(a) Except as provided in paragraph (b) of this section, this part applies to railroads that operate on standard gage track which is part of the general railroad system of transportation.

(b) This part does not apply to rail rapid transit operations conducted over track that is used exclusively for that purpose and that is not part of the general system of railroad transportation.

§233.5 Accidents resulting from signal failure.

Each carrier shall report within 24 hours to the Federal Railroad Administration by toll free telephone, number 800-424-0201, whenever it learns of the occurrence of an accident/incident arising from the failure of an appliance, device, method or system to function or indicate as required by part 236 of this title that results in a more favorable aspect than intended or other condition hazardous to the movement of a train.

EFFECTIVE DATE NOTE: At 49 FR 3379, Jan. 26, 1984, part 233 was revised. This section contains information collection and record-keeping requirements and will not become effective until approval has been given by the Office of Management and Budget.

§233.7 Signal failure reports.

Each carrier shall report within 15 days each failure of an appliance, device, method, or system to function or indicate as required by part 236 of this title that results in a more favorable aspect than intended or other condition hazardous to the movement of a train. Form FRA F6180-14, "Signal Failure Report," shall be used for this purpose and completed in accordance with instructions printed on the form.

(Approved by the Office of Management and Budget under control number 2130-0007)

§233.9 Reports.

Not later than April 1, 1997 and every 5 years thereafter, each carrier shall file with FRA a signal system status report "Signal System Five-year Report" on a form to be provided by FRA in accordance with instructions and definitions provided on the report.

[61 FR 33872, July 1, 1996]

§233.11 Civil penalties.

Any person (an entity of any type covered under 1 U.S.C. 1, including but not limited to the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner,

Federal Railroad Administration, DOT

Pt. 234

manufacturer, lessor, lessee, or independent contractor) who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least \$550 and not more than \$11,000 per violation, except that: Penalties may be assessed against individuals only for willful violations, and, where a grossly negligent violation or a pattern of repeated violations has created an imminent hazard of death or injury to persons, or has caused death or injury, a penalty not to exceed \$27,000 per violation may be assessed. Each day a violation continues shall constitute a separate offense. See appendix A to this

part for a statement of agency civil penalty policy.

[63 FR 11623, Mar. 10, 1998, as amended at 69 FR 30595, May 28, 2004]

§ 233.13 Criminal penalty.

Whoever knowingly and willfully—

(a) Makes, causes to be made, or participates in the making of a false entry in reports required to be filed by this part; or

(b) Files a false report or other document required to be filed by this part is subject to a \$5,000 fine and 2 years imprisonment as prescribed by 49 U.S.C. 522(a) and section 209(e) of the Federal Railroad Safety Act of 1970, as amended (45 U.S.C. 438(e)).

APPENDIX A TO PART 233—SCHEDULE OF CIVIL PENALTIES¹

Section	Violation	Willful violation
233.5 Accidents resulting from signal failure	\$2,500	\$5,000
233.7 Signal failure reports	5,000	7,500
233.9 Annual reports	1,000	2,000

[53 FR 52936, Dec. 29, 1988, as amended at 63 FR 11623, Mar. 10, 1998; 69 FR 30595, May 28, 2004]

PART 234—GRADE CROSSING SIGNAL SYSTEM SAFETY

Subpart A—General

- Sec.
- 234.1 Scope.
- 234.3 Application.
- 234.4 Preemptive effect.
- 234.5 Definitions.
- 234.6 Penalties.

Subpart B—Reports

- 234.7 Accidents involving grade crossing signal failure.
- 234.9 Grade crossing signal system failure reports.

Subpart C—Response to Reports of Warning System Malfunction

- 234.101 Employee notification rules.
- 234.103 Timely response to report of malfunction.
- 234.105 Activation failure.
- 234.106 Partial activation.

- 234.107 False activation.
- 234.109 Recordkeeping.

Subpart D—Maintenance, Inspection, and Testing

MAINTENANCE STANDARDS

- 234.201 Location of plans.
- 234.203 Control circuits.
- 234.205 Operating characteristics of warning system apparatus.
- 234.207 Adjustment, repair, or replacement of component.
- 234.209 Interference with normal functioning of system.
- 234.211 Security of warning system apparatus.
- 234.213 Grounds.
- 234.215 Standby power system.
- 234.217 Flashing light units.
- 234.219 Gate arm lights and light cable.
- 234.221 Lamp voltage.
- 234.223 Gate arm.
- 234.225 Activation of warning system.
- 234.227 Train detection apparatus.
- 234.229 Shunting sensitivity.
- 234.231 Fouling wires.

¹ A penalty may be assessed against an individual only for a willful violation. The Administrator reserves the right to assess a

penalty of up to \$27,000 for any violation where circumstances warrant. See 49 CFR part 209, appendix A.

§ 234.1

- 234.233 Rail joints.
- 234.235 Insulated rail joints.
- 234.237 Reverse switch cut-out circuit.
- 234.239 Tagging of wires and interference of wires or tags with signal apparatus.
- 234.241 Protection of insulated wire; splice in underground wire.
- 234.243 Wire on pole line and aerial cable.
- 234.245 Signs.

INSPECTIONS AND TESTS

- 234.247 Purpose of inspections and tests; removal from service of relay or device failing to meet test requirements.
- 234.249 Ground tests.
- 234.251 Standby power.
- 234.253 Flashing light units and lamp voltage.
- 234.255 Gate arm and gate mechanism.
- 234.257 Warning system operation.
- 234.259 Warning time.
- 234.261 Highway traffic signal pre-emption.
- 234.263 Relays.
- 234.265 Timing relays and timing devices.
- 234.267 Insulation resistance tests, wires in trunking and cables.
- 234.269 Cut-out circuits.
- 234.271 Insulated rail joints, bond wires, and track connections.
- 234.273 Results of inspections and tests.

APPENDIX A TO PART 234—SCHEDULE OF CIVIL PENALTIES

APPENDIX B TO PART 234—ALTERNATE METHODS OF PROTECTION UNDER 49 CFR 234.105(C), 234.106, AND 234.107(C).

AUTHORITY: 49 U.S.C. 20103, 20107, and 49 CFR 1.49.

AUTHORITY: 49 U.S.C. 20103, 20107; 28 U.S.C. 2461, note; and 49 CFR 1.49.

SOURCE: 61 FR 31806, June 20, 1996, unless otherwise noted.

Subpart A—General

§ 234.1 Scope.

This part imposes minimum maintenance, inspection, and testing standards for highway-rail grade crossing warning systems. This part also prescribes standards for the reporting of failures of such systems and prescribes minimum actions railroads must take when such warning systems malfunction. This part does not restrict a railroad from adopting and enforcing additional or more stringent requirements not inconsistent with this part.

§ 234.3 Application.

This part applies to all railroads except:

49 CFR Ch. II (10–1–04 Edition)

(a) A railroad that exclusively operates freight trains only on track which is not part of the general railroad system of transportation;

(b) Rapid transit operations within an urban area that are not connected to the general railroad system of transportation; and

(c) A railroad that operates passenger trains only on track inside an installation that is insular; i.e., its operations are limited to a separate enclave in such a way that there is no reasonable expectation that the safety of the public—except a business guest, a licensee of the railroad or an affiliated entity, or a trespasser—would be affected by the operation. An operation will not be considered insular if one or more of the following exists on its line:

(1) A public highway-rail crossing that is in use;

(2) An at-grade rail crossing that is in use;

(3) A bridge over a public road or waters used for commercial navigation; or

(4) A common corridor with a railroad, i.e., its operations are within 30 feet of those of any railroad.

§ 234.4 Preemptive effect.

Under 49 U.S.C. 20106 (formerly § 205 of the Federal Railroad Safety Act of 1970 (45 U.S.C. 434)), issuance of these regulations preempts any State law, rule, regulation, order, or standard covering the same subject matter, except a provision directed at an essentially local safety hazard that is consistent with this part and that does not impose an undue burden on interstate commerce.

§ 234.5 Definitions.

As used in this part:

Activation failure means the failure of an active highway-rail grade crossing warning system to indicate the approach of a train at least 20 seconds prior to the train's arrival at the crossing, or to indicate the presence of a train occupying the crossing, unless the crossing is provided with an alternative means of active warning to highway users of approaching trains. (This failure indicates to the motorist that it is safe to proceed across the railroad tracks when, in fact, it is not safe to do so.) A grade crossing signal

system does not indicate the approach of a train within the meaning of this paragraph if—more than 50% of the flashing lights (not gate arm lights) on any approach lane to the crossing are not functioning as intended, or in the case of an approach lane for which two or more pairs of flashing lights are provided, there is not at least one flashing light pair operating as intended. Back lights on the far side of the crossing are not considered in making these determinations.

Appropriately equipped flagger means a person other than a train crewmember who is equipped with a vest, shirt, or jacket of a color appropriate for daytime flagging such as orange, yellow, strong yellow green or fluorescent versions of these colors or other generally accepted high visibility colors. For nighttime flagging, similar outside garments shall be retro reflective. Acceptable hand signal devices for daytime flagging include “STOP/SLOW” paddles or red flags. For nighttime flagging, a flashlight, lantern, or other lighted signal shall be used. Inasmuch as Part VI of the Federal Highway Administration’s Manual on Uniform Traffic Control Devices addresses standards and guides for flaggers and flagging equipment for highway traffic control, FRA recommends that railroads be aware of the standards and follow them to the greatest extent possible. Copies of the latest MUTCD provisions regarding flagging will be available from FRA, as well as FMCSA, as changes are made in this area.

Credible report of system malfunction means specific information regarding a malfunction at an identified highway-rail crossing, supplied by a railroad employee, law enforcement officer, highway traffic official, or other employee of a public agency acting in an official capacity.

False activation means the activation of a highway-rail grade crossing warning system caused by a condition that requires correction or repair of the grade crossing warning system. (This failure indicates to the motorist that it is not safe to cross the railroad tracks when, in fact, it is safe to do so.)

Highway-rail grade crossing means a location where a public highway, road, street, or private roadway, including

associated sidewalks and pathways, crosses one or more railroad tracks at grade.

Partial activation means activation of a highway-rail grade crossing warning system indicating the approach of a train, however, the full intended warning is not provided due to one of the following conditions:

(1) At non-gated crossings equipped with one pair of lights designed to flash alternately, one of the two lights does not operate properly (and approaching motorists can not clearly see flashing back lights from the warning lights on the other side of the crossing);

(2) At gated crossings, the gate arm is not in a horizontal position; or

(3) At gated crossings, any portion of a gate arm is missing if that portion normally had a gate arm flashing light attached.

Train means one or more locomotives, with or without cars.

Warning system malfunction means an activation failure, a partial activation, or a false activation of a highway-rail grade crossing warning system.

§ 234.6 Penalties.

(a) *Civil penalty.* Any person (an entity of any type covered under 1 U.S.C. 1, including but not limited to the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor) who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least \$550, but not more than \$11,000 per violation, except that: penalties may be assessed against individuals only for willful violations, and where a grossly negligent violation or a pattern of repeated violations has created an imminent hazard of death or injury to persons, or has caused death or injury, a penalty not to exceed \$27,000 per violation may be assessed. Each day a violation continues shall constitute a separate offense. Appendix A to this part contains a schedule of

§ 234.7

civil penalty amounts used in connection with this rule. The railroad is not responsible for compliance with respect to any condition inconsistent with the technical standards set forth in this part where such variance arises as a result of actions beyond the control of the railroad and the railroad could not have prevented the variance through the exercise of due diligence. The foregoing sentence does not excuse any instance of noncompliance resulting from the actions of the railroad's employees, agents, or contractors.

(b) *Criminal penalty.* Whoever knowingly and willfully makes, causes to be made, or participates in the making of a false entry in reports required to be filed by this part, or files a false report or other document required to be filed by this part is subject to a \$5,000 fine and 2 years imprisonment as prescribed by 49 U.S.C. 522(a) and section 209(e) of the Federal Railroad Safety Act of 1970, as amended (45 U.S.C. 438(e)).

[61 FR 31806, June 20, 1996, as amended at 63 FR 11623, Mar. 10, 1998; 69 FR 30595, May 28, 2004]

Subpart B—Reports

§ 234.7 Accidents involving grade crossing signal failure.

(a) Each railroad shall report to FRA every impact between on-track railroad equipment and an automobile, bus, truck, motorcycle, bicycle, farm vehicle, or pedestrian at a highway-rail grade crossing involving an activation failure. Notification shall be provided to the National Response Center within 24 hours of occurrence at (800) 424-0201. Complete reports shall thereafter be filed with FRA pursuant to § 234.9 of this part (activation failure report) and 49 CFR 225.11 (accident/ incident report).

(b) Each telephone report must state the:

- (1) Name of the railroad;
- (2) Name, title, and telephone number of the individual making the report;
- (3) Time, date, and location of accident;
- (4) U. S. DOT-AAR Grade Crossing Identification Number;

49 CFR Ch. II (10–1–04 Edition)

(5) Circumstances of the accident, including operating details of the grade crossing warning device;

(6) Number of persons killed or injured, if any;

(7) Maximum authorized train speed; and

(8) Posted highway speed limit, if known.

§ 234.9 Grade crossing signal system failure reports.

Each railroad shall report to FRA within 15 days each activation failure of a highway-rail grade crossing warning system. FRA Form No. 6180–83, “Highway-Rail Grade Crossing Warning System Failure Report,” shall be used for this purpose and completed in accordance with instructions printed on the form.

Subpart C—Response to Reports of Warning System Malfunction

§ 234.101 Employee notification rules.

Each railroad shall issue rules requiring its employees to report to persons designated by that railroad, by the quickest means available, any warning system malfunction.

§ 234.103 Timely response to report of malfunction.

(a) Upon receipt of a credible report of a warning system malfunction, a railroad having maintenance responsibility for the warning system shall promptly investigate the report and determine the nature of the malfunction. The railroad shall take appropriate action as required by § 234.207.

(b) Until repair or correction of the warning system is completed, the railroad shall provide alternative means of warning highway traffic and railroad employees in accordance with §§ 234.105, 234.106 or 234.107 of this part.

(c) Nothing in this subpart requires repair of a warning system, if, acting in accordance with applicable State law, the railroad proceeds to discontinue or dismantle the warning system. However, until repair, correction, discontinuance, or dismantling of the warning system is completed, the railroad shall comply with this subpart to ensure the safety of the traveling public and railroad employees.

§ 234.105 Activation failure.

Upon receipt of a credible report of warning system malfunction involving an activation failure, a railroad having maintenance responsibility for the warning system shall promptly initiate efforts to warn highway users and railroad employees at the subject crossing by taking the following actions:

(a) Prior to any train's arrival at the crossing, notify the train crew of the report of activation failure and notify any other railroads operating over the crossing;

(b) Notify the law enforcement agency having jurisdiction over the crossing, or railroad police capable of responding and controlling vehicular traffic; and

(c) Provide for alternative means of actively warning highway users of approaching trains, consistent with the following requirements (see appendix B for a summary chart of alternative means of warning):

(1)(i) If an appropriately equipped flagger provides warning for each direction of highway traffic, trains may proceed through the crossing at normal speed.

(ii) If at least one uniformed law enforcement officer (including a railroad police officer) provides warning to highway traffic at the crossing, trains may proceed through the crossing at normal speed.

(2) If an appropriately equipped flagger provides warning for highway traffic, but there is not at least one flagger providing warning for each direction of highway traffic, trains may proceed with caution through the crossing at a speed not exceeding 15 miles per hour. Normal speed may be resumed after the locomotive has passed through the crossing.

(3) If there is not an appropriately equipped flagger or uniformed law enforcement officer providing warning to highway traffic at the crossing, each train must stop before entering the crossing and permit a crewmember to dismount to flag highway traffic to a stop. The locomotive may then proceed through the crossing, and the flagging crewmember may reboard the locomotive before the remainder of the train proceeds through the crossing.

(d) A locomotive's audible warning device shall be activated in accordance with railroad rules regarding the approach to a grade crossing.

§ 234.106 Partial activation.

Upon receipt of a credible report of a partial activation, a railroad having maintenance responsibility for the warning system shall promptly initiate efforts to warn highway users and railroad employees at the subject crossing in the same manner as required for false activations (§ 234.107).

§ 234.107 False activation.

Upon receipt of a credible report of a false activation, a railroad having maintenance responsibility for the highway-rail grade crossing warning system shall promptly initiate efforts to warn highway users and railroad employees at the crossing by taking the following actions:

(a) Prior to a train's arrival at the crossing, notify the train crew of the report of false activation and notify any other railroads operating over the crossing;

(b) Notify the law enforcement agency having jurisdiction over the crossing, or railroad police capable of responding and controlling vehicular traffic; and

(c) Provide for alternative means of actively warning highway users of approaching trains, consistent with the following requirements (see Appendix B for a summary chart of alternative means of warning).

(1)(i) If an appropriately equipped flagger is providing warning for each direction of highway traffic, trains may proceed through the crossing at normal speed.

(ii) If at least one uniformed law enforcement officer (including a railroad police officer) provides warning to highway traffic at the crossing, trains may proceed through the crossing at normal speed.

(2) If there is not an appropriately equipped flagger providing warning for each direction of highway traffic, or if there is not at least one uniformed law enforcement officer providing warning, trains with the locomotive or cab car leading, may proceed with caution

§ 234.109

through the crossing at a speed not exceeding 15 miles per hour. Normal speed may be resumed after the locomotive has passed through the crossing. In the case of a shoving move, a crewmember shall be on the ground to flag the train through the crossing.

(3) In lieu of complying with paragraphs (c) (1) or (2) of this section, a railroad may temporarily take the warning system out of service if the railroad complies with all requirements of § 234.105, "Activation failure."

(d) A locomotive's audible warning device shall be activated in accordance with railroad rules regarding the approach to a grade crossing.

§ 234.109 Recordkeeping.

(a) Each railroad shall keep records pertaining to compliance with this subpart. Records may be kept on forms provided by the railroad or by electronic means. Each railroad shall keep the following information for each credible report of warning system malfunction:

(1) Location of crossing (by highway name and DOT/AAR Crossing Inventory Number);

(2) Time and date of receipt by railroad of report of malfunction;

(3) Actions taken by railroad prior to repair and reactivation of repaired system; and

(4) Time and date of repair.

(b) Each railroad shall retain for at least one year (from the latest date of railroad activity in response to a credible report of malfunction) all records referred to in paragraph (a) of this section. Records required to be kept shall be made available to FRA as provided by 49 U.S.C. 20107 (formerly 208 of the Federal Railroad Safety Act of 1970 (45 U.S.C. 437)).

Subpart D—Maintenance, Inspection, and Testing

MAINTENANCE STANDARDS

§ 234.201 Location of plans.

Plans required for proper maintenance and testing shall be kept at each highway-rail grade crossing warning system location. Plans shall be legible and correct.

49 CFR Ch. II (10–1–04 Edition)

§ 234.203 Control circuits.

All control circuits that affect the safe operation of a highway-rail grade crossing warning system shall operate on the fail-safe principle.

§ 234.205 Operating characteristics of warning system apparatus.

Operating characteristics of electromagnetic, electronic, or electrical apparatus of each highway-rail crossing warning system shall be maintained in accordance with the limits within which the system is designed to operate.

§ 234.207 Adjustment, repair, or replacement of component.

(a) When any essential component of a highway-rail grade crossing warning system fails to perform its intended function, the cause shall be determined and the faulty component adjusted, repaired, or replaced without undue delay.

(b) Until repair of an essential component is completed, a railroad shall take appropriate action under § 234.105, Activation failure, § 234.106, Partial activation, or § 234.107, False activation, of this part.

§ 234.209 Interference with normal functioning of system.

(a) The normal functioning of any system shall not be interfered with in testing or otherwise without first taking measures to provide for safety of highway traffic that depends on normal functioning of such system.

(b) Interference includes, but is not limited to:

(1) Trains, locomotives or other railroad equipment standing within the system's approach circuit, other than normal train movements or switching operations, where the warning system is not designed to accommodate those activities.

(2) Not providing alternative methods of maintaining safety for the highway user while testing or performing work on the warning systems or on track and other railroad systems or structures which may affect the integrity of the warning system.

§ 234.211 Security of warning system apparatus.

Highway-rail grade crossing warning system apparatus shall be secured against unauthorized entry.

§ 234.213 Grounds.

Each circuit that affects the proper functioning of a highway-rail grade crossing warning system shall be kept free of any ground or combination of grounds that will permit a current flow of 75 percent or more of the release value of any relay or electromagnetic device in the circuit. This requirement does not apply to: circuits that include track rail; alternating current power distribution circuits that are grounded in the interest of safety; and common return wires of grounded common return single break circuits.

§ 234.215 Standby power system.

A standby source of power shall be provided with sufficient capacity to operate the warning system for a reasonable length of time during a period of primary power interruption. The designated capacity shall be specified on the plans required by § 234.201 of this part.

[66 FR 49560, Sept. 28, 2001]

§ 234.217 Flashing light units.

(a) Each flashing light unit shall be properly positioned and aligned and shall be visible to a highway user approaching the crossing.

(b) Each flashing light unit shall be maintained to prevent dust and moisture from entering the interior of the unit. Roundels and reflectors shall be clean and in good condition.

(c) All light units shall flash alternately. The number of flashes per minute for each light unit shall be 35 minimum and 65 maximum.

§ 234.219 Gate arm lights and light cable.

Each gate arm light shall be maintained in such condition to be properly visible to approaching highway users. Lights and light wire shall be secured to the gate arm.

§ 234.221 Lamp voltage.

The voltage at each lamp shall be maintained at not less than 85 percent of the prescribed rating for the lamp.

§ 234.223 Gate arm.

Each gate arm, when in the downward position, shall extend across each lane of approaching highway traffic and shall be maintained in a condition sufficient to be clearly viewed by approaching highway users. Each gate arm shall start its downward motion not less than three seconds after flashing lights begin to operate and shall assume the horizontal position at least five seconds before the arrival of any normal train movement through the crossing. At those crossings equipped with four quadrant gates, the timing requirements of this section apply to entrance gates only.

§ 234.225 Activation of warning system.

A highway-rail grade crossing warning system shall be maintained to activate in accordance with the design of the warning system, but in no event shall it provide less than 20 seconds warning time for the normal operation of through trains before the grade crossing is occupied by rail traffic.

§ 234.227 Train detection apparatus.

(a) Train detection apparatus shall be maintained to detect a train or railcar in any part of a train detection circuit, in accordance with the design of the warning system.

(b) If the presence of sand, rust, dirt, grease, or other foreign matter is known to prevent effective shunting, a railroad shall take appropriate action under § 234.105, "Activation failure," to safeguard highway users.

§ 234.229 Shunting sensitivity.

Each highway-rail grade crossing train detection circuit shall detect the application of a shunt of 0.06 ohm resistance when the shunt is connected across the track rails of any part of the circuit.

§ 234.231 Fouling wires.

Each set of fouling wires in a highway-rail grade crossing train detection

§ 234.233

circuit shall consist of at least two discrete conductors. Each conductor shall be of sufficient conductivity and shall be maintained in such condition to ensure proper operation of the train detection apparatus when the train detection circuit is shunted. Installation of a single duplex wire with single plug acting as fouling wires is prohibited. Existing installations having single duplex wires with a single plug for fouling wires may be continued in use until they require repair or replacement.

§ 234.233 Rail joints.

Each non-insulated rail joint located within the limits of a highway-rail grade crossing train detection circuit shall be bonded by means other than joint bars and the bonds shall be maintained in such condition to ensure electrical conductivity.

§ 234.235 Insulated rail joints.

Each insulated rail joint used to separate train detection circuits of a highway-rail grade crossing shall be maintained to prevent current from flowing between rails separated by the insulation in an amount sufficient to cause a failure of the train detection circuit.

§ 234.237 Reverse switch cut-out circuit.

A switch, when equipped with a switch circuit controller connected to the point and interconnected with warning system circuitry, shall be maintained so that the warning system can only be cut out when the switch point is within one-half inch of full reverse position.

§ 234.239 Tagging of wires and interference of wires or tags with signal apparatus.

Each wire shall be tagged or otherwise so marked that it can be identified at each terminal. Tags and other marks of identification shall be made of insulating material and so arranged that tags and wires do not interfere with moving parts of the apparatus. This requirement applies to each wire at each terminal in all housings including switch circuit controllers and terminal or junction boxes. This requirement does not apply to flashing light units, gate arm light units and other

49 CFR Ch. II (10–1–04 Edition)

auxiliary light units. The local wiring on a solid state crossing controller rack does not require tags if the wiring is an integral part of the solid state equipment.

§ 234.241 Protection of insulated wire; splice in underground wire.

Insulated wire shall be protected from mechanical injury. The insulation shall not be punctured for test purposes. A splice in underground wire shall have insulation resistance at least equal to that of the wire spliced.

§ 234.243 Wire on pole line and aerial cable.

Wire on a pole line shall be securely attached to an insulator that is properly fastened to a cross arm or bracket supported by a pole or other support. Wire shall not interfere with, or be interfered with by, other wires on the pole line. Aerial cable shall be supported by messenger wire. An open-wire transmission line operating at voltage of 750 volts or more shall be placed not less than 4 feet above the nearest cross arm carrying active warning system circuits.

§ 234.245 Signs.

Each sign mounted on a highway-rail grade crossing signal post shall be maintained in good condition and be visible to the highway user.

INSPECTIONS AND TESTS

§ 234.247 Purpose of inspections and tests; removal from service of relay or device failing to meet test requirements.

(a) The inspections and tests set forth in §§ 234.249 through 234.271 are required at highway-rail grade crossings located on in service railroad tracks and shall be made to determine if the warning system and its component parts are maintained in a condition to perform their intended function.

(b) If a railroad elects not to comply with the requirements of §§ 234.249 through 234.271 because all tracks over the grade crossing are out of service or the railroad suspends operations during a portion of the year, and the grade crossing warning system is also temporarily taken out of service, a full inspection and all required tests must be

successfully completed before railroad operations over the grade crossing resume.

(c) Any electronic device, relay, or other electromagnetic device that fails to meet the requirements of tests required by this part shall be removed from service and shall not be restored to service until its operating characteristics are in accordance with the limits within which such device or relay is designed to operate.

[61 FR 31806, June 20, 1996, as amended at 66 FR 49560, Sept. 28, 2001]

§ 234.249 Ground tests.

A test for grounds on each energy bus furnishing power to circuits that affect the safety of warning system operation shall be made when such energy bus is placed in service and at least once each month thereafter.

§ 234.251 Standby power.

Standby power shall be tested at least once each month.

§ 234.253 Flashing light units and lamp voltage.

(a) Each flashing light unit shall be inspected when installed and at least once every twelve months for proper alignment and frequency of flashes in accordance with installation specifications.

(b) Lamp voltage shall be tested when installed and at least once every 12 months thereafter.

(c) Each flashing light unit shall be inspected for proper visibility, dirt and damage to roundels and reflectors at least once each month.

§ 234.255 Gate arm and gate mechanism.

(a) Each gate arm and gate mechanism shall be inspected at least once each month.

(b) Gate arm movement shall be observed for proper operation at least once each month.

(c) Hold-clear devices shall be tested for proper operation at least once every 12 months.

§ 234.257 Warning system operation.

(a) Each highway-rail crossing warning system shall be tested to determine that it functions as intended when it is

placed in service. Thereafter, it shall be tested at least once each month and whenever modified or disarranged.

(b) Warning bells or other stationary audible warning devices shall be tested when installed to determine that they function as intended. Thereafter, they shall be tested at least once each month and whenever modified or disarranged.

§ 234.259 Warning time.

Each crossing warning system shall be tested for the prescribed warning time at least once every 12 months and when the warning system is modified because of a change in train speeds. Electronic devices that accurately determine actual warning time may be used in performing such tests.

§ 234.261 Highway traffic signal pre-emption.

Highway traffic signal pre-emption interconnections, for which a railroad has maintenance responsibility, shall be tested at least once each month.

§ 234.263 Relays.

(a) Except as stated in paragraph (b) of this section, each relay that affects the proper functioning of a crossing warning system shall be tested at least once every four years.

(b)(1) Alternating current vane type relays, direct current polar type relays, and relays with soft iron magnetic structure shall be tested at least once every two years.

(2) Alternating current centrifugal type relays shall be tested at least once every 12 months.

(c) Testing of relays requiring testing on four year intervals shall be completed in accordance with the following schedule:

(1) Not less than 50% by the end of calendar year 1996;

(2) Not less than a total of 75% by the end of calendar year 1997; and

(3) One hundred percent by the end of calendar year 1998.

(d) Testing of relays requiring testing on two year intervals shall be completed by the end of calendar year 1996.

§ 234.265

49 CFR Ch. II (10–1–04 Edition)

§ 234.265 Timing relays and timing devices.

Each timing relay and timing device shall be tested at least once every twelve months. The timing shall be maintained at not less than 90 percent nor more than 110 percent of the 41 predetermined time interval. The predetermined time interval shall be shown on the plans or marked on the timing relay or timing device. Timing devices which perform internal functions associated with motion detectors, motion sensors, and grade crossing predictors are not subject to the requirements of this section.

§ 234.267 Insulation resistance tests, wires in trunking and cables.

(a) Insulation resistance tests shall be made when wires or cables are installed and at least once every ten years thereafter.

(b) Insulation resistance tests shall be made between all conductors and ground, between conductors in each multiple conductor cable, and between conductors in trunking. Insulation resistance tests shall be performed when wires, cables, and insulation are dry.

(c) Subject to paragraph (d) of this section, when insulation resistance of wire or cable is found to be less than 500,000 ohms, prompt action shall be taken to repair or replace the defective wire or cable. Until such defective wire or cable is replaced, insulation resistance tests shall be made annually.

(d) A circuit with a conductor having an insulation resistance of less than 200,000 ohms shall not be used.

(e) Required insulation resistance testing that does not conform to the required testing schedule of this section shall be completed in accordance with the following schedule:

(1) Not less than 50% by the end of calendar year 1996;

(2) Not less than a total of 75% by the end of calendar year 1997; and

(3) One hundred percent by the end of calendar year 1998.

§ 234.269 Cut-out circuits.

Each cut-out circuit shall be tested at least once every three months to determine that the circuit functions as intended. For purposes of this section, a cut-out circuit is any circuit which overrides the operation of automatic warning systems. This includes both switch cut-out circuits and devices which enable personnel to manually override the operation of automatic warning systems.

§ 234.271 Insulated rail joints, bond wires, and track connections.

Insulated rail joints, bond wires, and track connections shall be inspected at least once every three months.

§ 234.273 Results of inspections and tests.

(a) Results of inspections and tests made in compliance with this part shall be recorded on forms provided by the railroad, or by electronic means, subject to approval by the Associate Administrator for Safety. Each record shall show the name of the railroad, AAR/DOT inventory number, place and date, equipment tested, results of tests, repairs, replacements, adjustments made, and condition in which the apparatus was left.

(b) Each record shall be signed or electronically coded by the employee making the test and shall be filed in the office of a supervisory official having jurisdiction. Records required to be kept shall be made available to FRA as provided by 49 U.S.C. 20107 (formerly § 208 of the Federal Railroad Safety Act of 1970 (45 U.S.C. 437)).

(c) Each record shall be retained until the next record for that test is filed but in no case for less than one year from the date of the test.

APPENDIX A TO PART 234—SCHEDULE OF CIVIL PENALTIES¹

Section	Violation	Willful violation
Subpart B—Reports		
234.7 Accidents involving grade crossing signal failure	\$5,000	\$7,500
234.9 Grade crossing signal system failure reports	2,500	5,000

Federal Railroad Administration, DOT

Pt. 234, App. A

Section		Violation	Willful violation
Subpart C—Response to Reports of Warning System Malfunction			
Sec.			
234.101	Employee notification rules	2,500	5,000
234.103	Timely response to report of malfunction	2,500	5,000
234.105	Activation failure		
	(a) Failure to notify—train crews	5,000	7,500
	Other railroads	5,000	7,500
	(b) Failure to notify law enforcement agency	2,500	5,000
	(c) Failure to comply with—flagging requirements	5,000	5,000
	Speed restrictions	5,000	7,500
	(d) Failure to activate horn or whistle	5,000	7,500
234.106	Partial activation		
	(a) Failure to notify—train crews	5,000	7,500
	Other railroads	5,000	7,500
	(b) Failure to notify law enforcement agency	2,500	5,000
	(c) Failure to comply with—flagging requirements speed restrictions	5,000	7,500
	(d) Failure to activate horn or whistle	5,000	7,500
234.107	False activation		
	(a) Failure to notify—train crews	5,000	7,500
	Other railroads	5,000	7,500
	(b) Failure to notify law enforcement agency	2,500	5,000
	(c) Failure to comply with—flagging requirements	5,000	7,500
	Speed restrictions	5,000	7,500
	(d) Failure to activate horn or whistle	5,000	7,500
234.109	Recordkeeping	1,000	2,000
Subpart D—Maintenance, Inspection, and Testing			
Maintenance Standards:			
234.201	Location of plans	1,000	2,000
234.203	Control circuits	1,000	2,000
234.205	Operating characteristics of warning system apparatus	2,500	5,000
234.207	Adjustment, repair, or replacement of component	2,500	5,000
234.209	Interference with normal functioning of system	5,000	7,500
234.211	Locking of warning system apparatus	1,000	2,000
234.213	Grounds	1,000	2,000
234.215	Standby power system	5,000	7,500
234.217	Flashing light units	1,000	2,000
234.219	Gate arm lights and light cable	1,000	2,000
234.221	Lamp voltage	1,000	2,000
234.223	Gate arm	1,000	2,000
234.225	Activation of warning system	5,000	7,500
234.227	Train detection apparatus	2,500	5,000
234.229	Shunting sensitivity	2,500	5,000
234.231	Fouling wires	1,000	2,000
234.233	Rail joints	1,000	2,000
234.235	Insulated rail joints	1,000	2,000
234.237	Switch equipped with circuit controller	1,000	2,000
234.239	Tagging of wires and interference of wires or tags with signal apparatus	1,000	2,000
234.241	Protection of insulated wire; splice in underground wire	1,000	2,000
234.243	Wire on pole line and aerial cable	1,000	2,000
234.245	Signs	1,000	2,000
Inspections and Tests:			
234.247	Purpose of inspections and tests; removal from service of relay or device failing to meet test requirements	2,500	5,000
234.249	Ground tests	2,500	5,000
234.251	Standby power	5,000	7,500
234.253	Flashing light units and lamp voltage	1,000	2,000
234.255	Gate arm and gate mechanism	1,000	2,000
234.257	Warning system operation	2,500	5,000
234.259	Warning time	1,000	2,000
234.261	Highway traffic signal pre-emption	1,000	2,000
234.263	Relays	1,000	2,000
234.265	Timing relays and timing devices	1,000	2,000
234.267	Insulation resistance tests, wires in trunking and cables	2,500	5,000
234.269	Cut-out circuits	1,000	2,000
234.271	Insulated rail joints, bond wires, and track connections	2,500	5,000
234.273	Results of tests	1,000	2,000

¹A penalty may be assessed against an individual only for a willful violation. The Administrator reserves the right to assess a penalty of up to \$27,000 for any violation where circumstances warrant. See 49 CFR Part 209, Appendix A.

[61 FR 31806, June 20, 1996, as amended at 63 FR 11623, Mar. 10, 1998; 69 FR 30595, May 28, 2004]

APPENDIX B TO PART 234—ALTERNATE METHODS OF PROTECTION UNDER 49 CFR
234.105(C), 234.106, AND 234.107(C)

[This is a summary—see body of text for complete requirements]

	Flagger for each direction of traffic	Police officer present	Flagger present, but not one for each direction of traffic	No flagger/no police
False Activation	Normal Speed	Normal Speed	Proceed with caution—maximum speed of 15 mph.	Proceed with caution—maximum speed of 15 mph.
Partial Activation* ...	Normal Speed	Normal Speed	Proceed with caution—maximum speed of 15 mph.	Proceed with caution—maximum speed of 15 mph.
Activation Failure**	Normal Speed	Normal Speed	Proceed with caution—maximum speed of 15 mph.	Stop: Crewmember flag traffic and reboard.

*Partial activation—full warning not given.
Non-gated crossing with one pair of lights designed to flash alternatively, one light does not work (and back-lights from other side not visible).

Gated crossing—gate arm not horizontal; or any portion of a gate arm is missing if that portion had held a gate arm flashing light.

**Activation failure includes—if more than 50% of the flashing lights on any approach lane not functioning; or if an approach lane has two or more pairs of flashing lights, there is not at least one pair operating as intended.

APPENDIX A TO PART 235—SCHEDULE OF CIVIL PENALTIES

AUTHORITY: 49 U.S.C. 20103, 20107, and 49 CFR 1.49.

AUTHORITY: 49 U.S.C. 20103, 20107; 28 U.S.C. 2461, note; and 49 CFR 1.49.

SOURCE: 49 FR 3380, Jan. 26, 1984, unless otherwise noted.

§ 235.1 Scope.

This part prescribes application for approval to discontinue or materially modify block signal systems, interlockings, traffic control systems, automatic train stop, train control, or cab signal systems, or other similar appliances, devices, methods, or systems,

and provides for relief from part 236 of this title.

§ 235.3 Application.

(a) Except as provided in paragraph (b) of this section, this part applies to railroads that operate on standard gage track which is part of the general railroad system of transportation.

(b) This part does not apply to rail rapid transit operations conducted over track that is used exclusively for that purpose and that is not part of the general system of railroad transportation.

§ 235.5 Changes requiring filing of application.

(a) Except as provided in § 235.7, applications shall be filed to cover the following:

(1) The discontinuance of a block signal system, interlocking, traffic control system, automatic train stop, train control, or cab signal system or other similar appliance or device;

(2) The decrease of the limits of a block signal system, interlocking, traffic control system, automatic train stop, train control, or cab signal system; or

(3) The modification of a block signal system, interlocking, traffic control system, automatic train stop, train control, or cab signal system.

(b) [Reserved]

(Approved by the Office of Management and Budget under control number 2130–0042)

§ 235.7 Changes not requiring filing of application.

(a) It is not necessary to file an application for approval of the following discontinuances:

(1) Removal of block signal system, interlocking, traffic control system, automatic train stop, train control, or cab signal system from track approved for abandonment by formal proceeding;

(2) Removal of devices and associated signals used to provide protection against unusual contingencies such as landslide, burned bridge, high water, high and wide load, or tunnel protection when the unusual contingency no longer exists;

(3) Removal of an interlocking where a drawbridge has been permanently closed by the formal approval of another government agency; or

(4) Removal from service not to exceed six months of block signal system, interlocking, or traffic control system necessitated by catastrophic occurrence such as derailment, flood, fire, or hurricane.

(b) When the resultant arrangement will comply with part 236 of this title, it is not necessary to file for approval to decrease the limits of a system as follows:

(1) Decrease of the limits of an interlocking when interlocked switches, derails, or movable-point frogs are not involved;

(2) Removal of electric or mechanical lock from hand-operated switch in automatic block signal or traffic control territory where train speed over switch does not exceed 20 miles per hour; or

(3) Removal of electric or mechanical lock from hand-operated switch in automatic block signal or traffic control territory where trains are not permitted to clear the main track at such switch.

(c) When the resultant arrangement will comply with part 236 of this title, it is not necessary to file an application for approval of the following modifications:

(1) A modification that is required to comply with an order of the Federal Railroad Administration or any section of part 236 of this title;

(2) The installation of an automatic block signal or a traffic control system

to replace manual block or non-signalized territory;

(3) The installation of a traffic control system to replace a roadway automatic block signal system (discontinuance of an automatic train stop, train control, or cab signal system is not permitted without FRA approval);

(4) The installation of an automatic train stop, train control, or cab signal system in an existing automatic block or traffic control system;

(5) The installation of a continuous inductive automatic train stop system to replace an existing intermittent inductive automatic train stop system;

(6) The installation of a continuous inductive automatic train stop system to supplement an existing automatic cab signal system;

(7) The installation of an automatic train control system to replace an existing automatic train stop system or to supplement an existing automatic cab signal system;

(8) The installation of an interlocking to replace existing stop signs, gates, or pipe-connected derails protecting a railroad crossing at grade;

(9) The installation of all relay type locking to replace existing mechanical or electromechanical locking of an interlocking;

(10) The installation of an additional controlled point in existing traffic control system;

(11) The installation of an interlocking in an existing block signal system;

(12) The conversion of a hand-operated switch, a hand-operated switch locked either electrically or mechanically, or a spring switch to a power-operated switch;

(13) The conversion of a spring switch to a hand-operated switch, or to a hand-operated switch locked either electrically or mechanically;

(14) The removal or relocation of signals associated with a spring switch converted to hand operation;

(15) The installation, relocation, or removal of signals to specifically provide adequate stopping distance;

(16) The change of aspects;

(17) The relocation of a signal to improve preview of signal aspect visibility;

§ 235.8

(18) To replace a signal with a signal of another type;

(19) To change an approach signal to operative or inoperative signal, or remove an approach signal not required by § 236.310 of this title;

(20) The change in location of a machine from which an interlocking or traffic control system is controlled;

(21) The closing of a manual block station or the change in hours during which a manual block station is attended;

(22) The change in hours during which a manual interlocking is attended provided the interlocking operates for all routes over which train movements are permitted;

(23) The installation of devices used to provide protection against unusual contingencies such as landslide, burned bridges, high water, high and wide loads, or dragging equipment;

(24) The installation, relocation, or removal of signals, interlocked switches, derails, movable-point frogs, or electric locks in an existing system directly associated with:

(i) The installation of new track;

(ii) The elimination of existing track other than a second main track;

(iii) The extension or shortening of a passing siding;

(iv) Elimination of second main track where signal system mn retained main track is arranged to provide both opposing and following protection for train movements provided second main track is physically removed; or

(v) A line relocation; or

(vi) The conversion of pole line circuits to electronic (coded) track circuits provided that the railroad gives notice and a profile plan of the change to the FRA regional office having jurisdiction over that territory at least 60 days in advance of the change. The railroad must also at the same time provide a copy of the notice and profile plan to representatives of employees responsible for maintenance, inspection and testing of the signal system under 49 CFR Part 236. The signal system modification will be deemed acceptable, unless within 60 days, the Regional Administrator stays action by written notice to the railroad and refers the issue to the Railroad Safety Board for decision.

49 CFR Ch. II (10–1–04 Edition)

(25) The temporary or permanent arrangement of existing systems necessitated by highway rail separation construction. Temporary arrangements shall be removed within six months following completion of construction.

[49 FR 3380, Jan. 26, 1984, as amended at 61 FR 33873, July 1, 1996]

§ 235.8 Relief from the requirements of part 236 of this title.

Relief from the requirements of the rules, standards and instructions contained in part 236 of this title will be granted upon a adequate showing by an individual carrier. Relief heretofore granted to any carrier shall constitute relief to the same extent as relief granted under the requirements of this part.

(Approved by the Office of Management and Budget under control number 2130–0043)

§ 235.9 Civil penalty.

Any person (an entity of any type covered under 1 U.S.C. 1, including but not limited to the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor) who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least \$550 and not more than \$11,000 per violation, except that: Penalties may be assessed against individuals only for willful violations, and, where a grossly negligent violation or a pattern of repeated violations has created an imminent hazard of death or injury to persons, or has caused death or injury, a penalty not to exceed \$27,000 per violation may be assessed. Each day a violation continues shall constitute a separate offense. See appendix A to this part for a statement of agency civil penalty policy.

[63 FR 11623, Mar. 10, 1998, as amended at 69 FR 30595, May 28, 2004]

§ 235.10 Contents of applications.

(a) The application may be submitted by letter and shall contain the following information:

- (1) The corporate name of each applicant;
 - (2) The manner in which applicant is involved;
 - (3) The location of the project, giving name of operating division and nearest station;
 - (4) The track or tracks involved;
 - (5) A complete description of proposed changes as they would affect the existing facilities or of the section from which relief is sought;
 - (6) The reason for proposed changes or justification for relief from the requirements;
 - (7) The approximate dates of beginning and completion of project;
 - (8) Changes in operating practices, temporary or permanent;
 - (9) Whether safety of operation will be affected, and if so, how; and
 - (10) Whether proposed changes will conform to the Federal Railroad Administration's Rules, Standards and Instructions (part 236 of this title).
- (b) [Reserved]

(Approved by the Office of Management and Budget under control number 2130-0042)

§ 235.12 Additional required information-prints.

- (a) A print or prints, size 8 inches by 10½ inches, or 8½ inches by 11 inches, or folded to 8 inches by 10½ inches or to 8½ inches by 11 inches, shall be furnished with each application.
- (b) The print or prints shall be to scale or by indicated dimensions, using Association of American Railroads graphic symbols.
- (c) The following information shall be shown on the print or prints:
 - (1) Present and proposed arrangement of tracks and signal facilities;
 - (2) Name of carrier;
 - (3) Operating division;
 - (4) Place and State; and
 - (5) Timetable directions of movements.
- (d) If stopping distances are involved, the following information shall also be shown:
 - (1) Curvature and grade;
 - (2) Maximum authorized speeds of trains; and

(3) Length of signal control circuits for each signal indication displayed.

(e) The following color scheme is suggested on prints:

- (1) Installations, relocations, and added signal aspects should be colored, preferably in yellow;
- (2) Removals, discontinuances, and abandonments should be colored, preferably in red; and
- (3) Existing facilities not pertinent to change proposed in application should be shown uncolored.

(Approved by the Office of Management and Budget under control number 2130-0042)

§ 235.13 Filing procedure.

- (a) Applications or requests for reconsideration of an application shall be submitted by an authorized officer of the carrier.
- (b) The original and two copies of each application with supporting papers should be filed.
- (c) The application and correspondence in reference thereto should be addressed to the Associate Administrator for Safety, Federal Railroad Administration, Washington, DC 20590.
- (d) A separate application shall be filed for each project.
- (e) At a joint facility where changes are proposed in the automatic block signal system, interlocking, traffic control system, automatic train stop, train control, or cab signal system on the tracks of more than one carrier, or if more than one carrier will be affected by the proposed changes or relief sought, a joint application signed by all carriers affected shall be filed.
- (f) Where only one carrier at a joint facility is affected by the discontinuance or modification of the installation or relief sought, it shall be responsible for filing the application. It shall also certify that the other joint carriers have been notified of the filing of its application.

(Approved by the Office of Management and Budget under control number 2130-0042)

§ 235.14 Notice.

The FRA will publish notice of the filing of an application or a request for reconsideration of an application in the FEDERAL REGISTER and a copy of such

§ 235.20

notice will be available at the Department of Transportation Central Docket Management System, Nassif Building, Room PL-401, 400 Seventh Street, S.W., Washington, D.C. 20590, and on the Docket Management System's Web site at <http://dms.dot.gov>.

[64 FR 70195, Dec. 16, 1999]

§ 235.20 Protests.

(a) A protest against the granting of an application shall set forth specifically the grounds upon which it is made, and contain a concise statement of the interest of protestant in the proceeding.

(b) The original and two copies of any protest shall be filed with the Associate Administrator for Safety, Federal

49 CFR Ch. II (10–1–04 Edition)

Railroad Administration, Washington, DC 20590, and one copy shall be furnished to each applicant.

(c) Protests should be filed within the time limit set forth in the public notice.

(d) The protestant shall certify that service of a copy of its protest was made upon each applicant.

(e) Request for hearing must be accompanied with a showing why the protestant is unable to properly present his or her position by written statements.

EFFECTIVE DATE NOTE: At 49 FR 3380, Jan. 26, 1984, part 235 was revised. This section contains information collection and record-keeping requirements and will not become effective until approval has been given by the Office of Management and Budget.

APPENDIX A TO PART 235—SCHEDULE OF CIVIL PENALTIES¹

Section	Violation	Willful violation
235.5 Changes requiring filing of application	\$5,000	\$7,500

[53 FR 52936, Dec. 29, 1988]

PART 236—RULES, STANDARDS, AND INSTRUCTIONS GOVERNING THE INSTALLATION, INSPECTION, MAINTENANCE, AND REPAIR OF SIGNAL AND TRAIN CONTROL SYSTEMS, DEVICES, AND APPLIANCES

Sec.

236.0 Applicability, minimum requirements, and civil penalties.

Subpart A—Rules and Instructions: All Systems

GENERAL

236.1 Plans, where kept.

236.2 Grounds.

236.3 Locking of signal apparatus housings.

236.4 Interference with normal functioning of device.

236.5 Design of control circuits on closed circuit principle.

236.6 Hand-operated switch equipped with switch circuit controller.

236.7 Circuit controller operated by switch-and-lock movement.

236.8 Operating characteristics of electromagnetic, electronic, or electrical apparatus.

236.9 Selection of circuits through indicating or annunciating instruments.

236.10 Electric locks, force drop type; where required.

236.11 Adjustment, repair, or replacement of component.

236.12 Spring switch signal protection; where required.

236.13 Spring switch; selection of signal control circuits through circuit controller.

236.14 Spring switch signal protection; requirements.

236.15 Timetable instructions.

236.16 Electric lock, main track releasing circuit.

236.17 Pipe for operating connections, requirements.

ROADWAY SIGNALS AND CAB SIGNALS

236.21 Location of roadway signals.

236.22 Semaphore signal arm; clearance to other objects.

¹A penalty may be assessed against an individual only for a willful violation. The Administrator reserves the right to assess a

penalty of up to \$20,000 for any violation where circumstances warrant. See 49 CFR part 209, appendix A.

- 236.23 Aspects and indications.
- 236.24 Spacing of roadway signals.
- 236.25 [Reserved]
- 236.26 Buffing device, maintenance.

TRACK CIRCUITS

- 236.51 Track circuit requirements.
- 236.52 Relayed cut-section.
- 236.53 Track circuit feed at grade crossing.
- 236.54 Minimum length of track circuit.
- 236.55 Dead section; maximum length.
- 236.56 Shunting sensitivity.
- 236.57 Shunt and fouling wires.
- 236.58 Turnout, fouling section.
- 236.59 Insulated rail joints.
- 236.60 Switch shunting circuit; use restricted.

WIRES AND CABLES

- 236.71 Signal wires on pole line and aerial cable.
- 236.72 [Reserved]
- 236.73 Open-wire transmission line; clearance to other circuits.
- 236.74 Protection of insulated wire; splice in underground wire.
- 236.75 [Reserved]
- 236.76 Tagging of wires and interference of wires or tags with signal apparatus.

INSPECTIONS AND TESTS; ALL SYSTEMS

- 236.101 Purpose of inspection and tests; removal from service of relay or device failing to meet test requirements.
- 236.102 Semaphore or searchlight signal mechanism.
- 236.103 Switch circuit controller or point detector.
- 236.104 Shunt fouling circuit.
- 236.105 Electric lock.
- 236.106 Relays.
- 236.107 Ground tests.
- 236.108 Insulation resistance tests, wires in trunking and cables.
- 236.109 Time releases, timing relays and timing devices.
- 236.110 Results of tests.

Subpart B—Automatic Block Signal Systems

STANDARDS

- 236.201 Track-circuit control of signals.
- 236.202 Signal governing movements over hand-operated switch.
- 236.203 Hand operated crossover between main tracks; protection.
- 236.204 Track signaled for movements in both directions, requirements.
- 236.205 Signal control circuits; requirements.
- 236.206 Battery or power supply with respect to relay; location.
- 236.207 Electric lock on hand-operated switch; control.

Subpart C—Interlocking

STANDARDS

- 236.301 Where signals shall be provided.
- 236.302 Track circuits and route locking.
- 236.303 Control circuits for signals, selection through circuit controller operated by switch points or by switch locking mechanism.
- 236.304 Mechanical locking or same protection effected by circuits.
- 236.305 Approach or time locking.
- 236.306 Facing point lock or switch-and-lock movement.
- 236.307 Indication locking.
- 236.308 Mechanical or electric locking or electric circuits; requisites.
- 236.309 Loss of shunt protection; where required.
- 236.310 Signal governing approach to home signal.
- 236.311 Signal control circuits, selection through track relays or devices functioning as track relays and through signal mechanism contacts and time releases at automatic interlocking.
- 236.312 Movable bridge, interlocking of signal appliances with bridge devices.
- 236.313 [Reserved]
- 236.314 Electric lock for hand-operated switch or derail.

RULES AND INSTRUCTIONS

- 236.326 Mechanical locking removed or disarranged; requirement for permitting train movements through interlocking.
- 236.327 Switch, movable-point frog or split-point derail.
- 236.328 Plunger of facing-point lock.
- 236.329 Bolt lock.
- 236.330 Locking dog of switch-and-lock movement.
- 236.331–236.333 [Reserved]
- 236.334 Point detector.
- 236.335 Dogs, stops and trunnions of mechanical locking.
- 236.336 Locking bed.
- 236.337 Locking faces of mechanical locking; fit.
- 236.338 Mechanical locking required in accordance with locking sheet and dog chart.
- 236.339 Mechanical locking; maintenance requirements.
- 236.340 Electromechanical interlocking machine; locking between electrical and mechanical levers.
- 236.341 Latch shoes, rocker links, and quadrants.
- 236.342 Switch circuit controller.

INSPECTION AND TESTS

- 236.376 Mechanical locking.
- 236.377 Approach locking.
- 236.378 Time locking.
- 236.379 Route locking.

Pt. 236

49 CFR Ch. II (10–1–04 Edition)

- 236.380 Indication locking.
- 236.381 Traffic locking.
- 236.382 Switch obstruction test.
- 236.383 Valve locks, valves, and valve magnets.
- 236.384 Cross protection.
- 236.385 [Reserved]
- 236.386 Restoring feature on power switches.
- 236.387 Movable bridge locking.

Subpart D—Traffic Control Systems

STANDARDS

- 236.401 Automatic block signal system and interlocking standards applicable to traffic control systems.
- 236.402 Signals controlled by track circuits and control operator.
- 236.403 Signals at controlled point.
- 236.404 Signals at adjacent control points.
- 236.405 Track signaled for movements in both directions, change of direction of traffic.
- 236.406 [Reserved]
- 236.407 Approach or time locking; where required.
- 236.408 Route locking.
- 236.409 [Reserved]
- 236.410 Locking, hand-operated switch; requirements.

RULES AND INSTRUCTIONS

- 236.426 Interlocking rules and instructions applicable to traffic control systems.

INSPECTION AND TESTS

- 236.476 Interlocking inspections and tests applicable to traffic control systems.

Subpart E—Automatic Train Stop, Train Control and Cab Signal Systems

STANDARDS

- 236.501 Forestalling device and speed control.
- 236.502 Automatic brake application, initiation by restrictive block conditions stopping distance in advance.
- 236.503 Automatic brake application; initiation when predetermined rate of speed exceeded.
- 236.504 Operation interconnected with automatic block-signal system.
- 236.505 Proper operative relation between parts along roadway and parts on locomotive.
- 236.506 Release of brakes after automatic application.
- 236.507 Brake application; full service.
- 236.508 Interference with application of brakes by means of brake valve.
- 236.509 Two or more locomotives coupled.
- 236.510 [Reserved]
- 236.511 Cab signals controlled in accordance with block conditions stopping distance in advance.

- 236.512 Cab signal indication when locomotive enters block where restrictive conditions obtain.
- 236.513 Audible indicator.
- 236.514 Interconnection of cab signal system with roadway signal system.
- 236.515 Visibility of cab signals.
- 236.516 Power supply.

RULES AND INSTRUCTIONS; ROADWAY

- 236.526 Roadway element not functioning properly.
- 236.527 Roadway element insulation resistance.
- 236.528 Restrictive condition resulting from open hand-operated switch; requirement.
- 236.529 Roadway element inductor; height and distance from rail.
- 236.530 [Reserved]
- 236.531 Trip arm; height and distance from rail.
- 236.532 Strap iron inductor; use restricted.
- 236.533 [Reserved]
- 236.534 Entrance to equipped territory; requirements.

RULES AND INSTRUCTIONS; LOCOMOTIVES

- 236.551 Power supply voltage; requirement.
- 236.552 Insulation resistance; requirement.
- 236.553 Seal, where required.
- 236.554 Rate of pressure reduction; equalizing reservoir or brake pipe.
- 236.555 Repaired or rewound receiver coil.
- 236.556 Adjustment of relay.
- 236.557 Receiver; location with respect to rail.
- 236.558–236.559 [Reserved]
- 236.560 Contact element, mechanical trip type; location with respect to rail.
- 236.561 [Reserved]
- 236.562 Minimum rail current required.
- 236.563 Delay time.
- 236.564 Acknowledging time.
- 236.565 Provision made for preventing operation of pneumatic brake-applying apparatus by double-heading cock; requirement.
- 236.566 Locomotive of each train operating in train stop, train control or cab signal territory; equipped.
- 236.567 Restrictions imposed when device fails and/or is cut out en route.
- 236.568 Difference between speeds authorized by roadway signal and cab signal; action required.

INSPECTION AND TESTS; ROADWAY

- 236.576 Roadway element.
- 236.577 Test, acknowledgement, and cut-in circuits.

INSPECTION AND TESTS; LOCOMOTIVE

- 236.586 Daily or after trip test.
- 236.587 Departure test.
- 236.588 Periodic test.
- 236.589 Relays.

236.590 Pneumatic apparatus.

Subpart F—Dragging Equipment and Slide Detectors and Other Similar Protective Devices

STANDARDS

236.601 Signals controlled by devices; location.

Subpart G—Definitions

236.700 Definitions.
 236.701 Application, brake; full service.
 236.702 Arm, semaphore.
 236.703 Aspect.
 236.704 [Reserved]
 236.705 Bar, locking.
 236.706 Bed, locking.
 236.707 Blade, semaphore.
 236.708 Block.
 236.709 Block, absolute.
 236.710 Block, latch.
 236.711 Bond, rail joint.
 236.712 Brake pipe.
 236.713 Bridge, movable.
 236.714 Cab.
 236.715–236.716 [Reserved]
 236.717 Characteristics, operating.
 236.718 Chart, dog.
 236.719 Circuit, acknowledgment.
 236.720 Circuit, common return.
 236.721 Circuit, control.
 236.722 Circuit, cut-in.
 236.723 Circuit, double wire; line.
 236.724 Circuit, shunt fouling.
 236.725 Circuit, switch shunting.
 236.726 Circuit, track.
 236.727 Circuit, track; coded.
 236.728 Circuit, trap.
 236.729 Cock, double heading.
 236.730 Coil, receiver.
 236.731 Contoller, circuit.
 236.732 Controller, circuit; switch.
 236.733 Current, foreign.
 236.734 Current of traffic.
 236.735 Current, leakage.
 236.736 Cut-section.
 236.737 Cut-section, relayed.
 236.738 Detector, point.
 236.739 Device, acknowledging.
 236.740 Device, reset.
 236.741 Distance, stopping.
 236.742 Dog, locking.
 236.743 Dog, swing.
 236.744 Element, roadway.
 236.745 Face, locking.
 236.746 Feature, restoring.
 236.747 Fore stall.
 236.748 [Reserved]
 236.749 Indication.
 236.750 Interlocking, automatic.
 236.751 Interlocking, manual.
 236.752 Joint, rail, insulated.
 236.753 Limits, interlocking.
 236.754 Line, open wire.
 236.755 Link, rocker.

236.756 Lock, bolt.
 236.757 Lock, electric.
 236.758 Lock, electric, forced drop.
 236.759 Lock, facing point.
 236.760 Locking, approach.
 236.761 Locking, electric.
 236.762 Locking, indication.
 236.763 Locking, latch operated.
 236.764 Locking, lever operated.
 236.765 Locking, mechanical.
 236.766 Locking, movable bridge.
 236.767 Locking, route.
 236.768 Locking, time.
 236.769 Locking, traffic.
 236.770 Locomotive.
 236.771 Machine, control.
 236.772 Machine, interlocking.
 236.773 Movements, conflicting.
 236.774 Movement, facing.
 236.775 Movement, switch-and-lock.
 236.776 Movement, trailing.
 236.777 Operator, control.
 236.778 Piece, driving.
 236.779 Plate, top.
 236.780 Plunger, facing point lock.
 236.781 [Reserved]
 236.782 Point, controlled.
 236.783 Point, stop-indication.
 236.784 Position, deenergized.
 236.785 Position, false restrictive.
 236.786 Principle, closed circuit.
 236.787 Protection, cross.
 236.788 Receiver.
 236.789 Relay, timing.
 236.790 Release, time.
 236.791 Release, value.
 236.792 Reservoir, equalizing.
 236.793 Rod, lock.
 236.794 Rod, up-and-down.
 236.795 Route.
 236.796 Routes, conflicting.
 236.797 Route, interlocked.
 236.798 Section, dead.
 236.799 Section, fouling.
 236.800 Sheet, locking.
 236.801 Shoe, latch.
 236.802 Shunt.
 236.802a Siding.
 236.803 Signal, approach.
 236.804 Signal, block.
 236.805 Signal, cab.
 236.806 Signal, home.
 236.807 Signal, interlocking.
 236.808 Signals, opposing.
 236.809 Signal, slotted mechanical.
 236.810 Spectacle, semaphore arm.
 236.811 Speed, medium.
 236.812 Speed, restricted.
 236.813 Speed, slow.
 236.813a State, most restrictive.
 236.814 Station, control.
 236.815 Stop.
 236.816 Superiority of trains.
 236.817 Switch, electro-pneumatic.
 236.818 Switch, facing point.
 236.819 Switch, hand operated.
 236.820 Switch, interlocked.

§ 236.0

236.820a Switch, power-operated.
236.821 Switch, sectionalizing.
236.822 Switch, spring.
236.823 Switch, trailing point.
236.824 System, automatic block signal.
236.825 System, automatic train control.
236.826 System, automatic train stop.
236.827 System, block signal.
236.828 System, traffic control.
236.829 Terminal, initial.
236.830 Time, acknowledging.
236.831 Time, delay.
236.831a Track, main.
236.832 Train.
236.833 Train, opposing.
236.834 Trip.
236.835 Trunking.
236.836 Trunnion.
236.837 Valve, electro-pneumatic.
236.838 Wire, shunt.

APPENDIX A TO PART 236—CIVIL PENALTIES

AUTHORITY: 49 U.S.C. 20103, 20107; 28 U.S.C. 2461, note and 49 CFR 1.49.

SOURCE: 33 FR 19684, Dec. 25, 1968, unless otherwise noted.

§ 236.0 Applicability, minimum requirements, and civil penalties.

(a) Except as provided in paragraph (b) of this section, this part applies to railroads that operate on standard gage track which is part of the general railroad system of transportation.

(b) This part does not apply to rail rapid transit operations conducted over track that is used exclusively for that purpose and that is not part of the general system of railroad transportation.

(c) Where a passenger train is operated at a speed of 60 or more miles per hour, or a freight train is operated at a speed of 50 or more miles per hour, a block signal system complying with the provisions of this part shall be installed or a manual block system shall be placed permanently in effect which shall conform to the following conditions:

(1) A passenger train shall not be admitted to a block occupied by another train except under flag protection;

(2) No train shall be admitted to a block occupied by a passenger train except under flag protection;

(3) No train shall be admitted to a block occupied by an opposing train except under flag protection; and

(4) A freight train, including a work train, may be authorized to follow a freight train, including a work train, into a block but the following train

49 CFR Ch. II (10–1–04 Edition)

must proceed prepared to stop within one-half the range of vision but not exceeding 20 miles per hour.

(d) Where any train is operated at a speed of 80 or more miles per hour, an automatic cab signal, automatic train stop or automatic train control system complying with the provisions of this part shall be installed.

(e) Nothing in this section authorizes the discontinuance of a block signal system, interlocking, traffic control system, automatic train stop, train control, or cab signal system without approval of the Federal Railroad Administration.

(f) Any person (an entity of any type covered under 1 U.S.C. 1, including but not limited to the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor) who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least \$550 and not more than \$11,000 per violation, except that: Penalties may be assessed against individuals only for willful violations, and, where a grossly negligent violation or a pattern of repeated violations has created an imminent hazard of death or injury to persons, or has caused death or injury, a penalty not to exceed \$27,000 per violation may be assessed. Each day a violation continues shall constitute a separate offense. See appendix A to this part for a statement of agency civil penalty policy.

[49 FR 3382, Jan. 26, 1984, as amended at 53 FR 52936, Dec. 29, 1988; 63 FR 11624, Mar. 10, 1998; 69 FR 30595, May 28, 2004]

Subpart A—Rules and Instructions: All Systems

GENERAL

§ 236.1 Plans, where kept.

As required for maintenance, plans shall be kept at all interlockings, automatic signals and controlled points. Plans shall be legible and correct.

[49 FR 3382, Jan. 26, 1984]

§ 236.2 Grounds.

Each circuit, the functioning of which affects the safety of train operations, shall be kept free of any ground or combination of grounds which will permit a flow of current equal to or in excess of 75 percent of the release value of any relay or other electromagnetic device in the circuit, except circuits which include any track rail and except the common return wires of single-wire, single-break, signal control circuits using a grounded common, and alternating current power distribution circuits which are grounded in the interest of safety.

§ 236.3 Locking of signal apparatus housings.

Signal apparatus housings shall be secured against unauthorized entry.

[49 FR 3382, Jan. 26, 1984]

§ 236.4 Interference with normal functioning of device.

The normal functioning of any device shall not be interfered with in testing or otherwise without first taking measures to provide for safety of train operation which depends on normal functioning of such device.

[49 FR 3382, Jan. 26, 1984]

§ 236.5 Design of control circuits on closed circuit principle.

All control circuits the functioning of which affects safety of train operation shall be designed on the closed circuit principle, except circuits for roadway equipment of intermittent automatic train stop system.

§ 236.6 Hand-operated switch equipped with switch circuit controller.

Hand-operated switch equipped with switch circuit controller connected to

the point, or with facing-point lock and circuit controller, shall be so maintained that when point is open one-fourth inch or more on facing-point switch and three-eighths inch or more on trailing-point switch, track or control circuits will be opened or shunted or both, and if equipped with facing-point lock with circuit controller, switch cannot be locked. On such hand-operated switch, switch circuit controllers, facing-point locks, switch-and-lock movements, and their connections shall be securely fastened in place, and contacts maintained with an opening of not less than one-sixteenth inch when open.

§ 236.7 Circuit controller operated by switch-and-lock movement.

Circuit controller operated by switch-and-lock movement shall be maintained so that normally open contacts will remain closed and normally closed contacts will remain open until the switch is locked.

§ 236.8 Operating characteristics of electromagnetic, electronic, or electrical apparatus.

Signal apparatus, the functioning of which affects the safety of train operation, shall be maintained in accordance with the limits within which the device is designed to operate.

[49 FR 3382, Jan. 26, 1984]

§ 236.9 Selection of circuits through indicating or annunciating instruments.

Signal control and electric locking circuits shall not be selected through the contacts of instruments designed primarily for indicating or annunciating purposes in which an indicating element attached to the armature is arranged so that it can in itself cause improper operation of the armature.

§ 236.10 Electric locks, force drop type; where required.

Electric locks on new installations and new electric locks applied to existing installations shall be of the forced drop type.

§ 236.11

§ 236.11 Adjustment, repair, or replacement of component.

When any component of a signal system, the proper functioning of which is essential to the safety of train operation, fails to perform its intended signaling function or is not in correspondence with known operating conditions, the cause shall be determined and the faulty component adjusted, repaired or replaced without undue delay.

[49 FR 3382, Jan. 26, 1984]

§ 236.12 Spring switch signal protection; where required.

Signal protection shall be provided for facing and trailing movements through spring switch within interlocking limits and through spring switch installed in automatic block signal, train stop, train control or cab signal territory where train movements over the switch are made at a speed exceeding 20 miles per hour, except that signal protection shall be required only with the current of traffic on track signaled for movement in only one direction.

NOTE: Does not apply to spring switch installed prior to October 1, 1950 in automatic block signal, automatic train stop, or automatic train control territory.

[49 FR 3383, Jan. 26, 1984]

§ 236.13 Spring switch; selection of signal control circuits through circuit controller.

The control circuits of signals governing facing movements over a main track spring switch shall be selected through the contacts of a switch circuit controller, or through the contacts of relay repeating the position of such circuit controller, which, when normally closed switch point is open one-fourth inch or more, will cause such signals to display their most restrictive aspects, except that where a separate aspect is displayed for facing movements over the switch in the reverse position the signal shall display its most restrictive aspect when the switch points are open one-fourth inch or more from either the normal or reverse position.

49 CFR Ch. II (10–1–04 Edition)

§ 236.14 Spring switch signal protection; requirements.

(a) The indication of signal governing movements from siding to main track with the current of traffic on track signaled for movements in only one direction through a spring switch in automatic block signal territory shall be not less restrictive than “Proceed at Restricted Speed” when the block, into which movements are governed by the signal, is occupied, and shall be “Stop” when the main track is occupied by a train approaching the switch within at least 1,500 feet in approach of the approach signal located stopping distance from the main track signal governing trailing movements over switch, except that the indication may be caused to be less restrictive if approach or time locking is used.

(b) The indication of signal governing movements against the current of traffic from the reverse main of main tracks to a single track, or signal governing movements from a siding to a main track signaled for movements in either direction, through a spring switch, in automatic block signal territory, shall be not less restrictive than “Proceed at Restricted Speed” when the block, into which movements are governed by the signal, is occupied by a preceding train, and shall be “Stop” when the block on the single track into which the signal governs is occupied by an opposing train.

(c) The indication of signal governing movements against the current of traffic from the reverse main of main tracks to a single track or signal governing movements from a siding to a main track signaled for movements in either direction through a spring switch in automatic block signal territory shall be “Stop” when the normal direction main track of the double track or the single track signaled for movements in both directions is occupied by a train approaching the switch within at least 1,500 feet in approach of the approach signal located stopping distance from the main track signal governing trailing movements over switch, except that indication may be caused to be less restrictive if approach or time locking is used.

Federal Railroad Administration, DOT

§ 236.23

§ 236.15 Timetable instructions.

Automatic block, traffic control, train stop, train control and cab signal territory shall be designated in timetable instructions.

§ 236.16 Electric lock, main track releasing circuit.

When an electric lock releasing circuit is provided on the main track to permit a train or an engine to diverge from the main track without time delay, the circuit shall be of such length to permit occupancy of the circuit to be seen by a crew member stationed at the switch. When the releasing circuit extends into the fouling circuit, a train or engine on the siding shall be prevented from occupying the releasing circuit by a derail either pipe-connected to switch point or equipped with an independently operated electric lock.

[49 FR 3383, Jan. 26, 1984]

§ 236.17 Pipe for operating connections, requirements.

(a) Steel or wrought-iron pipe one inch or larger, or members of equal strength, shall be used for operating connections for switches, derails, movable-point frogs, facing-point locks, rail-locking devices of movable bridge protected by interlocking, and mechanically operated signals, except up-and-down rod which may be three-fourths inch pipe or solid rod. Pipe shall be fully screwed into coupling and both ends of each pipe shall be riveted to pipe plug with 2 rivets.

(b) Pipeline shall not be out of alignment sufficiently to interfere with proper operation, shall be properly compensated for temperature changes, and supported on carriers spaced not more than 8 feet apart on tangent and curve of less than 2° and not more than 7 feet apart on curve of 2° or more. With lever in any position, couplings in pipe line shall not foul carriers.

[49 FR 3383, Jan. 26, 1984]

ROADWAY SIGNALS AND CAB SIGNALS

§ 236.21 Location of roadway signals.

Each roadway signal shall be positioned and aligned so that its aspects

can be clearly associated with the track it governs.

[49 FR 3383, Jan. 26, 1984]

§ 236.22 Semaphore signal arm; clearance to other objects.

At least one-half inch clearance shall be provided between semaphore signal arm, and any object that may interfere with its operation.

§ 236.23 Aspects and indications.

(a) Aspects shall be shown by the position of semaphore blades, color of lights, position of lights, flashing of lights, or any combination thereof. They may be qualified by marker plate, number plate, letter plate, marker light, shape and color of semaphore blades or any combination thereof, subject to the following conditions:

(1) Night aspects of roadway signals, except qualifying appurtenances, shall be shown by lights; day aspects by lights or semaphore arms. A single white light shall not be used.

(2) Reflector lenses or buttons or other devices which depend for visibility upon reflected light from an external source shall not be used hereafter in night aspects, except qualifying appurtenances.

(b) The aspects of cab signals shall be shown by lights or by illuminated letters or numbers.

(c) Each aspect displayed by a signal shall be identified by a name and shall indicate action to be taken. Only one name and indication shall apply to those aspects indicating the same action to be taken; the same aspect shall not be used with any other name and indication.

(d) The fundamental indications of signal aspects shall conform to the following:

(1) A red light, a series of horizontal lights or a semaphore blade in a horizontal position shall be used to indicate stop.

(2) A yellow light, a lunar light, or a series of lights or a semaphore blade in the upper or lower quadrant at an angle of approximately 45 degrees to the vertical, shall be used to indicate that speed is to be restricted and stop may be required.

(3) A green light, a series of vertical lights, or a semaphore blade in a

§ 236.24

vertical position in the upper quadrant or 60° or 90° in the lower quadrant shall be used to indicate proceed at authorized speed.

(e) The names, indications, and aspects of roadway and cab signals shall be defined in the carrier's Operating Rule Book or Special Instructions. Modifications shall be filed with the FRA within thirty days after such modifications become effective.

(f) The absence of a qualifying appurtenance, the failure of a lamp in a light signal, or a false restrictive position of an arm of a semaphore signal shall not cause the display of a less restrictive aspect than intended.

[33 FR 19684, Dec. 25, 1968, as amended at 49 FR 3383, Jan. 26, 1984]

§ 236.24 Spacing of roadway signals.

Each roadway signal shall be located with respect to the next signal or signals in advance which govern train movements in the same direction so that the indication of a signal displaying a restrictive aspect can be complied with by means of a brake application, other than an emergency application, initiated at such signal, either by stopping at the signal where a stop is required, or by a reduction in speed to the rate prescribed by the next signal in advance where reduced speed is required.

§ 236.25 [Reserved]

§ 236.26 Buffing device, maintenance.

Buffing device shall be maintained so as not to cause the signal to display a less restrictive aspect than intended.

TRACK CIRCUITS

§ 236.51 Track circuit requirements.

Track relay controlling home signals shall be in deenergized position, or device that functions as a track relay controlling home signals shall be in its most restrictive state, and the track circuit of an automatic train stop, train control, or cab signal system shall be deenergized in the rear of the point where any of the following conditions exist:

(a) When a rail is broken or a rail or switch-frog is removed except when a rail is broken or removed in the shunt

49 CFR Ch. II (10–1–04 Edition)

fouling circuit of a turnout or crossover, provided, however, that shunt fouling circuit may not be used in a turnout through which permissible speed is greater than 45 miles per hour. It shall not be a violation of this requirement if a track circuit is energized:

(1) When a break occurs between the end of rail and track circuit connector; within the limits of rail-joint bond, appliance or other protective device, which provides a bypath for the electric current, or

(2) As result of leakage current or foreign current in the rear of a point where a break occurs.

(b) When a train, locomotive, or car occupies any part of a track circuit, including fouling section of turnout except turnouts of hand-operated main track crossover. It shall not be a violation of this requirement where the presence of sand, rust, dirt, grease, or other foreign matter prevents effective shunting, except that where such conditions are known to exist adequate measures to safeguard train operation must be taken.

(c) Where switch shunting circuit is used:

(1) Switch point is not closed in normal position.

(2) A switch is not locked where facing-point lock with circuit controller is used.

(3) An independently operated fouling-point derail equipped with switch circuit controller is not in derailing position.

[33 FR 19684, Dec. 25, 1968, as amended at 49 FR 3383, Jan. 26, 1984]

§ 236.52 Relayed cut-section.

Where relayed cut-section is used in territory where noncoded direct-current track circuits are in use the energy circuit to the adjoining track shall be open and the track circuit shunted when the track relay at such cut-section is in deenergized position.

§ 236.53 Track circuit feed at grade crossing.

At grade crossing with an electric railroad where foreign current is present, the electric energy for noncoded direct current track circuit shall feed away from the crossing.

§ 236.54 Minimum length of track circuit.

When a track circuit shorter than maximum inner wheelbase of any locomotive or car operated over such track circuit is used for control of signaling facilities, other means shall be used to provide the equivalent of track circuit protection.

[49 FR 3383, Jan. 26, 1984]

§ 236.55 Dead section; maximum length.

Where dead section exceeds 35 feet, a special circuit shall be installed. Where shortest outer wheelbase of a locomotive operating over such dead section is less than 35 feet, the maximum length of the dead section shall not exceed the length of the outer wheelbase of such locomotive unless special circuit is used.

[49 FR 3383, Jan. 26, 1984]

§ 236.56 Shunting sensitivity.

Each track circuit controlling home signal or approach locking shall be so maintained that track relay is in deenergized position, or device that functions as a track relay shall be in its most restrictive state if, when track circuit is dry, a shunt of 0.06 ohm resistance is connected across the track rails of the circuit, including fouling sections of turnouts.

[49 FR 3383, Jan. 26, 1984]

§ 236.57 Shunt and fouling wires.

(a) Except as provided in paragraph (b) of this section, shunt wires and fouling wires hereafter installed or replaced shall consist of at least two discrete conductors, and each shall be of sufficient conductivity and maintained in such condition that the track relay will be in deenergized position, or device that functions as a track relay will be in its most restrictive state, when the circuit is shunted.

(b) This rule does not apply to shunt wires where track or control circuit is opened by the switch circuit controller.

[49 FR 3383, Jan. 26, 1984]

§ 236.58 Turnout, fouling section.

Rail joints within the fouling section shall be bonded, and fouling section

shall extend at least to a point where sufficient tract centers and allowance for maximum car overhang and width will prevent interference with train, locomotive, or car movement on the adjacent track.

[49 FR 3383, Jan. 26, 1984]

§ 236.59 Insulated rail joints.

Insulated rail joints shall be maintained in condition to prevent sufficient track circuit current from flowing between the rails separated by the insulation to cause a failure of any track circuit involved.

§ 236.60 Switch shunting circuit; use restricted.

Switch shunting circuit shall not be hereafter installed, except where tract or control circuit is opened by the circuit controller.

[49 FR 3384, Jan. 26, 1984]

WIRES AND CABLES

§ 236.71 Signal wires on pole line and aerial cable.

Signal wire on pole line shall be securely tied in on insulator properly fastened to crossarm or bracket supported by pole or other support. Signal wire shall not interfere with, or be interfered by, other wires on the pole line. Aerial cable shall be supported by messenger.

[49 FR 3384, Jan. 26, 1984]

§ 236.72 [Reserved]**§ 236.73 Open-wire transmission line; clearance to other circuits.**

Open-wire transmission line operating at voltage of 750 volts or more shall be placed not less than 4 feet above the nearest crossarm carrying signal or communication circuits.

§ 236.74 Protection of insulated wire; splice in underground wire.

Insulated wire shall be protected from mechanical injury. The insulation shall not be punctured for test purposes. Splice in underground wire shall have insulation resistance at least equal to the wire spliced.

§ 236.75

§ 236.75 [Reserved]

§ 236.76 Tagging of wires and interference of wires or tags with signal apparatus.

Each wire shall be tagged or otherwise so marked that it can be identified at each terminal. Tags and other marks of identification shall be made of insulating material and so arranged that tags and wires do not interfere with moving parts of apparatus.

[49 FR 3384, Jan. 26, 1984]

INSPECTIONS AND TESTS; ALL SYSTEMS

§ 236.101 Purpose of inspection and tests; removal from service of relay or device failing to meet test requirements.

The following inspections and tests shall be made in accordance with specifications of the carrier, subject to approval of the FRA, to determine if the apparatus and/or equipment is maintained in condition to perform its intended function. Electronic device, relay, or other electromagnetic device which fails to meet the requirements of specified tests shall be removed from service, and shall not be restored to service until its operating characteristics are in accordance with the limits within which such device or relay is designed to operate.

[49 FR 3384, Jan. 26, 1984]

§ 236.102 Semaphore or searchlight signal mechanism.

(a) Semaphore signal mechanism shall be inspected at least once every six months, and tests of the operating characteristics of all parts shall be made at least once every two years.

(b) Searchlight signal mechanism shall be inspected, and the mechanical movement shall be observed while operating the mechanism to all positions, at least once every six months. Tests of the operating characteristics shall be made at least once every two years.

[49 FR 3384, Jan. 26, 1984]

§ 236.103 Switch circuit controller or point detector.

Switch circuit controller, circuit controller, or point detector operated by hand-operated switch or by power-

49 CFR Ch. II (10–1–04 Edition)

operated or mechanically-operated switch-and-lock movement shall be inspected and tested at least once every three months.

[49 FR 3384, Jan. 26, 1984]

§ 236.104 Shunt fouling circuit.

Shunt fouling circuit shall be inspected and tested at least once every three months.

§ 236.105 Electric lock.

Electric lock, except forced-drop type, shall be tested at least once every two years.

§ 236.106 Relays.

Each relay, the functioning of which affects the safety of train operations, shall be tested at least once every four years except:

(a) Alternating current centrifugal type relay shall be tested at least once every 12 months;

(b) Alternating current vane type relay and direct current polar type relay shall be tested at least once every 2 years; and

(c) Relay with soft iron magnetic structure shall be tested at least once every 2 years.

[49 FR 3384, Jan. 26, 1984]

§ 236.107 Ground tests.

(a) Except as provided in paragraph (b) of this section, a test for grounds on each energy bus furnishing power to circuits, the functioning of which affects the safety of train operation, shall be made when such energy bus is placed in service, and shall be made at least once every three months thereafter.

(b) The provisions of this rule shall not apply to track circuit wires, common return wires of grounded common single-break circuits, or alternating current power distribution circuits grounded in the interest of safety.

[49 FR 3384, Jan. 26, 1984]

§ 236.108 Insulation resistance tests, wires in trunking and cables.

(a) Insulation resistance of wires and cables, except wires connected directly to track rails, shall be tested when wires, cables, and insulation are dry.

Insulation resistance tests shall be made between all conductors and ground, and between conductors in each multiple conductor cable, and between conductors in trunking, when wires or cables are installed and at least once every ten years thereafter.

(b) Then insulation resistance of wire or cable is found to be less than 500,000 ohms, prompt action shall be taken to repair or replace the defective wire or cable and until such defective wire or cable is replaced, insulation resistance test shall be made annually.

(c) In no case shall a circuit be permitted to function on a conductor having an insulation resistance to ground or between conductors of less than 200,000 ohms during the period required for repair or replacement.

[49 FR 3384, Jan. 26, 1984]

§ 236.109 Time releases, timing relays and timing devices.

Time releases, timing relays and timing devices shall be tested at least once every twelve months. The timing shall be maintained at not less than 90 percent of the predetermined time interval, which shall be shown on the plans or marked on the time release, timing relay, or timing device.

[49 FR 3384, Jan. 26, 1984]

§ 236.110 Results of tests.

Results of tests made in compliance with §§ 236.109 to 236.102, inclusive; 236.376 to 236.387, inclusive; 236.576; 236.577; and 236.586 to 236.589, inclusive, shall be recorded on preprinted or computerized forms provided by the railroad. Such forms shall show the name of the railroad, place and date, equipment tested, results of tests, repairs, replacements, adjustments made, and condition in which the apparatus was left. Each record shall be signed by the employee making the test and shall be filed in the office of a supervisory official having jurisdiction. Results of tests made in compliance with § 236.587 shall be retained for 92 days. Results of all other tests listed in this section shall be retained until the next record is filed but in no case less than one year.

[53 FR 37313, Sept. 26, 1988]

Subpart B—Automatic Block Signal Systems

STANDARDS

§ 236.201 Track-circuit control of signals.

The control circuits for home signal aspects with indications more favorable than "proceed at restricted speed" shall be controlled automatically by track circuits extending through the entire block.

§ 236.202 Signal governing movements over hand-operated switch.

Signal governing movements over hand-operated switch in the facing direction shall display its most restrictive aspect when the points are open one-fourth inch or more and, in the trailing direction, three-eighths inch or more, except that where a separate aspect is displayed for facing movements over the switch in the normal and in the reverse position, the signal shall display its most restrictive aspect when the switch points are open one-fourth inch or more from either the normal or reverse position.

§ 236.203 Hand operated crossover between main tracks; protection.

At hand-operated crossover between main tracks, protection shall be provided by one of the following:

(a) An arrangement of one or more track circuits and switch circuit controllers,

(b) Facing point locks on both switches of the crossover, with both locks operated by a single lever, or

(c) Electric locking of the switches of the crossover. Signals governing movements over either switch shall display their most restrictive aspect when any of the following conditions exist:

(1) Where protection is provided by one or more track circuits and switch circuit controllers, and either switch is open or the crossover is occupied by a train, locomotive or car in such a manner as to foul the main track. It shall not be a violation of this requirement where the presence of sand, rust, dirt, grease or other foreign matter on the rail prevents effective shunting;

§ 236.204

(2) Where facing point locks with a single lever are provided, and either switch is unlocked;

(3) Where the switches are electrically locked, before the electric locking releases.

§ 236.204 Track signaled for movements in both directions, requirements.

On track signaled for movements in both directions, a train shall cause one or more opposing signals immediately ahead of it to display the most restrictive aspect, the indication of which shall be not more favorable than "proceed at restricted speed." Signals shall be so arranged and controlled that if opposing trains can simultaneously pass signals displaying proceed aspects and the next signal in advance of each such signal then displays an aspect requiring a stop, or its most restrictive aspect, the distance between opposing signals displaying such aspects shall be not less than the aggregate of the stopping distances for movements in each direction. Where such opposing signals are spaced stopping distance apart for movements in one direction only, signals arranged to display restrictive aspects shall be provided in approach to at least one of the signals. Where such opposing signals are spaced less than stopping distance apart for movements in one direction, signals arranged to display restrictive aspects shall be provided in approach to both such signals. In absolute permissive block signaling, when a train passes a head block signal, it shall cause the opposing head block signal to display an aspect with an indication not more favorable than "stop."

[33 FR 19684, Dec. 25, 1968, as amended at 49 FR 3384, Jan. 26, 1984]

§ 236.205 Signal control circuits; requirements.

The circuits shall be so installed that each signal governing train movements into a block will display its most restrictive aspect when any of the following conditions obtain within the block:

- (a) Occupancy by a train, locomotive, or car,
- (b) When points of a switch are not closed in proper position,

49 CFR Ch. II (10–1–04 Edition)

(c) When an independently operated fouling point derail equipped with switch circuit controller is not in derailling position,

(d) When a track relay is in de-energized position or a device which functions as a track relay is in its most restrictive state; or when signal control circuit is deenergized.

[33 FR 19684, Dec. 25, 1968, as amended at 49 FR 3385, Jan. 26, 1984]

§ 236.206 Battery or power supply with respect to relay; location.

The battery or power supply for each signal control relay circuit, where an open-wire circuit or a common return circuit is used, shall be located at the end of the circuit farthest from the relay.

§ 236.207 Electric lock on hand-operated switch; control.

Electric lock on hand-operated switch shall be controlled so that it cannot be unlocked until control circuits of signals governing movements over such switch have been opened. Approach or time locking shall be provided.

[49 FR 3385, Jan. 26, 1984]

Subpart C—Interlocking

STANDARDS

§ 236.301 Where signals shall be provided.

Signals shall be provided to govern train movements into and through interlocking limits, except that a signal shall not be required to govern movements over a hand-operated switch into interlocking limits if the switch is provided with an electric lock and a derail at the clearance point, either pipe-connected to the switch or independently locked, electrically. Electric locks installed under this rule must conform to the time and approach locking requirements of Rule 314 (without reference to the 20-mile exceptions), and those of either Rule 760 or Rule 768, as may be appropriate.

§ 236.302 Track circuits and route locking.

Track circuits and route locking shall be provided and shall be effective when the first pair of wheels of a locomotive or a car passes a point not more than 13 feet in advance of the signal governing its movement, measured from the center of the mast, or if there is no mast, from the center of the signal.

[49 FR 3385, Jan. 26, 1984]

§ 236.303 Control circuits for signals, selection through circuit controller operated by switch points or by switch locking mechanism.

The control circuit for each aspect with indication more favorable than "proceed at restricted speed" of power operated signal governing movements over switches, movable-point frogs and derails shall be selected through circuit controller operated directly by switch points or by switch locking mechanism, or through relay controlled by such circuit controller, for each switch, movable-point frog, and derail in the routes governed by such signal. Circuits shall be arranged so that such signal can display an aspect more favorable than "proceed at restricted speed," only when each switch, movable-point frog, and derail in the route is in proper position.

§ 236.304 Mechanical locking or same protection effected by circuits.

Mechanical locking, or the same protection effected by means of circuits, shall be provided.

§ 236.305 Approach or time locking.

Approach or time locking shall be provided in connection with signals displaying aspects with indications more favorable than "proceed at restricted speed."

§ 236.306 Facing point lock or switch-and-lock movement.

Facing point lock or switch-and-lock movement shall be provided for mechanically operated switch, movable-point frog, or split-point derail.

§ 236.307 Indication locking.

Indication locking shall be provided for operative approach signals of the semaphore type, power-operated home signals, power-operated switches, movable-point frogs and derails, and for all approach signals except light signals, all aspects of which are controlled by polar or coded track circuits or line circuits so arranged that a single fault will not permit a more favorable aspect than intended to be displayed.

[49 FR 3385, Jan. 26, 1984]

§ 236.308 Mechanical or electric locking or electric circuits; requisites.

Mechanical or electric locking or electric circuits shall be installed to prevent signals from displaying aspects which permit conflicting movements except that opposing signals may display an aspect indicating proceed at restricted speed at the same time on a track used for switching movements only, by one train at a time. Manual interlocking in service as of the date of this part at which opposing signals on the same track are permitted simultaneously to display aspects authorizing conflicting movements when interlocking is unattended, may be continued, provided that simultaneous train movements in opposite directions on the same track between stations on either side of the interlocking are not permitted.

NOTE: Relief from the requirement of this section will be granted upon an adequate showing by an individual carrier to allow opposing signals on the same track simultaneously to display aspects to proceed through an interlocking which is unattended, provided that train movements in opposite directions on the same track between stations on either side of the interlocking are not permitted at the same time.

§ 236.309 Loss of shunt protection; where required.

(a) A loss of shunt of 5 seconds or less shall not permit an established route to be changed at an automatic interlocking.

(b) A loss of shunt of 5 seconds or less shall not permit the release of the route locking circuit of each power-operated switch hereafter installed.

[49 FR 3385, Jan. 26, 1984]

§ 236.310

§ 236.310 Signal governing approach to home signal.

A signal shall be provided on main track to govern the approach with the current of traffic to any home signal except where the home signal is the first signal encountered when leaving yards or stations and authorized speed approaching such signal is not higher than slow speed. When authorized speed between home signals on route governed is 20 miles per hour or less, an inoperative signal displaying an aspect indicating "approach next signal prepared to stop" may be used to govern the approach to the home signal.

§ 236.311 Signal control circuits, selection through track relays or devices functioning as track relays and through signal mechanism contacts and time releases at automatic interlocking.

(a) The control circuits for aspects with indications more favorable than "proceed at restricted speed" shall be selected through track relays, or through devices that function as track relays, for all track circuits in the route governed.

(b) At automatic interlocking, signal control circuits shall be selected (1) through track relays, or devices that function as track relays, for all track circuits in the route governed and in all conflicting routes within the interlocking; (2) through signal mechanism contacts or relay contacts closed when signals for such conflicting routes display "stop" aspects; and (3) through normal contacts of time releases, time element relays, or timing devices for such conflicting routes, or contacts of relays repeating the normal position or normal state of such time releases, time element relays, or timing devices.

[49 FR 3385, Jan. 26, 1984]

§ 236.312 Movable bridge, interlocking of signal appliances with bridge devices.

When movable bridge is protected by interlocking the signal appliances shall be so interlocked with bridge devices that before a signal governing movements over the bridge can display an aspect to proceed the bridge must be locked and the track aligned, with the bridge locking members within one

49 CFR Ch. II (10–1–04 Edition)

inch of their proper positions and with the track rail on the movable span within three-eighths inch of correct surface and alinement with rail seating device on bridge abutment or fixed span. Emergency bypass switches and devices shall be locked or sealed.

[33 FR 19684, Dec. 25, 1968, as amended at 49 FR 3385, Jan. 26, 1984]

§ 236.313 [Reserved]

§ 236.314 Electric lock for hand-operated switch or derail.

Electric lock shall be provided for each hand-operated switch or derail within interlocking limits, except where train movements are made at not exceeding 20 miles per hour. At manually operated interlocking it shall be controlled by operator of the machine and shall be unlocked only after signals governing movements over such switch or derail display aspects indicating stop. Approach or time locking shall be provided.

RULES AND INSTRUCTIONS

§ 236.326 Mechanical locking removed or disarranged; requirement for permitting train movements through interlocking.

When mechanical locking of interlocking machine is being changed or is removed from the machine, or locking becomes disarranged or broken, unless protection equivalent to mechanical locking is provided by electric locking or electric circuits, train movements through the interlocking shall not be permitted until each switch, movable-point frog or derail in the route is spiked, clamped or blocked in proper position so that it cannot be moved by its controlling lever, and then train movements shall not exceed restricted speed until the interlocking is restored to normal operation. It will not be necessary to comply with this requirement at interlockings where protection is in service in accordance with section 303, provided that the signal controls are arranged so that the signals cannot display an aspect the indication of which is less restrictive than "proceed at restricted speed."

§ 236.327 Switch, movable-point frog or split-point derail.

Switch, movable-point frog, or split-point derail equipped with lock rod shall be maintained so that it can not be locked when the point is open three-eighths inch or more.

[49 FR 3385, Jan. 26, 1984]

§ 236.328 Plunger of facing-point lock.

Plunger of lever operated facing-point lock shall have at least 8-inch stroke. When lock lever is in unlocked position the end of the plunger shall clear the lock rod not more than one inch.

§ 236.329 Bolt lock.

Bolt lock shall be so maintained that signal governing movements over switch or derail and displaying an aspect indicating stop cannot be operated to display a less restrictive aspect while derail is in derailing position, or when switch point is open one-half inch or more.

§ 236.330 Locking dog of switch-and-lock movement.

Locking dog of switch-and-lock movement shall extend through lock rod one-half inch or more in either normal or reverse position.

§§ 236.331–236.333 [Reserved]**§ 236.334 Point detector.**

Point detector shall be maintained so that when switch mechanism is locked in normal or reverse position, contacts cannot be opened by manually applying force at the closed switch point. Point detector circuit controller shall be maintained so that the contacts will not assume the position corresponding to switch point closure if the switch point is prevented by an obstruction, from closing to within one-fourth inch where latch-out device is not used, and to within three-eighths inch where latch-out device is used.

§ 236.335 Dogs, stops and trunnions of mechanical locking.

Driving pieces, dogs, stops and trunnions shall be rigidly secured to locking bars. Swing dogs shall have full

and free movement. Top plates shall be maintained securely in place.

§ 236.336 Locking bed.

The various parts of the locking bed, locking bed supports, and tappet stop rail shall be rigidly secured in place and alined to permit free operation of locking.

§ 236.337 Locking faces of mechanical locking; fit.

Locking faces shall fit squarely against each other with a minimum engagement when locked of at least one-half the designed locking face.

§ 236.338 Mechanical locking required in accordance with locking sheet and dog chart.

Mechanical locking shall be in accordance with locking sheet and dog chart currently in effect.

§ 236.339 Mechanical locking, maintenance requirements.

Locking and connections shall be maintained so that, when a lever or latch is mechanically locked the following will be prevented:

(a) *Mechanical machine.* (1) Latch-operated locking. Raising lever latch block so that bottom thereof is within three-eighths inch of top of quadrant.

(2) Lever-operated locking. Moving lever latch block more than three-eighths inch on top of quadrant.

(b) *Electromechanical machine.* (1) Lever moving in horizontal plant. Moving lever more than five-sixteenths inch when in normal position or more than nine-sixteenths inch when in reverse position.

(2) Lever moving in arc. Moving lever more than 5 degrees.

(c) *Power machine.* (1) Latch-operated locking. Raising lever latch block to that bottom thereof is within seven thirty-seconds inch of top of quadrant.

(2) Lever moving in horizontal plane. Moving lever more than five-sixteenths inch when in normal position or more than nine-sixteenths inch when in reverse position.

(3) Lever moving in arc. Moving lever more than 5 degrees.

§ 236.340

§ 236.340 Electromechanical interlocking machine; locking between electrical and mechanical levers.

In electro-mechanical interlocking machine, locking between electric and mechanical levers shall be maintained so that mechanical lever cannot be operated except when released by electric lever.

§ 236.341 Latch shoes, rocker links, and quadrants.

Latch shoes, rocker links, and quadrants of Saxby and farmer machines shall be maintained so that locking will not release if a downward force not exceeding a man's weight is exerted on the rocker while the lever is in the mid-stroke position.

§ 236.342 Switch circuit controller.

Switch circuit controller connected at the point to switch, derail, or movable-point frog, shall be maintained so that its contacts will not be in position corresponding to switch point closure when switch point is open one-fourth inch or more.

INSPECTION AND TESTS

§ 236.376 Mechanical locking.

Mechanical locking in interlocking machine shall be tested when new locking is installed; and thereafter when change in locking is made, or locking becomes disarranged, or tested at least once every two years, whichever shall occur first.

[49 FR 3385, Jan. 26, 1984]

§ 236.377 Approach locking.

Approach locking shall be tested when placed in service and thereafter when modified, disarranged, or at least once every two years, whichever shall occur first.

[49 FR 3385, Jan. 26, 1984]

§ 236.378 Time locking.

Time locking shall be tested when placed in service and thereafter when modified, disarranged, or at least once every two years, whichever shall occur first.

[49 FR 3385, Jan. 26, 1984]

49 CFR Ch. II (10–1–04 Edition)

§ 236.379 Route locking.

Route locking or other type of switch locking shall be tested when placed in service and thereafter when modified, disarranged, or at least once every two years, whichever shall occur first.

[49 FR 3385, Jan. 26, 1984]

§ 236.380 Indication locking.

Indication locking shall be tested when placed in service and thereafter when modified, disarranged, or at least once every two years, whichever shall occur first.

[49 FR 3385, Jan. 26, 1984]

§ 236.381 Traffic locking.

Traffic locking shall be tested when placed in service and thereafter when modified, disarranged, or at least once every two years, whichever shall occur first.

[49 FR 3385, Jan. 26, 1984]

§ 236.382 Switch obstruction test.

Switch obstruction test of lock rod of each power-operated switch and lock rod of each hand-operated switch equipped with switch-and-lock-movement shall be made when lock rod is placed in service or changed out, but not less than once each month.

[49 FR 3385, Jan. 26, 1984]

§ 236.383 Valve locks, valves, and valve magnets.

Valve locks on valves of the non-cut-off type shall be tested at least once every three months, and valves and valve magnets shall be tested at least once every year.

[49 FR 3385, Jan. 26, 1984]

§ 236.384 Cross protection.

Cross protection shall be tested at least once every six months.

[49 FR 3385, Jan. 26, 1984]

§ 236.385 [Reserved]

§ 236.386 Restoring feature on power switches.

Restoring feature on power switches shall be tested at least once every three months.

§ 236.387 Movable bridge locking.

Movable bridge locking shall be tested at least once a year.

Subpart D—Traffic Control Systems

STANDARDS

§ 236.401 Automatic block signal system and interlocking standards applicable to traffic control systems.

The standards prescribed in §§ 236.201, to 236.203, inclusive, §§ 236.205, 236.206, 236.303, 236.307 and 236.309 to 236.311, inclusive, shall apply to traffic control systems.

[49 FR 3385, Jan. 26, 1984]

§ 236.402 Signals controlled by track circuits and control operator.

The control circuits for home signal aspects with indications more favorable than “proceed at restricted speed” shall be controlled by track circuits extending through entire block. Also in addition, at controlled point they may be controlled by control operator, and, at manually operated interlocking, they shall be controlled manually in cooperation with control operator.

§ 236.403 Signals at controlled point.

Signals at controlled point shall be so interconnected that aspects to proceed cannot be displayed simultaneously for conflicting movements, except that opposing signals may display an aspect indicating “proceed at restricted speed” at the same time on a track used for switching movements only, by one train at a time.

[49 FR 3386, Jan. 26, 1984]

§ 236.404 Signals at adjacent control points.

Signals at adjacent controlled points shall be so interconnected that aspects to proceed on tracks signaled for movements at greater than restricted speed cannot be displayed simultaneously for conflicting movements.

§ 236.405 Track signaled for movements in both directions, change of direction of traffic.

On track signaled for movements in both directions, occupancy of the track between opposing signals at adjacent

controlled points shall prevent changing the direction of traffic from that which obtained at the time the track became occupied, except that when a train having left one controlled point reaches a section of track immediately adjacent to the next controlled point at which switching is to be performed, an aspect permitting movement at not exceeding restricted speed may be displayed into the occupied block.

§ 236.406 [Reserved]**§ 236.407 Approach or time locking; where required.**

Approach or time locking shall be provided for all controlled signals where route or direction of traffic can be changed.

[49 FR 3386, Jan. 26, 1984]

§ 236.408 Route locking.

Route locking shall be provided where switches are power-operated. Route locking shall be effective when the first pair of wheels of a locomotive or car passes a point not more than 13 feet in advance of the signal governing its movement, measured from the center of the signal mast or, if there is no mast, from the center of the signal.

[49 FR 3386, Jan. 26, 1984]

§ 236.409 [Reserved]**§ 236.410 Locking, hand-operated switch; requirements.**

(a) Each hand-operated switch in main track shall be locked either electrically or mechanically in normal position, except:

(1) Where train speeds over the switch do not exceed 20 miles per hour;

(2) Where trains are not permitted to clear the main track;

(3) Where a signal is provided to govern train movements from the auxiliary track to the signaled track; or

(4) On a signaled siding without intermediate signals where the maximum authorized speed on the siding does not exceed 30 miles per hour.

(b) Approach or time locking shall be provided and locking may be released either automatically, or by the control operator, but only after the control circuits of signals governing movement in either direction over the switch and

§ 236.426

which display aspects with indications more favorable than “proceed at restricted speed” have been opened directly or by shunting of track circuit.

NOTE: Each carrier subject to this rule is hereby authorized to remove electrical or mechanical locks now installed within the purview of § 236.410 when either exception (1) or (2) of the present rule is satisfied, subject to the condition that the following procedures and actions be accomplished:

1. Each carrier intending to remove a lock under the findings made herein and based on the existence of one or more of the circumstances as set forth in exception (1) or (2) as contained in the revised section, shall:

(a) Notify the FRA by letter setting forth the location of the lock involved and the specific exception on which removal is based.

(b) Include in the letter to the FRA an assurance that the excepting circumstance relied upon will not be changed without either reinstallation of the electric or mechanical lock, or approval by the FRA of the changed circumstances.

(c) Publish in its Time Table the not-to-exceed 20 miles per hour speed limit covering the area of the switch, when that is the exception relied upon; or, where exception (2) is relied upon, publish either in the Special Instructions part of its Time Table or in separate printed Special Instructions the location of each hand-operated switch where electric or mechanical lock is removed and, where train movements are made in excess of twenty (20) miles per hour, concurrently issuing specific instructions, by stating therein, that trains are not to be permitted to clear the main track at such switch.

2. Following the foregoing, and upon acknowledgment of the letter to the FRA, such acknowledgment to be made promptly as an administrative action by the FRA's Bureau of Railroad Safety, and such acknowledging letter to be retained by the carrier as authority for the removal and as a record of the exception on which relied, the lock may then be removed.

(c) Where a signal is used in lieu of electric or mechanical lock to govern movements from auxiliary track to signaled track, the signal shall not display an aspect to proceed until after the control circuits of signals governing movement on main track in either direction over the switch have been opened, and either the approach locking circuits to the switch are unoccupied or a predetermined time interval has expired.

NOTE: Railroads shall bring all hand-operated switches that are not electrically or mechanically locked and that do not con-

49 CFR Ch. II (10–1–04 Edition)

form to the requirements of this section on the effective date of this part into conformity with this section in accordance with the following schedule:

Not less than 33% during calendar year 1984.

Not less than 66% during calendar year 1985.

The remainder during calendar year 1986.

[33 FR 19684, Dec. 25, 1968, as amended at 49 FR 3386, Jan. 26, 1984]

RULES AND INSTRUCTIONS

§ 236.426 Interlocking rules and instructions applicable to traffic control systems.

The rules and instructions prescribed in §§ 236.327 and 236.328, § 236.330 to § 236.334, inclusive, and § 236.342 shall apply to traffic control systems.

INSPECTION AND TESTS

§ 236.476 Interlocking inspections and tests applicable to traffic control systems.

The inspections and tests prescribed in §§ 236.377 to 236.380, inclusive, and §§ 236.382, 236.383, and 236.386 shall apply to traffic control systems.

[49 FR 3386, Jan. 26, 1984]

Subpart E—Automatic Train Stop, Train Control and Cab Signal Systems

STANDARDS

§ 236.501 Forestalling device and speed control.

(a) An automatic train stop system may include a device by means of which the automatic application of the brakes can be forestalled.

(b) Automatic train control system shall include one or more of the following features:

(1) Low-speed restriction, requiring the train to proceed under slow speed after it has either been stopped by an automatic application of the brakes, or under control of the engineman, its speed has been reduced to slow speed, until the apparatus is automatically restored to normal because the condition which caused the restriction no longer affects the movement of the train.

(2) Medium-speed restriction, requiring the train to proceed under medium speed after passing a signal displaying an approach aspect or when approaching a signal requiring a stop, or a stop indication point, in order to prevent an automatic application of the brakes.

NOTE: Relief from the requirements of paragraphs (b) (1) and (2) of this section will be granted, insofar as speed limits fixed by definitions of Slow and Medium speeds are concerned, upon an adequate showing by an individual carrier where automatic train control systems now in service enforce speed restrictions higher than those required by definitions in §§ 236.700 to 236.838 inclusive.

(3) Maximum-speed restriction, effecting an automatic brake application whenever the predetermined maximum speed limit is exceeded.

§ 236.502 Automatic brake application, initiation by restrictive block conditions stopping distance in advance.

An automatic train-stop or train-control system shall operate to initiate an automatic brake application at least stopping distance from the entrance to a block, wherein any condition described in § 236.205 obtains, and at each main track signal requiring a reduction in speed.

§ 236.503 Automatic brake application; initiation when predetermined rate of speed exceeded.

An automatic train control system shall operate to initiate an automatic brake application when the speed of the train exceeds the predetermined rate as required by the setting of the speed control mechanism.

§ 236.504 Operation interconnected with automatic block-signal system.

(a) A continuous inductive automatic train stop or train control system shall operate in connection with an automatic block signal system and shall be so interconnected with the signal system as to perform its intended function in event of failure of the engineer to acknowledge or obey a restrictive wayside signal or a more restrictive cab signal.

(b) An intermittent inductive automatic train stop system shall operate in connection with an automatic block signal system and shall be so inter-

connected with the signal system that the failure of the engineer to acknowledge a restrictive wayside signal will cause the intermittent inductive automatic train stop system to perform its intended function.

[49 FR 3386, Jan. 26, 1984]

§ 236.505 Proper operative relation between parts along roadway and parts on locomotive.

Proper operative relation between the parts along the roadway and the parts on the locomotive shall obtain under all conditions of speed, weather, wear, oscillation, and shock.

§ 236.506 Release of brakes after automatic application.

The automatic train stop or train control apparatus shall prevent release of the brakes after automatic application until a reset device has been operated, or the speed of the train has been reduced to a predetermined rate, or the condition that caused the brake application no longer affects the movement of the train. If reset device is used it shall be arranged so that the brakes cannot be released until the train has been stopped, or it shall be located so that it cannot be operated by engineman without leaving his accustomed position in the cab.

§ 236.507 Brake application; full service.

The automatic train stop or train control apparatus shall, when operated, cause a full service application of the brakes.

§ 236.508 Interference with application of brakes by means of brake valve.

The automatic train stop, train control, or cab signal apparatus shall be so arranged as not to interfere with the application of the brakes by means of the brake valve and not to impair the efficiency of the brake system.

[49 FR 3386, Jan. 26, 1984]

§ 236.509 Two or more locomotives coupled.

The automatic train stop, train control or cab signal apparatus shall be arranged so that when two or more locomotives are coupled, or a pushing or

§ 236.510

helping locomotive is used, it can be made operative only on the locomotive from which the brakes are controlled.

§ 236.510 [Reserved]

§ 236.511 Cab signals controlled in accordance with block conditions stopping distance in advance.

The automatic cab signal system shall be arranged so that cab signals will be continuously controlled in accordance with conditions described in § 236.205 that obtain at least stopping distance in advance.

§ 236.512 Cab signal indication when locomotive enters block where restrictive conditions obtain.

The automatic cab signal system shall be arranged so that when a locomotive enters or is within a block, wherein any condition described in § 236.205 obtains, the cab signals shall indicate "Proceed at Restricted Speed."

§ 236.513 Audible indicator.

(a) The automatic cab signal system shall be so arranged that when the cab signal changes to display a more restrictive aspect, an audible indicator will sound continuously until silenced by manual operation of an acknowledging device.

(b) The audible cab indicator of automatic cab signal, automatic train stop, or automatic train control system shall have a distinctive sound and be clearly audible throughout the cab under all operating conditions.

[49 FR 3386, Jan. 26, 1984]

§ 236.514 Interconnection of cab signal system with roadway signal system.

The automatic cab signal system shall be interconnected with the roadway-signal system so that the cab signal indication will not authorize operation of the train at a speed higher than that authorized by the indication of the roadway signal that governed the movement of a train into a block except when conditions affecting movement of trains in the block change after the train passes the signal.

§ 236.515 Visibility of cab signals.

The cab signals shall be plainly visible to member or members of the loco-

49 CFR Ch. II (10–1–04 Edition)

motive crew from their stations in the cab.

[49 FR 3386, Jan. 26, 1984]

§ 236.516 Power supply.

Automatic cab signal, train stop, or train control device hereafter installed shall operate from a separate or isolated power supply.

[49 FR 3386, Jan. 26, 1984]

RULES AND INSTRUCTIONS; ROADWAY

§ 236.526 Roadway element not functioning properly.

When a roadway element except track circuit of automatic train stop, train control or cab signal system is not functioning as intended, the signal associated with such roadway element shall be caused manually to display its most restrictive aspect until such element has been restored to normal operative condition.

§ 236.527 Roadway element insulation resistance.

Insulation resistance between roadway inductor and ground shall be maintained at not less than 10,000 ohms.

[49 FR 3386, Jan. 26, 1984]

§ 236.528 Restrictive condition resulting from open hand-operated switch; requirement.

When a facing point hand-operated switch is open one-fourth inch or more, a trailing point hand-operated switch three-eighths inch or more, or hand-operated switch is not locked where facing point lock with circuit controller is used, the resultant restrictive condition of an automatic train stop or train control device of the continuous type or the resultant restrictive cab signal indication of an automatic cab signal device on an approaching locomotive shall be maintained to within 300 feet of the points of the switch.

§ 236.529 Roadway element inductor; height and distance from rail.

Inductor of the inert roadway element type shall be maintained with the inductor pole faces at a height above the plane of the tops of the rails, and

Federal Railroad Administration, DOT

§ 236.557

with its inner edge at a horizontal distance from the gage side of the nearest running rail, in accordance with specifications of the carrier.

[49 FR 3386, Jan. 26, 1984]

§ 236.530 [Reserved]

§ 236.531 Trip arm; height and distance from rail.

Trip arm of automatic train stop device when in the stop position shall be maintained at a height above the plane of the tops of the rails, and at a horizontal distance from its center line to gage side of the nearest running rail, in accordance with specifications of the carrier.

[49 FR 3386, Jan. 26, 1984]

§ 236.532 Strap iron inductor; use restricted.

No railroad shall use strap iron inductor or other roadway element with characteristics differing from its standard type on track where speed higher than restricted speed is permitted.

[49 FR 3386, Jan. 26, 1984]

§ 236.533 [Reserved]

§ 236.534 Entrance to equipped territory; requirements.

Where trains are not required to stop at the entrance to equipped territory, except when leaving yards and stations and speed until entering equipped territory does not exceed restricted speed, the automatic train stop, train control, or cab signal device shall be operative at least stopping distance from the entrance to such territory except where the approach thereto is governed by automatic approach signal.

RULES AND INSTRUCTIONS; LOCOMOTIVES

§ 236.551 Power supply voltage; requirement.

The voltage of power supply shall be maintained within 10 percent of rated voltage.

§ 236.552 Insulation resistance; requirement.

When periodic test prescribed in § 236.588 is performed, insulation resistance between wiring and ground of con-

tinuous inductive automatic cab signal system, automatic train control system, or automatic train stop system shall be not less than one megohm, and that of an intermittent inductive automatic train stop system, not less than 250,000 ohms. Insulation resistance values between periodic tests shall be not less than 250,000 ohms for a continuous inductive automatic cab signal system, automatic train control system, or automatic train stop system, and 20,000 ohms for an intermittent inductive automatic train stop system.

[49 FR 3387, Jan. 26, 1984]

§ 236.553 Seal, where required.

Seal shall be maintained on any device other than brake-pipe cut-out cock (double-heading cock), by means of which the operation of the pneumatic portion of automatic train-stop or train-control apparatus can be cut out.

§ 236.554 Rate of pressure reduction; equalizing reservoir or brake pipe.

The equalizing-reservoir pressure or brake-pipe pressure reduction during an automatic brake application shall be at a rate not less than that which results from a manual service application.

§ 236.555 Repaired or rewound receiver coil.

Receiver coil which has been repaired or rewound shall have the same operating characteristics which it possessed originally or as currently specified for new equipment.

§ 236.556 Adjustment of relay.

Change in adjustment of relay shall be made only in a shop equipped for that purpose except when receiver coils, electro-pneumatic valve, or other essential part of the equipment is replaced. Irregularities in power-supply voltage or other variable factors in the circuit shall not be compensated for by adjustment of the relay.

§ 236.557 Receiver; location with respect to rail.

(a) Receiver of intermittent inductive automatic train stop device of the inert roadway element type shall be maintained with bottom of the receiver

§§ 236.558–236.559

at a height above the plane of the tops of the rails, and with its outer edge at a horizontal distance from the gage side of the nearest rail, in accordance with specifications of the carrier.

(b) Receiver of continuous inductive automatic cab signal, train stop, or train control device of locomotive equipped with onboard test equipment, shall be maintained with the bottom of the receiver at a height above the plane of the tops of the rails, and with its outer edge at a horizontal distance from the gage side of the nearest rail, in accordance with specifications of the carrier.

[49 FR 3387, Jan. 26, 1984]

§§ 236.558–236.559 [Reserved]

§ 236.560 Contact element, mechanical trip type; location with respect to rail.

Contact element of automatic train stop device of the mechanical trip type shall be maintained at a height above the plane of the tops of the rails, and at a horizontal distance from the gage side of the rail, in accordance with specifications of the carrier.

[49 FR 3387, Jan. 26, 1984]

§ 236.561 [Reserved]

§ 236.562 Minimum rail current required.

The minimum rail current required to restore the locomotive equipment of continuous inductive automatic train stop or train control device to normal condition or to obtain a proceed indication of automatic cab signal device (pick-up) shall be in accordance with specifications of the carrier.

[49 FR 3387, Jan. 26, 1984]

§ 236.563 Delay time.

Delay time of automatic train stop or train control system shall not exceed 8 seconds and the spacing of signals to meet the requirements of § 236.24 shall take into consideration the delay time.

§ 236.564 Acknowledging time.

Acknowledging time of intermittent automatic train-stop device shall be not more than 30 seconds.

49 CFR Ch. II (10–1–04 Edition)

§ 236.565 Provision made for preventing operation of pneumatic brake-applying apparatus by double-heading cock; requirement.

Where provision is made for preventing the operation of the pneumatic brake-applying apparatus of an automatic train stop or train control device when the double-heading cock is placed in double-heading position, the automatic train stop or train control device shall not be cut out before communication is closed between the engineman's automatic brake valve and the brake pipe, when operating double-heading cock toward double-heading position.

§ 236.566 Locomotive of each train operating in train stop, train control or cab signal territory; equipped.

The locomotive from which brakes are controlled, of each train operating in automatic train stop, train control, or cab signal territory shall be equipped with apparatus responsive to the roadway equipment installed on all or any part of the route traversed, and such apparatus shall be in operative condition.

§ 236.567 Restrictions imposed when device fails and/or is cut out en route.

Where an automatic train stop, train control, or cab signal device fails and/or is cut out enroute, train may proceed at restricted speed or if an automatic block signal system is in operation according to signal indication but not to exceed medium speed, to the next available point of communication where report must be made to a designated officer. Where no automatic block signal system is in use train shall be permitted to proceed at restricted speed or where automatic block signal system is in operation according to signal indication but not to exceed medium speed to a point where absolute block can be established. Where an absolute block is established in advance of the train on which the device is inoperative train may proceed at not to exceed 79 miles per hour.

§ 236.568 Difference between speeds authorized by roadway signal and cab signal; action required.

If for any reason a cab signal authorizes a speed different from that authorized by a roadway signal, when a train enters the block governed by such roadway signal, the lower speed shall not be exceeded.

INSPECTION AND TESTS; ROADWAY

§ 236.576 Roadway element.

Roadway elements, except track circuits, including those for test purposes, shall be gaged monthly for height and alinement, and shall be tested at least every 6 months.

§ 236.577 Test, acknowledgement, and cut-in circuits.

Test, acknowledgement, and cut-in circuits shall be tested at least once every twelve months.

[49 FR 3387, Jan. 26, 1984]

INSPECTION AND TESTS; LOCOMOTIVE

§ 236.586 Daily or after trip test.

(a) Except where tests prescribed by § 236.588 are performed at intervals of not more than 2 months, each locomotive equipped with an automatic cab signal or train stop or train control device operating in equipped territory shall be inspected for damage to the equipment and tested at least once each calendar day or within 24 hours before departure upon each trip.

(b) Each equipped locomotive shall be tested to determine the locomotive equipment is responsive to the wayside equipment and shall be cycled to determine the device functions as intended.

(c) Each locomotive equipped with intermittent inductive automatic train stop or non-coded continuous inductive automatic train stop or non-coded continuous inductive automatic train control device shall be tested to determine that the pickup of the device is within specified limits.

[49 FR 3387, Jan. 26, 1984]

§ 236.587 Departure test.

(a) The automatic train stop, train control, or cab signal apparatus on each locomotive, except a locomotive

or a multiple-unit car equipped with mechanical trip stop, shall be tested using one of the following methods:

- (1) Operation over track elements;
- (2) Operation over test circuit;
- (3) Use of portable test equipment; or
- (4) Use of onboard test device.

(b) The test shall be made on departure of the locomotive from its initial terminal unless that apparatus will be cut out between the initial terminal and the equipped territory. If the apparatus is cut out between the initial terminal and the equipped territory the test shall be made prior to entering equipped territory.

(c) If a locomotive makes more than one trip in any 24-hour period, only one departure test is required in such 24-hour period.

(d)(1) Whoever performs the test shall certify in writing that such test was properly performed. The certification and the test results shall be posted in the cab of the locomotive and a copy of the certification and test results left at the test location for filing in the office of the supervisory official having jurisdiction.

(2) If it is impractical to leave a copy of the certification and test results at the location of the test, the test results shall be transmitted to either (i) the dispatcher or (ii) one other designated individual at each location, who shall keep a written record of the test results and the name of the person performing the test. These records shall be retained for at least 92 days.

[49 FR 3387, Jan. 26, 1984, as amended at 53 FR 37313, Sept. 26, 1988]

EFFECTIVE DATE NOTE: At 49 FR 3387, Jan. 26, 1984, § 236.587 was revised. This section contains information collection and record-keeping requirements and will not become effective until approval has been given by the Office of Management and Budget.

§ 236.588 Periodic test.

Except as provided in § 236.586, periodic test of the automatic train stop, train control, or cab signal apparatus shall be made at least once every 92 days, and on multiple-unit cars as specified by the carrier, subject to approval by the FRA.

[49 FR 3387, Jan. 26, 1984]

§ 236.589

§ 236.589 Relays.

(a) Each relay shall be removed from service, subjected to thorough test, necessary repairs and adjustments made, and shall not be replaced in service unless its operating characteristics are in accordance with the limits within which such relay is designed to operate, as follows:

(1) Master or primary relays of torque type depending on spring tension to return contacts to deenergized position in noncoded continuous inductive automatic train stop or train control system, at least once every two years; and

(2) All other relays, at least once every six years.

(b) [Reserved]

[49 FR 3387, Jan. 26, 1984]

§ 236.590 Pneumatic apparatus.

Automatic train stop, train control, or cab signal pneumatic apparatus shall be inspected, cleaned, and the results of such inspection recorded as provided by § 229.29(a). When a locomotive with automatic train stop, train control, or cab signal pneumatic apparatus receives out-of-use credit pursuant to § 229.33, the automatic train stop, train control, or cab signal apparatus shall be tested in accordance with § 236.588 prior to the locomotive being placed in service.

[61 FR 33873, July 1, 1996]

Subpart F—Dragging Equipment and Slide Detectors and Other Similar Protective Devices

STANDARDS

§ 236.601 Signals controlled by devices; location.

Signals controlled by devices used to provide protection against unusual contingencies, such as landslides, dragging equipment, burned bridges or trestles and washouts shall be located so that stopping distance will be provided between the signal and the point where it is necessary to stop the train.

49 CFR Ch. II (10–1–04 Edition)

Subpart G—Definitions

§ 236.700 Definitions.

For the purpose of these rules, standards, and instructions, the following definitions will apply.

§ 236.701 Application, brake; full service.

An application of the brakes resulting from a continuous or a split reduction in brake pipe pressure at a service rate until maximum brake cylinder pressure is developed. As applied to an automatic or electro-pneumatic brake with speed governor control, an application other than emergency which develops the maximum brake cylinder pressure, as determined by the design of the brake equipment for the speed at which the train is operating.

§ 236.702 Arm, semaphore.

The part of a semaphore signal displaying an aspect. It consists of a blade fastened to a spectacle.

§ 236.703 Aspect.

The appearance of a roadway signal conveying an indication as viewed from the direction of an approaching train; the appearance of a cab signal conveying an indication as viewed by an observer in the cab.

§ 236.704 [Reserved]

§ 236.705 Bar, locking.

A bar in an interlocking machine to which the locking dogs are attached.

§ 236.706 Bed, locking.

That part of an interlocking machine that contains or holds the tappets, locking bars, crosslocking, dogs and other apparatus used to interlock the levers.

§ 236.707 Blade, semaphore.

The extended part of a semaphore arm which shows the position of the arm.

§ 236.708 Block.

A length of track of defined limits, the use of which by trains is governed by block signals, cab signals, or both.

§ 236.709 Block, absolute.

A block in which no train is permitted to enter while it is occupied by another train.

§ 236.710 Block, latch.

The lower extremity of a latch rod which engages with a square shoulder of the segment or quadrant to hold the lever in position.

§ 236.711 Bond, rail joint.

A metallic connection attached to adjoining rails to insure electrical conductivity.

§ 236.712 Brake pipe.

A pipe running from the engineman's brake valve through the train, used for the transmission of air under pressure to charge and actuate the automatic brake equipment and charge the reservoirs of the electro-pneumatic brake equipment on each vehicle of the train.

§ 236.713 Bridge, movable.

That section of a structure bridging a navigable waterway so designed that it may be displaced to permit passage of traffic on the waterway.

§ 236.714 Cab.

The compartment of a locomotive from which the propelling power and power brakes of the train are manually controlled.

§§ 236.715–236.716 [Reserved]**§ 236.717 Characteristics, operating.**

The measure of electrical values at which electrical or electronic apparatus operate (e.g., drop-away, pick-up, maximum and minimum current, and working value).

[49 FR 3387, Jan. 26, 1984]

§ 236.718 Chart, dog.

A diagrammatic representation of the mechanical locking of an interlocking machine, used as a working plan in making up, assembling and fitting the locking.

§ 236.719 Circuit, acknowledgment.

A circuit consisting of wire or other conducting material installed between the track rails at each signal in terri-

tory where an automatic train stop system or cab signal system of the continuous inductive type with 2-indication cab signals is in service, to enforce acknowledgement by the engineman at each signal displaying an aspect requiring a stop.

§ 236.720 Circuit, common return.

A term applied where one wire is used for the return of more than one electric circuit.

§ 236.721 Circuit, control.

An electrical circuit between a source of electric energy and a device which it operates.

§ 236.722 Circuit, cut-in.

A roadway circuit at the entrance to automatic train stop, train control or cab signal territory by means of which locomotive equipment of the continuous inductive type is actuated so as to be in operative condition.

§ 236.723 Circuit, double wire; line.

An electric circuit not employing a common return wire; a circuit formed by individual wires throughout.

§ 236.724 Circuit, shunt fouling.

The track circuit in the fouling section of a turnout, connected in multiple with the track circuit in the main track.

§ 236.725 Circuit, switch shunting.

A shunting circuit which is closed through contacts of a switch circuit controller.

§ 236.726 Circuit, track.

An electrical circuit of which the rails of the track form a part.

§ 236.727 Circuit, track; coded.

A track circuit in which the energy is varied or interrupted periodically.

§ 236.728 Circuit, trap.

A term applied to a circuit used where it is desirable to provide a track circuit but where it is impracticable to maintain a track circuit.

§ 236.729

§ 236.729 Cock, double heading.

A manually operated valve by means of which the control of brake operation is transferred to the leading locomotive.

§ 236.730 Coil, receiver.

Concentric layers of insulated wire wound around the core of a receiver of an automatic train stop, train control or cab signal device on a locomotive.

§ 236.731 Controller, circuit.

A device for opening and closing electric circuits.

§ 236.732 Controller, circuit; switch.

A device for opening and closing electric circuits, operated by a rod connected to a switch, derail or movable-point frog.

§ 236.733 Current, foreign.

A term applied to stray electric currents which may affect a signaling system, but which are not a part of the system.

§ 236.734 Current of traffic.

The movement of trains on a specified track in a designated direction.

§ 236.735 Current, leakage.

A stray electric current of relatively small value which flows through or across the surface of insulation when a voltage is impressed across the insulation.

§ 236.736 Cut-section.

A location other than a signal location where two adjoining track circuits end within a block.

§ 236.737 Cut-section, relayed.

A cut-section where the energy for one track circuit is supplied through front contacts or through front and polar contacts of the track relay for the adjoining track circuit.

§ 236.738 Detector, point.

A circuit controller which is part of the switch operating mechanism and operated by a rod connected to a switch, derail or movable point frog to indicate that the point is within a specified distance of the stock rail.

49 CFR Ch. II (10–1–04 Edition)

§ 236.739 Device, acknowledging.

A manually operated electric switch or pneumatic valve by means of which, on a locomotive equipped with an automatic train stop or train control device, an automatic brake application can be forestalled, or by means of which, on a locomotive equipped with an automatic cab signal device, the sounding of the cab indicator can be silenced.

§ 236.740 Device, reset.

A device whereby the brakes may be released after an automatic train control brake application.

§ 236.741 Distance, stopping.

The maximum distance on any portion of any railroad which any train operating on such portion of railroad at its maximum authorized speed, will travel during a full service application of the brakes, between the point where such application is initiated and the point where the train comes to a stop.

§ 236.742 Dog, locking.

A steel block attached to a locking bar or tappet of an interlocking machine, by means of which locking between levers is accomplished.

§ 236.743 Dog, swing.

A locking dog mounted in such a manner that it is free to rotate on a trunnion which is riveted to a locking bar.

CROSS REFERENCE: Element, contact. See receiver, § 236.788.

§ 236.744 Element, roadway.

That portion of the roadway apparatus of automatic train stop, train control, or cab signal system, such as electric circuit, inductor, or trip arm to which the locomotive apparatus of such system is directly responsive.

[49 FR 3387, Jan. 26, 1984]

§ 236.745 Face, locking.

The locking surface of a locking dog, tappet or cross locking of an interlocking machine.

§ 236.746 Feature, restoring.

An arrangement on an electro-pneumatic switch by means of which power is applied to restore the switch movement to full normal or to full reverse position, before the driving bar creeps sufficiently to unlock the switch, with control level in normal or reverse position.

[49 FR 3388, Jan. 26, 1984]

§ 236.747 ForeSTALL.

As applied to an automatic train stop or train control device, to prevent an automatic brake application by operation of an acknowledging device or by manual control of the speed of the train.

§ 236.748 [Reserved]**§ 236.749 Indication.**

The information conveyed by the aspect of a signal.

CROSS REFERENCE: Inductor, see § 236.744.

§ 236.750 Interlocking, automatic.

An arrangement of signals, with or without other signal appliances, which functions through the exercise of inherent powers as distinguished from those whose functions are controlled manually, and which are so interconnected by means of electric circuits that their movements must succeed each other in proper sequence, train movements over all routes being governed by signal indication.

§ 236.751 Interlocking, manual.

An arrangement of signals and signal appliances operated from an interlocking machine and so interconnected by means of mechanical and/or electric locking that their movements must succeed each other in proper sequence, train movements over all routes being governed by signal indication.

§ 236.752 Joint, rail, insulated.

A joint in which electrical insulation is provided between adjoining rails.

§ 236.753 Limits, interlocking.

The tracks between the opposing home signals of an interlocking.

§ 236.754 Line, open wire.

An overhead wire line consisting of single conductors as opposed to multiple-conductor cables.

§ 236.755 Link, rocker.

That portion of an interlocking machine which transmits motion between the latch and the universal link.

§ 236.756 Lock, bolt.

A mechanical lock so arranged that if a switch, derail or movable-point frog is not in the proper position for a train movement, the signal governing that movement cannot display an aspect to proceed; and that will prevent a movement of the switch, derail or movable-point frog unless the signal displays its most restrictive aspect.

§ 236.757 Lock, electric.

A device to prevent or restrict the movement of a lever, a switch or a movable bridge, unless the locking member is withdrawn by an electrical device, such as an electromagnet, solenoid or motor.

§ 236.758 Lock, electric, forced drop.

An electric lock in which the locking member is mechanically forced down to the locked position.

§ 236.759 Lock, facing point.

A mechanical lock for a switch, derail, or movable-point frog, comprising a plunger stand and a plunger which engages a lock rod attached to the switch point to lock the operated unit.

§ 236.760 Locking, approach.

Electric locking effective while a train is approaching, within a specified distance, a signal displaying an aspect to proceed, and which prevents, until after the expiration of a predetermined time interval after such signal has been caused to display its most restrictive aspect, the movement of any interlocked or electrically locked switch, movable-point frog, or derail in the route governed by the signal, and which prevents an aspect to proceed from being displayed for any conflicting route.

§ 236.761

§ 236.761 Locking, electric.

The combination of one or more electric locks and controlling circuits by means of which levers of an interlocking machine, or switches or other units operated in connection with signaling and interlocking, are secured against operation under certain conditions.

§ 236.762 Locking, indication.

Electric locking which prevents manipulation of levers that would result in an unsafe condition for a train movement if a signal, switch, or other operative unit fails to make a movement corresponding to that of its controlling lever, or which directly prevents the operation of a signal, switch, or other operative unit, in case another unit which should operate first fails to make the required movement.

§ 236.763 Locking, latch operated.

The mechanical locking of an interlocking machine which is actuated by means of the lever latch.

§ 236.764 Locking, lever operated.

The mechanical locking of an interlocking machine which is actuated by means of the lever.

§ 236.765 Locking, mechanical.

An arrangement of locking bars, dogs, tappets, cross locking and other apparatus by means of which interlocking is effected between the levers of an interlocking machine and so interconnected that their movements must succeed each other in a predetermined order.

§ 236.766 Locking, movable bridge.

The rail locks, bridge locks, bolt locks, circuit controllers, and electric locks used in providing interlocking protection at a movable bridge.

§ 236.767 Locking, route.

Electric locking, effective when a train passes a signal displaying an aspect for it to proceed, which prevents the movement of any switch, movable-point frog, or derail in advance of the train within the route entered. It may be so arranged that as a train clears a

49 CFR Ch. II (10–1–04 Edition)

track section of the route, the locking affecting that section is released.

§ 236.768 Locking, time.

A method of locking, either mechanical or electrical, which, after a signal has been caused to display an aspect to proceed, prevents, until after the expiration of a predetermined time interval after such signal has been caused to display its most restrictive aspect, the operation of any interlocked or electrically locked switch, movable-point frog, or derail in the route governed by that signal, and which prevents an aspect to proceed from being displayed for any conflicting route.

§ 236.769 Locking, traffic.

Electric locking which prevents the manipulation of levers or other devices for changing the direction of traffic on a section of track while that section is occupied or while a signal displays an aspect for a movement to proceed into that section.

§ 236.770 Locomotive.

A self-propelled unit of equipment which can be used in train service.

§ 236.771 Machine, control.

An assemblage of manually operated devices for controlling the functions of a traffic control system; it may include a track diagram with indication lights.

§ 236.772 Machine, interlocking.

An assemblage of manually operated levers or other devices for the control of signals, switches or other units.

CROSS REFERENCE: Magnet, track, see § 236.744.

§ 236.773 Movements, conflicting.

Movements over conflicting routes.

§ 236.774 Movement, facing.

The movement of a train over the points of a switch which face in a direction opposite to that in which the train is moving.

§ 236.775 Movement, switch-and-lock.

A device, the complete operation of which performs the three functions of unlocking, operating and locking a switch, movable-point frog or derail.

§ 236.776 Movement, trailing.

The movement of a train over the points of a switch which face in the direction in which the train is moving.

§ 236.777 Operator, control.

An employee assigned to operate the control machine of a traffic control system.

§ 236.778 Piece, driving.

A crank secured to a locking shaft by means of which horizontal movement is imparted to a longitudinal locking bar.

§ 236.779 Plate, top.

A metal plate secured to a locking bracket to prevent the cross locking from being forced out of the bracket.

§ 236.780 Plunger, facing point lock.

That part of a facing point lock which secures the lock rod to the plunger stand when the switch is locked.

§ 236.781 [Reserved]**§ 236.782 Point, controlled.**

A location where signals and/or other functions of a traffic control system are controlled from the control machine.

§ 236.783 Point, stop-indication.

As applied to an automatic train stop or train control system without the use of roadway signals, a point where a signal displaying an aspect requiring a stop would be located.

§ 236.784 Position, deenergized.

The position assumed by the moving member of an electromagnetic device when the device is deprived of its operating current.

§ 236.785 Position, false restrictive.

A position of a semaphore arm that is more restrictive than it should be.

§ 236.786 Principle, closed circuit.

The principle of circuit design where a normally energized electric circuit which, on being interrupted or deenergized, will cause the controlled func-

tion to assume its most restrictive condition.

§ 236.787 Protection, cross.

An arrangement to prevent the improper operation of a signal, switch, movable-point frog, or derail as the result of a cross in electrical circuits.

CROSS REFERENCE: Ramp, see § 236.744.

§ 236.788 Receiver.

A device on a locomotive, so placed that it is in position to be influenced inductively or actuated by an automatic train stop, train control or cab signal roadway element.

§ 236.789 Relay, timing.

A relay which will not close its front contacts or open its back contacts, or both, until the expiration of a definite time intervals after the relay has been energized.

§ 236.790 Release, time.

A device used to prevent the operation of an operative unit until after the expiration of a predetermined time interval after the device has been actuated.

§ 236.791 Release, value.

The electrical value at which the movable member of an electromagnetic device will move to its deenergized position.

§ 236.792 Reservoir, equalizing.

An air reservoir connected with and adding volume to the top portion of the equalizing piston chamber of the automatic brake valve, to provide uniform service reductions in brake pipe pressure regardless of the length of the train.

CROSS REFERENCE: Rocker, see § 236.755.

§ 236.793 Rod, lock.

A rod, attached to the front rod or lug of a switch, movable-point frog or derail, through which a locking plunger may extend when the switch points or derail are in the normal or reverse position.

§ 236.794**§ 236.794 Rod, up-and-down.**

A rod used for connecting the semaphore arm to the operating mechanism of a signal.

§ 236.795 Route.

The course or way which is, or is to be, traveled.

§ 236.796 Routes, conflicting.

Two or more routes, opposing, converging or intersecting, over which movements cannot be made simultaneously without possibility of collision.

§ 236.797 Route, interlocked.

A route within interlocking limits.

§ 236.798 Section, dead.

A section of track, either within a track circuit or between two track circuits, the rails of which are not part of a track circuit.

§ 236.799 Section, fouling.

The section of track between the switch points and the clearance point in a turnout.

§ 236.800 Sheet, locking.

A description in tabular form of the locking operations in an interlocking machine.

§ 236.801 Shoe, latch.

The casting by means of which the latch rod and the latch block are held to a lever of a mechanical interlocking machine.

§ 236.802 Shunt.

A by-path in an electrical circuit.

§ 236.802a Siding.

An auxiliary track for meeting or passing trains.

§ 236.803 Signal, approach.

A roadway signal used to govern the approach to another signal and if operative so controlled that its indication furnishes advance information of the indication of the next signal.

§ 236.804 Signal, block.

A roadway signal operated either automatically or manually at the entrance to a block.

§ 236.805 Signal, cab.

A signal located in engineman's compartment or cab, indicating a condition affecting the movement of a train and used in conjunction with interlocking signals and in conjunction with or in lieu of block signals.

§ 236.806 Signal, home.

A roadway signal at the entrance to a route or block to govern trains in entering and using that route or block.

§ 236.807 Signal, interlocking.

A roadway signal which governs movements into or within interlocking limits.

§ 236.808 Signals, opposing.

Roadway signals which govern movements in opposite directions on the same track.

§ 236.809 Signal, slotted mechanical.

A mechanically operated signal with an electromagnetic device inserted in its operating connection to provide a means of controlling the signal electrically, as well as mechanically.

§ 236.810 Spectacle, semaphore arm.

That part of a semaphore arm which holds the roundels and to which the blade is fastened.

§ 236.811 Speed, medium.

A speed not exceeding 40 miles per hour.

§ 236.812 Speed, restricted.

A speed that will permit stopping within one-half the range of vision, but not exceeding 20 miles per hour.

[49 FR 3388, Jan. 26, 1984]

§ 236.813 Speed, slow.

A speed not exceeding 20 miles per hour.

§ 236.813a State, most restrictive.

The mode of an electric or electronic device that is equivalent to a track relay in its deenergized position.

[49 FR 3388, Jan. 26, 1984]

§ 236.814 Station, control.

The place where the control machine of a traffic control system is located.

§ 236.815 Stop.

As applied to mechanical locking, a device secured to a locking bar to limit its movement.

§ 236.816 Superiority of trains.

The precedence conferred upon one train over other trains by train order or by reason of its class or the direction of its movement.

§ 236.817 Switch, electro-pneumatic.

A switch operated by an electro-pneumatic switch-and-lock movement.

§ 236.818 Switch, facing point.

A switch, the points of which face traffic approaching in the direction for which the track is signaled.

§ 236.819 Switch, hand operated.

A non-interlocked switch which can only be operated manually.

§ 236.820 Switch, interlocked.

A switch within the interlocking limits the control of which is interlocked with other functions of the interlocking.

§ 236.820a Switch, power-operated.

A switch operated by an electrically, hydraulically, or pneumatically driven switch-and-lock movement.

[49 FR 3388, Jan. 26, 1984]

§ 236.821 Switch, sectionalizing.

A switch for disconnecting a section of a power line from the source of energy.

§ 236.822 Switch, spring.

A switch equipped with a spring device which forces the points to their original position after being trailed through and holds them under spring compression.

§ 236.823 Switch, trailing point.

A switch, the points of which face away from traffic approaching in the direction for which the track is signaled.

§ 236.824 System, automatic block signal.

A block signal system wherein the use of each block is governed by an automatic block signal, cab signal, or both.

§ 236.825 System, automatic train control.

A system so arranged that its operation will automatically result in the following:

(a) A full service application of the brakes which will continue either until the train is brought to a stop, or, under control of the engineman, its speed is reduced to a predetermined rate.

(b) When operating under a speed restriction, an application of the brakes when the speed of the train exceeds the predetermined rate and which will continue until the speed is reduced to that rate.

§ 236.826 System, automatic train stop.

A system so arranged that its operation will automatically result in the application of the brakes until the train has been brought to a stop.

§ 236.827 System, block signal.

A method of governing the movement of trains into or within one or more blocks by block signals or cab signals.

§ 236.828 System, traffic control.

A block signal system under which train movements are authorized by block signals whose indications supersede the superiority of trains for both opposing and following movements on the same track.

§ 236.829 Terminal, initial.

The starting point of a locomotive for a trip.

§ 236.830 Time, acknowledging.

As applied to an intermittent automatic train stop system, a predetermined time within which an automatic

§ 236.831

brake application may be forestalled by means of the acknowledging device.

§ 236.831 Time, delay.

As applied to an automatic train stop or train control system, the time which elapses after the onboard apparatus detects a more restrictive indication until the brakes start to apply.

[49 FR 3388, Jan. 26, 1984]

§ 236.831a Track, main.

A track, other than auxiliary track, extending through yards and between stations, upon which trains are operated by timetable or train orders, or both, or the use of which is governed by block signals.

§ 236.832 Train.

A locomotive or more than one locomotive coupled, with or without cars.

§ 236.833 Train, opposing.

A train, the movement of which is in a direction opposite to and toward another train on the same track.

49 CFR Ch. II (10–1–04 Edition)

§ 236.834 Trip.

A movement of a locomotive over all or any portion of automatic train stop, train control or cab signal territory between the terminals for that locomotive; a movement in one direction.

CROSS REFERENCE: Trip-arm, see § 236.744.

§ 236.835 Trunking.

A casing used to protect electrical conductors.

§ 236.836 Trunnion.

A cylindrical projection supporting a revolving part.

§ 236.837 Valve, electro-pneumatic.

A valve electrically operated which, when operated, will permit or prevent passage of air.

§ 236.838 Wire, shunt.

A wire forming part of a shunt circuit.

APPENDIX A TO PART 236—CIVIL PENALTIES ¹

Section	Violation	Willful violation
Subpart A—Rules and Instructions—All Systems		
<i>General:</i>		
236.0 Applicability, minimum requirements	\$2,500	\$5,000
236.1 Plans, where kept	1,000	2,000
236.2 Grounds	1,000	2,000
236.3 Locking of signal apparatus housings:		
(a) Power interlocking machine cabinet not secured against unauthorized entry	2,500	5,000
(b) other violations	1,000	2,000
236.4 Interference with normal functioning of device	5,000	7,500
236.5 Design of control circuits on closed circuit principle	1,000	2,000
236.6 Hand-operated switch equipped with switch circuit controller	1,000	2,000
236.7 Circuit controller operated by switch-and-lock movement	1,000	2,000
236.8 Operating characteristics of electro-magnetic, electronic, or electrical apparatus	1,000	2,000
236.9 Selection of circuits through indicating or annunciating instruments	1,000	2,000
236.10 Electric locks, force drop type; where required	1,000	2,000
236.11 Adjustment, repair, or replacement of component	2,500	5,000
236.12 Spring switch signal protection; where required	1,000	2,000
236.13 Spring switch; selection of signal control circuits through circuit controller	1,000	2,000
236.14 Spring switch signal protection; requirements	1,000	2,000
236.15 Timetable instructions	1,000	2,000
236.16 Electric lock, main track releasing circuit:		
(a) Electric lock releasing circuit on main track extends into fouling circuit where turnout not equipped with derailed at clearance point either pipe-connected to switch or independently locked, electrically	2,500	5,000
(b) other violations	1,000	2,000
236.17 Pipe for operating connections, requirements	1,000	2,000
<i>Roadway Signals and Cab Signals—</i>		
236.21 Location of roadway signals	1,000	2,000
236.22 Semaphore signal arm; clearance to other objects	1,000	2,000
236.23 Aspects and indications	1,000	2,000
236.24 Spacing of roadway signals	2,500	5,000

Federal Railroad Administration, DOT

Pt. 236, App. A

Section	Violation	Willful violation
236.26 Buffing device, maintenance	1,000	2,000
<i>Track Circuits—</i>		
236.51 Track circuit requirements:		
(a) Shunt fouling circuit used where permissible speed through turnout greater than 45 m.p.h.	2,500	5,000
(b) Track relay not in de-energized position or device that functions as track relay not in its most restrictive state when train, locomotive, or car occupies any part of track circuit, except fouling section of turnout of hand-operated main-track crossover	2,500	5,000
(c) other violations	1,000	2,000
236.52 Relayed cut-section	1,000	2,000
236.53 Track circuit feed at grade crossing	1,000	2,000
236.54 Minimum length of track circuit	1,000	2,000
236.55 Dead section; maximum length	1,000	2,000
236.56 Shunting sensitivity	2,500	5,000
236.57 Shunt and fouling wires:		
(a) Shunt or fouling wires do not consist of at least two discrete conductors	2,500	5,000
(b) other violations	1,000	2,000
236.58 Turnout, fouling section:		
(a) Rail joint in shunt fouling section not bonded	2,500	5,000
(b) other violations	1,000	2,000
236.59 Insulated rail joints	1,000	2,000
236.60 Switch shunting circuit; use restricted	2,500	5,000
<i>Wires and Cables—</i>		
236.71 Signal wires on pole line and aerial cable	1,000	2,000
236.73 Open-wire transmission line; clearance to other circuits	1,000	2,000
236.74 Protection of insulated wire; splice in underground wire	1,000	2,000
236.76 Tagging of wires and interference of wires or tags with signal apparatus	1,000	2,000
<i>Inspections and Tests; All Systems—</i>		
236.101 Purpose of inspection and tests; removal from service or relay or device failing to meet test requirements	2,500	5,000
236.102 Semaphore or search-light signal mechanism	1,000	2,000
236.103 Switch circuit controller or point detector	1,000	2,000
236.104 Shunt fouling circuit	1,000	2,000
236.105 Electric lock	1,000	2,000
236.106 Relays	1,000	2,000
236.107 Ground tests	1,000	2,000
236.108 Insulation resistance tests, wires in trunking and cables:		
(a) Circuit permitted to function on a conductor having insulation resistance value less than 200,000 ohms	2,500	5,000
(b) other violations	1,000	2,000
236.109 Time releases, timing relays and timing devices	1,000	2,000
236.110 Results of tests	1,000	2,000
Subpart B—Automatic Block Signal Systems		
236.201 Track circuit control of signals	1,000	2,000
236.202 Signal governing movements over hand-operated switch	1,000	2,000
236.203 Hand-operated crossover between main tracks; protection	1,000	2,000
236.204 Track signaled for movements in both directions, requirements	1,000	2,000
236.205 Signal control circuits; requirements	1,000	2,000
236.206 Battery or power supply with respect to relay; location	1,000	2,000
Subpart C—Interlocking		
236.207 Electric lock on hand-operated switch; control:		
(a) Approach or time locking of electric lock on hand-operated switch can be defeated by unauthorized use of emergency device which is not kept sealed in the non-release position	2,500	5,000
(b) other violations	1,000	2,000
236.301 Where signals shall be provided	1,000	2,000
236.302 Track circuits and route locking	1,000	2,000
236.303 Control circuits for signals, selection through circuit controller operated by switch points or by switch locking mechanism	1,000	2,000
236.304 Mechanical locking or same protection effected by circuits	1,000	2,000
236.305 Approach or time locking	1,000	2,000
236.306 Facing point lock or switch-and-lock movement	1,000	2,000
236.307 Indication locking:		
Mechanical or electric locking or electric circuits; requisites	1,000	2,000
236.309 Loss of shunt protection; where required:		
(a) Loss of shunt of five seconds or less permits release of route locking of power-operated switch, movable point frog, or derail	2,500	5,000

Section	Violation	Willful violation
(b) Other violations	1,000	2,000
236.310 Signal governing approach to home signal	1,000	2,000
236.311 Signal control circuits, selection through track relays or devices functioning as track relays and through signal mechanism contacts and time releases at automatic interlocking	1,000	2,000
236.312 Movable bridge, interlocking of signal appliances with bridge devices:		
(a) Emergency bypass switch or device not locked or sealed	2,500	5,000
(b) other violations	1,000	2,000
236.314 Electric lock for hand-operated switch or derail:		
(a) Approach or time locking of electric lock at hand-operated switch or derail can be defeated by unauthorized use of emergency device which is not kept sealed in non-release position	2,500	5,000
(b) other violations	1,000	2,000
<i>Rules and Instructions—</i>		
236.326 Mechanical locking removed or disarranged; requirement for permitting train movements through interlocking	1,000	2,000
236.327 Switch, movable-point frog or split-point derail	1,000	2,000
236.328 Plunger of facing-point	1,000	2,000
236.329 Bolt lock	1,000	2,000
236.330 Locking dog of switch and lock movement	1,000	2,000
236.334 Point detector	1,000	2,000
236.335 Dogs, stops and trunnions of mechanical locking	1,000	2,000
236.336 Locking bed	1,000	2,000
236.337 Locking faces of mechanical locking; fit	1,000	2,000
236.338 Mechanical locking required in accordance with locking sheet and dog chart	1,000	2,000
236.339 Mechanical locking; maintenance requirements	1,000	2,000
236.340 Electromechanical interlocking machine; locking between electrical and mechanical levers	1,000	2,000
236.341 Latch shoes, rocker links, and quadrants	1,000	2,000
236.342 Switch circuit controller	1,000	2,000
<i>Inspection and Tests—</i>		
236.376 Mechanical locking	1,000	2,000
236.377 Approach locking	1,000	2,000
236.378 Time locking	1,000	2,000
236.379 Route locking	1,000	2,000
236.380 Indication locking	1,000	2,000
236.381 Traffic locking	1,000	2,000
236.382 Switch obstruction test	1,000	2,000
236.383 Valve locks, valves, and valve magnets	1,000	2,000
236.384 Cross protection		
236.386 Restoring feature on power switches		
236.387 Movable bridge locking	1,000	2,000
Subpart D—Traffic Control Systems Standards		
236.401 Automatic block signal system and interlocking standards applicable to traffic control systems:		
236.402 Signals controlled by track circuits and control operator	1,000	2,000
236.403 Signals at controlled point	1,000	2,000
236.404 Signals at adjacent control points	1,000	2,000
236.405 Track signaled for movements in both directions, change of direction of traffic	1,000	2,000
236.407 Approach or time locking; where required	1,000	2,000
236.408 Route locking	1,000	2,000
236.410 Locking, hand-operated switch; requirements:		
(a) Hand-operated switch on main track not electrically or mechanically locked in normal position where signal not provided to govern movement to main track, movements made at speeds in excess of 20 m.p.h., and train or engine movements may clear main track	2,500	5,000
(b) Hand-operated switch on signaled siding not electrically or mechanically locked in normal position where signal not provided to govern movements to signaled siding, train movements made at speeds in excess of 30 m.p.h., and train or engine movements may clear signaled siding	2,500	5,000
(c) Approach or time locking of electric lock at hand-operated switch can be defeated by use of emergency release device of electric lock which is not kept sealed in non-release position	2,500	5,000
(d) other violations	1,000	2,000
<i>Rules and Instructions—</i>		
236.426 Interlocking rules and instructions applicable to traffic control systems	1,000	2,000
236.476 Interlocking inspections and tests applicable to traffic control systems	1,000	2,000

Section	Violation	Willful violation
Subpart E—Automatic Train Stop, Train Control and Cab Signal Systems Standards		
236.501 Forestalling device and speed control	1,000	2,000
236.502 Automatic brake application, initiation by restrictive block conditions stopping distance in advance	1,000	2,000
236.503 Automatic brake application; initiation when predetermined rate of speed exceeded	1,000	2,000
236.504 Operations interconnected with automatic block-signal system	1,000	2,000
236.505 Proper operative relation between parts along roadway and parts on locomotive	1,000	2,000
236.506 Release of brakes after automatic application	1,000	2,000
236.507 Brake application; full service	1,000	2,000
236.508 Interference with application of brakes by means of brake valve	1,000	2,000
236.509 Two or more locomotives coupled	1,000	2,000
236.511 Cab signals controlled in accordance with block conditions stopping distance in advance	1,000	2,000
236.512 Cab signal indication when locomotive enters blocks	1,000	2,000
236.513 Audible indicator	1,000	2,000
236.514 Interconnection of cab signal system with roadway signal system	1,000	2,000
236.515 Visibility of cab signals	1,000	2,000
236.516 Power supply	1,000	2,000
<i>Rules and Instructions; Roadway—</i>		
236.526 Roadway element not functioning properly	2,500	5,000
236.527 Roadway element insulation resistance	1,000	2,000
236.528 Restrictive condition resulting from open hand-operated switch; requirement	1,000	2,000
236.529 Roadway element inductor; height and distance from rail	1,000	2,000
236.531 Trip arm; height and distance from rail	1,000	2,000
236.532 Strap iron inductor; use restricted	1,000	2,000
236.534 Rate of pressure reduction; equalizing reservoir or brake pipe	1,000	2,000
236.551 Power supply voltage	1,000	2,000
236.552 Insulation resistance	1,000	2,000
236.553 Seal, where required	2,500	5,000
236.554 Rate of pressure reduction; equalizing reservoir or brake pipe	1,000	2,000
236.555 Repaired or rewound receiver coil	1,000	2,000
236.556 Adjustment of relay	1,000	2,000
236.557 Receiver; location with respect to rail	1,000	2,000
236.560 Contact element, mechanical trip type; location with respect to rail	1,000	2,000
236.562 Minimum rail current required	1,000	2,000
236.563 Delay time	1,000	2,000
236.564 Acknowledging time	1,000	2,000
236.565 Provision made for preventing operation of pneumatic brake-applying apparatus by double-heading clock; requirement	1,000	2,000
236.566 Locomotive of each train operating in train stop, train control or cab signal territory; equipped	5,000	7,500
236.567 Restrictions imposed when device fails and/or is cut out en route:		
(a) Report not made to designated officer at next available point of communication after automatic train stop, train control, or cab signal device fails and/or is cut en route	5,000	7,500
(b) Train permitted to proceed at speed exceeding 79 m.p.h. where automatic train stop, train control, or cab signal device fails and/or is cut out en route when absolute block established in advance of train on which device is inoperative	5,000	7,500
(c) other violations	1,000	2,000
236.568 Difference between speeds authorized by roadway signal and cab signal; action	1,000	2,000
<i>Inspection and Tests; Roadway—</i>		
236.576 Roadway element	1,000	2,000
236.577 Test, acknowledgement, and cut-in circuits	1,000	2,000
<i>Inspection and Tests; Locomotive—</i>		
236.586 Daily or after trip test	2,500	5,000
236.587 Departure test:		
(a) Test of automatic train stop, train control, or cab signal apparatus on locomotive not made on departure of locomotive from initial terminal if equipment on locomotive not cut out between initial terminal and equipped territory	5,000	7,500
(b) Test of automatic train stop, train control, or cab signal apparatus on locomotive not made immediately on entering equipped territory, if equipment on locomotive cut out between initial terminal and equipped territory	5,000	7,500
(c) Automatic train stop, train control, or cab signal apparatus on locomotive making more than one trip within 24-hour period not given departure test within corresponding 24-hour period	5,000	7,500
(d) other violations	2,500	5,000
236.588 Periodic test	2,500	5,000
236.589 Relays	2,500	5,000
236.590 Pneumatic apparatus:		
(a) Automatic train stop, train control, or cab signal apparatus not inspected and cleaned at least once every 736 days	2,500	5,000
(b) other violations	1,000	2,000

Section	Violation	Willful violation
Subpart F—Dragging Equipment and Slide Detectors and Other Similar Protective Devices; Standards		
238.601 Signals controlled by devices; location	1,000	2,000

¹ A penalty may be assessed against an individual only for a willful violation. The Administrator reserves the right to assess a penalty of up to \$27,000 for any violation where circumstances warrant. See 49 CFR part 209, appendix A.

PART 238—PASSENGER EQUIPMENT SAFETY STANDARDS

Subpart A—General

Sec.

- 238.1 Purpose and scope.
- 238.3 Applicability.
- 238.5 Definitions.
- 238.7 Waivers.
- 238.9 Responsibility for compliance.
- 238.11 Penalties.
- 238.13 Preemptive effect.
- 238.15 Movement of passenger equipment with power brake defects.
- 238.17 Movement of passenger equipment with other than power brake defects.
- 238.19 Reporting and tracking of repairs to defective passenger equipment.
- 238.21 Special approval procedure.
- 238.23 Information collection.

Subpart B—Safety Planning and General Requirements

- 238.101 Scope.
- 238.103 Fire safety.
- 238.105 Train electronic hardware and software safety.
- 238.107 Inspection, testing, and maintenance plan.
- 238.109 Training, qualification, and designation program.
- 238.111 Pre-revenue service acceptance testing plan.
- 238.113 Emergency window exits.
- 238.115 Emergency lighting.
- 238.117 Protection against personal injury.
- 238.119 Rim-stamped straight-plate wheels.

Subpart C—Specific Requirements for Tier I Passenger Equipment

- 238.201 Scope/alternative compliance.
- 238.203 Static end strength.
- 238.205 Anti-climbing mechanism.
- 238.207 Link between coupling mechanism and car body.
- 238.209 Forward-facing end structure of locomotives.
- 238.211 Collision posts.
- 238.213 Corner posts.
- 238.215 Rollover strength.
- 238.217 Side structure.
- 238.219 Truck-to-car-body attachment.

- 238.221 Glazing.
- 238.223 Locomotive fuel tanks.
- 238.225 Electrical system.
- 238.227 Suspension system.
- 238.229 Safety appliances.
- 238.231 Brake system.
- 238.233 Interior fittings and surfaces.
- 238.235 Doors.
- 238.237 Automated monitoring.

Subpart D—Inspection, Testing, and Maintenance Requirements for Tier I Passenger Equipment

- 238.301 Scope.
- 238.303 Exterior calendar day mechanical inspection of passenger equipment.
- 238.305 Interior calendar day mechanical inspection of passenger cars.
- 238.307 Periodic mechanical inspection of passenger cars and unpowered vehicles used in passenger trains.
- 238.309 Periodic brake equipment maintenance.
- 238.311 Single car test.
- 238.313 Class I brake test.
- 238.315 Class IA brake test.
- 238.317 Class II brake test.
- 238.319 Running brake test.

Subpart E—Specific Requirements for Tier II Passenger Equipment

- 238.401 Scope.
- 238.403 Crash energy management.
- 238.405 Longitudinal static compressive strength.
- 238.407 Anti-climbing mechanism.
- 238.409 Forward end structures of power car cabs.
- 238.411 Rear end structures of power car cabs.
- 238.413 End structures of trailer cars.
- 238.415 Rollover strength.
- 238.417 Side loads.
- 238.419 Truck-to-car-body and truck component attachment.
- 238.421 Glazing.
- 238.423 Fuel tanks.
- 238.425 Electrical system.
- 238.427 Suspension system.
- 238.429 Safety appliances.
- 238.431 Brake system.
- 238.433 Draft system.
- 238.435 Interior fittings and surfaces.

Federal Railroad Administration, DOT

§ 238.3

- 238.437 Emergency communication.
- 238.439 Doors.
- 238.441 Emergency roof entrance location.
- 238.443 Headlights.
- 238.445 Automated monitoring.
- 238.447 Train operator's controls and power car cab layout.

AUTHORITY: 49 U.S.C. 20103, 20107, 20133, 20141, 20302–20303, 20306, 20701–20702, 21301–21302, 21304; 28 U.S.C. 2461, note; and 49 CFR 1.49.

SOURCE: 64 FR 25660, May 12, 1999, unless otherwise noted.

Subpart A—General

§ 238.1 Purpose and scope.

(a) The purpose of this part is to prevent collisions, derailments, and other occurrences involving railroad passenger equipment that cause injury or death to railroad employees, railroad

passengers, or the general public; and to mitigate the consequences of such occurrences to the extent they cannot be prevented.

(b) This part prescribes minimum Federal safety standards for railroad passenger equipment. This part does not restrict a railroad from adopting and enforcing additional or more stringent requirements not inconsistent with this part.

(c) Railroads to which this part applies shall be responsible for compliance with all of the requirements contained in §§ 238.15, 238.17, 238.19, 238.107, 238.109, and subpart D of this part effective January 1, 2002.

(1) A railroad may request earlier application of the requirements contained in §§ 238.15, 238.17, 238.19, 238.107, 238.109, and subpart D upon written notification to FRA's Associate Administrator for Safety. Such a request shall indicate the railroad's readiness and ability to comply with all of the provisions referenced in paragraph (c) introductory text of this section.

(2) Except for paragraphs (b) and (c) of § 238.309, a railroad may specifically request earlier application of the maintenance and testing provisions contained in §§ 238.309 and 238.311 simultaneously. In order to request earlier application of these two sections, the railroad shall indicate its readiness and ability to comply with all of the provisions contained in both of those sections.

(3) Paragraphs (b) and (c) of § 238.309 apply beginning September 9, 1999.

[64 FR 25660, May 12, 1999, as amended at 65 FR 41305, July 3, 2000; 67 FR 19989, Apr. 23, 2002]

§ 238.3 Applicability.

(a) Except as provided in paragraph (c) of this section, this part applies to all:

(1) Railroads that operate intercity or commuter passenger train service on standard gage track which is part of the general railroad system of transportation; and

(2) Railroads that provide commuter or other short-haul rail passenger train service in a metropolitan or suburban area as described by 49 U.S.C. 20102(1), including public authorities operating passenger train service.

§ 238.5

49 CFR Ch. II (10–1–04 Edition)

(b) Railroads that permit to be used or hauled on their lines passenger equipment subject to this part, in violation of a power brake provision of this part or a safety appliance provision of this part, are subject to the power brake and safety appliance provisions of this part with respect to such operations.

(c) This part does not apply to:

(1) Rapid transit operations in an urban area that are not connected to the general railroad system of transportation;

(2) A railroad that operates only on track inside an installation that is not part of the general railroad system of transportation;

(3) Tourist, scenic, historic, or excursion operations, whether on or off the general railroad system of transportation; or

(4) Circus trains.

§ 238.5 Definitions.

As used in this part—

AAR means the Association of American Railroads.

APTA means the American Public Transit Association.

Actuator means a device directly actuated by the movement of the brake cylinder piston which provides an indication of the piston travel.

Administrator means the Administrator of the Federal Railroad Administration or the Administrator's delegate.

Alerter means a device or system installed in the locomotive cab to promote continuous, active locomotive engineer attentiveness by monitoring select locomotive engineer-induced control activities. If fluctuation of a monitored locomotive engineer-induced control activity is not detected within a predetermined time, a sequence of audible and visual alarms is activated so as to progressively prompt a response by the locomotive engineer. Failure by the locomotive engineer to institute a change of state in a monitored control, or acknowledge the alerter alarm activity through a manual reset provision, results in a penalty brake application that brings the locomotive or train to a stop.

Anti-climbing mechanism means the parts at the ends of adjoining vehicles

in a train that are designed to engage when subjected to large buff loads to prevent the override of one vehicle by another.

Bind means restrict the intended movement of one or more brake system components by obstruction, increased friction, or reduced clearance.

Block of cars means one car or multiple cars in a solid unit coupled together for the purpose of being added to, or removed from, a train as a solid unit.

Brake, air or power brake means a combination of devices operated by compressed air, arranged in a system, and controlled manually, electrically, or pneumatically, by means of which the motion of a rail car or locomotive is retarded or arrested.

Brake, disc means a retardation system used on some rail vehicles, primarily passenger equipment, that utilizes flat metal discs as the braking surface instead of the wheel tread.

Brake, dynamic means a train braking system whereby the kinetic energy of a moving train is used to generate electric current at the locomotive traction motors, which is then dissipated through banks of resistor grids or back into the catenary or third rail system.

Brake, effective means a brake that is capable of producing its required designed retarding force on the train. A brake is not effective if its piston travel is in excess of the maximum prescribed limits. On vehicles equipped with nominal 12-inch stroke brake cylinders, the brake is not effective if its piston travel exceeds 10½ inches.

Brake indicator means a device, actuated by brake cylinder pressure, which indicates whether brakes are applied or released.

Brake, inoperative means a primary brake that, for any reason, no longer applies or releases as intended or is otherwise ineffective.

Brake, on-tread friction means a braking system that uses a brake shoe that acts on the tread of the wheel to retard the vehicle.

Brake, parking or hand brake means a brake that can be applied and released by hand to prevent movement of a stationary rail car or locomotive.

Brake pipe means the system of piping (including branch pipes, angle

cocks, cutout cocks, dirt collectors, hoses, and hose couplings) used for connecting locomotives and all rail cars for the passage of air to control the locomotive and car brakes.

Brake, power means “air brake” as that term is defined in this section.

Brake, primary means those components of the train brake system necessary to stop the train within the signal spacing distance without thermal damage to friction braking surfaces.

Brake, secondary means those components of the train brake system which develop supplemental brake retarding force that is not needed to stop the train within signal spacing distances or to prevent thermal damage to friction braking surfaces.

Brake shoes or pads aligned with tread or disc means that the surface of the brake shoe or pad, respectively, engages the surface of the wheel tread or disc, respectively, to prevent localized thermal stress.

Braking system, blended means a braking system where the primary brake and one or more secondary brakes are automatically combined to stop the train. If the secondary brakes are unavailable, the blended brake uses the primary brake alone to stop the train.

Calendar day means a time period running from one midnight to the next midnight on a given date.

Class I brake test means a complete passenger train brake system test and inspection (as further specified in § 238.313) performed by a qualified maintenance person to ensure that the air brake system is 100 percent effective.

Class IA brake test means a test and inspection (as further specified in § 238.315) performed by a qualified person of the air brake system on each car in a passenger train to ensure that the brakes apply and release on each car in the train in response to train line commands.

Class II brake test means a test and inspection (as further specified in § 238.317) performed by a qualified person of brake pipe integrity and continuity from the controlling locomotive to the rear unit of a passenger train.

Collision posts means structural members of the end structures of a vehicle

that extend vertically from the underframe to which they are securely attached and that provide protection to occupied compartments from an object penetrating the vehicle during a collision.

Control valves means that part of the air brake equipment on each rail car or locomotive that controls the charging, application, and release of the air brakes, in response to train line commands.

Corner posts means structural members located at the intersection of the front or rear surface with the side surface of a rail vehicle and which extend vertically from the underframe to the roof. Corner posts may be combined with collision posts to become part of the end structure.

Crack means a fracture without complete separation into parts, except that, in a casting, a shrinkage crack or hot tear that does not significantly diminish the strength of the member is not a crack.

Crash energy management means an approach to the design of rail passenger equipment which controls the dissipation of energy during a collision to protect the occupied volumes from crushing and to limit the decelerations on passengers and crewmembers in those volumes. This may be accomplished by designing energy-absorbing structures of low strength in the unoccupied volumes of a rail vehicle or passenger train to collapse in a controlled manner, while providing higher structural strength in the occupied volumes. Energy deflection can also be part of a crash energy management approach. Crash energy management can be used to help provide anti-climbing resistance and to reduce the risk of train buckling during a collision.

Crash refuge means a volume with structural strength designed to maximize the survivability of crewmembers stationed in the locomotive cab during a collision.

Crewmember means a railroad employee called to perform service covered by the Federal hours of service laws at 49 U.S.C. 21103 and subject to the railroad's operating rules and program of operational tests and inspections required in § 217.9 and § 217.11 of this chapter.

Critical buckling stress means the minimum stress necessary to initiate buckling of a structural member.

Emergency brake application means an irretrievable brake application resulting in the maximum retarding force available from the train brake system.

Emergency window means that segment of a side-facing glazing panel which has been designed to permit rapid and easy removal in an emergency situation.

End structure means the main support structure projecting upward from the underframe of a locomotive, passenger car, or other rail vehicle. The end structure is securely attached to the underframe at each end of a rail vehicle.

50th-percentile adult male means a person weighing 164 pounds (plus or minus 3 pounds) and possessing the following dimensions: erect sitting height: 35.7 inches (plus or minus 0.1 inch); hip breadth (sitting): 14.7 inches (plus or minus 0.7 inch); hip circumference (sitting): 42 inches; waist circumference (sitting): 32 inches (plus or minus 0.6 inch); chest depth: 9.3 inches (plus or minus 0.2 inch); and chest circumference: 37.4 inches (plus or minus 0.6 inch).

Foul means restrict the intended movement of one or more brake system components because the component is snagged, entangled, or twisted.

FRA means the Federal Railroad Administration.

Fuel tank, external means a fuel containment volume that extends outside the car body structure of a locomotive.

Fuel tank, internal means a fuel containment volume that does not extend outside the car body structure of a locomotive.

Full-height collision post, corner post, or side frame post means any vertical framing member in the rail car body structure that spans the distance between the underframe and the roof at the car body section where the post is located. For collision posts located at the approximate third points laterally of an end frame, the term “full-height” applies to posts that extend and connect to supporting structural members in the roof at the location of the posts, or to a beam connected to the top of the end-frame and supported by the

roof rails (or anti-telescoping plate), or to both.

Full service application means a brake application which results in a brake cylinder pressure at the service limiting valve setting or equivalent.

Glazing, end-facing means a glazing panel located where a line perpendicular to the exterior surface of the panel makes an angle of 50 degrees or less with the longitudinal center line of the rail vehicle in which the panel is installed. A glazing panel that curves so as to meet the definition for both side-facing and end-facing glazing is considered end-facing glazing.

Glazing, exterior means a glazing panel that is an integral part of the exterior skin of a rail vehicle and has a surface exposed to the outside environment.

Glazing, side-facing means a glazing panel located where a line perpendicular to the exterior surface of the panel makes an angle of more than 50 degrees with the longitudinal center line of the rail vehicle in which the panel is installed.

Handrails means safety appliances installed on either side of a rail vehicle's exterior doors to assist passengers and crewmembers to safely board and depart the vehicle.

Head end power means power generated on board the locomotive of a passenger train used for purposes other than propelling the train, such as cooking, heating, illumination, ventilation and air conditioning.

In passenger service/in revenue service means a train or passenger equipment that is carrying, or available to carry, passengers. Passengers need not have paid a fare in order for the equipment to be considered in passenger or in revenue service.

