 504 loans should be encouraged but not required to carry insurance on their home.

(v) On LH security property which was not built or repaired with FmHA or its successor agency under Public Law 103–354 loan funds provided that the State Director determines that the land and other structures adequately

secure the FmHA or its successor agency under Public Law 103-354 loan and any prior liens.

(vi) On which the hazards are so slight because of the character and construction of the building, or the cost of the insurance is so high in comparison with the value of the building that, according to common standards of judgment, it should not be insured, including but not limited to windmills, silos, and fire-cured tobacco barns.

(vii) In cases where the unpaid balance of the FmHA or its successor agency under Public Law 103-354 loans and any prior liens have been reduced to \$2,500 or less, property insurance need not be required if the borrower wants to discontinue it, provided the County Supervisor determines that the value of the land security itself is sufficient to protect the FmHA or its successor agency under Public Law 103-354 in its collection of the amount of the outstanding indebtedness.

(viii) If insurance for windstorm and hail to meet all FmHA or its successor agency under Public Law 103-354 requirements is not available in a hurricane area, the County Supervisor may accept from the borrower or applicant the windstorm and hail insurance policy that most nearly conforms to FmHA or its successor agency under Public Law 103-354 requirements. If such an exception is made, the situation should be fully documented in the borrower's case file. However, if the best insurance policy a borrower or applicant can obtain at the time he receives a loan contains a loss deductible clause for windstorm and hail damage exceeding \$250 or 10 percent of the actual cash value of the buildings, whichever amount is greater, the insurance policy, with an explanation of the reasons why more adequate insurance is not available will be submitted to the State Office for prior approval.

[41 FR 34571, Aug. 16, 1976, as amended at 56 FR 6945, Feb. 21, 1991]

§ 1806.4 Examining and general servicing of insurance.

(a) *Examination by county office of policies, endorsements, binders, and other evidence of insurance.* Upon receipt in the County Office of a policy, endorsement, binder, or other evidence of in-

surance, submitted by a borrower, it will be examined promptly for compliance with the requirements of this Instruction. If the evidence of insurance is found to be acceptable, it will be placed in the borrower's case folder.

(1) *Unacceptable policies.* (i) When the borrower furnishes any policy or other evidence of insurance which does not meet the requirements of this Instruction such policy or other evidence of insurance will be returned to the borrower with the reasons why it is not acceptable.

(ii) If the borrower does not furnish acceptable insurance by the date the previous policy expired or was canceled, the County Supervisor will proceed as provided in § 1806.6.

(2) *Expiration Records and Notices.* After the insurance has been accepted, the expiration date will be inserted on Form FmHA or its successor agency under Public Law 103-354 1905-1, "Management System Card—Individual," or Form FmHA or its successor agency under Public Law 103-354 1905-5, "Management System Card—Individual (Rural Housing Only)," or Form FmHA or its successor agency under Public Law 103-354 1905-10, "Management System Card—Association or Organization," or Form 1905-12, "Monthly Expirations," as provided in FmHA or its successor agency under Public Law 103-354 Instruction 1905-A for servicing the renewal of insurance.

(i) In cases other than those involving FP or section 502 RH borrowers, the County Supervisor will notify the borrower of the expiration of his insurance at least 30 days in advance of such expiration unless he has received written evidence that the insurance has been renewed.

(ii) FP and Section 502 RH borrowers will be informed during the tenth month after the date of loan closing of their responsibility to carry insurance. Form FmHA or its successor agency under Public Law 103-354 426-4 will be sent to these borrowers, regardless of whether there is evidence that the insurance has been renewed. Thereafter, the County Supervisor will not be required to further determine whether the borrower has adequately maintained insurance; however, if a further notice of expiration is received in the

County Office, the County Supervisor will again notify the borrower by using Form FmHA or its successor agency under Public Law 103–354 426–4 of his responsibility.

(3) *Release of mortgage interest.* When the borrower's loan has been paid in full and the satisfaction or release of the mortgage has been executed, the County Supervisor or his delegate will execute the following Release of Mortgage Interest on the mortgage clause attached to the policy or other evidence of insurance and transmit it with the policy or other evidence of insurance, the paid-in-full note, and the satisfaction to the borrower:

It is understood and agreed that the interest of the United States of America in the property insured hereunder ceased as of (Date of Final Payment), and that the Government shall have no interest in any loss or damage to such property occurring thereafter.

(4) *Lost or misplaced policies.* When an unexpired insurance policy or other evidence of insurance is lost or misplaced, it will be necessary to obtain a replacement policy or other evidence of insurance. The County Supervisor is authorized to sign a Lost Policy Receipt on behalf of the FmHA or its successor agency under Public Law 103–354. For FP and section 502 RH loans, this paragraph applies only during the period the policy is retained in the County Office.

(5) *Disposition of expired and canceled policies.* An expired or canceled policy or other evidence of insurance will be returned to the borrower, unless there is a loss settlement pending.

(b) *Special servicing of insurance.* (1) *Vacancy or unoccupancy—tenant occupancy—increased hazard.* If the County Supervisor has knowledge that insured property is vacant or unoccupied or that the ownership or occupancy has changed from owner to tenant, or that the hazards otherwise are increased, he will examine the policy to determine whether the policy permits such conditions. Unless the insurance permits such conditions, the County Supervisor will immediately notify the company or agent in writing. In any case where there is an additional premium due because of vacancy, unoccupancy, tenant occupancy, or other increased hazard, and upon demand to FmHA or its suc-

cessor agency under Public Law 103–354 from the company or agent because the borrower cannot, or will not, pay the additional premium, it may be paid in accordance with FmHA or its successor agency under Public Law 103–354 Instruction 2024–A, to the company or agent. For FP and section 502 RH borrowers, property insurance will not be obtained except in cases where an unusual and severe hazard exists and insurance is necessary to protect the interests of the Government.

(2) *Transfer of property.* (i) When a borrower or transferee requests the consent of FmHA or its successor agency under Public Law 103–354 to a transfer of the security property which already has been made, or when the County Supervisor learns that any such transfer has been made, he will immediately inform the transferee that the mortgage requires the owner to provide and maintain adequate insurance acceptable to, and with loss payable to, FmHA or its successor agency under Public Law 103–354 as mortgagee. The transferee may obtain a new insurance policy or the transferor may have the insurance company or agent issue an endorsement to the current insurance policy changing the name of the assured to that of the transferee. If a new insurance policy is obtained, the old policy or other evidence of insurance will be returned to the transferor unless there is an unsettled loss. If there is an unsettled loss, the policy or other evidence of insurance will not be returned until the claim has been settled. The County Supervisor, with the concurrence of the State Director and the OGC, will notify the borrower and transferee that acceptance of the new policy or endorsement will not constitute consent by the Government to the transfer even though the Government is protected by a loss payable clause in such an insurance policy.

(ii) In a transfer with assumption, insurance will be required in the same amount and according to the same provisions as for an initial loan of the same type.

(3) *Voluntary conveyance of property to the Government and foreclosure.* Insurance will not be carried on buildings which the Government has acquired.

After a foreclosure sale has been held, or after a deed of conveyance to the Government in lieu of foreclosure has been filed for record, insurance will not be maintained by the Government (whether or not subject to redemption).

[41 FR 34571, Aug. 16, 1976, as amended at 42 FR 33262, June 30, 1977; 50 FR 39638, Sept. 30, 1985; 54 FR 35869, Aug. 30, 1989; 57 FR 36590, Aug. 14, 1992]

§ 1806.5 Losses.

(a) *Protecting property.* It is the responsibility of the borrower to immediately notify the County Supervisor and insurance company or agent of any loss or damage to insured property and collect the amount of the loss. When the County Supervisor learns of a loss to property which secures an FmHA or its successor agency under Public Law 103-354 loan, he will:

(1) Check the borrower's casefile for an insurance policy or other evidence of insurance. When a policy or other evidence of insurance has not been retained by the FmHA or its successor agency under Public Law 103-354, such as for FP and section 502 RH borrowers, the County Supervisor will determine whether the property was insured and whether FmHA or its successor agency under Public Law 103-354 was named as mortgagee in the insurance policy.

(2) Determine that the borrower has taken such steps as are necessary to protect the interest of the FmHA or its successor agency under Public Law 103-354 in the security property against further damage. When serious problems arise with respect to protecting the property from further damage, the borrower cannot or will not arrange adequate protection for the property, or when legal action appears to be necessary, the County Supervisor will arrange for emergency protection and immediately refer the case with complete information to the State Director.

(b) *Loss covered by insurance.* (1) If the FmHA or its successor agency under Public Law 103-354 is listed as mortgagee in the insurance policy, the County Supervisor will collect the amount of the loss and may consent to the borrower using funds to repair or replace damaged or destroyed property or to apply loss proceeds to his loan account

or to any prior liens that might exist in the order of their priority.

(2) If the FmHA or its successor agency under Public Law 103-354 is not listed as mortgagee in the insurance policy, the County Supervisor will contact the borrower to determine whether he has received the loss proceeds. If the borrower has received the loss proceeds but not yet paid for improvements to repair or replace the property, or has not received the loss proceeds the County Supervisor will:

(i) Notify the insurance company in writing of the FmHA or its successor agency under Public Law 103-354's interest in the security property and request that the loss proceeds be made payable jointly to the FmHA or its successor agency under Public Law 103-354 and the borrower.

(ii) Inform the borrower of his responsibility for repairing or replacing the damaged or destroyed property or for authorized disposition of the loss proceeds as outlined in paragraph (b)(1) of this section.

(c) *Loss drafts—when loan is secured by a first mortgage.* (1) A loss draft which in the opinion of the County Supervisor represents a satisfactory adjustment of the loss will be endorsed immediately without recourse and deposited in a supervised bank account to be used in repairing or replacing the damaged building, except:

(i) Where the amount of the loss is \$1,000 or less and the borrower will use the funds for repairing or replacing an essential building, the loss draft may be endorsed without recourse and given to the borrower upon satisfactory proof that the repairs or replacements have been made, or upon satisfactory assurance that the work will be performed.

(ii) When (A) the essential buildings are not to be repaired or replaced and other suitable buildings are not to be erected, or (B) a balance remains after all repairs, replacements, and other authorized disbursements have been made, such insurance funds will be applied on prior liens or as an extra payment to the borrower's loan accounts secured by the real estate or disposed of in accordance with the general principles applicable to the use of proceeds from the sale of a part of the security

contained in applicable security servicing regulations for the type loan involved.

(iii) An insurance payment for loss or damage to a nonessential building the borrower voluntarily insured will be (A) applied on prior liens, or to current delinquencies to FmHA or its successor agency under Public Law 103–354 or as an extra payment on the borrower's loan accounts secured by real estate, (B) disposed of as authorized by the State Director in accordance with the general principles applicable to the use of proceeds from the sale of a part of the security contained in applicable security servicing regulations for the type loan involved, or (C) used for other purposes as authorized by the State Director if the loan is adequately secured and the loan account is current.

(iv) When the indebtedness secured by the insured property has been paid in full or the draft is in payment for loss of property on which the FmHA or its successor agency under Public Law 103–354 has no claim, a loss draft which includes the FmHA or its successor agency under Public Law 103–354 as a joint payee may be endorsed without recourse and delivered to the borrower.

(d) *Loss drafts—When loan is secured by other than first mortgage.* (1) When the loss draft does not include the interest of a prior mortgagee, it will be processed as provided in paragraph (c) of this section.

(2) When the loss draft includes the interest of a prior mortgagee, the County Supervisor is authorized to endorse and process the draft as follows:

(i) When the prior mortgagee will permit the use of such loss funds to repair or replace the damaged building, the draft may be endorsed without recourse upon satisfactory proof that the repairs or replacements have been made or upon satisfactory assurance that the work will be performed.

(ii) When the amount of the draft does not exceed the amount of the indebtedness then secured by the prior mortgage as stated in writing by the holder of the prior mortgage, and the holder of the prior mortgage has agreed in a written statement to the County Supervisor that he will apply such funds as a payment on the borrower's

prior mortgage indebtedness, the draft may be endorsed without recourse.

(iii) When the amount of the draft exceeds the amount of the indebtedness then secured by the prior mortgage, as stated in writing by the holder, and he has agreed in writing to pay such indebtedness from the loss funds, the draft will be endorsed without recourse only after all parties named as payees in the draft have signed an agreement to deliver the draft “in escrow” to a bank acceptable to the named parties. The agreement will specify the manner in which the funds will be disbursed by the bank, as escrow agent, to the several mortgagees named in the draft. After the loss funds have been collected by the bank, it will issue cashier's checks in the manner prescribed in the escrow agreement (see exhibit A for suggested form). If this procedure is found to be impractical in an individual instance, the State Director may authorize an alternative method for disbursing the loss funds to protect the Government's financial interest.

(iv) Drafts which have been endorsed by all other payees will be endorsed immediately without recourse. Such drafts or other loss funds will be processed in accordance with the methods described in paragraph (c) of this section.

(e) *Servicing insurance losses under special circumstances—(1) Foreclosures and voluntary conveyances.* Losses on properties in process of foreclosure or voluntary conveyance will be handled with the advice of the OGC. If the necessary cooperation of the borrower cannot be obtained, the State Director, with the advice of the OGC, will determine the proper action to be taken. To the extent feasible from a legal and practical standpoint, all loss payments should be received for a damaged or destroyed building and applied on the borrower's real estate indebtedness before title to the property is taken by the Government through foreclosure sale, voluntary conveyance, or otherwise, unless absolute assignment has been made by the borrower to the Government of all loss funds due from the insurance company.

(2) *Subrogation agreements.* When a company claims nonliability to the borrower and subrogation to the rights

of the FmHA or its successor agency under Public Law 103-354, the County Supervisor will forward a full report of the facts in the case to the State Director. The State Director will upon advice from OGC, instruct the County Supervisor regarding further action to be taken.

(f) *Repairs and replacements.* When any loss payments have been deposited in a supervised bank account, all repairs and replacements done by or under the direction of the borrower, or by contract, will be planned, performed, inspected, and paid for in the same manner as improvements financed with loan funds.