In service, when used in connection with passenger equipment, means:

- (1) Passenger equipment subject to this part that is in passenger or revenue service in the United States; and
- (2) All other passenger equipment subject to this part in the United States, unless the passenger equipment:

- (i) Is being handled in accordance with §§ 238.15, 238.17, 238.305(d), or 238.503(f), as applicable;

(ii) Is in a repair shop or on a repair track;

(iii) Is on a storage track and is not carrying passengers; or

(iv) Has been delivered in interchange but has not been accepted by the receiving railroad.

Interior fitting means any component in the passenger compartment which is mounted to the floor, ceiling, side-walls, or end walls and projects into the passenger compartment more than 25 mm (1 in.) from the surface or surfaces to which it is mounted. Interior fittings do not include side and end walls, floors, door pockets, or ceiling lining materials, for example.

Lateral means the horizontal direction perpendicular to the direction of travel.

Locomotive means a piece of on-track rail equipment, other than hi-rail, specialized maintenance, or other similar equipment, which may consist of one or more units operated from a single control stand with one or more propelling motors designed for moving other passenger equipment; with one or more propelling motors designed to transport freight or passenger traffic, or both; or without propelling motors but with one or more control stands. This term does not include a locomotive propelled by steam power unless it is used to haul an intercity or commuter passenger train. Nor does this term include a freight locomotive when used to haul a passenger train due to failure of a passenger locomotive.

Locomotive cab means the compartment or space on board a locomotive where the control stand is located and which is normally occupied by the engineer when the locomotive is operated.

Locomotive, cab car means rail rolling equipment intended to provide transportation for members of the general public that is without propelling motors but equipped with one or more control stands.

Locomotive, controlling means the locomotive from which the locomotive engineer exercises control over the train.

Locomotive, MU means rail rolling equipment self-propelled by any power source and intended to provide transportation for members of the general

public; however, this term does not include an MU locomotive propelled by steam power unless it is used to haul an intercity or commuter passenger train.

Longitudinal means in a direction parallel to the normal direction of travel.

Luminescent material means material that absorbs light energy when ambient levels of light are high and emits this stored energy when ambient levels of light are low, making the material appear to glow in the dark.

L/V ratio means the ratio of the lateral force that any wheel exerts on an individual rail to the vertical force exerted by the same wheel on the rail.

MIL-STD-882 means a military standard issued by the United States Department of Defense to provide uniform requirements for developing and implementing a system safety plan and program to identify and then eliminate the hazards of a system or reduce the associated risk to an acceptable level.

Mph means miles per hour.

95th-percentile adult male means, except as used in § 238.447(f)(2), a person weighing 215 pounds and possessing the following dimensions: erect sitting height: 38 inches; hip breadth (sitting): 16.5 inches; hip circumference (sitting): 47.2 inches; waist circumference (sitting): 42.5 inches; chest depth: 10.5 inches; and chest circumference 44.5 inches.

Occupied volume means the volume of a rail vehicle or passenger train where passengers or crewmembers are normally located during service operation, such as the operating cab and passenger seating and sleeping areas. The entire width of a vehicle's end compartment that contains a control stand is an occupied volume. A vestibule is typically not considered occupied, except when it contains a control stand for use as a control cab.

Ordered, as applied to acquisition of equipment, means that the acquiring entity has given a notice to proceed to manufacture the equipment that represents a firm financial commitment to compensate the manufacturer for the contract price of the equipment or for damages if the order is nullified. Equipment is not ordered if future exercise of a contract option is required

to place the remanufacturing process in motion.

Override means to climb over the normal coupling or side buffers and linking mechanism and impact the end of the adjoining rail vehicle or unit above the underframe.

Passenger car means rail rolling equipment intended to provide transportation for members of the general public and includes a self-propelled car designed to carry passengers, baggage, mail, or express. This term includes a passenger coach, cab car, and an MU locomotive. In the context of articulated equipment, “passenger car” means that segment of the rail rolling equipment located between two trucks. This term does not include a private car.

Passenger coach means rail rolling equipment intended to provide transportation for members of the general public that is without propelling motors and without a control stand.

Passenger equipment—means

(1) All powered and unpowered passenger cars, locomotives used to haul a passenger car, and any other rail rolling equipment used in a train with one or more passenger cars. Passenger equipment includes—

(i) A passenger coach,

(ii) A cab car,

(iii) A MU locomotive,

(iv) A locomotive not intended to provide transportation for a member of the general public that is used to power a passenger train, and

(v) Any non-self-propelled vehicle used in a passenger train, including an express car, baggage car, mail car, freight car, or a private car.

(2) In the context of articulated equipment, “passenger equipment” means a segment of rail rolling equipment located between two trucks that is used in a train with one or more passenger cars. This term does not include a freight locomotive when used to haul a passenger train due to failure of a passenger locomotive.

Passenger station means a location designated in a railroad’s timetable where passengers are regularly scheduled to get on or off any train.

Permanent deformation means the undergoing of a permanent change in shape of a structural member of a rail vehicle.

Person means an entity of any type covered under 1 U.S.C. 1, including but not limited to the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor.

Piston travel means the amount of linear movement of the air brake hollow rod (or equivalent) or piston rod when forced outward by movement of the piston in the brake cylinder or actuator and limited by the brake shoes being forced against the wheel or disc.

Power car means a rail vehicle that propels a Tier II passenger train or is the lead vehicle in a Tier II passenger train, or both.

Pre-revenue service acceptance testing plan means a document, as further specified in § 238.111, prepared by a railroad that explains in detail how pre-revenue service tests of passenger equipment demonstrate that the equipment meets Federal safety standards and the railroad’s own safety requirements.

Primary responsibility means the task that a person performs during at least 50 percent of the time that the person is working. The totality of the circumstances will be considered on a case-by-case basis in circumstances where an individual does not spend 50 percent of his or her workday engaged in any one readily identifiable type of activity. Time spent supervising employees engaged in the functions of troubleshooting, inspection, testing, maintenance, or repair of train brake and mechanical components and systems covered by this part shall be considered work which is generally consistent with the function of troubleshooting of such systems and components for the purpose of the definition of this term and the definition of “Qualified Maintenance Person.”

Private car means rail rolling equipment that is used only for excursion, recreational, or private transportation purposes. A private car is not a passenger car.

Public highway-rail grade crossing means a location where a public highway, road or street, including associated sidewalks or pathways, crosses one or more active railroad tracks at grade.

Qualified maintenance person means a qualified person who has received, as a part of the training, qualification, and designation program required under § 238.109, instruction and training that includes “hands-on” experience (under appropriate supervision or apprenticeship) in one or more of the following functions: troubleshooting, inspection, testing, maintenance, or repair of the specific train brake and other components and systems for which the person is assigned responsibility. This person shall also possess a current understanding of what is required to properly repair and maintain the safety-critical brake or mechanical components for which the person is assigned responsibility. Further, the qualified maintenance person shall be a person whose primary responsibility includes work generally consistent with the above-referenced functions and is designated to:

- (1) Conduct Class I brake tests under this part;
- (2) Conduct exterior calendar day mechanical inspections on MU locomotives or other passenger cars and unpowered vehicles under this part; or
- (3) Determine whether equipment not in compliance with this part may be moved as required by § 238.17.

Qualified person means a person who has received, as a part of the training, qualification, and designation program required under § 238.109, instruction and training necessary to perform one or more functions required under this part. The railroad is responsible for determining that the person has the knowledge and skills necessary to perform the required function for which the person is assigned responsibility. The railroad determines the qualifications and competencies for employees designated to perform various functions in the manner set forth in this part. Although the rule uses the term “qualified person” to describe a person responsible for performing various functions required under this part, a person may be deemed qualified to per-

form some functions but not qualified to perform other functions. For example, although a person may be deemed qualified to perform the Class II brake test required by this part, that same person may or may not be qualified to perform the Class IA brake test or authorize the movement of defective equipment under this part. The railroad will determine the required functions for which an individual will be deemed a “qualified person” based upon the instruction and training the individual has received pursuant to § 238.109 on a particular function.

Railroad means any form of non-highway ground transportation that runs on rails or electromagnetic guideways and any entity providing such transportation, including—

(i) Commuter or other short-haul railroad passenger service in a metropolitan or suburban area and commuter railroad service that was operated by the Consolidated Rail Corporation on January 1, 1979; and

(ii) High speed ground transportation systems that connect metropolitan areas, without regard to whether those systems use new technologies not associated with traditional railroads; but does not include rapid transit operations in an urban area that are not connected to the general railroad system of transportation.

Refresher training means periodic retraining required by a railroad for employees or contractors to remain qualified to perform specific equipment inspection, testing, or maintenance functions.

Repair point means a location designated by a railroad where repairs of the type necessary occur on a regular basis. A repair point has, or should have, the facilities, tools, and personnel qualified to make the necessary repairs. A repair point need not be staffed continuously.

Respond as intended means to produce the result that a device or system is designed to produce.

Rollover strength means the strength provided to protect the structural integrity of a rail vehicle in the event the vehicle leaves the track and impacts the ground on its side or roof.

§ 238.5

49 CFR Ch. II (10–1–04 Edition)

Roof rail means the longitudinal structural member at the intersection of the side wall and the roof sheathing.

Running brake test means a test (as further specified in § 238.319) performed by a qualified person of a train system or component while the train is in motion to verify that the system or component functions as intended.

Running gear defect means any condition not in compliance with this part which involves a truck component, a draft system component, a wheel, or a wheel component.

Safety appliance means an appliance required under 49 U.S.C. chapter 203, excluding power brakes. The term includes automatic couplers, hand brakes, sill steps, handholds, handrails, or ladder treads made of steel or a material of equal or greater mechanical strength used by the traveling public or railroad employees that provide a means for safely coupling, uncoupling, or ascending or descending passenger equipment.

Safety-critical means a component, system, or task that, if not available, defective, not functioning, not functioning correctly, not performed, or not performed correctly, increases the risk of damage to passenger equipment or injury to a passenger, crewmember, or other person.

Semi-permanently coupled means coupled by means of a drawbar or other coupling mechanism that requires tools to perform the uncoupling operation. Coupling and uncoupling of each semi-permanently coupled unit in a train can be performed safely only while at a maintenance or shop location where personnel can safely get under a unit or between units.

Semi-monocoque means a type of rail vehicle construction where the shell or skin acts as a single unit with the supporting frame to resist and transmit the loads acting on the rail vehicle.

Shear strength means the ability of a structural member to resist forces or components of forces acting perpendicular to compression or tension forces, or both, in the member.

Shock absorbent material means material designed to prevent or mitigate injuries due to impact by yielding and absorbing much of the energy of impact.

Side posts means main vertical structural elements in the sides of a rail vehicle.

Side sill means that portion of the underframe or side at the bottom of the rail vehicle side wall.

Single car test means a comprehensive test (as further specified in § 238.311) of the functioning of all critical brake system components installed on an individual passenger car or unpowered vehicle, other than a self-propelled passenger car, used or allowed to be used in a passenger train.

Single car test device means a device capable of controlling the application and release of the brakes on an individual passenger car or an unpowered vehicle, other than a self-propelled passenger car, through pneumatic or electrical means.

Skin means the outer covering of a fuel tank and a rail vehicle. The skin may be covered with another coating of material such as fiberglass.

Spall, glazing means small pieces of glazing that fly off the back surface of the glazing when an object strikes the front surface.

Switching service means the classification of freight cars according to commodity or destination; assembling of cars for train movements; changing the position of cars for purposes of loading, unloading, or weighing; placing of locomotives and cars for repair or storage; or moving of rail equipment in connection with work service that does not constitute a train movement.

Telescope means override an adjoining rail vehicle or unit and penetrate into the interior of that adjoining vehicle or unit because of compressive forces.

Terminal means a starting point or ending point of a single scheduled trip for a train, where passengers may get on or off a train. Normally, this location is a point where the train would reverse direction or change destinations.

Tier I means operating at speeds not exceeding 125 mph.

Tier II means operating at speeds exceeding 125 mph but not exceeding 150 mph.

Tourist, scenic, historic, or excursion operations means railroad operations

that carry passengers, often using antiquated equipment, with the conveyance of the passengers to a particular destination not being the principal purpose. Train movements of new passenger equipment for demonstration purposes are not tourist, scenic, historic, or excursion operations.

Trailer car means a rail vehicle that neither propels a Tier II passenger train nor is the leading unit in a Tier II passenger train. A trailer car is normally without a control stand and is normally occupied by passengers.

Train means a locomotive unit or locomotive units coupled, with or without cars. For the purposes of the provisions of this part related to power brakes, the term “train” does not include such equipment when being used in switching service.

Train brake communication line means the communication link between the locomotive and passenger equipment in a train by which the brake commands are transmitted. This may be a pneumatic pipe, electrical line, or radio signal.

Train, commuter means a passenger train providing commuter service within an urban, suburban, or metropolitan area. The term includes a passenger train provided by an instrumentality of a State or a political subdivision of a State.

Train, long-distance intercity passenger means a passenger train that provides service between large cities more than 125 miles apart and is not operated exclusively in the National Railroad Passenger Corporation’s Northeast Corridor.

Train, passenger means a train that transports or is available to transport members of the general public. If a train is composed of a mixture of passenger and freight equipment, that train is a passenger train for purposes of this part.

Train, short-distance intercity passenger means a passenger train that provides service exclusively on the National Railroad Passenger Corporation’s Northeast Corridor or between cities that are not more than 125 miles apart.

Train, Tier II passenger means a short-distance or long-distance intercity passenger train providing service at speeds

that include those exceeding 125 mph but not exceeding 150 mph.

Trainset, passenger means a passenger train.

Transverse means in a direction perpendicular to the normal direction of travel.

Ultimate strength means the load at which a structural member fractures or ceases to resist any load.

Uncoupling mechanism means the arrangement for operating the coupler by any means.

Underframe means the lower horizontal support structure of a rail vehicle.

Unit means passenger equipment of any type, except a freight locomotive when used to haul a passenger train due to failure of a passenger locomotive.

Unoccupied volume means the volume of a rail vehicle or passenger train which does not contain seating and is not normally occupied by passengers or crewmembers.

Vehicle, rail means passenger equipment of any type and includes a car, trailer car, locomotive, power car, tender, or similar vehicle. This term does not include a freight locomotive when used to haul a passenger train due to failure of a passenger locomotive.

Vestibule means an area of a passenger car that normally does not contain seating and is used in passing from the seating area to the side exit doors.

Witness plate means a thin foil placed behind a piece of glazing undergoing an impact test. Any material spalled or broken from the back side of the glazing will dent or mark the witness plate.

Yard means a system of tracks within defined limits provided for the making up of trains, storing of cars, or other purposes.

Yard air test means a train brake system test conducted using a source of compressed air other than a locomotive.

Yield strength means the ability of a structural member to resist a change in length caused by a heavy load. Exceeding the yield strength may cause permanent deformation of the member.

[64 FR 25660, May 12, 1999, as amended at 65 FR 41305, July 3, 2000; 67 FR 19989, Apr. 23, 2002]

§ 238.7

§ 238.7 Waivers.

(a) A person subject to a requirement of this part may petition the Administrator for a waiver of compliance with such requirement. The filing of such a petition does not affect the person's responsibility for compliance with that requirement while the petition is being considered.

(b) Each petition for waiver under this section shall be filed in the manner and contain the information required by part 211 of this chapter.

(c) If the Administrator finds that a waiver of compliance is in the public interest and is consistent with railroad safety, the Administrator may grant the waiver subject to any conditions the Administrator deems necessary.

§ 238.9 Responsibility for compliance.

(a) A railroad subject to this part shall not—

(1) Use, haul, permit to be used or hauled on its line, offer in interchange, or accept in interchange any train or passenger equipment, while in service,

(i) That has one or more conditions not in compliance with a safety appliance or power brake provision of this part; or

(ii) That has not been inspected and tested as required by a safety appliance or power brake provision of this part; or

(2) Use, haul, offer in interchange, or accept in interchange any train or passenger equipment, while in service,

(i) That has one or more conditions not in compliance with a provision of this part, other than the safety appliance and power brake provisions of this part, if the railroad has actual knowledge of the facts giving rise to the violation, or a reasonable person acting in the circumstances and exercising reasonable care would have that knowledge; or

(ii) That has not been inspected and tested as required by a provision of this part, other than the safety appliance and power brake provisions of this part, if the railroad has actual knowledge of the facts giving rise to the violation, or a reasonable person acting in the circumstances and exercising reasonable care would have that knowledge; or

49 CFR Ch. II (10–1–04 Edition)

(3) Violate any other provision of this part.

(b) For purposes of this part, passenger equipment will be considered in use prior to departure but after it has received, or should have received, the inspection required under this part for movement and is deemed ready for passenger service.

(c) Although the duties imposed by this part are generally stated in terms of the duty of a railroad, any person as defined in § 238.5, including a contractor for a railroad, who performs any function covered by this part must perform that function in accordance with this part.

§ 238.11 Penalties.

(a) Any person, as defined in § 238.5, who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least \$550 and not more than \$11,000 per violation, except that: Penalties may be assessed against individuals only for willful violations, and, where a grossly negligent violation or a pattern of repeated violations has created an imminent hazard of death or injury to persons, or has caused death or injury, a penalty not to exceed \$27,000 per violation may be assessed. Each day a violation continues shall constitute a separate offense. See appendix A to this part for a statement of agency civil penalty policy.

(b) Any person who knowingly and willfully falsifies a record or report required by this part may be subject to criminal penalties under 49 U.S.C. 21311.

[64 FR 25660, May 12, 1999, as amended at 69 FR 30595, May 28, 2004]

§ 238.13 Preemptive effect.

Under 49 U.S.C. 20106, issuance of the regulations in this part preempts any State law, regulation, or order covering the same subject matter, except an additional or more stringent law, regulation, or order that is necessary to eliminate or reduce an essentially local safety hazard; that is not incompatible with a law, regulation, or order of the United States Government; and that does not unreasonably burden interstate commerce.

§ 238.15 Movement of passenger equipment with power brake defects.

Beginning on January 1, 2002, the following provisions of this section apply to railroads operating Tier I passenger equipment covered by this part. A railroad may request earlier application of these requirements upon written notification to FRA's Associate Administrator for Safety as provided in § 238.1(c) of this part.

(a) *General.* This section contains the requirements for moving passenger equipment with a power brake defect without liability for a civil penalty under this part. Railroads remain liable for the movement of passenger equipment under 49 U.S.C. 20303(c). For purposes of this section, § 238.17, and § 238.503, a "power brake defect" is a condition of a power brake component, or other primary brake component, that does not conform with this part. (Passenger cars and other passenger equipment classified as locomotives under part 229 of this chapter are also covered by the movement restrictions contained in § 229.9 of this chapter for those defective conditions covered by part 229 of this chapter.)

(b) *Limitations on movement of passenger equipment containing a power brake defect at the time a Class I or IA brake test is performed.* Except as provided in paragraph (c) of this section (which addresses brakes that become defective en route after a Class I or IA brake test was performed), a commuter or passenger train that has in its consist passenger equipment containing a power brake defect at the time that a Class I or IA brake test (or, for Tier II trains, the equivalent) is performed may only be moved, without civil penalty liability under this part—

(1) If all of the following conditions are met:

- (i) The train is moved for purposes of repair, without passengers;
- (ii) The applicable operating restrictions in paragraphs (d) and (e) of this section are observed; and
- (iii) The passenger equipment is tagged, or information is recorded, as prescribed in paragraph (c)(2) of this section; or

(2) If the train is moved for purposes of scrapping or sale of the passenger equipment that has the power brake

defect and all of the following conditions are met:

- (i) The train is moved without passengers;
- (ii) The movement is at a speed of 15 mph or less; and
- (iii) The movement conforms with the railroad's air brake or power brake instructions.

(c) *Limitations on movement of passenger equipment in passenger service that becomes defective en route after a Class I or IA brake test.* Passenger equipment hauled or used in service in a commuter or passenger train that develops inoperative or ineffective power brakes or any other power brake defect while en route to another location after receiving a Class I or IA brake test (or, for Tier II trains, the equivalent) may be hauled or used by a railroad for repair, without civil penalty liability under this part, if the applicable operating restrictions set forth in paragraphs (d) and (e) of this section are complied with and all of the following requisites are satisfied:

(1) *En route defect.* At the time of the train's Class I or IA brake test, the passenger equipment in the train was properly equipped with power brakes that comply with this part. The power brakes on the passenger equipment become defective while it is en route to another location.

(2) *Record.* A tag or card is placed on both sides of the defective passenger equipment, or an automated tracking system is provided, with the following information about the defective passenger equipment:

- (i) The reporting mark and car or locomotive number;
- (ii) The name of the inspecting railroad;
- (iii) The name of the inspector;
- (iv) The inspection location and date;
- (v) The nature of each defect;
- (vi) The destination of the equipment where it will be repaired; and
- (vii) The signature, if possible, and job title of the person reporting the defective condition.

(3) *Automated tracking system.* Automated tracking systems used to meet the tagging requirements contained in paragraph (c)(2) of this section may be reviewed and monitored by FRA at any

time to ensure the integrity of the system. FRA's Associate Administrator for Safety may prohibit or revoke a railroad's ability to utilize an automated tracking system in lieu of tagging if FRA finds that the automated tracking system is not properly secure, is inaccessible to FRA or a railroad's employees, or fails to adequately track or monitor the movement of defective equipment. Such a determination will be made in writing and will state the basis for such action.

(4) *Conditional requirement.* In addition, if an en route failure causes power brakes to be cut out or renders the brake inoperative on passenger equipment, the railroad shall:

(i) Determine the percentage of operative power brakes in the train based on the number of brakes known to be cut out or otherwise inoperative, using the formula specified in paragraph (d)(1) of this section;

(ii) Notify the person responsible for the movement of trains of the percent of operative brakes and movement restrictions on the train imposed by paragraph (d) of this section;

(iii) Notify the mechanical department of the failure; and

(iv) Confirm the percentage of operative brakes by a walking inspection at the next location where the railroad reasonably judges that it is safe to do so.

(d) *Operating restrictions based on percent operative power brakes in train.* (1) *Computation of percent operative power brakes.* (i) Except as specified in paragraphs (d)(1)(ii) and (iii) of this section, the percentage of operative power brakes in a train shall be determined by dividing the number of axles in the train with operative power brakes by the total number of axles in the train.

(ii) For trains equipped with only tread brake units (TBUs), the percentage of operative power brakes shall be determined by dividing the number of operative TBUs by the total number of TBUs in the train.

(iii) Each cut-out axle on a locomotive that weighs more than 200,000 pounds shall be counted as two cut-out axles for the purposes of calculating the percentage of operative brakes. Unless otherwise specified by the railroad, the friction braking effort over all

other axles shall be considered uniform.

(iv) The following brake conditions not in compliance with this part do not render power brakes inoperative for purposes of this calculation:

(A) Failure or cutting out of secondary brake systems;

(B) Inoperative or otherwise defective handbrakes or parking brakes;

(C) Piston travel that is in excess of the Class I brake test limits required in § 238.313 but that does not exceed the maximum prescribed limits for considering the brakes to be effective; and

(D) Power brakes overdue for inspection, testing, maintenance, or stenciling under this part.

(2) *All passenger trains developing 50–74 percent operative power brakes.* A passenger train that develops inoperative power brake equipment resulting in at least 50 percent but less than 75 percent operative power brakes may be used only as follows:

(i) The train may be moved in passenger service only to the next forward passenger station;

(ii) The speed of the train shall be restricted to 20 mph or less; and

(iii) After all passengers are discharged, the defective equipment shall be moved to the nearest location where the necessary repairs can be made.

(3) *Commuter, short-distance intercity, and short-distance Tier II passenger trains developing 75–99 percent operative power brakes.* (i) 75–84 percent operative brakes. Commuter, short-distance intercity, and short-distance Tier II passenger trains which develop inoperative power brake equipment resulting in at least 75 percent but less than 85 percent operative brakes may be used only as follows:

(A) The train may be moved in passenger service only to the next forward location where the necessary repairs can be made; however, if the next forward location where the necessary repairs can be made does not have the facilities to handle the safe unloading of passengers, the train may be moved past the repair location in service only to the next forward passenger station in order to facilitate the unloading of passengers; and

(B) The speed of the train shall be restricted to 50 percent of the train's

maximum allowable speed or 40 mph, whichever is less; and

(C) After all passengers are discharged, the defective equipment shall be moved to the nearest location where the necessary repairs can be made.

(ii) *85–99 percent operative brakes.* Commuter, short-distance intercity, and short-distance Tier II passenger trains which develop inoperative power brake equipment resulting in at least 85 percent but less than 100 percent operative brakes may only be used as follows:

(A) The train may be moved in passenger service only to the next forward location where the necessary repairs can be made; however, if the next forward location where the necessary repairs can be made does not have the facilities to handle the safe unloading of passengers, the train may be moved past the repair location in service only to the next forward passenger station in order to facilitate the unloading of passengers; and

(B) After all passengers are discharged, the defective equipment shall be moved to the nearest location where the necessary repairs can be made.

(4) *Long-distance intercity and long-distance Tier II passenger trains developing 75–99 operative power brakes.* (i) *75–84 percent operative brakes.* Long-distance intercity and long-distance Tier II passenger trains which develop inoperative power brake equipment resulting in at least 75 percent but less than 85 percent operative brakes may be used only if all of the following restrictions are observed:

(A) The train may be moved in passenger service only to the next forward repair location identified for repair of that equipment by the railroad operating the equipment in the list required by §238.19(d); however, if the next forward repair location does not have the facilities to handle the safe unloading of passengers, the train may be moved past the designated repair location in service only to the next forward passenger station in order to facilitate the unloading of passengers; and

(B) The speed of the train shall be restricted to 50 percent of the train's maximum allowable speed or 40 mph, whichever is less; and

(C) After all passengers are discharged, the defective equipment shall be moved to the nearest location where the necessary repairs can be made.

(ii) *85–99 percent operative brakes.* Long-distance intercity and long-distance Tier II passenger trains which develop inoperative power brake equipment resulting in at least 85 percent but less than 100 percent operative brakes may be used only if all of the following restrictions are observed:

(A) The train may be moved in passenger service only to the next forward repair location identified for repair of that equipment by the railroad operating the equipment in the list required by §238.19(d); however, if the next forward repair location does not have the facilities to handle the safe unloading of passengers, the train may be moved past the designated repair location in service only to the next forward passenger station in order to facilitate the unloading of passengers; and

(B) After all passengers are discharged, the defective equipment shall be moved to the nearest location where the necessary repairs can be made.

(e) *Operating restrictions on passenger trains with inoperative power brakes on the front or rear unit.* If the power brakes on the front or rear unit in any passenger train are completely inoperative the following shall apply:

(1) If the handbrake is located inside the interior of the car:

(i) A qualified person shall be stationed at the handbrake on the unit;

(ii) The car shall be locked-out and empty except for the railroad employee manning the handbrake; and

(iii) Appropriate speed restrictions shall be placed on the train by a qualified person;

(2) If the handbrake is located outside the interior of the car or is inaccessible to a qualified person:

(i) The car shall be locked-out and empty;

(ii) The speed of the train shall be restricted to 20 mph or less; and

(iii) The car shall be removed from the train or repositioned in the train at the first location where it is possible to do so.

§ 238.17

49 CFR Ch. II (10–1–04 Edition)

(f) *Special Notice for Repair.* Nothing in this section authorizes the movement of passenger equipment subject to a Special Notice for Repair under part 216 of this chapter unless the movement is made in accordance with the restrictions contained in the Special Notice.

[64 FR 25660, May 12, 1999, as amended at 65 FR 41306, July 3, 2000; 67 FR 19990, Apr. 23, 2002]

§ 238.17 Movement of passenger equipment with other than power brake defects.

Beginning on January 1, 2002, the following provisions of this section apply to railroads operating Tier I passenger equipment covered by this part. A railroad may request earlier application of these requirements upon written notification to FRA's Associate Administrator for Safety as provided in § 238.1(c) of this part.

(a) *General.* This section contains the requirements for moving passenger equipment with other than a power brake defect. (Passenger cars and other passenger equipment classified as locomotives under part 229 of this chapter are also covered by the movement restrictions contained in § 229.9 of this chapter for those defective conditions covered by part 229 of this chapter.)

(b) *Limitations on movement of passenger equipment containing defects found at time of calendar day inspection.* Except as provided in §§ 238.303(e)(15), 238.305(c) and (d), and 238.307(c)(1), passenger equipment containing a condition not in conformity with this part at the time of its calendar day mechanical inspection may be moved from that location for repair if all of the following conditions are satisfied:

(1) If the condition involves a running gear defect, the defective equipment is not used in passenger service and is moved in a non-revenue train;

(2) If the condition involves a non-running gear defect, the defective equipment may be used in passenger service in a revenue train provided that a qualified maintenance person determines that it is safe to do so, and if so, the car is locked out and empty, and all movement restrictions are observed except that the car may be occupied by a member of the train crew or a rail-

road employee to the extent necessary to safely operate the train;

(3) The requirements of paragraphs (c)(3) and (c)(4) of this section are met; and

(4) The special requirements of paragraph (e) of this section, if applicable, are met.

(c) *Limitations on movement of passenger equipment that develops defects en route.* Except as provided in §§ 238.303(e)(15), 238.307(c)(1), and 238.503(f), passenger equipment that develops en route to its destination, after its calendar day mechanical inspection is performed and before its next calendar day mechanical inspection is performed, any condition not in compliance with this part, other than a power brake defect, may be moved only if the railroad complies with all of the following requirements or, if applicable, the special requirements in paragraph (e) of this section:

(1) Prior to movement of equipment with a potential running gear defect, a qualified maintenance person shall determine if it is safe to move the equipment in passenger service and, if so, the maximum speed and other restrictions necessary for safely conducting the movement. If appropriate, these determinations may be made based upon a description of the defective condition provided by a crewmember. If the determinations required by this paragraph are made by an off-site qualified maintenance person based on a description of the defective condition by on-site personnel, then a qualified maintenance person shall perform a physical inspection of the defective equipment, at the first location possible, to verify the description of the defect provided by the on-site personnel.

(2) Prior to movement of equipment with a non-running gear defect, a qualified person or a qualified maintenance person shall determine if it is safe to move the equipment in passenger service and, if so, the maximum speed and other restrictions necessary for safely conducting the movement. If appropriate, these determinations may be made based upon a description of the defective condition provided by the on-site personnel.

(3) Prior to movement of any defective equipment, the qualified person or

qualified maintenance person shall notify the crewmember in charge of the movement of the defective equipment, who in turn shall inform all other crewmembers of the presence of the defective condition(s) and the maximum speed and other restrictions determined under paragraph (c)(1) or (c)(2) of this section. The movement shall be made in conformance with such restrictions.

(4) The railroad shall maintain a record of all defects reported and their subsequent repair in the defect tracking system required in § 238.19. In addition, prior to movement of the defective equipment, a tag or card placed on both sides of the defective equipment, or an automated tracking system, shall record the following information about the defective equipment:

- (i) The reporting mark and car or locomotive number;
- (ii) The name of the inspecting railroad;
- (iii) The name of the inspector, inspection location, and date;
- (iv) The nature of each defect;
- (v) Movement restrictions and safety restrictions, if any;
- (vi) The destination of the equipment where it will be repaired; and
- (vii) The signature, if possible, as well as the job title and location of the person making the determinations required by this section.

(5) *Automated tracking system.* Automated tracking systems used to meet the tagging requirements contained in paragraph (c)(4) of this section may be reviewed and monitored by FRA at any time to ensure the integrity of the system. FRA's Associate Administrator for Safety may prohibit or revoke a railroad's ability to utilize an automated tracking system in lieu of tagging if FRA finds that the automated tracking system is not properly secure, is inaccessible to FRA or a railroad's employees, or fails to adequately track or monitor the movement of defective equipment. Such a determination will be made in writing and will state the basis for such action.

(6) After a qualified maintenance person or a qualified person verifies that the defective equipment is safe to remain in service as required in paragraphs (c)(1) and (c)(2) of this section,

the defective equipment that develops a condition not in compliance with this part while en route may continue in passenger service not later than the next calendar day mechanical inspection, if the requirements of this paragraph are otherwise fully met.

(d) *Inspection of roller bearings on equipment involved in a derailment.* (1) A railroad shall not continue passenger equipment in service that has a roller bearing whose truck was involved in a derailment unless the bearing has been inspected and tested in accordance with the railroad's procedures for handling defective equipment.

(2) The roller bearing shall be disassembled from the axle and inspected internally if:

- (i) It shows any external sign of damage;
- (ii) It makes any unusual noise when its wheel set is spun freely (an on-track rolling test is acceptable) or when the bearing is manually rotated;
- (iii) Its truck was involved in a derailment at a speed of more than 10 miles per hour; or
- (iv) Its truck was dragged on the ground for more than 100 feet.

(e) *Special requisites for movement of passenger equipment with safety appliance defects.* Consistent with 49 U.S.C. 20303, passenger equipment with a safety appliance not in compliance with this part or with part 231 of this chapter, if applicable, may be moved—

(1) If necessary to effect repair of the safety appliance;

(2) From the point where the safety appliance defect was first discovered by the railroad to the nearest available location on the railroad where the necessary repairs required to bring the passenger equipment into compliance can be made or, at the option of the receiving railroad, the equipment may be received and hauled for repair to a point on the receiving railroad's line that is no farther than the point on the delivering railroad's line where the repair of the defect could have been made;

(3) If a tag placed on both sides of the passenger equipment or an automated tracking system contains the information required under paragraph (c)(4) of this section; and

§ 238.19

49 CFR Ch. II (10–1–04 Edition)

(4) After notification of the crewmember in charge of the movement of the defective equipment, who in turn shall inform all other crewmembers of the presence of the defective condition(s).

(f) *Special Notice for Repair.* Nothing in this section authorizes the movement of equipment subject to a Special Notice for Repair under part 216 of this chapter unless the movement is made in accordance with the restrictions contained in the Special Notice.

[64 FR 25660, May 12, 1999, as amended at 65 FR 41306, July 3, 2000]

§ 238.19 Reporting and tracking of repairs to defective passenger equipment.

(a) *General.* Beginning on January 1, 2002, each railroad shall have in place a reporting and tracking system for passenger equipment with a defect not in conformance with this part. A railroad may request earlier application of these requirements upon written notification to FRA's Associate Administrator for Safety as provided in § 238.1(c) of this part. The reporting and tracking system shall record the following information:

- (1) The identification number of the defective equipment;
- (2) The date the defect was discovered;
- (3) The nature of the defect;
- (4) The determination made by a qualified person or qualified maintenance person on whether the equipment is safe to run;
- (5) The name of the qualified person or qualified maintenance person making such a determination;
- (6) Any operating restrictions placed on the equipment; and
- (7) Repairs made and the date that they were made.

(b) *Retention of records.* At a minimum, each railroad shall keep the records described in paragraph (a) of this section for one periodic maintenance interval for each specific type of equipment as described in the railroad's inspection, testing, and maintenance plan required by § 238.107. FRA strongly encourages railroads to keep these records for longer periods of time because they form the basis for future reliability-based decisions concerning

test and maintenance intervals that may be developed pursuant to § 238.307(b).

(c) *Availability of records.* Railroads shall make defect reporting and tracking records available to FRA upon request.

(d) *List of power brake repair points.* Railroads operating long-distance intercity and long-distance Tier II passenger equipment shall designate locations, in writing, where repairs to passenger equipment with a power brake defect will be made and shall provide the list to FRA's Associate Administrator for Safety and make it available to FRA for inspection and copying upon request. Railroads operating these trains shall designate a sufficient number of repair locations to ensure the safe and timely repair of passenger equipment. These designations shall not be changed without at least 30 days' advance written notice to FRA's Associate Administrator for Safety.

[64 FR 25660, May 12, 1999, as amended at 65 FR 41306, July 3, 2000]

§ 238.21 Special approval procedure.

(a) *General.* The following procedures govern consideration and action upon requests for special approval of alternative standards under §§ 238.103, 238.223, 238.309, 238.311, 238.405, or 238.427; for approval of alternative compliance under § 238.201; and for special approval of pre-revenue service acceptance testing plans as required by § 238.111. (Requests for approval of programs for the inspection, testing, and maintenance of Tier II passenger equipment are governed by § 238.505.)

(b) *Petitions for special approval of alternative standard.* Each petition for special approval of an alternative standard shall contain—

- (1) The name, title, address, and telephone number of the primary person to be contacted with regard to review of the petition;
- (2) The alternative proposed, in detail, to be substituted for the particular requirements of this part;
- (3) Appropriate data or analysis, or both, establishing that the alternative will provide at least an equivalent level of safety; and

(4) A statement affirming that the railroad has served a copy of the petition on designated representatives of its employees, together with a list of the names and addresses of the persons served.

(c) *Petitions for special approval of alternative compliance.* Each petition for special approval of alternative compliance shall contain—

(1) The name, title, address, and telephone number of the primary person to be contacted with regard to the petition;

(2) The elements prescribed in § 238.201(b); and

(3) A statement affirming that the railroad has served a copy of the petition on designated representatives of its employees, together with a list of the names and addresses of the persons served.

(d) *Petitions for special approval of pre-revenue service acceptance testing plan.*

(1) Each petition for special approval of a pre-revenue service acceptance testing plan shall contain—

(i) The name, title, address, and telephone number of the primary person to be contacted with regard to review of the petition; and

(ii) The elements prescribed in § 238.111.

(2) Three copies of each petition for special approval of the pre-revenue service acceptance testing plan shall be submitted to the Associate Administrator for Safety, Federal Railroad Administration, 1120 Vermont Ave., N.W., Mail Stop 25, Washington, D.C. 20590.

(e) *Federal Register notice.* FRA will publish a notice in the FEDERAL REGISTER concerning each petition under paragraphs (b) and (c) of this section.

(f) *Comment.* Not later than 30 days from the date of publication of the notice in the FEDERAL REGISTER concerning a petition under paragraphs (b) and (c) of this section, any person may comment on the petition.

(1) Each comment shall set forth specifically the basis upon which it is made, and contain a concise statement of the interest of the commenter in the proceeding.

(2) Each comment shall be submitted to the DOT Central Docket Management System, Nassif Building, Room PL-401, 400 Seventh Street, S.W., Wash-

ington, D.C. 20590, and shall contain the assigned docket number for that proceeding. The form of such submission may be in written or electronic form consistent with the standards and requirements established by the Central Docket Management System and posted on its web site at <http://dms.dot.gov>.

(g) *Disposition of petitions.*

(1) FRA will conduct a hearing on a petition in accordance with the procedures provided in § 211.25 of this chapter.

(2) If FRA finds that the petition complies with the requirements of this section or that the proposed plan is acceptable or changes are justified, or both, the petition will be granted, normally within 90 days of its receipt. If the petition is neither granted nor denied within 90 days, the petition remains pending for decision. FRA may attach special conditions to the approval of the petition. Following the approval of a petition, FRA may reopen consideration of the petition for cause stated.

(3) If FRA finds that the petition does not comply with the requirements of this section, or that the proposed plan is not acceptable or that the proposed changes are not justified, or both, the petition will be denied, normally within 90 days of its receipt.

(4) When FRA grants or denies a petition, or reopens consideration of the petition, written notice is sent to the petitioner and other interested parties.

[64 FR 25660, May 12, 1999, as amended at 64 FR 70196, Dec. 16, 1999]

§ 238.23 Information collection.

(a) The information collection requirements of this part were reviewed by the Office of Management and Budget pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et. seq.*) and are assigned OMB control number 2130-0544.

(b) The information collection requirements are found in the following sections: §§ 238.1, 238.7, 238.11, 238.15, 238.17, 238.19, 238.21, 238.103, 238.105, 238.107, 238.109, 238.111, 238.201, 238.203, 238.211, 238.223, 238.231, 238.237, 238.301, 238.303, 238.305, 238.307, 238.309, 238.311, 238.313, 238.315, 238.317, 238.403, 238.405, 238.421, 238.423, 238.427, 238.431, 238.437,

§ 238.101

238.441, 238.445, 238.447, 238.503, 238.505, and 238.603.

Subpart B—Safety Planning and General Requirements

§ 238.101 Scope.

This subpart contains safety planning and general safety requirements for all railroad passenger equipment subject to this part.

§ 238.103 Fire safety.

(a) *Materials.* (1) Materials used in constructing a passenger car or a cab of a locomotive ordered on or after September 8, 2000, or placed in service for the first time on or after September 9, 2002, shall meet the test performance criteria for flammability and smoke emission characteristics as specified in Appendix B to this part, or alternative standards issued or recognized by an expert consensus organization after special approval of FRA under § 238.21.

(2) On or after November 8, 1999, materials introduced in a passenger car or a locomotive cab, as part of any kind of rebuild, refurbishment, or overhaul of the car or cab, shall meet the test performance criteria for flammability and smoke emission characteristics as specified in Appendix B to this part, or alternative standards issued or recognized by an expert consensus organization after special approval of FRA under § 238.21.

(3) For purposes of complying with the requirements of this paragraph, a railroad may rely on the results of tests of material conducted in accordance with the standards and performance criteria for flammability and smoke emission characteristics as specified in Appendix B to this part in effect on July 12, 1999 (*see* 49 CFR parts 200–399, revised as of October 1, 1999), if prior to June 25, 2002 the material is—

(i) Installed in a passenger car or locomotive;

(ii) Held in inventory by the railroad; or

(iii) Ordered by the railroad.

(b) *Certification.* A railroad shall require certification that a representative sample of combustible materials to be—

(1) Used in constructing a passenger car or a locomotive cab, or

49 CFR Ch. II (10–1–04 Edition)

(2) Introduced in a passenger car or a locomotive cab, as part of any kind of rebuild, refurbishment, or overhaul of the car or cab, has been tested by a recognized independent testing laboratory and that the results show the representative sample complies with the requirements of paragraph (a) of this section at the time it was tested.

(c) *Fire safety analysis for procuring new passenger cars and locomotives.* In procuring new passenger cars and locomotives, each railroad shall ensure that fire safety considerations and features in the design of this equipment reduce the risk of personal injury caused by fire to an acceptable level in its operating environment using a formal safety methodology such as MIL-STD-882. To this end, each railroad shall complete a written fire safety analysis for the passenger equipment being procured. In conducting the analysis, the railroad shall—

(1) Identify, analyze, and prioritize the fire hazards inherent in the design of the equipment.

(2) Take effective steps to design the equipment and select materials which help provide sufficient fire resistance to reasonably ensure adequate time to detect a fire and safely evacuate the passengers and crewmembers, if a fire cannot be prevented. Factors to consider include potential ignition sources; the type, quantity, and location of the materials; and availability of rapid and safe egress to the exterior of the equipment under conditions secure from fire, smoke, and other hazards.

(3) Reasonably ensure that a ventilation system in the equipment does not contribute to the lethality of a fire.

(4) Identify in writing any train component that is a risk of initiating fire and which requires overheating protection. An overheating detector shall be installed in any component when the analysis determines that an overheating detector is necessary.

(5) Identify in writing any unoccupied train compartment that contains equipment or material that poses a fire hazard, and analyze the benefit provided by including a fire or smoke detection system in each compartment so identified. A fire or smoke detector shall be installed in any unoccupied

compartment when the analysis determines that such equipment is necessary to ensure sufficient time for the safe evacuation of passengers and crewmembers from the train. For purposes of this section, an unoccupied train compartment means any part of the equipment structure that is not normally occupied during operation of the train, including a closet, baggage compartment, food pantry, etc.

(6) Determine whether any occupied or unoccupied space requires a portable fire extinguisher and, if so, the proper type and size of the fire extinguisher for each location. As required by § 239.101 of this chapter, each passenger car is required to have a minimum of one portable fire extinguisher. If the analysis performed indicates that one or more additional portable fire extinguishers are needed, such shall be installed.

(7) On a case-by-case basis, analyze the benefit provided by including a fixed, automatic fire-suppression system in any unoccupied train compartment that contains equipment or material that poses a fire hazard, and determine the proper type and size of the automatic fire-suppression system for each such location. A fixed, automatic fire-suppression system shall be installed in any unoccupied compartment when the analysis determines that such equipment is practical and necessary to ensure sufficient time for the safe evacuation of passengers and crewmembers from the train.

(8) Explain how safety issues are resolved in the design of the equipment and selection of materials to reduce the risk of each fire hazard.

(9) Describe the analysis and testing necessary to demonstrate that the fire protection approach taken in the design of the equipment and selection of materials meets the fire protection requirements of this part.

(d) *Fire safety analysis for existing passenger cars and locomotives.* (1) Not later than January 10, 2001, each passenger railroad shall complete a preliminary fire safety analysis for each category of existing passenger cars and locomotives and rail service.

(2) Not later than July 10, 2001, each such railroad shall—

(i) Complete a final fire safety analysis for any category of existing passenger cars and locomotives and rail service evaluated during the preliminary fire safety analysis as likely presenting an unacceptable risk of personal injury. In conducting the analysis, the railroad shall consider the extent to which materials comply with the test performance criteria for flammability and smoke emission characteristics as specified in Appendix B to this part or alternative standards approved by FRA under this part.

(ii) Take remedial action to reduce the risk of personal injuries to an acceptable level in any such category, if the railroad finds the risk to be unacceptable. In considering remedial action, a railroad is not required to replace material found not to comply with the test performance criteria for flammability and smoke emission characteristics required by this part, if:

(A) The risk of personal injuries from the material is negligible based on the railroad's operating environment and the material's size, or location, or both; or

(B) The railroad takes alternative action which reduces the risk of personal injuries to an acceptable level.

(3) Not later than July 10, 2003, each such railroad shall—

(i) Complete a final fire safety analysis for all categories of existing passenger cars and locomotives and rail service. In completing this analysis, the railroad shall, as far as practicable, determine the extent to which remaining materials comply with the test performance criteria for flammability and smoke emission characteristics as specified in Appendix B to this part or alternative standards approved by FRA under this part.

(ii) Take remedial action to reduce the risk of personal injuries to an acceptable level in any such category, if the railroad finds the risk to be unacceptable. In considering remedial action, a railroad is not required to replace material found not to comply with the test performance criteria for flammability and smoke emission characteristics required by this part, if:

(A) The risk of personal injuries from the material is negligible based on the railroad's operating environment and the material's size, or location, or both; or

(B) The railroad takes alternative action which reduces the risk of personal injuries to an acceptable level.

(4) Where possible prior to transferring existing passenger cars and locomotives to a new category of rail service, but in no case more than 90 days following such a transfer, the passenger railroad shall complete a new fire safety analysis taking into consideration the change in railroad operations and shall effect prompt action to reduce any identified risk to an acceptable level.

(5) As used in this paragraph, a "category of existing passenger cars and locomotives and rail service" shall be determined by the railroad based on relevant fire safety risks, including available ignition sources, presence or absence of heat/smoke detection systems, known variations from the required material test performance criteria or alternative standards approved by FRA, and availability of rapid and safe egress to the exterior of the vehicle under conditions secure from fire, smoke, and other hazards.

(e) *Inspection, testing, and maintenance.* Each railroad shall develop and adopt written procedures for the inspection, testing, and maintenance of all fire safety systems and fire safety equipment on the passenger equipment it operates. The railroad shall comply with those procedures that it designates as mandatory for the safety of the equipment and its occupants.

[64 FR 25660, May 12, 1999, as amended at 67 FR 42909, June 25, 2002]

§ 238.105 Train electronic hardware and software safety.

The requirements of this section apply to electronic hardware and software used to control or monitor safety functions in passenger equipment ordered on or after September 8, 2000, and such components implemented or materially modified in new or existing passenger equipment on or after September 9, 2002.

(a) The railroad shall develop and maintain a written hardware and soft-

ware safety program to guide the design, development, testing, integration, and verification of software and hardware that controls or monitors equipment safety functions.

(b) The hardware and software safety program shall be based on a formal safety methodology that includes a Failure Modes, Effects, Criticality Analysis (FMECA); verification and validation testing for all hardware and software components and their interfaces; and comprehensive hardware and software integration testing to ensure that the hardware and software system functions as intended.

(c) The hardware and software safety program shall include a description of how the following will be accomplished, achieved, carried out, or implemented to ensure safety and reliability:

(1) The hardware and software design process;

(2) The hardware and software design documentation;

(3) The hardware and software hazard analysis;

(4) Hardware and software safety reviews;

(5) Hardware and software hazard monitoring and tracking;

(6) Hardware and software integration safety testing; and

(7) Demonstration of overall hardware and software system safety as part of the pre-revenue service testing of the equipment.

(d) (1) Hardware and software that controls or monitors a train's primary braking system shall either:

(i) Fail safely by initiating a full service brake application in the event of a hardware or software failure that could impair the ability of the engineer to apply or release the brakes; or

(ii) Access to direct manual control of the primary braking system (both service and emergency braking) shall be provided to the engineer.

(2) Hardware and software that controls or monitors the ability to shut down a train's main power and fuel intake system shall either:

(i) Fail safely by shutting down the main power and cutting off the intake of fuel in the event of a hardware or software failure that could impair the

ability of the train crew to command that electronic function; or

(ii) The ability to shut down the main power and fuel intake by non-electronic means shall be provided to the train crew.

(e) The railroad shall comply with the elements of its hardware and software safety program that affect the safety of the passenger equipment.

[67 FR 19990, Apr. 23, 2002]

§ 238.107 Inspection, testing, and maintenance plan.

(a) *General.* Beginning on January 1, 2002, the following provisions of this section apply to railroads operating Tier I passenger equipment covered by this part. A railroad may request earlier application of these requirements upon written notification to FRA's Associate Administrator for Safety as provided in § 238.1(c).

(b) Each railroad shall develop, and provide to FRA upon request, a detailed inspection, testing, and maintenance plan consistent with the requirements of this part. This plan shall include a detailed description of the following:

- (1) Inspection procedures, intervals, and criteria;
- (2) Test procedures and intervals;
- (3) Scheduled preventive maintenance intervals;
- (4) Maintenance procedures; and
- (5) Special testing equipment or measuring devices required to perform inspections and tests.

(c) The inspection, testing, and maintenance plan required by this section is not intended to address and should not include procedures to address employee working conditions that arise in the course of conducting the inspections, tests, and maintenance set forth in the plan. When requesting a copy of the railroad's plan, FRA does not intend to review any portion of the plan that relates to employee working conditions.

(d) The inspection, testing, and maintenance plan required by this section shall be reviewed by the railroad annually.

[64 FR 25660, May 12, 1999, as amended at 65 FR 41307, July 3, 2000]

§ 238.109 Training, qualification, and designation program.

(a) Beginning on January 1, 2002, each railroad shall have adopted a training, qualification, and designation program for employees and contractors that perform any of the inspections, tests, or maintenance required by this part, and shall have trained such employees and contractors in accordance with the program. A railroad may request earlier application of these requirements upon written notification to FRA's Associate Administrator for Safety as provided in § 238.1(c). For purposes of this section, a "contractor" is defined as a person under contract with the railroad or an employee of a person under contract with the railroad to perform any of the tasks required by this part.

(b) As part of this program, the railroad shall, at a minimum:

(1) Identify the tasks related to the inspection, testing, and maintenance required by this part that must be performed on each type of equipment that the railroad operates;

(2) Develop written procedures for the performance of the tasks identified in paragraph (b)(1) of this section;

(3) Identify the skills and knowledge necessary to perform each task identified in paragraph (b)(1) of this section;

(4) Adopt a training curriculum that includes classroom and "hands-on" lessons designed to impart the skills and knowledge identified as necessary to perform each task identified in paragraph (b)(1) of this section. The training curriculum shall specifically address the Federal regulatory requirements contained in this part that are related to the performance of the tasks identified;

(5) Require all employees and contractors to successfully complete the training course that covers the equipment and tasks for which they are responsible that are required by this part as well as the specific Federal regulatory requirements contained in this part related to equipment and tasks for which they are responsible;

(6) Require all employees and contractors to pass either a written or an oral examination covering the equipment and tasks for which they are responsible that are required by this part

as well as the specific Federal regulatory requirements contained in this part related to equipment and tasks for which they are responsible;

(7) Require all employees and contractors to individually demonstrate “hands-on” capability to successfully perform the tasks required by this part that must be performed as part of their duties on the type equipment to which they are assigned;

(8) Require supervisors to complete the program that covers the employees whom they supervise, including refresher training;

(9) Require supervisors to exercise oversight to ensure that all the identified tasks are performed in accordance with the railroad’s written procedures;

(10) Designate in writing that each employee and contractor has the knowledge and skills necessary to perform the safety-related tasks that are part of his or her job;

(11) Require periodic refresher training, at an interval not to exceed three years, that includes classroom and “hands-on” training, as well as testing; except, employees and contractors that have completed their initial training under this part prior to January 1, 2002, shall not be required to complete their first periodic refresher training until four years after the completion of their initial training, and every three years thereafter;

(12) Add new equipment to the qualification and designation program prior to its introduction to revenue service; and

(13) Maintain records adequate to demonstrate that each employee and contractor performing safety-related tasks on passenger equipment is currently qualified to do so. These records shall be adequate to distinguish the qualifications of the employee or contractor as a qualified person or as a qualified maintenance person.

[64 FR 25660, May 12, 1999, as amended at 65 FR 41307, July 3, 2000; 67 FR 19990, Apr. 23, 2002]

§ 238.111 Pre-revenue service acceptance testing plan.

(a) *Passenger equipment that has previously been used in revenue service in the United States.* For passenger equipment that has previously been used in rev-

enue service in the United States, each railroad shall test the equipment on its system prior to placing such equipment in revenue service for the first time on its railroad to ensure the compatibility of the equipment with the railroad’s operating system (including the track, and signal system). A description of such testing shall be retained by the railroad and made available to FRA for inspection and copying upon request. For purposes of this paragraph, passenger equipment that has previously been used in revenue service in the United States means:

(1) The actual equipment used in such service;

(2) Equipment manufactured identically to that actual equipment; and

(3) Equipment manufactured similarly to that actual equipment with no material differences in safety-critical components or systems.

(b) *Passenger equipment that has not been used in revenue service in the United States.* Before using passenger equipment for the first time on its system that has not been used in revenue service in the United States, each railroad shall:

(1) Prepare a pre-revenue service acceptance testing plan for the equipment which contains the following elements:

(i) An identification of any waivers of FRA or other Federal safety regulations required for the testing or for revenue service operation of the equipment;

(ii) A clear statement of the test objectives. One of the principal test objectives shall be to demonstrate that the equipment meets the safety requirements specified in this part when operated in the environment in which it is to be used;

(iii) A planned schedule for conducting the testing;

(iv) A description of the railroad property or facilities to be used to conduct the testing;

(v) A detailed description of how the testing is to be conducted, including a description of the criteria to be used to evaluate the equipment’s performance;

(vi) A description of how the test results are to be recorded;

(vii) A description of any special instrumentation to be used during the tests;

(viii) A description of the information or data to be obtained;

(ix) A description of how the information or data obtained is to be analyzed or used;

(x) A description of any criteria to be used as safety limits during the testing;

(xi) A description of the criteria to be used to measure or determine the success or failure of the tests. If acceptance is to be based on extrapolation of less than full-level testing results, the analysis to be done to justify the validity of the extrapolation shall be described;

(xii) Quality control procedures to ensure that the inspection, testing, and maintenance procedures are followed;

(xiii) Criteria to be used for the revenue service operation of the equipment; and

(xiv) A description of any testing of the equipment that has previously been performed.

(2) Submit a copy of the plan to FRA at least 30 days prior to testing the equipment and include with that submission notification of the times and places of the pre-revenue service tests to permit FRA observation of such tests. For Tier II passenger equipment, the railroad shall obtain FRA approval of the plan under the procedures specified in §238.21.

(3) Comply with the plan, including fully executing the tests required by the plan.

(4) Document in writing the results of the tests. For Tier II passenger equipment, the railroad shall report the results of the tests to the FRA Associate Administrator for Safety at least 90 days prior to its intended operation of the equipment in revenue service.

(5) Correct any safety deficiencies identified in the design of the equipment or in the inspection, testing, and maintenance procedures, uncovered during the testing. If safety deficiencies cannot be corrected by design changes, the railroad shall impose operational limitations on the revenue service operation of the equipment that are designed to ensure that the

equipment can operate safely. For Tier II passenger equipment, the railroad shall comply with any operational limitations imposed by the FRA Associate Administrator for Safety on the revenue service operation of the equipment for cause stated following FRA review of the results of the test program. This section does not restrict a railroad from petitioning FRA for a waiver of a safety regulation under the procedures specified in part 211 of this chapter.

(6) Make the plan and documentation kept pursuant to that plan available for inspection and copying by FRA upon request.

(7) For Tier II passenger equipment, obtain approval from the FRA Associate Administrator for Safety prior to placing the equipment in revenue service. The Associate Administrator grants such approval upon a showing of the railroad's compliance with the applicable requirements of this part.

(c) If a railroad plans a major upgrade or introduction of new technology on Tier II passenger equipment that has been used in revenue service in the United States and that affects a safety system on such equipment, the railroad shall follow the procedures specified in paragraph (b) of this section prior to placing the equipment in revenue service with such a major upgrade or introduction of new technology.

§238.113 Emergency window exits.

(a) The following requirements apply on or after November 8, 1999—

(1) Each passenger car shall have a minimum of four emergency window exits, either in a staggered configuration where practical or with one exit located in each end of each side of the passenger car. If the passenger car has multiple levels, each main level shall have a minimum of four emergency window exits, either in a staggered configuration where practical or with one exit located in each end of each side on each level.

(2) Each sleeping car, and any similarly designed car having a number of separate compartments intended to be

§ 238.115

occupied by passengers or train crewmembers, shall have at least one emergency window exit in each compartment.

(3) Each emergency window exit shall be designed to permit rapid and easy removal from the inside of the car during an emergency situation without requiring the use of a tool or other implement.

(b) Each emergency window exit in a passenger car, including a sleeper car, ordered on or after September 8, 2000, or placed in service for the first time on or after September 9, 2002, shall have an unobstructed opening with minimum dimensions of 26 inches horizontally by 24 inches vertically. A seat back is not an obstruction if it can be moved away from the window opening without requiring the use of a tool or other implement.

(c) Emergency window exits shall be marked, and instructions provided for their use, as required by § 223.9(d) of this chapter.

[64 25660, May 12, 1999, as amended at 67 FR 19990, Apr. 23, 2002]

§ 238.115 Emergency lighting.

(a) This section applies to each passenger car ordered on or after September 8, 2000, or placed in service for the first time on or after September 9, 2002. This section applies to each level of a multi-level passenger car.

(b) Emergency lighting shall be provided in each passenger car and shall include the following:

(1) A minimum, average illumination level of 1 foot-candle measured at floor level adjacent to each exterior door and each interior door providing access to an exterior door (such as a door opening into a vestibule);

(2) A minimum, average illumination level of 1 foot-candle measured 25 inches above floor level along the center of each aisle and passageway;

(3) A minimum illumination level of 0.1 foot-candle measured 25 inches above floor level at any point along the center of each aisle and passageway; and

(4) A back-up power system capable of:

(i) Operating in all equipment orientations within 45 degrees of vertical;

(ii) Operating after the initial shock of a collision or derailment resulting in the following individually applied accelerations:

(A) Longitudinal: 8g;

(B) Lateral: 4g; and

(C) Vertical: 4g; and

(iii) Operating all emergency lighting for a period of at least 90 minutes without a loss of more than 40% of the minimum illumination levels specified in this paragraph (b).

§ 238.117 Protection against personal injury.

On or after November 8, 1999, all moving parts, high voltage equipment, electrical conductors and switches, and pipes carrying hot fluids or gases on all passenger equipment shall be appropriately equipped with interlocks or guards to minimize the risk of personal injury. This section does not apply to the interior of a private car.

§ 238.119 Rim-stamped straight-plate wheels.

(a)(1) Except as provided in paragraph (a)(2) of this section, on or after November 8, 1999, no railroad shall place or continue in service any vehicle, other than a private car, that is equipped with a rim-stamped straight-plate wheel if a brake shoe acts on the tread of the wheel for the purpose of slowing the vehicle.

(2) A commuter railroad may continue in service a vehicle equipped with a Class A, rim-stamped straight-plate wheel mounted on an inboard-bearing axle until the railroad exhausts its replacement stock of wheels held as of May 12, 1999, provided the railroad does not modify the operation of the vehicle in any way that would result in increased thermal input to the wheel during braking.

(b) A rim-stamped straight-plate wheel shall not be used as a replacement wheel on a private car that operates in a passenger train if a brake shoe acts on the tread of the wheel for the purpose of slowing the car.

(c) The requirements of this section do not apply to a wheel that is periodically tread-braked for a short duration by automatic circuitry for the sole purpose of cleaning the wheel tread surface.

Subpart C—Specific Requirements for Tier I Passenger Equipment

§ 238.201 Scope/alternative compliance.

(a) *Scope.* (1) This subpart contains requirements for railroad passenger equipment operating at speeds not exceeding 125 miles per hour. As stated in § 238.229, all such passenger equipment remains subject to the safety appliance requirements contained in Federal statute at 49 U.S.C. chapter 203 and in FRA regulations at part 231 and § 232.2 of this chapter. Unless otherwise specified, these requirements only apply to passenger equipment ordered on or after September 8, 2000 or placed in service for the first time on or after September 9, 2002.

(2) The structural standards of this subpart (§ 238.203-static end strength; § 238.205-anti-climbing mechanism; § 238.207-link between coupling mechanism and car body; § 238.209-forward-facing end structure of locomotives; § 238.211-collision posts; § 238.213-corner posts; § 238.215-rollover strength; § 238.217-side structure; § 238.219 -truck-to-car-body attachment; and § 238.223-locomotive fuel tanks) do not apply to passenger equipment if used exclusively on a rail line:

(i) With no public highway-rail grade crossings;

(ii) On which no freight operations occur at any time;

(iii) On which only passenger equipment of compatible design is utilized; and

(iv) On which trains operate at speeds not exceeding 79 mph.

(b) *Alternative compliance.* Passenger equipment of special design shall be deemed to comply with this subpart, other than § 238.203, for the service environment in which the petitioner proposes to operate the equipment if the FRA Associate Administrator for Safety determines under paragraph (c) of this section that the equipment provides at least an equivalent level of safety in such environment with respect to the protection of its occupants from serious injury in the case of a derailment or collision. In making a determination under paragraph (c) the Associate Administrator shall consider, as a whole, all of those elements

of casualty prevention or mitigation relevant to the integrity of the equipment that are addressed by the requirements of this subpart.

(c)(1) The Associate Administrator may only make a finding of equivalent safety and compliance with this subpart, other than § 238.203, based upon a submission of data and analysis sufficient to support that determination. The petition shall include:

(i) The information required by § 238.21(c);

(ii) Information, including detailed drawings and materials specifications, sufficient to describe the actual construction of the equipment of special design;

(iii) Engineering analysis sufficient to describe the likely performance of the equipment in derailment and collision scenarios pertinent to the safety requirements for which compliance is required and for which the equipment does not conform to the specific requirements of this subpart; and

(iv) A quantitative risk assessment, incorporating the design information and engineering analysis described in this paragraph, demonstrating that the equipment, as utilized in the service environment for which recognition is sought, presents no greater hazard of serious personal injury than equipment that conforms to the specific requirements of this subpart.

(2) Any petition made under this paragraph is subject to the procedures set forth in § 238.21, and will be disposed of in accordance with § 238.21(g).

[64 25660, May 12, 1999, as amended at 67 FR 19990, Apr. 23, 2002]

§ 238.203 Static end strength.

(a)(1) Except as further specified in this paragraph or in paragraph (d), on or after November 8, 1999 all passenger equipment shall resist a minimum static end load of 800,000 pounds applied on the line of draft without permanent deformation of the body structure.

(2) For a passenger car or a locomotive, the static end strength of unoccupied volumes may be less than 800,000 pounds if:

(i) Energy absorbing structures are used as part of a crash energy management design of the passenger car or locomotive, and

(ii) The passenger car or locomotive resists a minimum static end load of 800,000 pounds applied on the line of draft at the ends of its occupied volume without permanent deformation of the body structure.

(3) For a locomotive placed in service prior to November 8, 1999, as an alternative to resisting a minimum static end load of 800,000 pounds applied on the line of draft without permanent deformation of the body structure, the locomotive shall resist a horizontal load of 1,000,000 pounds applied along the longitudinal center line of the locomotive at a point on the buffer beam construction 12 inches above the center line of draft without permanent deformation of the body structure. The application of this load shall not be distributed over an area greater than 6 inches by 24 inches. The alternative specified in this paragraph is not applicable to a cab car or an MU locomotive.

(4) The requirements of this paragraph do not apply to:

(i) A private car; or

(ii) Unoccupied passenger equipment operating at the rear of a passenger train.

(b) Passenger equipment placed in service before November 8, 1999 is presumed to comply with the requirements of paragraph (a)(1) of this section, unless the railroad operating the equipment has knowledge, or FRA makes a showing, that such passenger equipment was not built to the requirements specified in paragraph (a)(1).

(c) When overloaded in compression, the body structure of passenger equipment shall be designed, to the maximum extent possible, to fail by buckling or crushing, or both, of structural members rather than by fracture of structural members or failure of structural connections.

(d) *Grandfathering of non-compliant equipment for use on a specified rail line or lines.*(1) *Grandfathering approval is equipment and line specific.* Grandfathering approval of non-compliant equipment under this paragraph is limited to usage of the equipment on a particular rail line or lines. Before grandfathered equipment can be used on another rail line, a railroad must file and secure approval of a

grandfathering petition under paragraph (d)(3) of this section.

(2) *Temporary usage of non-compliant equipment.* Any passenger equipment placed in service on a rail line or lines before November 8, 1999 that does not comply with the requirements of paragraph (a)(1) may continue to be operated on that particular line or (those particular lines) if the operator of the equipment files a petition seeking grandfathering approval under paragraph (d)(3) before November 8, 1999. Such usage may continue while the petition is being processed, but in no event later than May 8, 2000, unless the petition is approved.

(3) *Petitions for grandfathering.* Petitions for grandfathering shall include:

(i) The name, title, address, and telephone number of the primary person to be contacted with respect to the petition;

(ii) Information, including detailed drawings and material specifications, sufficient to describe the actual construction of the equipment;

(iii) Engineering analysis sufficient to describe the likely performance of the static end strength of the equipment and the likely performance of the equipment in derailment and collision scenarios pertinent to the equipment's static end strength;

(iv) A description of risk mitigation measures that will be employed in connection with the usage of the equipment on a specified rail line or lines to decrease the likelihood of accidents involving the use of the equipment; and

(v) A quantitative risk assessment, incorporating the design information, engineering analysis, and risk mitigation measures described in this paragraph, demonstrating that the use of the equipment, as utilized in the service environment for which recognition is sought, is in the public interest and is consistent with railroad safety.

(e) *Service.* Three copies of each petition shall be submitted to the Associate Administrator for Safety, Federal Railroad Administration, 1120 Vermont Ave., Mail Stop 25, Washington, DC 20590.

(f) *Federal Register notice.* FRA will publish a notice in the FEDERAL REGISTER concerning each petition under paragraph (d) of this section.

(g) *Comment.* Not later than 30 days from the date of publication of the notice in the FEDERAL REGISTER concerning a petition under paragraph (d) of this section, any person may comment on the petition.

(1) Each comment shall set forth specifically the basis upon which it is made, and contain a concise statement of the interest of the commenter in the proceeding.

(2) Each comment shall be submitted to the DOT Central Docket Management System, Nassif Building, Room PL-401, 400 Seventh Street, SW, Washington, DC 20590, and shall contain the assigned docket number for that proceeding. The form of such submission may be in written or electronic form consistent with the standards and requirements established by the Central Docket Management System and posted on its web site at <http://dms.dot.gov>.

(h) *Disposition of petitions.*(1) If the Administrator finds it necessary or desirable, FRA will conduct a hearing on a petition in accordance with the procedures provided in § 211.25 of this chapter.

(2) If FRA finds that the petition complies with the requirements of this section and that the proposed usage is in the public interest and consistent with railroad safety, the petition will be granted, normally within 90 days of its receipt. If the petition is neither granted nor denied within 90 days, the petition remains pending for decision. FRA may attach special conditions to the approval of the petition. Following the approval of a petition, FRA may reopen consideration of the petition for cause stated.

(3) If FRA finds that the petition does not comply with the requirements of this section or that the proposed usage is not in the public interest and consistent with railroad safety, the petition will be denied, normally within 90 days of its receipt.

(4) When FRA grants or denies a petition, or reopens consideration of the petition, written notice is sent to the petitioner and other interested parties.

[64 FR 25660, May 12, 1999, as amended at 64 FR 70196, Dec. 16, 1999; 67 FR 19991, Apr. 23, 2002]

§ 238.205 Anti-climbing mechanism.

(a) Except as provided in paragraph (b) of this section, all passenger equipment placed in service for the first time on or after September 8, 2000 shall have at both the forward and rear ends an anti-climbing mechanism capable of resisting an upward or downward vertical force of 100,000 pounds without failure. When coupled together in any combination to join two vehicles, AAR Type H and Type F tight-lock couplers satisfy this requirement.

(b) Except for a cab car or an MU locomotive, each locomotive ordered on or after September 8, 2000, or placed in service for the first time on or after September 9, 2002, shall have an anti-climbing mechanism at its forward end capable of resisting both an upward and downward vertical force of 200,000 pounds without failure.

[64 FR 25660, May 12, 1999, as amended at 67 FR 19991, Apr. 23, 2002]

§ 238.207 Link between coupling mechanism and car body.

All passenger equipment placed in service for the first time on or after September 8, 2000 shall have a coupler carrier at each end designed to resist a vertical downward thrust from the coupler shank of 100,000 pounds for any normal horizontal position of the coupler, without permanent deformation. For passenger equipment that is connected by articulated joints that comply with the requirements of § 238.205(a), such passenger equipment also complies with the requirements of this section.

§ 238.209 Forward-facing end structure of locomotives.

The skin covering the forward-facing end of each locomotive shall be:

(a) Equivalent to a ½ inch steel plate with a 25,000 pounds-per-square-inch yield strength—material of a higher yield strength may be used to decrease the required thickness of the material provided at least an equivalent level of strength is maintained;

(b) Designed to inhibit the entry of fluids into the occupied cab area of the equipment; and

§ 238.211

(c) Affixed to the collision posts or other main vertical structural members of the forward end structure so as to add to the strength of the end structure.

(d) As used in this section, the term “skin” does not include forward-facing windows and doors.

§ 238.211 Collision posts.

(a) Except as further specified in this paragraph and paragraphs (b) and (c) of this section—

(1) All passenger equipment placed in service for the first time on or after September 8, 2000 shall have either:

(i) Two full-height collision posts, located at approximately the one-third points laterally, at each end. Each collision post shall have an ultimate longitudinal shear strength of not less than 300,000 pounds at a point even with the top of the underframe member to which it is attached. If reinforcement is used to provide the shear value, the reinforcement shall have full value for a distance of 18 inches up from the underframe connection and then taper to a point approximately 30 inches above the underframe connection; or

(ii) An equivalent end structure that can withstand the sum of forces that each collision post in paragraph (a)(1)(i) of this section is required to withstand. For analysis purposes, the required forces may be assumed to be evenly distributed at the end structure at the underframe joint.

(2) The requirements of this paragraph do not apply to unoccupied passenger equipment operating in a passenger train, or to the rear end of a locomotive if the end is unoccupied by design.

(b) Each locomotive, including a cab car and an MU locomotive, ordered on or after September 8, 2000, or placed in service for the first time on or after September 9, 2002, shall have at its forward end, in lieu of the structural protection described in paragraph (a) of this section, either:

(1) Two forward collision posts, located at approximately the one-third points laterally, each capable of withstanding:

(i) A 500,000-pound longitudinal force at the point even with the top of the

49 CFR Ch. II (10–1–04 Edition)

underframe, without exceeding the ultimate strength of the joint; and

(ii) A 200,000-pound longitudinal force exerted 30 inches above the joint of the post to the underframe, without exceeding the ultimate strength; or

(2) An equivalent end structure that can withstand the sum of the forces that each collision post in paragraph (b)(1)(i) of this section is required to withstand.

(c) The end structure requirements in paragraphs (a) and (b) of this section apply only to the ends of a semi-permanently coupled consist of articulated units, provided that:

(1) The railroad submits to the FRA Associate Administrator for Safety under the procedures specified in § 238.21 a documented engineering analysis establishing that the articulated connection is capable of preventing disengagement and telescoping to the same extent as equipment satisfying the anti-climbing and collision post requirements contained in this subpart; and

(2) FRA finds the analysis persuasive.

[64 FR 25660, May 12, 1999, as amended at 67 FR 19991, Apr. 23, 2002]

§ 238.213 Corner posts.

(a) Each passenger car shall have at each end of the car, placed ahead of the occupied volume, two full-height corner posts capable of resisting:

(1) A horizontal load of 150,000 pounds at the point of attachment to the underframe without failure;

(2) A horizontal load of 20,000 pounds at the point of attachment to the roof structure without failure; and

(3) A horizontal load of 30,000 pounds applied 18 inches above the top of the floor without permanent deformation.

(b) For purposes of this section, the orientation of the applied horizontal loads shall range from longitudinal inward to transverse inward.

§ 238.215 Rollover strength.

(a) Each passenger car shall be designed to rest on its side and be uniformly supported at the top (“roof rail”), the bottom cords (“side sill”) of the side frame, and, if bi-level, the intermediate floor rail. The allowable stress in the structural members of the occupied volumes for this condition

shall be one-half yield or one-half the critical buckling stress, whichever is less. Local yielding to the outer skin of the passenger car is allowed provided that the resulting deformations in no way intrude upon the occupied volume of the car.

(b) Each passenger car shall also be designed to rest on its roof so that any damage in occupied areas is limited to roof sheathing and framing. Other than roof sheathing and framing, the allowable stress in the structural members of the occupied volumes for this condition shall be one-half yield or one-half the critical buckling stress, whichever is less. Deformation to the roof sheathing and framing is allowed to the extent necessary to permit the vehicle to be supported directly on the top chords of the side frames and end frames.

§ 238.217 Side structure.

Each passenger car shall comply with the following:

(a) *Side posts and corner braces.*

(1) For modified girder, semi-monocoque, or truss construction, the sum of the section moduli in inches³—about a longitudinal axis, taken at the weakest horizontal section between the side sill and side plate—of all posts and braces on each side of the car located between the body corner posts shall be not less than 0.30 multiplied by the distance in feet between the centers of end panels.

(2) For modified girder or semi-monocoque construction only, the sum of the section moduli in inches³—about a transverse axis, taken at the weakest horizontal section between the side sill and side plate—of all posts, braces and pier panels, to the extent available, on each side of the car located between body corner posts shall be not less than 0.20 multiplied by the distance in feet between the centers of end panels.

(3) The center of an end panel is the point midway between the center of the body corner post and the center of the adjacent side post.

(4) The minimum section moduli or thicknesses specified in paragraph (a) of this section may be adjusted in proportion to the ratio of the yield strength of the material used to that of mild open-hearth steel for a car whose

structural members are made of a higher strength steel.

(b) *Sheathing.*

(1) Outside sheathing of mild, open-hearth steel when used flat, without reinforcement (other than side posts) in a side frame of modified girder or semi-monocoque construction shall not be less than 1/8 inch nominal thickness. Other metals may be used of a thickness in inverse proportion to their yield strengths.

(2) Outside metal sheathing of less than 1/8 inch thickness may be used only if it is reinforced so as to produce at least an equivalent sectional area at a right angle to reinforcements as that of the flat sheathing specified in paragraph (b)(1) of this section.

(3) When the sheathing used for truss construction serves no load-carrying function, the minimum thickness of that sheathing shall be not less than 40 percent of that specified in paragraph (b)(1) of this section.

§ 238.219 Truck-to-car-body attachment.

Passenger equipment shall have a truck-to-car-body attachment with an ultimate strength sufficient to resist without failure the following individually applied loads: 2g vertically on the mass of the truck; and 250,000 pounds in any horizontal direction on the truck, along with the resulting vertical reaction to this load. For purposes of this section, the mass of the truck includes axles, wheels, bearings, the truck-mounted brake system, suspension system components, and any other component attached to the truck by design.

[67 FR 19991, Apr. 23, 2002]

§ 238.221 Glazing.

(a) Passenger equipment shall comply with the applicable Safety Glazing Standards contained in part 223 of this chapter, if required by that part.

(b) Each exterior window on a locomotive cab and a passenger car shall remain in place when subjected to:

(1) The forces described in part 223 of this chapter; and

(2) The forces due to air pressure differences caused when two trains pass

§ 238.223

at the minimum separation for two adjacent tracks, while traveling in opposite directions, each train traveling at the maximum authorized speed.

§ 238.223 Locomotive fuel tanks.

Locomotive fuel tanks shall comply with either the following or an industry standard providing at least an equivalent level of safety if approved by FRA under § 238.21:

(a) *External fuel tanks.* External locomotive fuel tanks shall comply with the requirements contained in Appendix D to this part.

(b) *Internal fuel tanks.*

(1) Internal locomotive fuel tanks shall be positioned in a manner to reduce the likelihood of accidental penetration from roadway debris or collision.

(2) Internal fuel tank vent systems shall be designed so they do not become a path of fuel loss in any tank orientation due to a locomotive overturning.

(3) Internal fuel tank bulkheads and skin shall, at a minimum, be equivalent to a 5/16-inch thick steel plate with a yield strength of 25,000 pounds per square inch. Material of a higher yield strength may be used to decrease the required thickness of the material provided at least an equivalent level of strength is maintained. Skid plates are not required.

[67 FR 19991, Apr. 23, 2002]

§ 238.225 Electrical system.

All passenger equipment shall comply with the following:

(a) *Conductors.* Conductor sizes shall be selected on the basis of current-carrying capacity, mechanical strength, temperature, flexibility requirements, and maximum allowable voltage drop. Current-carrying capacity shall be derated for grouping and for operating temperature.

(b) *Main battery system.*

(1) The main battery compartment shall be isolated from the cab and passenger seating areas by a non-combustible barrier.

(2) Battery chargers shall be designed to protect against overcharging.

(3) If batteries are of the type to potentially vent explosive gases, the battery compartment shall be adequately

49 CFR Ch. II (10–1–04 Edition)

ventilated to prevent the accumulation of explosive concentrations of these gases.

(c) *Power dissipation resistors.*

(1) Power dissipating resistors shall be adequately ventilated to prevent overheating under worst-case operating conditions as determined by the railroad.

(2) Power dissipation grids shall be designed and installed with sufficient isolation to prevent combustion.

(3) Resistor elements shall be electrically insulated from resistor frames, and the frames shall be electrically insulated from the supports that hold them.

(d) *Electromagnetic interference and compatibility.* (1) The operating railroad shall ensure electromagnetic compatibility of the safety-critical equipment systems with their environment. Electromagnetic compatibility may be achieved through equipment design or changes to the operating environment.

(2) The electronic equipment shall not produce electrical noise that affects the safe performance of train line control and communications or wayside signaling systems.

(3) To contain electromagnetic interference emissions, suppression of transients shall be at the source wherever possible.

(4) All electronic equipment shall be self-protected from damage or improper operation, or both, due to high voltage transients and long-term over-voltage or under-voltage conditions. This includes protection from both power frequency and harmonic effects as well as protection from radio frequency signals into the microwave frequency range.

§ 238.227 Suspension system.

On or after November 8, 1999—

(a) All passenger equipment shall exhibit freedom from hunting oscillations at all operating speeds. If hunting oscillations do occur, a railroad shall immediately take appropriate action to prevent derailment. For purposes of this paragraph, hunting oscillations shall be considered lateral oscillations of trucks that could lead to a dangerous instability.

(b) All passenger equipment intended for service above 110 mph shall demonstrate stable operation during pre-revenue service qualification tests at all operating speeds up to 5 mph in excess of the maximum intended operating speed under worst-case conditions—including component wear—as determined by the operating railroad.

(c) Nothing in this section shall affect the requirements of part 213 of this chapter as they apply to passenger equipment as provided in that part.

§ 238.229 Safety appliances.

Except as provided in this part, all passenger equipment continues to be subject to the safety appliance requirements contained in Federal statute at 49 U.S.C. chapter 203 and in Federal regulations at part 231 and § 232.2 of this chapter.

§ 238.231 Brake system.

Except as otherwise provided in this section, on or after September 9, 1999 the following requirements apply to all passenger equipment and passenger trains.

(a) A passenger train's primary brake system shall be capable of stopping the train with a service application from its maximum authorized operating speed within the signal spacing existing on the track over which the train is operating.

(b) The brake system design of passenger equipment ordered on or after September 8, 2000 or placed in service for the first time on or after September 9, 2002, shall not require an inspector to place himself or herself on, under, or between components of the equipment to observe brake actuation or release.

(c) Passenger equipment shall be provided with an emergency brake application feature that produces an irretrievable stop, using a brake rate consistent with prevailing adhesion, passenger safety, and brake system thermal capacity. An emergency brake application shall be available at any time, and shall be initiated by an unintentional parting of the train.

(d) A passenger train brake system shall respond as intended to signals from a train brake control line or lines. Control lines shall be designed so that failure or breakage of a control line

will cause the brakes to apply or will result in a default to control lines that meet this requirement.

(e) Introduction of alcohol or other chemicals into the air brake system of passenger equipment is prohibited.

(f) The operating railroad shall require that the design and operation of the brake system results in wheels that are free of condemnable cracks.

(g) Disc brakes shall be designed and operated to produce a surface temperature no greater than the safe operating temperature recommended by the disc manufacturer and verified by testing or previous service.

(h) *Hand brakes and parking brakes.* (1) Except for a locomotive that is ordered before September 8, 2000 or placed in service for the first time before September 9, 2002, and except for MU locomotives, all locomotives shall be equipped with a hand or parking brake that can:

(i) Be applied or activated by hand;

(ii) Be released by hand; and

(iii) Hold the loaded unit on the maximum grade anticipated by the operating railroad.

(2) Except for a private car and locomotives addressed in paragraph (h)(1) of this section, all other passenger equipment, including MU locomotives, shall be equipped with a hand brake that meets the requirements for hand brakes contained in part 231 of this chapter and that can:

(i) Be applied or activated by hand;

(ii) Be released by hand; and

(iii) Hold the loaded unit on the maximum grade anticipated by the operating railroad.

(3) The air brake shall not be depended upon to hold equipment standing unattended on a grade (including a locomotive, a car, or a train whether or not a locomotive is attached). When required, a sufficient number of hand brakes shall be applied to hold the train or equipment before the air brakes are released. Any hand brakes applied to hold equipment shall not be released until it is known that the air brake system is properly charged.

(i) Passenger cars shall be equipped with a means to apply the emergency brake that is accessible to passengers and located in the vestibule or passenger compartment. The emergency

§ 238.233

brake shall be clearly identified and marked.

(j) Locomotives ordered after September 8, 2000, or placed in service for the first time after September 9, 2002, that are equipped with blended brakes shall be designed so that:

(1) The blending of friction and dynamic brake to obtain the correct retarding force is automatic;

(2) Loss of power or failure of the dynamic brake does not result in exceeding the allowable stopping distance;

(3) The friction brake alone is adequate to safely stop the train under all operating conditions; and

(4) Operation of the friction brake alone does not result in thermal damage to wheels or disc rotor surface temperatures exceeding the manufacturer's recommendation.

(k) For new designs of braking systems, the design process shall include computer modeling or dynamometer simulation of train braking that shows compliance with paragraphs (f) and (g) of this section over the range of equipment operating speeds. A new simulation is required prior to implementing a change in operating parameters.

(l) Locomotives ordered on or after September 8, 2000 or placed in service for the first time on or after September 9, 2002, shall be equipped with effective air coolers or dryers that provide air to the main reservoir with a dew point at least 10 degrees F. below ambient temperature.

(m) When a passenger train is operated in either direct or graduated release—

(1) all the cars in the train consist shall be set up in the same operating mode or

(2) up to two cars may be operated in direct release mode when the rest of the cars in the train are operated in graduated release mode, provided that the cars operated in direct release mode are hauled at the rear of the train consist.

(n) Before adjusting piston travel or working on brake rigging, the cutout cock in the brake pipe branch must be closed and the air reservoirs must be voided of all compressed air. When cutout cocks are provided in brake cylinder pipes, these cutout cocks may be

closed, and air reservoirs need not be voided of all compressed air.

(o) All passenger trains to which this part applies shall comply with the requirements covering the use of two-way end-of-train devices contained in part 232 of this chapter.

[64 FR 25660, May 12, 1999, as amended at 65 FR 41307, July 3, 2000]

§ 238.233 Interior fittings and surfaces.

(a) Each seat in a passenger car shall—

(1) Be securely fastened to the car body so as to withstand an individually applied acceleration of 4g acting in the lateral direction and 4g acting in the upward vertical direction on the deadweight of the seat or seats, if held in tandem; and

(2) Have an attachment to the car body of an ultimate strength capable of resisting simultaneously:

(i) The longitudinal inertial force of 8g acting on the mass of the seat; and

(ii) The load associated with the impact into the seatback of an unrestrained 95th-percentile adult male initially seated behind the seat, when the floor to which the seat is attached decelerates with a triangular crash pulse having a peak of 8g and a duration of 250 milliseconds.

(b) Overhead storage racks in a passenger car shall provide longitudinal and lateral restraint for stowed articles. Overhead storage racks shall be attached to the car body with sufficient strength to resist loads due to the following individually applied accelerations acting on the mass of the luggage stowed as determined by the railroad:

(1) Longitudinal: 8g;

(2) Vertical: 4g; and

(3) Lateral: 4g.

(c) Other interior fittings within a passenger car shall be attached to the car body with sufficient strength to withstand the following individually applied accelerations acting on the mass of the fitting:

(1) Longitudinal: 8g;

(2) Vertical: 4g; and

(3) Lateral: 4g.

(d) To the extent possible, all interior fittings in a passenger car, except seats, shall be recessed or flush-mounted.

(e) Sharp edges and corners in a locomotive cab and a passenger car shall be either avoided or padded to mitigate the consequences of an impact with such surfaces.

(f) Each seat provided for a crew-member regularly assigned to occupy the cab of a locomotive and each floor-mounted seat in the cab shall be secured to the car body with an attachment having an ultimate strength capable of withstanding the loads due to the following individually applied accelerations acting on the combined mass of the seat and a 95th-percentile adult male occupying it:

- (1) Longitudinal: 8g;
- (2) Lateral: 4g; and
- (3) Vertical: 4g.

(g) If, for purposes of showing compliance with the requirements of this section, the strength of a seat attachment is to be demonstrated through sled testing, the seat structure and seat attachment to the sled that is used in such testing must be representative of the actual seat structure in, and seat attachment to, the rail vehicle subject to the requirements of this section. If the attachment strength of any other interior fitting is to be demonstrated through sled testing, for purposes of showing compliance with the requirements of this section, such testing shall be conducted in a similar manner.

§ 238.235 Doors.

(a) By December 31, 1999, each powered, exterior side door in a vestibule that is partitioned from the passenger compartment of a passenger car shall have a manual override device that is:

- (1) Capable of releasing the door to permit it to be opened without power from inside the car;
- (2) Located adjacent to the door which it controls; and
- (3) Designed and maintained so that a person may readily access and operate the override device from inside the car without requiring the use of a tool or other implement. If the door is dual-leafed, only one of the door leaves is required to respond to the manual override device.

(b) Each passenger car ordered on or after September 8, 2000, or placed in service for the first time on or after September 9, 2002 shall have a minimum

of two exterior side doors, each door providing a minimum clear opening with dimensions of 30 inches horizontally by 74 inches vertically.

NOTE: The Americans with Disabilities Act (ADA) Accessibility Specifications for Transportation Vehicles also contain requirements for doorway clearance (See 49 CFR part 38).

Each powered, exterior side door on each such passenger car shall have a manual override device that is:

- (1) Capable of releasing the door to permit it to be opened without power from both inside and outside the car;
- (2) Located adjacent to the door which it controls; and
- (3) Designed and maintained so that a person may access the override device from both inside and outside the car without requiring the use of a tool or other implement.

(c) A railroad may protect a manual override device used to open a powered, exterior door with a cover or a screen capable of removal without requiring the use of a tool or other implement.

(d) Door exits shall be marked, and instructions provided for their use, as required by § 239.107(a) of this chapter.

[64 FR 25660, May 12, 1999, as amended at 67 FR 19991, Apr. 23, 2002]

§ 238.237 Automated monitoring.

(a) Except as further specified in this paragraph, on or after November 8, 1999 a working alerter or deadman control shall be provided in the controlling locomotive of each passenger train operating in other than cab signal, automatic train control, or automatic train stop territory. If the controlling locomotive is ordered on or after September 8, 2000, or placed into service for the first time on or after September 9, 2002, a working alerter shall be provided.

(b) Alerter or deadman control timing shall be set by the operating railroad taking into consideration maximum train speed and capabilities of the signal system. The railroad shall document the basis for setting alerter or deadman control timing and make this documentation available to FRA upon request.

(c) If the train operator does not respond to the alerter or maintain proper

§ 238.301

contact with the deadman control, it shall initiate a penalty brake application.

(d) The following procedures apply if the alerter or deadman control fails en route and causes the locomotive to be in non-compliance with paragraph (a):

(1)(i) A second person qualified on the signal system and trained to apply the emergency brake shall be stationed in the locomotive cab; or

(ii) The engineer shall be in constant communication with a second crewmember until the train reaches the next terminal.

(2)(i) A tag shall be prominently displayed in the locomotive cab to indicate that the alerter or deadman control is defective, until such device is repaired; and

(ii) When the train reaches its next terminal or the locomotive undergoes its next calendar day inspection, whichever occurs first, the alerter or deadman control shall be repaired or the locomotive shall be removed as the controlling locomotive in the train.

[64 FR 25660, May 12, 1999, as amended at 67 FR 19991, Apr. 23, 2002]

Subpart D—Inspection, Testing, and Maintenance Requirements for Tier I Passenger Equipment

§ 238.301 Scope.

(a) This subpart contains requirements pertaining to the inspection, testing, and maintenance of passenger equipment operating at speeds not exceeding 125 miles per hour. The requirements in this subpart address the inspection, testing, and maintenance of the brake system as well as other mechanical and electrical components covered by this part.

(b) Beginning on January 1, 2002, the requirements contained in this subpart shall apply to railroads operating Tier I passenger equipment covered by this part. A railroad may request earlier application of the requirements contained in this subpart upon written notification to FRA's Associate Administrator for Safety as provided in § 238.1(c).

49 CFR Ch. II (10–1–04 Edition)

(c) Paragraphs (b) and (c) of § 238.309 shall apply beginning September 9, 1999.

[64 FR 25660, May 12, 1999, as amended at 65 FR 41307, July 3, 2000]

§ 238.303 Exterior calendar day mechanical inspection of passenger equipment.

(a) *General.*

(1) Except as provided in paragraph (f) of this section, each passenger car and each unpowered vehicle used in a passenger train shall receive an exterior mechanical inspection at least once each calendar day that the equipment is placed in service.

(2) Except as provided in paragraph (f) of this section, all passenger equipment shall be inspected as required in this section at least once each calendar day that the equipment is placed in service to ensure that the equipment conforms with the requirement contained in paragraph (e)(15) of this section.

(3) If a passenger car is also classified as a locomotive under part 229 of this chapter, the passenger car shall also receive a daily inspection pursuant to the requirements of § 229.21 of this chapter.

(b) Each passenger car and each unpowered vehicle added to a passenger train shall receive an exterior calendar day mechanical inspection in accordance with the following:

(1) Except as provided in paragraph (b)(2) of this section, each passenger car and each unpowered vehicle added to a passenger train shall receive an exterior calendar day mechanical inspection at the time it is added to the train unless notice is provided to the train crew that an exterior mechanical inspection was performed on the car or vehicle on the last day it was used in passenger service. The notice required by this section shall contain the date, time, and location of the last exterior mechanical inspection;

(2) Each express car, freight car, and each unit of intermodal equipment (e.g., RoadRailers®) added to a passenger train shall receive an exterior calendar day mechanical inspection at the time it is added to the train, unless notice is provided to the train crew that an exterior mechanical inspection

was performed on the car within the previous calendar day. The notice required by this section shall contain the date, time, and location of the last exterior mechanical inspection.

(c) The exterior calendar day mechanical inspection shall be performed by a qualified maintenance person.

(d) The exterior calendar day mechanical inspection required by this section shall be conducted to the extent possible without uncoupling the trainset and without placing the equipment over a pit or on an elevated track.

(e) As part of the exterior calendar day mechanical inspection, the railroad shall verify conformity with the following conditions, and nonconformity with any such condition renders the passenger car or unpowered vehicle used in a passenger train defective whenever discovered in service:

(1) Products of combustion are released entirely outside the cab and other compartments.

(2) Each battery container is vented and each battery is kept from gassing excessively.

(3) Each coupler is in the following condition:

(i) Sidewall or pin bearing bosses and the pulling face of the knuckles are not broken or cracked;

(ii) The coupler assembly is equipped with anti-creep protection;

(iii) The coupler carrier is not broken or cracked; and

(iv) The yoke is not broken or cracked.

(4) A device is provided under the lower end of all drawbar pins and articulated connection pins to prevent the pin from falling out of place in case of breakage.

(5) The suspension system, including the spring rigging, is in the following condition:

(i) Protective construction or safety hangers are provided to prevent spring planks, spring seats, or bolsters from dropping to the track structure in event of a hanger or spring failure;

(ii) The top (long) leaf or any of the other three leaves of the elliptical spring is not broken, except when a spring is part of a nest of three or more springs and none of the other springs in

the nest has its top leaf or any of the other three leaves broken;

(iii) The outer coil spring or saddle is not broken;

(iv) The equalizers, hangers, bolts, gibs, or pins are not cracked or broken;

(v) The coil spring is not fully compressed when the car is at rest;

(vi) The shock absorber is not broken or leaking oil or other fluid; and

(vii) Each air bag or other pneumatic suspension system component inflates or deflates, as applicable, correctly and otherwise operates as intended.

(6) Each truck is in the following condition:

(i) Each tie bar is not loose;

(ii) Each motor suspension lug, equalizer, hanger, gib, or pin is not cracked or broken; and

(iii) The truck frame is not broken and is not cracked in a stress area that may affect its structural integrity.

(7) Each side bearing is in the following condition:

(i) Each friction side bearing with springs designed to carry weight does not have more than 25 percent of the springs in any one nest broken;

(ii) Each friction side bearing does not run in contact unless designed to operate in that manner; and

(iii) The maximum clearance of each side bearing does not exceed the manufacturer's recommendation.

(8) Each wheel does not have any of the following conditions:

(i) A single flat spot that is 2½ inches or more in length, or two adjoining spots that are each two or more inches in length;

(ii) A gouge or chip in the flange that is more than 1½ inches in length and ½ inch in width;

(iii) A broken rim, if the tread, measured from the flange at a point ⅝ of an inch above the tread, is less than 3¾ inches in width;

(iv) A shelled-out spot 2½ inches or more in length, or two adjoining spots that are each two or more inches in length;

(v) A seam running lengthwise that is within 3¾ inches of the flange;

(vi) A flange worn to a ⅞ inch thickness or less, gauged at a point ⅜ of an inch above the tread;

(vii) A tread worn hollow ⅝ of an inch or more;

(viii) A flange height of 1½ inches or more measured from the tread to the top of the flange;

(ix) A rim less than 1 inch thick;

(x) Except as provided in paragraph (e)(8)(iii) of this section, a crack or break in the flange, tread, rim, plate, or hub;

(xi) A loose wheel; or

(xii) A weld.

(9) No part or appliance of a passenger coach, except the wheels, is less than 2½ inches above the top of the rail.

(10) Each unguarded, noncurrent-carrying metal part subject to becoming charged is grounded or thoroughly insulated.

(11) Each jumper and cable connection is in the following condition:

(i) Each jumpers and cable connection between coaches, between locomotives, or between a locomotive and a coach is located and guarded in a manner that provides sufficient vertical clearance. Jumpers and cable connections may not hang with one end free;

(ii) The insulation is not broken or badly chafed;

(iii) No plug, receptacle, or terminal is broken; and

(iv) No strand of wire is broken or protruding.

(12) Each door and cover plate guarding high voltage equipment is marked “Danger—High Voltage” or with the word “Danger” and the normal voltage carried by the parts so protected.

(13) Each buffer plate is in place.

(14) Each diaphragm, if any, is in place and properly aligned.

(15) Each secondary braking system is in operating mode and does not have any known defective condition which prevents its proper operation. If the dynamic brakes on a locomotive are found not to be in operating mode or are known to have a defective condition which prevents their proper operation at the time that the exterior mechanical inspection is performed or at any other time while the locomotive is in service, the following requirements shall be met in order to continue the locomotive in service:

(i) MU locomotives equipped with dynamic brakes found not to be in operating mode or containing a defective condition which prevents the proper

operation of the dynamic brakes shall be handled in accordance with the following requirements:

(A) A tag bearing the words “inoperative dynamic brakes” shall be securely displayed in a conspicuous location in the cab of the locomotive and contain the locomotive number, the date and location where the condition was discovered, and the signature of the individual who discovered the condition;

(B) The locomotive engineer shall be informed in writing that the dynamic brakes on the locomotive are inoperative at the location where the locomotive engineer first takes charge of the train; and

(C) The inoperative or defective dynamic brakes shall be repaired or removed from service by or at the locomotive’s next exterior calendar day mechanical inspection.

(ii) Conventional locomotives equipped with dynamic brakes found not to be in operating mode or containing a defective condition which prevents the proper operation of the dynamic brakes shall be handled in accordance with the following:

(A) A tag bearing the words “inoperative dynamic brakes” shall be securely displayed in a conspicuous location in the cab of the locomotive and contain the locomotive number, the date and location where the condition was discovered, and the signature of the person discovering the condition;

(B) The locomotive engineer shall be informed in writing that the dynamic brakes on the locomotive are inoperative at the location where the locomotive engineer first takes charge of the train; and

(C) The inoperative or defective dynamic brakes shall be repaired within 3 calendar days of being found in defective condition or at the locomotive’s next periodic inspection pursuant to § 229.23 of this chapter, whichever occurs first.

(16) All roller bearings do not have any of the following conditions:

(i) A sign of having been overheated as evidenced by discoloration or other telltale sign of overheating, such as damage to the seal or distortion of any bearing component;

(ii) A loose or missing cap screw;

(iii) A broken, missing, or improperly applied cap screw lock; or

(iv) A seal that is loose or damaged or permits leakage of lubricant in clearly formed droplets.

(f) *Exception.* A long-distance inter-city passenger train that misses a scheduled exterior calendar day mechanical inspection due to a delay en route may continue in service to the location where the inspection was scheduled to be performed. At that point, an exterior calendar day mechanical inspection shall be performed prior to returning the equipment to service. This flexibility applies only to the exterior mechanical safety inspections required by this section, and does not relieve the railroad of the responsibility to perform a calendar day inspection on a unit classified as a “locomotive” under part 229 of this chapter as required by § 229.21 of this chapter.

(g) *Records.* A record shall be maintained of each exterior calendar day mechanical inspection performed.

(1) This record may be maintained in writing or electronically provided FRA has access to the record upon request.

(2) The written or electronic record must contain the following information:

(i) The identification number of the unit;

(ii) The place, date, and time of the inspection;

(iii) Any non-complying conditions found; and

(iv) The signature or electronic identification of the inspector.

(3) This record may be part of a single master report covering an entire group of cars and equipment.

(4) This record shall be maintained at the place where the inspection is conducted or at one central location and shall be retained for at least 92 days.

(h) Cars requiring a single car test in accordance with § 238.311 that are being moved in service to a location where the single car test can be performed shall have the single car test completed prior to, or as a part of, the exterior calendar day mechanical inspection.

§ 238.305 Interior calendar day mechanical inspection of passenger cars.

(a) Except as provided in paragraph (d) of this section, each passenger car shall receive an interior mechanical inspection at least once each calendar day that it is placed in service.

(b) The interior calendar day mechanical inspection shall be performed by a qualified person or a qualified maintenance person.

(c) As part of the interior calendar day mechanical inspection, the railroad shall verify conformity with the following conditions, and nonconformity with any such condition renders the car defective whenever discovered in service, except as provided in paragraphs (c)(5) through (c)(10), and paragraph (d) of this section:

(1) All fan openings, exposed gears and pinions, exposed moving parts of mechanisms, pipes carrying hot gases and high-voltage equipment, switches, circuit breakers, contactors, relays, grid resistors, and fuses are installed in non-hazardous locations or equipped with guards to prevent personal injury.

(2) Floors of passageways and compartments are free from oil, water, waste, or any obstruction that creates a slipping, tripping, or fire hazard, and floors are properly treated to provide secure footing.

(3) All D rings, pull handles, or other means to access manual door releases are in place based on a visual inspection.

(4) All emergency equipment, including a fire extinguisher, pry bar, auxiliary portable lighting, and first aid kits, as applicable, are in place.

(5) The words “Emergency Brake Valve” are legibly stenciled or marked near each brake pipe valve or shown on an adjacent badge plate.

(6) All doors and cover plates guarding high voltage equipment are marked “Danger—High Voltage” or with the word “Danger” and the normal voltage carried by the parts so protected.

(7) All safety-related signage is in place and legible.

(8) All trap doors safely operate and securely latch in place in both the up and down position. A non-complying car may continue in passenger service

[64 FR 25660, May 12, 1999, as amended at 65 FR 41307, July 3, 2000]

§ 238.307

49 CFR Ch. II (10–1–04 Edition)

pursuant to paragraph (d) of this section, if the trap door can be secured by locking out the door for which it is used.

(9) All vestibule steps are illuminated. A non-complying car may continue in passenger service pursuant to paragraph (d) of this section, if the car will be used solely in high-platform service.

(10) All end doors and side doors operate safely and as intended. A non-complying car may continue in passenger service pursuant to paragraph (d) of this section, if at least one operative and accessible door is available on each side of the car; and a notice is prominently displayed directly on the defective door indicating that the door is defective.

(d) Any passenger car found not to be in compliance with the requirements contained in paragraphs (c)(5) through (c)(10) of this section at the time of its interior calendar day mechanical inspection may remain in passenger service until the car's next interior calendar day mechanical inspection where it must be repaired or removed from passenger service; provided, all of the specific conditions contained in paragraphs (c)(8) through (c)(10) of this section are met and all of the following requirements are met:

(1) A qualified person or a qualified maintenance person determines that the repairs necessary to bring the car into compliance cannot be performed at the time that the current day's interior mechanical inspection is conducted;

(2) A qualified person or a qualified maintenance person determines that it is safe to move the equipment in passenger service; and

(3) A record is maintained of the non-complying condition with the date and time that the condition was first discovered.

(e) A long-distance intercity passenger train that misses a scheduled calendar day interior mechanical inspection due to a delay en route may continue in service to the location where the inspection was scheduled to be performed. At that point, an interior calendar day mechanical inspection shall be performed prior to returning the equipment to service.

(f) *Records.* A record shall be maintained of each interior calendar day mechanical inspection performed.

(1) This record may be maintained in writing or electronically provided FRA has access to the record upon request.

(2) The written or electronic record must contain the following information:

(i) The identification number of the unit;

(ii) The place, date, and time of the inspection;

(iii) Any non-complying conditions found; and

(iv) The signature or electronic identification of the inspector.

(3) This record may be part of a single master report covering an entire group of cars and equipment.

(4) This record shall be maintained at the place where the inspection is conducted or at one central location and shall be retained for at least 92 days.

[64 FR 25660, May 12, 1999, as amended at 65 FR 41308, July 3, 2000]

§ 238.307 Periodic mechanical inspection of passenger cars and unpowered vehicles used in passenger trains.

(a) *General.*

(1) Railroads shall conduct periodic mechanical inspections of all passenger cars and all unpowered vehicles used in a passenger train as required by this section or as warranted and justified by data developed pursuant to paragraph (a)(2) of this section. A periodic inspection conducted under part 229 of this chapter satisfies the requirement of this section with respect to the features inspected.

(2) A railroad may, upon written notification to FRA's Associate Administrator for Safety, adopt and comply with alternative periodic mechanical inspection intervals for specific components or equipment in lieu of the requirements of this section. Any alternative interval must be based upon a documented reliability assessment conducted under a system safety plan subject to periodic peer audit. (See Appendix E to this part for a discussion of the general principles of reliability-based maintenance programs.) The periodic inspection intervals provided in this section may be changed only

when justified by accumulated, verifiable data that provides a high level of confidence that the component(s) will not fail in a manner resulting in harm to persons. FRA may monitor and review a railroad's implementation and compliance with any alternative interval adopted. FRA's Associate Administrator for Safety may prohibit or revoke a railroad's ability to utilize an alternative inspection interval if FRA determines that the adopted interval is not supported by credible data or does not provide adequate safety assurances. Such a determination will be made in writing and will state the basis for such action.

(b) Each periodic mechanical inspection required by this section shall be performed by a qualified maintenance person.

(c) The periodic mechanical inspection shall specifically include the following interior and exterior mechanical components, which shall be inspected not less frequently than every 184 days. At a minimum, this inspection shall determine that:

(1) Seats and seat attachments are not broken or loose. If a car is found with a seat that is not in compliance with this requirement while being used between periodic mechanical inspections, the equipment may continue to be used in passenger service until the performance of an interior calendar day mechanical inspection pursuant to § 238.305 on the day following the discovery of the defective condition provided the seat is rendered unuseable, a notice is prominently displayed on the seat, and a record is maintained with the date and time that the non-complying condition was discovered.

(2) Luggage racks are not broken or loose.

(3) All beds and bunks are not broken or loose, and all restraints or safety latches and straps are in place and function as intended.

(4) A representative sample of emergency window exits on the railroad's passenger cars properly operate, in accordance with the requirements of § 239.107 of this chapter.

(5) Emergency lighting systems are operational.

(6) With regard to switches:

(i) All hand-operated switches carrying currents with a potential of more than 150 volts that may be operated while under load are covered and are operative from the outside of the cover;

(ii) A means is provided to display whether the switches are open or closed; and

(iii) Switches not designed to be operated safely while under load are legibly marked with the voltage carried and the words "must not be operated under load".

(7) Each coupler is in the following condition:

(i) The distance between the guard arm and the knuckle nose is not more than $5\frac{1}{8}$ inches on standard type couplers (MCB contour 1904), or not more than $5\frac{5}{16}$ inches on D&E couplers;

(ii) The free slack in the coupler or drawbar not absorbed by friction devices or draft gears is not more than $\frac{1}{2}$ inch; and

(iii) The draft gear is not broken, to the extent possible without dropping cover plates.

(8) All trucks are equipped with a device or securing arrangement to prevent the truck and car body from separating in case of derailment.

(9) All center castings on trucks are not cracked or broken, to the extent possible without jacking the car and rolling out the trucks. However, an extensive inspection of all center castings shall be conducted by jacking the equipment and rolling out the trucks at each COT&S cycle provided in § 238.309 for the equipment.

(10) All mechanical systems and components of the equipment are free of all the following general conditions that endanger the safety of the crew, passengers, or equipment:

(i) A continuous accumulation of oil or grease;

(ii) Improper functioning of a component;

(iii) A crack, break, excessive wear, structural defect, or weakness of a component;

(iv) A leak;

(v) Use of a component or system under a condition that exceeds that for which the component or system is designed to operate; and

(vi) Insecure attachment of a component.

§ 238.309

49 CFR Ch. II (10–1–04 Edition)

(11) All of the items identified in the exterior calendar day mechanical inspection contained at § 238.303 are in conformity with the conditions prescribed in that section.

(12) All of the items identified in the interior calendar day mechanical inspection contained at § 238.305 are in conformity with the conditions prescribed in that section.

(d) The periodic mechanical inspection shall specifically include the manual door releases, which shall be inspected not less frequently than every 368 days. At a minimum, this inspection shall determine that all manual door releases operate as intended.

(e) *Records.* (1) A record shall be maintained of each periodic mechanical inspection required to be performed by this section. This record may be maintained in writing or electronically, provided FRA has access to the record upon request. The record shall be maintained either in the railroad's files, the cab of the locomotive, or a designated location in the passenger car. The record shall be retained until the next periodic mechanical inspection of the same type is performed and shall contain the following information:

- (i) The date of the inspection;
- (ii) The location where the inspection was performed;
- (iii) The signature or electronic identification of the inspector; and
- (iv) The signature or electronic identification of the inspector's supervisor.

(2) Detailed documentation of any reliability assessments depended upon for implementing an alternative inspection interval under paragraph (a)(2) of this section, including underlying data, shall be retained during the period that the alternative inspection interval is in effect. Data documenting inspections, tests, component replacement and renewals, and failures shall be retained for not less than three (3) inspection intervals.

(f) Nonconformity with any of the conditions set forth in this section renders the car or vehicle defective whenever discovered in service.

[64 FR 25660, May 12, 1999, as amended at 65 FR 41308, July 3, 2000]

§ 238.309 Periodic brake equipment maintenance.

(a) *General.* (1) This section contains the minimum intervals at which the brake equipment on various types of passenger equipment shall be periodically cleaned, repaired, and tested. This maintenance procedure requires that all of the equipment's brake system pneumatic components that contain moving parts and are sealed against air leaks be removed from the equipment, disassembled, cleaned, and lubricated and that the parts that can deteriorate with age be replaced.

(2) A railroad may petition FRA's Associate Administrator for Safety to approve alternative maintenance procedures providing equivalent safety, in lieu of the requirements of this section. The petition shall be filed as provided in § 238.21.

(b) *MU locomotives.* The brake equipment of each MU locomotive shall be cleaned, repaired, and tested at intervals in accordance with the following schedule:

(1) Every 736 days if the MU locomotive is part of a fleet that is not 100 percent equipped with air dryers;

(2) Every 1,104 days if the MU locomotive is part of a fleet that is 100 percent equipped with air dryers and is equipped with PS-68, 26-C, 26-L, PS-90, CS-1, RT-2, RT-5A, GRB-1, CS-2, or 26-R brake systems. (This listing of brake system types is intended to subsume all brake systems using 26 type, ABD, or ABDW control valves and PS68, PS-90, 26B-1, 26C, 26CE, 26-B1, 30CDW, or 30ECDW engineer's brake valves.); and

(3) Every 736 days for all other MU locomotives.

(c) *Conventional locomotives.* The brake equipment of each conventional locomotive shall be cleaned, repaired, and tested at intervals in accordance with the following schedule:

(1) Every 1,104 days for a locomotive equipped with a 26-L or equivalent brake system; and

(2) Every 736 days for a locomotive equipped with other than a 26-L or equivalent brake system.

(d) *Passenger coaches and other unpowered vehicles.* The brake equipment on each passenger coach and each unpowered vehicle used in a passenger train shall be cleaned, repaired, and

tested at intervals in accordance with following schedule:

(1) Every 2,208 days for a coach or vehicle equipped with an AB-type brake system.

(2) Every 1,476 days for a coach or vehicle equipped with a 26-C or equivalent brake system; and

(3) Every 1,104 days for a coach or vehicle equipped with other than an AB, ABD, ABDX, 26-C, or equivalent brake system.

(e) *Cab cars.* The brake equipment of each cab car shall be cleaned, repaired, and tested at intervals in accordance with the following schedule:

(1) Every 1,476 days for that portion of the cab car brake system using brake valves that are identical to the passenger coach 26-C brake system;

(2) Every 1,104 days for that portion of the cab car brake system using brake valves that are identical to the locomotive 26-L brake system; and

(3) Every 736 days for all other types of cab car brake valves.

(f) *Records of periodic maintenance.*

(1) The date and place of the cleaning, repairing, and testing required by this section shall be recorded on Form FRA 6180-49A or a similar form developed by the railroad containing the same information, and the person performing the work and that person's supervisor shall sign the form, if possible. Alternatively, the railroad may stencil the vehicle with the date and place of the cleaning, repairing, and testing and maintain an electronic record of the person performing the work and that person's supervisor.

(2) A record of the parts of the air brake system that are cleaned, repaired, and tested shall be kept in the railroad's files, the cab of the locomotive, or a designated location in the passenger car until the next such periodic test is performed.

[64 FR 25660, May 12, 1999, as amended at 65 FR 41309, July 3, 2000]

§238.311 Single car test.

(a) Except for self-propelled passenger cars, single car tests of all passenger cars and all unpowered vehicles used in passenger trains shall be performed in accordance with either APTA Standard SS-M-005-98, "Code of Tests for Passenger Car Equipment

Using Single Car Testing Device," published March, 1998; or an alternative procedure approved by FRA pursuant to §238.21. The incorporation by reference of this APTA standard was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. You may obtain a copy of the incorporated document from the American Public Transit Association, 1201 New York Avenue, NW., Washington, DC 20005. You may inspect a copy of the document at the Federal Railroad Administration, Docket Clerk, 1120 Vermont Avenue, NW., Suite 7000, Washington, DC or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

(b) Each single car test required by this section shall be performed by a qualified maintenance person.

(c) A railroad shall perform a single car test of the brake system of a car or vehicle described in paragraph (a) of this section if the car or vehicle is found with one or more of the following wheel defects:

- (1) Built-up tread;
- (2) Slid flat wheel;
- (3) Thermal crack;
- (4) Overheated wheel; or
- (5) Shelling.

(d) A railroad need not perform the single car test required in paragraph (c) of this section, if the railroad can establish that the wheel defect is other than built-up tread and is due to a cause other than a defective brake system on the car.

(e) Except as provided in paragraph (f) of this section, a railroad shall perform a single car test of the brake system of a car or vehicle described in paragraph (a) of this section when:

(1) Except for private cars, a car or vehicle is placed in service after having been out of service for 30 days or more; or

(2) One or more of the following conventional air brake equipment items is removed, repaired, or replaced:

- (i) Relay valve;
- (ii) Service portion;
- (iii) Emergency portion; or

§ 238.313

49 CFR Ch. II (10–1–04 Edition)

(iv) Pipe bracket.

(f) *Exception.* If the single car test cannot be made at the point where repairs are made, the car may be moved in passenger service to the next forward location where the test can be made. A railroad may move a car in this fashion only after visually verifying an application and release of the brakes on both sides of the car that was repaired, and provided that the car is appropriately tagged to indicate the need to perform a single car test. The single car test shall be completed prior to, or as a part of, the car's next calendar day mechanical inspection.

(g) If one or more of the following conventional air brake equipment items is removed, repaired, or replaced only that portion which is renewed or replaced must be tested to satisfy the provisions of this section:

- (1) Brake reservoir;
- (2) Brake cylinder;
- (3) Piston assembly;
- (4) Vent valve;
- (5) Quick service valve;
- (6) Brake cylinder release valve;
- (7) Modulating valve or slack adjuster; or
- (8) Angle cock or cutout cock.

[64 FR 25660, May 12, 1999, as amended at 65 FR 41309, July 3, 2000]

§ 238.313 Class I brake test.

(a) Each commuter and short-distance intercity passenger train shall receive a Class I brake test once each calendar day that the train is placed or continues in passenger service.

(b) Except as provided in paragraph (i) of this section, each long-distance intercity passenger train shall receive a Class I brake test:

(1) Prior to the train's departure from an originating terminal; and

(2) Every 1,500 miles or once each additional calendar day, whichever occurs first, that the train remains in continuous passenger service.

(c) Each passenger car and each unpowered vehicle added to a passenger train shall receive a Class I or Class IA brake test at the time it is added to the train unless notice is provided to the train crew that a Class I brake test was performed on the car within the previous calendar day and the car has not been disconnected from a source of

compressed air for more than four hours prior to being added to the train. The notice required by this section shall contain the date, time, and location of the last Class I brake test.

(d) Each Class I brake test shall be performed by a qualified maintenance person.

(e) Each Class I brake test may be performed either separately or in conjunction with the exterior calendar day mechanical inspection required under § 238.303.

(f) Except as provided in § 238.15(b), a railroad shall not use or haul a passenger train in passenger service from a location where a Class I brake test has been performed, or was required by this part to have been performed, with less than 100 percent operative brakes.

(g) A Class I brake test shall be performed at the air pressure at which the train's air brakes will be operated, but not less than 90 psi, and shall be made to determine and ensure that:

(1) The friction brakes apply and remain applied on each car in the train until a release of the brakes has been initiated on each car in response to train line electric, pneumatic, or other signals. This test shall include a verification that each side of each car's brake system responds properly to application and release signals;

(2) The brake shoes or pads are firmly seated against the wheel or disc with the brakes applied;

(3) Piston travel is within prescribed limits, either by direct observation, observation of an actuator, or in the case of tread brakes by determining that the brake shoe provides pressure to the wheel. For vehicles equipped with 8½-inch or 10-inch diameter brake cylinders, piston travel shall be within 7 to 9 inches. If piston travel is found to be less than 7 inches or more than 9 inches, it must be adjusted to nominally 7½ inches. Proper release of the brakes can be determined by observation of the clearance between the brake shoe and the wheel or between the brake pad and the brake disc.

(4) The communicating signal system is tested and known to be operating as intended; a tested and operating two-way radio system meets this requirement;

(5) Each brake shoe or pad is securely fastened and correctly aligned in relation to the wheel or to the disc;

(6) The engineer's brake valve or controller will cause the proper train line commands for each position or brake level setting;

(7) Brake pipe leakage does not exceed 5 pounds per square inch per minute if leakage will affect service performance;

(8) The emergency brake application and deadman pedal or other emergency control devices function as intended;

(9) Each brake shoe or pad is not below the minimum thickness established by the railroad. This thickness shall not be less than the minimum thickness necessary to safely travel the maximum distance allowed between Class I brake tests;

(10) Each angle cock and cutout cock is properly positioned;

(11) The brake rigging or the system mounted on the car for the transmission of the braking force operates as intended and does not bind or foul so as to impede the force delivered to a brake shoe, impede the release of a brake shoe, or otherwise adversely affect the operation of the brake system;

(12) If the train is equipped with electropneumatic brakes, an electropneumatic application of the brakes is made and the train is walked to determine that the brakes on each car in the train properly apply;

(13) Each brake disc is free of any crack in accordance with the manufacturer's specifications or, if no specifications exist, free of any crack to the extent that the design permits;

(14) If the equipment is provided with a brake indicator, the brake indicator operates as intended; and

(15) The communication of brake pipe pressure changes at the rear of the train is verified, which may be accomplished by observation of an application and release of the brakes on the last car in the train.

(h) *Records.* A record shall be maintained of each Class I brake test performed.

(1) This record may be maintained in writing or electronically, provided FRA has access to the record upon request.

(2) The written or electronic record must contain the following information:

(i) The date and time that the Class I brake test was performed;

(ii) The location where the test was performed;

(iii) The identification number of the controlling locomotive of the train;

(iv) The total number of cars inspected during the test; and

(v) The signature or electronic identification of the inspector.

(3) This record shall be maintained at the place where the inspection is conducted or at one central location and shall be retained for at least 92 days.

(i) A long-distance, intercity passenger train that misses a scheduled calendar day Class I brake test due to a delay en route may proceed to the point where the Class I brake test was scheduled to be performed. A Class I brake test shall be completed at that point prior to placing the train back in service.

[64 FR 25660, May 12, 1999, as amended at 65 FR 41309, July 3, 2000]

§ 238.315 Class IA brake test.

(a) Except as provided in paragraph (b) of this section, either a Class I or a Class IA brake test shall be performed:

(1) Prior to the first morning departure of each commuter or short-distance intercity passenger train, unless all of the following conditions are satisfied:

(i) A Class I brake test was performed within the previous twelve (12) hours;

(ii) The train has not been used in passenger service since the performance of the Class I brake test; and

(iii) The train has not been disconnected from a source of compressed air for more than four hours since the performance of the Class I brake test; and

(2) Prior to placing a train in service that has been off a source of compressed air for more than four hours.

(b) A commuter or short-distance intercity passenger train that provides continuing late night service that began prior to midnight may complete its daily operating cycle after midnight without performing another Class I or Class IA brake test. A Class

§ 238.317

I or Class IA brake test shall be performed on such a train before it starts a new daily operating cycle.

(c) A Class IA brake test may be performed at a shop or yard site and is not required to be repeated at the first passenger terminal if the train remains on a source of compressed air and:

(1) The train remains in the custody of the train crew; or

(2) The train crew receives notice that the Class IA brake test has been performed.

(d) The Class IA brake test shall be performed by either a qualified person or a qualified maintenance person.

(e) Except as provided in § 238.15(b), a railroad shall not use or haul a passenger train in passenger service from a location where a Class IA brake test has been performed, or was required by this part to have been performed, with less than 100 percent operative brakes.

(f) A Class IA brake test shall be performed at the air pressure at which the train's air brakes will be operated and shall determine and ensure that:

(1) Brake pipe leakage does not exceed 5 pounds per square inch per minute if brake pipe leakage will affect service performance;

(2) Each brake sets and releases by inspecting in the manner described in paragraph (g) of this section;

(3) For MU locomotives that utilize an electric signal to communicate a service brake application and only a pneumatic signal to propagate an emergency brake application, the emergency brake application functions as intended.

(4) Each angle cock and cutout cock is properly set;

(5) The communication of brake pipe pressure changes at the rear of the train is verified, which may be accomplished by observation of an application and release of the brakes on the last car in the train; and

(6) The communicating signal system is tested and known to be operating as intended; a tested and operating two-way radio system meets this requirement.

(g) In determining whether each brake sets and releases—

(1) The inspection of the set and release of the brakes shall be completed by walking the train to directly ob-

49 CFR Ch. II (10–1–04 Edition)

serve the set and release of each brake, if the railroad determines that such a procedure is safe.

(2) If the railroad determines that operating conditions pose a safety hazard to an inspector walking the brakes, brake indicators may be used to verify the set and release on cars so equipped. However, the observation of the brake indicators shall not be made from the cab of the locomotive. The inspector shall walk the train in order to position himself or herself to accurately observe each indicator.

[64 FR 25660, May 12, 1999, as amended at 65 FR 41310, July 3, 2000; 67 FR 19991, Apr. 23, 2002]

§ 238.317 Class II brake test.

(a) A Class II brake test shall be performed on a passenger train when any of the following events occurs:

(1) Whenever the control stand used to control the train is changed; except if the control stand is changed to facilitate the movement of a passenger train from one track to another within a terminal complex while not in passenger service. In these circumstances, a Class II brake test shall be performed prior to the train's departure from the terminal complex with passengers;

(2) Prior to the first morning departure of each commuter or short-distance intercity passenger train where a Class I brake test remains valid as provided in § 238.315(a)(1);

(3) When previously tested units (i.e., cars that received a Class I brake test within the previous calendar day and have not been disconnected from a source of compressed air for more than four hours) are added to the train;

(4) When cars or equipment are removed from the train; and

(5) When an operator first takes charge of the train, except for face-to-face relief.

(b) A Class II brake test shall be performed by a qualified person or a qualified maintenance person.

(c) Except as provided in § 238.15, a railroad shall not use or haul a passenger train in passenger service from a terminal or yard where a Class II brake test has been performed, or was required by this part to have been performed, with any of the brakes cut-out, inoperative, or defective.

(d) In performing a Class II brake test on a train, a railroad shall determine that:

(1) The brakes on the rear unit of the train apply and release in response to a signal from the engineer's brake valve or controller of the leading or controlling unit, or a gauge or similar device located at the rear of the train or in the cab of the rear unit indicates that brake pipe pressure changes are properly communicated at the rear of the train;

(2) For MU locomotives that utilize an electric signal to communicate a service brake application and only a pneumatic signal to propagate an emergency brake application, the emergency brake application functions as intended.

(3) The communicating signal system is tested and known to be operating as intended; a tested and operating two-way radio system meets this requirement.

[64 FR 25660, May 12, 1999, as amended at 65 FR 41310, July 3, 2000; 67 FR 19991, Apr. 23, 2002]

§ 238.319 Running brake test.

(a) As soon as conditions safely permit, a running brake test shall be performed on each passenger train after the train has received, or was required under this part to have received, either a Class I, Class IA, or Class II brake test.

(b) A running brake test shall be performed whenever the control stand used to control the train is changed to facilitate the movement of a passenger train from one track to another within a terminal complex while not in passenger service.

(c) The running brake test shall be conducted in accordance with the railroad's established operating rules, and shall be made by applying brakes in a manner that allows the engineer to ascertain whether the brakes are operating properly.

(d) If the engineer determines that the brakes are not operating properly, the engineer shall stop the train and follow the procedures provided in § 238.15.

Subpart E—Specific Requirements for Tier II Passenger Equipment

§ 238.401 Scope.

This subpart contains specific requirements for railroad passenger equipment operating at speeds exceeding 125 mph but not exceeding 150 mph. The requirements of this subpart apply beginning on September 9, 1999. As stated in § 238.433(b), all such passenger equipment remains subject to the requirements concerning couplers and uncoupling devices contained in Federal statute at 49 U.S.C. chapter 203 and in FRA regulations at part 231 and § 232.2 of this chapter.

§ 238.403 Crash energy management.

(a) Each power car and trailer car shall be designed with a crash energy management system to dissipate kinetic energy during a collision. The crash energy management system shall provide a controlled deformation and collapse of designated sections within the unoccupied volumes to absorb collision energy and to reduce the decelerations on passengers and crewmembers resulting from dynamic forces transmitted to occupied volumes.

(b) The design of each unit shall consist of an occupied volume located between two normally unoccupied volumes. Where practical, sections within the unoccupied volumes shall be designed to be structurally weaker than the occupied volume. During a collision, the designated sections within the unoccupied volumes shall start to deform and eventually collapse in a controlled fashion to dissipate energy before any structural damage occurs to the occupied volume.

(c) At a minimum, each Tier II passenger train shall be designed to meet the following requirements:

(1) Thirteen megajoules (MJ) shall be absorbed at each end of the train through the controlled crushing of unoccupied volumes, and of this amount a minimum of 5 MJ shall be absorbed ahead of the operator's cab in each power car;

(2) A minimum of an additional 3 MJ shall be absorbed by the power car structure between the operator's cab and the first trailer car; and

§ 238.405

(3) The end of the first trailer car adjacent to each power car shall absorb a minimum of 5 MJ through controlled crushing.

(d) For a 30-mph collision of a Tier II passenger train on tangent, level track with an identical stationary train:

(1) When seated anywhere in a trailer car, the velocity at which a 50th-percentile adult male contacts the seat back ahead of him shall not exceed 25 mph; and

(2) The deceleration of the occupied volumes of each trailer car shall not exceed 8g. For the purpose of demonstrating compliance with this paragraph, deceleration measurements may be processed through a low-pass filter having a bandwidth of 50 Hz.

(e) Compliance with paragraphs (a) through (d) of this section shall be demonstrated by analysis using a dynamic collision computer model. For the purpose of demonstrating compliance, the following assumptions shall be made:

(1) The train remains upright, in line, and with all wheels on the track throughout the collision; and

(2) Resistance to structural crushing follows the force-versus-displacement relationship determined during the structural analysis required as part of the design of the train.

(f) Passenger seating shall not be permitted in the leading unit of a Tier II passenger train.

§ 238.405 Longitudinal static compressive strength.

(a) To form an effective crash refuge for crewmembers occupying the cab of a power car, the underframe of the cab of a power car shall resist a minimum longitudinal static compressive force of 2,100,000 pounds without permanent deformation to the cab, unless equivalent protection to crewmembers is provided under an alternate design approach, validated through analysis and testing, and approved by FRA under the provisions of § 238.21.

(b) The underframe of the occupied volume of each trailer car shall resist a minimum longitudinal static compressive force of 800,000 pounds without permanent deformation to the car. To demonstrate compliance with this requirement, the 800,000-pound load shall

49 CFR Ch. II (10–1–04 Edition)

be applied to the underframe of the occupied volume as it would be transmitted to the underframe by the full structure of the vehicle.

(c) Unoccupied volumes of a power car or a trailer car designed to crush as part of the crash energy management design are not subject to the requirements of this section.

§ 238.407 Anti-climbing mechanism.

(a) Each power car shall have an anti-climbing mechanism at its forward end capable of resisting an ultimate upward or downward static vertical force of 200,000 pounds. A power car constructed with a crash energy management design is permitted to crush in a controlled manner before the anti-climbing mechanism fully engages.

(b) Interior train coupling points between units, including between units of articulated cars or other permanently joined units of cars, shall have an anti-climbing mechanism capable of resisting an upward or downward vertical force of 100,000 pounds without yielding.

(c) The forward coupler of a power car shall be attached to the car body to resist a vertical downward force of 100,000 pounds for any horizontal position of the coupler without yielding.

§ 238.409 Forward end structures of power car cabs.

This section contains requirements for the forward end structure of the cab of a power car. (A conceptual implementation of this end structure is provided in Figure 1 to this subpart.)

(a) *Center collision post.* The forward end structure shall have a full-height center collision post, or its structural equivalent, capable of withstanding the following:

(1) A shear load of 500,000 pounds at its joint with the underframe without exceeding the ultimate strength of the joint;

(2) A shear load of 150,000 pounds at its joint with the roof without exceeding the ultimate strength of the joint; and

(3) A horizontal, longitudinal force of 300,000 pounds, applied at a point on

level with the bottom of the windshield, without exceeding its ultimate strength.

(b) *Side collision posts.* The forward end structure shall have two side collision posts, or their structural equivalent, located at approximately the one-third points laterally, each capable of withstanding the following:

(1) A shear load of 500,000 pounds at its joint with the underframe without exceeding the ultimate strength of the joint; and

(2) A horizontal, longitudinal force of 300,000 pounds, applied at a point on level with the bottom of the windshield, without exceeding its ultimate strength.

(c) *Corner posts.* The forward end structure shall have two full-height corner posts, or their structural equivalent, each capable of withstanding the following:

(1) A horizontal, longitudinal or lateral shear load of 300,000 pounds at its joint with the underframe, without exceeding the ultimate strength of the joint;

(2) A horizontal, lateral force of 100,000 pounds applied at a point 30 inches up from the underframe attachment, without exceeding the yield or the critical buckling stress; and

(3) A horizontal, longitudinal or lateral shear load of 80,000 pounds at its joint with the roof, without exceeding the ultimate strength of the joint.

(d) *Skin.* The skin covering the forward-facing end of each power car shall be:

(1) Equivalent to a ½-inch steel plate with a 25,000 pounds-per-square-inch yield strength—material of a higher yield strength may be used to decrease the required thickness of the material provided at least an equivalent level of strength is maintained;

(2) Securely attached to the end structure; and

(3) Sealed to prevent the entry of fluids into the occupied cab area of the equipment. As used in paragraph (d), the term “skin” does not include forward-facing windows and doors.

§ 238.411 Rear end structures of power car cabs.

The rear end structure of the cab of a power car shall be designed to include

the following elements, or their structural equivalent. (A conceptual implementation of this end structure is provided in Figure 2 to this subpart.)

(a) *Corner posts.* The rear end structure shall have two full-height corner posts, or their structural equivalent, each capable of withstanding the following:

(1) A horizontal, longitudinal or lateral shear load of 300,000 pounds at its joint with the underframe without exceeding the ultimate strength of the joint; and

(2) A horizontal, longitudinal or lateral shear load of 80,000 pounds at its joint with the roof without exceeding the ultimate strength of the joint.

(b) *Collision posts.* The rear end structure shall have two full-height collision posts, or their structural equivalent, each capable of withstanding the following:

(1) A horizontal, longitudinal shear load of 500,000 pounds at its joint with the underframe without exceeding the ultimate strength of the joint; and

(2) A horizontal, longitudinal shear load of 75,000 pounds at its joint with the roof without exceeding the ultimate strength of the joint.

[64 FR 25660, May 12, 1999, as amended at 67 FR 19991, Apr. 23, 2002]

§ 238.413 End structures of trailer cars.

(a) Except as provided in paragraph (b) of this section, the end structure of a trailer car shall be designed to include the following elements, or their structural equivalent. (A conceptual implementation of this end structure is provided in Figure 3 to this subpart.)

(1) *Corner posts.* Two full-height corner posts, each capable of withstanding the following:

(i) A horizontal, longitudinal shear load of 150,000 pounds at its joint with the underframe without exceeding the ultimate strength of the joint;

(ii) A horizontal, longitudinal or lateral force of 30,000 pounds applied at a point 18 inches up from the underframe attachment without exceeding the yield or the critical buckling stress; and

(iii) A horizontal, longitudinal or lateral shear load of 20,000 pounds at its

§ 238.415

joint with the roof without exceeding the ultimate strength of the joint.

(2) *Collision posts.* Two full-height collision posts each capable of withstanding the following:

(i) A horizontal, longitudinal shear load of 300,000 pounds at its joint with the underframe without exceeding the ultimate strength of the joint; and

(ii) A horizontal, longitudinal shear load of 60,000 pounds at its joint with the roof without exceeding the ultimate strength of the joint.

(b) If the trailer car is designed with an end vestibule, the end structure inboard of the vestibule shall have two full-height corner posts, or their structural equivalent, each capable of withstanding the following (A conceptual implementation of this end structure is provided in Figure 4 to this subpart):

(1) A horizontal, longitudinal shear load of 200,000 pounds at its joint with the underframe without exceeding the ultimate strength of the joint;

(2) A horizontal, lateral force of 30,000 pounds applied at a point 18 inches up from the underframe attachment without exceeding the yield or the critical buckling stress;

(3) A horizontal, longitudinal force of 50,000 pounds applied at a point 18 inches up from the underframe attachment without exceeding the yield or the critical buckling stress; and

(4) A horizontal, longitudinal or lateral shear load of 20,000 pounds at its joint with the roof without exceeding the ultimate strength of the joint.

§ 238.415 Rollover strength.

(a) Each passenger car and power car shall be designed to rest on its side and be uniformly supported at the top ("roof rail") and the bottom chords ("side sill") of the side frame. The allowable stress in the structural members of the occupied volumes for this condition shall be one-half yield or one-half the critical buckling stress, whichever is less. Minor localized deformations to the outer side skin of the passenger car or power car is allowed provided such deformations in no way intrude upon the occupied volume of each car.

(b) Each passenger car and power car shall also be designed to rest on its roof so that any damage in occupied

49 CFR Ch. II (10–1–04 Edition)

areas is limited to roof sheathing and framing. The allowable stress in the structural members of the occupied volumes for this condition shall be one-half yield or one-half the critical buckling stress, whichever is less. Deformation to the roof sheathing and framing is allowed to the extent necessary to permit the vehicle to be supported directly on the top chords of the side frames and end frames.

§ 238.417 Side loads.

(a) Each passenger car body structure shall be designed to resist an inward transverse load of 80,000 pounds of force applied to the side sill and 10,000 pounds of force applied to the belt rail (horizontal members at the bottom of the window opening in the side frame).

(b) These loads shall be considered to be applied separately over the full vertical dimension of the specified member for any distance of 8 feet in the direction of the length of the car.

(c) The allowable stress shall be the lesser of the yield stress, except as otherwise allowed by this paragraph, or the critical buckling stress. In calculating the stress to show compliance with this requirement, local yielding of the side skin adjacent to the side sill and belt rail, and local yielding of the side sill bend radii at the crossbearer and floor-beam connections is allowed. For purposes of this paragraph, local yielding is allowed provided the resulting deformations in no way intrude upon the occupied volume of the car.

(d) The connections of the side frame to the roof and underframe shall support the loads specified in this section.

§ 238.419 Truck-to-car-body and truck component attachment.

(a) The ultimate strength of the truck-to-car-body attachment for each unit in a train shall be sufficient to resist without failure the following individually applied loads: a vertical force equivalent to 2g acting on the mass of the truck; and a force of 250,000 pounds acting in any horizontal direction on the truck, along with the resulting vertical reaction to this load.

(b) Each component of a truck (which include axles, wheels, bearings, the truck-mounted brake system, suspension system components, and any other

components attached to the truck by design) shall remain attached to the truck when a force equivalent to 2g acting on the mass of the component is exerted in any direction on that component.

[64 FR 25660, May 12, 1999, as amended at 67 FR 19992, Apr. 23, 2002]

§ 238.421 Glazing.

(a) *General.* Except as provided in paragraphs (b) and (c) of this section, each exterior window on a passenger car and a power car cab shall comply with the requirements contained in part 223 of this chapter.

(b) *Particular end-facing exterior glazing requirements.* Each end-facing exterior window in a passenger car and a power car cab shall also, in the orientation in which it is installed in the car:

(1) Resist the impact of a 12-pound solid steel sphere traveling (i) at the maximum speed at which the car will operate (ii) at an impact angle no less severe than horizontal to the car, with no penetration or spall. An impact angle that is perpendicular (90 degrees) to the window's surface shall be considered the most severe impact angle for purposes of this requirement; and

(2) Demonstrate anti-spalling performance by the use of a 0.001-inch thick aluminum witness plate, placed 12 inches from the window's surface during all impact tests. The witness plate shall contain no marks from spalled glazing particles after any impact test; and

(3) Be permanently marked, prior to installation, in such a manner that the marking is clearly visible after the material has been installed. The marking shall include:

(i) The words "FRA TYPE IHP" to indicate that the material has successfully passed the testing requirements specified in this paragraph;

(ii) The name of the manufacturer; and

(iii) The type or brand identification of the material.

(c) *Passenger equipment ordered prior to May 12, 1999.* Each exterior window in passenger equipment ordered prior to May 12, 1999, may comply with the following glazing requirements in lieu of the requirements specified in paragraphs (a) and (b) of this section:

(1) Each end-facing exterior window shall, in the orientation in which it is installed in the vehicle, resist the impact of a 12-pound solid steel sphere traveling (i) at the maximum speed at which the vehicle will operate (ii) at an impact angle no less severe than horizontal to the vehicle, with no penetration or spall. An impact angle that is perpendicular to the window's surface shall be considered the most severe impact angle for purposes of this requirement.

(2) Each side-facing exterior window shall resist the impact of a:

(i) 12-pound solid steel sphere at 15 mph, at an angle of 90 degrees to the window's surface, with no penetration or spall; and

(ii) A granite ballast stone weighing a minimum of 0.5 pounds, traveling at 75 mph and impacting at a 90-degree angle to the window's surface, with no penetration or spall.

(3) All exterior windows shall:

(i) Resist a single impact of a 9-mm, 147-grain bullet traveling at an impact velocity of 900 feet per second, with no bullet penetration or spall; and

(ii) Demonstrate anti-spalling performance by the use of a 0.002-inch thick aluminum witness plate, placed 12 inches from the window's surface during all impact tests. The witness plate shall contain no marks from spalled glazing particles after any impact test; and

(iii) Be permanently marked, prior to installation, in such a manner that the marking is clearly visible after the material has been installed. The marking shall include:

(A) The words "FRA TYPE IH" for end-facing glazing or "FRA TYPE IIH" for side-facing glazing, to indicate that the material has successfully passed the testing requirements of this section;

(B) The name of the manufacturer; and

(C) The type or brand identification of the material.

(d) *Glazing securement.* Each exterior window on a passenger car and a power car cab shall remain in place when subjected to:

(1) The forces due to air pressure differences caused when two trains pass

§ 238.423

at the minimum separation for two adjacent tracks, while traveling in opposite directions, each train traveling at the maximum authorized speed; and

(2) The impact forces that the glazed window is required to resist as specified in this section.

(e) *Stenciling.* Each car that is fully equipped with glazing materials that meet the requirements of this section shall be stenciled on an interior wall as follows: "Fully Equipped with FRA Part 238 Glazing" or similar words conveying that meaning, in letters at least $\frac{3}{8}$ of an inch high.

[64 FR 25660, May 12, 1999, as amended at 67 FR 19992, Apr. 23, 2002]

§ 238.423 Fuel tanks.

(a) *External fuel tanks.* Each type of external fuel tank must be approved by FRA's Associate Administrator for Safety upon a showing that the fuel tank provides a level of safety at least equivalent to a fuel tank that complies with the external fuel tank requirements in § 238.223(a).

(b) *Internal fuel tanks.* Internal fuel tanks shall comply with the requirements specified in § 238.223(b).

§ 238.425 Electrical system.

(a) *Circuit protection.* (1) The main propulsion power line shall be protected with a lightning arrestor, automatic circuit breaker, and overload relay. The lightning arrestor shall be run by the most direct path possible to ground with a connection to ground of not less than No. 6 AWG. These overload protection devices shall be housed in an enclosure designed specifically for that purpose with the arc chute vented directly to outside air.

(2) Head end power, including trainline power distribution, shall be provided with both overload and ground fault protection.

(3) Circuits used for purposes other than propelling the equipment shall be connected to their power source through circuit breakers or equivalent current-limiting devices.

(4) Each auxiliary circuit shall be provided with a circuit breaker located as near as practical to the point of connection to the source of power for that circuit; however, such protection may

be omitted from circuits controlling safety-critical devices.

(b) *Main battery system.* (1) The main batteries shall be isolated from the cab and passenger seating areas by a non-combustible barrier.

(2) Battery chargers shall be designed to protect against overcharging.

(3) Battery circuits shall include an emergency battery cut-off switch to completely disconnect the energy stored in the batteries from the load.

(4) If batteries are of the type to potentially vent explosive gases, the batteries shall be adequately ventilated to prevent accumulation of explosive concentrations of these gases.

(c) *Power dissipation resistors.* (1) Power dissipating resistors shall be adequately ventilated to prevent overheating under worst-case operating conditions.

(2) Power dissipation grids shall be designed and installed with sufficient isolation to prevent combustion between resistor elements and combustible material.

(3) Power dissipation resistor circuits shall incorporate warning or protective devices for low ventilation air flow, over-temperature, and short circuit failures.

(4) Resistor elements shall be electrically insulated from resistor frames, and the frames shall be electrically insulated from the supports that hold them.

(d) *Electromagnetic interference and compatibility.* (1) The operating railroad shall ensure electromagnetic compatibility of the safety-critical equipment systems with their environment. Electromagnetic compatibility can be achieved through equipment design or changes to the operating environment.

(2) The electronic equipment shall not produce electrical noise that interferes with trainline control and communications or with wayside signaling systems.

(3) To contain electromagnetic interference emissions, suppression of transients shall be at the source wherever possible.

(4) Electrical and electronic systems of equipment shall be capable of operation in the presence of external electromagnetic noise sources.

49 CFR Ch. II (10–1–04 Edition)

(5) All electronic equipment shall be self-protected from damage or improper operation, or both, due to high voltage transients and long-term over-voltage or under-voltage conditions.

§ 238.427 Suspension system.

(a) *General requirements.* (1) Suspension systems shall be designed to reasonably prevent wheel climb, wheel unloading, rail rollover, rail shift, and a vehicle from overturning to ensure safe, stable performance and ride quality. These requirements shall be met:

(i) In all operating environments, and under all track conditions and loading conditions as determined by the operating railroad; and

(ii) At all track speeds and over all track qualities consistent with the Track Safety Standards in part 213 of this chapter, up to the maximum operating speed and maximum cant deficiency of the equipment.

(2) Passenger equipment shall meet the safety performance standards for suspension systems contained in appendix C to this part, or alternative standards providing at least equivalent safety if approved by FRA under the provisions of § 238.21.

(b) *Car body accelerations.* (1) A passenger car shall not operate under conditions that result in a steady-state lateral acceleration greater than 0.12g as measured parallel to the car floor inside the passenger compartment. During pre-revenue service acceptance testing of the equipment under § 238.111 and § 213.345 of this chapter, a passenger car shall demonstrate that steady-state lateral acceleration does not exceed 0.1g at the maximum intended cant deficiency.

(2) While traveling at the maximum operating speed over the intended route, the train suspension system shall be designed to:

(i) Limit the vertical acceleration, as measured by a vertical accelerometer mounted on the car floor, to no greater than 0.55g single event, peak-to-peak over a one second period;

(ii) Limit lateral acceleration, as measured by a lateral accelerometer mounted on the car floor, to no greater than 0.3g single event, peak-to-peak over a one second period; and

(iii) Limit the combination of lateral acceleration (a_L) and vertical acceleration (a_V) occurring over a one second period as expressed by the square root of ($a_L^2 + a_V^2$) to no greater than 0.6g, where a_L may not exceed 0.3g and a_V may not exceed 0.55g. Compliance with the requirements of paragraph (b)(2) shall be demonstrated during the pre-revenue service acceptance testing of the equipment required under § 238.111 and § 213.345 of this chapter.

(3) For purposes of this paragraph:

(i) Car body acceleration measurements shall be processed through a filter having a cut-off frequency of 10 Hz; and

(ii) Steady-state lateral acceleration shall be computed as the mathematical average of the accelerations in the body of a curve, between the spiral/curve points. In a compound curve, steady-state lateral acceleration shall be measured separately for each curve segment.

(c) *Truck (hunting) acceleration.* Each truck shall be equipped with a permanently installed lateral accelerometer mounted on the truck frame. The accelerometer output signals shall be processed through a filter having a band pass of 0.5 to 10 Hz to determine if hunting oscillations of the truck are occurring. If hunting oscillations are detected, the train monitoring system shall provide an alarm to the operator, and the train shall be slowed to a speed at least 5 mph less than the speed at which the hunting oscillations stopped. For purposes of this paragraph, hunting oscillations are considered a sustained cyclic oscillation of the truck which is evidenced by lateral accelerations in excess of 0.4g root mean square (mean-removed) for 2 seconds.

(d) *Overheat sensors.* Overheat sensors for each wheelset journal bearing shall be provided. The sensors may be placed either onboard the equipment or at reasonable intervals along the railroad's right-of-way.

[64 FR 25660, May 12, 1999, as amended at 67 FR 19992, Apr. 23, 2002]

§ 238.429 Safety appliances.

(a) *Couplers.* (1) The leading and the trailing ends of a semi-permanently coupled trainset shall each be equipped with an automatic coupler that couples

on impact and uncouples by either activation of a traditional uncoupling lever or some other type of uncoupling mechanism that does not require a person to go between the equipment units.

(2) The automatic coupler and uncoupling device on the leading and trailing ends of a semi-permanently coupled trainset may be stored within a removable shrouded housing.

(3) If the units in a train are not semi-permanently coupled, both ends of each unit shall be equipped with an automatic coupler that couples on impact and uncouples by either activation of a traditional uncoupling lever or some other type of uncoupling mechanism that does not require a person to go between the equipment units.

(b) *Hand brakes.* Except as provided in paragraph (f) of this section, Tier II trains shall be equipped with a parking or hand brake that can be applied and released manually and that is capable of holding the train on a 3-percent grade.

(c) *Safety appliance mechanical strength and fasteners.* (1) All handrails, handholds, and sill steps shall be made of 1-inch diameter steel pipe, $\frac{5}{8}$ -inch thickness steel, or a material of equal or greater mechanical strength.

(2) All safety appliances shall be securely fastened to the car body structure with mechanical fasteners that have mechanical strength greater than or equal to that of a $\frac{1}{2}$ -inch diameter SAE grade steel bolt mechanical fastener.

(i) Safety appliance mechanical fasteners shall have mechanical strength and fatigue resistance equal to or greater than a $\frac{1}{2}$ -inch diameter SAE steel bolt.

(ii) Mechanical fasteners shall be installed with a positive means to prevent unauthorized removal. Self-locking threaded fasteners do not meet this requirement.

(iii) Mechanical fasteners shall be installed to facilitate inspection.

(d) *Handrails and handholds.* Except as provided in paragraph (f) of this section:

(1) Handrails shall be provided for passengers on both sides of all steps used to board or depart the train.

(2) Exits on a power vehicle shall be equipped with handrails and handholds

so that crewmembers can get on and off the vehicle safely.

(3) Throughout their entire length, handrails and handholds shall be a color that contrasts with the color of the vehicle body to which they are fastened.

(4) The maximum distance above the top of the rail to the bottom of vertical handrails and handholds shall be 51 inches, and the minimum distance shall be 21 inches.

(5) Vertical handrails and handholds shall be installed to continue to a point at least equal to the height of the top edge of the control cab door.

(6) The minimum hand clearance distance between a vertical handrail or handhold and the vehicle body shall be $2\frac{1}{2}$ inches for the entire length.

(7) All vertical handrails and handholds shall be securely fastened to the vehicle body.

(8) If the length of the handrail exceeds 60 inches, it shall be securely fastened to the power vehicle body with two fasteners at each end.

(e) *Sill steps.* Except as provided in paragraph (f) of this section, each power vehicle shall be equipped with a sill step below each exterior door as follows:

(1) The sill step shall have a minimum cross-sectional area of $\frac{1}{2}$ by 3 inches;

(2) The sill step shall be made of steel or a material of equal or greater strength and fatigue resistance;

(3) The minimum tread length of the sill step shall be 10 inches;

(4) The minimum clear depth of the sill step shall be 8 inches;

(5) The outside edge of the tread of the sill step shall be flush with the side of the car body structure;

(6) Sill steps shall not have a vertical rise between treads exceeding 18 inches;

(7) The lowest sill step tread shall be not more than 24, preferably not more than 22, inches above the top of the track rail;

(8) Sill steps shall be a color that contrasts with the color of the power vehicle body to which they are fastened;

(9) Sill steps shall be securely fastened;

(10) At least 50 percent of the tread surface area of each sill step shall be open space; and

(11) The portion of the tread surface area of each sill step which is not open space and is normally contacted by the foot shall be treated with an anti-skid material.

(f) *Exceptions.* (1) If the units of the equipment are semi-permanently coupled, with uncoupling done only at maintenance facilities, the equipment units that are not required by paragraph (a) of this section to be equipped with automatic couplers need not be equipped with sill steps or end or side handholds that would normally be used to safely perform coupling and uncoupling operations.

(2) If the units of the equipment are not semi-permanently coupled, the units shall be equipped with hand brakes, sill steps, end handholds, and side handholds that meet the requirements contained in § 231.14 of this chapter.

(3) If two trainsets are coupled to form a single train that is not semi-permanently coupled (i.e., that is coupled by an automatic coupler), the automatically coupled ends shall be equipped with an end handhold that is located and installed so that an individual can safely couple and uncouple the trainsets. The end handhold shall be not more than 16 inches from each side of the car and shall extend the remaining length of the end of the car. (If the equipment is designed with a tapered nose, the side of the car shall be determined based on the outer dimension of the tapered nose where the end handhold is attached.) The end handhold shall also meet the mechanical strength and design requirements contained in paragraphs (c), (d)(3), and (d)(6) of this section. If the trainsets are semi-permanently coupled, this safety appliance is not required.

(g) *Optional safety appliances.* Safety appliances installed at the option of the railroad shall be firmly attached with mechanical fasteners and shall meet the design and installation requirements provided in this section.

[64 FR 25660, May 12, 1999, as amended at 67 FR 19992, Apr. 23, 2002]

§ 238.431 Brake system.

(a) A passenger train's brake system shall be capable of stopping the train from its maximum operating speed within the signal spacing existing on the track over which the train is operating under worst-case adhesion conditions.

(b) The brake system shall be designed to allow an inspector to determine that the brake system is functioning properly without having to place himself or herself in a dangerous position on, under, or between the equipment.

(c) Passenger equipment shall be provided with an emergency brake application feature that produces an irretrievable stop, using a brake rate consistent with prevailing adhesion, passenger safety, and brake system thermal capacity. An emergency brake application shall be available at any time, and shall be initiated by an unintentional parting of the train. A means to initiate an emergency brake application shall be provided at two locations in each unit of the train; however, where a unit of the train is 45 feet or less in length a means to initiate an emergency brake application need only be provided at one location in the unit.

(d) The brake system shall be designed to prevent thermal damage to wheels and brake discs. The operating railroad shall demonstrate through analysis and testing that no thermal damage results to the wheels or brake discs under conditions resulting in maximum braking effort being exerted on the wheels or discs.

(e) The following requirements apply to blended braking systems:

(1) Loss of power or failure of the dynamic brake does not result in exceeding the allowable stopping distance;

(2) The friction brake alone is adequate to safely stop the train under all operating conditions;

(3) The operational status of the electric portion of the brake system shall be displayed for the train operator in the control cab; and

(4) The operating railroad shall demonstrate through analysis and testing the maximum operating speed for safe operation of the train using only the friction brake portion of the blended

§ 238.433

49 CFR Ch. II (10–1–04 Edition)

brake with no thermal damage to wheels or discs.

(f) The brake system design shall allow a disabled train's pneumatic brakes to be controlled by a conventional locomotive, during a rescue operation, through brake pipe control alone.

(g) An independent failure-detection system shall compare brake commands with brake system output to determine if a failure has occurred. The failure detection system shall report brake system failures to the automated train monitoring system.

(h) Passenger equipment shall be equipped with an adhesion control system designed to automatically adjust the braking force on each wheel to prevent sliding during braking. In the event of a failure of this system to prevent wheel slide within preset parameters, a wheel slide alarm that is visual or audible, or both, shall alert the train operator in the cab of the controlling power car to wheel-slide conditions on any axle of the train.

§ 238.433 Draft system.

(a) Leading and trailing automatic couplers of trains shall be compatible with standard AAR couplers with no special adapters used.

(b) All passenger equipment continues to be subject to the requirements concerning couplers and uncoupling devices contained in Federal Statute at 49 U.S.C. chapter 203 and in FRA regulations at part 231 and § 232.2 of this chapter.

§ 238.435 Interior fittings and surfaces.

(a) Each seat back and seat attachment in a passenger car shall be designed to withstand, with deflection but without total failure, the load associated with the impact into the seat back of an unrestrained 95th-percentile adult male initially seated behind the seat back, when the floor to which the seat is attached decelerates with a triangular crash pulse having a peak of 8g and a duration of 250 milliseconds.

(b) Each seat back in a passenger car shall include shock-absorbent material to cushion the impact of occupants with the seat ahead of them.

(c) The ultimate strength of each seat attachment to a passenger car

body shall be sufficient to withstand the following individually applied accelerations acting on the mass of the seat plus the mass of a seat occupant who is a 95th-percentile adult male:

(1) Lateral: 4g; and

(2) Vertical: 4g.

(d)(1) Other interior fittings shall be attached to the passenger car body with sufficient strength to withstand the following individually applied accelerations acting on the mass of the fitting:

(i) Longitudinal: 8g;

(ii) Lateral: 4g; and

(iii) Vertical: 4g.

(2) Fittings that can be expected to be impacted by a person during a collision, such as tables between facing seats, shall be designed for the mass of the fitting plus the mass of the number of occupants who are 95th-percentile adult males that could be expected to strike the fitting, when the floor of the passenger car decelerates with a triangular crash pulse having a peak of 8g and a duration of 250 milliseconds.

(e) The ultimate strength of the interior fittings and equipment in power car control cabs shall be sufficient to resist without failure loads due to the following individually applied accelerations acting on the mass of the fitting or equipment:

(1) Longitudinal: 12g;

(2) Lateral: 4g; and

(3) Vertical: 4g.

(f) To the extent possible, interior fittings, except seats, shall be recessed or flush-mounted. Corners and sharp edges shall be avoided or otherwise padded.

(g) Energy-absorbent material shall be used to pad surfaces likely to be impacted by occupants during collisions or derailments.

(h) Luggage stowage compartments shall be enclosed, and have an ultimate strength sufficient to resist loads due to the following individually applied accelerations acting on the mass of the luggage that the compartments are designed to accommodate:

(1) Longitudinal: 8g;

(2) Lateral: 4g; and

(3) Vertical: 4g.

(i) If, for purposes of showing compliance with the requirements of this section, the strength of a seat attachment

is to be demonstrated through sled testing, the seat structure and seat attachment to the sled that are used in such testing must be representative of the actual seat structure in, and seat attachment to, the rail vehicle subject to the requirements of this section. If the attachment strength of any other interior fitting is to be demonstrated through sled testing, for purposes of showing compliance with the requirements of this section, such testing shall be conducted in a similar manner.

[64 FR 25660, May 12, 1999, as amended at 67 FR 19992, Apr. 23, 2002]

§ 238.437 Emergency communication.

A means of emergency communication throughout a train shall be provided and shall include the following:

(a) Except as further specified, transmission locations at each end of each passenger car, adjacent to the car's end doors, and accessible to both passengers and crewmembers without requiring the use of a tool or other implement. If the passenger car does not exceed 45 feet in length, or if the passenger car was ordered prior to May 12, 1999, only one transmission location is required;

(b) Transmission locations that are clearly marked with luminescent material;

(c) Clear and understandable operating instructions at or near each transmission location; and

(d) Back-up power for a minimum period of 90 minutes.

[64 FR 25660, May 12, 1999, as amended at 67 FR 19993, Apr. 23, 2002]

§ 238.439 Doors.

(a) Each passenger car shall have a minimum of two exterior side doors, each door providing a minimum clear opening with dimensions of 30 inches horizontally by 74 inches vertically.

NOTE: The Americans with Disabilities Act (ADA) Accessibility Specifications for Transportation Vehicles also contain requirements for doorway clearance (See 49 CFR part 38).

(b) Each passenger car shall be equipped with a manual override feature for each powered, exterior side door. Each manual override must be:

(1) Capable of releasing the door to permit it to be opened, without power, from both inside and outside the car;

(2) Located adjacent to the door which it controls; and

(3) Designed and maintained so that a person may readily access and operate the override device from both inside and outside the car without the use of any tool or other implement.

(c) The status of each powered, exterior side door in a passenger car shall be displayed to the crew in the operating cab. If door interlocks are used, the sensors used to detect train motion shall be nominally set to operate at 3 mph.

(d) Each powered, exterior side door in a passenger car shall be connected to an emergency back-up power system.

(e) A railroad may protect a manual override device used to open a powered, exterior door with a cover or a screen capable of removal without requiring the use of a tool or other implement.

(f) A passenger compartment end door (other than a door providing access to the exterior of the trainset) shall be equipped with a kick-out panel, pop-out window, or other similar means of egress in the event the door will not open, or shall be so designed as to pose a negligible probability of becoming inoperable in the event of car body distortion following a collision or derailment.

(g) Door exits shall be marked, and instructions provided for their use, as required by § 239.107(a) of this chapter.

[64 FR 25660, May 12, 1999, as amended at 67 FR 19993, Apr. 23, 2002]

§ 238.441 Emergency roof entrance location.

(a) Each passenger car and power car cab shall have a minimum of one roof hatch emergency entrance location with a minimum opening of 18 inches by 24 inches, or at least one clearly marked structural weak point in the roof having a minimum opening of the same dimensions to provide quick access for properly equipped emergency response personnel.

(b) *Marking and instructions.* [Reserved]

§ 238.443

49 CFR Ch. II (10–1–04 Edition)

§ 238.443 Headlights.

(a) Each power car shall be equipped with at least two headlights. Each headlight shall produce no less than 200,000 candela. One headlight shall be arranged to illuminate a person standing between the rails 800 feet ahead of the power car under clear weather conditions. The other headlight shall be arranged to illuminate a person standing between the rails 1,500 feet ahead of the power car under clear weather conditions.

(b) A power car with a headlight not in compliance with the requirements of paragraph (a) of this section shall be moved in accordance with the following:

(1) If one of the headlights is defective, the defect shall be considered a non-running gear defect subject to the provisions contained in § 238.17 of this part.

(2) If both headlights are defective, the power car shall be inspected and tagged in accordance with the requirements contained in § 238.17(c) relating to non-running gear defects. The power car may continue to be used in passenger service only to the nearest forward location where the repairs necessary to bring the power car into compliance can be made or to the power car's next calendar day mechanical inspection, whichever occurs first.

[67 FR 19993, Apr. 23, 2002]

§ 238.445 Automated monitoring.

(a) Each passenger train shall be equipped to monitor the performance of the following systems or components:

- (1) Reception of cab signals and train control signals;
- (2) Truck hunting;
- (3) Dynamic brake status;
- (4) Friction brake status;
- (5) Fire detection systems;
- (6) Head end power status;
- (7) Alerter or deadman control;
- (8) Horn and bell;
- (9) Wheel slide;
- (10) Tilt system, if so equipped; and
- (11) On-board bearing-temperature sensors, if so equipped.

(b) When any such system or component is operating outside of its predetermined safety parameters:

(1) The train operator shall be alerted; and

(2) Immediate corrective action shall be taken, if the system or component defect impairs the train operator's ability to safely operate the train. Immediate corrective action includes limiting the speed of the train.

(c) The monitoring system shall be designed with an automatic self-test feature that notifies the train operator that the monitoring capability is functioning correctly and alerts the train operator when a system failure occurs.

§ 238.447 Train operator's controls and power car cab layout.

(a) Train operator controls in the power car cab shall be arranged so as to minimize the chance of human error, and be comfortably within view and within easy reach when the operator is seated in the normal train control position.

(b) The train operator's control panel buttons, switches, levers, knobs, and the like shall be distinguishable by sight and by touch.

(c) An alerter shall be provided in the power car cab. If not acknowledged, the alerter shall cause a brake application to stop the train.

(d) Power car cab information displays shall be designed with the following characteristics:

(1) Simplicity and standardization shall be the driving criteria for design of formats for the display of information in the cab;

(2) Essential, safety-critical information shall be displayed as a default condition;

(3) Operator selection shall be required to display other than default information;

(4) Cab or train control signals shall be displayed for the operator; and

(5) Displays shall be readable from the operators's normal position under all lighting conditions.

(e) The power car cab shall be designed so as to permit the crew to have an effective field of view in the forward direction, as well as to the right and left of the direction of travel to observe objects approaching the train from either side. Field-of-view obstructions due to required structural members shall be minimized.

Federal Railroad Administration, DOT

§ 238.447

(f) Each seat provided for an employee regularly assigned to occupy a power car cab and any floor-mounted seat in the cab shall be:

(1) Secured to the car body with an attachment having an ultimate strength capable of withstanding the loads due to the following individually applied accelerations acting on the combined mass of the seat and the mass of a seat occupant who is a 95th-percentile adult male:

- (i) Longitudinal: 12g;
- (ii) Lateral: 4g; and
- (iii) Vertical: 4g;

(2) Designed so that all adjustments have the range necessary to accommodate a person ranging from a 5th-percentile adult female to a 95th-percentile adult male, as persons possessing such characteristics are specified, correcting for clothing as appropriate, in any recognized survey after

1958 of weight, height, and other body dimensions of U.S. adults;

(3) Equipped with lumbar support that is adjustable from the seated position;

(4) Equipped with force-assisted, vertical-height adjustment, operated from the seated position;

(5) Equipped with a manually reclining seat back, adjustable from the seated position;

(6) Equipped with an adjustable headrest; and

(7) Equipped with folding, padded armrests.

(g) Sharp edges and corners shall be eliminated from the interior of the power car cab, and interior surfaces of the cab likely to be impacted by an employee during a collision or derailment shall be padded with shock-absorbent material.

Subpart F—Inspection, Testing, and Maintenance Requirements for Tier II Passenger Equipment

§ 238.501 Scope.

This subpart contains inspection, testing, and maintenance requirements for railroad passenger equipment that operates at speeds exceeding 125 mph but not exceeding 150 mph.

§ 238.503 Inspection, testing, and maintenance requirements.

(a) *General.* Under the procedures provided in § 238.505, each railroad shall obtain FRA approval of a written inspection, testing, and maintenance program for Tier II passenger equipment

prior to implementation of that program and prior to commencing passenger operations using that equipment. As further specified in this section, the program shall describe in detail the procedures, equipment, and other means necessary for the safe operation of the passenger equipment, including:

- (1) Inspection procedures, intervals, and criteria;
- (2) Testing procedures and intervals;
- (3) Scheduled preventive-maintenance intervals;
- (4) Maintenance procedures;
- (5) Special testing equipment or measuring devices required to perform inspections, tests, and maintenance; and

(6) The training, qualification, and designation of employees and contractors to perform inspections, tests, and maintenance.

(b) *Compliance.* After the railroad's inspection, testing, and maintenance program is approved by FRA under § 238.505, the railroad shall adopt the program and shall perform—

(1) The inspections and tests of power brakes and other primary brakes as described in the program;

(2) The other inspections and tests described in the program in accordance with the procedures and criteria that the railroad identified as safety-critical; and

(3) The maintenance tasks described in the program in accordance with the procedures and intervals that the railroad identified as safety-critical.

(c) *General safety inspection, testing, and maintenance procedures.* The inspection, testing, and maintenance program under paragraph (a) of this section shall contain the railroad's written procedures to ensure that all systems and components of in service passenger equipment are free of any general condition that endangers the safety of the crew, passengers, or equipment. These procedures shall protect against:

(1) A continuous accumulation of oil or grease;

(2) Improper functioning of a component;

(3) A crack, break, excessive wear, structural defect, or weakness of a component;

(4) A leak;

(5) Use of a component or system under a condition that exceeds that for which the component or system is designed to operate; and

(6) Insecure attachment of a component.

(d) *Specific inspections.* The program under paragraph (a) of this section shall specify that all Tier II passenger equipment shall receive thorough inspections in accordance with the following standards:

(1) Except as provided in paragraph (d)(3) of this section, the equivalent of a Class I brake test contained in § 238.313 shall be conducted prior to a train's departure from an originating terminal and every 1,500 miles or once

each calendar day, whichever comes first, that the train remains in continuous service.

(i) Class I equivalent brake tests shall be performed by a qualified maintenance person.

(ii) Except as provided in § 238.15(b), a railroad shall not use or haul a Tier II passenger train in passenger service from a location where a Class I equivalent brake test has been performed, or was required by this part to have been performed, with less than 100 percent operative brakes.

(2) Except as provided in paragraph (d)(3) of this section, a complete exterior and interior mechanical inspection, in accordance with the railroad's inspection program, shall be conducted by a qualified maintenance person at least once during each calendar day the equipment is used in service.

(3) Trains that miss a scheduled Class I brake test or mechanical inspection due to a delay en route may proceed to the point where the Class I brake test or mechanical inspection was scheduled to be performed.

(e) *Movement of trains with power brake defects.* Movement of trains with a power brake defect as defined in § 238.15 (any primary brake defect) shall be governed by § 238.15.

(f) *Movement of trains with other defects.* The movement of a train with a defect other than a power brake defect shall be conducted in accordance with § 238.17, with the following exceptions:

(1) The movement of a Tier II power car with a non-complying headlight shall be conducted in accordance with § 238.443(b) of this part; and

(2) When a failure of a secondary brake on a Tier II passenger train occurs en route, that train may remain in service until its next scheduled calendar day Class I brake test equivalent at a speed no greater than the maximum safe operating speed demonstrated through analysis and testing for braking with the friction brake alone. The brake system shall be restored to 100 percent operation before the train departs that inspection location.

(g) *Maintenance intervals.* The program under paragraph (a) of this section shall include the railroad's initial scheduled maintenance intervals for

Tier II equipment based on an analysis completed pursuant to the railroad's safety plan. The maintenance interval of a safety-critical component shall be changed only when justified by accumulated, verifiable operating data and approved by FRA under § 238.505 before the change takes effect.

(h) *Training, qualification, and designation program.* The program under paragraph (a) of this section shall describe the training, qualification, and designation program, as defined in the training program plan under § 238.109, established by the railroad to qualify individuals to inspect, test, and maintain the equipment.

(1) If the railroad deems it safety-critical, then only qualified individuals shall inspect, test, and maintain the equipment.

(2) Knowledge of the procedures described in paragraph (a) of this section shall be required to qualify an employee or contractor to perform an inspection, testing, or maintenance task under this part.

(i) *Standard procedures.* The program under paragraph (a) of this section shall include the railroad's written standard procedures for performing all safety-critical equipment inspection, testing, maintenance, and repair tasks necessary to ensure the safe and proper operation of the equipment. The inspection, testing, and maintenance program required by this section is not intended to address and should not include procedures to address employee working conditions that arise in the course of conducting the inspections, tests, and maintenance set forth in the program. When reviewing the railroad's program, FRA does not intend to review any portion of the program that relates to employee working conditions.

(j) *Annual review.* The inspection, testing, and maintenance program required by this section shall be reviewed by the railroad annually.

(k) *Quality control program.* Each railroad shall establish an inspection, testing, and maintenance quality control program enforced by railroad or contractor supervisors to reasonably ensure that inspections, tests, and maintenance are performed in accordance

with Federal safety standards and the procedures established by the railroad.

(l) *Identification of safety-critical items.* In the program under paragraph (a) of this section, the railroad shall identify all inspection and testing procedures and criteria as well as all maintenance intervals that the railroad deems to be safety-critical.

[64 25660, May 12, 1999, as amended at 67 FR 19994, Apr. 23, 2002]

§ 238.505 Program approval procedure.

(a) *Submission.* Not less than 90 days prior to commencing passenger operations using Tier II passenger equipment, each railroad to which this subpart applies shall submit for approval an inspection, testing, and maintenance program for that equipment meeting the requirements of this subpart with the Associate Administrator for Safety, Federal Railroad Administration, 1120 Vermont Ave, Mail Stop 25, Washington, DC 20590. If a railroad seeks to amend an approved program, the railroad shall file with FRA's Associate Administrator for Safety a petition for approval of such amendment not less than 60 days prior to the proposed effective date of the amendment. A program responsive to the requirements of this subpart or any amendment to the program shall not be implemented prior to FRA approval.

(1) Each program or amendment under § 238.503 shall contain:

(i) The information prescribed in § 238.503 for such program or amendment;

(ii) The name, title, address, and telephone number of the primary person to be contacted with regard to review of the program or amendment; and

(iii) A statement affirming that the railroad has served a copy of the program or amendment on designated representatives of railroad employees, together with a list of the names and addresses of persons served.

(2) Each railroad shall serve a copy of each submission to FRA on designated representatives of railroad employees responsible for the equipment's operation, inspection, testing, and maintenance under this subpart.

(b) *Comment.* Not later than 45 days from the date of filing the program or

§ 238.601

amendment, any person may comment on the program or amendment.

(1) Each comment shall set forth specifically the basis upon which it is made, and contain a concise statement of the interest of the commenter in the proceeding.

(2) Three copies of each comment shall be submitted to the Associate Administrator for Safety, Federal Railroad Administration, 1120 Vermont Ave., Mail Stop 25, Washington, DC 20590.

(3) The commenter shall certify that a copy of the comment was served on the railroad.

(c) *Approval.*

(1) Within 60 days of receipt of each initial inspection, testing, and maintenance program, FRA will conduct a formal review of the program. FRA will then notify the primary railroad contact person and the designated employee representatives in writing whether the inspection, testing, and maintenance program is approved and, if not approved, the specific points in which the program is deficient. If a program is not approved by FRA, the railroad shall amend its program to correct all deficiencies and resubmit its program with the required revisions not later than 45 days prior to commencing passenger operations.

(2) FRA will review each proposed amendment to the program within 45 days of receipt. FRA will then notify the primary railroad contact person and the designated employee representatives in writing whether the proposed amendment has been approved by FRA and, if not approved, the specific points in which the proposed amendment is deficient. The railroad shall correct any deficiencies and file the corrected amendment prior to implementing the amendment.

(3) Following initial approval of a program or amendment, FRA may reopen consideration of the program or amendment for cause stated.

Subpart G—Specific Safety Planning Requirements for Tier II Passenger Equipment

§ 238.601 Scope.

This subpart contains specific safety planning requirements for the oper-

49 CFR Ch. II (10–1–04 Edition)

ation of Tier II passenger equipment, procurement of Tier II passenger equipment, and the introduction or major upgrade of new technology in existing Tier II passenger equipment that affects a safety system on such equipment.

§ 238.603 Safety planning requirements.

(a) Prior to commencing revenue service operation of Tier II passenger equipment, each railroad shall prepare and execute a written plan for the safe operation of such equipment. The plan may be combined with any other plan required under this part. The plan shall be updated at least every 365 days. At a minimum, the plan shall describe the approaches and processes to:

(1) Identify all requirements necessary for the safe operation of the equipment in its operating environment;

(2) Identify all known or potential hazards to the safe operation of the equipment;

(3) Eliminate or reduce the risk posed by each hazard identified to an acceptable level using a formal safety methodology such as MIL-STD-882; and

(4) Impose operational limitations, as necessary, on the operation of the equipment if the equipment cannot meet safety requirements.

(b) For the procurement of Tier II passenger equipment, and for each major upgrade or introduction of new technology in existing Tier II passenger equipment that affects a safety system on such equipment, each railroad shall prepare and execute a written safety plan. The plan may be combined with any other plan required under this part. The plan shall describe the approaches and processes to:

(1) Identify all safety requirements governing the design of the passenger equipment and its supporting systems;

(2) Evaluate the total system, including hardware, software, testing, and support activities, to identify known or potential safety hazards over the life cycle of the equipment;

(3) Identify safety issues during design reviews;

(4) Eliminate or reduce the risk posed by each hazard identified to an acceptable level using a formal safety methodology such as MIL-STD-882;

(5) Monitor the progress in resolving safety issues, reducing hazards, and meeting safety requirements;

(6) Develop a program of testing or analysis, or both, to demonstrate that safety requirements have been met; and

(7) Impose operational limitations, as necessary, on the operation of the equipment if the equipment cannot meet safety requirements.

(c) Each railroad shall maintain sufficient documentation to demonstrate

how the operation and design of its Tier II passenger equipment complies with safety requirements or, as appropriate, addresses safety requirements under paragraphs (a)(4) and (b)(7) of this section. Each railroad shall maintain sufficient documentation to track how safety issues are raised and resolved.

(d) Each railroad shall make available to FRA for inspection and copying upon request each safety plan required by this section and any documentation required pursuant to such plan.

[64 25660, May 12, 1999, as amended at 67 FR 19994, Apr. 23, 2002]

APPENDIX A TO PART 238—SCHEDULE OF CIVIL PENALTIES¹

Section	Violation	Willful violation
SUBPART A—GENERAL		
238.15 Movement of power brake defects:		
(b) Improper movement from Class I or IA brake test	5,000	7,500
(c) Improper movement of en route defect	2,500	5,000
(2), (3) Insufficient tag or record	1,000	2,000
(4) Failure to determine percent operative brake	2,500	5,000
(d) Failure to follow operating restrictions	5,000	7,500
(e) Failure to follow restrictions for inoperative front or rear unit	2,500	5,000
238.17 Movement of other than power brake defects: ¹		
(c)(4), (5) Insufficient tag or record	1,000	2,000
(d) Failure to inspect or improper use of roller bearings	2,500	5,000
(e) Improper movement of defective safety appliances	(1)	
238.19 Reporting and tracking defective equipment:		
(a) Failure to have reporting or tracking system	7,500	11,000
(b) Failure to retain records	2,000	4,000
(c) Failure to make records available	1,000	2,000
(d) Failure to list power brake repair points	2,000	4,000
SUBPART B—SAFETY PLANNING AND GENERAL REQUIREMENTS		
238.103 Fire protection plan/fire safety:		
(a) Failure to use proper materials	5,000	7,500
(b) Improper certification	1,000	2,000
(c) Failure to consider fire safety on new equipment	5,000	7,500
(d) Failure to perform fire safety analysis	5,000	7,500
(e) Failure to develop, adopt or comply with procedures	5,000	7,500
238.105 Train electronic hardware and software safety:		
(a), (b), (c) Failure to develop and maintain hardware and software safety	7,500	11,000
(d) Failure to include required design features	5,000	7,500
(e) Failure to comply with hardware and software safety program	5,000	7,500
238.107 Inspection, testing, and maintenance plan:		
(b) Failure to develop plan	7,500	11,000
(b)(1)–(5) Failure of plan to address specific item	3,000	6,000
(d) Failure to conduct annual review	5,000	7,500
238.109 Training, qualification, and designation program:		
(a) Failure to develop or adopt program	7,500	11,000
(b)(1)–(4) Failure of plan to address specific item	3,000	6,000
(b)(5)–(12) Failure to comply with specific required provision of the program	5,000	7,500
(b)(13) Failure to maintain adequate records	2,500	5,000
238.111 Pre-revenue service acceptance testing plan:		
(a) Failure to properly test previously used equipment	7,500	11,000
(b)(1) Failure to develop plan	7,500	11,000
(b)(2) Failure to submit plan to FRA	5,000	7,500
(b)(3) Failure to comply with plan	5,000	7,500
(b)(4) Failure to document results of testing	5,000	7,500
(b)(5) Failure to correct safety deficiencies or impose operating limits	5,000	7,500
(b)(6) Failure to maintain records	3,000	6,000
(b)(7) Failure to obtain FRA approval	5,000	7,500

Section		Violation	Willful violation
238.113	Emergency window exits	2,500	5,000
238.115	Emergency lighting	2,500	5,000

238.231	Brake System (a)–(g), (i)–(n)	2,500	5,000
	(h)(1), (2) Hand or parking brake missing or inoperative	5,000	7,500
	(h)(3) Hand or parking brake not applied to hold equipment unattended on grade or prematurely released	5,000	7,500
238.233	Interior fittings and surfaces	2,500	7,500
238.235	Doors	2,500	5,000
238.237	Automated monitoring	2,500	5,000
SUBPART D—INSPECTION, TESTING, AND MAINTENANCE REQUIREMENTS FOR TIER I EQUIPMENT			
238.303	Exterior mechanical inspection of passenger equipment:		
	(a)(1) Failure to perform mechanical inspection	1,200	4,000
	(a)(2) Failure to inspect secondary brake system	2,500	5,000
	(b) Failure to perform inspection on car added to train	1,200	4,000
	(c) Failure to utilize properly qualified personnel	2,000	4,000
	(e)(1) Products of combustion not released outside cab	2,500	5,000
	(e)(2) Battery not vented or gassing excessively	2,500	5,000
	(e)(3) Coupler not in proper condition	2,500	5,000
	(e)(4) No device under drawbar pins or connection pins	2,500	5,000
	(e)(5) Suspension system and spring rigging not in proper condition	2,500	5,000
	(e)(6) Truck not in proper condition	2,500	5,000
	(e)(7) Side bearing not in proper condition	2,500	5,000
	(e)(8) Wheel not in proper condition:		
	(i), (iv) Flat spot(s) and shelled spot(s):		
	(A) One spot 2½" or more but less than 3" in length	2,500	5,000
	(B) One spot 3" or more in length	5,000	7,500
	(C) Two adjoining spots each of which is 2" or more in length but less than 2½" in length	2,500	5,000
	(D) Two adjoining spots each of which are at least 2" in length, if either spot is 2½" or more in length	5,000	7,500
	(ii) Gouge or chip in flange:		
	(A) More than 1½" but less than 1⅞" in length; and more than ⅛" but less than ⅝" in width	2,500	5,000
	(B) 1⅞" or more in length and ⅝" or more in width	5,000	7,500
	(iii) Broken rim	5,000	7,500
	(v) Seam in tread	2,500	5,000
	(vi) Flange thickness of:		
	(A) ⅞" or less but more than		
	(B) 1¾" or less	5,000	7,500
	(vii) Tread worn hollow	2,500	5,000
	(viii) Flange height of:		
	(A) 1½" or greater but less than 1⅞"	2,500	5,000
	(B) 1⅞" or more	5,000	7,500
	(ix) Rim thickness:		
	(A) Less than 1"	2,500	5,000
	(B) 1⅞" or less	5,000	7,500
	(x) Crack or break in flange, tread, rim, plate, or hub:		
	(A) Crack of less than 1"	2,500	5,000
	(B) Crack of 1" or more	5,000	7,500
	(C) Break	5,000	7,500
	(xi) Loose wheel	5,000	7,500
	(xii) Welded wheel	5,000	7,500
	(e)(10) Improper grounding or insulation	5,000	7,500
	(e)(11) Jumpers or cable connections not in proper condition	2,500	5,000

Federal Railroad Administration, DOT

Pt. 238, App. A

Section	Violation	Willful violation
(e)(12) Door or cover plate not properly marked	2,500	5,000
(e)(13) Buffer plate not properly placed	2,500	5,000
(e)(14) Diaphragm not properly placed or aligned	2,500	5,000
(e)(15) Secondary braking system not in operating mode or contains known defect	2,500	5,000
(e)(16) Roller bearings:		
(i) Overheated	5,000	7,500
(ii) Cap screw loose or missing	2,500	5,000
(iii) Cap screw lock broken or missing	1,000	2,000
(iv) Seal loose, damaged, or leaks lubricant	2,500	5,000
(g) Record of inspection:		
(1), (4) Failure to maintain record of inspection	5,000	4,000
(2) Record contains insufficient information	1,000	2,000
238.305 Interior mechanical inspection of passenger cars:		
(a) Failure to perform inspection	¹ 1,000	2,000
(b) Failure to utilize properly qualified personnel	1,000	2,000
(c)(1) Failure to protect against personal injury	2,500	5,000
(c)(2) Floors not free of condition that creates hazard	2,500	5,000
(c)(3) Access to manual door release not in place	2,000	4,000
(c)(4) Emergency equipment not in place	1,000	2,000
(c)(5) Emergency brake valve not stenciled or marked	2,500	5,000
(c)(6) Door or cover plates not properly marked	2,500	5,000
(c)(7) Safety signage not in place or legible	1,000	2,000
(c)(8) Trap door unsafe or improperly secured	2,500	5,000
(c)(9) Vestibule steps not illuminated	2,000	4,000
(c)(10) Door not safely operate as intended	2,500	5,000
(c)(11) Seat broken, loose, or not properly attached	2,500	5,000
(e) Record of inspection:		
(1), (4) Failure to maintain record of inspection	2,000	4,000
(2) Record contains insufficient information	1,000	1,000
(f) Record of inspection:		
(1), (4) Failure to maintain record of inspection	2,000	4,000
(2) Record contains insufficient information	1,000	2,000
238.307 Periodic mechanical inspection of passenger cars and unpowered vehicles:		
(a) Failure to perform periodic mechanical inspection	¹ 2,500	5,000
(b) Failure to utilize properly qualified personnel	2,500	5,000
(c)(1) Seat or seat attachment broken or loose	2,500	5,000
(c)(2) Luggage rack broken or loose	2,500	5,000
(c)(3) Bed, bunks, or restraints broken or loose	2,500	5,000
(c)(4) Emergency window exit not properly operate	2,500	5,000
(c)(5) Emergency lighting not operational	2,500	5,000
(c)(6) Switches not in proper condition	2,500	5,000
(c)(7) Coupler not in proper condition	2,500	5,000
(c)(8) Truck not equipped with securing arrangement	2,500	5,000
(c)(9) Truck center casting cracked or broken	5,000	7,500
(c)(10) General conditions endangering crew, passengers	2,500	5,000
(d) Manual door release not operate as intended	2,500	5,000
(d)(1) Seat or seat attachment broken or loose	2,500	5,000
(d)(2) Luggage rack broken or loose	2,500	5,000
(d)(3) Bed, bunks, or restraints broken or loose	2,500	5,000
(d)(4) Emergency window exit not properly operate	2,500	5,000
(d)(5) Coupler not in proper condition	2,500	5,000
(e)(1) Failure to maintain record of inspection	2,000	4,000
(i)-(iv) Record contains insufficient information	1,000	2,000
(f)(1) Record of inspection:		
(i) Failure to maintain record of inspection	2,000	4,000
(ii) Record contains insufficient information	1,000	2,000
238.309 Periodic brake equipment maintenance:		
(b) Failure to perform on MU locomotive	2,500	5,000
(c) Failure to perform on conventional locomotive	2,500	5,000
(d) Failure to perform on passenger coaches or other unpowered vehicle	2,500	5,000
(e) Failure to perform on cab car	2,500	5,000
(f) Record of periodic maintenance:		
(1), (2) Failure to maintain record or stencil	2,000	4,000
238.311 Single car tests:		
(a) Failure to test in accord with required procedure	2,500	5,000
(b) Failure to utilize properly qualified personnel	2,500	5,000
(c), (e) Failure to perform single car test	2,500	5,000
(f) Improper movement of car for testing	2,000	4,000
(g) Failure to test after repair or replacement of component	2,000	4,000
238.313 Class I brake test:		
(a) Failure to perform on commuter or short distance intercity passenger train	¹ 10,000	15,000
(b) Failure to perform on long-distance intercity passenger train	¹ 10,000	15,000
(c) Failure to perform on cars added to passenger train	¹ 5,000	7,500

Section	Violation	Willful violation
(d) Failure to utilize properly qualified personnel	5,000	7,500
(f) Passenger train used from Class I brake test with less than 100% operative brakes	5,000	7,500
(g) Partial failure to perform inspection on a passenger train	5,000	7,500
(3) Failure to adjust piston travel (per car)	2,500	5,000
(h) Failure to maintain record	2,000	4,000
238.315 Class IA brake test:		
(a) Failure to perform inspection	15,000	7,500
(d) Failure to utilize properly qualified personnel	2,500	5,000
(e) Passenger train used from Class IA brake test with improper percentage of operative brakes	5,000	7,500
(f) Partial failure to perform inspection on passenger train	2,500	5,000
238.317 Class II brake test:		
(a) Failure to perform inspection	12,500	5,000
(b) Failure to utilize properly qualified personnel	2,500	5,000
(c) Improper use of defective equipment from Class II brake test	2,500	5,000
238.319 Running brake tests:		
(a), (b) Failure to perform test	2,000	4,000
SUBPART E—SPECIFIC REQUIREMENTS FOR TIER II PASSENGER EQUIPMENT		
238.403 Crash energy management	2,500	5,000
238.405 Longitudinal static compressive strength	2,500	5,000
238.407 Anti-climbing mechanism	2,500	5,000
238.409 Forward end structures of power car cabs:		
(a) Center collision post	2,500	5,000
(b) Side collision posts	2,500	5,000
(c) Corner posts	2,500	5,000
(d) Skin	2,500	5,000
238.411 Rear end structures of power car cabs:		
(a) Corner posts	2,500	5,000
(b) Collision posts	2,500	5,000
238.413 End structures of trailer cars	2,500	5,000
238.415 Rollover strength	2,500	5,000
238.417 Side loads	2,500	5,000
238.419 Truck-to-car-body and truck component attachment	2,500	5,000
238.421 Glazing:		
(b) End-facing exterior glazing	2,500	5,000
(c) Alternate glazing requirements	2,500	5,000
(d) Glazing securement	1,000	2,000
(e) Stenciling	2,500	5,000
238.423 Fuel tanks:		
(a) External fuel tanks	2,500	5,000
(b) Internal fuel tanks	2,500	5,000
238.425 Electrical system:		
(a) Circuit protection	2,500	5,000
(b) Main battery system	2,500	5,000
(c) Power dissipation resistors	2,500	5,000
(d) Electromagnetic interference and compatibility	2,500	5,000
238.427 Suspension system	2,500	5,000
238.429 Safety Appliances:		
(a) Couplers	5,000	7,500
(b) Hand/parking brakes	5,000	7,500
(d) Handrail and handhold missing	2,500	5,000
(d)(1)–(8) Handrail or handhold improper design	2,500	5,000
(e) Sill step missing	5,000	7,500
(e)(1)–(11) Sill step improper design	2,500	5,000
(g) Optional safety appliances	2,500	5,000
238.431 Brake system	2,500	5,000
238.433 Draft System	2,500	5,000
238.435 Interior fittings and surfaces	2,500	5,000
238.437 Emergency communication	2,500	5,000
238.439 Doors:		
(a) Exterior side doors	2,500	5,000
(b) Manual override feature	2,500	5,000
(c) Notification to crew of door status	2,500	5,000
(d) Emergency back-up power	2,500	5,000
(f) End door kick-out panel or pop-out window	2,500	5,000
(g) Marking and instructions	[Reserved]	
238.441 Emergency roof hatch entrance location	2,500	5,000
238.443 Headlights	2,500	5,000
238.445 Automated monitoring	2,500	5,000
238.447 Train operator's controls and power car cab layout	2,500	5,000
SUBPART F—INSPECTION, TESTING, AND MAINTENANCE REQUIREMENTS FOR TIER II PASSENGER EQUIPMENT		
238.503 Inspection, testing, and maintenance requirements:		

Section	Violation	Willful violation
(a) Failure to develop inspection, testing, and maintenance program or obtain FRA approval	10,000	15,000
(b) Failure to comply with provisions of the program	5,000	7,500
(c) Failure to ensure equipment free of conditions which endanger safety of crew, passengers, or equipment	2,500	5,000
(d) Specific safety inspections:		
(1)(i) Failure to perform Class I brake test or equivalent	10,000	15,000
(1)(ii) Partial failure to perform Class I brake test or equivalent	5,000	7,500
(2)(i) Failure to perform exterior mechanical inspection	¹ 2,000	4,000
(2)(ii) Failure to perform interior mechanical inspection	¹ 1,000	2,000
(g) Failure to perform scheduled maintenance as required in program	2,500	5,000
(h) Failure to comply with training, qualification and designation program	5,000	7,500
(i) Failure to develop or comply with standard procedures for performing inspection, tests, and maintenance	2,500	5,000
(j) Failure to conduct annual review	5,000	7,500
(k) Failure to establish or utilize quality control program	5,000	7,500
SUBPART G—SPECIFIC SAFETY PLANNING REQUIREMENTS FOR TIER II PASSENGER EQUIPMENT		
238.603 Safety plan:		
(a) Failure to develop safety operating plan	7,500	11,000
(b) Failure to develop procurement plan	7,500	11,000
(1)–(7) Failure to develop portion of plan	2,500	5,000
(c) Failure to maintain documentation	2,500	5,000

¹A penalty may be assessed against an individual only for a willful violation. Generally when two or more violations of these regulations are discovered with respect to a single unit of passenger equipment that is placed or continued in service by a railroad, the appropriate penalties set forth above are aggregated up to a maximum of \$10,000 per day. However, failure to perform, with respect to a particular unit of passenger equipment, any of the inspections and tests required under subparts D and F of this part will be treated as a violation separate and distinct from, and in addition to, any substantive violative conditions found on that unit of passenger equipment. Moreover, the Administrator reserves the right to assess a penalty of up to \$77,000 for any violation where circumstances warrant. See 49 CFR part 209, appendix A. Failure to observe any condition for movement of defective equipment set forth in § 238.17 will deprive the railroad of the benefit of the movement-for-repair provision and make the railroad and any responsible individuals liable for penalty under the particular regulatory section(s) concerning the substantive defect(s) present on the unit of passenger equipment at the time of movement. Failure to observe any condition for the movement of passenger equipment containing defective safety appliances, other than power brakes, set forth in § 238.17(e) will deprive the railroad of the movement-for-repair provision and make the railroad and any responsible individuals liable for penalty under the particular regulatory section(s) contained in part 231 of this chapter or § 238.429 concerning the substantive defective condition. The penalties listed for failure to perform the exterior and interior mechanical inspections and tests required under § 238.303 and § 238.305 may be assessed for each unit of passenger equipment contained in a train that is not properly inspected. Whereas, the penalties listed for failure to perform the brake inspections and tests under § 238.313 through § 238.319 may be assessed for each train that is not properly inspected.

[64 FR 25660, May 12, 1999, as amended at 65 FR 41310, July 3, 2000; 67 FR 19994, Apr. 23, 2002]]

APPENDIX B TO PART 238—TEST METHODS AND PERFORMANCE CRITERIA FOR THE FLAMMABILITY AND SMOKE EMISSION CHARACTERISTICS OF MATERIALS USED IN PASSENGER CARS AND LOCOMOTIVE CABS

This appendix contains the test methods and performance criteria for the flammability and smoke emission characteristics of materials used in passenger cars and locomotive cabs, in accordance with the requirements of § 238.103.

(a) *Incorporation by reference.*

Certain documents are incorporated by reference into this appendix with the approval of the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. You may inspect a copy of each document during normal business hours at the Federal Railroad Administration, Docket Clerk, 1120 Vermont Ave., N.W., Suite 7000 or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030,

or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html. The documents incorporated by reference into this appendix and the sources from which you may obtain these documents are listed below:

(1) American Society for Testing and Materials (ASTM), 100 Barr Harbor Dr., West Conshohocken, PA 19428-2959.

(i) ASTM C 1166-00, Standard Test Method for Flame Propagation of Dense and Cellular Elastomeric Gaskets and Accessories.

(ii) ASTM D 2724-87, Standard Test Methods for Bonded, Fused, and Laminated Apparel Fabrics.

(iii) ASTM D 3574-95, Standard Test Methods for Flexible Cellular Materials—Slab, Bonded, and Molded Urethane Foams.

(iv) ASTM D 3675-98, Standard Test Method for Surface Flammability of Flexible Cellular Materials Using a Radiant Heat Energy Source.

(v) ASTM E 119-00a, Standard Test Methods for Fire Tests of Building Construction and Materials.

(vi) ASTM E 162–98, Standard Test Method for Surface Flammability of Materials Using a Radiant Heat Energy Source.

(vii) ASTM E 648–00, Standard Test Method for Critical Radiant Flux of Floor-Covering Systems Using a Radiant Heat Energy Source.

(viii) ASTM E 662–01, Standard Test Method for Specific Optical Density of Smoke Generated by Solid Materials.

(ix) ASTM E 1534–99, Standard Test Method for Heat and Visible Smoke Release Rates for Materials and Products Using an Oxygen Consumption Calorimeter.

(x) ASTM E 1537–99, Standard Test Method for Fire Testing of Upholstered Furniture.

(xi) ASTM E 1590–01, Standard Test Method for Fire Testing of Mattresses.

(2) General Services Administration, Federal Supply Service, Specification Section, 470 E. L'Enfant Plaza, S.W., Suite 8100, Washington, D.C., 20407. FED–STD–191A–Textile Test Method 5830, Leaching Resistance of Cloth; Standard Method (July 20, 1978).

(3) State of California, Department of Consumer Affairs, Bureau of Home Furnishings and Thermal Insulation, 3485 Orange Grove Avenue, North Highlands, CA 95660–5595.

(i) California Technical Bulletin (Cal TB) 129, Flammability Test Procedure for Mattresses for Use in Public Buildings (October, 1992).

(ii) Cal TB 133, Flammability Test Procedure for Seating Furniture for Use in Public Occupancies (January, 1991).

(b) *Definitions.* As used in this appendix—

Average heat release rate ($\dot{q}''_{180}$) means, as defined in ASTM E 1354–99, the average heat release rate per unit area in the time period

beginning at the time of ignition and ending 180 seconds later.

Critical radiant flux (C.R.F.) means, as defined in ASTM E 648–00, a measure of the behavior of horizontally-mounted floor covering systems exposed to a flaming ignition source in a graded radiant heat energy environment in a test chamber.

Flame spread index (I_s) means, as defined in ASTM E 162–98, a factor derived from the rate of progress of the flame front (F_s) and the rate of heat liberation by the material under test (Q), such that $I_s = F_s \times Q$.

Flaming dripping means periodic dripping of flaming material from the site of material burning or material installation.

Flaming running means continuous flaming material leaving the site of material burning or material installation.

Heat release rate means, as defined in ASTM E 1354–99, the heat evolved from a specimen per unit of time.

Specific extinction area (σ_f) means, as defined in ASTM E 1354–99, specific extinction area for smoke.

Specific optical density (D_s) means, as defined in ASTM E 662–01, the optical density measured over unit path length within a chamber of unit volume, produced from a specimen of unit surface area, that is irradiated by a heat flux of 2.5 watts/cm² for a specified period of time.

Surface flammability means the rate at which flames will travel along surfaces.

(c) *Required test methods and performance criteria.* The materials used in locomotive cabs and passenger cars shall be tested according to the methods and meet the performance criteria set forth in the following table and notes:

Pt. 238, App. B

49 CFR Ch. II (10–1–02 Edition)

**Test Procedures and Performance Criteria for the Flammability and Smoke Emission
Characteristics of Materials Used in Passenger Cars and Locomotive Cabs**

CATEGORY	FUNCTION OF MATERIAL	TEST METHOD	PERFORMANCE CRITERIA
Cushions, Mattresses	All ^{1, 2, 3, 4, 5, 6, 7, 8}	ASTM D 3675-98	$I_s \leq 25$
		ASTM E 662-01	$D_s (1.5) \leq 100$ $D_s (4.0) \leq 175$
Fabrics	Seat upholstery, mattress ticking and covers, curtains, draperies, wall coverings, and window shades ^{1, 2, 3, 6, 7, 8}	14 CFR 25, Appendix F, Part I, (vertical test)	Flame time ≤ 10 seconds Burn length ≤ 6 inches
		ASTM E 662-01	$D_s (4.0) \leq 200$
Other Vehicle Components ^{9, 10, 11, 12}	Seat and mattress frames, wall and ceiling panels, seat and toilet shrouds, tray and other tables, partitions, shelves, opaque windscreens, end caps, roof housings, and component boxes and covers ^{1, 2}	ASTM E 162-98	$I_s \leq 35$
		ASTM E 662-01	$D_s (1.5) \leq 100$ $D_s (4.0) \leq 200$
	Flexible cellular foams used in armrests and seat padding ^{1, 2, 4, 6}	ASTM D 3675-98	$I_s \leq 25$
		ASTM E 662-01	$D_s (1.5) \leq 100$ $D_s (4.0) \leq 175$
	Thermal and acoustic insulation ^{1, 2}	ASTM E 162-98	$I_s \leq 25$
		ASTM E 662-01	$D_s (4.0) \leq 100$
	HVAC ducting ^{1, 2}	ASTM E 162-98	$I_s \leq 35$
		ASTM E 662-01	$D_s (4.0) \leq 100$
	Floor covering ^{12, 13}	ASTM E 648-00	C.R.F. $\geq 5 \text{ kW/m}^2$
		ASTM E 662-01	$D_s (1.5) \leq 100$ $D_s (4.0) \leq 200$
	Light diffusers, windows and transparent plastic windscreens ^{2, 14}	ASTM E 162-98	$I_s \leq 100$
		ASTM E 662-01	$D_s (1.5) \leq 100$ $D_s (4.0) \leq 200$
Elastomers ^{1, 10, 11}	Window gaskets, door nosings, inter-car diaphragms, roof mats, and seat springs	ASTM C 1166-00	Average flame propagation ≤ 4 inches
		ASTM E 662-01	$D_s (1.5) \leq 100$ $D_s (4.0) \leq 200$
Structural Components ¹⁵	Flooring ¹⁶ , Other ¹⁷	ASTM E 119-00a	Pass

¹Materials tested for surface flammability shall not exhibit any flaming running or dripping.

²The ASTM E 662 01 maximum test limits for smoke emission (specific optical density) shall be measured in either the flaming or

¹Materials tested for surface flammability shall not exhibit any flaming running or dripping.

²The ASTM E 662-01 maximum test limits for smoke emission (specific optical density) shall be measured in either the flaming or

non-flaming mode, utilizing the mode which generates the most smoke.

³Testing of a complete seat assembly (including cushions, fabric layers, upholstery) according to ASTM E 1537–99 using the pass/fail criteria of Cal TB 133, and testing of a complete mattress assembly (including foam and ticking) according to ASTM E 1590–01 using the pass/fail criteria of Cal TB 129 shall be permitted in lieu of the test methods prescribed herein, provided the assembly component units remain unchanged or new (replacement) assembly components possess equivalent fire performance properties to the original components tested. A fire hazard analysis must also be conducted that considers the operating environment within which the seat or mattress assembly will be used in relation to the risk of vandalism, puncture, cutting, or other acts which may expose the individual components of the assemblies to an ignition source. Notes 5, 6, 7, and 8 apply.

⁴Testing is performed without upholstery.

⁵The surface flammability and smoke emission characteristics shall be demonstrated to be permanent after dynamic testing according to ASTM D 3574–95, Test I₂ (Dynamic Fatigue Test by the Roller Shear at Constant Force) or Test I₃ (Dynamic Fatigue Test by Constant Force Pounding) both using Procedure B, except that the test samples shall be a minimum of 6 inches (154 mm) by 18 inches (457 mm) by the thickness of the material in its end use configuration, or multiples thereof. If Test I₃ is used, the size of the indenter described in paragraph 96.2 shall be modified to accommodate the specified test specimen.

⁶The surface flammability and smoke emission characteristics shall be demonstrated to be permanent by washing, if appropriate, according to FED-STD-191A Textile Test Method 5830.

⁷The surface flammability and smoke emission characteristics shall be demonstrated to be permanent by dry-cleaning, if appropriate, according to ASTM D 2724–87.

⁸Materials that cannot be washed or dry-cleaned shall be so labeled and shall meet the applicable performance criteria after being cleaned as recommended by the manufacturer.

⁹Signage is not required to meet any flammability or smoke emission performance criteria specified in this Appendix.

¹⁰Materials used to fabricate miscellaneous, discontinuous small parts (such as knobs, rollers, fasteners, clips, grommets, and small electrical parts) that will not contribute materially to fire growth in end use configuration are exempt from flammability and smoke emission performance requirements, provided that the surface area of any individual small part is less than 16 square inches (100 cm²) in end use configuration and an appropriate fire hazard analysis is con-

ducted which addresses the location and quantity of the materials used, and the vulnerability of the materials to ignition and contribution to flame spread.

¹¹If the surface area of any individual small part is less than 16 square inches (100 cm²) in end use configuration, materials used to fabricate such a part may be tested in accordance with ASTM E 1354–99 as an alternative to both (a) the ASTM E 162–98 flammability test procedure, or the appropriate flammability test procedure otherwise specified in the table, and (b) the ASTM E 662–01 smoke generation test procedure. Testing shall be at 50 kW/m² applied heat flux with a retainer frame. Materials tested in accordance with ASTM E 1354–99 shall meet the following performance criteria: average heat release rate ($\dot{q}''_{180}$) less than or equal to 100 kW/m², and average specific extinction area (σ_T) less than or equal to 500 m²/kg over the same 180-second period.

¹²Carpeting used as a wall or ceiling covering shall be tested according to ASTM E 162–98 and ASTM E 662–01 and meet the respective criteria of I_s less than or equal to 35 and D_s (1.5) less than or equal to 100 and D_s (4.0) less than or equal to 200. Notes 1 and 2 apply.

¹³Floor covering shall be tested with padding in accordance with ASTM E 648–00, if the padding is used in the actual installation.

¹⁴For double window glazing, only the interior glazing is required to meet the requirements specified herein. (The exterior glazing is not required to meet these requirements.)

¹⁵Penetrations (ducts, etc.) shall be designed against acting as passageways for fire and smoke and representative penetrations shall be included as part of test assemblies.

¹⁶A structural flooring assembly separating the interior of a vehicle from its undercarriage shall meet the performance criteria during a nominal test period as determined by the railroad. The nominal test period must be twice the maximum expected time period under normal circumstances for a vehicle to stop completely and safely from its maximum operating speed, plus the time necessary to evacuate all the vehicle's occupants to a safe area. The nominal test period must not be less than 15 minutes. Only one specimen need be tested. A proportional reduction may be made in the dimensions of the specimen provided it serves to truly test the ability of the structural flooring assembly to perform as a barrier against under-vehicle fires. The fire resistance period required shall be consistent with the safe evacuation of a full load of passengers from the vehicle under worst-case conditions.

¹⁷Portions of the vehicle body which separate major ignition sources, energy sources, or sources of fuel-load from vehicle interiors, shall have sufficient fire endurance as determined by a fire hazard analysis acceptable to

the railroad which addresses the location and quantity of the materials used, as well as vulnerability of the materials to ignition, flame spread, and smoke generation. These portions include equipment carrying portions of a vehicle's roof and the interior structure separating the levels of a bi-level car, but do not include a flooring assembly subject to Note 16. A railroad is not required to use the ASTM E 119-00a test method.

[67 FR 42910, June 25, 2002]

APPENDIX C TO PART 238—SUSPENSION SYSTEM SAFETY PERFORMANCE STANDARDS

This appendix contains the minimum suspension system safety performance standards for Tier II passenger equipment as required by §238.427. These requirements shall be the basis for evaluating suspension system safety performance until an industry standard acceptable to FRA is developed and approved under the procedures provided in §238.21.

(a) Passenger equipment suspension systems shall be designed to limit the lateral and vertical forces and lateral to vertical (L/V) ratios, for the time duration required to travel five feet at any operating speed or over any class of track, under all operating conditions as determined by the railroad, as follows:

(1) The maximum single wheel lateral to vertical force (L/V) ratio shall not exceed Nadal's limit as follows:

$$\text{Wheel L/V} \leq \frac{\tan(\delta) - \mu}{1 + \mu \tan(\delta)}$$

where:

δ =flange angle (deg).

μ =coefficient of friction of 0.5.

(2) The net axle lateral force shall not exceed 0.5 times the static vertical axle load.

(3) The vertical wheel/rail force shall not be less than or equal to 10 percent of the static vertical wheel load.

(4) The sum of the vertical wheel loads on one side of any truck shall not be less than or equal to 20 percent of the static vertical axle load. This shall include the effect of a crosswind allowance as specified by the railroad for the intended service.

(5) The maximum truck side L/V ratio shall not exceed 0.6.

(6) When stopped on track with a uniform 6-inch superelevation, vertical wheel loads, at all wheels, shall not be less than or equal to 60 percent of the nominal vertical wheel load on level track.

(b) For purposes of this appendix, wheel/rail force measurements shall be processed through a low pass filter having a cut-off frequency of 25 Hz.

APPENDIX D TO PART 238—REQUIREMENTS FOR EXTERNAL FUEL TANKS ON TIER I LOCOMOTIVES

The requirements contained in this appendix are intended to address the structural and puncture resistance properties of the locomotive fuel tank to reduce the risk of fuel spillage to acceptable levels under derailment and minor collision conditions.

(a) *Structural strength.*

(1) *Load case 1—minor derailment.* The end plate of the fuel tank shall support a sudden loading of one-half the weight of the car body at a vertical acceleration of 2g, without exceeding the ultimate strength of the material. The load is assumed to be supported on one rail, within an eight inch band (plus or minus) at a point nominally above the head of the rail, on tangent track. Consideration should be given in the design of the fuel tank to maximize the vertical clearance between the top of the rail and the bottom of the fuel tank.

(2) *Load case 2—jackknifed locomotive.* The fuel tank shall support transversely at the center a sudden loading equivalent to one half the weight of the locomotive at a vertical acceleration of 2g, without exceeding the ultimate strength of the material. The load is assumed to be supported on one rail, distributed between the longitudinal center line and the edge of the tank bottom, with a rail head surface of two inches.

(3) *Load case 3—side impact.* In a side impact collision by an 80,000 pound Gross Vehicle Weight tractor/trailer at the longitudinal center of the fuel tank, the fuel tank shall withstand, without exceeding the ultimate strength, a 200,000 pound load (2.5g) distributed over an area of six inches by forty-eight inches (half the bumper area) at a height of thirty inches above the rail (standard DOT bumper height).

(4) *Load case 4—penetration resistance.* The minimum thickness of the sides, bottom sheet and end plates of the fuel tank shall be equivalent to a $\frac{5}{16}$ -inch steel plate with a 25,000 pounds-per-square-inch yield strength (where the thickness varies inversely with the square root of yield strength). The lower one third of the end plates shall have the equivalent penetration resistance by the above method of a $\frac{3}{4}$ -inch steel plate with a 25,000 pounds-per-square-inch yield strength. This may be accomplished by any combination of materials or other mechanical protection.

(b) *Sideswipe.* To minimize fuel tank damage during sideswipes (railroad vehicles and grade crossings), all drain plugs, clean-out ports, inspection covers, sight glasses, gauge openings, etc., must be flush with the tank surface or adequately protected to avoid catching foreign objects or breakage. All seams must be protected or flush to avoid catching foreign objects.

(c) *Spill controls.* Vents and fills shall be designed to avert spillage of fuel in the event of a roll over.

APPENDIX E TO PART 238—GENERAL PRINCIPLES OF RELIABILITY-BASED MAINTENANCE PROGRAMS

(a) Any maintenance program has the following four basic objectives:

(1) To ensure realization of the design level of safety and reliability of the equipment;

(2) To restore safety and reliability to their design levels when deterioration has occurred;

(3) To obtain the information necessary for design improvements of those items whose design reliability proves inadequate; and

(4) To accomplish these goals at a minimum total cost, including maintenance costs and the costs of residual failures.

(b) Reliability-based maintenance programs are based on the following general principles. A failure is an unsatisfactory condition. There are two types of failures: functional and potential. Functional failures are usually reported by operating crews. Conversely, maintenance crews usually discover potential failures. A potential failure is an identifiable physical condition, which indicates that a functional failure is imminent. The consequences of a functional failure determine the priority of a maintenance effort. These consequences fall into the following general categories:

(1) Safety consequences, involving possible loss of the equipment and its occupants;

(2) Operational consequences, which involve an indirect economic loss as well as the direct cost of repair;

(3) Non-operational consequences, which involve only the direct cost of repair; or

(4) Hidden failure consequences, which involve exposure to a possible multiple failure as a result of the undetected failure of a hidden function.

(c) In a reliability-based maintenance program, scheduled maintenance is required for any item whose loss of function or mode of failure could have safety consequences. If preventative tasks cannot reduce the risk of such failures to an acceptable level, the item requires redesign to alter its failure consequences. Scheduled maintenance is also required for any item whose functional failure will not be evident to the operating crew, and therefore reported for corrective action. In all other cases the consequences of failure are economic, and maintenance tasks directed at preventing such failures must be justified on economic grounds. All failure consequences, including economic consequences, are established by the design characteristics of the equipment and can be altered only by basic changes in the design. Safety consequences can, in nearly all cases, be reduced to economic consequences by the

use of redundancy. Hidden functions can usually be made evident by instrumentation or other design features. The feasibility and cost effectiveness of scheduled maintenance depend on the inspectability of the component, and the cost of corrective maintenance depends on its failure modes and design reliability.

(d) The design reliability of equipment or components will only be achieved with an effective maintenance program. This level of reliability is established by the design of each component and the manufacturing processes that produced it. Scheduled maintenance can ensure that design reliability of each component is achieved, but maintenance alone cannot yield a level of reliability beyond the design reliability.

(e) When a maintenance program is developed, it includes tasks that satisfy the criteria for both applicability and effectiveness. The applicability of a task is determined by the characteristics of the component or equipment to be maintained. The effectiveness is stated in terms of the consequences that the task is designed to prevent. The basic types of tasks that are performed by maintenance personnel are each applicable under a unique set of conditions. Tasks may be directed at preventing functional failures or preventing a failure event consisting of the sequential occurrence of two or more independent failures which may have consequences that would not be produced by any of the failures occurring separately. The task types include:

(1) Inspections of an item to find and correct any potential failures;

(2) Rework/remanufacture/overhaul of an item at or before some specified time or age limit;

(3) Discard of an item (or parts of it) at or before some specified life limit; and

(4) Failure finding inspections of a hidden-function item to find and correct functional failures that have already occurred but were not evident to the operating crew.

(b) Components or systems in a reliability-based maintenance program may be defined as simple or complex. A simple component or system is one that is subject to only one or a very few failure modes. This type of component or system frequently shows decreasing reliability with increasing operating age. An age/time limit may be used to reduce the overall failure rate of simple components or systems. Here, safe-life limits, fail-safe designs, or damage tolerance-based residual life calculations may be imposed on a single component or system to play a crucial role in controlling critical failures. Complex components or systems are ones whose functional failure may result from many different failure modes and show little or no decrease in overall reliability with increasing age unless there is a dominant failure mode. Therefore, age limits imposed on complex

components or systems have little or no effect on their overall failure rates.

(g) When planning the maintenance of a component or system to protect the safety and operating capability of the equipment, a number of items must be considered in the reliability assessment process:

(1) The consequences of each type of functional failure;

(2) The visibility of a functional failure to the operating crew (evidence that a failure has occurred);

(3) The visibility of reduced resistance to failure (evidence that a failure is imminent);

(4) The age-reliability characteristics of each item;

(5) The economic tradeoff between the cost of scheduled maintenance and the benefits to be derived from it;

(6) A multiple failure, resulting from a sequence of independent failures, may have consequences that would not be caused by any one of the individual failures alone. These consequences are taken into account in the definition of the failure consequences for the first failure; and

(7) A default strategy governs decision making in the absence of full information or agreement. This strategy provides for conservative initial decisions, to be revised on the basis of information derived from operating experience.

(h) A successful reliability-based maintenance program must be dynamic. Any prior-to-service program is based on limited information. As such, the operating organization must be prepared to collect and respond to real data throughout the operating life of the equipment. Management of the ongoing maintenance program requires an organized information system for surveillance and analysis of the performance of each item under actual operating conditions. This information is needed to determine the refinements and modifications to be made in the initial maintenance program (including the adjustment of task intervals) and to determine the need for product improvement. The information derived from operating experience may be considered to have the following hierarchy of importance in the reliability-based maintenance program:

(1) Failures that could affect operating safety;

(2) Failures that have operational consequences;

(3) The failure modes of units removed as a result of failures;

(4) The general condition of unfailed parts in units that have failed; and

(5) The general condition of serviceable units inspected as samples.

(i) At the time an initial maintenance program is developed, information is usually available to determine the tasks necessary to protect safety and operating capability. However, the information required to deter-

mine optimum task intervals and the applicability of age or life limits can be obtained only from age or life exploration after the equipment enters service. With any new equipment there is always the possibility of unanticipated failure modes. The first occurrence of any serious unanticipated failure should immediately set into motion the following improvement cycle:

(1) An inspection task is developed to prevent recurrences while the item is being redesigned;

(2) The operating fleet is modified to incorporate the redesigned part; and

(3) After the modification has proved successful, the special inspection task is eliminated from the maintenance program.

(j) Component improvements based on identification of the actual reliability characteristics of each item through age or life exploration, is part of the normal development cycle of all complex equipment.

PART 239—PASSENGER TRAIN EMERGENCY PREPAREDNESS

Subpart A—General

Sec.

239.1 Purpose and scope.

239.3 Application.

239.5 Preemptive effect.

239.7 Definitions.

239.9 Responsibility for compliance.

239.11 Penalties.

239.13 Waivers.

239.15 Information collection.

Subpart B—Specific Requirements

239.101 Emergency preparedness plan.

239.103 Passenger train emergency simulations.

239.105 Debriefing and critique.

239.107 Emergency exits.

Subpart C—Review, Approval, and Retention of Emergency Preparedness Plans

239.201 Emergency preparedness plan; filing and approval.

239.203 Retention of emergency preparedness plan.

Subpart D—Operational (Efficiency) Tests; Inspection of Records and Recordkeeping

239.301 Operational (efficiency) tests.

239.303 Electronic recordkeeping.

APPENDIX A TO PART 239—SCHEDULE OF CIVIL PENALTIES

AUTHORITY: 49 U.S.C. 20102–20103, 20105–20114, 20133, 21301, 21304, and 21311; 28 U.S.C. 2461, note; and 49 CFR 1.49(c), (g), (m).

§ 239.1

SOURCE: 63 FR 24676, May 4, 1998, unless otherwise noted.

Subpart A—General

§ 239.1 Purpose and scope.

(a) The purpose of this part is to reduce the magnitude and severity of casualties in railroad operations by ensuring that railroads involved in passenger train operations can effectively and efficiently manage passenger train emergencies.

(b) This part prescribes minimum Federal safety standards for the preparation, adoption, and implementation of emergency preparedness plans by railroads connected with the operation of passenger trains, and requires each affected railroad to instruct its employees on the provisions of its plan. This part does not restrict railroads from adopting and enforcing additional or more stringent requirements not inconsistent with this part.

§ 239.3 Application.

(a) Except as provided in paragraph (b) of this section, this part applies to all:

(1) Railroads that operate intercity or commuter passenger train service on standard gage track which is part of the general railroad system of transportation;

(2) Railroads that provide commuter or other short-haul rail passenger train service in a metropolitan or suburban area (as described by 49 U.S.C. 20102(1)), including public authorities operating passenger train service; and

(3) Passenger or freight railroads hosting the operation of passenger train service described in paragraph (a)(1) or (a)(2) of this section.

(b) This part does *not* apply to:

(1) Rapid transit operations in an urban area that are not connected with the general railroad system of transportation;

(2) Operation of private cars, including business/office cars and circus trains; or

(3) Tourist, scenic, historic, or excursion operations, whether on or off the general railroad system.

49 CFR Ch. II (10–1–04 Edition)

§ 239.5 Preemptive effect.

Under 49 U.S.C. 20106 (formerly section 205 of the Federal Railroad Safety Act of 1970 (45 U.S.C. 434)), issuance of this part preempts any State law, rule, regulation, order, or standard covering the same subject matter, except a provision necessary to eliminate or reduce an essentially local safety hazard, that is not incompatible with Federal law or regulation and does not unreasonably burden interstate commerce.

§ 239.7 Definitions.

As used in this part—

Adjacent rail modes of transportation means other railroads, trolleys, light rail, heavy transit, and other vehicles operating on rails or electromagnetic guideways which are expressly identified in a railroad's emergency preparedness plan.

Administrator means the Administrator of the Federal Railroad Administration or the Administrator's delegate.

Control center means a central location on a railroad with responsibility for directing the safe movement of trains.

Crewmember means a person, other than a passenger, who is assigned to perform either:

(1) On-board functions connected with the movement of the train (i.e., an employee of a railroad, or of a contractor to a railroad, who is assigned to perform service subject to the Federal hours of service laws during a tour of duty) or

(2) On-board functions in a sleeping car or coach assigned to intercity service, other than food, beverage, or security service.

Division headquarters means the location designated by the railroad where a high-level operating manager (e.g., a superintendent, division manager, or equivalent), who has jurisdiction over a portion of the railroad, has an office.

Emergency or emergency situation means an unexpected event related to the operation of passenger train service involving a significant threat to the safety or health of one or more persons requiring immediate action, including:

(1) A derailment;

(2) A fatality at a grade crossing;

Federal Railroad Administration, DOT

§ 239.11

(3) A passenger or employee fatality, or a serious illness or injury to one or more passengers or crewmembers requiring admission to a hospital;

(4) An evacuation of a passenger train; and

(5) A security situation (e.g., a bomb threat).

Emergency preparedness plan means one or more documents focusing on preparedness and response in dealing with a passenger train emergency.

Emergency responder means a member of a police or fire department, or other organization involved with public safety charged with providing or coordinating emergency services, who responds to a passenger train emergency.

Emergency window means that segment of a side facing glazing location which has been designed to permit rapid and easy removal in an emergency situation.

FRA means the Federal Railroad Administration.

Joint operations means rail operations conducted by more than one railroad on the same track, except as necessary for the purpose of interchange, regardless of whether such operations are the result of:

(1) Contractual arrangements between the railroads;

(2) Order of a governmental agency or a court of law; or

(3) Any other legally binding directive.

Passenger train service means the transportation of persons (other than employees, contractors, or persons riding equipment to observe or monitor railroad operations) by railroad in intercity passenger service or commuter or other short-haul passenger service in a metropolitan or suburban area.

Person includes all categories of entities covered under 1 U.S.C. 1, including, but not limited to, a railroad; any manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any passenger; any trespasser or nontrespasser; any independent contractor providing goods or services to a railroad; any volunteer providing goods or services to a railroad; and any employee of such owner, manufacturer,

lessor, lessee, or independent contractor.

Private car means a rail passenger car used to transport non-revenue passengers on an occasional contractual basis, and includes business or office cars and circus trains.

Qualified means a status attained by an employee who has successfully completed any required training for, has demonstrated proficiency in, and has been authorized by the employer to perform the duties of a particular position or function involving emergency preparedness.

Railroad means:

(1) Any form of non-highway ground transportation that runs on rails or electromagnetic guideways, including—

(i) Commuter or other short-haul rail passenger service in a metropolitan or suburban area and commuter railroad service that was operated by the Consolidated Rail Corporation on January 1, 1979, and

(ii) High speed ground transportation systems that connect metropolitan areas, without regard to whether those systems use new technologies not associated with traditional railroads, but does not include rapid transit operations in an urban area that are not connected to the general railroad system of transportation and

(2) A person that provides railroad transportation, whether directly or by contracting out operation of the railroad to another person.

Railroad officer means any supervisory employee of a railroad.

System headquarters means the location designated by the railroad as the general office for the railroad system.

§ 239.9 Responsibility for compliance.

Although the requirements of this part are stated in terms of the duty of a railroad, when any person, including a contractor to a railroad, performs any function required by this part, that person (whether or not a railroad) shall perform that function in accordance with this part.

§ 239.11 Penalties.

Any person who violates any requirement of this part or causes the violation of any such requirement is subject

§ 239.13

to a civil penalty of at least \$550 and not more than \$11,000 per violation, except that: Penalties may be assessed against individuals only for willful violations, and, where a grossly negligent violation or a pattern of repeated violations has created an imminent hazard of death or injury to persons, or has caused death or injury, a penalty not to exceed \$27,000 per violation may be assessed. Each day a violation continues shall constitute a separate offense. Any person who knowingly and willfully falsifies a record or report required by this part may be subject to criminal penalties under 49 U.S.C. 21311 (formerly codified in 45 U.S.C. 438(e)). Appendix A contains a schedule of civil penalty amounts used in connection with this part.

[63 FR 24676, May 4, 1998, as amended at 69 FR 30595, May 28, 2004]

§ 239.13 Waivers.

(a) Any person subject to a requirement of this part may petition the Administrator for a waiver of compliance with such requirement. The filing of such a petition does not affect that person's responsibility for compliance with that requirement while the petition is being considered.

(b) Each petition for waiver must be filed in the manner and contain the information required by part 211 of this chapter.

(c) If the Administrator finds that a waiver of compliance is in the public interest and is consistent with railroad safety, the Administrator may grant the waiver subject to any conditions the Administrator deems necessary.

§ 239.15 Information collection.

(a) The information collection requirements of this part have been reviewed by the Office of Management and Budget pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d) *et seq.*), and have been assigned OMB control number 2130-0545.

(b) The information collection requirements are found in the following sections: §§ 239.101, 239.103, 239.105, 239.107, 239.201, 239.203, 239.301, and 239.303.

49 CFR Ch. II (10-1-04 Edition)

Subpart B—Specific Requirements

§ 239.101 Emergency preparedness plan.

(a) Each railroad to which this part applies shall adopt and comply with a written emergency preparedness plan approved by FRA under the procedures of § 239.201. The plan shall include the following elements and procedures for implementing each plan element.

(1) *Communication.* (i) *Initial and on-board notification.* An on-board crewmember shall quickly and accurately assess the passenger train emergency situation and then notify the control center as soon as practicable by the quickest available means. As appropriate, an on-board crewmember shall inform the passengers about the nature of the emergency and indicate what corrective countermeasures are in progress.

(ii) *Notifications by control center.* The control center shall promptly notify outside emergency responders, adjacent rail modes of transportation, and appropriate railroad officials that a passenger train emergency has occurred. Each railroad shall designate an employee responsible for maintaining current emergency telephone numbers for use in making such notifications.

(2) *Employee training and qualification.* (i) *On-board personnel.* The railroad's emergency preparedness plan shall address individual employee responsibilities and provide for initial training, as well as periodic training at least once every two calendar years thereafter, on the applicable plan provisions. As a minimum, the initial and periodic training shall include:

- (A) Rail equipment familiarization;
- (B) Situational awareness;
- (C) Passenger evacuation;
- (D) Coordination of functions; and
- (E) "Hands-on" instruction concerning the location, function, and operation of on-board emergency equipment.

(ii) *Control center personnel.* The railroad's emergency preparedness plan shall require initial training of responsible control center personnel, as well as periodic training at least once every

two calendar years thereafter, on appropriate courses of action for each potential emergency situation. As a minimum, the initial and periodic training shall include:

(A) Dispatch territory familiarization; and

(B) Protocols governing internal communications between appropriate control center personnel whenever an imminent potential emergency situation exists.

(iii) *Initial training schedule for current employees.* The railroad's emergency preparedness plan shall provide for the completion of initial training of all on-board and control center employees who are employed by the railroad on the date that the plan is conditionally approved under § 239.201(b)(1), in accordance with the following schedule:

(A) For each railroad that provides commuter or other short-haul passenger train service and whose operations include less than 150 route miles and less than 200 million passenger miles annually, not more than one year after January 29, 1999, or not more than 90 days after commencing passenger operations, whichever is later.

(B) For each railroad that provides commuter or other short-haul passenger train service and whose operations include at least 150 route miles or at least 200 million passenger miles annually, not more than two years after January 29, 1999, or not more than 180 days after commencing passenger operations, whichever is later.

(C) For each railroad that provides intercity passenger train service, regardless of the number of route miles or passenger miles, not more than two years after January 29, 1999, or not more than 180 days after commencing passenger operations, whichever is later.

(D) For each freight railroad that hosts passenger train service, regardless of the number of route miles or passenger miles of that service, not more than one year after January 29, 1999, or not more than 90 days after the hosting begins, whichever is later.

(iv) *Initial training schedule for new employees.* The railroad's emergency preparedness plan shall provide for the completion of initial training of all on-

board and control center employees who are hired by the railroad after the date on which the plan is conditionally approved under § 239.201(b)(1). Each employee shall receive initial training within 90 days after the employee's initial date of service.

(v) *Testing of on-board and control center personnel.* A railroad shall have procedures for testing a person being evaluated for qualification under the emergency preparedness plan. The types of testing selected by the railroad shall be:

(A) Designed to accurately measure an individual employee's knowledge of his or her responsibilities under the plan;

(B) Objective in nature;

(C) Administered in written form; and

(D) Conducted without reference by the person being tested to open reference books or other materials, except to the degree the person is being tested on his or her ability to use such reference books or materials.

(vi) *On-board staffing.* (A) Except as provided in paragraph (a)(2)(vi)(B), all crewmembers on board a passenger train shall be qualified to perform the functions for which they are responsible under the provisions of the applicable emergency preparedness plan.

(B) A freight train crew relieving an expired passenger train crew en route is not required to be qualified under the emergency preparedness plan, provided that at least one member of the expired passenger train crew remains on board and is available to perform excess service under the Federal hours of service laws in the event of an emergency.

(3) *Joint operations.* (i) Each railroad hosting passenger train service shall address its specific responsibilities consistent with this part.

(ii) In order to achieve an optimum level of emergency preparedness, each railroad hosting passenger train service shall communicate with each railroad that provides or operates such service and coordinate applicable portions of the emergency preparedness plan. All of the railroads involved in hosting, providing, and operating a passenger train service operation shall

jointly adopt one emergency preparedness plan that addresses each entity's specific responsibilities consistent with this part. Nothing in this paragraph shall restrict the ability of the railroads to provide for an appropriate assignment of responsibility for compliance with this part among those railroads through a joint operating agreement or other binding contract. However, the assignor shall not be relieved of responsibility for compliance with this part.

(4) *Special circumstances.* (i) *Tunnels.* When applicable, the railroad's emergency preparedness plan shall reflect readiness procedures designed to ensure passenger safety in an emergency situation occurring in a tunnel of 1,000 feet or more in length. The railroad's emergency preparedness plan shall address, as a minimum, availability of emergency lighting, access to emergency evacuation exits, benchwall readiness, ladders for detrainment, effective radio or other communication between on-board crewmembers and the control center, and options for assistance from other trains.

(ii) *Other operating considerations.* When applicable, the railroad's emergency preparedness plan shall address passenger train emergency procedures involving operations on elevated structures, including drawbridges, and in electrified territory.

(iii) *Parallel operations.* When applicable, the railroad's emergency preparedness plan shall require reasonable and prudent action to coordinate emergency efforts where adjacent rail modes of transportation run parallel to either the passenger railroad or the railroad hosting passenger operations.

(5) *Liaison with emergency responders.* Each railroad to which this part applies shall establish and maintain a working relationship with the on-line emergency responders by, as a minimum:

(i) Developing and making available a training program for all on-line emergency responders who could reasonably be expected to respond during an emergency situation. The training program shall include an emphasis on access to railroad equipment, location of railroad facilities, and communications interface, and provide informa-

tion to emergency responders who may not have the opportunity to participate in an emergency simulation. Each affected railroad shall either offer the training directly or provide the program information and materials to state training institutes, firefighter organizations, or police academies;

(ii) Inviting emergency responders to participate in emergency simulations; and

(iii) Distributing applicable portions of its current emergency preparedness plan at least once every three years, or whenever the railroad materially changes its plan in a manner that could reasonably be expected to affect the railroad's interface with the on-line emergency responders, whichever occurs earlier, including documentation concerning the railroad's equipment and the physical characteristics of its line, necessary maps, and the position titles and telephone numbers of relevant railroad officers to contact.

(6) *On-board emergency equipment.* (i) *General.* Each railroad's emergency preparedness plan shall state the types of emergency equipment to be kept on board and indicate their location(s) on each passenger car that is in service. Effective May 4, 1999, or not more than 120 days after commencing passenger operations, whichever is later, this equipment shall include, at a minimum:

(A) One fire extinguisher per passenger car;

(B) One pry bar per passenger car; and

(C) One flashlight per on-board crewmember.

(ii) Effective May 4, 1999, or not more than 120 days after commencing passenger operations, whichever is later, each railroad that provides intercity passenger train service shall also equip each passenger train that is in service with at least one first-aid kit accessible to crewmembers that contains, at a minimum:

(A) Two small gauze pads (at least 4x4 inches);

(B) Two large gauze pads (at least 8x10 inches);

(C) Two adhesive bandages;

(D) Two triangular bandages;

(E) One package of gauge roller bandage that is at least two inches wide;

(F) Wound cleaning agent, such as sealed moistened towelettes;

(G) One pair of scissors;

(H) One set of tweezers;

(I) One roll of adhesive tape;

(J) Two pairs of latex gloves; and

(K) One resuscitation mask.

(iii) *On-board emergency lighting.* Consistent with the requirements of part 238 of this chapter, auxiliary portable lighting (e.g., a handheld flashlight) must be accessible and provide, at a minimum:

(A) Brilliant illumination during the first 15 minutes after the onset of an emergency situation; and

(B) Continuous or intermittent illumination during the next 60 minutes after the onset of an emergency situation.

(iv) *Maintenance.* Each railroad's emergency preparedness plan shall provide for scheduled maintenance and replacement of first-aid kits, on-board emergency equipment, and on-board emergency lighting.

(7) *Passenger safety information.* (i) *General.* Each railroad's emergency preparedness plan shall provide for passenger awareness of emergency procedures, to enable passengers to respond properly during an emergency.

(ii) *Passenger awareness program activities.* Each railroad shall conspicuously and legibly post emergency instructions inside all passenger cars (e.g., on car bulkhead signs, seatback decals, or seat cards) and shall utilize one or more additional methods to provide safety awareness information including, but not limited to, one of the following:

(A) On-board announcements;

(B) Laminated wallet cards;

(C) Ticket envelopes;

(D) Timetables;

(E) Station signs or video monitors;

(F) Public service announcements; or

(G) Seat drops.

(b) [Reserved]

§ 239.103 Passenger train emergency simulations.

(a) *General.* Each railroad operating passenger train service shall conduct full-scale emergency simulations, in order to determine its capability to execute the emergency preparedness plan under the variety of scenarios

that could reasonably be expected to occur on its operation, and ensure coordination with all emergency responders who voluntarily agree to participate in the emergency simulations.

(b) *Frequency of the emergency simulations.* Except as provided in paragraph (c) of this section:

(1) Each railroad that provides commuter or other short-haul passenger train service and whose operations include less than 150 route miles and less than 200 million passenger miles annually, shall conduct a minimum of one full-scale emergency simulation during every two calendar years.

(2) Each railroad that provides commuter or other short-haul passenger train service and whose operations include at least 150 route miles or at least 200 million passenger miles annually, shall conduct a minimum of one full-scale emergency simulation during each calendar year.

(3) Each railroad that provides intercity passenger train service, shall conduct a minimum of one full-scale emergency simulation during each calendar year, regardless of the number of route miles or passenger miles.

(c) *Actual emergency situations.* Neither a tabletop exercise nor the activation of its emergency preparedness plan during an actual emergency situation may be credited toward the minimum number of full-scale emergency simulations required under paragraph (b) of this section. However, a railroad that has activated its emergency preparedness plan in response to a major emergency may elect to postpone a scheduled full-scale simulation for up to 180 calendar days beyond the applicable calendar year completion date in order to evaluate the effectiveness of its plan during that major emergency and, as appropriate, modify the rescheduled simulation.

(d) *Definition.* As used in this section, *major emergency* means an unexpected event related to the operation of passenger train service that results in serious injury or death to one or more persons and property damage greater than the current reporting threshold of part 225 of this chapter to railroad on-track equipment, signals, tracks, track structures, or roadbeds, including labor

§ 239.105

costs and the costs for acquiring new equipment and material.

§ 239.105 Debriefing and critique.

(a) *General.* Except as provided in paragraph (b) of this section, each railroad operating passenger train service shall conduct a debriefing and critique session after each passenger train emergency situation or full-scale simulation to determine the effectiveness of its emergency preparedness plan, and shall improve or amend its plan, or both, as appropriate, in accordance with the information developed. The debriefing and critique session shall be conducted within 60 days of the date of the passenger train emergency situation or full-scale simulation.

(b) *Exceptions.* (1) No debriefing and critique session shall be required in the case of an emergency situation involving only a collision between passenger railroad rolling stock and: a pedestrian; a trespasser; or a motor vehicle or other highway conveyance at a highway-rail grade crossing, provided that the collision does not result in: a passenger or employee fatality, or an injury to one or more crewmembers or passengers requiring admission to a hospital; or the evacuation of a passenger train. (2) For purposes of this section, *highway-rail grade crossing* means a location where a public highway, road, street, or private roadway, including associated sidewalks and pathways, crosses one or more railroad tracks at grade, and *trespasser* means a person who is on that part of railroad property used in railroad operation and whose presence is prohibited, forbidden, or unlawful.

(c) *Purpose of debriefing and critique.* The debriefing and critique session shall be designed to determine, at a minimum:

- (1) Whether the on-board communications equipment functioned properly;
- (2) How much time elapsed between the occurrence of the emergency situation or full-scale simulation and notification to the emergency responders involved;
- (3) Whether the control center promptly initiated the required notifications;

49 CFR Ch. II (10–1–04 Edition)

(4) How quickly and effectively the emergency responders responded after notification; and

(5) How efficiently the passengers exited from the car through the emergency exits.

(d) *Records.* (1) Each railroad shall maintain records of its debriefing and critique sessions at its system headquarters and applicable division headquarters for two calendar years after the end of the calendar year to which they relate, including the following information:

(i) Date and location of the passenger train emergency situation or full-scale simulation;

(ii) Date and location of the debriefing and critique session; and

(iii) Names of all participants in the debriefing and critique session.

(2) These records shall be made available to representatives of FRA and States participating under part 212 of this chapter for inspection and copying during normal business hours.

§ 239.107 Emergency exits.

For additional requirements related to emergency window exits, see part 223 of this chapter.

(a) *Marking.* Each railroad operating passenger train service shall determine for each passenger car that is in service, except for self-propelled cars designed to carry baggage, mail, or express:

(1) That all door exits intended for emergency egress are either lighted or conspicuously and legibly marked with luminescent material on the inside of the car and that clear and understandable instructions are posted at or near such exits.

(2) That all door exits intended for emergency access by emergency responders for extrication of passengers are marked with retroreflective material and that clear and understandable instructions are posted at each such door.

(b) *Inspection, maintenance, and repair.* Consistent with the requirements of part 223 of this chapter, each railroad operating passenger train service shall:

(1) Provide for scheduled inspection, maintenance, and repair of emergency window and door exits;

(2) Test a representative sample of emergency window exits on its cars at least once every 180 days to verify that they are operating properly; and

(3) Repair each inoperative emergency window and door exit on a car before returning the car to service.

(c) *Records.* Each railroad operating passenger service shall maintain records of its inspection, maintenance, and repair of emergency window and door exits at its system headquarters and applicable division headquarters for two calendar years after the end of the calendar year to which they relate. These records shall be made available to representatives of FRA and States participating under part 212 of this chapter for inspection and copying during normal business hours.

(d) *Electronic recordkeeping.* Each railroad to which this part applies is authorized to retain by electronic recordkeeping the information prescribed in paragraph (b) of this section, provided that all of the following conditions are met:

(1) The railroad adequately limits and controls accessibility to such information retained in its database system and identifies those individuals who have such access;

(2) The railroad has a terminal at the system headquarters and at each division headquarters;

(3) Each such terminal has a desk-top computer (i.e., monitor, central processing unit, and keyboard) and either a facsimile machine or a printer connected to the computer to retrieve and produce information in a usable format for immediate review by representatives of FRA and States participating under part 212 of this chapter;

(4) The railroad has a designated representative who is authorized to authenticate retrieved information from the electronic system as true and accurate copies of the electronically kept records; and

(5) The railroad provides representatives of FRA and States participating under part 212 of this chapter with immediate access to these records for inspection and copying during normal business hours and provides printouts of such records upon request.

Subpart C—Review, Approval, and Retention of Emergency Preparedness Plans

§ 239.201 Emergency preparedness plan; filing and approval.

(a) *Filing.* Each passenger railroad to which this part applies and all railroads hosting its passenger train service (if applicable) shall jointly adopt a single emergency preparedness plan for that service and the passenger railroad shall file one copy of that plan with the Associate Administrator for Safety, Federal Railroad Administration, Mail Stop 25, 400 Seventh Street, S.W., Washington, D.C. 20590, not more than 180 days after May 4, 1998, or not less than 45 days prior to commencing passenger operations, whichever is later. The emergency preparedness plan shall include the name, title, address, and telephone number of the primary person on each affected railroad to be contacted with regard to review of the plan, and shall include a summary of each railroad's analysis supporting each plan element and describing how every condition on the railroad's property that is likely to affect emergency response is addressed in the plan. Each subsequent amendment to a railroad's emergency preparedness plan shall be filed with FRA by the passenger railroad not less than 60 days prior to the proposed effective date.

(b) *Approval.* (1) *Preliminary review.* (i) Within 90 days of receipt of each proposed emergency preparedness plan, and within 45 days of receipt of each plan for passenger operations to be commenced after the initial deadline for plan submissions, FRA will conduct a preliminary review of the proposed plan to determine if the elements prescribed in § 239.101 are sufficiently addressed and discussed in the railroad's plan submission. FRA will then notify the primary contact person of each affected railroad in writing of the results of the review, whether the proposed plan has been conditionally approved by FRA, and if not conditionally approved, the specific points in which the plan is deficient.

(ii) If a proposed emergency preparedness plan is not conditionally approved by FRA, the affected railroad or railroads shall amend the proposed

§ 239.203

plan to correct all deficiencies identified by FRA (and provide FRA with a corrected copy) not later than 30 days following receipt of FRA's written notice that the proposed plan was not conditionally approved.

(2) *Final review.* (i) Within 18 months of receipt of each proposed plan, and within 180 days of receipt of each proposed plan for passenger operations to be commenced after the initial deadline for plan submissions, FRA will conduct a comprehensive review of the conditionally approved plan to evaluate implementation of the elements included. This review will include ongoing dialogues with rail management and labor representatives, and field analysis and verification. FRA will then notify the primary contact person of each affected railroad in writing of the results of the review, whether the conditionally approved plan has been finally approved by FRA, and if not approved, the specific points in which the plan is deficient.

(ii) If an emergency preparedness plan of a railroad or railroads is not finally approved by FRA, the affected railroad or railroads shall amend the plan to correct all deficiencies (and provide FRA with a corrected copy) not later than 30 days following receipt of FRA's written notice that the plan was not finally approved.

(3) *Review of amendments.* (i) FRA will review each proposed plan amendment within 45 days of receipt. FRA will then notify the primary contact person of each affected railroad of the results of the review, whether the proposed amendment has been approved by FRA, and if not approved, the specific points in which the proposed amendment is deficient.

(ii) If the amendment is not approved, the railroad shall correct any deficiencies identified by FRA and file the corrected amendment prior to implementing the amendment.

(4) *Reopened review.* Following initial approval of a plan, or amendment, FRA may reopen consideration of the plan, or amendment, for cause stated.

§ 239.203 Retention of emergency preparedness plan.

Each passenger railroad to which this part applies, and all railroads hosting

49 CFR Ch. II (10–1–04 Edition)

its passenger train service (if applicable), shall each retain one copy of the emergency preparedness plan required by § 239.201 and one copy of each subsequent amendment to that plan at the system and division headquarters of each, and shall make such records available to representatives of FRA and States participating under part 212 of this chapter for inspection and copying during normal business hours.

Subpart D—Operational (Efficiency) Tests; Inspection of Records and Recordkeeping

§ 239.301 Operational (efficiency) tests.

(a) Each railroad to which this part applies shall periodically conduct operational (efficiency) tests of its on-board and control center employees to determine the extent of compliance with its emergency preparedness plan.

(b) Each railroad to which this part applies shall maintain a written record of the date, time, place, and result of each operational (efficiency) test that was performed in accordance with paragraph (a) of this section. Each record shall also specify the name of the railroad officer who administered the test, the name of each employee tested, and sufficient information to identify the relevant facts relied on for evaluation purposes.

(c) Each record required by paragraph (a) of this section shall be retained at the system headquarters of the railroad and at the division headquarters for the division where the test was conducted for one calendar year after the end of the calendar year to which the test relates. Each such record shall be made available to representatives of FRA and States participating under part 212 of this chapter for inspection and copying during normal business hours.

§ 239.303 Electronic recordkeeping.

Each railroad to which this part applies is authorized to retain by electronic recordkeeping the information prescribed in § 239.301, provided that all of the following conditions are met:

Federal Railroad Administration, DOT

Pt. 239, App. A

(a) The railroad adequately limits and controls accessibility to such information retained in its database system and identifies those individuals who have such access;

(b) The railroad has a terminal at the system headquarters and at each division headquarters;

(c) Each such terminal has a desk-top computer (*i.e.*, monitor, central processing unit, and keyboard) and either a facsimile machine or a printer connected to the computer to retrieve and produce information in a usable format for immediate review by representa-

tives of FRA and States participating under part 212 of this chapter;

(d) The railroad has a designated representative who is authorized to authenticate retrieved information from the electronic system as true and accurate copies of the electronically kept records; and

(e) The railroad provides representatives of FRA and States participating under part 212 of this chapter with immediate access to these records for inspection and copying during normal business hours and provides printouts of such records upon request.

APPENDIX A TO PART 239—SCHEDULE OF CIVIL PENALTIES ¹

Section	Violation	Willful violation
Subpart B—Specific Requirements:		
239.101(a) Failure of a railroad to adopt a written emergency preparedness plan	\$7,500	\$11,000
(a)(1) Failure of the plan to provide for:		
(i) Initial or on-board notifications by an on-board crewmember	2,500	5,000
(ii) Notification of outside emergency responders by control center	2,500	5,000
(a)(2) Failure of the plan to provide for:		
(i) Initial or periodic training of on-board personnel	2,500	5,000
(ii) Initial or periodic training of control center personnel	2,500	5,000
(iii) Completion of initial training of all on-board and control center personnel by the specified date	2,500	5,000
(iv) Completion of initial training of all newly hired on-board and control center personnel by the specified date	2,500	5,000
(v) Adequate procedures to evaluate and test on-board and control center personnel for qualification under the emergency preparedness plan	2,500	5,000
(vi) Adequate on-board staffing	2,500	5,000
(a)(3) Failure of a host railroad involved in joint operations to coordinate applicable portions of the emergency preparedness plan with the railroad or railroads providing or operating a passenger train service operation	3,000	6,000
(a)(4) Failure of the plan to address:		
(i) Readiness procedures for emergencies in tunnels	2,500	5,000
(ii) Readiness procedures for emergencies on an elevated structure or in electrified territory	2,500	5,000
(iii) Coordination efforts involving adjacent rail modes of transportation	2,500	5,000
(a)(5) Failure of the plan to address relationships with on-line emergency responders by providing for:		
(i) The development and availability of training programs	3,000	6,000
(ii) Invitations to emergency responders to participate in emergency simulations	3,000	6,000
(iii) Distribution of applicable portions of the current emergency preparedness plan	3,000	6,000
(a)(6) Failure of the plan to provide for, or the railroad to include on board each train and maintain and replace:		
(i) Emergency equipment	2,500	5,000
(ii) First-aid kits	2,500	5,000
(iii) Emergency lighting	2,500	5,000
(a)(7) Failure of the plan to provide for emergency instructions inside each passenger car or to include additional safety awareness information	3,500	7,000
239.103 Failure to conduct a required full-scale simulation in accordance with the frequency schedule	5,000	7,500
239.105 Debriefing and critique		
(a) Failure to conduct a debriefing and critique session after an emergency or full-scale simulation	4,000	7,500
(d)(1) Failure to maintain a record	2,500	5,000
(i) Failure to include date or location of the emergency or simulation	1,000	2,000
(ii) Failure to include date or location of the debriefing and critique session ..	1,000	2,000
(iii) Failure to include names of participants in the debriefing and critique session	1,000	2,000
(d)(2) Failure to make record available	1,000	2,000
239.107 Emergency exits		

Section	Violation	Willful violation
(a)(1), (a)(2):		
(i) Door not marked or instructions not posted	2,500	5,000
(ii) Door improperly marked or instructions 1,000-2,000-improperly posted ...	2,500	5,000
(b)(1) Failure to provide for scheduled inspection, maintenance, and repair of emergency windows and doors	5,000	7,500
(b)(2):		
(i) Failure to test a representative sample of emergency windows	3,000	6,000
(ii) Emergency windows tested too infrequently	1,500	3,000
(b)(3) Failure to repair an inoperative emergency window or door exit	3,500	7,000
(c):		
(i) Failure to maintain a record	2,500	5,000
(ii) Failure to make record available	1,000	2,000
(d)(1) Insufficient limits or controls on accessibility to records	2,500	5,000
(d)(2) Missing terminal	1,000	2,000
(d)(3) Inability of railroad to produce information in a usable format for immediate review	1,000	2,000
(d)(4) Failure by railroad to designate an authorized representative	1,000	2,000
(d)(5) Failure to make record available	1,000	2,000
Subpart C—Review, Approval, and Retention of Emergency Preparedness Plans:		
239.201 Filing and approval		
(a):		
(i) Failure of a railroad to file a written emergency preparedness plan	5,000	7,500
(ii) Failure to designate a primary person to contact for plan review	1,000	2,000
(iii) Failure of a railroad to file an amendment to its plan	2,500	5,000
(b)(1), (b)(2):		
(i) Failure of a railroad to correct a plan deficiency	2,500	5,000
(ii) Failure to provide FRA with a corrected copy of the plan	1,000	2,000
(b)(3):		
(i) Failure of a railroad to correct an amendment deficiency	2,500	5,000
(ii) Failure to file a corrected plan amendment with FRA	1,000	1,000
239.203 Retention of emergency preparedness plan		
(1) Failure to retain a copy of the plan or an amendment to the plan	2,500	5,000
(2) Failure to make record available	1,000	2,000
Subpart D—Operational (efficiency) tests; Inspection of Records and Recordkeeping:		
239.301 Operational (efficiency) tests		
(a) Testing Program	5,000	7,500
(b)(1) Failure to maintain a record	2,500	5,000
(b)(2) Record improperly completed	1,000	1,000
(c)(1) Failure to retain a copy of the record	2,500	5,000
(c)(2) Failure to make record available	1,000	2,000
239.303 Electronic recordkeeping		
(a) Insufficient limits or controls on accessibility to records	2,500	5,000
(b) Missing terminal	1,000	2,000
(c) Inability of railroad to produce information in a usable format for immediate review	1,000	2,000
(d) Failure by railroad to designate an authorized representative	1,000	2,000
(e) Failure to make record available	1,000	2,000

¹ A penalty may be assessed against an individual only for a willful violation. The Administrator reserves the right to assess a penalty of up to \$27,000 for any violation where circumstances warrant. See 49 U.S.C. 21301, 21304, and 49 CFR part 209, appendix A. Further designations, not found in the CFR citation for certain provisions, are FRA Office of Chief Counsel computer codes added as a suffix to the CFR citation and used to expedite imposition of civil penalties for violations. FRA reserves the right, should litigation become necessary, to substitute in its complaint the CFR citation in place of the combined designation cited in the penalty demand letter.

240.11 Penalties and consequences for non-compliance.

240.13 Information collection requirements.

PART 240—QUALIFICATION AND CERTIFICATION OF LOCOMOTIVE ENGINEERS

Subpart B—Component Elements of the Certification Process

Subpart A—General

Sec.

240.1 Purpose and scope.

240.3 Application and responsibility for compliance.

240.5 Preemptive effect and construction.

240.7 Definitions.

240.9 Waivers.

240.101 Certification program required.

240.103 Approval of design of individual railroad programs by FRA.

240.104 Criteria for determining whether movement of roadway maintenance equipment or a dual purpose vehicle requires a certified locomotive engineer.

240.105 Criteria for selection of designated supervisors of locomotive engineers.

Federal Railroad Administration, DOT

§ 240.1

- 240.107 Criteria for designation of classes of service.
- 240.109 General criteria for eligibility based on prior safety conduct.
- 240.111 Individual's duty to furnish data on prior safety conduct as motor vehicle operator.
- 240.113 Individual's duty to furnish data on prior safety conduct as an employee of a different railroad.
- 240.115 Criteria for consideration of prior safety conduct as a motor vehicle operator.
- 240.117 Criteria for consideration of operating rules compliance data.
- 240.119 Criteria for consideration of data on substance abuse disorders and alcohol/drug rules compliance.
- 240.121 Criteria for vision and hearing acuity data.
- 240.123 Criteria for initial and continuing education.
- 240.125 Criteria for testing knowledge.
- 240.127 Criteria for examining skill performance.
- 240.129 Criteria for monitoring operational performance of certified engineers.

Subpart C—Implementation of the Certification Process

- 240.201 Schedule for implementation.
- 240.203 Determinations required as a prerequisite to certification.
- 240.205 Procedures for determining eligibility based on prior safety conduct.
- 240.207 Procedures for making the determination on vision and hearing acuity.
- 240.209 Procedures for making the determination on knowledge.
- 240.211 Procedures for making the determination on performance skills.
- 240.213 Procedures for making the determination on completion of training program.
- 240.215 Retaining information supporting determinations.
- 240.217 Time limitations for making determinations.
- 240.219 Denial of certification.
- 240.221 Identification of qualified persons.
- 240.223 Criteria for the certificate.
- 240.225 Reliance on qualification determinations made by other railroads.
- 240.227 Reliance on qualification requirements of other countries.
- 240.229 Requirements for joint operations territory.
- 240.231 Requirements for locomotive engineers unfamiliar with physical characteristics in other than joint operations.

Subpart D—Administration of the Certification Programs

- 240.301 Replacement of certificates.

- 240.303 Operational monitoring requirements.
- 240.305 Prohibited conduct.
- 240.307 Revocation of certification.
- 240.309 Railroad oversight responsibilities.

Subpart E—Dispute Resolution Procedures

- 240.401 Review board established.
- 240.403 Petition requirements.
- 240.405 Processing qualification review petitions.
- 240.407 Request for a hearing.
- 240.409 Hearings.
- 240.411 Appeals.

SOURCE: 56 FR 28254, June 19, 1991, unless otherwise noted.

Subpart A—General

§ 240.1 Purpose and scope.

(a) The purpose of this part is to ensure that only qualified persons operate a locomotive or train.

(b) This part prescribes minimum Federal safety standards for the eligibility, training, testing, certification and monitoring of all locomotive engineers to whom it applies. This part does not restrict a railroad from adopting and enforcing additional or more stringent requirements not inconsistent with this part.

(c) The qualifications for locomotive engineers prescribed in this part are pertinent to any person who operates a locomotive, unless that person is specifically excluded by a provision of this

§ 240.3

part, regardless of the fact that a person may have a job classification title other than that of locomotive engineer.

[56 FR 28254, June 19, 1991, as amended at 64 FR 60988, Nov. 8, 1999]

§ 240.3 Application and responsibility for compliance.

(a) Except as provided in paragraph (b) of this section, this part applies to all railroads.

(b) This part does not apply to—

(1) A railroad that operates only on track inside an installation that is not part of the general railroad system of transportation; or

(2) Rapid transit operations in an urban area that are not connected to the general railroad system of transportation.

(c) Although the duties imposed by this part are generally stated in terms of the duty of a railroad, each person, including a contractor for a railroad, who performs any function covered by this part must perform that function in accordance with this part.

[64 FR 60988, Nov. 8, 1999]

§ 240.5 Preemptive effect and construction.

(a) Under 49 U.S.C. 20106, issuance of the regulations in this part preempts any State law, regulation, or order covering the same subject matter, except an additional or more stringent law, regulation, or order that is necessary to eliminate or reduce an essentially local safety hazard; is not incompatible with a law, regulation, or order of the United States Government; and does not impose an unreasonable burden on interstate commerce.

(b) FRA does not intend by issuance of these regulations to preempt provisions of State criminal law that impose sanctions for reckless conduct that leads to actual loss of life, injury, or damage to property, whether such provisions apply specifically to railroad employees or generally to the public at large.

(c) FRA does not intend, by use of the term *locomotive engineer* in this part, to preempt or otherwise alter the terms, conditions, or interpretation of existing collective bargaining agreements that employ other job classifica-

49 CFR Ch. II (10–1–04 Edition)

tion titles when identifying persons authorized by a railroad to operate a locomotive.

(d) FRA does not intend by issuance of these regulations to preempt or otherwise alter the authority of a railroad to initiate disciplinary sanctions against its employees, including managers and supervisors, in the normal and customary manner, including those contained in its collective bargaining agreements.

(e) Nothing in this part shall be construed to create or prohibit an eligibility or entitlement to employment in other service for the railroad as a result of denial, suspension, or revocation of certification under this part.

(f) Nothing in this part shall be deemed to abridge any additional procedural rights or remedies not inconsistent with this part that are available to the employee under a collective bargaining agreement, the Railway Labor Act, or (with respect to employment at will) at common law with respect to removal from service or other adverse action taken as a consequence of this part.

[56 FR 28254, June 19, 1991, as amended at 58 FR 19002, Apr. 9, 1993; 64 FR 60988, Nov. 8, 1999]

§ 240.7 Definitions.

As used in this part—

Administrator means the Administrator of the Federal Railroad Administration or the Administrator's delegate.

Alcohol means ethyl alcohol (ethanol) and includes use or possession of any beverage, mixture, or preparation containing ethyl alcohol.

Controlled Substance has the meaning assigned by 21 U.S.C. 802 and includes all substances listed on Schedules I through V as they may be revised from time to time (21 CFR parts 1301–1316).

Current Employee is any employee with at least one year of experience in transportation service on a railroad.

Designated Supervisor of Locomotive Engineers is a person designated as such by a railroad in accordance with the provisions of § 240.105 of this part.

Drug means any substance (other than alcohol) that has known mind or function-altering effects on a human subject, specifically including any

Federal Railroad Administration, DOT

§ 240.7

psychoactive substance and including, but not limited to, controlled substances.

Dual purpose vehicle means a piece of on-track equipment that is capable of moving railroad rolling stock and may also function as roadway maintenance equipment.

EAP Counselor means a person qualified by experience, education, or training to counsel people affected by substance abuse problems and to evaluate their progress in recovering from or controlling such problems. An EAP Counselor can be a qualified full-time salaried employee of a railroad, a qualified practitioner who contracts with the railroad on a fee-for-service or other basis, or a qualified physician designated by the railroad to perform functions in connection with alcohol or substance abuse evaluation or counseling. As used in this rule, the EAP Counselor owes a duty to the railroad to make an honest and fully informed evaluation of the condition and progress of an employee.

File, filed and filing mean submission of a document under this part on the date when the Docket Clerk receives it, or if sent by mail on or after September 4, 2001, the date mailing was completed.

FRA means the Federal Railroad Administration.

FRA Representative means the Associate Administrator for Safety, FRA, and the Associate Administrator's delegate, including any safety inspector employed by the Federal Railroad Administration and any qualified state railroad safety inspector acting under part 212 of this chapter.

Instructor Engineer means a person who

- (1) Is a qualified locomotive engineer under this part,
- (2) Has been selected by the railroad to teach others proper train handling procedures, and
- (3) Has demonstrated an adequate knowledge of the subjects under instruction.

Joint Operations means rail operations conducted by more than one railroad on the same track regardless of whether such operations are the result of—

(1) Contractual arrangement between the railroads,

(2) Order of a governmental agency or a court of law, or

(3) Any other legally binding directive.

Knowingly means having actual knowledge of the facts giving rise to the violation or that a reasonable person acting in the circumstances, exercising due care, would have had such knowledge.

Locomotive means a piece of on-track equipment (other than specialized roadway maintenance equipment or a dual purpose vehicle operating in accordance with § 240.104(a)(2)):

(1) With one or more propelling motors designed for moving other equipment;

(2) With one or more propelling motors designed to carry freight or passenger traffic or both; or

(3) Without propelling motors but with one or more control stands.

Locomotive engineer means any person who moves a locomotive or group of locomotives regardless of whether they are coupled to other rolling equipment except:

(1) A person who moves a locomotive or group of locomotives within the confines of a locomotive repair or servicing area as provided for in 49 CFR 218.5(f) and 218.29(a)(1); or

(2) A person who moves a locomotive or group of locomotives for distances of less than 100 feet and this incidental movement of a locomotive or locomotives is for inspection or maintenance purposes.

Main track means a track upon which the operation of trains is governed by one or more of the following methods of operation: timetable; mandatory directive; signal indication; or any form of absolute or manual block system.

Medical examiner means a person licensed as a doctor of medicine or doctor of osteopathy. A medical examiner can be a qualified full-time salaried employee of a railroad, a qualified practitioner who contracts with the railroad on a fee-for-service or other basis, or a qualified practitioner designated by the railroad to perform functions in connection with medical evaluations of employees. As used in this rule, the medical examiner owes a

§ 240.7

49 CFR Ch. II (10–1–04 Edition)

duty to the railroad to make an honest and fully informed evaluation of the condition of an employee.

Newly hired employee is any person who is hired with no prior railroad experience, or one with less than one year of experience in transportation service on that railroad or another railroad.

Person means an entity of any type covered under 1 U.S.C. 1, including but not limited to the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor.

Qualified means a person who has passed all appropriate training and testing programs required by the railroad and this part and who, therefore, has actual knowledge or may reasonably be expected to have knowledge of the subject on which the person is qualified.

Railroad means any form of non-highway ground transportation that runs on rails or electromagnetic guideways and any entity providing such transportation, including

(1) Commuter or other short-haul railroad passenger service in a metropolitan or suburban area and commuter railroad service that was operated by the Consolidated Rail Corporation on January 1, 1979; and

(2) High speed ground transportation systems that connect metropolitan areas, without regard to whether those systems use new technologies not associated with traditional railroads; but does not include rapid transit operations in an urban area that are not connected to the general railroad system of transportation.

Railroad Officer means any supervisory employee of a railroad.

Railroad rolling stock is on-track equipment that is either a freight car (as defined in § 215.5 of this chapter) or a passenger car (as defined in § 238.5 of this chapter).

Roadway maintenance equipment is on-track equipment powered by any means of energy other than hand power

which is used in conjunction with maintenance, repair, construction or inspection of track, bridges, roadway, signal, communications, or electric traction systems.

Segment means any portion of a railroad assigned to the supervision of one superintendent or equivalent transportation officer.

Service has the meaning given in Rule 5 of the Federal Rules of Civil Procedure as amended. Similarly, the computation of time provisions in Rule 6 of the Federal Rules of Civil Procedure as amended are also applicable in this part. See also the definition of “filing” in this section.

Specialized roadway maintenance equipment is roadway maintenance equipment that does not have the capability to move railroad rolling stock. Any alteration of such equipment that enables it to move railroad rolling stock will require that the equipment be treated as a dual purpose vehicle.

Substance abuse disorder refers to a psychological or physical dependence on alcohol or a drug or another identifiable and treatable mental or physical disorder involving the abuse of alcohol or drugs as a primary manifestation. A substance abuse disorder is “active” within the meaning of this part if the person (1) is currently using alcohol and other drugs, except under medical supervision consistent with the restrictions described in § 219.103 of this chapter or (2) has failed to successfully complete primary treatment or successfully participate in aftercare as directed by an EAP Counselor.

Type I Simulator means a replica of the control compartment of a locomotive with all associated control equipment that:

(1) Functions in response to a person’s manipulation and causes the gauges associated with such controls to appropriately respond to the consequences of that manipulation;

(2) Pictorially, audibly and graphically illustrates the route to be taken;

(3) Graphically, audibly, and physically illustrates the consequences of control manipulations in terms of their effect on train speed, braking capacity, and in-train force levels throughout the train; and

(4) Is computer enhanced so that it can be programmed for specific train consists and the known physical characteristics of the line illustrated.

Type II Simulator means a replica of the control equipment for a locomotive that:

(1) Functions in response to a person's manipulation and causes the gauges associated with such controls to appropriately respond to the consequences of that manipulation;

(2) Pictorially, audibly, and graphically illustrates the route to be taken;

(3) Graphically and audibly illustrates the consequences of control manipulations in terms of their effect on train speed braking capacity, and in-train force levels throughout the train; and

(4) Is computer enhanced so that it can be programmed for specific train consists and the known physical characteristics of the line illustrated.

Type III Simulator means a replica of the control equipment for a locomotive that:

(1) Functions in response to a person's manipulation and causes the gauges associated with such controls to appropriately respond to the consequences of that manipulation;

(2) Graphically illustrates the route to be taken;

(3) Graphically illustrates the consequences of control manipulations in terms of their effect on train speed braking capacity, and in-train force levels throughout the train; and

(4) Is computer enhanced so that it can be programmed for specific train consists and the known physical characteristics of the line illustrated.

[56 FR 28254, June 19, 1991, as amended at 58 FR 19002, Apr. 9, 1993; 60 FR 53136, Oct. 12, 1995; 64 FR 60989, Nov. 8, 1999; 65 FR 58483, Sept. 29, 2000; 67 FR 24, Jan. 2, 2002]

§ 240.9 Waivers.

(a) A person subject to a requirement of this part may petition the Administrator for a waiver of compliance with such requirement. The filing of such a petition does not affect that person's responsibility for compliance with that requirement while the petition is being considered.

(b) Each petition for a waiver under this section must be filed in the man-

ner and contain the information required by part 211 of this chapter.

(c) If the Administrator finds that a waiver of compliance is in the public interest and is consistent with railroad safety, the Administrator may grant the waiver subject to any conditions the Administrator deems necessary.

[56 FR 28254, June 19, 1991, as amended at 64 FR 60989, Nov. 8, 1999]

§ 240.11 Penalties and consequences for noncompliance.

(a) A person who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least \$550 and not more than \$11,000 per violation, except that: Penalties may be assessed against individuals only for willful violations, and, where a grossly negligent violation or a pattern of repeated violations has created an imminent hazard of death or injury to persons, or has caused death or injury, a penalty not to exceed \$27,000 per violation may be assessed. Each day a violation continues shall constitute a separate offense. See Appendix A to this part for a statement of agency civil penalty policy.

(b) A person who violates any requirement of this part or causes the violation of any such requirement may be subject to disqualification from all safety-sensitive service in accordance with part 209 of this chapter.

(c) A person who knowingly and willfully falsifies a record or report required by this part may be subject to criminal penalties under 49 U.S.C. 21311.

(d) In addition to the enforcement methods referred to in paragraphs (a), (b), and (c) of this section, FRA may also address violations of this part by use of the emergency order, compliance order, and/or injunctive provisions of the Federal Railroad Safety Act.

[56 FR 28254, June 19, 1991, as amended at 63 FR 11624, Mar. 10, 1998; 64 FR 60989, Nov. 8, 1999; 69 FR 30595, May 28, 2004]

§ 240.13 Information collection requirements.

(a) The information collection requirements of this part were reviewed

§ 240.101

by the Office of Management and Budget pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) and are assigned OMB control number 2130-0533.

(b) The information collection requirements are found in the following sections: §§ 240.101, 240.103, 240.105, 240.107, 240.109, 240.111, 240.113, 240.115, 240.117, 240.119, 240.121, 240.123, 240.125, 240.127, 240.129, 240.201, 240.205, 240.207, 240.209, 240.211, 240.213, 240.215, 240.219, 240.221, 240.223, 240.227, 240.229, 240.301, 240.303, 240.305, 240.307, 240.309, 240.401, 240.403, 240.405, 240.407, 240.411.

[56 FR 28254, June 19, 1991, as amended at 58 FR 19003, Apr. 9, 1993]

Subpart B—Component Elements of the Certification Process

§ 240.101 Certification program required.

(a) After September 17, 1991, each railroad in operation on that date and subject to this part shall have in effect a written program for certifying the qualifications of locomotive engineers.

(b) A railroad commencing operations after September 17, 1991, shall have such a program in effect prior to commencing operations.

(c) After the pertinent date specified in paragraph (e), (f), or (g) of § 240.201, each railroad shall have a certification program approved in accordance with § 240.103 that includes:

(1) A procedure for designating any person it determines to be qualified as a supervisor of locomotive engineers that complies with the criteria established in § 240.105;

(2) A designation of the classes of service that it determines will be used in compliance with the criteria established in § 240.107;

(3) A procedure for evaluating prior safety conduct that complies with the criteria established in § 240.109;

(4) A procedure for evaluating visual and hearing acuity that complies with the criteria established in § 240.121;

(5) A procedure for training that complies with the criteria established in § 240.123;

(6) A procedure for knowledge testing that complies with the criteria established in § 240.125;

49 CFR Ch. II (10–1–04 Edition)

(7) A procedure for skill performance testing that complies with the criteria established in § 240.127; and

(8) A procedure for monitoring operational performance that complies with the criteria established in § 240.129.

§ 240.103 Approval of design of individual railroad programs by FRA.

(a) Each railroad shall submit its written certification program and a description of how its program conforms to the specific requirements of this part in accordance with the procedures contained in appendix B to this part and shall submit this written certification program for approval at least 60 days before commencing operations.

(b) That submission shall state the railroad's election either:

(1) To accept responsibility for the training of student engineers and thereby obtain authority for that railroad to initially certify a person as an engineer in an appropriate class of service, or

(2) To recertify only engineers previously certified by other railroads.

A railroad that elects to accept responsibility for the training of student engineers shall state in its submission whether it will conduct the training program or employ a training program conducted by some other entity on its behalf but adopted and ratified by that railroad.

(c) A railroad's program is considered approved and may be implemented thirty days after the required filing date (or the actual filing date) unless the Administrator notifies the railroad in writing that the program does not conform to the criteria set forth in this part.

(1) If the Administrator determines that the program does not conform, the Administrator will inform the railroad of the specific deficiencies.

(2) If the Administrator informs the railroad of deficiencies more than 30 days after the initial filing date, the original program may remain in effect until 30 days after approval of the revised program is received.

(d) A railroad shall resubmit its program within 30 days after the date of such notice of deficiencies. A failure to

resubmit the program with the necessary revisions will be considered a failure to implement a program under this part.

(1) The Administrator will inform the railroad in writing whether its revised program conforms with this part.

(2) If the program does not conform, the railroad shall resubmit its program.

(e) A railroad that intends to materially modify its program after receiving initial FRA approval shall submit a description of how it intends to modify the program in conformity with the specific requirements of this part at least 30 days prior to implementing such a change.

(1) A modification is material if it would affect the program's conformance with this part.

(2) The modification submission shall contain a description that conforms with the pertinent portion of the procedures contained in appendix B.

(3) The modification submission will be handled in accordance with the procedures of paragraphs (c) and (d) of this section as though it were a new program.

[56 FR 28254, June 19, 1991, as amended at 64 FR 60990, Nov. 8, 1999]

§ 240.104 Criteria for determining whether movement of roadway maintenance equipment or a dual purpose vehicle requires a certified locomotive engineer.

(a) A railroad is not required to use a certified locomotive engineer to perform the following functions:

(1) Operate specialized roadway maintenance equipment; or

(2) Operate a dual purpose vehicle that is:

(i) Being operated in conjunction with roadway maintenance and related maintenance of way functions, including traveling to and from the work site;

(ii) Moving under authority of railroad operating rules designated for the movement of roadway maintenance equipment that ensure the protection of such equipment from train movements; and

(iii) Being operated by an individual trained and qualified in accordance

with §§ 214.341, 214.343, and 214.355 of this chapter.

(b) A railroad is required to use a certified locomotive engineer when operating a dual purpose vehicle other than in accordance with paragraph (a)(2) of this section.

[64 FR 60990, Nov. 8, 1999]

§ 240.105 Criteria for selection of designated supervisors of locomotive engineers.

(a) Each railroad's program shall include criteria and procedures for implementing this section.

(b) The railroad shall examine any person it is considering for qualification as a supervisor of locomotive engineers to determine that he or she:

(1) Knows and understands the requirements of this part;

(2) Can appropriately test and evaluate the knowledge and skills of locomotive engineers;

(3) Has the necessary supervisory experience to prescribe appropriate remedial action for any noted deficiencies in the training, knowledge or skills of a person seeking to obtain or retain certification; and

(4) Is a certified engineer who is qualified on the physical characteristics of the portion of the railroad on which that person will perform the duties of a Designated Supervisor of Locomotive Engineers.

(c) If a railroad does not have any Designated Supervisors of Locomotive Engineers, and wishes to hire one, the chief operating officer of the railroad shall make a determination in writing that the Designated Supervisor of Locomotive Engineers designate possesses the necessary performance skills in accordance with § 240.127. This determination shall take into account any special operating characteristics which are unique to that railroad.

[56 FR 28254, June 19, 1991, as amended at 64 FR 60990, Nov. 8, 1999]

§ 240.107 Criteria for designation of classes of service.

(a) Each railroad's program shall state which of the three classes of service, provided for in paragraph (b) of this section, that it will cover.

§ 240.109

49 CFR Ch. II (10–1–04 Edition)

(b) A railroad may issue certificates for any or all of the following classes of service:

- (1) Train service engineers,
- (2) Locomotive servicing engineers, and
- (3) Student engineers.

(c) The following operational constraints apply to each class of service:

(1) Train service engineers may operate locomotives singly or in multiples and may move them with or without cars coupled to them;

(2) Locomotive servicing engineers may operate locomotives singly or in multiples but may not move them with cars coupled to them; and

(3) Student engineers may operate only under direct and immediate supervision of an instructor engineer.

(d) Each railroad is authorized to impose additional conditions or operational restrictions on the service an engineer may perform beyond those identified in this section provided those conditions or restrictions are not inconsistent with this part.

§ 240.109 General criteria for eligibility based on prior safety conduct.

(a) Each railroad's program shall include criteria and procedures to implement this section.

(b) A railroad shall evaluate the prior safety conduct of any person it is considering for qualification as a locomotive engineer and the program shall require that a person is ineligible if the person has an adverse record of prior safety conduct as provided for in § 240.115, § 240.117, or § 240.119.

(c) The program shall require evaluation of data which reflect the person's prior safety conduct as a railroad employee and the person's prior safety conduct as an operator of a motor vehicle, provided that there is relevant prior conduct. The information to be evaluated shall include:

(1) The relevant data furnished from the evaluating railroad's own records, if the person was previously an employee of that railroad;

(2) The relevant data furnished by any other railroad formerly employing the person; and

(3) The relevant data furnished by any governmental agency with pertinent motor vehicle driving records.

(d) The railroad's process for evaluating information concerning prior safety conduct shall be designed to conform wherever necessary with the procedural requirements of § 240.111, § 240.113, § 240.115, § 240.117, § 240.119, and § 240.217.

(e) When evaluating a person's motor vehicle driving record or a person's railroad employment record, a railroad shall not consider information concerning motor vehicle driving incidents or prior railroad safety conduct that

(1) Occurred prior to the effective date of this rule; or

(2) Occurred at a time other than that specifically provided for in § 240.115, § 240.117 or § 240.119 of this subpart.

(f) A railroad's program shall provide a candidate for certification or recertification a reasonable opportunity to review and comment in writing on any record which contains information concerning the person's prior safety conduct, including information pertinent to determinations required under § 240.119 of this subpart, if the railroad believes the record contains information that could be sufficient to render the person ineligible for certification under this subpart.

(g) The opportunity for comment shall be afforded to the person prior to the railroad's rendering its eligibility decision based on that information. Any responsive comment furnished shall be retained by the railroad in accordance with § 240.215 of this part.

(h) The program shall include a method for a person to advise the railroad that he or she has never been a railroad employee or obtained a license to drive a motor vehicle. Nothing in this section shall be construed as imposing a duty or requirement that a person have prior railroad employment experience or obtain a motor vehicle driver's license in order to become a certified locomotive engineer.

(i) Nothing in this section, § 240.111, or § 240.113 shall be construed to prevent persons subject to this part from entering into an agreement that results in a railroad's obtaining the information needed for compliance with this subpart in a different manner than that prescribed in § 240.111 or § 240.113.

§ 240.111 Individual's duty to furnish data on prior safety conduct as motor vehicle operator.

(a) Except for initial certifications under paragraph (b), (h), or (i) of § 240.201 or for persons covered by § 240.109(h), each person seeking certification or recertification under this part shall, within 366 days preceding the date of the railroad's decision on certification or recertification:

(1) Take the actions required by paragraphs (b) through (f) or paragraph (g) of this section to make information concerning his or her driving record available to the railroad that is considering such certification or recertification; and

(2) Take any additional actions, including providing any necessary consent required by State or Federal law to make information concerning his or her driving record available to that railroad.

(b) Each person seeking certification or recertification under this part shall:

(1) Request, in writing, that the chief of each driver licensing agency identified in paragraph (c) of this section provide a copy of that agency's available information concerning his or her driving record to the railroad that is considering such certification or recertification; and

(2) Request, in accordance with the provisions of paragraph (d) or (e) of this section, that a check of the National Driver Register be performed to identify additional information concerning his or her driving record and that any resulting information be provided to that railroad.

(c) Each person shall request the information required under paragraph (b)(1) of this section from:

(1) The chief of the driver licensing agency which last issued that person a driver's license; and

(2) The chief of the driver licensing agency of any other state or states that issued or reissued him or her a driver's license within the preceding five years.

(d) Each person shall request the information required under paragraph (b)(2) of this section from the Chief, National Driver Register, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Wash-

ington, DC 20590 in accordance with the procedures contained in appendix C unless the person's motor vehicle driving license was issued by one of the driver licensing agencies identified in appendix D.

(e) If the person's motor vehicle driving license was issued by one of the driver licensing agencies identified in appendix D, the person shall request the chief of that driver licensing agency to perform a check of the National Driver Register for the possible existence of additional information concerning his or her driving record and to provide the resulting information to the railroad.

(f) If advised by the railroad that a driver licensing agency or the National Highway Traffic Safety Administration has informed the railroad that additional information concerning that person's driving history may exist in the files of a state agency not previously contacted in accordance with this section, such person shall:

(1) Request in writing that the chief of the state agency which compiled the information provide a copy of the available information to the prospective certifying railroad; and

(2) Take any additional action required by State or Federal law to obtain that additional information.

(g) Any person who has never obtained a motor vehicle driving license is not required to comply with the provisions of paragraph (b) of this section but shall notify the railroad of that fact in accordance with procedures of the railroad that comply with § 240.109(d).

(h) Each certified locomotive engineer or person seeking initial certification shall report motor vehicle incidents described in § 240.115 (b)(1) and (2) to the employing railroad within 48 hours of being convicted for, or completed state action to cancel, revoke, suspend, or deny a motor vehicle drivers license for, such violations. For the purposes of engineer certification, no railroad shall require reporting earlier than 48 hours after the conviction, or completed state action to cancel, revoke, or deny a motor vehicle drivers license.

[56 FR 28254, June 19, 1991, as amended at 64 FR 60990, Nov. 8, 1999]

§ 240.113 Individual's duty to furnish data on prior safety conduct as an employee of a different railroad.

(a) Except for initial certifications under paragraphs (b), (h), or (i) of § 240.201 or for persons covered by § 240.109(h), each person seeking certification under this part shall, within 366 days preceding the date of the railroad's decision on certification or recertification:

(1) Take the actions required by paragraph (b) of this section to make information concerning his or her prior railroad service record available to the railroad that is considering such certification or recertification; and

(2) Take any additional actions, including providing any necessary consent required by State or Federal law to make information concerning his or her service record available to that railroad.

(b) Each person seeking certification or recertification under this part shall request, in writing, that the chief operating officer or other appropriate person of the former employing railroad provide a copy of that railroad's available information concerning his or her service record to the railroad that is considering such certification or recertification.

[56 FR 28254, June 19, 1991, as amended at 64 FR 60990, Nov. 8, 1999]

§ 240.115 Criteria for consideration of prior safety conduct as a motor vehicle operator.

(a) Each railroad's program shall include criteria and procedures for implementing this section.

(b) When evaluating a person's motor vehicle driving record, a railroad shall not consider information concerning motor vehicle driving incidents that occurred more than 36 months before the month in which the railroad is making its certification decision and shall only consider information concerning the following types of motor vehicle incidents:

(1) A conviction for, or completed state action to cancel, revoke, suspend, or deny a motor vehicle drivers license for, operating a motor vehicle while under the influence of or impaired by alcohol or a controlled substance;

(2) A conviction for, or completed state action to cancel, revoke, suspend, or deny a motor vehicle driver's license for, refusal to undergo such testing as is required by State law when a law enforcement official seeks to determine whether a person is operating a vehicle while under the influence of alcohol or a controlled substance.

(c) If such an incident is identified,

(1) The railroad shall provide the data to the railroad's EAP Counselor, together with any information concerning the person's railroad service record, and shall refer the person for evaluation to determine if the person has an active substance abuse disorder;

(2) The person shall cooperate in the evaluation and shall provide any requested records of prior counseling or treatment for review exclusively by the EAP Counselor in the context of such evaluation; and

(3) If the person is evaluated as not currently affected by an active substance abuse disorder, the subject data shall not be considered further with respect to certification. However, the railroad shall, on recommendation of the EAP Counselor, condition certification upon participation in any needed aftercare and/or follow-up testing for alcohol or drugs deemed necessary by the EAP Counselor consistent with the technical standards specified in § 240.119(d)(3) of this part.

(4) If the person is evaluated as currently affected by an active substance abuse disorder, the person shall not be currently certified and the provisions of § 240.119(b) will apply.

§ 240.117 Criteria for consideration of operating rules compliance data.

(a) Each railroad's program shall include criteria and procedures for implementing this section.

(b) A person who has demonstrated a failure to comply, as described in paragraph (e) of this section, with railroad rules and practices for the safe operation of trains shall not be currently certified as a locomotive engineer.

(c)(1) A certified engineer who has demonstrated a failure to comply, as described in paragraph (e) of this section, with railroad rules and practices for the safe operation of trains shall have his or her certification revoked.

(2) A Designated Supervisor of Locomotive Engineers, a certified locomotive engineer pilot or an instructor engineer who is monitoring, piloting or instructing a locomotive engineer and fails to take appropriate action to prevent a violation of paragraph (e) of this section, shall have his or her certification revoked. Appropriate action does not mean that a supervisor, pilot or instructor must prevent a violation from occurring at all costs; the duty may be met by warning an engineer of a potential or foreseeable violation. A Designated Supervisor of Locomotive Engineers will not be held culpable under this section when this monitoring event is conducted as part of the railroad's operational compliance tests as defined in §§ 217.9 and 240.303 of this chapter.

(3) A person who is a certified locomotive engineer but is called by a railroad to perform the duty of a train crew member other than that of locomotive engineer, and is performing such other duty, shall not have his or her certification revoked based on actions taken or not taken while performing that duty.

(d) Limitations on consideration of prior operating rule compliance data. Except as provided for in paragraph (i) of this section, in determining whether a person may be or remain certified as a locomotive engineer, a railroad shall consider as operating rule compliance data only conduct described in paragraphs (e)(1) through (e)(5) of this section that occurred within a period of 36 consecutive months prior to the determination. A review of an existing certification shall be initiated promptly upon the occurrence and documentation of any conduct described in this section.

(e) A railroad shall only consider violations of its operating rules and practices that involve:

(1) Failure to control a locomotive or train in accordance with a signal indication, excluding a hand or a radio signal indication or a switch, that requires a complete stop before passing it;

(2) Failure to adhere to limitations concerning train speed when the speed at which the train was operated exceeds the maximum authorized limit

by at least 10 miles per hour. Where restricted speed is in effect, railroads shall consider only those violations of the conditional clause of restricted speed rules (*i.e.*, the clause that requires stopping within one half of the locomotive engineer's range of vision), or the operational equivalent thereof, which cause reportable accidents or incidents under part 225 of this chapter, except for accidents and incidents that are classified as "covered data" under § 225.5 of this chapter (*i.e.*, employee injury/illness cases reportable exclusively because a physician or other licensed health care professional either made a one-time topical application of a prescription-strength medication to the employee's injury or made a written recommendation that the employee: Take one or more days away from work when the employee instead reports to work (or would have reported had he or she been scheduled) and takes no days away from work in connection with the injury or illness; work restricted duty for one or more days when the employee instead works unrestricted (or would have worked unrestricted had he or she been scheduled) and takes no other days of restricted work activity in connection with the injury or illness; or take over-the-counter medication at a dosage equal to or greater than the minimum prescription strength, whether or not the employee actually takes the medication, as instances of failure to adhere to this section;

(3) Failure to adhere to procedures for the safe use of train or engine brakes when the procedures are required for compliance with the initial terminal, intermediate terminal, or transfer train and yard test provisions of 49 CFR part 232 or when the procedures are required for compliance with the class 1, class 1A, class II, or running brake test provisions of 49 CFR part 238;

(4) Occupying main track or a segment of main track without proper authority or permission;

(5) Failure to comply with prohibitions against tampering with locomotive mounted safety devices, or knowingly operating or permitting to

§ 240.117

49 CFR Ch. II (10–1–04 Edition)

be operated a train with an unauthorized disabled safety device in the controlling locomotive. (See 49 CFR part 218, subpart D and Appendix C to part 218);

(6) Incidents of noncompliance with § 219.101 of this chapter; however such incidents shall be considered as a violation only for the purposes of paragraphs (g)(2) and (3) of this section;

(f)(1) If in any single incident the person's conduct contravened more than one operating rule or practice, that event shall be treated as a single violation for the purposes of this section.

(2) A violation of one or more operating rules or practices described in paragraph (e)(1) through (e)(5) of this section that occurs during a properly conducted operational compliance test subject to the provisions of this chapter shall be counted in determining the periods of ineligibility described in paragraph (g) of this section.

(3) An operational test that is not conducted in compliance with this part, a railroad's operating rules, or a railroad's program under § 217.9 of this chapter, will not be considered a legitimate test of operational skill or knowledge, and will not be considered for certification, recertification or revocation purposes.

(g) A period of ineligibility described in this paragraph shall:

(1) Begin, for a person not currently certified, on the date of the railroad's written determination that the most recent incident has occurred; or

(2) Begin, for a person currently certified, on the date of the railroad's notification to the person that recertification has been denied or certification has been revoked; and

(3) Be determined according to the following standards:

(i) In the case of a single incident involving violation of one or more of the operating rules or practices described in paragraphs (e)(1) through (e)(5) of this section, the person shall have his or her certificate revoked for a period of one month.

(ii) In the case of two separate incidents involving a violation of one or more of the operating rules or practices described in paragraphs (e)(1) through (e)(5) of this section, that occurred within 24 months of each other,

the person shall have his or her certificate revoked for a period of six months.

(iii) In the case of three separate incidents involving violations of one or more of the operating rules or practices, described in paragraphs (e)(1) through (e)(6) of this section, that occurred within 36 months of each other, the person shall have his or her certificate revoked for a period of one year.

(iv) In the case of four separate incidents involving violations of one or more of the operating rules or practices, described in paragraphs (e)(1) through (e)(6) of this section, that occurred within 36 months of each other, the person shall have his or her certificate revoked for a period of three years.

(v) Where, based on the occurrence of violations described in paragraph (e)(6) of this section, different periods of ineligibility may result under the provisions of this section and § 240.119, the longest period of revocation shall control.

(4) Be reduced to the shorter periods of ineligibility imposed by paragraphs (g)(1) through (3) of this section as amended, and effective January 7, 2000 if the incident:

(i) Occurred prior to January 7, 2000; and

(ii) Involved violations described in paragraphs (e)(1) through (e)(5) of this section; and

(iii) Did not occur within 60 months of a prior violation as described in paragraph (e)(6) of this section.

(h) Future eligibility to hold certificate. A person whose certification has been denied or revoked shall be eligible for grant or reinstatement of the certificate prior to the expiration of the initial period of revocation only if:

(1) The denial or revocation of certification in accordance with the provisions of paragraph (g)(3) of this section is for a period of one year or less;

(2) Certification was denied or revoked for reasons other than non-compliance with § 219.101 of this chapter;

(3) The person has been evaluated by a Designated Supervisor of Locomotive Engineers and determined to have received adequate remedial training;

(4) The person has successfully completed any mandatory program of

training or retraining, if that was determined to be necessary by the railroad prior to return to service; and

(5) At least one half the pertinent period of ineligibility specified in paragraph (g)(3) of this section has elapsed.

(i) In no event shall incidents that meet the criteria of paragraphs (i)(1) through (4) of this section be considered as prior incidents for the purposes of paragraph (g)(3) of this section even though such incidents could have been or were validly determined to be violations at the time they occurred. Incidents that shall not be considered under paragraph (g)(3) of this section are those that:

(1) Occurred prior to May 10, 1993;

(2) Involved violations of one or more of the following operating rules or practices:

(i) Failure to control a locomotive or train in accordance with a signal indication;

(ii) Failure to adhere to limitations concerning train speed;

(iii) Failure to adhere to procedures for the safe use of train or engine brakes; or

(iv) Entering track segment without proper authority;

(3) Were or could have been found to be violations under this section contained in the 49 CFR, parts 200 to 399, edition revised as of October 1, 1992; and

(4) Would not be a violation of paragraph (e) of this section.

(j) In no event shall incidents that meet the criteria of paragraphs (j)(1) through (2) of this section be considered as prior incidents for the purposes of paragraph (g)(3) of this section even though such incidents could have been or were validly determined to be violations at the time they occurred. Incidents that shall not be considered under paragraph (g)(3) of this section are those that:

(1) Occurred prior to January 7, 2000;

(2) Involved violations of one or more of the following operating rules or practices:

(i) Failure to control a locomotive or train in accordance with a signal indication that requires a complete stop before passing it;

(ii) Failure to adhere to limitations concerning train speed when the speed

at which the train was operated exceeds the maximum authorized limit by at least 10 miles per hour or by more than one half of the authorized speed, whichever is less;

(3) Were or could have been found to be violations under this section contained in the 49 CFR, parts 200 to 399, edition revised as of October 1, 1999; and

(4) Would not be a violation of paragraph (e) of this section.

[64 FR 60990, Nov. 8, 1999, as amended at 68 FR 10139, Mar. 3, 2003]

§ 240.119 Criteria for consideration of data on substance abuse disorders and alcohol/drug rules compliance.

(a) Each railroad's program shall include criteria and procedures for implementing this section.

(b) *Fitness requirement.* (1) A person who has an active substance abuse disorder shall not be currently certified as a locomotive engineer.

(2) Except as provided in paragraph (e) of this section, a certified engineer who is determined to have an active substance abuse disorder shall be suspended from certification. Consistent with other provisions of this part, certification may be reinstated as provided in paragraph (d) of this section.

(3) In the case of a current employee of the railroad evaluated as having an active substance abuse disorder (including a person identified under the procedures of § 240.115), the employee may, if otherwise eligible, voluntarily self-refer for substance abuse counseling or treatment under the policy required by § 219.403 of this chapter; and the railroad shall then treat the substance abuse evaluation as confidential except with respect to current ineligibility for certification.

(c) *Prior alcohol/drug conduct; Federal rule compliance.* (1) In determining whether a person may be or remain certified as a locomotive engineer, a railroad shall consider conduct described in paragraph (c)(2) of this section that occurred within a period of 60 consecutive months prior to the review. A review of certification shall be initiated promptly upon the occurrence and documentation of any incident of conduct described in this paragraph.

(2) A railroad shall consider any violation of § 219.101 or § 219.102 of this chapter and any refusal or failure to provide a breath or body fluid sample for testing under the requirements of part 219 of this chapter when instructed to do so by a railroad representative.

(3) A period of ineligibility described in this paragraph shall:

(i) Begin, for a person not currently certified, on the date of the railroad's written determination that the most recent incident has occurred; or

(ii) Begin, for a person currently certified, on the date of the railroad's notification to the person that recertification has been denied or certification has been revoked; and

(4) The period of ineligibility described in this paragraph shall be determined in accordance with the following standards:

(i) In the case of a single violation of § 219.102 of this chapter, the person shall be ineligible to hold a certificate during evaluation and any required primary treatment as described in paragraph (d) of this section. In the case of two violations of § 219.102, the person shall be ineligible to hold a certificate for a period of two years. In the case of more than two such violations, the person shall be ineligible to hold a certificate for a period of five years.

(ii) In the case of one violation of § 219.102 of this chapter and one violation of § 219.101 of this chapter, the person shall be ineligible to hold a certificate for a period of three years.

(iii) In the case of one violation of § 219.101 of this chapter, the person shall be ineligible to hold a certificate for a period of 9 months (unless identification of the violation was through a qualifying "co-worker report" as described in § 219.405 of this chapter and the engineer waives investigation, in which case the certificate shall be deemed suspended during evaluation and any required primary treatment as described in paragraph (d)). In the case of two or more violations of § 219.101, the person shall be ineligible to hold a certificate for a period of five years.

(iv) In the case of a refusal or failure to provide a breath or body fluid sample for testing under the requirements of part 219 of this chapter when in-

structed to do so by a railroad representative, the refusal or failure shall be treated for purposes of ineligibility under this paragraph in the same manner as a violation of—

(A) § 219.102, in the case of a refusal or failure to provide a urine specimen for testing; or

(B) § 219.101, in the case of a refusal or failure to provide a breath sample (subpart D), or a blood specimen for mandatory post-accident toxicological testing (subpart C)).

(d) *Future eligibility to hold certificate following alcohol/drug violation.* The following requirements apply to a person who has been denied certification or who has had certification suspended or revoked as a result of conduct described in paragraph (c) of this section:

(1) The person shall not be eligible for grant or reinstatement of the certificate unless and until the person has—

(i) Been evaluated by an EAP Counselor to determine if the person currently has an active substance abuse disorder;

(ii) Successfully completed any program of counseling or treatment determined to be necessary by the EAP Counselor prior to return to service; and

(iii) Presented a urine sample for testing under Subpart H of this part that tested negative for controlled substances assayed and has tested negative for alcohol under paragraph (d)(4) of this section.

(2) An engineer placed in service or returned to service under the above-stated conditions shall continue in any program of counseling or treatment deemed necessary by the EAP Counselor and shall be subject to a reasonable program of follow-up alcohol and drug testing without prior notice for a period of not more than 60 months following return to service. Follow-up tests shall include not fewer than 6 alcohol tests and 6 drug tests during the first 12 months following return to service.

(3) Return-to-service and follow-up alcohol and drug tests shall be performed consistent with the requirements of subpart H of part 219 of this chapter.

(4) This paragraph does not create an entitlement to utilize the services of a railroad EAP Counselor, to be afforded leave from employment for counseling or treatment, or to employment as a locomotive engineer. Nor does it restrict any discretion available to the railroad to take disciplinary action based on conduct described herein.

(e) *Confidentiality protected.* Nothing in this part shall affect the responsibility of the railroad under § 219.403 of this chapter ("Voluntary Referral Policy") to treat voluntary referrals for substance abuse counseling and treatment as confidential; and the certification status of an engineer who is successfully assisted under the procedures of that section shall not be adversely affected. However, the railroad shall include in its voluntary referral policy required to be issued pursuant to § 219.403 of this chapter a provision that, at least with respect to a certified locomotive engineer or a candidate for certification, the policy of confidentiality is waived (to the extent that the railroad shall receive from the EAP Counselor official notice of the substance abuse disorder and shall suspend or revoke the certification, as appropriate) if the person at any time refuses to cooperate in a recommended course of counseling or treatment.

[56 FR 28254, June 19, 1991, as amended at 60 FR 53136, Oct. 12, 1995; 62 FR 63467, Dec. 1, 1997]

§ 240.121 Criteria for vision and hearing acuity data.

(a) Each railroad's program shall include criteria and procedures implementing this section.

(b) *Fitness requirement.* In order to be currently certified as a locomotive engineer, except as permitted by paragraph (e) of this section, a person's vision and hearing shall meet or exceed the standards prescribed in this section and appendix F to this part. It is recommended that each test conducted pursuant to this section should be performed according to any directions supplied by the manufacturer of such test and any American National Standards Institute (ANSI) standards that are applicable.

(c) Except as provided in paragraph (e), each person shall have visual acuity

that meets or exceeds the following thresholds:

(1) For distant viewing either

(i) Distant visual acuity of at least 20/40 (Snellen) in each eye without corrective lenses or

(ii) Distant visual acuity separately corrected to at least 20/40 (Snellen) with corrective lenses and distant binocular acuity of at least 20/40 (Snellen) in both eyes with or without corrective lenses;

(2) A field of vision of at least 70 degrees in the horizontal meridian in each eye; and

(3) The ability to recognize and distinguish between the colors of railroad signals as demonstrated by successfully completing one of the tests in appendix F to this part.

(d) Except as provided in paragraph (e) of this section, each person shall have hearing acuity that meets or exceeds the following thresholds when tested by use of an audiometric device (calibrated to American National Standard Specification for Audiometers, S3.6-1969): the person does not have an average hearing loss in the better ear greater than 40 decibels at 500Hz, 1,000 Hz, and 2,000 Hz with or without use of a hearing aid.

(e) A person not meeting the thresholds in paragraphs (c) and (d) of this section shall, upon request, be subject to further medical evaluation by a railroad's medical examiner to determine that person's ability to safely operate a locomotive. In accordance with the guidance prescribed in appendix F to this part, a person is entitled to one retest without making any showing and to another retest if the person provides evidence substantiating that circumstances have changed since the last test to the extent that the person could now arguably operate a locomotive or train safely. The railroad shall provide its medical examiner with a copy of this part, including all appendices. If, after consultation with one of the railroad's designated supervisors of locomotive engineers, the medical examiner concludes that, despite not meeting the threshold(s) in paragraphs (c) and (d) of this section, the person has the ability to safely operate a locomotive, the person may be certified as

§ 240.123

49 CFR Ch. II (10–1–04 Edition)

a locomotive engineer and such certification conditioned on any special restrictions the medical examiner determines in writing to be necessary.

(f) As a condition of maintaining certification, each certified locomotive engineer shall notify his or her employing railroad's medical department or, if no such department exists, an appropriate railroad official if the person's best correctable vision or hearing has deteriorated to the extent that the person no longer meets one or more of the prescribed vision or hearing standards or requirements of this section. This notification is required prior to any subsequent operation of a locomotive or train which would require a certified locomotive engineer.

[56 FR 28254, June 19, 1991, as amended at 64 FR 60992, Nov. 8, 1999]

§ 240.123 Criteria for initial and continuing education.

(a) Each railroad's program shall include criteria and procedures for implementing this section.

(b) A railroad shall provide for the continuing education of certified locomotive engineers to ensure that each engineer maintains the necessary knowledge, skill and ability concerning personal safety, operating rules and practices, mechanical condition of equipment, methods of safe train handling (including familiarity with physical characteristics as determined by a qualified Designated Supervisor of Locomotive Engineers), and relevant Federal safety rules.

(c) A railroad that elects to train a previously untrained person to be a locomotive engineer shall provide initial training which, at a minimum:

(1) Is composed of classroom, skill performance, and familiarization with physical characteristics components;

(2) Includes both knowledge and performance skill testing;

(3) Is conducted under the supervision of a qualified class instructor;

(4) Is subdivided into segments or periods of appropriate duration to effectively cover the following subject matter areas:

(i) Personal safety,

(ii) Railroad operating rules,

(iii) Mechanical condition of equipment,

(iv) Train handling procedures (including use of locomotive and train brake systems),

(v) Familiarization with physical characteristics including train handling, and

(vi) Compliance with Federal regulations;

(5) Is conducted so that the performance skill component shall

(i) Be under the supervision of a qualified instructor engineer located in the same control compartment whenever possible;

(ii) Place the student engineer at the controls of a locomotive for a significant portion of the time; and

(iii) Permit the student to experience whatever variety of types of trains are normally operated by the railroad.

(d) Pursuant to paragraphs (b) and (c) of this section, a person may acquire familiarity with the physical characteristics of a territory through the following methods if the specific conditions included in the description of each method are met. The methods used by a railroad for familiarizing its engineers with new territory while starting up a new railroad, starting operations over newly acquired rail lines, or reopening of a long unused route, shall be described in the railroad's locomotive engineer qualification program required under this part and submitted according to the procedures described in Appendix B to this part.

(1) If ownership of a railroad is being transferred from one company to another, the engineer(s) of the acquiring company may receive familiarization training from the selling company prior to the acquiring railroad commencing operation; or

(2) Failing to obtain familiarization training from the previous owner, opening a new rail line, or reopening an unused route would require that the engineer(s) obtain familiarization through other methods. Acceptable methods of obtaining familiarization include using hyrail trips or initial lite locomotive trips in compliance with what is specified in the railroad's locomotive engineer qualification program required under this part and submitted

according to the procedures described in Appendix B to this part.

[56 FR 28254, June 19, 1991, as amended at 64 FR 60992, Nov. 8, 1999]

§ 240.125 Criteria for testing knowledge.

(a) Each railroad's program shall include criteria and procedures for implementing this section.

(b) A railroad shall have procedures for testing a person being evaluated for qualification as a locomotive engineer in either train or locomotive service to determine that the person has sufficient knowledge of the railroad's rules and practices for the safe operation of trains.

(c) The testing methods selected by the railroad shall be:

(1) Designed to examine a person's knowledge of the railroad's rules and practices for the safe operation of trains;

(2) Objective in nature;

(3) Administered in written form;

(4) Cover the following subjects:

(i) Personal safety practices;

(ii) Operating practices;

(iii) Equipment inspection practices;

(iv) Train handling practices including familiarity with the physical characteristics of the territory; and

(v) Compliance with Federal safety rules;

(5) Sufficient to accurately measure the person's knowledge of the covered subjects; and

(6) Conducted without open reference books or other materials except to the degree the person is being tested on his or her ability to use such reference books or materials.

(d) The conduct of the test shall be documented in writing and the documentation shall contain sufficient information to identify the relevant facts relied on for evaluation purposes.

§ 240.127 Criteria for examining skill performance.

(a) Each railroad's program shall include criteria and procedures for implementing this section.

(b) A railroad shall have procedures for examining the performance skills of a person being evaluated for qualification as a locomotive engineer in either train or locomotive service to deter-

mine whether the person has the skills to safely operate locomotives and/or trains, including the proper application of the railroad's rules and practices for the safe operation of locomotives or trains, in the most demanding class or type of service that the person will be permitted to perform.

(c) The testing procedures selected by the railroad shall be:

(1) Designed to examine a person's skills in safely operating locomotives or trains including the proper application of the railroad's rules and practices for the safe operation of locomotives or trains when performing the most demanding class or type of service that the person will be permitted to perform;

(2) Conducted by a Designated Supervisor of Locomotive Engineers, who does not need to be qualified on the physical characteristics of the territory over which the test will be conducted;

(3) Cover the following subjects during the test period

(i) Operating practices;

(ii) Equipment inspection practices;

(iii) Train handling practices; and

(iv) Compliance with Federal safety rules;

(4) Be of sufficient length to effectively evaluate the person's ability to operate trains; and

(5) Conducted when the person either

(i) Is at the controls of the type of train normally operated on that railroad or segment of railroad and which this person might be permitted or required by the railroad to operate in the normal course of events after certification or

(ii) Is at the controls of a Type I or Type II simulator programmed to replicate the responsive behavior of the type of train normally operated on that railroad or segment of railroad and which this person might be permitted or required by the railroad to operate in the normal course of events after certification.

(d) The conduct of the test shall be documented in writing by the designated supervisor and the documentation shall contain:

(1) The relevant facts concerning the train being operated;

§ 240.129

(2) The constraints applicable to its operation; and

(3) The factors observed and relied on for evaluation purposes by the designated supervisor.

[56 FR 28254, June 19, 1991, as amended at 64 FR 60992, Nov. 8, 1999]

§ 240.129 Criteria for monitoring operational performance of certified engineers.

(a) Each railroad's program shall include criteria and procedures for implementing this section.

(b) A railroad shall have procedures for monitoring the operational performance of those it has determined as qualified as a locomotive engineer in either train or locomotive service.

(c) The procedures shall:

(1) Be designed to determine that the person possesses and routinely employs the skills to safely operate locomotives and/or trains, including the proper application of the railroad's rules and practices for the safe operation of locomotives and trains;

(2) Be designed so that each engineer shall be annually monitored by a Designated Supervisor of Locomotive Engineers, who does not need to be qualified on the physical characteristics of the territory over which the operational performance monitoring will be conducted;

(3) Be designed so that the locomotive engineer is either accompanied by the designated supervisor for a reasonable length of time or has his or her train handling activities electronically recorded by a train operations event recorder;

(d) The procedures may be designed so that the locomotive engineer being monitored either (i) is at the controls of the type of train normally operated on that railroad or segment of railroad and which this person might be permitted or required by the railroad to operate in the normal course of events after certification or (ii) is at the controls of a Type I or Type II simulator programmed to replicate the responsive behavior of the type of train normally operated on that railroad or segment of railroad and which this person might be permitted or required by the railroad to operate in the normal course of events after certification.

49 CFR Ch. II (10–1–04 Edition)

(e) The testing and examination procedures selected by the railroad for the conduct of a monitoring program shall be:

(1) Designed so that each locomotive engineer shall be given at least one unannounced test each calendar year.

(2) Designed to test engineer compliance with provisions of the railroad's operating rules that require response to signals that display less than a "clear" aspect, if the railroad operates with a signal system that must comply with part 236 of this chapter;

(3) Designed to test engineer compliance with provisions of the railroad's operating rules, timetable or other mandatory directives that require affirmative response by the locomotive engineer to less favorable conditions than that which existed prior to initiation of the test;

(4) Designed to test engineer compliance with provisions of the railroad's operating rules, timetable or other mandatory directives violation of which by engineers were cited by the railroad as the cause of train accidents or train incidents in accident reports filed in compliance with part 225 of this chapter in the preceding calendar year;

(5) Designed so that the administration of these tests is effectively distributed throughout whatever portion of a 24-hour day that the railroad conducts its operations; and

(6) Designed so that individual tests are administered without prior notice to the engineer being tested.

[56 FR 28254, June 19, 1991, as amended at 64 FR 60992, Nov. 8, 1999]

Subpart C—Implementation of the Certification Process

§ 240.201 Schedule for implementation.

(a) After October 30, 1991, each railroad in operation on that date shall designate in writing any person(s) it deems qualified as a designated supervisor of locomotive engineers. Each person so designated shall have demonstrated to the railroad through training, testing or prior experience that he or she has the knowledge, skills, and ability to be a designated supervisor of locomotive engineers.

(b) No later than November 1, 1991, each railroad shall designate in writing all persons that it will deem to be qualified as certified locomotive engineers for the purpose of initial compliance with paragraph (d) of this section, except as provided for in paragraph (h) of this section.

(1) Each person so designated shall have demonstrated to the railroad through training, testing or prior experience that he or she has the knowledge and skills to be a certified locomotive engineer.

(2) Each railroad shall issue, no later than December 31, 1991, a certificate that complies with § 240.223 to each person that it designates as qualified under the provisions of paragraph (b) of this section.

(c) No railroad shall permit or require a person, designated as qualified for certification under the provisions of paragraph (b) of this section, to perform service as a certified locomotive or train service engineer for more than the 36-month period beginning on the pertinent date for compliance with the mandatory procedures for testing and evaluation set forth in the applicable provisions of paragraph (e), (f) or (g) of this section unless that person has been determined to be qualified in accordance with procedures that comply with subpart C.

(d) After December 31, 1991, no railroad shall permit or require any person to operate a locomotive in any class of locomotive or train service unless that person has been certified as a qualified locomotive engineer and issued a certificate that complies with § 240.223.

(e) After December 31, 1991, no Class I railroad (including the National Railroad Passenger Corporation) or railroad providing commuter service shall designate any person it deems qualified as a designated supervisor of locomotive engineers or initially certify or recertify a person as a locomotive engineer in either locomotive or train service unless that person has been tested, evaluated, and determined to be qualified in accordance with procedures that comply with subpart C.

(f) After May 31, 1992 no Class II railroad shall designate any person it deems qualified as a designated supervisor of locomotive engineers or ini-

tially certify or recertify a person as a locomotive engineer in any class of locomotive or train service unless that person has been tested, evaluated and determined to be qualified in accordance with procedures that comply with subpart C.

(g) After November 30, 1992 no Class III railroad (including a switching and terminal or other railroad not otherwise classified) shall designate any person it deems qualified as a designated supervisor of locomotive engineers or initially certify or recertify a person as a locomotive engineer in any class of locomotive or train service unless that person has been tested, evaluated and determined to be qualified in accordance with procedures that comply with subpart C.

(h) A railroad may continue to designate any person it deems qualified as a designated supervisor of locomotive engineers or as a certified engineer, on the basis of paragraph (b) determinations, prior to the pertinent date by which a railroad of its class must comply with the procedures for testing and evaluating persons required under subpart C. Each person designated as a locomotive engineer shall be issued a certificate that complies with § 240.223 prior to being required or permitted to operate a locomotive.

(i) A railroad commencing operations prior to the pertinent date for compliance by a railroad of its class may designate any person it deems qualified as a designated supervisor of locomotive engineers or as a certified locomotive engineer on the basis of paragraph (b) until the pertinent date for compliance with the procedures for testing and evaluating required under subpart C. Each person designated as a locomotive engineer shall be issued a certificate that complies with § 240.223 prior to being required or permitted to operate a locomotive.

§ 240.203 Determinations required as a prerequisite to certification.

(a) Except as provided in paragraph (c), after the pertinent date specified in paragraph (e), (f), or (g) of § 240.201, each railroad, prior to initially certifying or recertifying any person as an engineer for any class of service, shall,

§ 240.205

in accordance with its FRA-approved program determine in writing that:

(1) The individual meets the eligibility requirements of §§ 240.115, 240.117 and 240.119; and

(2) The individual meets the vision and hearing acuity standards of § 240.121;

(3) The individual has the necessary knowledge, as demonstrated by successfully completing a test that meets the requirements of § 240.125;

(4) The individual has the necessary applied knowledge and operating performance skills, as demonstrated by successfully completing an operational performance test that meets the requirements of § 240.127; and

(5) Where a person has not previously been certified, that the person has completed a training program that meets the requirements of § 240.123.

(b) A railroad may certify a person as a student engineer after determining that the person meets the vision and hearing acuity standards of § 240.121. A railroad may subsequently certify that student engineer as either a locomotive servicing engineer or a train service engineer without further review of his or her acuity status provided it determines that:

(1) The person successfully completed a training program that complies with § 240.123;

(2) The person meets the eligibility requirements of §§ 240.109 and 240.119; and

(3) A period of not more than twenty-four months has elapsed since the student engineer certification was issued.

[56 FR 28254, June 19, 1991, as amended at 60 FR 53136, Oct. 12, 1995]

§ 240.205 Procedures for determining eligibility based on prior safety conduct.

(a) After the pertinent date specified in paragraph (e), (f), or (g) of § 240.201, each railroad, prior to initially certifying or recertifying any person as an engineer for any class of service, shall determine that the person meets the eligibility requirements of § 240.115 involving prior conduct as a motor vehicle operator, § 240.117 involving prior conduct as a railroad worker, and § 240.119 involving substance abuse dis-

49 CFR Ch. II (10–1–04 Edition)

orders and alcohol/drug rules compliance.

(b) In order to make the determination required under paragraph (a) of this section, a railroad shall have on file documents pertinent to the determinations referred to in paragraph (a) of this section, including a written document from its EAP Counselor either a document reflecting his or her professional opinion that the person has been evaluated as not currently affected by a substance abuse disorder or that the person has been evaluated as affected by an active substance abuse disorder and is ineligible for certification.

§ 240.207 Procedures for making the determination on vision and hearing acuity.

(a) After the pertinent date specified in paragraph (e), (f), or (g) of § 240.201, each railroad, prior to initially certifying or recertifying any person as an engineer for any class of service, shall determine that the person meets the standards for visual acuity and hearing acuity prescribed in § 240.121.

(b) In order to make the determination required under paragraph (a), a railroad shall have on file either:

(1) A medical examiner's certificate that the individual has been medically examined and meets these acuity standards; or

(2) A written document from its medical examiner documenting his or her professional opinion that the person does not meet one or both acuity standards and stating the basis for his or her determination that

(i) The person can nevertheless be certified under certain conditions or

(ii) The person's acuity is such that he or she cannot safely operate a locomotive even with conditions attached.

(c) Any examination required for compliance with this section shall be performed by or under the supervision of a medical examiner or a licensed physician's assistant such that:

(1) A licensed optometrist or a technician responsible to that person may perform the portion of the examination that pertains to visual acuity; and

(2) A licensed or certified audiologist or a technician responsible to that person may perform the portion of the examination that pertains to hearing acuity.

(d) If the examination required under this section discloses that the person needs corrective lenses or a hearing aid, or both, either to meet the threshold acuity levels established in § 240.121 or to meet a lower threshold determined by the railroad's medical examiner to be sufficient to safely operate a locomotive or train on that railroad, that fact shall be noted on the certificate issued in accordance with the provisions of this part.

(e) Any person with such a certificate notation shall use the relevant corrective device(s) while operating a locomotive in locomotive or train service unless the railroad's medical examiner subsequently determines in writing that the person can safely operate without using the device.

§ 240.209 Procedures for making the determination on knowledge.

(a) After the pertinent date specified in paragraph (e), (f), or (g) of § 240.201, each railroad, prior to initially certifying or recertifying any person as an engineer for any class of train or locomotive service, shall determine that the person has, in accordance with the requirements of § 240.125 of this part, demonstrated sufficient knowledge of the railroad's rules and practices for the safe operation of trains.

(b) In order to make the determination required by paragraph (a) a railroad shall have written documentation showing that the person either

(i) Exhibited his or her knowledge by achieving a passing grade in testing that complies with this part or

(ii) Did not achieve a passing grade in such testing.

(c) If a person fails to achieve a passing score under the testing procedures required by this part no railroad shall permit or require that person to operate a locomotive as a locomotive or train service engineer prior to that person's achieving a passing score during a reexamination of his or her knowledge.

§ 240.211 Procedures for making the determination on performance skills.

(a) After the pertinent date specified in paragraph (e), (f), or (g) of § 240.201, each railroad, prior to initially certifying or recertifying any person as an engineer for any class of train or locomotive service, shall determine that the person has demonstrated, in accordance with the requirements of § 240.127 of this part, the skills to safely operate locomotives or locomotives and trains, including the proper application of the railroad's rules and practices for the safe operation of locomotives or trains, in the most demanding class or type of service that the person will be permitted to perform.

(b) In order to make this determination, a railroad shall have written documentation showing the person either

(i) Exhibited his or her knowledge by achieving a passing grade in testing that complies with this part or

(ii) Did not achieve a passing grade in such testing.

(c) If a person fails to achieve a passing score under the testing and evaluation procedures required by this part, no railroad shall permit or require that person to operate a locomotive as a locomotive or train service engineer prior to that person's achieving a passing score during a reexamination of his or her performance skills.

(d) No railroad shall permit a designated supervisor of locomotive engineers to test, examine or evaluate his or her own performance skills when complying with this section.

§ 240.213 Procedures for making the determination on completion of training program.

(a) After the pertinent date specified in paragraph (e), (f), or (g) of § 240.201, each railroad, prior to the initial issuance of a certificate to any person as a train or locomotive service engineer, shall determine that the person has, in accordance with the requirements of § 240.123 of this part, the knowledge and skills to safely operate a locomotive or train in the most demanding class or type of service that the person will be permitted to perform.

§ 240.215

49 CFR Ch. II (10–1–04 Edition)

(b) In making this determination, a railroad shall have written documentation showing that:

(1) The person completed a training program that complies with § 240.123 of this part;

(2) The person demonstrated his or her knowledge and skills by achieving a passing grade under the testing and evaluation procedures of that training program; and

(3) A qualified Designated Supervisor of Locomotive Engineers has determined that the person is familiar with the physical characteristics of the railroad or its pertinent segments.

[56 FR 28254, June 19, 1991, as amended at 64 FR 60992, Nov. 8, 1999]

§ 240.215 Retaining information supporting determinations.

(a) After the pertinent date in paragraphs (e), (f) or (g) of § 240.201, a railroad that issues, denies, or revokes a certificate after making the determinations required under § 240.203 shall maintain a record for each certified engineer or applicant for certification that contains the information the railroad relied on in making the determinations.

(b) The information concerning eligibility that the railroad shall retain includes:

(1) Any relevant data from the railroad's records concerning the person's prior safety conduct;

(2) Any relevant data furnished by another railroad;

(3) Any relevant data furnished by a governmental agency concerning the person's motor vehicle driving record; and

(4) Any relevant data furnished by the person seeking certification concerning his or her eligibility.

(c) The information concerning vision and hearing acuity that the railroad shall retain includes:

(1) The relevant test results data concerning acuity; and,

(2) If applicable, the relevant data concerning the professional opinion of the railroad's medical examiner on the adequacy of the person's acuity.

(d) The information concerning demonstrated knowledge that the railroad shall retain includes:

(1) Any relevant data from the railroad's records concerning the person's success or failure of the passage of knowledge test(s); and

(2) A sample copy of the written knowledge test or tests administered.

(e) The information concerning demonstrated performance skills that the railroad shall retain includes:

(1) The relevant data from the railroad's records concerning the person's success or failure on the performance skills test(s) that documents the relevant operating facts on which the evaluation is based including the observations and evaluation of the designated supervisor of locomotive engineers;

(2) If a railroad relies on the use of a locomotive operations simulator to conduct the performance skills testing required under this part, the relevant data from the railroad's records concerning the person's success or failure on the performance skills test(s) that documents the relevant operating facts on which the determination was based including the observations and evaluation of the designated supervisor of locomotive engineers; and;

(3) The relevant data from the railroad's records concerning the person's success or failure on tests the railroad performed to monitor the engineer's operating performance in accordance with § 240.129.

(f) If a railroad is relying on successful completion of an approved training program conducted by another entity, the relying railroad shall maintain a record for each certified engineer that contains the relevant data furnished by the training entity concerning the person's demonstration of knowledge and performance skills and relied on by the railroad in making its determinations.

(g) If a railroad is relying on a certification decision initially made by another railroad, the relying railroad shall maintain a record for each certified engineer that contains the relevant data furnished by the other railroad which it relied on in making its determinations.

(h) All records required under this section shall be retained for a period of six years from the date of the certification, recertification, denial or revocation decision and shall be made

available to FRA representatives upon request during normal business hours.

(i) It shall be unlawful for any railroad to knowingly or any individual to willfully:

(1) Make, cause to be made, or participate in the making of a false entry on the record(s) required by this section; or

(2) Otherwise falsify such records through material misstatement, omission, or mutilation.

(j) Nothing in this section precludes a railroad from maintaining the information required to be retained under this section in an electronic format provided that:

(1) The railroad adequately limits and controls those who have access to such information;

(2) The railroad employs a system for data storage that permits reasonable access and retrieval of the information in usable format when requested to furnish data by FRA representatives; and

(3) Information retrieved from the system can be easily produced in a printed format which can be readily provided to FRA representatives and authenticated by a designated representative of the railroad as a true and accurate copy of the railroad's records if requested to do so by FRA representatives.

[56 FR 28254, June 19, 1991, as amended at 58 FR 19003, Apr. 9, 1993]

§ 240.217 Time limitations for making determinations.

(a) After the pertinent date in paragraph (e), (f) or (g) of § 240.201, a railroad shall not certify or recertify a person as a qualified locomotive engineer in any class of train or engine service, if the railroad is making:

(1) A determination concerning eligibility and the eligibility data being relied on were furnished more than 366 days before the date of the railroad's certification decision;

(2) A determination concerning visual and hearing acuity and the medical examination being relied on was conducted more than 366 days before the date of the railroad's recertification decision;

(3) A determination concerning demonstrated knowledge and the knowledge examination being relied on was

conducted more than 366 days before the date of the railroad's certification decision; or

(4) A determination concerning demonstrated performance skills and the performance skill testing being relied on was conducted more than 366 days before the date of the railroad's certification decision;

(b) The time limitations of paragraph (a) of this section do not apply to a railroad that is making a certification decision in reliance on determinations made by another railroad in accordance with paragraph (c)(2) of this section, § 240.227, or § 240.229.

(c) Except as provided in § 240.201 concerning implementation dates for initial certification decisions and paragraph (b) of this section, no railroad shall:

(1) Certify a person as a qualified locomotive engineer for an interval of more than 36 months; or

(2) Rely on a certification issued by another railroad that is more than 36 months old.

(d) Except as provided for in § 240.201 concerning initial implementation of the program, a railroad shall issue each person designated as a certified locomotive engineer a certificate that complies with § 240.223 no later than 30 days from the date of its decision to certify or recertify that person.

[56 FR 28254, June 19, 1991, as amended at 58 FR 19003, Apr. 9, 1993; 60 FR 53137, Oct. 12, 1995; 64 FR 60992, Nov. 8, 1999]

§ 240.219 Denial of certification.

(a) A railroad shall notify a candidate for certification or recertification of information known to the railroad that forms the basis for denying the person certification and provide the person a reasonable opportunity to explain or rebut that adverse information in writing prior to denying certification.

(b) This section does not require further opportunity to comment if the railroad's denial is based solely on factors addressed by §§ 240.115, 240.117, and 240.119 and the opportunity to comment afforded by those sections has been provided.

(c) If it denies a person certification or recertification, a railroad shall notify the person of the adverse decision

§ 240.221

and explain, in writing, the basis for its denial decision. The document explaining the basis for the denial shall be mailed or delivered to the person within 10 days after the railroad's decision and shall give the date of the decision.

§ 240.221 Identification of qualified persons.

(a) After November 1, 1991, a railroad shall maintain a written record identifying each person designated by it as a supervisor of locomotive engineers.

(b) After November 1, 1991, a railroad shall maintain a written record identifying each person designated as a certified locomotive engineer. That listing of certified engineers shall indicate the class of service the railroad determines each person is qualified to perform and date of the railroad's certification decision.

(c) If a railroad is responsible for controlling joint operations territory, the listing shall include person(s) certified in accordance with § 240.229.

(d) The listing required by paragraphs (a), (b), and (c) shall be updated at least annually.

(e) The record required under this section shall be kept at the divisional or regional headquarters of the railroad and shall be available for inspection or copying by FRA during regular business hours.

(f) A railroad may obtain approval from FRA to maintain this record electronically or maintain this record at the railroad's general offices, or both. Requests for such approval shall be filed in writing with the Associate Administrator for Safety and contain sufficient information to explain how FRA will be given access to the data that is fully equivalent to that created by compliance with paragraph (e).

§ 240.223 Criteria for the certificate.

(a) As a minimum, each certificate issued in compliance with this part shall:

(1) Identify the railroad or parent company that is issuing it;

(2) Indicate that the railroad, acting in conformity with this part, has determined that the person to whom it is being issued has been determined to be qualified to operate a locomotive;

49 CFR Ch. II (10–1–04 Edition)

(3) Identify the person to whom it is being issued (including the person's name, date of birth and employee identification number, and either a physical description or photograph of the person);

(4) Identify any conditions or limitations, including the class of service or conditions to ameliorate vision or hearing acuity deficiencies, that restrict the person's operational authority;

(5) Show the date of its issuance;

(6) Be signed by a supervisor of locomotive engineers or other individual designated in accordance with paragraph (b) of this section;

(7) Show the date of the person's last operational monitoring event as required by § 240.129(c) and § 240.303(b), unless that information is reflected on supplementary documents which the locomotive engineer has in his or her possession when operating a locomotive; and

(8) Be of sufficiently small size to permit being carried in an ordinary pocket wallet.

(b) Each railroad to which this part applies shall designate in writing any person, other than a supervisor of locomotive engineers, that it authorizes to sign the certificates described in this section. The designation can identify such persons by name or job title.

(c) Nothing in paragraph (a) of this section shall prohibit any railroad from including additional information on the certificate or supplementing the certificate through other documents.

(d) It shall be unlawful for any railroad to knowingly or any individual to willfully:

(1) Make, cause to be made, or participate in the making of a false entry on that certificate; or

(2) Otherwise falsify that certificate through material misstatement, omission, or mutilation.

[56 FR 28254, June 19, 1991, as amended at 58 FR 19003, Apr. 9, 1993; 64 FR 60993, Nov. 8, 1999]

§ 240.225 Reliance on qualification determinations made by other railroads.

(a) After December 31, 1991, a railroad that is considering certification of a person as a qualified engineer may rely

on determinations made by another railroad concerning that person's qualifications. The railroad's certification program shall address how the railroad will administer the training of previously uncertified engineers with extensive operating experience or previously certified engineers who have had their certification expire. If a railroad's certification program fails to specify how to train a previously certified engineer hired from another railroad, then the railroad shall require the newly hired engineer to take the hiring railroad's entire training program. A railroad relying on another's certification shall determine that:

(1) The prior certification is still valid in accordance with the provisions of §§ 240.201, 240.217, and 240.307;

(2) The prior certification was for the same classification of locomotive or train service as the certification being issued under this section;

(3) The person has received training on and visually observed the physical characteristics of the new territory in accordance with § 240.123;

(4) The person has demonstrated the necessary knowledge concerning the railroad's operating rules in accordance with § 240.125;

(5) The person has demonstrated the necessary performance skills concerning the railroad's operating rules in accordance with § 240.127.

(b) [Reserved]

[64 FR 60993, Nov. 8, 1999]

§ 240.227 Reliance on qualification requirements of other countries.

(a) A railroad that conducts joint operations with a Canadian railroad may certify, for the purposes of compliance with this part, that a person is qualified to be a locomotive or train service engineer provided it determines that:

(1) The person is employed by the Canadian railroad; and

(2) The person meets or exceeds the qualifications standards issued by Transport Canada for such service.

(b) Any Canadian railroad that is required to comply with this regulation may certify that a person is qualified to be a locomotive or train service engineer provided it determines that:

(1) The person is employed by the Canadian railroad; and

(2) The person meets or exceeds the qualifications standards issued by Transport Canada for such service.

§ 240.229 Requirements for joint operations territory.

(a) Except for minimal joint operations provided for in paragraph (f) of this section, no railroad that is responsible for controlling the conduct of joint operations with another railroad shall permit or require any person to operate a locomotive in any class of train or engine service unless that person has been certified as a qualified locomotive engineer for the purposes of joint operations and issued a certificate that complies with § 240.223.

(b) Each railroad that is responsible for controlling the conduct of joint operations with another railroad shall certify a person as a qualified locomotive engineer for the purposes of joint operations either by making the determinations required under subpart C of this part or by relying on the certification issued by another railroad under this part.

(c) A railroad that controls joint operations may rely on the certification issued by another railroad under the following conditions:

(1) The controlling railroad shall determine:

(i) That the person has been certified as a qualified engineer under the provisions of this part by the railroad which employs that individual;

(ii) That the person certified as a locomotive engineer by the other railroad has demonstrated the necessary knowledge concerning the controlling railroad's operating rules, if the rules are different;

(iii) That the person certified as a locomotive engineer by the other railroad has the necessary operating skills concerning the joint operations territory; and

(iv) That the person certified as a locomotive engineer by the other railroad has the necessary familiarity with the physical characteristics for the joint operations territory; and,

(2) The railroad which employs the individual shall determine that the person called to operate on the controlling railroad is a certified engineer who

§ 240.231

49 CFR Ch. II (10–1–04 Edition)

is qualified to operate on that track segment; and

(3) Each locomotive engineer who is called to operate on another railroad shall:

(i) Be qualified on the segment of track upon which he or she will operate in accordance with the requirements set forth by the controlling railroad; and,

(ii) Immediately notify the railroad upon which he or she is employed if he or she is not qualified to perform that service.

(d) A railroad that controls joint operations and certifies locomotive engineers from a different railroad may comply with the requirements of paragraph (a) of this section by noting its supplemental certification decision on the original certificate as provided for in § 240.223(c).

(e) A railroad responsible for controlling the conduct of joint operations with another railroad shall be deemed to be in compliance with paragraph (a) of this section when it provides a qualified person to accompany a locomotive engineer who lacks joint operations certification during that engineer's operations in joint operations territory. As used in this section qualified person means either a designated supervisor of locomotive engineers or a certified train service engineer determined by the controlling railroad to have the necessary knowledge concerning the controlling railroad's operating rules and to have the necessary operating skills including familiarity with its physical characteristics concerning the joint operations territory.

(f) A railroad that is responsible for controlling the conduct of joint operations with another railroad may permit a certified locomotive engineer to operate a locomotive in any class of train or engine service without determining that the person has been certified as a qualified locomotive engineer for the purposes of joint operations when a minimal joint operation is involved. For the purposes of this section a minimal joint operation exists when a locomotive or train belonging to one railroad is being operated on the same track on which operations are conducted by the railroad controlling

operations, under the following conditions:

(1) The maximum authorized speed for operations on the track does not exceed 20 miles per hour;

(2) The track is other than a main track;

(3) Operations are conducted under operating rules that require every locomotive and train to proceed at a speed that permits stopping within one half the range of vision of the locomotive engineer; and

(4) The maximum distance for joint operations on the track does not exceed one mile.

[56 FR 28254, June 19, 1991, as amended at 58 FR 19003, Apr. 9, 1993; 64 FR 60993, Nov. 8, 1999]

§ 240.231 Requirements for locomotive engineers unfamiliar with physical characteristics in other than joint operations.

(a) Except as provided in paragraph (b) of this section, no locomotive engineer shall operate a locomotive over a territory unless he or she is qualified on the physical characteristics of the territory pursuant to the railroad's certification program.

(b) Except as provided in paragraph (c) of this section, if a locomotive engineer lacks qualification on the physical characteristics required by paragraph (a) of this section, he or she shall be assisted by a pilot qualified over the territory pursuant to the railroad's certification program.

(1) For a locomotive engineer who has never been qualified on the physical characteristics of the territory over which he or she is to operate a locomotive or train, the pilot shall be a person qualified and certified as a locomotive engineer who is not an assigned crew member.

(2) For a locomotive engineer who was previously qualified on the physical characteristics of the territory over which he or she is to operate a locomotive or train, but whose qualification has expired, the pilot may be any person, who is not an assigned crew member, qualified on the physical characteristics of the territory.

(c) Pilots are not required if the movement is on a section of track with

an average grade of less than 1% over 3 continuous miles, and

(1) The track is other than a main track; or

(2) The maximum distance the locomotive or train will be operated does not exceed one mile; or

(3) The maximum authorized speed for any operation on the track does not exceed 20 miles per hour; or

(4) Operations are conducted under operating rules that require every locomotive and train to proceed at a speed that permits stopping within one half the range of vision of the locomotive engineer.

[64 FR 60993, Nov. 8, 1999]

Subpart D—Administration of the Certification Programs

§ 240.301 Replacement of certificates.

A railroad shall have a system for the prompt replacement of lost, stolen or mutilated certificates and that system shall be reasonably accessible to certified locomotive engineers in need of a replacement certificate.

§ 240.303 Operational monitoring requirements.

(a) After December 31, 1991, each railroad to which this part applies shall, prior to FRA approval of its program in accordance with § 240.201, have a program to monitor the conduct of its certified locomotive engineers by performing both operational monitoring observations and by conducting unannounced operating rules compliance tests.

(b) The program shall be conducted so that each locomotive engineer shall be given at least one operational monitoring observation by a qualified supervisor of locomotive engineers in each calendar year.

(c) The program shall be conducted so that each locomotive engineer shall be given at least one unannounced compliance test each calendar year.

(d) The unannounced test program shall:

(1) Test engineer compliance with one or more provisions of the railroad's operating rules that require response to signals that display less than a "clear" aspect, if the railroad operates

with a signal system that must comply with part 236 of this chapter;

(2) Test engineer compliance with one or more provisions of the railroad's operating rules, timetable or other mandatory directives that require affirmative response by the locomotive engineer to less favorable conditions than that which existed prior to initiation of the test;

(3) Test engineer compliance with provisions of the railroad's operating rules, timetable or other mandatory directives the violations of which by engineers were cited by the railroad as the cause of train accidents or train incidents in accident reports filed in compliance with part 225 of this chapter for the preceding year;

(4) Be conducted so that the administration of these tests is effectively distributed throughout whatever portion of a 24-hour day that the railroad conducts its operations;

(5) Be conducted so that individual tests are administered without prior notice to the locomotive engineer being tested; and

(6) Be conducted so that the results of the test are recorded on the certificate and entered on the record established under § 240.215 within 30 days of the day the test is administered.

§ 240.305 Prohibited conduct.

After December 31, 1991,

(a) It shall be unlawful to:

(1) Operate a locomotive or train past a signal indication, excluding a hand or a radio signal indication or a switch, that requires a complete stop before passing it; or

(2) Operate a locomotive or train at a speed which exceeds the maximum authorized limit by at least 10 miles per hour. Where restricted speed is in effect, only those violations of the conditional clause of restricted speed rules (i.e., the clause that requires stopping within one half of the locomotive engineer's range of vision), or the operational equivalent thereof, which cause reportable accidents or incidents under part 225 of this chapter, shall be considered instances of failure to adhere to this section; or

(3) Operate a locomotive or train without adhering to procedures for the safe use of train or engine brakes when

§ 240.307

49 CFR Ch. II (10–1–04 Edition)

the procedures are required for compliance with the initial terminal, intermediate terminal, or transfer train and yard test provisions of 49 CFR part 232 or when the procedures are required for compliance with the class 1, class 1A, class II, or running brake test provisions of 49 CFR part 238;

(4) Fail to comply with any mandatory directive concerning the movement of a locomotive or train by occupying main track or a segment of main track without proper authority or permission;

(5) Fail to comply with prohibitions against tampering with locomotive mounted safety devices, or knowingly operate or permit to be operated a train with an unauthorized disabled safety device in the controlling locomotive. (See 49 CFR part 218, subpart D, and appendix C to part 218);

(6) Be a Designated Supervisor of Locomotive Engineers, a certified locomotive engineer pilot or an instructor engineer who is monitoring, piloting or instructing a locomotive engineer and fails to take appropriate action to prevent a violation of paragraphs (a)(1) through (a)(5) of this section. Appropriate action does not mean that a supervisor, pilot or instructor must prevent a violation from occurring at all costs; the duty may be met by warning an engineer of a potential or foreseeable violation. A Designated Supervisor of Locomotive Engineers will not be held culpable under this section when this monitoring event is conducted as part of the railroad's operational compliance tests as defined in §§ 217.9 and 240.303 of this chapter.

(b) Each locomotive engineer who has received a certificate required under this part shall:

(1) Have that certificate in his or her possession while on duty as an engineer; and

(2) Display that certificate upon the receipt of a request to do so from

(i) A representative of the Federal Railroad Administration,

(ii) An officer of the issuing railroad, or

(iii) An officer of another railroad when operating a locomotive or train in joint operations territory.

(c) Any locomotive engineer who is notified or called to operate a loco-

motive or train and such operation would cause the locomotive engineer to exceed certificate limitations, set forth in accordance with subpart B of this part, shall immediately notify the railroad that he or she is not qualified to perform that anticipated service and it shall be unlawful for the railroad to require such service.

(d) During the duration of any certification interval, a locomotive engineer who has a current certificate from more than one railroad shall immediately notify the other certifying railroad(s) if he or she is denied recertification by a railroad or has his or her certification revoked by a railroad.

(e) Nothing in this section shall be deemed to alter a certified locomotive engineer's duty to comply with other provisions of this chapter concerning railroad safety.

[56 FR 28254, June 19, 1991, as amended at 58 FR 19004, Apr. 9, 1993; 64 FR 60993, Nov. 8, 1999]

§ 240.307 Revocation of certification.

(a) Except as provided for in § 240.119(e), a railroad that certifies or recertifies a person as a qualified locomotive engineer and, during the period that certification is valid, acquires information which convinces the railroad that the person no longer meets the qualification requirements of this part, shall revoke the person's certificate as a qualified locomotive engineer.

(b) Pending a revocation determination under this section, the railroad shall:

(1) Upon receipt of reliable information indicating the person's lack of qualification under this part, immediately suspend the person's certificate;

(2) Prior to or upon suspending the person's certificate, provide notice of the reason for the suspension, the pending revocation, and an opportunity for a hearing before a presiding officer other than the investigating officer. The notice may initially be given either orally or in writing. If given orally, it must be confirmed in writing and the written confirmation must be made promptly. Written confirmation which conforms to the notification provisions of an applicable collective bargaining agreement shall be deemed to satisfy

the written confirmation requirements of this section. In the absence of an applicable collective bargaining agreement provision, the written confirmation must be made within 96 hours.

(3) Convene the hearing within the deadline prescribed by either paragraph (c)(1) of this section or the applicable collective bargaining agreement as permitted under paragraph (d) of this section;

(4) Determine, on the record of the hearing, whether the person no longer meets the qualification requirements of this part stating explicitly the basis for the conclusion reached;

(5) When appropriate, impose the pertinent period of revocation provided for in § 240.117 or § 240.119; and

(6) Retain the record of the hearing for 3 years after the date the decision is rendered.

(c) Except as provided for in paragraphs (d), (f), (i) and (j) of this section, a hearing required by this section shall be conducted in accordance with the following procedures:

(1) The hearing shall be convened within 10 days of the date the certificate is suspended unless the locomotive engineer requests or consents to delay in the start of the hearing.

(2) The hearing shall be conducted by a presiding officer, who can be any qualified person authorized by the railroad other than the investigating officer.

(3) The presiding officer will exercise the powers necessary to regulate the conduct of the hearing for the purpose of achieving a prompt and fair determination of all material issues in controversy.

(4) The presiding officer shall convene and preside over the hearing.

(5) Testimony by witnesses at the hearing shall be recorded verbatim.

(6) All relevant and probative evidence shall be received unless the presiding officer determines the evidence to be unduly repetitive or so extensive and lacking in relevancy that its admission would impair the prompt, orderly, and fair resolution of the proceeding.

(7) The presiding officer may:

(i) Adopt any needed procedures for the submission of evidence in written form;

(ii) Examine witnesses at the hearing;

(iii) Convene, recess, adjourn or otherwise regulate the course of the hearing; and

(iv) Take any other action authorized by or consistent with the provisions of this part and permitted by law that may expedite the hearing or aid in the disposition of the proceeding.

(8) Parties may appear and be heard on their own behalf or through designated representatives. Parties may offer relevant evidence including testimony and may conduct such examination of witnesses as may be required for a full disclosure of the relevant facts.

(9) The record in the proceeding shall be closed at conclusion of the hearing unless the presiding officer allows additional time for the submission of information. In such instances the record shall be left open for such time as the presiding officer grants for that purpose.

(10) No later than 10 days after the close of the record, a railroad official, other than the investigating officer, shall prepare and sign a written decision in the proceeding.

(11) The decision shall:

(i) Contain the findings of fact as well as the basis therefor, concerning all material issues of fact presented on the record; and

(ii) Be served on the employee.

(12) The railroad shall have the burden of proving that the locomotive engineer's conduct was not in compliance with the applicable railroad operating rule or practice or part 219 of this chapter.

(d) A hearing required by this section which is conducted in a manner that conforms procedurally to the applicable collective bargaining agreement shall be deemed to satisfy the procedural requirements of this section.

(e) A hearing required under this section may be consolidated with any disciplinary or other hearing arising from the same facts, but in all instances a railroad official, other than the investigating officer, shall make separate findings as to the revocation required under this section.

§ 240.309

49 CFR Ch. II (10–1–04 Edition)

(f) A person may waive the right to the hearing provided under this section. That waiver shall:

(1) Be made in writing;

(2) Reflect the fact that the person has knowledge and understanding of these rights and voluntarily surrenders them; and

(3) Be signed by the person making the waiver.

(g) A railroad that has relied on the certification by another railroad under the provisions of §240.227 or §240.229, shall revoke its certification if, during the period that certification is valid, the railroad acquires information which convinces it that another railroad has revoked its certification after determining, in accordance with the provisions of this section, that the person no longer meets the qualification requirements of this part. The requirement to provide a hearing under this section is satisfied when any single railroad holds a hearing and no additional hearing is required prior to a revocation by more than one railroad arising from the same facts.

(h) The period of certificate suspension prior to the commencement of a hearing required under this section shall be credited towards satisfying any applicable revocation period imposed in accordance with the provisions of §240.117.

(i) A railroad:

(1) Shall not determine that the person failed to meet the qualification requirements of this part and shall not revoke the person's certification as provided for in paragraph (a) of this section if sufficient evidence exists to establish that an intervening cause prevented or materially impaired the locomotive engineer's ability to comply with the railroad operating rule or practice which constitutes a violation under §240.117(e)(1) through (e)(5) of this part; or

(2) May determine that the person meets the qualification requirements of this part and decide not to revoke the person's certification as provided for in paragraph (a) of this section if sufficient evidence exists to establish that the violation of §240.117(e)(1) through (e)(5) of this part was of a minimal nature and had no direct or potential effect on rail safety.

(j) The railroad shall place the relevant information in the records maintained in compliance with §240.309 for Class I (including the National Railroad Passenger Corporation) and Class II railroads, and §240.15 for Class III railroads if sufficient evidence meeting the criteria provided in paragraph (i) of this section, becomes available either:

(1) Prior to a railroad's action to suspend the certificate as provided for in paragraph (b)(1) of this section; or

(2) Prior to the convening of the hearing provided for in this section;

(k) Provided that the railroad makes a good faith determination after a reasonable inquiry that the course of conduct provided for in paragraph (i) of this section is appropriate, the railroad which does not suspend a locomotive engineer's certification, as provided for in paragraph (a) of this section, is not in violation of paragraph (a) of this section.

[58 FR 19004, Apr. 9, 1993, as amended at 60 FR 53137, Oct. 12, 1995; 64 FR 60994, Nov. 8, 1999]

§ 240.309 Railroad oversight responsibilities.

(a) No later than March 31 of each year (beginning in calendar year 1993), each Class I railroad (including the National Railroad Passenger Corporation and a railroad providing commuter service) and Class II railroad shall conduct a formal annual review and analysis concerning the administration of its program for responding to detected instances of poor safety conduct by certified locomotive engineers during the prior calendar year.

(b) Each review and analysis shall involve:

(1) The number and nature of the instances of detected poor safety conduct including the nature of the remedial action taken in response thereto;

(2) The number and nature of FRA reported train accidents attributed to poor safety performance by locomotive engineers;

(3) The number and type of operational monitoring test failures and observations of inadequate skill performance recorded by supervisors of locomotive engineers; and

(4) If it conducts joint operations with another railroad, the number of

locomotive engineers employed by such other railroad(s) to which such events were ascribed which the controlling railroad certified for joint operations purposes.

(c) Based on that review and analysis each railroad shall determine what action(s) it will take to improve the safety of train operations to reduce or eliminate future incidents of that nature.

(d) If requested in writing by FRA, the railroad shall provide a report of the findings and conclusions reached during such annual review and analysis effort.

(e) For reporting purposes, information about the nature of detected poor safety conduct shall be capable of segregation for study and evaluation purposes into the following categories:

(1) Incidents involving noncompliance with part 218;

(2) Incidents involving noncompliance with part 219;

(3) Incidents involving noncompliance with the procedures for the safe use of train or engine brakes when the procedures are required for compliance with the initial terminal, intermediate terminal, or transfer train and yard test provisions of 49 CFR part 232 or when the procedures are required for compliance with the class 1, class 1A, class II, or running brake test provisions of 49 CFR part 238;

(4) Incidents involving noncompliance with the railroad's operating rules involving operation of a locomotive or train to operate at a speed that exceeds the maximum authorized limit;

(5) Incidents involving noncompliance with the railroad's operating rules resulting in operation of a locomotive or train past any signal, excluding a hand or a radio signal indication or a switch, that requires a complete stop before passing it;

(6) Incidents involving noncompliance with the provisions of restricted speed, and the operational equivalent thereof, that must be reported under the provisions of part 225 of this chapter;

(7) Incidents involving occupying main track or a segment of main track without proper authority or permission;

(8) Incidents involving the failure to comply with prohibitions against tampering with locomotive mounted safety devices, or knowingly operating or permitting to be operated a train with an unauthorized or disabled safety device in the controlling locomotive;

(9) Incidents involving noncompliance with the railroad's operating practices (including train handling procedures) resulting in excessive in-train force levels; and

(f) For reporting purposes each category of detected poor safety conduct identified in paragraph (d) of this section shall be capable of being annotated to reflect the following:

(1) The nature of the remedial action taken and the number of events subdivided so as to reflect which of the following actions was selected:

(i) Imposition of informal discipline;

(ii) Imposition of formal discipline;

(iii) Provision of informal training; or

(iv) Provision of formal training; and

(2) If the nature of the remedial action taken was formal discipline, the number of events further subdivided so as to reflect which of the following punishments was imposed by the hearing officer:

(i) The person was withheld from service;

(ii) The person was dismissed from employment or

(iii) The person was issued demerits. If more than one form of punishment was imposed only that punishment deemed the most severe shall be shown.