(g) *Completing adjustment.* The borrower must complete the adjustment of the loss with the company or its authorized representatives. The County Supervisor, upon request of the borrower may consult with the borrower regarding the loss adjustment, but will not enter into negotiations with insurance adjusters or company representatives relative to the adjustment or settlement of losses on borrower property, or make any commitments, or sign any forms in connection with the adjustment of the loss. The FmHA or its successor agency under Public Law 103-354 will not waive any rights which it may have against the company except when the borrower's account or the FmHA or its successor agency under Public Law 103-354 claim has been paid-in-full.

(1) The County Supervisor will maintain a proper followup on all losses until satisfactory settlement has been made by the company.

(2) Where the County Supervisor has evidence that the adjustment agreed to by the borrower is significantly less than the amount of damage to which the borrower is entitled under the terms of the policy, the loss draft accompanied by a report will be sent to the State Director so that he may reopen the adjustment, if he considers it is in the interest of the FmHA or its successor agency under Public Law 103-354 to do so.

(3) When it appears evident that the amount of the loss is \$1,000 or less, the County Supervisor may rely on estimates of contractors, building supply firms, reliable carpenters, or other evidence rather than personal inspection

in determining whether the adjustment is equitable and the Government's interest is protected.

(h) *Reinstatement after loss.* In cases where insurance in the amount of the loss is not reinstated automatically by the provisions of the policy, it will be the responsibility of the County Supervisor to have the borrower reinstate as much of the insurance as may be necessary to fulfill the requirements of the FmHA or its successor agency under Public Law 103-354.

(i) *Losses not covered by insurance.* When a loss occurs and insurance is not in force, the County Supervisor will:

(1) Inform the borrower that he has violated the security instrument by not providing insurance coverage and that it is his responsibility to make the needed replacements or repairs.

(2) If the borrower is unable or unwilling to make needed repairs or replacements from his own resources, the County Supervisor will submit complete information to the FmHA or its successor agency under Public Law 103-354 official authorized to determine whether FmHA or its successor agency under Public Law 103-354 will or will not continue with the loan. The County Supervisor's report will include recommendations on the following items:

(i) The advisability and possibility of making a subsequent loan to pay for needed repairs.

(ii) Subordination of the FmHA or its successor agency under Public Law 103-354 real estate lien to permit the borrower to obtain funds for needed repairs from another source.

(iii) The possibility of the borrower obtaining funds secured by a junior lien from another source.

(iv) Whether an advance is needed to protect the Government's interest in the property.

(3) If the loan will not be continued with the borrower, it must be serviced in accordance with the applicable Instructions.

(4) If the borrower has improperly disposed of loss proceeds, the County Supervisor will refer the case with complete information and recommendations to the State Director. The State Director will consult the Regional Attorney when necessary and

§ 1806.6

7 CFR Ch. XVIII (1–1–97 Edition)

advise the County Supervisor as to appropriate servicing actions.

[41 FR 34571, Aug. 16, 1976, as amended at 50 FR 39638, Sept. 30, 1985]

§ 1806.6 Failure of borrower to provide insurance.

When a borrower fails to provide and maintain property insurance which meets the requirements set forth in § 1806.2 of this subpart, every effort will be made to have the borrower provide coverage acceptable to FmHA or its successor agency under Public Law 103–354. It will be emphasized that under the terms of the security instrument, it is the borrower's responsibility to provide and maintain proper insurance coverage. Existing borrowers required to escrow will be notified by letter at least 90 days prior to initiating escrowing for insurance. Failure to provide insurance is a nonmonetary default and will be a consideration in determining if the loan is to be continued. For FP or SFH borrowers *not* required to escrow, the County Supervisor will obtain insurance coverage and voucher for the insurance premium only in cases where: An unusual and severe hazard, such as recurring fires or unstable ground conditions, exists, or, an SFH borrower on a moratorium is unable to pay the insurance premium and the borrower requests that FmHA or its successor agency under Public Law 103–354 pay the premium. For SFH borrowers required to escrow, force placed insurance will be obtained if the borrower fails to provide acceptable insurance. Borrowers being phased into escrow will be given at least 30 days to obtain coverage, after which force placed insurance will be obtained. If the escrow account contains insufficient funds to pay the insurance when due, the County Supervisor will request the borrower to pay an amount equal to the difference between the premium due and the escrow balance in a lump sum within 30 days after notification. If the borrower fails to remit the amount requested, the amount will be advanced and charged to the borrower's account as a recoverable cost. The amortization period for an advance due to an escrow shortage will be one year. Insurance coverage shall be provided continuously unless the property is ac-

quired by FmHA or its successor agency under Public Law 103–354. The cost of obtaining such a policy shall be advanced and charged to the borrower's account as a recoverable cost. Amortization of the charge will be handled in accordance with § 1951.310 of subpart G of part 1951 of this chapter. If a borrower indebted for other than an FP or SFH loan fails to provide acceptable insurance, the Servicing Official will take the following action:

(a) *Expired policies.* (1) The County Supervisor will request the insurance agency or broker who issued the expired policy to issue a new policy which is acceptable to the FmHA or its successor agency under Public Law 103–354.

(i) The new policy will be effective as of the date of the County Supervisor's contact with the insurance agency or broker or as soon thereafter as possible, and will be for a term of one year. If State insurance regulations require a longer term, the State Director will issue a State Instruction authorizing County Supervisors to obtain policies for the minimum period permitted by State insurance regulations.

(ii) The FmHA or its successor agency under Public Law 103–354 will be shown in the loss payable clause and in the mortgage clause in the proper order of priority.

(iii) Insurance coverage on each building usually will be the same as shown on the expired policy if it meets or exceeds FmHA or its successor agency under Public Law 103–354 requirements. If the coverage shown on the expired policy does not meet FmHA or its successor agency under Public Law 103–354 requirements, proper coverage will be obtained.

(iv) The County Supervisor will, if possible, have an automatic renewal provision included in the policy.

(v) If the borrower refuses to pay the insurance premium with his own funds or arrange with the agent for subsequent payment by premium not or otherwise, the County Supervisor will pay the amount of the insurance premium in accordance with FmHA or its successor agency under Public Law 103–354 Instruction 2024–A. The amount of the premium payment will be charged to the borrower's FmHA or its successor

RHS, RBS, RUS, FSA, USDA**§ 1806.6**

agency under Public Law 103-354 account with the highest lien priority as a recoverable cost item.

(vi) If the insurance agency or broker who issued the expired policy refuses to issue a new policy, the County Supervisor will have the borrower designate in writing another insurance agency or broker from whom the insurance can be obtained.

(vii) After the County Supervisor and the borrower exhaust all efforts to obtain acceptable insurance, the County Supervisor will request advice from the State Office as to companies issuing acceptable policies in the State and from which the borrower might be able to obtain an acceptable policy. If the borrower still cannot obtain an acceptable policy from any such company, and the determination has been made to continue with the borrower, the County Supervisor will temporarily accept from the borrower the available insurance policy the FmHA or its successor agency under Public Law 103-354 determines most nearly conforms to the requirements of § 1806.2 of this subpart.

(A) In making this determination, the following deficiencies become more objectionable in the order from (1) to (5) paragraphs (a)(1)(vii)(A) of this section:

(1) A policy written for an initial term of less than one year.

(2) A policy which will insure the most essential buildings but will not cover all essential buildings.

(3) A policy which covers major risks such as fire and lightning, but does not include one or more of the other risks specified in § 1806.2(8).

(4) A policy for a lesser amount of insurance than is required by § 1806.3.

(5) A policy that is issued by a company which is not licensed to do business in the State or otherwise does not meet the requirements of § 1806.3.

(B) Whenever adequate insurance becomes available, the County Supervisor will require the borrower to deliver to the County Office an acceptable insurance policy. The temporary policy will be returned to the borrower for cancellation after all losses claimed under the policy have been settled.

(C) If the borrower is unable to furnish a property insurance policy of any

kind, he is still responsible for the debt in the event of loss.

(D) If the County Supervisor accepts an inadequate insurance policy under these conditions or the borrower fails to furnish any insurance policy, the County Supervisor will include in his report to the State Director an explanation of the efforts he and the borrower made to obtain acceptable insurance and his justification for accepting an inadequate policy, or for not obtaining an insurance policy of any kind.

(b) Insurance canceled for reasons other than nonpayment of insurance premium.

(1) The County Supervisor, immediately upon receipt of a 10-day notice of cancellation for a policy, will urge the borrower to provide acceptable insurance.

(2) If the borrower fails to provide acceptable insurance before the cancellation is effective, the County Supervisor will contact the insurance agency or broker who issued the insurance policy to determine the reasons for cancellation and, if possible, have the policy reinstated.

(3) If the insurance company will not reinstate the policy, the County Supervisor will attempt to obtain an acceptable insurance policy from another agency or broker in accordance with the provisions of paragraph (a) of this section.

(c) Insurance canceled for nonpayment of premium. (1) The County Supervisor, immediately upon receiving a 10-day cancellation notice for a policy, will, if possible, contact the borrower in an effort to have him pay the insurance premium from his own funds or arrange with the agent for subsequent payment by premium note, or otherwise.

(2) If the borrower does not pay or arrange to pay the premium before the policy cancellation is effective, the County Supervisor will, before the cancellation becomes effective, notify the insurance company or broker by certified mail (return receipt requested), that the FmHA or its successor agency under Public Law 103-354 as mortgagee (or trustee) will pay the premium for one year to continue the policy in effect for that period. The County Supervisor will, in accordance with FmHA or its successor agency under Public Law 103-354 Instruction 2024-A, pay the

Pt. 1806, Subpt. A, Exh. A

amount of the premium for a period of one year. The amount of the premium will be charged to the borrower's loan account as a recoverable cost item.

(3) If a property insurance mortgage clause other than Form FmHA or its successor agency under Public Law 103-354 426-2 is used in connection with the policy and the insurance company or broker refuses to accept payment from the FmHA or its successor agency under Public Law 103-354 in this manner to reinstate or continue the policy, the County Supervisor will attempt to obtain an acceptable insurance policy from another insurance company or broker in accordance with the provisions of paragraph (a) of this section.

SOURCE: 39 FR 17093, May 13, 1974, unless otherwise noted.

§ 1806.21 General.

(a) *Authority.* This subpart prescribes the policies and procedures to be followed in implementing the National Flood Insurance Act of 1968 as amended by the Flood Disaster Protection Act of 1973. The provisions of these Acts are applicable to Farmers Home Administration (FmHA) or its successor agency under Public Law 103-354 authorities permitting financing of buildings of any type now located in or to be located in special flood or mudslide prone areas as designated by the Federal Insurance Administration (FIA) of the Department of Housing and Urban Development (HUD), and any machinery, equipment, fixtures and furnishings contained or to be contained therein.

(b) *Background.* The Congress has found that annual losses throughout the nation caused by floods and mudslides are increasing at an alarming rate, largely as a result of the accelerated development and concentration of populations in areas subject to floods and mudslides. The availability of Federal funds in the form of loans, grants, guarantees, insurance and other forms of financial assistance are often determining factors in the utilization of land and the location and construction of industrial, commercial and residential facilities.

(c) *Scope.* The National Flood Insurance Program (the program) was authorized and created because the private insurance industry has been unable to provide insurance coverage at reasonable prices for such natural disasters as floods and mudslides. Subsidized and affordable insurance has been made available under the Act through an agreement between the Federal Insurance Administration and

the National Flood Insurers Association.

§ 1806.22 Areas of responsibility.

(a) *Federal Insurance Administration (FIA)*. (1) Identify and publish information with respect to all areas in the country which are subject to floods and mudslides and designate those areas on Flood Hazard Boundary maps.

(2) Notify affected communities of their designations and encourage them to adopt and enforce land use and other control measures and to adopt ordinances or laws which will regulate and control construction in areas designated as having special flood or mudslide hazards.

(3) Make flood insurance available at reasonable rates in sufficient amounts, within the statutory limits, to adequately protect owners against loss to their buildings and contents when those buildings are located in or will be located in designated special flood and mudslide prone areas in communities participating in the National Flood Insurance Program.

(b) *Farmers Home Administration or its successor agency under Public Law 103-354*. The State Director, after being notified by the FmHA or its successor agency under Public Law 103-354 National Office or FIA of designated flood or mudslide hazard areas and receiving flood hazard boundary maps identifying the hazard areas, FIA insurance rate charts, or other information concerning the program, will inform the appropriate County Supervisors and provide them the maps, rate charts, and other relevant information concerning the program in areas they serve. Permanent records indicating the date a community was notified as containing identified flood hazard areas, communities participating in the program, and communities eligible to participate but not participating in the program will be maintained in the State Office. County Supervisors will notify, in writing, those borrowers whose insurable buildings are located in designated flood or mudslide hazard areas of the availability of national flood insurance and encourage them to obtain flood insurance to protect their and the Government's financial interest.

(c) *Community*. Communities are required to participate in the National Flood Insurance Program within 1 year after notification of its formal identification as a community containing one or more special flood and mudslide prone areas, or by July 1, 1975, whichever is later, or be denied Federal financial assistance or Federally-related financial assistance for acquisition or construction purposes in such areas. Communities wishing to qualify for the program may submit a completed application to: Administrator, Federal Insurance Administration, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410.

(d) *Lender*. The lender must determine whether real property is located in an area identified as having special flood or mudslide hazards and cannot discharge the responsibility merely by obtaining a self-certification from the applicant that the property is not located in an area having special flood hazards.

§ 1806.23 Definitions.

For the purpose of this subpart, the following definitions apply:

(a) *Financial assistance* means any form of direct, insured or guaranteed loan, including reamortization and assumption on new terms of any loan, any form of grant, or other form of direct or indirect assistance extended by the FmHA or its successor agency under Public Law 103-354.

(b) *Financial assistance for acquisition or construction purposes* means any form of Federal financial assistance which is intended in whole or in part for the acquisition, construction, reconstruction, or substantial improvement of any building and for any machinery, equipment, fixtures and furnishings contained or to be contained in such buildings.