(g) For reporting purposes each category of detected poor safety conduct identified in paragraph (d) of this section which resulted in the imposition of formal or informal discipline shall be annotated to reflect the following:

(1) The number of instances in which the railroad's internal appeals process reduced the punishment initially imposed at the conclusion of its hearing; and

(2) The number of instances in which the punishment imposed by the railroad was reduced by any of the following entities: The National Railroad Adjustment Board, a Public Law Board, a Special Board of Adjustment

§ 240.401

49 CFR Ch. II (10–1–04 Edition)

or other body for the resolution of disputes duly constituted under the provisions of the Railway Labor Act.

(h) For reporting purposes each category of detected poor safety conduct identified in paragraph (d) of this section shall be capable of being annotated to reflect the following:

(1) The total number of incidents in that category;

(2) The number of incidents within that total which reflect incidents requiring an FRA accident/incident report; and

(3) The number of incidents within that total which were detected as a result of a scheduled operational monitoring effort.

[56 FR 28254, June 19, 1991, as amended at 64 FR 60994, Nov. 8, 1999]

Subpart E—Dispute Resolution Procedures

§ 240.401 Review board established.

(a) Any person who has been denied certification, denied recertification, or has had his or her certification revoked and believes that a railroad incorrectly determined that he or she failed to meet the qualification requirements of this regulation when making the decision to deny or revoke certification, may petition the Federal Railroad Administrator to review the railroad's decision.

(b) The Federal Railroad Administrator has delegated initial responsibility for adjudicating such disputes to the Locomotive Engineer Review Board.

(c) The Locomotive Engineer Review Board shall be composed of at least three employees of the Federal Railroad Administration selected by the Administrator.

[56 FR 28254, June 19, 1991, as amended at 58 FR 19005, Apr. 9, 1993]

§ 240.403 Petition requirements.

(a) To obtain review of a railroad's decision to deny certification, deny recertification, or revoke certification, a person shall file a petition for review that complies with this section.

(b) Each petition shall:

(1) Be in writing;

(2) Be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, 1120 Vermont Avenue, NW, Washington, DC 20590;

(3) Contain all available information that the person thinks supports the person's belief that the railroad acted improperly, including:

(i) The petitioner's full name;

(ii) The petitioner's current mailing address;

(iii) The petitioner's daytime telephone number;

(iv) The name and address of the railroad; and

(v) The facts that the petitioner believes constitute the improper action by the railroad, specifying the locations, dates, and identities of all persons who were present or involved in the railroad's actions (to the degree known by the petitioner);

(4) Explain the nature of the remedial action sought;

(5) Be supplemented by a copy of all written documents in the petitioner's possession that document that railroad's decision; and

(6) Be filed in a timely manner.

(c) A petition seeking review of a railroad's decision to deny certification or recertification filed with FRA more than 180 days after the date of the railroad's denial decision will be denied as untimely.

(d) A petition seeking review of a railroad's decision to revoke certification in accordance with the procedures required by § 240.307 filed with FRA more than 120 days after the date of the railroad's revocation decision will be denied as untimely except that the Locomotive Engineer Review Board for cause shown may extend the petition filing period at any time in its discretion:

(1) Provided the request for extension is filed before the expiration of the period provided in this paragraph (d); or

(2) Provided that the failure to timely file was the result of excusable neglect.

(e) A party aggrieved by a Board decision to deny a petition as untimely

Federal Railroad Administration, DOT

§ 240.407

may file an appeal with the Administrator in accordance with § 240.411.

[56 FR 28254, June 19, 1991, as amended at 64 FR 60995, Nov. 8, 1999; 64 FR 70196, Dec. 16, 1999]

§ 240.405 Processing qualification review petitions.

(a) Each petition shall be acknowledged in writing by FRA. The acknowledgment shall contain the docket number assigned to the petition and a statement of FRA's intention that the Board will render a decision on this petition within 180 days from the date that the railroad's response is received or from the date upon which the railroad's response period has lapsed pursuant to paragraph (c) of this section.

(b) Upon receipt of the petition, FRA will notify the railroad that it has received the petition and provide the railroad with a copy of the petition.

(c) The railroad will be given a period of not to exceed 60 days to submit to FRA any information that the railroad considers pertinent to the petition. Late filings will only be considered to the extent practicable.

(d) A railroad that submits such information shall:

(1) Identify the petitioner by name and the docket number of the review proceeding;

(2) Provide a copy of the information being submitted to FRA to the petitioner.

(3) Submit the information in triplicate to the Docket Clerk, Federal Railroad Administration, 400 Seventh Street SW., Washington, DC 20590;

(e) Each petition will then be referred to the Locomotive Engineer Review Board for a decision.

(f) The Board will determine whether the denial or revocation of certification or recertification was improper under this regulation (*i.e.*, based on an incorrect determination that the person failed to meet the qualification requirements of this regulation) and grant or deny the petition accordingly. The Board will not otherwise consider the propriety of a railroad's decision, *i.e.*, it will not consider whether the railroad properly applied its own more stringent requirements.

(g) Notice of that decision will be provided in writing to both the peti-

tioner and the railroad. The decision will include findings of fact on which it is based.

[56 FR 28254, June 19, 1991, as amended at 64 FR 60995, Nov. 8, 1999]

§ 240.407 Request for a hearing.

(a) If adversely affected by the Locomotive Engineer Review Board decision, either the petitioner before the Board or the railroad involved shall have a right to an administrative proceeding as prescribed by § 240.409.

(b) To exercise that right, the adversely affected party shall, within 20 days of service of the Board's decision on that party, file a written request with the Docket Clerk, Department of Transportation Central Docket Management System, Nassif Building, Room PL-401, 400 Seventh Street, S.W., Washington, D.C. 20590. The form of such request may be in written or electronic form consistent with the standards and requirements established by the Central Docket Management System and posted on its web site at <http://dms.dot.gov>.

(c) The result of a failure to request a hearing within the period provided in paragraph (b) of this section is that the Locomotive Engineer Review Board's decision will constitute final agency action.

(d) If a party elects to request a hearing, that person shall submit a written request to the Docket Clerk containing the following:

(1) The name, address, and telephone number of the respondent and the requesting party's designated representative, if any;

(2) The specific factual issues, industry rules, regulations, or laws that the requesting party alleges need to be examined in connection with the certification decision in question; and

(3) The signature of the requesting party or the requesting party's representative, if any.

(e) Upon receipt of a hearing request complying with paragraph (d) of this section, FRA shall arrange for the appointment of a presiding officer who shall schedule the hearing for the earliest practicable date.

[60 FR 53137, Oct. 12, 1995, as amended at 64 FR 70196, Dec. 16, 1999]

§ 240.409 Hearings.

(a) An administrative hearing for a locomotive engineer qualification petition shall be conducted by a presiding officer, who can be any person authorized by the Administrator, including an administrative law judge.

(b) The presiding officer may exercise the powers of the Administrator to regulate the conduct of the hearing for the purpose of achieving a prompt and fair determination of all material issues in controversy.

(c) The presiding officer shall convene and preside over the hearing. The hearing shall be a *de novo* hearing to find the relevant facts and determine the correct application of this part to those facts. The presiding officer may determine that there is no genuine issue covering some or all material facts and limit evidentiary proceedings to any issues of material fact as to which there is a genuine dispute.

(d) The presiding officer may authorize discovery of the types and quantities which in the presiding officer's discretion will contribute to a fair hearing without unduly burdening the parties. The presiding officer may impose appropriate non-monetary sanctions, including limitations as to the presentation of evidence and issues, for any party's willful failure or refusal to comply with approved discovery requests.

(e) Every petition, motion, response, or other authorized or required document shall be signed by the party filing the same, or by a duly authorized officer or representative of record, or by any other person. If signed by such other person, the reason therefor must be stated and the power of attorney or other authority authorizing such other person to subscribe the document must be filed with the document. The signature of the person subscribing any document constitutes a certification that he or she has read the document; that to the best of his or her knowledge, information and belief every statement contained in the document is true and no such statements are misleading; and that it is not interposed for delay or to be vexatious.

(f) After the request for a hearing is filed, all documents filed or served upon one party must be served upon all

parties. Each party may designate a person upon whom service is to be made when not specified by law, regulation, or directive of the presiding officer. If a party does not designate a person upon whom service is to be made, then service may be made upon any person having subscribed to a submission of the party being served, unless otherwise specified by law, regulation, or directive of the presiding officer. Proof of service shall accompany all documents when they are tendered for filing.

(g) If any document initiating, filed, or served in, a proceeding is not in substantial compliance with the applicable law, regulation, or directive of the presiding officer, the presiding officer may strike or dismiss all or part of such document, or require its amendment.

(h) Any party to a proceeding may appear and be heard in person or by an authorized representative.

(i) Any person testifying at a hearing or deposition may be accompanied, represented, and advised by an attorney or other representative, and may be examined by that person.

(j) Any party may request to consolidate or separate the hearing of two or more petitions by motion to the presiding officer, when they arise from the same or similar facts or when the matters are for any reason deemed more efficiently heard together.

(k) Except as provided in § 240.407(c) of this part and paragraph (u)(4) of this section, whenever a party has the right or is required to take action within a period prescribed by this part, or by law, regulation, or directive of the presiding officer, the presiding officer may extend such period, with or without notice, for good cause, provided another party is not substantially prejudiced by such extension. A request to extend a period which has already expired may be denied as untimely.

(l) An application to the presiding officer for an order or ruling not otherwise specifically provided for in this part shall be by motion. The motion shall be filed with the presiding officer and, if written, served upon all parties. All motions, unless made during the hearing, shall be written. Motions made during hearings may be made

orally on the record, except that the presiding officer may direct that any oral motion be reduced to writing. Any motion shall state with particularity the grounds therefor and the relief or order sought, and shall be accompanied by any affidavits or other evidence desired to be relied upon which is not already part of the record. Any matter submitted in response to a written motion must be filed and served within fourteen (14) days of the motion, or within such other period as directed by the presiding officer.

(m) Testimony by witnesses at the hearing shall be given under oath and the hearing shall be recorded verbatim. The presiding officer shall give the parties to the proceeding adequate opportunity during the course of the hearing for the presentation of arguments in support of or in opposition to motions, and objections and exceptions to rulings of the presiding officer. The presiding officer may permit oral argument on any issues for which the presiding officer deems it appropriate and beneficial. Any evidence or argument received or proffered orally shall be transcribed and made a part of the record. Any physical evidence or written argument received or proffered shall be made a part of the record, except that the presiding officer may authorize the substitution of copies, photographs, or descriptions, when deemed to be appropriate.

(n) The presiding officer shall employ the Federal Rules of Evidence for United States Courts and Magistrates as general guidelines for the introduction of evidence. Notwithstanding paragraph (m) of this section, all relevant and probative evidence shall be received unless the presiding officer determines the evidence to be unduly repetitive or so extensive and lacking in relevancy that its admission would impair the prompt, orderly, and fair resolution of the proceeding.

(o) The presiding officer may:

- (1) Administer oaths and affirmations;
- (2) Issue subpoenas as provided for in § 209.7 of part 209 in this chapter;
- (3) Adopt any needed procedures for the submission of evidence in written form;
- (4) Examine witnesses at the hearing;

(5) Convene, recess, adjourn or otherwise regulate the course of the hearing; and

(6) Take any other action authorized by or consistent with the provisions of this part and permitted by law that may expedite the hearing or aid in the disposition of the proceeding.

(p) The petitioner before the Locomotive Engineer Review Board, the railroad involved in taking the certification action, and FRA shall be parties at the hearing. All parties may participate in the hearing and may appear and be heard on their own behalf or through designated representatives. All parties may offer relevant evidence, including testimony, and may conduct such cross-examination of witnesses as may be required to make a record of the relevant facts.

(q) The party requesting the administrative hearing shall be the "hearing petitioner." The hearing petitioner shall have the burden of proving its case by a preponderance of the evidence. Hence, if the hearing petitioner is the railroad involved in taking the certification action, that railroad will have the burden of proving that its decision to deny certification, deny recertification, or revoke certification was correct. Conversely, if the petitioner before the Locomotive Engineer Review Board is the hearing petitioner, that person will have the burden of proving that the railroad's decision to deny certification, deny recertification, or revoke certification was incorrect. Between the petitioner before the Locomotive Engineer Review Board and the railroad involved in taking the certification action, the party who is not the hearing petitioner will be a respondent.

(r) FRA will be a mandatory party to the administrative hearing. At the start of each proceeding, FRA will be a respondent.

(s) The record in the proceeding shall be closed at the conclusion of the evidentiary hearing unless the presiding officer allows additional time for the submission of additional evidence. In such instances the record shall be left open for such time as the presiding officer grants for that purpose.

§ 240.411

49 CFR Ch. II (10–1–04 Edition)

(t) At the close of the record, the presiding officer shall prepare a written decision in the proceeding.

(u) The decision:

(1) Shall contain the findings of fact and conclusions of law, as well as the basis for each concerning all material issues of fact or law presented on the record;

(2) Shall be served on the hearing petitioner and all other parties to the proceeding;

(3) Shall not become final for 35 days after issuance;

(4) Constitutes final agency action unless an aggrieved party files an appeal within 35 days after issuance; and

(5) Is not precedential.

[60 FR 53137, Oct. 12, 1995]

§ 240.411 Appeals.

(a) Any party aggrieved by the presiding officer's decision may file an appeal. The appeal must be filed within 35 days of issuance of the decision with the Federal Railroad Administrator, 400 Seventh Street SW., Washington, DC 20590. A copy of the appeal shall be served on each party. The appeal shall set forth objections to the presiding officer's decision, supported by reference to applicable laws and regulations and with specific reference to the record. If no appeal is timely filed, the presiding officer's decision constitutes final agency action.

(b) A party may file a reply to the appeal within 25 days of service of the appeal. The reply shall be supported by

reference to applicable laws and regulations and with specific reference to the record, if the party relies on evidence contained in the record.

(c) The Administrator may extend the period for filing an appeal or a response for good cause shown, provided that the written request for extension is served before expiration of the applicable period provided in this section.

(d) The Administrator has sole discretion to permit oral argument on the appeal. On the Administrator's own initiative or written motion by any party, the Administrator may grant the parties an opportunity for oral argument.

(e) The Administrator may remand, vacate, affirm, reverse, alter or modify the decision of the presiding officer and the Administrator's decision constitutes final agency action except where the terms of the Administrator's decision (for example, remanding a case to the presiding officer) show that the parties' administrative remedies have not been exhausted.

(f) Where a party files an appeal from a Locomotive Engineer Review Board decision pursuant to § 240.403(e), the Administrator may affirm or vacate the Board's decision, and may remand the petition to the Board for further proceedings. An Administrator's decision to affirm the Board's decision constitutes final agency action.

[56 FR 28254, June 19, 1991, as amended at 60 FR 53138, Oct. 12, 1995; 64 FR 60995, Nov. 8, 1999]

APPENDIX A TO PART 240—SCHEDULE OF CIVIL PENALTIES ¹

Section	Violation	Willful violation
Subpart B—Component Elements		
240.101—Program Failures		
(a) Failure to have program	\$5,000	\$10,000
(b) Program that fails to address a subject	2,500	5,000
240.103—Failure to:		
(a) follow Appendix B	1,000	2,000
(d) to resubmit, when directed by FRA	1,000	2,000
240.104—Allowing uncertified person to operate non-traditional locomotives	5,000	10,000
240.105—Failure to have or execute adequate procedure for selection of supervisors	2,500	5,000
240.107—Classes of Service		
(a) Failure to designate classes of service	2,000	4,000
240.109—Limitations on considering prior conduct records		
(a) Failure to have procedure for determining eligibility	2,500	5,000
(e) Considering excluded data	2,000	4,000
(f,g) Failure to provide timely review opportunity	2,000	4,000
240.111—Furnishing Motor Vehicle Records:		
(a) Failure to action required to make information available	1,000	2,000
(b) Failure to request:		

Federal Railroad Administration, DOT

Pt. 240, App. A

Section	Violation	Willful violation
(1) local record	1,000	2,000
(2) NDR record	1,000	2,000
(f) Failure to request additional record	1,000	2,000
(g) Failure to notify of absence of license	750	1,500
(h) Failure to submit request in timely manner	750	1,500
(i) Failure to report within 48 hours or railroad taking certification action for not reporting earlier than 48 hours	1,000	2,000
240.113—Furnishing prior employment information		
(a) Failure to take action required to make information available	1,000	2,000
(b) Failure to request record	1,000	2,000
240.115—Criteria for considering prior motor vehicle conduct		
(b) Considering excluded data	2,000	4,000
(c) Failure to		
(1) consider data	5,000	7,500
(3,4) properly act in response to data	2,500	5,000
240.117—Consideration of Operational Rules Compliance Records:		
(a) Failure to have program and procedures	5,000	10,000
(b–j) Failure to have adequate program or procedure	2,500	5,000
240.119—Consideration of substance abuse /rules compliance records		
(a) Failure to have program and procedures	5,000	10,000
(b–e) Failure to have adequate program or procedure	2,500	5,000
240.121—Failure to have adequate procedure for determining acuity	2,500	5,000
(f) Failure of engineer to notify	2,500	5,000
240.123—Failure to have:		
(b) Adequate procedures for continuing education	2,500	5,000
(c) adequate procedures for training new engineers	2,500	5,000
240.125—Failure to have		
(a) adequate procedures for testing knowledge	2,500	5,000
(d) adequate procedures for documenting testing	2,500	5,000
240.127—Failure to have		
(a) adequate procedures for evaluating skill performance	2,500	5,000
(c) adequate procedures for documenting skills testing	2,500	5,000
240.129—Failure to have		
(a–b) adequate procedures for monitoring performance	2,500	5,000
Subpart C—Implementation of the Process		
240.201—Schedule for implementation		
(a) Failure to select supervisors by specified date	1,000	2,000
(b) Failure to identify grandfathered engineers	2,000	4,000
(c) Failure to issue certificate to engineer	1,000	2,000
(d) Allowing uncertified person to operate	5,000	10,000
(e–g) Certifying without complying with subpart C	2,500	5,000
(h–i) Failure to issue certificate to engineer	1,000	2,000
240.203 (a) Designating a person as a supervisor without determining that		
(1) person knows and understands this part	2,500	5,000
(2) person can test and evaluate engineers	5,000	7,500
(3) person has experience to prescribe remedies	2,500	5,000
(b) Certifying a person without determining that		
(1) person meets the eligibility criteria	5,000	7,500
(2) person meets the medical criteria	2,500	5,000
(3) person has demonstrated knowledge	2,500	5,000
(4) person has demonstrated skills	2,500	5,000
(c) Certifying a person without determining that		
(1) person has completed training program	2,500	5,000
(2) person meets the eligibility criteria	2,500	5,000
(3) time has elapsed	2,500	5,000
240.205—Procedures for determining eligibility based on prior safety conduct		
(a) Selecting person lacking eligibility	5,000	7,500
(d) Failure to have basis for taking action	2,500	5,000
240.207—Ineligibility based on medical condition		
(a) Selecting person lacking proper acuity	2,000	4,000
(b) Failure to have basis for finding of proper acuity	1,000	2,000
(c) Acuity examinations performed by unauthorized person	1,000	2,000
(d) Failure to note need for device to achieve acuity	1,000	2,000
(e) Failure to use device needed for proper acuity	1,000	2,000
240.209—Demonstrating knowledge		
(b) Failure to properly determine knowledge	2,500	5,000
(c) Improper test procedure	2,000	4,000
(d) Failure to document test results	1,000	2,000
(e) Allowing person to operate despite test failure	2,500	5,000
240.211—Demonstrating skills		
(b) Failure to properly determine knowledge	2,500	5,000
(c) Improper test procedure	2,000	4,000
(d) Failure to document test results	1,000	2,000

Section	Violation	Willful violation
(e) Allowing person to operate despite test failure	2,500	5,000
240.213—Completion of approved training program		
(a) Failure to properly determine	2,500	5,000
(b) Failure to document successful program completion	2,000	4,000
240.215—Supporting information		
(a, f–h) Failure to have a record	1,000	2,000
(b) Failure to have complete record	500	1,000
(i) Falsification of record	(–)	10,000
240.217—Time limits for making determinations		
(a, c) Exceeding time limit	2,000	4,000
240.219—Denial of certification		
(a) Failure to notify or provide opportunity for comment	2,000	4,000
(c) Failure to notify, provide data, or untimely notification	2,000	4,000
240.221—Identification of persons		
(a–c) Failure to have a record	2,000	4,000
(d) Failure to update a record	2,000	4,000
(e–f) Failure to make a record available	1,000	2,000
240.223—Certificate criteria		
(a) Improper certificate	500	1,000
(b) Failure to designate those with signatory authority	500	1,000
(d) Falsification of certificate	(–)	10,000
240.225—Railroad Relying on Determination of Another:		
(a) Failure to address in program or failure to require newly hired engineer to take entire training program	5,000	7,500
(1) Reliance on expired certification	2,500	5,000
(2) Reliance on wrong class of service	2,500	5,000
(3) Failure to familiarize person with new operational territory	2,000	4,000
(4) Failure to determine knowledge	2,000	4,000
(5) Failure to determine performance skills	2,000	4,000
240.227—Railroad Relying on Requirements of a Different Country		
(a) Joint operator reliance		
(1) on person not employed	1,000	2,000
(2) on person who fails to meet Canadian requirements	1,000	2,000
(b) Canadian railroad reliance		
(1) on person not employed	1,000	2,000
(2) on person who fails to meet Canadian requirements	1,000	2,000
240.229—Requirements for Joint Operations Territory:		
(a) Allowing uncertified person to operate	2,000	4,000
(b) Certifying without making determinations or relying on another railroad	2,500	5,000
(c) Failure of:		
(1) controlling railroad certifying without determining certification status, knowledge, skills, or familiarity with physical characteristics	4,000	8,000
(2) employing railroad to determine person's certified and qualified status for controlling railroad	4,000	8,000
(3) person to notify employing railroad of lack of qualifications	4,000	8,000
(d) Failure to provide qualified person	2,000	4,000
240.231—Persons Qualified on Physical Characteristics in Other Than Joint Operations:		
(a) Person unqualified, no exception applies or railroad does not adequately address in program	5,000	10,000
(b) Failure to have a pilot:		
(1) for engineer who has never been qualified	4,000	8,000
(2) for engineer previously qualified	2,500	5,000
Subpart D—Program Administration		
240.301—Failure to have system for certificate replacement	2,000	4,000
240.303—Monitoring operations		
(a) Failure to have program	5,000	10,000
(b) Failure to observe each person annually	1,000	2,000
(c) Failure to test each person annually	1,000	2,000
(d) Failure to test properly	1,000	2,000
240.305—Prohibited Conduct:		
(a) Unlawful:		
(1) passing of stop signal	2,500	5,000
(2) control of speed	2,500	5,000
(3) brake tests	2,500	5,000
(4) occupancy of main track	2,500	5,000
(5) tampering on operation with disabled safety device	2,500	5,000
(6) supervisor, pilot, or instructor fails to take appropriate action	2,500	5,000
(b) Failure of engineer to:		
(1) carry certificate	1,000	2,000
(2) display certificate when requested	1,000	2,000
(c) Failure of engineer to notify railroad of limitations or railroad requiring engineer to exceed limitations	4,000	8,000
(d) Failure of engineer to notify railroad of denial or revocation	4,000	8,000

Section	Violation	Willful violation
240.307—Revocation of Certification:		
(a) Failure to withdraw person from service	2,500	5,000
(b) Failure to notify, provide hearing opportunity, or untimely procedures	2,500	5,000
(c-h) Failure of railroad to comply with hearing or waiver procedures	1,000	2,000
(j) Failure of railroad to make record	2,500	5,000
(k) Failure of railroad to conduct reasonable inquiry or make good faith determination	5,000	10,000
240.309—Oversight Responsibility Report:		
(a) Failure to report or to report on time	1,000	2,000
(b-h) Incomplete or inaccurate report	2,000	4,000

¹A penalty may be assessed against an individual only for a willful violation. The Administrator reserves the right to assess a penalty of up to \$27,000 for any violation where circumstances warrant. See 49 CFR part 209, appendix A.

[56 FR 28254, June 19, 1991, as amended at 60 FR 53138, Oct. 12, 1995; 63 FR 11624, Mar. 10, 1998; 64 FR 60995, Nov. 8, 1999; 69 FR 30595, May 28, 2004]

APPENDIX B TO PART 240—PROCEDURES FOR SUBMISSION AND APPROVAL OF LOCOMOTIVE ENGINEER QUALIFICATION PROGRAMS

This appendix establishes procedures for the submission and approval of a railroad's program concerning the training, testing, and evaluating of persons seeking certification or recertification as a locomotive engineer in accordance with the requirements of this part (see §§240.101, 240.103, 240.105, 240.107, 240.123, 240.125, 240.127 and 240.129). It also contains guidance on how FRA will exercise its review and approval responsibilities.

Submission by a Railroad

As provided for in §240.101, each railroad must have a program for determining the qualifications of each person it permits or requires to operate a locomotive. In designing its program a railroad must take into account the trackage and terrain over which it operates, the system(s) for train control that are employed, the operational design characteristics of the track and equipment being operated including train length, train make-up, and train speeds. Each railroad must submit its individual program to FRA for approval as provided for in §240.103. Each program must be accompanied by a request for approval organized in accordance with this appendix. Requests for approval must contain appropriate references to the relevant portion of the program being discussed. Requests should be submitted in writing on standard sized paper (8-1/2x11) and can be in letter or narrative format. The railroad's submission shall be sent to the Associate Administrator for Safety, FRA. The mailing address for FRA is 400 Seventh Street, SW., Washington, DC 20590.

Organization of the Submission

Each request should be organized to present the required information in the following standardized manner. Each section

must begin by giving the name, title, telephone number, and mailing address of the person to be contacted concerning the matters addressed by that section. If a person is identified in a prior section, it is sufficient to merely repeat the person's name in a subsequent section.

Section 1 of the Submission: General Information and Elections

The first section of the request must contain the name of the railroad, the person to be contacted concerning the request (including the person's name, title, telephone number, and mailing address) and a statement electing either to accept responsibility for educating previously untrained persons to be qualified locomotive engineers or recertify only engineers previously certified by other railroads (see §240.103(b)).

If a railroad elects not to conduct the training of persons not previously trained to be a locomotive engineer, the railroad is not obligated to submit information on how the previously untrained will be trained. A railroad that makes this election will be limited to recertifying persons initially certified by another railroad. A railroad that initially elects not to accept responsibility for training its own locomotive engineers can rescind its initial election by obtaining FRA approval of a modification of its program (see §240.103(e)).

If a railroad elects to accept responsibility for conducting the education of persons not previously trained to be locomotive engineers, the railroad is obligated to submit information on how such persons will be trained but has no duty to actually conduct such training. A railroad that elects to accept the responsibility for the training of such persons may authorize another railroad or a non-railroad entity to perform the actual training effort. The electing railroad remains responsible for assuring that such other training providers adhere to the training program the railroad submits.

This section must also state which class or classes of service the railroad will employ. (See § 240.107).

Section 2 of the Submission: Selection of Supervisors of Locomotive Engineers

The second section of the request must contain information concerning the railroad's procedure for selecting the person or persons it will rely on to evaluate the knowledge, skill, and ability of persons seeking certification or recertification. As provided for in § 240.105 each railroad must have a procedure for selecting supervisors of locomotive engineers which assures that persons so designated can appropriately test and evaluate the knowledge, skill, and ability of individuals seeking certification or recertification.

Section 240.105 provides a railroad latitude to select the criteria and evaluation methodology it will rely on to determine which person or persons have the required capacity to perform as a supervisor of locomotive engineers. The railroad must describe in this section how it will use that latitude and evaluate those it designates as supervisors of locomotive engineers so as to comply with the performance standard set forth in § 240.105(b). The railroad must identify, in sufficient detail to permit effective review by FRA, the criteria for evaluation it has selected. For example, if a railroad intends to rely on one or more of the following, a minimum level of prior experience as an engineer, successful completion of a course of study, or successful passage of a standardized testing program, the submission must state which criteria it will employ.

Section 3 of the Submission: Training Persons Previously Certified

The third section of the request must contain information concerning the railroad's program for training previously certified locomotive engineers. As provided for in § 240.123(b) each railroad must have a program for the ongoing education of its locomotive engineers to assure that they maintain the necessary knowledge concerning personal safety, operating rules and practices, mechanical condition of equipment, methods of safe train handling (including familiarity with physical characteristics), and relevant Federal safety rules.

Section 240.123(b) provides a railroad latitude to select the specific subject matter to be covered, duration of the training, method of presenting the information, and the frequency with which the training will be provided. The railroad must describe in this section how it will use that latitude to assure that its engineers remain knowledgeable concerning the safe discharge of their train operation responsibilities so as to comply with the performance standard set forth in

§ 240.123(b). This section must contain sufficient detail to permit effective evaluation of the railroad's training program in terms of the subject matter covered, the frequency and duration of the training sessions, the training environment employed (for example, and use of classroom, use of computer based training, use of simulators, use of film or slide presentations, use of on-job-training) and which aspects of the program are voluntary or mandatory.

Safe train handling involves both abstract knowledge about the appropriate use of engine controls and the application of that knowledge to trains of differing composition traversing varying terrain. Time and circumstances have the capacity to diminish both abstract knowledge and the proper application of that knowledge to discrete events. Time and circumstances also have the capacity to alter the value of previously obtained knowledge and the application of that knowledge. In formulating how it will use the discretion being afforded, each railroad must design its program to address both loss of retention of knowledge and changed circumstances, and this section of the submission to FRA must address these matters.

For example, locomotive engineers need to have their fundamental knowledge of train operations refreshed periodically. Each railroad needs to advise FRA how that need is satisfied in terms of the interval between attendance at such training, the nature of the training being provided, and methods for conducting the training. A matter of particular concern to FRA is how each railroad acts to assure that engineers remain knowledgeable about safe train handling procedures if the territory over which a locomotive engineer is authorized to operate is territory from which the engineer has been absent. The railroad must have a plan for the familiarization training that addresses the question of how long a person can be absent before needing more education and, once that threshold is reached, how the person will acquire the needed education. Similarly, the program must address how the railroad responds to changes such as the introduction of new technology, new operating rule books, or significant changes in operations including alteration in the territory engineers are authorized to operate over.

Section 4 of the Submission: Testing and Evaluating Persons Previously Certified

The fourth section of the request must contain information concerning the railroad's program for testing and evaluating previously certified locomotive engineers. As provided for in § 240.125 and § 240.127, each railroad must have a program for the ongoing testing and evaluating of its locomotive

engineers to assure that they have the necessary knowledge and skills concerning personal safety, operating rules and practices, mechanical condition of equipment, methods of safe train handling (including familiarity with physical characteristics), and relevant Federal safety rules. Similarly, each railroad must have a program for ongoing testing and evaluating to assure that its locomotive engineers have the necessary vision and hearing acuity as provided for in §240.121.

Sections 240.125 and 240.127 require that a railroad rely on written procedures for determining that each person can demonstrate his or her knowledge of the railroad's rules and practices and skill at applying those rules and practices for the safe operation of a locomotive or train. Section 240.125 directs that, when seeking a demonstration of the person's knowledge, a railroad must employ a written test that contains objective questions and answers and covers the following subject matters: (i) Personal safety practices; (ii) operating practices; (iii) equipment inspection practices; (iv) train handling practices (including familiarity with the physical characteristics of the territory); and (v) compliance with relevant Federal safety rules. The test must accurately measure the person's knowledge of all of these areas.

Section 240.125 provides a railroad latitude in selecting the design of its own testing policies (including the number of questions each test will contain, how each required subject matter will be covered, weighting (if any) to be given to particular subject matter responses, selection of passing scores, and the manner of presenting the test information). The railroad must describe in this section how it will use that latitude to assure that its engineers will demonstrate their knowledge concerning the safe discharge of their train operation responsibilities so as to comply with the performance standard set forth in §240.125.

Section 240.127 directs that, when seeking a demonstration of the person's skill, a railroad must employ a test and evaluation procedure conducted by a designated supervisor of locomotive engineers that contains an objective evaluation of the person's skills at applying the railroad's rules and practices for the safe operation of trains. The test and evaluation procedure must examine the person's skills in terms of all of the following subject matters: (i) Operating practices; (ii) equipment inspection practices; (iii) train handling practices (including familiarity with the physical characteristics of the territory); and (iv) compliance with relevant Federal safety rules. The test must be sufficient to effectively examine the person's skills while operating a train in the most demanding type of service which the person is likely to encounter in the normal course of events once he or she is deemed qualified.

Section 240.127 provides a railroad latitude in selecting the design of its own testing and evaluation procedures (including the duration of the evaluation process, how each required subject matter will be covered, weighting (if any) to be given to particular subject matter response, selection of passing scores, and the manner of presenting the test information). The section should provide information concerning the procedures which the railroad will follow that achieve the objectives described in FRA's recommended practices (see appendix E) for conducting skill performance testing. The section also gives a railroad the latitude to employ either a Type 1 or a Type 2 simulator (properly programmed) to conduct the test and evaluation procedure. A railroad must describe in this section how it will use that latitude to assure that its engineers will demonstrate their skills concerning the safe discharge of their train operation responsibilities so as to comply with the performance standard set forth in §240.127.

Section 240.121 provides a railroad latitude to rely on the professional medical opinion of the railroad's medical examiner concerning the ability of a person with substandard acuity to safely operate a locomotive. The railroad must describe in this section how it will assure that its medical examiner has sufficient information concerning the railroad's operations to effectively form appropriate conclusions about the ability of a particular individual to safely operate a train.

Section 5 of the Submission: Training, Testing, and Evaluating Persons Not Previously Certified

Unless a railroad has made an election not to accept responsibility for conducting the initial training of persons to be locomotive engineers, the fifth section of the request must contain information concerning the railroad's program for educating, testing, and evaluating persons not previously trained as locomotive engineers. As provided for in §240.123(c), a railroad that is issuing an initial certification to a person to be a locomotive engineer must have a program for the training, testing, and evaluating of its locomotive engineers to assure that they acquire the necessary knowledge and skills concerning personal safety, operating rules and practices, mechanical condition of equipment, methods of safe train handling (including familiarity with physical characteristics), and relevant Federal safety rules.

Section 240.123 establishes a performance standard and gives a railroad latitude in selecting how it will meet that standard. A railroad must describe in this section how it will use that latitude to assure that its engineers will acquire sufficient knowledge and skill and demonstrate their knowledge and

skills concerning the safe discharge of their train operation responsibilities. This section must contain the same level of detail concerning initial training programs as that described for each of the components of the overall program contained in sections 2 through 4 of this appendix. A railroad that plans to accept responsibility for the initial training of locomotive engineers may authorize another railroad or a non-railroad entity to perform the actual training effort. The authorizing railroad may submit a training program developed by that authorized trainer but the authorizing railroad remains responsible for assuring that such other training providers adhere to the training program submitted. Railroads that elect to rely on other entities, to conduct training away from the railroad's own trackage, must indicate how the student will be provided with the required familiarization with the physical characteristics for its trackage.

Section 6 of the Submission: Monitoring Operational Performance by Certified Engineers

The final section of the request must contain information concerning the railroad's program for monitoring the operation of its certified locomotive engineers. As provided for in §240.129, each railroad must have a program for the ongoing monitoring of its locomotive engineers to assure that they operate their locomotives in conformity with the railroad's operating rules and practices including methods of safe train handling and relevant Federal safety rules.

Section 240.129 requires that a railroad annually observe each locomotive engineer demonstrating his or her knowledge of the railroad's rules and practices and skill at applying those rules and practices for the safe operation of a locomotive or train. Section 240.129 directs that the observation be conducted by a designated supervisor of locomotive engineers but provides a railroad latitude in selecting the design of its own observation procedures (including the duration of the observation process, reliance on tapes that record the specifics of train operation, and the specific aspects of the engineer's performance to be covered). The section also gives a railroad the latitude to employ either a Type 1 or a Type 2 simulator (properly programmed) to conduct monitoring observations. A railroad must describe in this section how it will use that latitude to assure that the railroad is monitoring that its engineers demonstrate their skills concerning the safe discharge of their train operation responsibilities. A railroad that intends to employ train operation event recorder tapes to comply with this monitoring requirement shall indicate in this section how it anticipates determining what person was at the controls and what signal indications or other

operational constraints, if any, were applicable to the train's movement.

Section 7 of the Submission: Procedures for Routine Administration of the Engineer Certification Program

The final section of the request must contain a summary of how the railroad's program and procedures will implement the various specific aspects of the regulatory provisions that relate to routine administration of its certification program for locomotive engineers. At a minimum this section needs to address the procedural aspects of the rule's provisions identified in the following paragraph.

Section 240.109 provides that each railroad must have procedures for review and comment on adverse prior safety conduct, but allows the railroad to devise its own system within generalized parameters. Sections 240.115, 240.117 and 240.119 require a railroad to have procedures for evaluating data concerning prior safety conduct as a motor vehicle operator and as railroad workers, yet leave selection of many details to the railroad. Sections 240.203, 240.217, and 240.219 place a duty on the railroad to make a series of determinations but allow the railroad to select what procedures it will employ to assure that all of the necessary determinations have been made in a timely fashion; who will be authorized to conclude that person is or is not qualified; and how it will communicate adverse decisions. Documentation of the factual basis the railroad relied on in making determinations under §§240.205, 240.207, 240.209, 240.211, and 240.213 is required, but these sections permit the railroad to select the procedures it will employ to accomplish compliance with these provisions. Sections 240.225 and 240.227 permit reliance on qualification determinations made by other entities and permit a railroad latitude in selecting the procedures it will employ to assure compliance with these provisions. Similarly, §240.229 permits use of railroad selected procedures to meet the requirements for certification of engineers performing service in joint operations territory. Sections 240.301 and 240.307 allow a railroad a certain degree of discretion in complying with the requirements for replacing lost certificates or the conduct of certification revocation proceedings.

This section of the request should outline in summary fashion the manner in which the railroad will implement its program so as to comply with the specific aspects of each of the rule's provisions described in preceding paragraph.

FRA Review

The submissions made in conformity with this appendix will be deemed approved within 30 days after the required filing date or

the actual filing date whichever is later. No formal approval document will be issued by FRA. The brief interval for review reflects FRA's judgment that railroads generally already have existing programs that will meet the requirements of this part. FRA has taken the responsibility for notifying a railroad when it detects problems with the railroad's program. FRA retains the right to disapprove a program that has obtained approval due to the passage of time as provided for in section §240.103.

FRA initially proposed specifying the details for most aspects of the programs being submitted under this appendix. The proposed rule contained a distillation of the essential elements of pre-existing training, testing, evaluating, and monitoring programs that appear to result in railroads having locomotive engineers who operate locomotives and trains safely. The proposal contained very specific details for each aspect of the program that appeared to contribute to that result. Those details included such things as the duration of classes intended to teach operating rules as well as the interval and methodology for acquiring familiarization with physical characteristics of an engineer's operational territory. Railroads commenting on the proposed rule did not question the validity of the FRA's views concerning the essential elements of an effective program but did convince FRA that they should be given more discretion to formulate the design of their individual programs.

Rather than establish rigid requirements for each element of the program as initially proposed, FRA has given railroads discretion to select the design of their individual programs within a specified context for each element. The proposed rule, however, provides a good guide to the considerations that should be addressed in designing a program that will meet the performance standards of this final rule. In reviewing program submissions, FRA will focus on the degree to which a particular program deviates from the norms identified in its proposed rule. To the degree that a particular program submission materially deviates from the norms set out in its proposed rule which was published in the FEDERAL REGISTER on December 11, 1989 (54 FR 50890), FRA's review and approval process will be focused on determining the validity of the reasoning relied on by a railroad for selecting its alternative approach and the degree to which the alternative approach is likely to be effective in producing locomotive engineers who have the knowledge, skill, and ability to safely operate trains.

APPENDIX C TO PART 240—PROCEDURES FOR OBTAINING AND EVALUATING MOTOR VEHICLE DRIVING RECORD DATA

The purpose of this appendix is to outline the procedures available to individuals and railroads for complying with the requirements of section 4(a) of the Railroad Safety Improvement Act of 1988 and §§240.109, 240.111 and 240.205 of this part. Those provisions require that railroads consider the motor vehicle driving record of each person prior to issuing him or her certification or recertification as a qualified locomotive engineer.

To fulfill that obligation, a railroad must review a certification candidate's recent motor vehicle driving record. Generally, that will be a single record on file with the state agency that issued the candidate's current license. However, it can include multiple records if the candidate has been issued a motor vehicle driving license by more than one state agency. In addition, the railroad must determine whether the certification candidate is listed in the National Driver Register and, if so listed, to review the data that caused the candidate to be so listed.

Access to State Motor Vehicle Driving Record Data

The right of railroad workers, their employers, or prospective employers to have access to a state motor vehicle licensing agency's data concerning an individual's driving record is controlled by state law. Although many states have mechanisms through which employers and prospective employers such as railroads can obtain such data, there are some states in which privacy concerns make such access very difficult or impossible. Since individuals generally are entitled to obtain access to driving record data that will be relied on by a state motor vehicle licensing agency when that agency is taking action concerning their driving privileges, FRA places responsibility on individuals, who want to serve as locomotive engineers to request that their current state drivers licensing agency or agencies furnish such data directly to the railroad considering certifying them as a locomotive operator. Depending on the procedures adopted by a particular state agency, this will involve the candidate's either sending the state agency a brief letter requesting such action or executing a state agency form that accomplishes the same effect. It will normally involve payment of a nominal fee established by the state agency for such a records check. In rare instances, when a certification candidate has been issued multiple licenses, it may require more than a single request.

The National Driver Register

In addition to seeking an individual state's data, each engineer candidate is required to request that a search and retrieval be performed of any relevant information concerning his or her driving record contained in the National Driver Register. The National Driver Register (NDR) is a system of information created by Congress in 1960. In essence it is a nationwide repository of information on problem drivers that was created in an effort to protect motorists. It is a voluntary State/Federal cooperative program that assists motor vehicle driver licensing agencies in gaining access to data about actions taken by other state agencies concerning an individual's motor vehicle driving record. The NDR is designed to address the problem that occurs when chronic traffic law violators, after losing their license in one State travel to and receive licenses in another State. Currently the NDR is maintained by the National Highway Traffic Safety Administration (NHTSA) of the Department of Transportation under the provisions of the National Driver Register Act (23 U.S.C. 401 note). Under that statute, state motor vehicle licensing authorities voluntarily notify NHTSA when they take action to deny, suspend, revoke or cancel a person's motor vehicle driver's license and, under the provisions of a 1982 change to the statute, states are also authorized to notify NHTSA concerning convictions for operation of a motor vehicle while under the influence of, or impaired by, alcohol or a controlled substance, and for traffic violations arising in connection with a fatal traffic accident, reckless driving or racing on the highway even if these convictions do not result in an immediate loss of driving privileges.

The information submitted to NHTSA contains, at a minimum, three specific pieces of data: the identification of the state authority providing the information, the name of the person whose license is being affected, and the date of birth of that person. It may be supplemented by data concerning the person's height, weight, color of eyes, and social security account number, if a State collects such data.

Access to NDR Data

Essentially only individuals and state licensing agencies can obtain access to the NDR data. Since railroads have no direct access to the NDR data, FRA requires that individuals seeking certification as a locomotive engineer request that an NDR search be performed and direct that the results be furnished to the railroad. FRA requires that each person request the NDR information directly from NHTSA unless the prospective operator has a motor vehicle driver license issued by a state motor vehicle licensing agency that is "participating" under the pro-

visions of the National Driver Register Act of 1982. Participating states can directly access the NDR data on behalf of the prospective engineer. The state agencies that currently are authorized to access NDR data in that manner are identified in appendix D of this regulation.

Requesting NHTSA to Perform the NDR Check

The procedures for requesting NHTSA performance of an NDR check are as follows:

1. Each person shall submit a written request to National Highway Traffic Safety Administration at the following address: Chief, National Driver Register, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590.
2. The request must contain:
 - (a) The full legal name;
 - (b) Any other names used by the person (e.g., nickname or professional name);
 - (c) The date of birth;
 - (d) Sex;
 - (e) Height;
 - (f) Weight;
 - (g) Color of eyes;
 - (h) Driver's license number (unless that is not available).

3. The request must authorize NHTSA to perform the NDR check and to furnish the results of the search directly to the railroad.

4. The request must identify the railroad to which the results are to be furnished, including the proper name of the railroad, and the proper mailing address of the railroad.

5. The person seeking to become a certified locomotive engineer shall sign the request, and that signature must be notarized.

FRA requires that the request be in writing and contain as much detail as is available to improve the reliability of the data search. Any person may supply additional information to that being mandated by FRA. Furnishing additional information, such as the person's Social Security account number, will help to more positively identify any records that may exist concerning the requester. Although no fee is charged for such NDR checks, a minimal cost may be incurred in having the request notarized. The requirement for notarization is designed to ensure that each person's right to privacy is being respected and that records are only being disclosed to legally authorized parties.

Requesting a State Agency to Perform the NDR Check

As discussed earlier in connection with obtaining data compiled by the state agency itself, a person can either write a letter to that agency asking for the NDR check or can use the agency's forms for making such a request. If a request is made by letter the individual must follow the same procedures required when directly seeking the data from NHTSA. At present there are only a limited

number of state licensing agencies that have the capacity to make a direct NDR inquiry of this nature. It is anticipated that the number of states with such capability will increase in the near future; therefore, FRA will continue to update the identification of such states by revising appendix D to this regulation to identify such state agencies. Since it would be more efficient for a prospective locomotive engineer to make a single request for both aspects of the information required under this rule, FRA anticipates that state agency inquiry will eventually become the predominant method for making these NDR checks. Requests to state agencies may involve payment of a nominal fee established by the state agency for such a records check.

State agencies normally will respond in approximately 30 days or less and advise whether there is or is not a listing for a person with that name and date of birth. If there is a potential match and the inquiry state was not responsible for causing that entry, the agency normally will indicate in writing the existence of a probable match and will identify the state licensing agency that suspended, revoked or canceled the relevant license or convicted the person of one of the violations referenced earlier in this appendix.

Actions When a Probable NDR Match Occurs

The response provided after performance of an NDR check is limited to either a notification that no potential record match was identified or a notification that a potential record match was identified. If the latter event occurs, the notification will include the identification of the state motor vehicle licensing authority which possesses the relevant record. If the NDR check results indicate a potential match and that the state with the relevant data is the same state which furnished detailed data (because it had issued the person a driving license), no further action is required to obtain additional data. If the NDR check results indicate a potential match and the state with the relevant data is different from the state which furnished detailed data, it then is necessary to contact the individual state motor vehicle licensing authority that furnished the NDR information to obtain the relevant record. FRA places responsibility on the railroad to notify the engineer candidate and on the candidate to contact the state with the relevant information. FRA requires the certification candidate to write to the state licensing agency and request that the agency inform the railroad concerning the person's driving record. If required by the state agency, the person may have to pay a nominal fee for providing such data and may have to furnish written evidence that the prospective operator consents to the release of the data

to the railroad. FRA does not require that a railroad or a certification candidate go beyond these efforts to obtain the information in the control of such a state agency, and a railroad may act upon the pending certification without the data if an individual state agency fails or refuses to supply the records.

If the non-issuing state licensing agency does provide the railroad with the available records, the railroad must verify that the record pertains to the person being considered for certification. It is necessary to perform this verification because in some instances only limited identification information is furnished for use in the NDR and this might result in data about a different person being supplied to the railroad. Among the available means for verifying that the additional state record pertains to the certification candidate are physical description, photographs and handwriting comparisons.

Once the railroad has obtained the motor vehicle driving record which, depending on the circumstance, may consist of more than two documents, the railroad must afford the prospective engineer an opportunity to review that record and respond in writing to its contents in accordance with the provisions of §240.219. The review opportunity must occur before the railroad evaluates that record. The railroad's required evaluation and subsequent decision making must be done in compliance with the provisions of this part.

APPENDIX D TO PART 240—IDENTIFICATION OF STATE AGENCIES THAT PERFORM NATIONAL DRIVER REGISTER CHECKS

Under the provisions of §240.111 of this part, each person seeking certification or recertification as a locomotive operator must request that a check of the National Driver Register (NDR) be conducted and that the resulting information be furnished to his or her employer or prospective employer. Under the provisions of paragraphs (d) and (e) of §240.111, each person seeking certification or recertification as a locomotive engineer must request that National Highway Traffic Safety Administration conduct the NDR check, unless he or she was issued a motor vehicle driver license by one of the state agencies identified in this appendix. If the certification candidate received a license from one of the designated state agencies, he or she must request the state agency to perform the NDR check. The state motor vehicle licensing agencies listed in this appendix participate in a program that authorizes these state agencies, in accordance with the National Driver Register Act of 1982, to obtain information from the NDR on behalf of individuals seeking data about themselves.

Since these state agencies can more efficiently supply the desired data and, in some instances, can provide a higher quality of information, FRA requires that certification candidates make use of this method in preference to directly contacting NHTSA.

Although the number of state agencies that participate in this manner is limited, FRA anticipates that an increasing number of states will do so in the future. This appendix will be revised periodically to reflect current participation in the program. As of December 31, 1989, the motor vehicle licensing agencies of the following states participate under the provisions of the 1982 changes to the NDR Act: North Dakota, Ohio, Virginia, and Washington.

APPENDIX E TO PART 240—RECOMMENDED PROCEDURES FOR CONDUCTING SKILL PERFORMANCE TESTS

FRA requires (see §240.127 and §240.211) that locomotive engineers be given a skill performance test prior to certification or recertification and establishes certain criteria for the conduct of that test. Railroads are given discretion concerning the manner in which to administer the required testing. FRA has afforded railroads this discretion to allow individual railroad companies latitude to tailor their testing procedures to the specific operational realities. This appendix contains FRA's recommendations for the administration of skill performance testing that occurs during operation of an actual train. It can be modified to serve in instances where a locomotive simulator is employed for testing purposes. These recommended practices, if followed, will ensure a more thorough and systematic assessment of locomotive engineer performance.

The Need for a Systematic Approach

There are numerous criteria that should be monitored when a designated supervisor of locomotive engineers is observing a person to determine whether that individual should be certified or recertified as a qualified locomotive engineer. The details of those criteria will vary for the different classes of service, types of railroads, and terrain over which trains are being operated. At a minimum, the attention of a designated supervisor of locomotive engineers should concentrate on several general areas during any appraisal. Compliance with the railroad's operating rules, including its safety directives and train handling rules, and compliance with Federal regulations should be carefully monitored. But, in order to effectively evaluate employees, it is necessary to have something against which to compare their performance. In order to hold a locomotive engineer accountable for compliance, a rail-

road must have adequate operating, safety and train handling rules. Any railroad that fails to have adequate operating, safety, or train handling rules will experience difficulty in establishing a objective method of measuring an individual's skill level. Any railroad that requires the evaluation of an individual's performance relative to its train handling rules needs to have established preferred operating ranges for throttle use, brake application, and train speed. The absence of such criteria results in the lack of a meaningful yardstick for the designated supervisor of locomotive engineers to use in measuring the performance of locomotive engineers. It also is essential to have a definite standard so that the engineer and any reviewing body can know what the certification candidate is being measured against.

Evaluating the performance of certain train operation skills will tend to occur in all situations. For example, it would be rare for a designated supervisor of locomotive engineers to observe any operator for a reasonable period of time and not have some opportunity to review that engineer's compliance with some basic safety rules, compliance with basic operating rules, and performance of a brake test. As the complexity of the operation increases, so does the number of items that the operator must comply with. Higher speeds, mountainous terrain, and various signal systems place increased emphasis on the need for operator compliance with more safety, operating, and train handling rules. Accounting for such variables in any universal monitoring scheme immediately results in a fairly complex system.

FRA therefore recommends that designated supervisors of locomotive engineers employ a written aid to help record events and procedures that as a minimum should be observed for when conducting a skills performance test. FRA is providing the following information to assist railroads in developing such a written aid so as to ensure meaningful testing. When conducting a skills performance test, a designated supervisor of locomotive engineers should be alert to the following:

- Does the employee have the necessary books (Operating Rules, Safety Rules, Timetable, etc.)?
- Are predeparture inspections properly conducted (Radio, Air Brake Tests, Locomotive, etc.)?
- Does the employee comply with applicable safety rules?
- Does the employee read the bulletins, general orders, etc.?
- Enroute, does the employee:
 - Comply with applicable Federal Rules?
 - Monitor gauges?
 - Properly use the horn, whistle, headlight?
 - Couple to cars at a safe speed?

- Properly control in train slack and buff forces?
- Properly use the train braking systems?
- Comply with speed restrictions?
- Display familiarity with the physical characteristics?
- Comply with signal indications?
- Respond properly to unusual conditions?
- At the conclusion of the trip, does the employee:
 - Apply a hand brake to the locomotives?
 - Properly report locomotive defects?

Obviously, the less sophisticated the railroad's operations are, the fewer the number of identified practices that would be relevant. Hence, this list should be modified accordingly.

The Need for Objectivity, Use of Observation Form

It is essential that railroads conduct the performance skills testing in the most objective manner possible, whether this testing is the locomotive engineer's initial qualification testing or periodic retesting. There will always be some potential for the subjective views, held by the designated supervisor of locomotive engineers conducting the testing, to enter into evaluations concerning the competency of a particular individual to handle the position of locomotive engineer. Steps can be taken, and need to be taken, to minimize the risk that personality factors adversely influence the testing procedure.

One way to reduce the entry of subjective matters into the qualification procedures is through the use of a document that specifies those criteria that the designated supervisor of locomotive engineers is to place emphasis on. The use of an observation form will reduce but not eliminate subjectivity. Any skill performance test will contain some amount of subjectivity. While compliance with the operating rules or the safety rules is clear in most cases, with few opportunities for deviation, train handling offers many options with few absolute right answers. The fact that an engineer applies the train air brakes at one location rather than a few yards away does not necessarily indicate a failure but a question of judgment. The use of dynamic braking versus air brakes at a particular location may be a question of judgment unless the carrier has previously specified the use of a preferred braking method. In any case the engineer's judgment, to apply or not apply a braking system at a given location, is subject to the

opinion of the designated supervisor of locomotive engineers.

A railroad should attempt to reduce or eliminate such subjectivity through use of some type of observation or evaluation. For railroads developing any evaluation form, the areas of concern identified earlier will not be relevant in all instances. Railroads that do not have sophisticated operations would only need a short list of subjects. For example, most smaller railroads would not require line items pertaining to compliance with signal rule compliance or the use of dynamic brakes. Conversely, in all instances the observation forms should include the time and location that the observer started and ended the observation. FRA believes that there should be a minimum duration for all performance skills examinations. FRA allows railroads to select a duration appropriate for their individual circumstances, requiring only that the period be "of sufficient length to effectively evaluate the person." In exercising its discretion FRA suggests that the minimums selected by a railroad be stated in terms of a distance since the examination has to be of a sufficient duration to adequately monitor the operator's skills in a variety of situations. FRA also suggests that the format for the observation form include a space for recording the observer's comments. Provision for comments ideally would allow for the inclusion of "constructive criticism" without altering the import of the evaluation and would permit subjective comments where merited.

APPENDIX F TO PART 240—MEDICAL
STANDARDS GUIDELINES

(1) The purpose of this appendix is to provide greater guidance on the procedures that should be employed in administering the vision and hearing requirements of §§240.121 and 240.207.

(2) In determining whether a person has the visual acuity that meets or exceeds the requirements of this part, the following testing protocols are deemed acceptable testing methods for determining whether a person has the ability to recognize and distinguish among the colors used as signals in the railroad industry. The acceptable test methods are shown in the left hand column and the criteria that should be employed to determine whether a person has failed the particular testing protocol are shown in the right hand column.

Accepted tests	Failure criteria
PSEUDOISCHROMATIC PLATE TESTS	
American Optical Company 1965	5 or more errors on plates 1–15.
AOC—Hardy-Rand-Ritter plates—second edition	Any error on plates 1–6 (plates 1–4 are for demonstration—test plate 1 is actually plate 5 in book)
Dvorine—Second edition	3 or more errors on plates 1–15

Accepted tests	Failure criteria
Ishihara (14 plate)	2 or more errors on plates 1–11.
Ishihara (16 plate)	2 or more errors on plates 1–8.
Ishihara (24 plate)	3 or more errors on plates 1–15.
Ishihara (38 plate)	4 or more errors on plates 1–21.
Richmond Plates 1983	5 or more errors on plates 1–15.
MULTIFUNCTION VISION TESTER	
Keystone Orthoscope	Any error.
OPTEC 2000	Any error.
Titmus Vision Tester	Any error.
Titmus II Vision Tester	Any error.

(3) In administering any of these protocols, the person conducting the examination should be aware that railroad signals do not always occur in the same sequence and that “yellow signals” do not always appear to be the same. It is not acceptable to use “yarn” or other materials to conduct a simple test to determine whether the certification candidate has the requisite vision. No person shall be allowed to wear chromatic lenses during an initial test of the person’s color vision; the initial test is one conducted in accordance with one of the accepted tests in the chart and § 240.121(c)(3).

(4) An examinee who fails to meet the criteria in the chart, may be further evaluated as determined by the railroad’s medical examiner. Ophthalmologic referral, field testing, or other practical color testing may be utilized depending on the experience of the examinee. The railroad’s medical examiner will review all pertinent information and, under some circumstances, may restrict an examinee who does not meet the criteria from operating the train at night, during adverse weather conditions or under other circumstances. The intent of § 240.121(e) is not to provide an examinee with the right to make an infinite number of requests for further evaluation, but to provide an examinee with at least one opportunity to prove that a hearing or vision test failure does not mean the examinee cannot safely operate a locomotive or train. Appropriate further medical evaluation could include providing another approved scientific screening test or a field test. All railroads should retain the discretion to limit the number of retests that an examinee can request but any cap placed on the number of retests should not limit retesting when changed circumstances would make such retesting appropriate. Changed circumstances would most likely occur if the examinee’s medical condition has improved in some way or if technology has advanced to the extent that it arguably could compensate for a hearing or vision deficiency.

(5) Engineers who wear contact lenses should have good tolerance to the lenses and

should be instructed to have a pair of corrective glasses available when on duty.

APPENDIX B TO PART 241—SCHEDULE OF CIVIL PENALTIES

APPENDIX C TO PART 241—GEOGRAPHICAL BOUNDARIES OF FRA’S REGIONS AND ADDRESSES OF FRA’S REGIONAL HEAD-QUARTERS

AUTHORITY: 49 U.S.C. 20103, 20107, 21301, 21304, 21311; 28 U.S.C. 2461, note; 49 CFR 1.49.

SOURCE: 67 FR 75960, Dec. 10, 2002, unless otherwise noted.

§ 241.1 Purpose and scope.

(a) The purpose of this part is to prevent railroad accidents and incidents, and consequent injuries, deaths, and

Federal Railroad Administration, DOT

§ 241.5

property damage, that would result from improper dispatching of railroad operations in the United States by individuals located outside of the United States.

(b) This part prohibits extraterritorial dispatching of railroad operations, conducting railroad operations that are extraterritorially dispatched, and allowing track to be used for such operations, subject to certain stated exceptions. This part does not restrict a railroad from adopting and enforcing additional or more stringent requirements not inconsistent with this part.

§ 241.3 Application and responsibility for compliance.

(a) Except as provided in paragraph (b) of this section, this part applies to all railroads.

(b) This part does not apply to—

(1) A railroad that operates only on track inside an installation that is not part of the general railroad system of transportation; or

(2) Rapid transit operations in an urban area that are not connected to the general railroad system of transportation.

(c) Although the duties imposed by this part are generally stated in terms of a duty of a railroad, each person, including a contractor for a railroad, who performs a function covered by this part, shall perform that function in accordance with this part.

§ 241.5 Definitions.

As used in this part:

Administrator means the Administrator of the Federal Railroad Administration or the Administrator's delegate.

Dispatch means—

(1) To perform a function that would be classified as a duty of a “dispatching service employee,” as that term is defined by the hours of service laws at 49 U.S.C. 21101(2), if the function were to be performed in the United States. For example, to *dispatch* means, by the use of an electrical or mechanical device—

(i) To control the movement of a train or other on-track equipment by the issuance of a written or verbal authority or permission affecting a railroad operation, or by establishing a

route through the use of a railroad signal or train control system but not merely by aligning or realigning a switch; or

(ii) To control the occupancy of a track by a roadway worker or stationary on-track equipment, or both; or

(iii) To issue an authority for working limits to a roadway worker.

(2) The term *dispatch* does not include the action of personnel in the field—

(i) Effecting implementation of a written or verbal authority or permission affecting a railroad operation or an authority or permission affecting a railroad operation or an authority for working limits to a roadway worker (e.g., initiating an interlocking timing device, authorizing a train to enter working limits); or

(ii) Operating a function of a signal system designed for use by those personnel.

Dispatcher means any individual who dispatches.

Emergency means an unexpected and unforeseeable event or situation that affects a railroad's ability to use a dispatcher in the United States to dispatch a railroad operation in the United States and that, absent the railroad's use of an extraterritorial dispatcher to dispatch the railroad operation, would either materially disrupt rail service or pose a substantial safety hazard.

Employee means an individual who is engaged or compensated by a railroad or by a contractor to a railroad to perform any of the duties defined in this part.

Extraterritorial dispatcher means a dispatcher who, while located outside of the United States, dispatches a railroad operation that occurs in the United States.

Extraterritorial dispatching means the act of dispatching a railroad operation that occurs on trackage in the United States by a dispatcher located outside of the United States.

Fringe border dispatching means the act of extraterritorial dispatching a railroad operation that occurs on trackage in the United States immediately adjacent to the border between the United States and Canada or the border between the United States and

§241.7

49 CFR Ch. II (10–1–04 Edition)

Mexico by a dispatcher who is a railroad employee located in Canada or Mexico.

FRA means the Federal Railroad Administration, United States Department of Transportation.

Movement of a train means the movement of one or more locomotives coupled with or without cars, requiring an air brake test in accordance with part 232 or part 238 of this chapter, except during switching operations or where the operation is that of classifying and assembling rail cars within a railroad yard for the purpose of making or breaking up trains.

Occupancy of a track by a roadway worker or stationary on-track equipment or both refers to the physical presence of a roadway worker or stationary on-track equipment, or both, on a track for the purpose of making an inspection, repair, or another activity not associated with the movement of a train or other on-track equipment.

Person means an entity of a type covered under 1 U.S.C. 1, including but not limited to the following: a railroad; a manager, supervisor, official, or other employee or agent of a railroad; an owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; an independent contractor providing goods or services to a railroad; and an employee of such owner, manufacturer, lessor, lessee, or independent contractor.

Railroad means any form of non-highway ground transportation that runs on rails or electromagnetic guideways and any person providing such transportation, including—

(1) Commuter or other short-haul railroad passenger service in a metropolitan or suburban area and commuter railroad service that was operated by the Consolidated Rail Corporation on January 1, 1979; and

(2) High speed ground transportation systems that connect metropolitan areas, without regard to whether those systems use new technologies not associated with traditional railroads; but does not include rapid transit operations in an urban area that are not connected to the general railroad system of transportation.

Railroad contractor means a contractor to a railroad or a subcontractor to a contractor to a railroad.

Railroad operation means the movement of a train or other on-track equipment (other than on-track equipment used in a switching operation or where the operation is that of classifying and assembling rail cars within a railroad yard for the purpose of making or breaking up a train), or the activity that is the subject of an authority issued to a roadway worker for working limits.

Roadway worker means any employee of a railroad, or of a contractor to a railroad, whose duties include inspection, construction, maintenance, or repair of railroad track, bridges, roadway, signal and communication systems, electric traction systems, roadway facilities, or roadway maintenance machinery on or near track or with the potential of fouling a track, and flagmen and watchmen/lookouts.

State means a State of the United States of America or the District of Columbia.

United States means all of the States.

Working limits means a segment of track with definite boundaries established in accordance with part 214 of this chapter upon which trains and engines may move only as authorized by the roadway worker having control over that defined segment of track. Working limits may be established through “exclusive track occupancy,” “inaccessible track,” “foul time,” or “train coordination” as defined in part 214 of this chapter.

§241.7 Waivers.

(a) *General.* (1) A person subject to a requirement of this part may petition the Administrator for a waiver of compliance with such requirement. Except as provided in paragraph (b) of this section, the filing of such a petition does not affect that person’s responsibility for compliance with that requirement while the petition is being considered.

(2) (i) Each petition for waiver under this section shall be filed in the manner and contain the information required by part 211 of this chapter.

(ii) Petitions seeking approval to conduct fringe border operations shall

also comply with the requirements of paragraph (c) of this section.

(iii) Petitioners not filing under paragraph (c) of this section should review the guidelines at 66 FR 63942 (Dec. 11, 2001), and frame their petitions to address the safety and security concerns articulated in the preamble, or contact the Office of the Chief Counsel, RCC-12, FRA, 1120 Vermont Avenue, NW., Stop 10, Washington, DC 20590, for a copy of the guidelines.

(3) If the Administrator finds that a waiver of compliance is in the public interest and is consistent with railroad safety, the Administrator may grant the waiver subject to any conditions that the Administrator deems necessary.

(b) *Special dispensation for existing extraterritorial dispatching.* (1) A railroad that files a waiver request seeking to continue extraterritorial dispatch of an operation that it has dispatched from Canada or Mexico pursuant to regulations contained in 49 CFR part 241, revised as of October 1, 2002, may continue extraterritorial dispatching of that operation until the railroad's waiver request is acted upon by FRA if the petition is filed no later than April 11, 2003.

(2) If the waiver request is for an operation not listed in appendix A to this part, the waiver request must describe when the extraterritorial dispatching of the operation commenced and how the dispatching was authorized by regulations contained in 49 CFR part 241, revised as of October 1, 2002. FRA will notify the railroad if FRA determines that the operation was not permitted by the terms of those regulations.

(c) *Fringe border dispatching.* (1) A waiver request to have a railroad employee located in Canada or in Mexico dispatch a railroad operation in the United States immediately adjacent to the border of the country in which the dispatcher conducts the dispatching will generally be approved by FRA, subject to any conditions imposed by FRA, if the waiver request meets all of the terms of paragraphs (c)(2) and (3) of this section. A proponent of a waiver request may seek relief from the terms of paragraphs (c)(2) and (3) of this section.

(2) The railroad proposing to conduct the fringe border dispatching shall supply the following documents as part of the waiver request:

(i) A description, by railroad division, applicable subdivision(s), and mileposts, of the line proposed to be dispatched;

(ii) A copy of the operating rules of the railroad that would apply to the proposed fringe border dispatching, including hours of service limitations, and the railroad's program for testing the dispatchers in accordance with these operating rules and for ensuring that the dispatchers do not work in excess of the hours of service restrictions;

(iii) A copy of the railroad's drug and alcohol abuse prevention program that applies to the fringe border dispatchers. The program shall, to the extent permitted by the laws of the country where the dispatching occurs, contain the following:

(A) Preemployment drug testing;

(B) A general prohibition on possession and use of alcohol and drugs while on duty;

(C) Reasonable cause alcohol and drug testing;

(D) A policy dealing with co-worker and self-reporting of alcohol and drug abuse problems;

(E) Post-accident testing; and

(F) Random drug testing;

(iv) The steps the railroad has taken to ensure the security of the dispatch center where the fringe border dispatching will take place;

(v) The railroad's plans for complying with the requirements of paragraph (c)(3) of this section; and

(vi) A verification from a government agency in the country where the dispatching will occur that the agency has safety jurisdiction over the railroad and the proposed dispatching, and that the railroad's safety programs referenced in paragraphs (c)(2)(ii) and (iii) of this section meet the safety requirements established by the agency or, in the absence of established safety requirements, that the programs are satisfactory to the agency.

(3) Except as otherwise approved by FRA, fringe border dispatching must comply with the following requirements:

§241.9

49 CFR Ch. II (10–1–04 Edition)

(i) The trackage in the United States being extraterritorially dispatched shall not exceed the following route miles, measured from the point that the trackage crosses the United States border:

(A) For operations conducted pursuant to the regulations contained in 49 CFR part 241, revised as of October 1, 2002, the route miles shall be the miles normally operated by the railroad in conducting the operation; and

(B) For all other operations, the route miles shall not exceed five miles.

(ii) Except for unforeseen circumstances such as equipment failure, accident, casualty, or incapacitation of a crew member, each extraterritorially dispatched train shall be under the control of the same assigned crew for the entire trip over the extraterritorially dispatched trackage.

(iii) The fringe border dispatcher shall communicate instructions to the train crew and maintenance of way employees working on the line in the English language and, when referencing units of measurement, shall use English units of measurement.

(iv) The rail line shall be under the exclusive control of a single dispatching district or desk; and

(v) The dispatching of the train shall be transferred from the fringe border dispatcher to a dispatcher located in the United States at one of the following locations within the mileage limits mandated in paragraph (c)(3)(i) of this section:

(A) Interchange point;

(B) Signal control point;

(C) Junction of two rail lines;

(D) Established crew change point;

(E) Yard or yard limits location;

(F) Inspection point for U.S. Customs, Immigration and Naturalization Service, Department of Agriculture, or other governmental inspection; or

(G) Location where there is a change in the method of train operations.

§241.9 Prohibition against extraterritorial dispatching; exceptions.

(a) *General.* Except as provided in §241.7(d) and paragraphs (b) and (c) of this section, a railroad subject to this part shall not require or permit a dispatcher located outside the United

States to dispatch a railroad operation that occurs in the United States if the dispatcher is employed by the railroad or by a contractor to the railroad.

(b) *Transitional period to continue existing extraterritorial dispatching.* A railroad that has normally extraterritorially dispatched railroad track in the United States from Canada or Mexico pursuant to the regulations contained in 49 CFR part 241, revised as of October 1, 2002, may continue extraterritorial dispatching of that railroad track until April 10, 2003, to permit the railroad an opportunity to file a waiver request pursuant to §241.7.

(c) *Emergencies.* (1) In an emergency situation, a railroad may require or permit one of its dispatchers located outside the United States to dispatch a railroad operation that occurs in the United States, provided that:

(i) The dispatching railroad notifies the FRA Regional Administrator of each FRA region where the railroad operation was conducted, in writing as soon as practicable, of the emergency; and

(ii) The extraterritorial dispatching is limited to the duration of the emergency.

(2) Written notification may be made either on paper or by electronic mail.

(3) A list of the States that make up the FRA regions and the street and e-mail addresses and fax numbers of the FRA Regional Administrators appears in appendix C to this part.

(d) *Liability.* The Administrator may hold either the railroad that employs the dispatcher or the railroad contractor that employs the dispatcher, or both, responsible for compliance with this section and subject to civil penalties under §241.15.

§241.11 Prohibition against conducting a railroad operation dispatched by an extraterritorial dispatcher; exceptions.

(a) *General.* Except as provided in §241.5(d) or paragraphs (b) and (c) of this section, a railroad subject to this part shall not conduct, or contract for the conduct of, a railroad operation in the United States that is dispatched from a location outside of the United States.

(b) *Transitional period to continue existing extraterritorial dispatching.* A railroad that has normally conducted, or contracted for the conduct of, a railroad operation in the United States that is extraterritorially dispatched pursuant to the regulations contained in 49 CFR part 241, revised as of October 1, 2002, may continue to conduct or contract for the conduct of the operation until April 10, 2003, to permit the railroad an opportunity to file a waiver request pursuant to § 241.7.

(c) *Emergencies.* (1) In an emergency situation, a railroad may conduct, or contract for the conduct of, a railroad operation in the United States that is dispatched from a location outside the United States, provided that:

(i) The dispatching railroad notifies the FRA Regional Administrator of each FRA region where the railroad operation was conducted, in writing as soon as practicable, of the emergency; and

(ii) The extraterritorial dispatching is limited to the duration of the emergency.

(2) Written notification may be made either on paper or by electronic mail.

(3) A list of the States that make up the FRA regions and the street and e-mail addresses and fax numbers of the FRA Regional Administrators appears in appendix C to this part.

(d) *Liability.* The Administrator may hold either the railroad that conducts the railroad operation or the railroad contractor that conducts the operation, or both, responsible for compliance with this section and subject to civil penalties under § 241.15.

§ 241.13 Prohibition against track owner's requiring or permitting use of its line for a railroad operation dispatched by an extraterritorial dispatcher; exceptions.

(a) *General.* Except as provided in paragraphs (b) and (c) of this section, an owner of railroad track located in the United States shall not require or permit the track to be used for a railroad operation that is dispatched from outside the United States.

(b) *Transitional period to continue existing extraterritorial dispatching.* An owner of a track segment located in the United States that is extraterritorially dispatched pursuant

to the regulations contained in 49 CFR 241, revised as of October 1, 2002, may require or permit the track segment to be continued to be used for a railroad operation that is extraterritorially dispatched until April 10, 2003, to permit the railroad an opportunity to file a waiver request pursuant to § 241.7.

(c) *Emergencies.* In an emergency situation, an owner of railroad track located in the United States may require or permit the track to be used for a railroad operation that is dispatched from outside the United States, provided that:

(1) The dispatching railroad notifies the FRA Regional Administrator of each FRA region where the operation was conducted, in writing as soon as practicable, of the emergency and

(2) The extraterritorial dispatching is limited to the duration of the emergency. Written notification may be made either on paper or by electronic mail.

(d) *Liability.* The Administrator may hold either the track owner or the assignee under § 213.5(c) of this chapter (if any), or both, responsible for compliance with this section and subject to civil penalties under § 241.15. A common carrier by railroad that is directed by the Surface Transportation Board to provide service over the track in the United States of another railroad under 49 U.S.C. 11123 is considered the owner of that track for the purposes of the application of this section during the period that the directed service order remains in effect.

§ 241.15 Penalties and other consequences for noncompliance.

(a) Any person who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least \$550 and not more than \$11,000 per violation, except that: Penalties may be assessed against individuals only for willful violations, and, where a grossly negligent violation or a pattern of repeated violations has created an imminent hazard of death or injury to persons, or has caused death or injury, a penalty not to exceed \$27,000 per violation may be assessed. Each day a violation continues shall constitute a separate offense.

§ 241.17

49 CFR Ch. II (10–1–04 Edition)

(b) An individual who violates any requirement of this part or causes the violation of any such requirement may be subject to disqualification from safety-sensitive service in accordance with part 209 of this chapter.

(c) A person who knowingly and willfully falsifies a record or report required by this part may be subject to criminal penalties under 49 U.S.C. 21311.

[67 FR 75960, Dec. 10, 2002, as amended at 69 FR 30595, May 28, 2004]

§ 241.17 Preemptive effect.

Under 49 U.S.C. 20106, the regulations in this part preempt any State law, regulation, or order covering the same subject matter, except an additional or more stringent law, regulation, or order that is necessary to eliminate or

reduce an essentially local safety hazard; is not incompatible with a law, regulation, or order of the United States Government; and does not impose an unreasonable burden on interstate commerce.

§ 241.19 Information collection.

(a) The information collection requirements of this part are being reviewed by the Office of Management and Budget pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

(b) The information collection requirements are found in the following sections: § 241.7(a), (b), (c); 241.9(c); 241.11(c); 241.13(c); and 214.15. When an effective date for these sections is established, FRA will publish notice of that date in the FEDERAL REGISTER.

APPENDIX A TO PART 241—LIST OF LINES BEING EXTRATERRITORIALLY DISPATCHED IN ACCORDANCE WITH THE REGULATIONS CONTAINED IN 49 CFR PART 241, REVISED AS OF OCTOBER 1, 2002

Description of United States track segment being extraterritorially dispatched	Length of United States' track segment	Railroad conducting the dispatching
Maine: Between Vanceboro, Maine and Brownville Junction, Maine.	99 miles	Eastern Maine Ry. Co.
Michigan: U.S. trackage between Windsor, Ontario, and Detroit, Michigan.	1.8 miles	Canadian Pacific Railway Company.
U.S. trackage between Sarnia, Ontario, and Port Huron, Michigan.	3.1 miles	Canadian National Railway Company (CN).
Minnesota: Sprague Subdivision, between Baudette, Minnesota, and International Boundary, Minnesota.	43.8 miles	CN.

APPENDIX B TO PART 241—SCHEDULE OF CIVIL PENALTIES ¹

Section ²	Violation	Willful violation
241.9(a) Requiring or permitting extraterritorial dispatching of a railroad operation	\$7,500	\$11,000
(b) Failing to notify FRA about extraterritorial dispatching of a railroad operation in an emergency situation	5,000	7,500
241.11 Conducting a railroad operation that is extraterritorially dispatched:		
(a)(1) Generally	7,500	11,000
(a)(2) In an emergency situation—where dispatching railroad fails to notify FRA of the extraterritorial dispatching	2,500	5,000
241.13 Requiring or permitting track to be used for the conduct of a railroad operation that is extraterritorially dispatched:		
(a)(1) Generally	7,500	11,000
(a)(2) In an emergency situation—where dispatching railroad fails to notify FRA of the extraterritorial dispatching	2,500	5,000

¹ A penalty may be assessed against an individual only for a willful violation. The Administrator reserves the right to assess a penalty of up to \$27,000 for any violation where circumstances warrant. See 49 U.S.C. 21301, 21304 and 49 CFR part 209, appendix A.

² Further designations for certain provisions, not found in the CFR citation for those provisions, and not found in this Appendix, are FRA Office of Chief Counsel computer codes added as a suffix to the CFR citation and used to expedite imposition of civil penalties for violations. FRA reserves the right, should litigation become necessary, to substitute in its complaint the CFR citation in place of the combined designation cited in the civil penalty demand letter.

Federal Railroad Administration, DOT

§ 244.1

APPENDIX C TO PART 241—GEOGRAPHICAL BOUNDARIES OF FRA'S REGIONS AND ADDRESSES OF FRA'S REGIONAL HEADQUARTERS

The geographical boundaries of FRA's eight regions and the addresses for the regional headquarters of those regions are as follows:

(1) *Region 1* consists of Maine, Vermont, New Hampshire, New York, Massachusetts, Rhode Island, Connecticut, and New Jersey. The mailing address of the Regional Headquarters is: 55 Broadway, Room 1077, Cambridge, Massachusetts 02142. The fax number is 617-494-2967. The electronic mail (E-mail) address of the Regional Administrator for Region 1 is: *Mark.McKeon@fra.dot.gov*.

(2) *Region 2* consists of Pennsylvania, Delaware, Maryland, Ohio, West Virginia, Virginia, and Washington, DC. The mailing address of the Regional Headquarters is: Two International Plaza, Suite 550, Philadelphia, Pennsylvania 19113. The fax number is 610-521-8225. The E-mail address of the Regional Administrator for Region 2 is: *David.Myers@fra.dot.gov*.

(3) *Region 3* consists of Kentucky, Tennessee, North Carolina, South Carolina, Georgia, Alabama, Mississippi, and Florida. The mailing address of the Regional Headquarters is: Atlanta Federal Center, 61 Forsythe Street, SW., Suite 16T20, Atlanta, Georgia 30303. The fax number is 404-562-3830. The E-mail address of the Regional Administrator for Region 3 is: *Fred.Dennin@fra.dot.gov*.

(4) *Region 4* consists of Minnesota, Wisconsin, Michigan, Illinois, and Indiana. The mailing address of the Regional Headquarters is: 300 West Adams Street, Rm 310, Chicago, Illinois 60606. The fax number is 312-886-9634. The E-mail address of the Regional Administrator for Region 4 is: *Laurance.Hasvold@fra.dot.gov*.

(5) *Region 5* consists of New Mexico, Oklahoma, Arkansas, Louisiana and Texas. The mailing address of the Regional Headquarters is: 4100 International Plaza, Suite 450, Fort Worth, Texas, 76109-4820. The fax number is 817-284-3804. The E-mail address of the Regional Administrator for Region 5 is: *John.Megary@fra.dot.gov*.

(6) *Region 6* consists of Nebraska, Iowa, Colorado, Kansas, and Missouri. The mailing address of the Regional Headquarters is: 911 Locust Street, Suite 464, Kansas City, Missouri 64106. The fax number is 816-329-3867. The E-mail address of the Regional Administrator for Region 6 is: *Darrell.Tisor@fra.dot.gov*.

(7) *Region 7* consists of California, Nevada, Utah, Arizona, and Hawaii. The mailing address of the Regional Headquarters is: 801 I Street, Suite 466, Sacramento, California 95814. The fax number is 916-498-6546. The E-

mail address of the Regional Administrator for Region 7 is: *Alvin.Settje@fra.dot.gov*.

(8) *Region 8* consists of Washington, Idaho, Montana, North Dakota, Oregon, Wyoming, South Dakota, and Alaska. The mailing address of the Regional Headquarters is: Murdock Executive Plaza, 703 Broadway, Suite 650, Vancouver, Washington 98660. The fax number is 360-696-7548. The E-mail address of the Regional Administrator for Region 8 is: *Dick.Clairmont@fra.dot.gov*.

PART 244—REGULATIONS ON SAFETY INTEGRATION PLANS GOVERNING RAILROAD CONSOLIDATIONS, MERGERS, AND ACQUISITIONS OF CONTROL

Subpart A—General

- Sec.
- 244.1 Scope, application, and purpose.
- 244.3 Preemptive effect.
- 244.5 Penalties.
- 244.7 Waivers.
- 244.9 Definitions.

Subpart B—Safety Integration Plans

- 244.11 Contents of a Safety Integration Plan.
- 244.13 Subjects to be addressed in a Safety Integration Plan involving an amalgamation of operations.
- 244.15 Subjects to be addressed in a Safety Integration Plan not involving an amalgamation of operations.
- 244.17 Procedures.
- 244.19 Disposition.
- 244.21 Compliance and Enforcement.

APPENDIX A TO PART 244—SCHEDULE OF CIVIL PENALTIES [RESERVED]

AUTHORITY: 49 U.S.C. 20103, 20107, 21301; 5 U.S.C. 553 and 559; 28 U.S.C. 2461, note; and 49 CFR 1.49.

SOURCE: 67 FR 11604, Mar. 15, 2002, unless otherwise noted.

Subpart A—General

§ 244.1 Scope, application, and purpose.

(a) This part prescribes requirements for filing and implementing a Safety Integration Plan with FRA whenever a Class I railroad proposes to consolidate with, merge with, or acquire control of another Class I railroad, or with a Class II railroad where there is a proposed amalgamation of operations.

§ 244.3

(b) The purpose of this part is to achieve a reasonable level of railroad safety during the implementation of transactions described in paragraph (a) of this section. This part does not preclude a railroad from taking additional measures not inconsistent with this part to provide for safety in connection with a transaction.

(c) The requirements prescribed under this part apply only to FRA's disposition of a regulated transaction filed by an applicant. The transactions covered by this part also require separate filing with and approval by the Surface Transportation Board. *See* 49 CFR part 1106.

§ 244.3 Preemptive effect.

Under 49 U.S.C. 20106, issuance of these regulations preempts any State law, regulation, or order covering the same subject matter, except an additional or more stringent law, regulation, or order that:

(a) Is necessary to eliminate or reduce an essentially local safety hazard;

(b) Is not incompatible with a law, regulation, or order of the United States Government; and

(c) Does not unreasonably burden interstate commerce.

§ 244.5 Penalties.

(a) Any person who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least \$550, but not more than \$11,000 per day, except that: Penalties may be assessed against individuals only for willful violations, and, where a grossly negligent violation or a pattern of repeated violations has created an imminent hazard of death or injury to persons, or has caused death or injury, a penalty not to exceed \$27,000 per violation may be assessed. Each day a violation continues shall constitute a separate offense.

(b) As specified in § 244.21, FRA may also exercise any of its other enforcement remedies if a railroad fails to comply with § 244.21.

(c) Any person who knowingly and willfully makes a false entry in a record or report required by this part

49 CFR Ch. II (10–1–04 Edition)

shall be subject to criminal penalties under 49 U.S.C. 21311.

[67 FR 11604, Mar. 15, 2002, as amended at 69 FR 30595, May 28, 2004]

§ 244.7 Waivers.

(a) A person subject to a requirement of this part may petition the Administrator for a waiver of compliance with any requirement of this part. The filing of such a petition does not affect that person's responsibility for compliance with that requirement pending action on such a petition.

(b) Each petition for a waiver under this section must be filed in the manner and contain the information required by part 211 of this chapter.

(c) If the Administrator finds that a waiver of compliance is in the public interest and is consistent with railroad safety, the Administrator may grant the waiver subject to any conditions the Administrator deems necessary.

(d) The procedures governing a petition for a waiver that are prescribed under this part apply only to FRA's disposition of such a petition. A person seeking a waiver of a Surface Transportation Board regulation would need to file a petition for a waiver with the Board. (*See* 49 CFR 1106.5.)

§ 244.9 Definitions.

As used in this part—

Administrator means the Administrator of the Federal Railroad Administration or the Administrator's delegate.

Amalgamation of operations means the migration, combination, or unification of one set of railroad operations with another set of railroad operations, including, but not limited to, the allocation of resources affecting railroad operations (*e.g.*, changes in personnel, track, bridges, or communication or signal systems; or use or deployment of maintenance-of-way equipment, locomotives, or freight or passenger cars).

Applicant means a Class I railroad or a Class II railroad engaging in a transaction subject to this part.

Best practices means measures that are tried, tested, and proven to be the safest and most efficient rules or instructions governing railroad operations.

Class I or Class II railroad has the meaning assigned by regulations of the Surface Transportation Board (49 CFR Part 1201; General Instructions 1-1), as those regulations may be revised by the Board (including modifications in class thresholds based on the revenue deflator formula) from time to time.

Corporate culture means the totality of the commitments, written and oral directives, and practices that make up the way a railroad's management and its employees operate their railroad.

Control means actual control, legal control, or the power to exercise control through:

(1) Common directors, officers, stockholders, a voting trust, or a holding or investment company, or

(2) Any other means. See 49 U.S.C. 10102.

Consolidation means the creation of a new Class I railroad by combining existing Class I railroads or a Class I railroad and a Class II railroad where there is an amalgamation of operations, or by a railroad or a corporate parent of a Class I railroad taking over the assets or assuming the liabilities, or both, of another Class I railroad such that the resulting unified entity has the combined capital, powers, and subsidiaries and affiliates, if applicable, of all of its constituents.

Environmental documentation means either an Environmental Assessment or Environmental Impact Statement prepared in accordance with the Surface Transportation Board's environmental rules at 49 CFR part 1105.

Merger means the acquisition of one Class I railroad or Class II railroad where there is amalgamation of operations by a Class I railroad such that the acquiring railroad or a corporate parent of that railroad acquires the stock, assets, liabilities, powers, subsidiaries and affiliates of the railroad acquired.

Person means an entity of any type covered under 1 U.S.C. 1, including the following: A railroad; a manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer,

lessor, lessee, or independent contractor.

Railroad means any form of non-highway ground transportation that runs on rails or electromagnetic guideways, including:

(1) Commuter or other short-haul rail passenger service in a metropolitan or suburban area; and

(2) High speed ground transportation systems that connect metropolitan areas, without regard to whether those systems use new technologies not associated with traditional railroads. The term does not include rapid transit operations in an urban area that are not connected to the general railroad system of transportation.

Safety Integration Plan means a comprehensive written plan submitted to and approved by FRA in compliance with this part that demonstrates in required detail how an applicant will provide for safe railroad operations during and after any transaction covered by this part, and otherwise assure compliance with the Federal railroad safety laws.

Section of Environmental Analysis or "SEA" means the Section of the Surface Transportation Board that prepares its environmental documentation and analyses.

Transaction means a consolidation, merger, or acquisition of control subject to the requirements of this part.

Subpart B—Safety Integration Plans

§ 244.11 Contents of a Safety Integration Plan.

Each Safety Integration Plan shall contain the following information for each subject matter identified in § 244.13 or § 244.15:

(a) A detailed description of how the applicant differs from each railroad it proposes to acquire or with which the applicant proposes to consolidate or merge, including the rules or instructions governing railroad operations of these railroads;

(b) A detailed description of the proposed manner of operations of the resulting railroad, including a reconciliation of the differing rules or instructions governing railroad operations of

the railroads involved in the transaction;

(c) The measures to be taken to comply with applicable Federal railroad safety laws and regulations;

(d) The proposed specific measures, expressed step-by-step, for each relevant subject matter that the applicant believes will result in safe implementation of the proposed transaction consistent with the requirements of this part;

(e) The allocation of resources, expressed as human and capital resources within designated operating budgets, directed to complete safety-relevant operations subject to the transaction; and

(f) The timetable, targeted in specific terms from commencement to completion, for implementing paragraphs (c), (d) and (e) of this section.

§ 244.13 Subjects to be addressed in a Safety Integration Plan involving an amalgamation of operations.

Each Safety Integration Plan involving an amalgamation of operations shall address the following subjects for railroad operations conducted on property subject to the transaction:

(a) *Corporate culture.* Each applicant shall:

(1) Identify and describe differences for each safety-related area between the corporate cultures of the railroads involved in the transaction;

(2) Describe how these cultures lead to different practices governing rail operations; and

(3) Describe, in step-by-step measures, the integration of these corporate cultures and the manner in which it will produce a system of “best practices” when the transaction is implemented.

(b) *Training.* Each applicant shall identify classroom and field courses, lectures, tests, and other educational or instructional forums designed to ensure the proficiency, qualification, and familiarity with the operating rules and operating tasks of territory assigned of the following employees, either when these employees are assigned to a new territory or the operating rules on a given territory are changed:

(1) Employees who perform train and engine service;

(2) Employees who inspect and maintain track and bridges;

(3) Employees who inspect, maintain and repair any type of on-track equipment, including locomotives, passenger cars, and freight cars of all types;

(4) Dispatchers or operators;

(5) Employees who inspect and maintain signal and train control devices and systems;

(6) Hazardous materials personnel, including information technology personnel who affect the transportation of hazardous materials;

(7) Employees who maintain or upgrade communication systems affecting rail operations; and

(8) Supervisors of employees enumerated in paragraphs (b)(1) through (7) of this section.

(c) *Operating practices.*

(1) *Operating rules.* Each applicant shall identify the operating rules, timetables, and timetable special instructions to govern railroad operations, including yard or terminal operations and freight or passenger service.

(2) *Alcohol and drug.* Each applicant shall identify the post-accident toxicological testing, reasonable cause testing, and random alcohol and drug testing programs as required under 49 CFR part 219.

(3) *Qualification and certification of locomotive engineers.* Each applicant shall identify the program for qualifying and certifying locomotive engineers under 49 CFR part 240.

(4) *Hours of service laws.* Each applicant shall identify the procedures for complying with the Federal hours of service laws and related measures to minimize fatigue of employees covered by 49 U.S.C. chapter 211.

(d) *Motive power and equipment.* Each applicant shall identify the qualification standards for employees who inspect, maintain, or repair railroad freight or passenger cars and locomotives, and the designated facilities used, or to be used, to repair such equipment.

(e) *Signal and train control.* Each applicant shall identify the signal and train control systems governing railroad operations and maintenance, and

any planned amendments or modifications to capital improvement and research and development projects for signal and train control operations.

(f) *Track Safety Standards and bridge structures.* Each applicant shall identify the maintenance and inspection programs for track and bridges, and the qualification standards for roadway workers.

(g) *Hazardous Materials.* Each applicant shall identify an inspection program covering the following areas:

- (1) Field inspection practices;
- (2) Hazardous materials communication standards;
- (3) Emergency response procedures; and
- (4) Information technology systems and personnel employed for transmitting or receiving information accompanying hazardous materials shipments. The inspection program should identify preventive measures that will be employed to respond to potential information technology integration and hazardous materials documentation deficiencies.

(h) *Dispatching operations.* Each applicant shall identify:

- (1) The railroad dispatching system to be adopted;
- (2) The migration of the existing dispatching systems to the adopted system, if applicable; and
- (3) The criteria used to determine workload and duties performed by operators or dispatchers employed to execute operations.

(i) *Highway-rail grade crossing systems.* Each applicant shall identify a program, including its development and implementation, covering the following:

- (1) Identification of the highway-rail grade crossings at which there will be an increase in rail traffic resulting from the transaction;
- (2) An applicant's existing grade-crossing programs as they apply to grade crossings identified in paragraph (i)(1) of this section;
- (3) Integration of the grade crossing programs of the railroads subject to the transaction to the extent the programs may be different;
- (4) Emergency response actions;
- (5) Avoidance of blocked or obstructed highway-rail crossing systems

by trains, locomotives, railroad cars, or other pieces of rolling equipment; and

(6) Signs employed for changes in rail traffic patterns.

(j) *Personnel staffing.* Each applicant shall identify the number of employees by job category, currently and proposed, to perform the following types of functions when there is a projected change of operations that will impact workforce duties or responsibilities for employees of that job category:

- (1) Train and engine service;
- (2) Yard and terminal service;
- (3) Dispatching operations;
- (4) Roadway maintenance;
- (5) Freight car and locomotive maintenance;
- (6) Maintenance of signal and train control systems, devices, and appliances;
- (7) Hazardous materials operations; and
- (8) Managers responsible for oversight of safety programs.

(k) *Capital investment.* Each applicant shall identify the capital investment program, clearly displaying planned investments in track and structures, signals and train control, and locomotives and equipment. The program shall describe any differences from the program currently in place on each of the railroads involved in the transaction.

(l) *Information systems compatibility.* Each applicant shall identify measures providing for a seamless interchange of information relating to the following subject matters:

- (1) Train consists;
- (2) Movements and movement history of locomotives and railroad freight cars;
- (3) Dispatching operations;
- (4) Emergency termination of operations; and
- (5) Transportation of hazardous materials.

[67 FR 11604, Mar. 15, 2002, as amended at 67 FR 68045, Nov. 8, 2002]

§244.15 Subjects to be addressed in a Safety Integration Plan not involving an amalgamation of operations.

If an applicant does not propose an amalgamation of operations conducted

§ 244.17

on properties subject to the transaction, the applicant shall not be required to file a Safety Integration Plan unless directed to do so by FRA.

§ 244.17 Procedures.

(a) Each applicant shall file one original of a proposed Safety Integration Plan with the Associate Administrator for Safety, FRA, 1120 Vermont Avenue, NW., Mail Stop 25, Washington, DC, 20590, no later than 60 days after the date it files its application with the Surface Transportation Board.

(b) The applicant shall submit such additional information necessary to support its proposed Safety Integration Plan as FRA may require to satisfy the requirements of this part.

(c) The applicant shall coordinate with FRA to resolve FRA's comments on the proposed Safety Integration Plan until such plan is approved.

(d) FRA will file its findings and conclusions on the proposed Safety Integration Plan with the Board's Section of Environmental Analysis at a date sufficiently in advance of the Board's issuance of its draft environmental documentation in the case to permit incorporation in the draft environmental document.

(e) Assuming FRA approves the proposed Safety Integration Plan and the Surface Transportation Board approves the transaction and adopts the Plan, each applicant involved in the transaction shall coordinate with FRA in implementing the approved Safety Integration Plan.

(f) During implementation of an approved Safety Integration Plan, FRA expects that an applicant may change and refine its Safety Integration Plan in response to unforeseen developments. An applicant shall communicate with FRA about such developments and submit amendments to its Safety Integration Plan to FRA for approval.

(g) During implementation of an approved Safety Integration Plan, FRA will inform the Surface Transportation Board about implementation of the plan at times and in a manner designed to aid the Board's exercise of its continuing jurisdiction over the approved transaction in accordance with an

49 CFR Ch. II (10–1–04 Edition)

agreement that FRA and the Board will enter into and execute. Pursuant to such agreement, FRA will consult with the Board at all appropriate stages of implementation, and will advise the Board on the status of the implementation process:

(1) For a period of no more than five years after the Board approves the transaction,

(2) For an oversight period for the transaction established by the Board, or

(3) Until FRA advises the Board in writing that the integration of operations subject to the transaction is complete, whichever is shorter.

(h) *Request for Confidential Treatment.* Each applicant requesting that advanced drafts of the proposed Safety Integration Plan and information in support of the proposed and approved plan that are filed with FRA receive confidential treatment shall comply with the procedures enumerated at 49 CFR 209.11.

§ 244.19 Disposition.

(a) *Standard of review.* FRA reviews an applicant's Safety Integration Plan, and any amendments thereto, to determine whether it provides a reasonable assurance of safety at every step of the transaction. In making this determination, FRA will consider whether the plan:

(1) Is thorough, complete, and clear; and

(2) Describes in adequate detail a logical and workable transition from conditions existing before the transaction to conditions intended to exist after consummation of the transaction.

(b) *Approval of the Safety Integration Plan and Amendments Thereto.* FRA approves a Safety Integration Plan, and any amendments thereto, that meets the standard set forth in paragraph (a) of this section. The approval will be conditioned on an applicant's execution of all of the elements contained in the plan, including any amendments to the plan approved by FRA.

(c) *Amendment.*—(1) *By the applicant.* The applicant may amend its Safety Integration Plan, from time to time, provided it explains the need for the proposed amendment in writing to FRA. Any amendment shall take effect

Federal Railroad Administration, DOT

§ 245.5

no earlier than 30 days after its submission to FRA, unless it is either approved or disapproved by FRA within that period. Any disapproval of an amendment shall be in accordance with the requirements prescribed in paragraph (b) of this section.

(2) *By FRA.* FRA may request an applicant to amend its approved Safety Integration Plan from time to time should circumstances warrant.

[67 FR 11604, Mar. 15, 2002, as amended at 67 FR 68045, Nov. 8, 2002]

§ 244.21 Compliance and Enforcement.

(a) After the Surface Transportation Board has approved a transaction subject to this part, a railroad implementing a transaction subject to this part shall operate in accordance with the Safety Implementation Plan approved by FRA until the properties involved in the transaction are completely integrated into the form contemplated in the Surface Transportation Board's approval of the transaction.

(b) FRA may exercise any or all of its enforcement remedies authorized by the Federal railroad safety laws if a railroad fails to comply with paragraph (a) of this section or to execute any measure contained in a Safety Implementation Plan approved by FRA.

APPENDIX A TO PART 244—SCHEDULE OF
CIVIL PENALTIES [RESERVED]

PART 245—RAILROAD USER FEES

Subpart A—General

Sec.
245.1 Purpose and scope.
245.3 Application.
245.5 Definitions.
245.7 Penalties.

Subpart B—Reporting and Recordkeeping

245.101 Reporting requirements.
245.103 Recordkeeping.
245.105 Retention of records.

Subpart C—User Fee Calculation

245.201 User fee calculation.

Subpart D—Collection Procedures and Duty to Pay

245.301 Collection procedures.

245.303 Duty to pay.

AUTHORITY: 45 U.S.C. 431, 437, 438, 446; 49 CFR 1.49(m).

SOURCE: 57 FR 30602, July 9, 1992, unless otherwise noted.

Subpart A—General

§ 245.1 Purpose and scope.

(a) The purpose of this part is to implement section 216 of the Federal Railroad Safety Act of 1970 (45 U.S.C. 446) (the "Safety Act") which requires the Secretary of Transportation to establish a schedule of fees to be assessed equitably to railroads to cover the costs incurred by the Federal Railroad Administration ("FRA") in administering the Safety Act (not including activities described in section 202(a)(2) thereof).

(b) Beginning in the fiscal year ending September 30, 1991, each railroad subject to this part shall pay an annual user fee to the FRA. For fiscal years 1992 through 1995, the user shall be calculated by FRA in accordance with § 245.101. The Secretary's authority to collect user fees shall expire on September 30, 1995, as provided for in section 216(f) of the Safety Act.

§ 245.3 Application.

This part applies to all railroads except those railroads whose entire operations are confined within an industrial installation.

§ 245.5 Definitions.

As used in this part—

(a) *Employee hours* means the number of hours worked by all employees of the railroad during the previous calendar year.

(b) *FRA* means the Federal Railroad Administration.

(c) *Industrial track* means a switching track serving industries, such as mines, mills smelters, and factories.

(d) *Light density railroad* means railroads with 1200 or less train-miles per road mile.

(e) *Main track* means a track, other than an auxiliary track, extending through yards or between stations, upon which trains are operated by timetable or train order or both, or the use of which is governed by a signal system.

§ 245.7

49 CFR Ch. II (10–1–04 Edition)

(f) *Passenger service* means both inter-city rail passenger service and commuter rail passenger service.

(g) *Railroad* means all forms of non-highway ground transportation that run on rails or electro-magnetic guideways, including (1) commuter or other short-haul rail passenger service in a metropolitan or suburban area, as well as any commuter rail service which was operated by the Consolidated Rail Corporation as of January 1, 1979, and (2) high speed ground transportation systems that connect metropolitan areas, without regard to whether they use new technologies not associated with traditional railroads. Such term does not include rapid transit operations within an urban area that are not connected to the general railroad system of transportation (See, 45 U.S.C. 431(e)).

(h) *Responsible entity* means the railroad subject to this part as of December 31 of the applicable fiscal year (October 1 to September 30), i.e. December 31, 1991, for fiscal year 1992, December 31, 1992, for fiscal year 1993, etc.

(i) *Road miles* means the length in miles of the single or first main track, measured by the distance between terminals or stations, or both. Road miles does not include industrial and yard tracks, sidings, and all other tracks not regularly used by road trains operated in such specific service, and lines operated under a trackage rights agreement.

(j) *Safety Act* means the Federal Railroad Safety Act of 1970 (45 U.S.C. 421 *et seq.*)

(k) *Sliding Scale* means the adjustment made to the mile of road of light density railroads. The sliding scale is as follows:

Train miles per road mile	Scaling factor
Up to 500	.0
501 to 750	.25
751 to 1000	.50
1001 to 1200	.75
1201 and above	1.00

The scaling factor is multiplied by the preliminary rate per road mile for each railroad for the year.

(l) *Trackage rights agreement* means an agreement through which a railroad obtains access and provides service over tracks owned by another railroad

where the owning railroad retains the responsibility for operating and maintaining the tracks.

(m) *Train* means a unit of equipment, or a combination of units of equipment (including light locomotives) in condition for movement over tracks by self-contained motor equipment.

(n) *Train mile* means the movement of a train a distance of one mile measured by the distance between terminals and/or stations and includes yard switching miles, train switching miles, and work train miles. Yard switching miles may be computed on any reasonable, supportable, and verifiable basis. In the event actual mileage is not computable by other means, yard switching miles may be computed at the rate of 6 mph for the time actually engaged in yard switching service.

(o) *Yard track* means a system of tracks within defined limits used for the making up or breaking up of trains, for the storing of cars, and for other related purposes, over which movements not authorized by timetable, or by train order may be made subject to prescribed signals, rules or other special instructions. Sidings used exclusively as passing track and main line track within yard limits are not included in the term yard track.

§ 245.7 Penalties.

Any person (including a railroad and any manager, supervisor, official, or other employee or agent of a railroad) who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least \$250 and not more than \$10,000 per violation. Civil penalties may be assessed against individuals only for willful violations. Each day a violation continues shall constitute a separate offense. A person may also be subject to the criminal penalties provided for in 45 U.S.C. 438(e) for knowingly and willfully falsifying records or reports required by this part.

Subpart B—Reporting and Recordkeeping

§ 245.101 Reporting requirements.

(a) Each railroad subject to this part shall submit to FRA, not later than March 1st of each year (August 1st, for

the fiscal year ending September 30, 1992) a report identifying the railroad's total train miles for the prior calendar year, the total road miles owned, operated under lease, or controlled (but not including trackage rights) by the railroad as of December 31 of the previous calendar year, and the railroad's total number of employee hours for the prior calendar year. An entity shall be considered a railroad subject to this part if it conforms to the definitions found in § 245.5(g) and (h) above. Each railroad shall report all of the data for the entire relevant calendar year whether or not its present operations generated all of the reportable data. This report shall be made on FRA Form 6180.91—Annual Report of Railroads Subject to User Fees and shall be filed by the Responsible Entity (see § 245.5(h)). The report shall include an explanation for an entry of zero for train miles, road miles, or employee hours. Each railroad shall also identify all subsidiary railroads for which it is reporting and provide a breakdown of train miles, road miles, and employee hours for each subsidiary. Finally, each railroad shall enter its corporate billing address for the user fees, and the name, title, telephone number, date, and a signature of the person submitting the form to FRA.

(b) FRA anticipates mailing blank copies of FRA Form 6180.91—Annual Report of Railroads Subject to User Fees to each railroad during the month of January (the month of July for the fiscal year ending September 30, 1992) for the railroad's use in preparing the report. This action by FRA is for the convenience of the railroads only and in no way affects the obligation of railroads subject to this part to obtain and submit FRA Form 6180.91 to FRA in a timely fashion in the event a blank form is not received from FRA. Blank copies of FRA Form 6180.91 may be obtained from the Office of Safety, FRA, 400 Seventh Street, SW., Washington, DC 20590.

(c) Train miles, as defined in § 245.5(n), shall be calculated by the railroad in accordance with the following considerations:

(1) Each railroad subject to this part is to report the train miles for the freight and passenger service it oper-

ates without regard to track or facility ownership.

(2) Train miles are to be reported by both freight and passenger railroads and shall include miles run between terminals or stations, or both, miles run by trains consisting of empty freight cars or without cars, locomotive train miles run, miles run by trains consisting of deadhead passenger equipment, motor train miles run, yard-switching miles run, work train miles, and train switching miles.

(d) Road miles, as defined in § 245.5(i), shall be calculated by the railroad in accordance with the following considerations:

(1) Road miles to be reported shall include all track owned, operated under lease, or controlled by the railroad but shall not include track used under trackage rights agreements. (Note: road miles consisting of leased track are to be reported by the lessee railroad). Road miles consisting of jointly-owned track or track jointly operated under lease shall be reported by the railroad controlling operations over the track. Road miles for a given section of railroad should be reported by only one railroad.

(2) Road miles to be reported shall not include industrial track, yard tracks, sidings, and other tracks not regularly used by road trains operated in such specific service. The determination that a particular track segment qualifies as industrial track or yard track must be made on a reasonable and supportable basis. Road miles do not include track which was out of service for the entire calendar year that is the subject of the user fee report.

(e) Employee hours, as defined in § 245.5(a), shall be calculated by the railroad in accordance with the following considerations: Employees hours to be reported include the number of hours worked by all railroad employees, regardless of occupation, during the previous calendar year. Include all employees in the occupational categories shown in appendix D of the FRA Guide for Preparing Accident/Incident Reports. Employee hours do not include time paid but not actually worked, such as holidays, vacations, etc. Employee hours do not include

§ 245.103

hours worked by volunteers. Employee hours do not include hours worked by individuals not employed directly by the reporting railroad (i.e. contractor employees).

(f) In computing both train miles and road miles, fractions representing less than one-half mile shall be disregarded and other fractions considered as one mile.

(g) Each railroad subject to this part has a continuing obligation to assure that the information provided to FRA on Form 6180.91—Annual Report of Railroads Subject to User Fees is accurate. Should a railroad learn at a later date that the information provided was not correct, it shall submit a revised Form 6180.91 along with a letter explaining in detail the discrepancy.

(h) Each railroad subject to this part has an obligation to assure that the information provided to FRA under this part is consistent with information provided to FRA under other reporting requirements, in particular reports submitted under 49 CFR part 225—Railroad Accidents/Incidents: Reports Classification, and Investigations. The railroad shall fully explain and resolve any discrepancies.

(i) The FRA has prepared a questionnaire entitled “Written Questionnaire on Whether Your Company Is A ‘Railroad’ Subject To FRA User Fee Regulations” (FRA Form 6180.90) in order to assist in determining whether certain entities meet the definition of “railroad” included in §245.5 or constitute railroads whose entire operations are confined within an industrial installation (“plant railroads”) excluded from this part under §245.3. Copies of FRA Form 6180.90 are available from the Office of Safety, FRA, 400 Seventh Street, SW., Washington, DC 20590.

§ 245.103 Recordkeeping.

Each railroad subject to this part shall maintain adequate records supporting its calculation of the railroad’s total train miles for the prior calendar year, total road miles as of December 31 of the previous calendar year, and the total employee hours for the previous calendar year. Such records shall be sufficient to enable the FRA to verify the information provided by the railroad on FRA Form 6180.91—Annual

49 CFR Ch. II (10–1–04 Edition)

Report of Railroads Subject to User Fees. Such records shall also be available for inspection and copying by the Administrator or the Administrator’s designee during normal business hours.

§ 245.105 Retention of records.

Each railroad subject to this part shall retain records required by §245.103 for at least three years after the end of the calendar year to which they relate.

Subpart C—User Fee Calculation

§ 245.201 User fee calculation.

(a) The fee to be paid by each railroad shall be determined as follows:

(1) After March 15th of each year (August 1st for the fiscal year ending September 30, 1992), FRA will tabulate the total train miles, total employee hours, and total road miles for railroads subject to this part for the preceding calendar year. FRA’s calculations will be based on the information supplied by railroads under §245.101 hereof, and other reports and submissions which railroads are required to make to FRA under applicable regulations (i.e. 49 CFR parts 225 and 228). At the same time, FRA will calculate the total cost of administering the Safety Act for the current fiscal year (other than activities described in section 202(a)(2) thereof) which will represent the total amount of user fees to be collected.

(2) Using tabulations of total train miles, total employee hours, total road miles, and the total cost of administering the Safety Act, FRA will calculate a railroad’s user fee assessment as follows:

(i) The assessment rate per train mile will be calculated by multiplying the total costs of administering the Safety Act by 0.55 and then dividing this amount (i.e., fifty-five percent of the total amount to be collected) by the total number of train miles reported to the FRA for the previous calendar year. The result will be the railroad user fee assessment rate per train mile for the current fiscal year.

(ii) The assessment rate per employee hour will be calculated by multiplying the total costs of administering the Safety Act by 0.1 and then dividing this amount (i.e., 10 percent of

the total amount to be collected) by the total number of employee hours reported to the FRA for the previous calendar year. The result will be the railroad user fee rate per employee hour for the fiscal year.

(iii) The assessment rate per road mile will be calculated in three steps. First, FRA will determine a preliminary assessment rate per road mile by multiplying the total costs of administering the Safety Act by 0.35 and dividing this amount (i.e., thirty-five percent of the total amount to be collected) by the total road miles reported to FRA for the previous calendar year. Second, FRA will adjust this preliminary rate per road mile for each light density railroad by multiplying the preliminary rate by the appropriate scaling factor identified in § 245.5(h). The result will be a reduced assessment rate per road mile for light density railroads. Third, FRA will adjust the preliminary assessment rate per road mile for all railroads except light density railroads by adding to their preliminary rate an incremental amount reflecting the reallocation of the relief provided to light density railroads under step 2 using the sliding scale. The incremental amount is calculated by subtracting (A) the total amount to be collected from light density railroads after application of the sliding scale from (B) the total amount that would have been collected from light density railroads using the preliminary assessment rate and developed under step 1 and (C) dividing the resulting amount by the total road miles reported to FRA by all railroads except light density railroads. The incremental amount is then added to the preliminary assessment rate for all railroads except light density railroads to derive the assessment rate per road mile for all railroads except light density railroads. The results will be a modified assessment rate per road mile for light density railroads qualifying under step 2 and a general assessment rate applicable to all other railroads. In those cases where the computed fee is less than the defined minimum, the net increase attributable to the application of the minimum standard is not included in the reallocation process

under step 3 and is instead added to total collections.

(b) The user fee to be paid by each covered railroad is the greater of \$500.00 or the sum of the railroad's train miles times the assessment rate per train mile, the railroad's employee hours times the assessment rate per employee hour, and the railroad's road miles times the applicable assessment rate per road mile.

Subpart D—Collection Procedures and Duty to Pay

§ 245.301 Collection procedures.

(a) After March 15th of each year (August 15th for the fiscal year ending September 30, 1992), FRA will publish in the FEDERAL REGISTER a notice containing FRA's preliminary estimates of the total user fee to be collected, the assessment rate per train mile, the assessment rate per employee hour, and the assessment rate per road mile (as adjusted by the sliding scale). The information published by FRA will be sufficient to enable each railroad to calculate its estimated user fee bill for the fiscal year on the basis of the train mile, employee hour, and road mile information provided by the railroad to FRA.

(b) After June 1st of each year, (August 15th for the fiscal year ending September 30, 1992), FRA will provide to each covered railroad a notice (the "Assessment Notice") containing FRA's final calculations of the total user fee to be collected, the assessment rate per train mile, the assessment rate per employee hour, the assessment rate per road mile (as adjusted by the sliding scale), the train miles, employee hours, and road miles for the railroad for the prior calendar year, the user fee to be paid by the railroad, and a statement and payment record form. FRA will mail the Assessment Notice sufficiently in advance of the end of the fiscal year in order to allow all collections to be completed prior to the end of the fiscal year. FRA will mail the Assessment Notice to the billing address designated by the railroad on FRA Form 6180.91—Annual Report of Railroads Subject to User Fees.

§ 245.303

§ 245.303 Duty to pay.

(a) Beginning in the fiscal year ending September 30, 1991, each railroad subject to this part shall pay an annual railroad user fee to the FRA. Payment in full shall be received by FRA no later than thirty days after the Assessment Notice is mailed. Payment is made only when received by FRA. Payments in excess of ten thousand dollars (\$10,000.00) shall be made by wire transfer through the Federal Reserve communications, commonly known as Fedwire, to the account of the U.S. Treasury in accordance with the instructions provided in the Assessment Notice. Payments of ten thousand dollars or less shall be by check or money order payable to the Federal Railroad Administration. The payment shall be identified as the railroad's user fee by noting it with the User Fee Bill Number as assigned by FRA and by returning the payment record received with the Assessment Notice. Payment shall be sent to the address stated in the assessment notice. Any railroad making an aggregate payment for one or more subsidiaries or affiliates should return the payment records for each and list all applicable Bill Numbers with the payment.

(b) The responsibility for paying the user fee rests with the responsible entity (see § 245.5(h)). Parties involved in purchase and sale transactions of railroad(s) or portions of a railroad shall be responsible for allocating the user fee amongst the interested entities in an appropriate fashion. FRA will not prorate user fee bills.

(c) No user fee will be collected from railroads that properly report zero train miles and zero road miles on FRA Form 6180.91—Annual Report of Railroads Subject to User Fees.

(d) Payments not received by the due date will be subject to allowable interest charges, penalties, and administrative charges (31 U.S.C. 3717). Follow-up demands for payment and other actions intended to assure timely collection, including referral to local collection agencies or court action, will be conducted in accordance with Federal Claims Collection Standards (4 CFR chapter II) and Departmental procedures (49 CFR 89).

49 CFR Ch. II (10–1–04 Edition)

PART 250—GUARANTEE OF CERTIFICATES OF TRUSTEES OF RAILROADS IN REORGANIZATION

Sec.

- 250.1 Form and content of application.
- 250.2 Required exhibits.
- 250.3 Fees.
- 250.4 Execution and filing of application.
- 250.5 General instructions.

AUTHORITY: Sec. 3(f) of the Emergency Rail Services Act of 1970, Pub. L. 91–663; sec. 1.49(m), regulations of the Office of the Secretary of Transportation, 49 CFR 1.49(m).

SOURCE: 36 FR 770, Jan. 16, 1971, unless otherwise noted.

§ 250.1 Form and content of application.

The application shall include, in the order indicated and by section numbers and letters corresponding to those used in this part, the following:

(a) *As to the Trustee:*

(1) Full and correct name and principal business address.

(2) The name and address of the reorganization court under the direction of which the Trustee is acting and the docket number of the proceeding.

(3) Name, title, and address of the person to whom correspondence regarding the application should be addressed.

(4) Brief description of the loan and its purpose or purposes, including statements of

(i) The total amount of the loan and the amount of the guarantee being sought,

(ii) The purpose or purposes for which the loan proceeds will be used,

(iii) The maturity date or dates,

(iv) The date or dates on which the Trustee desires the funds to be made available, and

(v) The rate of interest.

(5) Statement, in summary form, showing financial obligations to or claims against the United States or obligations for which the United States is guarantor, if any, by applicant or any applicant's parent as to the date of the application, including:

(i) Status of any claims under litigation; and

(ii) Any other debts or credits existing between the applicant and the United States, showing the department

Federal Railroad Administration, DOT

§ 250.1

or agency involved in such loans, claims and other debts;

(6)(i) Statement on behalf of the Trustee that the Trustee has endeavored to obtain a loan or loans for the purpose or purposes proposed without a guarantee by the Secretary, but has not been able to obtain a loan therefor upon reasonable terms, or if only upon terms considered unreasonable, a statement setting forth such terms and describing any facts relevant thereto.

(ii) Information as to the Trustee's efforts to obtain the needed financing without a guarantee thereof by the Secretary, and as to the results of such efforts. (See §250.2(b)(1) as to exhibits on this subject.)

(7) Full and complete statement, together with independent supporting evidence, where feasible, concerning the effect that cessation of essential transportation services of carrier would have on the public welfare.

(8) Full and complete statement, together with supporting evidence, where possible, demonstrating that cessation of essential transportation services by applicant carrier is imminent.

(9) Full and complete statement, together with supporting evidence, if possible, that there is no other practicable means of obtaining funds to meet payroll and other expenses necessary to provide essential transportation services other than the issuance of Trustee certificates. Such statements shall include in detail a complete listing of all nontransportation assets of the carrier and corporate affiliates, or subsidiaries having a fair market value of not less than \$50,000, together with the amount of encumbrances thereon, if any, and a statement or plan for the disposition or sale of such assets as a means of obtaining funds necessary for essential transportation services.

(10) Full and complete statement, together with supporting evidence, if possible, demonstrating, with particularity, that the carrier can reasonably be expected to become self sustaining within a reasonable period of time.

(11) Full and complete statement, together with supporting evidence, that the probable value of the assets of the carrier in the event of liquidation provides reasonable protection to the United States.

(b) *As to the holder or holders:*

(1) Full and correct name and principal business address.

(2) Names and addresses of principal executive officers and directors, or partners.

(3) Reference to applicable provisions of law and the charter or other governing instruments conferring authority to the lender to make the loan and to accept the proposed obligation.

(4) Brief statement of the circumstances and negotiations leading to the agreement by the lender to make the proposed loan, including the name and address of any person or persons, or employees of the carrier, representing or purporting to represent the Trustee in connection with such negotiations.

(5) Brief statement of the nature and extent of any affiliation or business relationship between the lender and any of its directors, partners, or principal executive officers, on the one hand, and, on the other, the carrier and any of its directors, partners, or principal executive officers, or any person or persons whose names are required to be furnished under paragraph (b)(4) of this section.

(6) Full and complete statement of all sums paid or to be paid and of any other consideration given or to be given by lender in connection with the proposed loan, including with respect thereto:

(i) Name and address of each person to whom the payment is made or to be made,

(ii) The amount of the cash payment, or the nature and value of other consideration,

(iii) The exact nature of the services rendered or to be rendered,

(iv) Any condition upon the obligation of the lender to make such payment, and

(v) The nature of any affiliation, association, or prior business relationship between any person named in answer to paragraph (6)(i) of this section and the lender or any of its directors, partners, or officers.

(c) *As to the impact of the financing on the environment.* (1) Summary statement of the use to which funds will be put and any anticipated impact on the

§ 250.2

49 CFR Ch. II (10–1–04 Edition)

environment. After reviewing this submission, the Administrator retains the right to require the Trustee to submit a detailed assessment of the financing's impact on the environment in a general format to be supplied by the Administrator.

(2) [Reserved]

[44 FR 23851, Apr. 23, 1979]

§ 250.2 Required exhibits.

There shall be filed with and made a part of each application and copy thereof the following exhibits, except that exhibits filed with the Administrator pursuant to some other statutory provision or regulation which are in the same format as the following exhibits may be incorporated in and made part of the application filed under this part by reference. While the application is pending, when actual data become available in place of the estimated or forecasted data required in the exhibits under this part, such actual data must be reported promptly to the Administrator in the form required in the appropriate exhibit.

(a) The following exhibits are required concerning the Trustee and the carrier:

(1) As Exhibit 1, copy of duly certified order of the court, or instrument of appointment, appointing trustees of the carrier.

(2) As Exhibit 2, a certified copy of the order(s) of the reorganization court having jurisdiction of applicant authorizing (i) the filing of the application with the Administrator for a guarantee of the Trustee's certificate; (ii) filing of the application with the Interstate Commerce Commission for authority to issue a Trustee's certificate; (iii) such pledge of security for the loan and the guarantee as the applicant proposes in connection with Exhibit 3; and (iv) compliance by the Trustee with conditions to the guarantee imposed by law and the Administrator.

(3) As Exhibit 3, full and complete statement, together with supporting evidence, that the probable value of the assets of the railroad in the event of liquidation provides reasonable protection to the United States.

(4) As Exhibit 4, a map of the carrier's existing railroad.

(5) As Exhibit 5, statement showing miles of line owned; miles operated; number of units of locomotives, freight cars, and passenger cars owned and leased; principal commodities carried; and identification of the ten most important industries served.

(6) As Exhibit 6, statement as to whether any railroad affiliated with the carrier has applied for or received any Federal assistance since 1970.

(7) As Exhibit 7, statement showing total dividends, if any, declared and total dividends paid for each of the last 5 calendar years and for each month of the current year to latest available date.

(8) As Exhibit 8, a copy of applicant's most recent year-end general balance sheet certified by applicant's independent public accountants, if available, and a copy of applicant's most recent unaudited general balance sheet as of a date no less recent than the end of the third month preceding the date of the filing of the application. The unaudited balance sheet shall be presented in account form and detail as required in Schedule 200 of the Commission's annual report R-1 or R-2, as appropriate, together with the following schedules (where changes in accounts from the end of the prior year to date of the application have not been significant, copies of the appropriate schedules in the prior year's R-1 or R-2 with marginal notations listing the changes may be substituted):

(i) Particulars of Account 704, Loans and Notes Receivable, in form and detail as required in Schedule 201 of annual report R-1 for the Class I railroads, and in similar form for the Class II railroads except that for Class II railroads, loans and notes receivable that are each less than \$25,000 may be combined into a single amount;

(ii) Particulars of investment in affiliated companies and other investment in form and detail required in Schedules 205 and 206 of annual report R-1, or Schedules 1001 and 1002 of annual report R-2, as appropriate;

(iii) Particulars of balances in Accounts 741, Other Assets, and 743, Other Deferred Charges, in form and detail required in Schedule 216 of annual report R-1 or Schedule 1703 of annual report R-2, as appropriate;

(iv) Particulars of loans and notes payable in form and detail required in Schedule 223 of annual report R-1, or Schedule 1701 of annual report R-2, as appropriate, as well as information as to bank loans, including the name of the bank, date and amount of the original loan, current balance, maturities, rate of interest, and security, if any;

(v) Particulars of long-term debt in form and detail required in Schedules 218 and 219 of annual report R-1 or Schedules 670, 695, 901, 902 and 1702 of annual report R-2, as appropriate, together with a brief statement concerning each mortgage, pledge, and other lien, indicating the property or securities encumbered, the mortgage limit per mile, if any, and particulars as to priority;

(vi) Particulars of balance in Account 784. Other Deferred Credits, in form and detail required in Schedule 225 of annual report R-1 or Schedule 1704 of annual report R-2, as appropriate; and

(vii) Particulars as to capital stock in form and detail required in Schedules 228, 229, and 230 of annual report R-1 or Schedule 690 in annual report R-2, as appropriate.

(9) As Exhibit 9, a copy of carrier applicant's report to its stockholders or report of the trustee for each of the 3 years preceding the year in which the application is filed.

(10) As Exhibit 10, applicant's most recent annual income statement certified by applicant's independent public accounts if available, and a spread sheet showing unaudited monthly and year-to-date income statement data for the calendar year in which the application is filed in account form similar to that required in column (a) of Schedule 300 of annual report R-1 or R-2 as appropriate. For those months preceding and ending upon the date of the unaudited balance sheet presented in Exhibit 8, the income statement shall be reported on an actual basis and so noted. For those months between the dates of the unaudited balance sheet and the filing of the application, the income statement data shall be reported on an estimated basis and so noted and shall be submitted in conjunction with corresponding estimated month-end balance sheets. For those months between the date of the appli-

cation and the end of the year income statement data shall be presented on a forecasted basis and so noted and shall be submitted in conjunction with a forecasted balance sheet as at the year end.

(11) As Exhibit 11, spread sheets showing for each of the four years subsequent to the year in which the application is filed, both before and after giving effect to the proceeds of the assistance required in the application:

(i) Forecasted annual income statement data in account form and detail similar to that required in column (a) of Schedule 300 of annual report R-1 or R-2 as appropriate, including the sub-accounts comprising line 2 (railway operating expenses), as specified by lines 64, 92, 105, 159, 166, and 180 of Schedule 320; and

(ii) Forecasted year-end balance sheets in account form and detail similar to that required in Schedule 200 of annual report R-1 or R-2, as appropriate. These spread sheets shall be accompanied by a statement setting forth the bases for such forecasts.

(12) As Exhibit 12, a spread sheet showing changes in financial position for the year in which the application is filed in account form and detail as required in Schedule 309 of annual report R-1 and R-2 as appropriate as follows:

(i) For that period ending on the date of the unaudited balance sheet in Exhibit C, based upon actual data; and

(ii) For that period from the balance sheet date to the end of the year, based upon estimated and forecasted data.

(13) As Exhibit 13, a spread sheet showing forecasted changes in financial position for each of the four calendar years subsequent to the year in which the application is filed, both before and after giving effect to any funds requested in the application and including a statement showing the bases for such estimates, in account form and detail as required in Schedule 309 of the annual Report R-1 for Class I railroads in similar form and detail for Class II railroads.

(14) As Exhibit 14, a statement showing actual cash balance at the beginning of each month and the actual cash receipts and disbursements during each month of the current year to the date of the latest balance sheet furnished as

§ 250.3

Exhibit 8, together with a monthly forecast (both before and after giving effect to use of proceeds from the proposed loan) for the balance of the current year and the year subsequent thereto.

(15) As Exhibit 15, a general statement setting forth the facts as to estimated prospective earnings and other funds upon which applicant relies to repay the loan.

(b) The following exhibits are required as to the transaction.

(1) As Exhibit 16, copies of correspondence from all, and not less than three, lending institutions or security underwriters to which application for the financing has been made, evidencing that they have declined the financing unless guaranteed by the Secretary or specifying the terms upon which they will undertake the financing without such guarantee.

(2) As Exhibit 17, specimens, or forms where specimens are not available, of all securities to be pledged or otherwise issued in connection with the proposed loan; and in case of mortgage, a copy of the mortgage or indenture.

(3) As Exhibit 18, copies of the loan agreement entered into, or to be entered into, between the Trustee and lender, and of any agreements or instruments executed or to be executed in connection with the proposed loan.

[44 FR 23852, Apr. 23, 1979]

§ 250.3 Fees.

On date of final payment of the loan guaranteed by the Secretary pursuant to application filed under this part, the applicant carrier or the trustee, if still in existence, shall pay, or cause to be paid, to the Administrator as a guarantee fee such amount as the Administrator hereafter may determine and prescribe as necessary to cover the administrative costs of carrying out the provisions of the Emergency Rail Services Act of 1970.

§ 250.4 Execution and filing of application.

The following procedure shall govern the execution and filing of the application:

(a) The original application shall bear the date of execution and be signed with ink by or on behalf of the

49 CFR Ch. II (10-1-04 Edition)

trustee and the lender. Execution on behalf of the trustee shall be by the trustee or trustees having knowledge of the matters therein set forth. Persons signing the application on behalf of the trustee and lender, respectively, shall also sign a certificate in form as follows:

(Name of official) _____ certifies that he is the _____ (title of official) of the _____ (name of carrier or lender); that he is authorized on the part of said applicant to sign and file with the Administrator this application and exhibits attached thereto; that he has carefully examined all of the statements contained in such application and the exhibits attached thereto and made a part thereof relating to the aforesaid _____ (name of carrier or lender); that he has knowledge of the matters set forth therein and that all such statements made and matters set forth therein are true and correct to the best of his knowledge, information, and belief.

(Date)

(b) There shall be made a part of the original application the following certificate by the Chief Accounting Officer of the carrier:

(Name of officer) _____, certifies that he is _____ (title of officer) of _____ (name of carrier applicant); that he has supervision over the books of account and other financial records of the carrier and has control over the manner in which they are kept; that such accounts are maintained in good faith in accordance with the effective accounting and other orders of the Interstate Commerce Commission; that he has examined the financial statements and supporting schedules included in this application and to the best of his knowledge and belief said statements accurately reflect the accounts as stated in the books of account; and that, other than the matters set forth in the exceptions attached to such statements, said financial statements and supporting schedules represent a true and complete statement of the financial position of the carrier applicant and that there are no undisclosed assets, liabilities, commitments to purchase property or securities, other commitments, litigation in the courts, contingent rental agreements, or other contingent transactions which might materially affect the financial position of the carrier applicant.

(Date)

(c) The original application and supporting papers, and six copies thereof for the use of the Administrator shall

be filed with the Administrator, Federal Railroad Administration, Department of Transportation, Washington, DC. Simultaneously, one copy of the application and supporting papers shall be filed with the Secretary of the Interstate Commerce Commission, Washington, DC. Each copy shall bear the dates and signatures that appear in the original and shall be complete in itself, but the signatures in the copies may be stamped or typed. If unusual difficulties arise in the furnishing of any of the exhibits required in §250.2, the carrier applicant or the lender, upon appropriate showing and with the consent of the Administrator, may file a lesser number.

(d) In the event the furnishing of exhibits in the detail required by §250.2 is shown by the applicant or applicants to be unduly burdensome in relation to the nature and amount of the loan, the Administrator may modify the requirements of said section. In addition, the Administrator may waive or modify any requirement of this part upon good cause shown, or make any additional requirements he deems necessary.

§250.5 General instructions.

(a) If the application is approved by the Administrator and the Secretary of Transportation and the latter agrees to make the guarantee, the following documents will be required for deposit with the Administrator before the transaction is closed:

(1) Final opinion by counsel for the Trustee to the effect that he is familiar with the corporate powers of the carrier applicant and the orders of the reorganization court; that the Trustees of the carrier applicant are authorized to execute and deliver the certificate or other obligations evidencing the same, and to pledge and hypothecate any securities pledged as collateral; that the certificate or other obligations so executed and so delivered constitute the valid and binding obligations of the Trustees of the carrier that the certificate or other obligations of the Trustee will be treated as an expense of administration and receive the highest lien on the railroads property and priority in payment under the Bankruptcy Act, and that the lender and the Secretary will obtain a lien on

any security involved of the rank and priority represented by the Trustee. Such opinion shall also cover the priority and lien of each item of the collateral offered.

(2) Certified copies of the reorganization court orders and decrees authorizing the Trustee to execute and deliver the certificates or other obligations and to give the security under and according to the terms of the loan and guarantee as prescribed by the Administrator. Such order or orders of the reorganization court shall specify that trustee certificates, guaranteed by the Secretary as to payment of principal and interest, shall be treated as an expense of administration and receive the highest lien on the railroad's property and priority in payment under the Bankruptcy Act.

(3) Unexecuted copies of the foregoing documents will be delivered to the Administrator 3 business days prior to closing.

(b) The guarantee by the Secretary of a loan pursuant to an application filed as provided in this part should not be construed as relieving a carrier from complying with applicable provisions of section 20a of the Interstate Commerce Act (49 U.S.C. 20a) in relation to the issuance of Trustee certificates.

APPENDIX A TO PART 256—CERTIFICATE

AUTHORITY: Sec. 4(i) of the Department of Transportation Act, 49 U.S.C. 1653(i), as amended by (1) sec. 15 of the Amtrak Improvement Act of 1974, Pub. L. 93-496, 88 Stat. 1528; (2) sec. 13 of the Amtrak Improvement Act of 1975, Pub. L. 94-25, 89 Stat. 93; (3) sec. 706 of the Railroad Revitalization and Regulatory Reform Act of 1976, Pub. L. 94-210, 90 Stat. 125; and (4) sec. 219(a) of the Rail Transportation Improvement Act, Pub. L.

§ 256.1

94-555, 90 Stat. 2629; and regulations of the Office of the Secretary of Transportation, 49 CFR 1.49(r).

REGULATIONS GOVERNING APPLICATIONS FOR AND DISBURSEMENT OF FINANCIAL ASSISTANCE

§ 256.1 Purpose.

The purpose of this part is to establish procedures for implementing subsection 4(i) of the Department of Transportation Act as amended (49 U.S.C. 1653(i)) with respect to all financial assistance provided under that subsection.

[40 FR 29080, July 10, 1975]

§ 256.3 Definitions.

As used in this part—

(a) *Act* means the Department of Transportation Act, as amended.

(b) *Administrator* means the Federal Railroad Administrator, or his delegate.

(c) *Allowable project costs* means those project costs for which Federal financial assistance may be expended under § 256.7.

(d) *Applicant* means a governmental entity, a non-profit public-purpose organization, or any responsible person having the legal, financial, and technical capacity to implement an intermodal passenger terminal project under this part. The applicant must have legal authority to receive and expend Federal funds.

(e) *Chairman* means the Chairman of the National Endowment for the Arts.

(f) *Civic and cultural activities* includes, but is not limited to, museums, libraries, musical and dramatic presentations, art exhibitions, adult education programs, public meetings of community groups, convention visitors and others, and other public activities supported in whole or in part under Federal law.

(g) *Council* means the Advisory Council on Historic Preservation.

(h) *Demonstration funds* means funds authorized for the purpose set forth in paragraph (1)(A) of subsection 4(i) of the Act.

(i) *Intermodal passenger terminal* means an existing railroad passenger terminal which has been or may be modified as necessary to accommodate

49 CFR Ch. II (10-1-04 Edition)

several modes of transportation, including intercity rail service and some or all of the following: Intercity bus, commuter rail, intra-city rail transit and bus transportation, airport limousine service and airline ticket offices, rent-a-car facilities, taxis, private parking, and other transportation services.

(j) *National Register* means the National Register of Historic Places maintained by the Secretary of the Interior.

(k) *Planning funds* means funds authorized for the purpose set forth in paragraph (1)(D) of subsection 4(i) of the Act.

(l) *Preservation funds* means funds authorized for the purpose set forth in paragraph (1)(B) of subsection 4(i) of the Act.

(m) *Project* means a locally sponsored, coordinated, and administered program, or any part thereof, to plan, finance, construct, maintain, or improve an intermodal passenger terminal, which may incorporate civic or cultural activities where feasible in an architecturally or historically distinctive railroad passenger terminal.

(n) *4R Act* means the Railroad Revitalization and Regulatory Reform Act of 1976, as amended, Public Law 94-210, 90 Stat. 125, 49 U.S.C. 1653.

(o) *Sufficient commitments* means commitments of a binding nature adequate to ensure the successful operation of a project. Such commitments may be conditional, requiring, for example, the participation of other entities in the project, or action by a date certain.

[40 FR 29080, July 10, 1975, as amended at 43 FR 21887, May 22, 1978; 44 FR 21647, Apr. 11, 1979]

§ 256.5 Eligibility.

(a) *General*. A project is eligible for financial assistance under subsection 4(i) of the Act if:

(1) The applicant provides satisfactory assurance that such fiscal control and fund accounting procedures will be adopted as may be necessary to assure proper disbursement of and accounting for Federal financial assistance granted to the applicant under the Act;

(2) The applicant complies with the regulations of the Administrator prescribed in this part, and with such

other terms and conditions as may be included in the grant of assistance; and

(3) The Council is given a reasonable opportunity to review and comment upon the project as it affects property listed or eligible for listing on the National Register.

(b) *Demonstration funds.* A project is eligible for financial assistance in accordance with subsection 4(i) of the Act if the Administrator determines that:

(1) The railroad passenger terminal can be converted to an intermodal passenger terminal;

(2) There exist sufficient commitments by Amtrak or other rail passenger carriers, and by intercity bus carriers, the local public transportation authority, or other public or private transportation operators, to provide co-ordinated service for convenient intermodal interchange to meet the goals enumerated in paragraph (b) of § 256.13;

(3) The railroad passenger terminal is listed on the National Register;

(4) The architectural integrity of the railroad passenger terminal will be preserved, and this determination is concurred in by the consultants recommended by the Chairman and Council and retained by the Administrator for this purpose;

(5) To the extent practicable, the use of station facilities for transportation purposes may be combined with use for other civic and cultural activities, especially when such use is recommended by the Council or the Chairman, or the consultants retained by the Administrator upon their recommendation;

(6) The applicant has provided the information and documentation required under § 256.11(c).

(7) The railroad passenger terminal and the conversion project meet such other criteria as the Administrator may develop and promulgate in consultation with the Chairman and the Council.

(c) *Preservation funds.* A project is eligible for financial assistance in accordance with subsection 4(i) of the Act if the Administrator determines that:

(1) The applicant is empowered by applicable law, and is qualified, prepared, and committed, on an interim basis pending the formulation of plans for reuse, to maintain and prevent the

demolition, dismantling, or further deterioration of, a railroad passenger terminal;

(2) The railroad passenger terminal is threatened with demolition, dismantling, or further deterioration;

(3) There is a reasonable likelihood that the railroad passenger terminal will be converted to or conditioned for reuse as an intermodal passenger terminal. The primary use of the terminal shall be for intermodal purposes, but facilities for the provision of civic and cultural activities may be incorporated to the extent feasible. Such dual use of the terminal is particularly encouraged when it is recommended by the Council or the Chairman.

(4) Planning activity aimed at conversion or reuse has commenced and is proceeding in a competent manner;

(5) The expenditure of funds on such project would be in the manner most likely to maximize the preservation of railroad passenger terminals which are:

(i) Reasonably capable of conversion to intermodal passenger terminals;

(ii) Listed in the National Register; or

(iii) Recommended on the basis of architectural integrity and quality by the Chairman or the Council; and

(6) The applicant has provided the information and documentation required by § 256.11(d).

(d) *Planning funds.* A project is eligible for financial assistance in accordance with subsection 4(i)(5) of the Act if the Administrator determines that:

(1) The applicant is prepared to develop practicable plans meeting the zoning, land use, and other requirements of the applicable State and local jurisdictions in which the rail passenger terminal is located;

(2) The applicant incorporates into its plans for the conversion of an historic terminal into an intermodal passenger terminal, features which appear reasonably likely to attract private investors willing to finance the planned conversion and/or its subsequent maintenance and operation. The primary use of the terminal shall be for intermodal purposes, but facilities for the provision of civic or cultural activities may be incorporated to the extent feasible.

§ 256.7

49 CFR Ch. II (10–1–04 Edition)

(3) The applicant will be able to complete the designs and plans for such conversion within two years following the approval of the application for Federal financial assistance;

(4) The expenditure of funds on such project would be in the manner most likely to maximize the preservation of railroad passenger terminals which are listed in the National Register or recommended on the basis of architectural integrity and quality by the Chairman or the Council; and

(5) The applicant has provided the information and documentation required under § 256.11(e).

[40 FR 29080, July 10, 1975, as amended at 43 FR 21887, May 22, 1978; 44 FR 21647, Apr. 11, 1979]

§ 256.7 Financial assistance.

(a) *Demonstration funds.* Federal financial assistance for the conversion of a railroad passenger terminal into an intermodal passenger terminal, under subsection 4(i)(2) of the Act, may be expended for the following project costs incurred after the date of final project approval:

(1) Acquisition or long-term lease of real property or other property interests, including air rights, subterranean rights, or easements, where necessary for project implementation;

(2) Final architectural and engineering construction documentation, including all necessary plans, specifications, detailed cost estimates, and implementation schedules; and

(3) Construction, which may include, but is not limited to:

(i) Complete rehabilitation and refurbishment of the interior and exterior of the structure;

(ii) Provision of necessary public service facilities;

(iii) Structural modifications and minor additions necessary to permit the development of (A) improved rail passenger facilities, (B) intercity bus terminal and docking facilities, (C) adequate facilities for local mass transit, and (D) parking and access for automobiles and bicycles; and

(iv) Provisions for accommodating major tenants and concessionaires such as airline ticket offices, rent-a-car offices, and other transportation service facilities.

(b) *Preservation funds.* Federal financial assistance under subsection 4(i)(3) of the Act, for the preservation of a railroad passenger terminal which has a reasonable likelihood of being converted or otherwise maintained, may be expended for costs incurred after the date of project approval which are necessary to maintain (and prevent the demolition, dismantling, or further deterioration of) a railroad passenger terminal pending the completion of project planning, for a period not to exceed five years.

(c) *Planning funds.* Federal financial assistance granted under subsection 4(i)(5) of the Act for the development of plans for the conversion of a railroad passenger terminal into an intermodal passenger terminal, which may incorporate civic and cultural activities where feasible, may be expended for the following project costs if incurred within two years after project approval:

(1) Cost of a study or studies to:

(i) Assess the need for and the feasibility of converting an existing railroad passenger terminal into an intermodal passenger terminal which may incorporate civic and cultural activities where feasible;

(ii) Develop a fiscal plan and agreements for the plan's implementation; and

(iii)(A) Relate the project to other transportation priorities in the area; and

(B) Evaluate alternate means of providing needed intermodal passenger services within the community.

(2) Costs of preparation of preliminary architectural and engineering design documents for the project, including:

(i) Plans, sections, and sketches illustrating the functional as well as preservation aspects of the recommended development;

(ii) Assessment of the condition of existing structural and utilities systems and requirements for their improvement;

(iii) Outline specifications and preliminary estimates of project costs; and

(iv) Required environmental impact reviews and analyses.

(d) *Federal share.* The Federal share of any project under this part shall not exceed 80 percent of the total allowable project costs. The non-Federal share may not be augmented by any Federal funds, directly or indirectly, unless the funds are provided through a Federal program which specifically authorizes the augmentation of a non-Federal share of a federally-assisted program with such funds.

[40 FR 29080, July 10, 1975, as amended at 43 FR 21887, May 22, 1978; 44 FR 21647, Apr. 11, 1979]

§ 256.9 [Reserved]

§ 256.11 Applications.

(a) *Incorporation by reference in application of previously submitted information or material.* Any information or material of any kind which has been submitted by an applicant need not be re-submitted if the prior submission is identified and incorporated by reference in the application. Where the prior submission is in need of any changes of any kind, the changes may be submitted provided the prior submission is identified and incorporated by reference with the changes. Any assurance, certification, or affirmation previously made by the applicant, in connection with a prior submission, must be reaffirmed by the applicant when any identification and incorporation by reference of previously submitted materials is made.

(b) *Pre-applications for demonstration funds.* In accordance with appendix M of Office of Management and Budget Circular A-102, applicants shall use the pre-application form directed for use for construction, land acquisition, and land development projects when applying for demonstration funds under this program. Applicants shall include under Part IV (Program Narrative) of the pre-application form:

(1) A statement of whether the railroad passenger terminal is listed in the National Register;

(2) A statement as to the interest and anticipated cooperation of the terminal owner and the relevant transportation companies;

(3) Where the applicant contemplates using funds it has received or will receive from other Federal programs for

the planning or preservation stage of the projects, a brief description of the sources, and total anticipated amount of such funds; and

(4) A breakdown of the total allowable project costs.

(c) *Applications for demonstration funds.* Upon notification of the approval of the pre-application, applicants shall submit a final application for demonstration funds using the Federal Assistance Application for Construction Programs in accordance with appendix M of Office of Management and Budget Circular A-102. Applicants shall include under Part IV (Program Narrative) of the form:

(1) A list of all organizations which will participate in the planning, implementation, or operation of each project, along with a discussion of the role of each organization;

(2) A full discussion of the desirability and feasibility of the project and a summary of the benefits to be derived;

(3) A summary of each proposed use of the intermodal passenger terminal for a civic or cultural activity;

(4) A description and documentation of existing or potential markets for interline intermodal service making use of the project facility, and of any changes in existing services which must be provided to achieve this potential;

(5) The proposed period during which the project will be evaluated to determine whether it has achieved the goals set forth in § 256.13(b);

(6) A detailed description of the rail passenger terminal (including where applicable the description on file with the National Register), the available transportation facilities, and the proposed intermodal passenger transportation improvements;

(7) Evidence that the architectural integrity of the railroad passenger terminal will be preserved;

(8) A detailed estimate of the total allowable project costs, listing and identifying each cost to the maximum possible extent;

(9) Evidence of the applicant's ability and intent to furnish its share of the total allowable costs;

(10) Evidence that the applicant has established, in accordance with Attachment G of Office of Management and Budget Circular A–102, adequate procedures for financial control, accounting, and performance evaluation, in order to assure proper use of the Federal funds;

(11) An assurance by the applicant that it will use Federal funds provided under the Act solely for the purpose for which assistance is sought and in conformance with the limitations on the expenditures allowed under the Act and applicable regulations;

(12) A description of the proposed methods of monitoring and evaluating the demonstration;

(13) Copies of the following: Preliminary architectural and engineering design documents, plans, sections, sketches, and outline specifications;

(14) A proposed draft of an environmental impact statement, including documentation that the project includes all possible planning to minimize harm to the historic nature of the facility as required by section 4(f) of the Act (49 U.S.C. 1653(f)), to be reviewed, analyzed and used by the Administrator in preparation of a final Environmental Impact Statement under Department of Transportation Order 5610.1B (39 FR 35234, September 30, 1974);

(15) Two copies of an affirmative action program prepared in accordance with section 905 of the 4R Act (45 U.S.C. 803) and 49 CFR part 265;

(16) Assurances that the applicant will comply with the following Federal laws, policies, regulations and pertinent directives:

(i) Title VI of the Civil Rights Act of 1964 42 U.S.C. 2000d *et seq.*, and 49 CFR part 21;

(ii) Section 905 of the 4R Act (45 U.S.C. 803), and 49 CFR part 265;

(iii) Executive Order 11246, as amended (30 FR 12319, 32 FR 14303) and 41 CFR 60–4, as amended (43 FR 14888, Apr. 7, 1978) which require equal employment opportunity in federally-assisted construction programs.

(iv) Titles II and III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, 42 U.S.C. 4601 *et seq.*, and 49 CFR part 25;

(v) 42 U.S.C. 4151 *et seq.*, with regard to Federal policies ensuring that physically handicapped persons will have ready access to, and use of, public buildings;

(vi) The Rehabilitation Act of 1973, 29 U.S.C. 794, with regard to non-discrimination under Federal grants;

(vii) The Hatch Act, 5 U.S.C. 1501 *et seq.*, which limits the political activities of employees; and

(viii) Where applicable, the State and Local Fiscal Assistance Act of 1972, 31 U.S.C. 1221 *et seq.*, and 31 CFR part 51.

(17) Evidence of all legal commitments including, but not limited to, operating agreements and right-of-way leases which have been obtained from private carriers, public transportation operating agencies, and other entities as appropriate, to assure continued operation of the transportation services during the evaluation period;

(18) Evidence (including, but not limited to, copies of leases, deeds, easements, certificates of title, and mortgage agreements) that the applicant's property interest in the railroad passenger terminal is or will be, at the commencement of the project, sufficient for the applicant to implement the project;

(19) A summary of each proposed agreement permitting the use of any portion of the intermodal passenger terminal for commercial purposes other than the provision of transportation services (if a standard form contract is to be used, applicant may submit a copy of the standard contract, a list of parties with whom it has contracted, and a list of any terms not common to the standard contract);

(20) An opinion of the applicant's legal counsel advising that (i) counsel is familiar with (A) the applicant's corporate or other organization powers; (B) section 4(i) of the Act, as amended (49 U.S.C. 1653(i)); (C) the other Acts referred to in these regulations; and (D) any regulations issued to implement those Acts; (ii) the applicant is authorized to make the application including all certifications, assurances, and affirmations required; (iii) the applicant has the requisite authority to carry out the actions proposed in the application and to fulfill the obligations created thereby, including the obligation

to pay a share of the costs of the proposed project; (iv) the applicant has the authority to enter into all of the legal commitments referred to in paragraph (c)(16) of this section and that these commitments are legal and binding by their terms; and (v) the applicant's property interest in the railroad passenger terminal is sufficient for the applicant to implement the project;

(21) For projects located in urbanized areas, as defined by the Bureau of the Census, a statement that the application has been coordinated with the metropolitan planning organization, designated by the Governor of the State in which the project is located pursuant to 23 U.S.C. 104(f)(3);

(22) A certification by the applicant that, in accordance with Office of Management and Budget Circular A-95 (41 FR 2052, Jan. 13, 1976), section 204 of the Demonstration Cities and Metropolitan Development Act of 1966 (42 U.S.C. 3334), and section 401 of the Intergovernmental Cooperation Act of 1968 (42 U.S.C. 4231), notification of the project has been submitted to, and comments thereon have been solicited from, the appropriate State and regional agencies and clearinghouses; and

(23) Any other information that the Administrator may require.

(d) *Applications for preservation funds.* Each application for preservation assistance shall include:

(1) The complete name and principal business address of the applicant;

(2) The complete name, title, and address of the person to whom correspondence regarding the application should be addressed;

(3) A list of all organizations which will participate in the planning, implementation, or operation of each project, and a discussion of each organization's role;

(4) A full discussion of the desirability and feasibility of the project and a summary of the benefits to be derived;

(5) A detailed description of the rail passenger terminal (including where applicable the description on file with the National Register), the available transportation facilities, and the proposed intermodal passenger transportation improvements;

(6) Documentation of the threat to the existing terminal, involving demolition, dismantling, or further deterioration of the terminal and the causes thereof;

(7) Evidence that the planning for conversion or reuse of the terminal has commenced and that it is proceeding in a timely manner, including a copy of the projected planning schedule;

(8) A proposed draft of an environmental impact statement or a negative declaration, including documentation that the project includes all possible planning to minimize harm to the historic nature of the facility as required by section 4(f) of the Act, 49 U.S.C. 1653(f), to be reviewed, analyzed, and used by the Administrator in preparation of a final Environmental Impact Statement or Negative Declaration as required by Department of Transportation Order 5610.1B (39 FR 35234, Sept. 30, 1974);

(9) A detailed estimate of the total allowable project costs, listing and identifying all anticipated preservation costs to the maximum extent possible;

(10) The total amount of Federal assistance requested;

(11) Evidence of the applicant's ability and intent to furnish its share of the total allowable project costs;

(12) Where the applicant contemplates using funds which it has received or will receive from other Federal programs for the planning or demonstration stage of the project, a brief description of the sources, use and total anticipated amount of such funds;

(13) Evidence that the applicant has established in accordance with Attachment G of Office of Management and Budget Circular A-102, adequate procedures for financial control, accounting, and performance evaluation in order to assure proper use of the Federal funds;

(14) An assurance by the applicant that it will use Federal funds provided under the Act solely for the purpose for which assistance is sought and in conformance with the limitations on the expenditures allowed under the Act and applicable regulations;

(15) Evidence of substantial local public and/or private interest in organizing a project to convert the existing railroad passenger terminal to an intermodal passenger terminal, which

§ 256.11

49 CFR Ch. II (10–1–04 Edition)

may include use for civic or cultural activities;

(16) An opinion of the applicant's legal counsel stating that:

(i) Counsel is familiar with (A) the applicant's corporate or other organizational powers; (B) section 4(i) of the Act, as amended (49 U.S.C. 1653(i)), (C) the other Acts referred to in these regulations; (D) and any regulation issued to implement those Acts;

(ii) The applicant is authorized to make this application including all certifications, assurances, and affirmations required;

(iii) The applicant has the requisite authority to carry out the actions proposed in its application and to fulfill the obligations created thereby, including the obligation to pay a share of the cost of the proposed project, and

(iv) The applicant is empowered, for an interim period pending the formulation of plans for the conversion of the existing railroad passenger terminal, to maintain the terminal building and prevent its demolition, dismantling, or further deterioration;

(17) For projects located in urbanized areas, as defined by the Bureau of the Census, a statement that the application has been coordinated with the metropolitan planning organization, designated by the Governor of the State in which the project is located, pursuant to 23 U.S.C. 104(f)(3);

(18) A certification by the applicant that, in accordance with Office of Management and Budget Circular A-95 (41 FR 2052, Jan. 13, 1976), section 204 of the Demonstration Cities and Metropolitan Development Act of 1966 (42 U.S.C. 3334), and section 401 of the Intergovernmental Cooperation Act of 1968 (42 U.S.C. 4231), notification of the project has been submitted to, and comments thereon have been solicited from, the appropriate State and regional agencies and clearinghouses;

(19) Two copies of an affirmative action program prepared in accordance with section 905 of the 4R Act (45 U.S.C. 803) and 49 CFR part 265;

(20) Assurances that the applicant will comply with the following Federal laws, policies, regulations and pertinent directives:

(i) Title VI of the Civil Rights Act of 1964, 42 U.S.C. 2000d *et seq.*, and 49 CFR part 21;

(ii) Section 905 of the 4R Act (45 U.S.C. 803) and 49 CFR part 265;

(iii) Executive Order 11246, as amended (30 FR 12319, 32 FR 14303) and 41 CFR 60-4, as amended (43 FR 14888, Apr. 7, 1978), which requires equal employment opportunity in federally-assisted construction programs.

(iv) Titles II and III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, 42 U.S.C. 4601 *et seq.*, and 49 CFR part 25;

(v) 42 U.S.C. 4151 *et seq.*, with regard to Federal policies ensuring that physically handicapped persons will have ready access to, and use of, public buildings;

(vi) The Rehabilitation Act of 1973, 29 U.S.C. 794, with regard to non-discrimination under Federal grants;

(vii) The Hatch Act, 5 U.S.C. 1501 *et seq.*, which limits the political activities of employees; and

(viii) Where applicable, the State and Local Fiscal Assistance Act of 1972, 31 U.S.C. 1221 *et seq.*, and 31 CFR part 51; and

(21) Any other information that the Administrator may require.

(e) *Applications for planning funds.* Each application for planning assistance shall include:

(1) The complete name and principal business address of the applicant;

(2) The name, title, and address of the person to whom correspondence regarding the application should be addressed;

(3) A list of all organizations which will participate in the planning, implementation, or operation of each project, and a discussion of each organization's role;

(4) A preliminary statement of work, and a detailed estimate of all planning costs broken down by project task;

(5) A proposed schedule for the planning process;

(6) A full discussion of the desirability and feasibility of the project and a summary of the benefits to be derived;

(7) A detailed description of the rail passenger terminal (including, where applicable, the description on file with the National Register), the available

Federal Railroad Administration, DOT

§ 256.11

transportation facilities, and the proposed intermodal passenger transportation improvements;

(8) The total amount of Federal assistance requested;

(9) Evidence of the applicant's ability and intent to furnish its share of the total allowable project costs;

(10) Where the applicant contemplates using funds which it has received or will receive from other Federal programs for the preservation or demonstration stages of the project, a brief description of the sources, use, and anticipated amount of such funds;

(11) Evidence that the applicant has established, in accordance with Attachment G of Office of Management and Budget Circular A-102, adequate procedures for financial control, accounting, and performance evaluation, in order to assure proper use of the Federal funds;

(12) An assurance by the applicant that it will use Federal funds provided under the Act solely for the purpose for which assistance is sought and in conformance with the limitations on the expenditures allowed under the Act and applicable regulations;

(13) An opinion of the applicant's legal counsel stating that:

(i) Counsel is familiar with (A) the applicant's corporate or other organizational powers; (B) section 4(i) of the Act, as amended, 49 U.S.C. 1653(i); (C) the other Acts referred to in these regulations; and (D) any regulations issued to implement those Acts;

(ii) The applicant is authorized to make this application including all certifications, assurances, and affirmations required; and

(iii) The applicant has the requisite authority to carry out the actions proposed in its applications and to fulfill the obligations created thereby, including the obligation to pay a share of the costs of the proposed project;

(14) A proposed schedule for the implementation of the applicant's completed designs and plans;

(15) For projects located in urbanized areas, as defined by the Bureau of the Census, a statement that the application has been coordinated with the metropolitan planning organization, designated by the Governor of the

State in which the project is located, pursuant to 23 U.S.C. 104(f)(3);

(16) A certification by the applicant that, in accordance with Office of Management and Budget Circular A-95 (41 FR 2052, Jan. 13, 1976), section 204 of the Demonstration Cities and Metropolitan Development Act of 1966 (42 U.S.C. 3334), and section 401 of the Intergovernmental Cooperation Act of 1968 (42 U.S.C. 4231), notification of the project has been submitted to, and comments thereon have been solicited from, the appropriate State and regional agencies and clearinghouses;

(17) Two copies of an affirmative action program prepared in accordance with section 905 of the 4R Act (45 U.S.C. 803) and 49 CFR part 265;

(18) Assurances that the applicant will comply with the following Federal laws, policies, regulations, and pertinent directives:

(i) Title VI of the Civil Rights Act of 1964, 42 U.S.C. 2000d *et seq.* and 49 CFR part 21;

(ii) Section 905 of the 4R Act (45 U.S.C. 803) and 49 CFR part 265;

(iii) Title II and title III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, 42 U.S.C. 4601 *et seq.* and 49 CFR part 25;

(iv) 42 U.S.C. 4151 *et seq.*, with regard to Federal policies ensuring that physically handicapped persons will have ready access to, and use of, public buildings;

(v) The Rehabilitation Act of 1973, 29 U.S.C. 794, with regard to non-discrimination under Federal grants;

(vi) The Hatch Act, 5 U.S.C. 1501, *et seq.*, which limits the political activities of employees; and

(vii) Where applicable, the State and Local Fiscal Assistance Act of 1972, 31 U.S.C. 1221 *et seq.*, and 31 CFR part 51;

(19) A statement that the applicant is prepared to develop practicable plans meeting the zoning, land use, and other requirements of the applicable State and local jurisdictions in which the rail passenger terminal is located.

(20) An assurance by the applicant that the designs and plans for the conversion to an intermodal passenger terminal, including any use for civic or cultural activities, will be completed

§ 256.13

49 CFR Ch. II (10–1–04 Edition)

within two years following the approval of the application for Federal financial assistance;

(21) A description of how the applicant can incorporate features which appear reasonably likely to attract private investors willing to share in the implementation of the planned conversion and its subsequent maintenance and operation;

(22) An environmental assessment using an interdisciplinary approach in identifying the type, degree, effect, and probability of occurrence of potential environmental impacts due to the conversion to an intermodal passenger terminal; and

(23) Any other information that the Administrator may require.

(f) *Execution and filing of applications.*

(1) The original application shall bear the date of execution and be signed by the Chief Executive Officer of the applicant or by the applicant, where the applicant is an individual. Each person required to execute an application shall execute a certificate in the form of appendix A hereto.

(2) The original application and two (2) copies shall be filed with the Federal Railroad Administrator, Department of Transportation, 400 7th Street SW., Washington, DC 20590. Each copy shall show the dates and signatures that appear in the original and shall be complete in itself.

(3) Pre-applications for demonstration funds must be submitted to the Administrator no later than August 21, 1978. Applications for planning, preservation and demonstration funds must be submitted to the Administrator no later than September 19, 1978. Applications received after these deadlines will not be considered for funding, unless all funds are not granted to applicants who have met the application deadline.

[43 FR 21887, May 22, 1978]

§ 256.13 Review and approval of applications.

(a) *Pre-applications.* Pre-applications for demonstration funds shall be reviewed by the Administrator in consultation with the Chairman and the Council.

(b) *Applications.* The Administrator shall review applications in consulta-

tion with the Chairman and the Council and select and monitor projects most likely to accomplish the following goals:

(1) Demonstrate the capabilities of intermodal terminals to provide a more effective means of passenger interchange between various modes of transportation;

(2) Demonstrate the advantages of joint use terminal facilities to carriers;

(3) Demonstrate a more comprehensive and effective network of energy efficient surface common carrier transportation services through improving coordinated interline intermodal exchange at selected intermodal passenger terminals distinguished by coordinated information systems, schedules, and through ticketing and baggage handling;

(4) Evaluate user response to such coordinated interline intermodal transportation services, and to joint carrier use of terminal facilities;

(5) Demonstrate the potential of underutilized railroad passenger terminals of historical and architectural distinction for improving intermodal passenger transportation services and for providing an appropriate focal point for civic and cultural activities;

(6) Stimulate local public and private investment, by transportation carriers and others, in improved intercity and local public transportation facilities and services;

(7) Encourage the preservation of railroad passenger terminals pending the formulation of plans for reuse; and

(8) Encourage the development of plans for the conversion of railroad passenger terminals into intermodal passenger terminals, which may incorporate civic and cultural activities where feasible.

(c) *Preferential consideration.* In reviewing applications for planning funds, the Administrator shall give preferential consideration to applicants whose completed designs and plans will be implemented and effectuated within three years after the date of completion.

(d) *Approval within 90 days.* The Administrator will approve or deny each application within 90 days of the submission dates set forth in § 256.11(f)(3) and the Administrator will promptly

Federal Railroad Administration, DOT

Pt. 260

notify in writing each applicant whose application has been approved.

[40 FR 29080, July 10, 1975, as amended at 43 FR 21890, May 22, 1978; 44 FR 21647, Apr. 11, 1979]

§ 256.15 Disbursement of financial assistance.

(a) *Grant agreement.* After receipt, review, and approval of an application, the Administrator will enter into a grant agreement with an applicant for the Federal share of the total allowable project costs. The terms and conditions of payment of the Federal share shall be set forth in the grant agreement.

(b) *Record retention.* Each recipient of financial assistance under this part shall keep such records as the Administrator shall prescribe, including records which fully disclose the amount and disposition by such recipient of the proceeds of such assistance, the total cost of the project or undertaking in connection with which such assistance was given or used, the amount of that portion of the cost of the project or undertaking supplied by other sources, and such other records as will facilitate an effective audit.

(c) *Audit and examination.* Until the expiration of three years after the completion of the project or undertaking referred to in paragraph (b) of this section, the Administrator and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination to any books, documents, papers, and records of such receipts which, in the opinion of the Administrator or the Comptroller General, may be related or pertinent to such financial assistance.

[40 FR 29080, July 10, 1975, as amended at 43 FR 21890, May 22, 1978]

APPENDIX A TO PART 256—CERTIFICATE

The following is the form of the certificate to be executed by each person signing a pre-application or application:

_____(Name of Person) certifies that he is the Chief Executive Officer of _____(Name of Agency or Organization); that he is authorized to sign and file with the Federal Railroad Administrator this (pre-application or application); that he has carefully examined all of the statements contained in the (pre-application or applica-

tion) relating to _____; that he has knowledge of the matters set forth therein and that all statements made and matters set forth therein are true and correct to the best of his knowledge, information and belief.

[43 FR 21890, May 22, 1978]

PART 260—REGULATIONS GOVERNING LOANS AND LOAN GUARANTEES UNDER THE RAILROAD REHABILITATION AND IMPROVEMENT FINANCING PROGRAM

Subpart A—Overview

- Sec.
- 260.1 Program authority.
- 260.3 Definitions.
- 260.5 Eligible purposes.
- 260.7 Priority consideration.
- 260.9 Loan terms.
- 260.11 Investigation charge.
- 260.13 Credit reform.
- 260.15 Credit risk premium.

Subpart B—FRA Policies and Procedures for Evaluating Applications for Financial Assistance

- 260.17 Credit risk premium analysis.
- 260.19 Preapplication meeting.

Subpart C—Applications for Financial Assistance

- 260.21 Eligibility.
- 260.23 Form and content of application generally.
- 260.25 Additional information for Applicants not having a credit rating.
- 260.27 Additional information for loan guaranties.
- 260.29 Third party consultants.
- 260.31 Execution and filing of the application.
- 260.33 Information requests.
- 260.35 Environmental assessment.

Subpart D—Standards for Maintenance of Facilities Involved in the Project

- 260.37 Applicability.
- 260.39 Maintenance standards.
- 260.41 Inspection and reporting.
- 260.43 Impact on other laws.

Subpart E—Procedures To Be Followed in the Event of Default

- 260.45 Events of default for guaranteed loans.
- 260.47 Events of default for direct loans.
- 260.49 Avoiding defaults.

§ 260.1

Subpart A—Overview

§ 260.1 Program authority.

Section 502 of the Railroad Revitalization and Regulatory Reform Act of 1976, as amended, 45 U.S.C. 821 *et seq.*, authorizes the Secretary of Transportation to provide direct loans and loan guarantees to State and local governments, government sponsored authorities and corporations, railroads, and joint ventures that include at least one railroad. The Secretary's authority has been delegated to the Administrator of the Federal Railroad Administration, an agency of the Department of Transportation.

§ 260.3 Definitions.

As used in this part—

(a) *Act* means the Railroad Revitalization and Regulatory Reform Act of 1976, as amended, 45 U.S.C. 821 *et seq.*

(b) *Administrator* means the Federal Railroad Administrator, or his or her representative.

(c) *Applicant* means any State or local government, government sponsored authority or corporation, railroad, or group of two or more entities, at least one of which is a railroad, participating in a joint venture, that submits an application to the Administrator for a direct loan or the guarantee of an existing obligation under which it is an obligor or for a commitment to guarantee a new obligation.

(d) *Borrower* means an Applicant that has been approved for, and has received, financial assistance under this part.

(e) *Credit risk premium* means that portion of the total subsidy cost to the Government of a direct loan or loan guarantee that is not covered by Federal appropriations and which must be paid by Applicant or its non-Federal infrastructure partner before that di-

rect loan can be disbursed or loan guarantee can be issued.

(f) *Direct loan* means a disbursement of funds by the Government to a non-federal borrower under a contract that requires the repayment of such funds.

(g) *FRA* means the Federal Railroad Administration.

(h) *Financial assistance* means a direct loan, or a guarantee of a new loan issued under this part.

(i) *Holder* means the current owner of an obligation or the entity retained by the owner to service and collect an obligation which is guaranteed under the provisions of this part.

(j) *Including* means including but not limited to.

(k) *Infrastructure partner* means any non-Federal source of the Credit Risk Premium which must be paid to the Administrator in lieu of, or in combination with, an appropriation in connection with financial assistance provided under this part.

(l) *Intermodal* means of or relating to the connection between rail service and other modes of transportation, including all parts of facilities at which such connection is made.

(m) *Lender* means the non-Federal entity making a loan to an Applicant for which a loan guarantee under this part is sought.

(n) *Loan guarantee* means any guarantee, insurance, or other pledge with respect to the payment of all or a part of the principal or interest on any debt obligation of a non-Federal borrower to a non-Federal Lender, but does not include the insurance of deposits, shares, or other withdrawable accounts in financial institutions.

(o) *Obligation* means a bond, note, conditional sale agreement, equipment trust certificate, security agreement, or other obligation.

(p) *Obligor* means the debtor under an obligation, including the original obligor and any successor or assignee of such obligor.

(q) *Project* means the purpose for which financial assistance is requested.

(r) *Railroad* means a rail carrier subject to part A of subtitle IV of title 49, United States Code.

(s) *Subsidy cost of a direct loan* means the net present value, at the time when

Federal Railroad Administration, DOT

§ 260.15

the direct loan is disbursed, of the following estimated cash flows:

- (1) Loan disbursements;
- (2) Repayments of principal; and
- (3) Payments of interest and other payments by or to the Government over the life of the loan after adjusting for estimated defaults, prepayments, fees, penalties, and other recoveries; including the effects of changes in loan terms resulting from the exercise by the borrower of an option included in the loan contract.

(t) *Subsidy cost of a loan guarantee* means the net present value, at the time when the guaranteed loan is disbursed, of the following estimated cash flows:

- (1) Payments by the Government to cover defaults, delinquencies, interest subsidies, or other payments; and
- (2) The payments to the Government including origination and other fees, penalties and recoveries.

§ 260.5 Eligible purposes.

(a) Financial assistance under this part is available solely to:

- (1) Acquire, improve, or rehabilitate intermodal or rail freight or passenger equipment or facilities, including track, components of track, bridges, yards, buildings, and shops;
- (2) Refinance outstanding debt incurred for purposes described in paragraph (a)(1) of this section; or
- (3) Develop or establish new intermodal or railroad facilities.

(b) Financial assistance under this part cannot be used for railroad operating expenses.

§ 260.7 Priority consideration.

When evaluating applications, the Administrator will give priority consideration (but not necessarily in the following order) to projects that:

- (a) Enhance public safety;
- (b) Enhance the environment;
- (c) Promote economic development;
- (d) Enable United States companies to be more competitive in international markets;
- (e) Are endorsed by the plans prepared under section 135 of title 23, United States Code, by the State or States in which they are located; or

(f) Preserve or enhance rail or intermodal service to small communities or rural areas.

§ 260.9 Loan terms.

The maximum repayment period for direct loans and guaranteed loans under this part is 25 years from the date of execution. The interest rate on direct loans will be equal to the rate on Treasury securities of a similar term. In general, the financial assistance provided will be required to be repaid prior to the end of the useful life of the project it is used to fund.

§ 260.11 Investigation charge.

(a) Applicants for financial assistance under this part may be required to pay an investigation charge of up to one-half of one percent of the principal amount of the direct loan or portion of the loan to be guaranteed.

(b) When an investigation charge is assessed, one-half of the investigation charge shall be paid by Applicant at the time a formal application is submitted to FRA.

(c) Within 60 days after the date of filing of the application, Applicant shall pay to the Administrator the balance of the investigation charge.

§ 260.13 Credit reform.

The Federal Credit Reform Act of 1990, 2 U.S.C. 661, requires Federal agencies to set aside the subsidy cost of new credit assistance provided in the form of direct loans or loan guarantees. The subsidy cost will be the estimated long term cost to the Government of the loan or loan guarantee. The subsidy cost associated with each direct loan or loan guarantee, which the Administrator must set aside, may be funded by Federal appropriations, direct payment of a Credit Risk Premium by the Applicant or a non-Federal infrastructure partner on behalf of the Applicant, or any combination thereof.