(c) *Community means* any state or political subdivision thereof, such as county, parish, township, city or other local government which has zoning and building code jurisdiction over a particular area having special flood hazards.

(d) *Eligible community* means a community in which the Administrator of

§ 1806.24

FIA has authorized the sale of flood insurance under the program.

(e) *Designated special flood or mudslide prone area* means those areas in a community subject to flood or mudslide which have been identified by flood hazard boundary maps or those areas not identified by maps but where, due to emergency, the FIA Administrator has authorized the sale of flood insurance.

(f) *Flood* means a general and temporary condition of partial or complete inundation of normally dry land areas from the overflow of streams, rivers, or other inland water, the collapse or subsidence of land along the shore of a lake or other body of water as a result of erosion or undermining caused by waves or currents of water exceeding anticipated cyclical levels, or abnormally high tidal water or rising coastal waters resulting from severe storms, hurricanes, or tidal waves resulting from volcano eruptions or earthquakes.

(g) *Mudslide or mudflow* means a major occurrence involving the appearance of a large river or flow of "liquid mud" down a hillside, usually as a result of earlier brushfires followed by heavy rains over a widespread area.

(h) *Flood insurance* means insurance coverage for floods and/or mudslides under the program or otherwise acceptable to FIA.

(i) *Building* means any walled and roofed structure, other than a gas or liquid tank, that is principally above ground and affixed to a permanent site. Residential and most types of industrial, commercial, and agricultural buildings, such as lumber sheds, machinery storage sheds, grain storage bins, and silos, are included in this definition.

(j) *Substantial improvement* means any repair, reconstruction or improvement of a structure, the cost of which equals or exceeds 50 percent of the actual cash value of the structure either before the improvement is started or, if the structure has been damaged and is being restored, before the damage occurred.

§ 1806.24 Eligibility.

In addition to an applicant meeting the requirements for the type of financial assistance requested, the following requirements for eligibility of appli-

7 CFR Ch. XVIII (1-1-97 Edition)

cants for financial assistance for acquisition and construction purposes in designated special flood and mudslide prone areas must be met:

(a) If flood insurance is available, to be eligible after March 1, 1974, the applicant must have purchased a flood insurance policy at the time the loan or grant is closed.

(b) Applicants will not receive financial assistance in those communities that have been notified as having special flood and mudslide prone areas and where flood insurance is not available within 1 year after such notification or by July 1, 1975, whichever is later.

§ 1806.25 Conditions.

FmHA or its successor agency under Public Law 103-354 financial assistance may be extended to eligible applicants meeting the eligibility requirements of § 1806.24 of this subpart, provided the following conditions are also met:

(a) *Dwelling and multi-unit housing facilities.* (1) If the financial assistance is to buy a dwelling or multi-unit housing facility:

(i) The first floor elevation of the habitable space of the dwelling or housing unit must be above the 100-year flood level.

(ii) The housing must be served by public utilities and facilities, such as sewer, gas, electrical and water systems that are located and constructed to minimize or eliminate flood damage, or have an onsite water supply system and waste disposal system located so as to avoid impairment of such systems and contamination from the waste disposal system to the water supply system from flooding.

(2) If the financial assistance is to build or provide substantial improvement, the requirements of paragraph (a)(1) of this section must be met and all construction must meet requirements of the applicable development standards, and:

(i) A building permit must be issued by the appropriate governing officials having jurisdiction in the area and compliance must be had with the zoning code or other established legal requirements of the area for reducing or eliminating flood or mudslide damage.

(ii) The structure must be designed and anchored to prevent flotation, collapse or lateral movement of the structure.

(iii) Construction materials and utility equipment that are resistant to flood damage must be used.

(iv) Construction methods and practices that will minimize flood damage must be followed.

(3) If the financial assistance is to make minor repairs, the conditions of paragraphs (a)(1) (i) and (ii) and (2) (i), (ii) and (iii) of this section must be met or the building must have existed on the site prior to the date the area was identified as having special flood or mudslide hazards and the loan approval official must determine that the dwelling is suitable as a residence.

(4) When applications for financial assistance are received in areas identified as having special flood and mudslide hazards, the loan approval official will consider the expected severity and frequency of floods and mudslides in determining whether any housing loans should be made in the area. He should be sure, if loans are made, that the objectives of the loans can be accomplished and the Government's financial interest will be adequately protected.

(b) *Nonresidential buildings.* Construction plans and specifications for new buildings or improvements to existing buildings must comply with flood plain area management or control laws, regulations or ordinances.

(c) *Flood insurance coverage.* (1) Any property on which flood insurance is required must be covered by such insurance during its anticipated economic and useful life in an amount at least equal to its development or replacement cost (except estimated land cost), or to the maximum limit of coverage made available with respect to the particular type of property under the National Flood Insurance Program, whichever is less. However, if the financial assistance provided is in the form of a loan, the amount of flood insurance required need not exceed the outstanding principal balance of the loan and need not be required beyond the term of the loan.

(2) The contents of a building must be insured separately from a building but coverage cannot be written on the

contents of a three-walled machinery shed or similar type open building.

(3) Flood insurance shall not be required on any state owned property that is covered under an adequate state policy of self-insurance satisfactory to the Secretary of HUD, who will publish a list of states with such policies.

(4) It will be emphasized that under the terms of the security instrument it is the borrower's responsibility to provide and maintain proper flood insurance coverage. If flood insurance is not provided on any property for which it is required, the flood insurance premium will be paid to protect the Government's security interest. For borrowers required to escrow for flood insurance, payment of the premium will be handled in accordance with § 1806.28 of this subpart. Existing borrowers required to escrow will be notified by letter at least 90 days prior to initiating escrowing for flood insurance. If FmHA or its successor agency under Public Law 103-354 pays the flood insurance premium for borrowers not required to escrow, the cost will be charged to the borrower's account as a recoverable cost. Failure to provide flood insurance is a nonmonetary default and will be a consideration in determining if the loan is to be continued.

[39 FR 17093, May 13, 1974, as amended at 52 FR 8002, Mar. 13, 1987; 56 FR 6945, Feb. 21, 1991]

§ 1806.26 Coverage and premium rates.

Exhibit A sets forth limits of coverage and chargeable premium rates under the program. Insurance policies under the program can be obtained from any licensed property insurance agent or broker serving the eligible community or from the National Flood Insurers Association Serving Company (Serving Company) for the state. The Servicing Company for each state is shown in exhibit B.

§ 1806.27 Acceptable policies and servicing.

The general acceptance of policies and servicing of insurance will be performed in accordance with Subpart A of this part. Any unusual situations that may arise with respect to obtaining or servicing flood insurance should be referred to the State Director. The

§ 1806.28

State Director will attempt to resolve any problems concerning the flood insurance program in the state with the Servicing Company. Flood hazard boundary maps, insurance rate tables, the insurability of specific structures, and other information concerning the program may be obtained from the Servicing Company. Difficulties in administering the program which the State Director is unable to resolve should be referred to the National Office for Assistance.

§ 1806.28 Borrowers required to escrow.

For borrowers required to use escrow accounts for the payment of real estate taxes and insurance, the flood insurance premium will be paid when due from funds contained in the escrow account. If the escrow account contains insufficient funds to pay the flood insurance premium when due, the County Supervisor will request the borrower to pay an amount equal to the difference between the premium due and the escrow balance in a lump sum within 30 days after notification. If the borrower fails to remit the amount requested, the amount will be advanced and charged to the borrower's account as a recoverable cost. The amortization period for an advance due to an escrow shortage will be one year. Amortization of the charge will be handled in accordance with § 1951.310 of subpart G of part 1951 of this chapter. When a borrower has more than one loan secured by the real estate on which the flood insurance premium is being paid, the advance will be charged to the initial or lowest numbered loan.

[56 FR 6946, Feb. 21, 1991]

EXHIBIT A TO SUBPART B—COVERAGE AND PREMIUM RATES

1. The following table sets forth the limits of coverage available under the program:

Type of structure	Structure coverage		Contents of coverage ⁴	
	Sub-sidized	Total ³	Sub-sidized	Total ³
Single family, residential ¹	\$35,000	\$70,000	\$10,000	\$20,000
All other, residential ¹	100,000	200,000	10,000	20,000

7 CFR Ch. XVIII (1–1–97 Edition)

Type of structure	Structure coverage		Contents of coverage ⁴	
	Sub-sidized	Total ³	Sub-sidized	Total ³
All nonresidential ²	100,000	200,000	100,000	200,000

¹For Alaska, Hawaii, and the Virgin Islands, the following limits of coverage apply: Structure coverage for one family residential is \$50,000 subsidized and \$100,000 total coverage, and structure coverage for other residential is \$150,000 subsidized and \$300,000 total coverage.

²Includes hotels and motels with normal occupancy of less than 6 months.

³Coverage in amounts exceeding the subsidized limits is available only after an actuarial cost has been established and flood insurance rate may be issued.

⁴Contents of a building must be insured separately from the building. However, coverage is applicable to contents only while in an enclosed building. Therefore, coverage cannot be written on the contents of a three-walled machinery shed or a similar type open building.

2. The following table sets forth the applicable premium rates:

Type of structure	Rates per \$100 of coverage (subsidized only)	
	Structures	Contents
All residential	¹ \$0.25	\$0.35
All nonresidential	¹ .40	.75

¹Actuarial (nonsubsidized) rates are applicable to any structure, the construction or substantial improvement of which started after Dec. 31, 1974, or the date on which the initial rate map was issued, whichever is later, in identified areas having special flood or mudslide hazards.

EXHIBIT B TO SUBPART B—SERVICING COMPANY

The servicing company office to be contacted for information relative to the availability of coverage under the national flood insurance program, flood hazard boundary maps, insurance rate tables, and related material.

Subpart B—[Reserved]

AUTHORITY: 7 U.S.C. 1989; 14 U.S.C. 1480; 7 CFR 2.23; 7 CFR 2.70.

Subpart A—Interest Rates, Amortization, Guarantee Fee, Annual Charge, and Fixed Period

§ 1810.1 Information concerning interest rates, amortization, guarantee fee, annual charge, and fixed period.

(a) Tables for computing the interest rates (including the annual charge rates and length of fixed period for initial repurchase agreement for insured loans), tables for use in determining the amounts of interest on loans at different rates, tables providing factors in amortizing loans, and the guarantee fee for guaranteed loans, may be obtained from any County, District, or State Office of FmHA or its successor agency under Public Law 103-354 or from its National Office at 14th and Independence Avenue SW., Washington, DC 20250.

(b) In the event that the tables provided for in paragraph (a) of this section do not furnish adequate information, questions should be directed to the Assistant Administrator, Finance Office, Farmers Home Administration or its successor agency under Public Law 103-354, 1520 Market Street, St. Louis, Missouri 63103.

[56 FR 11503, Mar. 19, 1991]

§ 1810.2 Adjustment of interest rates for certain loans involving use of or construction on prime or unique farmland.

(a) For essential community facility loans, insured farm ownership loans for recreation or non-farm enterprises, insured farm operating loans for recreation enterprises, soil and water loans for recreation purposes, individual recreation loans, and insured business and industry loans, the interest rate will be increased by two per centum per annum if the project being financed will involve the use of, or construction on, prime or unique farmland. Prime or unique farmland is as defined in § 657.5 (a) and (b) of title 7, Code of Federal Regulations (1980).

(b) The two per centum interest rate increase will not apply if the applicant/borrower is a public body or Indian tribe and has demonstrated to FmHA or its successor agency under Public Law 103-354 that there are no suitable options for locating the proposed essential community facility project on land that is not prime or unique farmland.

(c) For each essential community facility loan and insured business and industry loan the District Director, after consultation with the Soil Conservation Service (SCS), will determine whether the proposed project will involve the use of, or construction on, prime or unique farmland. For each insured farm ownership loan for a recreation or non-farm enterprise, insured farm operating loan for a recreation enterprise, soil and water loan for a recreational purpose, or individual recreation loan, the County Supervisor, after consultation with SCS, will determine whether the proposed project will involve the use of, or construction on, prime or unique farmland. The determination will be documented by FmHA or its successor agency under Public Law 103-354 and made a part of the official case file.

SOURCE: 35 FR 16087, July 1, 1970, unless otherwise noted.

§ 1822.261 General.

This subpart sets forth the policies and procedures and delegates authority for making Rural Housing Site (RHS) loans under sections 523 and 524 of the Housing Act of 1949. Any processing or servicing activity conducted pursuant to this subpart involving authorized assistance to FmHA or its successor agency under Public Law 103–354 employees, members of their families, known close relatives, or business or close personal associates, is subject to the provisions of subpart D of part 1900 of this chapter. Applicants for this assistance are required to identify any known relationship or association with an FmHA or its successor agency under Public Law 103–354 employee. Section 523 loans are direct loans for the purchase and development of building sites for housing to be built by the self-help method; they have additional requirements which are contained in § 1822.278.

[35 FR 16087, July 1, 1970, as amended at 58 FR 224, Jan. 5, 1993]

§ 1822.262 Objective.

The basic objective of RHS loans is to assist public or private nonprofit organizations interested in providing sites for housing, to acquire and develop land in rural areas. This land will be subdivided into adequate building sites and sold on a nonprofit basis to (a) families eligible for low and moderate income section 502 Rural Housing (RH) loans, including self-help housing; (b) cooperative Rural Cooperative Housing (RCH) applicants and broadly based nonprofit Rural Rental Housing (RRH) applicants; and (c) applicants eligible for Housing and Urban Development (HUD) sections 235 and 236 insured mortgages.

§ 1822.263 Definitions.

As used in this subpart:

(a) A *private nonprofit organization* is a corporation which: is owned and controlled by private persons; is organized and operated for purposes other than

making gains or profits for the corporation or members; and, is legally precluded from distributing to its members any gains or profits.

(b) A *public nonprofit organization* is a nonprofit corporation other than a private nonprofit corporation, including a municipal corporation or other corporate agency of a State or local government.

(c) *Rural area* is open country or rural places as defined in § 1944.10 of subpart A.