§ 260.15 Credit risk premium.

(a) Where available Federal appropriations are inadequate to cover the subsidy cost, a non-Federal infrastructure partner may pay to the Administrator a Credit Risk Premium adequate to cover that portion of the subsidy

§ 260.17

49 CFR Ch. II (10–1–04 Edition)

cost not covered by Federal appropriations. Where there is no Federal appropriation, the Credit Risk Premium must cover the entire subsidy cost.

(b) The amount of the Credit Risk Premium required for each direct loan or loan guarantee, if any, shall be established by the Administrator. The Credit Risk Premium shall be determined based on the credit risk and anticipated recovery in the event of default, including the recovery of collateral.

(c) The Credit Risk Premium must be paid before the disbursement of a direct or guaranteed loan. Where the borrower draws down the direct or guaranteed loan in several increments, the borrower may pay a portion of the total Credit Risk Premium for each increment equal to the proportion of that increment to the total amount of the direct or guaranteed loan.

(d) Each direct loan and loan guarantee made by the Administrator will be included in one cohort of direct loans or one cohort of loan guarantees, respectively, made during that same fiscal year, or longer period, as may be determined by the Administrator. When all obligations in a cohort have been satisfied or liquidated, the amount of Credit Risk Premiums, paid by applicants or infrastructure partners, remaining in the cohort, after deductions made to mitigate losses from any loan or loan guarantee in the cohort, together with interest accrued thereon, will be repaid on a pro rata basis to each original payor of a Credit Risk Premium for any obligation which was fully satisfied. If the Administrator's estimate of the default risk cost of each loan is accurate, the aggregate of Credit Risk Premiums associated with each cohort of loans will fully offset all losses in the cohort and none will remain to be returned to the payees.

Subpart B—FRA Policies and Procedures for Evaluating Applications for Financial Assistance

§ 260.17 Credit risk premium analysis.

(a) When Federal appropriations are not available to cover the total subsidy cost, the Administrator will determine

the Credit Risk Premium necessary for each direct loan or loan guarantee by estimating the credit risk and the potential recovery in the event of a default of each project evaluating the factors described in paragraphs (b) and (c) of this section.

(b) Establishing the credit risk.

(1) Where an Applicant has received a recent credit rating from one or more nationally recognized rating agencies, that rating will be used to estimate the credit risk.

(2) Where an Applicant has not received a credit rating from a credit rating agency, the Administrator will determine the credit risk based on an evaluation of the following factors:

(i) Business risk, based on Applicant's:

(A) Industry outlook;

(B) Market position;

(C) Management and financial policies;

(D) Capital expenditures; and

(E) Operating efficiency.

(ii) Financial risk, based on Applicant's past and projected:

(A) Profitability;

(B) Liquidity;

(C) Financial strength;

(D) Size; and

(E) Level of capital expenditures; and

(iii) Project risk, based on the proposed project's:

(A) Potential for improving revenues, profitability and cash flow from operations; and

(B) Reliance on third parties for success.

(c) The potential recovery in the event of a default will be based on:

(1) The nature of the Applicant's assets; and

(2) Liquidation value of the collateral offered, including the terms and conditions of the lien securing the collateral.

§ 260.19 Preapplication meeting.

Potential Applicants may request a meeting with the FRA Associate Administrator for Railroad Development to discuss the nature of the project being considered. Applicants must be prepared to provide at least the following information:

(a) Applicant's name, address, and contact person;

(b) Name of the proposed infrastructure partner(s), if any, including the identification of potential amounts of funding from each;

(c) Amount of the direct loan or loan guarantee request, and a description of the technical aspects of the project including a map of the existing railroad lines with the location of the project indicated;

(d) Brief description and estimate of the economic impact, including future demand for service, improvements that can be achieved, the project's relation to the priorities listed in §260.7, along with any feasibility, market or other studies that may have been done as attachments;

(e) Amount of Applicant's equity and a description of collateral offered, with estimated values, including the basis of such, to be offered as security for the loan;

(f) If applicable, the names and addresses of the Applicant's parent, affiliates, and subsidiary corporations, if any, and a description of the ownership relationship and the level of guarantee, if any, to be offered;

(g) For existing companies, a current balance sheet and an income statement not more than 90 days old and financial statements for the borrower and any parent, affiliates, and subsidiaries for at least the four most recent years; and

(h) Information relevant to the potential environmental impacts of the project in the context of applicable Federal law.

Subpart C—Applications for Financial Assistance

§ 260.21 Eligibility.

The Administrator may make a direct loan to an Applicant, or guarantee the payment of the principal balance and any interest of an obligation of an Applicant prior to, on, or after the date of execution or the date of disbursement of such obligation, if the proceeds of such direct loan or obligation shall be, or have been, used by the Applicant for the eligible purposes listed in §260.5(a)(1), (2), and (3).

§ 260.23 Form and content of application generally.

Each application shall include, in the order indicated and identified by applicable paragraph numbers and letters corresponding to those used in this section, the following information:

(a) Full and correct name and principal business address of the Applicant;

(b) Date of Applicant's incorporation, or organization if not a corporation, and name of the government, State or territory under the laws of which it was incorporated or organized. If Applicant is a partnership, association, or other form of organization other than a corporation, a full description of the organization should be furnished;

(c) Name, title, and address of the person to whom correspondence regarding the application should be addressed.

(d) A statement of whether the project involves another railroad or other participant, through joint execution, coordination, or otherwise; if so, description of the relative participation of Applicant and such other railroad or participant, including financial statements (if applicable) and financing arrangements of each participant, portion of the work to be performed by each participant, and anticipated level of usage of the equipment or facility of each participant when the work is completed, along with a statement by a responsible officer or official of the other railroad or participant that the information provided reflects their agreement on these matters;

(e) A detailed description of the amount and timing of the financial assistance that is being requested and its purpose or purposes, including:

(1) Detailed description of the project and its purpose or purposes;

(2) A description of all facilities or equipment and the physical condition of such facilities or equipment included in or directly affected by the proposed project;

(3) Each part or sub-part into which the project may reasonably be divided and the priority and schedule of expenditure for each part or sub-part; and

(4) Proposed dates of commencement and completion of the project and estimated timing of the expenditure of the proceeds of the obligation;

§ 260.25

49 CFR Ch. II (10–1–04 Edition)

(5) A map of Applicant's existing railroad with location of project indicated, if appropriate.

(f) A listing and description of the collateral to be offered the Administrator in connection with any financial assistance provided; Applicant's opinion of the value of this security and the basis for such opinion; in the case of leased equipment to be rehabilitated or improved with the proceeds of the obligation proposed to be guaranteed, Applicant shall state, in addition to the above, whether the lease provides for, or the lessor will permit, encumbrance of the leasehold or subordination of the lessor's interest in the equipment to the Administrator;

(g) A statement, in summary form, showing financial obligations to or claims against the United States or obligations for which the United States is guarantor, if any, by Applicant or any affiliated corporate entity of the Applicant or the Applicant's parent as of the date of the application, including:

(1) Status of any claims under litigation; and

(2) Any other debits or credits existing between the Applicant and the United States, showing the department or agency involved in such loans, claims and other debts;

(h) To the extent such information is available, an analysis that includes:

(1) A statement, together with supporting evidence including copies of all market analyses and studies that have been performed to determine present and future demand for rail services or facilities, that the financing is justified by present and future probable demand for rail services or facilities, will meet existing needs for such services or facilities, and will provide shippers or passengers with improved service;

(2) Description of the impact of the project upon the projected freight or passenger traffic to be originated, terminated, or carried by the Applicant for at least the five years immediately following completion of the project;

(3) Explanation of the manner in which the project will increase the economical and efficient utilization of equipment and facilities; and

(4) Description of cost savings or any other benefit which would accrue to the Applicant from the project;

(i) A statement as to how the project will contribute to, or enhance, the safe operation of the railroad, considering such factors as the occupational safety and health of the employees and the improvement of the physical and other conditions that have caused or may cause serious injury or loss of life to the public or significant property damage;

(j) A statement of the Applicant's maintenance program for its entire rail system and planned maintenance program for the equipment or facilities financed by the proceeds of the financial assistance;

(k) A certified statement in the form contained in §260.31(d) that Applicant will pay to the Administrator, in accordance with §260.11, the investigation charge with respect to the application.

(l) Information relevant to the potential environmental impacts of the project in the context of applicable Federal laws;

(m) Any additional information that the Applicant deems appropriate to convey a full and complete understanding of the project, the project's relations to the priorities listed in §260.7, and its impact, or to assist the Administrator in making the statutorily prescribed findings; and

(n) Any other information which the Administrator may deem necessary concerning an application filed under this part.

(o) Railroad applicants must also submit a copy of application for financing for the project in the private sector, including terms requested, from at least one commercial lender, and its response refusing to provide such financing.

§ 260.25 Additional information for Applicants not having a credit rating.

Each application submitted by Applicants not having a recent credit rating from one or more nationally recognized rating agencies shall include, in the order indicated and identified by applicable numbers and letters corresponding to those used in this section, the following information:

(a) A narrative statement detailing management's business plan to enhance Applicant's ability to provide

Federal Railroad Administration, DOT

§ 260.27

rail services including a discussion of the following:

(1) Applicant's current and prospective traffic base, including by commodity and geographic region, major markets served, major interchange points, and market development plans;

(2) Applicant's current operating patterns, and plans, if any, to enhance its ability to serve its current and prospective traffic base;

(3) System-wide plans to maintain equipment and rights-of-way at current or improved levels; and

(4) Specific plans for rationalization of marginal or uneconomic services;

(b) Detailed financial information, including:

(1) Financial statements prepared by a Certified Public Accountant (audited, if available), for the four calendar years immediately preceding the date of filing of the application, including:

(i) A copy of Applicant's most recent year-end general balance sheet and a copy of Applicant's most recent unaudited general balance sheet; and

(ii) Applicant's most recent annual income statement and a spread sheet showing unaudited monthly and year-to-date income statement data up to the date the application is filed;

(2) Projected financial statements, including spread sheets showing for each of the four years subsequent to the year in which the application is filed, both before and after giving effect to the proceeds of the assistance requested in the application:

(i) Forecasted annual income statement;

(ii) Forecasted year-end balance sheets. These spread sheets shall be accompanied by a statement setting forth the bases for such forecasts; and

(iii) A spread sheet showing changes in financial position for the year in which the application is filed, including the period ending on the date of the application based upon actual data and the period from the date of the application to the end of the year, based upon estimated and forecasted data;

(c) Capital spending plans for the next five years;

(d) Cash flow projections;

(e) Contingency plans for termination of the project before completion, if necessary; and

(f) A narrative description of Applicant's management team, including:

(1) Rail experience of top management;

(2) Management's plans for achieving growth and its long-term capital spending plan; and

(3) A narrative description of Applicant's workforce and the historical rate of employee turnover.

§ 260.27 Additional information for loan guarantees.

Applications for a loan guarantee shall also include in the order indicated and identified by applicable numbers and letters corresponding to those used in this section, the following information:

(a) With respect to each existing obligation to be refinanced or proposed obligation:

(1) A certified copy of proposed or executed obligation agreements;

(2) A detailed description of the obligation, and a description of the series or issue of which the obligation is, or will be, a part, including:

(i) Effective date, or anticipated effective date;

(ii) Where a guarantee is sought for an outstanding obligation being refinanced, actual effective rate of interest; or where the obligation is new, the terms of the proposed obligation including the proposed effective rate of interest; and

(iii) All related documents, whether executed or proposed;

(3) For an existing obligation, the Applicant's payment history on that obligation; and

(b) With respect to each existing Lender, Holder, or prospective Lender, a statement as to:

(1) Full and correct name and principal business address;

(2) Reference to applicable provisions of law and the charter or other governing instruments conferring authority to do business on the Lender, Holder, or prospective Lender;

(3) Brief statement of the circumstances and negotiations leading to the agreement by the Lender, Holder, or prospective Lender to make the loan;

§ 260.29

49 CFR Ch. II (10–1–04 Edition)

(4) Brief statement of the nature and extent of any affiliation or business relationship between the Lender, Holder, or prospective Lender and the Applicant or any of Applicant's directors, partners, or principal executive officers; and.

(5) Full and complete statement of all sums to be provided by the Lender or Holder, or to be provided by the prospective Lender in connection with the proposed obligation including:

(i) Name and address of each person to whom the payment has been made or will be made and nature of any affiliation, association, or prior business relationship between any person named in this paragraph and the Lender, Holder or prospective Lender or any of its directors, partners, or officers; and

(ii) Amount of the cash payment, or the nature and value of other consideration.

§ 260.29 Third party consultants.

Applicants may utilize independent third-party consultants to prepare a financial evaluation of the proposed project and the applicant, if approved by FRA. Providing such an evaluation would greatly assist FRA in the evaluation of the application and would significantly reduce the time necessary for FRA to process the application. We encourage the use of third party consultants.

§ 260.31 Execution and filing of the application.

(a) The original application shall bear the date of execution, be signed in ink by or on behalf of the Applicant, and shall bear the corporate seal in the case of an Applicant which is a corporation. Execution shall be by all partners if a partnership, unless satisfactory evidence is furnished of the authority of a partner to bind the partnership, or if a corporation, an association or other similar form of organization, by its president or other executive officer having knowledge of the matters therein set forth. Persons signing the application on behalf of the Applicant shall also sign a certificate in form as follows:

(Name of official) certifies that he or she is the (Title of official) of the (Name of Applicant); that he or she is authorized on the

part of the Applicant to sign and file with the Administrator this application and exhibits attached thereto; that the consent of all parties whose consent is required, by law or by binding commitment of the Applicant, in order to make this application has been given; that he or she has carefully examined all of the statements contained in such application and the exhibits attached thereto and made a part thereof relating to the aforesaid (Name of Applicant); that he or she has knowledge of the matters set forth therein and that all such statements made and matters set forth therein are true and correct to the best of his or her knowledge, information, and belief; and that Applicant will pay the balance of the investigation charge in accordance with § 260.11.

(Signature of official)

(Date)

(b) There shall be made a part of the original application the following certificate by the Chief Financial Officer or equivalent officer of the Applicant:

(Name of officer) certifies that he or she is (Title of officer) of (Name of Applicant); that he or she has supervision over the books of accounts and other financial records of the affected Applicant and has control over the manner in which they are kept; that such accounts are maintained in good faith in accordance with the effective accounting practices; that such accounts are adequate to assure that proceeds from the financing being requested will be used solely and specifically for the purposes authorized; that he or she has examined the financial statements and supporting schedules included in this application and to the best of his or her knowledge and belief those statements accurately reflect the accounts as stated in the books of account; and that, other than the matters set forth in the exceptions attached to such statements, those financial statements and supporting schedules represent a true and complete statement of the financial position of the Applicant and that there are no undisclosed assets, liabilities, commitments to purchase property or securities, other commitments, litigation in the courts, contingent rental agreements, or other contingent transactions which might materially affect the financial position of the Applicant.

(Signature of official)

(Date)

(c) The Applicant shall pay the investigation charge in accordance with § 260.11.

(d) The application shall be accompanied by a transmittal letter in form as follows:

Federal Railroad Administration, DOT

§ 260.35

Federal Railroad Administrator, c/o Associate Administrator for Railroad Development, Federal Railroad Administration, Washington, D.C. 20590

Re: Application for financial assistance under the Railroad Rehabilitation and Improvement Financing Program.

Dear Sir or Madam: Being duly authorized by (jointly and severally/if more than one) (the "Applicant") to convey the understandings hereinafter set forth, I respectfully submit this application and remit its investigation fee in the amount equal to one-half the total investigation fee established by the Administrator. By this filing, Applicant requests the Administrator to investigate the application and make the necessary findings upon which Applicant's eligibility for a direct loan or loan guarantee may be determined. Applicant understands that neither the acceptance of this filing, the deposit of the investigation charge, nor the commencement of an investigation acknowledges the sufficiency of the application's form, content or merit. Furthermore, Applicant understands that the Administrator will incur numerous expenses by this filing with respect to the investigation of the application, the appraisal of security being offered, and the making of the necessary determinations and findings, and promises to pay, within 60 days, the remainder of the investigation fee required by the Administrator. Applicant understands that the Administrator will establish the amount of Credit Risk Premium due from Applicant, if any, as provided in §260.15. Applicant agrees to pay such Credit Risk Premium prior to the disbursement of direct or guaranteed loan, as appropriate. Such Credit Risk Premium may be refunded as provided in §260.15.

Respectfully submitted.

Applicant(s)

Seal(s) by Its(Their).

(e) The original application and supporting papers, and two copies thereof for the use of the Administrator, shall be filed with the Associate Administrator for Railroad Development of the Federal Railroad Administration, 1120 Vermont Ave., NW., MailStop 20, Washington, DC 20590. Each copy shall bear the dates and signatures that appear in the original and shall be complete in itself, but the signatures in the copies may be stamped or typed.

§260.33 Information requests.

If an Applicant desires that any information submitted in its application or any supplement thereto not be released by the Administrator upon request from a member of the public, the

Applicant must so state and must set forth any reasons why such information should not be released, including particulars as to any competitive harm which would probably result from release of such information. The Administrator will keep such information confidential to the extent permitted by law.

§260.35 Environmental assessment.

(a) The provision of financial assistance by the Administrator under this Part is subject to a variety of environmental and historic preservation statutes and implementing regulations including the National Environmental Policy Act ("NEPA") (42 U.S.C. 4332 *et seq.*), Section 4(f) of the Department of Transportation Act (49 U.S.C. 303(c)), the National Historic Preservation Act (16 U.S.C. 470(f)), the Coastal Zone Management Act (16 U.S.C. 1451), and the Endangered Species Act (16 U.S.C. 1531). Appropriate environmental/historic preservation documentation must be completed and approved by the Administrator prior to a decision by the Administrator on the applicant's financial assistance request. FRA's "Procedures for Considering Environmental Impacts" ("FRA's Environmental Procedures") (65 FR 28545 (May 26, 1999)) or any replacement environmental review procedures that the FRA may later issue and the NEPA regulation of the Council on Environmental Quality ("CEQ Regulation") (40 CFR Part 1500) will govern the FRA's compliance with applicable environmental/historic preservation review requirements.

(b) The Administrator, in cooperation with the applicant, has the responsibility to manage the preparation of the appropriate environmental document. The role of the applicant will be determined by the Administrator in accordance with the CEQ Regulation and Environmental Procedures.

(c) Depending on the type, size and potential environmental impact of the project for which the applicant is seeking financial assistance, FRA will need to determine whether the project is categorically excluded from detailed environmental review under FRA's Environmental Procedures and, if not, to

prepare or have prepared an Environmental Assessment leading to an Environmental Impact Statement (EIS) or a Finding of No Significant Impact. At the discretion of the Administrator, Applicants may be required to prepare and submit an environmental assessment of the proposed project or to submit adequate documentation to support a finding that the project is categorically excluded from detailed environmental review. If the applicant is a public agency that has statewide jurisdiction or is a local unit of government acting through a statewide agency, and meets the requirements of section 102(2)(D) of NEPA, the applicant may be requested to prepare the EIS and other environmental documents under the Administrator's guidance.

(d) Applicants are strongly urged to consult with the Associate Administrator for Railroad Development at the earliest possible stage in project development in order to assure that the environmental/historic preservation review process can be completed in a timely manner.

(e) Applicants may not initiate any activities that would have an adverse environmental impact or limit the choice of reasonable alternatives in advance of the completion of the environmental review process. This does not preclude development by applicants of plans or designs or performance of other work necessary to support the application for financial assistance.

Subpart D—Standards for Maintenance of Facilities Involved in the Project

§ 260.37 Applicability.

This subpart prescribes standards governing the maintenance of facilities that are being, or have been, acquired, rehabilitated, improved, or constructed with the proceeds of a direct loan or a guaranteed loan issued under this part for the period during which any portion of the principal or interest of such obligation remains unpaid.

§ 260.39 Maintenance standards.

(a) When the proceeds of a direct loan or an obligation guaranteed by the Administrator under this part are, or were, used to acquire, rehabilitate, im-

prove or construct track, roadbed, and related structures, Borrower shall, as long as any portion of the principal or interest of such obligation remains unpaid, maintain such facilities in at least the highest track class, as defined by FRA Track Safety Standards in part 213 of this chapter, specified in the Application at which the rehabilitated, improved, acquired, or constructed track is to be operated upon completion of the project.

(b) When the proceeds of a direct loan or an obligation guaranteed by the Administrator under this part are, or were, used for equipment or facilities, the Borrower shall, during the period in which any portion of the principal or interest in such obligation remains unpaid, maintain such equipment or facilities in a manner consistent with sound engineering and maintenance practices and in a condition that will permit the level of use that existed upon completion of the acquisition, rehabilitation, improvement or construction of such equipment or facilities.

§ 260.41 Inspection and reporting.

(a) Equipment or facilities subject to the provisions of this subpart may be inspected at such times as the Administrator deems necessary to assure compliance with the standards set forth in § 260.39. Each Borrower shall permit representatives of the FRA to enter upon its property to inspect and examine such facilities at reasonable times and in a reasonable manner. Such representatives shall be permitted to use such testing devices as the Administrator deems necessary to insure that the maintenance standards imposed by this subpart are being followed.

(b) Each Borrower shall submit annually to the Administrator financial records and other documents detailing the maintenance and inspections performed which demonstrate that the Borrower has complied with the standards in § 260.39.

§ 260.43 Impact on other laws.

Standards issued under this subpart shall not be construed to relieve the Borrower of any obligation to comply with any other Federal, State, or local law or regulation.

Subpart E—Procedures To Be Followed in the Event of Default**§ 260.45 Events of default for guaranteed loans.**

(a) If the Borrower is more than 30 days past due on a payment or is in violation of any covenant or condition of the loan documents and such violation constitutes a default under the provisions of the loan documents, Lender must notify the Administrator in writing and must continue to submit this information to the Administrator each month until such time as the loan is no longer in default; and the Administrator will pay the Lender of the obligation, or the Lenders's agent, an amount equal to the past due interest on the guaranteed portion of the defaulted loan. This payment will in no way reduce the Borrower's obligation to the Lender to make all payments of principal and interest in accordance with the note. If the loan is brought current, the Lender will repay to the Agency any interest payments made by the Agency, plus accrued interest at the note rate.

(b) If the default has continued for more than 90 days, the Administrator will pay to the Lender, or the Lender's agent, 90 percent of the unpaid guaranteed principal. If, subsequent to this payment being made, the default is cured and liquidation is no longer appropriate, the Lender will repay such funds to the Administrator, plus interest at the note rate.

(c) After the default has continued for more than 90 days, the Lender shall expeditiously submit to the Administrator, in writing, its proposed detailed plan to resolve the default by liquidating the collateral or by any other means. If the resolution will require the liquidation of the collateral, then the Lender's plan shall include:

(1) Proof adequate to establish that the Lender is legally in possession of the obligation, or is the agent for a Holder who is legally in possession of the obligation, and a statement of the current loan balance and accrued interest to date and the method of computing the interest;

(2) A full and complete list of all collateral, including any personal and corporate guarantees;

(3) The recommended liquidation methods for making the maximum collection possible and the justification for such methods, including recommended action for acquiring and disposing of all collateral and collecting from any guarantors;

(4) Necessary steps for preservation of the collateral;

(5) Copies of the Borrower's latest available financial statements;

(6) Copies of any guarantor's latest available financial statements;

(7) An itemized list of estimated liquidation expenses expected to be incurred along with justification for each expense;

(8) A schedule to periodically report to the FRA on the progress of liquidation;

(9) Proposed protective bid amounts on collateral to be sold at auction and a breakdown to show how the amounts were determined;

(10) If a voluntary conveyance is considered, the proposed amount to be credited to the guaranteed debt;

(11) Legal opinions, as appropriate;

(12) The Lender will obtain an independent appraisal on all collateral securing the loan which will reflect the fair market value and potential liquidation value. In order to formulate a liquidation plan that maximizes recovery, the appraisal shall consider the presence of hazardous substances, petroleum products, or other environmental hazards, which may adversely impact the market value of the collateral; and

(13) The anticipated expenses associated with the liquidation will be considered a cost of liquidation.

(d) The Administrator will inform the Lender in writing whether the Administrator concurs in the Lender's liquidation plan. Should the Administrator and the Lender not agree on the liquidation plan, negotiations will take place between the Administrator and the Lender to resolve the disagreement. When the liquidation plan is approved by the Administrator, the Lender will proceed expeditiously with liquidation. The liquidation plan may be modified when conditions warrant. All modifications must be approved in writing by the Administrator prior to implementation.

§ 260.47

(e) Lender will account for funds during the period of liquidation and will provide the Administrator with reports at least quarterly on the progress of liquidation including disposition of collateral, resulting costs, and additional procedures necessary for successful completion of the liquidation.

(f) Within 30 days after final liquidation of all collateral, the Lender will prepare and submit to the Administrator a final report in which the Lender must account for all funds during the period of liquidation, disposition of the collateral, all costs incurred, and any other information necessary for the successful completion of liquidation. Upon receipt of the final accounting and report of loss, the Administrator may audit all applicable documentation to confirm the final loss. The Lender will make its records available and otherwise assist the Administrator in making any investigation.

(g) The Administrator shall be subrogated to all the rights of the Lender, or if Lender is agent for a Holder then to all of the rights of the Holder, with respect to the Borrower to the extent of the Administrator's payment to the Lender under this section.

(h) When the Administrator finds the final report to be proper in all respects:

(1) All amounts recovered in liquidation shall be paid to the Administrator; and

(2) The remaining obligation of the Administrator to the Lender under the guarantee, if any, will be paid directly to Lender by the Administrator.

(i) The Administrator shall not be required to make any payment under paragraphs (a) and (b) of this section if the Administrator finds, before the expiration of the periods described in such subsections, that the default has been remedied.

(j) The Administrator shall have the right to charge Borrower interest, penalties and administrative costs, including all of the United States' legally assessed or reasonably incurred expenses of its counsel and court costs in connection with any proceeding brought or threatened to enforce payment or performance under applicable loan documents, in accordance with OMB Circular A-129 (www.whitehouse.gov/

49 CFR Ch. II (10-1-04 Edition)

omb.), as it may be revised from time to time.

§ 260.47 Events of default for direct loans.

(a) Upon the Borrower's failure to make a scheduled payment, or upon the Borrower's violation of any covenant or condition of the loan documents which constitutes a default under the provisions of the loan documents, the Administrator, at the Administrator's discretion may:

(1) Exercise any and all remedies available under the provisions of the loan agreement and other loan documents, including any guarantees, or inherent in law or equity;

(2) Terminate further borrowing of funds;

(3) Take possession of assets pledged as collateral; and

(4) Liquidate pledged collateral.

(b) The Administrator shall have the right to charge Borrower interest, penalties and administrative costs, including all of the United States' legally assessed or reasonably incurred expenses of its counsel and court costs in connection with any proceeding brought or threatened to enforce payment or performance under applicable loan documents, in accordance with OMB Circular A-129, as it may be revised from time to time.

§ 260.49 Avoiding defaults.

Borrowers are encouraged to contact the Administrator prior to the occurrence of an event of default to explore possible avenues for avoiding such an occurrence.

Subpart F—Loan Guarantees—Lenders

§ 260.51 Conditions of guarantee.

(a) The percentage of the obligation for which Applicant seeks a guarantee is a matter of negotiation between the Lender and the Applicant, subject to the Administrator's approval. The maximum percentage of the total obligation that the Administrator will guarantee is 80 percent. The amount of guarantee allowed will depend on the total credit quality of the transaction and the level of risk believed to be assumed by the Administrator.

(b) A guarantee under this part constitutes an obligation supported by the full faith and credit of the United States and is incontestable except for fraud or misrepresentation of which a Lender or Holder has actual knowledge at the time it becomes such Lender or Holder or which a Lender or Holder participates in or condones. In addition, the guarantee will be unenforceable by the Lender or the Holder to the extent any loss is occasioned by the violation of usury laws, negligent servicing, or failure to obtain the required security regardless of the time at which the Administrator acquires knowledge thereof. Any losses occasioned will be unenforceable to the extent that loan funds are used for purposes other than those specifically approved by FRA in its guarantee.

(c) The Administrator may guarantee an Applicant's obligation to any Lender provided such Lender can establish to the satisfaction of the Administrator that it has the legal authority and sufficient expertise and financial strength to operate a successful lending program. Loan guarantees will only be approved for Lenders with adequate experience and expertise to make, secure, service, and collect the loans.

(d) The Lender may sell all of the guaranteed portion of the loan on the secondary market, provided the loan is not in default, or retain the entire loan.

(e) When a guaranteed portion of a loan is sold to a Holder, the Holder shall succeed to all rights of the Lender under the loan guarantee to the extent of the portion purchased. The Lender will remain bound to all obligations under the loan guarantee and the provisions of this part. In the event of material fraud, negligence or misrepresentation by the Lender or the Lender's participation in or condoning of such material fraud, negligence or misrepresentation, the Lender will be liable for payments made by the Agency to any Holder.

§ 260.53 Lenders' functions and responsibilities.

Lenders have the primary responsibility for the successful delivery of the program consistent with the policies and procedures outlined in this part.

All Lenders obtaining or requesting a loan guarantee from the Administrator are responsible for:

(a) *Loan processing.* Lender shall be responsible for all aspects of loan processing, including:

(1) Processing applications for the loan to be guaranteed;

(2) Developing and maintaining adequately documented loan files;

(3) Recommending only loan proposals that are eligible and financially feasible;

(4) Obtaining valid evidence of debt and collateral in accordance with sound lending practices;

(5) Supervising construction, where appropriate;

(6) Distributing loan funds;

(7) Servicing guaranteed loans in a prudent manner, including liquidation if necessary; and

(8) Obtaining the Administrator's approval or concurrence as required in the loan guarantee documentation;

(b) *Credit evaluation.* Lender must analyze all credit factors associated with each proposed loan and apply its professional judgment to determine that the credit factors, considered in combination, ensure loan repayment. The Lender must have an adequate underwriting process to ensure that loans are reviewed by other than the originating officer. There must be good credit documentation procedures;

(c) *Environmental responsibilities.* Lender has a responsibility to become familiar with Federal environmental requirements; to consider, in consultation with the prospective borrower, the potential environmental impacts of their proposals at the earliest planning stages; and to develop proposals that minimize the potential to adversely impact the environment. Lender must alert the Administrator to any controversial environmental issues related to a proposed project or items that may require extensive environmental review. Lender must assist borrowers as necessary to comply with the environmental requirements outlined in this part. Additionally, Lender will assist in the collection of additional data when the Agency needs such data to complete its environmental review of the proposal; and assist in the resolution of environmental problems;

§ 260.55

(d) *Loan closing.* The Lender will conduct or arrange for loan closings; and

(e) *Fees and Charges.* The Lender may establish charges and fees for the loan provided they are similar to those normally charged other Applicants for the same type of loan in the ordinary course of business.

§ 260.55 Lender's loan servicing.

(a) The lender is responsible for servicing the entire loan and for taking all servicing actions that are prudent. This responsibility includes but is not limited to the collection of payments, obtaining compliance with the covenants and provisions in the loan documents, obtaining and analyzing financial statements, verification of tax payments, and insurance premiums, and maintaining liens on collateral.

(b) The lender must report the outstanding principal and interest balance on each guaranteed loan semiannually.

(c) At the Administrator's request, the Lender will periodically meet with the Administrator to ascertain how the guaranteed loan is being serviced and that the conditions and covenants of the loan documents are being enforced.

(d) The Lender must obtain and forward to the Administrator the Borrower's annual financial statements within 120 days after the end of the Borrower's fiscal year and the due date of other reports as required by the loan documents. The Lender must analyze the financial statements and provide the Agency with a written summary of the Lender's analysis and conclusions, including trends, strengths, weaknesses, extraordinary transactions, and other indications of the financial condition of the Borrower.

(e) Neither the Lender nor the Holder shall alter, nor approve any amendments of, any loan instrument without the prior written approval of the Administrator.

APPENDIX A TO PART 265

AUTHORITY: Sec. 905 of the Railroad Revitalization and Regulatory Reform Act of 1976, Pub. L. 94–210, 90 Stat. 31; regulations of the Office of the Secretary of Transportation, 49 CFR 1.49(u).

SOURCE: 42 FR 4286, Jan. 24, 1977, unless otherwise noted.

Subpart A—General

§ 265.1 Purpose.

The purpose of this part is to effectuate the provisions of section 905 of the Railroad Revitalization and Regulatory Reform Act of 1976 (hereinafter

referred to as the "Act") to ensure that no person in the United States shall on the grounds of race, color, national origin, or sex be excluded from participation in, or denied the benefits of, or be subjected to discrimination under, any project, program or activity funded in whole or in part through financial assistance under the Act, or any provision of law amended by the Act. Nothing contained in these regulations is intended to diminish or supersede the obligations made applicable by either title VI of the Civil Rights Act of 1964, (42 U.S.C. 2000d), or Executive Order No. 11246, (42 U.S.C. 2000e (note)). Subsection (d) of section 905 of the Act authorizes the Secretary to prescribe such regulations and take such actions as are necessary to monitor, enforce, and affirmatively carry out the purposes of that section. This authority coupled with the provisions of section 906 of the Act, which requires the establishment of a Minority Resource Center which is authorized to encourage, promote and assist in the participation by MBE enterprises in the restructuring, improvement, revitalization and maintenance of our Nation's railroads, provides the basis for requirements for the development of affirmative action programs by recipients of Federal financial assistance and certain of their contractors to insure that minorities and MBEs are afforded ample consideration with respect to employment and contractual opportunities produced as a result of the implementation of the Act and other provisions of law amended by the Act.

§ 265.3 Applicability.

This part applies to any project, program, or activity funded in whole or in part through financial assistance provided under the Act, and to any activity funded under any provision of the Regional Rail Reorganization Act of 1973, as amended (45 U.S.C. 701 *et seq.*) or the Rail Passenger Service Act, as amended (45 U.S.C. 501 *et seq.*) amended by the Act including the financial assistance programs listed in appendix A. It applies to contracts awarded to implement the Northeast Corridor Project and to financial assistance programs administered by the United States Railway Association.

§ 265.5 Definitions.

As used in this part, unless the context indicates otherwise:

(a) *Act* means the Railroad Revitalization and Regulatory Reform Act of 1976 (Pub. L. No. 94-210).

(b) *Administrator* means the Federal Railroad Administrator or his delegate.

(c) *Affirmative action program* means the program described in § 265.9 through § 265.15 of this part.

(d) *Agency* means the Federal Railroad Administration.

(e) *Applicant* means persons applying for financial assistance under any of the Rail Acts.

(f) *Contractor* means a prime contractor or a subcontractor who will be paid in whole or in part directly or indirectly from financial assistance provided under the Rail Acts.

(g) [Reserved]

(h) *Includes* means includes but not limited to.

(i) *Minority* means women, Blacks, Hispanic Americans, American Indians, American Eskimos, American Orientals and American Aleuts.

(j) *MBE* means a business concern which is owned and controlled by a minority. For the purpose of this part, *owned and controlled* means a business:

(1) Which is at least 51 per centum owned by one or more minority individuals; or, in the case of a publicly owned business, at least 51 per centum of the stock of which is owned by one or more minority individuals; and

(2) Whose management and daily operations are controlled by one or more such individuals.

(k) *MBE Resource Center* means the Minority Resource Center established in the Department of Transportation pursuant to section 906 of the Act.

(l) *Rail Acts* means the Railroad Revitalization and Regulatory Reform Act of 1976, the Regional Rail Reorganization Act of 1973, as amended (45 U.S.C. 701 *et seq.*) and the Rail Passenger Service Act, as amended (45 U.S.C. 501 *et seq.*).

(m) *Recipient* means a person who receives financial assistance under any of the Rail Acts except under section 602 of the Rail Passenger Service Act, as amended (45 U.S.C. 501 *et seq.*).

(n) *Underutilization* means the condition of having fewer minority employees in a particular job group or fewer awards of contracts to MBEs than would reasonably be expected by their availability for such jobs or awards.

[42 FR 4286, Jan. 24, 1977, as amended at 44 FR 36339, June 21, 1979]

Subpart B—Requirements

§ 265.7 Nondiscrimination clauses.

(a) Each agreement for financial assistance made under any provision of the Rail Acts shall include, or in the case of agreements made prior to the effective date of this part, shall be amended to include, the following clauses:

(1) As a condition to receiving Federal financial assistance under the Railroad Revitalization and Regulatory Reform Act of 1976 (“Act”), or the provisions of the Regional Rail Reorganization Act of 1973, as amended (45 U.S.C. 701 *et seq.*), or the Rail Passenger Service Act of 1970, as amended (45 U.S.C. 501 *et seq.*) amended by the Act (collectively called, together with the Act, the “Rail Acts”), the recipient hereby agrees to observe and comply with the following:

(i) No person in the United States shall on the ground of race, color, national origin or sex be excluded from participation in, or denied the benefits of, or be subjected to discrimination under, any project, program, or activity funded in whole or in part through such assistance.

(2) The following specific discriminatory actions are prohibited:

(i) A recipient under any project, program or activity to which these clauses apply shall not, directly or through contractual or other arrangements, on the ground of race, color, national origin, or sex:

(A) Deny a person any service, financial aid, or other benefit provided under such project, program or activity;

(B) Provide any service, financial aid, or other benefit to a person which is different, or is provided in a different manner, from that provided to others under such project, program or activity;

(C) Subject a person to segregation or separate treatment in any matter related to his receipt of any service, financial aid or other benefit under such project, program or activity;

(D) Restrict a person in any way in the enjoyment of any advantage or privilege enjoyed by others receiving any service, financial aid or other benefit under such project, program or activity; or

(E) Deny a person an opportunity to participate in such project, program or activity through the provision of services or otherwise or afford him an opportunity to do so which is different from that afforded others under such project, program or activity.

(ii) A recipient, in determining the types of services, financial aid, or other benefits, or facilities which will be provided under any such project, program or activity or the class of persons to whom, or the situations in which such services, financial aid, other benefits, or facilities will be provided under any such project, program or activity, or the class of persons to be afforded an opportunity to participate in any such project, program or activity shall not, directly or through contractual or other arrangements, utilize criteria or methods of administration which have the effect of subjecting persons to discrimination because of their race, color, national origin, or sex, or have the effect of defeating or substantially impairing accomplishment of the objectives of the project, program or activity, with respect to individuals of a particular race, color, national origin or sex.

(iii) In determining the site or location of facilities, a recipient shall not make selections with the purpose or effect of excluding persons from, denying them the benefits of, or subjecting them to discrimination under any project, program or activity to which these clauses apply on the grounds of race, color, national origin or sex, or with the purpose or effect of defeating or substantially impairing the accomplishment of the objectives of these clauses.

(iv) The recipient shall not discriminate against any employee or applicant for employment because of race, color,

national origin or sex. Except as otherwise required by the regulations or orders of the Administrator, the recipient shall take affirmative action to insure that applicants for employment are employed, and that employees are treated during employment, without regard to their race, color, national origin or sex. Such action shall include but not be limited to the following: Employment, promotion, demotion, transfer, recruitment or recruitment advertising, layoff or termination, rates of pay or other forms of compensation, and selection for training, including apprenticeship. The recipient agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the agency's representative setting forth the provisions of these non-discrimination clauses. The recipient understands and agrees that it shall not be an excuse for the recipient's failure to provide affirmative action that the labor organizations with which the recipient has a collective bargaining agreement failed or refused to admit or qualify minorities for admission to the union, or that the provisions of such agreements otherwise prevent recipient from implementing its affirmative action program.

(v) The recipient shall not discriminate against any business organization in the award of any contract because of race, color, national origin or sex of its employees, managers or owners. Except as otherwise required by the regulations or orders of the Administrator, the recipient shall take affirmative action to insure that business organizations are permitted to compete and are considered for awards of contracts without regard to race, color, national origin or sex.

(3) As used in these clauses, the services, financial aid, or other benefits provided under a project, program, or activity receiving financial assistance under the Rail Acts include any service, financial aid, or other benefit provided in or through a facility funded through financial assistance provided under the Rail Acts.

(4) The enumeration of specific forms of prohibited discrimination does not

limit the generality of the prohibition in paragraph (a)(1)(i) of this section.

(5) These clauses do not prohibit the consideration of race, color, national origin or sex if the purpose and effect are to remove or overcome the consequences of practices or impediments which have restricted the availability of, or participation in, recipient's operations or activities on the grounds of race, color, national origin or sex. Where prior discriminatory or other practice or usage tends, on the grounds of race, color, national origin or sex, to exclude individuals or businesses from participation in, to deny them the benefits of, or to subject them to discrimination under any project, program or activity to which these clauses apply, the recipient must take affirmative action to remove or overcome the effects of the prior discriminatory practice or usage. Even in the absence of prior discriminatory practice or usage to which this part applies, the recipient is expected to take affirmative action to insure that no person is excluded from participation in or denied the benefits of the project, program or activity on the grounds of race, color, national origin or sex, and that minorities and MBEs are afforded a reasonable opportunity to participate in employment and procurement opportunities that will result from financial assistance provided under the Rail Acts.

(6) The recipient agrees to take such actions as are necessary to monitor its activities and those of its contractors who will be paid in whole or in part with funds provided by the Rail Acts, or from obligations guaranteed by the Administrator pursuant to the Rail Acts, except obligations guaranteed under section 602 of the Rail Passenger Service Act, in order to carry out affirmatively the purposes of paragraph (a)(1) of this section, and to implement the affirmative action program developed and implemented pursuant to 49 CFR part 265.

(7) The recipient shall, in all advertisements for employees, or solicitations for services or materials from business organizations placed by or on behalf of the recipient, in connection with any project, program or activity funded in whole or in part with financial assistance under the Rail Acts,

§ 265.7

49 CFR Ch. II (10–1–04 Edition)

state that all applicants for employment will receive consideration for employment, and all business organizations will receive consideration for an award of a contract, without regard to race, color, national origin or sex.

(8) The recipient shall send to each labor organization or representative of workers with which it has a collective bargaining agreement or other contract or understanding a notice to be provided by the agency's representative, advising the labor organization or workers' representative of the recipient's commitments under section 905 of the Act, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(9) The recipient shall comply with all provisions of section 905 of the Act, the Civil Rights Act of 1964, any other Federal civil rights act, and with the rules, regulations, and orders issued under such acts.

(10) The recipient shall furnish all information and reports required by the rules, regulations, and orders of the Administrator, and will permit access to its books, records, and accounts by the Administrator for purposes of investigation to ascertain compliance with rules, regulations, and orders referred to in paragraph (a)(9) of this section.

(11) Recipient shall furnish such relevant procurement information, not included in its affirmative action program as may be requested by the MBE Resource Center. Upon the request of the recipient, the Center shall keep such information confidential to the extent necessary to protect commercial or financial information or trade secrets to the extent permitted by law.

(12) In the event of the recipient's noncompliance with the non-discrimination clauses of this agreement, or with the provisions of section 905 of the Act, the Civil Rights Act of 1964, or with any other Federal civil rights act, or with any rules, regulations, or orders issued under such acts, this contract will, after notice of such noncompliance, and after affording a reasonable opportunity for compliance, be canceled, terminated, or suspended in whole or in part and the recipient may be declared ineligible for further

Federal financial assistance in accordance with procedures authorized in section 905 of the Act, or as otherwise provided by law.

(13) The recipient shall not enter into any contract or contract modification whether for the furnishing of supplies or services or for the use of real or personal property, including lease arrangements, or for construction, in connection with a project, program or activity which receives financial assistance under the Rail Acts with a contractor debarred from or who has not demonstrated eligibility for Federal or federally assisted contracts, and will carry out such sanctions and penalties for violation of this part as may be imposed upon contractors and subcontractors by the Administrator or any other authorized Federal official. The recipient shall insure that the clauses required by 41 CFR 60–1.46 implementing Executive Order 11246 will be placed in each non-exempt federally assisted construction contract.

(14) The recipient agrees to comply with and implement the written affirmative action program as approved by the Administrator pursuant to § 265.17 of title 49 CFR.

(15) The recipient agrees to notify the Administrator promptly of any law suit or complaint filed against the recipient alleging discrimination on the basis of race, color, national origin or sex.

(16) The recipient shall include the preceding provisions of paragraphs (a) (1) through (15) of this section in every contract or purchase order, whether for the furnishing of supplies or services or for the use of real or personal property, including lease arrangements, or for construction relating to projects, programs or activities financed in whole or in part under the Rail Acts. The recipient shall cause each such contractor or vendor to include the provisions of paragraphs (a) (1) through (15) of this section in every subcontract. The recipient will take such action with respect to any such contract or purchase order as the Administrator may direct as a means of enforcing such provisions including sanctions for noncompliance; provided, however, that in the event the recipient becomes

Federal Railroad Administration, DOT

§ 265.13

involved in, or is threatened with, litigation with a contractor or vendor as a result of such direction by the Administrator, the recipient may request the United States to enter into such litigation.

§ 265.9 Affirmative action program—General.

Recipients of financial assistance under the Rail Acts and their contractors, as specified herein, shall develop and maintain an affirmative action program to insure that persons and businesses are not discriminated against because of race, color, national origin or sex in programs, projects and activities financed in whole or in part through financial assistance provided under the Rail Acts, and that minorities and MBEs receive a fair proportion of employment and contractual opportunities which will result from such programs, projects and activities.

§ 265.11 Submission of affirmative action program.

(a) Each application for financial assistance under any of the Rail Acts shall, as a condition to its approval and the extension of any financial assistance pursuant to the application, contain or be accompanied by two copies of a written affirmative action program for review by and approval of the Administrator. Recipients that have already entered into an agreement or other arrangement providing for such assistance shall, within 60 days after the effective date of this part, develop and submit to the Administrator two copies of a written affirmative action program for review by and approval of the Administrator and thereafter maintain such program.

(b)(1) Beginning 30 days after the effective date of this part, and until 120 days after such date, each recipient shall require any contractor, as a condition to an award of a contract, for \$50,000 or more for services or products on a project receiving federal financial assistance under a program covered by section 905 of the Act:

(i) To furnish to the recipient a written assurance that it will, within 90 days after the date of the award, develop and maintain a written affirmative action program meeting the re-

quirements of this part for the project, program or activity covered by the contract,

(ii) To require each of its subcontractors receiving an award of a subcontract for \$50,000 or more within 120 days after the effective date of this part, to furnish to the contractor as a condition to such an award the written assurance described in paragraph (b)(1)(i) of this section.

(2) Beginning 120 days after the effective date of this part, each recipient shall require as a condition to the award of a contract or subcontract of \$50,000 or more that the contractor or subcontractor furnish a certificate to the recipient or contractor as appropriate that a written affirmative action program meeting the requirements of this part has been developed and is being maintained.

(3) Notwithstanding paragraphs (b)(1) and (2) of this section, each contractor or subcontractor having a contract or \$50,000 or more but less than 50 employees shall be required to develop and maintain a written affirmative action program only for contracts in accordance with § 265.13(c) of this part.

(4) A recipient or contractor shall not procure supplies or services in less than usual quantities or in a manner which is intended to have the effect of avoiding the applicability of this paragraph.

§ 265.13 Contents of affirmative action program.

(a) *General.* A prerequisite to the development of a satisfactory affirmative action program is the identification and analysis of problem areas inherent in minority employment and utilization of MBEs, and an evaluation of opportunities for utilization of minority group personnel and MBEs. Therefore, an affirmative action program to guarantee employment and contractual opportunities shall provide for specific actions keyed to the problems and needs of minority persons and MBEs including, where there are deficiencies based on past practices, and with respect to future plans for hiring and promoting employees or awarding contracts, the development of specific goals and timetables for the prompt achievement and maintenance of full

opportunities for minority persons and MBEs with respect to programs, projects and activities subject to this part.

(b) *Employment practices.* (1) The affirmative action program for employment showing the level of utilization of minority employees, and establishing a plan to insure representative opportunities for employment for minority persons shall be developed in accordance with the regulations of the Department of Labor at 41 CFR 60–2.

(2) Railroad applicants or recipients shall develop their program for each establishment in their organization and by job categories in accordance with the requirements of the Joint Reporting Committee of the Equal Employment Opportunity Commission and the Department of Labor. Other applicants, recipients or contractors may use any program format or organization which has been approved for use by other Federal agencies enforcing equal opportunity laws.

(3) The affirmative action program shall show the source of statistical data used.

(4) The affirmative action program shall include a listing by job category of all jobs which may be established or filled by the applicant, recipient or contractor as a result of the project, program or activity funded by federal financial assistance under the Rail Acts for the first five years of such project, program or activity or the period during which such project, program or activity will be undertaken, whichever is the lesser (“program period”).

(5) The affirmative action program shall set forth in detail a plan to insure that with respect to the project, program or activity financed in whole or in part through financial assistance under the Rail Acts, minority persons have an opportunity to participate in employment in proportion to the percentage of the minority work force in the area where the applicant’s, recipient’s or contractor’s operations are located as compared to the total work force, and that such minority persons have an equal opportunity for promotion or upgrading. Where appropriate because of prior underutilization of minority employees, the program

shall establish specific goals and time-tables to utilize minority employees in such projects, programs or activities in the above-mentioned proportion.

(c) *Contracts.* (1) The affirmative action program shall include details of proposed contracts in excess of \$10,000 to be awarded in connection with projects, programs and activities funded in whole or in part through financial assistance under the Rail Acts, including contracts for professional and financial services, for the program period. The details shall include a description of the services or products which will be sought including estimated quantities, the location where the services are to be provided, the manner in which proposals will be solicited (e.g., cost plus fixed fee, fixed price), the manner in which contracts will be awarded (e.g., competitive or sole source). The plan shall also give details as to bidding procedures, and information as to other qualifications for doing business with the applicant, recipient or contractor. Upon request by the applicant, recipient or contractor, any information submitted to the Administrator shall be kept confidential to the extent permitted by law.

(2) The affirmative action program shall review the procurement practices of the applicant, recipient or contractor for the full year preceding the date of the submission of the affirmative action program and evaluate the utilization of MBE in its procurement activities. Such evaluation of utilization of MBEs shall include the following:

(i) An analysis of awards of contracts to MBEs during such year describing the nature of goods and services purchased and the dollar amount involved; and

(ii) A comparison of the percentage of awards of contracts to MBEs (by number of contracts and by total dollar amount involved) to the total procurement activity of the applicant, recipient or contractor for said year.

(3) The affirmative action program shall set forth in detail applicant’s, recipient’s or contractor’s plan to insure that MBEs are afforded a fair and representative opportunity to do business with applicant, recipient or contractor

(both in terms of number of contracts and dollar amount involved) for the program period. Such plan shall identify specific actions to be taken to:

(i) Designate a liaison officer who will administer the MBE program;

(ii) Provide for adequate and timely consideration of the availability and potential of MBEs in all procurement decisions;

(iii) Assure that MBEs will have an equitable opportunity to compete for contracts, by arranging solicitation time for the preparation of bids, quantities, specifications, and delivery schedules so as to facilitate the participation of MBEs and by assisting MBEs who are potential contractors in preparing bid materials and in obtaining and maintaining suitable bonding coverage in those instances where bonds are required;

(iv) Maintain records showing that the policies set forth in this part are being complied with;

(v) Submit quarterly reports of the records referred to in paragraph (c)(3)(iv) of this section in such form and manner as the Administrator may prescribe; and

(vi) Where appropriate because of prior underutilization of MBEs, establish specific goals and timetables to utilize MBEs in the performance of contracts awarded.

(d) *Successor organizations.* Where applicant, recipient or contractor is a successor organization, its affirmative action program shall review the hiring and procurement practices of its predecessor organization or organizations.

§ 265.14 Determining the MBE status of a business.

FRA or a recipient may, on the basis of available information, determine that a business is not an MBE within the meaning of this part. This determination shall be final, except as provided in § 265.14-1, for that contract and other contracts being let by that contracting agency at the time of the determination. Businesses may correct deficiencies in their ownership and control and apply as MBEs only for future contracts.

[44 FR 36339, June 21, 1979]

§ 265.14-1 Appeals of determination of MBE status.

(a) *Filing.* Any firm who believes that it has been wrongly determined not to be an MBE under § 265.14 by the FRA or a recipient may file an appeal in writing with the Administrator. The appeal shall be filed no later than 30 days after the date of the determination. The Administrator may extend the time for filing or waive the time limit in the interest of justice, specifying in writing the reasons for so doing. Third parties who have reason to believe that a business has been wrongly denied or granted status as an MBE may advise the Administrator. This information is not considered an appeal pursuant to this section.

(b) *Decision to investigate.* The Administrator ensures that a prompt investigation is made of those cases with investigative merit (except those being reviewed on the merits by the Comptroller General), pursuant to prescribed DOT Title VI (49 CFR part 21) investigation procedures.

(c) *Status during the investigation.* The Administrator may deny the business in question eligibility to participate as an MBE in direct or FRA-assisted contracts let during the pendency of the investigation, after providing the business in question an opportunity to show cause by written statement to the Administrator why this should not occur.

(d) *Cooperation in investigation.* All parties shall cooperate fully with the investigation. Failure or refusal to furnish relevant information or other failure to cooperate is a violation of this part.

(e) *Determinations.* The Administrator will make one of the following determinations and so inform the business in writing of the reasons for the determination:

(1) The business is considered to be an MBE within the meaning of this part; or

(2) The business is not considered to be an MBE within the meaning of this part and is denied eligibility to participate as an MBE in any direct or FRA-assisted contract until a further determination is made by FRA that the

§ 265.15

business is an MBE within the meaning of this part.

[44 FR 36339, June 21, 1979]

§ 265.15 Implementation and maintenance of affirmative action program.

The affirmative action program with respect to employment and procurement practices shall set forth in detail applicant's recipient's or contractor's program to implement and maintain its recommended action program to insure that persons and businesses are not discriminated against because of race, color, national origin or sex, and that minorities and MBEs have equal employment and contractual opportunities with applicant, recipient or contractor. In developing its maintenance program for employment, applicants, recipients and contractors shall follow the applicable regulations of the Department of Labor implementing Executive Order 11246 at 41 CFR 60-2, subpart C, which provisions may also be helpful in implementing and maintaining applicant's recipient's or contractor's procurement program.

§ 265.17 Review of affirmative action program.

(a) Except as provided for contractors and subcontractors in § 265.11(b), each affirmative action program to be acceptable must have the written approval of the Administrator.

(b) The Administrator recognizes that there may be some exceptional situations where the requirements of § 265.13 through § 265.15 may not fulfill the affirmative action objectives sought or that those objectives may be better achieved through modified or different requirements. Accordingly, the applicant, recipient or contractor may request approval for modified or different requirements that embody the objectives of §§ 265.13 through 265.15. Such a request must include detailed showings that the particular situation is exceptional and that the modified or different proposals substantially comply with the objectives of this part. If the Administrator determines that the requirements for a detailed justification have been met, he may waive or modify these requirements or impose different require-

49 CFR Ch. II (10-1-04 Edition)

ments as he deems necessary to further the objectives sought herein.

Subpart C—Compliance

§ 265.19 Compliance information.

(a) Each recipient and contractor shall keep such records and submit to the Administrator complete and accurate reports, at such times, and in such form, and containing such information as the Administrator may determine to be necessary to enable him to ascertain whether the recipient or contractor has complied or is complying with this part. These records shall show in connection with the project, program or activity funded in whole or in part through financial assistance under the Rail Acts:

(1) Procedures which have been adopted to comply with the policies set forth in this part, including the establishment of a source list of MBEs;

(2) Specific efforts to identify and award contracts to MBEs; and

(3) Awards to MBEs on the source list required in paragraph (a)(1) of this section.

(b) Each recipient and contractor shall permit access by the Administrator during normal business hours to such of its books, records, accounts and other sources of information and its facilities as may in the opinion of the Administrator be necessary to ascertain compliance with this part.

(c) Each recipient and contractor shall make available to participants, beneficiaries and other interested persons, such information regarding the provisions of this part and the applicability to the program, project or activity under which the recipient received financial assistance from the Rail Acts or under which the contractor is awarded a contract and make such information available to them in such manner as the Administrator finds necessary to apprise such persons of the protections against discrimination assured them by the Act and this part.

§ 265.21 Conduct of investigations.

(a) The Administrator shall from time to time review the practices of recipients and contractors to determine whether they are complying with this part. The Administrator shall to the

fullest extent practicable seek the cooperation of recipients and contractors in obtaining compliance with this part and shall provide assistance and guidance to recipients and contractors to help them comply voluntarily with this part. As required by § 265.7(a)(6) of this part recipients and contractors shall from time to time review the practices of their contractors and subcontractors to determine whether they are complying with this part.

(b) Any person who believes himself or herself or any other person to be subjected to discrimination prohibited by this part, may file with the Administrator a written complaint. A complaint must be filed not later than sixty (60) days after the date complainant discovers the alleged discrimination, unless the time for filing is extended by the Administrator.

(c) The Administrator will make a prompt investigation in cases where a compliance review, report, complaint or other information indicates a possible failure to comply with this part.

(d)(1) If an investigation pursuant to paragraph (c) of this section indicates a failure to comply with this part, the Administrator shall within ten (10) days after such determination so inform the recipient or contractor in writing of the specific grounds for alleging noncompliance and the matter shall be resolved by informal means whenever possible. The notice shall provide that, if it has been determined that the matter is not resolved by informal means within thirty (30) days after the delivery of the notice, action will be taken as provided for in § 265.23.

(2) If an investigation does not warrant action pursuant to paragraph (d)(1) of this section, the Administrator shall within ten (10) days after such determination so inform the recipient, or contractor and the complainant, if any, in writing.

(e) No recipient, contractor or other person shall intimidate, threaten, coerce or discriminate against any individual for the purpose of interfering with any right or privilege secured by section 905 of the Act or this part, or because he or she made a complaint, testified, assisted or participated in any manner in an investigation, proceeding or hearing under this part. The

identity of complainants shall be kept confidential at their election during the conduct of any investigation, proceeding or hearing under this part. But when such confidentiality is likely to hinder the investigation the complainant will be advised for the purpose of waiving the privilege.

§ 265.23 Procedures for effecting compliance.

(a) Whenever the Administrator determines that any recipient, or contractor has failed to comply with the provisions of this part, or with any Federal civil rights statute, or with any order or regulation issued under such a statute, and such failure has not been resolved by informal means pursuant to § 265.21 of this part, the Administrator shall within ten (10) days after such determination notify such recipient or contractor, and the appropriate labor organization if the matter may appear to affect a person who is covered by a collective bargaining agreement, in writing of the specific grounds for alleging noncompliance, and the right of such persons to respond to such determination in writing or to request an informal hearing. Where the Administrator determines that substantial noncompliance exists and it is unlikely that compliance will be obtained, or that lack of good faith exists, or that other good cause exists, he may order that further financial assistance be suspended in whole or in part pending a final decision in the matter. Subject to the provisions of paragraphs (b) through (e) of this section, the recipient or contractor shall have sixty (60) days from the date of delivery of the notice within which to comply. The recipient or contractor may be entitled to additional time if it is demonstrated that compliance is not possible within the sixty day period and that the necessary initial curative actions were undertaken promptly and have been diligently prosecuted toward completion. The Administrator shall specify the last day upon which curative action must be completed to his satisfaction. Unless the Administrator determines that compliance cannot be reasonably attained, failure to take curative action shall be grounds for the Administrator to:

§ 265.23

(1) Direct that no further Federal financial assistance be provided to the recipient;

(2) Refer the matter to the Attorney General with a recommendation that an appropriate civil action be instituted;

(3) Exercise the powers and functions provided by title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d *et seq.*); or

(4) Take such other actions as may be provided by law or this part.

(b) Persons receiving notification and a directive pursuant to paragraph (a) of this section may within thirty (30) days after receipt respond to the notice in writing in lieu of requesting an informal hearing as specified in paragraph (c) of this section. The Administrator will make a determination as to compliance within thirty (30) days after receipt of such written response, and advise the person in writing of his determination. If the Administrator determines that compliance is reasonably attainable and that such person has failed to comply with the provisions of this part or with his determination within 30 days after receipt of his determination, the Administrator shall pursue the remedies set forth in the last sentence of paragraph (a) of this section.

(c) Persons receiving notification and a directive pursuant to paragraph (a) of this section may within ten (10) days after receipt request an informal hearing in lieu of filing a written response as specified in paragraph (b) of this section. The Administrator may, in his discretion, grant a request for an informal hearing for the purpose of inquiring into the status of compliance of such person. The Administrator will advise persons subject to his directive in writing as to the time and place of the informal hearings and may direct such persons to bring specific documents and records, or furnish other relevant information concerning their compliance status. When so requested, such person shall attend and bring the requested information. The time and place so fixed shall be reasonable and shall be subject to change for cause. The complainant, if any, shall be advised of the time and place of the hearing. The failure of such person to request a hearing or to appear at a hear-

49 CFR Ch. II (10–1–04 Edition)

ing for which a date has been set shall be deemed to be a consent to the applicability of the procedures set forth in paragraph (a) of this section.

(d) The hearing shall be conducted by a hearing officer appointed by the Administrator. Such hearings shall commence within twenty (20) days from the date the hearing is granted and shall be concluded no later than thirty (30) days from the commencement date. Parties to informal hearings may be represented by counsel or other authorized representative and shall have a fair opportunity to present any relevant material. Formal rules of evidence will not apply to such proceedings.

(e) *Decisions and notices.* (1) Within ten (10) days after the conclusion of such hearings, the hearing officer will advise the Administrator, in writing, of his views and recommendations as to compliance with this part and a copy of such decision shall be sent by registered mail, return receipt requested, to the recipient or contractor and participating labor organization. If the hearing officer in his decision determines that the recipient or contractor is in noncompliance with this part, he may, if he determines that it is unlikely that compliance will be obtained, or that a lack of good faith exists, or for other good cause, order that further financial assistance be suspended in whole or in part, pending a decision by the Administrator in the matter.

(2) The recipient, contractor or labor organization may file exceptions to the hearing officer's decision, with his reasons therefor, with the Administrator within thirty (30) days of receipt of the initial decision. Within twenty (20) days, after the time for filing exceptions, the Administrator shall determine, in writing, whether or not the parties involved are in compliance with this part. A copy of the Administrator's decision will be given to the recipient, contractor, labor organization, if appropriate, and to the complainant, if any.

(3) If the Administrator determines that compliance can reasonably be attained, his decision shall provide that

if such person fails or refuses to comply with the decision of the Administrator within thirty (30) days after receipt of the decision, the Administrator shall:

- (i) Direct that no further Federal assistance be provided to such a person;
- (ii) Refer the matter to the Attorney General with a recommendation that an appropriate civil action be instituted;
- (iii) Exercise the powers and functions provided by title VI of the Civil Rights Act of 1964; and/or
- (iv) Take such other actions as may be provided by law or this part.

(4) A recipient or contractor adversely affected by a decision of the Administrator issued under paragraph (a) or (b) of this section shall be restored to full eligibility to receive Federal assistance or award of a federally assisted contract if the recipient or contractor takes complete curative action to eliminate the noncompliance with this part and if the recipient or contractor provides reasonable assurance that the recipient or contractor will fully comply with this part.

§ 265.25 Other information.

(a) Each person required to submit a written affirmative action program pursuant to this part shall include as an appendix thereto, the following information except to the extent such information is already provided as part of the application for financial assistance;

(1) A brief description of other pending applications to other federal agencies for financial assistance, and of federal assistance being provided at the time of submission of the affirmative action program;

(2) A statement of any civil rights compliance reviews regarding applicant or recipient conducted in the two year period before the application, or affirmative action program; the name of the agency or organization performing the review, and the findings of the review;

(3) Where the project, program or activity receiving financial assistance will require the relocation of persons and businesses, a description of the requirements and steps used or proposed to guard against unnecessary impact

on persons on the basis of race, color, or national origin;

(4) Where the project, program or activity receiving financial assistance will result in the construction of new facilities or expansion of existing facilities, a description of the requirements and steps used or proposed to guard against unnecessary impact on persons on the basis of race, color or national origin;

(5) Where paragraphs (a) (3) and (4) of this section are applicable, additional data such as demographic maps, racial composition of affected neighborhoods, or census data should be provided where necessary or appropriate to evaluate the impact of projects, programs and activities referred to in paragraphs (a) (3) and (4) of this section.

APPENDIX A TO PART 265

The following are the financial assistance programs to which this part applies:

(a) *Railroad Revitalization and Regulatory Reform Act of 1976*, (1) purchase of redeemable preference shares or trustee certificates pursuant to section 505;

(2) Guarantee of obligations, the proceeds of which will be used to acquire, or rehabilitate or improve rail facilities, or equipment, pursuant to section 511; and

(3) Grants and contracts made to implement the Northeast Corridor project under section 704.

(b) *Regional Rail Reorganization Act of 1973, as amended*, (1) loans made by the United States Railway Association (USRA) pursuant to section 211;

(2) Purchase of securities of the Consolidated Rail Corporation pursuant to section 216; and

(3) Grants to States, or local or regional authorities for rail continuation assistance under section 402.

(c) *Department of Transportation Act*, (1) grants to States for rail freight assistance programs under section 5 (sec. 803 of the Railroad Revitalization and Regulatory Reform Act of 1976); and

(2) Grants under section 4(i) for the planning, preservation and conversion of rail passenger terminals of historical or architectural significance.

(d) *Rail Passenger Service Act*, (1) grants to Amtrak under section 601.

**PART 266—ASSISTANCE TO STATES
FOR LOCAL RAIL SERVICE UNDER
SECTION 5 OF THE DEPARTMENT
OF TRANSPORTATION ACT**

- Sec.
266.1 Definitions.
266.3 Rail Service Assistance Program.
266.5 State eligibility.
266.7 Project eligibility.
266.9 Federal/State share.
266.11 Allowable costs.
266.13 Distribution of funds.
266.15 Requirements for State Rail Plan.

266.25 Waivers and modifications.

AUTHORITY: Sec. 5 of the Department of Transportation Act (49 U.S.C. 1654), as amended by the Local Rail Service Assistance Act of 1978, Pub. L. 95–607, 92 Stat. 3059.

SOURCE: 44 FR 51129, Aug. 30, 1979, unless otherwise noted.

§ 266.1 Definitions.

As used in this part:

Acquisition assistance means funds granted to a State under section 5(f)(2) of the Department of Transportation Act (49 U.S.C. 1654(f)(2)) to cover the cost of acquiring by purchase, lease, or in such other manner as the State considers appropriate, a line of railroad or other rail properties, or any interest therein for existing or future rail freight service.

Act means the Department of Transportation Act (49 U.S.C. 1650 *et seq.*).

Administrator means the Administrator of the Federal Railroad Administration or the Administrator's delegate.

Cash means an outlay of funds.

Commission means the Interstate Commerce Commission or any successor Federal agency to the relevant activity.

Common carrier means a person providing railroad transportation for compensation who is subject to the jurisdiction of the Commission under subchapter I of chapter 105 of title 49 of the U.S.C.

Designated State Agency means the State agency designated under section 5(j)(2) of the Act (49 U.S.C. 1654(j)(2)).

Entitlement means the amount of assistance which a State is eligible to re-

ceive annually under section 5(h) of the Act (49 U.S.C. 1654(h)).

Equipment means rolling stock of the kind generally used by American railroads in revenue freight service.

Facilities means track, ties, roadbed and related structures including terminals, team tracks and appurtenances, bridges and tunnels, and other structures used or usable for rail service operations.

FRA means the Federal Railroad Administration.

Federal Share means the contribution by the Administrator under section 5(g) of the Act (49 U.S.C. 1654(g)) to a State's rail service assistance program.

Final System Plan means the plan approved by the Congress under section 208 of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 718).

Gross ton miles per mile means the combined weight of locomotives and all trailing cars and their contents used in revenue freight trains multiplied by the number of route miles traveled and divided by the number of route miles of the line.

Line means a line of railroad.

Maintenance means inspection and light repairs, emergency repairs and a planned program of periodic maintenance which is necessary to keep a line at its existing condition or to comply with FRA Class 1 Safety Standards.

Planning assistance means funds granted to a State under section 5(i) of the Act (49 U.S.C. 1654(i)) to meet the cost of establishing (including developing a planning application), implementing, revising, and updating the State Rail Plan required by section 5(j) of the Act (49 U.S.C. 1654(j)).

Planning Work Program means that portion of a State's planning application which outlines the State's plan for establishing, implementing, revising, or updating a State Rail Plan which meets the requirements of section 5(i) of the Act, (49 U.S.C. 1654(i)).

Program operation assistance means funds granted to a State to cover those administrative costs allowable under Federal Management Circular 74–4.

Rail Act means the Regional Rail Reorganization Act of 1973 (45 U.S.C. 701 *et seq.*).

Rail banking means the acquisition of an interest in a rail right-of-way sufficient to ensure its preservation for future rail freight service.

Rail facility construction assistance means funds granted to a State under section 5(f)(5) of the Act (49 U.S.C. 1654(f)(5)) to cover the cost of constructing rail or rail related facilities (including new connections between two or more existing lines, intermodal freight terminals, sidings, and relocation of existing lines) for the purpose of improving the quality and efficiency of rail freight service.

Rail service continuation assistance means funds granted to a State under section 5(f)(1) of the Act (49 U.S.C. 1654(f)(1)) to cover rail service continuation payments for the difference between the revenue attributable to a line of railroad and the avoidable costs of providing rail service on that line, together with a reasonable return on the value of the line and other rail properties related to that line, all as determined in accordance with 49 CFR part 1121 with the following exceptions:

(1) Where service was eligible to be subsidized under section 402(c)(2) (A) and (B) of the Rail Act, rail service continuation assistance means funds for payments determined in accordance with 49 CFR part 1125; and

(2) Where service was eligible to be subsidized under section 402(c)(2)(C) of the Rail Act, rail service continuation assistance means funds for payments calculated, to the greatest extent possible, in a manner consistent with 49 CFR part 1121.

Rehabilitation or improvement assistance means funds granted to a State under section 5(f)(3) of the Act (49 U.S.C. 1654(f)(3)) to cover the cost of replacing or upgrading, to the extent necessary to permit adequate and efficient rail freight service, facilities needed to provide service on a line.

Relocation costs means actual expenses directly incurred in moving shippers from a line to a new location.

State means any State or the District of Columbia in which a common carrier maintains any line.

State Rail Plan means the current plan, including all updates, revisions, and amendments required by section 5(j)(1) of the Act (49 U.S.C. 1654(j)(1)).

Substitute service assistance means funds granted to a State under section 5(f)(4) of the Act (49 U.S.C. 1654(f)(4)) to cover the cost of reducing the costs of lost rail service in a manner less expensive than continuing rail service and includes (but is not limited to) the acquisition, construction, or improvement of facilities for the provision of substitute freight transportation services and relocation costs.

§ 266.3 Rail Service Assistance Program.

(a) *Scope of the program.* The Rail Service Assistance Program includes:

- (1) Rail service continuation assistance;
- (2) Acquisition assistance;
- (3) Rehabilitation or improvement assistance;
- (4) Substitute service assistance;
- (5) Rail facility construction assistance;
- (6) Planning assistance; and
- (7) Program operations assistance.

(b) *Special limitations on planning assistance and program operation assistance.* (1) A State is eligible to receive up to \$100,000, or 5 percent of its entitlement, whichever is greater, as planning assistance; and

(2) A State is eligible to receive up to 5 percent of the total amount of funds granted to it each fiscal year under paragraphs (a)(1) to (5) of this section as program operation assistance.

§ 266.5 State eligibility.

(a) *General eligibility requirements under the rail service assistance program.* A State is eligible for assistance if:

(1) The State has certified pursuant to section 5(j)(4) of the Act that it has or will adopt and maintain adequate procedures for financial control, accounting and performance evaluation in order to assure proper use of Federal funds;

(2) For purpose of establishing a State Rail Plan, the State has submitted, in accordance with § 266.17(e) of this part, a planning application; and

(3) For any other assistance,

(i) The State has established an adequate plan for rail services in the State which (A) meets the requirements of § 266.15 of this part; (B) is part of an

§ 266.7

49 CFR Ch. II (10–1–04 Edition)

overall planning process for all transportation services in the State; (C) includes a suitable procedure for updating, revising, and amending such plan; and (D) as updated, revised, or amended has been approved by the Administrator;

(ii) Such State Rail Plan (A) is administered or coordinated by a designated State agency; (B) provides for the equitable distribution of resources; and (C) includes a methodology for determining the ratio of benefits to costs of projects for which acquisition assistance, rehabilitation or improvement assistance, substitute service assistance, and rail facility construction assistance is sought;

(iii) The State agency:

(A) Has authority and administrative jurisdiction to develop, promote, supervise, and support safe, adequate, and efficient rail transportation services;

(B) Employs or will employ, directly or indirectly, sufficient trained and qualified personnel;

(C) Maintains or will maintain adequate programs of investigation, research, promotion, and development with provision for public participation; and

(D) Is designated and directed solely or in cooperation with other State agencies to take all practicable steps to improve transportation safety and to reduce transportation-related energy utilization and pollution; and

(iv) The State undertakes to immediately notify the Administrator of any changes in conditions which might affect its compliance with this section.

§ 266.7 Project eligibility.

(a) *Rail service continuation assistance, acquisition assistance and substitute service assistance.* A project is eligible for assistance under § 266.3(a) (1), (2), and (4) of this part, respectively, if:

(1) The Commission pursuant to 49 U.S.C. 10903 has found since February 5, 1976, that the public convenience and necessity permit the abandonment and discontinuance of rail service on the line related to the project, except that any such line or related project eligible prior to October 1, 1978, is eligible only until September 30, 1981 and any such line eligible for rail service continuation assistance shall receive such as-

sistance for no more than 36 months after October 1, 1978;

(2) The line related to the project was eligible for assistance under section 402 of the Rail Act (45 U.S.C. 762), except that any such line or related project is eligible only until September 30, 1981; or

(3) For purposes of acquisition assistance, the line related to the project is listed for possible inclusion in a rail bank in Part III, Section C of the Final System Plan.

(b) *Rehabilitation and improvement assistance and rail facility construction assistance.* A project is eligible for assistance under § 266.3(a) (3) and (5) of this part, respectively, if:

(1)(i) The Commission has not made a finding that the public convenience and necessity would require or permit abandonment or discontinuance of rail service on the line related to the project;

(ii) Any pending application for a certificate of abandonment or discontinuance of rail service on the line related to the project is withdrawn within a reasonable period (as determined by the Administrator) following the execution of the grant agreement and before Federal funds are disbursed for the project; and

(iii)(A) The line related to the project is certified by the railroad as having carried three million gross ton miles per mile or less during the prior year; or

(B) The line related to the project is certified by the railroad in a written statement which identifies the name of the line, the State or States in which it is located, its length, termini, and termini mile posts as having carried between three and five million gross ton miles per mile during the prior year, and the Administrator has determined that the project is consistent with proposals made under the authority of subsections 5 (a) through (e) of the Act (49 U.S.C. 1654 (a)–(e));

(2)(i) An application for a certificate of abandonment or discontinuance of rail service on the line related to the project has been filed with the Commission during the period February 5, 1976 through December 31, 1978, whether or not such application has been granted; or

(ii) During the period February 5, 1976, through December 31, 1978, the Commission has found that the public convenience and necessity would require or permit abandonment or discontinuance of rail service on the line related to the project irrespective of when the application was filed;

(3) The line related to the project is listed for possible inclusion in a rail bank in Part III, Section C of the Final System Plan; or

(4) The line related to the project was eligible to be acquired under section 402(c)(3) of the Rail Act (45 U.S.C. 762(c)(3)).

(c) Projects eligible under paragraphs (b)(2), (b)(3), and (b)(4), of this section are eligible only until September 30, 1981. Projects initially eligible under paragraph (b)(2) of this section, may subsequently become eligible under paragraph (b)(1) of this section, if the Commission issues a new certificate of public convenience and necessity with respect to the line related to the project.

§ 266.9 Federal/State share.

(a) *Federal share.* The Federal share of allowable costs under the Rail Service Assistance Program is 80 percent, with the exception that the Federal share of payments to be covered by rail service continuation assistance shall be 70 percent for any third twelve month period which begins on or after October 1, 1980 that such assistance is provided.

(b) *State share-general.* The State share of allowable costs under the Rail Service Assistance Program shall be provided either in cash or through eligible in-kind benefits which would not otherwise have been provided. When more than the required State share is provided during the Federal fiscal year beginning October 1, 1978, or thereafter, the amount in excess of the required State share may be carried forward to subsequent fiscal years. The State share of allowable costs under the Rail Service Assistance Program may not be satisfied directly or indirectly by any Federal funds unless the funds are provided through a Federal program which specifically authorizes the use of such funds to satisfy the non-Federal

share of a Federally subsidized program.

(c) *In-kind benefits—(1) Eligible types of benefits and their valuation.* The following types of in-kind benefits are eligible when they are provided for projects eligible under § 266.7 of this part (whether or not Federal assistance is requested for the projects) or they are activities which would be eligible for planning and program operation assistance. Eligible in-kind benefits are valued as follows:

(i) The value of forgiven taxes, such as those portions of gross receipts or revenue taxes which are applicable to an approved project or property taxes on project related property, shall be the amount which would otherwise have been levied by the taxing authority. Forgiveness may be through exemption or remission;

(ii) The value of trackage rights secured by a State for a common carrier shall be the amount paid by railroads for comparable rights on comparable rail freight properties;

(iii) The value of State salaries for State public employees working in the State Rail Service Assistance Program, shall be consistent with rates paid for similar work by state public employees working in comparable state programs but shall not include overhead or general administrative costs;

(iv) The value of donations by the State or by a third party on behalf of the State of real property or tangible personal property of the kind necessary for safe and efficient operation of rail freight service, such as State or locally owned or leased buildings used in rail freight operations or equipment or materials, shall be determined as follows:

(A) The value of State tangible personal property shall be established at the State's actual cost in accordance with Federal Management Circular 74-4;

(B) The value of donated tangible personal property shall be determined in accordance with Attachment F of Office of Management and Budget Circular (OMB) A-102;

(C) The value of State real property shall be established at the State's actual cost in accordance with Federal Management Circular 74-4, if at least one independent appraisal based on the

§266.11

results of a title search was performed when the property was purchased by the State, otherwise it shall be valued at the fair market value as established by at least one independent appraisal based on the results of a title search at the time the state proposes to make the property available as in-kind benefit; and

(D) The value of donated real property shall be its fair market value, at the time of donation to the State, as established by at least one independent appraisal based on the results of a title search;

(2) *Eligibility criteria.* To be applied toward the State share, in-kind benefits must:

(i) Be verifiable from the State's records;

(ii) Be necessary and reasonable for proper and efficient accomplishment of the objectives of the Rail Service Assistance Program;

(iii) Be provided for in the approved grant budget; and

(iv) Be approved under paragraph (3) of this paragraph (c).

(v) The State shall submit such information as the Administrator may request to verify the value of in-kind benefits.

(3) *Request for approval.* A request for approval of the in-kind benefits are to be applied and shall include the following:

(i) Full name and principal business address of the contributor if other than grantee;

(ii) Detailed documentation of the in-kind benefits including identification of the kind of in-kind benefits to be provided as well as their estimated value. When in-kind benefits are to be provided by a third party, a copy of the executed agreement between the State and the third party; and

(iii) Certification by the State that the contribution will be used solely for the purposes documented.

§266.11 Allowable costs.

Allowable costs include only the following costs which are properly allocable to the work performed: Planning and program operation costs which are allowed under Federal Management Circular 74-4; and costs of projects eligible under §266.7 of this part. All al-

49 CFR Ch. II (10-1-04 Edition)

lowable costs shall be authorized by a fully executed grant agreement. A State may incur costs prior to the execution of a grant agreement only if the Administrator, based on the State's demonstration of a compelling need to incur costs prior to the execution of a grant agreement, has authorized the costs in writing prior to their incurrence by the State.

§266.13 Distribution of funds.

(a) *Formula.* Funds appropriated for or reallocated in any fiscal year (in this section referred to jointly as "funds") are to be distributed to each State as follows:

(1) Two-thirds of the funds will be allocated in the ratio which a State's rail mileage that, in accordance with 49 U.S.C. 10904(d), is either potentially subject to abandonment or is to become the subject of an application for a certificate of abandonment or discontinuance which a carrier plans to submit, but has not yet submitted, bears to the total such rail mileage in all the States;

(2) One-third of the funds will be allocated in the ratio which a State's rail mileage for which the Commission has found within three years prior to the first day of the fiscal year for which the funds are being allocated that the public convenience and necessity permits the abandonment, or the discontinuance, of rail service on such rail mileage, bears to the total such rail mileage in all the States. Until September 30, 1981, such rail mileage includes the rail mileage which was eligible under the Rail Service Assistance Program pursuant to section 402 of the Rail Act, and all rail mileage which, prior to October 1, 1978, had been included for formula allocation purposes. The Administrator will calculate rail mileage under this paragraph as of October 1 of each year; and

(3) The above calculations will be adjusted if necessary so that no State receives less than 1 percent of the funds appropriated for a fiscal year.

(b) *Reallocation.* The Administrator will reallocate among the States funds which have not been granted under an executed grant agreement by the end of the fiscal year for which the funds were appropriated and funds determined by

a Federal audit to be in excess of allowable costs when they have not been granted under an executed grant agreement by the end of the fiscal year in which the Federal audit is made. Reallocated funds are distributed in accordance with the allocation formula described in paragraph (a) of this section.

(c) *Interstate sharing of allocated funds.* Where not in violation of State law, two or more States, which are eligible to receive assistance under the Rail Service Assistance Program pursuant to §266.5 of this part may combine any portion of their entitlements for purposes of conducting any eligible project of mutual benefit provided that they enter into an agreement for this purpose.

§266.15 Requirements for State Rail Plan.

(a) *State planning process.* The State Rail Plan shall be based on a comprehensive, coordinated and continuing planning process for all transportation services within the State and shall be developed with an opportunity for participation by persons interested in rail activity in the State and adjacent States where appropriate. At a minimum, the State shall hold a public hearing if, on the basis of reasonable public notice appearing in the press, there is sufficient public interest to justify a hearing. Public notice shall be given, in accordance with applicable State law and practice concerning comparable matters, that a draft of the State Rail Plan is available for public inspection at a reasonable time in advance of the hearing. The State shall enable local and regional governmental bodies to review and comment on appropriate elements of the State Rail Plan. Provisions shall also be made for updating, revising, and amending the State Rail Plan.

(b) *Format of the State Rail Plan.* Each item submitted in response to a requirement of this section shall reference that requirement by subsection, paragraph, and subparagraph.

(c) *Contents of the State Rail Plan.* Each State Rail Plan shall:

(1) Specify the objectives of the State's Rail Service Assistance Program and explain how the implementa-

tion of the State Rail Plan will accomplish these objectives and explain relevant data sources, assumptions, analytical methodology, other legal constraints and special problems or conditions which will aid the public in understanding the State Rail Plan;

(2) Contain an illustration of the State's entire rail system on suitable scale maps of the State highway system (such as a reduction of the County Highway Planning Series of maps), designating with respect to each line listed under subparagraph (3) of this subsection, including all lines connecting to them:

- (i) The operating carrier or carriers;
- (ii) Freight traffic density, and
- (iii) Location of passenger service.

These maps shall be accompanied by a written description of the service provided on each line;

(3) Identify the following classes of rail service within the State:

(i) Lines in the State which are eligible for assistance under §266.7 of this part other than those included in paragraph (c)(3)(ii) of this section;

(ii) Lines in the State which a common carrier has identified on its system diagram map submitted under 49 CFR 1121.20(b) (1) and (2) as potentially subject to abandonment and lines which are anticipated to be the subject of an abandonment or discontinuance application within three years following the date of submission;

(iii) [Reserved]

(iv) Lines in the State for which abandonment or discontinuance applications are pending;

(v) Lines in the State which are involved in the following kinds of proposals that have been submitted to the Commission for approval or are in the process of negotiation, to the extent that this information is publicly available:

- (A) Mergers;
- (B) Consolidations;
- (C) Reorganizations;
- (D) Purchases by other common carriers; or
- (E) Other unification and coordination projects.

(vi) Rail projects for which the State plans to request Federal assistance or approval as in-kind benefits; and

§ 266.15

49 CFR Ch. II (10–1–04 Edition)

(vii) Rail projects for which a State provides or plans to provide assistance from sources other than the Rail Service Assistance Program, including the estimated cost of the projects;

(4) Establish and describe screening criteria to be used in selecting the eligible lines which the State analyzes in detail, identify these lines, and explain how the application of the screening criteria resulted in their selection;

(5) Describe the State's methodology for determining the ratio of benefits to the costs of proposed projects eligible under § 266.7 of this part (except projects to be funded with rail service continuation assistance);

(6) Include, to the extent that the information is available to the State, the following data for each line the State has selected to analyze in detail:

(i) Annual freight tonnage and carloads segregated by commodity type and indicating any seasonal traffic fluctuations and the number of shippers and receivers on the line aggregated by type (e.g., grain elevator, power plant, heavy manufacturing), including identification of information which a shipper wishes the Administrator to consider confidential to the extent permitted by law;

(ii) Revenues and costs of providing rail freight service on the line;

(iii) Condition of the related rail facilities and equipment, and for a line eligible under § 266.7(b) of this part, a description of the particular rail facilities involved in any project a State may be considering on the line;

(iv) When the State is considering a line for rail service continuation assistance, projections of freight traffic needs on the line for at least the three succeeding calendar years and estimates of the amount and type of equipment, the condition of the rail facilities, and the level of service necessary to satisfy the projected traffic needs as well as estimates of the revenue and costs of providing this service; and

(v) When the State is considering a project eligible under § 266.7(b) of this part, the amount of funds expended for the maintenance of the line and the kinds of work performed during the five year period preceding its eligibility.

(vi) When the State is considering a line for rail banking, a description of the line's future economic potential, such as the existence of fossil fuel reserves or agricultural production likely to be served;

(7) Describe the alternatives which the State will analyze in applying the methodology described in paragraph (c)(5) of this section, such as: Rail service continuation payments, rehabilitation or improvement, acquisition, rail facility construction, potential for moving freight by alternate modes, or abandonment or discontinuance of rail freight service;

(8) Apply the methodology described in paragraph (c)(5) of this section to each line the State has selected to analyze in detail;

(9) Specify the State's decision regarding the alternative selected for each line the State has analyzed in detail and include the following:

(i) An indication of whether Federal assistance will be requested or other funds will be used to implement the alternative selected;

(ii) An identification of lines which may be affected by the alternative selected;

(iii) An explanation of how the alternative selected contributes to the accomplishment of the State's objectives as stated in paragraph (c)(1) of this section; and

(iv) A statement of the projected future of the line after the alternative selected is implemented and the line is no longer eligible for rail service continuation assistance under § 266.7(a) of this part or after the payback period used in the State's benefit-cost analysis, whichever is appropriate;

(10) Describe the planning process participation of local and regional governmental bodies, the railroads, railroad labor, rail service users, and the public in general;

(11) Describe the overall planning process for all transportation services in the State; and

(11A) Indicate how the overall planning process in the State addresses the need to improve national energy efficiency, reduce the national use of petroleum and natural gas, and increase the national use of coal.

(12) Include a program of projects which identifies the projects for which the State expects to submit applications and the anticipated submission date. The program shall group the proposed projects in the order they comply with the State's criteria and goals for assistance, and shall:

(i) Identify the type of project (i.e., rail service continuation payments, acquisition, rehabilitation or improvement, rail facility construction, or substitute service), its location, and duration; and

(ii) Include the anticipated amount of funds to be requested for each project:

(d) *Updates, revisions, and amendments of the State Rail Plan*—(1) *General*. As provided for in paragraph (e) of this section, State Rail Plans shall be updated at least on an annual basis but may be revised more frequently at the discretion of the State in accordance with its program needs. Such updates shall be subject to the same review, public participation and approval procedures by the State and FRA as the original State Rail Plan.

(2) *Contents*. Annual updates shall include the following:

(i) A response to unanswered FRA comments on previously submitted updates, revisions, amendments, or the original State Rail Plan;

(ii) An update of information in previous submittals which is no longer accurate as a result of plan implementation, action by a governmental entity or railroad, or changed conditions;

(iii) For lines receiving rail service continuation assistance, inclusion of revenue and cost information from the past year's operating experience and a reevaluation of service based on these new data;

(iv) Updating of the maps and descriptions required under paragraph (c)(2) of this section;

(v) Analysis of any new projects developed by the State in accordance with paragraphs (c)(4), (5) and (6) of this section;

(vi) Changes in agency responsibilities and authority including ability to provide the non-Federal share; and

(vii) Revisions in the State's policies, objectives or long-range expectations.

(e) *Adoption and submission of State Rail Plan and annual updates*. An original and five copies of the State Rail Plan, and any amendments, revisions, or updates shall be submitted to FRA for review and approval with a certification by the Governor, or by the Governor's delegate, that the submission constitutes the State Rail Plan established by the State as provided in section 5(j) of the Act. The State Rail plan, and all amendments, revisions, and updates shall be submitted to the FRA through the appropriate Federal Highway Division Office. A current list of mailing addresses of the above offices will be provided by FRA to each State.

(f) *Review of the State Rail Plan and Updates*. The State Rail Plan and all amendments, revisions, and updates shall analyze in accordance with this section all projects for which the State anticipates requesting rail service assistance, other than planning assistance, during the fiscal year. In accordance with § 266.17(b) of this part, a project for which funds are requested must have been addressed in a previously approved State Rail Plan or update. If the Administrator determines that the State Rail Plan or update is not in accordance with this part, the Administrator will notify the State in writing setting forth the Administrator's reasons for such a determination.

[44 FR 51129, Aug. 30, 1979, as amended at 45 FR 58038, Aug. 29, 1980; 48 FR 29274, June 24, 1983]

§ 266.17 Applications.

(a) *General*. (1) Applications for planning assistance shall comply with paragraphs (b), (c) and (e) of this section.

(2) Applications for rail service continuation assistance shall comply with paragraphs (b), (c), (d) and (f) of this section.

(3) Applications for acquisition assistance shall comply with paragraphs (b), (c), (d) and (g) of this section.

(4) Applications for rehabilitation or improvement assistance and rail facility construction assistance shall comply with paragraphs (b), (c), (d) and (h) of this section.

(5) Applications for substitute service assistance shall comply with paragraphs (b), (c), (d) and (i) of this section.

(b) *Submission.* (1) Applications shall be submitted by the designated State agency using the standard forms contained in Attachment M of Office of Management and Budget Circular No. A–102 (“OMB Circular A–102”). Each item submitted in response to a requirement of this section shall reference that requirement by subsection, paragraph, and subparagraph. Each application shall be consistent with the current State Rail Plan and analyzed in it.

(2) A State may apply for planning assistance to cover prospective costs at any time during the planning process.

(3) Exhibits previously filed with the Administrator need not be refiled unless the prior filing has been rendered obsolete by changed circumstances. Such prior filing shall be appropriately referenced by source, location of data and date of submittal.

(c) *Contents.* Each application shall include:

(1) Full name and principal business address of the applicant;

(2) Name, title, address and phone number of the person to whom correspondence regarding the application should be addressed;

(3) Budget estimates for the total amount of assistance required for projects or planning;

(4) Applicant’s proposed means of furnishing its share of the total costs of the projects, as well as copies of executed agreements between the agency and any third party which may be providing the non-Federal share or a portion thereof;

(5) Assurance by the chief executive officer of the applicant that the Federal funds provided under the Act will be used solely for the purpose for which the assistance will be provided and in conformity with limitations on expenditures under the Act and applicable regulations;

(6) Evidence that the applicant has established in accordance with Attachment G of OMB Circular A–102, adequate procedures for financial control, accounting and performance evalua-

tion in order to assure proper use of the Federal funds;

(7) Assurance by applicant’s chief executive officer that the timing of all advances by the applicant will comply with the Department of Treasury advance financing regulations (31 CFR part 205);

(8) Statement as to whether the applicant prefers to receive disbursement of Federal funds by advance payment or reimbursement;

(9) Opinion of applicant’s legal counsel showing that counsel is familiar with the corporate or other organizational powers of the applicant, that the applicant is authorized to make the application, that the applicant is eligible to participate in the Rail Service Assistance Program in accordance with the provisions of the Act and this part, and that the applicant has the requisite authority to carry out actions proposed in the application and to assume the responsibilities and obligations created thereby;

(10) Assurances that the applicant will comply with and that the program will be conducted in accordance with the following Federal laws, policies, regulations and pertinent directives:

(i) Title VI of the Civil Rights Act of 1964, 42 U.S.C. 2000d *et seq.*, and 49 CFR part 21;

(ii) Section 905 of the Railroad Revitalization and Regulatory Reform Act of 1976, 45 U.S.C. 803, and 49 CFR part 265;

(iii) The Rehabilitation Act of 1973, 29 U.S.C. 794 and 49 CFR part 27 (44 FR 31442, May 31, 1979) relating to non-discrimination on the basis of handicap; and

(iv) The State and Local Fiscal Assistance Act of 1972, 31 U.S.C. 1221 *et seq.* and 31 CFR part 51; and

(11) When two or more States desire to combine their entitlements or any portion of them for the purpose of funding a project, certification of the Governor or the Governor’s delegate of each State involved that it is a party to an interstate agreement as required under section 5(h)(4) of the Act (49 U.S.C. 1654(h)(4)). Such certification shall include the amount of money to be used from each State’s entitlement and which State is to enter into a grant for the project.

(d) *Additional contents.* In addition to meeting the requirements of paragraphs (b) and (c) of this section each application except when planning assistance is requested, shall include evidence that the agency submitting the application has the statutory authority and administrative jurisdiction to develop, promote, supervise and support safe, adequate, and efficient rail services; that it employs or will employ, directly or indirectly, sufficient trained and qualified personnel; that it maintains or will maintain adequate programs of investigation, research, promotion, and development with provision for public participation; and that it is designated and directed solely, or in cooperation with other State agencies, to take all practicable steps to improve transportation safety and to reduce transportation related energy utilization and pollution.

(e) *Planning assistance.* In addition to meeting the requirements of paragraphs (b) and (c) of this section, each application for planning assistance shall include a Planning Work Program which, together with such other information the State may choose to submit, demonstrates to the satisfaction of the Administrator that the State's proposed use of planning assistance will produce a State Rail Plan, or an update, amendment or revision which meets the requirements of § 266.15 of this part. The Planning Work Program shall include the following information:

(1) An explanation of how the State Rail Plan will be related to the overall planning process for transportation within the State. This explanation shall concentrate on the expectations of the State for the future of local rail freight services and consider such factors as likelihood of profitability of existing rail lines, necessity of rail service continuation payments, State acquisition of rail lines, use of alternate modes of transportation in lieu of rail freight service, and other long-term alternatives;

(2) A description of the methods by which the State will involve local and regional governmental bodies and the public generally in its rail planning process, including its methods of pro-

viding for equitable distribution of resources;

(3) An identification of the data to be obtained on the rail network and rail services in the State, the sources of this data, and the methodology to be employed in the collection of the data;

(4) A description of the method by which the State will develop the State Rail Plan, including a brief description of discrete tasks or activities to be accomplished; and

(5) A list of the individuals responsible for the planning, a work schedule and a budget.

(f) *Rail service continuation assistance.* In addition to meeting the requirements of paragraphs (b), (c), and (d) of this section, each application for rail service continuation assistance shall include the following:

(1) The amount of the estimated rail service continuation payment for each line; and

(2) A description of the arrangements which the applicant has made for operation of the rail services to be subsidized including copies of the proposed operating agreements, leases, or other compensation agreements under which service is to be provided, and the results of the application's preaward audit of proposed operators and equipment leasing companies if the equipment to be used in providing the rail service is to be leased by the proposed operator.

(g) *Acquisition assistance.* In addition to meeting the requirements of paragraphs (b), (c), and (d) of this section, each application for acquisition assistance shall include the following:

(1) Copies of the results of a title search, and the basis for the proposed acquisition price including two independent valuation appraisals by qualified appraisers. Such appraisals shall be performed in accordance with the "Uniform Appraisal Standards for Federal Land Acquisition" proposed by the Interagency Land Acquisition Conference and shall be based on the results of a title search and comparable sales and shall take cognizance of all easements, encumbrances and restrictions that may affect the value of the property. Such appraisals shall be reviewed by a State Review appraiser to establish just compensation;

(2) Written assurance that the acquisition is being undertaken in accordance with 49 CFR 25.253, 25.255, 25.257, and 25.259 to the greatest extent practicable under State law and fully in compliance with 49 CFR 25.261(a) and 25.263;

(3) Written assurance that the owner of the property to be acquired has been advised of the requirements of 49 CFR 25.259 or will be advised of such requirements prior to the consummation of the acquisition;

(4) A description of the necessary steps, and timing for completion of the acquisition;

(5) When rail service is to be immediately provided over the line, a description of the arrangements which the applicant has made for operation of the rail service, including copies of the proposed operating agreements, leases, and other compensation agreements under which the service is to be provided, and a description of the means by which the State will continue rail service on the property to be acquired once assistance under the Act is terminated;

(6) For applications regarding rail banking, evidence that the properties for which assistance is requested have potential for rail freight service such as plans for agricultural development or existence of fossil fuel reserves, the State's anticipated timetable for returning the line to service, and its proposed use of the property while it is out of service including its maintenance plans; and

(7) Evidence that the anticipated benefits and costs of the proposed acquisition have been analyzed in accordance with the methodology established by the State under § 266.15(c)(5) of this part.

(h) *Rehabilitation or improvement assistance and rail facility construction assistance.* (1) In addition to meeting the requirements of paragraphs (b), (c), and (d) of this section, each application for rehabilitation or improvement assistance and rail facility construction assistance shall include the following:

(i) A detailed estimate of the materials and labor required to complete the work, the total estimated costs of the work, the estimated numbers and kinds of ties and other material, the

milepost termini involved, and a schedule for completion of the work;

(ii) Evidence that the anticipated benefits and costs of the proposed acquisition have been analyzed in accordance with the methodology established by the State under § 266.15(c)(5) of this part;

(iii) When rehabilitation assistance is requested—

(A) A copy of the document by which funds will be granted or loaned (at an interest rate determined by the State) to the owner of the rail properties or the operator of the rail service related to the project; and

(B) An assurance by the chief executive officer of the applicant that:

(1) Repaid loan funds and interest accumulated with respect to such funds will not be loaned or granted without the prior written approval of the Administrator;

(2) The Federal share of repaid loan funds will be placed in an interest-bearing account or with the prior written approval of the Administrator will be deposited by the borrower, for the benefit and use of the State, in a bank which has been designated by the Secretary of Treasury in accordance with 12 U.S.C. 265; and

(3) If the rehabilitated or improved facilities are not used for rail freight service during the useful life of the improvement the Federal share of the fair market value of the improvement or facility will be placed in an interest-bearing account or with the prior written approval of the Administrator will be deposited by the owner of the rail properties, for the benefit and use of the State, in a bank which has been designated by the Secretary of the Treasury in accordance with 12 U.S.C. 265;

(iv) An assurance by chief executive officer of the applicant that rehabilitated or improved facilities or newly constructed facilities will be maintained to prevent deterioration below the speed at which the line could be operated upon completion of the project during the period of time established as the payback period in the benefit-cost analysis of the project;

(2) In addition to meeting the requirements of paragraphs (b), (c), and

(d) and (h)(1) of this section, each application for a project eligible under § 266.7(b)(2)(i) (if the Commission has made a finding granting the application for abandonment and discontinuance) (ii), (3) or (4) shall also include the following:

(i) An indication of which of the following methods will be used to complete the work, including proposed contracts unless the work will be performed under method (A):

(A) On an actual cost basis by the operator or the applicant;

(B) By contracting for the work in accordance with Attachment O to OMB Circular A-102; or

(C) Under an existing continuing contract between the operator and another firm provided that the applicant can demonstrate the the costs are comparable to those under paragraph (h)(2)(i) (A) or (B) of this section; and

(ii) A description of the plans for inspection of the work including identification and qualifications of the staff to be responsible for the inspection and a proposed schedule of inspections; and

(iii) A description of the arrangements made for the operation of rail service over the property including copies of the proposed operating agreements, leases or other compensation agreements under which service is to be provided, and the proposed method of financing the operation of such rail service;

(3) In addition to meeting the requirements of paragraphs (b), (c), (d), and (h)(1) of this section, each application for a project eligible under § 266.7(b)(1) or (2)(i) (if the Commission has not made a finding granting the application for abandonment discontinuance) shall include an assurance by the common carrier which operates service on or owns the line related to the project that if an application for a certificate of abandonment or discontinuance has been filed with the Commission the application will be withdrawn within a reasonable period following execution of a grant agreement and before Federal funds are disbursed for the project; and

(4) When rail facility construction assistance is requested an assurance by the chief executive officer of the applicant that if the facility is abandoned,

sold, or converted to non-rail freight use during its useful life, FRA will be compensated an amount computed by applying FRA's participation in the cost of constructing the facility to the fair market value of the facility at the time it is abandoned, sold, or converted to non-rail use.

(i) *Substitute service assistance.* In addition to meeting the requirements of paragraphs (b), (c), and (d) of this section, each application for substitute service assistance shall include:

(1) A detailed description of the substitute service project, including evidence that the cost and scope of the project are limited to that necessary to replace the rail service being discontinued;

(2) Evidence that the anticipated benefits and costs of the proposed acquisition have been analyzed in accordance with the methodology established by the State under § 266.15(c)(5) of this part;

(3) For construction or improvement of fixed facilities, a description of the proposed work, including:

(i) The cost and timing of the work; and

(ii) An assurance by the chief executive officer of the applicant that the Federal share of the project will be repaid in accordance with Attachment N of OMB Circular A-102, if the properties are not used for rail freight service during the useful life of the project properties;

(4) For relocation costs, the following assurances by the chief executive officer of the applicant:

(i) When the rail line related to the project is eligible under section 5(k)(4)(A) of the Act (49 U.S.C. 1654(k)(4)(A)), an assurance that the applicant is requesting only such assistance as is needed to relocate the shippers which were receiving rail service on the line at the time the Commission found that the public convenience and necessity would permit discontinuance or abandonment of the rail service;

(ii) When the rail line related to the project is eligible under section 5(k)(4)(B) of the Act (49 U.S.C. 1654(k)(4)(B)), an assurance that assistance is being requested to relocate only the shippers who received rail service on the line as of April 1, 1976; and

(iii) An assurance, and the basis therefor, that the shippers will not be relocated to a line with respect to which an application for a certificate of abandonment or discontinuance has been filed with the Commission or that if an application has been filed it will be withdrawn within a reasonable period following execution of a grant agreement and before Federal funds are disbursed for the project;

(5) An assurance by the chief executive officer of the applicant that after completion of the substitute service project, additional Federal assistance will not be requested for the continuation of the rail freight service that the substitute service is designed to replace, unless the Administrator determines that circumstances have changed so that continuation of rail freight service is more cost-effective than continued use of the substitute service project;

(6) A description of the arrangements made for operation of service where rail service is to be provided in conjunction with a substitute service project, including copies of proposed operating agreements, leases, or other compensation agreements under which service is to be provided; and

(7) An assurance by the chief executive officer of the applicant that assistance provided will not be used to pay the non-Federal share under any Federal program.

(j) *Execution and filing of applications.*

(1) Each original application shall bear the date of execution and be signed by the chief executive officer of the agency submitting the application;

(2) Each application for planning assistance, and two (2) copies thereof, shall be filed with the Administrator through the appropriate Federal Highway Administration Division Office;

(3) Each application (excluding requests for planning assistance), and two (2) copies thereof, shall be filed with the Administrator through the appropriate Regional Director of Federal Assistance. A current list of the appropriate mailing addresses of the above officials will be provided by FRA to each State.

§ 266.19 **Environmental impact.**

(a) *General.* The Administrator has determined that providing assistance to cover the following costs is not a major action significantly affecting the quality of the human environment: Rehabilitation or improvement consisting of work normally performed on a periodic basis which does not change the existing character of the facility (including work to overcome normal periodic maintenance that had been deferred) rail service continuation, acquisition, and planning.

(b) *Substitute service assistance, rail facility construction assistance, and non-exempt rehabilitation or improvement assistance—(1) Environmental assessment.* (i) When an applicant requests substitute service assistance, rail facility construction assistance, or rehabilitation or improvement assistance (except for rehabilitation or improvement assistance which is exempt under paragraph (a) of this section), the applicant shall:

(A) Prepare an environmental assessment to determine whether the future use of the property will significantly affect the quality of the human environment; or

(B) Provide sufficient documentation to enable the Administrator to determine that the project satisfies the following criteria:

(1) The action is not likely to be environmentally controversial from the point of view of people living within the environment affected by the action or controversial with respect to the availability of adequate relocation housing;

(2) The action is not inconsistent with any Federal, State, or local law, regulation, ordinance, or judicial or administrative determination relating to environmental protection;

(3) The action will not have any significant adverse impact in any natural, cultural, recreational, or scenic environment(s) in which the action takes place, or on the air or water quality or ambient noise levels of such environment(s);

(4) The action will not: use 4(f)-protected properties; adversely affect properties under section 106 of the National Historic Preservation Act; involve new construction location in a

wetlands area; or affect a base floodplain;

(5) The action will not cause a significant short- or long-term increase in traffic congestion, or other significant adverse environmental impact on any mode of transportation;

(6) The action is not an integral part of a program of actions which, when considered separately, would not be classified as major FRA actions, but when considered together would be so classified; and

(7) Environmental assessment or documentation is not required by any Federal law, regulation, guideline, order, or judicial or administrative determination other than this part.

(ii) Prior to submitting an application, FRA recommends that the applicant seek the Administrator's advice as to form and substance of the assessment for the project under consideration. The environmental assessment shall utilize an interdisciplinary approach in identifying the type, degree of effect, and probability of occurrence of primary, secondary and cumulative potential environmental impacts (positive and negative) of the proposed action and of alternative courses of action. The depth of coverage shall be consistent with the magnitude of the project and its expected environmental effects. The environmental assessment and all documents used as a basis for the assessment shall be submitted together with the application for assistance.

(2) *Environmental impact statement.* A draft environmental impact statement (EIS) shall be submitted with each application when the environmental assessment concludes that the future use significantly affects the quality of human environment. FRA recommends that prior to submitting the application, the applicant seek the Administrator's advice as to form and substance of the EIS for the project under consideration.

(3) *Finding of no significant impact.* A draft finding of no significant impact declaration shall be submitted with each application when the applicant's environmental assessment concludes that the future use does not significantly affect the quality of the human environment. The finding of no significant

impact shall include a description of the project, and sufficient data and environmental findings to support the conclusions as to the impact upon the quality of the human environment. FRA recommends that prior to submitting the application, the applicant seek the Administrator's advice as to the form and substance of this finding for the project under consideration.

(4) *Section 4(f) determination.* For projects involving the use of any land from a public park, recreation area, wildlife and waterfowl refuge, or historic site of national, State or local significance as determined by the Federal, State, or local officials having jurisdiction thereon, information to support a determination pursuant to section 4(f) of the Act shall be submitted together with the application. The section 4(f) determination shall document that:

(i) There is no feasible and prudent alternative to the use of such land; and

(ii) The project includes all planning to minimize harm resulting from such use.

(5) *Historic preservation.* For projects involving the use of historic, cultural or archeological resources listed or eligible for listing in the National Register of Historic Places, information which documents that the Advisory Council on Historic Preservation has been afforded an opportunity for review and comment on the proposed project in accordance with 16 U.S.C. 470 and 36 CFR part 800 shall be submitted with the application.

(c) *Highway or highway-related facilities.* Substitute service projects involving highway or highway-related facilities are subject to the applicable substantive Federal Highway Administration regulations on environmental considerations (23 CFR part 771).

§ 266.21 Grant agreement and disbursement.

(a) *Grant agreement.* (1) Upon the approval of an application meeting the requirements of § 266.17 of this part, a grant agreement for the Federal share of the approved amount of estimated program costs will be executed by the Administrator and the grantee.

(2) The grant agreement will identify the amount of the grantee's share of

§ 266.23

program costs to be furnished in cash and through approved in-kind benefits. The grantee shall expend a pro-rata share of its cash contribution at the same time payments of the Federal share are made available to the grantee.

(b) *Disbursement.* (1) Federal funds are provided either in advance by a letter-of-credit or a Treasury check or by reimbursement in accordance with Attachment J of OMB Circular A-102.

(2) Prior to receipt of advance payments, the grantee must have demonstrated to the satisfaction of the Administrator that it has established procedures to comply with OMB Circular A-102, Attachment J, including procedures that will minimize the time elapsing between the receipt of funds by the grantee and their disbursement. Evidence of such compliance shall be provided to the Administrator at least 30 days prior to the anticipated date of receipt of advance payments. An advance by letter-of-credit is used when the rail service assistance is expected to be provided for a minimum of one (1) year, and is expected to involve annual payments aggregating at least \$120,000. Otherwise, advance payments are made by Treasury check.

(3) If the grantee is not eligible for advance payments or does not desire them, the grantee will be reimbursed for eligible expenditures at the end of each fiscal quarter upon submission of a request for reimbursement.

(4) Before disbursement of Federal funds can be made to a grantee for payment to third parties under this subsection, the grantee must have executed an agreement with the third party.

(5) Acquisition assistance will be disbursed only after the following have been approved by the Administrator:

(i) A title opinion of the chief legal officer of the grantee that describe the type of title being acquired, and if a general warranty deed is not being given, it must explain why it could not be given. The opinion shall also advise of any need for use of the State's eminent domain powers to assure adequate title. In addition, the opinion shall explain how the defects disclosed by the title search might affect the marketability of the property;

49 CFR Ch. II (10-1-04 Edition)

(ii) A written determination that the property acquired is limited to the land and facilities that are needed for the rail freight services which would have been curtailed or abandoned but for the acquisition has been accepted by the Administrator; and

(iii) A written determination that the purchase price is consistent with the value of the property interest being acquired, and the evidence upon which the determination is based.

(c) *Settlement.* (1) Settlement under the grant agreement is made on the basis of a Federal audit which has determined the allowable costs over the entire term of the grant agreement. If the Federal audit determines that the allowable costs under the grant agreement are less than the amount of the grant, the difference shall be refunded to FRA at the end of the fiscal year in which the audit was made unless it has become the subject of another executed grant agreement. Upon termination of a State's participation in the Rail Service Assistance Program, the State shall repay FRA the Federal share of any unused rehabilitation and improvement assistance and any accumulated interest.

§ 266.23 Record, audit, and examination.

(a) Retention and custodial requirements for financial records, supporting documents, statistical records, and all other records pertinent to a grant provided under this part shall be governed by Attachment C of OMB Circular A-102.

(b) The Administrator and the Comptroller General of the United States or any of their duly authorized representatives shall, until the expiration of three years after submission to the Administrator of the grantee's final accounting of all program funds, and for any longer period necessary to resolve audit findings, have access for the purpose of audit and examination to any books, documents, papers, and records which in the opinion of the Administrator or the Comptroller General of the United States may be related or pertinent to the grants, contracts, or other arrangements arising out of, or in any way connected with, the rail service assistance program.

§ 266.25 Waivers and modifications.

The Administrator may, with respect to individual requests, upon good cause shown, waive or modify any requirement of this part not required by law or make any additional requirements the Administrator deems necessary. Procedures for submission and consideration of petitions for waiver or modification are governed by 49 CFR part 211.

PART 268—MAGNETIC LEVITATION TRANSPORTATION TECHNOLOGY DEPLOYMENT PROGRAM

Subpart A—Overview

Sec.

268.1 Definitions.

268.3 Different phases of the Maglev Deployment Program.

268.5 Federal funding sources for the Maglev Deployment Program.

268.7 Federal/State share and restrictions on the uses of Federal Maglev Funds.

Subpart B—Procedures For Financial Assistance

268.9 Eligible participants.

268.11 Project eligibility standards.

268.13 Deadline for submission of applications for preconstruction planning assistance.

268.15 Form and contents of applications for preconstruction planning assistance.

268.17 Project selection criteria.

268.19 Evaluation of applications for preconstruction planning assistance.

268.21 Down-selection of one or more Maglev projects for further study and selection of one project for final design, engineering, and construction funding.

AUTHORITY: 49 U.S.C. 322; 23 U.S.C. 322; 49 CFR 1.49.

SOURCE: 65 FR 2344, Jan. 14, 2000, unless otherwise noted.

Subpart A—Overview

§ 268.1 Definitions.

As used in this part—

CMAQ means Congestion Mitigation and Air Quality Improvement Program (23 U.S.C. 149).

Environmental assessment (“EA”) means the environmental assessment in support of the project description and containing the information listed in § 268.11(b)(6)(i).

Environmental impact statement (“EIS”) means the environmental impact statement which is required pursuant to §§ 268.3.

Eligible project costs means the costs of preconstruction planning activities and the capital cost of the fixed guideway infrastructure of a Maglev project, including land, piers, guideways, propulsion equipment and other components attached to guideways, power distribution facilities (including substations), control and communications facilities, access roads, and storage, repair, and maintenance facilities, but eligible project costs do not include the cost of stations, vehicles, and equipment.

Federal Maglev funds means such funds as are provided under the authority of 23 U.S.C. 322 to pay for Eligible Project Costs.

Full project costs means the total capital costs of a Maglev project, including Eligible Project Costs and the costs of stations, vehicles, and equipment.

Phase means one of the five different phases of the Maglev Deployment Program; these phases are described in § 268.3.

Maglev means transportation systems employing magnetic levitation that would be capable of safe use by the public at a speed in excess of 240 miles per hour.

Maglev Deployment Program means the program authorized by 23 U.S.C. 322.

Partnership potential means the usage of the term in the commercial feasibility study of high-speed ground transportation (*High Speed Ground Transportation for America*) mandated under section 1036 of the Intermodal Surface Transportation Efficiency Act of 1991 (105 Stat. 1978). Under that usage any corridor exhibiting Partnership Potential must at least meet the following two conditions:

(1) Private enterprise must be able to run on the corridor—once built and paid for—as a completely self-sustaining entity; and

(2) The total benefits of a Maglev corridor must equal or exceed its total costs.

STP means the Surface Transportation Program (23 U.S.C. 133).

TEA 21 means the Transportation Equity Act for the 21st Century (Public Law No. 105–178, 112 Stat. 107).

§ 268.3 Different phases of the Maglev Deployment Program.

(a) The Maglev Deployment Program includes five phases, as described in paragraphs (b) through (f) of this section. The current projected timing for implementing these phases is indicated to assist applicants in planning their projects. All dates beyond the first date (the deadline for the submission of preconstruction planning applications) are for planning purposes only and are subject to change—including possible acceleration of deadlines—based on the progress of the Maglev Deployment Program; grantees will be notified accordingly.

(b) *Phase I—Competition for Planning Grants (Early October 1998–September 15, 1999).* (1) *Description.* In Phase I, States will apply for funds for preconstruction planning activities. As required by § 268.13, applications must be filed with FRA by February 15, 1999. FRA will select one or more projects to receive preconstruction planning financial assistance awarded under this part to perform Phase II of the Maglev Deployment Program.

(2) *Timing of Major Milestones.*

(i) February 15, 1999—Planning grant applications due.

(ii) May 24, 1999—FRA announces grantees for planning grants.

(iii) August 31, 1999—FRA awards planning grants for the conduct of activities listed in Phase II.

(c) *Phase II—Project Description Development (July 1, 1999–June 30, 2000).*

(1) *Description.* In Phase II, each grant recipient will prepare and submit to FRA a project description, supporting preconstruction planning reports, and an EA. Supporting reports may include demand and revenue analyses, project specification, cost estimates, scheduling, financial studies, a system safety plan (including supporting analysis), and other information in support of the project description. FRA will use this information in reaching a decision on which projects to down-select for completion of site-specific environmental studies, investment grade revenue forecasts, and

other studies and analyses necessary prior to initiation of construction. FRA will initiate documentation of environmental factors considered in the project selection process.

(2) *Timing of Major Milestones.*

(i) February 29, 2000—Deadline for submission of appropriate EA's needed by FRA for the down-selection of one or more projects under Phase III.

(ii) June 30, 2000—Deadline for submission of project descriptions and any related supporting reports needed by FRA for down-selection of one or more projects.

(d) *Phase III—Project Selection Process (July 1, 2000–September 30, 2000).* (1) *Description.* FRA will evaluate the information provided by the grant recipients under Phase II and will down-select one or more projects for completion of additional environmental studies, investment grade revenue forecasts, and other studies and analyses necessary prior to initiation of construction.

(2) *Timing of Major Milestones.* September 30, 2000—FRA down-selects one or more project(s).

(e) *Phase IV—Project Development and Completion of Site-specific EIS October 1, 2000–November 30, 2001).*

(1) *Description.* The financial assistance recipient(s) down-selected in Phase III will complete additional environmental studies, investment grade revenue forecasts, and other studies and analyses necessary prior to initiation of construction, and address issues raised by FRA's review of system safety plans (including supporting analysis). They will also initiate final design and engineering work for the down-selected project(s). If more than one project is down-selected in Phase III, FRA will select one of them for final design, engineering, and construction funding. Detailed agreements for the construction and operation of the selected project will be negotiated.

(2) *Timing of Major Milestones.* (i) March 31, 2001—If more than one project is down-selected in Phase III, FRA will select one project.

(ii) December 31, 2001—FRA will issue a Final Record of Decision on the site-specific EIS for the one selected project, confirming the project design.

(f) *Phase V—Completion of Detailed Engineering and Construction January 1, 2002 and beyond*. In Phase V, the sponsoring State or State-designated authority will oversee the efforts of the public/private partnership formed to progress the selected project, to complete the detailed engineering designs, and finance, construct, equip, and operate the project in revenue service. Construction will be contingent upon the appropriation of Federal funds. In no event will construction be authorized until FRA is fully satisfied that the system will meet appropriate safety standards.

§ 268.5 Federal funding sources for the Maglev Deployment Program.

(a) *Federal Maglev Funds*. Section 322 of Title 23 provides for the following funds for the Maglev Deployment Program:

(1) *Contract authority*. Fifty-five million has been made available for the Maglev Deployment Program as contract authority from the Highway Trust Fund for Fiscal Years 1999 through 2001; this would be used to fund the competition in all its phases and could also be used for final design, engineering, and construction activities of the selected project. Of the \$55 million, the Congress has made available up to \$15 million for Fiscal Year 1999, up to \$15 million for Fiscal Year 2000, and \$25 million for Fiscal Year 2001.

(2) *Authorization for appropriations*. Nine hundred fifty million, also from the Highway Trust Fund, has been authorized to be appropriated for the Maglev Deployment Program for Fiscal Years 2000 through 2003. Of the \$950 million, \$200 million is authorized to be appropriated for each of Fiscal Years 2000 and 2001, \$250 million for Fiscal Year 2002, and \$300 million for Fiscal Year 2003. Any decision to proceed with possible Federal funding of the construction of a Maglev system will be contingent upon the receipt of appropriations, and upon completion of appropriate environmental documentation.

(b) *Other Federal funds*. Section 322 of Title 23 provides that the portion of the Maglev project not covered by Federal Maglev Funds may be covered by

any non-Federal funding sources—including private (debt and/or equity), State, local, regional, and other public or public/private entities—as well as by Federally-provided STP and CMAQ funds, and by other forms of financial assistance made available under title 23 and TEA 21, such as loans and loan guarantees.

(c) *Costs Incurred in Advance of Cooperative Agreement*. Certain costs incurred in advance of the execution of a cooperative agreement between FRA and the grantee for pre-construction planning but after enactment of TEA 21 (June 9, 1998) will be eligible for reimbursement, but such costs are allowable only to the extent that they are otherwise allowable under the terms of a fully executed cooperative agreement.

§ 268.7 Federal/State share and restrictions on the uses of Federal Maglev Funds.

(a) *Federal share*. The Federal share of Full Projects Costs shall be not more than $\frac{2}{3}$, with the remaining $\frac{1}{3}$ paid by the grant recipient using non-Federal funds. Funds made available under STP and CMAQ are considered non-Federal funds for purposes of the matching requirement.

(b) *Restrictions on the uses of Federal Maglev Funds*. (1) Federal Maglev Funds may be applied only to Eligible Project Costs;

(2) Federal Maglev Funds provided under a preconstruction planning grant may be used only for Phase II activities, and for completion of site-specific draft EIS's; see § 268.3;

(3) Federal Maglev Funds may be used to pay for only $\frac{2}{3}$ of preconstruction planning costs; grant recipients are required to pay the remaining $\frac{1}{3}$ of the costs with non-Federal funds; and

(4) The "prevailing wages" requirement of the Davis Bacon Act (40 U.S.C. 276a–276a–5) applies to any construction contracts under the Maglev Deployment Program.

**Subpart B—Procedures For
Financial Assistance**

§ 268.9 Eligible participants.

Any State, or any authority designated by one or more State(s) to carry out the preconstruction planning activities under the Maglev Deployment Program is eligible to participate in the Maglev Deployment Program.

§ 268.11 Project eligibility standards.

(a) *Project eligibility standards for preconstruction planning financing.* (1) As required by 23 U.S.C. 322(d)(4), in order to be eligible to receive financial assistance, a Maglev project shall:

- (i) Involve a segment or segments of a high-speed ground transportation corridor that exhibit Partnership Potential;
- (ii) Require an amount of Federal funds for project financing that will not exceed the sum of Federal Maglev Funds, and the amounts made available by States under STP and CMAQ;
- (iii) Result in an operating transportation facility that provides a revenue producing service;
- (iv) Be undertaken through a public and private partnership, with at least 1/3 of Full Project Costs paid using non-Federal funds;
- (v) Satisfy applicable statewide and metropolitan planning requirements;
- (vi) Be approved by FRA based on an application submitted by a State or authority designated by one or more States;
- (vii) To the extent that non-United States Maglev technology is used within the United States, be carried out as a technology transfer project; and
- (viii) Be carried out using materials at least 70 percent of which are manufactured in the United States.

(2) FRA recognizes that applicants for preconstruction planning grants will not have detailed information with respect to some of the requirements of paragraph (a)(1) of this section, and that the purpose of a preconstruction planning grant is to develop much of this information with respect to a particular Maglev project. As required by § 268.15, an applicant will need to provide whatever information it has with respect to each of the requirements of paragraph (a)(1) of this section, to-

gether with a certification that the applicant fully intends to comply with the requirements of this paragraph (a) should its project be selected by FRA for final design, engineering and construction financing.

(b) *Project eligibility standards for final design, engineering, and construction financing.* FRA will select the most promising Maglev project for final design, engineering, and construction financing. To be eligible to be considered, the project must meet each of the following requirements; these requirements restate the requirements in paragraph (a)(1) of this section, but with more detail and in a different order:

(1) *Purpose and significance of the project.* (i) The project description shall point to a Maglev facility and daily operation the primary purpose of which is the conduct of a revenue-producing passenger transportation service between distinct points, rather than a service solely for the passengers' riding pleasure.

(ii) The project description shall incorporate scheduled operation at a top speed of not less than 240 mph.

(2) *Benefits for the American economy.* The project description shall include a certification as to paragraphs (b)(2) (i) and (ii) of this section and, as appropriate, a technology acquisition/transfer plan which describes the strategy for their accomplishment.

(i) Processes will be established that will enable an American-owned and -sited firm (or firms) to gain, in the course of the project, the capability to participate in the design, manufacture, and installation of the facilities and vehicles needed for a Maglev operation, if the owner of the selected version of Maglev technology is not an American-owned and -sited firm (thus meeting the technology transfer requirement of 23 U.S.C. 322).

(ii) The 70 percent U.S. content requirement content of 23 U.S.C. 322 will be carried out.

(3) *Partnership potential.* The project shall exhibit Partnership potential by satisfying the following:

(i) A private/public partnership must be in place that is ready, willing, and able to finance, construct, operate, and maintain the project;

(ii) The private/public partnership either owns the version of Maglev technology proposed to be implemented in the project, or has an agreement with the owner which affords full cooperation to the partnership in progressing the project, including implementation of the technology acquisition/transfer plan if applicable; and

(iii) The recipient of a preconstruction planning grant or the FRA has developed and endorsed a projection of system capital costs, demand, revenues, operating expenses, and total costs and benefits, that:

(A) Covers either the entire corridor in which the Maglev project is involved ("Corridor"), or the project considered independently;

(B) Demonstrates that private enterprise would be able to run the Corridor or the project—once built and paid for—as a completely self-sustaining entity, in which revenues will cover operating expenses and continuing investment needs; and

(C) Shows total benefits equal to or exceeding total costs.

(4) *Funding Limits and Sources.* The project description shall include a financing plan that demonstrates project completion with the \$950 million in Federal Maglev Funds, funds remaining unobligated from the \$55 million in contract authority, and the funds made available under STP and CMAQ. The project that is selected will be eligible for other forms of financial assistance provided under title 23 and TEA 21, including loans, loan guarantees, and lines of credit. However, at least $\frac{1}{3}$ of Full Project Costs must come from non-Federal Funds.

(5) *Project Management.* The State, the technology owner, and all other relevant project partners must include in the project description, an agreed upon—

(i) *Management plan* that defines the partnership, responsibilities, and procedures for accomplishing the project;

(ii) *Project schedule* that shows how timely implementation of the project will be accomplished, including, to the extent possible, a construction plan and schedule; and

(iii) *Financial plan* that shows how funds will flow, in accordance with the other requirements of this subsection.

(6) *Planning/environmental process.*

(i) *Assessment of environmental consequences of the proposed project.* Recipients of preconstruction planning grants shall conduct an EA in support of the project description; and will prepare additional environmental studies for the project. The EA shall include information to support the grantee's decision to pursue the proposed project. The grantee shall develop the information and discuss the environmental consequences of the proposed technology and route in sufficient detail for the preparation of appropriate documentation by FRA to support selection of one project. This shall include: the identification of potential positive and negative environmental effects resulting from the technology (e.g. energy consumption compared to other transportation options); generic noise emissions at various distances from the centerline of the guideway; changes in electromagnetic field levels at various distances from the centerline of the guideway; and environmental screening of the proposed route (e.g., identification of land use; identification of endangered species possibly present and location of their critical habitat; identification of navigable waterways, wetlands and other sensitive water resources; and identification of the location of parks, wildlife refuges, historic and archaeological sites of National, State or local significance and other sites protected by section 4(f) of the Department of Transportation Act). The latter information and analysis shall be submitted four months in advance of the remainder of the project description. The above list is illustrative only. Grantees will be expected to review proposed work statements with FRA at pre-application meetings or through some other means to develop the final scope of this environmental review.

(ii) The project description must also include letters of endorsement of project implementation from all the State departments of transportation involved, and from all Metropolitan Planning Organizations for metropolitan areas that would be served by the project.

§ 268.13

§ 268.13 Deadline for submission of applications for preconstruction planning assistance.

Completed application packages shall be returned to FRA by December 31, 1998. Applications shall be submitted to: Honorable Jolene M. Molitoris, Administrator, Federal Railroad Administration, ATTN: Maglev Project, RDV-11, 400 Seventh Street, SW, Stop 20, Washington, DC 20590.

§ 268.15 Form and contents of applications for preconstruction planning assistance.

States, groups of States, or designated authorities that have Maglev projects are invited to submit applications in Phase I of the Maglev Deployment Program, the competition for preconstruction planning grants. The applications shall contain:

(a)(1) If submitted by a State: name, address, responsible party, telephone, fax number, and e-mail address of the State agency submitting the application; or

(2) If submitted by a designated authority: name, address, responsible party, telephone, fax number, and e-mail address of the designated authority and of the State agency or agencies on whose behalf the designated authority is submitting the application, together with letters from the State(s) evidencing all such designations;

(b) A description of the project concept, identifying its likely location, market area, length, and the transportation service that it would perform, and a preliminary estimate of the time that would be required—if funds are made available—to bring the project to the start of construction and then to the initiation of full revenue service. At its option, the applicant may include any reports already completed on the project as well as any additional descriptive material that would assist the FRA in evaluating the application;

(c) Whatever information the applicant has to demonstrate that the project meets the project eligibility standards in § 269.11(a), and the project selection criteria in § 268.17, together with a certification that the applicant fully intends to comply with the requirements in § 269.11 should its project

49 CFR Ch. II (10–1–04 Edition)

be selected by FRA for final design, engineering and construction financing.

(d) A statement of work for the preconstruction planning activities to be accomplished under the planning grant. The statement shall describe the work to be performed, including but not necessarily limited to:

(1) Preconstruction planning work as is needed to develop a Maglev project, and project description that will satisfy the project eligibility standards in § 268.11(b), and the project selection criteria in § 268.17; and

(2) Preparation of EAs, as described in § 268.11(b)(6)(i);

(e) Management plan, schedule, and financial plan for accomplishing the preconstruction planning work under the planning grant;

(f) Letters supporting the application from the heads of all State departments of transportation involved, as well as from responsible officials of the Metropolitan Planning Organizations of all metropolitan areas to be served by the proposed project;

(g) A certification from the State, or from the authority designated by one or more States, that the $\frac{1}{3}$ matching funds required for work under the planning grant are, or will be, available by the time the grants are announced. The source(s) of the matching must be shown in the financial plan under paragraph (e); and

(h) If the applicant has made a definitive choice of the particular Maglev technology proposed to be included, a description of that technology and the degree to which it has been produced and tested should be submitted. Further, if the applicant has identified organizations that would form members of the team that would implement the project, the names of those organizations and the persons representing them should also be submitted.

§ 268.17 Project selection criteria.

Except as qualified by § 268.19, the following criteria will govern FRA's selection of projects to receive funding under the Maglev Deployment Program.

(a) *Purpose and significance of the project.*

(1) The degree to which the project description demonstrates

attractiveness to travelers, as measured in passengers and passenger-miles.

(2) The extent to which implementation of the project will reduce congestion, and attendant delay costs, in other modes of transportation; will reduce emissions and/or energy consumption; or will reduce the rate of growth in needs for additional highway or airport construction. Measures for this criterion will include but not be limited to the present value of congestion reduction, pollution reduction, and/or facility cost-avoidance benefits.

(3) The degree to which the project will demonstrate the variety of operating conditions which are to be expected in the United States.

(4) The degree to which the project will augment a Maglev corridor or network that has been identified, by any State, group of States, or the FRA, as having Partnership Potential.

(b) *Timely implementation.* The speed with which the project can realistically be brought into full revenue service, based on the project description and on the current and projected development status of the Maglev technology selected by the applicant for the project.

(c) *Benefits for the American economy.* The extent to which the project is expected to create new jobs in traditional and emerging industries in the United States.

(d) *Partnership potential.* The degree to which the project description demonstrates Partnership Potential for the corridor in which it is involved, and/or for the project independently.

(e) *Funding limits and sources.* (1) The extent and proportion to which States, regions, and localities commit to financially contributing to the project, both in terms of their own locally-raised, entirely non-Federal funds, and in terms of commitments of scarce Federal resources from non-Maglev funds; and

(2) The extent and proportion to which the private sector contributes financially to the project.

NOTE TO § 268.17: FRA recognizes that applicants for preconstruction planning assistance may not have detailed information with respect to each of these criteria, and that the purpose of the preconstruction planning assistance is to develop much of this information with respect to a particular Maglev project. The preconstruction planning appli-

cation requirements of this part 268 are designed to elicit whatever information an applicant may have pertaining to these criteria.

§ 268.19 Evaluation of applications for preconstruction planning assistance.

The FRA will evaluate the applications for their completeness and responsiveness to the requirements listed in § 268.15. In addition, applicants are advised that the Maglev Deployment Program contains a number of project eligibility standards (minimum threshold standards) and project evaluation criteria that will guide the FRA's review of the project descriptions produced under the Planning Grants. The FRA's implementation of these standards and criteria appears in § 268.11 and § 268.17, respectively. Although subject to revision, the information in § 268.11 and § 268.17 should assist the States in completing their applications in the competition for planning grants, since the project descriptions will need to respond to the standards and criteria. In evaluating the applications for planning grants, FRA will consider how consistent the applicant's project is to the standards and criteria, and the application's likelihood of leading to a project that meets all the standards and criteria.

§ 268.21 Down-selection of one or more Maglev projects for further study and selection of one project for final design, engineering, and construction funding.

(a) Upon completion of Phase III of the Maglev Deployment Program, FRA will down-select one or more projects to complete additional environmental studies, investment grade revenue forecasts, and other studies and analyses necessary prior to initiation of construction. Final design and engineering work will also be initiated for the down-selected project(s). To be down-selected a project must appear to meet the project eligibility standards contained in § 268.11 (b), rate highly in the project selection criteria specified in § 268.17, be judged by FRA to have a good chance of being constructed with the Federal funds authorized for this program, and be successfully operated by a public/private partnership.

§ 268.21

49 CFR Ch. II (10–1–04 Edition)

(b) Only one project will be selected in Phase IV of the Maglev Deployment Program and be eligible for any Federal construction funds that Congress chooses to make available. That one project must meet each and every project eligibility standard contained in § 268.11 (b). If more than one project down-selected in Phase III and funded through Phase IV meets all of these standards, then FRA will evaluate and compare the eligible projects according to the set of project selection criteria contained in § 268.17.

(c) In reviewing competing projects under the project eligibility standards

and project selection criteria, the FRA will exercise particular vigilance regarding the following elements of the preconstruction planning process, although not to the exclusion of others:

(1) The credibility of the demand and revenue forecasts, cost estimates, and benefit/cost comparisons; and

(2) The credibility of the financial plan.

(d) FRA intends to make periodic reviews of the processes and products of grant recipients. Such reviews may include, at the FRA's option, reviews at key milestones in the preparation of project descriptions.

SOURCE: 40 FR 42437, Sept. 12, 1975, unless otherwise noted.

EDITORIAL NOTE: Nomenclature changes to part 325 appear at 66 FR 49869, Oct. 1, 2001.

Subpart A—General Provisions

§ 325.1 Scope of the rules in this part.

(a) The rules in this part prescribe procedures for inspection, surveillance, and measurement of motor vehicles and motor vehicle equipment operated by motor carriers to determine whether those vehicles and that equipment conform to the Interstate Motor Carrier Noise Emission Standards of the Environmental Protection Agency, 40 CFR part 202.

(b) Except as provided in paragraph (c) of this section, the rules in this part apply to motor carriers engaged in interstate commerce. The rules apply at any time or under any condition of highway grade, load, acceleration or deceleration.

(c) The rules in this part do not apply to—

(1) A motor vehicle that has a Gross Vehicle Weight Rating (GVWR) of 10,000 pounds (4,536 kg.) or less;

(2) A combination of motor vehicles that has a Gross Combination Weight Rating (GCWR) of 10,000 pounds (4,536 kg.) or less;

(3) The sound generated by a warning device, such as a horn or siren, installed in a motor vehicle, unless such device is intentionally sounded in order to preclude an otherwise valid noise emission measurement;

(4) An emergency motor vehicle, such as a fire engine, an ambulance, a police van, or a rescue van, when it is responding to an emergency call;

(5) A snow plow in operation; or

(6) The sound generated by auxiliary equipment which is normally operated only when the motor vehicle on which

§ 325.3

it is installed is stopped or is operating at a speed of 5 miles per hour (8 kph) or less, unless such device is intentionally operated at speeds greater than 5 mph (8 kph) in order to preclude an otherwise valid noise measurement. Examples of that type of auxiliary equipment include, but are not limited to, cranes, asphalt, spreaders, ditch diggers, liquid or slurry pumps, auxiliary air compressors, welders, and trash compactors.

§ 325.3 Effective date.

The rules in this part are effective on October 15, 1975.

§ 325.5 Definitions.

(a) *Statutory definitions.* All terms defined in the Noise Control Act of 1972 (Pub. L. 92-574, 86 Stat. 1234) are used as they are defined in that Act.

(b) *Definitions in standards.* All terms defined in §202.10 of the Interstate Motor Carrier Noise Emission Standards, 40 CFR 202.10, are used as they are defined in that section.

(c) *Additional definitions.* (1) *Hard test site* means any test site having the ground surface covered with concrete, asphalt, packed dirt, gravel, or similar reflective material for more than ½ the distance between the microphone target point and the microphone location point.

49 CFR Ch. III (10–1–04 Edition)

(2) *Soft test site* means any test site having the ground surface covered with grass, other ground cover, or similar absorptive material for ½ or more of the distance between the microphone target point and the microphone location point.

(3) *Ground cover* means any of various low, dense-growing plants, such as ivy, myrtle, low weeds, or brush.

(4) *Traffic railing* means any longitudinal highway traffic barrier system installed along the side or median of a highway. For the purpose of this part, a traffic railing must have at least 35 percent of its vertical height, from the ground surface to the top of the railing, open to free space in order to qualify as an acceptable object within a noise measurement test site. Further, for the purposes of this part, posts or other discrete supports shall be ignored when ascertaining open free space.

(5) *Relatively flat* when used to describe a noise measurement site means a site which does not contain significant concave curvatures or slope reversals that may result in the focusing of sound waves toward the microphone location point.

§ 325.7 Allowable noise levels.

Motor vehicle noise emissions, when measured according to the rules of this part, shall not exceed the values specified in Table 1.

TABLE 1—MAXIMUM PERMISSIBLE SOUND LEVEL READINGS (DECIBEL (A))¹, THNSP;²

	Highway operation test				Stationary tests	
	Soft site		Hard Site		Soft site	Hard site
	35 mi/h or less	Above 35 mi/h	35 mi/h or less	Above 35 mi/h		
If the distance between the microphone location point and the microphone target point is—						
31 ft (9.5m) or more but less than 35 ft (10.7m)	87	91	89	93	89	91
35 ft (10.7m) or more but less than 39 ft (11.9m)	86	90	88	92	88	90
39 ft (11.9m) or more but less than 43 ft (13.1m)	85	89	87	91	87	89
43 ft (13.1m) or more but less than 48 ft (14.6m)	84	88	86	90	86	88
48 ft (14.6m) or more but less than 58 ft (17.1m)	83	87	85	89	85	87
58 ft (17.1m) or more but less than 70 ft (21.3m)	82	86	84	88	84	86
70 ft (21.3m) or more but less than 83 ft (25.3m)	81	85	83	87	83	85

¹The speeds shown refer to measurements taken at sites having speed limits as indicated. These speed limits do not necessarily have to be posted.

²This table is based on motor carrier noise emission requirements specified in 40 CFR 202.20 and 40 CFR 202.21.

[40 FR 42437, Sept. 12, 1975, as amended at 54 FR 50385, Dec. 6, 1989]

§ 325.9 Measurement tolerances.

(a) Measurement tolerances will be allowed to take into account the effects of the following factors:

(1) The consensus standard practice of reporting filed sound level measurements to the nearest whole decibel.

(2) Variations resulting from commercial instrument tolerances.

(3) Variations resulting from the topography of the noise measurement site.

(4) Variations resulting from atmospheric conditions such as wind, ambient temperature, and atmospheric pressure.

(5) Variations resulting from reflected sound from small objects allowed within the test site.

(6) The interpretation of the effects of the above cited factors by enforcement personnel.

(b) Measurement tolerances shall not exceed 2 decibels for a given measurement.

(b) A motor carrier, its officers, drivers, agents, and employees must, at any time, submit a motor vehicle used in its operations for inspection, examination, and testing for the purpose of ascertaining whether the motor vehicle and equipment installed on it conforms to the Interstate Motor Carrier Noise Emission Standards of the Environmental Protection Agency, 40 CFR part 202.

(c) *Prescribed inspection report.* Form MCS-141, Noise Level Compliance Check shall be used to record findings from motor vehicles selected for noise emission inspection by authorized employees.

(d) *Motor carrier's disposition of form MCS-141.* (1) The driver of any motor vehicle receiving a Form MCS-141 shall deliver such MCS-141 to the motor carrier operating the vehicle upon his/her arrival at the next terminal or facility of the motor carrier, if such arrival occurs within twenty-four (24) hours. If the driver does not arrive at a terminal or facility of the motor carrier operating the vehicle within twenty-four (24) hours he/she shall immediately mail the Form MCS-141 to the motor carrier. For operating convenience, motor carriers may designate any shop, terminal, facility, or person to which it may instruct its drivers to deliver or forward Form MCS-141. It shall be the sole responsibility of the motor carrier that Form MCS-141 is returned to the Federal Highway Administration, in accordance with the terms prescribed thereon and in paragraphs (d) (2) and (3) of this section. A driver, if himself/herself a motor carrier, shall return Form MCS-141 to the Federal Motor Carrier Safety Administration, in accordance with the terms prescribed thereon and in paragraphs (d) (2) and (3) of this section.

(2) Motor carriers shall carefully examine Forms MCS-141. Appropriate corrective action shall be taken on vehicles found to be not in compliance with the requirements of this part.

(3) Motor carriers must complete the "Motor Carrier Certification of Action

Subpart B—Administrative Provisions

§ 325.11 Issuance, amendment, and revocation of the rules in this part.

The procedures specified in part 389 of this chapter for the issuance, amendment, or revocation of the Federal Motor Carrier Safety Regulations apply to rulemaking proceedings for the issuance, amendment, or revocation of the rules in this part.

§ 325.13 Inspection and examination of motor vehicles.

(a) Any special agent of the Federal Motor Carrier Safety Administration (designated in appendix B to subchapter B of this chapter) is authorized to inspect, examine, and test a motor vehicle operated by a motor carrier in accordance with the procedures specified in this part for the purpose of ascertaining whether the motor vehicle and equipment installed on the motor vehicle conforms to the Interstate Motor Carrier Noise Emission Standards of the Environmental Protection Agency, 40 CFR part 202.

§ 325.21

Taken” on Form MCS-141 in accordance with the terms prescribed thereon. Motor carriers must return Forms MCS-141 to the Division Office at the address indicated on Form MCS-141 within fifteen (15) days following the date of the vehicle inspection.

[40 FR 42437, Sept. 12, 1975, as amended at 41 FR 10226, Mar. 10, 1976; 54 FR 50385, Dec. 6, 1989; 60 FR 38743, July 28, 1995; 66 FR 49869, Oct. 1, 2001]

Subpart C—Instrumentation

§ 325.21 Scope of the rules in this subpart.

The rules in this subpart specify criteria for sound level measurement systems which are used to make the sound level measurements specified in subpart D and subpart E of this part.

§ 325.23 Type of measurement systems which may be used.

The sound level measurement system must meet or exceed the requirements of American National Standard Specification for Sound Level Meters (ANSI S1.4-1971), approved April 27, 1971, issued by the American National Standards Institute,¹ throughout the applicable frequency range for either:

- (a) A Type 1 sound level meter;
- (b) A Type 2 sound level meter; or
- (c) A Type S sound level meter which has—

- (1) A weighing frequency response;
- (2) Fast dynamic characteristics of its indicating instrument; and
- (3) A relative response level tolerance consistent with those of either a Type 1 or Type 2 sound level meter, as specified in section 3.2 of ANSI S1.4-1971.

§ 325.25 Calibration of measurement systems.

(a)(1) The sound level measurement system must be calibrated and appropriately adjusted at one or more frequencies in the range from 250 to 1,000 Hz at the beginning of each series of measurements and at intervals of 5–15 minutes thereafter, until it has been determined that the sound level meas-

¹Copies of the specification may be secured from the American National Standards Institute, 1430 Broadway, New York, New York, 10018.

49 CFR Ch. III (10–1–04 Edition)

urement system has not significantly drifted from its calibrated level. Once this fact has been established, calibrations may be made at intervals once every hour. A significant drift shall be considered to have occurred if a 0.3 dB or more excursion is noted from the system’s predetermined reference calibration level. In the case of systems using displays with whole decibel increments, the operator may visually judge when the 0.3 dB drift has been met or exceeded.

(2) The sound level measurement system must be checked periodically by its manufacturer, a representative of its manufacturer, or a person of equivalent special competence to verify that its accuracy meets the manufacturer’s design criteria.

(b) An acoustical calibrator of the microphone coupler type designed for the sound level measurement system in use shall be used to calibrate the sound level measurement system in accordance with paragraph (a) of this section. The calibration must meet or exceed the accuracy requirements specified in section 5.4.1 of the American National Standard Institute Standard *Methods for Measurements of Sound Pressure Levels* (ANSI S1.13-1971) for field method measurements.

[40 FR 42437, Sept. 12, 1975, as amended at 41 FR 10227, Mar. 10, 1976]

§ 325.27 Use of a windscreen.

A properly installed windscreen, of the type recommended by the manufacturer of the Sound Level Measurement System, shall be used during the time that noise emission measurements are being taken.

Subpart D—Measurement of Noise Emissions; Highway Operations

§ 325.31 Scope of the rules in this subpart.

The rules in this subpart specify conditions and procedures for measurement of the sound level generated by a motor vehicle engaged in a highway operation for the purpose of ascertaining whether the motor vehicle conforms to the Standards for Highway Operations set forth in 40 CFR 202.20.

§ 325.33 Site characteristics; highway operations.

(a) Measurement shall be made at a test site which is adjacent to, and includes a portion of, a traveled lane of a public highway. A microphone target point shall be established on the centerline of the traveled lane of the highway, and a microphone location point shall be established on the ground surface not less than 31 feet (9.5 m) or more than 83 feet (25.3 m) from the microphone target point and on a line that is perpendicular to the centerline of the traveled lane of the highway and that passes through the microphone target point. In the case of a standard test site, the microphone location point is 50 feet (15.2 m) from the microphone target point. Within the test site is a triangular measurement area. A plan view diagram of a standard test site, having an open site within a 50-foot (15.2 m) radius of both the microphone target point and the microphone location point, is shown in Figure 1. Measurements may be made at a test site having smaller or greater dimensions in accordance with the rules in subpart F of this part.

Figure 1
STANDARD TEST SITE;
HIGHWAY OPERATIONS

(b) The test site must be an open site, essentially free of large sound-reflecting objects. However, the following objects may be within the test site, including the triangular measurement area:

- (1) Small cylindrical objects such as fire hydrants or telephone or utility poles.
- (2) Rural mailboxes.

(3) Traffic railings of any type of construction except solid concrete barriers (see § 325.5(c)(4)).

(4) One or more curbs having a vertical height of 1 foot (.3 m) or less.

(c) The following objects may be within the test site if they are outside of the triangular measurement area of the site:

(1) Any vertical surface (such as billboard), regardless of size, having a lower edge more than 15 feet (4.6 m) higher than the surface of the traveled lane of the highway.

(2) Any uniformly smooth sloping surface slanting away from the highway (such as a rise in grade alongside the highway) with a slope that is less than 45 degrees above the horizontal.

(3) Any surface slanting away from the highway that is 45 degrees or more and not more than 90 degrees above the horizontal, if all points on the surface are more than 15 feet (4.6 m) above the surface of the traveled lane of the highway.

(d) The surface of the ground within the measurement area must be relatively flat (see § 325.5(c)(5)). The site shall be a "soft" test site. However, if the site is determined to be "hard," the correction factor specified in § 325.75(a) of this part shall be applied to the measurement.

(e) The traveled lane of the highway within the test site must be dry, paved with relatively smooth concrete or asphalt, and substantially free of—

(1) Holes or other defects which would cause a motor vehicle to emit irregular tire, body, or chassis impact noise; and

(2) Loose material, such as gravel or sand.

(f) The traveled lane of the highway on which the microphone target point is situated must not pass through a tunnel or underpass located within 200 feet (61 m) of that point.

[40 FR 42437, Sept. 12, 1975, as amended at 54 FR 50385, Dec. 6, 1989]

§ 325.35 Ambient conditions; highway operations.

(a)(1) *Sound.* The ambient A-weighted sound level at the microphone location point shall be measured, in the absence of motor vehicle noise emanating from within the clear zone, with fast meter

§ 325.37

response using a sound level measurement system that conforms to the rules of § 325.23.

(2) The measured ambient level must be 10 dB(A) or more below that level specified in § 325.7, Table 1, which corresponds to the maximum permissible sound level reading which is applicable at the test site at the time of testing.

(b) *Wind.* The wind velocity at the test shall be measured at the beginning of each series of noise measurements and at intervals of 5–15 minutes thereafter until it has been established that the wind velocity is essentially constant. Once this fact has been established, wind velocity measurements may be made at intervals of once every hour. Noise measurements may only be made if the measured wind velocity is 12 mph (19.3 kph) or less. Gust wind measurements of up to 20 mph (33.2 kph) are allowed.

(c) *Precipitation.* Measurements are prohibited under any condition of precipitation, however, measurements may be made with snow on the ground. The ground surface within the measurement area must be free of standing water.

[40 FR 42437, Sept. 12, 1975, as amended at 41 FR 10227, Mar. 10, 1976; 41 FR 28267, July 9, 1976]

§ 325.37 Location and operation of sound level measurement system; highway operations.

(a) The microphone of a sound level measurement system that conforms to the rules in § 325.23 of this part shall be located at a height of not less than 2 feet (.6 m) nor more than 6 feet (1.8 m) above the plane of the roadway surface and not less than 3½ feet (1.1 m) above the surface on which the microphone stands. The preferred microphone height on flat terrain is 4 feet (1.2 m).

(b)(1) When the sound level measurement system is hand-held or is otherwise monitored by a person located near its microphone, the holder must orient himself/herself relative to the highway in a manner consistent with the recommendation of the manufacturer of the sound level measurement system.

(2) In no case shall the holder or observer be closer than 2 feet (.6 m) from the system's microphone, nor shall he/

49 CFR Ch. III (10–1–04 Edition)

she locate himself/herself between the microphone and the vehicle being measured.

(c) The microphone of the sound level measurement system shall be oriented toward the traveled lane of the highway at the microphone target point at an angle that is consistent with the recommendation of the system's manufacturer. If the manufacturer of the system does not recommend an angle of orientation for its microphone, the microphone shall be oriented toward the highway at an angle of not less than 70 degrees and not more than perpendicular to the horizontal plane of the traveled lane of the highway at the microphone target point.

(d) The sound level measurement system shall be set to the A-weighting network and "fast" meter response mode.

[40 FR 42437, Sept. 12, 1975, as amended at 41 FR 10227, Mar. 10, 1976]

§ 325.39 Measurement procedure; highway operations.

(a) In accordance with the rules in this subpart, a measurement shall be made of the sound level generated by a motor vehicle operating through the measurement area on the traveled lane of the highway within the test site, regardless of the highway grade, load, acceleration or deceleration.

(b) The sound level generated by the motor vehicle is the highest reading observed on the sound level measurement system as the vehicle passes through the measurement area, corrected, when appropriate, in accordance with the rules in subpart F of this part. (Table 1 in § 325.7 lists the range of maximum permissible sound level readings for various test conditions.) The sound level of the vehicle being measured must be observed to rise at least 6 dB(A) before the maximum sound level occurs and to fall at least 6 dB(A) after the maximum sound level occurs in order to be considered a valid sound level reading.

[40 FR 42437, Sept. 12, 1975, as amended at 41 FR 10227, Mar. 10, 1976]

Subpart E—Measurement of Noise Emissions; Stationary Test

§ 325.51 Scope of the rules in this subpart.

(a) The rules in this subpart specify conditions and procedures for measuring the sound level generated by a vehicle when the vehicle's engine is rapidly accelerated from idle to governed speed at wide open throttle with the vehicle stationary, its transmission in neutral, and its clutch engaged, for the purpose of ascertaining whether the motor vehicle conforms to the Standard for Operation Under Stationary Test, 40 CFR 202.21.

(b) The rules in this subpart apply only to a motor vehicle that is equipped with an engine speed governor.

(c) Tests conducted in accordance with the rules of this subpart may be made on either side of the vehicle.

§ 325.53 Site characteristics; stationary test.

(a)(1) The motor vehicle to be tested shall be parked on the test site. A microphone target point shall be established on the ground surface of the site on the centerline of the lane in which the motor vehicle is parked at a point that is within 3 feet (.9 m) of the longitudinal position of the vehicle's exhaust system outlet(s). A microphone location point shall be established on the ground surface not less than 31 feet (9.5 m) and not more than 83 feet (25.3 m) from the microphone target point. Within the test site is a triangular measurement area. A plan view diagram of a standard test site, having an open site within a 50-foot (15.2 m) radius of both the microphone target point and the microphone location point, is shown in Figure 2.

Figure 2
STANDARD TEST SITE;
STATIONARY TEST

(2) Measurements may be made at a test site having smaller or greater dimensions in accordance with the rules in subpart F of this part.

(b) The test site must be an open site, essentially free of large sound-reflecting objects. However, the following objects may be within the test site, including the triangular measurement area:

(1) Small cylindrical objects such as fire hydrants or telephone or utility poles.

(2) Rural mailboxes.

(3) Traffic railings of any type of construction except solid concrete barriers (see § 325.5(c)(4)).

(4) One or more curbs having a height of 1 foot (.3 m) or less.

(c) The following objects may be within the test site if they are outside of the triangular measurement area of the site:

(1) Any vertical surface, regardless of size (such as a billboard), having a lower edge more than 15 feet (4.6 m) above the ground.

(2) Any uniformly smooth surface slanting away from the vehicle with a slope that is less than 45 degrees above the horizontal.

(3) Any surface slanting away from the vehicle that is 45 degrees or more and not more than 90 degrees above the horizontal, if all points on the surface are more than 15 feet (4.6 m) above the surface of the ground in the test site.

(d) The surface of the ground within the measurement area must be relatively flat. (See § 325.5(c)(5)). The site shall be a "hard" site. However, if the site is determined to be "soft," the correction factor specified in § 325.75(b) of

§ 325.55

this part shall be applied to the measurement.

[40 FR 42437, Sept. 12, 1975, as amended at 41 FR 10227, Mar. 10, 1976; 54 FR 50385, Dec. 6, 1989]

§ 325.55 Ambient conditions; stationary test.

(a)(1) *Sound.* The ambient A-weighted sound level at the microphone location point shall be measured, in the absence of motor vehicle noise emanating from within the clear zone, with fast meter response using a sound level measurement system that conforms to the rules of § 325.23.

(2) The measured ambient level must be 10 dB(A) or more below that level specified in § 325.7, Table 1, which corresponds to the maximum permissible sound level reading which is applicable at the test site at the time of testing.

(b) *Wind.* The wind velocity at the test site shall be measured at the beginning of each series of noise measurements and at intervals of 5–15 minutes thereafter until it has been established that the wind velocity is essentially constant. Once this fact has been established, wind velocity measurements may be made at intervals of once every hour. Noise measurements may only be made if the measured wind velocity is 12 mph (19.3 kph) or less. Gust wind measurements of up to 20 mph (33.2 kph) are allowed.

(c) *Precipitation.* Measurements are prohibited under any conditions of precipitation, however, measurements may be made with snow on the ground. The ground within the measurement area must be free of standing water.

[40 FR 42437, Sept. 12, 1975, as amended at 41 FR 28267, July 9, 1976]

§ 325.57 Location and operation of sound level measurement systems; stationary test.

(a) The microphone of a sound level measurement system that conforms to the rules in § 325.23 shall be located at a height of not less than 2 feet (.6 m) nor more than 6 feet (1.8 m) above the plane of the roadway surface and not less than 3½ feet (1.1 m) above the surface on which the microphone stands. The preferred microphone height on flat terrain is 4 feet (1.2 m).

49 CFR Ch. III (10–1–04 Edition)

(b) When the sound level measurement system is hand-held or otherwise monitored by a person located near its microphone, the holder must orient himself/herself relative to the highway in a manner consistent with the recommendation of the manufacturer of the sound level measurement system. In no case shall the holder or observer be closer than 2 feet (.6 m) from the system's microphone, nor shall he/she locate himself/herself between the microphone and the vehicle being measured.

(c) The microphone of the sound level measurement system shall be oriented toward the vehicle at an angle that is consistent with the recommendation of the system's manufacturer. If the manufacturer of the system does not recommend an angle of orientation for its microphone, the microphone shall be oriented at an angle of not less than 70 degrees and not more than perpendicular to the horizontal plane of the test site at the microphone target point.

(d) The sound level measurement system shall be set to the A-weighting network and "fast" meter response mode.

[40 FR 42437, Sept. 12, 1975, as amended at 41 FR 10227, Mar. 10, 1976]

§ 325.59 Measurement procedure; stationary test.

In accordance with the rules in this subpart, a measurement shall be made of the sound level generated by a stationary motor vehicle as follows:

(a) Park the motor vehicle on the test site as specified in § 325.53 of this subpart. If the motor vehicle is a combination (articulated) vehicle, park the combination so that the longitudinal centerlines of the towing vehicle and the towed vehicle or vehicles are in substantial alignment.

(b) Turn off all auxiliary equipment which is installed on the motor vehicle and which is designed to operate under normal conditions only when the vehicle is operating at a speed of 5 mph (8 kph) or less. Examples of such equipment include cranes, asphalt spreaders, liquid or slurry pumps, auxiliary air compressors, welders, and trash compactors.

(c) If the motor vehicle's engine radiator fan drive is equipped with a clutch or similar device that automatically either reduces the rotational speed of the fan or completely disengages the fan from its power source in response to reduced engine cooling loads, park the vehicle before testing with its engine running at high idle or any other speed the operator may choose, for sufficient time but not more than 10 minutes, to permit the engine radiator fan to automatically disengage when the vehicle's noise emissions are measured under stationary test.

(d) With the motor vehicle's transmission in neutral and its clutch engaged, rapidly accelerate the vehicle's engine from idle to its maximum governed speed with wide open throttle. Return the engine's speed to idle.

(e) Observe the maximum reading on the sound level measurement system during the time the procedures specified in paragraph (d) of this section are followed. Record that reading, if the reading has not been influenced by extraneous noise sources such as motor vehicles operating on adjacent roadways.

(f) Repeat the procedures specified in paragraphs (d) and (e) of this section until the first two maximum sound level readings that are within 2 dB(A) of each other are recorded. Numerically average those two maximum sound level readings. When appropriate, correct the average figure in accordance with the rules in subpart F of this part.

(g) The average figure, corrected as appropriate, contained in accordance with paragraph (f) of this section, is the sound level generated by the motor vehicle for the purpose of determining whether it conforms to the Standard for Operation Under Stationary Test, 40 CFR 202.21. (Table 1 in §325.7 lists the range of maximum permissible sound level readings for various test conditions.)

[40 FR 42437, Sept. 12, 1975, as amended at 41 FR 10226, Mar. 10, 1976]

Subpart F—Correction Factors

§ 325.71 Scope of the rules in this subpart.

(a) The rules in this subpart specify correction factors which are added to, or subtracted from, the reading of the sound level generated by a motor vehicle, as displayed on a sound level measurement system, during the measurement of the motor vehicle's sound level emissions at a test site which is not a standard site.

(b) The purpose of adding or subtracting a correction factor is to equate the sound level reading actually generated by the motor vehicle to the sound level reading it would have generated if the measurement had been made at a standard test site.

§ 325.73 Microphone distance correction factors.¹

If the distance between the microphone location point and the microphone target point is other than 50 feet (15.2 m), the maximum observed sound level reading generated by the motor vehicle in accordance with §325.39 of this part or the numerical average of the recorded maximum observed sound level readings generated by the motor vehicle in accordance with §325.59 of this part shall be corrected as specified in the following table:

TABLE 2—DISTANCE CORRECTION FACTORS

If the distance between the microphone location point and the microphone target point is	The value dB(A) to be applied to the observed sound level reading is—
31 feet (9.5 m) or more but less than 35 feet (10.7 m)	–4
35 feet (10.7 m) or more but less than 39 feet (11.9 m)	–3
39 feet (11.9 m) or more but less than 43 feet (13.1 m)	–2
43 feet (13.1 m) or more but less than 48 feet (14.6 m)	–1
48 feet (14.6 m) or more but less than 58 feet (17.7 m)	0

¹Table 1, in §325.7 is a tabulation of the maximum allowable sound level readings taking into account both the distance correction factors contained in §325.73 and the ground surface correction factors contained in §325.75.

§ 325.75

49 CFR Ch. III (10–1–04 Edition)

TABLE 2—DISTANCE CORRECTION FACTORS—
Continued

If the distance between the microphone location point and the microphone target point is	The value dB(A) to be applied to the observed sound level reading is—
58 feet (17.7 m) or more but less than 70 feet (21.3 m)	+1
70 feet (21.3 m) or more but less than 83 feet (25.3 m)	+2

[40 FR 42437, Sept. 12, 1975, as amended at 54 FR 50385, Dec. 6, 1989]

§ 325.75 Ground surface correction factors.¹

(a) *Highway operations.* When measurements are made in accordance with the rules in subpart D of this part upon a test site which is “hard,” a correction factor of 2 dB(A) shall be subtracted from the maximum observed sound level reading generated by the motor vehicle to determine whether the motor vehicle conforms to the Standards for Highway Operations, 40 CFR 202.20.

(b) *Stationary Test.* When measurements are made in accordance with the rules in subpart E of this part upon a test site which is “soft,” a correction factor of 2 dB(A) shall be added to the numerical average of the recorded maximum observed sound level readings generated by the motor vehicle to determine whether the motor vehicle conforms to the Standard for Operation Under Stationary Test, 40 CFR 202.21.

§ 325.77 Computation of open site requirements—nonstandard sites.

(a) If the distance between the microphone location point and the microphone target point is other than 50 feet (15.2 m), the test site must be an open site within a radius from both points which is equal to the distance between the microphone location point and the microphone target point.

¹Table 1, in § 325.7 is a tabulation of the maximum allowable sound level readings taking into account both the distance correction factors contained in § 325.73 and the ground surface correction factors contained in § 325.75.

(b) Plan view diagrams of non-standard test sites are shown in Figures 3 and 4. Figure 3 illustrates a test site which is larger than a standard test site and is based upon a 60-foot (18.3 m) distance between the microphone location point and the microphone target point. (See § 325.79(b)(1) for an example of the application of the correction factor to a sound level reading obtained at such a site.) Figure 4 illustrates a test site which is smaller than a standard test site and is based upon a 35-foot (10.7 m) distance between the microphone location point and the microphone target point. (See § 325.79(b)(2) for an example of the application of the correction factor to a sound level reading obtained at such a site.)

Figure 3
NON-STANDARD TEST SITE:
(60 FT (18.3M) DISTANCE BETWEEN
MICROPHONE LOCATION AND TARGET POINTS)

Figure 4
NON-STANDARD TEST SITE:
(35 FT (10.7M) DISTANCE BETWEEN
MICROPHONE LOCATION AND TARGET POINTS)

§ 325.79 Application of correction factors.

(a) If two correction factors apply to a measurement they are applied cumulatively.

(b) The following examples illustrate the application of correction factors to sound level measurement readings:

(1) *Example 1—Highway operations.* Assume that a motor vehicle generates a maximum observed sound level reading of 86 dB(A) during a measurement in accordance with the rules in subpart D of this part. Assume also that the distance between the microphone location point and the microphone target point is 60 feet (18.3 m) and that the measurement area of the test site is acoustically “hard.” The corrected sound level generated by the motor vehicle would be 85 dB(A), calculated as follows:

86 dB(A)	Uncorrected reading
+1 dB(A)	Distance correction factor
—2 dB(A)	Ground surface correction factor

85 dB(A) Corrected reading

(2) *Example 2—Stationary test.* Assume that a motor vehicle generates maximum sound level readings which average 88 dB(A) during a measurement in accordance with the rules in subpart E of this part. Assume also that the distance between the microphone location point and the microphone target point is 35 feet (10.7 m), and that the measurement area of the test site is acoustically “soft.” The corrected sound level generated by the motor vehicle would be 87 dB(A), calculated as follows:

88 dB(A)	Uncorrected average of readings
—3 dB(A)	Distance correction factor
+2 dB(A)	Ground surface correction factor

87 dB(A) Corrected reading

Subpart G—Exhaust Systems and Tires**§ 325.91 Exhaust systems.**

A motor vehicle does not conform to the visual exhaust system inspection requirements, 40 CFR 202.22, of the Interstate Motor Carrier Noise Emission Standards, if inspection of the exhaust system of the motor vehicle discloses that the system—

(a) Has a defect which adversely affects sound reduction, such as exhaust gas leaks or alteration or deterioration of muffler elements, (small traces of soot on flexible exhaust pipe sections shall not constitute a violation of this subpart);

(b) Is not equipped with either a muffler or other noise dissipative device, such as a turbocharger (supercharger driven by exhaust gases); or

(c) Is equipped with a cut-out, bypass, or similar device, unless such device is designed as an exhaust gas driven cargo unloading system.

§ 325.93 Tires.

(a) Except as provided in paragraph (b) of this section, a motor vehicle does not conform to the visual tire inspection requirements, 40 CFR 202.23, of the Interstate Motor Carrier Noise Emissions Standards, if inspection of any tire on which the vehicle is operating discloses that the tire has a tread pattern composed primarily of cavities in the tread (excluding sipes and local chunking) which are not vented by grooves to the tire shoulder or circumferentially to each other around the tire.

(b) Paragraph (a) of this section does not apply to a motor vehicle operated on a tire having a tread pattern of the type specified in that paragraph, if the motor carrier who operates the motor vehicle demonstrates to the satisfaction of the Administrator or his/her designee that either—

(1) The tire did not have that type of tread pattern when it was originally manufactured or newly remanufactured; or

(2) The motor vehicle generates a maximum sound level reading of 90 dB(A) or less when measured at a standard test site for highway operations at a distance of 15.3 meters (50 feet) and under the following conditions:

(i) The measurement must be made at a time and place and under conditions specified by the Administrator or his/her designee.

(ii) The motor vehicle must be operated on the same tires that were installed on it when the inspection specified in paragraph (a) of this section occurred.

§ 325.93

49 CFR Ch. III (10–1–04 Edition)

(iii) The motor vehicle must be operated on a highway having a posted speed limit of more than 56.3 kph (35 mph).

(iv) The sound level measurement must be made while the motor vehicle is operating at the posted speed limit.

[40 FR 42437, Sept. 12, 1975, as amended at 60 FR 38743, July 28, 1995]

SUBCHAPTER B—FEDERAL MOTOR CARRIER SAFETY REGULATIONS

PART 350—COMMERCIAL MOTOR CARRIER SAFETY ASSISTANCE PROGRAM

Subpart A—General

Sec.

- 350.101 What is the Motor Carrier Safety Assistance Program (MCSAP)?
- 350.103 What is the purpose of this part?
- 350.105 What definitions are used in this part?
- 350.107 What jurisdictions are eligible for MCSAP funding?
- 350.109 What are the national program elements?
- 350.111 What constitutes “traffic enforcement” for the purpose of the MCSAP?

Subpart B—Requirements for Participation

- 350.203 [Reserved]
- 350.205 How and when does a State apply for MCSAP funding?
- 350.207 What response does a State receive to its CVSP submission?
- 350.209 How does a State demonstrate that it satisfies the conditions for Basic Program funding?
- 350.211 What is the format of the certification required by §350.209?
- 350.213 What must a State CVSP include?
- 350.215 What are the consequences for a State that fails to perform according to an approved CVSP or otherwise fails to meet the conditions of this part?
- 350.217 What are the consequences for a State with a CDL program not in substantial compliance with 49 CFR part 384, subpart B?

Subpart C—Funding

- 350.301 What level of effort must a State maintain to qualify for MCSAP funding?
- 350.303 What are the State and Federal shares of expenses incurred under an approved CVSP?
- 350.305 Are U.S. Territories subject to the matching funds requirement?
- 350.307 How long are MCSAP funds available to a State?
- 350.309 What activities are eligible for reimbursement under the MCSAP?
- 350.311 What specific items are eligible for reimbursement under the MCSAP?
- 350.313 How are MCSAP funds allocated?
- 350.315 How may Basic Program Funds be used?

- 350.317 What are Incentive Funds and how may they be used?
- 350.319 What are permissible uses of High Priority Activity Funds?
- 350.321 What are permissible uses of Border Activity Funds?
- 350.323 What criteria are used in the Basic Program Funds allocation?
- 350.325 [Reserved]
- 350.327 How may States qualify for Incentive Funds?
- 350.329 How may a State or a local agency qualify for High Priority or Border Activity Funds?
- 350.331 How does a State ensure its laws and regulations are compatible with the FMCSRs and HMRs?
- 350.333 What are the guidelines for the compatibility review?
- 350.335 What are the consequences if my State has laws or regulations incompatible with the Federal regulations?
- 350.337 How may State laws and regulations governing motor carriers, CMV drivers, and CMVs in interstate commerce differ from the FMCSRs and still be considered compatible?
- 350.339 What are tolerance guidelines?
- 350.341 What specific variances from the FMCSRs are allowed for State laws and regulations governing motor carriers, CMV drivers, and CMVs engaged in intrastate commerce and not subject to Federal jurisdiction?
- 350.343 How may a State obtain a new exemption for State laws and regulations for a specific industry involved in intrastate commerce?
- 350.345 How does a State apply for additional variances from the FMCSRs?

Subpart A—General

§350.101 What is the Motor Carrier Safety Assistance Program (MCSAP)?

The MCSAP is a Federal grant program that provides financial assistance to States to reduce the number and severity of accidents and hazardous materials incidents involving commercial motor vehicles (CMV). The goal of the MCSAP is to reduce CMV-involved accidents, fatalities, and injuries through

§ 350.103

consistent, uniform, and effective CMV safety programs. Investing grant monies in appropriate safety programs will increase the likelihood that safety defects, driver deficiencies, and unsafe motor carrier practices will be detected and corrected before they become contributing factors to accidents. The MCSAP also sets forth the conditions for participation by States and local jurisdictions and promotes the adoption and uniform enforcement of safety rules, regulations, and standards compatible with the Federal Motor Carrier Safety Regulations (FMCSRs) and Federal Hazardous Material Regulations (HMRs) for both interstate and intrastate motor carriers and drivers.

§ 350.103 What is the purpose of this part?

The purpose of this part is to ensure the Federal Motor Carrier Safety Administration (FMCSA), States, and other political jurisdictions work in partnership to establish programs to improve motor carrier, CMV, and driver safety to support a safe and efficient transportation system.

§ 350.105 What definitions are used in this part?

10-year average accident rate means for each State, the aggregate number of large truck-involved fatal crashes (as reported in the Fatality Analysis Reporting System (FARS)) for a 10-year period divided by the aggregate vehicle miles traveled (VMT) (as defined by the Federal Motor Carrier Safety Administration (FMCSA)) for the same 10-year period.

Accident rate means for each State, the total number of fatal crashes involving large trucks (as measured by the FARS for each State) divided by the total VMT as defined by the FMCSA for each State for all vehicles.

Agency means Federal Motor Carrier Safety Administration.

Administrative Takedown Funds means funds deducted by the FMCSA each fiscal year from the amount made available for the MCSAP for expenses incurred in the administration of the MCSAP, including expenses to train State and local government employees.

Administrator means Federal Motor Carrier Safety Administrator.

49 CFR Ch. III (10–1–04 Edition)

Basic Program Funds means the total MCSAP funds less the High Priority Activity, Border Activity, Administrative Takedown, and Incentive Funds.

Border Activity Funds means funds provided to States, local governments, and other persons carrying out programs, activities, and projects relating to CMV safety and regulatory enforcement supporting the North American Free Trade Agreement (NAFTA) at the U.S. border. Up to 5 percent of total MCSAP funds are available for these activities.

Commercial motor vehicle (CMV) means a motor vehicle that has any of the following characteristics:

(1) A gross vehicle weight (GVW), gross vehicle weight rating (GVWR), gross combination weight (GCW), or gross combination weight rating (GCWR) of 4,537 kilograms (10,001 pounds) or more.

(2) Regardless of weight, is designed or used to transport 16 or more passengers, including driver.

(3) Regardless of weight, is used in the transportation of hazardous materials and is required to be placarded pursuant to 49 CFR part 172, subpart F.

Commercial vehicle safety plan (CVSP) means the document outlining the State's CMV safety objectives, strategies, activities and performance measures.

Compatible or *Compatibility* means State laws and regulations applicable to interstate commerce and to intrastate movement of hazardous materials are identical to the FMCSRs and the HMRs or have the same effect as the FMCSRs. State laws applicable to intrastate commerce are either identical to, or have the same effect as, the FMCSRs or fall within the established limited variances under § 350.341.

High Priority Activity Funds means funds provided to States, local governments, and other persons carrying out activities and projects that directly support the MCSAP, are national in scope in that the successful activity or project could potentially be applied in other States on a national scale, and improve CMV safety and compliance with CMV safety regulations. Up to 5 percent of total MCSAP funds are available for these activities.

Incentive Funds means funds awarded to States achieving reductions in CMV involved fatal accidents, CMV fatal accident rate, or meeting specified CMV safety program performance criteria.

Large truck means a truck over 10,000 pounds gross vehicle weight rating including single unit trucks and truck tractors (FARS definition).

Motor carrier means a for-hire motor carrier or private motor carrier. The term includes a motor carrier's agents, officers, or representatives responsible for hiring, supervising, training, assigning, or dispatching a driver or concerned with the installation, inspection, and maintenance of motor vehicle equipment or accessories or both.

North American Standard Inspection means the methodology used by State CMV safety inspectors to conduct safety inspections of CMVs. This consists of various levels of inspection of the vehicle or driver or both. The inspection criteria are developed by the FMCSA in conjunction with the Commercial Vehicle Safety Alliance (CVSA), an association of States, Canadian Provinces, and Mexico whose members agree to adopt these standards for inspecting CMVs in their jurisdiction.

§350.107 What jurisdictions are eligible for MCSAP funding?

All of the States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, American Samoa, Guam, and the Virgin Islands are eligible to receive MCSAP grants directly from the FMCSA. For purposes of this subpart, all references to "State" or "States" include these jurisdictions.

§350.109 What are the national program elements?

The national program elements include the following five activities:

- (a) Driver/vehicle inspections.
- (b) Traffic enforcement.
- (c) Compliance reviews.
- (d) Public education and awareness.
- (e) Data collection.

§350.111 What constitutes "traffic enforcement" for the purpose of the MCSAP?

Traffic enforcement means enforcement activities of State or local officials, including stopping CMVs operating on highways, streets, or roads for violations of State or local motor vehicle or traffic laws (*e.g.*, speeding, following too closely, reckless driving, improper lane change). To be eligible for funding through the grant, traffic enforcement must include an appropriate North American Standard Inspection of the CMV or driver or both prior to releasing the driver or CMV for resumption of operations.

Subpart B—Requirements for Participation

§350.201 What conditions must a State meet to qualify for Basic Program Funds?

Each State must meet the following twenty-two conditions:

(a) Assume responsibility for improving motor carrier safety and adopting and enforcing State safety laws and regulations that are compatible with the FMCSRs (49 CFR parts 390–397) and the HMRs (49 CFR parts 107 (subparts F and G only), 171–173, 177, 178 and 180), except as may be determined by the Administrator to be inapplicable to a State enforcement program.

(b) Implement a performance-based program by the beginning of Fiscal Year 2000 and submit a CVSP which will serve as the basis for monitoring and evaluating the State's performance.

(c) Designate, in its State Certification, the lead State agency responsible for implementing the CVSP.

(d) Ensure that only agencies having the legal authority, resources, and qualified personnel necessary to enforce the FMCSRs and HMRs or compatible State laws or regulations are assigned to perform functions in accordance with the approved CVSP.

(e) Allocate adequate funds for the administration of the CVSP including the enforcement of the FMCSRs, HMRs, or compatible State laws or regulations.

§ 350.203

49 CFR Ch. III (10–1–04 Edition)

(f) Maintain the aggregate expenditure of funds by the State and its political subdivisions, exclusive of Federal funds, for motor carrier and highway hazardous materials safety enforcement, eligible for funding under this part, at a level at least equal to the average expenditure for Federal or State fiscal years 1997, 1998, and 1999.

(g) Provide legal authority for a right of entry and inspection adequate to carry out the CVSP.

(h) Prepare and submit to the FMCSA, upon request, all reports required in connection with the CVSP or other conditions of the grant.

(i) Adopt and use the reporting standards and forms required by the FMCSA to record work activities performed under the CVSP.

(j) Require registrants of CMVs to declare, at the time of registration, their knowledge of applicable FMCSRs, HMRs, or compatible State laws or regulations.

(k) Grant maximum reciprocity for inspections conducted under the North American Standard Inspection through the use of a nationally accepted system that allows ready identification of previously inspected CMVs.

(l) Conduct CMV size and weight enforcement activities funded under this program only to the extent those activities do not diminish the effectiveness of other CMV safety enforcement programs.

(m) Coordinate the CVSP, data collection and information systems, with State highway safety programs under title 23 United States Code (U.S.C.).

(n) Ensure participation in SAFETYNET and other information systems by all appropriate jurisdictions receiving funding under this section.

(o) Ensure information is exchanged with other States in a timely manner.

(p) Emphasize and improve enforcement of State and local traffic laws and regulations related to CMV safety.

(q) Promote activities in support of the national program elements listed in § 350.109, including the following three activities:

(1) Activities aimed at removing impaired CMV drivers from the highways through adequate enforcement of restrictions on the use of alcohol and

controlled substances and by ensuring ready roadside access to alcohol detection and measuring equipment.

(2) Activities aimed at providing an appropriate level of training to MCSAP personnel to recognize drivers impaired by alcohol or controlled substances.

(3) Interdiction activities affecting the transportation of controlled substances by CMV drivers and training on appropriate strategies for carrying out those interdiction activities.

(r) Enforce requirements relating to the licensing of CMV drivers, including checking the status of commercial drivers' licenses (CDL).

(s) Require the proper and timely correction of all CMV safety violations noted during inspections carried out with MCSAP funds.

(t)(1) Enforce registration requirements under 49 U.S.C. 13902, and 49 CFR part 365, and 49 CFR 392.9a by placing out-of-service the vehicle discovered to be operating without registration or beyond the scope of its registration.

(2) Enforce financial responsibility requirements under 49 U.S.C. 13906, 31138, 31139, and 49 CFR part 387.

(u) Adopt and maintain consistent, effective, and reasonable sanctions for violations of CMV, driver, and hazardous materials regulations.

(v) Ensure that MCSAP agencies have policies that stipulate roadside inspections will be conducted at locations that are adequate to protect the safety of drivers and enforcement personnel.

[65 FR 15102, Mar. 21, 2000, as amended at 67 FR 55165, Aug. 28, 2002; 67 FR 61820, Oct. 2, 2002]

§ 350.203 [Reserved]

§ 350.205 How and when does a State apply for MCSAP funding?

(a) The lead agency, designated by the Governor, must submit the State's CVSP to the Motor Carrier State Director, FMCSA, on or before August 1 of each year.

(b) This deadline may, for good cause, be extended by the State Director for a period not to exceed 30 calendar days.

(c) For a State to receive funding, the CVSP must be complete and include all required documents.

§ 350.207 What response does a State receive to its CVSP submission?

(a) The FMCSA will notify the State, in writing, within 30 days of receipt of the CVSP whether:

(1) The plan is approved.

(2) Approval of the plan is withheld because the CVSP does not meet the requirements of this part, or is not adequate to ensure effective enforcement of the FMCSRs and HMRs or compatible State laws and regulations.

(b) If approval is withheld, the State will have 30 days from the date of the notice to modify and resubmit the plan.

(c) Disapproval of a resubmitted plan is final.

(d) Any State aggrieved by an adverse decision under this section may seek judicial review under 5 U.S.C. chapter 7.

§ 350.209 How does a State demonstrate that it satisfies the conditions for Basic Program funding?

(a) The Governor, the State's Attorney General, or other State official specifically designated by the Governor, must execute a State Certification as described in § 350.211.

(b) The State must submit the State Certification along with its CVSP, and supplement it with a copy of any State law, regulation, or form pertaining to CMV safety adopted since the State's last certification that bears on the items contained in § 350.201 of this subpart.

§ 350.211 What is the format of the certification required by § 350.209?

The State's certification must be consistent with the following content:

I (name), (title), on behalf of the State (or Commonwealth) of (State), as requested by the Administrator as a condition of approval of a grant under the authority of 49 U.S.C. 31102, as amended, do hereby certify as follows:

1. The State has adopted commercial motor carrier and highway hazardous materials safety rules and regulations that are compatible with the FMCSRs and the HMRs.

2. The State has designated (name of State CMV safety agency) as the lead agency to administer the CVSP for the grant sought and (names of agencies) to perform defined functions under the plan. These agencies have the legal authority, resources, and qualified

personnel necessary to enforce the State's commercial motor carrier, driver, and highway hazardous materials safety laws or regulations.

3. The State will obligate the funds or resources necessary to provide a matching share to the Federal assistance provided in the grant to administer the plan submitted and to enforce the State's commercial motor carrier safety, driver, and hazardous materials laws or regulations in a manner consistent with the approved plan.

4. The laws of the State provide the State's enforcement officials right of entry and inspection sufficient to carry out the purposes of the CVSP, as approved, and provide that the State will grant maximum reciprocity for inspections conducted pursuant to the North American Standard Inspection procedure, through the use of a nationally accepted system allowing ready identification of previously inspected CMVs.

5. The State requires that all reports relating to the program be submitted to the appropriate State agency or agencies, and the State will make these reports available, in a timely manner, to the FMCSA on request.

6. The State has uniform reporting requirements and uses FMCSA designated forms for record keeping, inspection, and other enforcement activities.

7. The State has in effect a requirement that registrants of CMVs declare their knowledge of the applicable Federal or State CMV safety laws or regulations.

8. The State will maintain the level of its expenditures, exclusive of Federal assistance, at least at the level of the average of the aggregate expenditures of the State and its political subdivisions during State or Federal fiscal years 1997, 1998, and 1999. These expenditures must cover at least the following four program areas, if applicable:

(a) Motor carrier safety programs in accordance with 49 CFR 350.301.

(b) Size and weight enforcement programs.

(c) Traffic safety.

(d) Drug interdiction enforcement programs.

9. The State will ensure that CMV size and weight enforcement activities funded with MCSAP funds will not diminish the effectiveness of other CMV safety enforcement programs.

10. The State will ensure that violation fines imposed and collected by the State are consistent, effective, and equitable.

11. The State will ensure it has a program for timely and appropriate correction of all violations discovered during inspections conducted using MCSAP funds.

12. The State will ensure that the CVSP, data collection, and information systems are coordinated with the State highway safety program under title 23, U.S. Code. The name of the Governor's highway safety representative (or other authorized State official

§ 350.213

49 CFR Ch. III (10–1–04 Edition)

through whom coordination was accomplished) is _____. (Name)

13. The State participates in SAFETYNET and ensures information is exchanged with other States in a timely manner.

14. The State has undertaken efforts to emphasize and improve enforcement of State and local traffic laws as they pertain to CMV safety.

15. The State will ensure that MCSAP agencies have departmental policies stipulating that roadside inspections will be conducted at locations that are adequate to protect the safety of drivers and enforcement personnel.

16. The State will ensure that requirements relating to the licensing of CMV drivers are enforced, including checking the status of CDLs.

17. The State or a local recipient of MCSAP funds will certify that it meets the minimum Federal standards set forth in 49 CFR part 385, Subpart C, for training and experience of employees performing safety audits, compliance reviews, or driver/vehicle roadside inspections.

[65 FR 15102, Mar. 21, 2000, as amended at 67 FR 12779, Mar. 19, 2002; 67 FR 61820, Oct. 2, 2002]

§ 350.213 What must a State CVSP include?

The State's CVSP must reflect a performance-based program, and contain the following eighteen items:

(a) A general overview section that must include the following two items:

(1) A statement of the State agency goal or mission.

(2) A program summary of the effectiveness of the prior years' activities in reducing CMV accidents, injuries and fatalities, and improving driver and motor carrier safety performance. Data periods used must be consistent from year to year. This may be calendar year or fiscal year or any 12-month period of time for which the State's data is current. The summary must show trends supported by safety and program performance data collected over several years. It must identify safety or performance problems in the State and those problems must be addressed in the new or modified CVSP.

(b) A brief narrative describing how the State program addresses the national program elements listed in § 350.109. The plan must address these elements even if there are no planned

activities in a program area. The rationale for the resource allocation decision must be explained. The narrative section must include a description of how the State supports the activities identified in § 350.201(q) and (t).

(1) Activities aimed at removing impaired CMV drivers from the highways through adequate enforcement of restrictions on the use of alcohol and controlled substances and by ensuring ready roadside access to alcohol detection and measuring equipment.

(2) Activities aimed at providing an appropriate level of training to MCSAP personnel to recognize drivers impaired by alcohol or controlled substances.

(3) Interdiction activities affecting the transportation of controlled substances by CMV drivers and training on appropriate strategies for carrying out those interdiction activities.

(4) Activities to enforce registration requirements under 49 U.S.C. 13902 and 49 CFR part 365 and financial responsibility requirements under 49 U.S.C. 13906, 31138 and 31139 and 49 CFR part 387.

(c) A definitive problem statement for each objective, supported by data or other information. The CVSP must identify the source of the data, and who is responsible for its collection, maintenance, and analysis.

(d) Performance objectives, stated in quantifiable terms, to be achieved through the State plan. Objectives must include a measurable reduction in highway accidents or hazardous materials incidents involving CMVs. The objective may also include documented improvements in other program areas (e.g., legislative or regulatory authority, enforcement results, or resource allocations).

(e) Strategies to be employed to achieve performance objectives. Strategies may include education, enforcement, legislation, use of technology and improvements to safety infrastructure.

(f) Specific activities intended to achieve the stated strategies and objectives. Planned activities must be eligible under this program as defined in §§ 350.309 and 350.311.

(g) Specific quantifiable performance measures, as appropriate. These performance measures will be used to assist the State in monitoring the progress of its program and preparing an annual evaluation.

(h) A description of the State's method for ongoing monitoring of the progress of its plan. This should include who will conduct the monitoring, the frequency with which it will be carried out, and how and to whom reports will be made.

(i) An objective evaluation that discusses the progress towards individual objectives listed under the "Performance Objectives" section of the previous year's CVSP and identifies any safety or performance problems discovered. States will identify those problems as new objectives or make modifications to the existing objectives in the next CVSP.

(j) A budget which supports the CVSP, describing the expenditures for allocable costs such as personnel and related costs, equipment purchases, printing, information systems costs, and other eligible costs consistent with §§ 350.311 and 350.309.

(k) A budget summary form including planned expenditures for that fiscal year and projected number of activities in each national program element, except data collection.

(l) The results of the annual review to determine the compatibility of State laws and regulations with the FMCSRs and HMRs.

(m) A copy of any new law or regulation affecting CMV safety enforcement that was enacted by the State since the last CVSP was submitted.

(n) Executed State Certification as outlined in § 350.211.

(o) Executed MCSAP-1 form.

(p) List of MCSAP contacts.

(q) Annual Certification of Compatibility, § 350.331.

(r) State Training Plan.

[65 FR 15102, Mar. 21, 2000, as amended at 67 FR 61820, Oct. 2, 2002; 67 FR 63019, Oct. 9, 2002]

§ 350.215 What are the consequences for a State that fails to perform according to an approved CVSP or otherwise fails to meet the conditions of this part?

(a) If a State is not performing according to an approved plan or not adequately meeting conditions set forth in § 350.201, the Administrator may issue a written notice of proposed determination of nonconformity to the Governor of the State or the official designated in the plan. The notice will set forth the reasons for the proposed determination.

(b) The State will have 30 days from the date of the notice to reply. The reply must address the deficiencies or incompatibility cited in the notice and provide documentation as necessary.

(c) After considering the State's reply, the Administrator will make a final decision.

(d) In the event the State fails timely to reply to a notice of proposed determination of nonconformity, the notice becomes the Administrator's final determination of nonconformity.

(e) Any adverse decision will result in immediate cessation of Federal funding under this part.

(f) Any State aggrieved by an adverse decision under this section may seek judicial review under 5 U.S.C. chapter 7.

§ 350.217 What are the consequences for a State with a CDL program not in substantial compliance with 49 CFR part 384, subpart B?

(a) A State with a CDL program not in substantial compliance with 49 CFR part 384, subpart B, as required by 49 CFR part 384, subpart C, is subject to the loss of all Motor Carrier Safety Assistance Program (MCSAP) grant funds authorized under sec. 103(b)(1) of the Motor Carrier Safety Improvement Act of 1999 [Pub. L. 106-159, 113 Stat. 1748] and loss of certain Federal-aid highway funds, as specified in 49 CFR part 384, subpart D.

(b) Withheld MCSAP grant funds will be restored to the State if the State meets the conditions of § 384.403(b) of this subchapter.

[67 FR 49755, July 31, 2002]

Subpart C—Funding

§ 350.301 What level of effort must a State maintain to qualify for MCSAP funding?

(a) The State must maintain the average aggregate expenditure (monies spent during the base period of Federal or State fiscal years 1997, 1998, and 1999) of State funds for motor carrier and highway hazardous materials safety enforcement purposes, in the year in which the grant is sought.

(b) Determination of a State's level of effort must not include the following three things:

(1) Federal funds received for support of motor carrier and hazardous materials safety enforcement.

(2) State matching funds.

(3) State funds used for federally sponsored demonstration or pilot CMV safety programs.

(c) The State must include costs associated with activities performed during the base period by State or local agencies currently receiving or projected to receive funds under this part. It must include only those activities which meet the current requirements for funding eligibility under the grant program.

§ 350.303 What are the State and Federal shares of expenses incurred under an approved CVSP?

(a) The FMCSA will reimburse up to 80 percent of the eligible costs incurred in the administration of an approved CVSP.

(b) In-kind contributions are acceptable in meeting the State's matching share if they represent eligible costs as established by 49 CFR part 18 or agency policy.

§ 350.305 Are U.S. Territories subject to the matching funds requirement?

The Administrator waives the requirement for matching funds for the Virgin Islands, American Samoa, Guam, and the Commonwealth of the Northern Mariana Islands.

§ 350.307 How long are MCSAP funds available to a State?

The funds obligated to a State will remain available for the rest of the fiscal year in which they were obligated

and the next full fiscal year. The State must account for any prior year's unexpended funds in the annual CVSP. Funds must be expended in the order in which they are obligated.

§ 350.309 What activities are eligible for reimbursement under the MCSAP?

The primary activities eligible for reimbursement are:

(a) The five national program elements listed in § 350.109 of this part.

(b) Sanitary food transportation inspections performed under 49 U.S.C. 5708.

(c) The following three activities, when accompanied by an appropriate North American Standard Inspection and inspection report:

(1) Enforcement of size and weight regulations conducted at locations other than fixed weight facilities, at specific geographical locations where the weight of the vehicle can significantly affect the safe operation of the vehicle, or at seaports where intermodal shipping containers enter and exit the United States.

(2) Detection of the unlawful presence of controlled substances in a CMV or on the driver or any occupant of a CMV.

(3) Enforcement of State traffic laws and regulations designed to promote the safe operation of CMVs.

§ 350.311 What specific items are eligible for reimbursement under the MCSAP?

All reimbursable items must be necessary, reasonable, allocable to the approved CVSP, and allowable under this part and 49 CFR part 18. The eligibility of specific items is subject to review by the FMCSA. The following six types of expenses are eligible for reimbursement:

(a) Personnel expenses, including recruitment and screening, training, salaries and fringe benefits, and supervision.

(b) Equipment and travel expenses, including per diem, directly related to the enforcement of safety regulations, including vehicles, uniforms, communications equipment, special inspection equipment, vehicle maintenance, fuel, and oil.

(c) Indirect expenses for facilities, except fixed scales, used to conduct inspections or house enforcement personnel, support staff, and equipment to the extent they are measurable and recurring (e.g., rent and overhead).

(d) Expenses related to data acquisition, storage, and analysis that are specifically identifiable as program-related to develop a data base to coordinate resources and improve efficiency.

(e) Clerical and administrative expenses, to the extent necessary and directly attributable to the MCSAP.

(f) Expenses related to the improvement of real property (e.g., installation of lights for the inspection of vehicles at night). Acquisition of real property, land, or buildings are not eligible costs.

§ 350.313 How are MCSAP funds allocated?

(a) After deducting administrative expenses authorized in 49 U.S.C. 31104(e), the MCSAP funds are allocated as follows:

(1) Up to 5 percent of the MCSAP funds appropriated for each fiscal year may be distributed for High Priority Activities and Projects at the discretion of the Administrator.

(2) Up to 5 percent of the MCSAP funds appropriated for each fiscal year may be distributed for Border CMV Safety and Enforcement Programs at the discretion of the Administrator.

(3) The remaining funds will be allocated among qualifying States in two ways:

(i) As Basic Program Funds in accordance with § 350.323 of this part,

(ii) As Incentive Funds in accordance with § 350.327 of this part.

(b) The funding provided in paragraphs (a)(1) and (a)(2) of this section may be awarded through contract, cooperative agreement, or grant. The FMCSA will notify States if it intends to solicit State grant proposals for any portion of this funding.

(c) The funding provided under paragraphs (a)(1) and (a)(2) of this section may be made available to State MCSAP lead agencies, local governments, and other persons that use and train qualified officers and employees in coordination with State motor vehicle safety agencies.

§ 350.315 How may Basic Program Funds be used?

Basic Program Funds may be used for any eligible activity or item consistent with §§ 350.309 and 350.311.

§ 350.317 What are Incentive Funds and how may they be used?

Incentive Funds are monies, in addition to Basic Program Funds, provided to States that achieve reduction in CMV-involved fatal accidents, CMV fatal accident rate, or that meet specified CMV safety performance criteria. Incentive Funds may be used for any eligible activity or item consistent with §§ 350.309 and 350.311.

§ 350.319 What are permissible uses of High Priority Activity Funds?

(a) The FMCSA may generally use these funds to support, enrich, or evaluate State CMV safety programs and to accomplish the five objectives listed below:

(1) Implement, promote, and maintain national programs to improve CMV safety.

(2) Increase compliance with CMV safety regulations.

(3) Increase public awareness about CMV safety.

(4) Provide education on CMV safety and related issues.

(5) Demonstrate new safety related technologies.

(b) These funds will be allocated, at the discretion of the FMCSA, to States, local governments, and other organizations that use and train qualified officers and employees in coordination with State safety agencies.

(c) The FMCSA will notify the States when such funds are available.

(d) The Administrator may designate up to 5 percent of the annual MCSAP funding for these projects and activities.

§ 350.321 What are permissible uses of Border Activity Funds?

(a) The FMCSA may generally use such funds to develop and implement a national program addressing CMV safety and enforcement activities along the United States' borders.

(b) These funds will be allocated, at the discretion of the FMCSA, to States, local governments, and other

§ 350.323

49 CFR Ch. III (10–1–04 Edition)

organizations that use and train qualified officials and employees in coordination with State safety agencies. The FMCSA will notify the States when such funds are available. The Administrator may designate up to 5 percent of the annual MCSAP funding for these projects and activities.

§ 350.323 What criteria are used in the Basic Program Funds allocation?

(a) The funds are distributed proportionally to the States using the following four, equally weighted (25 percent), factors.

(1) 1997 Road miles (all highways) as defined by the FMCSA.

(2) All vehicle miles traveled (VMT) as defined by the FMCSA.

(3) Population—annual census estimates as issued by the U.S. Census Bureau.

(4) Special fuel consumption (net after reciprocity adjustment) as defined by the FMCSA.

(b) Distribution of Basic Program Funds is subject to a maximum and minimum allocation as illustrated in the Table to this section, as follows:

TABLE TO § 350.323(b)—BASIC PROGRAM FUND ALLOCATION LIMITATIONS

Recipient	Maximum allocation	Minimum allocation
States and Puerto Rico ...	4.944% of the Basic Program Funds	\$350,000 or 0.44% of Basic Program Funds, whichever is greater.
U.S. Territories	\$350,000 (fixed amount)	

§ 350.325 [Reserved]

§ 350.327 How may States qualify for Incentive Funds?

(a) A State may qualify for Incentive Funds if it can demonstrate that its CMV safety program has shown improvement in any or all of the following five categories:

(1) Reduction of large truck-involved fatal accidents.

(2) Reduction of large truck-involved fatal accident rate or maintenance of a large truck-involved fatal accident rate that is among the lowest 10 percent of such rates of MCSAP recipients.

(3) Upload of CMV accident reports in accordance with current FMCSA policy guidelines.

(4) Verification of CDLs during all roadside inspections.

(5) Upload of CMV inspection data in accordance with current FMCSA policy guidelines.

(b) Incentive Funds will be distributed based upon the five following safety and program performance factors:

(1) Five shares will be awarded to States that reduce the number of large truck-involved fatal accidents for the most recent calendar year for which data are available when compared to the 10-year average number of large truck-involved fatal accidents ending

with the preceding year. The 10-year average will be computed from the number of large truck-involved fatal crashes, as reported by the FARS, administered by the National Highway Traffic Safety Administration (NHTSA).

(2) Four shares will be awarded to States that reduce the fatal-accident rate for the most recent calendar year for which data are available when compared to each State's average fatal accident rate for the preceding 10-year period. States with the lowest 10 percent of accident rates in the most recent calendar year for which data are available will be awarded three shares if the rate for the State is the same as its average accident rate for the preceding 10-year period.

(3) Two shares will be awarded to States that upload CMV accident data within FMCSA policy guidelines.

(4) Two shares will be awarded to States that certify their MCSAP inspection agencies have departmental policies that stipulate CDLs are verified, as part of the inspection process, through Commercial Driver's License Information System (CDLIS), National Law Enforcement Tracking System (NLETS), or the State licensing authority.

(5) Two shares will be awarded to States that upload CMV inspection reports within current FMCSA policy guidelines.

(c) The total of all States' shares awarded will be divided into the dollar amount of Incentive Funds available, thereby establishing the value of one share. Each State's incentive allocation will then be determined by multiplying the State's percentage participation in the formula allocation of Basic Program Funds, by the number of shares it received that year, multiplied by the dollar value of one share.

(d) States may use Incentive Funds for any eligible CMV safety purpose.

(e) Incentive Funds are subject to the same State matching requirements as Basic Program Funds.

(f) A State must annually certify compliance with the applicable incentive criteria to receive Incentive Funds. A State must submit the required certification as part of its CVSP or as a separate document.

§ 350.329 How may a State or a local agency qualify for High Priority or Border Activity Funds?

(a) States must meet the requirements of § 350.201, as applicable.

(b) Local agencies must meet the following nine conditions:

(1) Prepare a proposal in accordance with § 350.213, as applicable.

(2) Coordinate the proposal with the State lead MCSAP agency to ensure the proposal is consistent with State and national CMV safety program priorities.

(3) Certify that your local jurisdiction has the legal authority, resources, and trained and qualified personnel necessary to perform the functions specified in the proposal.

(4) Designate a person who will be responsible for implementation, reporting, and administering the approved proposal and will be the primary contact for the project.

(5) Agree to fund up to 20 percent of the proposed request.

(6) Agree to prepare and submit all reports required in connection with the proposal or other conditions of the grant.

(7) Agree to use the forms and reporting criteria required by the State lead

MCSAP agency and/or the FMCSA to record work activities to be performed under the proposal.

(8) Certify that the local agency will impose sanctions for violations of CMV and driver laws and regulations that are consistent with those of the State.

(9) Certify participation in national data bases appropriate to the project.

§ 350.331 How does a State ensure its laws and regulations are compatible with the FMCSRs and HMRs?

(a) A State must review any new law or regulation affecting CMV safety as soon as possible, but in any event immediately after enactment or issuance, for compatibility with the FMCSRs and HMRs.

(b) If the review determines that the new law or regulation is incompatible with the FMCSRs and/or HMRs, the State must immediately notify the Motor Carrier State Director.

(c) A State must conduct an annual review of its laws and regulations for compatibility and report the results of that review in the annual CVSP in accordance with § 350.213(l) along with a certification of compliance, no later than August 1 of each year. The report must include the following two items:

(1) A copy of the State law, regulation, or policy relating to CMV safety that was adopted since the State's last report.

(2) A certification, executed by the State's Governor, Attorney General, or other State official specifically designated by the Governor, stating that the annual review was performed and that State CMV safety laws remain compatible with the FMCSRs and HMRs. If State CMV laws are no longer compatible, the certifying official shall explain.

(d) As soon as practical after the effective date of any newly enacted regulation or amendment to the FMCSRs or HMRs, but no later than three years after that date, the State must amend its laws or regulations to make them compatible with the FMCSRs and/or HMRs, as amended.

§ 350.333 What are the guidelines for the compatibility review?

(a) The State law or regulation must apply to all segments of the motor carrier industry (*i.e.*, for-hire and private motor carriers of property and passengers).

(b) Laws and regulations reviewed for the CDL compliance report are excluded from the compatibility review.

(c) Definitions of words or terms must be consistent with those in the FMCSRs and HMRs.

(d) A State must identify any law or regulation that is not the same as the corresponding Federal regulation and evaluate it in accordance with the table to this section as follows:

TABLE TO § 350.333—GUIDELINES FOR THE STATE LAW AND REGULATION COMPATIBILITY REVIEW

Law or regulation has same effect as corresponding Federal regulation	Applies to interstate or intrastate commerce	Less stringent or more stringent	Action authorized
(1) Yes			Compatible—Interstate and intrastate commerce enforcement authorized.
(2) No	Intrastate		Refer to § 350.341
(3) No	Interstate	Less stringent	Enforcement prohibited.
(4) No	Interstate	More stringent	Enforcement authorized if the State can demonstrate the law or regulation has a safety benefit or does not create an undue burden upon interstate commerce (See 49 CFR Part 355).

§ 350.335 What are the consequences if my State has laws or regulations incompatible with the Federal regulations?

(a) A State that currently has compatible CMV safety laws and regulations pertaining to interstate commerce (*i.e.*, rules identical to the FMCSRs and HMRs) and intrastate commerce (*i.e.*, rules identical to or within the tolerance guidelines for the FMCSRs and identical to the HMRs) but enacts a law or regulation which results in an incompatible rule will not be eligible for Basic Program Funds nor Incentive Funds.

(b) A State that fails to adopt any new regulation or amendment to the FMCSRs or HMRs within three years of its effective date will be deemed to have incompatible regulations and will not be eligible for Basic Program nor Incentive Funds.

(c) Those States with incompatible laws or regulations pertaining to intrastate commerce and receiving 50 percent of their basic formula allocation on April 20, 2000 will continue at that level of funding until those incompatibilities are removed, provided no further incompatibilities are created.

(d) Upon a finding by the FMCSA, based upon its own initiative or upon a

petition of any person, including any State, that your State law, regulation or enforcement practice pertaining to CMV safety, in either interstate or intrastate commerce, is incompatible with the FMCSRs or HMRs, the FMCSA may initiate a proceeding under § 350.215 for withdrawal of eligibility for all Basic Program and Incentive Funds.

(e) Any decision regarding the compatibility of your State law or regulation with the HMRs that requires an interpretation will be referred to the Research and Special Programs Administration of the DOT for such interpretation before proceeding under § 350.215.

§ 350.337 How may State laws and regulations governing motor carriers, CMV drivers, and CMVs in interstate commerce differ from the FMCSRs and still be considered compatible?

States are not required to adopt 49 CFR parts 398 and 399, subparts A through E and H of part 107, and §§ 171.15 and 171.16, as applicable to either interstate or intrastate commerce.

§ 350.339 What are tolerance guidelines?

Tolerance guidelines set forth the limited deviations from the FMCSRs allowed in your State's laws and regulations. These variances apply only to motor carriers, CMV drivers and CMVs engaged in intrastate commerce and not subject to Federal jurisdiction.

§ 350.341 What specific variances from the FMCSRs are allowed for State laws and regulations governing motor carriers, CMV drivers, and CMVs engaged in intrastate commerce and not subject to Federal jurisdiction?

(a) A State may exempt a CMV from all or part of its laws or regulations applicable to intrastate commerce, provided that neither the GVW, GVWR, GCW, nor GCWR of the vehicle equals or exceeds 11,801 kg (26,001 lbs.). However, a State may not exempt a CMV from such laws or regulations if the vehicle:

(1) Transports hazardous materials requiring a placard.

(2) Is designed or used to transport 16 or more people, including the driver.

(b) State laws and regulations applicable to intrastate commerce may not grant exemptions based upon the type of transportation being performed (*e.g.*, for-hire, private, etc.).

(c) A State may retain those exemptions from its motor carrier safety laws and regulations that were in effect before April, 1988, are still in effect, and apply to specific industries operating in intrastate commerce.

(d) State laws and regulations applicable to intrastate commerce must not include exemptions based upon the distance a motor carrier or driver operates from the work reporting location. This prohibition does not apply to those exemptions already contained in the FMCSRs nor to the extension of the mileage radius exemption contained in 49 CFR 395.1(e) from 100 to 150 miles.

(e) Hours of service—State hours-of-service limitations applied to intrastate transportation may vary to the extent of allowing the following:

(1) A 12-hour driving limit, provided driving a CMV after having been on duty more than 16 hours is prohibited.

(2) Driving prohibitions for drivers who have been on duty 70 hours in 7 consecutive days or 80 hours in 8 consecutive days.

(f) Age of CMV driver—All CMV drivers must be at least 18 years of age.

(g) Grandfather clauses—States may provide grandfather clauses in their rules and regulations if such exemptions are uniform or in substantial harmony with the FMCSRs and provide an orderly transition to full regulatory adoption at a later date.

(h) Driver qualifications:

(1) Intrastate drivers who do not meet the physical qualification standards in 49 CFR 391.41 may continue to be qualified to operate a CMV in intrastate commerce if the following three conditions are met:

(i) The driver was qualified under existing State law or regulation at the time the State adopted physical qualification standards compatible with the Federal standards in 49 CFR 391.41.

(ii) The otherwise non-qualifying medical or physical condition has not substantially worsened.

(iii) No other non-qualifying medical or physical condition has developed.

(2) The State may adopt or continue programs granting variances to intrastate drivers with medical or physical conditions that would otherwise be non-qualifying under the State's equivalent of 49 CFR 391.41 if the variances are based upon sound medical judgment combined with appropriate performance standards ensuring no adverse affect on safety.

§ 350.343 How may a State obtain a new exemption for State laws and regulations for a specific industry involved in intrastate commerce?

The FMCSA strongly discourages exemptions for specific industries, but will consider such requests if the State submits documentation containing information supporting evaluation of the following 10 factors:

(a) Type and scope of the industry exemption requested, including percentage of industry affected, number of vehicles, mileage traveled, number of companies involved.

(b) Type and scope of the requirement to which the exemption would apply.

§ 350.345

(c) Safety performance of that specific industry (*e.g.*, accident frequency, rates and comparative figures).

(d) Inspection information (*e.g.*, number of violations per inspection, driver and vehicle out-of-service information).

(e) Other CMV safety regulations enforced by other State agencies not participating in the MCSAP.

(f) Commodity transported (*e.g.*, livestock, grain).

(g) Similar variations granted and the circumstances under which they were granted.

(h) Justification for the exemption.

(i) Identifiable effects on safety.

(j) State's economic environment and its ability to compete in foreign and domestic markets.

§ 350.345 How does a State apply for additional variances from the FMCSRs?

Any State may apply to the Administrator for a variance from the FMCSRs for intrastate commerce. The variance will be granted only if the State satisfactorily demonstrates that the State law, regulation or enforcement practice:

(a) Achieves substantially the same purpose as the similar Federal regulation.

(b) Does not apply to interstate commerce.

(c) Is not likely to have an adverse impact on safety.

PART 355—COMPATIBILITY OF STATE LAWS AND REGULATIONS AFFECTING INTERSTATE MOTOR CARRIER OPERATIONS

Subpart A—General Applicability and Definitions

Sec.

355.1 Purpose.

355.3 Applicability.

355.5 Definitions.

Subpart B—Requirements

355.21 Regulatory review.

355.23 Submission of results.

355.25 Adopting and enforcing compatible laws and regulations.

APPENDIX A TO PART 355—GUIDELINES FOR THE REGULATORY REVIEW

49 CFR Ch. III (10–1–04 Edition)

AUTHORITY: 49 U.S.C. 504 and 31101 *et seq.*; 49 CFR 1.73.

SOURCE: 57 FR 40962, Sept. 8, 1992, unless otherwise noted.

EDITORIAL NOTE: Nomenclature changes to part 355 appear at 66 FR 49870, Oct. 1, 2001.

Subpart A—General Applicability and Definitions

§ 355.1 Purpose.

(a) To promote adoption and enforcement of State laws and regulations pertaining to commercial motor vehicle safety that are compatible with appropriate parts of the Federal Motor Carrier Safety Regulations.

(b) To provide guidelines for a continuous regulatory review of State laws and regulations.

(c) To establish deadlines for States to achieve compatibility with appropriate parts of the Federal Motor Carrier Safety Regulations with respect to interstate commerce.

§ 355.3 Applicability.

These provisions apply to any State that adopts or enforces laws or regulations pertaining to commercial motor vehicle safety in interstate commerce.

§ 355.5 Definitions.

Unless specifically defined in this section, terms used in this part are subject to the definitions in 49 CFR 390.5.

Compatible or *Compatibility* means that State laws and regulations applicable to interstate commerce and to intrastate movement of hazardous materials are identical to the FMCSRs and the HMRs or have the same effect as the FMCSRs; and that State laws applicable to intrastate commerce are either identical to, or have the same effect as, the FMCSRs or fall within the established limited variances under §§ 350.341, 350.343, and 350.345 of this subchapter.

Federal Hazardous Materials Regulations (FMHRs) means those safety regulations which are contained in parts 107, 171–173, 177, 178 and 180, except part 107 and §§ 171.15 and 171.16.

Federal Motor Carrier Safety Regulations (FMCSRs) means those safety regulations which are contained in parts

Federal Motor Carrier Safety Administration, DOT

§ 355.25

390, 391, 392, 393, 395, 396, and 397 of this subchapter.

State means a State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, American Samoa, Guam and the Virgin Islands.

[57 FR 40962, Sept. 8, 1992, as amended at 65 FR 15109, Mar. 21, 2000]

Subpart B—Requirements

§ 355.21 Regulatory review.

(a) *General.* Each State shall annually analyze its laws and regulations, including those of its political subdivisions, which pertain to commercial motor vehicle safety to determine whether its laws and regulations are compatible with the Federal Motor Carrier Safety Regulations. Guidelines for the regulatory review are provided in the appendix to this part.

(b) *Responsibility.* The State agency designated as lead agency for the administration of grants made pursuant to part 350 of this subchapter is responsible for reviewing and analyzing State laws and regulations for compliance with this part. In the absence of an officially designated Motor Carrier Safety Assistance Program (MCSAP) lead agency or in its discretion, the State shall designate another agency responsible to review and determine compliance with these regulations.

(c) *State review.* (1) The State shall determine which of its laws and regulations pertaining to commercial motor vehicle safety are the same as the Federal Motor Carrier Safety or Federal Hazardous Materials Regulations. With respect to any State law or regulation which is not the same as the FMCSRs (FHMRS must be identical), the State shall identify such law or regulation and determine whether:

(i) It has the same effect as a corresponding section of the Federal Motor Carrier Safety Regulations;

(ii) It applies to interstate commerce;

(iii) It is more stringent than the FMCSRs in that it is more restrictive or places a greater burden on any entity subject to its provisions.

(2) If the inconsistent State law or regulation applies to interstate com-

merce and is more stringent than the FMCSRs, the State shall determine:

(i) The safety benefits associated with such State law or regulation; and

(ii) The effect of the enforcement of such State law or regulation on interstate commerce.

(3) If the inconsistent State law or regulation does not apply to interstate commerce or is less stringent than the FMCSRs, the guidelines for participation in the Motor Carrier Safety Assistance Program in §§ 350.341, 350.343, and 350.345 of this subchapter shall apply.

[57 FR 40962, Sept. 8, 1992, as amended at 65 FR 15109, Mar. 21, 2000]

§ 355.23 Submission of results.

Each State shall submit the results of its regulatory review annually with its certification of compliance under § 350.209 of this subchapter. It shall submit the results of the regulatory review with the certification no later than August 1 of each year with the Commercial Vehicle Safety Plan (CVSP). The State shall include copies of pertinent laws and regulations.

[65 FR 15109, Mar. 21, 2000]

§ 355.25 Adopting and enforcing compatible laws and regulations.

(a) *General.* No State shall have in effect or enforce any State law or regulation pertaining to commercial motor vehicle safety in interstate commerce which the Administrator finds to be incompatible with the provisions of the Federal Motor Carrier Safety Regulations.

(b) *New state requirements.* No State shall implement any changes to a law or regulation which makes that or any other law or regulation incompatible with a provision of the Federal Motor Carrier Safety Regulations.

(c) *Enforcement.* To enforce compliance with this section, the Administrator will initiate a rulemaking proceeding under part 389 of this subchapter to declare the incompatible State law or regulation pertaining to commercial motor vehicle safety unenforceable in interstate commerce.

(d) *Waiver of determination.* Any person (including any State) may petition for a waiver of a determination made

Pt. 355, App. A

under paragraph (c) of this section. Such petition will also be considered in a rulemaking proceeding under part 389. Waivers shall be granted only upon a satisfactory showing that continued enforcement of the incompatible State law or regulation is not contrary to the public interest and is consistent with the safe operation of commercial motor vehicles.

(e) *Consolidation of proceedings.* The Administrator may consolidate any action to enforce this section with other proceedings required under this section if the Administrator determines that such consolidation will not adversely affect any party to any such proceeding.

**APPENDIX A TO PART 355—GUIDELINES
FOR THE REGULATORY REVIEW**

Each State shall review its laws and regulations to achieve compatibility with the Federal Motor Carrier Safety Regulations (FMCSRs). Each State shall consider all related requirements on enforcement of the State's motor carrier safety regulations. The documentation shall be simple and brief.

SCOPE

The State review required by §355.21 may be limited to those laws and regulations previously determined to be incompatible in the report of the Commercial Motor Vehicle Safety Regulatory Review Panel issued in August 1990, or by subsequent determination by the Administrator under this part, and any State laws or regulations enacted or issued after August 1990.

APPLICABILITY

The requirements must apply to all segments of the motor carrier industry common, contract, and private carriers of property and for-hire carriers of passengers.

DEFINITIONS

Definitions of terms must be consistent with those in the FMCSRs.

DRIVER QUALIFICATIONS

Require a driver to be properly licensed to drive a commercial motor vehicle; require a driver to be in good physical health, at least 21 years of age, able to operate a vehicle safely, and maintain a good driving record; prohibit drug and alcohol abuse; require a motor carrier to maintain a driver qualification file for each driver; and require a motor carrier to ensure that a driver is medically qualified.

49 CFR Ch. III (10–1–04 Edition)

NOTE: The requirements for testing apply only to drivers of commercial motor vehicles as defined in 49 CFR part 383.

DRIVING OF MOTOR VEHICLES

Prohibit possession, use, or driving under the influence of alcohol or other controlled substances (while on duty); and establish 0.04 percent as the level of alcohol in the blood at which a driver is considered under the influence of alcohol.

**PARTS AND ACCESSORIES NECESSARY FOR SAFE
OPERATION**

Require operational lights and reflectors; require systematically arranged and installed wiring; and require brakes working at the required performance level, and other key components included in 49 CFR part 393.

HOURS OF SERVICE OF DRIVERS

Prohibit a motor carrier from allowing or requiring any driver to drive: More than 10 hours following 8 consecutive hours off duty; after being on duty 15 hours, after being on duty more than 60 hours in any 7 consecutive days; or after being on duty more than 70 hours in any 8 consecutive days.

Require a driver to prepare a record-of-duty status for each 24-hour period. The driver and motor carrier must retain the records.

INSPECTION AND MAINTENANCE

Prohibit a commercial motor vehicle from being operated when it is likely to cause an accident or a breakdown; require the driver to conduct a walk-around inspection of the vehicle before driving it to ensure that it can be safely operated; require the driver to prepare a driver vehicle inspection report; and require commercial motor vehicles to be inspected at least annually.

HAZARDOUS MATERIALS

Require a motor carrier or a person operating a commercial motor vehicle transporting hazardous materials to follow the safety and hazardous materials requirements.

STATE DETERMINATIONS

1. Each State must determine whether its requirements affecting interstate motor carriers are "less stringent" than the Federal requirements. "Less stringent" requirements represent either gaps in the State requirements in relation to the Federal requirements as summarized under item number one in this appendix or State requirements which are less restrictive than the Federal requirements.

a. An example of a gap is when a State does not have the authority to regulate the safety of for-hire carriers of passengers or

Federal Motor Carrier Safety Administration, DOT

§ 356.3

has the authority but chooses to exempt the carrier.

b. An example of a less restrictive State requirement is when a State allows a person under 21 years of age to operate a commercial motor vehicle in interstate commerce.

2. Each State must determine whether its requirements affecting interstate motor carriers are “more stringent” than the Federal requirements: “More stringent” requirements are more restrictive or inclusive in relation to the Federal requirements as summarized under item number one in this appendix. For example, a requirement that a driver must have 2 days off after working 5 consecutive days. The State would demonstrate that its more stringent requirements:

a. Have a “safety benefit;” for example, result in fewer accidents or reduce the risk of accidents;

b. do not create “an undue burden on interstate commerce,” e.g., do not delay, interfere with, or increase that cost or the administrative burden for a motor carrier transporting property or passengers in interstate commerce; and

c. Are otherwise compatible with Federal safety requirements.

3. A State must adopt and enforce in a consistent manner the requirements referenced in the above guidelines in order for the FMCSA to accept the State’s determination that it has compatible safety requirements affecting interstate motor carrier operations. Generally, the States would have up to 3 years from the effective date of the new Federal requirement to adopt and enforce compatible requirements. The FMCSA would specify the deadline when promulgating future Federal safety requirements. The requirements are considered of equal importance.

[57 FR 40962, Sept. 8, 1992, as amended by 58 FR 33776, June 21, 1993; 62 FR 37151, July 11, 1997; 65 FR 15110, Mar. 21, 2000]

PART 356—MOTOR CARRIER ROUTING REGULATIONS

Sec.

356.1 Authority to serve a particular area—construction.

356.3 Regular route motor passenger service.

356.5 Traversal authority.

356.7 Tacking.

356.9 Elimination of routing restrictions—regular route carriers.

356.11 Elimination of gateways—regular and irregular route carriers.

356.13 Redesignated highways.

AUTHORITY: 5 U.S.C. 553; 49 U.S.C. 13301 and 13902; and 49 CFR 1.73.

SOURCE: 62 FR 32041, June 12, 1997, unless otherwise noted.

EDITORIAL NOTE: Nomenclature changes to part 356 appear at 66 FR 49870, Oct. 1, 2001.

§ 356.1 Authority to serve a particular area—construction.

(a) *Service at municipality.* A motor carrier of property, motor passenger carrier of express, and freight forwarder authorized to serve a municipality may serve all points within that municipality’s commercial zone not beyond the territorial limits, if any, fixed in such authority.

(b) *Service at unincorporated community.* A motor carrier of property, motor passenger carrier of express, and freight forwarder, authorized to serve an unincorporated community having a post office of the same name, may serve all points in the United States not beyond the territorial limits, if any, fixed in such authority, as follows:

(1) All points within 3 miles of the post office in such unincorporated community if it has a population of less than 2,500; within 4 miles if it has a population of 2,500 but less than 25,000; and within 6 miles if it has a population of 25,000 or more;

(2) At all points in any municipality any part of which is within the limits described in paragraph (b)(1) of this section; and

(3) At all points in any municipality wholly surrounded, or so surrounded except for a water boundary, by any municipality included under the terms of paragraph (b)(2) of this section.

§ 356.3 Regular route motor passenger service.

(a) A motor common carrier authorized to transport passengers over regular routes may serve:

(1) All points on its authorized route;

(2) All municipalities wholly within one airline mile of its authorized route;

(3) All unincorporated areas within one airline mile of its authorized route; and

(4) All military posts, airports, schools, and similar establishments that may be entered within one airline mile of its authorized route, but operations within any part of such establishment more than one airline mile

§ 356.5

from such authorized route may not be over a public road.

(b) This section does not apply to those motor passenger common carriers authorized to operate within:

- (1) New York, NY;
- (2) Rockland, Westchester, Orange, or Nassau Counties, NY;
- (3) Fairfield County, CT; and
- (4) Passaic, Bergen, Essex, Hudson, Union, Morris, Somerset, Middlesex, or Monmouth Counties, NJ.

§ 356.5 Traversal authority.

(a) *Scope.* An irregular route motor carrier may operate between authorized service points over any reasonably direct or logical route unless expressly prohibited.

(b) *Requirements.* Before commencing operations, the carrier must, regarding each State traversed:

- (1) Notify the State regulatory body in writing, attaching a copy of its operating rights;
- (2) Designate a process agent; and
- (3) Comply with 49 CFR 387.315.

§ 356.7 Tacking.

Unless expressly prohibited, a motor common carrier of property holding separate authorities which have common service points may join, or *tack*, those authorities at the common point, or *gateway*, for the purpose of performing through service as follows:

- (a) Regular route authorities may be tacked with one another;
- (b) Regular route authority may be tacked with irregular route authority;
- (c) Irregular route authorities may be tacked with one another if the authorities were granted pursuant to application filed on or before November 23, 1973, and the distance between the points at which service is provided, when measured through the gateway point, is 300 miles or less; and
- (d) Irregular route authorities may be tacked with one another if the authorities involved contain a specific provision granting the right to tack.

§ 356.9 Elimination of routing restrictions—regular route carriers.

(a) *Regular route authorities—construction.* All certificates that, either singly or in combination, authorize the trans-

49 CFR Ch. III (10–1–04 Edition)

portation by a motor common carrier of property over:

- (1) A single regular route or;
- (2) Over two or more regular routes that can lawfully be tacked at a common service point, shall be construed as authorizing transportation between authorized service points over any available route.

(b) *Service at authorized points.* A common carrier departing from its authorized service routes under paragraph (a) of this section shall continue to serve points authorized to be served on or in connection with its authorized service routes.

(c) *Intermediate point service.* A common carrier conducting operations under paragraph (a) of this section may serve points on, and within one airline mile of, an alternative route it elects to use if all the following conditions are met:

- (1) The carrier is authorized to serve all intermediate points (without regard to nominal restrictions) on the underlying service route;
- (2) The alternative route involves the use of a superhighway (i.e., a limited access highway with split-level crossings);
- (3) The alternative superhighway route, including highways connecting the superhighway portion of the route with the carrier's authorized service route,
 - (i) Extends in the same general direction as the carrier's authorized service route and
 - (ii) Is wholly within 25 airline miles of the carrier's authorized service route; and
- (4) Service is provided in the same manner as, and subject to any restrictions that apply to, service over the authorized service route.

§ 356.11 Elimination of gateways—regular and irregular route carriers.

A motor common carrier of property holding separate grants of authority (including regular route authority), one or more of which authorizes transportation over irregular routes, where the authorities have a common service point at which they can lawfully be tacked to perform through service, may perform such through service over any available route.

§ 356.13 Redesignated highways.

Where a highway over which a regular route motor common carrier of property is authorized to operate is assigned a new designation, such as a new number, letter, or name, the carrier shall advise the FMCSA by letter, and shall provide information concerning the new and the old designation, the points between which the highway is redesignated, and each place where the highway is referred to in the carrier's authority. The new designation of the highway will be shown in the carrier's certificate when the FMCSA has occasion to reissue it.

PART 360—FEES FOR MOTOR CARRIER REGISTRATION AND INSURANCE

Sec.

360.1 Fees for records search, review, copying, certification, and related services.

360.3 Filing fees.

360.5 Updating user fees.

AUTHORITY: 31 U.S.C. 9701; 49 U.S.C. 13908(c) and 14504(c)(2); and 49 CFR 1.73.

SOURCE: 64 FR 7137, Feb. 12, 1999, unless otherwise noted.

EDITORIAL NOTE: Nomenclature changes to part 360 appear at 66 FR 49870, Oct. 1, 2001.

§ 360.1 Fees for records search, review, copying, certification, and related services.

Certifications and copies of public records and documents on file with the Federal Motor Carrier Safety Administration will be furnished on the following basis, pursuant to the Freedom of Information Act regulations at 49 CFR Part 7:

(a) Certificate of the Director, Office of Data Analysis and Information Systems, as to the authenticity of documents, \$9.00;

(b) Service involved in checking records to be certified to determine authenticity, including clerical work, etc., incidental thereto, at the rate of \$16.00 per hour;

(c) Copies of the public documents, at the rate of \$.80 per letter size or legal size exposure. A minimum charge of \$5.00 will be made for this service; and

(d) Search and copying services requiring ADP processing, as follows:

(1) A fee of \$42.00 per hour for professional staff time will be charged when it is required to fulfill a request for ADP data.

(2) The fee for computer searches will be set at the current rate for computer service. Information on those charges can be obtained from the Office of Data Analysis and Information Systems (MC-RIS).

(3) Printing shall be charged at the rate of \$.10 per page of computer generated output with a minimum charge of \$.25. A charge of \$30 per reel of magnetic tape will be made if the tape is to be permanently retained by the requestor.

§ 360.3 Filing fees.

(a) *Manner of payment.* (1) Except for the insurance fees described in the next sentence, all filing fees will be payable at the time and place the application, petition, or other document is tendered for filing. The service fee for insurance, surety or self-insurer accepted certificate of insurance, surety bond or other instrument submitted in lieu of a broker surety bond must be charged to an insurance service account established by the Federal Motor Carrier Safety Administration in accordance with paragraph (a)(2) of this section.

(2) *Billing account procedure.* A written request must be submitted to the Office of Enforcement and Compliance, Insurance Compliance Division (MC-ECI) to establish an insurance service fee account.

(i) Each account will have a specific billing date within each month and a billing cycle. The billing date is the date that the bill is prepared and printed. The billing cycle is the period between the billing date in one month and the billing date in the next month. A bill for each account which has activity or an unpaid balance during the billing cycle will be sent on the billing date each month. Payment will be due 20 days from the billing date. Payments received before the next billing date are applied to the account. Interest will accrue in accordance with 4 CFR 102.13.

(ii) The Debt Collection Act of 1982, including disclosure to the consumer reporting agencies and the use of collection agencies, as set forth in 4 CFR

§ 360.3

49 CFR Ch. III (10–1–04 Edition)

102.5 and 102.6 will be utilized to encourage payment where appropriate.

(iii) An account holder who files a petition in bankruptcy or who is the subject of a bankruptcy proceeding must provide the following information to the Office of Enforcement and Compliance, Insurance Division (MC-ECI):

(A) The filing date of the bankruptcy petition;

(B) The court in which the bankruptcy petition was filed;

(C) The type of bankruptcy proceeding;

(D) The name, address, and telephone number of its representative in the bankruptcy proceeding; and

(E) The name, address, and telephone number of the bankruptcy trustee, if one has been appointed.

(3) Fees will be payable to the Federal Motor Carrier Safety Administration by a check payable in United States currency drawn upon funds deposited in a United States or foreign bank or other financial institution, money order payable in United States' currency, or credit card (VISA or MASTERCARD).

(b) Any filing that is not accompanied by the appropriate filing fee is deficient except for filings that satisfy the deferred payment procedures in paragraph (a) of this section.

(c) *Fees not refundable.* Fees will be assessed for every filing in the type of proceeding listed in the schedule of fees contained in paragraph (f) of this section, subject to the exceptions contained in paragraphs (d) and (e) of this section. After the application, petition, or other document has been accepted for filing by the Federal Motor Carrier Safety Administration, the filing fee will not be refunded, regardless of whether the application, petition, or other document is granted or approved, denied, rejected before docketing, dismissed, or withdrawn.

(d) *Related or consolidated proceedings.*

(1) Separate fees need not be paid for related applications filed by the same applicant which would be the subject of one proceeding. (This does not mean requests for multiple types of operating authority filed on forms in the OP-1 series under the regulations at 49 CFR part 365. A separate filing fee is required for each type of authority

sought in each transportation mode, e.g., common, contract, and broker authority for motor property carriers.)

(2) Separate fees will be assessed for the filing of temporary operating authority applications as provided in paragraph (f)(6) of this section, regardless of whether such applications are related to an application for corresponding permanent operating authority.

(3) The Federal Motor Carrier Safety Administration may reject concurrently filed applications, petitions, or other documents asserted to be related and refund the filing fee if, in its judgment, they embrace two or more severable matters which should be the subject of separate proceedings.

(e) *Waiver or reduction of filing fees.* It is the general policy of the Federal Motor Carrier Safety Administration not to waive or reduce filing fees except as described as follows:

(1) Filing fees are waived for an application or other proceeding which is filed by a Federal government agency, or a State or local government entity. For purposes of this section the phrases "Federal government agency" or "government entity" do not include a quasi-governmental corporation or government subsidized transportation company.

(2) In extraordinary situations the Federal Motor Carrier Safety Administration will accept requests for waivers or fee reductions in accordance with the following procedure:

(i) *When to request.* At the time that a filing is submitted to the Federal Motor Carrier Safety Administration the applicant may request a waiver or reduction of the fee prescribed in this part. Such request should be addressed to the Director, Office of Data Analysis and Information Systems.

(ii) *Basis.* The applicant must show the waiver or reduction of the fee is in the best interest of the public, or that payment of the fee would impose an undue hardship upon the requestor.

(iii) *Federal Motor Carrier Safety Administration action.* The Director, Office of Data Analysis and Information Systems, will notify the applicant of the decision to grant or deny the request for waiver or reduction.

(f) Schedule of filing fees.

Federal Motor Carrier Safety Administration, DOT

§ 360.5

Type of Proceeding		Fee
Part I: Licensing:		
(1)	An application for motor carrier operating authority, a certificate of registration for certain foreign carriers, property broker authority, or freight forwarder authority.	\$300
(2)	A petition to interpret or clarify an operating authority	3,000
(3)	A request seeking the modification of operating authority only to the extent of making a ministerial correction, when the original error was caused by applicant, a change in the name of the shipper or owner of a plant site, or the change of a highway name or number.	50
(4)	A petition to renew authority to transport explosives	250
(5)	An application for authority to deviate from authorized regular-route authority.	150
(6)	An application for motor carrier temporary authority issued in an emergency situation.	100
(7)	Request for name change of a motor carrier, property broker, or freight forwarder.	14
(8)	An application involving the merger, transfer, or lease of the operating rights of motor passenger and property carriers, property brokers, and household goods freight forwarders under 49 U.S.C. 10321 and 10926.	300
(9)—(49)	[Reserved]	
Part II: Insurance:		
(50)	(i) An application for original qualification as self-insurer for bodily injury and property damage insurance (BI&PD).	4,200
	(ii) An application for original qualification as self-insurer for cargo insurance.	420
(51)	A service fee for insurer, surety, or self-insurer accepted certificate of insurance, surety bond, and other instrument submitted in lieu of a broker surety bond.	\$10 per accepted certificate, surety bond or other instrument submitted in lieu of a broker surety bond.
(52)	A petition for reinstatement of revoked operating authority	80
(53)—(79)	[Reserved].	
Part III: Services:		
(80)	Request for service or pleading list for proceedings	13 per list
(81)	Faxed copies of operating authority to applicants or their representatives who did not receive a served copy.	5

(g) *Returned check policy.* (1) If a check submitted to the FMCSA for a filing or service fee is dishonored by a bank or financial institution on which it is drawn, the FMCSA will notify the person who submitted the check that:

(i) All work will be suspended on the filing or proceeding, until the check is made good;

(ii) A returned check charge of \$6.00 and any bank charges incurred by the FMCSA as a result of the dishonored check must be submitted with the filing fee which is outstanding; and

(iii) If payment is not made within the time specified by the FMCSA, the proceeding will be dismissed or the filing may be rejected.

(2) If a person repeatedly submits dishonored checks to the FMCSA for filing fees, the FMCSA may notify the person that all future filing fees must be submitted in the form of a certified

or cashier's check, money order, or credit card.

[64 FR 7137, Feb. 12, 1999, as amended at 67 FR 61820, Oct. 2, 2002]

§ 360.5 Updating user fees.

(a) *Update.* Each fee established in this part may be updated in accordance with this section as deemed necessary by the FMCSA.

(b) *Publication and effective dates.* Updated fees shall be published in the FEDERAL REGISTER and shall become effective 30 days after publication.

(c) *Payment of fees.* Any person submitting a filing for which a fee is established shall pay the fee in effect at the time of the filing.

(d) *Method of updating fees.* Each fee shall be updated by updating the cost components comprising the fee. Cost components shall be updated as follows:

(1) Direct labor costs shall be updated by multiplying base level direct labor costs by percentage changes in average

Pt. 365

49 CFR Ch. III (10–1–04 Edition)

wages and salaries of FMCSA employees. Base level direct labor costs are direct labor costs determined by the cost study in *Regulations Governing Fees For Service*, 1 I.C.C. 2d 60 (1984), or subsequent cost studies. The base period for measuring changes shall be April 1984 or the year of the last cost study.

(2) Operations overhead shall be developed each year on the basis of current relationships existing on a weighted basis, for indirect labor applicable to the first supervisory work centers directly associated with user fee activity. Actual updating of operations overhead will be accomplished by applying the current percentage factor to updated direct labor, including current governmental overhead costs.

(3)(i) Office general and administrative costs shall be developed each year on the basis of current levels costs, i.e., dividing actual office general and administrative costs for the current fiscal year by total office costs for the office directly associated with user fee activity. Actual updating of office general and administrative costs will be accomplished by applying the current percentage factor to updated direct labor, including current governmental overhead and current operations overhead costs.

(ii) FMCSA general and administrative costs shall be developed each year on the basis of current level costs; i.e., dividing actual FMCSA general and administrative costs for the current fiscal year by total agency expenses for the current fiscal year. Actual updating of FMCSA general and administrative costs will be accomplished by applying the current percentage factor to updated direct labor, including current governmental overhead, operations overhead and office general and administrative costs.

(4) Publication costs shall be adjusted on the basis of known changes in the costs applicable to publication of material in the FEDERAL REGISTER or FMCSA Register.

(This rounding procedures excludes copying, printing and search fees.)

(e) *Rounding of updated fees.* Updated fees shall be rounded in the following manner:

(1) Fees between \$1 and \$30 will be rounded to the nearest \$1;

(2) Fees between \$30 and \$100 will be rounded to the nearest \$10;

(3) Fees between \$100 and \$999 will be rounded to the nearest \$50; and

(4) Fees above \$1,000 will be rounded to the nearest \$100.

PART 365—RULES GOVERNING APPLICATIONS FOR OPERATING AUTHORITY

Subpart A—How To Apply for Operating Authority

Sec.

365.101 Applications governed by these rules.

365.103 Modified procedure.

365.105 Starting the application process: Form OP–1.

365.107 Types of applications.

365.109 FMCSA review of the application.

365.111 Appeals to rejections of the application.

365.113 Changing the request for authority or filing supplementary evidence after the application is filed.

365.115 After publication in the FMCSA Register.

365.117 Obtaining a copy of the application.

365.119 Opposed applications.

365.121 Filing a reply statement.

365.123 Applicant withdrawal.

Subpart B—How To Oppose Requests for Authority

365.201 Definitions.

365.203 Time for filing.

365.205 Contents of the protest.

365.207 Withdrawal.

Subpart C—General Rules Governing the Application Process

365.301 Applicable rules.

365.303 Contacting another party.

365.305 Serving copies of pleadings.

365.307 Replies to motions.

365.309 FAX filings.

Subpart D—Transfer of Operating Rights Under 49 U.S.C. 10926

365.401 Scope of rules.

365.403 Definitions.

365.405 Applications.

365.407 Notice.

365.409 FMCSA action and criteria for approval.

365.411 Responsive pleadings.

365.413 Procedures for changing the name or business form of a motor carrier, freight forwarder, or property broker.

Subpart E—Special Rules for Certain Mexico-Domiciled Carriers

- 365.501 Scope of rules.
- 365.503 Application.

APPENDIX A TO SUBPART E—EXPLANATION OF PRE-AUTHORIZATION SAFETY AUDIT EVALUATION CRITERIA FOR MEXICO-DOMICILED MOTOR CARRIERS

AUTHORITY: 5 U.S.C. 553 and 559; 16 U.S.C. 1456; 49 U.S.C. 13101, 13301, 13901–13906, 14708, 31138, and 31144; 49 CFR 1.73.

SOURCE: 59 FR 63728, Dec. 9, 1994, unless otherwise noted. Redesignated at 61 FR 54707, Oct. 21, 1996.

EDITORIAL NOTE: Nomenclature changes to part 365 appear at 66 FR 49870, Oct. 1, 2001.

Subpart A—How To Apply for Operating Authority

§ 365.101 Applications governed by these rules.

These rules govern the handling of applications for operating authority of the following type:

- (a) Applications for certificates and permits to operate as a motor common or contract carrier of property or passengers.
- (b) Applications for permits to operate as a freight forwarder.
- (c) [Reserved]
- (d) Applications for licenses to operate as a broker of motor vehicle transportation.
- (e) Applications for certificates under 49 U.S.C. 13902(b)(3) to operate as a motor common carrier of passengers in intrastate commerce on a route over which applicant holds interstate authority as of November 19, 1982.
- (f) Applications for certificates under 49 U.S.C. 13902(b)(3) to operate as a motor common carrier of passengers in intrastate commerce on a route over which applicant has been granted or will be granted interstate authority after November 19, 1982.
- (g) Applications for temporary motor carrier authority.

(h) Applications for Mexico-domiciled motor carriers to operate in foreign commerce as common, contract or private motor carriers of property (including exempt items) between Mexico and all points in the United States. Under NAFTA Annex I, page I–U–20, a Mexico-domiciled motor carrier may not provide point-to-point transportation services, including express delivery services, within the United States for goods other than international cargo.

[59 FR 63728, Dec. 9, 1994, as amended at 60 FR 63981, Dec. 13, 1995; 62 FR 49940, Sept. 24, 1997; 67 FR 12714, Mar. 19, 2002; 67 FR 61820, Oct. 2, 2002]

§ 365.103 Modified procedure.

The FMCSA will handle licensing application proceedings using the modified procedure, if possible. The applicant and protestants send statements made under oath (verified statements) to each other and to the FMCSA. There are no personal appearances or formal hearings.

§ 365.105 Starting the application process: Form OP–1.

(a) All applicants must file the appropriate form in the OP–1 series, effective January 1, 1995. Form OP–1 for motor property carriers and brokers of general freight and household goods; Form OP–1(P) for motor passenger carriers; Form OP–1(FF) for freight forwarders; and Form OP–1(MX) for Mexico-domiciled motor property carriers, including household goods and motor passenger carriers. A separate filing fee in the amount set forth at 49 CFR 360.3(f)(1) is required for each type of authority sought in each transportation mode.

(b) Obtain forms at a FMCSA Division Office in each State or at one of the FMCSA Service Centers. Addresses and phone numbers for the Division Offices and Service Centers can be found at: <http://www.fmcsa.dot.gov/aboutus/fieldoffices>. The forms and information about filing procedures can be downloaded at: <http://www.fmcsa.dot.gov/factsfigs/formspubs>; and from the do-it-yourself website at: <http://www.diy.dot.gov>.

[66 FR 49870, Oct. 1, 2001, as amended at 67 FR 12714, Mar. 19, 2002; 67 FR 61820, Oct. 2, 2002]

§ 365.107 Types of applications.

(a) Fitness applications. Motor property applications and certain types of motor passenger applications require only the finding that the applicant is fit, willing and able to perform the involved operations and to comply with all applicable statutory and regulatory provisions. These applications can be opposed only on the grounds that applicant is not fit [*e.g.*, is not in compliance with applicable financial responsibility and safety fitness requirements]. These applications are:

(1) Motor common and contract carrier of property (except household goods), Mexican motor property carriers that perform private carriage and transport exempt items, and motor contract carrier of passengers transportation.

(2) Motor carrier brokerage of general commodities (except household goods).

(3) Certain types of motor passenger applications as described in Form OP–1 (P).

(b) Motor passenger “public interest” applications as described in Form OP–1 (P).

(c) Intrastate motor passenger applications under 49 U.S.C. 13902(b)(3) as described in Form OP–1, Schedule B.

(d) Motor common carrier of household goods applications, including Mexican carrier applicants. These applications require a finding that:

(1) The applicant is fit, willing, and able to provide the involved transportation and to comply with all applicable statutory and regulatory provisions; and

(2) The service proposed will serve a useful public purpose, responsive to a public demand or need.

(e) Motor contract carrier of household goods, household goods property broker, and freight forwarder applications. These applications require a finding that:

(1) The applicant is fit, willing, and able to provide the involved transportation and to comply with all applicable statutory and regulatory provisions; and

(2) The transportation to be provided will be consistent with the public interest and the national transportation policy of 49 U.S.C. 13101.

(f) Temporary authority (TA) for motor and water carriers. These applications require a finding that there is or soon will be an immediate transportation need that cannot be met by existing carrier service.

(g) In view of the expedited time frames established in this part for processing requests for permanent authority, applications for TA will be entertained *only* in exceptional circumstances (*i.e.*, natural disasters or national emergencies) when evidence of immediate service need can be specifically documented in a narrative supplement appended to Form OP–1 for motor property carriers, Form OP–1MX for Mexican property carriers and, Form OP–1(P) for motor passenger carriers.

[59 FR 63728, Dec. 9, 1994, as amended at 60 FR 63981, Dec. 13, 1995; 62 FR 49940, Sept. 24, 1997; 67 FR 61820, Oct. 2, 2002]

§ 365.109 FMCSA review of the application.

(a) FMCSA staff will review the application for correctness, completeness, and adequacy of the evidence (the *prima facie* case).

(1) Minor errors will be corrected without notification to the applicant.

(2) Materially incomplete applications will be rejected. Applications that are in substantial compliance with these rules may be accepted.

(3) All motor carrier applications will be reviewed for consistency with the FMCSA’s operational safety fitness policy. Applicants with “Unsatisfactory” safety fitness ratings from DOT will have their applications rejected.

(4) FMCSA staff will review completed applications that conform with the FMCSA’s safety fitness policy and that are accompanied by evidence of adequate financial responsibility.

(5) Financial responsibility is indicated by filing within 20 days from the date an application notice is published in the FMCSA Register:

(i) *Form BMC–91 or 91X or BMC 82 surety bond*—Bodily injury and property damage (motor property and passenger carriers; household goods freight forwarders that provide pickup or delivery service directly or by using a local delivery service under their control).

(ii) *Form BMC-84*—Surety bond or *Form BMC-85*—trust fund agreement (property brokers of general commodities and household goods).

(iii) *Form BMC-34* or *BMC 83* surety bond—Cargo liability (motor property common carriers and household goods freight forwarders).

(6) Applicants also must submit *Form BOC-3*—designation of legal process agents—within 20 days from the date an application notice is published in the *FMCSA Register*.

(7) Applicants seeking to conduct operations for which tariffs are required may not commence such operations until tariffs are in effect.

(8) All applications must be completed in English.

(b) A summary of the application will be published as a preliminary grant of authority in the *FMCSA Register* to give notice to the public in case anyone wishes to oppose the application.

[59 FR 63728, Dec. 9, 1994, as amended at 60 FR 63981, Dec. 13, 1995; 67 FR 61820, Oct. 2, 2002]

§ 365.111 Appeals to rejections of the application.

(a) An applicant has the right to appeal rejection of the application. The appeal must be filed at the FMCSA within 10 days of the date of the letter of rejection.

(b) If the appeal is successful and the filing is found to be proper, the application shall be deemed to have been properly filed as of the decision date of the appeal.

§ 365.113 Changing the request for authority or filing supplementary evidence after the application is filed.

(a) Once the application is filed, the applicant may supplement evidence only with approval of the FMCSA.

(b) Amendments to the application generally are not permitted, but in appropriate instances may be entertained at the discretion of the FMCSA.

§ 365.115 After publication in the FMCSA Register.

(a) Interested persons have 10 days from the date of *FMCSA Register* publication to file protests. See Subpart B of this part.

(b) If no one opposes the application, the grant published in the *FMCSA Register* will become effective by issuance of a certificate, permit, or license.

§ 365.117 Obtaining a copy of the application.

After publication, interested persons may request a copy of the application by contacting the FMCSA-designated contract agent (as identified in the *FMCSA Register*).

§ 365.119 Opposed applications.

If the application is opposed, opposing parties are required to send a copy of their protest to the applicant.

§ 365.121 Filing a reply statement.

(a) If the application is opposed, applicant may file a reply statement. This statement is due within 20 days after *FMCSA Register* publication.

(b) The reply statement may not contain new evidence. It shall only rebut or further explain matters previously raised.

(c) The reply statement need not be notarized or verified. Applicant understands that the oath in the application form applies to all evidence submitted in the application. Separate legal arguments by counsel need not be notarized or verified.

§ 365.123 Applicant withdrawal.

If the applicant wishes to withdraw an application, it shall request dismissal in writing.

Subpart B—How To Oppose Requests for Authority

§ 365.201 Definitions.

A person wishing to oppose a request for permanent authority files a *protest*. A person filing a valid protest becomes a *protestant*.

§ 365.203 Time for filing.

A protest shall be filed (received at the FMCSA) within 10 days after notice of the application appears in the *FMCSA Register*. A copy of the protest shall be sent to applicant's representative at the same time. Failure timely to file a protest waives further participation in the proceeding.

§ 365.205

§ 365.205 Contents of the protest.

(a) All information upon which the protestant plans to rely is put into the protest.

(b) A protest must be verified, as follows:

I, _____, verify under penalty of perjury under laws of the United States of America, that the information above is true and correct. Further, I certify that I am qualified and authorized to file this protest. (See 18 U.S.C. 1001 and 18 U.S.C. 1621 for penalties.)

(Signature and Date)

(c) A protest not in substantial compliance with applicable statutory standards or these rules may be rejected.

(d) Protests must respond directly to the statutory standards for FMCSA review of the application. As these standards vary for particular types of applications, potential protestants should refer to the general criteria addressed at § 365.107 and may consult the FMCSA at (202) 366-9805 for further assistance in developing their evidence.

[59 FR 63728, Dec. 9, 1994. Redesignated at 61 FR 54707, Oct. 21, 1996, as amended at 62 FR 49940, Sept. 24, 1997]

§ 365.207 Withdrawal.

A protestant wishing to withdraw from a proceeding shall inform the FMCSA and applicant in writing.

Subpart C—General Rules Governing the Application Process

§ 365.301 Applicable rules.

Generally, all application proceedings are governed by the FMCSA's Rules of Practice at part 386 of this chapter except as designated below.

§ 365.303 Contacting another party.

When a person wishes to contact a party or serve a pleading or letter on that party, it shall do so through its representative. The phone and FAX numbers and address of applicant's representative shall be listed in the *FMCSA Register*.

49 CFR Ch. III (10–1–04 Edition)

§ 365.305 Serving copies of pleadings.

(a) An applicant must serve all pleadings and letters on the FMCSA and all known participants in the proceeding, except that a reply to a motion need only be served on the moving party.

(b) A protestant need serve only the FMCSA and applicant with pleadings or letters.

§ 365.307 Replies to motions.

Replies to motions filed under this part are due within 5 days of the date the motion is filed at the FMCSA.

§ 365.309 FAX filings.

FAX filings of applications and supporting evidence are not permitted. To assist parties in meeting the expedited time frames established for protesting an application, however, the FMCSA will accept FAX filings of protests and any reply or rebuttal evidence. FAX filings of these pleadings must be followed by the original document, plus one copy for FMCSA recordkeeping purposes.

Subpart D—Transfer of Operating Rights Under 49 U.S.C. 10926

SOURCE: 53 FR 4852, Feb. 18, 1988, unless otherwise noted. Redesignated at 61 FR 54707, Oct. 21, 1996.

§ 365.401 Scope of rules.

These rules define the procedures that enable motor passenger and property carriers, property brokers, and household goods freight forwarders to obtain approval from the FMCSA to merge, transfer, or lease their operating rights in financial transactions not subject to 49 U.S.C. 11343. Transactions covered by these rules are governed by 49 U.S.C. 10321 and 10926. The filing fee is set forth at 49 CFR 360.3(f)(8).

[53 FR 4852, Feb. 18, 1988, as amended at 67 FR 61820, Oct. 2, 2002]

§ 365.403 Definitions.

For the purposes of this part, the following definitions apply:

(a) *Transfer*. Transfers include all transactions (i.e., the sale or lease of

interstate operating rights,¹ or the merger of two or more carriers or a carrier into a noncarrier) subject to 49 U.S.C. 10926, as well as the sale of property brokers' licenses under 49 U.S.C. 10321.

(b) *Operating rights.* Operating rights include:

(1) Certificates and permits issued to motor carriers;

(2) Permits issued to freight forwarders;

(3) Licenses issued to property brokers; and

(4) Certificates of Registration issued to motor carriers. The term also includes authority held by virtue of the gateway elimination regulations published in the FEDERAL REGISTER as letter-notices.

(c) *Certificate of registration.* The evidence of a motor carrier's right to engage in interstate or foreign commerce within a single State is established by a corresponding State certificate.

(d) *Person.* An individual, partnership, corporation, company, association, or other form of business, or a trustee, receiver, assignee, or personal representative of any of these.

(e) *Record holder.* The person shown on the records of the FMCSA as the legal owner of the operating rights.

(f) *Control.* A relationship between persons that includes actual control, legal control, and the power to exercise control, through or by common directors, officers, stockholders, a voting trust, a holding or investment company, or any other means.

(g) *Category 1 transfers.* Transactions in which the person to whom the operating rights would be transferred is not an FMCSA carrier and is not affiliated with any FMCSA carrier.

(h) *Category 2 transfers.* Transactions in which the person to whom the operating rights would be transferred is an

FMCSA carrier and/or is affiliated with an FMCSA carrier.

[53 FR 4852, Feb. 18, 1988, as amended at 67 FR 61821, Oct. 2, 2002]

§ 365.405 Applications.

(a) *Procedural requirements.* (1) At least 10 days before consummation, an original and two copies of a properly completed Form OP-FC-1 and any attachments (see paragraph (b)(1)(viii) of this section) must be filed with the FMCSA, Licensing Team; (MC-RIS), 400 Seventh Street, SW., Room 8214, Washington, DC 20590.

(2) At any time after the expiration of the 10-day waiting period, applicants may consummate the transaction, subject to the subsequent approval of the application by the FMCSA, as described below. The transferee may commence operations under the rights acquired from the transferor upon its compliance with the FMCSA's regulations governing insurance, and process agents. See 49 CFR parts 387, subpart C, and 366, respectively. In the alternative, applicants may wait until the FMCSA has issued a decision on their application before transferring the operating rights. If the transferee wants the transferor's operating authority to be reissued in its name, it should furnish the FMCSA with a statement executed by both transferor and transferee indicating that the transaction has been consummated. Authority will not be reissued until after the FMCSA has approved the transaction.

(b) *Information required.* (1) In category 1 and category 2 transfers, applicants must furnish the following information:

(i) Full name, address, and signatures of the transferee and transferor.

(ii) A copy of the transferor's operating authority involved in the transfer proceeding.

(iii) A short summary of the essential terms of the transaction.

(iv) If relevant, the status of proceedings for the transfer of State certificate(s) corresponding to the Certificates of Registration being transferred.

(v) A statement as to whether the transfer will or will not significantly affect the quality of the human environment.

¹The execution of a chattel mortgage, deed of trust, or other similar document does not constitute a transfer or require the FMCSA's approval. However, a foreclosure for the purpose of transferring an operating right to satisfy a judgment or claim against the record holder may not be effected without approval of the FMCSA.

§ 365.407

(vi) Certification by transferor and transferee of their current respective safety ratings by the United States Department of Transportation (*i.e.*, satisfactory, conditional, unsatisfactory, or unrated).

(vii) Certification by the transferee that it has sufficient insurance coverage under 49 U.S.C. 13906 for the service it intends to provide.

(viii) Information to demonstrate that the proposed transaction is consistent with the national transportation policy and satisfies the criteria for approval set forth at § 365.409 of this part. (Such information may be appended to the application form and, if provided, would be embraced by the oath and verification contained on that form.)

(ix) If motor carrier operating rights are being transferred, certification by the transferee that it is not domiciled in Mexico nor owned or controlled by persons of that country.

(2) Category 2 applicants must also submit the following additional information:

(i) Name(s) of the carrier(s), if any, with which the transferee is affiliated.

(ii) Aggregate revenues of the transferor, transferee, and their carrier affiliates from interstate transportation sources for a 1-year period ending not earlier than 6 months before the date of the agreement of the parties concerning the transaction. If revenues exceed \$2 million, the transfer may be subject to 49 U.S.C. 14303 rather than these rules.

[53 FR 4852, Feb. 18, 1988, as amended at 54 FR 35343, Aug. 25, 1989; 62 FR 49940, Sept. 24, 1997; 67 FR 61821, Oct. 2, 2002; 68 FR 56198, Sept. 30, 2003]

§ 365.407 Notice.

The FMCSA will give notice of approved transfer applications through publication in the *FMCSA Register*.

§ 365.409 FMCSA action and criteria for approval.

A transfer will be approved under this section if:

(a) The transaction is not subject to 49 U.S.C. 14303; and

(b) The transaction is consistent with the public interest; however,

49 CFR Ch. III (10–1–04 Edition)

(c) If the transferor or transferee has an “Unsatisfactory” safety fitness rating from DOT, the transfer may be denied. If an application is denied, the FMCSA will set forth the basis for its action in a decision or letter notice. If parties with “Unsatisfactory” safety fitness ratings consummate a transaction pursuant to the 10-day rule at § 365.405 of this part prior to the notification of FMCSA action, they do so at their own risk and subject to any conditions we may impose subsequently. Transactions that have been consummated but later are denied by the FMCSA are null and void and must be rescinded. Similarly, if applications contain false or misleading information, they are void *ab initio*.

[53 FR 4852, Feb. 18, 1988, as amended at 56 FR 46735, Sept. 16, 1991; 62 FR 49940, Sept. 24, 1997]

§ 365.411 Responsive pleadings.

(a) Protests must be filed within 20 days after the date of publication of an approved transfer application in the *FMCSA Register*. Protests received prior to the notice will be rejected. Applicants may respond within 20 days after the due date of protests. Petitions for reconsideration of decisions denying applications must be filed within 20 days after the date of service of such decisions.

(b) Protests and petitions for reconsideration must be filed with the FMCSA Licensing Team (MC-RIS), 400 Seventh Street, SW., Room 8214, Washington, DC 20590, and be served on appropriate parties.

[53 FR 4852, Feb. 18, 1988, as amended at 67 FR 61821, Oct. 2, 2002; 68 FR 56198, Sept. 30, 2003]

§ 365.413 Procedures for changing the name or business form of a motor carrier, freight forwarder, or property broker.

(a) *Scope.* These procedures apply in the following circumstances:

(1) A change in the form of a business, such as the incorporation of a partnership or sole proprietorship;

(2) A change in the legal name of a corporation or partnership or change in the trade name or assumed name of any entity;

(3) A transfer of operating rights from a deceased or incapacitated spouse to the other spouse;

(4) A reincorporation and merger for the purpose of effecting a name change;

(5) An amalgamation or consolidation of a carrier and a noncarrier into a new carrier having a different name from either of the predecessor entities; and

(6) A change in the State of incorporation accomplished by dissolving the corporation in one State and reincorporating in another State.

(b) *Procedures.* To accomplish these changes, a letter must be sent to the FMCSA, Licensing Team (MC-RIS), Washington, DC 20590. The envelope should be marked "NAME CHANGE". The applicant must provide:

(1) The docket number(s) and name of the carrier requesting the change;

(2) A copy of the articles of incorporation and the State certificate reflecting the incorporation;

(3) The name(s) of the owner(s) of the stock and the distribution of the shares;

(4) The names of the officers and directors of the corporation; and

(5) A statement that there is no change in the ownership, management, or control of the business. When this procedure is being used to transfer operating rights from a deceased or incapacitated spouse to the other spouse, documentation that the other spouse has the legal right to effect such change must be included with the request. The fee for filing a name change request is in § 360.3(f) of this chapter.

[53 FR 4852, Feb. 18, 1988, as amended at 54 FR 47364, Nov. 14, 1989; 62 FR 49940, Sept. 24, 1997; 68 FR 56198, Sept. 30, 2003]

Subpart E—Special Rules for Certain Mexico-domiciled Carriers

SOURCE: 67 FR 12714, Mar. 19, 2002, unless otherwise noted.

§ 365.501 Scope of rules.

(a) The rules in this subpart govern the application by a Mexico-domiciled motor carrier to provide transportation of property or passengers in interstate commerce between Mexico

and points in the United States beyond the municipalities and commercial zones along the United States-Mexico international border.

(b) A Mexico-domiciled carrier may not provide point-to-point transportation services, including express delivery services, within the United States for goods other than international cargo.

§ 365.503 Application.

(a) Each applicant applying under this subpart must submit an application that consists of:

(1) Form OP-1 (MX)—Application to Register Mexican Carriers for Motor Carrier Authority To Operate Beyond U.S. Municipalities and Commercial Zones on the U.S.-Mexico Border;

(2) Form MCS-150—Motor Carrier Identification Report; and

(3) A notification of the means used to designate process agents, either by submission in the application package of Form BOC-3—Designation of Agents—Motor Carriers, Brokers and Freight Forwarders or a letter stating that the applicant will use a process agent service that will submit the Form BOC-3 electronically.

(b) The Federal Motor Carrier Safety Administration (FMCSA) will only process your application if it meets the following conditions:

(1) The application must be completed in English;

(2) The information supplied must be accurate, complete, and include all required supporting documents and applicable certifications in accordance with the instructions to Form OP-1 (MX), Form MCS-150, and Form BOC-3;

(3) The application must include the filing fee payable to the FMCSA in the amount set forth at 49 CFR 360.3(f)(1); and

(4) The application must be signed by the applicant.

(c) You must submit the application to the address provided in Form OP-1(MX).

(d) You may obtain the application forms from any FMCSA Division Office or download it from the FMCSA website at: <http://www.fmcsa.dot.gov/factsfigs/formspubs.htm>.

§ 365.505 Re-registration and fee waiver for certain applicants.

(a) If you filed an application using Form OP–1(MX) before May 3, 2002, you are required to file a new Form OP–1(MX). You do not need to submit a new fee when you file a new application under this subpart.

(b) If you hold a Certificate of Registration issued before April 18, 2002, authorizing operations beyond the municipalities along the United States-Mexico border and beyond the commercial zones of such municipalities, you are required to file an OP–1(MX) if you want to continue those operations. You do not need to submit a fee when you file an application under this subpart.

(1) You must file the application by November 4, 2003.

(2) The FMCSA may suspend or revoke the Certificate of Registration of any applicable holder that fails to comply with the procedures set forth in this section.

(3) Certificates of Registration issued before April 18, 2002, will remain valid until the FMCSA acts on the OP–1(MX) application.

[67 FR 12714, Mar. 19, 2002, as amended at 68 FR 56198, Sept. 30, 2003]

§ 365.507 FMCSA action on the application.

(a) The FMCSA will review and act on each application submitted under this subpart in accordance with the procedures set out in this part.

(b) The FMCSA will validate the accuracy of information and certifications provided in the application by checking data maintained in databases of the governments of Mexico and the United States.

(c) *Pre-authorization safety audit.* Every Mexico-domiciled carrier that applies under this part must satisfactorily complete an FMCSA-administered safety audit before FMCSA will grant provisional operating authority to operate in the United States. The safety audit is a review by the FMCSA of the carrier's written procedures and records to validate the accuracy of information and certifications provided in the application and determine whether the carrier has established or exercises the basic safety management controls necessary to ensure safe oper-

ations. The FMCSA will evaluate the results of the safety audit using the criteria in Appendix A to this subpart.

(d) If a carrier successfully completes the pre-authorization safety audit and the FMCSA approves its application submitted under this subpart, FMCSA will publish a summary of the application as a preliminary grant of authority in the FMCSA Register to give notice to the public in case anyone wishes to oppose the application, as required in § 365.109(b) of this part.

(e) If the FMCSA grants provisional operating authority to the applicant, it will assign a distinctive USDOT Number that identifies the motor carrier as authorized to operate beyond the municipalities in the United States on the U.S.-Mexico international border and beyond the commercial zones of such municipalities. In order to operate in the United States, a Mexico-domiciled motor carrier with provisional operating authority must:

(1) Have its surety or insurance provider file proof of financial responsibility in the form of certificates of insurance, surety bonds, and endorsements, as required by § 387.301 of this subchapter;

(2) File a hard copy of, or have its process agent(s) electronically submit, Form BOC–3—Designation of Agents-Motor Carriers, Brokers and Freight Forwarders, as required by part 366 of this subchapter; and

(3) Comply with all provisions of the safety monitoring system in subpart B of part 385 of this subchapter, including successfully passing CVSA Level I inspections at least every 90 days and having decals affixed to each commercial motor vehicle operated in the United States as required by § 385.103(c) of this subchapter.

(f) The FMCSA may grant permanent operating authority to a Mexico-domiciled carrier no earlier than 18 months after the date that provisional operating authority is granted and only after successful completion to the satisfaction of the FMCSA of the safety monitoring system for Mexico-domiciled carriers set out in subpart B of part 385 of this subchapter. Successful completion includes obtaining a satisfactory safety rating as the result of a compliance review.

§ 365.509 Requirement to notify FMCSA of change in applicant information.

(a) A motor carrier subject to this subpart must notify the FMCSA of any changes or corrections to the information in parts I, IA or II submitted on the Form OP-1(MX) or the Form BOC-3—Designation of Agents—Motor Carriers, Brokers and Freight Forwarders during the application process or after having been granted provisional operating authority. The carrier must notify the FMCSA in writing within 45 days of the change or correction.

(b) If a carrier fails to comply with paragraph (a) of this section, the FMCSA may suspend or revoke its operating authority until it meets those requirements.

§ 365.511 Requirement for CVSA inspection of vehicles during first three consecutive years of permanent operating authority.

A Mexico-domiciled motor carrier granted permanent operating authority must have its vehicles inspected by Commercial Vehicle Safety Alliance (CVSA)-certified inspectors every three months and display a current inspection decal attesting to the successful completion of such an inspection for at least three consecutive years after receiving permanent operating authority from the FMCSA.

APPENDIX A TO SUBPART E OF PART 365—EXPLANATION OF PRE-AUTHORIZATION SAFETY AUDIT EVALUATION CRITERIA FOR MEXICO-DOMICILED MOTOR CARRIERS

I. GENERAL

(a) Section 350 of the Fiscal Year 2002 DOT Appropriations Act (Pub. L. 107-87) directed the FMCSA to perform a safety audit of each Mexico-domiciled motor carrier before the FMCSA grants the carrier provisional operating authority to operate beyond United States municipalities and commercial zones on the United States-Mexico international border.

(b) The FMCSA will decide whether it will conduct the safety audit at the Mexico-domiciled motor carrier's principal place of business in Mexico or at a location specified by the FMCSA in the United States, in accordance with the statutory requirements that 50 percent of all safety audits must be conducted onsite and on-site inspections cover

at least 50 percent of estimated truck traffic in any year. All records and documents must be made available for examination within 48 hours after a request is made. Saturdays, Sundays, and Federal holidays are excluded from the computation of the 48-hour period.

(c) The safety audit will include:

(1) Verification of available performance data and safety management programs;

(2) Verification of a controlled substances and alcohol testing program consistent with part 40 of this title;

(3) Verification of the carrier's system of compliance with hours-of-service rules in part 395 of this subchapter, including record-keeping and retention;

(4) Verification of proof of financial responsibility;

(5) Review of available data concerning the carrier's safety history, and other information necessary to determine the carrier's preparedness to comply with the Federal Motor Carrier Safety Regulations, parts 382 through 399 of this subchapter, and the Federal Hazardous Material Regulations, parts 171 through 180 of this title;

(6) Inspection of available commercial motor vehicles to be used under provisional operating authority, if any of these vehicles have not received a decal required by § 385.103(d) of this subchapter;

(7) Evaluation of the carrier's safety inspection, maintenance, and repair facilities or management systems, including verification of records of periodic vehicle inspections;

(8) Verification of drivers' qualifications, including confirmation of the validity of the Licencia de Federal de Conductor of each driver the carrier intends to assign to operate under its provisional operating authority; and

(9) An interview of carrier officials to review safety management controls and evaluate any written safety oversight policies and practices.

(d) To successfully complete the safety audit, a Mexico-domiciled motor carrier must demonstrate to the FMCSA that it has the required elements in paragraphs (c)(2), (3), (4), (7), and (8) above and other basic safety management controls in place which function adequately to ensure minimum acceptable compliance with the applicable safety requirements. The FMCSA developed a "safety audit evaluation criteria," which uses data from the safety audit and roadside inspections to determine that each applicant for provisional operating authority has basic safety management controls in place.

(e) The safety audit evaluation process developed by the FMCSA is used to:

(1) Evaluate basic safety management controls and determine if each Mexico-domiciled carrier and each driver is able to operate

safely in the United States beyond municipalities and commercial zones on the United States-Mexico international border; and

(2) Identify motor carriers and drivers who are having safety problems and need improvement in their compliance with the FMCSRs and the HMRs, before FMCSA grants the carriers provisional operating authority to operate beyond United States municipalities and commercial zones on the United States-Mexico international border.

II. SOURCE OF THE DATA FOR THE SAFETY AUDIT EVALUATION CRITERIA

(a) The FMCSA's evaluation criteria are built upon the operational tool known as the safety audit. The FMCSA developed this tool to assist auditors and investigators in assessing the adequacy of a Mexico-domiciled carrier's basic safety management controls.

(b) The safety audit is a review of a Mexico-domiciled motor carrier's operation and is used to:

(1) Determine if a carrier has the basic safety management controls required by 49 U.S.C. 31144;

(2) Meet the requirements of Section 350 of the DOT Appropriations Act; and

(3) In the event that a carrier is found not to be in compliance with applicable FMCSRs and HMRs, the safety audit can be used to educate the carrier on how to comply with U.S. safety rules.

(c) Documents such as those contained in driver qualification files, records of duty status, vehicle maintenance records, and other records are reviewed for compliance with the FMCSRs and HMRs. Violations are cited on the safety audit. Performance-based information, when available, is utilized to evaluate the carrier's compliance with the vehicle regulations. Recordable accident information is also collected.

III. OVERALL DETERMINATION OF THE CARRIER'S BASIC SAFETY MANAGEMENT CONTROLS

(a) The carrier will not be granted provisional operating authority if the FMCSA fails to:

(1) Verify a controlled substances and alcohol testing program consistent with part 40 of this title;

(2) Verify a system of compliance with hours-of-service rules of this subchapter, including recordkeeping and retention;

(3) Verify proof of financial responsibility;

(4) Verify records of periodic vehicle inspections; and

(5) Verify drivers' qualifications of each driver the carrier intends to assign to operate under such authority, as required by parts 383 and 391 of this subchapter, including confirming the validity of each driver's *Licencia de Federal de Conductor*.

(b) If the FMCSA confirms each item under II (a)(1) through (5) above, the carrier will be granted provisional operating authority, except if FMCSA finds the carrier has inadequate basic safety management controls in at least three separate factors described in part III below. If FMCSA makes such a determination, the carrier's application for provisional operating authority will be denied.

IV. EVALUATION OF REGULATORY COMPLIANCE

(a) During the safety audit, the FMCSA gathers information by reviewing a motor carrier's compliance with "acute" and "critical" regulations of the FMCSRs and HMRs.

(b) Acute regulations are those where noncompliance is so severe as to require immediate corrective actions by a motor carrier regardless of the overall basic safety management controls of the motor carrier.

(c) Critical regulations are those where noncompliance relates to management and/or operational controls. These are indicative of breakdowns in a carrier's management controls.

(d) The list of the acute and critical regulations, which are used in determining if a carrier has basic safety management controls in place, is included in Appendix B, VII. List of Acute and Critical Regulations to part 385 of this subchapter.

(e) Noncompliance with acute and critical regulations are indicators of inadequate safety management controls and usually higher than average accident rates.

(f) Parts of the FMCSRs and the HMRs having similar characteristics are combined together into six regulatory areas called "factors." The regulatory factors, evaluated on the adequacy of the carrier's safety management controls, are:

(1) Factor 1—General: Parts 387 and 390;

(2) Factor 2—Driver: Parts 382, 383 and 391;

(3) Factor 3—Operational: Parts 392 and 395;

(4) Factor 4—Vehicle: Part 393, 396 and inspection data for the last 12 months;

(5) Factor 5—Hazardous Materials: Parts 171, 177, 180 and 397; and

(6) Factor 6—Accident: Recordable Accident Rate per Million Miles.

(g) For each instance of noncompliance with an acute regulation, 1.5 points will be assessed.

(h) For each instance of noncompliance with a critical regulation, 1 point will be assessed.

(i) *Vehicle Factor*. (1) When at least three vehicle inspections are recorded in the Motor Carrier Management Information System (MCMIS) during the twelve months before the safety audit or performed at the time of the review, the Vehicle Factor (part 396) will be evaluated on the basis of the Out-of-Service (OOS) rates and noncompliance with acute and critical regulations. The results of

the review of the OOS rate will affect the Vehicle Factor as follows:

(i) If the motor carrier has had at least three roadside inspections in the twelve months before the safety audit, and the vehicle OOS rate is 34 percent or higher, one point will be assessed against the carrier. That point will be added to any other points assessed for discovered noncompliance with acute and critical regulations of part 396 to determine the carrier's level of safety management control for that factor.

(ii) If the motor carrier's vehicle OOS rate is less than 34 percent, or if there are less than three inspections, the determination of the carrier's level of safety management controls will only be based on discovered noncompliance with the acute and critical regulations of part 396.

(2) Over two million inspections occur on the roadside each year in the United States. This vehicle inspection information is retained in the MCMIS and is integral to evaluating motor carriers' ability to successfully maintain their vehicles, thus preventing them from being placed OOS during roadside inspections. Each safety audit will continue to have the requirements of part 396, Inspection, Repair, and Maintenance, reviewed as indicated by the above explanation.

(j) *Accident Factor.* (1) In addition to the five regulatory factors, a sixth factor is included in the process to address the accident history of the motor carrier. This factor is the recordable accident rate, which the carrier has experienced during the past 12 months. Recordable accident, as defined in 49 CFR 390.5, means an accident involving a commercial motor vehicle operating on a public road in interstate or intrastate commerce which results in a fatality; a bodily injury to a person who, as a result of the injury, immediately receives medical treatment away from the scene of the accident; or one or more motor vehicles incurring disabling damage as a result of the accident requiring the motor vehicle to be transported away from the scene by a tow truck or other motor vehicle.

(2) Experience has shown that urban carriers, those motor carriers operating entirely within a radius of less than 100 air miles (normally urban areas), have a higher exposure to accident situations because of their environment and normally have higher accident rates.

(3) The recordable accident rate will be used in determining the carrier's basic safety management controls in Factor 6, Accident. It will be used only when a carrier incurs two or more recordable accidents within the 12 months before the safety audit. An urban carrier (a carrier operating entirely within a radius of 100 air miles) with a recordable rate per million miles greater than 1.7 will be deemed to have inadequate basic safety management controls for the accident factor. All

other carriers with a recordable accident rate per million miles greater than 1.5 will be deemed to have inadequate basic safety management controls for the accident factor. The rates are the result of roughly doubling the United States national average accident rate in Fiscal Years 1994, 1995, and 1996.

(4) The FMCSA will continue to consider preventability when a new entrant contests the evaluation of the accident factor by presenting compelling evidence that the recordable rate is not a fair means of evaluating its accident factor. Preventability will be determined according to the following standard: "If a driver, who exercises normal judgment and foresight, could have foreseen the possibility of the accident that in fact occurred, and avoided it by taking steps within his/her control which would not have risked causing another kind of mishap, the accident was preventable."

(k) *Factor Ratings*

(1) The following table shows the five regulatory factors, parts of the FMCSRs and HMRs associated with each factor, and the accident factor. Each carrier's level of basic safety management controls with each factor is determined as follows:

(i) Factor 1—General: Parts 390 and 387;

(ii) Factor 2—Driver: Parts 382, 383, and 391;

(iii) Factor 3—Operational: Parts 392 and 395;

(iv) Factor 4—Vehicle: Parts 393, 396 and the Out of Service Rate;

(v) Factor 5—Hazardous Materials: Part 171, 177, 180 and 397; and

(vi) Factor 6—Accident: Recordable Accident Rate per Million Miles;

(2) For paragraphs III (k)(1)(i) through (v) (Factors 1 through 5), if the combined violations of acute and or critical regulations for each factor is equal to three or more points, the carrier is determined not to have basic safety management controls for that individual factor.

(3) For paragraphs III (k)(1)(vi), if the recordable accident rate is greater than 1.7 recordable accidents per million miles for an urban carrier (1.5 for all other carriers), the carrier is determined to have inadequate basic safety management controls.

(l) Notwithstanding FMCSA verification of the items listed in part II (a)(1) through (5) above, if the safety audit determines the carrier has inadequate basic safety management controls in at least three separate factors described in part III, the carrier's application for provisional operating authority will be denied. For example, FMCSA evaluates a carrier finding:

(1) One instance of noncompliance with a critical regulation in part 387 scoring one point for Factor 1;

(2) Two instances of noncompliance with acute regulations in part 382 scoring three points for Factor 2;

(3) Three instances of noncompliance with critical regulations in part 396 scoring three points for Factor 4; and

(4) Three instances of noncompliance with acute regulations in parts 171 and 397 scoring four and one-half (4.5) points for Factor 5.

Under this example, the carrier will not receive provisional operating authority because it scored three or more points for Factors 2, 4, and 5 and FMCSA determined the carrier had inadequate basic safety management controls in at least three separate factors.

PART 366—DESIGNATION OF PROCESS AGENT

Sec.

366.1 Applicability.

366.2 Form of designation.

366.3 Eligible persons.

366.4 Required States.

366.5 Blanket designations.

366.6 Cancellation or change.

AUTHORITY: 49 U.S.C. 13303, 13304, and 14704; and 49 CFR 1.73.

SOURCE: 55 FR 11197, Mar. 27, 1990, unless otherwise noted. Redesignated at 61 FR 54707, Oct. 21, 1996.

EDITORIAL NOTE: Nomenclature changes to part 366 appear at 66 FR 49870, Oct. 1, 2001.

§366.1 Applicability.

These rules, relating to the filing of designations of persons upon whom court process may be served, govern motor carriers and brokers and, as of the moment of succession, their fiduciaries (as defined at 49 CFR 387.319(a)).

[55 FR 11197, Mar. 27, 1990. Redesignated at 61 FR 54707, Oct. 21, 1996; 62 FR 49940, Sept. 24, 1997]

§366.2 Form of designation.

Designations shall be made on Form BOC-3, *Designation of Agent for Service of Process*. Only one completed current form may be on file. It must include all States for which agent designations are required. One copy must be retained by the carrier or broker at its principal place of business.

§366.3 Eligible persons.

All persons (as defined at 49 U.S.C. 13102(16)) designated must reside or maintain an office in the State for which they are designated. If a State official is designated, evidence of his

willingness to accept service of process must be furnished.

[55 FR 11197, Mar. 27, 1990. Redesignated at 61 FR 54707, Oct. 21, 1996; 62 FR 49940, Sept. 24, 1997]

§366.4 Required States.

(a) *Motor carriers*. Every motor carrier (of property or passengers) shall make a designation for each State in which it is authorized to operate and for each State traversed during such operations. Every motor carrier (including private carriers) operating in the United States in the course of transportation between points in a foreign country shall file a designation for each State traversed.

(b) *Brokers*. Every broker shall make a designation for each State in which its offices are located or in which contracts will be written.

[55 FR 11197, Mar. 27, 1990, as amended at 55 FR 47338, Nov. 13, 1990]

§366.5 Blanket designations.

Where an association or corporation has filed with the FMCSA a list of process agents for each State, motor carriers may make the required designations by using the following statement:

Those persons named in the list of process agents on file with the Federal Motor Carrier Safety Administration by _____

(Name of association or corporation) and any subsequently filed revisions thereof, for the States in which this carrier is or may be authorized to operate, including States traversed during such operations, except those States for which individual designations are named.

§366.6 Cancellation or change.

A designation may be canceled or changed only by a new designation except that, where a carrier or broker ceases to be subject to §366.4 in whole or in part for 1 year, designation is no longer required and may be canceled without making another designation.

[55 FR 11197, Mar. 27, 1990. Redesignated at 61 FR 54707, Oct. 21, 1996; 62 FR 49940, Sept. 24, 1997]

APPENDIX A TO PART 367—UNIFORM APPLICATION FOR SINGLE STATE REGISTRATION FOR MOTOR CARRIERS REGISTERED WITH THE SECRETARY OF TRANSPORTATION

AUTHORITY: 49 U.S.C. 13301 and 14504; and 49 CFR 1.73.

SOURCE: 58 FR 28933, May 18, 1993, unless otherwise noted. Redesignated at 61 FR 54707, Oct. 21, 1996.

EDITORIAL NOTE: Nomenclature changes to part 367 appear at 66 FR 49870, Oct. 1, 2001.

§ 367.1 Definitions.

(a) *The Secretary.* The Secretary of Transportation.

(b) *Motor carrier and carrier.* A person authorized to engage in the transportation of passengers or property, as a common or contract carrier, in interstate or foreign commerce, under the provisions of 49 U.S.C. 13902.

(c) *Motor vehicle.* A self-propelled or motor driven vehicle operated by a motor carrier in interstate or foreign commerce under authority issued by the Secretary.

(d) *Principal place of business.* A single location that serves as a motor carrier's headquarters and where it maintains or can make available its operational records.

(e) *State.* A State of the United States or the District of Columbia.

[58 FR 28933, May 18, 1993. Redesignated at 61 FR 54707, Oct. 21, 1996, as amended at 62 FR 15420, Apr. 1, 1997]

§ 367.2 Participation by States.

(a) A State is eligible to participate as a registration State and to receive fee revenue only if, as of January 1, 1991, it charged or collected a fee for a vehicle identification stamp or a number pursuant to the provisions of the predecessor to this part.

(b) An eligible State that intends either to commence or to cease partici-

pating in the registration program must publish notice of its intention by the 1st day of July of the year preceding the registration year in which it will commence or cease participating.

§ 367.3 Selection of registration State.

(a) Each motor carrier required to register and pay filing fees must select a single participating State as its registration State. The carrier must select the State in which it maintains its principal place of business, if such State is a participating State. A carrier that maintains its principal place of business outside of a participating State must select the State in which it will operate the largest number of motor vehicles during the next registration year. In the event a carrier will operate the same largest number of vehicles in more than one State, it must select one of those States.

(b) A carrier may not change its registration State unless it changes its principal place of business or its registration State ceases participating in the program, in which case the carrier must select a registration State for the next registration year under the standards of paragraph (a) of this section.

(c) A carrier must give notice of its selection to the State commission of its selected registration State, and, the State commission of its prior registration State, within 30 days after it has made its selection. If a carrier changes its principal place of business during the annual registration period specified in § 367.4(b)(2), the carrier may continue to use its prior registration State, if any, for the next registration year.

(d) A carrier must give notice of its selection to its insurer or insurers as soon as practicable after it has made its selection.

[58 FR 28933, May 18, 1993. Redesignated at 61 FR 54707, Oct. 21, 1996, as amended at 62 FR 15420, Apr. 1, 1997]

§ 367.4 Requirements for registration.

(a) Except as provided in paragraph (c)(1) of this section with regard to a carrier operating under temporary authority, only a motor carrier holding a certificate or permit issued by the Secretary under 49 U.S.C. 13902 shall be required to register under these standards.

§ 367.4

49 CFR Ch. III (10–1–04 Edition)

(b) A motor carrier operating in interstate or foreign commerce in one or more participating States under a certificate or permit issued by the Secretary shall be required to register annually with a single registration State, and such registration shall be deemed to satisfy the registration requirements of all participating States.

(1) The registration year will be the calendar year.

(2) A carrier must file its annual registration application between the 1st day of August and the 30th day of November of the year preceding the registration year. A carrier that intends to commence operating during the current registration year may register at any time, but it must do so before it commences operating.

(3) The registration application must be in the form appended to this part and must contain the information and be accompanied by the fees specified in paragraph (c) of this section. There will be no prorating of fees to account for partial year operations.

(4) A carrier that has changed its registration State since its last filing must identify the registration State with which it previously filed.

(c) A motor carrier must file, or cause to be filed, the following with its registration State:

(1) Copies of its certificates and/or permits. A carrier must supplement its filing by submitting copies of any new operating authorities as they are issued. Once a carrier has submitted copies of its authorities, it may thereafter satisfy the filing requirement by certifying that the copies are on file. A carrier may, with the permission of its registration State, submit a summary of its operating authorities in lieu of copies. A carrier granted emergency temporary authority or temporary authority having a duration of 120 days or less is not required to file evidence of such authority, but it must otherwise comply with the requirements of this section;

(2) A copy of its proof of public liability security submitted to and accepted by the Secretary under 49 CFR part 387, subpart C or a copy of an order of the Secretary approving a public liability self-insurance application or other public liability security or agreement

under the provisions of that part. A carrier must supplement its filings as necessary to ensure that current information is on file. Once a carrier has submitted, or caused to be submitted, a copy of its proof or order of the Secretary, it may thereafter satisfy the filing requirement by certifying that it has done so and that its security, self-insurance, or agreement remains in effect;

(3) A copy of its designation of an agent or agents for service of process submitted to and accepted by the Secretary under 49 CFR part 366. A carrier must supplement its filings as necessary to ensure that current information is on file. Once a carrier has submitted a copy of its designation, it may thereafter satisfy the filing requirement by certifying that its designation is on file; and

(4) A fee for the filing of proof of insurance. In support of such fee, the carrier must submit the following information:

(i) The number of motor vehicles it intends to operate in each participating State during the next registration year;

(ii) The per vehicle fee each pertinent participating State charges, which fee must equal the fee, not to exceed \$10, that such State collected or charged as of November 15, 1991;

(iii) The total fee due each participating State; and

(iv) The total of all fees specified in paragraph (c)(4)(iii) of this section.

(d) Consistent with its obligations under paragraph (c)(2) of this section, a carrier must cause to be timely filed with its registration State copies of any notices of cancellation or of any replacement certificates of insurance, surety bonds, or other security filed with the Secretary under 49 CFR part 387, subpart C.

(e) A carrier must make such supplemental filings at any time during the registration year as may be necessary to specify additional vehicles and/or States of operation and to pay additional fees.

(f) A motor carrier must submit to its insurer or insurers a copy of the supporting information, including any supplemental information, filed with

its registration State under paragraphs (c)(4) and (e) of this section.

(g) The charging or collection of any fee that is not in accordance with the fee system established above is deemed a burden on interstate commerce. This includes fees for the registration or filing of evidence of insurance whether assessed directly upon the carrier or indirectly upon the insurance provider or other party who seeks reimbursement from the carrier.

(h) To the extent any State registration requirement imposes obligations in excess of those specified in this part, the requirement is an unreasonable burden on transportation within the Secretary's jurisdiction under 49 U.S.C. 13501.

[58 FR 28933, May 18, 1993. Redesignated at 61 FR 54707, Oct. 21, 1996, as amended at 62 FR 15420, Apr. 1, 1997]

§ 367.5 Registration receipts.

(a) On compliance by a motor carrier with the annual or supplemental registration requirements of § 367.4, the registration State must issue the carrier a receipt reflecting that the carrier has filed the required proof of insurance and paid fees in accordance with the requirements of that section. The registration State also must issue a number of official copies of the receipt equal to the number of motor vehicles for which fees have been paid.

(1) The receipt and official copies must contain only information identifying the carrier and specifying the States for which fees were paid. Supplemental receipts and official copies need contain only information relating to their underlying supplemental registrations.

(b) Receipts and official copies issued pursuant to a filing made during the annual registration period specified in § 367.4(b)(2) must be issued within 30 days of filing of a fully acceptable registration application. All other receipts and official copies must be issued by the 30th day following the date of filing of a fully acceptable supplemental registration application. All receipts and official copies shall expire at midnight on the 31st day of December of the registration year for which they were issued.

(c) A carrier is permitted to operate its motor vehicles only in those participating States with respect to which it has paid appropriate fees, as indicated on the receipts and official copies. It may not operate more motor vehicles in a participating State than the number for which it has paid fees.

(d) A motor carrier may not copy or alter a receipt or an official copy of a receipt.

(e) A motor carrier must maintain in each of its motor vehicles an official copy of its receipt indicating that it has filed the required proof of insurance and paid appropriate fees for each State in which it operates.

(f) A motor carrier may transfer its official copies of its receipts from vehicles taken out of service to their replacement vehicles.

(g) The driver of a motor vehicle must present an official copy of a receipt for inspection by any authorized government personnel on reasonable demand.

(h) No registration State shall require decals, stamps, cab cards, or any other means of registering or identifying specific vehicles operated by a motor carrier.

[60 FR 30012, June 7, 1995. Redesignated at 61 FR 54707, Oct. 21, 1996, as amended at 62 FR 15420, Apr. 1, 1997]

§ 367.6 Registration State accounting.

(a) A participating State must, on or before the last day of each month, allocate and remit to each other participating State the appropriate portion of the fee revenue registrants submitted during the preceding month. Each remittance must be accompanied by a supporting statement identifying registrants and specifying the number of motor vehicles for which each registrant submitted fees. A participating State must submit a report of "no activity" to any other participating State for which it collected no fees during any month.

(b) A participating State must maintain records of fee revenue received from and remitted to each other participating State. Such records must specify the fees received from and remitted to each participating State

§ 367.7

with respect to each motor carrier registrant. A participating State must retain such records for a minimum of 3 years.

(c) A participating State must keep records pertaining to each of the motor carriers for which it acts as a registration State. The records must, at a minimum, include copies of annual and supplemental registration applications containing the information required by § 367.4(c). A registration State must retain all such records for a minimum of 3 years.

[58 FR 28933, May 18, 1993. Redesignated at 61 FR 54707, Oct. 21, 1996, as amended at 62 FR 15420, Apr. 1, 1997]

§ 367.7 Violations unlawful; criminal penalties and civil sanctions.

Any violation of the provisions of these standards is unlawful. Nothing in these standards shall be construed to prevent a State from imposing criminal penalties or civil sanctions upon any person or organization violating any provision of them.

APPENDIX A TO PART 367—UNIFORM APPLICATION FOR SINGLE STATE REGISTRATION FOR MOTOR CARRIERS REGISTERED WITH THE SECRETARY OF TRANSPORTATION

Motor Carrier Identification Numbers:

FMCSA MC No.(s.) _____

US DOT No. _____

Applicant (Identical to name on FMCSA order):

Name: _____

D/B/A _____

Principal Place of Business Address:¹

Street _____

City _____

State _____

Zip _____

Mailing Address if Different From Business Address Above:

Street _____

City _____

State _____

Zip _____

Type of Registration:

☐ *New Carrier Registration*— The motor carrier has not previously registered.

¹ A principal place of business is a single location that serves as a motor carrier's headquarters and where it maintains or can make available its operational records.

49 CFR Ch. III (10–1–04 Edition)

☐ *Annual Registration*— The motor carrier is renewing its annual registration.

☐ *Supplemental Registration*— The motor carrier is adding additional vehicles or States of travel after its annual registration.

☐ *New Registration State Selection*— The motor carrier has changed its principal place of business or its prior registration State has left the registration program. The prior registration State was _____.

☐ *Additional States not registered* in prior years. List _____

Type of Motor Carrier: (Check one)

☐ Individual ☐ Partnership ☐ Corporation

If corporation, give State in which incorporated: _____

List names of partners or officers:

Name: _____

Title: _____

Name: _____

Title: _____

Name: _____

Title: _____

Type of FMCSA Registered Authority:

Permanent Certificate or Permit ☐ Temporary Authority (TA) ☐ Emergency Temporary Authority (ETA) ☐

FMCSA Certificate(s) or Permit(s):

☐ FMCSA Authority Order(s) attached for initial registration.

☐ FMCSA Authority Order(s) attached for additional grants received.

☐ No change from prior year registration.

Proof of Public Liability Security:

☐ The applicant is filing, or causing to be filed, a copy of its proof of public liability security submitted to and accepted by the FMCSA under 49 CFR part 387, subpart C.

☐ The applicant has filed, or caused to be filed, a copy of its proof of public liability security submitted to and accepted by the FMCSA under 49 CFR part 387, subpart C, and the security remains in effect.

FMCSA Approved Self-Insurance or Other Securities:

☐ FMCSA Insurance order attached for new carrier registration. (Check one when completing for annual registration.)

☐ The FMCSA Order approving the self-insurance plan or other security is still in full force and effect, and the carrier is in full compliance with all conditions imposed by the FMCSA Order.

☐ The motor carrier is no longer approved under a self-insurance plan or other security, and the motor carrier will file, or

Federal Motor Carrier Safety Administration, DOT

§ 368.3

cause to be filed, a copy of proof of public liability security with this application in the registration State.

Hazardous Materials: (Check one)

- ☐ The applicant *will not* haul hazardous materials in any quantity.
- ☐ The applicant will haul hazardous materials that require the following limits in accordance with Title 49 CFR 387.303:

(Check one)

- ☐ Public Liability and Property Damage Insurance of \$1 million.
- ☐ Public Liability and Property Damage Insurance of \$5 million.

Process Agents:

- ☐ FMCSA Form No. BOC-3 or blanket designation attached for new registration.
- ☐ FMCSA Form No. BOC-3 or blanket designation attached reflecting changes of designation of process agents.
- ☐ No change from prior year registration.

Certification:

I, the undersigned, under penalty for false statement, certify that the above information is true and correct and that I am authorized to execute and file this document on behalf of the applicant. (Penalty provisions subject to the laws of the registration State.)

PART 368—APPLICATION FOR A CERTIFICATE OF REGISTRATION TO OPERATE IN MUNICIPALITIES IN THE UNITED STATES ON THE UNITED STATES-MEXICO INTER- NATIONAL BORDER OR WITHIN THE COMMERCIAL ZONES OF SUCH MUNICIPALITIES.

Sec.

- 368.1 Certificate of registration.
- 368.2 Definitions.
- 368.3 Applying for a certificate of registration.
- 368.4 Requirement to notify FMCSA of change in applicant information.
- 368.5 Re-registration of certain carriers holding certificates of registration.
- 368.6 FMCSA action on an application.
- 368.7 Requirement to carry certificate of registration in the vehicle.
- 368.8 Appeals.

AUTHORITY: 49 U.S.C. 13301 and 13902; Pub. L. 106-159, 113 Stat. 1748; and 49 CFR 1.73.

SOURCE: 67 FR 12660, Mar. 19, 2002, unless otherwise noted.

§ 368.1 Certificate of registration.

(a) A Mexico-domiciled motor carrier must apply to the FMCSA and receive a Certificate of Registration to provide interstate transportation in municipalities in the United States on the United States-Mexico international border or within the commercial zones of such municipalities as defined in 49 U.S.C. 13902(c)(4)(A).

(b) A certificate of registration permits only interstate transportation of property in municipalities in the United States on the United States-Mexico international border or within the commercial zones of such municipalities. A holder of a Certificate of Registration who operates a vehicle beyond this area is subject to applicable penalties and out-of-service orders.

§ 368.2 Definitions.

Interstate transportation means transportation described at 49 U.S.C. 13501, and transportation in the United States otherwise exempt from the Secretary's jurisdiction under 49 U.S.C. 13506(b)(1).

Mexico-domiciled motor carrier means a motor carrier of property whose principal place of business is located in Mexico.

§ 368.3 Applying for a certificate of registration.

(a) If you wish to obtain a certificate of registration under this part, you must submit an application that includes the following:

- (1) Form OP-2—Application for Mexican Certificate of Registration for Foreign Motor Carriers and Foreign Motor Private Carriers Under 49 U.S.C. 13902;
- (2) Form MCS-150—Motor Carrier Identification Report; and
- (3) A notification of the means used to designate process agents, either by submission in the application package of Form BOC-3—Designation of Agents—Motor Carriers, Brokers and Freight Forwarders or a letter stating that the applicant will use a process agent service that will submit the Form BOC-3 electronically.

§ 368.4

(b) The FMCSA will only process your application for a Certificate of Registration if it meets the following conditions:

(1) The application must be completed in English;

(2) The information supplied must be accurate and complete in accordance with the instructions to the Form OP-2, Form MCS-150 and Form BOC-3;

(3) The application must include all the required supporting documents and applicable certifications set forth in the instructions to the Form OP-2, Form MCS-150 and Form BOC-3;

(4) The application must include the filing fee payable to the FMCSA in the amount set forth in 49 CFR 360.3(f)(1); and

(5) The application must be signed by the applicant.

(c) If you fail to furnish the complete application as described under paragraph (b) of this section your application may be rejected.

(d) If you submit false information under this section, you will be subject to applicable Federal penalties.

(e) You must submit the application to the address provided in the instructions to the Form OP-2.

(f) You may obtain the application described in paragraph (a) of this section from any FMCSA Division Office or download it from the FMCSA web site at: <http://www.fmcsa.dot.gov/factsfigs/formspubs.htm>.

§ 368.4 Requirement to notify FMCSA of change in applicant information.

(a) You must notify the FMCSA of any changes or corrections to the information in Parts I, IA or II submitted on the Form OP-2 or the Form BOC-3—Designation of Agents—Motor Carriers, Brokers and Freight Forwarders during the application process or while you have a Certificate of Registration. You must notify the FMCSA in writing within 45 days of the change or correction.

(b) If you fail to comply with paragraph (a) of this section, the FMCSA may suspend or revoke the Certificate of Registration until you meet those requirements.

49 CFR Ch. III (10–1–04 Edition)

§ 368.5 Re-registration of certain carriers holding certificates of registration.

(a) Each holder of a certificate of registration that permits operations only in municipalities in the United States along the United States-Mexico international border or in commercial zones of such municipalities issued before April 18, 2002, who wishes to continue solely in those operations must submit an application according to procedures established under § 368.3 of this part, except the filing fee in paragraph (b)(4) of that section is waived. You must file your application by October 20, 2003.

(b) The FMCSA may suspend or revoke the certificate of registration of any registrant that fails to comply with the procedures set forth in this section.

(c) Certificates of registration issued before April 18, 2002, remain valid until the FMCSA acts on the OP-2 application filed according to paragraph (a) of this section.

§ 368.6 FMCSA action on the application.

(a) The Federal Motor Carrier Safety Administration will review the application for correctness, completeness, and adequacy of information. Non-material errors will be corrected without notice to the applicant. Incomplete applications may be rejected.

(b) If the applicant does not require or is not eligible for a Certificate of Registration, the FMCSA will deny the application and notify the applicant.

(c) The FMCSA will validate the accuracy of information and certifications provided in the application against data maintained in databases of the governments of Mexico and the United States.

(d) If the FMCSA determines that the application and certifications demonstrate that the application is consistent with the FMCSA's safety fitness policy, it will issue a provisional Certificate of Registration, including a distinctive USDOT Number that identifies the motor carrier as permitted to provide interstate transportation of property solely in municipalities in the United States on the U.S.-Mexico international border or within the

commercial zones of such municipalities.

(e) The FMCSA may issue a permanent Certificate of Registration to the holder of a provisional Certificate of Registration no earlier than 18 months after the date of issuance of the Certificate and only after completion to the satisfaction of the FMCSA of the safety monitoring system for Mexico-domiciled carriers set out in subpart B of part 385 of this subchapter.

(f) Notice of the authority sought will not be published in either the FEDERAL REGISTER or the FMCSA Register. Protests or comments will not be allowed. There will be no oral hearings.

§ 368.7 Requirement to carry certificate of registration in the vehicle.

A holder of a Certificate of Registration must maintain a copy of the Certificate of Registration in any vehicle providing transportation service within the scope of the Certificate, and make it available upon request to any State or Federal authorized inspector or enforcement officer.

§ 368.8 Appeals.

An applicant has the right to appeal denial of the application. The appeal must be in writing and specify in detail why the agency's decision to deny the application was wrong. The appeal must be filed with the Director, Office of Data Analysis and Information Systems within 20 days of the date of the letter denying the application. The decision of the Director will be the final agency order.

PART 370—PRINCIPLES AND PRACTICES FOR THE INVESTIGATION AND VOLUNTARY DISPOSITION OF LOSS AND DAMAGE CLAIMS AND PROCESSING SALVAGE

Sec.

- 370.1 Applicability of regulations.
- 370.3 Filing of claims.
- 370.5 Acknowledgment of claims.
- 370.7 Investigation of claims.
- 370.9 Disposition of claims.
- 370.11 Processing of salvage.

AUTHORITY: 49 U.S.C. 13301 and 14706; and 49 CFR 1.73.

SOURCE: 62 FR 32042, June 12, 1997, unless otherwise noted.

EDITORIAL NOTE: Nomenclature changes to part 370 appear at 66 FR 49870, Oct. 1, 2001.

§ 370.1 Applicability of regulations.

The regulations set forth in this part shall govern the processing of claims for loss, damage, injury, or delay to property transported or accepted for transportation, in interstate or foreign commerce, by each motor carrier, water carrier, and freight forwarder (hereinafter called carrier), subject to 49 U.S.C. subtitle IV, part B.

§ 370.3 Filing of claims.

(a) *Compliance with regulations.* A claim for loss or damage to baggage or for loss, damage, injury, or delay to cargo, shall not be voluntarily paid by a carrier unless filed, as provided in paragraph (b) of this section, with the receiving or delivering carrier, or carrier issuing the bill of lading, receipt, ticket, or baggage check, or carrier on whose line the alleged loss, damage, injury, or delay occurred, within the specified time limits applicable thereto and as otherwise may be required by law, the terms of the bill of lading or other contract of carriage, and all tariff provisions applicable thereto.

(b) *Minimum filing requirements.* A written or electronic communication (when agreed to by the carrier and shipper or receiver involved) from a claimant, filed with a proper carrier within the time limits specified in the bill of lading or contract of carriage or transportation and:

(1) Containing facts sufficient to identify the baggage or shipment (or shipments) of property,

(2) Asserting liability for alleged loss, damage, injury, or delay, and

(3) Making claim for the payment of a specified or determinable amount of money, shall be considered as sufficient compliance with the provisions for filing claims embraced in the bill of lading or other contract of carriage; *Provided, however,* That where claims are electronically handled, procedures are established to ensure reasonable carrier access to supporting documents.

(c) *Documents not constituting claims.* Bad order reports, appraisal reports of damage, notations of shortage or damage, or both, on freight bills, delivery

§ 370.5

receipts, or other documents, or inspection reports issued by carriers or their inspection agencies, whether the extent of loss or damage is indicated in dollars and cents or otherwise, shall, standing alone, not be considered by carriers as sufficient to comply with the minimum claim filing requirements specified in paragraph (b) of this section.

(d) *Claims filed for uncertain amounts.* Whenever a claim is presented against a proper carrier for an uncertain amount, such as "\$100 more or less," the carrier against whom such claim is filed shall determine the condition of the baggage or shipment involved at the time of delivery by it, if it was delivered, and shall ascertain as nearly as possible the extent, if any, of the loss or damage for which it may be responsible. It shall not, however, voluntarily pay a claim under such circumstances unless and until a formal claim in writing for a specified or determinable amount of money shall have been filed in accordance with the provisions of paragraph (b) of this section.

(e) *Other claims.* If investigation of a claim develops that one or more other carriers has been presented with a similar claim on the same shipment, the carrier investigating such claim shall communicate with each such other carrier and, prior to any agreement entered into between or among them as to the proper disposition of such claim or claims, shall notify all claimants of the receipt of conflicting or overlapping claims and shall require further substantiation, on the part of each claimant of his/her title to the property involved or his/her right with respect to such claim.

§ 370.5 Acknowledgment of claims.

(a) Each carrier shall, upon receipt in writing or by electronic transmission of a proper claim in the manner and form described in the regulations in the past, acknowledge the receipt of such claim in writing or electronically to the claimant within 30 days after the date of its receipt by the carrier unless the carrier shall have paid or declined such claim in writing or electronically within 30 days of the receipt thereof. The carrier shall indicate in its acknowledgment to the claimant

49 CFR Ch. III (10–1–04 Edition)

what, if any, additional documentary evidence or other pertinent information may be required by it further to process the claim as its preliminary examination of the claim, as filed, may have revealed.

(b) The carrier shall at the time each claim is received create a separate file and assign thereto a successive claim file number and note that number on all documents filed in support of the claim and all records and correspondence with respect to the claim, including the acknowledgment of receipt. At the time such claim is received the carrier shall cause the date of receipt to be recorded on the face of the claim document, and the date of receipt shall also appear in the carrier's acknowledgment of receipt to the claimant. The carrier shall also cause the claim file number to be noted on the shipping order, if in its possession, and the delivery receipt, if any, covering such shipment, unless the carrier has established an orderly and consistent internal procedure for assuring:

(1) That all information contained in shipping orders, delivery receipts, tally sheets, and all other pertinent records made with respect to the transportation of the shipment on which claim is made, is available for examination upon receipt of a claim;

(2) That all such records and documents (or true and complete reproductions thereof) are in fact examined in the course of the investigation of the claim (and an appropriate record is made that such examination has in fact taken place); and

(3) That such procedures prevent the duplicate or otherwise unlawful payment of claims.

§ 370.7 Investigation of claims.

(a) *Prompt investigation required.* Each claim filed against a carrier in the manner prescribed in this part shall be promptly and thoroughly investigated if investigation has not already been made prior to receipt of the claim.

(b) *Supporting documents.* When a necessary part of an investigation, each claim shall be supported by the original bill of lading, evidence of the freight charges, if any, and either the original invoice, a photographic copy of the original invoice, or an exact

copy thereof or any extract made therefrom, certified by the claimant to be true and correct with respect to the property and value involved in the claim; or certification of prices or values, with trade or other discounts, allowance, or deductions, of any nature whatsoever and the terms thereof, or depreciation reflected thereon; *Provided, however*, That where property involved in a claim has not been invoiced to the consignee shown on the bill of lading or where an invoice does not show price or value, or where the property involved has been sold, or where the property has been transferred at bookkeeping values only, the carrier shall, before voluntarily paying a claim, require the claimant to establish the destination value in the quantity, shipped, transported, or involved; *Provided, further*, That when supporting documents are determined to be a necessary part of an investigation, the supporting documents are retained by the carriers for possible FMCSA inspection.

(c) *Verification of loss.* When an asserted claim for loss of an entire package or an entire shipment cannot be otherwise authenticated upon investigation, the carrier shall obtain from the consignee of the shipment involved a certified statement in writing that the property for which the claim is filed has not been received from any other source.

§ 370.9 Disposition of claims.

(a) Each carrier subject to 49 U.S.C. subtitle IV, part B which receives a written or electronically transmitted claim for loss or damage to baggage or for loss, damage, injury, or delay to property transported shall pay, decline, or make a firm compromise settlement offer in writing or electronically to the claimant within 120 days after receipt of the claim by the carrier; *Provided, however*, That, if the claim cannot be processed and disposed of within 120 days after the receipt thereof, the carrier shall at that time and at the expiration of each succeeding 60-day period while the claim remains pending, advise the claimant in writing or electronically of the status of the claim and the reason for the delay in making final disposition thereof and it shall re-

tain a copy of such advice to the claimant in its claim file thereon.

(b) When settling a claim for loss or damage, a common carrier by motor vehicle of household goods as defined in § 375.1(b)(1) of this chapter shall use the replacement costs of the lost or damaged item as a base to apply a depreciation factor to arrive at the current actual value of the lost or damaged item: *Provided*, That where an item cannot be replaced or no suitable replacement is obtainable, the proper measure of damages shall be the original costs, augmented by a factor derived from a consumer price index, and adjusted downward by a factor depreciation over average useful life.

§ 370.11 Processing of salvage.

(a) Whenever baggage or material, goods, or other property transported by a carrier subject to the provisions in this part is damaged or alleged to be damaged and is, as a consequence thereof, not delivered or is rejected or refused upon tender thereof to the owner, consignee, or person entitled to receive such property, the carrier, after giving due notice, whenever practicable to do so, to the owner and other parties that may have an interest therein, and unless advised to the contrary after giving such notice, shall undertake to sell or dispose of such property directly or by the employment of a competent salvage agent. The carrier shall only dispose of the property in a manner that will fairly and equally protect the best interests of all persons having an interest therein. The carrier shall make an itemized record sufficient to identify the property involved so as to be able to correlate it to the shipment or transportation involved, and claim, if any, filed thereon. The carrier also shall assign to each lot of such property a successive lot number and note that lot number on its record of shipment and claim, if any claim is filed thereon.

(b) Whenever disposition of salvage material or goods shall be made directly to an agent or employee of a carrier or through a salvage agent or company in which the carrier or one or more of its directors, officers, or managers has any interest, financial or otherwise, that carrier's salvage

records shall fully reflect the particulars of each such transaction or relationship, or both, as the case may be.

(c) Upon receipt of a claim on a shipment on which salvage has been processed in the manner prescribed in this section, the carrier shall record in its claim file thereon the lot number assigned, the amount of money recovered, if any, from the disposition of such property, and the date of transmittal of such money to the person or persons lawfully entitled to receive the same.

PART 371—BROKERS OF PROPERTY

Sec.

371.1 Applicability.

371.2 Definitions.

371.3 Records to be kept by brokers.

371.7 Misrepresentation.

371.9 Rebating and compensation.

371.10 Duties and obligations of brokers.

371.13 Accounting.

AUTHORITY: 49 U.S.C. 13301, 13501, and 14122; and 49 CFR 1.73.

SOURCE: 45 FR 68942, Oct. 17, 1980, unless otherwise noted. Redesignated at 61 FR 54707, Oct. 21, 1996.

§ 371.1 Applicability.

This part applies, to the extent provided therein, to all brokers of transportation by motor vehicle as defined in § 371.2.

[32 FR 20034, Dec. 20, 1967, as amended at 62 FR 15421, Apr. 1, 1997]

§ 371.2 Definitions.

(a) *Broker* means a person who, for compensation, arranges, or offers to arrange, the transportation of property by an authorized motor carrier. Motor carriers, or persons who are employees or bona fide agents of carriers, are not brokers within the meaning of this section when they arrange or offer to arrange the transportation of shipments which they are authorized to transport and which they have accepted and legally bound themselves to transport.

(b) *Bona fide agents* are persons who are part of the normal organization of a motor carrier and perform duties under the carrier's directions pursuant to a preexisting agreement which provides for a continuing relationship, precluding the exercise of discretion on

the part of the agent in allocating traffic between the carrier and others.

(c) *Brokerage* or *brokerage service* is the arranging of transportation or the physical movement of a motor vehicle or of property. It can be performed on behalf of a motor carrier, consignor, or consignee.

(d) *Non-brokerage service* is all other service performed by a broker on behalf of a motor carrier, consignor, or consignee.

§ 371.3 Records to be kept by brokers.

(a) A broker shall keep a record of each transaction. For purposes of this section, brokers may keep master lists of consignors and the address and registration number of the carrier, rather than repeating this information for each transaction. The record shall show:

(1) The name and address of the consignor;

(2) The name, address, and registration number of the originating motor carrier;

(3) The bill of lading or freight bill number;

(4) The amount of compensation received by the broker for the brokerage service performed and the name of the payer;

(5) A description of any non-brokerage service performed in connection with each shipment or other activity, the amount of compensation received for the service, and the name of the payer; and

(6) The amount of any freight charges collected by the broker and the date of payment to the carrier.

(b) Brokers shall keep the records required by this section for a period of three years.

(c) Each party to a brokered transaction has the right to review the record of the transaction required to be kept by these rules.

[45 FR 68942, Oct. 17, 1980. Redesignated at 61 FR 54707, Oct. 21, 1996, as amended at 62 FR 15421, Apr. 1, 1997]

§ 371.7 Misrepresentation.

(a) A broker shall not perform or offer to perform any brokerage service (including advertising), in any name other than that in which its registration is issued.

(b) A broker shall not, directly or indirectly, represent its operations to be that of a carrier. Any advertising shall show the broker status of the operation.

[45 FR 68942, Oct. 17, 1980. Redesignated at 61 FR 54707, Oct. 21, 1996, as amended at 62 FR 15421, Apr. 1, 1997]

§371.9 Rebating and compensation.

(a) A broker shall not charge or receive compensation from a motor carrier for brokerage service where:

(1) The broker owns or has a material beneficial interest in the shipment or

(2) The broker is able to exercise control over the shipment because the broker owns the shipper, the shipper owns the broker, or there is common ownership of the two.

(b) A broker shall not give or offer to give anything of value to any shipper, consignor or consignee (or their officers or employees) except inexpensive advertising items given for promotional purposes.

§371.10 Duties and obligations of brokers.

Where the broker acts on behalf of a person bound by law or the FMCSA regulation as to the transmittal of bills or payments, the broker must also abide by the law or regulations which apply to that person.

[45 FR 68943, Oct. 17, 1980, as amended at 62 FR 15421, Apr. 1, 1997]

§371.13 Accounting.

Each broker who engages in any other business shall maintain accounts so that the revenues and expenses relating to the brokerage portion of its business are segregated from its other activities. Expenses that are common shall be allocated on an equitable basis; however, the broker must be prepared to explain the basis for the allocation.

[45 FR 68943, Oct. 17, 1980]

49 CFR Ch. III (10–1–04 Edition)

EDITORIAL NOTE: Nomenclature changes to part 372 appear at 66 FR 49870, Oct. 1, 2001.

Subpart A—Exemptions

SOURCE: 32 FR 20036, Dec. 20, 1967, unless otherwise noted. Redesignated at 61 FR 54708, Oct. 21, 1996.

§ 372.101 Casual, occasional, or reciprocal transportation of passengers for compensation when such transportation is sold or arranged by anyone for compensation.

The partial exemption from regulation under the provisions of 49 U.S.C. subtitle IV, part B of the casual, occasional, and reciprocal transportation of passengers by motor vehicle in interstate or foreign commerce for compensation as provided in 49 U.S.C. 13506(b) be, and it is hereby, removed to the extent necessary to make applicable all provisions of 49 U.S.C. subtitle IV, part B to such transportation when sold or offered for sale, or provided or procured or furnished or arranged for, by any person who sells, offers for sale, provides, furnishes, contracts, or arranges for such transportation for compensation or as a regular occupation or business.

[32 FR 20036, Dec. 20, 1967. Redesignated at 61 FR 54708, Oct. 21, 1996, as amended at 62 FR 15421, Apr. 1, 1997]

§ 372.103 Motor vehicles employed solely in transporting school children and teachers to or from school.

The exemption set forth in 49 U.S.C. 13506(a)(1) shall not be construed as being inapplicable to motor vehicles being used at the time of operation in the transportation of schoolchildren and teachers to or from school, even though such motor vehicles are employed at other times in transportation beyond the scope of the exemption.

[36 FR 9022, May 18, 1971, as amended at 62 FR 15421, Apr. 1, 1997]

§ 372.107 Definitions.

As used in the regulations in this part, the following terms shall have the meaning shown:

(a) *Cooperative association*. The term “cooperative association” means an association which conforms to the fol-

lowing definition in the Agricultural Marketing Act, approved June 15, 1929, as amended (12 U.S.C. 1141j):

As used in this Act, the term *cooperative association* means any association in which farmers act together in processing, preparing for market, handling, and/or marketing the farm products of persons so engaged, and also means any association in which farmers act together in purchasing, testing, grading, processing, distributing, and/or furnishing farm supplies and/or farm business services. Provided, however, That such associations are operated for the mutual benefit of the members thereof as such producers or purchasers and conform to one or both of the following requirements:

First. That no member of the association is allowed more than one vote because of the amount of stock or membership capital he may own therein; and

Second. That the association does not pay dividends on stock or membership capital in excess of 8 per centum per annum.

And in any case to the following:

Third. That the association shall not deal in farm products, farm supplies and farm business services with or for nonmembers in an amount greater in value than the total amount of such business transacted by it with or for members. All business transacted by any cooperative association for or on behalf of the United States or any agency or instrumentality thereof shall be disregarded in determining the volume of member and nonmember business transacted by such association.

Associations which do not conform to such definition are not eligible to operate under the partial exemption of 49 U.S.C. 13506(a)(5).

(b) *Federation of cooperative associations*. The term “federation of cooperative associations” means a federation composed of either two or more cooperative associations, or one or more farmers, which federation possesses no greater powers or purposes than a cooperative association as defined in paragraph (a) of this section. Federations of cooperative associations which do not conform to such definition are not eligible to operate under the partial exemption of 49 U.S.C. 13506(a)(5).

(c) *Member*. The term “member” means any farmer or cooperative association which has consented to be, has been accepted as, and is a member in good standing in accordance with the constitution, bylaws, or rules of the cooperative association or federation of cooperative associations.

(d) *Farmer*. The term “farmer” means any individual, partnership, corporation, or other business entity to the extent engaged in farming operations either as a producer of agricultural commodities or as a farm owner.

(e) *Interstate transportation*. The term “interstate transportation” means transportation by motor vehicle in interstate or foreign commerce subject to the FMCSA’s jurisdiction as set forth in 49 U.S.C. 13501.

(f) *Member transportation*. The term “member transportation” means transportation performed by a cooperative association or federation of cooperative associations for itself or for its members, but does not include transportation performed in furtherance of the nonfarm business of such members.

(g) *Nonmember transportation*. The term “nonmember transportation” means transportation performed by a cooperative association or federation of cooperative associations other than member transportation as defined in paragraph (f) of this section.

(h) *Fiscal year*. The term “fiscal year” means the annual accounting period adopted by the cooperative association or federation of cooperative associations for Federal income tax reporting purposes.

[43 FR 2397, Jan. 17, 1978, as amended at 45 FR 45524, July 3, 1980; 47 FR 13353, Mar. 30, 1982; 47 FR 15142, Apr. 8, 1982]

§ 372.109 Computation of tonnage allowable in nonfarm-non-member transportation.

Interstate transportation performed by a cooperative association or federation of cooperative associations for nonmembers who are not farmers, cooperative associations, or federations of associations or the United States Government for compensation, (except transportation otherwise exempt under subtitle IV, part B, chapter 135 of title 49 of the United States Code) shall be limited to that which is incidental to its primary transportation operation and necessary for its effective performance. It shall in no event exceed 25 percent of its total interstate transportation services in any fiscal year, measured in terms of tonnage. A cooperative association or federation of cooperative associations may transport

its own property, its members’ property, property of other farmers and the property of other cooperatives or federations in accordance with existing law, except where the provisions of § 372.111 may be applicable to the limit on member/nonmember transportation.

(a) The phrase “incidental to its primary transportation operation and necessary for its effective performance” means that the interstate transportation of the cooperative association or federation of cooperation association for nonmembers as described above is performed with the same trucks or tractors employed in a prior or subsequent trip in the primary transportation operation of the cooperative association or federation, that it is not economically feasible to operate the trucks or tractors empty on return trips (outbound trips in cases where the primary transportation operation is inbound to the association or federation), and that the additional income obtained from such transportation is necessary to make the primary transportation operation financially practicable. Transportation for nonmembers as described above performed by a cooperative or federation through the use of trucks or tractors trip-leased for one-way movements with the cooperative association or federation acting as lessee, is not incidental and necessary;

(b) The base tonnage to which the 25-percent limitation is applied is all tonnage of all kinds transported by the cooperative association or federation of cooperative associations in interstate or foreign commerce, whether for itself, its members or nonmembers, for or on behalf of the United States or any agency or instrumentality thereof, and that performed within the exemption provided by 49 U.S.C. 13506(a)(5).

[43 FR 2397, Jan. 17, 1978, as amended at 43 FR 21894, May 22, 1978; 45 FR 45524, July 3, 1980; 62 FR 49940, Sept. 24, 1997]

§ 372.111 Nonmember transportation limitation and record keeping.

(a) *Overall limitation of nonmember transportation*. No cooperative association or federation of cooperative associations may engage in nonmember interstate transportation for compensation in any fiscal year which, measured in terms of tonnage, exceeds

§ 372.113

its total interstate member transportation in such fiscal year.

(b) *Records of interstate transportation when nonmember transportation is performed.* Any cooperative association or federation of cooperative associations performing interstate transportation for nonmembers shall prepare and retain for a period of at least two years written records of all interstate transportation performed for members and nonmembers. These records shall contain:

- (1) The date of the shipment,
- (2) The names and addresses of the consignor and consignee,
- (3) The origin and destination of the shipment,
- (4) A description of the articles in the shipment,
- (5) The weight or volume of the shipment,
- (6) A description of the equipment used either by unit number or license number and, in the event this equipment is nonowned, the name and address of its owners and drivers,
- (7) The total charges collected,
- (8) A copy of all leases executed by the cooperative association or federation of cooperative associations to obtain equipment to perform transportation under 49 U.S.C. 13506(a)(5),
- (9) Whether the transportation performed is:
 - (i) Member transportation,
 - (ii) Nonmember transportation for nonmembers who are farmers, cooperative associations, or federations thereof,
 - (iii) Other nonmember transportation, and if of class (iii), how the transportation was incidental and necessary as defined in § 372.109(a).

[43 FR 2397, Jan. 17, 1978, as amended at 45 FR 45524, July 3, 1980; 62 FR 38036, July 16, 1997; 62 FR 49940, Sept. 24, 1997]

§ 372.113 [Reserved]

§ 372.115 Commodities that are not exempt under 49 U.S.C. 13506(a)(6).

49 U.S.C. 13506(a)(6) provides an exemption from regulation for motor vehicles used in carrying ordinary livestock, fish, and unmanufactured agricultural commodities. Certain specific commodities have been statutorily determined to be non-exempt. Adminis-

49 CFR Ch. III (10–1–04 Edition)

trative Ruling No. 133, which is reproduced below, is a list of those commodities that are non-exempt by statute.

ADMINISTRATIVE RULING NO. 133

LIST OF COMMODITIES THAT ARE NOT EXEMPT BY STATUTE UNDER 49 U.S.C. 13506(A)(6)

Animal fats
Butter
Canned fruits and vegetables
Carnauba wax as imported in slabs or chunks
Cattle, slaughtered
Charcoal
Cheese
Coal
Cocoa beans
Coffee, beans, roasted, or instant
Copra meal
Cotton yarn
Cottonseed cake or meal
Diatomaceous earth
Dinners, frozen
Feeds:
Alfalfa meal
Alfalfa pellets
Beet pulp
Bran shorts
Copra meal
Corn gluten
Distilled corn grain residues, with or without solubles added
Fish meal
Hominy feed
Middlings
Pelletized ground refuse screenings
Wheat bran
Wheat shorts
Fertilizer, commercial
Fish:
Canned or salted as a treatment for preserving
Cooked or partially cooked fish or shrimp, frozen or unfrozen
Hermetically sealed in containers as a treatment for preserving
Oil from fishes
Preserved, or treated for preserving, such as smoked, salted, pickled, spiced, corned or kippered
Flagstone
Flaxseed meal
Flour
Forest products:
Resin products, such as turpentine
Fruits and Berries:
Bananas, fresh, dried, dehydrated, or frozen
Canned
Frozen
Hulls of oranges after juice extractions
Juice, fruit, plain or concentrated
Pies, frozen

Federal Motor Carrier Safety Administration, DOT

§372.117

Preserved, such as jam
 Purees, strawberry and other, frozen
Grains:
 Oils extracted from grain
 Popcorn, popped
 Rice, precooked
 Wheat germ
Gravel
Hair, hog or other animal, product of slaughter of animal
Hay, sweetened with 3 percent molasses by weight
Hemp fiber
Hides, green and salted
Insecticides
Limestone, agricultural
Livestock:
 Monkeys
 Race horses
 Show horses
 Zoo animals
Lumber, rough sawed or planed
Maple syrup
Meal:
 Alfalfa
 Copra
 Cottonseed
 Fish
 Flaxseed
 Linseed
 Peanut
 Soybean
Meat and meat products, fresh, frozen or canned
Milk and Cream:
 Chocolate
 Condensed
 Sterilized in hermetically sealed cans
Molasses
Nuts (including peanuts):
 Peanut meal
 Roasted or boiled
Oil, mint
Oil, extracted from vegetables, grain, seed, fish or other commodity
Pelts
Pies, frozen
Pigeons, racing
Pulp, beet
Pulp, sugar cane
Rock (except natural crushed, vesicular rock to be used for decorative purposes)
Rubber, crude, in bales
Rubber, latex, natural, liquid, from which water has been extracted and to which ammonia has been added
Sand
Seeds:
 Oil extracted from seeds
Skins, animal
Soil, potting

Soil, top
Soup, frozen
Sugar
Sugar cane pulp
Sugar raw
Syrup, cane
Syrup, maple
Tea
Tobacco:
 Cigars and cigarettes
 Homogenized
 Smoking
Top Soil
Trees:
 Sawed into lumber
Vegetables:
 Candied sweet potatoes, frozen
 Canned
 Cooked
 French fried potatoes
 Oil, extracted from vegetables
 Soup, frozen
 Soybean meal
Wool imported from a foreign country
Wool tops and noils
Wool waste (carded, spun, woven, or knitted)
Wool yarn

Note 1: Under 49 U.S.C. 13506(a)(6)(D), any listed fish or shellfish product that is not intended for human consumption is *exempt*.

Note 2: Under 49 U.S.C. 13506(a)(6)(E), any listed livestock feed, poultry feed, agricultural seeds, or plants that are transported to a site of agricultural production or to a business enterprise engaged in the sale to agricultural producers of goods used in agricultural production is *exempt*.

[53 FR 17707, May 18, 1988, as amended at 62 FR 15421, Apr. 1, 1997]

§372.117 Motor transportation of passengers incidental to transportation by aircraft.

(a) *Passengers having an immediately prior or subsequent movement by air.* The transportation of passengers by motor vehicle is transportation incidental to transportation by aircraft provided (1) that it is confined to the transportation of passengers who have had or will have an immediately prior or immediately subsequent movement by air and (2) that the zone within which motor transportation is incidental to transportation by aircraft, except as it may be individually determined as provided in section (c) herein, shall not exceed in size the area encompassed by a 25-mile radius of the boundary of the airport at which the passengers arrive or depart and by the boundaries of the

§ 372.201

commercial zones (as defined by the Secretary) of any municipalities any part of whose commercial zones falls within the 25-mile radius of the pertinent airport.

(b) *Substituted motor-for-air transportation due to emergency conditions.* Transportation of passengers by motor vehicle is transportation incidental to transportation by aircraft if it constitutes substituted motor-for-air service performed at the expense of the air carrier in emergency situations arising from the inability of the air carrier to perform air transportation due to adverse weather conditions, equipment failure, or other causes beyond the control of the air carrier.

(c) *Individual determination of exempt zones.* Upon its own motion or upon petition filed by any interested person, the Secretary may in an appropriate proceeding, determine whether the area within which the transportation by motor vehicle of passengers having an immediately prior or subsequent movement by air must be performed, in order to come within the provisions of paragraph (a) of this section, should be individually determined with respect to any particular airport or city served by an airport, and whether there should be established therefor appropriate boundaries differing in extent from this defined in paragraph (a)(2) of this section.

(d) *Exempt zones and operations—(1) Dulles and Baltimore-Washington International Airports.* The transportation by motor vehicle, in interstate or foreign commerce, of passengers, having an immediately prior or subsequent movement by air, between Dulles International Airport, near Chantilly, Va., and Baltimore-Washington International Airport, near Baltimore, Md., is partially exempt from regulation under 49 U.S.C. 13506(a)(8)(A).

(2) *Savannah, Ga., Airport.* The transportation by motor vehicle, in interstate or foreign commerce, of passengers, having an immediately prior or subsequent movement by air, between Savannah, Ga., Airport and all points on Hilton Head Island, SC, is partially exempt from regulation under 49 U.S.C. 13506(a)(8)(A).

(3) *Chicago O'Hare International Airport (Chicago, Ill.).* The transportation

by motor vehicle, in interstate or foreign commerce, of passengers, having an immediately prior or subsequent movement by air, between O'Hare International Airport, at Chicago, Ill., on the one hand, and, on the other, points in Indiana on and north of U.S. Highway 30 and on and west of Indiana Highway 49, is partially exempt from regulation under 49 U.S.C. 13506(a)(8)(A).

[32 FR 20036, Dec. 20, 1967, as amended at 37 FR 5252, Mar. 11, 1972; 42 FR 10003, Feb. 18, 1977; 42 FR 15705; Mar. 23, 1977; 62 FR 15421, Apr. 1, 1997]

Subpart B—Commercial Zones

SOURCE: 41 FR 56653, Dec. 29, 1976, unless otherwise noted. Redesignated at 61 FR 54708, Oct. 21, 1996.

§ 372.201 Albany, NY.

The zone adjacent to, and commercially a part of Albany, N.Y., within which transportation by motor vehicle, in interstate or foreign commerce, not under common control, management, or arrangement for a continuous carriage or shipment to or from a point beyond such zone, is partially exempt from regulations under 49 U.S.C. 13506(b)(1) includes and is comprised of all points as follows:

(a) The municipality of Albany, N.Y., itself.

(b) All points within a line drawn eight miles beyond the municipal limits of Albany.

(c) All points in that area more than eight miles beyond the municipal limits of Albany bounded by a line as follows: Beginning at that point on the western boundary of Cohoes, N.Y., where it crosses the line described in paragraph (b) of this section, thence along the western and northern boundary of Cohoes to the Mohawk River thence along such river to the northern boundary of the Town of Waterford thence along the northern and eastern boundaries of the Town of Waterford to the northern boundary of the City of Troy (all of which city is included under the next provision).

(d) All of any municipality any part of which is within the limits of the combined areas defined in paragraphs (b) and (c) of this section, and

(e) All of any municipality wholly surrounded, or so surrounded except for a water boundary, by the municipality of Albany or any other municipality included under the terms of paragraph (d) of this section.

[41 FR 56653, Dec. 29, 1976, as amended at 62 FR 15422, Apr. 1, 1997]

§ 372.203 Beaumont, TX.

The zone adjacent to, and commercially a part of Beaumont, Tex., within which transportation by motor vehicle in interstate or foreign commerce, not under common control, management, or arrangement for a continuous carriage or shipment to or from a point beyond such zone, is partially exempt from regulation under 49 U.S.C. 13506(b)(1) includes and is comprised of all points as follows:

(a) The municipality of Beaumont, Tex., itself;

(b) All points within a line drawn 8 miles beyond the municipal limits of Beaumont;

(c) All points in Jefferson County and Orange County, Tex.;

(d) All of any municipality any part of which is within the limits of the combined areas defined in paragraphs (b) and (c) of this section, and

(e) All of any municipality wholly surrounded, or so surrounded except for a water boundary, by the municipality of Beaumont or by any other municipality included under the terms of paragraph (d) of this section.

[41 FR 56653, Dec. 29, 1976, as amended at 62 FR 15422, Apr. 1, 1997]

§ 372.205 Charleston, S.C.

The zone adjacent to, and commercially a part of Charleston, S.C., within which transportation by motor vehicle in interstate or foreign commerce, not under common control, management, or arrangement for a continuous carriage or shipment to or from a point beyond such zone, is partially exempt from regulation under 49 U.S.C. 13506(b)(1) includes and is comprised of all points as follows:

(a) The municipality of Charleston, S.C., itself;

(b) All points within a line drawn 6 miles beyond the municipal limits of Charleston;

(c) Those points in Charleston County, S.C., which are not within the areas described in paragraph (b) of this section; and those points in Berkeley County, S.C., which are not within the areas described in paragraph (b) of this section, and which are west of South Carolina Highway 41; and all points in Dorchester County, SC.

(d) All of any municipality any part of which is within the limits of the combined areas defined in paragraphs (b) and (c) of this section, and

(e) All of any municipality wholly surrounded, or so surrounded except for a water boundary, by the municipality of Charleston or by any other municipality included under the terms of paragraph (d) of this section.

[41 FR 56653, Dec. 29, 1976, as amended at 46 FR 28658, May 28, 1981; 62 FR 15422, Apr. 1, 1997]

§ 372.207 Charleston, WV.

The zone adjacent to, and commercially a part of Charleston, W. Va., within which transportation by motor vehicle in interstate or foreign commerce, not under common control, management, or arrangement for a continuous carriage or shipment to or from a point beyond such zone, is partially exempt from regulation under 49 U.S.C. 13506(b)(1) includes and is comprised of all points as follows:

(a) The municipality of Charleston, W. Va., itself;

(b) All points within a line drawn 6 miles beyond the municipal limits of Charleston;

(c) Those points in Kanawha County, W. Va., which are not within the area described in paragraph (b) of this section; and those points in Putnam County, W. Va., south of West Virginia Highway 34;

(d) All of any municipality any part of which is within the limits of the combined areas defined in paragraphs (b) and (c) of this section, and

(e) All of any municipality wholly surrounded, or so surrounded except for a water boundary, by the municipality of Charleston or by any other municipality included under the terms of paragraph (d) of this section.

[41 FR 56653, Dec. 29, 1976, as amended at 62 FR 15422, Apr. 1, 1997]

§ 372.209

§ 372.209 Lake Charles, LA.

The zone adjacent to, and commercially a part of Lake Charles, La., within which transportation by motor vehicle in interstate or foreign commerce, not under common control, management, or arrangement for a continuous carriage or shipment to or from a point beyond such zone, is partially exempt from regulation under 49 U.S.C. 13506(b)(1) includes and is comprised of all points as follows:

(a) The municipality of Lake Charles, La., itself;

(b) All points within a line drawn 6 miles beyond the municipal limits of Lake Charles;

(c) Those points in Calcasieu Parish, La., which are not within the area described in paragraph (b) of this section; and which are east of Louisiana Highway 27 (western section);

(d) All of any municipality any part of which is within the limits of the combined areas defined in paragraphs (b) and (c) of this section, and

(e) All of any municipality wholly surrounded, or so surrounded except for a water boundary, by the municipality of Lake Charles or by any other municipality included under the terms of paragraph (d) of this section.

[41 FR 56653, Dec. 29, 1976, as amended at 62 FR 15422, Apr. 1, 1997]

§ 372.211 Pittsburgh, PA.

The zone adjacent to, and commercially a part of Pittsburgh within which transportation by motor vehicle in interstate or foreign commerce, not under common control, management, or arrangement for a continuous carriage or shipment to or from a point beyond such zone, is partially exempt from regulation under 49 U.S.C. 13506(b)(1) includes and is comprised of all points as follows:

(a) The municipality of Pittsburgh, Pa., itself;

(b) All points within a line drawn 15 miles beyond the municipal limits of Pittsburgh;

(c) Those points in Allegheny County, Pa., which are not within the area described in paragraph (b) of this section;

(d) All of any municipality any part of which is within the limits of the

49 CFR Ch. III (10–1–04 Edition)

combined areas defined in paragraphs (b) and (c) of this section, and

(e) All of any municipality wholly surrounded, or so surrounded except for a water boundary, by the municipality of Pittsburgh by any other municipality included under the terms of paragraph (d) of this section.

[41 FR 56654, Dec. 29, 1976, as amended at 62 FR 15422, Apr. 1, 1997]

§ 372.213 Pueblo, CO.

The zone adjacent to, and commercially a part of Pueblo, Colo., within which transportation by motor vehicle in interstate or foreign commerce, not under common control, management, or arrangement for a continuous carriage or shipment to or from a point beyond such zone, is partially exempt from regulations under 49 U.S.C. 13506(b)(1) includes and is comprised of all points as follows:

(a) The municipality of Pueblo, Colo., itself;

(b) All points within a line drawn 6 miles beyond the municipal limits of Pueblo;

(c) Those points in Pueblo County, Colo., which are not within the area described in paragraph (b) of this section;

(d) All of any municipality any part of which is within the limits of the combined areas defined in paragraphs (b) and (c) of this section, and

(e) All of any municipality wholly surrounded, or so surrounded except for a water boundary, by the municipality included under the terms of paragraph (d) of this section.

[41 FR 56654, Dec. 29, 1976, as amended at 62 FR 15422, Apr. 1, 1997]

§ 372.215 Ravenswood, WV.

The zone adjacent to, and commercially a part of Ravenswood, W. Va., within which transportation by motor vehicle in interstate or foreign commerce, not under common control, management, or arrangement for a continuous carriage or shipment to or from a point beyond such zone, is partially exempt from regulation under 49 U.S.C. 13506(b)(1) includes and is comprised of all points as follows:

(a) The municipality of Ravenswood, W. Va., itself;

(b) All points within a line drawn 4 miles beyond the municipal limits of Ravenswood;

(c) Those points in Jackson County, W. Va., which are not within the area described in paragraph (b) of this section, and which are north of U.S. Highway 33;

(d) All of any municipality any part of which is within the limits of the combined areas defined in paragraphs (b) and (c) of this section, and

(e) All of any municipality wholly surrounded, or so surrounded except for a water boundary, by the municipality of Ravenswood or by any other municipality included under the terms of paragraph (d) of this section.

[41 FR 56654, Dec. 29, 1976, as amended at 62 FR 15422, Apr. 1, 1997]

§372.217 Seattle, WA.

The zone adjacent to, and commercially a part of Seattle, Wash., within which transportation by motor vehicle in interstate or foreign commerce, not under common control, management, or arrangement for a continuous carriage or shipment to or from a point beyond such zone, is partially exempt from regulation under 49 U.S.C. 13506(b)(1) includes and is comprised of all points as follows:

(a) The municipality of Seattle, Wash., itself;

(b) All points within a line drawn 15 miles beyond the municipal limits of Seattle;

(c) Those points in King County, Wash., which are not within the area described in paragraph (b) of this section, and which are west of a line beginning at the intersection of the line described in paragraph (b) of this section and Washington Highway 18, thence northerly along Washington Highway 18 to junction of Interstate Highway 90, thence westerly along Interstate Highway 90 to junction Washington Highway 203, thence northerly along Washington Highway 203 to the King County line; and those points in Snohomish County, Wash., which are not within the area described in paragraph (b) of this section and which are west of Washington Highway 9; and those points in Kitsap County, Wash., which are not within the area described in paragraph (b) of this section lying

within the area bounded by a line beginning at the intersection of the line described in paragraph (b) of this section and Washington Highway 3 to the boundary of Olympic View Industrial Park/Bremerton-Kitsap County Airport, thence westerly, southerly, easterly, and northerly along the boundary of Olympic View Industrial Park/Bremerton-Kitsap County Airport to its juncture with Washington Highway 3 to its intersection with the line described in paragraph (b) of this section.

(d) All of any municipality any part of which is within the limits of the combined areas defined in paragraphs (b) and (c) of this section, and

(e) All of any municipality wholly surrounded, or so surrounded except for a water boundary, by the municipality of Seattle or by any other municipality included under the terms of paragraph (d) of this section.

[41 FR 56654, Dec. 29, 1976, as amended at 46 FR 25314, May 6, 1981; 62 FR 15422, Apr. 1, 1997]

§372.219 Washington, DC

The zone adjacent to, and commercially a part of Washington, D.C., within which transportation by motor vehicle in interstate or foreign commerce, not under common control, management, or arrangement for a continuous carriage or shipment to or from a point beyond such zone, is partially exempt from regulation under 49 U.S.C. 13506(b)(1) includes and is comprised of all points as follows:

(a) The municipality of Washington, D.C., itself;

(b) All points within a line drawn 15 miles beyond the municipal limits of Washington, DC

(c) All points in Fairfax and Loudoun Counties, VA, and all points in Prince William County, VA, including the City of Manassas, VA, and the City of Manassas Park, VA.

(d) All of any municipality any part of which is within the limits of the combined areas defined in paragraphs (b) and (c) of this section, and

(e) All of any municipality wholly surrounded, or so surrounded except for a water boundary, by the municipality of Washington, D.C., or by any other

§ 372.221

municipality included under the terms of paragraph (d) of this section.

[41 FR 56654, Dec. 29, 1976, as amended at 46 FR 56424, Nov. 17, 1981; 62 FR 15422, Apr. 1, 1997]

§ 372.221 Twin Cities.

For the purpose of determining commercial zones, utilizing the general population-mileage formula as set forth in § 372.241, each of the following combinations of cities shall be considered as a single municipality:

(a) Having a population equal to the sum of their combined populations, and

(b) Having boundaries comprised of their combined corporate limits, with the common portion thereof disregarded:

- (1) Bluefield, Va.-W. Va.
- (2) Bristol, Va.-Tenn.
- (3) Davenport, Iowa, and Rock Island and Moline, Ill.
- (4) Delmar, Del.-Md.
- (5) Harrison, Ohio-West Harrison, Ind.
- (6) Junction City, Ark.-La.
- (7) Kansas City, Mo.-Kansas City, Kans.
- (8) Minneapolis-St. Paul, Minn.
- (9) St. Louis, Mo.-East St. Louis, Ill.
- (10) Texarkana, Ark.-Tex.
- (11) Texhoma, Tex.-Okla.
- (12) Union City, Ind.-Ohio.

[41 FR 56654, Dec. 29, 1976, as amended at 62 FR 15422, Apr. 1, 1997]

§ 372.223 Consolidated governments.

The zone adjacent to, and commercially a part of a consolidated government within which transportation by motor vehicle, in interstate or foreign commerce, not under common control, management, or arrangement for a continuous carriage or shipment to or from a point beyond the zone, is partially exempt from regulation under 49 U.S.C. 13506(b)(1) includes and is comprised of all points as follows:

(a) All points within the boundaries of the consolidated government.

(b) All points beyond the boundaries of the consolidated government which were at any time within the commercial zone of the formerly independent core municipality.

(c) When the present population of the formerly independent core municipality is identifiable, all points beyond

49 CFR Ch. III (10–1–04 Edition)

the boundaries of the consolidated government which are within the territory determined by the most recent population-mileage formula measured from the limits of the formerly independent core municipality.

(d) All of any municipality wholly surrounded, or so surrounded except for a water boundary, by the consolidated government or by any other municipality included under the terms of paragraphs (a), (b), or (c) of this section.

[41 FR 56654, Dec. 29, 1976, as amended at 62 FR 15422, Apr. 1, 1997]

§ 372.225 Lexington-Fayette Urban County, KY.

The zone adjacent to and commercially a part of Lexington-Fayette Urban County, Ky., within which transportation by motor vehicle, in interstate or foreign commerce, not under a common control, management, or arrangement for a continuous carriage or shipment to or from a point beyond the zone, is partially exempt from regulation under 49 U.S.C. 13506(b)(1) includes and is comprised of all points as follows:

(a) Lexington-Fayette Urban County, Ky., itself.

(b) All other municipalities and unincorporated areas within 5 miles of the intersection of U.S. Highway 27 (Nicholasville Road) with the corporate boundary line between Jessamine County, Ky., and Lexington-Fayette Urban County, Ky.

[39 FR 18769, May 30, 1974. Redesignated at 41 FR 56655, Dec. 29, 1976. Further redesignated at 55 FR 42198, Oct. 18, 1990, as amended at 62 FR 15422, Apr. 1, 1997]

§ 372.227 Syracuse, NY.

The zone adjacent to, and commercially a part of Syracuse, N.Y., within which transportation by motor vehicle, in interstate or foreign commerce, not under common control, management, or arrangement for shipment to or from points beyond such zone, is partially exempt from regulation under 49 U.S.C. 13506(b)(1) includes and is comprised of all points as follows:

(a) The municipality of Syracuse, N.Y., itself;

Federal Motor Carrier Safety Administration, DOT

§ 372.231

(b) All points within a line drawn 10 miles beyond the municipal limits of Syracuse;

(c) Those points in the towns of Van Buren and Lysander, Onondaga County, N.Y., which are not within the area described in paragraph (b) of this section, but which are within an area bounded by a line beginning at the intersection of new New York Highway 48 with the line described in (b) of this section, thence northwesterly along new New York Highway 48 to junction New York Highway 370, thence westerly along New York Highway 370 to junction Emerick Road, thence northerly along Emerick Road to junction Dunham Road, thence northerly along Dunham road to junction New York Highway 192, thence easterly along New York Highway 192 to junction new New York Highway 48, thence northerly along new New York Highway 48 to junction New York Highway 213, thence easterly along New York Highway 213 to junction New York Highway 213A, thence easterly along New York Highway 213A to junction New York Highway 37, thence southerly along New York Highway 37 to its intersection with the line in (b) above;

(d) All of any municipality any part of which is within the limits of the combined area defined in (b) and (c) of this section, and

(e) All of any municipality wholly surrounded, or so surrounded except for a water boundary, by the municipality of Syracuse or any other municipality included under the terms of (d) of this section.