(d) *Development cost* means the cost of purchasing and developing the sites including engineering and legal fees, streets, roads, utilities, minimum essential administrative costs, necessary equipment and estimated interest which the borrower cannot pay from other sources.

(e) *RHS section 523 loan* means a loan to an organization which will provide sites for housing to be built by the self-help method.

(f) *RHS section 524 loan* means a loan to an organization which will provide sites for housing to be built with no limitation as to the method of construction that will be used.

(g) *OGC* means the Office of the General Counsel, including the regional attorney or attorney in charge serving the State in which the RHS project is located.

[35 FR 10687, July 1, 1970, as amended at 40 FR 52837, Nov. 13, 1975; 46 FR 61989, Dec. 21, 1981]

§ 1822.264 Eligibility requirements.

(a) *Eligibility of applicant.* To be eligible for an RHS loan, the applicant must be a private or public nonprofit organization as defined in § 1822.263 (a) or (b) which is authorized to provide housing sites on a nonprofit basis.

(1) If it is a private nonprofit organization as defined in § 1822.263(a), it should also:

(i) Have a membership of at least 10 community leaders.

(ii) Plan to adopt, if it is being newly organized, articles of incorporation and bylaws that generally conform to model articles and bylaws provided by the State director which will be consistent with State law and with changes appropriate to the purposes

and powers of an eligible applicant under this subpart.

(b) *Authorized representative of applicant.* The Farmers Home Administration (FmHA) or its successor agency under Public Law 103-354 will deal only with the applicant or bona fide representative or the applicant or the representative's technical advisors. An authorized representative of the applicant must have no pecuniary interest in the award of the engineering, architectural or construction contracts, necessary equipment, or the purchase or development of the land.

§ 1822.265 Loan purposes.

RHS loans may be made to qualified applicants:

(a) For the purchase and development of adequate sites, including the construction of essential access roads, streets, utility lines, and necessary equipment which will become a permanent part of the development. If public water and waste disposal facilities are not available and cannot reasonably be provided on a community basis with other financing, including FmHA or its successor agency under Public Law 103-354 Water and Waste Disposal Association loans, funds may be included for this purpose.

(b) For the payment of necessary engineering fees, legal fees, and closing costs.

(c) For the payment of actual cash cost of incidental administrative expenses such as postage, telephone, advertising, and temporary secretarial help, if funds to pay these expenses are not otherwise available. The estimated cost of these items should be identified and shown in the budget.

(d) To provide for needed landscaping, planting, seeding, or sodding, or other necessary facilities related to buildings such as walks, parking areas, and driveways.

(e) When legally required by proper local, county, and State Governmental bodies as a condition for subdivision approval, RHS loan funds may be used to provide common areas playgrounds and tot lots, provided such facilities

§ 1822.266

are dedicated to, and maintained by, a public body.

(42 U.S.C. 1480; delegation of authority by the Sec. of Agri., 7 CFR 2.23; delegation of authority by the Asst. Sec. for Rural Development, 7 CFR 2.70)

[35 FR 16087, July 1, 1970, as amended at 43 FR 24264, June 5, 1978]

§ 1822.266 Limitations.

(a) *Loan limits.* No RHS loan(s) will be made to any applicant which will result in the applicant's owning an unpaid principal balance of more than \$100,000 on such loan(s) unless prior authorization for a larger loan is obtained from the national office. No such loan will exceed the development cost as defined in § 1822.263(d), or the value of the property as improved with the loan. These limitations also apply to cases in which the same persons hold a majority of the membership interests or constitute a majority of the directors of two or more applicants.

(b) *Limitations of use of loan funds.* Loans will not be made for:

(1) The purchase of land in excess of the immediate and identified needs in the locality.

(2) The purchase of land from a member of an applicant-organization, or from another organization in which any member of the applicant-organization has an interest, without prior consent of the national office.

(3) Refinancing of debts, except in accordance with paragraph (e) of this section.

(4) Payment of any fee, charge, or commission to any broker, negotiator, or other person for the referral of a prospective applicant or solicitation of a loan.

(5) Payment of any fee, salary, commission, profit, or compensation to an applicant, or to any officer, director, trustee, stockholder, member or agent of an applicant, except as provided in § 1822.265(b). No contract or agreement for services to be paid for with loan funds should be executed by the applicant without prior approval by the State director.

(c) *Sale of developed sites.* The sites developed with a section 524 loan must be for housing low- and moderate-income families and may be sold to families, nonprofit organizations, public agen-

7 CFR Ch. XVIII (1-1-97 Edition)

cies, and cooperatives eligible for assistance under any section of title V of the Housing Act of 1949, or under any other law which provides financial assistance. For example, this may include:

(1) Individuals with low and moderate incomes eligible for HUD mortgages.

(2) Individuals with low and moderate incomes eligible for VA guaranteed loans.

(3) Individuals with low or moderate incomes eligible for a loan from any private lender which is authorized by law to provide financial assistance for housing.

(4) Nonprofit organizations funded by Federal, State, or local governments carrying out programs for low- and moderate-income families to obtain housing.

(5) State or local public agencies such as a housing authority or a housing finance development agency carrying out programs for low- and moderate-income families to obtain housing.

(d) *Suitability of sites.* Sites will meet the requirements of the planned use; for example, individual housing or multiple housing or any combination thereof. Building sites must be well located and designed to provide a desirable living environment. Generally a loan will not be made for the development of less than 10 units, but they need not be contiguous.

(e) *Obligations incurred before loan closing.* When an applicant files an application for a loan, the county supervisor will advise the applicant that development work must not be started and obligations for work, materials, or land purchase must not be incurred before the loan is closed. If, nevertheless, the applicant incurs obligations for work, materials, or land purchase before the loan is closed, the State director may authorize the use of loan funds to pay such obligations only when he finds that all the following conditions exist:

(1) The obligations were incurred after the applicant filed a written application for a loan.

(2) The applicant is unable to pay such obligations from its own resources or to obtain credit from other sources, and failure to authorize the use of loan

funds to pay such debts would impair the applicant's financial position.

(3) The obligations were incurred for authorized loan purposes.

(4) Contracts, materials, development and any land purchase meet FmHA or its successor agency under Public Law 103-354 standards and requirements.

(5) Payment of the obligations will remove any liens which have attached, and any basis for liens that may attach, to the property on account of such obligations or such work, materials, or land purchase.

[35 FR 10687, July 1, 1970, as amended at 40 FR 6951, Feb. 18, 1975]

§1822.267 Special conditions.

(a) *Evidence of need.* Loans will be made on the basis of the applicant providing firm information as to the number of sites to be developed and evidence of a need for the proposed building sites in the locality.

(b) *Nondiscrimination.* The borrower will be required to agree not to discriminate or permit discrimination, in accordance with section 3 of the loan resolution form “(‘Rural Housing Site’ Loan to Nonprofit Corporation),” available at all FmHA or its successor agency under Public Law 103-354 offices.

(c) *Supervisory assistance.* Supervision will be provided borrowers to the extent necessary to achieve the objectives of the loan and to protect the interests of the Government. County supervisors will counsel with applicants in selecting locations that will provide essential services and facilities and will result in the development of desirable residential communities.

(d) *Loan resolution.* A Loan Resolution will be adopted by the applicant's Board of Directors or similar governing body using a form entitled, “((Rural Housing Site) Loan to Nonprofit Corporation)” available at all FmHA or its successor agency under Public Law 103-354 offices. If any provisions are not appropriate to a particular case, proposed substitute language should be submitted to the national office with the recommendations of the State director.

(e) *Development policies.* Development will be planned and performed in accordance with subparts A and C of part 1924 of this chapter, and certain infor-

mation in a guide entitled “Planning and Developing Building Sites” available at all FmHA or its successor agency under Public Law 103-354 offices.

(f) *Water and waste disposal facilities.* If public water and waste disposal facilities are not available and these facilities will be provided on a community basis with funds included in the RHS loan or with other financing, provision should be made to form an organization with members who will provide continuing maintenance and management of facilities. The cost of the facilities should be considered as a cost of developing the sites and included in the price charged for the lots when they are sold.

(g) *Compliance with local codes and regulations.* Planning and development of sites will comply with all State, county, and local planning and zoning requirements, and will be for housing that will conform with any applicable laws, ordinances, codes, and regulations governing such matters as construction, heating, plumbing, electrical installation, fire prevention, health, and sanitation.

(h) *Optioning of land.* If a loan includes funds to purchase real estate, the applicable provisions of subpart A of part 1943 regarding options will be followed. After the loan is approved, the county supervisor will have Form FmHA or its successor agency under Public Law 103-354 440-35, “Form Letter—Acceptance of Option,” or other appropriate form of acceptance, completed, signed by the applicant, and mailed to the seller.

(i) *Use of and accountability for loan funds.* Supervised bank accounts will not be used except when their requirement is made or authorized by the State director for cases where adequate bonding is not available. If a supervised bank account is used, collateral for deposits of funds will be pledged when the supervised bank account exceeds \$100,000. All loan funds and funds from other sources to be used to pay the development costs of the site, as well as proceeds from the sale of any sites, will be deposited in accordance with part 1902, subpart A of this chapter. The county supervisor will see that funds for land purchase are paid to the seller simultaneously with loan closing.

After the loan is closed, monthly reports will be provided to FmHA or its successor agency under Public Law 103–354 of all disbursements made and income received by the borrower. Reports for each month will be submitted to the FmHA or its successor agency under Public Law 103–354 county office during the first 10 days of the next month. No expenditures will be made without prior FmHA or its successor agency under Public Law 103–354 consent for items which are not included in the FmHA or its successor agency under Public Law 103–354 approved development cost estimate or for amounts greater than those set forth in such estimate.

(j) *Insurance.* The State director will determine the minimum amounts and types of insurance the applicant will carry.

(1) Suitable workman’s compensation insurance will be carried by the applicant for all its employees.

(2) The applicant will be advised of the possibility of incurring liability and encouraged, or required when appropriate, to obtain liability insurance.

(k) *Bonding.* (1) Approved corporate surety bonds will be required in all cases involving a development contract in excess of \$20,000, unless an exception is made by the national office. In other cases, the county supervisor will determine whether a surety bond is required.

(2) The applicant will provide fidelity bond coverage for its officers and employees entrusted with the receipt, custody, and disbursement of its funds and the custody of any other negotiable or readily saleable personal property. The amount of the bond will be at least equal to the maximum amount of such funds including funds in bank accounts, and property that the applicant will have in its possession or control at any one time. If permitted by State law, the United States will be named coobligee in the bond. Form FmHA or its successor agency under Public Law 103–354 440–24, “Position Fidelity Schedule Bond,” may be used if permitted by State law.

(l) *Conditional commitments for construction of homes on developed sites.* Conditional commitments may be issued on sites developed with an RHS

section 524 loan to permit homes to be constructed on sites prior to the sale of the site to an eligible purchaser in accordance with the following:

(1) The requirements of § 1944.45 of part 1944, subpart A must be met and a conditional commitment issued prior to the start of construction of the home.

(2) The conditional commitment must be issued to an RHS borrower who can legally provide the proposed housing and has the experience and training in construction to the extent necessary to assure that the housing will be built or jointly to the RHS loan borrower and a builder who has the legal capacity, training and experience necessary to construct the housing. In all cases the following language will be added under “other conditions” on Form FmHA or its successor agency under Public Law 103–354 1944–11, “Conditional Commitment”:

(i) “Notwithstanding the other provisions of this commitment the sale of completed homes on sites developed with section 524 Rural Housing Site loans will be limited to families eligible for assistance under any section of title V of the Housing Act of 1949 or under any other law which provides financial assistance for housing low- and moderate-income families. The approval of FmHA or its successor agency under Public Law 103–354 will be obtained prior to the sale of each home. The request for approval shall be submitted to the local FmHA or its successor agency under Public Law 103–354 office along with an application for an RH 502 loan or a financial statement from the purchaser and verification of the other credit that is available.”

(ii) The benefits of the nonprofit development of the site(s) must be passed on to the purchaser. This will result in this site being sold for \$—— (price to be determined as provided for in (§ 1822.275(b))).

(3) In arriving at the commitment price for the site and the completed home, the value will be based on the present market value of the house only, plus the nonprofit selling price of the lot.

(4) If in order to obtain interim financing for the construction of the homes, the RHS loan borrower requests

RHS, RBS, RUS, FSA, USDA**§1822.270**

a subordination by FmHA or its successor agency under Public Law 103-354 on individual lots, the State Director may approve the subordination by completing and executing a subordination in the format of exhibit C of this subpart.

(5) FmHA or its successor agency under Public Law 103-354's lien on any lot will be released only at the time of sale to an eligible purchaser.

(6) The County Supervisor should provide the necessary supervision to assure that the RHS loan borrower takes the necessary action to assure that all qualified builders in the area are aware of the availability of rural housing sites and are given an equal opportunity to participate in this conditional commitment program. As a minimum, the borrower will be required to submit a signed statement indicating the actions taken including names and dates of contacts with builders.

(7 U.S.C. 1989; 5 U.S.C. 301; sec. 10, Pub. L. 93-347, 88 Stat. 392; 42 U.S.C. 1480; delegation of authority by the Sec. of Agr., 7 CFR 2.23; delegation of authority by the Asst. Sec. for Rural Development, 7 CFR 2.70)

[35 FR 16087, July 1, 1970, as amended at 41 FR 47460, Oct. 29, 1976; 42 FR 44669, Sept. 6, 1977; 43 FR 24264, June 5, 1978; 44 FR 1702, Jan. 8, 1979; 45 FR 39793, June 12, 1980; 46 FR 36106, July 14, 1981; 46 FR 61989, Dec. 21, 1981; 52 FR 8002, Mar. 13, 1987; 52 FR 19283, May 22, 1987]

§1822.268 Rates, terms, and source of funds.

(a) *Interest rate.* Upon request of the applicant, the interest rate charged by FmHA or its successor agency under Public Law 103-354 will be the lower of the interest rates in effect at the time of loan approval or loan closing. If an applicant does not indicate a choice, the loan will be closed at the interest rate in effect at the time of loan approval. Interest rates are specified in exhibit B of FmHA or its successor agency under Public Law 103-354 Instruction 440.1 (available in any FmHA or its successor agency under Public Law 103-354 office) for the type assistance involved.