[42 FR 44816, Sept. 7, 1977. Redesignated at 55 FR 42198, Oct. 18, 1990, as amended at 62 FR 15422, Apr. 1, 1997]

§ 372.229 Spokane, WA.

The zone adjacent to, and commercially a part of Spokane, WA, within which transportation by motor vehicle, in interstate or foreign commerce, not under control, management, or arrangement for shipment to or from points beyond such zone, is partially exempt from regulation under 49 U.S.C. 13506(b)(1) includes and is comprised of all points as follows:

(a) The municipality of Spokane, WA, itself,

(b) All points within a line drawn 8 miles beyond the municipal limits of Spokane;

(c) All points within that area more than 8 miles beyond the municipal limits of Spokane bounded by a line as follows: From the intersection of the line described in (b) of this section and U.S. Highway 2, thence westerly along U.S. Highway 2 to junction Brooks Road, thence southerly along Brooks Road to junction Hallett Road, thence easterly along Hallett Road to its intersection with the line described in (b) of this section;

(d) All of any municipality any part of which is within the limits of the combined areas in (b) and (c) of this section; and

(e) All of any municipality wholly surrounded, or so surrounded except for a water boundary, by the municipality of Spokane or any other municipality included under the terms of (d) of this section.

[45 FR 62085, Sept. 18, 1980. Redesignated and amended at 55 FR 42198, Oct. 18, 1990; 62 FR 15422, Apr. 1, 1997]

§ 372.231 Tacoma, WA.

The zone adjacent to, and commercially a part of Tacoma, WA, within which transportation by motor vehicle, in interstate or foreign commerce, not under common control, management, or arrangement for shipment to or from points beyond such zone, is partially exempt from regulation under 49 U.S.C. 13506(b)(1), includes and is comprised of all points as follows:

(a) The municipality of Tacoma, WA, itself;

(b) All points within a line drawn 8 miles beyond the municipal limits of Tacoma;

(c) Those points in Pierce County, WA, which are not within the area described in paragraph (b) of this section, but which are on Washington Highway 162 beginning at its intersection with the line described in paragraph (b) of this section, extending to and including Orting, WA, and all points within the Orting commercial zone.

(d) All of any municipality any part of which is within the limits of the combined area defined in (b) and (c) of this section, and

§ 372.233

(e) All of any municipality wholly surrounded, or so surrounded except for a water boundary, by the municipality of Tacoma or any other municipality included under the terms of (d) of this section.

[45 FR 66460, Oct. 7, 1980. Redesignated at 55 FR 42198, Oct. 18, 1990, as amended at 62 FR 15422, Apr. 1, 1997]

§ 372.233 Chicago, IL.

The zone adjacent to, and commercially a part of Chicago, IL, within which transportation by motor vehicle, in interstate or foreign commerce, not under common control, management, or arrangement for a shipment to or from such zone, is partially exempt from regulation under 49 U.S.C. 13506(b)(1), includes and is comprised of all points as follows:

(a) The municipality of Chicago, IL, itself;

(b) All points within a line drawn 20 miles beyond the municipal limits of Chicago;

(c) All points in Lake County, IL.

(d) All of any municipality any part of which is within the limits of the combined area defined in paragraphs (b) and (c) of this section, and

(e) All of any municipality wholly surrounded, or so surrounded except for a water boundary, by the municipality included under the terms of paragraph (d) of this section.

[46 FR 11286, Feb. 6, 1981. Redesignated at 55 FR 42198, Oct. 18, 1990, as amended at 62 FR 15422, Apr. 1, 1997]

§ 372.235 New York, NY.

The zone adjacent to, and commercially a part of, New York, NY, within which transportation by motor vehicle, in interstate or foreign commerce, not under common control, management, or arrangement for shipment to or from points beyond such zone is partially exempt from regulation under 49 U.S.C. 13506(b)(1), includes and is comprised of all points as follows:

(a) The municipality of New York, NY, itself;

(b) All points within a line drawn 20 miles beyond the municipal limits of New York, NY;

(c) All points in Morris County, NJ;

(d) All of any municipality any part of which is within the limits of the

49 CFR Ch. III (10–1–04 Edition)

combined areas defined in paragraphs (b) and (c); and

(e) All of any municipality wholly surrounded, or so surrounded except by a water boundary, by the municipality of New York or by any other municipality included under the terms of paragraph (d) of this section.

[50 FR 34478, Aug. 26, 1985. Redesignated at 55 FR 42198, Oct. 18, 1990, as amended at 62 FR 15422, Apr. 1, 1997]

§ 372.237 Cameron, Hidalgo, Starr, and Willacy Counties, TX.

(a) Transportation within a zone comprised of Cameron, Hidalgo, Starr, and Willacy Counties, TX, by motor carriers of property, in interstate or foreign commerce, not under common control, management, or arrangement for shipment to or from points beyond such zone, is partially exempt from regulation under 49 U.S.C. 13506(b)(1).

(b) To the extent that commercial zones of municipalities within the four counties (as determined under § 372.241) extend beyond the boundaries of this four-county zone, the areas of such commercial zones shall be considered to be part of the zone and partially exempt from regulation under 49 U.S.C. 13506(b)(1).

[51 FR 1815, Jan. 15, 1986. Redesignated at 55 FR 42198, Oct. 18, 1990, as amended at 62 FR 15422, Apr. 1, 1997]

§ 372.239 Definitions.

For the purposes of this part, the following terms are defined:

(a) *Municipality* means any city, town, village, or borough which has been created by special legislative act or which has been, otherwise, individually incorporated or chartered pursuant to general State laws, or which is recognized as such, under the Constitution or by the laws of the State in which located, and which has a local government. It does not include a town of the township or New England type.

(b) *Contiguous municipalities* means municipalities, as defined in paragraph (a) of this section, which have at some point a common municipal or corporate boundary.

(c) *Unincorporated area* means any area not within the corporate or municipal boundaries of any municipality

as defined in paragraph (a) of this section.

[32 FR 20048, Dec. 20, 1967]

§ 372.241 Commercial zones determined generally, with exceptions.

The commercial zone of each municipality in the United States, with the exceptions indicated in the note at the end of this section, within which the transportation of passengers or property, in interstate or foreign commerce, when not under a common control, management, or arrangement for a continuous carriage or shipment to or from a point without such zone, is exempt from all provisions of 49 U.S.C. subtitle IV, part B shall be deemed to consist of:

(a) The municipality itself, hereinafter called the base municipality;

(b) All municipalities which are contiguous to the base municipality;

(c) All other municipalities and all unincorporated areas within the United States which are adjacent to the base municipality as follows:

(1) When the base municipality has a population less than 2,500 all unincorporated areas within 3 miles of its corporate limits and all of any other municipality any part of which is within 3 miles of the corporate limits of the base municipality,

(2) When the base municipality has a population of 2,500 but less than 25,000 all unincorporated areas within 4 miles of its corporate limits and all of any other municipality any part of which is within 4 miles of the corporate limits of the base municipality.

(3) When the base municipality has a population of 25,000 but less than 100,000 all unincorporated areas within 6 miles of its corporate limits and all of any other municipality any part of which is within 6 miles of the corporate limits of the base municipality, and

(4) When the base municipality has a population of 100,000 but less than 200,000 all unincorporated areas within 8 miles of its corporate limits and all of any other municipality any part of which is within 8 miles of the corporate limits of the base municipality.

(5) When the base municipality has a population of 200,000 but less than 500,000 all unincorporated areas within 10 miles of its corporate limits and all

of any other municipality any part of which is within 10 miles of the corporate limits of the base municipality.

(6) When the base municipality has a population of 500,000 but less than 1 million, all unincorporated areas within 15 miles of its corporate limits and all of any other municipality any part of which is within 15 miles of the corporate limits of the base municipality.

(7) When the base municipality has a population of 1 million or more, all unincorporated areas within 20 miles of its corporate limits and all of any other municipality any part of which is within 20 miles of the corporate limits of the base municipality, and

(d) All municipalities wholly surrounded, or so surrounded except for a water boundary, by the base municipality, by any municipality contiguous thereto, or by any municipality adjacent thereto which is included in the commercial zone of such base municipality under the provisions of paragraph (c) of this section.

NOTE: Except: Municipalities the commercial zones of which have been or are hereafter individually or specially determined.

[32 FR 20048, Dec. 20, 1967, as amended at 34 FR 9870, June 26, 1969; 34 FR 15482, Oct. 4, 1969; 41 FR 56655, Dec. 29, 1976; 62 FR 15422, Apr. 1, 1997]

§ 372.243 Controlling distances and population data.

In the application of § 372.241:

(a) Air-line distances or mileages about corporate limits of municipalities shall be used.

(b) The population of any municipality shall be deemed to be the highest figure shown for that municipality in any decennial census since (and including) the 1940 decennial census.

(c) Contraction of municipal boundaries will not alter the size of commercial zones.

[32 FR 20040, Dec. 20, 1967, as amended at 37 FR 15701, Aug. 4, 1972; 50 FR 10233, Mar. 14, 1985; 62 FR 15422, Apr. 1, 1997]

Subpart C—Terminal Areas

SOURCE: 32 FR 20049, Dec. 20, 1967, unless otherwise noted. Redesignated at 61 FR 54708, Oct. 21, 1996.

§ 372.300

§ 372.300 Distances and population data.

In the application of this subpart, distances and population data shall be determined in the same manner as provided in 49 CFR 372.243. See also definitions in 49 CFR 372.239.

[62 FR 15422, Apr. 1, 1997]

§ 372.301 Terminal areas of motor carriers and freight forwarders at municipalities served.

The terminal area within the meaning of 49 U.S.C. 13503 of any motor carrier of property or freight forwarder subject to 49 U.S.C. subtitle IV, part B at any municipality authorized to be served by such motor carrier of property or motor carrier of passengers in the transportation of express or freight forwarder, within which transportation by motor carrier in the performance of transfer, collection, or delivery services may be performed by, or for, such motor carrier of property or freight forwarder without compliance with the provisions of 49 U.S.C. subtitle IV, part B consists of and includes all points or places which are:

(a) Within the commercial zone, as defined by the Secretary, of that municipality, and

(b) Not beyond the limits of the operating authority of such motor carrier of property or freight forwarder.

[62 FR 15422, Apr. 1, 1997]

§ 372.303 Terminal areas of motor carriers and freight forwarders at unincorporated communities served.

The terminal areas within the meaning of 49 U.S.C. 13503 of any motor carrier of property or freight forwarder subject to 49 U.S.C. subtitle IV, part B, at any unincorporated community having a post office of the same name which is authorized to be served by such motor carrier of property or motor carrier of passengers in the transportation of express or freight forwarder, within which transportation by motor vehicle in the performance of transfer, collection, or delivery services may be performed by, or for, such motor carrier of property or freight forwarder without compliance with the provisions of 49 U.S.C. subtitle IV, part B, consists of:

49 CFR Ch. III (10–1–04 Edition)

(a) All points in the United States which are located within the limits of the operating authority of the motor carrier of property or freight forwarder involved, and within 3 miles of the post office at such authorized unincorporated point if it has a population less than 2,500, within 4 miles if it has a population of 2,500 but less than 25,000, or within 6 miles if it has a population of 25,000 or more;

(b) All of any municipality any part of which is included under paragraph (a) of this section; and

(c) Any municipality wholly surrounded by any municipality included under paragraph (b) of this section, or so wholly surrounded except for a water boundary.

[32 FR 20049, Dec. 20, 1967, as amended at 41 FR 56655, Dec. 29, 1976; 51 FR 44297, Dec. 9, 1986; 62 FR 15423, Apr. 1, 1997]

PART 373—RECEIPTS AND BILLS

Subpart A—Motor Carrier Receipts and Bills

Sec.

373.101 Motor Carrier bills of lading.

373.103 Expense bills.

373.105 Low value packages.

Subpart B—Freight Forwarders; Bills of Lading

373.201 Bills of lading for freight forwarders.

AUTHORITY: 49 U.S.C. 13301 and 14706; and 49 CFR 1.73.

Subpart A—Motor Carrier Receipts and Bills

SOURCE: 55 FR 11198, Mar. 27, 1990, unless otherwise noted. Redesignated at 61 FR 54708, Oct. 21, 1996.

§ 373.101 Motor Carrier bills of lading.

Every motor common carrier shall issue a receipt or bill of lading for property tendered for transportation in interstate or foreign commerce containing the following information:

(a) Names of consignor and consignee.

(b) Origin and destination points.

(c) Number of packages.

(d) Description of freight.

(e) Weight, volume, or measurement of freight (if applicable to the rating of the freight).

Federal Motor Carrier Safety Administration, DOT

§ 373.201

The carrier shall keep a record of this information as prescribed in 49 CFR part 379.

[55 FR 11198, Mar. 27, 1990, as amended at 56 FR 30874, July 8, 1991; 62 FR 15423, Apr. 1, 1997]

§ 373.103 Expense bills.

(a) *Property.* Every motor common carrier shall issue a freight or expense bill for each shipment transported containing the following information:

(1) Names of consignor and consignee (except on a reconsigned shipment, not the name of the original consignor).

(2) Date of shipment.

(3) Origin and destination points (except on a reconsigned shipment, not the original shipping point unless the final consignee pays the charges from that point).

(4) Number of packages.

(5) Description of freight.

(6) Weight, volume, or measurement of freight (if applicable to the rating of the freight).

(7) Exact rate(s) assessed.

(8) Total charges due, including the nature and amount of any charges for special service and the points at which such service was rendered.

(9) Route of movement and name of each carrier participating in the transportation.

(10) Transfer point(s) through which shipment moved.

(11) Address where remittance must be made or address of bill issuer's principal place of business.

The shipper or receiver owing the charges shall be given the original freight or expense bill and the carrier shall keep a copy as prescribed at 49 CFR part 379. If the bill is electronically transmitted (when agreed to by the carrier and payor), a receipted copy shall be given to the payor upon payment.

(b) *Charter service.* Every motor passenger common carrier providing charter service shall issue an expense bill containing the following information:

(1) Serial number, consisting of one of a series of consecutive numbers assigned in advance and imprinted on the bill.

(2) Name of carrier.

(3) Names of payor and organization, if any, for which transportation is performed.

(4) Date(s) transportation was performed.

(5) Origin, destination, and general routing of trip.

(6) Identification and seating capacity of each vehicle used.

(7) Number of persons transported.

(8) Mileage upon which charges are based, including any deadhead mileage, separately noted.

(9) Applicable rates per mile, hour, day, or other unit.

(10) Itemized charges for transportation, including special services and fees.

(11) Total charges assessed and collected.

The carrier shall keep a copy of all expense bills issued for the period prescribed at 49 CFR part 379. If any expense bill is spoiled, voided, or unused for any reason, a copy or written record of its disposition shall be retained for a like period.

[55 FR 11198, Mar. 27, 1990, as amended at 59 FR 2303, Jan. 14, 1994; 61 FR 19860, May 3, 1996; 62 FR 15423, Apr. 1, 1997]

§ 373.105 Low value packages.

The carrier and shipper may elect to waive the above provisions and use a more streamlined recordkeeping or documentation system for distribution of "low value" packages. This includes the option of shipping such packages under the provisions of 49 U.S.C. 14706(c). The shipper is responsible ultimately for determining which packages should be designated as low value. A useful guideline for this determination is an invoice value less than or equal to the costs of preparing a loss or damage claim.

[55 FR 11198, Mar. 27, 1990. Redesignated at 61 FR 54708, Oct. 21, 1996, as amended at 62 FR 15423, Apr. 1, 1997]

Subpart B—Freight Forwarders; Bills of Lading

§ 373.201 Bills of lading for freight forwarders.

Every household goods freight forwarder (HHGFF) shall issue the shipper

Pt. 374

through bills of lading, covering transportation from origin to ultimate destination, on each shipment for which it arranges transportation in interstate commerce. Where a motor common carrier receives freight at the origin and issues a receipt therefor on its form with a notation showing the HHGFF's name, the HHGFF, upon receiving the shipment at the "on line" or consolidating station, shall issue a through bill of lading on its form as of the date the carrier receives the shipment.

[55 FR 11201, Mar. 27, 1990. Redesignated at 61 FR 54708, Oct. 21, 1996.]

PART 374—PASSENGER CARRIER REGULATIONS

Subpart A—Discrimination in Operations of Interstate Motor Common Carriers of Passengers

Sec.

- 374.101 Discrimination prohibited.
- 374.103 Notice to be printed on tickets.
- 374.105 Discrimination in terminal facilities.
- 374.107 Notice to be posted at terminal facilities.
- 374.109 Carriers not relieved of existing obligations.
- 374.111 Reports of interference with regulations.
- 374.113 Definitions.

Subpart B—Limitation of Smoking on Interstate Passenger Carrier Vehicles

- 374.201 Prohibition against smoking on interstate passenger-carrying motor vehicles.

Subpart C—Adequacy of Intercity Motor Common Carrier Passenger Service

- 374.301 Applicability.
- 374.303 Definitions.
- 374.305 Ticketing and information.
- 374.307 Baggage service.
- 374.309 Terminal facilities.
- 374.311 Service responsibility.
- 374.313 Equipment.
- 374.315 Transportation of passengers with disabilities.
- 374.317 Identification—bus and driver.
- 374.319 Relief from provisions.

Subpart D—Notice of and Procedures for Baggage Excess Value Declaration

- 374.401 Minimum permissible limitations for baggage liability.

49 CFR Ch. III (10–1–04 Edition)

- 374.403 Notice of passenger's ability to declare excess value on baggage.
- 374.405 Baggage excess value declaration procedures.

Subpart E—Incidental Charter Rights

- 374.501 Applicability.
- 374.503 Authority.
- 374.505 Exceptions.

AUTHORITY: 49 U.S.C. 13301 and 14101; and 49 CFR 1.73.

EDITORIAL NOTE: Nomenclature changes to part 374 appear at 66 FR 49871, Oct. 1, 2001.

Subpart A—Discrimination in Operations of Interstate Motor Common Carriers of Passengers

SOURCE: 36 FR 1338, Jan. 28, 1971, unless otherwise noted. Redesignated at 61 FR 54709, Oct. 21, 1996.

§ 374.101 Discrimination prohibited.

No motor common carrier of passengers subject to 49 U.S.C. subtitle IV, part B shall operate a motor vehicle in interstate or foreign commerce on which the seating of passengers is based upon race, color, creed, or national origin.

[36 FR 1338, Jan. 28, 1971. Redesignated at 61 FR 54709, Oct. 21, 1996, as amended at 62 FR 15423, Apr. 1, 1997]

§ 374.103 Notice to be printed on tickets.

Every motor common carrier of passengers subject to 49 U.S.C. subtitle IV, part B shall cause to be printed on every ticket sold by it for transportation on any vehicle operated in interstate or foreign commerce a plainly legible notice as follows: "Seating aboard vehicles operated in interstate or foreign commerce is without regard to race, color, creed, or national origin."

NOTE: The following interpretation of the provisions of § 374.103 (formerly § 1055.2) appears at 27 FR 230, Jan. 9, 1962:

The words, "Seating aboard vehicles operated in interstate or foreign commerce is without regard to race, color, creed, or national origin", should appear on the face of every ticket coming within the purview of the section. If the ticket is in parts or consists of additional elements, such as coupons, identification stubs, or checks, it shall be

Federal Motor Carrier Safety Administration, DOT

§374.113

sufficient for the purposes of §374.103 that the notice appear only once on the ticket and be placed on the face of that portion of the ticket which is held by the passenger.

[36 FR 1338, Jan. 28, 1971. Redesignated at 61 FR 54709, Oct. 21, 1996, as amended at 62 FR 15423, Apr. 1, 1997]

§374.105 Discrimination in terminal facilities.

No motor common carrier of passengers subject to 49 U.S.C. subtitle IV, part B shall in the operation of vehicles in interstate or foreign commerce provide, maintain arrangements for, utilize, make available, adhere to any understanding for the availability of, or follow any practice which includes the availability of, any terminal facilities which are so operated, arranged, or maintained as to involve any separation of any portion thereof, or in the use thereof on the basis of race, color, creed, or national origin.

[36 FR 1338, Jan. 28, 1971. Redesignated at 61 FR 54709, Oct. 21, 1996, as amended at 62 FR 15423, Apr. 1, 1997]

§374.107 Notice to be posted at terminal facilities.

No motor common carrier of passengers subject to 49 U.S.C. subtitle IV, part B shall in the operation of vehicles in interstate or foreign commerce utilize any terminal facility in which there is not conspicuously displayed and maintained so as to be readily visible to the public a plainly legible sign or placard containing the full text of these regulations. Such sign or placard shall be captioned: "Public Notice: Regulations Applicable to Vehicles and Terminal Facilities of Interstate Motor Common Carriers of Passengers, by order of the Secretary, U.S. Department of Transportation."

[36 FR 1338, Jan. 28, 1971. Redesignated at 61 FR 54709, Oct. 21, 1996, as amended at 62 FR 15423, Apr. 1, 1997]

§374.109 Carriers not relieved of existing obligations.

Nothing in this regulation shall be construed to relieve any interstate motor common carrier of passengers subject to 49 U.S.C. subtitle IV, part B of any of its obligations under 49 U.S.C.

subtitle IV, part B or its certificate(s) of public convenience and necessity.

[36 FR 1338, Jan. 28, 1971. Redesignated at 61 FR 54709, Oct. 21, 1996, as amended at 62 FR 15423, Apr. 1, 1997]

§374.111 Reports of interference with regulations.

Every motor common carrier of passengers subject to 49 U.S.C. subtitle IV, part B operating vehicles in interstate or foreign commerce shall report to the Secretary, within fifteen (15) days of its occurrence, any interference by any person, municipality, county, parish, State, or body politic with its observance of the requirements of these regulations in this part. Such report shall include a statement of the action that such carrier may have taken to eliminate any such interference.

[36 FR 1338, Jan. 28, 1971. Redesignated at 61 FR 54709, Oct. 21, 1996, as amended at 62 FR 15423, Apr. 1, 1997]

§374.113 Definitions.

For the purpose of these regulations the following terms and phrases are defined:

(a) *Terminal facilities.* As used in these regulations the term "terminal facilities" means all facilities, including waiting room, rest room, eating, drinking, and ticket sales facilities which a motor common carrier makes available to passengers of a motor vehicle operated in interstate or foreign commerce as a regular part of their transportation.

(b) *Separation.* As used in §374.105, the term "separation" includes, among other things, the display of any sign indicating that any portion of the terminal facilities are separated, allocated, restricted, provided, available, used, or otherwise distinguished on the basis of race, color, creed, or national origin.

[36 FR 1338, Jan. 28, 1971. Redesignated at 61 FR 54709, Oct. 21, 1996, as amended at 62 FR 15423, Apr. 1, 1997]

Subpart B—Limitation of Smoking on Interstate Passenger Carrier Vehicles

§ 374.201 Prohibition against smoking on interstate passenger-carrying motor vehicles.

(a) All motor common carriers of passengers subject to 49 U.S.C. subtitle IV, part B, shall prohibit smoking (including the carrying of lit cigars, cigarettes, and pipes) on vehicles transporting passengers in scheduled or special service in interstate commerce.

(b) Each carrier shall take such action as is necessary to ensure that smoking by passengers, drivers, and other employees is not permitted in violation of this section. This shall include making appropriate announcements to passengers, the posting of the international no-smoking symbol, and the posting of signs in all vehicles transporting passengers in letters in sharp color contrast to the background, and of such size, shape, and color as to be readily legible. Such signs and symbols shall be kept and maintained in such a manner as to remain legible and shall indicate that smoking is prohibited by Federal regulation.

(c) The provisions of paragraph (a) of this section shall not apply to charter operations as defined in § 374.503 of this part.

[56 FR 1745, Jan. 17, 1991. Redesignated at 61 FR 54709, Oct. 21, 1996, as amended at 62 FR 15423, Apr. 1, 1997]

Subpart C—Adequacy of Intercity Motor Common Carrier Passenger Service

SOURCE: 55 FR 11199, Mar. 27, 1990, unless otherwise noted. Redesignated at 61 FR 54709, Oct. 21, 1996.

§ 374.301 Applicability.

These rules govern only motor passenger common carriers conducting regular-route operations.

§ 374.303 Definitions.

(a) *Carrier* means a motor passenger common carrier.

(b) *Bus* means a passenger-carrying vehicle, regardless of design or seating

capacity, used in a carrier's authorized operations.

(c) *Facility* means any structure provided by or for a carrier at or near which buses pick up or discharge passengers.

(d) *Terminal* means a facility operated or used by a carrier chiefly to furnish passengers transportation services and accommodations.

(e) *Station* means a facility, other than a terminal, operated by or for a carrier to accommodate passengers.

(f) *Service* means passenger transportation by bus between authorized points or over authorized routes.

(g) *Commuter service*, means passenger transportation wholly between points not more than 100 airline miles apart and not involving through-bus, connecting, or interline services to or from points beyond 100 airline miles. The usual characteristics of commuter service include reduced fare, multiple-ride, and commutation tickets, and peak morning and evening operations.

(h) *Baggage* means property a passenger takes with him for his personal use or convenience.

(i) *Restroom* means a room in a bus or terminal equipped with a toilet, wash-bowl, soap or a reasonable alternative, mirror, wastebasket, and toilet paper.

[55 FR 11199, Mar. 27, 1990, as amended at 68 FR 56198, Sept. 30, 2003]

§ 374.305 Ticketing and information.

(a) *Information service.* (1) During business hours at each terminal or station, information shall be provided as to schedules, tickets, fares, baggage, and other carrier services.

(2) Carrier agents and personnel who sell or offer to sell tickets, or who provide information concerning tickets and carrier services, shall be competent and adequately informed.

(b) *Telephone information service.* Every facility where tickets are sold shall provide telephonic information to the traveling public, including current bus schedules and fare information, when open for ticket sales.

(c) *Schedules.* Printed, regular-route schedules shall be provided to the traveling public at all facilities where tickets for such services are sold. Each schedule shall show the points along the carrier's route(s) where facilities

are located or where the bus trips originate or terminate, and each schedule shall indicate the arrival or departure time for each such point.

(d) *Ticket refunds.* Each carrier shall refund unused tickets upon request, consistent with its governing tariff, at each place where tickets are sold, within 30 days after the request.

(e) *Announcements.* No scheduled bus (except in commuter service) shall depart from a terminal or station until a public announcement of the departure and boarding point has been given. The announcement shall be given at least 5 minutes before the initial departure and before departures from points where the bus is scheduled to stop for more than 5 minutes.

§ 374.307 Baggage service.

(a) *Checking procedures.* (1) Carriers shall issue receipts, which may be in the form of preprinted tickets, for all checked services baggage.

(2)(i) If baggage checking service is not provided at the side of the bus, all baggage checked at a baggage checking counter at least 30 minutes but not more than 1 hour before departure shall be transported on the same schedule as the ticketed passenger.

(ii) If baggage checking service is provided at the side of the bus, passengers checking baggage at the baggage checking counter less than 30 minutes before the scheduled departure shall be notified that their baggage may not travel on the same schedule. Such baggage must then be placed on the next available bus to its destination. All baggage checked at the side of the bus during boarding, or at alternative locations provided for such purpose, shall be transported on the same schedule as the ticketed passenger.

(b) *Baggage security.* All checked baggage shall be placed in a secure or attended area prohibited to the public. Baggage being readied for loading shall not be left unattended.

(c) *Baggage liability.* (1) No carrier may totally exempt its liability for articles offered as checked baggage, unless those articles have been exempted by the Secretary. (Other liability is subject to subpart D of this part). A notice listing exempted articles shall be prominently posted at every location

where baggage is accepted for checking.

(2) Carriers may refuse to accept as checked baggage and, if unknowingly accepted, may disclaim liability for loss or damage to the following articles:

(i) Articles whose transportation as checked baggage is prohibited by law or regulation;

(ii) Fragile or perishable articles, articles whose dimensions exceed the size limitations in the carrier's tariff, receptacles with articles attached or protruding, guns, and materials that have a disagreeable odor;

(iii) Money; and

(iv) Those other articles that the Secretary exempts upon petition by the carrier.

(3) Carriers need not offer excess value coverage on articles of extraordinary value (including, but not limited to, negotiable instruments, papers, manuscripts, irreplaceable publications, documents, jewelry, and watches).

(d) *Express shipments.* Passengers and their baggage always take precedence over express shipments.

(e) *Baggage at destination.* All checked baggage shall be made available to the passenger within a reasonable time, not to exceed 30 minutes, after arrival at the passenger's destination. If not, the carrier shall deliver the baggage to the passenger's local address at the carrier's expense.

(f) *Lost or delayed baggage.* (1) Checked baggage that cannot be located within 1 hour after the arrival of the bus upon which it was supposed to be transported shall be designated as lost. The carrier shall notify the passenger at that time and furnish him with an appropriate tracing form.

(2) Every carrier shall make available at each ticket window and baggage counter a single form suitable both for tracing and for filing claims for lost or misplaced baggage. The form shall be prepared in duplicate and signed by the passenger and carrier representative. The carrier or its agent shall receive the signed original, with any necessary documentation and additional information, and the claim check, for which a receipt shall be

§ 374.309

given. The passenger shall retain the duplicate copy.

(3) The carrier shall make immediate and diligent efforts to recover lost baggage.

(4) A passenger may fill out a tracing form for lost unchecked baggage. The carrier shall forward recovered unchecked baggage to the terminal or station nearest the address shown on the tracing form and shall notify the passenger that the baggage will be held on a will-call basis.

(g) *Settlement of claims.* Notwithstanding 49 CFR 370.9, if lost checked baggage cannot be located within 15 days, the carrier shall immediately process the matter as a claim. The date on which the carrier or its agent received the tracing form shall be considered the first day of a 60-day period in which a claim must be resolved by a firm offer of settlement or by a written explanation of denial of the claim.

[55 FR 11199, Mar. 27, 1990. Redesignated at 61 FR 54709, Oct. 21, 1996, as amended at 62 FR 15423, Apr. 1, 1997]

§ 374.309 Terminal facilities.

(a) *Passenger security.* All terminals and stations must provide adequate security for passengers and their attendants and be regularly patrolled.

(b) *Outside facilities.* At terminals and stations that are closed when buses are scheduled to arrive or depart, there shall be available, to the extent possible, a public telephone, outside lighting, posted schedule information, overhead shelter, information on local accommodations, and telephone numbers for local taxi service and police.

(c) *Maintenance.* Terminals shall be clean.

§ 374.311 Service responsibility.

(a) *Schedules.* Carriers shall establish schedules that can be reasonably met, including connections at junction points, to serve adequately all authorized points.

(b) *Continuity of service.* No carrier shall change an existing regular-route schedule without first filing a written notice with the FMCSA's Division Office(s). The carrier shall display conspicuously a copy of such notice in each facility and on each bus affected. Such notice shall be displayed for a

49 CFR Ch. III (10–1–04 Edition)

reasonable time before it becomes effective and shall contain the carrier's name, a description of the proposed schedule change, the effective date thereof, the reasons for the change, the availability of alternate service, and the name and address of the carrier representative passengers may contact.

(c) *Trip interruptions.* A carrier shall mitigate, to the extent possible, any passenger inconvenience it causes by disrupting travel plans.

(d) *Seating and reservations.* A carrier shall provide sufficient buses to meet passengers' normal travel demands, including ordinary weekend and usual seasonal or holiday demand. Passengers (except commuters) shall be guaranteed, to the extent possible, passage and seating.

(e) *Inspection of rest stops.* Each carrier shall inspect periodically all rest stops it uses to ensure that they are clean.

[55 FR 11199, Mar. 27, 1990. Redesignated at 61 FR 54709, Oct. 21, 1996, as amended at 62 FR 15423, Apr. 1, 1997]

§ 374.313 Equipment.

(a) *Temperature control.* A carrier shall maintain a reasonable temperature on each bus (except in commuter service).

(b) *Restrooms.* Each bus (except in commuter service) seating more than 14 passengers (not including the driver) shall have a clean, regularly maintained restroom, free of offensive odor. A bus may be operated without a restroom if it makes reasonable rest stops.

(c) *Bus servicing.* Each bus shall be kept clean, with all required items in good working order.

§ 374.315 Transportation of passengers with disabilities.

Service provided by a carrier to passengers with disabilities is governed by the provisions of 42 U.S.C. 12101 *et seq.*, and regulations promulgated thereunder by the Secretary of Transportation (49 CFR parts 27, 37, and 38) and the Attorney General (28 CFR part 36), incorporating the guidelines established by the Architectural and Transportation Barriers Compliance Board (36 CFR part 1191).

[57 FR 35764, Aug. 11, 1992]

§ 374.317 Identification—bus and driver.

Each bus and driver providing service shall be identified in a manner visible to passengers. The driver may be identified by name or company number.

§ 374.319 Relief from provisions.

(a) *Petitions.* Where compliance with any rule would impose an undue burden on a carrier, it may petition the Federal Motor Carrier Safety Administration either to treat it as though it were conducting a commuter service or to waive the rule. The request for relief must be justified by appropriate verified statements.

(b) *Notice to the public.* The carrier shall display conspicuously, for at least 30 days, in each facility and on each bus affected, a notice of the filing of any petition. The notice shall contain the carrier's name and address, a concise description of and reasons for the relief sought, and a statement that any interested person may file written comments with the Federal Motor Carrier Safety Administration (with one copy mailed to the carrier) on or before a specific date that is at least 30 days later than the date the notice is posted.

[55 FR 11199, Mar. 27, 1990. Redesignated at 61 FR 54709, Oct. 21, 1996, as amended at 62 FR 15423, Apr. 1, 1997]

Subpart D—Notice of and Procedures for Baggage Excess Value Declaration

SOURCE: 40 FR 1249, Jan. 7, 1975, unless otherwise noted. Redesignated at 61 FR 54709, Oct. 21, 1996.

§ 374.401 Minimum permissible limitations for baggage liability.

(a) Motor common carriers of passengers and baggage subject to 49 U.S.C. 13501 may not publish tariff provisions limiting their liability for loss or damage to baggage checked by a passenger transported in regular route or special operations unless:

(1) The amount for which liability is limited is \$250 or greater per adult fare, and

(2) The provisions permit the passenger, for an additional charge, to de-

clare a value in excess of the limited amount, and allow the passenger to recover the increased amount (but not higher than the actual value) in event of loss or damage. The carriers may publish a maximum value for which they will be liable, but that maximum value may not be less than \$1,000. Appropriate identification must be attached securely by the passenger to each item of baggage checked, indicating in a clear and legible manner the name and address to which the baggage should be forwarded if lost and subsequently recovered. Identification tags shall be made immediately available by the carriers to passengers upon request.

(3) Carriers need not offer excess value coverage on articles listed in § 374.307(c)(3).

(49 U.S.C. 10321, 5 U.S.C. 553)

[46 FR 22899, Apr. 22, 1981, as amended at 47 FR 21840, May 20, 1982; 62 FR 15423, Apr. 1, 1997]

§ 374.403 Notice of passenger's ability to declare excess value on baggage.

(a) All motor common carriers of passengers and baggage subject to 49 U.S.C. subtitle IV, part B, which provide in their tariffs for the declaration of baggage in excess of a free baggage allowance limitation, shall provide clear and adequate notice to the public of the opportunity to declare such excess value on baggage.

(b) The notice referred to in paragraph (a) of this section shall be in large and clear print, and shall state as follows:

NOTICE—BAGGAGE LIABILITY

This motor carrier is not liable for loss or damage to properly identified baggage in an amount exceeding \$____. If a passenger desires additional coverage for the value of his baggage he may, upon checking his baggage, declare that his baggage has a value in excess of the above limitation and pay a charge as follows:

IDENTIFY YOUR BAGGAGE

Under FMCSA regulations, all baggage must be properly identified. Luggage tags should indicate clearly the name and address to which lost baggage should be forwarded. Free luggage tags are available at all ticket windows and baggage counters.

§ 374.405

The statement of charges for excess value declaration shall be clear, and any other pertinent provisions may be added at the bottom in clear and readable print.

(c) The notice referred to in paragraphs (a) and (b) of this section shall be (1) placed in a position near the ticket seller, sufficiently conspicuous to apprise the public of its provisions, (2) placed on a form to be attached to each ticket issued (and the ticket seller shall, where possible, provide oral notice to each ticket purchaser to read the form attached to the ticket), (3) placed in a position at or near any location where baggage may be checked, sufficiently conspicuous to apprise each passenger checking baggage of its provisions, and (4) placed in a position at each boarding point or waiting area used by the carrier at facilities maintained by the carrier or its agents, sufficiently conspicuous to apprise each boarding passenger of the provisions of the said notice.

[40 FR 1249, Jan. 7, 1975, as amended at 62 FR 15423, Apr. 1, 1997]

§ 374.405 Baggage excess value declaration procedures.

All motor common carriers of passengers and baggage subject to 49 U.S.C. subtitle IV, part B, which provide in their tariffs for the declaration of baggage value in excess of a free baggage allowance limitation, shall provide for the declaration of excess value on baggage at any time or place where provision is made for baggage checking, including (a) at a baggage checking counter until 15 minutes before scheduled boarding time, and (b) at the side of the bus or at a baggage checking counter in reasonable proximity to the boarding area during boarding at a terminal or any authorized service point.

[40 FR 1249, Jan. 7, 1975, as amended at 62 FR 15423, Apr. 1, 1997]

Subpart E—Incidental Charter Rights

AUTHORITY: 5 U.S.C. 553 and 559 and 49 U.S.C. 10321, 10922, and 10932.

49 CFR Ch. III (10–1–04 Edition)

SOURCE: 54 FR 46619, Nov. 6, 1989, unless otherwise noted. Redesignated at 61 FR 54709, Oct. 21, 1996.

§ 374.501 Applicability.

The regulations in this part apply to incidental charter rights authorized under 49 U.S.C. 13506 [49 U.S.C. 10932(c)]. These regulations do not apply to interpreting authority contained in a certificate to transport passengers in special and/or charter operations.

[54 FR 46619, Nov. 6, 1989. Redesignated at 61 FR 54709, Oct. 21, 1996, as amended at 62 FR 15423, Apr. 1, 1997]

§ 374.503 Authority.

Motor carriers transporting passengers, in interstate or foreign commerce, over regular routes authorized in a certificate issued as a result of an application filed before January 2, 1967, may transport special or chartered parties, in interstate or foreign commerce, between any points and places in the United States (including Alaska and Hawaii). The term “special or chartered party” means a group of passengers who, with a common purpose and under a single contract, and at a fixed charge for the vehicle in accordance with the carrier’s tariff, have acquired the exclusive use of a passenger-carrying motor vehicle to travel together as a group to a specified destination or for a particular itinerary.

§ 374.505 Exceptions.

(a) Incidental charter rights do not authorize the transportation of passengers to whom the carrier has sold individual tickets or with whom the carrier has made separate and individual transportation arrangements.

(b) Service provided under incidental charter rights may not be operated between the same points or over the same route so frequently as to constitute a regular-route service.

(c) Passenger transportation within the Washington Metropolitan Area Transit District (as defined in the Washington Metropolitan Area Transportation Regulation Compact, Pub. L. No. 86–794, 74 Stat. 1031 (1960), as amended by Pub. L. No. 87–767, 76 Stat. (1962) is not authorized by these regulations, but is subject to the jurisdiction

and regulations of the Washington Metropolitan Area Transportation Commission.

(d) A private or public recipient of governmental assistance (within the meaning of 49 U.S.C. 13902(b)(8)) may provide service under incidental charter rights only for special or chartered parties originating in the area in which the private or public recipient provides regularly scheduled mass transportation services under the specific qualifying certificate that confers its incidental charter rights.

[54 FR 46619, Nov. 6, 1989. Redesignated at 61 FR 54709, Oct. 21, 1996, as amended at 62 FR 15423, Apr. 1, 1997]

PART 375—TRANSPORTATION OF HOUSEHOLD GOODS IN INTER-STATE COMMERCE; CONSUMER PROTECTION REGULATIONS

Subpart A—General Requirements

Sec.

- 375.101 Who must follow these regulations?
- 375.103 What are the definitions of terms used in this part?
- 375.105 What are the information collection requirements of this part?

Subpart B—Before Offering Services to My Customers

LIABILITY CONSIDERATIONS

- 375.201 What is my normal liability for loss and damage when I accept goods from an individual shipper?
- 375.203 What actions of an individual shipper may limit or reduce my normal liability?

GENERAL RESPONSIBILITIES

- 375.205 May I have agents?
- 375.207 What items must be in my advertisements?
- 375.209 How must I handle complaints and inquiries?
- 375.211 Must I have an arbitration program?
- 375.213 What information must I provide to a prospective individual shipper?

COLLECTING TRANSPORTATION CHARGES

- 375.215 How must I collect charges?
- 375.217 May I collect charges upon delivery?
- 375.219 May I extend credit to shippers?
- 375.221 May I use a charge or credit card plan for payments?

Subpart C—Service Options Provided

- 375.301 What service options may I provide?

- 375.303 If I sell liability insurance coverage, what must I do?

Subpart D—Estimating Charges

- 375.401 Must I estimate charges?
- 375.403 How must I provide a binding estimate?
- 375.405 How must I provide a non-binding estimate?
- 375.407 Under what circumstances must I relinquish possession of a collect-on-delivery shipment transported under a non-binding estimate?
- 375.409 May household goods brokers provide estimates?

Subpart E—Pick Up of Shipments of Household Goods

BEFORE LOADING

- 375.501 Must I write up an order for service?
- 375.503 Must I write up an inventory?
- 375.505 Must I write up a bill of lading?

WEIGHING THE SHIPMENT

- 375.507 Must I determine the weight of a shipment?
- 375.509 How must I determine the weight of a shipment?
- 375.511 May I use an alternative method for shipments weighing 3,000 pounds or less?
- 375.513 Must I give the individual shipper an opportunity to observe the weighing?
- 375.515 May an individual shipper waive his/her right to observe each weighing?
- 375.517 May an individual shipper demand re-weighing?
- 375.519 Must I obtain weight tickets?
- 375.521 What must I do if an individual shipper wants to know the actual weight or charges for a shipment before I tender delivery?

Subpart F—Transportation of Shipments

- 375.601 Must I transport the shipment in a timely manner?
- 375.603 When must I tender a shipment for delivery?
- 375.605 How must I notify an individual shipper of any service delays?
- 375.607 What must I do if I am able to tender a shipment for final delivery more than 24 hours before a specified date?
- 375.609 What must I do for shippers who store household goods in transit?

Subpart G—Delivery of Shipments

- 375.701 May I provide for a release of liability on my delivery receipt?
- 375.703 What is the maximum collect-on-delivery amount I may demand at the time of delivery?

§ 375.101

49 CFR Ch. III (10–1–04 Edition)

375.705 If a shipment is transported on more than one vehicle, what charges may I collect at delivery?

375.707 If a shipment is partially lost or destroyed, what charges may I collect at delivery?

375.709 If a shipment is totally lost or destroyed, what charges may I collect at delivery?

Subpart H—Collection of Charges

375.801 What types of charges apply to subpart H?

375.803 How must I present my freight or expense bill?

375.805 If I am forced to relinquish a collection-delivery shipment before the payment of ALL charges, how do I collect the balance?

375.807 What actions may I take to collect the charges upon my freight bill?

Subpart I—Penalties

375.901 What penalties do we impose for violations of this part?

APPENDIX A TO PART 375—YOUR RIGHTS AND RESPONSIBILITIES WHEN YOU MOVE

AUTHORITY: 5 U.S.C. 553; 49 U.S.C. 13301, 13704, 13707, 14104, 14706; and 49 CFR 1.73.

SOURCE: 68 FR 35091, June 11, 2003 unless otherwise noted.

Subpart A—General Requirements

§ 375.101 Who must follow these regulations?

You, a for-hire motor carrier engaged in the interstate transportation of household goods, must follow these regulations when offering your services to individual shippers. You are subject to this part only when you transport household goods for individual shippers by motor vehicle in interstate commerce as defined in § 390.5 of this subchapter.

[69 FR 10575, Mar. 5, 2004]

§ 375.103 What are the definitions of terms used in this part?

Terms used in this part are defined as follows. You may find other terms used in these regulations defined in 49 U.S.C. 13102. The definitions contained in this statute control. If terms are used in this part and the terms are neither defined here nor in 49 U.S.C. 13102, the terms will have the ordinary practical meaning of such terms.

Advertisement means any communication to the public in connection with an offer or sale of any interstate household goods transportation service. This includes written or electronic database listings of your name, address, and telephone number in an on-line database. This excludes listings of your name, address, and telephone number in a telephone directory or similar publication. However, Yellow Pages advertising is included in the definition.

Cashier's check means a check that has all four of the following characteristics:

(1) Drawn on a bank as defined in 12 CFR 229.2.

(2) Signed by an officer or employee of the bank on behalf of the bank as drawer.

(3) A direct obligation of the bank.

(4) Provided to a customer of the bank or acquired from the bank for remittance purposes.

Certified scale means any scale inspected and certified by an authorized scale inspection and licensing authority, and designed for weighing motor vehicles, including trailers or semitrailers not attached to a tractor, or designed as a platform or warehouse type scale.

Commercial shipper means any person who is named as the consignor or consignee in a bill of lading contract who is not the owner of the goods being transported but who assumes the responsibility for payment of the transportation and other tariff charges for the account of the beneficial owner of the goods. The beneficial owner of the goods is normally an employee of the consignor and/or consignee. A freight forwarder tendering a shipment to a carrier in furtherance of freight forwarder operations is also a commercial shipper. The Federal government is a government bill of lading shipper, not a commercial shipper.

Force majeure means a defense protecting the parties in the event that a part of the contract cannot be performed due to causes which are outside the control of the parties and could not be avoided by exercise of due care.

Government bill of lading shipper means any person whose property is transported under the terms and conditions of a government bill of lading

issued by any department or agency of the Federal government to the carrier responsible for the transportation of the shipment.

Household goods, as used in connection with transportation, means the personal effects or property used, or to be used, in a dwelling, when part of the equipment or supplies of the dwelling. Transportation of the household goods must be arranged and paid for by the individual shipper or by another individual on behalf of the shipper. Household goods includes property moving from a factory or store if purchased with the intent to use in a dwelling and transported at the request of the householder, who also pays the transportation charges.

Individual shipper means any person who is the consignor or consignee of a household goods shipment identified as such in the bill of lading contract. The individual shipper owns the goods being transported and pays the transportation charges.

May means an option. You may do something, but it is not a requirement.

Must means a legal obligation. You must do something.

Order for service means a document authorizing you to transport an individual shipper's household goods.

Reasonable dispatch means the performance of transportation on the dates, or during the period, agreed upon by you and the individual shipper and shown on the Order For Service/Bill of Lading. For example, if you deliberately withhold any shipment from delivery after an individual shipper offers to pay the binding estimate or 110 percent of a non-binding estimate, you have not transported the goods with reasonable dispatch. The term "reasonable dispatch" excludes transportation provided under your tariff provisions requiring guaranteed service dates. You will have the defenses of force majeure, *i.e.*, superior or irresistible force, as construed by the courts.

Should means a recommendation. We recommend you do something, but it is not a requirement.

Surface Transportation Board means an agency within the Department of Transportation. The Surface Transportation Board regulates household goods

carrier tariffs among other responsibilities.

Tariff means an issuance (in whole or in part) containing rates, rules, regulations, classifications or other provisions related to a motor carrier's transportation services. The Surface Transportation Board requires a tariff contain specific items under § 1312.3(a) of this title. These specific items include an accurate description of the services offered to the public and the specific applicable rates (or the basis for calculating the specific applicable rates) and service terms. A tariff must be arranged in a way that allows for the determination of the exact rate(s) and service terms applicable to any given shipment.

We, us, and our means the Federal Motor Carrier Safety Administration (FMCSA).

You and your means a motor carrier engaged in the interstate transportation of household goods and its household goods agents.

§ 375.105 What are the information collection requirements of this part?

(a) The information collection requirements of this part have been reviewed by the Office of Management and Budget pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) and have been assigned OMB control number 2126-0025.

(b) The information collection requirements are found in the following sections: Section 375.205, Section 375.207, Section 375.209, Section 375.211, Section 375.213, Section 375.215, Section 375.217, Section 375.303, Section 375.401, Section 375.403, Section 375.405, Section 375.409, Section 375.501, Section 375.503, Section 375.505, Section 375.507, Section 375.515, Section 375.519, Section 375.521, Section 375.605, Section 375.607, Section 375.609, Section 375.803, Section 375.805, and Section 375.807.

[69 FR 10575, Mar. 5, 2004]

**Subpart B—Before Offering
Services to My Customers**

LIABILITY CONSIDERATIONS

§ 375.201 What is my normal liability for loss and damage when I accept goods from an individual shipper?

(a) In general, you are legally liable for loss or damage if it happens during performance of any transportation of household goods and all related services identified on your lawful bill of lading.

(b) You are liable for loss of, or damage to, any household goods to the extent provided in the current Surface Transportation Board's released rates order. Contact the Surface Transportation Board for a current copy of the Released Rates of Motor Carrier Shipments of Household Goods. The rate may be increased annually by the carrier based on the Department of Commerce's Cost of Living Adjustment.

(c) As required by § 375.303(g), you may have additional liability if you sell liability insurance and you fail to issue a copy of the insurance policy or other appropriate evidence of insurance.

(d) You must, in a clear and concise manner, disclose to the individual shipper the limits of your liability.

§ 375.203 What actions of an individual shipper may limit or reduce my normal liability?

(a) If an individual shipper includes perishable, dangerous, or hazardous articles in the shipment without your knowledge, you need not assume liability for those articles or for the loss or damage caused by their inclusion in the shipment. If the shipper requests that you accept such articles for transportation, you may elect to limit your liability for any loss or damage by appropriately published tariff provisions.

(b) If an individual shipper agrees to ship household goods released at a value greater than 60 cents per pound (\$1.32 per kilogram) per article, your liability for loss and damage may be limited to \$100 per pound (\$220 per kilogram) per article if the individual shipper fails to notify you in writing of articles valued at more than \$100 per pound (\$220 per kilogram).

(c) If an individual shipper notifies you in writing that an article valued at greater than \$100 per pound (\$220 per kilogram) will be included in the shipment, the shipper will be entitled to full recovery up to the declared value of the article or articles, not to exceed the declared value of the entire shipment.

GENERAL RESPONSIBILITIES

§ 375.205 May I have agents?

(a) You may have agents provided you comply with paragraphs (b) and (c) of this section. A household goods agent is defined as either one of the following two types of agents:

(1) A *prime agent* provides a transportation service for you or on your behalf, including the selling of, or arranging for, a transportation service. You permit or require the agent to provide services under the terms of an agreement or arrangement with you. A prime agent does not provide services on an emergency or temporary basis. A prime agent does not include a household goods broker or freight forwarder.

(2) An *emergency or temporary agent* provides origin or destination services on your behalf, excluding the selling of, or arranging for, a transportation service. You permit or require the agent to provide such services under the terms of an agreement or arrangement with you. The agent performs such services only on an emergency or temporary basis.

(b) If you have agents, you must have written agreements between you and your prime agents. You and your retained prime agent must sign the agreements.

(c) Copies of all your prime agent agreements must be in your files for a period of at least 24 months following the date of termination of each agreement.

§ 375.207 What items must be in my advertisements?

(a) You and your agents must publish and use only truthful, straightforward, and honest advertisements.

(b) You must include, and you must require each of your agents to include, in all advertisements for all services

(including any accessorial services incidental to or part of interstate household goods transportation), the following two elements:

(1) Your name or trade name, as it appears on our document assigning you a U.S. DOT number, or the name or trade name of the motor carrier under whose operating authority the advertised service will originate.

(2) Your U.S. DOT number, assigned by us authorizing you to operate as a for-hire motor carrier transporting household goods.

(c) Your FMCSA-assigned U.S. DOT number must be displayed only in the following form in every advertisement: U.S. DOT No. (*assigned number*).

§375.209 How must I handle complaints and inquiries?

(a) You must establish and maintain a procedure for responding to complaints and inquiries from your individual shippers.

(b) Your procedure must include all four of the following items:

(1) A communications system allowing individual shippers to communicate with your principal place of business by telephone.

(2) A telephone number.

(3) A clear and concise statement about who must pay for complaint and inquiry telephone calls.

(4) A written or electronic record system for recording all inquiries and complaints received from an individual shipper by any means of communication.

(c) You must produce a clear and concise written description of your procedure for distribution to individual shippers.

§375.211 Must I have an arbitration program?

(a) You must have an arbitration program to resolve property loss and damage disputes for individual shippers. You must establish and maintain an arbitration program with the following 11 minimum elements:

(1) You must design your arbitration program to prevent you from having any special advantage in any case where the claimant resides or does business at a place distant from your principal or other place of business.

(2) Before execution of the order for service, you must provide notice to the individual shipper of the availability of neutral arbitration, including all three of the following items:

(i) A summary of the arbitration procedure.

(ii) Any applicable costs.

(iii) A disclosure of the legal effects of election to use arbitration.

(3) Upon the individual shipper's request, you must provide information and forms you consider necessary for initiating an action to resolve a dispute under arbitration.

(4) You must require each person you authorize to arbitrate to be independent of the parties to the dispute and capable of resolving such disputes, and you must ensure the arbitrator is authorized and able to obtain from you or the individual shipper any material or relevant information to carry out a fair and expeditious decisionmaking process.

(5) You must not charge the individual shipper more than one-half of the total cost for instituting the arbitration proceeding against you. In the arbitrator's decision, the arbitrator may determine which party must pay the cost or a portion of the cost of the arbitration proceeding, including the cost of instituting the proceeding.

(6) You must refrain from requiring the individual shipper to agree to use arbitration before a dispute arises.

(7) Arbitration must be binding for claims of \$5,000 or less, if the individual shipper requests arbitration.

(8) Arbitration must be binding for claims of more than \$5,000, if the individual shipper requests arbitration and the carrier agrees to it.

(9) If all parties agree, the arbitrator may provide for an oral presentation of a dispute by a party or representative of a party.

(10) The arbitrator must render a decision within 60 days of receipt of written notification of the dispute, and a decision by an arbitrator may include any remedies appropriate under the circumstances.

(11) The arbitrator may extend the 60-day period for a reasonable period if you or the individual shipper fail to

§ 375.213

provide, in a timely manner, any information the arbitrator reasonably requires to resolve the dispute.

(b) You must produce and distribute a concise, easy-to-read, accurate summary of your arbitration program, including the items in this section.

[68 FR 35091, June 11, 2003, as amended at 69 FR 10575, Mar. 5, 2004]

§ 375.213 What information must I provide to a prospective individual shipper?

(a) Before you execute an order for service for a shipment of household goods, you must furnish to your prospective individual shipper, all five of the following documents:

(1) The contents of appendix A of this part, "Your Rights and Responsibilities When You Move."

(2) A concise, easy-to-read, accurate estimate of your charges.

(3) A notice of the availability of the applicable sections of your tariff for the estimate of charges, including an explanation that individual shippers may examine these tariff sections or have copies sent to them upon request.

(4) A concise, easy-to-read, accurate summary of the your arbitration program.

(5) A concise, easy to read, accurate summary of your customer complaint and inquiry handling procedures. Included in this description must be both of the following two items:

(i) The main telephone number the individual shipper may use to communicate with you.

(ii) A clear and concise statement concerning who must pay for telephone calls.

(b) To comply with paragraph (a)(1) of this section, you must produce and distribute a document with the text and general order of appendix A to this part as it appears. The following three items also apply:

(1) If we, the Federal Motor Carrier Safety Administration, choose to modify the text or general order of appendix A, we will provide the public appropriate notice in the FEDERAL REGISTER and an opportunity for comment as required by part 389 of this chapter before making you change anything.

(2) If you publish the document, you may choose the dimensions of the pub-

49 CFR Ch. III (10–1–04 Edition)

lication as long as the type font size is at least 10 point or greater and the size of the booklet is at least as large as 36 square inches (232 square centimeters).

(3) If you publish the document, you may choose the color and design of the front and back covers of the publication. The following words must appear prominently on the front cover in at least 12 point or greater bold or full-faced type: "YOUR RIGHTS AND RESPONSIBILITIES WHEN YOU MOVE. FURNISHED BY YOUR MOVER, AS REQUIRED BY FEDERAL LAW." You may substitute your name or trade name in place of "Your Mover" if you wish (for example, *Furnished by XYZ Van Lines, As Required By Federal Law*).

(c) Paragraphs (b)(2) and (b)(3) of this section do not apply to exact copies of appendix A published in the FEDERAL REGISTER or the *Code of Federal Regulations*.

COLLECTING TRANSPORTATION CHARGES

§ 375.215 How must I collect charges?

You must issue an honest, truthful freight or expense bill in accordance with subpart A of part 373 of this chapter. All rates and charges for the transportation and related services must be in accordance with your appropriately published tariff provisions in effect, including the method of payment.

§ 375.217 How must I collect charges upon delivery?

(a) You must specify the form of payment when you prepare the estimate. You and your agents must honor the form of payment at delivery, except when a shipper agrees to a change in writing.

(b) You must specify the same form of payment provided in paragraph (a) of this section when you prepare the order for service and the bill of lading.

(c) Charge or credit card payments:

(1) If you agree to accept payment by charge or credit card, you must arrange with the individual shipper for the delivery only at a time when you can obtain authorization for the shipper's credit card transaction.

(2) Paragraph (c)(1) of this section does not apply to you when you have equipped your motor vehicle(s) to process card transactions.

(d) You may maintain a tariff setting forth nondiscriminatory rules governing collect-on-delivery service and the collection of collect-on-delivery funds.

(e) If an individual shipper pays you at least 110 percent of the approximate costs of a non-binding estimate on a collect-on-delivery shipment, you must relinquish possession of the shipment at the time of delivery.

[68 FR 35091, June 11, 2003, as amended at 69 FR 10575, Mar. 5, 2004]

§ 375.219 May I extend credit to shippers?

You may extend credit to shippers, but, if you do, it must be in accordance with § 375.807.

§ 375.221 May I use a charge or credit card plan for payments?

(a) You may provide in your tariff for the acceptance of charge or credit cards for the payment of freight charges. Accepting charge or credit card payments is different than extending credit to shippers in §§ 375.219 and 375.807. Once you provide an estimate you are bound by the provisions in your tariff regarding payment as of the estimate date, until completion of any transaction that results from that estimate, unless otherwise agreed with a shipper under § 375.217(a).

(b) You may accept charge or credit cards whenever shipments are transported under agreements and tariffs requiring payment by cash, certified check, money order, or a cashier's check.

(c) If you allow an individual shipper to pay for a freight or expense bill by charge or credit card, you are deeming such payment to be the same as payment by cash, certified check, money order, or a cashier's check.

(d) The charge or credit card plans you participate in must be identified in your tariff rules as items permitting the acceptance of the charge or credit cards.

(e) If an individual shipper causes a charge or credit card issuer to reverse a charge transaction, you may consider the individual shipper's action tantamount to forcing you to provide an involuntary extension of your credit. In

such instances, the rules in § 375.807 apply.

Subpart C—Service Options Provided

§ 375.301 What service options may I provide?

(a) You may design your household goods service to provide individual shippers with a wide range of specialized service and pricing features. Many carriers provide at least the following five service options:

- (1) Space reservation.
- (2) Expedited service.
- (3) Exclusive use of a vehicle.
- (4) Guaranteed service on or between agreed dates.
- (5) Liability insurance.

(b) If you sell liability insurance, you must follow the requirements in § 375.303.

§ 375.303 If I sell liability insurance coverage, what must I do?

(a) You, your employee, or an agent may sell, offer to sell, or procure liability insurance coverage for loss or damage to shipments of any individual shipper only when the individual shipper releases the shipment for transportation at a value not exceeding 60 cents per pound (\$1.32 per kilogram) per article.

(b) You may offer, sell, or procure any type of insurance policy on behalf of the individual shipper covering loss or damage in excess of the specified carrier liability.

(c) If you sell, offer to sell, or procure liability insurance coverage for loss or damage to shipments:

- (1) You must issue to the individual shipper a policy or other appropriate evidence of the insurance that the individual shipper purchased.
- (2) You must provide a copy of the policy or other appropriate evidence to the individual shipper at the time you sell or procure the insurance.
- (3) You must issue policies written in plain English.
- (4) You must clearly specify the nature and extent of coverage under the policy.

§ 375.401

49 CFR Ch. III (10–1–04 Edition)

(5) Your failure to issue a policy, or other appropriate evidence of insurance purchased, to an individual shipper will subject you to full liability for any claims to recover loss or damage attributed to you.

(6) You must provide in your tariff for the provision of selling, offering to sell, or procuring liability insurance coverage. The tariff must also provide for the base transportation charge, including your assumption of full liability for the value of the shipment. This would be in the event you fail to issue a policy or other appropriate evidence of insurance to the individual shipper at the time of purchase.

[69 FR 10575, Mar. 5, 2004]

Subpart D—Estimating Charges

§ 375.401 Must I estimate charges?

(a) Before you execute an order for service for a shipment of household goods for an individual shipper, you must estimate the total charges in writing. The written estimate must be one of the following two types:

(1) A *binding estimate*, an agreement made in advance with your individual shipper. It guarantees the total cost of the move based upon the quantities and services shown on your estimate.

(2) A *non-binding estimate*, what you believe the total cost will be for the move, based upon the estimated weight or volume of the shipment and the accessorial services requested. A non-binding estimate is not binding on you. You will base the final charges upon the actual weight of the individual shipper's shipment and the tariff provisions in effect.

(b) You must specify the form of payment you and your agent will honor at delivery. Payment forms may include, but are not limited to, cash, a certified check, a money order, a cashier's check, a specific charge card such as American Express™, a specific credit card such as Visa™, or your credit as allowed by § 375.807.

(c) For non-binding estimates, you must provide your reasonably accurate estimate of the approximate costs the individual shipper should expect to pay for the transportation and services of such shipments. If you provide an inac-

curately low estimate, you may be limiting the amount you will collect at the time of delivery as provided in § 375.407.

(d) If you provide a shipper with an estimate based on volume that will later be converted to a weight-based rate, you must provide the shipper an explanation in writing of the formula used to calculate the conversion to weight. You must specify the final charges will be based on actual weight and services subject to the 110 percent rule at delivery.

(e) You must determine charges for any accessorial services such as elevators, long carries, etc., before preparing the order for service and the bill of lading for binding or non-binding estimates. If you fail to ask the shipper about such charges and fail to determine such charges before preparing the order for service and the bill of lading, you must deliver the goods and bill the shipper after 30 days for the additional charges.

(f) You and the individual shipper must sign the estimate of charges. You must provide a dated copy of the estimate of charges to the individual shipper at the time you sign the estimate.

(g) Before loading a household goods shipment, and upon mutual agreement of both you and the individual shipper, you may amend an estimate of charges. You may not amend the estimate after loading the shipment.

§ 375.403 How must I provide a binding estimate?

(a) You may provide a guaranteed binding estimate of the total shipment charges to the individual shipper, so long as it is provided for in your tariff. The individual shipper must pay the amount for the services included in your estimate. You must comply with the following nine requirements:

(1) You must provide a binding estimate in writing to the individual shipper or other person responsible for payment of the freight charges.

(2) You must retain a copy of each binding estimate as an attachment to be made an integral part of the bill of lading contract.

(3) You must clearly indicate upon each binding estimate's face the estimate is binding upon you and the individual shipper. Each binding estimate must also clearly indicate on its face the charges shown are the charges being assessed for only those services specifically identified in the estimate.

(4) You must clearly describe binding estimate shipments and all services you are providing.

(5) If it appears an individual shipper has tendered additional household goods or requires additional services not identified in the binding estimate, you are not required to honor the estimate. If an agreement cannot be reached as to the price or service requirements for the additional goods or services, you are not required to service the shipment. However, if you do service the shipment, before loading the shipment, you must do one of the following three things:

(i) Reaffirm your binding estimate.

(ii) Negotiate a revised written binding estimate listing the additional household goods or services.

(iii) Agree with the individual shipper, in writing, that both of you will consider the original binding estimate as a non-binding estimate subject to § 375.405.

(6) Once you load a shipment, failure to execute a new binding estimate or a non-binding estimate signifies you have reaffirmed the original binding estimate. You may not collect more than the amount of the original binding estimate.

(7) If you believe additional services are necessary to properly service a shipment after the household goods are in transit, you must inform the individual shipper what the additional services are before performing those services. You must allow the shipper at least one hour to determine whether he or she wants the additional services performed. If the individual shipper agrees to pay for the additional services, you must execute a written attachment to be made an integral part of the bill of lading contract and have the individual shipper sign the written attachment. This may be done through fax transmissions; e-mail; overnight courier; or certified mail, return receipt requested. You must bill the indi-

vidual shipper for the additional services after 30 days from delivery. If the individual shipper does not agree to pay the additional services, the carrier should perform only those additional services as are required to complete the delivery, and bill the individual shipper for the additional services after 30 days from delivery.

(8) If the individual shipper requests additional services after the household goods are in transit, you must inform the individual shipper of the additional charges that will be billed. You must require full payment at destination of the original binding estimate only. You must bill for the payment of the balance of any remaining charges for additional services no sooner than 30 days after the date of delivery. For example, if your binding estimate to an individual shipper estimated total charges at delivery as \$1,000, but your actual charges at destination are \$1,500, you must deliver the shipment upon payment of \$1,000. You must then issue freight or expense bills no sooner than 30 days after the date of delivery for the remaining \$500.

(9) Failure to relinquish possession of a shipment upon an individual shipper's offer to pay the binding estimate amount constitutes a failure to transport a shipment with "reasonable dispatch" and subjects you to cargo delay claims pursuant to part 370 of this chapter.

(b) If you do not provide a binding estimate to an individual shipper, you must provide a non-binding estimate to the individual shipper in accordance with § 375.405.

(c) You must retain a copy of the binding estimate for each move you perform for at least one year from the date you made the estimate and keep it as an attachment to be made an integral part of the bill of lading contract.

[68 FR 35091, June 11, 2003, as amended at 69 FR 10575, Mar. 5, 2004; 69 FR 17317, May 5, 2004]

§ 375.405 How must I provide a non-binding estimate?

(a) If you do not provide a binding estimate to an individual shipper in accordance with § 375.403, you must provide a non-binding written estimate to the individual shipper.

(b) If you provide a non-binding estimate to an individual shipper, you must provide your reasonably accurate estimate of the approximate costs the individual shipper should expect to pay for the transportation and services of the shipment. You must comply with the following ten requirements:

(1) You must provide reasonably accurate non-binding estimates based upon the estimated weight or volume of the shipment and services required. If you provide a shipper with an estimate based on volume that will later be converted to a weight-based rate, you must provide the shipper an explanation in writing of the formula used to calculate the conversion to weight.

(2) You must explain to the individual shipper final charges calculated for shipments moved on non-binding estimates will be those appearing in your tariffs applicable to the transportation. You must explain to the individual shipper these final charges may exceed the approximate costs appearing in your estimate.

(3) You must furnish non-binding estimates without charge and in writing to the individual shipper or other person responsible for payment of the freight charges.

(4) You must retain a copy of each non-binding estimate as an attachment to be made an integral part of the bill of lading contract.

(5) You must clearly indicate on the face of a non-binding estimate, the estimate is not binding upon you and the charges shown are the approximate charges to be assessed for the services identified in the estimate. The estimate must clearly state that the shipper may not be required to pay more than 110 percent of the non-binding estimate at the time of delivery.

(6) You must clearly describe on the face of a non-binding estimate the entire shipment and all services you are providing.

(7) If it appears an individual shipper has tendered additional household goods or requires additional services not identified in the non-binding estimate, you are not required to honor the estimate. If an agreement cannot be reached as to the price or service requirements for the additional goods or services, you are not required to serv-

ice the shipment. However, if you do service the shipment, before loading the shipment, you must do one of the following two things:

(i) Reaffirm your non-binding estimate.

(ii) Negotiate a revised written non-binding estimate listing the additional household goods or services.

(8) Once you load a shipment, failure to execute a new non-binding estimate signifies you have reaffirmed the original non-binding estimate. You may not collect more than 110 percent of the amount of the original non-binding estimate at destination.

(9) If you believe additional services are necessary to properly service a shipment after the household goods are in transit, you must inform the individual shipper what the additional services are before performing those services. You must allow the shipper at least one hour to determine whether he or she wants the additional services performed. If the individual shipper agrees to pay for the additional services, you must execute a written attachment to be made an integral part of the bill of lading contract and have the individual shipper sign the written attachment. This may be done through fax transmissions; e-mail; overnight courier; or certified mail, return receipt requested. You must bill the individual shipper for the additional services after 30 days from delivery. If the individual shipper does not agree to pay the additional services, the carrier should perform only those additional services as are required to complete the delivery, and bill the individual shipper for the additional services after 30 days from delivery.

(10) If the individual shipper requests additional services after the household goods are in-transit, you must inform the individual shipper additional charges will be billed. You may require full payment at destination of no more than 110 percent of the original non-binding estimate. You must bill for the payment of the balance of any remaining charges after 30 days after delivery. For example, if your non-binding estimate to an individual shipper estimated total charges at delivery as \$1,000, but your actual charges at destination are \$1,500, you must deliver

the shipment upon payment of \$1,100 (110 percent of the estimated charges) and forego demanding immediate payment of the balance. You then must issue a freight or expense bill for the remaining \$400 after the 30-day period expires.

(c) If you furnish a non-binding estimate, you must enter the estimated charges upon the order for service and upon the bill of lading.

(d) You must retain a copy of the non-binding estimate for each move you perform for at least one year from the date you made the estimate and keep it as an attachment to be made an integral part of the bill of lading contract.

[68 FR 35091, June 11, 2003, as amended at 69 FR 10576, Mar. 5, 2004]

§ 375.407 Under what circumstances must I relinquish possession of a collect-on-delivery shipment transported under a non-binding estimate?

(a) If an individual shipper pays you at least 110 percent of the approximate costs of a non-binding estimate on a collect-on-delivery shipment, you must relinquish possession of the shipment at the time of delivery. You must accept the form of payment agreed to at the time of estimate, unless the shipper agrees in writing to a change in the form of payment.

(b) Failure to relinquish possession of a shipment upon an individual shipper's offer to pay 110 percent of the estimated charges constitutes a failure to transport the shipment with "reasonable dispatch" and subjects you to cargo delay claims pursuant to part 370 of this chapter.

(c) You must defer billing for the payment of the balance of any remaining charges for a period of 30 days following the date of delivery. After this 30-day period, you may demand payment of the balance of any remaining charges, as explained in § 375.405.

§ 375.409 May household goods brokers provide estimates?

A household goods broker must not provide an individual shipper with an estimate of charges for the transportation of household goods unless there is a written agreement between the

broker and you, the carrier, adopting the broker's estimate as your own estimate. If you make such an agreement with a broker, you must ensure compliance with all requirements of this part pertaining to estimates, including the requirement that you must relinquish possession of the shipment if the shipper pays you 110 percent of a non-binding estimate at the time of delivery.

Subpart E—Pick Up of Shipments of Household Goods

BEFORE LOADING

§ 375.501 Must I write up an order for service?

(a) Before you receive a shipment of household goods you will move for an individual shipper, you must prepare an order for service. The order for service must contain the information described in the following 15 items:

(1) Your name and address and the FMCSA U.S. DOT number assigned to the mover who is responsible for performing the service.

(2) The individual shipper's name, address, and, if available, telephone number(s).

(3) The name, address, and telephone number of the delivering mover's office or agent located at or nearest to the destination of the shipment.

(4) A telephone number where the individual shipper/consignee may contact you or your designated agent.

(5) One of the following three entries must be on the order for service:

(i) The agreed pickup date and agreed delivery date of the move.

(ii) The agreed period(s) of the entire move.

(iii) If you are transporting the shipment on a guaranteed service basis, the guaranteed dates or periods for pickup, transportation, and delivery. You must enter any penalty or per diem requirements upon the agreement under this item.

(6) The names and addresses of any other motor carriers, when known, who will participate in interline transportation of the shipment.

(7) The form of payment you and your agents will honor at delivery. The payment information must be the same that was entered on the estimate.

(8) The terms and conditions for payment of the total charges, including notice of any minimum charges.

(9) The maximum amount you will demand at the time of delivery to obtain possession of the shipment, when you transport on a collect-on-delivery basis.

(10) The Surface Transportation Board's required released rates valuation statement, and the charges, if any, for optional valuation coverage. The released rates may be increased annually by the carrier based on the Department of Commerce's Cost of Living Adjustment.

(11) A complete description of any special or accessorial services ordered and minimum weight or volume charges applicable to the shipment, subject to the following two conditions:

(i) If you provide service for individual shippers on rates based upon the transportation of a minimum weight or volume, you must indicate on the order for service the minimum weight- or volume-based rates, and the minimum charges applicable to the shipment.

(ii) If you do not indicate the minimum rates and charges, your tariff must provide you will compute the final charges relating to such a shipment based upon the actual weight or volume of the shipment.

(12) Any identification or registration number you assign to the shipment.

(13) *For non-binding estimates*, your reasonably accurate estimate of the amount of the charges, the method of payment of total charges, and the maximum amount (no more than 110 percent of the non-binding estimate) you will demand at the time of delivery to relinquish possession of the shipment.

(14) *For binding estimates*, the amount of charges you will demand based upon the binding estimate and the terms of payment under this estimate.

(15) Whether the individual shipper requests notification of the charges before delivery. The individual shipper must provide you with the fax number(s) or address(es) where you will transmit the notifications by fax transmission; e-mail; overnight courier; or certified mail, return receipt requested.

(b) You, your agent, or your driver must inform the individual shipper if you reasonably expect a special or accessorial service is necessary to safely transport a shipment. You must refuse to accept the shipment when you reasonably expect a special or accessorial service is necessary to safely transport a shipment and the individual shipper refuses to purchase the special or accessorial service. You must make a written note if the shipper refuses any special or accessorial services that you reasonably expect to be necessary.

(c) You and the individual shipper must sign the order for service. You must provide a dated copy of the order for service to the individual shipper at the time you sign the order.

(d)(1) You may provide the individual shipper with blank or incomplete estimates, orders for service, bills of lading, or any other blank or incomplete documents pertaining to the move.

(2) You may require the individual shipper to sign an incomplete document at origin provided it contains all relevant shipping information except the actual shipment weight and any other information necessary to determine the final charges for all services performed.

(e) You must provide the individual shipper the opportunity to rescind the order for service without any penalty for a three-day period after the shipper signs the order for service, if the shipper scheduled the shipment to be loaded more than three days after signing the order.

(f) Before loading the shipment, and upon mutual agreement of both you and the individual shipper, you may amend an order for service.

(g) You must retain a copy of the order for service for each move you perform for at least one year from the date you made the order for service and keep it as an attachment to be made an integral part of the bill of lading contract.

(h) You have the option of placing the valuation statement on either the order for service or the bill of lading, provided the order for service or bill of lading states the appropriate valuation selected by the shipper.

[68 FR 35091, June 11, 2003, as amended at 69 FR 10576, Mar. 5, 2004]

§ 375.503 Must I write up an inventory?

(a) You must prepare a written, itemized inventory for each shipment of household goods you transport for an individual shipper. The inventory must identify every carton and every uncartoned item that is included in the shipment. When you prepare the inventory, an identification number that corresponds to the inventory must be placed on each article that is included in the shipment.

(b) You must prepare the inventory before or at the time of loading in the vehicle for transportation in a manner that provides the individual shipper with the opportunity to observe and verify the accuracy of the inventory if he or she so requests.

(c) You must furnish a complete copy of the inventory to the individual shipper before or at the time of loading the shipment. A copy of the inventory, signed by both you and the individual shipper, must be provided to the shipper, together with a copy of the bill of lading, before or at the time you load the shipment.

(d) Upon delivery, you must provide the individual shipper with the opportunity to observe and verify that the same articles are being delivered and the condition of those articles. You must also provide the individual shipper the opportunity to note in writing any missing articles and the condition of any damaged or destroyed articles. In addition, you must also provide the shipper with a copy of all such notations.

(e) You must retain inventories for each move you perform for at least one year from the date you made the inventory and keep it as an attachment to be made an integral part of the bill of lading contract.

[68 FR 35091, June 11, 2003, as amended at 69 FR 10576, Mar. 5, 2004]

§ 375.505 Must I write up a bill of lading?

(a) You must issue a bill of lading. The bill of lading must contain the terms and conditions of the contract. A bill of lading may be combined with an order for service to include all the items required by § 375.501 of this subpart. You must furnish a partially

complete copy of the bill of lading to the individual shipper before the vehicle leaves the residence at origin. The partially complete bill of lading must contain all relevant shipment information, except the actual shipment weight and any other information necessary to determine the final charges for all services performed.

(b) On a bill of lading, you must include the following 14 items:

(1) Your name and address, or the name and address of the motor carrier issuing the bill of lading.

(2) The names and addresses of any other motor carriers, when known, who will participate in transportation of the shipment.

(3) The name, address, and telephone number of your office (or the office of your agent) where the individual shipper can contact you in relation to the transportation of the shipment.

(4) The form of payment you and your agents will honor at delivery. The payment information must be the same that was entered on the estimate and order for service.

(5) When you transport on a collect-on-delivery basis, the name, address, and if furnished, the telephone number, facsimile number, or e-mail address of a person to notify about the charges. The notification may also be made by overnight courier or certified mail, return receipt requested.

(6) *For non-guaranteed service*, the agreed date or period of time for pickup of the shipment and the agreed date or period of time for the delivery of the shipment. The agreed dates or periods for pickup and delivery entered upon the bill of lading must conform to the agreed dates or periods of time for pickup and delivery entered upon the order for service or a proper amendment to the order for service.

(7) *For guaranteed service*, subject to tariff provisions, the dates for pickup and delivery, and any penalty or per diem entitlements due the individual shipper under the agreement.

(8) The actual date of pickup.

(9) The company or carrier identification number of the vehicle(s) upon which you load the individual shipper's shipment.

§ 375.507

49 CFR Ch. III (10–1–04 Edition)

(10) The terms and conditions for payment of the total charges, including notice of any minimum charges.

(11) The maximum amount you will demand at the time of delivery to obtain possession of the shipment, when you transport under a collect-on-delivery basis.

(12) The Surface Transportation Board's required released rates valuation statement, and the charges, if any, for optional valuation coverage. The released rates may be increased annually by the carrier based on the Department of Commerce's Cost of Living Adjustment.

(13) Evidence of any insurance coverage sold to or procured for the individual shipper from an independent insurer, including the amount of the premium for such insurance.

(14) Each attachment to the bill of lading. Each attachment is an integral part of the bill of lading contract. If not provided elsewhere to the shipper, the following three items must be added as an attachment to the bill of lading.

(i) The binding or non-binding estimate.

(ii) The order for service.

(iii) The inventory.

(c) A copy of the bill of lading must accompany a shipment at all times while in your (or your agent's) possession. Before the vehicle leaves the residence of origin, the bill of lading must be in the possession of the driver responsible for the shipment.

(d) You must retain bills of lading for each move you perform for at least one year from the date you created the bill of lading.

(e) You have the option of placing the valuation statement on either the order for service or the bill of lading, provided the order for service or bill of lading states the appropriate valuation selected by the shipper.

[68 FR 35091, June 11, 2003, as amended at 69 FR 10576, Mar. 5, 2004]

WEIGHING THE SHIPMENT

§ 375.507 Must I determine the weight of a shipment?

(a) When you transport household goods on a non-binding estimate dependent upon the shipment weight, you

must determine the weight of each shipment transported before the assessment of any charges.

(b) You must weigh the shipment upon a certified scale.

(c) You must provide a written explanation of volume to weight conversions, when you provide an estimate by volume and convert the volume to weight.

§ 375.509 How must I determine the weight of a shipment?

(a) You must weigh the shipment by using one of the following two methods:

(1) *First method—origin weigh.* You determine the difference between the tare weight of the vehicle before loading at the origin of the shipment and the gross weight of the same vehicle after loading the shipment.

(2) *Second method—back weigh.* You determine the difference between the gross weight of the vehicle with the shipment loaded and the tare weight of the same vehicle after you unload the shipment.

(b) The following three conditions must exist for both the tare and gross weighings:

(1) The vehicle must have installed or loaded all pads, dollies, hand trucks, ramps, and other equipment required in the transportation of the shipment.

(2) The driver and other persons must be off the vehicle at the time of either weighing.

(3) The fuel tanks on the vehicle must be full at the time of each weighing, or, in the alternative, when you use the *first method—origin weigh*, in paragraph (a)(1) of this section, where the tare weighing is the first weighing performed, you must refrain from adding fuel between the two weighings.

(c) You may detach the trailer of a tractor-trailer vehicle combination from the tractor and have the trailer weighed separately at each weighing provided the length of the scale platform is adequate to accommodate and support the entire trailer at one time.

(d) You must use the net weight of shipments transported in containers. You must calculate the difference between the tare weight of the container (including all pads, blocking and bracing used in the transportation of the

shipment) and the gross weight of the container with the shipment loaded in the container.

§ 375.511 May I use an alternative method for shipments weighing 3,000 pounds or less?

For shipments weighing 3,000 pounds or less (1,362 kilograms or less), you may weigh the shipment upon a platform or warehouse certified scale before loading for transportation or after unloading.

§ 375.513 Must I give the individual shipper an opportunity to observe the weighing?

You must give the individual shipper or any other person responsible for the payment of the freight charges the right to observe all weighings of the shipment. You must advise the individual shipper, or any other person entitled to observe the weighings, where and when each weighing will occur. You must give the person who will observe the weighings a reasonable opportunity to be present to observe the weighings.

§ 375.515 May an individual shipper waive his/her right to observe each weighing?

(a) If an individual shipper elects not to observe a weighing, the shipper is presumed to have waived that right.

(b) If an individual shipper elects not to observe a reweighing, the shipper must waive that right in writing. The individual shipper may send the waiver notification via fax transmission; e-mail; overnight courier; or certified mail, return receipt requested.

(c) Waiver of the right to observe a weighing or re-weighing does not affect any other rights of the individual shipper under this part or otherwise.

[68 FR 35091, June 11, 2003, as amended at 69 FR 10576, Mar. 5, 2004]

§ 375.517 May an individual shipper demand re-weighing?

After you inform the individual shipper of the billing weight and total charges and before actually beginning to unload a shipment weighed at origin (*first method* under § 375.509(a)(1)), the individual shipper may demand a re-

weigh. You must base your freight bill charges upon the re-weigh weight.

§ 375.519 Must I obtain weight tickets?

(a) You must obtain weight tickets whenever we require you to weigh the shipment in accordance with this subpart. You must obtain a separate weight ticket for each weighing. The weigh master must sign each weight ticket. Each weight ticket must contain the following six items:

(1) The complete name and location of the scale.

(2) The date of each weighing.

(3) The identification of the weight entries as being the tare, gross, or net weights.

(4) The company or carrier identification of the vehicle.

(5) The last name of the individual shipper as it appears on the bill of lading.

(6) The carrier's shipment registration or bill of lading number.

(b) When both weighings are performed on the same scale, one weight ticket may be used to record both weighings.

(c) As part of the file on the shipment, you must retain the original weight ticket or tickets relating to the determination of the weight of a shipment.

(d) All freight bills you present to an individual shipper must include true copies of all weight tickets obtained in the determination of the shipment weight in order to collect any shipment charges dependent upon the weight transported.

§ 375.521 What must I do if an individual shipper wants to know the actual weight or charges for a shipment before I tender delivery?

(a) If an individual shipper of a shipment being transported on a collect-on-delivery basis specifically requests notification of the actual weight or volume and charges on the shipment, you must comply with this request. This requirement is conditioned upon the individual shipper's supplying you with an address or telephone number where the individual shipper will receive the communication. You must make your notification by telephone; in person; fax transmissions; e-mail; overnight

§ 375.601

49 CFR Ch. III (10–1–04 Edition)

courier; or certified mail, return receipt requested.

(b) The individual shipper must receive your notification at least one full 24-hour day before any tender of the shipment for delivery, excluding Saturdays, Sundays and Federal holidays.

(c) You may disregard the 24-hour notification requirement on shipments in any one of the following three circumstances:

(1) The shipment will be back weighed (*i.e.*, weighed at destination).

(2) Pickup and delivery encompass two consecutive weekdays, if the individual shipper agrees.

(3) The shipment is moving under a non-binding estimate and the maximum payment required at time of delivery is 110 percent of the estimated charges, but only if the individual shipper agrees to waive the 24-hour notification requirement.

[68 FR 35091, June 11, 2003, as amended at 69 FR 10576, Mar. 5, 2004]

Subpart F—Transportation of Shipments

§ 375.601 Must I transport the shipment in a timely manner?

Yes. Transportation in a timely manner is also known as “reasonable dispatch service.” You must provide reasonable dispatch service to all individual shippers, except for transportation on the basis of guaranteed pickup and delivery dates.

§ 375.603 When must I tender a shipment for delivery?

You must tender a shipment for delivery for an individual shipper on the agreed delivery date or within the period specified on the bill of lading. Upon the request or concurrence of the individual shipper, you may waive this requirement.

§ 375.605 How must I notify an individual shipper of any service delays?

(a) When you are unable to perform either the pickup or delivery of a shipment on the dates or during the periods specified in the order for service and as soon as the delay becomes apparent to you, you must notify the individual

shipper of the delay, at your expense, in one of the following six ways:

(1) By telephone.

(2) In person.

(3) Fax transmissions.

(4) E-mail.

(5) Overnight courier.

(6) Certified mail, return receipt requested.

(b) You must advise the individual shipper of the dates or periods you expect to be able to pick up and/or deliver the shipment. You must consider the needs of the individual shipper in your advisement. You also must do the following four things:

(1) You must prepare a written record of the date, time, and manner of notification.

(2) You must prepare a written record of your amended date or period for pick-up or delivery.

(3) You must retain these records as a part of your file on the shipment. The retention period is one year from the date of notification.

(4) You must furnish a copy of the notice to the individual shipper by first class mail or in person if the individual shipper requests a copy of the notice.

[68 FR 35091, June 11, 2003, as amended at 69 FR 10576, Mar. 5, 2004]

§ 375.607 What must I do if I am able to tender a shipment for final delivery more than 24 hours before a specified date?

(a) You may ask the individual shipper to accept an early delivery date. If the individual shipper does not concur with your request or the individual shipper does not request an early delivery date, you may, at your discretion, place a shipment in storage under your own account and at your own expense in a warehouse located near the destination of the shipment. If you place the shipment in storage, you must comply with paragraph (b) of this section. You may comply with paragraph (c) of this section, at your discretion.

(b) You must immediately notify the individual shipper of the name and address of the warehouse where you place the shipment. You must make and keep a record of your notification as a part of your shipment records. You have responsibility for the shipment under the terms and conditions of the

bill of lading. You are responsible for the charges for redelivery, handling, and storage until you make final delivery.

(c) You may limit your responsibility under paragraph (b) of this section up to the agreed delivery date or the first day of the period of time of delivery as specified in the bill of lading.

§ 375.609 What must I do for shippers who store household goods in transit?

(a) If you are holding goods for storage-in-transit (SIT) and the period of time is about to expire, you must comply with this section.

(b) You must notify the individual shipper, in writing of the following four items:

(1) The date of conversion to permanent storage.

(2) The existence of a nine-month period after the date of conversion to permanent storage when the individual shipper may file claims against you for loss or damage occurring to the goods in transit or during the storage-in-transit period.

(3) The fact your liability is ending.

(4) The fact the individual shipper's property will be subject to the rules, regulations, and charges of the warehouseman.

(c) You must make this notification at least 10 days before the expiration date of either one of the following two periods:

(1) The specified period of time when the goods are to be held in storage.

(2) The maximum period of time provided in your tariff for storage-in-transit.

(d) You must notify the individual shipper by facsimile transmission; e-mail; overnight courier; or certified mail, return receipt requested.

(e) If you are holding household goods in storage-in-transit for a period of time less than 10 days, you must give notification to the individual shipper of the information specified in paragraph (b) of this section one day before the expiration date of the specified time when the goods are to be held in such storage.

(f) You must maintain a record of notifications as part of the records of the shipment.

(g) Your failure or refusal to notify the individual shipper will automatically effect a continuance of your carrier liability according to the applicable tariff provisions with respect to storage-in-transit, until the end of the day following the date when you actually gave notice.

[68 FR 35091, June 11, 2003, as amended at 69 FR 10577, Mar. 5, 2004]

Subpart G—Delivery of Shipments

§ 375.701 May I provide for a release of liability on my delivery receipt?

(a) Your delivery receipt or shipping document must not contain any language purporting to release or discharge you or your agents from liability.

(b) The delivery receipt may include a statement the property was received in apparent good condition except as noted on the shipping documents.

§ 375.703 What is the maximum collect-on-delivery amount I may demand at the time of delivery?

(a) On a binding estimate, the maximum amount is the exact estimate of the charges.

(b) On a non-binding estimate, the maximum amount is 110 percent of the non-binding estimate of the charges.

§ 375.705 If a shipment is transported on more than one vehicle, what charges may I collect at delivery?

(a) At your discretion, you may do one of the following three things:

(1) You may defer the collection of all charges until you deliver the entire shipment.

(2) If you have determined the charges for the entire shipment, you may collect charges for the portion of the shipment tendered for delivery. You must determine the percentage of the charges for the entire shipment represented by the portion of the shipment tendered for delivery.

(3) If you cannot reasonably calculate the charges for the entire shipment, you must determine the charges for the portion of the shipment being delivered. You must collect this amount. The total charges you assess for the transportation of the separate portions of the shipment must not be more than

§ 375.707

the charges due for the entire shipment.

(b) In the event of the loss or destruction of any part of a shipment transported on more than one vehicle, you must collect the charges as provided in § 375.707.

§ 375.707 If a shipment is partially lost or destroyed, what charges may I collect at delivery?

(a) If a shipment is partially lost or destroyed, you may first collect your freight charges for the entire shipment, if you choose. If you do this, you must refund the portion of your published freight charges corresponding to the portion of the lost or destroyed shipment (including any charges for accessorial or terminal services), at the time you dispose of claims for loss, damage, or injury to the articles in the shipment under part 370 of this chapter.

(b) To calculate the amount of charges applicable to the shipment as delivered, you must multiply the percentage corresponding to the delivered shipment by the total charges applicable to the shipment tendered by the individual shipper. The following four conditions also apply:

(1) If the charges computed exceed the charges otherwise applicable to the shipment as delivered, the lesser of those charges must apply. This will apply only to the transportation of household goods and not to charges for other services the individual shipper ordered.

(2) You must collect any specific valuation charge due.

(3) You may disregard paragraph (a) of this section if loss or destruction was due to an act or omission of the individual shipper.

(4) You must determine, at your own expense, the proportion of the shipment, based on actual or constructive weight, not lost or destroyed in transit.

(c) The individual shipper's rights are in addition to, and not in lieu of, any other rights the individual shipper may have with respect to a shipment of household goods you or your agent(s) partially lost or destroyed in transit. This applies whether or not the individual shipper exercises its rights provided in paragraph (a) of this section.

49 CFR Ch. III (10–1–04 Edition)

§ 375.709 If a shipment is totally lost or destroyed, what charges may I collect at delivery?

(a) You are forbidden from collecting, or requiring an individual shipper to pay, any freight charges (including any charges for accessorial or terminal services) when a household goods shipment is *totally lost or destroyed* in transit. The following two conditions also apply:

(1) You must collect any specific valuation charge due.

(2) You may disregard paragraph (a) of this section if loss or destruction was due to an act or omission of the individual shipper.

(b) The individual shipper's rights are in addition to, and not in lieu of, any other rights the individual shipper may have with respect to a shipment of household goods you or your agent(s) totally lost or destroyed in transit. This applies whether or not the individual shipper exercises its rights provided in paragraph (a) of this section.

Subpart H—Collection of Charges

§ 375.801 What types of charges apply to subpart H?

This subpart applies to all shipments of household goods that:

(a) Entail a balance due freight or expense bill, or

(b) Are transported on an extension of credit basis.

[69 FR 10577, Mar. 5, 2004]

§ 375.803 How must I present my freight or expense bill?

You must present your freight or expense bill in accordance with § 375.807 of this subpart.

[69 FR 10577, Mar. 5, 2004]

§ 375.805 If I am forced to relinquish a collect-on-delivery shipment before the payment of ALL charges, how do I collect the balance?

On “collect-on-delivery” shipments, you must present your freight bill for all transportation charges within 15 days as required by § 375.807.

§375.807 What actions may I take to collect the charges upon my freight bill?

(a) You must present a freight bill within 15 days (excluding Saturdays, Sundays, and Federal holidays) of the date of delivery of a shipment at its destination.

(b) The credit period must be seven days (including Saturdays, Sundays, and Federal holidays).

(c) You must provide in your tariffs the following four things:

(1) You must automatically extend the credit period to a total of 30 calendar days for any shipper who has not paid your freight bill within the 7-day period.

(2) You will assess a service charge to each individual shipper equal to one percent of the amount of the freight bill, subject to a \$20 minimum charge, for the extension of the credit period. You will assess the service charge for each 30-day extension the charges go unpaid.

(3) You must deny credit to any shipper who fails to pay a duly-presented freight bill within the 30-day period. You may grant credit to the individual shipper when the individual shipper satisfies he/she will promptly pay all future freight bills duly presented.

(4) You must ensure all payments of freight bills are strictly in accordance with the rules and regulations of this part for the settlement of your rates and charges.

Subpart I—Penalties**§375.901 What penalties do we impose for violations of this part?**

The penalty provisions of 49 U.S.C. Chapter 149, Civil and Criminal Penalties apply to this part. These penalties do not overlap. Notwithstanding these civil penalties, nothing in this section shall deprive any holder of a receipt or a bill of lading any remedy or right of action under existing law.

APPENDIX A TO PART 375—YOUR RIGHTS AND RESPONSIBILITIES WHEN YOU MOVE

You must furnish this document to prospective individual shippers as required by 49 CFR 375.213. The text as it appears in this appendix may be reprinted in a form and manner chosen by you, provided it complies with

§375.213(b)(2) and (b)(3). You are not required to italicize titles of sections.

YOUR RIGHTS AND RESPONSIBILITIES WHEN YOU MOVE

OMB No. 2126-0025.

FURNISHED BY YOUR MOVER, AS REQUIRED BY FEDERAL LAW

AUTHORITY: 49 U.S.C. 13301, 13704, 13707, and 14104; 49 CFR 1.73.

What Is Included in This Pamphlet?

In this pamphlet, you will find a discussion of each of these topics:

Why Was I Given This Pamphlet?

What Are the Most Important Points I Should Remember From This Pamphlet?

What If I Have More Questions?

SUBPART A—GENERAL REQUIREMENTS

Who must follow the regulations?

What definitions are used in this pamphlet?

SUBPART B—BEFORE REQUESTING SERVICES FROM ANY MOVER

What is my mover's normal liability for loss or damage when my mover accepts goods from me?

What actions by me limit or reduce my mover's normal liability?

What are dangerous or hazardous materials that may limit or reduce my mover's normal liability?

May my mover have agents?

What items must be in my mover's advertisements?

How must my mover handle complaints and inquiries?

Do I have the right to inspect my mover's tariffs (schedules of charges) applicable to my move?

Must my mover have an arbitration program?

Must my mover inform me about my rights and responsibilities under Federal law?

What other information must my mover provide to me?

How must my mover collect charges?

May my mover collect charges upon delivery?

May my mover extend credit to me?

May my mover accept charge or credit cards for my payments?

SUBPART C—SERVICE OPTIONS PROVIDED

What service options may my mover provide?

If my mover sells liability insurance coverage, what must my mover do?

SUBPART D—ESTIMATING CHARGES

Must my mover estimate the transportation and accessorial charges for my move?

Pt. 375, App. A

49 CFR Ch. III (10–1–04 Edition)

How must my mover estimate charges under the regulations?

What payment arrangements must my mover have in place to secure delivery of my household goods shipment?

SUBPART E—PICKUP OF MY SHIPMENT OF HOUSEHOLD GOODS

Must my mover write up an order for service?

Must my mover write up an inventory of the shipment?

Must my mover write up a bill of lading?

Should I reach an agreement with my mover about pickup and delivery times?

Must my mover determine the weight of my shipment?

How must my mover determine the weight of my shipment?

What must my mover do if I want to know the actual weight or charges for my shipment before delivery?

SUBPART F—TRANSPORTATION OF MY SHIPMENT

Must my mover transport the shipment in a timely manner?

What must my mover do if it is able to deliver my shipment more than 24 hours before I am able to accept delivery?

What must my mover do for me when I store household goods in transit?

SUBPART G—DELIVERY OF MY SHIPMENT

May my mover ask me to sign a delivery receipt releasing it from liability?

What is the maximum collect-on-delivery amount my mover may demand I pay at the time of delivery?

If my shipment is transported on more than one vehicle, what charges may my mover collect at delivery?

If my shipment is partially or totally lost or destroyed, what charges may my mover collect at delivery?

How must my mover calculate the charges applicable to the shipment as delivered?

SUBPART H—COLLECTION OF CHARGES

Does this subpart apply to most shipments?

How must my mover present its freight or expense bill to me?

If I forced my mover to relinquish a collect-on-delivery shipment before the payment of ALL charges, how must my mover collect the balance?

What actions may my mover take to collect from me the charges in its freight bill?

Do I have a right to file a claim to recover money for property my mover lost or damaged?

SUBPART I—RESOLVING DISPUTES WITH MY MOVER

What may I do to resolve disputes with my mover?

WHY WAS I GIVEN THIS PAMPHLET?

The Federal Motor Carrier Safety Administration's (FMCSA) regulations protect consumers on interstate moves and define the rights and responsibilities of consumers and household goods carriers.

The household goods carrier (mover) gave you this booklet to provide information about your rights and responsibilities as an individual shipper of household goods. Your primary responsibility is to select a reputable household goods carrier, ensure that you understand the terms and conditions of the contract, and understand and pursue the remedies that are available to you in case problems arise. You should talk to your mover if you have further questions. The mover will also furnish you with additional written information describing its procedure for handling your questions and complaints. The additional written information will include a telephone number you can call to obtain additional information about your move.

WHAT ARE THE MOST IMPORTANT POINTS I SHOULD REMEMBER FROM THIS PAMPHLET?

1. Movers must give written estimates.
2. Movers may give binding estimates.
3. Non-binding estimates are not always accurate; actual charges may exceed the estimate.
4. If your mover provides you (or someone representing you) with any partially complete document for your signature, you should verify the document is as complete as possible before signing it. Make sure the document contains all relevant shipping information, except the actual shipment weight and any other information necessary to determine the final charges for all services performed.
5. You may request from your mover the availability of guaranteed pickup and delivery dates.
6. Be sure you understand the mover's responsibility for loss or damage, and request an explanation of the difference between valuation and actual insurance.
7. You have the right to be present each time your shipment is weighed.
8. You may request a reweigh of your shipment.
9. If you agree to move under a non-binding estimate, you should confirm with your mover—in writing—the method of payment at delivery as cash, certified check, cashier's check, money order, or credit card.
10. Movers must offer a dispute settlement program as an alternative means of settling

loss or damage claims. Ask your mover for details.

11. You should ask the person you speak to whether he or she works for the actual mover or a household goods broker. A household goods broker only arranges for the transportation. A household goods broker must not represent itself as a mover. A household goods broker does not own trucks of its own. The broker is required to find an authorized mover to provide the transportation. You should know that a household goods broker generally has no authority to provide you an estimate on behalf of a specific mover. If a household goods broker provides you an estimate, it may not be binding on the actual mover and you may have to pay the actual charges the mover incurs. A household goods broker is not responsible for loss or damage.

12. You may request complaint information about movers from the Federal Motor Carrier Safety Administration under the Freedom of Information Act. You may be assessed a fee to obtain this information. See 49 CFR part 7 for the schedule of fees.

13. You should seek estimates from at least three different movers. You should not disclose any information to the different movers about their competitors, as it may affect the accuracy of their estimates.

WHAT IF I HAVE MORE QUESTIONS?

If this pamphlet does not answer all of your questions about your move, do not hesitate to ask your mover's representative who handled the arrangements for your move, the driver who transports your shipment, or the mover's main office for additional information.

SUBPART A—GENERAL REQUIREMENTS

The primary responsibility for your protection lies with you in selecting a reputable household goods carrier, ensuring you understand the terms and conditions of your contract with your mover, and understanding and pursuing the remedies that are available to you in case problems arise.

WHO MUST FOLLOW THE REGULATIONS?

The regulations inform motor carriers engaged in the interstate transportation of household goods (movers) what standards they must follow when offering services to you. You, an individual shipper, are not directly subject to the regulations. However, your mover may be required by the regulations to force you to pay on time. The regulations only apply to your mover when the mover transports your household goods by motor vehicle in interstate commerce—that is, when you are moving from one State to another. The regulations do not apply when your interstate move takes place within a single commercial zone. A commercial zone

is roughly equivalent to the local metropolitan area of a city or town. For example, a move between Brooklyn, NY, and Hackensack, NJ, would be considered to be within the New York City commercial zone and would not be subject to these regulations. Commercial zones are defined in 49 CFR part 372.

WHAT DEFINITIONS ARE USED IN THIS PAMPHLET?

Accessorial (Additional) Services—These are services such as packing, appliance servicing, unpacking, or piano stair carries that you request to be performed (or that are necessary because of landlord requirements or other special circumstances). Charges for these services may be in addition to the line haul charges.

Advanced Charges—These are charges for services performed by someone other than the mover. A professional, craftsman, or other third party may perform these services at your request. The mover pays for these services and adds the charges to your bill of lading charges.

Advertisement—This is any communication to the public in connection with an offer or sale of any interstate household goods transportation service. This will include written or electronic database listings of your mover's name, address, and telephone number in an on-line database. This excludes listings of your mover's name, address, and telephone number in a telephone directory or similar publication. However, Yellow Pages advertising is included within the definition.

Agent—A local moving company authorized to act on behalf of a larger, national company.

Appliance Service by Third Party—The preparation of major electrical appliances to make them safe for shipment. Charges for these services may be in addition to the line haul charges.

Bill of Lading—The receipt for your goods and the contract for their transportation.

Carrier—The mover transporting your household goods.

Cash on Delivery (COD)—This means payment is required at the time of delivery at the destination residence (or warehouse).

Certified Scale—Any scale designed for weighing motor vehicles, including trailers or semitrailers not attached to a tractor, and certified by an authorized scale inspection and licensing authority. A certified scale may also be a platform or warehouse type scale that is properly inspected and certified.

Estimate, Binding—This is an agreement made in advance with your mover. It guarantees the total cost of the move based upon the quantities and services shown on the estimate.

Estimate, Non-Binding—This is what your mover believes the cost will be, based upon

the estimated weight of the shipment and the accessorial services requested. A non-binding estimate is not binding on the mover. The final charges will be based upon the actual weight of your shipment, the services provided, and the tariff provisions in effect.

Expedited Service—This is an agreement with the mover to perform transportation by a set date in exchange for charges based upon a higher minimum weight.

Flight Charge—A charge for carrying items up or down flights of stairs. Charges for these services may be in addition to the line haul charges.

Guaranteed Pickup and Delivery Service—An additional level of service featuring guaranteed dates of service. Your mover will provide reimbursement to you for delays. This premium service is often subject to minimum weight requirements.

High Value Article—These are items included in a shipment valued at more than \$100 per pound (\$220 per kilogram).

Household Goods, as used in connection with transportation, means the personal effects or property used, or to be used, in a dwelling, when part of the equipment or supplies of the dwelling. Transportation of the household goods must be arranged and paid for by you or by another individual on your behalf. This may include items moving from a factory or store when you purchase them to use in your dwelling. You must request that these items be transported, and you (or another individual on your behalf) must pay the transportation charges to the mover.

Inventory—The detailed descriptive list of your household goods showing the number and condition of each item.

Line Haul Charges—The charges for the vehicle transportation portion of your move. These charges, if separately stated, apply in addition to the accessorial service charges.

Long Carry—A charge for carrying articles excessive distances between the mover's vehicle and your residence. Charges for these services may be in addition to the line haul charges.

May—An option. You or your mover may do something, but it is not a requirement.

Mover—A motor carrier engaged in the transportation of household goods and its household goods agents.

Must—A legal obligation. You or your mover must do something.

Order for Service—The document authorizing the mover to transport your household goods.

Order (Bill of Lading) Number—The number used to identify and track your shipment.

Peak Season Rates—Higher line haul charges applicable during the summer months.

Pickup and Delivery Charges—Separate transportation charges applicable for trans-

porting your shipment between the storage-in-transit warehouse and your residence.

Reasonable Dispatch—The performance of transportation on the dates, or during the period of time, agreed upon by you and your mover and shown on the Order for Service/Bill of Lading. For example, if your mover deliberately withholds any shipment from delivery after you offer to pay the binding estimate or 110 percent of a non-binding estimate, your mover has not transported the goods with reasonable dispatch. The term "reasonable dispatch" excludes transportation provided under your mover's tariff provisions requiring guaranteed service dates. Your mover will have the defense of force majeure, i.e., that the contract cannot be performed owing to causes that are outside the control of the parties and that could not be avoided by exercise of due care.

Should—A recommendation. We recommend you or your mover do something, but it is not a requirement.

Shuttle Service—The use of a smaller vehicle to provide service to residences not accessible to the mover's normal line haul vehicles.

Storage-In-Transit (SIT)—The temporary warehouse storage of your shipment pending further transportation, with or without notification to you. If you (or someone representing you) cannot accept delivery on the agreed-upon date or within the agreed-upon time period (for example, because your home is not quite ready to occupy), your mover may place your shipment into SIT without notifying you. In those circumstances, you will be responsible for the added charges for SIT service, as well as the warehouse handling and final delivery charges.

However, your mover also may place your shipment into SIT if your mover was able to make delivery before the agreed-upon date (or before the first day of the agreed-upon delivery period), but you did not concur with early delivery. In those circumstances, your mover must notify you immediately of the SIT, and your mover is fully responsible for redelivery charges, handling charges, and storage charges.

Surface Transportation Board—An agency within the U.S. Department of Transportation that regulates household goods carrier tariffs, among other responsibilities. The Surface Transportation Board's address is 1925 K Street, NW., Washington, DC 20423–0001 Tele. 202–565–1674.

Tariff—An issuance (in whole or in part) containing rates, rules, regulations, classifications, or other provisions. The Surface Transportation Board requires that a tariff contain three specific items. First, an accurate description of the services the mover offers to the public. Second, the specific applicable rates (or the basis for calculating the specific applicable rates) and service terms for services offered to the public. Third, the

mover's tariff must be arranged in a way that allows you to determine the exact rate(s) and service terms applicable to your shipment.

Valuation—The degree of worth of the shipment. The valuation charge compensates the mover for assuming a greater degree of liability than is provided for in its base transportation charges.

Warehouse Handling—A charge may be applicable each time SIT service is provided. Charges for these services may be in addition to the line haul charges. This charge compensates the mover for the physical placement and removal of items within the warehouse.

We, Us, and Our—The Federal Motor Carrier Safety Administration (FMCSA).

You and Your—You are an individual shipper of household goods. You are a consignor or consignee of a household goods shipment and your mover identifies you as such in the bill of lading contract. You own the goods being transported and pay the transportation charges to the mover.

Where may other terms used in this pamphlet be defined? You may find other terms used in this pamphlet defined in 49 U.S.C. 13102. The statute controls the definitions in this pamphlet. If terms are used in this pamphlet and the terms are defined neither here nor in 49 U.S.C. 13102, the terms will have the ordinary practical meaning of such terms.

SUBPART B—BEFORE REQUESTING SERVICES FROM ANY MOVER

WHAT IS MY MOVER'S NORMAL LIABILITY FOR LOSS OR DAMAGE WHEN MY MOVER ACCEPTS GOODS FROM ME?

In general, your mover is legally liable for loss or damage that occurs during performance of any transportation of household goods and of all related services identified on your mover's lawful bill of lading.

Your mover is liable for loss of, or damage to, any household goods to the extent provided in the current Surface Transportation Board's Released Rates Order. You may obtain a copy of the current Released Rates Order by contacting the Surface Transportation Board at the address provided under the definition of the Surface Transportation Board. The rate may be increased annually by your mover based on the U.S. Department of Commerce's Cost of Living Adjustment. Your mover may have additional liability if your mover sells liability insurance to you.

All moving companies are required to assume liability for the value of the goods transported. However, there are different levels of liability, and you should be aware of the amount of protection provided and the charges for each option.

Basically, most movers offer two different levels of liability (options 1 and 2 below) under the terms of their tariffs and the Sur-

face Transportation Board's Released Rates Orders. These orders govern the moving industry.

Option 1: Released Value

This is the most economical protection option available. This no-additional-cost option provides minimal protection. Under this option, the mover assumes liability for no more than 60 cents per pound (\$1.32 cents per kilogram), per article. Loss or damage claims are settled based upon the pound (kilogram) weight of the article multiplied by 60 cents per pound (\$1.32 cents per kilogram). For example, if your mover lost or destroyed a 10-pound (4.54-kilogram) stereo component valued at \$1,000, your mover would be liable for no more than \$6.00. Obviously, you should think carefully before agreeing to such an arrangement. There is no extra charge for this minimal protection, but you must sign a specific statement on the bill of lading agreeing to it.

Option 2: Full Value Protection (FVP)

Under this option, the mover is liable for the replacement value of lost or damaged goods (as long as it doesn't exceed the total declared value of the shipment). If you elect to purchase full value protection, and your mover loses, damages or destroys your articles, your mover must repair, replace with like items, or settle in cash at the current market replacement value, regardless of the age of the lost or damaged item. The minimum declared value of a shipment under this option is \$5,000 or \$4.00 times the actual total weight (in pounds) of the shipment, whichever is greater. For example, the minimum declared value for a 4,000-pound (1,814.4-kilogram) shipment would be \$16,000. Your mover may offer you FVP with a \$250 or \$500 deductible, or with no deductible at all. The amount of the deductible will affect the cost of your FVP coverage. The \$4.00 per pound minimum valuation rate may be increased annually by your mover based on changes in the household furnishings element of the Consumer Price Index established by the U.S. Department of Labor's Bureau of Labor Statistics.

Unless you specifically agree to other arrangements, the mover must assume liability for the entire shipment based upon this option. The approximate cost for FVP is \$8.50 for each \$1,000 of declared value; however, it may vary by mover. In the example above, the valuation charge for a shipment valued at \$16,000 would be \$136.00. As noted above, this fee may be adjusted annually by your mover based on changes in the household furnishings element of the Consumer Price Index.

Under both of these liability options, movers are permitted to limit their liability for loss or damage to articles of extraordinary

Pt. 375, App. A

49 CFR Ch. III (10–1–04 Edition)

value, unless you specifically list these articles on the shipping documents. An article of extraordinary value is any item whose value exceeds \$100 per pound (\$220 per kilogram). Ask your mover for a complete explanation of this limitation before your move. It is your responsibility to study this provision carefully and make the necessary declaration.

These optional levels of liability are not insurance agreements governed by State insurance laws, but instead are authorized under Released Rates Orders of the Surface Transportation Board of the U.S. Department of Transportation.

In addition to these options, some movers may also offer to sell, or procure for you, separate liability insurance from a third-party insurance company when you release your shipment for transportation at the minimum released value of 60 cents per pound (\$1.32 per kilogram) per article (option 1). This is not valuation coverage governed by Federal law, but optional insurance regulated under State law. If you purchase this separate coverage and your mover is responsible for loss or damage, the mover is liable only for an amount not exceeding 60 cents per pound (\$1.32 per kilogram) per article, and the balance of the loss is recoverable from the insurance company up to the amount of insurance purchased. The mover's representative can advise you of the availability of such liability insurance, and the cost.

If you purchase liability insurance from or through your mover, the mover is required to issue a policy or other written record of the purchase and to provide you with a copy of the policy or other document at the time of purchase. If the mover fails to comply with this requirement, the mover becomes fully liable for any claim for loss or damage attributed to its negligence.

WHAT ACTIONS BY ME LIMIT OR REDUCE MY MOVER'S NORMAL LIABILITY?

Your actions may limit or reduce your mover's normal liability under the following three circumstances:

- (1) You include perishable, dangerous, or hazardous materials in your household goods without your mover's knowledge.
- (2) You choose liability option 1 but ship household goods valued at more than 60 cents per pound (\$1.32 per kilogram) per article.
- (3) You fail to notify your mover in writing of articles valued at more than \$100 per pound (\$220 per kilogram). (If you *do* notify your mover, you will be entitled to full recovery up to the declared value of the article or articles, not to exceed the declared value of the entire shipment.)

WHAT ARE DANGEROUS OR HAZARDOUS MATERIALS THAT MAY LIMIT OR REDUCE MY MOVER'S NORMAL LIABILITY?

Federal law forbids you to ship hazardous materials in your household goods boxes or luggage without informing your mover. A violation can result in five years' imprisonment and penalties of \$250,000 or more (49 U.S.C. 5124). You could also lose or damage your household goods by fire, explosion, or contamination.

If you offer hazardous materials to your mover, you are considered a hazardous materials shipper and must comply with the hazardous materials requirements in 49 CFR parts 171, 172, and 173, including but not limited to package labeling and marking, shipping papers, and emergency response information. Your mover must comply with 49 CFR parts 171, 172, 173, and 177 as a hazardous materials carrier.

Hazardous materials include explosives, compressed gases, flammable liquids and solids, oxidizers, poisons, corrosives, and radioactive materials. Examples: Nail polish remover, paints, paint thinners, lighter fluid, gasoline, fireworks, oxygen bottles, propane cylinders, automotive repair and maintenance chemicals, and radio-pharmaceuticals.

There are special exceptions for small quantities (up to 70 ounces total) of medicinal and toilet articles carried in your household goods and certain smoking materials carried on your person. For further information, contact your mover.

MAY MY MOVER HAVE AGENTS?

Yes, your mover may have agents. If your mover has agents, your mover must have written agreements with its prime agents. Your mover and its retained prime agent must sign their agreements. Copies of your mover's prime agent agreements must be in your mover's files for a period of at least 24 months following the date of termination of each agreement.

WHAT ITEMS MUST BE IN MY MOVER'S ADVERTISEMENTS?

Your mover must publish and use only truthful, straightforward, and honest advertisements. Your mover must include certain information in all advertisements for all services (including any accessorial services incidental to or part of interstate transportation). Your mover must require each of its agents to include the same information in its advertisements. The information must include the following two pieces of information about your mover:

- (1) Name or trade name of the mover under whose USDOT number the advertised service will originate.
- (2) USDOT number, assigned by FMCSA, authorizing your mover to operate. Your

mover must display the information as: USDOT No. (assigned number).

You should compare the name or trade name of the mover and its USDOT number to the name and USDOT number on the sides of the truck(s) that arrive at your residence. The names and numbers should be identical. If the names and numbers are not identical, you should ask your mover immediately why they are not. You should not allow the mover to load your household goods on its truck(s) until you obtain a satisfactory response from the mover's local agent. The discrepancies may warn of problems you will have later in your business dealings with this mover.

HOW MUST MY MOVER HANDLE COMPLAINTS AND INQUIRIES?

All movers are expected to respond promptly to complaints or inquiries from you, the customer. Should you have a complaint or question about your move, you should first attempt to obtain a satisfactory response from the mover's local agent, the sales representative who handled the arrangements for your move, or the driver assigned to your shipment.

If for any reason you are unable to obtain a satisfactory response from one of these persons, you should then contact the mover's principal office. When you make such a call, be sure to have available your copies of all documents relating to your move. *Particularly important is the number assigned to your shipment by your mover.*

Interstate movers are also required to offer neutral arbitration as a means of resolving consumer loss or damage disputes involving loss of or damage to household goods. Your mover is required to provide you with information regarding its arbitration program. You have the right to pursue court action under 49 U.S.C. 14706 to seek judicial redress directly rather than participate in your mover's arbitration program.

All interstate moving companies are required to maintain a complaint and inquiry procedure to assist their customers. At the time you make the arrangements for your move, you should ask the mover's representative for a description of the mover's procedure, the telephone number to be used to contact the mover, and whether the mover will pay for such telephone calls. Your mover's procedure must include the following four things:

- (1) A communications system allowing you to communicate with your mover's principal place of business by telephone.
- (2) A telephone number.
- (3) A clear and concise statement about who must pay for complaint and inquiry telephone calls.
- (4) A written or electronic record system for recording all inquiries and complaints re-

ceived from you by any means of communication.

Your mover must give you a clear and concise written description of its procedure. You may want to be certain that the system is in place.

DO I HAVE THE RIGHT TO INSPECT MY MOVER'S TARIFFS (SCHEDULES OF CHARGES) APPLICABLE TO MY MOVE?

Federal law requires your mover to advise you of your right to inspect your mover's tariffs (its schedules of rates or charges) governing your shipment. Movers' tariffs are made a part of the contract of carriage (bill of lading) between you and the mover. You may inspect the tariff at the mover's facility, or, upon request, the mover will furnish you a free copy of any tariff provision containing the mover's rates, rules, or charges governing your shipment.

Tariffs may include provisions limiting the mover's liability. This would generally be described in a section on declaring value on the bill of lading. A second tariff provision may set the periods for filing claims. This would generally be described in Section 6 on the reverse side of a bill of lading. A third tariff provision may reserve your mover's right to assess additional charges for additional services performed. For non-binding estimates, another tariff provision may base charges upon the exact weight of the goods transported. Your mover's tariff may contain other provisions that apply to your move. Ask your mover what they might be, and request a copy.

MUST MY MOVER HAVE AN ARBITRATION PROGRAM?

Your mover must have an arbitration program for your use in resolving disputes concerning loss or damage to your household goods. You have the right not to participate in the arbitration program. You may pursue court action under 49 U.S.C. 14706 to seek judicial remedies directly. Your mover must establish and maintain an arbitration program with the following 11 minimum elements:

- (1) The arbitration program offered to you must prevent your mover from having any special advantage because you live or work in a place distant from the mover's principal or other place of business.
- (2) Before your household goods are tendered for transport, your mover must provide notice to you of the availability of neutral arbitration, including the following three things:
 - (a) A summary of the arbitration procedure.
 - (b) Any applicable costs.
 - (c) A disclosure of the legal effects of electing to use arbitration.

(3) Upon your request, your mover must provide information and forms it considers necessary for initiating an action to resolve a dispute under arbitration.

(4) Each person authorized to arbitrate must be independent of the parties to the dispute and capable of resolving such disputes fairly and expeditiously. Your mover must ensure the arbitrator is authorized and able to obtain from you or your mover any material or relevant information to carry out a fair and expeditious decision-making process.

(5) You must not be required to pay more than one-half of the arbitration's cost. The arbitrator may determine the percentage of payment of the costs for each party in the arbitration decision, but must not make you pay more than half.

(6) Your mover must not require you to agree to use arbitration before a dispute arises.

(7) You will be bound by arbitration for claims of \$5,000 or less if you request arbitration.

(8) You will be bound by arbitration for claims of more than \$5,000 only if you request arbitration and your mover agrees to it.

(9) If you and your mover both agree, the arbitrator may provide for an oral presentation of a dispute by a party or representative of a party.

(10) The arbitrator must render a decision within 60 days of receipt of written notification of the dispute, and a decision by an arbitrator may include any remedies appropriate under the circumstances.

(11) The 60-day period may be extended for a reasonable period if you fail, or your mover fails, to provide information in a timely manner.

Your mover must produce and distribute a concise, easy-to-read, accurate summary of its arbitration program.

MUST MY MOVER INFORM ME ABOUT MY RIGHTS AND RESPONSIBILITIES UNDER FEDERAL LAW?

Yes, your mover must inform you about your rights and responsibilities under Federal law. Your mover must produce and distribute this document. It should be in the general order and contain the text of appendix A to 49 CFR part 375.

WHAT OTHER INFORMATION MUST MY MOVER PROVIDE ME?

Before your mover executes an order for service for a shipment of household goods, your mover must furnish you with the following four documents:

(1) The contents of appendix A, "Your Rights and Responsibilities When You Move"—this pamphlet.

(2) A concise, easy-to-read, accurate summary of your mover's arbitration program.

(3) A notice of availability of the applicable sections of your mover's tariff for the estimate of charges, including an explanation that you may examine the tariff sections or have copies sent to you upon request.

(4) A concise, easy-to-read, accurate summary of your mover's customer complaint and inquiry handling procedures. Included in this summary must be the following two items:

(a) The main telephone number you may use to communicate with your mover.

(b) A clear and concise statement concerning who must pay for telephone calls.

Your mover may, at its discretion, provide additional information to you.

HOW MUST MY MOVER COLLECT CHARGES?

Your mover must issue you an honest, truthful freight or expense bill for each shipment transported. Your mover's freight or expense bill must contain the following 19 items:

(1) Name of the consignor.

(2) Name of the consignees.

(3) Date of the shipment.

(4) Origin point.

(5) Destination points.

(6) Number of packages.

(7) Description of the freight.

(8) Weight of the freight (if applicable to the rating of the freight).

(9) The volume of the freight (if applicable to the rating of the freight).

(10) The measurement of the freight (if applicable to the rating of the freight).

(11) Exact rate(s) assessed.

(12) Disclosure of the actual rates, charges, and allowances for the transportation service, when your mover electronically presents or transmits freight or expense bills to you. These rates must be in accordance with the mover's applicable tariff.

(13) An indication of whether adjustments may apply to the bill.

(14) Total charges due and acceptable methods of payment.

(15) The nature and amount of any special service charges.

(16) The points where special services were rendered.

(17) Route of movement and name of each mover participating in the transportation.

(18) Transfer points where shipments moved.

(19) Address where you must pay or address of bill issuer's principal place of business.

Your mover must present its freight or expense bill to you within 15 days of the date of delivery of a shipment at its destination. The computation of time excludes Saturdays, Sundays, and Federal holidays. (Bills for charges exceeding 110 percent of a non-binding estimate, and for additional services

requested or found necessary after the shipment is in transit, will be presented no sooner than 30 days after the date of delivery.)

If your mover lacks sufficient information to compute its charges, your mover must present its freight bill for payment within 15 days of the date when sufficient information does become available.

MAY MY MOVER COLLECT CHARGES UPON DELIVERY?

Yes. Your mover must specify the form of payment acceptable at delivery when the mover prepares an estimate and order for service. The mover and its agents must honor the form of payment at delivery, except when you mutually agree to a change in writing. The mover must also specify the same form of payment when it prepares your bill of lading, unless you agree to a change. See also "May my mover accept charge or credit cards for my payments?"

You must be prepared to pay 10 percent more than the estimated amount, if your goods are moving under a non-binding estimate. Every collect-on-delivery shipper must have available 110 percent of the estimate at the time of delivery.

MAY MY MOVER EXTEND CREDIT TO ME?

Extending credit to you is not the same as accepting your charge or credit card(s) as payment. Your mover may extend credit to you in the amount of the tariff charges. If your mover extends credit to you, your mover becomes like a bank offering you a line of credit, whose size and interest rate are determined by your ability to pay its tariff charges within the credit period. Your mover must ensure you will pay its tariff charges within the credit period. Your mover may relinquish possession of freight before you pay its tariff charges, at its discretion.

The credit period must begin on the day following presentation of your mover's freight bill to you. Under Federal regulation, the standard credit period is 7 days, excluding Saturdays, Sundays, and Federal holidays. Your mover must also extend the credit period to a total of 30 calendar days if the freight bill is not paid within the 7-day period. A service charge equal to one percent of the amount of the freight bill, subject to a \$20 minimum, will be assessed for this extension and for each additional 30-day period the charges go unpaid.

Your failure to pay within the credit period will require your mover to determine whether you will comply with the Federal household goods transportation credit regulations in good faith in the future before extending credit again.

MAY MY MOVER ACCEPT CHARGE OR CREDIT CARDS FOR MY PAYMENTS?

Your mover may allow you to use a charge or credit card for payment of the freight charges. Your mover may accept charge or credit cards whenever you ship with it under an agreement and tariff requiring payment by cash or cash equivalents. Cash equivalents are a certified check, money order, or cashier's check (a check that a financial institution—bank, credit union, savings and loan—draws upon itself and that is signed by an officer of the financial institution).

If your mover allows you to pay for a freight or expense bill by charge or credit card, your mover deems such a payment to be equivalent to payment by cash, certified check, or cashier's check. It must note in writing on the order for service and the bill of lading whether you may pay for the transportation and related services using a charge or credit card. You should ask your mover at the time the estimate is written whether it will accept charge or credit cards at delivery.

The mover must specify what charge or credit cards it will accept, such as American Express™, Discover™, MasterCard™, or Visa™. If your mover agrees to accept payment by charge or credit card, you must arrange with your mover for the delivery only at a time when your mover can obtain authorization for your credit card transaction.

If you cause a charge or credit card issuer to reverse a transaction, your mover may consider your action tantamount to forcing your mover to provide an involuntary extension of its credit.

SUBPART C—SERVICE OPTIONS PROVIDED

WHAT SERVICE OPTIONS MAY MY MOVER PROVIDE?

Your mover may provide any service options it chooses. It is customary for movers to offer several price and service options.

The total cost of your move may increase if you want additional or special services. Before you agree to have your shipment moved under a bill of lading providing special service, you should have a clear understanding with your mover of what the additional cost will be. You should always consider whether other movers may provide the services you require without requiring you to pay the additional charges.

One service option is a *space reservation*. If you agree to have your shipment transported under a space reservation agreement, you will pay for a minimum number of cubic feet of space in the moving van regardless of how much space in the van your shipment actually occupies.

A second option is *expedited service*. This aids you if you must have your shipments transported on or between specific dates

when the mover could not ordinarily agree to do so in its normal operations.

A third customary service option is *exclusive use of a vehicle*. If for any reason you desire or require that your shipment be moved by itself on the mover's truck or trailer, most movers will provide such service.

Another service option is *guaranteed service on or between agreed dates*. You enter into an agreement with the mover where the mover provides for your shipment to be picked up, transported to destination, and delivered on specific guaranteed dates. If the mover fails to provide the service as agreed, you are entitled to be compensated at a predetermined amount or a daily rate (per diem) regardless of the expense you might actually have incurred as a result of the mover's failure to perform.

Before requesting or agreeing to any of these price and service options, be sure to ask the mover's representatives about the final costs you will pay.

Transport of Shipments on Two or More Vehicles

Although all movers try to move each shipment on one truck, it becomes necessary, at times, to divide a shipment among two or more trucks. This may occur if your mover has underestimated the cubic feet (meters) of space required for your shipment and it will not all fit on the first truck. Your mover will pick up the remainder, or "leave behind," on a second truck at a later time, and this part of your shipment may arrive at the destination later than the first truck. When this occurs, your transportation charges will be determined as if the entire shipment had moved on one truck.

If it is important for you to avoid this inconvenience of a "leave behind," be sure your estimate includes an accurate calculation of the cubic feet (meters) required for your shipment. Ask your estimator to use a "Table of Measurements" form in making this calculation. Consider asking for a binding estimate. A binding estimate is more likely to be conservative with regard to cubic feet (meters) than a non-binding estimate. If the mover offers space reservation service, consider purchasing this service for the necessary amount of space plus some margin for error. In any case, you would be prudent to "prioritize" your goods in advance of the move so the driver will load the more essential items on the first truck if some are left behind.

IF MY MOVER SELLS LIABILITY INSURANCE COVERAGE, WHAT MUST MY MOVER DO?

If your mover provides the service of selling additional liability insurance, your mover must follow certain regulations.

Your mover, its employees, or its agents, may sell, offer to sell, or procure additional

liability insurance coverage for you for loss or damage to your shipment if you release the shipment for transportation at a value not exceeding 60 cents per pound (\$1.32 per kilogram) per article.

Your mover may offer, sell, or procure any type of insurance policy covering loss or damage in excess of its specified liability.

Your mover must issue you a policy or other appropriate evidence of the insurance you purchased. Your mover must provide a copy of the policy or other appropriate evidence to you at the time your mover sells or procures the insurance. Your mover must issue policies written in plain English.

Your mover must clearly specify the nature and extent of coverage under the policy. Your mover's failure to issue you a policy, or other appropriate evidence of insurance you purchased, will subject your mover to full liability for any claims to recover loss or damage attributed to it.

Your mover's tariff must provide for liability insurance coverage. The tariff must also provide for the base transportation charge, including its assumption of full liability for the value of the shipment. This would offer you a degree of protection in the event your mover fails to issue you a policy or other appropriate evidence of insurance at the time of purchase.

SUBPART D—ESTIMATING CHARGES

MUST MY MOVER ESTIMATE THE TRANSPORTATION AND ACCESSORIAL CHARGES FOR MY MOVE?

We require your mover to prepare a written estimate on every shipment transported for you. You are entitled to a copy of the written estimate when your mover prepares it. Your mover must provide you a written estimate of all charges, including transportation, accessorial, and advance charges. Your mover's "rate quote" is not an estimate. You and your mover must sign the estimate of charges. Your mover must provide you with a dated copy of the estimate of charges at the time you sign the estimate.

You should be aware that if you receive an estimate from a household goods broker, the mover is not required to accept the estimate. Be sure to obtain a written estimate from the mover if a mover tells you orally that it will accept the broker's estimate.

Your mover must specify the form of payment the mover and its delivering agent will honor at delivery. Payment forms may include but are not limited to cash, certified check, money order, cashier's check, a specific charge card such as American Express™, a specific credit card such as Visa™, and your mover's own credit.

If your mover provides you with an estimate based on volume that will later be converted to a weight-based rate, the mover must provide you an explanation in writing

of the formula used to calculate the conversion to weight. Your mover must specify that the final charges will be based on actual weight and services. Before loading your household goods, and upon mutual agreement between you and your mover, your mover may amend an estimate of charges. Your mover may not amend the estimate after loading the shipment.

A *binding estimate* is an agreement made in advance with your mover. It guarantees the total cost of the move based upon the quantities and services shown on your mover's estimate.

A *non-binding estimate* is what your mover believes the total cost will be for the move, based upon the estimated weight of the shipment and the accessorial services requested. A non-binding estimate is not binding on your mover. Your mover will base the final charges upon the actual weight of your shipment, the services provided, and its tariff provisions in effect. You must be prepared to pay 10 percent more than the estimated amount at delivery.

HOW MUST MY MOVER ESTIMATE CHARGES UNDER THE REGULATIONS?

Binding Estimates

Your mover may charge you for providing a binding estimate. The binding estimate must clearly describe the shipment and all services provided.

When you receive a binding estimate, you cannot be required to pay any more than the estimated amount at delivery. If you have requested the mover provide more services than those included in the estimate, the mover must not demand full payment for those added services at time of delivery. Instead, the mover must bill for those services later, as explained below. Such services might include destination charges that often are not known at origin (such as long carry charges, shuttle charges, or extra stair carry charges).

A binding estimate must be in writing, and a copy must be made available to you before you move.

If you agree to a binding estimate, you are responsible for paying the charges due by cash, certified check, money order, or cashier's check. The charges are due your mover at the time of delivery unless your mover agrees, before you move, to extend credit or to accept payment by a specific charge card such as American Express™ or a specific credit card such as Visa™. If you are unable to pay at the time the shipment is delivered, the mover may place your shipment in storage at your expense until you pay the charges.

Other requirements of binding estimates include the following eight elements:

(1) Your mover must retain a copy of each binding estimate as an attachment to the bill of lading.

(2) Your mover must clearly indicate upon each binding estimate's face that the estimate is binding upon you and your mover. Each binding estimate must also clearly indicate on its face that the charges shown are the charges to be assessed for only those services specifically identified in the estimate.

(3) Your mover must clearly describe binding estimate shipments and all services to be provided.

(4) If, before loading your shipment, your mover believes you are tendering additional household goods or are requiring additional services not identified in the binding estimate, and you and your mover cannot reach an agreement, your mover may refuse to service the shipment. If your mover agrees to service the shipment, your mover must do one of the following three things:

(a) Reaffirm the binding estimate.

(b) Negotiate a revised written binding estimate listing the additional household goods or services.

(c) Add an attachment to the contract, in writing, stating you both will consider the original binding estimate as a non-binding estimate. You should read more below. This may seriously affect how much you may pay for the entire move.

(5) Once your mover loads your shipment, your mover's failure to execute a new binding estimate or to agree with you to treat the original estimate as a non-binding estimate signifies it has reaffirmed the original binding estimate. Your mover may not collect more than the amount of the original binding estimate, except as provided in the next two paragraphs.

(6) Your mover may believe additional services are necessary to properly service your shipment after your household goods are in transit. Your mover must inform you what the additional services are before performing them. Your mover must allow you at least one hour to determine whether you want the additional services performed. Such additional services include carrying your furniture up additional stairs or using an elevator. If these services do not appear on your mover's estimate, your mover must deliver your shipment and bill you later for the additional services.

If you agree to pay for the additional services, your mover must execute a written attachment to be made an integral part of the bill of lading and have you sign the written attachment. This may be done through fax transmissions. You will be billed for the additional services 30 days following the date of delivery.

(7) If you add additional services after your household goods are in transit, you will be billed for the additional services but only be

expected to pay the full amount of the binding estimate to receive delivery. Your mover must bill you for the balance of any remaining charges for these additional services no sooner than 30 days after delivery. For example, if your binding estimate shows total charges at delivery should be \$1,000 but your actual charges at destination are \$1,500, your mover must deliver the shipment upon payment of \$1,000. The mover must bill you for the remaining \$500 no sooner than 30 days after the date of delivery.

(8) Failure of your mover to relinquish possession of a shipment upon your offer to pay the binding estimate amount constitutes your mover's failure to transport a shipment with "reasonable dispatch" and subjects your mover to cargo delay claims pursuant to 49 CFR part 370.

Non-Binding Estimates

Your mover is not permitted to charge you for giving a non-binding estimate.

A non-binding estimate is not a bid or contract. Your mover provides it to you to give you a general idea of the cost of the move, but it does not bind your mover to the estimated cost. You should expect the final cost to be more than the estimate. The actual cost will be in accordance with your mover's tariffs. Federal law requires your mover to collect the charges shown in its tariffs, regardless of what your mover writes in its non-binding estimates. That is why it is important to ask for copies of the applicable portions of the mover's tariffs before deciding on a mover. The charges contained in movers' tariffs are essentially the same for the same weight shipment moving the same distance. If you obtain different non-binding estimates from different movers, you must pay only the amount specified in your mover's tariff. Therefore, a non-binding estimate may have no effect on the amount that you will ultimately have to pay.

You must be prepared to pay 10 percent more than the estimated amount at the time of delivery. Every collect-on-delivery shipper must have available 110 percent of the estimate at the time of delivery. If you order additional services from your mover after your goods are in transit, the mover will then bill you 30 days after delivery for any remaining charges.

Non-binding estimates must be in writing and clearly describe the shipment and all services provided. Any time a mover provides such an estimate, the amount of the charges estimated must be on the order for service and bill of lading related to your shipment. When you are given a non-binding estimate, do not sign or accept the order for service or bill of lading unless the mover enters the amount estimated on each form it prepares.

Other requirements of non-binding estimates include the following 10 elements:

(1) Your mover must provide reasonably accurate non-binding estimates based upon the estimated weight of the shipment and services required.

(2) Your mover must explain to you that all charges on shipments moved under non-binding estimates will be those appearing in your mover's tariffs applicable to the transportation. If your mover provides a non-binding estimate of approximate costs, your mover is not bound by such an estimate.

(3) Your mover must furnish non-binding estimates without charge and in writing to you.

(4) Your mover must retain a copy of each non-binding estimate as an attachment to the bill of lading.

(5) Your mover must clearly indicate on the face of a non-binding estimate that the estimate is not binding upon your mover and the charges shown are the approximate charges to be assessed for the services identified in the estimate.

(6) Your mover must clearly describe on the face of a non-binding estimate the entire shipment and all services to be provided.

(7) If, before loading your shipment, your mover believes you are tendering additional household goods or requiring additional services not identified in the non-binding estimate, and you and your mover cannot reach an agreement, your mover may refuse to service the shipment. If your mover agrees to service the shipment, your mover must do one of the following two things:

(a) Reaffirm the non-binding estimate.

(b) Negotiate a revised written non-binding estimate listing the additional household goods or services.

(8) Once your mover loads your shipment, your mover's failure to execute a new estimate signifies it has reaffirmed the original non-binding estimate. Your mover may not collect more than 110 percent of the amount of this estimate at destination.

(9) Your mover may believe additional services are necessary to properly service your shipment after your household goods are in transit. Your mover must inform you what the additional services are before performing them. Your mover must allow you at least one hour to determine whether you want the additional services performed. Such additional services include carrying your furniture up additional stairs or using an elevator. If these services do not appear on your mover's estimate, your mover must deliver your shipment and bill you later for the additional services.

If you agree to pay for the additional services, your mover must execute a written attachment to be made an integral part of the bill of lading and have you sign the written attachment. This may be done through fax transmissions. You will be billed for the additional services after 30 days from delivery.

(10) If you add additional services after your household goods are in transit, you will be billed for the additional services. To receive delivery, however, you are required to pay no more than 110 percent of the non-binding estimate. At least 30 days after delivery, your mover must bill you for any remaining balance, including the additional services you requested. For example, if your non-binding estimate shows total charges at delivery should be \$1,000 but your actual charges at destination are \$1,500, your mover must deliver the shipment upon payment of \$1,100. The mover must bill you for the remaining \$400 no sooner than 30 days after the date of delivery.

If your mover furnishes a non-binding estimate, your mover must enter the estimated charges upon the order for service and upon the bill of lading.

Your mover must retain a record of all estimates of charges for each move performed for at least one year from the date your mover made the estimate.

WHAT PAYMENT ARRANGEMENTS MUST MY MOVER HAVE IN PLACE TO SECURE DELIVERY OF MY HOUSEHOLD GOODS SHIPMENT?

If your total bill is 110 percent or less of the non-binding estimate, the mover can require payment in full upon delivery. If the bill exceeds 110 percent of the non-binding estimate, your mover must relinquish possession of the shipment at the time of delivery upon payment of 110 percent of the estimated amount. Your mover should have specified its acceptable form of payment on the estimate, order for service, and bill of lading. Your mover's failure to relinquish possession of a shipment after you offer to pay 110 percent of the estimated charges constitutes its failure to transport the shipment with "reasonable dispatch" and subjects your mover to your cargo delay claims under 49 CFR part 370.

Your mover must bill for the payment of the balance of any remaining charges after 30 days from delivery.

SUBPART E—PICKUP OF MY SHIPMENT OF HOUSEHOLD GOODS

Must My Mover Write Up an Order for Service?

We require your mover to prepare an order for service on every shipment transported for you. You are entitled to a copy of the order for service when your mover prepares it.

The order for service is not a contract. Should you cancel or delay your move or if you decide not to use the mover, you should promptly cancel the order.

If you or your mover change any agreed-upon dates for pickup or delivery of your shipment, or agree to any change in the non-binding estimate, your mover may prepare a written change to the order for service. The

written change must be attached to the order for service.

The order for service must contain the following 15 elements:

(1) Your mover's name and address and the USDOT number assigned to your mover.

(2) Your name, address and, if available, telephone number(s).

(3) The name, address, and telephone number of the delivering mover's office or agent at or nearest to the destination of your shipment.

(4) A telephone number where you may contact your mover or its designated agent.

(5) One of the following three dates and times:

(i) The agreed-upon pickup date and agreed delivery date of your move.

(ii) The agreed-upon period(s) of the entire move.

(iii) If your mover is transporting the shipment on a guaranteed service basis, the guaranteed dates or periods of time for pickup, transportation, and delivery. Your mover must enter any penalty or per diem requirements upon the agreement under this item.

(6) The names and addresses of any other motor carriers, when known, that will participate in interline transportation of the shipment.

(7) The form of payment your mover will honor at delivery. The payment information must be the same as was entered on the estimate.

(8) The terms and conditions for payment of the total charges, including notice of any minimum charges.

(9) The maximum amount your mover will demand at the time of delivery to obtain possession of the shipment, when transported on a collect-on-delivery basis.

(10) If not provided in the bill of lading, the Surface Transportation Board's required released rates valuation statement, and the charges, if any, for optional valuation coverage. The STB's required released rates may be increased annually by your mover based on the U.S. Department of Commerce's Cost of Living Adjustment.

(11) A complete description of any special or accessorial services ordered and minimum weight or volume charges applicable to the shipment.

(12) Any identification or registration number your mover assigns to the shipment.

(13) For non-binding estimated charges, your mover's reasonably accurate estimate of the amount of the charges, the method of payment of total charges, and the maximum amount (110 percent of the non-binding estimate) your mover will demand at the time of delivery for you to obtain possession of the shipment.

(14) For binding estimated charges, the amount of charges your mover will demand based upon the binding estimate and the terms of payment under the estimate.

(15) An indication of whether you request notification of the charges before delivery. You must provide your mover with the telephone number(s) or address(es) where your mover will transmit such communications.

You and your mover must sign the order for service. Your mover must provide a dated copy of the order for service to you at the time your mover signs the order. Your mover must provide you the opportunity to rescind the order for service without any penalty for a three-day period after you sign the order for service, if you scheduled the shipment to be loaded more than three days after you sign the order.

Your mover should provide you with documents that are as complete as possible, and with all charges clearly identified. However, as a practical matter, your mover usually cannot give you a complete bill of lading before transporting your goods. This is both because the shipment cannot be weighed until it is in transit and because other charges for service, such as unpacking, storage-in-transit, and various destination charges, cannot be determined until the shipment reaches its destination.

Therefore, your mover can require you to sign a partially complete bill of lading if it contains all relevant information except the actual shipment weight and any other information necessary to determine the final charges for all services provided. Signing the bill of lading allows you to choose the valuation option, request special services, and/or acknowledge the terms and conditions of released valuation.

Your mover also may provide you, strictly for informational purposes, with blank or incomplete documents pertaining to the move.

Before loading your shipment, and upon mutual agreement of both you and your mover, your mover may amend an order for service. Your mover must retain records of an order for service it transported for at least one year from the date your mover wrote the order.

Your mover must inform you, before or at the time of loading, if the mover reasonably expects a special or accessorial service is necessary to transport a shipment safely. Your mover must refuse to accept the shipment when your mover reasonably expects a special or accessorial service is necessary to transport a shipment safely, but you refuse to purchase the special or accessorial service. Your mover must make a written note if you refuse any special or accessorial services that your mover reasonably expects to be necessary.

MUST MY MOVER WRITE UP AN INVENTORY OF THE SHIPMENT?

Yes. Your mover must prepare an inventory of your shipment before or at the time of loading. If your mover's driver fails to prepare an inventory, you should write a de-

tailed inventory of your shipment listing any damage or unusual wear to any items. The purpose is to make a record of the existence and condition of each item.

After completing the inventory, you should sign each page and ask the mover's driver to sign each page. Before you sign it, it is important you make sure that the inventory lists every item in the shipment and that the entries regarding the condition of each item are correct. You have the right to note any disagreement. If an item is missing or damaged when your mover delivers the shipment, your subsequent ability to dispute the items lost or damaged may depend upon your notations.

You should retain a copy of the inventory. Your mover may keep the original if the driver prepared it. If your mover's driver completed an inventory, the mover must attach the complete inventory to the bill of lading as an integral part of the bill of lading.

MUST MY MOVER WRITE UP A BILL OF LADING?

The bill of lading is the *contract* between you and the mover. The mover is required by law to prepare a bill of lading for every shipment it transports. *The information on a bill of lading is required to be the same information shown on the order for service.* The driver who loads your shipment must give you a copy of the bill of lading before or at the time of loading your furniture and other household goods.

It is your responsibility to read the bill of lading before you accept it. It is your responsibility to understand the bill of lading before you sign it. If you do not agree with something on the bill of lading, do not sign it until you are satisfied it is correct.

The bill of lading requires the mover to provide the service you have requested. You must pay the charges set forth in the bill of lading.

The bill of lading is an important document. Do not lose or misplace your copy. Have it available until your shipment is delivered, all charges are paid, and all claims, if any, are settled.

A bill of lading must include the following 14 elements:

(1) Your mover's name and address, or the name and address of the motor carrier issuing the bill of lading.

(2) The names and addresses of any other motor carriers, when known, who will participate in the transportation of the shipment.

(3) The name, address, and telephone number of the office of the motor carrier you must contact in relation to the transportation of the shipment.

(4) The form of payment your mover will honor at delivery. The payment information

must be the same that was entered on the estimate and order for service.

(5) When your mover transports your shipment under a collect-on-delivery basis, your name, address, and telephone number where the mover will notify you about the charges.

(6) For *non-guaranteed service*, the agreed-upon date or period of time for pickup of the shipment and the agreed-upon date or period of time for the delivery of the shipment. The agreed-upon dates or periods for pickup and delivery entered upon the bill of lading must conform to the agreed-upon dates or periods of time for pickup and delivery entered upon the order for service or a proper amendment to the order for service.

(7) For *guaranteed service*, the dates for pickup and delivery and any penalty or per diem entitlements due you under the agreement.

(8) The actual date of pickup.

(9) The identification number(s) of the vehicle(s) in which your mover loads your shipment.

(10) The terms and conditions for payment of the total charges including notice of any minimum charges.

(11) The maximum amount your mover will demand from you at the time of delivery for you to obtain possession of your shipment, when your mover transports under a collect-on-delivery basis.

(12) If not provided in the order for service, the Surface Transportation Board's required released rates valuation statement, and the charges, if any, for optional valuation coverage. The Board's required released rates may be increased annually by your mover based on the U.S. Department of Commerce's Cost of Living Adjustment.

(13) Evidence of any insurance coverage sold to or procured for you from an independent insurer, including the amount of the premium for such insurance.

(14) Each attachment to the bill of lading. Each attachment is an integral part of the bill of lading contract. If not provided to you elsewhere by the mover, the following three items must be added as attachments:

(i) The binding or non-binding estimate.

(ii) The order for service.

(iii) The inventory.

A copy of the bill of lading must accompany your shipment at all times while in the possession of your mover or its agent(s). When your mover loads the shipment on a vehicle for transportation, the bill of lading must be in the possession of the driver responsible for the shipment. Your mover must retain bills of lading for shipments it transported for at least one year from the date your mover created the bill of lading.

SHOULD I REACH AN AGREEMENT WITH MY MOVER ABOUT PICKUP AND DELIVERY TIMES?

You and your mover should reach an agreement for pickup and delivery times. It is

your responsibility to determine on what date, or between what dates, you need to have the shipment picked up and on what date, or between what dates, you require delivery. It is your mover's responsibility to tell you if it can provide service on or between those dates, or, if not, on what other dates it can provide the service.

In the process of reaching an agreement with your mover, you may find it necessary to alter your moving and travel plans if no mover can provide service on the specific dates you desire.

Do not agree to have your shipment picked up or delivered "as soon as possible." The dates or periods you and your mover agree upon should be definite.

Once an agreement is reached, your mover must enter those dates upon the order for service and the bill of lading.

Once your goods are loaded, your mover is contractually bound to provide the service described in the bill of lading. Your mover's only defense for not providing the service on the dates called for is the defense of force majeure. This is a legal term. It means that when circumstances change, were not foreseen, and are beyond the control of your mover, preventing your mover from performing the service agreed to in the bill of lading, your mover is not responsible for damages resulting from its nonperformance.

This may occur when you do not inform your mover of the exact delivery requirements. For example, because of restrictions trucks must follow at your new location, the mover may not be able to take its truck down the street of your residence and may need to shuttle the shipment using another type of vehicle.

MUST MY MOVER DETERMINE THE WEIGHT OF MY SHIPMENT?

Generally, yes. If your mover transports your household goods on a non-binding estimate under the mover's tariffs based upon weight, your mover must determine the weight of the shipment. If your mover provided a binding estimate and has loaded your shipment without claiming you have added additional items or services, the weight of the shipment will not affect the charges you will pay. If your mover is transporting your shipment based upon the volume of the shipment—that is, a set number of cubic feet (or yards or meters)—the weight of the shipment likewise will not affect the charges you will pay.

Your mover must determine the weight of your shipment before requesting you to pay for any charges dependent upon your shipment's weight.

Most movers have a minimum weight or volume charge for transporting a shipment. Generally, the minimum is the charge for transporting a shipment of at least 3,000 pounds (1,362 kilograms).

If your shipment appears to weigh less than the mover's minimum weight, your mover must advise you on the order for service of the minimum cost before transporting your shipment. Should your mover fail to advise you of the minimum charges and your shipment is less than the minimum weight, your mover must base your final charges upon the actual weight, not upon the minimum weight.

HOW MUST MY MOVER DETERMINE THE WEIGHT OF MY SHIPMENT?

Your mover must weigh your shipment upon a certified scale.

The weight of your shipment must be obtained by using one of two methods.

Origin Weighing—Your mover may weigh your shipment in the city or area where it loads your shipment. If it elects this option, the driver must weigh the truck before coming to your residence. This is called the *tare weight*. At the time of this first weighing, the truck may already be partially loaded with another shipment(s). This will not affect the weight of your shipment. The truck should also contain the pads, dollies, hand trucks, ramps, and other equipment normally used in the transportation of household goods shipments.

After loading, the driver will weigh the truck again to obtain the loaded weight, called the *gross weight*. The net weight of your shipment is then obtained by subtracting the *tare weight* before loading from the *gross weight*.

Gross Weight – Tare Weight Before Loading = Net Weight.

Destination Weighing (Also called *Back Weighing*)—The mover is also permitted to determine the weight of your shipment at the destination after it delivers your load. Weighing your shipment at destination instead of at origin will not affect the accuracy of the shipment weight. *The most important difference is that your mover will not determine the exact charges on your shipment before it is unloaded.*

Destination weighing is done in reverse of origin weighing. After arriving in the city or area where you are moving, the driver will weigh the truck. Your shipment will still be on the truck. Your mover will determine the *gross weight* before coming to your new residence to unload. After unloading your shipment, the driver will again weigh the truck to obtain the *tare weight*. The net weight of your shipment will then be obtained by subtracting the *tare weight* after delivery from the *gross weight*.

Gross Weight – Tare Weight After Delivery = Net Weight.

At the time of both weighings, your mover's truck must have installed or loaded all pads, dollies, hand trucks, ramps, and other equipment required in the transportation of your shipment. The driver and other persons

must be off the vehicle at the time of both weighings. The fuel tanks on the vehicle must be full at the time of each weighing. In lieu of this requirement, your mover must not add fuel between the two weighings when the tare weighing is the first weighing performed.

Your mover may detach the trailer of a tractor-trailer vehicle combination from the tractor and have the trailer weighed separately at each weighing provided the length of the scale platform is adequate to accommodate and support the entire trailer.

Your mover may use an alternative method to weigh your shipment if it weighs 3,000 pounds (1,362 kilograms) or less. The only alternative method allowed is weighing the shipment upon a platform or warehouse certified scale before loading your shipment for transportation or after unloading.

Your mover must use the net weight of shipments transported in large containers, such as ocean or railroad containers. Your mover will calculate the difference between the tare weight of the container (including all pads, blocking and bracing used in the transportation of your shipment) and the gross weight of the container with your shipment loaded in the container.

You have the right, and your mover must inform you of your right, to observe all weighings of your shipment. Your mover must tell you where and when each weighing will occur. Your mover must give you a reasonable opportunity to be present to observe the weighings.

You may waive your right to observe any weighing or reweighing. This does not affect any of your other rights under Federal law.

Your mover may request you waive your right to have a shipment weighed upon a certified scale. Your mover may want to weigh the shipment upon a trailer's on-board, non-certified scale. You should demand your right to have a certified scale used. The use of a noncertified scale may cause you to pay a higher final bill for your move, if the non-certified scale does not accurately weigh your shipment. Remember that certified scales are inspected and approved for accuracy by a government inspection or licensing agency. Noncertified scales are not inspected and approved for accuracy by a government inspection or licensing agency.

Your mover must obtain a separate weight ticket for each weighing. The weigh master must sign each weight ticket. Each weight ticket must contain the following six items:

- (1) The complete name and location of the scale.
- (2) The date of each weighing.
- (3) Identification of the weight entries as being the tare, gross, or net weights.
- (4) The company or mover identification of the vehicle.
- (5) Your last name as it appears on the Bill of Lading.

(6) Your mover's shipment registration or Bill of Lading number.

Your mover must retain the original weight ticket or tickets relating to the determination of the weight of your shipment as part of its file on your shipment.

When both weighings are performed on the same scale, one weight ticket may be used to record both weighings.

Your mover must present all freight bills with true copies of all weight tickets. If your mover does not present its freight bill with all weight tickets, your mover is in violation of Federal law.

Before the driver actually begins unloading your shipment weighed at origin and after your mover informs you of the billing weight and total charges, you have the right to demand a reweigh of your shipment. If you believe the weight is not accurate, you have the right to request your mover reweigh your shipment before unloading.

You have the right, and your mover must inform you of your right, to observe all reweighings of your shipment. Your mover must tell you where and when each reweighing will occur. Your mover must give you a reasonable opportunity to be present to observe the reweighings.

You may waive your right to observe any reweighing; however, you must waive that right in writing. You may send the written waiver via fax or e-mail, as well as by overnight courier or certified mail, return receipt requested. This does not affect any of your other rights under Federal law.

Your mover is prohibited from charging you for the reweighing. If the weight of your shipment at the time of the reweigh is different from the weight determined at origin, your mover must recompute the charges based upon the reweigh weight.

Before requesting a reweigh, you may find it to your advantage to estimate the weight of your shipment using the following three-step method:

1. Count the number of items in your shipment. Usually there will be either 30 or 40 items listed on each page of the inventory. For example, if there are 30 items per page and your inventory consists of four complete pages and a fifth page with 15 items listed, the total number of items will be 135. *If an automobile is listed on the inventory, do not include this item in the count of the total items.*

2. Subtract the weight of any automobile included in your shipment from the total weight of the shipment. If the automobile was not weighed separately, its weight can be found on its title or license receipt.

3. Divide the number of items in your shipment into the weight. If the average weight resulting from this exercise ranges between 35 and 45 pounds (16 and 20 kilograms) per article, it is unlikely a reweigh will prove beneficial to you. In fact, it could result in your paying higher charges.

Experience has shown that the average shipment of household goods will weigh about 40 pounds (18 kilograms) per item. If a shipment contains a large number of heavy items, such as cartons of books, boxes of tools or heavier than average furniture, the average weight per item may be 45 pounds or more (20 kilograms or more).

WHAT MUST MY MOVER DO IF I WANT TO KNOW THE ACTUAL WEIGHT OR CHARGES FOR MY SHIPMENT BEFORE DELIVERY?

If you request notification of the actual weight or volume and charges upon your shipment, your mover must comply with your request if it is moving your goods on a collect-on-delivery basis. This requirement is conditioned upon your supplying your mover with an address or telephone number where you will receive the communication. Your mover must make its notification by telephone; fax transmissions; e-mail; overnight courier; certified mail, return receipt requested; or in person.

You must receive the mover's notification at least one full 24-hour day before its scheduled delivery, excluding Saturdays, Sundays, and Federal holidays.

Your mover may disregard this 24-hour notification requirement on shipments subject to one of the following three things:

- (1) Back weigh (when your mover weighs your shipment at its destination).
- (2) Pickup and delivery encompassing two consecutive weekdays, if you agree.
- (3) Maximum payment amounts at time of delivery of 110 percent of the estimated charges, if you agree.

SUBPART F—TRANSPORTATION OF MY SHIPMENT

MUST MY MOVER TRANSPORT THE SHIPMENT IN A TIMELY MANNER?

Yes, your mover must transport your household goods in a timely manner. This is also known as "reasonable dispatch service." Your mover must provide reasonable dispatch service to you, except for transportation on the basis of guaranteed delivery dates.

When your mover is unable to perform either the pickup or delivery of your shipment on the dates or during the periods of time specified in the order for service, your mover must notify you of the delay, at the mover's expense. As soon as the delay becomes apparent to your mover, it must give you notification it will be unable to provide the service specified in the terms of the order for service. Your mover may notify you of the delay in any of the following ways: by telephone; fax transmissions; e-mail; overnight courier; certified mail, return receipt requested; or in person.

When your mover notifies you of a delay, it also must advise you of the dates or periods

of time it may be able to pick up and/or deliver the shipment. Your mover must consider your needs in its advisement.

Your mover must prepare a written record of the date, time, and manner of its notification. Your mover must prepare a written record of its amended date or period for delivery. Your mover must retain these records as a part of its file on your shipment. The retention period is one year from the date of notification. Your mover must furnish a copy of the notification to you either by first class mail or in person, if you request a copy of the notice.

Your mover must tender your shipment for delivery on the agreed-upon delivery date or within the period specified on the bill of lading. Upon your request or concurrence, your mover may deliver your shipment on another day.

The establishment of a delayed pickup or delivery date does not relieve your mover from liability for damages resulting from your mover's failure to provide service as agreed. However, when your mover notifies you of alternate delivery dates, it is your responsibility to be available to accept delivery on the dates specified. If you are not available and are not willing to accept delivery, your mover has the right to place your shipment in storage at your expense or hold the shipment on its truck and assess additional charges.

If after the pickup of your shipment, you request your mover to change the delivery date, most movers will agree to do so provided your request will not result in unreasonable delay to its equipment or interfere with another customer's move. However, your mover is under no obligation to consent to amended delivery dates. Your mover has the right to place your shipment in storage at your expense if you are unwilling or unable to accept delivery on the date agreed to in the bill of lading.

If your mover fails to pick up and deliver your shipment on the date entered on the bill of lading and you have expenses you otherwise would not have had, you may be able to recover those expenses from your mover. This is what is called an inconvenience or delay claim. Should your mover refuse to honor such a claim and you continue to believe you are entitled to be paid damages, you may take your mover to court under 49 U.S.C. 14706. *The Federal Motor Carrier Safety Administration (FMCSA) has no authority to order your mover to pay such claims.*

While we hope your mover delivers your shipment in a timely manner, you should consider the possibility your shipment may be delayed, and find out what payment you can expect if a mover delays service through its own fault, before you agree with the mover to transport your shipment.

WHAT MUST MY MOVER DO IF IT IS ABLE TO DELIVER MY SHIPMENT MORE THAN 24 HOURS BEFORE I AM ABLE TO ACCEPT DELIVERY?

At your mover's discretion, it may place your shipment in storage. This will be under its own account and at its own expense in a warehouse located in proximity to the destination of your shipment. Your mover may do this if you fail to request or concur with an early delivery date, and your mover is able to deliver your shipment more than 24 hours before your specified date or the first day of your specified period.

If your mover exercises this option, your mover must immediately notify you of the name and address of the warehouse where your mover places your shipment. Your mover must make and keep a record of its notification as a part of its shipment records. Your mover has full responsibility for the shipment under the terms and conditions of the bill of lading. Your mover is responsible for the charges for redelivery, handling, and storage until it makes final delivery. Your mover may limit its responsibility to the agreed-upon delivery date or the first day of the period of delivery as specified in the bill of lading.

WHAT MUST MY MOVER DO FOR ME WHEN I STORE HOUSEHOLD GOODS IN TRANSIT?

If you request your mover to hold your household goods in storage-in-transit and the storage period is about to expire, your mover must notify you, in writing, about the four following items:

- (1) The date when storage-in-transit will convert to permanent storage.
- (2) The existence of a nine-month period after the date of conversion to permanent storage, during which you may file claims against your mover for loss or damage occurring to your goods while in transit or during the storage-in-transit period.
- (3) Your mover's liability will end.
- (4) Your property will be subject to the rules, regulations, and charges of the warehouseman.

Your mover must make this notification at least 10 days before the expiration date of one of the following two periods of time:

- (1) The specified period of time when your mover is to hold your goods in storage.
- (2) The maximum period of time provided in its tariff for storage-in-transit.

Your mover must notify you by facsimile transmission; overnight courier; e-mail; or certified mail, return receipt requested.

If your mover holds your household goods in storage-in-transit for less than 10 days, your mover must notify you, one day before the storage-in-transit period expires, of the same information specified above.

Your mover must maintain a record of all notifications to you as part of the records of

your shipment. Under the applicable tariff provisions regarding storage-in-transit, your mover's failure or refusal to notify you will automatically extend your mover's liability until the end of the day following the date when your mover actually gives you notice.

SUBPART G—DELIVERY OF MY SHIPMENT

MAY MY MOVER ASK ME TO SIGN A DELIVERY RECEIPT PURPORTING TO RELEASE IT FROM LIABILITY?

At the time of delivery, your mover will expect you to sign a receipt for your shipment. Normally, you will sign each page of your mover's copy of the inventory.

Your mover's delivery receipt or shipping document must not contain any language purporting to release or discharge it or its agents from liability.

Your mover may include a statement about your receipt of your property in apparent good condition, except as noted on the shipping documents.

Do not sign the delivery receipt if it contains any language purporting to release or discharge your mover or its agents from liability. Strike out such language before signing, or refuse delivery if the driver or mover refuses to provide a proper delivery receipt.

WHAT IS THE MAXIMUM COLLECT-ON-DELIVERY AMOUNT MY MOVER MAY DEMAND I PAY AT THE TIME OF DELIVERY?

On a binding estimate, the maximum amount is the exact estimate of the charges. Your mover must specify on the estimate, order for service, and bill of lading the form of payment acceptable to it (for example, a certified check).

On a non-binding estimate, the maximum amount is 110 percent of the approximate costs. Your mover must specify on the estimate, order for service, and bill of lading the form of payment acceptable to it (for example, cash).

IF MY SHIPMENT IS TRANSPORTED ON MORE THAN ONE VEHICLE, WHAT CHARGES MAY MY MOVER COLLECT AT DELIVERY?

Although all movers try to move each shipment on one truck, it becomes necessary at times to divide a shipment among two or more trucks. This frequently occurs when an automobile is included in the shipment and it is transported on a vehicle specially designed to transport automobiles. When this occurs, your transportation charges are the same as if the entire shipment moved on one truck.

If your shipment is divided for transportation on two or more trucks, the mover may require payment for each portion as it is delivered.

Your mover may delay the collection of all the charges until the entire shipment is delivered, at its discretion, not yours. When you order your move, you should ask the mover about its policies in this regard.

IF MY SHIPMENT IS PARTIALLY LOST OR DESTROYED, WHAT CHARGES MAY MY MOVER COLLECT AT DELIVERY?

Movers customarily make every effort to avoid losing, damaging, or destroying any of your items while your shipment is in their possession for transportation. However, despite the precautions taken, articles are sometimes lost or destroyed during the move.

In addition to any money you may recover from your mover to compensate for lost or destroyed articles, you may also recover the transportation charges represented by the portion of the shipment lost or destroyed. Your mover may only apply this paragraph to the transportation of household goods. Your mover may disregard this paragraph if loss or destruction was due to an act or omission by you. Your mover must require you to pay any specific valuation charge due.

For example, if you pack a hazardous material (i.e., gasoline, aerosol cans, motor oil, etc.) and your shipment is partially lost or destroyed by fire in storage or in the mover's trailer, your mover may require you to pay for the full cost of transportation.

Your mover may first collect its freight charges for the entire shipment, if your mover chooses. At the time your mover disposes of claims for loss, damage, or injury to the articles in your shipment, it must refund the portion of its freight charges corresponding to the portion of the lost or destroyed shipment (including any charges for accessorial or terminal services).

Your mover is forbidden from collecting, or requiring you to pay, any freight charges (including any charges for accessorial or terminal services) when your household goods shipment is *totally lost or destroyed* in transit, unless the loss or destruction was due to an act or omission by you.

HOW MUST MY MOVER CALCULATE THE CHARGES APPLICABLE TO THE SHIPMENT AS DELIVERED?

Your mover must multiply the percentage corresponding to the delivered shipment times the total charges applicable to the shipment tendered by you to obtain the total charges it must collect from you.

If your mover's computed charges exceed the charges otherwise applicable to the shipment as delivered, the lesser of those charges must apply. This will apply only to the transportation of your household goods.

Your mover must require you to pay any specific valuation charge due.

Your mover may not refund the freight charges if the loss or destruction was due to an act or omission by you. For example, you fail to disclose to your mover that your shipment contains perishable live plants. Your mover may disregard its loss or destruction of your plants, because you failed to inform your mover you were transporting live plants.

Your mover must determine, at its own expense, the proportion of the shipment, based on actual or constructive weight, not lost or destroyed in transit.

Your rights are in addition to, and not in lieu of, any other rights you may have with respect to your shipment of household goods your mover lost or destroyed, or partially lost or destroyed, in transit. This applies whether or not you have exercised your rights provided above.

SUBPART H—COLLECTION OF CHARGES

DOES THIS SUBPART APPLY TO MOST SHIPMENTS?

It applies to all shipments of household goods that involve a balance due freight or expense bill or are shipped on credit.

HOW MUST MY MOVER PRESENT ITS FREIGHT OR EXPENSE BILL TO ME?

At the time of payment of transportation charges, your mover must give you a freight bill identifying the service provided and the charge for each service. It is customary for most movers to use a copy of the bill of lading as a freight bill; however, some movers use an entirely separate document for this purpose.

Except in those instances where a shipment is moving on a binding estimate, the freight bill must specifically identify each service performed, the rate or charge per service performed, and the total charges for each service. *If this information is not on the freight bill, do not accept or pay the freight bill.*

Movers' tariffs customarily specify that freight charges must be paid in cash, by certified check, or by cashier's check. When this requirement exists, the mover will not accept personal checks. At the time you order your move, you should ask your mover about the form of payment your mover requires.

Some movers permit payment of freight charges by use of a charge or credit card. However, do not assume your nationally recognized charge, credit, or debit card will be acceptable for payment. Ask your mover at the time you request an estimate. Your mover must specify the form of payment it will accept at delivery.

If you do not pay the transportation charges at the time of delivery, your mover has the right, under the bill of lading, to refuse to deliver your goods. The mover may place them in storage, at your expense, until the charges are paid. However, the mover

must deliver your goods upon payment of 100 percent of a binding estimate.

If, before payment of the transportation charges, you discover an error in the charges, you should attempt to correct the error with the driver, the mover's local agent, or by contacting the mover's main office. If an error is discovered after payment, you should write the mover (the address will be on the freight bill) explaining the error, and request a refund.

Movers customarily check all shipment files and freight bills after a move has been completed to make sure the charges were accurate. If an overcharge is found, you should be notified and a refund made. If an undercharge occurred, you may be billed for the additional charges due.

On "to be prepaid" shipments, your mover must present its freight bill for all transportation charges within 15 days of the date your mover received the shipment. This period excludes Saturdays, Sundays, and Federal holidays.

On "collect" shipments, your mover must present its freight bill for transportation charges on the date of delivery, or, at its discretion, within 15 days, calculated from the date the shipment was delivered at your destination. This period excludes Saturdays, Sundays, and Federal holidays. (Bills for charges exceeding 110 percent of a non-binding estimate, and for additional services requested or found necessary after the shipment is in transit, will be presented no sooner than 30 days from the date of delivery.)

Your mover's freight bills and accompanying written notices must state the following five items:

- (1) Penalties for late payment.
- (2) Credit time limits.
- (3) Service or finance charges.
- (4) Collection expense charges.
- (5) Discount terms.

If your mover extends credit to you, freight bills or a separate written notice accompanying a freight bill or a group of freight bills presented at one time must state, "You may be subject to tariff penalties for failure to timely pay freight charges," or a similar statement. Your mover must state on its freight bills or other notices when it expects payment, and any applicable service charges, collection expense charges, and discount terms.

When your mover lacks sufficient information to compute its tariff charges at the time of billing, your mover must present its freight bill for payment within 15 days following the day when sufficient information becomes available. This period excludes Saturdays, Sundays, and Federal holidays.

Your mover must not extend additional credit to you if you fail to furnish sufficient information to your mover. Your mover must have sufficient information to render a

freight bill within a reasonable time after shipment.

When your mover presents freight bills by mail, it must deem the time of mailing to be the time of presentation of the bills. The term "freight bills," as used in this paragraph, includes both paper documents and billing by use of electronic media such as computer tapes, disks, or the Internet (e-mail).

When you mail acceptable checks or drafts in payment of freight charges, your mover must deem the act of mailing the payment within the credit period to be the proper collection of the tariff charges within the credit period for the purposes of Federal law. In case of a dispute as to the date of mailing, your mover must accept the postmark as the date of mailing.

IF I FORCED MY MOVER TO RELINQUISH A COLLECT-ON-DELIVERY SHIPMENT BEFORE THE PAYMENT OF ALL CHARGES, HOW MUST MY MOVER COLLECT THE BALANCE?

On "collect-on-delivery" shipments, your mover must present its freight bill for transportation charges within 15 days, calculated from the date the shipment was delivered at your destination. This period excludes Saturdays, Sundays, and Federal holidays. (Bills for charges exceeding 110 percent of a non-binding estimate, and charges for additional services requested or found necessary after the shipment is in transit, will be presented no sooner than 30 days after the date of delivery.)

WHAT ACTIONS MAY MY MOVER TAKE TO COLLECT FROM ME THE CHARGES UPON ITS FREIGHT BILL?

Your mover must present a freight bill within 15 days (excluding Saturdays, Sundays, and Federal holidays) of the date of delivery of a shipment at your destination. (Bills for charges exceeding 110 percent of a non-binding estimate, and for additional services requested or found necessary after the shipment is in transit, will be presented no sooner than 30 days after the date of delivery.)

The credit period must be 7 days (excluding Saturdays, Sundays, and Federal holidays).

Your mover must provide in its tariffs the following three things:

(1) A provision automatically extending the credit period to a total of 30 calendar days for you if you have not paid its freight bill within the 7-day period.

(2) A provision indicating you will be assessed a service charge by your mover equal to one percent of the amount of the freight bill, subject to a \$20 minimum charge, for the extension of the credit period. The mover will assess the service charge for each 30-day extension that the charges go unpaid.

(3) A provision that your mover must deny credit to you if you fail to pay a duly presented freight bill within the 30-day period. Your mover may grant credit to you, at its discretion, when you satisfy your mover's condition that you will pay all future freight bills duly presented. Your mover must ensure all your payments of freight bills are strictly in accordance with Federal rules and regulations for the settlement of its rates and charges.

DO I HAVE A RIGHT TO FILE A CLAIM TO RECOVER MONEY FOR PROPERTY MY MOVER LOST OR DAMAGED?