(b) *Repayment period.* Final payment will be due 2 years after the date of the loan. When necessary to carry out the loan purposes, the national office may authorize extension of maturity dates.

As lots are sold before the final due date of the note, the proceeds of the sales will be applied on the account or any prior lien, or, with the prior approval of the national office, used in a manner consistent with the purposes of the loan and the security interest of the Government.

(c) *Source of funds.* Loans under this subpart will be made as insured loans, except that loans under §1822.278 to develop building sites for sale in connection with self-help projects will be made as direct loans.

[35 FR 10687, July 1, 1970, as amended at 51 FR 6733, Feb. 26, 1986]

§1822.269 Security.

Each loan will be secured by a mortgage on the property purchased or improved with the loan, and a security interest in the funds held by the corporation in trust for the Government, in accordance with the provisions of the required Loan Resolution.

§1822.270 Technical, legal, and other services.

(a) *Appraisals.* The property will be appraised by an FmHA or its successor agency under Public Law 103-354 employee authorized to make real estate appraisals. The appraisal will consist of a narrative statement prepared and signed by the authorized employee describing in detail the items considered in arriving at the value of the property. Two values will be established by the appraiser:

(1) The fair market value of the total property "as is".

(2) The aggregate fair market value of the building sites after development.

(i) In determining the value of the property, the appraiser will consider the value and selling prices of similar building sites in the area. The selling prices of similar sites must be fully documented.

(b) *Title Clearance and Legal Services.* For a loan to a public nonprofit organization, title clearance and legal services will be obtained in accordance with instructions from the OGC, observing the provisions of subpart B of part 1927 of this chapter to the extent feasible. For a loan to a private nonprofit organization, the provisions of subpart B of part 1927 of this chapter

§ 1822.271

7 CFR Ch. XVIII (1–1–97 Edition)

regarding title clearance and legal services will apply. The applicant will be encouraged to have the same approved closing agent, where practical, perform the title clearance work in connection with the purchase of the land and the sale of the individual sites.

(c) *Contracts for legal services.* On projects requiring more legal services than are customarily required for title clearance alone, the applicant will be required to have a written contract when loan funds will be used for legal services. All such contracts will be subject to review and approval by the State director and therefore should be submitted to the State Director before execution by the applicant. Contracts will provide for the types of service to be performed and the amount of fees to be paid either in lump sum on the completion of all services or in installments as services are performed.

(d) *Engineering services.* On projects requiring engineering services, a written contract will be required between the engineer and the borrower. All such contracts will be subject to review and approval by the State director and therefore should be submitted to the State Director before execution by the applicant. The form of contract must conform with standard professional practices and describe the types of services to be performed and fees to be paid.

[35 FR 16087, July 1, 1970, as amended at 51 FR 6733, Feb. 26, 1986; 56 FR 67471, Dec. 31, 1991]

§ 1822.271 Processing applications.

(a) *Application.* The application will be in the form of a letter to the county supervisor with the following information included in or attached to the letter:

(1) Name and address of applicant.

(2) A copy of, or an accurate citation to, the specific provisions of State law under which the applicant is organized; a copy of the applicant's articles of incorporation, bylaws, and other authorizing documents; the names and addresses of the applicant's members, directors, and officers; and if another organization is a member of the applicant organization its name, address, and principal business.

(3) A current, dated, and signed financial statement showing assets, and liabilities, together with information on the repayment schedule and status of each debt.

(4) Evidence of inability to obtain credit from other sources.

(5) General description of the project.

(i) Location and size of tract or tracts to be bought and/or developed.

(ii) Number and size of individual sites planned together with a detailed plot plan.

(iii) Preliminary engineering plans, if available.

(6) Estimated cost and amount of loan needed.

(7) Explanation of applicant's financial contribution to the project.

(8) A map showing the location of and other supporting information on neighborhood and existing facilities such as distance to shopping area, neighborhood churches, available transportation, drainage, sanitation facilities, water supply available or planned, and access to essential services such as doctors, dentists, and hospitals.

(9) If facilities such as water and sewage systems, paved streets, and utilities are not currently available, information on when and how they will be provided.

(10) Evidence of the need for the proposed sites in the locality by low- and moderate-income families and other qualified applicants that are likely to be able to obtain financing for a home.

(11) Written evidence of any State, county, or local planning, zoning, or other ordinances imposing additional restrictions or requirements upon the proposed sites.

(b) *County supervisor's review and evaluation of applications.* The county supervisor will:

(1) Determine that the applicant meets the eligibility requirements of § 1822.264.

(2) Verify that the information provided is accurate and complete.

(3) Determine that:

(i) The sites will be located in a good residential area and that essential facilities and services will be provided.

(ii) The lots will be reasonable in cost and of a type FmHA or its successor agency under Public Law 103-354 can appropriately finance.

(iii) There is an immediate and ready market for the proposed sites in the planned location.

(iv) The total number of sites planned does not exceed the number of loans the county supervisor can reasonably expect to include in the rural housing program or for which other credit is reasonably assured when the sites are developed.

(v) Proposed subdivisions will comply with the local codes and ordinances and also meet the requirements of subpart C of part 1924 of this chapter.

(4) Evaluate the manner in which the applicant plans to conduct its business and financial affairs.

(5) Comment on the background of the members, directors and officials.

(6) If he has questions about the proposal, send the incomplete docket to the State office for advice.

(7) If for any reason the loan cannot be made, inform the applicant.

(c) *Completion of the docket.* If the county supervisor determines that the applicant is eligible and the loan will be sound and proper, he should request the applicant to make any needed revisions. In addition to the items required in the application the docket must include:

(1) A plot plan and detailed preliminary plans and specifications for development of the building sites.

(2) A detailed cost breakdown of the project for such items as land and rights-of-way, utility installations or connections, on-site improvements, engineering and legal services, and estimated interest.

(3) If water and sanitary facilities are not publicly owned, a complete statement as to how they will be provided and details about their ownership and operation.

(4) Satisfactory evidence of review and approval of the proposed development by applicable State and local officials whose approval is required by State or local laws, ordinances, or regulations.

(5) Satisfactory evidence that the appropriate public bodies will accept and maintain all public facilities, including common areas, playgrounds, and tot lots, when dedicated to such bodies.

(d) *Preparation of docket forms*—(1) *Request for obligation of funds and fund analysis.* Forms FmHA or its successor agency under Public Law 103-354 1944-50, "Multiple Family Housing Borrower/Project Characteristics," and FmHA or its successor agency under Public Law 103-354 1944-51, "Multiple Family Housing Obligation-Fund Analysis," will be completed in accordance with the Forms Manual Insert (FMI).

(2) *County committee certification or recommendation.* County committees will not be used to review RHS loan applications.

(e) *Assembly, review and distribution of complete loan docket items.* When all items required for the complete loan docket have been furnished, they will be examined thoroughly to make sure they are properly and accurately prepared and are complete in all respects, including dates and signatures. The loan docket items will be assembled in the following order and distributed as follows:

Form No.	Name of form or document	Total No. of copies	Signed by borrower	Number for loan docket	Copy for borrower

¹ Data input to Finance Office through field office terminals.

(f) *Submission of complete docket.* The complete docket will be sent to the State office together with the District Director's comments and recommendations and a draft for a press release.

(g) *Loan approval authority and State Office action.* The State Director is authorized to approve loans in accordance with this subpart and subpart A of part 1901 of this chapter. As soon as it is evident that a loan will be approved, the State Director will complete exhibit A to subpart C of part 2015 of this chapter and submit to the FmHA or its successor agency under Public Law 103–354 Finance Office through field office ter-

minals that information contained in Form FmHA or its successor agency under Public Law 103–354 1944–50, "Multiple Family Housing Borrower/Project Characteristics." The State Director may redelegate approval authority to qualified State Office employees. When a docket or preliminary application is received in the State Office, the State Director will:

(1) Utilize the services of technicians on his staff and from other agencies in evaluating the application.

(2) Review the applicant's articles of incorporation and bylaws. If they conform to approved forms for the State as

provided in §1822.264(a)(1)(ii), the State director need not obtain a preliminary opinion from the OGC. In all other cases the State director will, and in any case may, submit the docket with any comments or questions to the OGC for a preliminary opinion as to whether the applicant and the proposed loan meet or can meet the requirements of State law and this subpart.

(3) If additional information is needed to adequately evaluate the application, return the loan docket to the District Director with any comments and recommendations for further processing.

(4) If the docket is sufficiently complete to enable the State Director to determine that the applicant is eligible and the loan would be sound and proper, issue a proposed memorandum of approval listing any specific conditions that must be met before loan closing.

(5) If the applicant is not eligible or the loan would not be sound and proper and the deficiencies cannot be corrected, inform the District Director accordingly.

[35 FR 16087, July 1, 1970, as amended at 45 FR 70777, Oct. 27, 1980]

§1822.274 Loan closing.

(a) *Applicable instructions.* The complete loan docket will be sent to the OGC for loan closing instructions. RHS loans will be closed in accordance with applicable provisions of subpart B of

part 1927 of this chapter, and State Instructions which supplement this Instruction, and closing instructions of the OGC, and with the assistance of the approved attorney, representatives of the title insurance company, or local attorney, whichever is appropriate.

(b) *Mortgage.* Unless the OGC determines the Form to be inappropriate, real estate mortgage Form FmHA or its successor agency under Public Law 103-354 1927-1 (state), "Real Estate Mortgage for _____," will be used for all RHS section 524 loans modified as prescribed by or with the advice of the OGC with respect to the name, address, and other identification of the borrower, the style of execution, and the acknowledgement. Additional paragraphs will be included in the mortgage to read as follows:

The borrower agrees not to discriminate in the sale of the dwelling financed under this mortgage due to a prospective purchaser's race, color, national origin, sex, religion, age, marital status, or handicap. The borrower further agrees to comply with all Federal, State, or local laws and ordinances prohibiting discrimination in the sale of housing. The borrower's failure or refusal to comply with this agreement will be a basis for the FmHA or its successor agency under Public Law 103-354 to deny future requests for participation in its rural housing programs and activities.

This instrument also secures the obligations and covenants of borrower set forth in Borrower's Loan Resolution of _____ (date), which is hereby incorporated herein by reference.

(c) *Promissory note.* Form FmHA or its successor agency under Public Law 103-354 1944-52, "Promissory Note," will be used. Instructions for preparation will be in accordance with the FMI and the following:

(1) The total amount to be shown in the note will be the amount of the loan shown on Form FMHA or its successor agency under Public Law 103-354 1944-51. The note will be dated the date of the loan closing.

(2) The note will be signed in accordance with subpart B of part 1927 of this chapter and the forms manual insert for Form FmHA or its successor agency under Public Law 103-354 1944-52 (available in any FmHA or its successor agency under Public Law 103-354 office).

§ 1822.275

(3) Payments shall not be deferred.

(d) *Recorded mortgage.* When the real estate mortgage is returned by the recording official, the county supervisor will retain the original in the borrower's case folder. If the original is retained by the recording official for the county records, a conformed copy including the recording data showing the date and place of recordation and book and page number will be prepared and filed in the borrower's case folder. A copy of the mortgage will be delivered to the borrower but will be conformed only if required by State law or if it is the custom of other lenders in the area.

(e) *Date of loan closing.* An RHS loan is considered closed when the mortgage is filed of record.

[35 FR 16087, July 1, 1970, as amended at 42 FR 4408, Jan. 25, 1977; 50 FR 8584, Mar. 4, 1985; 56 FR 67472, Dec. 31, 1991]

§ 1822.275 Actions after sites are developed.

The building sites will be sold on a nonprofit basis to eligible families or organizations as described in § 1822.266(c).

(a) An option, Form FmHA or its successor agency under Public Law 103-354 440-34, "Option to Purchase Real Property," will be executed. The site will be clearly identified by a land survey.

(b) The sale price of each individual site will not be more than a sufficient amount to pay a proportionate part of the RHS loan and any other actual costs of buying, developing, and selling the building site.

(c) The proceeds from sale of the building sites will be applied on the RHS loan and any prior lien or, with the prior approval of the National Office, used in a manner consistent with the purpose of the loan and the security interest of the Government. The sites will be released from the mortgage in accordance with § 1965.110 of subpart C of part 1965 of this chapter or otherwise in accordance with prior approval of the National Office.

[35 FR 16087, July 1, 1970, as amended at 51 FR 4135, Feb. 3, 1986]

§ 1822.276 Subsequent RHS loans.

A subsequent RHS loan is an RHS loan to an applicant indebted for an initial RHS loan. Subsequent RHS

7 CFR Ch. XVIII (1-1-97 Edition)

loans will be made on the same basis as initial RHS loans.

§ 1822.277 Complaints regarding discrimination in opportunity to buy developed sites.

Any applicant wishing to purchase a site financed by an RHS loan who believes he or she has been discriminated against because of race, color, national origin, religion, sex, handicap, or age, may file a complaint with the County Supervisor or State Director. Any such complaint will be handled in accordance with § 1944.239 of part 1944, subpart E of this chapter.

[56 FR 67472, Dec. 31, 1991]

§ 1822.278 Special requirements for RHS section 523 loans (loans to organizations providing sites for self-help housing).

Loans to organizations which will provide sites for self-help housing (RHS sec. 523 loans) will be made under the provisions of this subpart with the following exceptions:

(a) *Eligibility.* The applicant must be a nonprofit organization engaged in assisting self-help projects.

(b) *Interest.* The interest rate will be 3 percent per annum on the unpaid principal balance.

(c) *Source of funds.* These will be direct loans made from the self-help fund.

(d) *Evidence of need.* Loans to newly formed organizations will be made on the basis of the applicant's providing firm information as to the number of sites to be developed and the names of eligible bona fide prospective purchasers who are assured of available home financing. Loans to organizations currently involved in mutual self-help housing projects may be made without submitting a list of the names of prospective site purchasers. There must, however, be definite evidence that enough families are available who are eligible and who will buy the sites when they are developed.

(e) *Multiple advances.* These loans may be disbursed over a period not to exceed 18 months from the date of the first advance.

(f) *Note forms.* Form FmHA or its successor agency under Public Law 103-354 1944-52, "Multiple Family Housing

RHS, RBS, RUS, FSA, USDA

Pt. 1822, Subpt. G, Exh. C

Promissory Note,” will be used. See § 1822.274 (c).

(g) *Mortgage*. Unless the OGC determines the Form to be inappropriate, real estate mortgage Form FmHA or its successor agency under Public Law 103-354 1927-1 (state), “Real Estate _____ for _____ (Direct Loan),” will be used modified as prescribed by or with the advice of the OGC with respect to the name, address, and other identification of the borrower, the style of execution, and the acknowledgement. Additional paragraphs will be included in the mortgage to read as follows:

The borrower agrees not to discriminate in the sale of the dwelling financed under this mortgage due to a prospective purchaser's race, color, national origin, sex, religion, age, marital status, or handicap. The borrower further agrees to comply with all Federal, State, or local laws and ordinances prohibiting discrimination in the sale of housing. The borrower's failure or refusal to comply with this agreement will be a basis for the FmHA or its successor agency under Public Law 103-354 to deny future requests for participation in its rural housing programs and activities.

This instrument also secures the obligations and covenants of borrower set forth in Borrower's Loan Resolution of _____ (date), which is hereby incorporated herein by reference.

[35 FR 16087, July 1, 1970, as amended at 42 FR 4408, Jan. 25, 1977; 50 FR 8584, Mar. 4, 1985; 56 FR 67472, Dec. 31, 1991]

§ 1822.279 Loan supervision and servicing.

Loan supervision will be provided according to subpart C of part 1930 of this chapter. Loan servicing will be provided according to subpart B of part 1965 of this chapter.

[48 FR 56139, Dec. 19, 1983]

**EXHIBITS A-B TO SUBPART G—
[Reserved]**

EXHIBIT C TO SUBPART G—SUBORDINATION BY THE GOVERNMENT FOR USE WITH RURAL HOUSING SITE LOANS

Whereas, The United States of America acting through the Farmers Home Administration or its successor agency under Public Law 103-354 (hereinafter called the “Govern-

ment”) is the holder of the following-described instrument(s) executed by

of _____
County, State of _____
(hereinafter called the “Borrower”)

Title of instrument	Date of instrument	Date filed	Office filed	Book No.	Page No.

And whereas, _____ (hereinafter called the “Lender”) has agreed to provide a loan to the borrower or to a builder designated by the borrower to construct a home on the property described in this instrument.

Now Therefore, in consideration of the Lender's agreement to make such loan to the borrower, the Government hereby consents to the Borrower obtaining said loan from the lender, and agrees to and hereby subordinates in favor of the Lender and his successors and assigns its liens or security interests created or evidenced by the above-described instrument(s) inasmuch as they cover the following described property:

Except That, The Government shall retain a first lien or security interest in the above-described property in an amount of \$_____. Such first lien will be released only when satisfactory evidence is provided indicating that the lot with completed home is being sold to a family eligible for assistance under any section of Title V of the Housing Act of 1949 or under any other law which provides financial assistance for housing low- and moderate-income families and that the benefits of the nonprofit development of the site are being passed on to the eligible purchaser and that the amount of that first lien is paid on the Borrower's Rural Housing Site Loan debt to the Government.

This subordination is limited to the amount actually loaned by the Lender to the Borrower for the foregoing purpose, but shall not exceed \$_____.

Only the above described property is affected by this subordination. This subordination shall not otherwise affect or modify the obligations secured by the aforesaid lien instrument(s), and the said obligations shall continue in force and effect until fully paid, satisfied, and discharged.

No member of Congress shall be admitted to any share or part of this agreement or to any benefit that may arise thereupon.

In Witness Whereof, The United States of America has caused these presents to be signed on the _____ day of _____, 19____, pursuant to delegated authority published in 7 CFR, Part 1800.

Subpart N—Loans to Indian Tribes and Tribal Corporations

SOURCE: 39 FR 3662, Jan. 29, 1974, unless otherwise noted.

§ 1823.401 General.

This subpart contains policies and procedures of the Farmers Home Administration (FmHA) or its successor agency under Public Law 103-354 applicable to making initial and subsequent insured loans to Indian tribes or tribal corporations for the acquisition of land within tribal reservations and Alaskan communities. Any processing or servicing activity conducted pursuant to this subpart involving authorized assistance to FmHA or its successor agency under Public Law 103-354 employees, members of their families, known close relatives, or business or close personal associates, is subject to the provisions of subpart D of part 1900 of this chapter. Applicants for this assistance are required to identify any known relationship or association with an FmHA or its successor agency under Public Law 103-354 employee. The Secretary of the Interior or authorized representative will determine whether lands lie within a tribal reservation or community.

[39 FR 3662, Jan. 29, 1974, as amended at 51 FR 6733, Feb. 26, 1986; 58 FR 224, Jan. 5, 1993]

§ 1823.402 Definitions.

The following definitions are applicable to the subsequent provisions of this subpart.

(a) *Land*. The term “land” includes any or all rights or interests therein.

(b) *Tribe*. The term “tribe” means, an Indian Tribe recognized by the Secretary of the Interior or a tribal corporation established pursuant to the Indian Reorganization Act, and/or a community in Alaska incorporated by the Secretary of the Interior pursuant to the Indian Reorganization Act.

(c) *Tribal*. The term “tribal” refers to an Indian tribe or Alaskan community described in paragraph (b) of this section, and “tribal members” refers to the members of such a tribe or community.

RHS, RBS, RUS, FSA, USDA

§ 1823.408

(d) *Reservation*. The term “reservation” means the lands or interests therein within the tribe’s reservation as determined by the Secretary of the Interior, or within a community in Alaska incorporated by the Secretary of the Interior pursuant to the Indian Reorganization Act.

(e) *Mortgage*. The term “mortgage” includes deeds of trust and other liens on land.

§ 1823.403 Eligibility.

To be eligible for a loan, the tribe must:

(a) Be without adequate uncommitted funds to acquire needed land within the reservation.

(b) Be unable to obtain sufficient credit elsewhere at reasonable rates and terms to finance the proposed land acquisition.

(c) Show reasonable prospects of repaying the loan as determined by:

(1) A feasible plan for the use of the tribe’s land.

(2) Satisfactory evidence of financial ability to develop and operate the land.

(3) A satisfactory management and repayment plan.

§ 1823.404 Loan purposes.

Loan funds may be used by the tribe to:

(a) Acquire land within the reservation for use of the tribe or its members. The land acquisition may be made for purposes such as elimination of fractional heirships and rounding out farming and ranching units.

(b) Pay costs incidental to land acquisition, such as those for appraisals, title clearance, legal services, land surveys, and loan closing.

§ 1823.405 Ineligible loan purposes.

Loan funds may not be used for any improvement or development purposes, acquisition or repair of buildings or personal property, payment of operating costs, refinancing of debts, payment of finder’s fees, or similar costs. Loans also may not be made for any purpose that will contribute to excessive erosion of highly erodible land or to the conversion of wetlands to produce an agricultural commodity, as

further explained in exhibit M of subpart G of part 1940 of this chapter.

[53 FR 7332, Mar. 8, 1988]

§ 1823.406 Rates and terms.

Each loan will be amortized over a period not to exceed 40 years. Upon request of the applicant, the interest rate charged by FmHA or its successor agency under Public Law 103-354 will be the lower of the interest rates in effect at the time of loan approval or loan closing. If an applicant does not indicate a choice, the loan will be closed at the interest rate in effect at the time of loan approval. Interest rates are specified in exhibit B of FmHA or its successor agency under Public Law 103-354 Instruction 440.1 (available in any FmHA or its successor agency under Public Law 103-354 office) for the type assistance involved.

[39 FR 3662, Jan. 29, 1974, as amended at 51 FR 6733, Feb. 26, 1986]

§ 1823.407 Use of acquired land.

The land acquired with the FmHA or its successor agency under Public Law 103-354 loan may be leased or sold to tribal members for dwelling, farming, grazing, recreational, and other purposes approved by the National Office as beneficial to the tribe or its members. The plan for use of the land must have the approval of the tribal council or other authorized governing body, and should be in accordance with the recommendations of appropriate Bureau of Indian Affairs (BIA) officials. It should also be consistent with the land use in the area unless other uses are justified. The plan should make maximum use of cost sharing and technical assistance of Federal and State programs.

§ 1823.408 Special requirements.

(a) *Loan authorization*. The tribe will take appropriate action to authorize obtaining and giving security for the loan, using exhibit B of this subpart N, Tribal Council Resolution, as a guide.

(b) *Right to mortgage*. If a mortgage is to be obtained on trust or restricted property and the tribe’s constitution or charter does not specifically authorize

§ 1823.409

7 CFR Ch. XVIII (1–1–97 Edition)

a mortgage of such property, the mortgage must be authorized by tribal referendum.

(c) *Waiver of immunity.* The appropriate tribal official(s) will execute on behalf of the tribe and in favor of FmHA or its successor agency under Public Law 103–354 a waiver of any immunity from suit or liability which it possesses. The waiver will be approved by the Secretary of the Interior or his authorized representative.

(d) *Mortgages or assignments to third parties.* At the time of loan closing an agreement will be obtained from the tribe that as long as any indebtedness on the loan is outstanding it will not, without the written consent of FmHA or its successor agency under Public Law 103–354;

(1) Give assignments or pledges to other parties of income, revenue, or other property assigned or pledged to FmHA or its successor agency under Public Law 103–354.

(2) Mortgage, sell, or otherwise dispose of any land (except sales to tribal members for market value) regardless of whether it is or is not mortgaged to FmHA or its successor agency under Public Law 103–354.

(3) This agreement will be submitted to the Office of the General Counsel (OGC) for review as to content and validity. For trust lands, a copy will be forwarded to the BIA. For other than trust lands, it will be recorded in the land records if OGC advises that such recordation is legally necessary.

(e) *Land acquisition, debt service, and reserve accounts.* The following accounts will be established at the time of loan closing. A properly bonded official of the tribe will receive the monies for each account and issue receipts therefor. The bonded official will deposit all such monies in the appropriate trust or counter-signature accounts. As a basis for withdrawals, the deposit agreement for each account will require the signatures of appropriate tribal official(s) and the FmHA or its successor agency under Public Law 103–354 County Supervisor or a BIA official, depending on whether the account is a BIA trust account or an FmHA or its successor agency under Public Law 103–354 supervised account in a commercial bank.

(1) *Land acquisition account.* The loan funds will be deposited in this account which will be established as a “Supervised Bank Account.” If funds in this account exceed \$100,000, it shall be secured by the financial institution in advance in accordance with U.S. Treasury Department Circular No. 176.

(2) *Debt service account.* A debt service account will be established at the time of loan closing for deposit of income assigned to FmHA or its successor agency under Public Law 103–354 to be used in making repayments on the loan and payments to the reserve account.

(3) *Reserve account.* This account will be established for debt service reserve purposes. On or before the first installment due date, an amount equal to one-tenth ($\frac{1}{10}$) of the amount to be paid annually on the loan will be deposited in this reserve account. An equal amount will be deposited in the account during each succeeding year until a full annual payment is accumulated.

(i) Funds in the reserve account may be used to make repayments on the loan when the tribe cannot meet the installments from other sources as they fall due. Any funds used for that purpose will be replaced as soon as possible before the next installment due date.

(ii) The reserve fund may be invested in short-term investments that are issued, guaranteed, or insured by the Federal or a State Government and name FmHA or its successor agency under Public Law 103–354 as co-owner.

[39 FR 3662, Jan. 29, 1974, as amended at 46 FR 36106, July 14, 1981]

§ 1823.409 Security.

All loans will be secured in a manner that will adequately protect the interests of FmHA or its successor agency under Public Law 103–354. Ordinarily, the security will include a lien on land acquired with loan funds plus assignment(s) of income. However, the security may consist only of assignments of income if the State Director determines that it will provide as good or better security than the land acquired with loan funds. Such security may be supplemented by security interests in personal property which is available and needed to protect the interests of

FmHA or its successor agency under Public Law 103-354.

(a) *Land plus assignments of income.* When land security is taken, it will be coupled with assignment(s) of uncommitted tribal, trust, or other income sufficient to cover loan repayments and payments to the reserve account.

(b) *Assignments of income without land security.* One or more assignments of income determined to be sufficient to cover the installment repayments plus reserve on the loan will be taken using exhibit C in this subpart N as a guide. The assignment may consist of one or more of the following:

(1) *Assignment of uncommitted income.* A general assignment of uncommitted tribal, trust, or other income, together with a BIA Subordination Agreement using exhibit D in this subpart N as a guide. A statement will be obtained from BIA on the amount of such income that will be available to cover repayments and payments to the reserve account.

(2) *Assignment of land sale or lease income.* An assignment of any net proceeds from the sale, lease, or other disposition of real estate, including minerals, timber, water, water rights, or other interests in real estate, if a real estate mortgage is not taken on such property.

(3) *Assignment of other income.* An assignment or pledge of other income or revenue.

(c) *Recordation of assignments.* Each assignment of income will be approved by BIA and recorded in the appropriate public records.

§ 1823.410 Appraisals.

The amount of loan funds used to acquire property will not exceed its market value as determined by FmHA or its successor agency under Public Law 103-354. Market value will be based on an appraisal made by authorized FmHA or its successor agency under Public Law 103-354 personnel, BIA appraisers or appraisers approved by the State Director. The value of any existing buildings that pass with the land will be deducted from the market value.

[43 FR 18161, Apr. 28, 1978]

§ 1823.411 Land rights.

Title to land acquired may, with the approval of the Secretary of the Interior or his designee, be in the name of the United States in trust for the tribe.

§ 1823.412 Loan docket.

The loan docket will consist of those items set forth in exhibit A. Forms and guides are available in all FmHA or its successor agency under Public Law 103-354 County Offices. Part of the docket will be prepared by the tribe with the assistance of BIA in accordance with exhibits A(1), B, C, and D of this subpart N. FmHA or its successor agency under Public Law 103-354 will provide items in exhibit A(2) of subpart N.

§ 1823.413 Loan approval.

State Directors are authorized to approve all loans except those in excess of \$500,000 which must first be authorized by the National Office. Information to be furnished the National Office will include the completed loan docket, proposed letter of conditions to be met by the applicant, any comments of OGC, and the State Director's recommendations. The State Director will forward an executed Form FmHA or its successor agency under Public Law 103-354 440-1, "Request for Obligations of Funds," to the Finance Office for each loan approved. If approval was authorized by the National Office, a copy of the memorandum authorizing approval will be attached to the Form FmHA or its successor agency under Public Law 103-354 440-3. An executed Form FmHA or its successor agency under Public Law 103-354 440-1 will be forwarded to the applicant on the same date the loan is approved, that is, on the same date it is forwarded to the Finance Office.

[39 FR 3662, Jan. 29, 1974, as amended at 41 FR 7488, Feb. 19, 1976]

§ 1823.414 Title to security property.

The applicant will provide evidence of title satisfactory to the FmHA or its successor agency under Public Law 103-354 for all property that will serve as security for the loan.

(a) *Real estate security.* (1) *Trust property.* The applicant will request BIA to furnish Title Status Reports to the

County Supervisor. The County Supervisor will review the reports in accordance with subpart B of part 1927 of this chapter. Form FmHA or its successor agency under Public Law 103–354 1927–13, “Waiver of Encumbrances, Exceptions, and Reservations,” will be used as appropriate. The County Supervisor will ask the State Director for advice if necessary.

(i) If administrative closing requirements can be met, BIA will prepare the deeds and obtain the needed signatures. The County Supervisor will supply BIA with Forms 1927–1, “Real Estate Mortgage for (State)”, and FmHA or its successor agency under Public Law 103–354 440–22, “Promissory Note (Association or Organization).” BIA will insert the appropriate land descriptions.

(ii) The partly completed real estate mortgage and note will be returned to the County Supervisor. The loan check can then be ordered and the loan closed. The mortgage and note will be completed and signed, but no funds will be disbursed.

(iii) A conformed copy of the note with the original mortgage and two copies will be forwarded to BIA. They will insert a certification on the mortgage and return it to the County Supervisor. BIA will also indicate that the deeds have been recorded and the priority of the Government’s lien in a continuation of the Title Status Report. However, the certification about the lien priority may be made on the old Status Report if BIA prefers this.

(iv) The certified original mortgage will then be recorded by the County Supervisor in the county where the land is located if OGC determines that such recordation is necessary. Funds can be disbursed as soon as the mortgage is recorded or the determination is made that recordation is not necessary.

(2) *Nontrust land.* Title clearance will be obtained in accordance with subpart B of part 1927 of this chapter.

(b) *Rights of way.* The applicant will be responsible for obtaining adequate, continuous, and valid rights-of-way for operation, and maintenance of its property. The following documentary evidence will be furnished FmHA or its successor agency under Public Law 103–354.

(1) A copy of the form of right-of-way instrument to be used if it differs from Form FmHA or its successor agency under Public Law 103–354 442–20, “Right-of-Way Easement.” Rights-of-way with restrictive provisions should be accepted only in very unusual circumstances. Whenever the form of the instrument differs from Form FmHA or its successor agency under Public Law 103–354 442–20 or contains special provisions that are required by either the applicant or the grantor, copies of such instruments will be submitted to the FmHA or its successor agency under Public Law 103–354 for review prior to acceptance and recording. Either specific rights-of-way containing a legal property description of a centerline description of the rights-of-way or general rights-of-way containing only a description of the tract or parcel of land affected, may be used.

(2) A certificate by a duly authorized official of the applicant that it has obtained and presently holds adequate and sufficient legal title to all rights-of-way, permits and other authorizations deemed necessary by the applicant and its attorney for an uninterrupted right-of-way for the operation and maintenance of the property. Use Form FmHA or its successor agency under Public Law 103–354 442–21, “Right-of-Way Certificate.”

(3) An opinion by the applicant’s attorney relating to the adequacy and legality of the rights-of-way covered by the right-of-way certificate. Use Form FmHA or its successor agency under Public Law 103–354 442–22, “Opinion of Counsel Relative to Rights-of-Way,” to the extent possible.

(c) *Lien on water rights.* When a mortgage or an assignment will be taken on water rights, the applicant’s attorney will furnish a statement regarding the nature of the water rights owned such as conveyance of title, appropriation and decree, application and permit, public notice of appropriation and use, and so forth.

(d) *Lien on chattel property.* When liens will be taken on chattel property, the following will be furnished:

(1) Description of the property for use in preparing security instruments.

(2) Form FmHA or its successor agency under Public Law 103–354 440–13,

RHS, RBS, RUS, FSA, USDA

Pt. 1823, Subpt. N, Exh. A

“Report of Lien Search,” or similar form prepared in accordance with the State requirements prescribing the use of such form for Operating loans.

(e) *Disposition of title evidence.* All title evidence other than the opinion of title, mortgage title insurance policy, and water stock certificates will be returned to the borrower when the loan has been closed. The opinion of title or title insurance policy and any water stock certificates will be retained in the borrower’s county office case folder.

[39 54 3662, Jan. 29, 1974, as amended at 56 FR 67472, Dec. 31, 1991]

§ 1823.415 Supervision and servicing.

Borrowers will be supervised in accordance with subpart A of part 1942 of this chapter. Loans will be serviced in accordance with subpart E of part 1951 of this chapter. The cooperation, assistance, and advice of appropriate BIA officials will be sought at all times.

[39 FR 3662, Jan. 29, 1974, as amended at 47 FR 52119, Nov. 19, 1982; 54 FR 47196, Nov. 13, 1989]

§ 1823.416 Check request and loan closing.

Before any loan can be closed, the District Director must notify the State Director in writing that all loan closing conditions have been met. Checks will be requested and loans will be closed in accordance with subpart A of part 1942 of this chapter.

[39 FR 3662, Jan. 29, 1974, as amended at 54 FR 47196, Nov. 13, 1989]

§ 1823.417 Civil rights.

Indian tribes, for the purpose of this subpart, are not subject to title VI of the Civil Rights Act of 1964 so long as the expected use of land acquired does not include operation of a facility which would be open to the public. Therefore, such tribes are not subject to part 1816 of this chapter.

§ 1823.418 State requirements.

Each State Director will, with the assistance of OGC, supplement this Subpart with State regulations, forms, worksheets, sample documents, and such other guidance as necessary to successfully carry out the program.

EXHIBIT A TO SUBPART N—LOAN DOCKET ITEMS—LOANS TO INDIAN TRIBES AND TRIBAL CORPORATIONS

(1) The tribe with the assistance of BIA will provide the following:

SF 424.1: Application for Federal Assistance (For Non-construction).

Form FmHA or its successor agency under Public Law 103-354 1910-11: Applicant Certification, Federal Collection Policies for Consumer or Commercial Debts. (O & 1C—Sign O);

Official audit report of the preceding 4 years including income and expenses;

List of tribal officers, including title and addresses and signature identifications;

Copy of tribe’s constitution and bylaws or charter or other evidence of organization and rules of operation;

Legal services contract approved by BIA if a private law firm. A written statement will be provided when a BIA attorney performs the legal services.

Land Utilization Plan including:

(a) A short narrative description of why the land is being purchased, what use is to be made of it, and the annual net income expected to be derived from the land. If it has proven income record, that information should be included. If not, it should be so stated. If any development work is contemplated by the tribe, this should be explained, including assurance of the source of funds to carry out such development. If the land is to be operated by the tribe, this should be described, including assurance of availability of the necessary money to meet operating costs and method of management. If the land is to be leased, there should be a description of how it will be used and assurance that its intended use will conform to the overall land use pattern of the reservation or any variations justified; (b) Recommendation of BIA Soil Conservation Specialist.

Form FmHA or its successor agency under Public Law 103-354 440-34: Option to Purchase Real Property or similar purchase agreement containing the provisions of the option.

Form FmHA or its successor agency under Public Law 103-354 440-35: Acceptance of Option.

Form FmHA or its successor agency under Public Law 103-354 442-7: Operating Budget or Statement of Income and Expenses including income and expenses from all sources.

Resolution of Tribal Council or other governing body approving and providing for the proposed land acquisition and any actions necessary to carry it out, such authority to encumber real estate and waiver of immunity and, where legally necessary, evidence of any required tribal election or referendum. The resolution should substantially conform with Exhibit B.

Subordination Agreement by BIA using Exhibit D as a guide.

Form FmHA or its successor agency under Public Law 103–354 1942–46: Letter of Intent to Meet Loan Conditions Fidelity Bond for tribal officers authorized to handle monies.

Form FmHA or its successor agency under Public Law 103–354 1927–9: Preliminary Title Opinion, if required.

Form FmHA or its successor agency under Public Law 103–354 442–20: Right-of-Way easement, or right-of-way instrument, if appropriate.

Form FmHA or its successor agency under Public Law 103–354 442–21: Right-of-Way Certificate, if appropriate.

Form FmHA or its successor agency under Public Law 103–354 442–22: Opinion of Counsel Relative to Right-of-Way, if appropriate.

Form FmHA or its successor agency under Public Law 103–354 440–13: Report of Lien Search, if appropriate.

Form FmHA or its successor agency under Public Law 103–354 1927–10: Final Title Opinion, if required.

(2) The FmHA or its successor agency under Public Law 103–354 County Supervisor will provide the following:

Form FmHA or its successor agency under Public Law 103–354 1922–1: Appraisal Report—Farm Tract if BIA or commercial appraisers have not provided a present market appraisal.

Form FmHA or its successor agency under Public Law 103–354 1927–13: Waiver of Encumbrances, Exceptions and Reservations, if required.

Form FmHA or its successor agency under Public Law 103–354 440–2: County Committee Certification or Recommendation.

Form FmHA or its successor agency under Public Law 103–354 424–49: Project Summary (Loans to Indian Tribes and Tribal Corporations).

Form FmHA or its successor agency under Public Law 103–354 1942–14: Association Project Fund Analysis Letter of Conditions.

Form FmHA or its successor agency under Public Law 103–354 1940–1: Request for Obligation of Funds.

Form FmHA or its successor agency under Public Law 103–354 440–22: Promissory Note.

Form FmHA or its successor agency under Public Law 103–354 440–9: Supplementary Payment Agreement, if required.

Form FmHA or its successor agency under Public Law 103–354 1927–1 (State): Real Estate Mortgage.

Form FmHA or its successor agency under Public Law 103–354 402–1: Deposit Agreement, if required.

[39 FR 3662, Jan. 22, 1974, as amended at 41 FR 7488, Feb. 19, 1976; 54 FR 29330, July 12, 1989; 54 FR 47196, Nov. 13, 1989; 55 FR 13503, Apr. 11, 1990; 56 FR 67472, Dec. 31, 1991; 58 FR 44752, Aug. 25, 1993]

EXHIBIT B TO SUBPART N—TRIBAL COUNCIL RESOLUTION NO. _____

A RESOLUTION OF THE TRIBAL COUNCIL OF THE _____ TRIBE AUTHORIZING AND PROVIDING FOR: (1) THE ISSUANCE OF AN INSTALLMENT PROMISSORY NOTE IN THE PRINCIPAL AMOUNT OF _____ TO FINANCE THE PURCHASE OF LAND, (2) THE GIVING OF SECURITY, (3) THE COLLECTION, HANDLING, AND DISPOSITION OF REVENUES OF THE LAND TO BE PURCHASED AND ANY OTHER LAND TO BE ENCUMBERED AS SECURITY, AND (4) RELATED ACTIONS AND MATTERS.

The _____, (hereafter referred to as “Tribe”), is an Indian Tribe recognized by the Secretary of the Interior or is a tribal corporation established pursuant to the Indian Reorganization Act;

The Tribe wishes to acquire interests in approximately _____ acres of real estate (hereinafter called “the land”) within its reservation or community for the use of and the improvement of the economic standing of the Tribe or its members but does not have adequate uncommitted funds for such acquisition.

A meeting of the tribal council or other governing body (hereafter called the “Council”) with the required number of Council members present was held at _____ on the _____ day of _____, 19____, pursuant to notice thereof as required by its constitution, by-laws, corporate charter, or other organizational documents, (hereafter called the “constitution”) to consider a plan to finance the proposed land acquisition.

The Tribe has the authority to acquire lands or interests therein.

The Tribe is authorized to mortgage or otherwise hypothecate its land either by its constitution, or by a tribal referendum whereby such mortgage or other hypothecation was approved by at least a majority of the qualified voters at an election in which at least 20 percent of those eligible voted, or under such other rules as may be prescribed by the constitution of the Secretary of the Interior.

The Secretary of the Interior or his authorized representative has approved the mortgaging or hypothecation of the land.

As shown by the minutes of said meeting, of the _____ (Number) Council members of record of the Tribe there were present and voting _____ Council Members and by a recorded majority vote, determinations were made and actions authorized as follows:

That in order to acquire the land, the Council was authorized and empowered, in its discretion, for and in the name of the Tribe, to make application to the Farmers Home Administration or its successor agency under Public Law 103–354 of the United

States Department of Agriculture (hereafter referred to as the "Government") for financial assistance; to cause the execution and delivery of promissory note or notes or other evidence of indebtedness and a mortgage, or other appropriate security instrument, to secure any loan or loans made, or insured, by the Government; to comply with any requirements, terms or conditions prescribed by the Government or by Government regulations; and to pay, extend or renew any such indebtedness; and to execute contracts or enter into agreements and, without limitation, to take any and all other action as may be necessary, incidental, or appropriate to finance acquisition of the land or interests therein in behalf of the Tribe.

Now therefore, it is hereby resolved by the Council of the Tribe as follows:

Section 1. (Determination of Council) It is necessary to defray all of a portion of the costs of acquiring the land or interests therein by obtaining a loan to be made or insured by the Government in accordance with applicable provisions of the Consolidated Farm and Rural Development Act and Pub. L. 91-229, it being determined that the Tribe is unable to obtain sufficient credit elsewhere to finance the acquisition taking into consideration prevailing private and cooperative rates and terms currently available.

Section 2. (Amount and Terms of Loan) The Tribe shall borrow \$_____ and issue as evidence thereof installment promissory note(s) in the form prescribed by the Government for the full principal amount of the loan. The note(s) shall be signed by the _____ (Appropriate Official) and attested by the _____ (Appropriate Official) and the corporate or other seal of the Tribe affixed thereto, and shall bear interest from its date, which shall be the date of loan closing, at a rate prescribed by the Government in its approval of the loan, but not to exceed _____ percent per annum. The security instruments shall be in such form and contain the terms and conditions required by the Government.

Section 3. (Pledge of Revenue) The indebtedness hereby authorized shall be payable from the gross income and revenue to be derived from the operation of the tribal land, a portion of which sufficient to pay the principal and interest as and when the same shall be come due is hereby pledged and shall be set aside for that purpose.

Section 4. (Pledge of Additional Security) If the revenue pledged in Section 3 is insufficient to pay the principal and interest as and when the same shall become due or if it appears the revenue will be insufficient, the Council hereby pledges its taxing authority and the funds held in the United States Treasury in trust for the Tribe, for the purpose of making up the deficiency or expected deficiency shall be deposited in the debt service and reserve accounts established by

Sections 5 B and C hereof and used as therein prescribed.

Section 5. (Protection and Disposition of Funds) The _____ (Appropriate Official) of the Tribe shall be the custodian of all loan funds of the Tribe and all revenues pledged for the repayment of the loan. All such funds shall be deposited in accordance with Part 1902, Subpart A of this chapter. The _____ (Appropriate Official) shall execute a fidelity bond in an amount not less than \$_____ with a surety company approved by the Government. The United States of America shall be named as coobligee in such bond, and the amount thereof shall not be reduced without the prior written consent of the Government. The _____ (Appropriate Official) is hereby directed to establish the following accounts into which proceeds of the note, the revenues from the land, and any other income pledged for repayment shall be deposited, which accounts shall be continually maintained, except as otherwise provided, so long as the indebtedness hereby authorized remains unpaid:

A. Land Acquisition Account. The proceeds of the loan hereby authorized shall be deposited in the Land Acquisition Account which shall be established as a "supervised bank account" as required by the Government. If funds in this account exceed \$100,000, it shall be secured by the financial institution in advance in accordance with U.S. Treasury Department Circular No. 176. When all land acquisition costs have been paid in full, any balance remaining in the Land Acquisition Account shall be applied as a refund on the loan and the Land Acquisition Account shall be closed.

B. Debt Service Account. All assigned revenues shall be deposited in the Debt Service Account until there is an amount equal to the next annual installment to become due plus any delinquencies and payments are made to the Reserve Account. The Debt Service Account will be used for making annual installment payments on the loan, payments on any delinquencies that might occur, and payments to the Reserve Account.

C. Reserve Account. Out of the funds in the Debt Service Account, there shall be transferred annually to the Reserve Account the sum of \$_____ (1/10 of an annual payment of principal and interest) until there is accumulated in that fund the sum of \$_____ (one annual installment of principal and interest), after which no further transfers need be made to said account except that transfers shall be made to replace any withdrawals. Funds in the Reserve Account shall be used only for the purpose of making payments of principal and interest in the event the amount in the Debt Service Account is insufficient to meet such payments.

Section 6. (Other Covenants and Agreements of the Tribe) The Tribe covenants and

agrees that, so long as the indebtedness hereby authorized remains unpaid, the Tribe will—

A. Comply with applicable Federal, State, and Tribal laws and regulations and maintain the land in good condition.

B. Impose and collect such rates and charges that gross revenues will be sufficient at all times for the maintenance of the land and the funding of the Debt Service and Reserve Accounts.

C. Cause to be levied and collected such taxes or assessments as may be necessary to maintain the land in good condition, meet payments on the loan, and make the deposits required by Sections 5 B and C, if for any reason gross revenues are insufficient.

D. Maintain complete books and records relating to the operation and maintenance of the land and its financial affairs and will cause such books and records to be audited annually at the end of each fiscal year and an audit report prepared, and will furnish the Government without request a copy of each annual audit report. The audit will be conducted by independent Certified Public Accountants or by licensed Public Accountants, licensed before December 31, 1970, who are certified or licensed by a regulatory authority of a state or other political subdivision of the United States. At all reasonable times, the Government shall have the right to inspect the land and to inspect and copy the records, accounts, and data of the Tribe relating thereto.

E. Maintain such insurance coverage as may be required by the Government.

F. Not borrow any money from any source or enter into any contract or agreement or incur any other liabilities in connection with making improvements to the land (exclusive of normal maintenance) without obtaining the prior written consent of the Government.

G. Not cause or permit any voluntary dissolution of its organization; merge or consolidate with any other organization; dispose of, transfer, or convey its title to any land or any part thereof or interest therein, by sale, mortgage, lease or other encumbrance, without obtaining the prior written consent of the Government.

H. Not modify or amend its constitution in any way that would affect the Government's security without the written consent of the Government.

Section 7. (Security Instruments) In order to secure the payment of the principal and interest on the note and any related obligations of the Tribe to the Government the _____ (Appropriate Official) and _____ (Appropriate Official) of the Tribe are hereby authorized and directed to execute and deliver a good and sufficient security instrument encumbering the land or other property and an assignment of revenues and funds held in the United States Treasury for the Tribe. The security instru-

ment shall give the Government the lien on the land, Tribal revenues, Tribal Treasury funds or other property and said officials are authorized and directed to acquire such subordination agreements as are necessary to achieve the required priority.

Section 8. (Refinancing) If at any time it shall appear to the Government that the Tribe is able to refinance the loan, in whole or in part, by obtaining a loan for such purposes from responsible cooperative or private credit sources, at reasonable rates and terms for loans for similar purposes and periods of time, the Tribe will, upon request of the Government, apply for and accept such loan in sufficient amount to repay the Government and will take such action as may be required in connection with such refinancing loan.

Section 9. (Waiver of Immunity) In order to secure the payment of the principal and interest of the note and any related obligations, the Tribe hereby waives for the benefit of the Government any immunity from suit or liability which it may possess except that this waiver shall not extend to the acquiring of any judgment, lien, or attachment upon the property of the Tribe other than property of the Tribe other than property specifically pledged, assigned, or mortgaged to the Government in connection with this loan provided that if no real estate is mortgaged to the Government this waiver shall extend to acquiring of judgment, lien or attachment on real estate purchased with the loan herein authorized.

Section 10. (Resolution a Contract) The provisions of this resolution shall constitute a contract between the Tribe and the Government so long as the loan made or insured by the Government remains unpaid.

Section 11. This resolution shall take effect and be in force immediately.

**EXHIBIT C TO SUBPART N—ASSIGNMENT
OF TRIBAL INCOME AND FUNDS**

Whereas, the United States of America, acting through the Farmers Home Administration or its successor agency under Public Law 103-354, United States Department of Agriculture (hereinafter called the "FmHA or its successor agency under Public Law 103-354") is the holder or insurer of a promissory note (hereinafter called the "Note") in the sum of _____ bearing interest at the rate of _____ percent per annum; and

Whereas, ther Note was given by _____ (hereinafter called the "Tribe") to evidence the indebtedness incurred by the Tribe under a loan (hereinafter call the "Loan" made or insured by the FmHA or its successor agency under Public Law 103-354, and

Whereas, Tribal Council Resolution No. _____ dated _____, authorized the acceptance of the Loan and the issuance of the Note and pledged and assigned income and funds as security for the payment thereof; and

Whereas, the Tribe has entered into a subordination agreement with the United States Department of the Interior, Bureau of Indian Affairs (hereinafter called the BIA), whereby the General Assignment of Income dated _____ and an Assignment of Income dated _____ in favor of the BIA is fully subordinated to the Assignment made herein;

Now, therefore, in consideration of the FmHA or its successor agency under Public Law 103-354's making or insuring the Loan and to secure the payment when due of the installments on the Note, the Tribe does hereby grant, convey, pledge and assign to the FmHA or its successor agency under Public Law 103-354 (1) all annual gross income from the land purchased with the loan, and (2) all annual gross income from other sources. If the Tribe shall pay the entire principal of and interest on the Note, this Assignment shall terminate and be of no further force and effect.

In Witness Whereof, the _____ Tribe of the _____ Reservation causes this Assignment to be executed by its President and its Tribal seal to be affixed and duly attested.

(Seal) _____ Tribe of the _____ Reservation.

Attest: By _____

(Appropriate Official)

**EXHIBIT D TO SUBPART N—
SUBORDINATION AGREEMENT**

This Agreement, dated _____, between the United States of America, Department of the Interior (hereinafter called the "BIA", and the _____ tribe of the _____ Reservation (hereinafter called the "Tribe"), for the benefit of the Tribe and to induce the United States of America, acting through the Farmers Home Administration or its successor agency under Public Law 103-354, United States Department of Agriculture (hereinafter called the "FmHA or its successor agency under Public Law 103-354"), to make or insure a loan to the Tribe:

Witnesseth:

Whereas, under date of _____, the Tribe executed and delivered to the BIA a "General Assignment and Assignment of Income" (hereinafter called the "General Assignment"), a copy of which is attached hereto and marked Exhibit A; and under date of _____ an "Assignment of Specific Income" a copy of which is attached hereto and marked Exhibit B, and Whereas, the FmHA or its successor agency under Public Law 103-354 has offered to loan or insure a loan to the Tribe in the sum of _____ for the purpose of paying part or all of the cost of acquiring interests in approximately _____ acres of real estate within its reservation pursuant to the provisions of the Act of April 11, 1970, Pub. L. 91-229; and

Whereas, FmHA or its successor agency under Public Law 103-354 requires that the annual gross income from the real estate purchased with the loan and the annual gross income from all other sources in such amount as may be necessary to pay debt service on such loan be pledged to pay the principal and interest on the loan; and

Whereas, the BIA is willing to subordinate to FmHA or its successor agency under Public Law 103-354 as security for said loan its rights under the General Assignment and under the Assignment of Specific Income to a lien on the income of the Tribe from all sources;

Now, Therefore, the BIA does agree as follows:

1. That the right it has under the General Assignment and under the Assignment of Specific Income as referred to in the first WHEREAS above, or any other instrument not mentioned herein to receive the income

Pt. 1823, Subpt. N, Exh. D

7 CFR Ch. XVIII (1-1-97 Edition)

derived by the Tribe from all sources shall be in all respects subordinate, subject to and junior in right to the right of FmHA or its successor agency under Public Law 103-354 in and to said income as said rights are created and defined in the Assignment Pledge Agreements, or other agreements now or hereafter given resulting from the loan from the Farmers Home Administration or its successor agency under Public Law 103-354 to the Tribe.

2. That this subordination Agreement shall be effective as of the date hereof.

Redesignation Table I

At 55 FR 39393, Sept. 27, 1990, RUS amended 7 CFR chapter XVII by redesignating, reorganizing, adding and reserving certain parts. For the convenience of the user, a redesignation table follows:

Old part or section	New part or section	Old part or section	New part or section
Rural Development Regulation			
1709	1703.	1747.30	1744.50.
		1749.1	1737.1(a).
		1749.2	1737.2.
		1749.2(a)	1737.2(b).
		1749.2(b)	1737.2(c).
		1749.2(c)	1737.2(e).
		1749.2(d)	1737.2(h).
		1749.2(e)	1737.2(i).
		1749.2(f)	1737.2(j).
		1749.2(g)	1737.2(k).
		1749.2(h)	1737.2(p).
		1749.2(i)	1737.2(r).
		1749.3	1737.3.
		1749 Subpart B	1737 Subpart B.
		1749 Subpart C	1737 Subpart C.
		1749 Subpart D	1737 Subpart D.
		1749 Subpart E	1737 Subpart E.
		1750.1(a)	1735.1(b).
		1750.1(b)	1735.1(c).
		1750.2	1735.1(d).
		1750.3(a)	1735.2(a).
		1750.3(b)	1735.2(b).
		1750.3(c)	1735.2(c).
		1750.3(d)	1735.2(d).

Redesignation Table II

At 55 FR 49249, Nov. 27, 1990, RUS combined parts 1784, 1786, and 1787 into subparts of new part 1786. For the convenience of the user, a redesignation table follows for the parts, subparts, and sections redesignated.

Old part or section	New part or section	Old part or section	New part or section
1784	1786 subpart C	1786.8	1786.32
1784.1	1786.50	1786.9	1786.33
1784.2	1786.51	1786.10	1786.34
1784.3	1786.52	1786.11	1786.35
1784.4	1786.53	1786.12	1786.36
1784.5	1786.54	1786.13	1786.37
1784.6	1786.55	1786.14	1786.38
1784.7	1786.56	1787	1786 subpart D
1784.8	1786.57	1787.1	1786.75
1784.9	1786.58	1787.2	1786.76
1784.10	1786.59	1787.3	1786.77
1784.11	1786.60	1787.4	1786.78
1784.12	1786.61	1787.5	1786.79
1786	1786 subpart B	1787.6	1786.80
1786.1	1786.25	1787.7	1786.81
1786.2	1786.26	1787.8	1786.82
1786.3	1786.27	1787.9	1786.83
1786.4	1786.28	1787.10	1786.84
1786.5	1786.29	1787.11	1786.85
1786.6	1786.30	1787.12	1786.86
1786.7	1786.31		

List of CFR Sections Affected

All changes in this volume of the Code of Federal Regulations which were made by documents published in the FEDERAL REGISTER since January 1, 1986, are enumerated in the following list. Entries indicate the nature of the changes effected. Page numbers refer to FEDERAL REGISTER pages. The user should consult the entries for chapters and parts as well as sections for revisions.

For the period before January 1, 1986, see the "List of CFR Sections Affected, 1949-1963, 1964-1972, and 1973-1985" published in seven separate volumes.