Should your move result in the loss of or damage to any of your property, you have the right to file a claim with your mover to recover money for such loss or damage.

You should file a claim as soon as possible. If you fail to file a claim within 9 months, your mover may not be required to accept your claim. If you institute a court action and win, you may be entitled to attorney's fees, but only in either of two circumstances. You may be entitled to attorney's fees if you submitted your claim to the carrier within 120 days after delivery, and a decision was not rendered through arbitration within the time required by law. You also may be entitled to attorney's fees if you submitted your claim to the carrier within 120 days after delivery, the court enforced an arbitration decision in your favor, and the time for the carrier to comply with the decision has passed.

While the Federal Government maintains regulations governing the processing of loss and damage claims (49 CFR part 370), it cannot resolve those claims. If you cannot settle a claim with the mover, you may file a civil action to recover your claim in court under 49 U.S.C. 14706. You may obtain the name and address of the mover's agent for service of legal process in your state by contacting the Federal Motor Carrier Safety Administration. You may also obtain the name of a process agent via the Internet by going to <http://www.fmcsa.dot.gov> and then clicking on Licensing and Insurance (L&I) section.

In addition, your mover must participate in an arbitration program. As described earlier in this pamphlet, an arbitration program gives you the opportunity to settle certain types of unresolved loss or damage claims through a neutral arbitrator. You may find submitting your claim to arbitration under such a program to be a less expensive and more convenient way to seek recovery of your claim. Your mover is required to provide you with information about its arbitration program before you move. If your mover fails to do so, ask the mover for details of its program.

Pt. 376

SUBPART I—RESOLVING DISPUTES WITH MY MOVER

WHAT MAY I DO TO RESOLVE DISPUTES WITH MY MOVER?

The Federal Motor Carrier Safety Administration does not help you settle your dispute with your mover.

Generally, you must resolve your own loss and damage disputes with your mover. You enter a contractual arrangement with your mover. You are bound by each of the following three things:

(1) The terms and conditions you negotiated before your move.

(2) The terms and conditions you accepted when you signed the bill of lading.

(3) The terms and conditions you accepted when you signed for delivery of your goods.

You have the right to take your mover to court. We require your mover to offer you arbitration to settle your disputes with it.

If your mover holds your goods “hostage”—refuses delivery unless you pay an amount you believe the mover is not entitled to charge—the Federal Motor Carrier Safety Administration does not have the resources to seek a court injunction on your behalf.

EDITORIAL NOTE: Nomenclature changes to part 376 appear at 66 FR 49871, Oct. 1, 2001.

Subpart A—General Applicability and Definitions

§376.1 Applicability.

The regulations in this part apply to the following actions by motor carriers registered with the Secretary to transport property:

(a) The leasing of equipment with which to perform transportation regulated by the Secretary.

(b) The leasing of equipment to motor private carrier or shippers.

(c) The interchange of equipment between motor common carriers in the performance of transportation regulated by the Secretary.

[44 FR 4681, Jan. 23, 1979. Redesignated at 61 FR 54707, Oct. 21, 1996, as amended at 62 FR 15423, Apr. 1, 1997]

§376.2 Definitions.

(a) *Authorized carrier.* A person or persons authorized to engage in the transportation of property as a motor carrier under the provisions of 49 U.S.C. 13901 and 13902.

(b) *Equipment.* A motor vehicle, straight truck, tractor, semitrailer, full trailer, any combination of these and any other type of equipment used by authorized carriers in the transportation of property for hire.

(c) *Interchange.* The receipt of equipment by one motor common carrier of property from another such carrier, at a point which both carriers are authorized to serve, with which to continue a through movement.

(d) *Owner.* A person (1) to whom title to equipment has been issued, or (2) who, without title, has the right to exclusive use of equipment, or (3) who has lawful possession of equipment registered and licensed in any State in the name of that person.

(e) *Lease.* A contract or arrangement in which the owner grants the use of equipment, with or without driver, for a specified period to an authorized carrier for use in the regulated transportation of property, in exchange for compensation.

(f) *Lessor*. In a lease, the party granting the use of equipment, with or without driver, to another.

(g) *Lessee*. In a lease, the party acquiring the use of equipment with or without driver, from another.

(h) *Sublease*. A written contract in which the lessee grants the use of leased equipment, with or without driver, to another.

(i) *Addendum*. A supplement to an existing lease which is not effective until signed by the lessor and lessee.

(j) *Private carrier*. A person, other than a motor carrier, transporting property by motor vehicle in interstate or foreign commerce when (1) the person is the owner, lessee, or bailee of the property being transported; and (2) the property is being transported for sale, lease, rent, or bailment, or to further a commercial enterprise.

(k) *Shipper*. A person who sends or receives property which is transported in interstate or foreign commerce.

(l) *Escrow fund*. Money deposited by the lessor with either a third party or the lessee to guarantee performance, to repay advances, to cover repair expenses, to handle claims, to handle license and State permit costs, and for any other purposes mutually agreed upon by the lessor and lessee.

(m) *Detention*. The holding by a consignor or consignee of a trailer, with or without power unit and driver, beyond the free time allocated for the shipment, under circumstances not attributable to the performance of the carrier.

[44 FR 4681, Jan. 23, 1979, as amended at 49 FR 47850, Dec. 7, 1984; 62 FR 15424, Apr. 1, 1997]

Subpart B—Leasing Regulations

§ 376.11 General leasing requirements.

Other than through the interchange of equipment as set forth in § 376.31, and under the exemptions set forth in subpart C of these regulations, the authorized carrier may perform authorized transportation in equipment it does not own only under the following conditions:

(a) *Lease*. There shall be a written lease granting the use of the equipment and meeting the requirements contained in § 376.12.

(b) *Receipts for equipment*. Receipts, specifically identifying the equipment to be leased and stating the date and time of day possession is transferred, shall be given as follows:

(1) When possession of the equipment is taken by the authorized carrier, it shall give the owner of the equipment a receipt. The receipt identified in this section may be transmitted by mail, telegraph, or other similar means of communication.

(2) When possession of the equipment by the authorized carrier ends, a receipt shall be given in accordance with the terms of the lease agreement if the lease agreement requires a receipt.

(3) Authorized representatives of the carrier and the owner may take possession of leased equipment and give and receive the receipts required under this subsection.

(c) *Identification of equipment*. The authorized carrier acquiring the use of equipment under this section shall identify the equipment as being in its service as follows:

(1) During the period of the lease, the carrier shall identify the equipment in accordance with the FMCSA's requirements in 49 CFR part 390 of this chapter (Identification of Vehicles).

(2) Unless a copy of the lease is carried on the equipment, the authorized carrier shall keep a statement with the equipment during the period of the lease certifying that the equipment is being operated by it. The statement shall also specify the name of the owner, the date and length of the lease, any restrictions in the lease relative to the commodities to be transported, and the address at which the original lease is kept by the authorized carrier. This statement shall be prepared by the authorized carrier or its authorized representative.

(d) *Records of equipment*. The authorized carrier using equipment leased under this section shall keep records of the equipment as follows:

(1) The authorized carrier shall prepare and keep documents covering each trip for which the equipment is used in its service. These documents shall contain the name and address of the owner of the equipment, the point of origin, the time and date of departure, and the

§ 376.12

49 CFR Ch. III (10–1–04 Edition)

point of final destination. Also, the authorized carrier shall carry papers with the leased equipment during its operation containing this information and identifying the lading and clearly indicating that the transportation is under its responsibility. These papers shall be preserved by the authorized carrier as part of its transportation records. Leases which contain the information required by the provisions in this paragraph may be used and retained instead of such documents or papers. As to lease agreements negotiated under a master lease, this provision is complied with by having a copy of a master lease in the unit of equipment in question and where the balance of documentation called for by this paragraph is included in the freight documents prepared for the specific movement.

(2) [Reserved]

[44 FR 4681, Jan. 23, 1979, as amended at 49 FR 47269, Dec. 3, 1984; 49 FR 47850, Dec. 7, 1984; 50 FR 24649, June 12, 1985; 51 FR 37406, Oct. 22, 1986; 62 FR 15424, Apr. 1, 1997]

§ 376.12 Written lease requirements.

Except as provided in the exemptions set forth in subpart C of this part, the written lease required under § 376.11(a) shall contain the following provisions. The required lease provisions shall be adhered to and performed by the authorized carrier.

(a) *Parties.* The lease shall be made between the authorized carrier and the owner of the equipment. The lease shall be signed by these parties or by their authorized representatives.

(b) *Duration to be specific.* The lease shall specify the time and date or the circumstances on which the lease begins and ends. These times or circumstances shall coincide with the times for the giving of receipts required by § 376.11(b).

(c) *Exclusive possession and responsibilities.* (1) The lease shall provide that the authorized carrier lessee shall have exclusive possession, control, and use of the equipment for the duration of the lease. The lease shall further provide that the authorized carrier lessee shall assume complete responsibility for the operation of the equipment for the duration of the lease.

(2) Provision may be made in the lease for considering the authorized

carrier lessee as the owner of the equipment for the purpose of subleasing it under these regulations to other authorized carriers during the lease.

(3) When an authorized carrier of household goods leases equipment for the transportation of household goods, as defined by the Secretary, the parties may provide in the lease that the provisions required by paragraph (c)(1) of this section apply only during the time the equipment is operated by or for the authorized carrier lessee.

(4) Nothing in the provisions required by paragraph (c)(1) of this section is intended to affect whether the lessor or driver provided by the lessor is an independent contractor or an employee of the authorized carrier lessee. An independent contractor relationship may exist when a carrier lessee complies with 49 U.S.C. 14102 and attendant administrative requirements.

(d) *Compensation to be specified.* The amount to be paid by the authorized carrier for equipment and driver's services shall be clearly stated on the face of the lease or in an addendum which is attached to the lease. Such lease or addendum shall be delivered to the lessor prior to the commencement of any trip in the service of the authorized carrier. An authorized representative of the lessor may accept these documents. The amount to be paid may be expressed as a percentage of gross revenue, a flat rate per mile, a variable rate depending on the direction traveled or the type of commodity transported, or by any other method of compensation mutually agreed upon by the parties to the lease. The compensation stated on the lease or in the attached addendum may apply to equipment and driver's services either separately or as a combined amount.

(e) *Items specified in lease.* The lease shall clearly specify which party is responsible for removing identification devices from the equipment upon the termination of the lease and when and how these devices, other than those painted directly on the equipment, will be returned to the carrier. The lease shall clearly specify the manner in which a receipt will be given to the authorized carrier by the equipment

owner when the latter retakes possession of the equipment upon termination of the lease agreement, if a receipt is required at all by the lease. The lease shall clearly specify the responsibility of each party with respect to the cost of fuel, fuel taxes, empty mileage, permits of all types, tolls, ferries, detention and accessorial services, base plates and licenses, and any unused portions of such items. The lease shall clearly specify who is responsible for loading and unloading the property onto and from the motor vehicle, and the compensation, if any, to be paid for this service. Except when the violation results from the acts or omissions of the lessor, the authorized carrier lessee shall assume the risks and costs of fines for overweight and oversize trailers when the trailers are pre-loaded, sealed, or the load is containerized, or when the trailer or lading is otherwise outside of the lessor's control, and for improperly permitted overdimension and overweight loads and shall reimburse the lessor for any fines paid by the lessor. If the authorized carrier is authorized to receive a refund or a credit for base plates purchased by the lessor from, and issued in the name of, the authorized carrier, or if the base plates are authorized to be sold by the authorized carrier to another lessor the authorized carrier shall refund to the initial lessor on whose behalf the base plate was first obtained a prorated share of the amount received.

(f) *Payment period.* The lease shall specify that payment to the lessor shall be made within 15 days after submission of the necessary delivery documents and other paperwork concerning a trip in the service of the authorized carrier. The paperwork required before the lessor can receive payment is limited to log books required by the Department of Transportation and those documents necessary for the authorized carrier to secure payment from the shipper. In addition, the lease may provide that, upon termination of the lease agreement, as a condition precedent to payment, the lessor shall remove all identification devices of the authorized carrier and, except in the case of identification painted directly on equipment, return them to the carrier. If the identification device has

been lost or stolen, a letter certifying its removal will satisfy this requirement. Until this requirement is complied with, the carrier may withhold final payment. The authorized carrier may require the submission of additional documents by the lessor but not as a prerequisite to payment. Payment to the lessor shall not be made contingent upon submission of a bill of lading to which no exceptions have been taken. The authorized carrier shall not set time limits for the submission by the lessor of required delivery documents and other paperwork.

(g) *Copies of freight bill or other form of freight documentation.* When a lessor's revenue is based on a percentage of the gross revenue for a shipment, the lease must specify that the authorized carrier will give the lessor, before or at the time of settlement, a copy of the rated freight bill or a computer-generated document containing the same information, or, in the case of contract carriers, any other form of documentation actually used for a shipment containing the same information that would appear on a rated freight bill. When a computer-generated document is provided, the lease will permit lessor to view, during normal business hours, a copy of any actual document underlying the computer-generated document. Regardless of the method of compensation, the lease must permit lessor to examine copies of the carrier's tariff or, in the case of contract carriers, other documents from which rates and charges are computed, provided that where rates and charges are computed from a contract of a contract carrier, only those portions of the contract containing the same information that would appear on a rated freight bill need be disclosed. The authorized carrier may delete the names of shippers and consignees shown on the freight bill or other form of documentation.

(h) *Charge-back items.* The lease shall clearly specify all items that may be initially paid for by the authorized carrier, but ultimately deducted from the lessor's compensation at the time of payment or settlement, together with a recitation as to how the amount of each item is to be computed. The lessor

shall be afforded copies of those documents which are necessary to determine the validity of the charge.

(i) *Products, equipment, or services from authorized carrier.* The lease shall specify that the lessor is not required to purchase or rent any products, equipment, or services from the authorized carrier as a condition of entering into the lease arrangement. The lease shall specify the terms of any agreement in which the lessor is a party to an equipment purchase or rental contract which gives the authorized carrier the right to make deductions from the lessor's compensation for purchase or rental payments.

(j) *Insurance.* (1) The lease shall clearly specify the legal obligation of the authorized carrier to maintain insurance coverage for the protection of the public pursuant to FMCSA regulations under 49 U.S.C. 13906. The lease shall further specify who is responsible for providing any other insurance coverage for the operation of the leased equipment, such as bobtail insurance. If the authorized carrier will make a charge back to the lessor for any of this insurance, the lease shall specify the amount which will be charged-back to the lessor.

(2) If the lessor purchases any insurance coverage for the operation of the leased equipment from or through the authorized carrier, the lease shall specify that the authorized carrier will provide the lessor with a copy of each policy upon the request of the lessor. Also, where the lessor purchases such insurance in this manner, the lease shall specify that the authorized carrier will provide the lessor with a certificate of insurance for each such policy. Each certificate of insurance shall include the name of the insurer, the policy number, the effective dates of the policy, the amounts and types of coverage, the cost to the lessor for each type of coverage, and the deductible amount for each type of coverage for which the lessor may be liable.

(3) The lease shall clearly specify the conditions under which deductions for cargo or property damage may be made from the lessor's settlements. The lease shall further specify that the authorized carrier must provide the lessor with a written explanation and

itemization of any deductions for cargo or property damage made from any compensation of money owed to the lessor. The written explanation and itemization must be delivered to the lessor before any deductions are made.

(k) *Escrow funds.* If escrow funds are required, the lease shall specify:

(1) The amount of any escrow fund or performance bond required to be paid by the lessor to the authorized carrier or to a third party.

(2) The specific items to which the escrow fund can be applied.

(3) That while the escrow fund is under the control of the authorized carrier, the authorized carrier shall provide an accounting to the lessor of any transactions involving such fund. The carrier shall perform this accounting in one of the following ways:

(i) By clearly indicating in individual settlement sheets the amount and description of any deduction or addition made to the escrow fund; or

(ii) By providing a separate accounting to the lessor of any transactions involving the escrow fund. This separate accounting shall be done on a monthly basis.

(4) The right of the lessor to demand to have an accounting for transactions involving the escrow fund at any time.

(5) That while the escrow fund is under the control of the carrier, the carrier shall pay interest on the escrow fund on at least a quarterly basis. For purposes of calculating the balance of the escrow fund on which interest must be paid, the carrier may deduct a sum equal to the average advance made to the individual lessor during the period of time for which interest is paid. The interest rate shall be established on the date the interest period begins and shall be at least equal to the average yield or equivalent coupon issue yield on 91-day, 13-week Treasury bills as established in the weekly auction by the Department of Treasury.

(6) The conditions the lessor must fulfill in order to have the escrow fund returned. At the time of the return of the escrow fund, the authorized carrier may deduct monies for those obligations incurred by the lessor which have been previously specified in the lease, and shall provide a final accounting to the lessor of all such final deductions

made to the escrow fund. The lease shall further specify that in no event shall the escrow fund be returned later than 45 days from the date of termination.

(l) *Copies of the lease.* An original and two copies of each lease shall be signed by the parties. The authorized carrier shall keep the original and shall place a copy of the lease on the equipment during the period of the lease unless a statement as provided for in § 376.11(c)(2) is carried on the equipment instead. The owner of the equipment shall keep the other copy of the lease.

(m) This paragraph applies to owners who are not agents but whose equipment is used by an agent of an authorized carrier in providing transportation on behalf of that authorized carrier. In this situation, the authorized carrier is obligated to ensure that these owners receive all the rights and benefits due an owner under the leasing regulations, especially those set forth in paragraphs (d)–(k) of this section. This is true regardless of whether the lease for the equipment is directly between the authorized carrier and its agent rather than directly between the authorized carrier and each of these owners. The lease between an authorized carrier and its agent shall specify this obligation.

[44 FR 4681, Jan. 23, 1979, as amended at 45 FR 13092, Feb. 28, 1980; 47 FR 28398, June 30, 1982; 47 FR 51140, Nov. 12, 1982; 47 FR 54083, Dec. 1, 1982; 49 FR 47851, Dec. 7, 1984; 51 FR 37406, 37407, Oct. 22, 1986; 52 FR 2412, Jan. 22, 1987; 57 FR 32905, July 24, 1992; 62 FR 15424, Apr. 1, 1997]

Subpart C—Exemptions for the Leasing Regulations

§ 376.21 General exemptions.

Except for § 376.11(c) which requires the identification of equipment, the leasing regulations in this part shall not apply to:

(a) Equipment used in substituted motor-for-rail transportation of railroad freight moving between points that are railroad stations and on railroad billing.

(b) Equipment used in transportation performed exclusively within any commercial zone as defined by the Secretary.

(c) Equipment leased without drivers from a person who is principally engaged in such a business.

(d) Any type of trailer not drawn by a power unit leased from the same lessor.

[44 FR 4681, Jan. 23, 1979. Redesignated at 61 FR 54707, Oct. 21, 1996, as amended at 62 FR 15424, Apr. 1, 1997]

§ 376.22 Exemption for private carrier leasing and leasing between authorized carriers.

Regardless of the leasing regulations set forth in this part, an authorized carrier may lease equipment to or from another authorized carrier, or a private carrier may lease equipment to an authorized carrier under the following conditions:

(a) The identification of equipment requirements in § 376.11(c) must be complied with;

(b) The lessor must own the equipment or hold it under a lease;

(c) There must be a written agreement between the authorized carriers or between the private carrier and authorized carrier, as the case may be, concerning the equipment as follows:

(1) It must be signed by the parties or their authorized representatives.

(2) It must provide that control and responsibility for the operation of the equipment shall be that of the lessee from the time possession is taken by the lessee and the receipt required under § 376.11(b) is given to the lessor until: (i) Possession of the equipment is returned to the lessor and the receipt required under § 376.11(b) is received by the authorized carrier; or (ii) in the event that the agreement is between authorized carriers, possession of the equipment is returned to the lessor or given to another authorized carrier in an interchange of equipment.

(3) A copy of the agreement must be carried in the equipment while it is in the possession of the lessee.

(4) Nothing in this section shall prohibit the use, by authorized carriers, private carriers, and all other entities conducting lease operations pursuant to this section, of a master lease if a copy of that master lease is carried in the equipment while it is in the possession of the lessee, and if the master lease complies with the provisions of

§ 376.26

49 CFR Ch. III (10–1–04 Edition)

this section and receipts are exchanged in accordance with § 376.11(b), and if records of the equipment are prepared and maintained in accordance with § 376.11(d).

(d) Authorized and private carriers under common ownership and control may lease equipment to each other under this section without complying with the requirements of paragraph (a) of this section pertaining to identification of equipment, and the requirements of paragraphs (c)(2) and (c)(4) of this section pertaining to equipment receipts. The leasing of equipment between such carriers will be subject to all other requirements of this section.

[49 FR 9570, Mar. 14, 1984, as amended at 49 FR 47269, Dec. 3, 1984; 49 FR 47851, Dec. 7, 1984; 62 FR 15424, Apr. 1, 1997; 63 FR 40838, July 31, 1998]

§ 376.26 Exemption for leases between authorized carriers and their agents.

The leasing regulations set forth in § 376.12(e) through (l) do not apply to leases between authorized carriers and their agents.

[47 FR 28398, June 30, 1982, as amended at 62 FR 15424, Apr. 1, 1997]

Subpart D—Interchange Regulations

§ 376.31 Interchange of equipment.

Authorized common carriers may interchange equipment under the following conditions:

(a) *Interchange agreement.* There shall be a written contract, lease, or other arrangement providing for the interchange and specifically describing the equipment to be interchanged. This written agreement shall set forth the specific points of interchange, how the equipment is to be used, and the compensation for such use. The interchange agreement shall be signed by the parties or by their authorized representatives.

(b) *Operating authority.* The carriers participating in the interchange shall be registered with the Secretary to provide the transportation of the commodities at the point where the physical exchange occurs.

(c) *Through bills of lading.* The traffic transported in interchange service must move on through bills of lading issued by the originating carrier. The rates charged and the revenues collected must be accounted for in the same manner as if there had been no interchange. Charges for the use of the interchanged equipment shall be kept separate from divisions of the joint rates or the proportions of such rates accruing to the carriers by the application of local or proportional rates.

(d) *Identification of equipment.* The authorized common carrier receiving the equipment shall identify equipment operated by it in interchange service as follows:

(1) The authorized common carrier shall identify power units in accordance with the FMCSA's requirements in 49 CFR part 390 of this chapter (Identification of Vehicles). Before giving up possession of the equipment, the carrier shall remove all identification showing it as the operating carrier.

(2) Unless a copy of the interchange agreement is carried on the equipment, the authorized common carrier shall carry a statement with each vehicle during interchange service certifying that it is operating the equipment. The statement shall also identify the equipment by company or State registration number and shall show the specific point of interchange, the date and time it assumes responsibility for the equipment, and the use to be made of the equipment. This statement shall be signed by the parties to the interchange agreement or their authorized representatives. The requirements of this paragraph shall not apply where the equipment to be operated in interchange service consists only of trailers or semitrailers.

(3) Authorized carriers under common ownership and control may interchange equipment with each other without complying with the requirements of paragraph (d)(1) of this section pertaining to removal of identification from equipment.

(e) *Connecting carriers considered as owner.*—An authorized carrier receiving equipment in connection with a through movement shall be considered to the owner of the equipment for the purpose of leasing the equipment to

other authorized carriers in furtherance of the movement to destination or the return of the equipment after the movement is completed.

[44 FR 4681, Jan. 23, 1979. Redesignated at 61 FR 54707, Oct. 21, 1996, as amended at 62 FR 15424, Apr. 1, 1997; 63 FR 40838, July 31, 1998]

Subpart E—Private Carriers and Shippers

§ 376.42 Lease of equipment by regulated carriers.

Authorized carriers may lease equipment and drivers from private carriers, for periods of less than 30 days, in the manner set forth in § 376.22.

[49 FR 9570, Mar. 14, 1984, as amended at 51 FR 37034, Oct. 17, 1986; 62 FR 15424, Apr. 1, 1997]

377.217 Interline settlement of revenues.

AUTHORITY: 49 U.S.C. 13101, 13301, 13701, 13702, 13706, 13707, and 14101; and 49 CFR 1.73.

EDITORIAL NOTE: Nomenclature changes to part 377 appear at 66 FR 49871, Oct. 1, 2001.

Subpart A—Handling of C.O.D. Shipments

SOURCE: 32 FR 20050, Dec. 20, 1967, unless otherwise noted. Redesignated at 61 FR 54708, Oct. 21, 1996.

§ 377.101 Applicability.

The rules and regulations in this part apply to the transportation by motor

vehicle of c.o.d. shipments by all common carriers of property subject to 49 U.S.C. 13702, except such transportation which is auxiliary to or supplemental of transportation by railroad and performed on railroad bills of lading, and except such transportation which is performed for freight forwarders and on freight forwarder bills of lading.

[32 FR 20050, Dec. 20, 1967. Redesignated at 61 FR 54708, Oct. 21, 1996, as amended at 62 FR 15424, Apr. 1, 1997]

§ 377.103 Tariff requirements.

No common carrier of property subject to the provisions of 49 U.S.C. 13702, except as otherwise provided in § 377.101, shall render any c.o.d. service unless such carrier has published, posted and filed tariffs which contain the rates, charges and rules governing such service, which rules shall conform to the regulations in this part.

[32 FR 20050, Dec. 20, 1967. Redesignated at 61 FR 54708, Oct. 21, 1996, as amended at 62 FR 15424, Apr. 1, 1997]

§ 377.105 Collection and remittance.

Every common carrier of property subject to 49 U.S.C. 13702, except as otherwise provided in § 377.101, which chooses to provide c.o.d. service may publish and maintain, or cause to be published and maintained for its account, a tariff or tariffs which set forth nondiscriminatory rules governing c.o.d. service and the collection and remittance of c.o.d. funds. Alternatively, any carrier that provides c.o.d. service, but does not wish to publish and maintain, or cause to be published and maintained, its own nondiscriminatory tariff, may adopt a rule requiring remittance of each c.o.d. collection directly to the consignor or other person designated by the consignor as payee within fifteen (15) days after delivery of the c.o.d. shipment to the consignee.

[52 FR 45966, Dec. 3, 1987, as amended at 62 FR 15424, Apr. 1, 1997]

Subpart B—Extension of Credit to Shippers by Motor Common Carriers, Water Common Carriers, and Household Goods Freight Forwarders

SOURCE: 50 FR 2290, Jan 16, 1985, unless otherwise noted. Redesignated at 61 FR 54709, Oct. 21, 1996.

§ 377.201 Scope.

(a) *General.* These regulations apply to the extension of credit in the transportation of property under Federal Motor Carrier Safety Administration regulation by motor carriers and household goods freight forwarders, except as otherwise provided.

(b) *Exceptions.* These regulations do not apply to—

- (1) Contract carriage operations.
- (2) Transportation for—
 - (i) The United States or any department, bureau, or agency thereof,
 - (ii) Any State, or political subdivision thereof,
 - (iii) The District of Columbia.
- (3) Property transportation incidental to passenger operations.

[50 FR 2290, Jan. 16, 1985, as amended at 51 FR 44297, Dec. 9, 1986; 62 FR 15424, Apr. 1, 1997]

§ 377.203 Extension of credit to shippers.

(a) *Authorization to extend credit.* (1) A carrier that meets the requirements in paragraph (a)(2) of this section may—

- (i) Relinquish possession of freight in advance of the payment of the tariff charges, and
- (ii) Extend credit in the amount of such charges to those who undertake to pay them (such persons are called *shippers* in this part).

(2) For such authorization, the carrier shall take reasonable actions to assure payment of the tariff charges within the credit periods specified—

- (i) In this part, or
- (ii) In tariff provisions published pursuant to the regulations in paragraph (d) of this section.

(b) *When the credit period begins.* The credit period shall begin on the day following presentation of the freight bill.

(c) *Length of credit period.* Unless a different credit period has been estab-

lished by tariff publication pursuant to paragraph (d) of this section, the credit period is 15 days. It includes Saturdays, Sundays, and legal holidays.

(d) *Carriers may establish different credit periods in tariff rules.* Carriers may publish tariff rules establishing credit periods different from those in paragraph (c) of this section. Such credit periods shall not be longer than 30 calendar days.

(e) *Service charges.* (1) Service charges shall not apply when credit is extended and payments are made within the standard credit period. The term *standard credit period*, as used in the preceding sentence, means—

- (i) The credit period prescribed in paragraph (c) of this section, or
- (ii) A substitute credit period published in a tariff rule pursuant to the authorization in paragraph (d) of this section.

(2) Carriers may, by tariff rule, extend credit for an additional time period, subject if they wish to a service charge for that additional time. The combined length of the carrier's standard credit period (as defined in paragraph (e)(1) of this section) and its additional credit period shall not exceed the 30-day maximum credit period prescribed in paragraph (d) of this section. When such a tariff rule is in effect, shippers may elect to postpone payment until the end of the extended credit period if, in consideration thereof, they include any published service charges when making their payment.

(3) Carriers may, by tariff rule, establish service charges for payments made after the expiration of an authorized credit period. Such a rule shall—

- (i) Institute such charges on the day following the last day of an authorized credit period, and
- (ii) Notify shippers—

(A) That its only purpose is to prevent a shipper who does not pay on time from having free use of funds due to the carrier,

(B) That it does not sanction payment delays, and

(C) That failure to pay within the authorized credit period will, despite this provision for such charges, continue to require the carrier, before again extending credit, to determine in good faith whether the shipper will comply

with the credit regulations in the future.

(4) Tariff rules that establish charges pursuant to paragraph (e) (2) or (3) of this section may establish minimum charges.

(f) *Discounts.* Carriers may, by tariff rule, authorize discounts for early freight bill payments when credit is extended.

(g)(1) *Collection expense charges.* Carriers may, by tariff rule, assess reasonable and certain liquidated damages for all costs incurred in the collection of overdue freight charges. Carriers may use one of two methods in their tariffs:

(i) The first method is to assess liquidated damages as a separate additional charge to the unpaid freight bill. In doing so, the tariff rule shall disclose the exact amount of the charges by stating either a dollar or specified percentage amount (or a combination of both) of the unpaid freight bill. The tariff shall further specify the time period (which shall at least allow for the authorized credit period) within which the shipper must pay to avoid such liquidated damages.

(ii) The second method is to require payment of the full, nondiscounted rate instead of the discounted rate otherwise applicable. The difference between the discount and the full rate constitutes a carrier's liquidated damages for its collection effort. Under this method the tariff shall identify the discount rates that are subject to the condition precedent and which require the shipper to make payment by a date certain. The date certain may not be set to occur by the carrier until at least after the expiration of the carrier's authorized credit period.

(2) The damages, the timing of their applicability, and the conditions, if any, as provided by the tariff-rule methods allowed under paragraphs (g)(1) (i) and (ii) of this section also:

(i) Shall be clearly described in the tariff rule;

(ii) Shall be applied without unlawful prejudice and/or unjust discrimination between similarly situated shippers and/or consignees;

(iii) Shall be applied only to the non-payment of original, separate and independent freight bills and shall not apply to aggregate *balance-due* claims

sought for collection on past shipments by a bankruptcy trustee, or any other person or agent;

(iv) Shall not apply to instances of clear clerical or ministerial error such as non-receipt of a carrier's freight bill, or shipper's payment check lost in the mail, or carrier mailing of the freight bill to the wrong address;

(v) Shall not apply in any way to a charge for a transportation service if the carrier's bill of lading independently provides that the shipper is liable for fees incurred by the carrier in the collection of freight charges on that same transportation service;

(vi) shall be applied only after the authorized credit period, and when the carrier has issued a revised freight bill or notice of imposition of collection expense charges for late payment within 90 days after expiration of the authorized credit period.

(3) As an alternative to the tariff-rule methods allowed under paragraphs (g)(1) (i) and (ii) of this section, a carrier may, wholly outside of its tariff, assess collection charges though contract terms in a bill of lading. By using the carrier and its bill of lading, the shipper accepts the bill of lading terms.

(h) *Discrimination prohibited.* Tariff rules published pursuant to paragraphs (d), (e), and (f) of this section shall not result in unreasonable discrimination among shippers.

[50 FR 2290, Jan 16, 1985, as amended at 53 FR 6991, Mar. 4, 1988; 54 FR 30748, July 24, 1989]

§ 377.205 Presentation of freight bills.

(a) *"To be prepaid" shipments.* (1) On "to be prepaid" shipments, the carrier shall present its freight bill for all transportation charges within the time period prescribed in paragraph (a)(2) of this section, except—

(i) As noted in paragraph (d) of this section, or

(ii) As otherwise excepted in this part.

(2) The time period for a carrier to present its freight bill for all transportation charges shall be 7 days, measured from the date the carrier received the shipment. This time period does not include Saturdays, Sundays, or legal holidays.

§ 377.207

49 CFR Ch. III (10–1–04 Edition)

(b) “*Collect*” shipments. (1) On “collect” shipments, the carrier shall present its freight bill for all transportation charges within the time period prescribed in paragraph (b)(2) and of this section, except—

(i) As noted in paragraph (d) of this section, or

(ii) As otherwise excepted in this part.

(2) The time period for a carrier to present its freight bill for all transportation charges shall be 7 days, measured from the date the shipment was delivered at its destination. This time period does not include Saturdays, Sundays, or legal holidays.

(c) *Bills or accompanying written notices shall state penalties for late payment, credit time limits and service charge and/or collection expense charge and discount terms.* When credit is extended, freight bills or a separate written notice accompanying a freight bill or a group of freight bills presented at one time shall state that “failure timely to pay freight charges may be subject to tariff penalties” (or a statement of similar import). The bills or other notice shall also state the time by which payment must be made and any applicable service charge and/or collection expense charge and discount terms.

(d) *When the carrier lacks sufficient information to compute tariff charges.* (1) When information sufficient to enable the carrier to compute the tariff charges is not then available to the carrier at its billing point, the carrier shall present its freight bill for payment within 7 days following the day upon which sufficient information becomes available at the billing point. This time period does not include Saturdays, Sundays, or legal holidays.

(2) A carrier shall not extend further credit to any shipper which fails to furnish sufficient information to allow the carrier to render a freight bill within a reasonable time after the shipment is tendered to the origin carrier.

(3) As used in this paragraph, the term “shipper” includes, but is not limited to, freight forwarders, and shippers’ associations and shippers’ agents.

[50 FR 2290, Jan 16, 1985, as amended at 54 FR 30748, July 24, 1989; 62 FR 15424, Apr. 1, 1997]

§ 377.207 Effect of mailing freight bills or payments.

(a) *Presentation of freight bills by mail.* When carriers present freight bills by mail, the time of mailing shall be deemed to be the time of presentation of the bills. The term *freight bills*, as used in this paragraph, includes both paper documents and billing by use of electronic media such as computer tapes or disks, when the mails are used to transmit them.

(b) *Payment by mail.* When shippers mail acceptable checks, drafts, or money orders in payment of freight charges, the act of mailing them within the credit period shall be deemed to be the collection of the tariff charges within the credit period for the purposes of the regulations in this part.

(c) *Disputes as to date of mailing.* In case of dispute as to the date of mailing, the postmark shall be accepted as such date.

§ 377.209 Additional charges.

When a carrier—

(a) Has collected the amount of tariff charges represented in a freight bill presented by it as the total amount of such charges, and

(b) Thereafter presents to the shipper another freight bill for additional charges—

the carrier may extend credit in the amount of such additional charges for a period of 30 calendar days from the date of the presentation of the freight bill for the additional charges.

§ 377.211 Computation of time.

Time periods involving calendar days shall be calculated pursuant to 49 CFR 386.32(a).

[50 FR 2290, Jan 16, 1985. Redesignated at 61 FR 54709, Oct. 21, 1996, as amended at 62 FR 15424, Apr. 1, 1997]

§§ 377.213–377.215 [Reserved]

§ 377.217 Interline settlement of revenues.

Nothing in this part shall be interpreted as affecting the interline settlement of revenues from traffic which is

transported over through routes composed of lines of common carriers subject to the Secretary's jurisdiction under 49 U.S.C. subtitle IV, part B.

[50 FR 2290, Jan 16, 1985. Redesignated at 61 FR 54709, Oct. 21, 1996, as amended at 62 FR 15424, Apr. 1, 1997]

PART 378—PROCEDURES GOVERNING THE PROCESSING, INVESTIGATION, AND DISPOSITION OF OVERCHARGE, DUPLICATE PAYMENT, OR OVERCOLLECTION CLAIMS

Sec.

378.1 Applicability.

378.2 Definitions.

378.3 Filing and processing claims.

378.4 Documentation of claims.

378.5 Investigation of claims.

378.6 Claim records.

378.7 Acknowledgment of claims.

378.8 Disposition of claims.

378.9 Disposition of unidentified payments, overcharges, duplicate payments, and overcollections not supported by claims.

AUTHORITY: 49 U.S.C. 13321, 14101, 14704 and 14705; and 49 CFR 1.73.

SOURCE: 43 FR 41040, Sept. 14, 1978, unless otherwise noted. Redesignated at 61 FR 54707, Oct. 21, 1996.

§ 378.1 Applicability.

The regulations set forth in this part govern the processing of claims for overcharge, duplicate payment, or overcollection for the transportation of property in interstate or foreign commerce by motor common carriers and household goods freight forwarders subject to 49 U.S.C. subtitle IV, part B.

[43 FR 41040, Sept. 14, 1978, as amended at 51 FR 44297, Dec. 9, 1986; 62 FR 15424, Apr. 1, 1997]

§ 378.2 Definitions.

(a) *Carrier* means a motor common carrier or household goods freight forwarder subject to 49 U.S.C. subtitle IV, part B.

(b) *Overcharge* means an overcharge as defined in 49 U.S.C. 14704(b). It also includes duplicate payments as defined in paragraph (c) of this section and overcollections as defined in paragraph (d) of this section when a dispute exists between the parties concerning such charges.

(c) *Duplicate payment* means two or more payments for transporting the same shipment. Where one or more payment is not in the exact amount of the applicable tariff rates and charges, refunds shall be made on the basis of the excess amount over the applicable tariff rates and charges.

(d) *Overcollection* means the receipt by a household goods carrier of a payment in excess of the transportation and/or accessorial charges applicable to a particular shipment of household goods, as defined in part 375 of this chapter, under tariffs lawfully on file with the United States Department of Transportation's Surface Transportation Board.

(e) *Unidentified payment* means a payment which a carrier has received but which the carrier is unable to match with its open accounts receivable or otherwise identify as being due for the performance of transportation services.

(f) *Claimant* means any shipper or receiver, or its authorized agent, filing a request with a carrier for the refund of an overcharge, duplicate payment, or overcollection.

[43 FR 41040, Sept. 14, 1978, as amended at 44 FR 66832, Nov. 21, 1979; 51 FR 34989, Oct. 1, 1986; 51 FR 44297, Dec. 9, 1986; 62 FR 15424, Apr. 1, 1997]

§ 378.3 Filing and processing claims.

(a) A claim for overcharge, duplicate payment, or overcollection shall not be paid unless filed in writing or electronically communicated (when agreed to by the carrier and shipper or receiver involved) with the carrier that collected the transportation charges. The collecting carrier shall be the carrier to process all such claims. When a claim is filed with another carrier that participated in the transportation, that carrier shall transmit the claim to the collecting carrier within 15 days after receipt of the claim. If the collecting carrier is unable to dispose of the claim for any reason, the claim may be filed with or transferred to any participating carrier for final disposition.

(b) A single claim may include more than one shipment provided the claim on each shipment involves:

(1) The same tariff issue or authority or circumstances,

§ 378.4

(2) Single line service by the same carrier, or

(3) Service by the same interline carriers.

[43 FR 41040, Sept. 14, 1978, as amended at 47 FR 12804, Mar. 25, 1982]

§ 378.4 Documentation of claims.

(a) Claims for overcharge, duplicate payment, or overcollection shall be accompanied by sufficient information to allow the carriers to conduct an investigation and pay or decline the claim within the time limitations set forth in § 378.8. Claims shall include the name of the claimant, its file number, if any, and the amount of the refund sought to be recovered, if known.

(b) Except when the original freight bill is not a paper document but is electronically transmitted, claims for overcharge shall be accompanied by the original freight bill. Additional information may include, but is not limited to, the following:

(1) The rate, classification, or commodity description or weight claimed to have been applicable.

(2) Complete tariff authority for the rate, classification, or commodity description claimed.

(3) Freight bill payment information.

(4) Other documents or data which is believed by claimant to substantiate the basis for its claim.

(c) Claims for duplicate payment and overcollection shall be accompanied by the original freight bill(s) for which charges were paid (except when the original freight bill is not a paper document but is electronically transmitted) and by freight bill payment information.

(d) Regardless of the provisions of paragraphs (a), (b), and (c) of this section, the failure to provide sufficient information and documentation to allow a carrier to conduct an investigation and pay or decline the claim within the allowable time limitation shall not constitute grounds for disallowance of the claim. Rather, the carrier shall comply with § 378.5(c) to obtain the additional information required.

(e) A carrier shall accept copies instead of the original documents required to be submitted in this section where the carrier is furnished with an agreement entered into by the claim-

49 CFR Ch. III (10–1–04 Edition)

ant which indemnifies the carrier for subsequent duplicate claims which might be filed and supported by the original documents.

[43 FR 41040, Sept. 14, 1978, as amended at 44 FR 4679, Jan. 23, 1979; 47 FR 12804, Mar. 25, 1982; 62 FR 15424, Apr. 1, 1997]

§ 378.5 Investigation of claims.

(a) Upon receipt of a claim, whether written or otherwise, the processing carrier shall promptly initiate an investigation and establish a file, as required by § 378.6.

(b) If a carrier discovers an overcharge, duplicate payment, or overcollection which has not been the subject of a claim, it shall promptly initiate an investigation and comply with the provisions in § 378.9.

(c) In the event the carrier processing the claim requires information or documents in addition to that submitted with the claim, the carrier shall promptly notify the claimant and request the information required. This includes notifying the claimant that a written or electronically transmitted claim must be filed before the carrier becomes subject to the time limits for settling such a claim under § 378.8.

[43 FR 41040, Sept. 14, 1978, as amended at 47 FR 12804, Mar. 25, 1982; 62 FR 15424, 15425, Apr. 1, 1997]

§ 378.6 Claim records.

At the time a claim is received the carrier shall create a separate file and assign it a successive claim file number and note that number on all documents filed in support of the claim and all records and correspondence with respect to the claim, including the written or electronic acknowledgment of receipt required under § 378.7. If pertinent to the disposition of the claim, the carrier shall also note that number on the shipping order and delivery receipt, if any, covering the shipment involved.

[47 FR 12804, Mar. 25, 1982, as amended at 62 FR 15425, Apr. 1, 1997]

§ 378.7 Acknowledgment of claims.

Upon receipt of a written or electronically transmitted claim, the carrier shall acknowledge its receipt in

writing or electronically to the claimant within 30 days after the date of receipt except when the carrier shall have paid or declined in writing or electronically within that period. The carrier shall include the date of receipt in its written or electronic claim which shall be placed in the file for that claim.

[47 FR 12804, Mar. 25, 1982]

§ 378.8 Disposition of claims.

The processing carrier shall pay, decline to pay, or settle each written or electronically communicated claim within 60 days after its receipt by that carrier, except where the claimant and the carrier agree in writing or electronically to a specific extension based upon extenuating circumstances. If the carrier declines to pay a claim or makes settlement in an amount different from that sought, the carrier shall notify the claimant in writing or electronically, of the reason(s) for its action, citing tariff authority or other pertinent information developed as a result of its investigation.

[47 FR 12804, Mar. 25, 1982]

§ 378.9 Disposition of unidentified payments, overcharges, duplicate payments, and overcollections not supported by claims.

(a)(1) Carriers shall establish procedures for identifying and properly applying all unidentified payments. If a carrier does not have sufficient information with which properly to apply such a payment, the carrier shall notify the payor of the unidentified payment within 60 days of receipt of the payment and request information which will enable it to identify the payment. If the carrier does not receive the information requested within 90 days from the date of the notice, the carrier may treat the unidentified payment as a payment in fact of freight charges owing to it. Following the 90-day period, the regular claims procedure under this part shall be applicable.

(2) Notice shall be in writing and clearly indicate that it is a final notice and not a bill. Notice shall include: The check number, amount, and date; the payor's name; and any additional basic

information the carrier is able to provide. The final notice also must inform payor that: (i) Applicable regulations allow the carrier to conditionally retain the payment as revenue in the absence of a timely response by the payor; and (ii) following the 90-day period the regular claims procedure shall be applicable.

(3) Upon a carrier's receipt of information from the payor, the carrier shall, within 14 days: (i) Make a complete refund of such funds to the payor; or (ii) notify the payor that the information supplied is not sufficient to identify the unapplied payment and request additional information; or (iii) notify the payor of the carrier's determination that such payment was applicable to particular freight charges lawfully due the carrier. Where no refund is made by the carrier, the carrier shall advise the payor of its right to file a formal claim for refund with the carrier in accordance with the regular claims procedure under this part.

(b) When a carrier which participates in a transportation movement, but did not collect the transportation charges, finds that an overpayment has been made, that carrier shall immediately notify the collecting carrier. When the collecting carrier (when single or joint line haul) discovers or is notified by such a participating carrier that an overcharge, duplicate payment, or overcollection exists for any transportation charge which has not been the subject of a claim, the carrier shall create a file as if a claim had been submitted and shall record in the file the date it discovered or was notified of the overpayment. The carrier that collected the charges shall then refund the amount of the overpayment to the person who paid the transportation charges or to the person that made duplicate payment within 30 days from the date of such discovery or notification.

[43 FR 41040, Sept. 14, 1978, as amended at 44 FR 66832, Nov. 21, 1979]

PART 379—PRESERVATION OF RECORDS

Sec.

379.1 Applicability.

379.3 Records required to be retained.

§ 379.1

379.5 Protection and storage of records.

379.7 Preservation of records.

379.9 Companies going out of business.

379.11 Waiver of requirements of the regulations in this part.

379.13 Disposition and retention of records.

APPENDIX A TO PART 379—SCHEDULE OF RECORDS AND PERIODS OF RETENTION

AUTHORITY: 49 U.S.C. 13301, 14122 and 14123; and 49 CFR 1.73.

SOURCE: 62 FR 32044, June 12, 1997, unless otherwise noted.

EDITORIAL NOTE: Nomenclature changes to part 379 appear at 66 FR 49871, Oct. 1, 2001.

§ 379.1 Applicability.

(a) The preservation of record rules contained in this part shall apply to the following:

- (1) Motor carriers and brokers;
- (2) Water carriers; and
- (3) Household goods freight forwarders.

(b) This part applies also to the preservation of accounts, records and memoranda of traffic associations, weighing and inspection bureaus, and other joint activities maintained by or on behalf of companies listed in paragraph (a) of this section.

§ 379.3 Records required to be retained.

Companies subject to this part shall retain records for the minimum retention periods provided in appendix A to this part. After the required retention periods, the records may be destroyed at the discretion of each company's management. It shall be the obligation of the subject company to maintain records that adequately support financial and operational data required by the Secretary. The company may request a ruling from the Secretary on the retention of any record. The provisions of this part shall not be construed as excusing compliance with the lawful requirements of any other governmental body prescribing longer retention periods for any category of records.

§ 379.5 Protection and storage of records.

(a) The company shall protect records subject to this part from fires, floods, and other hazards, and safeguard the records from unnecessary ex-

49 CFR Ch. III (10–1–04 Edition)

posure to deterioration from excessive humidity, dryness, or lack of ventilation.

(b) The company shall notify the Secretary if prescribed records are substantially destroyed or damaged before the term of the prescribed retention periods.

§ 379.7 Preservation of records.

(a) All records may be preserved by any technology that is immune to alteration, modification, or erasure of the underlying data and will enable production of an accurate and unaltered paper copy.

(b) Records not originally preserved on hard copy shall be accompanied by a statement executed by a person having personal knowledge of the facts indicating the type of data included within the records. One comprehensive statement may be executed in lieu of individual statements for multiple records if the type of data included in the multiple records is common to all such records. The records shall be indexed and retained in such a manner as will render them readily accessible. The company shall have facilities available to locate, identify and produce legible paper copies of the records.

(c) Any significant characteristic, feature or other attribute that a particular medium will not preserve shall be clearly indicated at the beginning of the applicable records as appropriate.

(d) The printed side of forms, such as instructions, need not be preserved for each record as long as the printed matter is common to all such forms and an identified specimen of the form is maintained on the medium for reference.

§ 379.9 Companies going out of business.

The records referred to in the regulations in this part may be destroyed after business is discontinued and the company is completely liquidated. The records may not be destroyed until dissolution is final and all pending transactions and claims are completed. When a company is merged with another company under jurisdiction of the Secretary, the successor company shall preserve records of the merged

company in accordance with the regulations in this part.

§379.11 Waiver of requirements of the regulations in this part.

A waiver from any provision of the regulations in this part may be made by the Secretary upon his/her own initiative or upon submission of a written request by the company. Each request for waiver shall demonstrate that unusual circumstances warrant a departure from prescribed retention periods, procedures, or techniques, or that compliance with such prescribed requirements would impose an unreasonable burden on the company.

§379.13 Disposition and retention of records.

The schedule in appendix A to this part shows periods that designated records shall be preserved. The descriptions specified under the various general headings are for convenient reference and identification, and are intended to apply to the items named regardless of what the records are called in individual companies and regardless of the record media. The retention periods represent the prescribed number of years from the date of the document and not calendar years. Records not listed in appendix A to this part shall be retained as determined by the management of each company.

APPENDIX A TO PART 379—SCHEDULE OF RECORDS AND PERIODS OF RETENTION

Item and category of records	Retention period
A. Corporate and General	
1. Incorporation and reorganization:	
(a) Charter or certificate of incorporation and amendments	Note A.
(b) Legal documents related to mergers, consolidations, reorganization, receiverships and similar actions which affect the identity or organization of the company.	Note A.
2. Minutes of Directors, Executive Committees, Stockholders and other corporate meetings.	Note A.
3. Titles, franchises and authorities:	
(a) Certificates of public convenience and necessity issued by regulating bodies.	Until expiration or cancellation.
(b) Operating authorizations and exemptions to operate	Until expiration or cancellation.
(c) Copies of formal orders of regulatory bodies served upon the company.	Note A.
(d) Deeds, charters, and other title papers	Until disposition of property.
(e) Patents and patent records	Note A.
4. Annual reports or statements to stockholders	3 years.
5. Contracts and agreements:	
(a) Service contracts, such as for operational management, accounting, financial or legal services, and agreements with agents.	Until expiration or termination plus 3 years.
(b) Contracts and other agreements relating to the construction, acquisition or sale of real property and equipment except as otherwise provided in (a) above.	Until expiration or termination plus 3 years.
(c) Contracts for the purchase or sale of material and supplies except as provided in (a) above.	Until expiration.
(d) Shipping contracts for transportation or caretakers of freight	Until expiration.
(e) Contracts with employees and employee bargaining groups	Until expiration.
(f) Contracts, leases and agreements, not specifically provided for in this section.	Until expiration or termination plus 1 year.
6. Accountant's auditor's, and inspector's reports:	
(a) Certifications and reports of examinations and audits conducted by public accountants.	3 years.
(b) Reports of examinations and audits conducted by internal auditors, time inspectors, and others.	3 years.
7. Other	Note A.
B. Treasury	
1. Capital stock records:	
(a) Capital stock ledger	Note A.
(b) Capital stock certificates, records of or stubs of	Note A.
(c) Stock transfer register	Note A.
2. Long-term debt records:	
(a) Bond indentures, underwritings, mortgages, and other long-term credit agreements.	Until redemption plus 3 years.
(b) Registered bonds and debenture ledgers	Until redemption plus 3 years.
(c) Stubs or similar records of bonds or other long-term debt issued	Note A.

Item and category of records	Retention period
3. Authorizations from regulatory bodies for issuance of securities including applications, reports, and supporting papers.	Note A.
4. Records of securities owned, in treasury, or held by custodians, detailed ledgers and journals, or their equivalent.	Until the securities are sold, redeemed or otherwise disposed of.
5. Other	Note A.
C. Financial and Accounting	
1. Ledgers:	
(a) General and subsidiary ledgers with indexes	Until discontinuance of use plus 3 years.
(b) Balance sheets and trial balance sheets of general and subsidiary ledgers.	3 years.
2. Journals:	
(a) General journals	Until discontinuance of use plus 3 years.
(b) Subsidiary journals and any supporting data, except as otherwise provided for, necessary to explain journal entries.	3 years.
3. Cash books:	
(a) General cash books	Until discontinuance of use plus 3 years.
(b) Subsidiary cash books	3 years.
4. Vouchers:	
(a) Voucher registers, indexes, or equivalent	3 years.
(b) Paid and canceled vouchers, expenditure authorizations, detailed distribution sheets and other supporting data including original bills and invoices, if not provided for elsewhere.	3 years.
(c) Paid drafts, paid checks, and receipts for cash paid out	3 years.
5. Accounts receivable:	
(a) Record or register of accounts receivable, indexes thereto, and summaries of distribution.	3 years after settlement.
(b) Bills issued for collection and supporting data	3 years after settlement.
(c) Authorization for writing off receivables	1 year.
(d) Reports and statements showing age and status of receivables	1 year.
6. Records of accounting codes and instructions	3 years after discontinuance.
7. Other	Note A.
D. Property and Equipment	
Note.—All accounts, records, and memoranda necessary for making a complete analysis of the cost or value of property shall be retained for the periods shown. If any of the records elsewhere provided for in this schedule are of this character, they shall be retained for the periods shown below, regardless of any lesser retention period assigned.	
1. Property records:	
(a) Records which maintain complete information on cost or other value of all real and personal property or equipment.	3 years after disposition of property.
(b) Records of additions and betterments made to property and equipment.	3 years after disposition of property.
(c) Records pertaining to retirements and replacements of property and equipment.	3 years after disposition of property.
(d) Records pertaining to depreciation	3 years after disposition of property.
(e) Records of equipment number changes	3 years after disposition of property.
(f) Records of motor and engine changes	3 years after disposition of property.
(g) Records of equipment lightweighed and stenciled	Only current or latest records.
2. Engineering records of property changes actually made	3 years after disposition of property.
3. Other	Note A.
E. Personnel and Payroll	
1. Personnel and payroll records	1 year.
F. Insurance and Claims	
1. Insurance records:	
(a) Schedules of insurance against fire, storms, and other hazards and records of premium payments.	Until expiration plus 1 year.
(b) Records of losses and recoveries from insurance companies and supporting papers.	1 year after settlement.
(c) Insurance policies	Until expiration of coverage plus 1 year.
2. Claims records:	
(a) Claim registers, card or book indexes, and other records which record personal injury, fire and other claims against the company, together with all supporting data.	1 year after settlement.
(b) Claims registers, card or book indexes, and other records which record overcharges, damages, and other claims filed by the company against others, together with all supporting data.	1 year after settlement.
(c) Records giving the details of authorities issued to agents, carriers, and others for participation in freight claims.	3 years.
(d) Reports, statements and other data pertaining to personal injuries or damage to property when not necessary to support claims or vouchers.	3 years.
(e) Reports, statements, tracers, and other data pertaining to unclaimed, over, short, damaged, and refused freight, when not necessary to support claims or vouchers.	1 year.

Federal Motor Carrier Safety Administration, DOT

Pt. 379, App. A

Item and category of records	Retention period
(f) Authorities for disposal of unclaimed, damaged, and refused freight ...	3 years.
3. Other	Note A.
G. Taxes	
1. Taxes	Note A.
H. Purchases and Stores	
1. Purchases and stores.	Note A.
I. Shipping and Agency Documents	
1. Bills of lading and releases:	
(a) Consignors' shipping orders, consignors' shipping tickets, and copies of bills of lading, freight bills from other carriers and other similar documents furnished the carrier for movement of freight.	1 year.
(b) Shippers' order-to-notify bills of lading taken up and canceled	1 year.
2. Freight waybills:	
(a) Local waybills	1 year.
(b) Interline waybills received from and made to other carriers	1 year.
(c) Company freight waybills	1 year.
(d) Express waybills	1 year.
3. Freight bills and settlements:	
(a) Paid copy of freight bill retained to support receipt of freight charges:	
(1) Bus express freight bills provided no claim has been filed	1 year.
(2) All other freight bills	1 year.
(b) Paid copy of freight bill retained to support payment of freight charges to other carriers:	
(1) Bus express freight bills provided no claim has been filed	1 year.
(2) All other freight bills	1 year.
(c) Records of unsettled freight bills and supporting papers	1 year after disposition.
(d) Records and reports of correction notices	1 year.
4. Other freight records:	
(a) Records of freight received, forwarded, and delivered	1 year.
(b) Notice to consignees of arrival of freight; tender of delivery	1 year.
5. Agency records (to include conductors, pursers, stewards, and others):	
(a) Cash books	1 year.
(b) Remittance records, bank deposit slips and supporting papers	1 year.
(c) Balance sheets and supporting papers	1 year.
(d) Statements of corrections in agents' accounts	1 year.
(e) Other records and reports pertaining to ticket sales, baggage handled, miscellaneous collections, refunds, adjustments, etc..	1 year.
J. Transportation	
1. Records pertaining to transportation of household goods:	
(a) Estimate of charges	1 year.
(b) Order for service	1 year.
(c) Vehicle-load manifest	1 year.
(d) Descriptive inventory	1 year.
2. Records and reports pertaining to operation of marine and floating equipment:	
(a) Ship log	3 years.
(b) Ship articles	3 years.
(c) Passenger and room list	3 years.
(d) Floatmen's barge, lighter, and escrow captain's reports, demurrage records, towing reports and checks sheets.	2 years.
3. Dispatchers' sheets, registers, and other records pertaining to movement of transportation equipment.	3 years.
4. Import and export records including bonded freight and steamship engagements.	2 years.
5. Records, reports, orders and tickets pertaining to weighting of freight	3 years.
6. Records of loading and unloading of transportation equipment	2 years.
7. Records pertaining to the diversion or reconsignment of freight, including requests, tracers, and correspondence.	2 years.
8. Other	Note A.
K. Supporting Data for Reports and Statistics	
1. Supporting data for reports filed with the Federal Motor Carrier Safety Administration, the Surface Transportation Board, the Department of Transportation's Bureau of Transportation Statistics and regulatory bodies:	
(a) Supporting data for annual financial, operating and statistical reports	3 years.
(b) Supporting data for periodical reports of operating revenues, expenses, and income.	3 years.
(c) Supporting data for reports detailing use of proceeds from issuance or sale of company securities.	3 years.

Item and category of records	Retention period
(d) Supporting data for valuation inventory reports and records. This includes related notes, maps and sketches, underlying engineering, land, and accounting reports, pricing schedules, summary or collection sheets, yearly reports of changes and other miscellaneous data, all relating to the valuation of the company's property by the Federal Highway Administration, the Surface Transportation Board, the Department of Transportation's Bureau of Transportation Statistics or other regulatory body.	3 years after disposition of the property.
2. Supporting data for periodical reports of accidents, inspections, tests, hours of service, repairs, etc..	3 years.
3. Supporting data for periodical statistical of operating results or performance by tonnage, mileage, passengers carried, piggyback traffic, commodities, costs, analyses of increases and decreases, or otherwise.	3 years.
M. Miscellaneous	
1. Index of records	Until revised as record structure changes.
2. Statement listing records prematurely destroyed or lost	For the remainder of the period as prescribed for records destroyed.

Note A.—Records referenced to this note shall be maintained as determined by the designated records supervisory official. Companies should be mindful of the record retention requirements of the Internal Revenue Service, Securities and Exchange Commission, State and local jurisdictions, and other regulatory agencies. Companies shall exercise reasonable care in choosing retention periods, and the choice of retention periods shall reflect past experiences, company needs, pending litigation, and regulatory requirements.

PART 380—SPECIAL TRAINING REQUIREMENTS

Subpart A—Longer Combination Vehicle (LCV) Driver-Training and Driver-Instructor Requirements—General

Sec.

- 380.101 Purpose and scope.
- 380.103 Applicability.
- 380.105 Definitions.
- 380.107 General requirements.
- 380.109 Driver testing.
- 380.111 Substitute for driver training.
- 380.113 Employer responsibilities.

Subpart B—LCV Driver-Training Program

- 380.201 General requirements.
- 380.203 LCV Doubles.
- 380.205 LCV Triples.

Subpart C—LCV Driver-Instructor Requirements

- 380.301 General requirements.
- 380.303 Substitute for instructor requirements.
- 380.305 Employer responsibilities.

Subpart D—Driver-Training Certification

- 380.401 Certification document.

Subpart E—Entry-Level Driver Training Requirements

- 380.500 Compliance date for training requirements for entry-level drivers.
- 380.501 Applicability.
- 380.502 Definitions.
- 380.503 Entry-level driver training requirements.

- 380.505 Proof of training.
- 380.507 Driver responsibilities.
- 380.509 Employer responsibilities.
- 380.511 Employer recordkeeping responsibilities.
- 380.513 Required information on the training certificate.

APPENDIX TO PART 380—LCV DRIVER TRAINING PROGRAMS, REQUIRED KNOWLEDGE AND SKILLS

AUTHORITY: 49 U.S.C. 31133, 31136, 31307, and 31502; sec. 4007(a) and (b) of Pub. L. 102–240 (105 Stat. 2151–2152); and 49 CFR 1.73.

SOURCE: 69 FR 16732, Mar. 30, 2004, unless otherwise noted.

Subpart A—Longer Combination Vehicle (LCV) Driver-Training and Driver-Instructor Requirements—General

§ 380.101 Purpose and scope.

(a) *Purpose.* The purpose of this part is to establish minimum requirements for operators of longer combination vehicles (LCVs) and LCV driver-instructors.

(b) *Scope.* This part establishes:

- (1) Minimum training requirements for operators of LCVs;
- (2) Minimum qualification requirements for LCV driver-instructors; and
- (3) Procedures for determining compliance with this part by operators, instructors, training institutions, and employers.

§ 380.103 Applicability.

The rules in this part apply to all operators of LCVs in interstate commerce, employers of such persons, and LCV driver-instructors.

§ 380.105 Definitions.

(a) The definitions in part 383 of this subchapter apply to this part, except where otherwise specifically noted.

(b) As used in this part:

Classroom instructor means a qualified LCV driver-instructor who provides knowledge instruction that does not involve the actual operation of a longer combination vehicle or its components. Instruction may take place in a parking lot, garage, or any other facility suitable for instruction.

Longer combination vehicle (LCV) means any combination of a truck-tractor and two or more trailers or semi-trailers, which operate on the National System of Interstate and Defense Highways with a gross vehicle weight (GVW) greater than 36,288 kilograms (80,000 pounds).

LCV Double means an LCV consisting of a truck-tractor in combination with two trailers and/or semi-trailers.

LCV Triple means an LCV consisting of a truck-tractor in combination with three trailers and/or semi-trailers.

Qualified LCV driver-instructor means an instructor meeting the requirements contained in subpart C of this part. There are two types of qualified LCV driver-instructors: (1) classroom instructor and (2) skills instructor.

Skills instructor means a qualified LCV driver-instructor who provides behind-the-wheel instruction involving the actual operation of a longer combination vehicle or its components outside a classroom.

Training institution means any technical or vocational school accredited by an accrediting institution recognized by the U.S. Department of Education. A motor carrier's training program for its drivers or an entity that exclusively offers services to a single motor carrier is not a training institution.

§ 380.107 General requirements.

(a) Except as provided in § 380.111, a driver who wishes to operate an LCV shall first take and successfully com-

plete an LCV driver-training program that provides the knowledge and skills necessary to operate an LCV. The specific types of knowledge and skills that a training program shall include are outlined in the appendix to this part.

(b) Before a person receives training:

(1) That person shall present evidence to the LCV driver-instructor showing that he/she meets the general requirements set forth in subpart B of this part for the specific type of LCV training to be taken.

(2) The LCV driver-instructor shall verify that each trainee applicant meets the general requirements for the specific type of LCV training to be taken.

(c) Upon successful completion of the training requirement, the driver-student shall be issued an LCV Driver Training Certificate by a certifying official of the training entity in accordance with the requirements specified in subpart D of this part.

§ 380.109 Driver testing.

(a) *Testing methods.* The driver-student must pass knowledge and skills tests in accordance with the following requirements, to determine whether a driver-student has successfully completed an LCV driver-training program as specified in subpart B of this part. The written knowledge test may be administered by any qualified driver-instructor. The skills tests, based on actual operation of an LCV, must be administered by a qualified LCV skills instructor.

(1) All tests shall be constructed to determine if the driver-student possesses the required knowledge and skills set forth in the appendix to this part for the specific type of LCV training program being taught.

(2) Instructors shall develop their own tests for the specific type of LCV-training program being taught, but those tests must be at least as stringent as the requirements set forth in paragraph (b) of this section.

(3) LCV driver-instructors shall establish specific methods for scoring the knowledge and skills tests.

(4) Passing scores must meet the requirements of paragraph (b) of this section.

(5) Knowledge and skills tests shall be based upon the information taught in the LCV training programs as set forth in the appendix to this part.

(6) Each knowledge test shall address the training provided during both theoretical and behind-the-wheel instruction, and include at least one question from each of the units listed in the table to the appendix to this part, for the specific type of LCV training program being taught.

(7) Each skills test shall include all the maneuvers and operations practiced during the Proficiency Development unit of instruction (behind-the-wheel instruction), as described in the appendix to this part, for the specific type of LCV training program being taught.

(b) *Proficiency determinations.* The driver-student must meet the following conditions to be certified as an LCV driver:

(1) Answer correctly at least 80 percent of the questions on each knowledge test; and

(2) Demonstrate that he/she can successfully perform all of the skills addressed in paragraph (a)(7) of this section.

(c) *Automatic test failure.* Failure to obey traffic laws or involvement in a preventable crash during the skills portion of the test will result in automatic failure. Automatic test failure determinations are made at the sole discretion of the qualified LCV driver-instructor.

(d) *Guidance for testing methods and proficiency determinations.* Motor carriers should refer to the Examiner's Manual for Commercial Driver's License Tests for help in developing testing methods and making proficiency determinations. You may obtain a copy of this document by contacting the American Association of Motor Vehicle Administrators (AAMVA), 4300 Wilson Boulevard, Suite 400, Arlington, Virginia 22203.

§ 380.111 Substitute for driver training.

(a) *Grandfather clause.* The LCV driver-training requirements specified in

subpart B of this part do not apply to an individual who meets the conditions set forth in paragraphs (b), (c), and (d) of this section. A motor carrier must ensure that an individual claiming eligibility to operate an LCV on the basis of this section meets these conditions before allowing him/her to operate an LCV.

(b) An individual must certify that, during the 2-year period immediately preceding the date of application for a Certificate of Grandfathering, he/she had:

(1) A valid Class A CDL with a "double/triple trailers" endorsement;

(2) No more than one driver's license;

(3) No suspension, revocation, or cancellation of his/her CDL;

(4) No convictions for a major offense while operating a CMV as defined in § 383.51(b) of this subchapter;

(5) No convictions for a railroad-highway grade crossing offense while operating a CMV as defined in § 383.51(d) of this subchapter;

(6) No convictions for violating an out-of-service order as defined in § 383.51(e) of this subchapter;

(7) No more than one conviction for a serious traffic violation, as defined in § 383.5 of this subchapter, while operating a CMV; and

(8) No convictions for a violation of State or local law relating to motor vehicle traffic control arising in connection with any traffic crash while operating a CMV.

(c) An individual must certify and provide evidence that he/she:

(1) Is regularly employed in a job requiring the operation of a CMV that requires a CDL with a double/triple trailers endorsement; and

(2) Has operated, during the 2 years immediately preceding the date of application for a Certificate of Grandfathering, vehicles representative of the type of LCV that he/she seeks to continue operating.

(d) A motor carrier must issue a Certificate of Grandfathering to a person who meets the requirements of this section and must maintain a copy of the certificate in the individual's Driver Qualification file.

Longer Combination Vehicle (LCV) Driver-Training Certificate of Grandfathering	
I certify that _____ has presented evidence of meeting the prerequisites set forth in the Federal Motor Carrier Safety Regulations (49 CFR § 380.111) for the substitute for LCV driver training and is qualified to operate the LCVs indicated below:	
YES	NO
☐	☐
LCV Doubles	
☐	☐
LCV Triples	
DRIVER NAME (First name, MI, Last name)	
Commercial Driver's License Number	STATE
ADDRESS OF DRIVER (Street Address, City, State and Zip Code)	
FULL NAME OF MOTOR CARRIER	Telephone Number
ADDRESS OF PRINCIPAL PLACE OF BUSINESS (Street Address, City, State, and Zip Code)	
SIGNATURE OF MOTOR CARRIER OFFICIAL	DATE ISSUED

(e) An applicant may be grandfathered under this section only during the year following June 1, 2004.

§ 380.113 Employer responsibilities.

(a) No motor carrier shall:

(1) Allow, require, permit or authorize an individual to operate an LCV unless he/she meets the requirements in §§ 380.203 or 380.205 and has been issued the LCV driver-training certificate described in § 380.401. This provision does not apply to individuals who are eligible for the substitute for driver training provision in § 380.111.

(2) Allow, require, permit, or authorize an individual to operate an LCV which the LCV driver-training certificate, CDL, and CDL endorsement(s) do not authorize the driver to operate. This provision applies to individuals employed by or under contract to the motor carrier.

(b) A motor carrier that employs or has under contract LCV drivers shall provide evidence of the certifications required by § 380.401 or § 380.111 of this

part when requested by an authorized FMCSA, State, or local official in the course of a compliance review.

Subpart B—LCV Driver-Training Program

§ 380.201 General requirements.

(a) The LCV Driver-Training Program that is described in the appendix to this part requires training using an LCV Double or LCV Triple and must include the following general categories of instruction:

- (1) Orientation;
- (2) Basic operation;
- (3) Safe operating practices;
- (4) Advanced operations; and
- (5) Nondriving activities.

(b) The LCV Driver-Training Program must include the minimum topics of training set forth in the appendix to this part and behind-the-wheel instruction that is designed to provide an opportunity to develop the skills outlined under the Proficiency Development unit of the training program.

§ 380.203

49 CFR Ch. III (10–1–04 Edition)

§ 380.203 LCV Doubles.

(a) To qualify for the training necessary to operate an LCV Double, a driver-student shall, during the 6 months immediately preceding application for training, have:

(1) A valid Class A CDL with a double/triple trailer endorsement;

(2) Driving experience in a Group A vehicle as described in §383.91 of this subchapter. Evidence of driving experience shall be an employer's written statement that the driver has, for at least 6 months immediately preceding application, operated a Group A vehicle while under his/her employ;

(3) No more than one driver's license;

(4) No suspension, revocation, or cancellation of his/her CDL;

(5) No convictions for a major offense, as defined in §383.51(b) of this subchapter, while operating a CMV;

(6) No convictions for a railroad-highway grade crossing offense, as defined in §383.51(d) of this subchapter, while operating a CMV;

(7) No convictions for violating an out-of-service order as defined in §383.51(e) of this subchapter;

(8) No more than one conviction for a serious traffic violation, as defined in §383.5 of this subchapter, while operating a CMV; and

(9) No convictions for a violation of State or local law relating to motor vehicle traffic control arising in connection with any traffic crash while operating a CMV.

(b) Driver-students meeting the preliminary requirements in paragraph (a) of this section shall successfully complete a training program that meets the minimum unit requirements for LCV Doubles as set forth in the appendix to this part.

(c) Driver-students who successfully complete the Driver Training Program for LCV Doubles shall be issued a certificate, in accordance with subpart D of this part, indicating the driver is qualified to operate an LCV Double.

§ 380.205 LCV Triples.

(a) To qualify for the training necessary to operate an LCV Triple, a driver-student shall, during the 6 months immediately preceding application for training, have:

(1) A valid Class A CDL with a double/triple trailer endorsement;

(2) Experience operating the vehicle listed under paragraph (a)(2)(i) or (a)(2)(ii) of this section. Evidence of driving experience shall be an employer's written statement that the driver has, during the 6 months immediately preceding application, operated the applicable vehicle(s):

(i) Group A truck-tractor/semi-trailer combination as described in §383.91 of this subchapter; or

(ii) Group A truck-tractor/semi-trailer/trailer combination that operates at a gross vehicle weight of 80,000 pounds or less;

(3) No more than one driver's license;

(4) No suspension, revocation, or cancellation of his/her CDL;

(5) No convictions for a major offense, as defined in §383.51(b) of this subchapter, while operating a CMV;

(6) No convictions for a railroad-highway grade crossing offense, as defined in §383.51(d) of this subchapter, while operating a CMV;

(7) No convictions for violating an out-of-service order, as defined in §383.51(e) of this subchapter;

(8) No more than one conviction for a serious traffic violation, as defined in §383.5 of this subchapter, while operating a CMV; and

(9) No convictions for a violation of State or local law relating to motor vehicle traffic control arising in connection with any traffic crash, while operating a CMV.

(b) Driver-students meeting the preliminary requirements in paragraph (a) of this section shall successfully complete a training program that meets the minimum unit requirements for LCV Triples as set forth in the appendix to this part.

(c) Driver-students who successfully complete the Driver Training Program for LCV Triples shall be issued a certificate, in accordance with subpart D of this part, indicating the driver is qualified to operate an LCV Triple.

Subpart C—LCV Driver-Instructor Requirements

§ 380.301 General requirements.

There are two types of LCV driver-instructors: Classroom instructors and

Skills instructors. Except as provided in § 380.303, you must meet the conditions under paragraph (a) or paragraph (b) of this section to qualify as an LCV driver-instructor.

(a) *Classroom instructor.* To qualify as an LCV Classroom instructor, a person shall:

(1) Have audited the driver-training course that he/she intends to instruct.

(2) If employed by a training institution, meet all State requirements for a vocational instructor.

(b) *Skills instructor.* To qualify as an LCV skills instructor, a person shall:

(1) Provide evidence of successful completion of the Driver-Training Program requirements, as set forth in subpart B of this part, when requested by employers and/or an authorized FMCSA, State, or local official in the course of a compliance review. The Driver-Training Program must be for the operation of CMVs representative of the subject matter that he/she will teach.

(2) If employed by a training institution, meet all State requirements for a vocational instructor;

(3) Possess a valid Class A CDL with all endorsements necessary to operate the CMVs applicable to the subject matter being taught (LCV Doubles and/or LCV Triples, including any specialized variation thereof, such as a tank vehicle, that requires an additional endorsement); and

(4) Have at least 2 years' CMV driving experience in a vehicle representative of the type of driver training to be provided (LCV Doubles or LCV Triples).

§ 380.303 Substitute for instructor requirements.

(a) *Classroom instructor.* The requirements specified under § 380.301(a) of this part for a qualified LCV driver-instructor are waived for a classroom instructor-candidate who has 2 years of recent satisfactory experience teaching the classroom portion of a program similar in content to that set forth in the appendix to this part.

(b) *Skills instructor.* The requirements specified under § 380.301(b) of this part for a qualified LCV driver-instructor are waived for a skills instructor-candidate who:

(1) Meets the conditions of § 380.111(b);

(2) Has CMV driving experience during the previous 2 years in a vehicle representative of the type of LCV that is the subject of the training course to be provided;

(3) Has experience during the previous 2 years in teaching the operation of the type of LCV that is the subject of the training course to be provided; and

(4) If employed by a training institution, meets all State requirements for a vocational instructor.

§ 380.305 Employer responsibilities.

(a) No motor carrier shall: (1) Knowingly allow, require, permit or authorize a driver-instructor in its employ, or under contract to the motor carrier, to provide LCV driver training unless such person is a qualified LCV driver-instructor under the requirements of this subpart; or

(2) Contract with a training institution to provide LCV driver training unless the institution:

(i) Uses instructors who are qualified LCV driver-instructors under the requirements of this subpart;

(ii) Is accredited by an accrediting institution recognized by the U.S. Department of Education;

(iii) Is in compliance with all applicable State training school requirements; and

(iv) Identifies drivers certified under § 380.401 of this part, when requested by employers and/or an authorized FMCSA, State, or local official in the course of a compliance review.

(b) A motor carrier that employs or has under contract qualified LCV driver-instructors shall provide evidence of the certifications required by § 380.301 or § 380.303 of this part, when requested by an authorized FMCSA, State, or local official in the course of a compliance review.

Subpart D—Driver-Training Certification

§ 380.401 Certification document.

(a) A student who successfully completes LCV driver training shall be issued a Driver-Training Certificate

§ 380.500

49 CFR Ch. III (10–1–04 Edition)

that is substantially in accordance with the following form.

Longer Combination Vehicle (LCV) Driver-Training Certificate	
I certify that _____ has presented evidence of meeting the training prerequisites set forth in the Federal Motor Carrier Safety Regulations (49 CFR §§ 380.203(a) and 380.205(a)) for LCV training, and has successfully completed the LCV Driver-Training Course(s) indicated below:	
YES ☐ NO ☐	LCV Doubles _____ Date Training Completed _____
☐ ☐	LCV Triples _____ Date Training Completed _____
I certify that the indicated LCV Driver-Training course(s) was provided by a qualified LCV driver-instructor as defined under 49 CFR § 380.105 and meet(s) the minimum requirements set forth in 49 CFR part 380, subparts A and B.	
DRIVER NAME (First Name, MI, Last Name) _____	
Commercial Driver's License Number _____	STATE _____
ADDRESS OF DRIVER (Street Address, City, State and Zip Code) _____	
FULL NAME OF TRAINING ENTITY _____	Telephone Number _____
BUSINESS ADDRESS (Street Address, City, State, and Zip Code) _____	
SIGNATURE OF TRAINING CERTIFYING OFFICIAL _____	DATE ISSUED _____

(b) An LCV driver must provide a copy of the Driver-Training Certificate to his/her employer to be filed in the Driver Qualification File.

Subpart E—Entry-Level Driver Training Requirements

SOURCE: 69 FR 29404, May 21, 2004, unless otherwise noted.

§ 380.500 Compliance date for training requirements for entry-level drivers.

(a) Employers must ensure that each entry-level driver has received the training required by this subpart no later than July 20, 2004, except as provided in paragraph (b) of this section.

(b) Each employer must ensure that each entry-level driver who first began operating a CMV in interstate commerce requiring a CDL between July 20, 2003, and October 18, 2004, has had the required training no later than October 18, 2004.

EFFECTIVE DATE NOTE: At 69 FR 29404, May 21, 2004, § 380.500 was added effective July 20, 2004 through July 30, 2005

§ 380.501 Applicability.

All entry-level drivers who drive in interstate commerce and are subject to the CDL requirements of part 383 of this chapter must comply with the rules of this subpart, except drivers who are subject to the jurisdiction of the Federal Transit Administration or

who are otherwise exempt under § 390.3(f) of this subchapter.

§ 380.502 Definitions.

(a) The definitions in part 383 of this chapter apply to this part, except where otherwise specifically noted.

(b) As used in this subpart:

Entry-level driver is a driver with less than one year of experience operating a CMV with a CDL in interstate commerce.

Entry-level driver training is training the CDL driver receives in driver qualification requirements, hours of service of drivers, driver wellness, and whistleblower protection as appropriate to the entry-level driver's current position in addition to passing the CDL test.

§ 380.503 Entry-level driver training requirements.

Entry-level driver training must include instruction addressing the following four areas:

(a) *Driver qualification requirements.* The Federal rules on medical certification, medical examination procedures, general qualifications, responsibilities, and disqualifications based on various offenses, orders, and loss of driving privileges (part 391, subparts B and E of this subchapter).

(b) *Hours of service of drivers.* The limitations on driving hours, the requirement to be off-duty for certain periods of time, record of duty status preparation, and exceptions (part 395 of this subchapter). Fatigue countermeasures as a means to avoid crashes.

(c) *Driver wellness.* Basic health maintenance including diet and exercise. The importance of avoiding excessive use of alcohol.

(d) *Whistleblower protection.* The right of an employee to question the safety practices of an employer without the employee's risk of losing a job or being subject to reprisals simply for stating a safety concern (29 CFR part 1978).

§ 380.505 Proof of training.

An employer who uses an entry-level driver must ensure the driver has received a training certificate containing all the information contained in § 380.513 from the training provider.

§ 380.507 Driver responsibilities.

Each entry-level driver must receive training required by § 380.503.

§ 380.509 Employer responsibilities.

(a) Each employer must ensure each entry-level driver who first began operating a CMV requiring a CDL in interstate commerce after July 20, 2003, receives training required by § 380.503.

(b) Each employer must place a copy of the driver's training certificate in the driver's personnel or qualification file.

(c) All records required by this subpart shall be maintained as required by § 390.31 of this subchapter and shall be made available for inspection at the employer's principal place of business within two business days after a request has been made by an authorized representative of the Federal Motor Carrier Safety Administration.

§ 380.511 Employer recordkeeping responsibilities.

The employer must keep the records specified in § 380.505 for as long as the employer employs the driver and for one year thereafter.

§ 380.513 Required information on the training certificate.

The training provider must provide a training certificate or diploma to the entry-level driver. If an employer is the training provider, the employer must provide a training certificate or diploma to the entry-level driver. The certificate or diploma must contain the following seven items of information:

(a) Date of certificate issuance.

(b) Name of training provider.

(c) Mailing address of training provider.

(d) Name of driver.

(e) A statement that the driver has completed training in driver qualification requirements, hours of service of drivers, driver wellness, and whistleblower protection requirements substantially in accordance with the following sentence:

I certify _____ has completed training requirements set forth in the Federal Motor Carrier Safety Regulations for entry-level driver training in accordance with 49 CFR 380.503.

Pt. 380, App.

(f) The printed name of the person at-testing that the driver has received the required training.

(g) The signature of the person at-testing that the driver has received the required training.

APPENDIX TO PART 380—LCV DRIVER TRAINING PROGRAMS, REQUIRED KNOWLEDGE AND SKILLS

The following table lists topics of instruction required for drivers of longer combination vehicles pursuant to 49 CFR part 380, subpart B. The training courses for operators of LCV Doubles and LCV Triples must be distinct and tailored to address their unique operating and handling characteristics. Each course must include the minimum topics of instruction, including behind-the-wheel training designed to provide an opportunity to develop the skills outlined under the Proficiency Development unit of the training program. Only a skills instructor may administer behind-the-wheel training involving the operation of an LCV or one of its components. A classroom instructor may administer only instruction that does not involve the operation of an LCV or one of its components.

TABLE TO THE APPENDIX—COURSE TOPICS FOR LCV DRIVERS

Section 1: Orientation	
1.1	LCVs in Trucking
1.2	Regulatory Factors
1.3	Driver Qualifications
1.4	Vehicle Configuration Factors
Section 2: Basic Operation	
2.1	Coupling and Uncoupling
2.2	Basic Control and Handling
2.3	Basic Maneuvers
2.4	Turning, Steering and Tracking
2.5	Proficiency Development
Section 3: Safe Operating Practices	
3.1	Interacting with Traffic
3.2	Speed and Space Management
3.3	Night Operations
3.4	Extreme Driving Conditions
3.5	Security Issues
3.6	Proficiency Development
Section 4: Advanced Operations	
4.1	Hazard Perception

49 CFR Ch. III (10–1–04 Edition)

TABLE TO THE APPENDIX—COURSE TOPICS FOR LCV DRIVERS—Continued

4.2	Hazardous Situations
4.3	Maintenance and Troubleshooting
Section 5: Non-Driving Activities	
5.1	Routes and Trip Planning
5.2	Cargo and Weight Considerations

SECTION 1—ORIENTATION

The units in this section must provide an orientation to the training curriculum and must cover the role LCVs play within the motor carrier industry, the factors that affect their operations, and the role that drivers play in the safe operation of LCVs.

Unit 1.1—LCVs in Trucking. This unit must provide an introduction to the emergence of LCVs in trucking and must serve as an orientation to the course content. Emphasis must be placed upon the role the driver plays in transportation.

Unit 1.2—Regulatory factors. This unit must provide instruction addressing the Federal, State, and local governmental bodies that propose, enact, and implement the laws, rules, and regulations that affect the trucking industry. Emphasis must be placed on those regulatory factors that affect LCVs, including 23 CFR 658.23 and Appendix C to part 658.

Unit 1.3—Driver qualifications. This unit must provide classroom instruction addressing the Federal and State laws, rules, and regulations that define LCV driver qualifications. It also must include a discussion on medical examinations, drug and alcohol tests, certification, and basic health and wellness issues. Emphasis must be placed upon topics essential to physical and mental health maintenance, including (1) diet, (2) exercise, (3) avoidance of alcohol and drug abuse, and caution in the use of prescription and nonprescription drugs, (4) the adverse effects of driver fatigue, and (5) effective fatigue countermeasures. Driver-trainees who have successfully completed the Entry-level training segments at §380.503(a) and (c) are considered to have satisfied the requirements of Unit 1.3.

Unit 1.4—Vehicle configuration factors. This unit must provide classroom instruction addressing the key vehicle components used in the configuration of longer combination vehicles. It also must familiarize the driver-trainee with various vehicle combinations, as well as provide instruction about unique characteristics and factors associated with LCV configurations.

SECTION 2—BASIC OPERATION

The units in this section must cover the interaction between the driver and the vehicle. They must teach driver-trainees how to couple and uncouple LCVs, ensure the vehicles are in proper operating condition, and control the motion of LCVs under various road and traffic conditions.

During the driving exercises at off-highway locations required by this section, the driver-trainee must first familiarize himself/herself with basic operating characteristics of an LCV. Utilizing an LCV, students must be able to perform the skills learned in each unit to a level of proficiency required to permit safe transition to on-street driving.

Unit 2.1—Coupling and uncoupling. This unit must provide instruction addressing the procedures for coupling and uncoupling LCVs. While vehicle coupling and uncoupling procedures are common to all truck-tractor/semi-trailer operations, some factors are peculiar to LCVs. Emphasis must be placed upon preplanning and safe operating procedures.

Unit 2.2—Basic control and handling. This unit must provide an introduction to basic vehicular control and handling as it applies to LCVs. This must include instruction addressing brake performance, handling characteristics and factors affecting LCV stability while braking, turning, and cornering. Emphasis must be placed upon safe operating procedures.

Unit 2.3—Basic maneuvers. This unit must provide instruction addressing the basic vehicular maneuvers that will be encountered by LCV drivers. This must include instruction relative to backing, lane positioning and path selection, merging situations, and parking LCVs. Emphasis must be placed upon safe operating procedures as they apply to brake performance and directional stability while accelerating, braking, merging, cornering, turning, and parking.

Unit 2.4—Turning, steering, and tracking. This unit must provide instruction addressing turning situations, steering maneuvers, and the tracking of LCV trailers. This must include instruction related to trailer sway and off-tracking. Emphasis must be placed on maintaining directional stability.

Unit 2.5—Proficiency development: basic operations. The purpose of this unit is to enable driver-students to gain the proficiency in basic operation needed to safely undertake on-street instruction in the Safe Operations Practices section of the curriculum.

The activities of this unit must consist of driving exercises that provide practice for the development of basic control skills and mastery of basic maneuvers. Driver-students practice skills and maneuvers learned in the Basic Control and Handling; Basic Maneuvers; and Turning, Steering and Tracking units. A series of basic exercises is practiced

at off-highway locations until students develop sufficient proficiency for transition to on-street driving.

Once the driver-student's skills have been measured and found adequate, the driver-student must be allowed to move to on-the-street driving.

Nearly all activity in this unit will take place on the driving range or on streets or roads that have low-density traffic conditions.

SECTION 3—SAFE OPERATING PRACTICES

The units in this section must cover the interaction between student drivers, the vehicle, and the traffic environment. They must teach driver-students how to apply their basic operating skills in a way that ensures their safety and that of other road users under various road, weather, and traffic conditions.

Unit 3.1—Interacting with traffic. This unit must provide instruction addressing the principles of visual search, communication, and sharing the road with other traffic. Emphasis must be placed upon visual search, mirror usage, signaling and/or positioning the vehicle to communicate, and understanding the special situations encountered by LCV drivers in various traffic situations.

Unit 3.2—Speed and space management. This unit must provide instruction addressing the principles of speed and space management. Emphasis must be placed upon maintaining safe vehicular speed and appropriate space surrounding the vehicle under various traffic and road conditions. Particular attention must be placed upon understanding the special situations encountered by LCVs in various traffic situations.

Unit 3.3—Night operations. This unit must provide instruction addressing the principles of Night Operations. Emphasis must be placed upon the factors affecting operation of LCVs at night. Night driving presents specific factors that require special attention on the part of the driver. Changes in vehicle safety inspection, vision, communications, speed management, and space management are needed to deal with the special problems night driving presents.

Unit 3.4—Extreme driving conditions. This unit must provide instruction addressing the driving of LCVs under extreme driving conditions. Emphasis must be placed upon the factors affecting the operation of LCVs in cold, hot, and inclement weather and in the mountains and desert. Changes in basic driving habits are needed to deal with the specific problems presented by these extreme driving conditions.

Unit 3.5—Security issues. This unit must include a discussion of security requirements imposed by the Department of Homeland Security, Transportation Security Administration; the U.S. Department of Transportation,

Research and Special Programs Administration; and any other State or Federal agency with responsibility for highway or motor carrier security.

Unit 3.6—Proficiency development. This unit must provide driver-students an opportunity to refine, within the on-street traffic environment, their vehicle handling skills learned in the first three sections. Driver-student performance progress must be closely monitored to determine when the level of proficiency required for carrying out the basic traffic maneuvers of stopping, turning, merging, straight driving, curves, lane changing, passing, driving on hills, driving through traffic restrictions, and parking has been attained. The driver-student must also be assessed for regulatory compliance with all traffic laws.

Nearly all activity in this unit will take place on public roadways in a full range of traffic environments applicable to this vehicle configuration. This must include urban and rural uncontrolled roadways, expressways or freeways, under light, moderate, and heavy traffic conditions. There must be a brief classroom session to familiarize driver-students with the type of on-street maneuvers they will perform and how their performance will be rated.

The instructor must assess the level of skill development of the driver-student and must increase in difficulty, based upon the level of skill attained, the types of maneuvers, roadways and traffic conditions to which the driver-student is exposed.

SECTION 4—ADVANCED OPERATIONS

The units in this section must introduce higher level skills that can be acquired only after the more fundamental skills and knowledge taught in sections two and three have been mastered. They must teach the perceptual skills necessary to recognize potential hazards, and must demonstrate the procedures needed to handle an LCV when faced with a hazard.

The Maintenance and Trouble-shooting Unit must provide instruction that addresses how to keep the vehicle in safe and efficient operating condition. The purpose of this unit is to teach the correct way to perform simple maintenance tasks, and how to troubleshoot and report those vehicle discrepancies or deficiencies that must be repaired by a qualified mechanic.

Unit 4.1—Hazard perception. This unit must provide instruction addressing the principles of recognizing hazards in sufficient time to reduce the severity of the hazard and neutralize a possible emergency situation. While hazards are present in all motor vehicle traffic operations, some are peculiar to LCV operations. Emphasis must be placed upon hazard recognition, visual search, and response to possible emergency-producing situations

encountered by LCV drivers in various traffic situations.

Unit 4.2—Hazardous situations. This unit must address dealing with specific procedures appropriate for LCV emergencies. These must include evasive steering, emergency braking, off-road recovery, brake failures, tire blowouts, rearward amplification, hydroplaning, skidding, jackknifing and the rollover phenomenon. The discussion must include a review of unsafe acts and the role they play in producing hazardous situations.

Unit 4.3—Maintenance and trouble-shooting. This unit must introduce driver-students to the basic servicing and checking procedures for the various vehicle components and provide knowledge of conducting preventive maintenance functions, making simple emergency repairs, and diagnosing and reporting vehicle malfunctions.

SECTION 5—NON-DRIVING ACTIVITIES

The units in this section must cover activities that are not directly related to the vehicle itself but must be performed by an LCV driver. The units in this section must ensure these activities are performed in a manner that ensures the safety of the driver, vehicle, cargo, and other road users.

Unit 5.1—Routes and trip planning. This unit must address the importance of and requirements for planning routes and trips. This must include classroom discussion of Federal and State requirements for a number of topics including permits, vehicle size and weight limitations, designated highways, local access, the reasonable access rule, staging areas, and access zones.

Unit 5.2—Cargo and weight considerations. This unit must address the importance of proper cargo documentation, loading, securing and unloading cargo, weight distribution, load sequencing and trailer placement. Emphasis must be placed on the importance of axle weight distribution, as well as on trailer placement and its effect on vehicle handling.

PART 381—WAIVERS, EXEMPTIONS, AND PILOT PROGRAMS

Subpart A—General

Sec.

381.100 What is the purpose of this part?

381.105 Who is required to comply with the rules in this part?

381.110 What definitions are applicable to this part?

Subpart B—Procedures for Requesting Waivers

381.200 What is a waiver?

381.205 How do I determine when I may request a waiver?

381.210 How do I request a waiver?

Federal Motor Carrier Safety Administration, DOT

§381.110

- 381.215 What will the FMCSA do after the agency receives my request for a waiver?
- 381.220 How long will it take the agency to respond to my request for a waiver?
- 381.225 Who should I contact if I have questions about the information I am required to submit to the FMCSA or about the status of my request for a waiver?

Subpart C—Procedures for Applying for Exemptions

- 381.300 What is an exemption?
- 381.305 How do I determine when I may apply for an exemption?
- 381.310 How do I apply for an exemption?
- 381.315 What will the FMCSA do after the agency receives my application for an exemption?
- 381.320 How long will it take the agency to respond to my application for an exemption?
- 381.325 Who should I contact if I have questions about the information I am required to submit to the FMCSA or about the status of my application for an exemption?
- 381.330 What am I required to do if the FMCSA grants my application for an exemption?

Subpart D—Initiation of Pilot Programs

- 381.400 What is a pilot program?
- 381.405 Who determines whether a pilot program should be initiated?
- 381.410 What may I do if I have an idea or suggestion for a pilot program?
- 381.415 Who should I contact if I have questions about the information to be included in my suggestion?
- 381.420 What will the FMCSA do after the agency receives my suggestion for a pilot program?

Subpart E—Administrative Procedures for Pilot Programs

- 381.500 What are the general requirements the agency must satisfy in conducting a pilot program?
- 381.505 What are the minimum elements required for a pilot program?
- 381.510 May the FMCSA end a pilot program before its scheduled completion date?
- 381.515 May the FMCSA remove approved participants from a pilot program?
- 381.520 What will the FMCSA do with the results from a pilot program?

Subpart F—Preemption of State Rules

- 381.600 Do waivers, exemptions, and pilot programs preempt State laws and regulations?

AUTHORITY: 49 U.S.C. 31136(e) and 31315; and 49 CFR 1.73.

SOURCE: 63 FR 67608, Dec. 8, 1998, unless otherwise noted.

EDITORIAL NOTE: Nomenclature changes to part 381 appear at 66 FR 49872, Oct. 1, 2001.

Subpart A—General

§381.100 What is the purpose of this part?

This part prescribes the rules and procedures for requesting waivers and applying for exemptions from those provisions of the Federal Motor Carrier Safety Regulations (FMCSRs) which were issued on the authority of 49 U.S.C. 31136 or chapter 313, and the initiation and administration of pilot programs.

§381.105 Who is required to comply with the rules in this part?

(a) You must comply with the rules in this part if you are going to request a waiver or apply for an exemption.

(b) You should follow the instructions in subpart D of this part if you would like to recommend the agency initiate a pilot program.

§381.110 What definitions are applicable to this part?

Commercial motor vehicle means any motor vehicle that meets the definition of “commercial motor vehicle” found at 49 CFR 382.107 concerning controlled substances and alcohol use and testing, 49 CFR 383.5 concerning commercial driver’s license standards, or 49 CFR 390.5 concerning parts 390 through 399 of the FMCSRs.

Federal Motor Carrier Safety Administrator (the Administrator) means the chief executive of the Federal Motor Carrier Safety Administration, an agency within the Department of Transportation.

FMCSRs means Federal Motor Carrier Safety Regulations (49 CFR parts 382 and 383, §§385.21 and 390.21, parts 391 through 393, 395, 396, and 399).

You means an individual or motor carrier or other entity that is, or will be, responsible for the operation of a CMV(s). The term includes a motor carrier’s agents, officers and representatives as well as employees responsible for hiring, supervising, training, assigning, or dispatching of drivers and

employees concerned with the installation, inspection, and maintenance of motor vehicle equipment and/or accessories. *You* also includes any interested party who would like to suggest or recommend that the FMCSA initiate a pilot program.

Subpart B—Procedures for Requesting Waivers

§ 381.200 What is a waiver?

(a) A waiver is temporary regulatory relief from one or more FMCSR given to a person subject to the regulations, or a person who intends to engage in an activity that would be subject to the regulations.

(b) A waiver provides the person with relief from the regulations for up to three months.

(c) A waiver is intended for unique, non-emergency events and is subject to conditions imposed by the Administrator.

(d) Waivers may only be granted from one or more of the requirements contained in the following parts and sections of the FMCSRs:

(1) Part 382—Controlled Substances and Alcohol Use and Testing;

(2) Part 383—Commercial Driver's License Standards; Requirements and Penalties;

(3) § 390.19 Motor Carrier Identification Report;

(4) § 390.21 Marking of commercial motor vehicles;

(5) Part 391—Qualifications of Drivers;

(6) Part 392—Driving of Commercial Motor Vehicles;

(7) Part 393—Parts and Accessories Necessary for Safe Operation;

(8) Part 395—Hours of Service of Drivers;

(9) Part 396—Inspection, Repair, and Maintenance (except § 396.25); and

(10) Part 399—Step, Handhold and Deck Requirements.

§ 381.205 How do I determine when I may request a waiver?

(a) You may request a waiver if one or more FMCSR would prevent you from using or operating CMVs, or make it unreasonably difficult to do so, during a unique, non-emergency event

that will take no more than three months to complete.

(b) Before you decide to request a waiver, you should carefully review the regulation to determine whether there are any practical alternatives already available that would allow your use or operation of CMVs during the event. You should also determine whether you need a waiver from all of the requirements in one or more parts of the regulations, or whether a more limited waiver of certain sections within one or more of the parts of the regulations would provide an acceptable level of regulatory relief. For example, if you need relief from one of the record-keeping requirements concerning driver qualifications, you should not request relief from all of the requirements of part 391.

§ 381.210 How do I request a waiver?

(a) You must send a written request (for example, a typed or handwritten (printed) letter), which includes all of the information required by this section, to the Federal Motor Carrier Safety Administrator, U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590.

(b) You must identify the person who would be covered by the waiver. The application for a waiver must include:

(1) Your name, job title, mailing address, and daytime telephone number;

(2) The name of the individual, motor carrier, or other entity that would be responsible for the use or operation of CMVs during the unique, non-emergency event;

(3) Principal place of business for the motor carrier or other entity (street address, city, State, and zip code); and

(4) The USDOT identification number for the motor carrier, if applicable.

(c) You must provide a written statement that:

(1) Describes the unique, non-emergency event for which the waiver would be used, including the time period during which the waiver is needed;

(2) Identifies the regulation that you believe needs to be waived;

(3) Provides an estimate of the total number of drivers and CMVs that would be operated under the terms and conditions of the waiver; and

(4) Explains how you would ensure that you could achieve a level of safety that is equivalent to, or greater than, the level of safety that would be obtained by complying with the regulation.

§ 381.215 What will the FMCSA do after the agency receives my request for a waiver?

(a) The Federal Motor Carrier Safety Administration will review your request and make a recommendation to the Administrator. The final decision whether to grant or deny the application for a waiver will be made by the Administrator.

(b) After a decision is signed by the Administrator, you will be sent a copy of the document, which will include the terms and conditions for the waiver or the reason for denying the application for a waiver.

§ 381.220 How long will it take the agency to respond to my request for a waiver?

You should receive a response from the agency within 60 calendar days from the date the Administrator receives your request. However, depending on the complexity of the issues discussed in your application, and the availability of staff to review the material, a final decision may take up to 120 days.

§ 381.225 Who should I contact if I have questions about the information I am required to submit to the FMCSA or about the status of my request for a waiver?

You should contact the Office of Bus and Truck Standards and Operations, Federal Motor Carrier Safety Administration, 400 Seventh Street, SW., Washington, DC 20590. The telephone number is (202) 366-1790.

Subpart C—Procedures for Applying for Exemptions

§ 381.300 What is an exemption?

(a) An exemption is temporary regulatory relief from one or more FMCSR given to a person or class of persons subject to the regulations, or who intend to engage in an activity that

would make them subject to the regulations.

(b) An exemption provides the person or class of persons with relief from the regulations for up to two years, and may be renewed.

(c) Exemptions may only be granted from one or more of the requirements contained in the following parts and sections of the FMCSRs:

(1) Part 382—Controlled Substances and Alcohol Use and Testing;

(2) Part 383—Commercial Driver's License Standards; Requirements and Penalties;

(3) Part 391—Qualifications of Drivers;

(4) Part 392—Driving of Commercial Motor Vehicles;

(5) Part 393—Parts and Accessories Necessary for Safe Operation;

(6) Part 395—Hours of Service of Drivers;

(7) Part 396—Inspection, Repair, and Maintenance (except for § 396.25); and

(8) Part 399—Step, Handhold and Deck Requirements.

§ 381.305 How do I determine when I may apply for an exemption?

(a) You may apply for an exemption if one or more FMCSR prevents you from implementing more efficient or effective operations that would maintain a level of safety equivalent to, or greater than, the level achieved without the exemption.

(b) Before you decide to apply for an exemption you should carefully review the regulation to determine whether there are any practical alternatives already available that would allow you to conduct your motor carrier operations. You should also determine whether you need an exemption from all of the requirements in one or more parts of the regulations, or whether a more limited exemption from certain sections within one or more parts of the regulations would provide an acceptable level of regulatory relief. For example, if you need regulatory relief from one of the recordkeeping requirements concerning driver qualifications, you should not request regulatory relief from all of the requirements of part 391.

§381.310

§381.310 How do I apply for an exemption?

(a) You must send a written request (for example, a typed or handwritten (printed) letter), which includes all of the information required by this section, to the Federal Motor Carrier Safety Administrator, U.S. Department of Transportation, Federal Motor Carrier Safety Administration, 400 Seventh Street, SW., Washington, DC 20590.

(b) You must identify the person or class of persons who would be covered by the exemption. The application for an exemption must include:

(1) Your name, job title, mailing address, and daytime telephone number;

(2) The name of the individual or motor carrier that would be responsible for the use or operation of CMVs;

(3) Principal place of business for the motor carrier (street address, city, State, and zip code); and

(4) The USDOT identification number for the motor carrier.

(c) You must provide a written statement that:

(1) Describes the reason the exemption is needed, including the time period during which it is needed;

(2) Identifies the regulation from which you would like to be exempted;

(3) Provides an estimate of the total number of drivers and CMVs that would be operated under the terms and conditions of the exemption;

(4) Assesses the safety impacts the exemption may have;

(5) Explains how you would ensure that you could achieve a level a safety that is equivalent to, or greater than, the level of safety that would be obtained by complying with the regulation; and

(6) Describes the impacts (e.g., inability to test innovative safety management control systems, etc.) you could experience if the exemption is not granted by the FMCSA.

(d) Your application must include a copy of all research reports, technical papers, and other publications and documents you reference.

49 CFR Ch. III (10–1–04 Edition)

§381.315 What will the FMCSA do after the agency receives my application for an exemption?

(a) The Federal Motor Carrier Safety Administration will review your application and prepare, for the Administrator's signature, a FEDERAL REGISTER notice requesting public comment on your application for an exemption. The notice will give the public an opportunity to review your request and your safety assessment or analysis (required by §381.310) and any other relevant information known to the agency.

(b) After a review of the comments received in response to the FEDERAL REGISTER notice described in paragraph (a) of this section, the Federal Motor Carrier Safety Administration will make a recommendation(s) to the Administrator to either to grant or deny the exemption. Notice of the Administrator's decision will be published in the FEDERAL REGISTER.

(c)(1) If the exemption is granted, the notice will identify the provisions of the FMCSRs from which you will be exempt, the effective period, and all terms and conditions of the exemption.

(2) If the exemption is denied, the notice will explain the reason for the denial.

(d) A copy of your application for an exemption and all comments received in response to the FEDERAL REGISTER notice will be included in a public docket and be available for review by interested parties.

(1) Interested parties may view the information contained in the docket by visiting the Department of Transportation, U.S. DOT Dockets, Room PL-401, 400 Seventh Street, SW., Washington DC. All information in the exemption docket will be available for examination at this address from 10 a.m. to 5 p.m., e.t., Monday through Friday, except Federal holidays.

(2) Internet users can access all information received by the U.S. DOT Dockets, Room PL-401, by using the universal resources locator (URL): <http://dms.dot.gov>. It is available 24 hours each day, 365 days each year. Please follow the instructions online for more information and help.

§ 381.320 How long will it take the agency to respond to my application for an exemption?

The agency will attempt to issue a final decision within 180 days of the date it receives your application. However, if you leave out important details or other information necessary for the FMCSA to prepare a meaningful request for public comments, the agency will attempt to issue a final decision within 180 days of the date it receives the additional information.

§ 381.325 Who should I contact if I have questions about the information I am required to submit to the FMCSA or about the status of my application for an exemption?

You should contact the Office of Bus and Truck Standards and Operations, Federal Motor Carrier Safety Administration, 400 Seventh Street, SW., Washington, DC 20590. The telephone number is (202) 366-1790.

§ 381.330 What am I required to do if the FMCSA grants my application for an exemption?

(a) You must comply with all the terms and conditions of the exemption.

(b) The FMCSA will immediately revoke your exemption if:

(1) You fail to comply with the terms and conditions of the exemption;

(2) The exemption has resulted in a lower level of safety than was maintained before the exemption was granted; or

(3) Continuation of the exemption is determined by the FMCSA to be inconsistent with the goals and objectives of the FMCSRs.

Subpart D—Initiation of Pilot Programs**§ 381.400 What is a pilot program?**

(a) A pilot program is a study in which temporary regulatory relief from one or more FMCSR is given to a person or class of persons subject to the regulations, or a person or class of persons who intend to engage in an activity that would be subject to the regulations.

(b) During a pilot program, the participants would be given an exemption from one or more sections or parts of

the regulations for a period of up to three years.

(c) A pilot program is intended for use in collecting specific data for evaluating alternatives to the regulations or innovative approaches to safety while ensuring that the safety performance goals of the regulations are satisfied.

(d) The number of participants in the pilot program must be large enough to ensure statistically valid findings.

(e) Pilot programs must include an oversight plan to ensure that participants comply with the terms and conditions of participation, and procedures to protect the health and safety of study participants and the general public.

(f) Exemptions for pilot programs may be granted only from one or more of the requirements contained in the following parts and sections of the FMCSRs:

(1) Part 382—Controlled Substances and Alcohol Use and Testing;

(2) Part 383—Commercial Driver's License Standards; Requirements and Penalties;

(3) Part 391—Qualifications of Drivers;

(4) Part 392—Driving of Commercial Motor Vehicles;

(5) Part 393—Parts and Accessories Necessary for Safe Operation;

(6) Part 395—Hours of Service of Drivers;

(7) Part 396—Inspection, Repair, and Maintenance (except for § 396.25); and

(8) Part 399—Step, Handhold and Deck Requirements.

§ 381.405 Who determines whether a pilot program should be initiated?

(a) Generally, pilot programs are initiated by the FMCSA when the agency determines that there may be an effective alternative to one or more of the requirements in the FMCSRs, but does not have sufficient research data to support the development of a notice of proposed rulemaking to change the regulation.

(b) You may request the FMCSA to initiate a pilot program. However, the decision of whether to propose a pilot program will be made at the discretion

§ 381.410

of the FMCSA. The FMCSA is not required to publish a notice in the FEDERAL REGISTER requesting public comment on your ideas or suggestions for pilot programs.

§ 381.410 What may I do if I have an idea or suggestion for a pilot program?

(a) You may send a written statement (for example, a typed or handwritten (printed) letter) to the Federal Motor Carrier Safety Administrator, U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590.

(b) You should identify the persons or class of persons who would be covered by the pilot program exemptions. Your letter should include:

(1) Your name, job title, mailing address, and daytime telephone number;

(2) The name of the individuals or motor carrier that would be responsible for the use or operation of CMVs covered by the pilot program, if there are motor carriers that have expressed an interest in participating in the program;

(3) Principal place of business for the motor carrier (street address, city, State, and zip code); and

(4) The USDOT identification number for the motor carrier.

(c) You should provide a written statement that:

(1) Presents your estimate of the potential benefits to the motor carrier industry, the FMCSA, and the general public if the pilot program is conducted, and describes how you developed your estimate;

(2) Estimates of the amount of time that would be needed to conduct the pilot program (e.g., the time needed to complete the collection and analysis of data);

(3) Identifies the regulation from which the participants would need to be exempted;

(4) Recommends a reasonable number of participants necessary to yield statistically valid findings;

(5) Provides ideas or suggestions for a monitoring plan to ensure that participants comply with the terms and conditions of participation;

(6) Provides ideas or suggestions for a plan to protect the health and safety of

49 CFR Ch. III (10–1–04 Edition)

study participants and the general public.

(7) Assesses the safety impacts the pilot program exemption may have; and

(8) Provides recommendations on how the safety measures in the pilot project would be designed to achieve a level of safety that is equivalent to, or greater than, the level of safety that would be obtained by complying with the regulation.

(d) Your recommendation should include a copy of all research reports, technical papers, publications and other documents you reference.

§ 381.415 Who should I contact if I have questions about the information to be included in my suggestion?

You should contact the Office of Bus and Truck Standards and Operations, Federal Motor Carrier Safety Administration, 400 Seventh Street, SW., Washington, DC 20590. The telephone number is (202) 366–1790.

§ 381.420 What will the FMCSA do after the agency receives my suggestion for a pilot program?

(a) The Federal Motor Carrier Safety Administration will review your suggestion for a pilot program and make a recommendation to the Administrator. The final decision whether to propose the development of a pilot program based upon your recommendation will be made by the Administrator.

(b) You will be sent a copy of the Administrator's decision. If the pilot program is approved, the agency will follow the administrative procedures contained in subpart E of this part.

Subpart E—Administrative Procedures for Pilot Programs

§ 381.500 What are the general requirements the agency must satisfy in conducting a pilot program?

(a) The FMCSA may conduct pilot programs to evaluate alternatives to regulations, or innovative approaches, concerning motor carrier, CMV, and driver safety.

(b) Pilot programs may include exemptions from the regulations listed in § 381.400(f) of this part.

(c) Pilot programs must, at a minimum, include all of the program elements listed in §381.505.

(d) The FMCSA will publish in the FEDERAL REGISTER a detailed description of each pilot program, including the exemptions to be considered, and provide notice and an opportunity for public comment before the effective date of the pilot program.

§381.505 What are the minimum elements required for a pilot program?

(a) *Safety measures.* Before granting exemptions for a pilot program, the FMCSA will ensure that the safety measures in a pilot program are designed to achieve a level of safety that is equivalent to, or greater than, the level of safety that would be achieved by complying with the regulations.

(b) *Pilot program plan.* Before initiating a pilot program, the FMCSA will ensure that there is a pilot program plan which includes the following elements:

(1) A scheduled duration of three years or less;

(2) A specific data collection and safety analysis plan that identifies a method of comparing the safety performance for motor carriers, CMVs, and drivers operating under the terms and conditions of the pilot program, with the safety performance of motor carriers, CMVs, and drivers that comply with the regulation;

(3) A reasonable number of participants necessary to yield statistically valid findings;

(4) A monitoring plan to ensure that participants comply with the terms and conditions of participation in the pilot program;

(5) Adequate safeguards to protect the health and safety of study participants and the general public; and

(6) A plan to inform the States and the public about the pilot program and to identify approved participants to enforcement personnel and the general public.

§381.510 May the FMCSA end a pilot program before its scheduled completion date?

The FMCSA will immediately terminate a pilot program if there is reason to believe the program is not achieving

a level of safety that is at least equivalent to the level of safety that would be achieved by complying with the regulations.

§381.515 May the FMCSA remove approved participants from a pilot program?

The Administrator will immediately revoke participation in a pilot program of a motor carrier, CMV, or driver for failure to comply with the terms and conditions of the pilot program, or if continued participation is inconsistent with the goals and objectives of the safety regulations.

§381.520 What will the FMCSA do with the results from a pilot program?

At the conclusion of each pilot program, the FMCSA will report to Congress the findings and conclusions of the program and any recommendations it considers appropriate, including suggested amendments to laws and regulations that would enhance motor carrier, CMV, and driver safety and improve compliance with the FMCSRs.

Subpart F—Preemption of State Rules

§381.600 Do waivers, exemptions, and pilot programs preempt State laws and regulations?

Yes. During the time period that a waiver, exemption, or pilot program authorized by this part is in effect, no State shall enforce any law or regulation that conflicts with or is inconsistent with the waiver, exemption, or pilot program with respect to a person operating under the waiver or exemption or participating in the pilot program.

PART 382—CONTROLLED SUBSTANCES AND ALCOHOL USE AND TESTING

Subpart A—General

Sec.

382.101 Purpose

382.103 Applicability.

382.105 Testing procedures.

382.107 Definitions.

382.109 Preemption of State and local laws.

382.111 Other requirements imposed by employers.

§ 382.101

- 382.113 Requirements for notice.
- 382.115 Starting date for testing programs.
- 382.117 Public interest exclusion.
- 382.119 Stand-down waiver provision.
- 382.121 Employee admission of alcohol and controlled substances use.

Subpart B—Prohibitions

- 382.201 Alcohol concentration.
- 382.205 On-duty use.
- 382.207 Pre-duty use.
- 382.209 Use following an accident.
- 382.211 Refusal to submit to a required alcohol or controlled substances test.
- 382.213 Controlled substances use.
- 382.215 Controlled substances testing.

Subpart C—Tests Required

- 382.301 Pre-employment testing.
- 382.303 Post-accident testing.
- 382.305 Random testing.
- 382.307 Reasonable suspicion testing.
- 382.309 Return-to-duty testing.
- 382.311 Follow-up testing.

Subpart D—Handling of Test Results, Record Retention, and Confidentiality

- 382.401 Retention of records.
- 382.403 Reporting of results in a management information system.
- 382.405 Access to facilities and records.
- 382.407 Medical review officer notifications to the employer.
- 382.409 Medical review officer record retention for controlled substances.
- 382.411 Employer notifications.
- 382.413 Inquiries for alcohol and controlled substances information from previous employers.

Subpart E—Consequences for Drivers Engaging in Substance Use-Related Conduct

- 382.501 Removal from safety-sensitive function.
- 382.503 Required evaluation and testing.
- 382.505 Other alcohol-related conduct.
- 382.507 Penalties.

Subpart F—Alcohol Misuse and Controlled Substances Use Information, Training, and Referral

- 382.601 Employer obligation to promulgate a policy on the misuse of alcohol and use of controlled substances.
- 382.603 Training for supervisors.
- 382.605 Referral, evaluation, and treatment.

AUTHORITY: 49 U.S.C. 31133, 31136, 31301 *et seq.*, 31502; and 49 CFR 1.73.

SOURCE: 66 FR 43103, Aug. 17, 2001, unless otherwise noted.

49 CFR Ch. III (10–1–04 Edition)

Subpart A—General

§ 382.101 Purpose.

The purpose of this part is to establish programs designed to help prevent accidents and injuries resulting from the misuse of alcohol or use of controlled substances by drivers of commercial motor vehicles.

§ 382.103 Applicability.

(a) This part applies to every person and to all employers of such persons who operate a commercial motor vehicle in commerce in any State, and is subject to:

(1) The commercial driver's license requirements of part 383 of this subchapter;

(2) The *Licencia Federal de Conductor* (Mexico) requirements; or

(3) The commercial drivers license requirements of the Canadian National Safety Code.

(b) An employer who employs himself/herself as a driver must comply with both the requirements in this part that apply to employers and the requirements in this part that apply to drivers. An employer who employs only himself/herself as a driver shall implement a random alcohol and controlled substances testing program of two or more covered employees in the random testing selection pool.

(c) The exceptions contained in § 390.3(f) of this subchapter do not apply to this part. The employers and drivers identified in § 390.3(f) of this subchapter must comply with the requirements of this part, unless otherwise specifically provided in paragraph (d) of this section.

(d) *Exceptions.* This part shall not apply to employers and their drivers:

(1) Required to comply with the alcohol and/or controlled substances testing requirements of part 655 of this title (Federal Transit Administration alcohol and controlled substances testing regulations); or

(2) Who a State must waive from the requirements of part 383 of this subchapter. These individuals include active duty military personnel; members of the reserves; and members of the national guard on active duty, including personnel on full-time national guard duty, personnel on part-time national

guard training and national guard military technicians (civilians who are required to wear military uniforms), and active duty U.S. Coast Guard personnel; or

(3) Who a State has, at its discretion, exempted from the requirements of part 383 of this subchapter. These individuals may be:

(i) Operators of a farm vehicle which is:

(A) Controlled and operated by a farmer;

(B) Used to transport either agricultural products, farm machinery, farm supplies, or both to or from a farm;

(C) Not used in the operations of a common or contract motor carrier; and

(D) Used within 241 kilometers (150 miles) of the farmer's farm.

(ii) Firefighters or other persons who operate commercial motor vehicles which are necessary for the preservation of life or property or the execution of emergency governmental functions, are equipped with audible and visual signals, and are not subject to normal traffic regulation.

§ 382.105 Testing procedures.

Each employer shall ensure that all alcohol or controlled substances testing conducted under this part complies with the procedures set forth in part 40 of this title. The provisions of part 40 of this title that address alcohol or controlled substances testing are made applicable to employers by this part.

§ 382.107 Definitions.

Words or phrases used in this part are defined in §§ 386.2 and 390.5 of this subchapter, and § 40.3 of this title, except as provided in this section—

Actual knowledge for the purpose of subpart B of this part, means actual knowledge by an employer that a driver has used alcohol or controlled substances based on the employer's direct observation of the employee, information provided by the driver's previous employer(s), a traffic citation for driving a CMV while under the influence of alcohol or controlled substances or an employee's admission of alcohol or controlled substance use, except as provided in § 382.121. Direct observation as used in this definition means observation of alcohol or controlled substances

use and does not include observation of employee behavior or physical characteristics sufficient to warrant reasonable suspicion testing under § 382.307.

Alcohol means the intoxicating agent in beverage alcohol, ethyl alcohol, or other low molecular weight alcohols including methyl and isopropyl alcohol.

Alcohol concentration (or content) means the alcohol in a volume of breath expressed in terms of grams of alcohol per 210 liters of breath as indicated by an evidential breath test under this part.

Alcohol use means the drinking or swallowing of any beverage, liquid mixture or preparation (including any medication), containing alcohol.

Commerce means:

(1) Any trade, traffic or transportation within the jurisdiction of the United States between a place in a State and a place outside of such State, including a place outside of the United States; and

(2) Trade, traffic, and transportation in the United States which affects any trade, traffic, and transportation described in paragraph (1) of this definition.

Commercial motor vehicle means a motor vehicle or combination of motor vehicles used in commerce to transport passengers or property if the vehicle—

(1) Has a gross combination weight rating of 11,794 or more kilograms (26,001 or more pounds) inclusive of a towed unit with a gross vehicle weight rating of more than 4,536 kilograms (10,000 pounds); or

(2) Has a gross vehicle weight rating of 11,794 or more kilograms (26,001 or more pounds); or

(3) Is designed to transport 16 or more passengers, including the driver; or

(4) Is of any size and is used in the transportation of materials found to be hazardous for the purposes of the Hazardous Materials Transportation Act (49 U.S.C. 5103(b)) and which require the motor vehicle to be placarded under the Hazardous Materials Regulations (49 CFR part 172, subpart F).

Confirmation (or confirmatory) drug test means a second analytical procedure performed on a urine specimen to

identify and quantify the presence of a specific drug or drug metabolite.

Confirmation (or confirmatory) validity test means a second test performed on a urine specimen to further support a validity test result.

Confirmed drug test means a confirmation test result received by an MRO from a laboratory.

Consortium/Third party administrator (C/TPA) means a service agent that provides or coordinates one or more drug and/or alcohol testing services to DOT-regulated employers. C/TPAs typically provide or coordinate the provision of a number of such services and perform administrative tasks concerning the operation of the employers' drug and alcohol testing programs. This term includes, but is not limited to, groups of employers who join together to administer, as a single entity, the DOT drug and alcohol testing programs of its members (e.g., having a combined random testing pool). C/TPAs are not "employers" for purposes of this part.

Controlled substances mean those substances identified in § 40.85 of this title.

Designated employer representative (DER) is an individual identified by the employer as able to receive communications and test results from service agents and who is authorized to take immediate actions to remove employees from safety-sensitive duties and to make required decisions in the testing and evaluation processes. The individual must be an employee of the company. Service agents cannot serve as DERs.

Disabling damage means damage which precludes departure of a motor vehicle from the scene of the accident in its usual manner in daylight after simple repairs.

(1) *Inclusions.* Damage to motor vehicles that could have been driven, but would have been further damaged if so driven.

(2) *Exclusions.* (i) Damage which can be remedied temporarily at the scene of the accident without special tools or parts.

(ii) Tire disablement without other damage even if no spare tire is available.

(iii) Headlight or taillight damage.

(iv) Damage to turn signals, horn, or windshield wipers which make them inoperative.

DOT Agency means an agency (or "operating administration") of the United States Department of Transportation administering regulations requiring alcohol and/or drug testing (14 CFR parts 61, 63, 65, 121, and 135; 49 CFR parts 199, 219, 382, and 655), in accordance with part 40 of this title.

Driver means any person who operates a commercial motor vehicle. This includes, but is not limited to: Full time, regularly employed drivers; casual, intermittent or occasional drivers; leased drivers and independent owner-operator contractors.

Employer means a person or entity employing one or more employees (including an individual who is self-employed) that is subject to DOT agency regulations requiring compliance with this part. The term, as used in this part, means the entity responsible for overall implementation of DOT drug and alcohol program requirements, including individuals employed by the entity who take personnel actions resulting from violations of this part and any applicable DOT agency regulations. Service agents are not employers for the purposes of this part.

Licensed medical practitioner means a person who is licensed, certified, and/or registered, in accordance with applicable Federal, State, local, or foreign laws and regulations, to prescribe controlled substances and other drugs.

Performing (a safety-sensitive function) means a driver is considered to be performing a safety-sensitive function during any period in which he or she is actually performing, ready to perform, or immediately available to perform any safety-sensitive functions.

Positive rate for random drug testing means the number of verified positive results for random drug tests conducted under this part plus the number of refusals of random drug tests required by this part, divided by the total number of random drug tests results (i.e., positives, negatives, and refusals) under this part.

Refuse to submit (to an alcohol or controlled substances test) means that a driver:

(1) Fail to appear for any test (except a pre-employment test) within a reasonable time, as determined by the employer, consistent with applicable DOT agency regulations, after being directed to do so by the employer. This includes the failure of an employee (including an owner-operator) to appear for a test when called by a C/TPA (see § 40.61(a) of this title);

(2) Fail to remain at the testing site until the testing process is complete. Provided, that an employee who leaves the testing site before the testing process commences (see § 40.63(c) of this title) a pre-employment test is not deemed to have refused to test;

(3) Fail to provide a urine specimen for any drug test required by this part or DOT agency regulations. Provided, that an employee who does not provide a urine specimen because he or she has left the testing site before the testing process commences (see § 40.63(c) of this title) for a pre-employment test is not deemed to have refused to test;

(4) In the case of a directly observed or monitored collection in a drug test, fails to permit the observation or monitoring of the driver's provision of a specimen (see §§ 40.67(l) and 40.69(g) of this title);

(5) Fail to provide a sufficient amount of urine when directed, and it has been determined, through a required medical evaluation, that there was no adequate medical explanation for the failure (see § 40.193(d)(2) of this title);

(6) Fail or declines to take a second test the employer or collector has directed the driver to take;

(7) Fail to undergo a medical examination or evaluation, as directed by the MRO as part of the verification process, or as directed by the DER under § 40.193(d) of this title. In the case of a pre-employment drug test, the employee is deemed to have refused to test on this basis only if the pre-employment test is conducted following a contingent offer of employment;

(8) Fail to cooperate with any part of the testing process (e.g., refuse to empty pockets when so directed by the collector, behave in a confrontational way that disrupts the collection process); or

(9) Is reported by the MRO as having a verified adulterated or substituted test result.

Safety-sensitive function means all time from the time a driver begins to work or is required to be in readiness to work until the time he/she is relieved from work and all responsibility for performing work. Safety-sensitive functions shall include:

(1) All time at an employer or shipper plant, terminal, facility, or other property, or on any public property, waiting to be dispatched, unless the driver has been relieved from duty by the employer;

(2) All time inspecting equipment as required by §§ 392.7 and 392.8 of this subchapter or otherwise inspecting, servicing, or conditioning any commercial motor vehicle at any time;

(3) All time spent at the driving controls of a commercial motor vehicle in operation;

(4) All time, other than driving time, in or upon any commercial motor vehicle except time spent resting in a sleeper berth (a berth conforming to the requirements of § 393.76 of this subchapter);

(5) All time loading or unloading a vehicle, supervising, or assisting in the loading or unloading, attending a vehicle being loaded or unloaded, remaining in readiness to operate the vehicle, or in giving or receiving receipts for shipments loaded or unloaded; and

(6) All time repairing, obtaining assistance, or remaining in attendance upon a disabled vehicle.

Screening test (or initial test) means:

(1) In drug testing, a test to eliminate "negative" urine specimens from further analysis or to identify a specimen that requires additional testing for the presence of drugs.

(2) In alcohol testing, an analytical procedure to determine whether an employee may have a prohibited concentration of alcohol in a breath or saliva specimen.

Stand-down means the practice of temporarily removing an employee from the performance of safety-sensitive functions based only on a report from a laboratory to the MRO of a confirmed positive test for a drug or drug metabolite, an adulterated test, or a substituted test, before the MRO has

§ 382.109

completed verification of the test results.

Violation rate for random alcohol testing means the number of 0.04 and above random alcohol confirmation test results conducted under this part plus the number of refusals of random alcohol tests required by this part, divided by the total number of random alcohol screening tests (including refusals) conducted under this part.

[66 FR 43103, Aug. 17, 2001, as amended at 68 FR 75458, Dec. 31, 2003]

§ 382.109 Preemption of State and local laws.

(a) Except as provided in paragraph (b) of this section, this part preempts any State or local law, rule, regulation, or order to the extent that:

(1) Compliance with both the State or local requirement in this part is not possible; or

(2) Compliance with the State or local requirement is an obstacle to the accomplishment and execution of any requirement in this part.

(b) This part shall not be construed to preempt provisions of State criminal law that impose sanctions for reckless conduct leading to actual loss of life, injury, or damage to property, whether the provisions apply specifically to transportation employees, employers, or the general public.

§ 382.111 Other requirements imposed by employers.

Except as expressly provided in this part, nothing in this part shall be construed to affect the authority of employers, or the rights of drivers, with respect to the use of alcohol, or the use of controlled substances, including authority and rights with respect to testing and rehabilitation.

§ 382.113 Requirement for notice.

Before performing each alcohol or controlled substances test under this part, each employer shall notify a driver that the alcohol or controlled substances test is required by this part. No employer shall falsely represent that a test is administered under this part.

49 CFR Ch. III (10–1–04 Edition)

§ 382.115 Starting date for testing programs.

(a) All domestic-domiciled employers must implement the requirements of this part on the date the employer begins commercial motor vehicle operations.

(b) All foreign-domiciled employers must implement the requirements of this part on the date the employer begins commercial motor vehicle operations in the United States.

§ 382.117 Public interest exclusion.

No employer shall use the services of a service agent who is subject to public interest exclusion in accordance with 49 CFR part 40, Subpart R.

§ 382.119 Stand-down waiver provision.

(a) Employers are prohibited from standing employees down, except consistent with a waiver from the Federal Motor Carrier Safety Administration as required under this section.

(b) An employer subject to this part who seeks a waiver from the prohibition against standing down an employee before the MRO has completed the verification process shall follow the procedures in 49 CFR 40.21. The employer must send a written request, which includes all of the information required by that section to the Federal Motor Carrier Safety Administrator (or the Administrator's designee), U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590.

(c) The final decision whether to grant or deny the application for a waiver will be made by the Administrator or the Administrator's designee.

(d) After a decision is signed by the Administrator or the Administrator's designee, the employer will be sent a copy of the decision, which will include the terms and conditions for the waiver or the reason for denying the application for a waiver.

(e) Questions regarding waiver applications should be directed to the Office of Enforcement and Compliance, Federal Motor Carrier Safety Administration, 400 Seventh Street, SW., Washington, DC 20590. The telephone number is (202) 366–5720.

§ 382.121 Employee admission of alcohol and controlled substances use.

(a) Employees who admit to alcohol misuse or controlled substances use are not subject to the referral, evaluation and treatment requirements of this part and part 40 of this title, provided that:

(1) The admission is in accordance with a written employer-established voluntary self-identification program or policy that meets the requirements of paragraph (b) of this section;

(2) The driver does not self-identify in order to avoid testing under the requirements of this part;

(3) The driver makes the admission of alcohol misuse or controlled substances use prior to performing a safety sensitive function (i.e., prior to reporting for duty); and

(4) The driver does not perform a safety sensitive function until the employer is satisfied that the employee has been evaluated and has successfully completed education or treatment requirements in accordance with the self-identification program guidelines.

(b) A qualified voluntary self-identification program or policy must contain the following elements:

(1) It must prohibit the employer from taking adverse action against an employee making a voluntary admission of alcohol misuse or controlled substances use within the parameters of the program or policy and paragraph (a) of this section;

(2) It must allow the employee sufficient opportunity to seek evaluation, education or treatment to establish control over the employee's drug or alcohol problem;

(3) It must permit the employee to return to safety sensitive duties only upon successful completion of an educational or treatment program, as determined by a drug and alcohol abuse evaluation expert, i.e., employee assistance professional, substance abuse professional, or qualified drug and alcohol counselor;

(4) It must ensure that:

(i) Prior to the employee participating in a safety sensitive function, the employee shall undergo a return to duty test with a result indicating an

alcohol concentration of less than 0.02; and/or

(ii) Prior to the employee participating in a safety sensitive function, the employee shall undergo a return to duty controlled substance test with a verified negative test result for controlled substances use; and

(5) It may incorporate employee monitoring and include non-DOT follow-up testing.

Subpart B—Prohibitions**§ 382.201 Alcohol concentration.**

No driver shall report for duty or remain on duty requiring the performance of safety-sensitive functions while having an alcohol concentration of 0.04 or greater. No employer having actual knowledge that a driver has an alcohol concentration of 0.04 or greater shall permit the driver to perform or continue to perform safety-sensitive functions.

§ 382.205 On-duty use.

No driver shall use alcohol while performing safety-sensitive functions. No employer having actual knowledge that a driver is using alcohol while performing safety-sensitive functions shall permit the driver to perform or continue to perform safety-sensitive functions.

§ 382.207 Pre-duty use.

No driver shall perform safety-sensitive functions within four hours after using alcohol. No employer having actual knowledge that a driver has used alcohol within four hours shall permit a driver to perform or continue to perform safety-sensitive functions.

§ 382.209 Use following an accident.

No driver required to take a post-accident alcohol test under § 382.303 shall use alcohol for eight hours following the accident, or until he/she undergoes a post-accident alcohol test, whichever occurs first.

§ 382.211 Refusal to submit to a required alcohol or controlled substances test.

No driver shall refuse to submit to a post-accident alcohol or controlled substances test required under § 382.303,

§ 382.213

a random alcohol or controlled substances test required under § 382.305, a reasonable suspicion alcohol or controlled substances test required under § 382.307, or a follow-up alcohol or controlled substances test required under § 382.311. No employer shall permit a driver who refuses to submit to such tests to perform or continue to perform safety-sensitive functions.

§ 382.213 Controlled substances use.

(a) No driver shall report for duty or remain on duty requiring the performance of safety-sensitive functions when the driver uses any controlled substance, except when the use is pursuant to the instructions of a licensed medical practitioner, as defined in § 382.107, who has advised the driver that the substance will not adversely affect the driver's ability to safely operate a commercial motor vehicle.

(b) No employer having actual knowledge that a driver has used a controlled substance shall permit the driver to perform or continue to perform a safety-sensitive function.

(c) An employer may require a driver to inform the employer of any therapeutic drug use.

§ 382.215 Controlled substances testing.

No driver shall report for duty, remain on duty or perform a safety-sensitive function, if the driver tests positive or has adulterated or substituted a test specimen for controlled substances. No employer having actual knowledge that a driver has tested positive or has adulterated or substituted a test specimen for controlled substances shall permit the driver to perform or continue to perform safety-sensitive functions.

Subpart C—Tests Required

§ 382.301 Pre-employment testing.

(a) Prior to the first time a driver performs safety-sensitive functions for an employer, the driver shall undergo testing for controlled substances as a condition prior to being used, unless the employer uses the exception in paragraph (b) of this section. No employer shall allow a driver, who the employer intends to hire or use, to per-

49 CFR Ch. III (10–1–04 Edition)

form safety-sensitive functions unless the employer has received a controlled substances test result from the MRO or C/TPA indicating a verified negative test result for that driver.

(b) An employer is not required to administer a controlled substances test required by paragraph (a) of this section if:

(1) The driver has participated in a controlled substances testing program that meets the requirements of this part within the previous 30 days; and

(2) While participating in that program, either:

(i) Was tested for controlled substances within the past 6 months (from the date of application with the employer), or

(ii) Participated in the random controlled substances testing program for the previous 12 months (from the date of application with the employer); and

(3) The employer ensures that no prior employer of the driver of whom the employer has knowledge has records of a violation of this part or the controlled substances use rule of another DOT agency within the previous six months.

(c)(1) An employer who exercises the exception in paragraph (b) of this section shall contact the controlled substances testing program(s) in which the driver participates or participated and shall obtain and retain from the testing program(s) the following information:

(i) Name(s) and address(es) of the program(s).

(ii) Verification that the driver participates or participated in the program(s).

(iii) Verification that the program(s) conforms to part 40 of this title.

(iv) Verification that the driver is qualified under the rules of this part, including that the driver has not refused to be tested for controlled substances.

(v) The date the driver was last tested for controlled substances.

(vi) The results of any tests taken within the previous six months and any other violations of subpart B of this part.

(2) An employer who uses, but does not employ a driver more than once a

year to operate commercial motor vehicles must obtain the information in paragraph (c)(1) of this section at least once every six months. The records prepared under this paragraph shall be maintained in accordance with § 382.401. If the employer cannot verify that the driver is participating in a controlled substances testing program in accordance with this part and part 40 of this title, the employer shall conduct a pre-employment controlled substances test.

(d) An employer may, but is not required to, conduct pre-employment alcohol testing under this part. If an employer chooses to conduct pre-employment alcohol testing, it must comply with the following requirements:

(1) It must conduct a pre-employment alcohol test before the first performance of safety-sensitive functions by every covered employee (whether a new employee or someone who has transferred to a position involving the performance of safety-sensitive functions).

(2) It must treat all safety-sensitive employees performing safety-sensitive functions the same for the purpose of pre-employment alcohol testing (i.e., it must not test some covered employees and not others).

(3) It must conduct the pre-employment tests after making a contingent offer of employment or transfer, subject to the employee passing the pre-employment alcohol test.

(4) It must conduct all pre-employment alcohol tests using the alcohol testing procedures of 49 CFR part 40 of this title.

(5) It must not allow a covered employee to begin performing safety-sensitive functions unless the result of the employee's test indicates an alcohol concentration of less than 0.04.

§ 382.303 Post-accident testing.

(a) As soon as practicable following an occurrence involving a commercial motor vehicle operating on a public

road in commerce, each employer shall test for alcohol for each of its surviving drivers:

(1) Who was performing safety-sensitive functions with respect to the vehicle, if the accident involved the loss of human life; or

(2) Who receives a citation within 8 hours of the occurrence under State or local law for a moving traffic violation arising from the accident, if the accident involved:

(i) Bodily injury to any person who, as a result of the injury, immediately receives medical treatment away from the scene of the accident; or

(ii) One or more motor vehicles incurring disabling damage as a result of the accident, requiring the motor vehicle to be transported away from the scene by a tow truck or other motor vehicle.

(b) As soon as practicable following an occurrence involving a commercial motor vehicle operating on a public road in commerce, each employer shall test for controlled substances for each of its surviving drivers:

(1) Who was performing safety-sensitive functions with respect to the vehicle, if the accident involved the loss of human life; or

(2) Who receives a citation within thirty-two hours of the occurrence under State or local law for a moving traffic violation arising from the accident, if the accident involved:

(i) Bodily injury to any person who, as a result of the injury, immediately receives medical treatment away from the scene of the accident; or

(ii) One or more motor vehicles incurring disabling damage as a result of the accident, requiring the motor vehicle to be transported away from the scene by a tow truck or other motor vehicle.

(c) The following table notes when a post-accident test is required to be conducted by paragraphs (a)(1), (a)(2), (b)(1), and (b)(2) of this section:

TABLE FOR § 382.303(A) AND (B)

Type of accident involved	Citation issued to the CMV driver	Test must be performed by employer
i. Human fatality	YES NO	YES. YES.
ii. Bodily injury with immediate medical treatment away from the scene.	YES NO	YES. NO.
iii. Disabling damage to any motor vehicle requiring tow away.	YES NO	YES. NO.

(d)(1) *Alcohol tests.* If a test required by this section is not administered within two hours following the accident, the employer shall prepare and maintain on file a record stating the reasons the test was not promptly administered. If a test required by this section is not administered within eight hours following the accident, the employer shall cease attempts to administer an alcohol test and shall prepare and maintain the same record. Records shall be submitted to the FMCSA upon request.

(2) *Controlled substance tests.* If a test required by this section is not administered within 32 hours following the accident, the employer shall cease attempts to administer a controlled substances test, and prepare and maintain on file a record stating the reasons the test was not promptly administered. Records shall be submitted to the FMCSA upon request.

(e) A driver who is subject to post-accident testing shall remain readily available for such testing or may be deemed by the employer to have refused to submit to testing. Nothing in this section shall be construed to require the delay of necessary medical attention for injured people following an accident or to prohibit a driver from leaving the scene of an accident for the period necessary to obtain assistance in responding to the accident, or to obtain necessary emergency medical care.

(f) An employer shall provide drivers with necessary post-accident information, procedures and instructions, prior to the driver operating a commercial motor vehicle, so that drivers will be able to comply with the requirements of this section.

(g)(1) The results of a breath or blood test for the use of alcohol, conducted by Federal, State, or local officials having independent authority for the test, shall be considered to meet the requirements of this section, provided such tests conform to the applicable Federal, State or local alcohol testing requirements, and that the results of the tests are obtained by the employer.

(2) The results of a urine test for the use of controlled substances, conducted by Federal, State, or local officials having independent authority for the test, shall be considered to meet the requirements of this section, provided such tests conform to the applicable Federal, State or local controlled substances testing requirements, and that the results of the tests are obtained by the employer.

(h) *Exception.* This section does not apply to:

(1) An occurrence involving only boarding or alighting from a stationary motor vehicle; or

(2) An occurrence involving only the loading or unloading of cargo; or

(3) An occurrence in the course of the operation of a passenger car or a multipurpose passenger vehicle (as defined in §571.3 of this title) by an employer unless the motor vehicle is transporting passengers for hire or hazardous materials of a type and quantity that require the motor vehicle to be marked or placarded in accordance with §177.823 of this title.

§ 382.305 Random testing.

(a) Every employer shall comply with the requirements of this section. Every driver shall submit to random alcohol and controlled substance testing as required in this section.

(b)(1) Except as provided in paragraphs (c) through (e) of this section, the minimum annual percentage rate for random alcohol testing shall be 10 percent of the average number of driver positions.

(2) Except as provided in paragraphs (f) through (h) of this section, the minimum annual percentage rate for random controlled substances testing shall be 50 percent of the average number of driver positions.

(c) The FMCSA Administrator's decision to increase or decrease the minimum annual percentage rate for alcohol testing is based on the reported violation rate for the entire industry. All information used for this determination is drawn from the alcohol management information system reports required by § 382.403. In order to ensure reliability of the data, the FMCSA Administrator considers the quality and completeness of the reported data, may obtain additional information or reports from employers, and may make appropriate modifications in calculating the industry violation rate. In the event of a change in the annual percentage rate, the FMCSA Administrator will publish in the FEDERAL REGISTER the new minimum annual percentage rate for random alcohol testing of drivers. The new minimum annual percentage rate for random alcohol testing will be applicable starting January 1 of the calendar year following publication in the FEDERAL REGISTER.

(d)(1) When the minimum annual percentage rate for random alcohol testing is 25 percent or more, the FMCSA Administrator may lower this rate to 10 percent of all driver positions if the FMCSA Administrator determines that the data received under the reporting requirements of § 382.403 for two consecutive calendar years indicate that the violation rate is less than 0.5 percent.

(2) When the minimum annual percentage rate for random alcohol testing is 50 percent, the FMCSA Administrator may lower this rate to 25 percent of all driver positions if the FMCSA Administrator determines that the data received under the reporting requirements of § 382.403 for two consecutive calendar years indicate that

the violation rate is less than 1.0 percent but equal to or greater than 0.5 percent.

(e)(1) When the minimum annual percentage rate for random alcohol testing is 10 percent, and the data received under the reporting requirements of § 382.403 for that calendar year indicate that the violation rate is equal to or greater than 0.5 percent, but less than 1.0 percent, the FMCSA Administrator will increase the minimum annual percentage rate for random alcohol testing to 25 percent for all driver positions.

(2) When the minimum annual percentage rate for random alcohol testing is 25 percent or less, and the data received under the reporting requirements of § 382.403 for that calendar year indicate that the violation rate is equal to or greater than 1.0 percent, the FMCSA Administrator will increase the minimum annual percentage rate for random alcohol testing to 50 percent for all driver positions.

(f) The FMCSA Administrator's decision to increase or decrease the minimum annual percentage rate for controlled substances testing is based on the reported positive rate for the entire industry. All information used for this determination is drawn from the controlled substances management information system reports required by § 382.403. In order to ensure reliability of the data, the FMCSA Administrator considers the quality and completeness of the reported data, may obtain additional information or reports from employers, and may make appropriate modifications in calculating the industry positive rate. In the event of a change in the annual percentage rate, the FMCSA Administrator will publish in the FEDERAL REGISTER the new minimum annual percentage rate for controlled substances testing of drivers. The new minimum annual percentage rate for random controlled substances testing will be applicable starting January 1 of the calendar year following publication in the FEDERAL REGISTER.

(g) When the minimum annual percentage rate for random controlled substances testing is 50 percent, the FMCSA Administrator may lower this rate to 25 percent of all driver positions

§ 382.305

49 CFR Ch. III (10–1–04 Edition)

if the FMCSA Administrator determines that the data received under the reporting requirements of § 382.403 for two consecutive calendar years indicate that the positive rate is less than 1.0 percent.

(h) When the minimum annual percentage rate for random controlled substances testing is 25 percent, and the data received under the reporting requirements of § 382.403 for any calendar year indicate that the reported positive rate is equal to or greater than 1.0 percent, the FMCSA Administrator will increase the minimum annual percentage rate for random controlled substances testing to 50 percent of all driver positions.

(i)(1) The selection of drivers for random alcohol and controlled substances testing shall be made by a scientifically valid method, such as a random number table or a computer-based random number generator that is matched with drivers' Social Security numbers, payroll identification numbers, or other comparable identifying numbers.

(2) Each driver selected for random alcohol and controlled substances testing under the selection process used, shall have an equal chance of being tested each time selections are made.

(3) Each driver selected for testing shall be tested during the selection period.

(j)(1) To calculate the total number of covered drivers eligible for random testing throughout the year, as an employer, you must add the total number of covered drivers eligible for testing during each random testing period for the year and divide that total by the number of random testing periods. Covered employees, and only covered employees, are to be in an employer's random testing pool, and all covered drivers must be in the random pool. If you are an employer conducting random testing more often than once per month (*e.g.*, daily, weekly, bi-weekly) you do not need to compute this total number of covered drivers rate more than on a once per month basis.

(2) As an employer, you may use a service agent (*e.g.*, a C/TPA) to perform random selections for you, and your covered drivers may be part of a larger random testing pool of covered employees. However, you must ensure that the

service agent you use is testing at the appropriate percentage established for your industry and that only covered employees are in the random testing pool.

(k)(1) Each employer shall ensure that random alcohol and controlled substances tests conducted under this part are unannounced.

(2) Each employer shall ensure that the dates for administering random alcohol and controlled substances tests conducted under this part are spread reasonably throughout the calendar year.

(l) Each employer shall require that each driver who is notified of selection for random alcohol and/or controlled substances testing proceeds to the test site immediately; provided, however, that if the driver is performing a safety-sensitive function, other than driving a commercial motor vehicle, at the time of notification, the employer shall instead ensure that the driver ceases to perform the safety-sensitive function and proceeds to the testing site as soon as possible.

(m) A driver shall only be tested for alcohol while the driver is performing safety-sensitive functions, just before the driver is to perform safety-sensitive functions, or just after the driver has ceased performing such functions.

(n) If a given driver is subject to random alcohol or controlled substances testing under the random alcohol or controlled substances testing rules of more than one DOT agency for the same employer, the driver shall be subject to random alcohol and/or controlled substances testing at the annual percentage rate established for the calendar year by the DOT agency regulating more than 50 percent of the driver's function.

(o) If an employer is required to conduct random alcohol or controlled substances testing under the alcohol or controlled substances testing rules of more than one DOT agency, the employer may—

(1) Establish separate pools for random selection, with each pool containing the DOT-covered employees who are subject to testing at the same required minimum annual percentage rate; or

(2) Randomly select such employees for testing at the highest minimum annual percentage rate established for the calendar year by any DOT agency to which the employer is subject.

[66 FR 43103, Aug. 17, 2001, as amended at 67 FR 61821, Oct. 2, 2002; 68 FR 75459, Dec. 31, 2003]

§ 382.307 Reasonable suspicion testing.

(a) An employer shall require a driver to submit to an alcohol test when the employer has reasonable suspicion to believe that the driver has violated the prohibitions of subpart B of this part concerning alcohol. The employer's determination that reasonable suspicion exists to require the driver to undergo an alcohol test must be based on specific, contemporaneous, articulable observations concerning the appearance, behavior, speech or body odors of the driver.

(b) An employer shall require a driver to submit to a controlled substances test when the employer has reasonable suspicion to believe that the driver has violated the prohibitions of subpart B of this part concerning controlled substances. The employer's determination that reasonable suspicion exists to require the driver to undergo a controlled substances test must be based on specific, contemporaneous, articulable observations concerning the appearance, behavior, speech or body odors of the driver. The observations may include indications of the chronic and withdrawal effects of controlled substances.

(c) The required observations for alcohol and/or controlled substances reasonable suspicion testing shall be made by a supervisor or company official who is trained in accordance with § 382.603. The person who makes the determination that reasonable suspicion exists to conduct an alcohol test shall not conduct the alcohol test of the driver.

(d) Alcohol testing is authorized by this section only if the observations required by paragraph (a) of this section are made during, just preceding, or just after the period of the work day that the driver is required to be in compliance with this part. A driver may be directed by the employer to only undergo reasonable suspicion testing while the

driver is performing safety-sensitive functions, just before the driver is to perform safety-sensitive functions, or just after the driver has ceased performing such functions.

(e)(1) If an alcohol test required by this section is not administered within two hours following the determination under paragraph (a) of this section, the employer shall prepare and maintain on file a record stating the reasons the alcohol test was not promptly administered. If an alcohol test required by this section is not administered within eight hours following the determination under paragraph (a) of this section, the employer shall cease attempts to administer an alcohol test and shall state in the record the reasons for not administering the test.

(2) Notwithstanding the absence of a reasonable suspicion alcohol test under this section, no driver shall report for duty or remain on duty requiring the performance of safety-sensitive functions while the driver is under the influence of or impaired by alcohol, as shown by the behavioral, speech, and performance indicators of alcohol misuse, nor shall an employer permit the driver to perform or continue to perform safety-sensitive functions, until:

(i) An alcohol test is administered and the driver's alcohol concentration measures less than 0.02; or

(ii) Twenty four hours have elapsed following the determination under paragraph (a) of this section that there is reasonable suspicion to believe that the driver has violated the prohibitions in this part concerning the use of alcohol.

(3) Except as provided in paragraph (e)(2) of this section, no employer shall take any action under this part against a driver based solely on the driver's behavior and appearance, with respect to alcohol use, in the absence of an alcohol test. This does not prohibit an employer with independent authority of this part from taking any action otherwise consistent with law.

(f) A written record shall be made of the observations leading to an alcohol or controlled substances reasonable suspicion test, and signed by the supervisor or company official who made the observations, within 24 hours of the observed behavior or before the results of

§ 382.309

the alcohol or controlled substances tests are released, whichever is earlier.

§ 382.309 Return-to-duty testing.

The requirements for return-to-duty testing must be performed in accordance with 49 CFR part 40, Subpart O.

§ 382.311 Follow-up testing.

The requirements for follow-up testing must be performed in accordance with 49 CFR part 40, Subpart O.

Subpart D—Handling of Test Results, Records Retention, and Confidentiality

§ 382.401 Retention of records.

(a) *General requirement.* Each employer shall maintain records of its alcohol misuse and controlled substances use prevention programs as provided in this section. The records shall be maintained in a secure location with controlled access.

(b) *Period of retention.* Each employer shall maintain the records in accordance with the following schedule:

(1) *Five years.* The following records shall be maintained for a minimum of five years:

(i) Records of driver alcohol test results indicating an alcohol concentration of 0.02 or greater,

(ii) Records of driver verified positive controlled substances test results,

(iii) Documentation of refusals to take required alcohol and/or controlled substances tests,

(iv) Driver evaluation and referrals,

(v) Calibration documentation,

(vi) Records related to the administration of the alcohol and controlled substances testing programs, and

(vii) A copy of each annual calendar year summary required by § 382.403.

(2) *Two years.* Records related to the alcohol and controlled substances collection process (except calibration of evidential breath testing devices).

(3) *One year.* Records of negative and canceled controlled substances test results (as defined in part 40 of this title) and alcohol test results with a concentration of less than 0.02 shall be maintained for a minimum of one year.

(4) *Indefinite period.* Records related to the education and training of breath alcohol technicians, screening test

49 CFR Ch. III (10–1–04 Edition)

technicians, supervisors, and drivers shall be maintained by the employer while the individual performs the functions which require the training and for two years after ceasing to perform those functions.

(c) *Types of records.* The following specific types of records shall be maintained. “Documents generated” are documents that may have to be prepared under a requirement of this part. If the record is required to be prepared, it must be maintained.

(1) Records related to the collection process:

(i) Collection logbooks, if used;

(ii) Documents relating to the random selection process;

(iii) Calibration documentation for evidential breath testing devices;

(iv) Documentation of breath alcohol technician training;

(v) Documents generated in connection with decisions to administer reasonable suspicion alcohol or controlled substances tests;

(vi) Documents generated in connection with decisions on post-accident tests;

(vii) Documents verifying existence of a medical explanation of the inability of a driver to provide adequate breath or to provide a urine specimen for testing; and

(viii) A copy of each annual calendar year summary as required by § 382.403.

(2) Records related to a driver’s test results:

(i) The employer’s copy of the alcohol test form, including the results of the test;

(ii) The employer’s copy of the controlled substances test chain of custody and control form;

(iii) Documents sent by the MRO to the employer, including those required by part 40, subpart G, of this title;

(iv) Documents related to the refusal of any driver to submit to an alcohol or controlled substances test required by this part;

(v) Documents presented by a driver to dispute the result of an alcohol or controlled substances test administered under this part; and

(vi) Documents generated in connection with verifications of prior employers’ alcohol or controlled substances test results that the employer:

(A) Must obtain in connection with the exception contained in § 382.301, and

(B) Must obtain as required by § 382.413.

(3) Records related to other violations of this part.

(4) Records related to evaluations:

(i) Records pertaining to a determination by a substance abuse professional concerning a driver's need for assistance; and

(ii) Records concerning a driver's compliance with recommendations of the substance abuse professional.

(5) Records related to education and training:

(i) Materials on alcohol misuse and controlled substance use awareness, including a copy of the employer's policy on alcohol misuse and controlled substance use;

(ii) Documentation of compliance with the requirements of § 382.601, including the driver's signed receipt of education materials;

(iii) Documentation of training provided to supervisors for the purpose of qualifying the supervisors to make a determination concerning the need for alcohol and/or controlled substances testing based on reasonable suspicion;

(iv) Documentation of training for breath alcohol technicians as required by § 40.213(a) of this title; and

(v) Certification that any training conducted under this part complies with the requirements for such training.

(6) Administrative records related to alcohol and controlled substances testing:

(i) Agreements with collection site facilities, laboratories, breath alcohol technicians, screening test technicians, medical review officers, consortia, and third party service providers;

(ii) Names and positions of officials and their role in the employer's alcohol and controlled substances testing program(s);

(iii) Semi-annual laboratory statistical summaries of urinalysis required by § 40.111(a) of this title; and

(iv) The employer's alcohol and controlled substances testing policy and procedures.

(d) *Location of records.* All records required by this part shall be maintained as required by § 390.31 of this sub-

chapter and shall be made available for inspection at the employer's principal place of business within two business days after a request has been made by an authorized representative of the Federal Motor Carrier Safety Administration.

(e) *OMB control number.* (1) The information collection requirements of this part have been reviewed by the Office of Management and Budget pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.) and have been assigned OMB control number 2126-0012.

(2) The information collection requirements of this part are found in the following sections: Sections 382.105, 382.113, 382.301, 382.303, 382.305, 382.307, 382.401, 382.403, 382.405, 382.409, 382.411, 382.601, 382.603.

[66 FR 43103, Aug. 17, 2001, as amended at 67 FR 61821, Oct. 2, 2002; 68 FR 75459, Dec. 31, 2003]

§ 382.403 Reporting of results in a management information system.

(a) An employer shall prepare and maintain a summary of the results of its alcohol and controlled substances testing programs performed under this part during the previous calendar year, when requested by the Secretary of Transportation, any DOT agency, or any State or local officials with regulatory authority over the employer or any of its drivers.

(b) If an employer is notified, during the month of January, of a request by the Federal Motor Carrier Safety Administration to report the employer's annual calendar year summary information, the employer shall prepare and submit the report to the FMCSA by March 15 of that year. The employer shall ensure that the annual summary report is accurate and received by March 15 at the location that the FMCSA specifies in its request. The employer must use the Management Information System (MIS) form and instructions as required by 49 CFR part 40 (at § 40.26 and appendix H to part 40). The employer may also use the electronic version of the MIS form provided by the DOT. The Administrator may designate means (*e.g.*, electronic program transmitted via the Internet), other than hard-copy, for MIS form

§ 382.405

49 CFR Ch. III (10–1–04 Edition)

submission. For information on the electronic version of the form, see: <http://www.fmcsa.dot.gov/safetyprogs/drugs/engtesting.htm>.

(c) When the report is submitted to the FMCSA by mail or electronic transmission, the information requested shall be typed, except for the signature of the certifying official. Each employer shall ensure the accuracy and timeliness of each report submitted by the employer or a consortium.

(d) If you have a covered employee who performs multi-DOT agency functions (e.g., an employee drives a commercial motor vehicle and performs pipeline maintenance duties for the same employer), count the employee only on the MIS report for the DOT agency under which he or she is randomly tested. Normally, this will be the DOT agency under which the employee performs more than 50% of his or her duties. Employers may have to explain the testing data for these employees in the event of a DOT agency inspection or audit.

(e) A service agent (e.g., *Consortial/Third party administrator* as defined in 49 CFR 382.107) may prepare the MIS report on behalf of an employer. However, a company official (e.g., *Designated employer representative*) must certify the accuracy and completeness of the MIS report, no matter who prepares it.

[66 FR 43103, Aug. 17, 2001, as amended at 68 FR 75459, Dec. 31, 2003]

§ 382.405 Access to facilities and records.

(a) Except as required by law or expressly authorized or required in this section, no employer shall release driver information that is contained in records required to be maintained under § 382.401.

(b) A driver is entitled, upon written request, to obtain copies of any records pertaining to the driver's use of alcohol or controlled substances, including any records pertaining to his or her alcohol or controlled substances tests. The employer shall promptly provide the records requested by the driver. Access to a driver's records shall not be contingent upon payment for records other than those specifically requested.

(c) Each employer shall permit access to all facilities utilized in complying with the requirements of this part to the Secretary of Transportation, any DOT agency, or any State or local officials with regulatory authority over the employer or any of its drivers.

(d) Each employer shall make available copies of all results for employer alcohol and/or controlled substances testing conducted under this part and any other information pertaining to the employer's alcohol misuse and/or controlled substances use prevention program, when requested by the Secretary of Transportation, any DOT agency, or any State or local officials with regulatory authority over the employer or any of its drivers.

(e) When requested by the National Transportation Safety Board as part of an accident investigation, employers shall disclose information related to the employer's administration of a post-accident alcohol and/or controlled substance test administered following the accident under investigation.

(f) Records shall be made available to a subsequent employer upon receipt of a written request from a driver. Disclosure by the subsequent employer is permitted only as expressly authorized by the terms of the driver's request.

(g) An employer may disclose information required to be maintained under this part pertaining to a driver to the decision maker in a lawsuit, grievance, or administrative proceeding initiated by or on behalf of the individual, and arising from a positive DOT drug or alcohol test or a refusal to test (including, but not limited to, adulterated or substituted test results) of this part (including, but not limited to, a worker's compensation, unemployment compensation, or other proceeding relating to a benefit sought by the driver). Additionally, an employer may disclose information in criminal or civil actions in accordance with § 40.323(a)(2) of this title.

(h) An employer shall release information regarding a driver's records as directed by the specific written consent of the driver authorizing release of the information to an identified person.

Release of such information by the person receiving the information is permitted only in accordance with the terms of the employee's specific written consent as outlined in § 40.321(b) of this title.

§ 382.407 Medical review officer notifications to the employer.

Medical review officers shall report the results of controlled substances tests to employers in accordance with the requirements of part 40, Subpart G, of this title.

§ 382.409 Medical review officer record retention for controlled substances.

(a) A medical review officer or third party administrator shall maintain all dated records and notifications, identified by individual, for a minimum of five years for verified positive controlled substances test results.

(b) A medical review officer or third party administrator shall maintain all dated records and notifications, identified by individual, for a minimum of one year for negative and canceled controlled substances test results.

(c) No person may obtain the individual controlled substances test results retained by a medical review officer or third party administrator, and no medical review officer or third party administrator shall release the individual controlled substances test results of any driver to any person, without first obtaining a specific, written authorization from the tested driver. Nothing in this paragraph (c) shall prohibit a medical review officer or third party administrator from releasing, to the employer or to officials of the Secretary of Transportation, any DOT agency, or any State or local officials with regulatory authority over the controlled substances testing program under this part, the information delineated in part 40, Subpart G, of this title.

§ 382.411 Employer notifications.

(a) An employer shall notify a driver of the results of a pre-employment controlled substances test conducted under this part, if the driver requests such results within 60 calendar days of being notified of the disposition of the employment application. An employer

shall notify a driver of the results of random, reasonable suspicion and post-accident tests for controlled substances conducted under this part if the test results are verified positive. The employer shall also inform the driver which controlled substance or substances were verified as positive.

(b) The designated employer representative shall make reasonable efforts to contact and request each driver who submitted a specimen under the employer's program, regardless of the driver's employment status, to contact and discuss the results of the controlled substances test with a medical review officer who has been unable to contact the driver.

(c) The designated employer representative shall immediately notify the medical review officer that the driver has been notified to contact the medical review officer within 72 hours.

§ 382.413 Inquiries for alcohol and controlled substances information from previous employers.

Employers shall request alcohol and controlled substances information from previous employers in accordance with the requirements of § 40.25 of this title.

Subpart E—Consequences for Drivers Engaging in Substance Use-Related Conduct

§ 382.501 Removal from safety-sensitive function.

(a) Except as provided in subpart F of this part, no driver shall perform safety-sensitive functions, including driving a commercial motor vehicle, if the driver has engaged in conduct prohibited by subpart B of this part or an alcohol or controlled substances rule of another DOT agency.

(b) No employer shall permit any driver to perform safety-sensitive functions; including driving a commercial motor vehicle, if the employer has determined that the driver has violated this section.

(c) For purposes of this subpart, commercial motor vehicle means a commercial motor vehicle in commerce as defined in § 382.107, and a commercial motor vehicle in interstate commerce

§ 382.503

as defined in part 390 of this subchapter.

§ 382.503 Required evaluation and testing.

No driver who has engaged in conduct prohibited by subpart B of this part shall perform safety-sensitive functions, including driving a commercial motor vehicle, unless the driver has met the requirements of part 40, subpart O, of this title. No employer shall permit a driver who has engaged in conduct prohibited by subpart B of this part to perform safety-sensitive functions, including driving a commercial motor vehicle, unless the driver has met the requirements of part 40, subpart O, of this title.

§ 382.505 Other alcohol-related conduct.

(a) No driver tested under the provisions of subpart C of this part who is found to have an alcohol concentration of 0.02 or greater but less than 0.04 shall perform or continue to perform safety-sensitive functions for an employer, including driving a commercial motor vehicle, nor shall an employer permit the driver to perform or continue to perform safety-sensitive functions, until the start of the driver's next regularly scheduled duty period, but not less than 24 hours following administration of the test.

(b) Except as provided in paragraph (a) of this section, no employer shall take any action under this part against a driver based solely on test results showing an alcohol concentration less than 0.04. This does not prohibit an employer with authority independent of this part from taking any action otherwise consistent with law.

§ 382.507 Penalties.

Any employer or driver who violates the requirements of this part shall be subject to the civil and/or criminal penalty provisions of 49 U.S.C. 521(b). In addition, any employer or driver who violates the requirements of 49 CFR part 40 shall be subject to the civil and/or criminal penalty provisions of 49 U.S.C. 521(b).

49 CFR Ch. III (10–1–04 Edition)

Subpart F—Alcohol Misuse and Controlled Substances Use Information, Training, and Referral

§ 382.601 Employer obligation to promulgate a policy on the misuse of alcohol and use of controlled substances.

(a) *General requirements.* Each employer shall provide educational materials that explain the requirements of this part and the employer's policies and procedures with respect to meeting these requirements.

(1) The employer shall ensure that a copy of these materials is distributed to each driver prior to the start of alcohol and controlled substances testing under this part and to each driver subsequently hired or transferred into a position requiring driving a commercial motor vehicle.

(2) Each employer shall provide written notice to representatives of employee organizations of the availability of this information.

(b) *Required content.* The materials to be made available to drivers shall include detailed discussion of at least the following:

(1) The identity of the person designated by the employer to answer driver questions about the materials;

(2) The categories of drivers who are subject to the provisions of this part;

(3) Sufficient information about the safety-sensitive functions performed by those drivers to make clear what period of the work day the driver is required to be in compliance with this part;

(4) Specific information concerning driver conduct that is prohibited by this part;

(5) The circumstances under which a driver will be tested for alcohol and/or controlled substances under this part, including post-accident testing under § 382.303(d);

(6) The procedures that will be used to test for the presence of alcohol and controlled substances, protect the driver and the integrity of the testing processes, safeguard the validity of the test results, and ensure that those results

are attributed to the correct driver, including post-accident information, procedures and instructions required by §382.303(d);

(7) The requirement that a driver submit to alcohol and controlled substances tests administered in accordance with this part;

(8) An explanation of what constitutes a refusal to submit to an alcohol or controlled substances test and the attendant consequences;

(9) The consequences for drivers found to have violated subpart B of this part, including the requirement that the driver be removed immediately from safety-sensitive functions, and the procedures under part 40, subpart O, of this title;

(10) The consequences for drivers found to have an alcohol concentration of 0.02 or greater but less than 0.04;

(11) Information concerning the effects of alcohol and controlled substances use on an individual's health, work, and personal life; signs and symptoms of an alcohol or a controlled substances problem (the driver's or a co-worker's); and available methods of intervening when an alcohol or a controlled substances problem is suspected, including confrontation, referral to any employee assistance program and or referral to management.

(c) *Optional provision.* The materials supplied to drivers may also include information on additional employer policies with respect to the use of alcohol or controlled substances, including any consequences for a driver found to have a specified alcohol or controlled substances level, that are based on the employer's authority independent of this part. Any such additional policies or consequences must be clearly and obviously described as being based on independent authority.

(d) *Certificate of receipt.* Each employer shall ensure that each driver is required to sign a statement certifying that he or she has received a copy of these materials described in this section. Each employer shall maintain the original of the signed certificate and may provide a copy of the certificate to the driver.

§382.603 Training for supervisors.

Each employer shall ensure that all persons designated to supervise drivers receive at least 60 minutes of training on alcohol misuse and receive at least an additional 60 minutes of training on controlled substances use. The training will be used by the supervisors to determine whether reasonable suspicion exists to require a driver to undergo testing under §382.307. The training shall include the physical, behavioral, speech, and performance indicators of probable alcohol misuse and use of controlled substances. Recurrent training for supervisory personnel is not required.

§382.605 Referral, evaluation, and treatment.

The requirements for referral, evaluation, and treatment must be performed in accordance with 49 CFR part 40, Subpart O.

EDITORIAL NOTE: Nomenclature changes to part 383 appear at 66 FR 49872, Oct. 1, 2001.

Subpart A—General

§ 383.1 Purpose and scope.

(a) The purpose of this part is to help reduce or prevent truck and bus acci-

dents, fatalities, and injuries by requiring drivers to have a single commercial motor vehicle driver's license and by disqualifying drivers who operate commercial motor vehicles in an unsafe manner.

(b) This part:

(1) Prohibits a commercial motor vehicle driver from having more than one commercial motor vehicle driver's license;

(2) Requires a driver to notify the driver's current employer and the driver's State of domicile of certain convictions;

(3) Requires that a driver provide previous employment information when applying for employment as an operator of a commercial motor vehicle;

(4) Prohibits an employer from allowing a person with a suspended license to operate a commercial motor vehicle;

(5) Establishes periods of disqualification and penalties for those persons convicted of certain criminal and other offenses and serious traffic violations, or subject to any suspensions, revocations, or cancellations of certain driving privileges;

(6) Establishes testing and licensing requirements for commercial motor vehicle operators;

(7) Requires States to give knowledge and skills tests to all qualified applicants for commercial drivers' licenses which meet the Federal standard;

(8) Sets forth commercial motor vehicle groups and endorsements;

(9) Sets forth the knowledge and skills test requirements for the motor vehicle groups and endorsements;

(10) Sets forth the Federal standards for procedures, methods, and minimum passing scores for States and others to use in testing and licensing commercial motor vehicle operators; and

(11) Establishes requirements for the State issued commercial license documentation.

[52 FR 20587, June 1, 1987, as amended at 53 FR 27648, July 21, 1988; 54 FR 40787, Oct. 3, 1989]

§ 383.3 Applicability.

(a) The rules in this part apply to every person who operates a commercial motor vehicle (CMV) in interstate, foreign, or intrastate commerce, to all

employers of such persons, and to all States.

(b) The exceptions contained in §390.3(f) of this subchapter do not apply to this part. The employers and drivers identified in §390.3(f) must comply with the requirements of this part, unless otherwise provided in this section.

(c) *Exception for certain military drivers.* Each State must exempt from the requirements of this part individuals who operate CMVs for military purposes. This exception is applicable to active duty military personnel; members of the military reserves; member of the national guard on active duty, including personnel on full-time national guard duty, personnel on part-time national guard training, and national guard military technicians (civilians who are required to wear military uniforms); and active duty U.S. Coast Guard personnel. This exception is not applicable to U.S. Reserve technicians.

(d) *Exception for farmers, firefighters, emergency response vehicle drivers, and drivers removing snow and ice.* A State may, at its discretion, exempt individuals identified in paragraphs (d)(1), (d)(2), and (d)(3) of this section from the requirements of this part. The use of this waiver is limited to the driver's home State unless there is a reciprocity agreement with adjoining States.

(1) Operators of a farm vehicle which is:

(i) Controlled and operated by a farmer, including operation by employees or family members;

(ii) Used to transport either agricultural products, farm machinery, farm supplies, or both to or from a farm;

(iii) Not used in the operations of a common or contract motor carrier; and

(iv) Used within 241 kilometers (150 miles) of the farmer's farm.

(2) Firefighters and other persons who operate CMVs which are necessary to the preservation of life or property or the execution of emergency governmental functions, are equipped with audible and visual signals and are not subject to normal traffic regulation. These vehicles include fire trucks, hook and ladder trucks, foam or water transport trucks, police SWAT team vehicles, ambulances, or other vehicles

that are used in response to emergencies.

(3)(i) A driver, employed by an eligible unit of local government, operating a commercial motor vehicle within the boundaries of that unit for the purpose of removing snow or ice from a roadway by plowing, sanding, or salting, if

(A) The properly licensed employee who ordinarily operates a commercial motor vehicle for these purposes is unable to operate the vehicle; or

(B) The employing governmental entity determines that a snow or ice emergency exists that requires additional assistance.

(ii) This exemption shall not preempt State laws and regulations concerning the safe operation of commercial motor vehicles.

(e) *Restricted commercial drivers license (CDL) for certain drivers in the State of Alaska.* (1) The State of Alaska may, at its discretion, waive only the following requirements of this part and issue a CDL to each driver that meets the conditions set forth in paragraphs (e) (2) and (3) of this section:

(i) The knowledge tests standards for testing procedures and methods of subpart H, but must continue to administer knowledge tests that fulfill the content requirements of subpart G for all applicants;

(ii) All the skills test requirements; and

(iii) The requirement under §383.153(a)(4) to have a photograph on the license document.

(2) Drivers of CMVs in the State of Alaska must operate exclusively over roads that meet *both* of the following criteria to be eligible for the exception in paragraph (e)(1) of this section:

(i) Such roads are not connected by land highway or vehicular way to the land-connected State highway system; and

(ii) Such roads are not connected to any highway or vehicular way with an average daily traffic volume greater than 499.

(3) Any CDL issued under the terms of this paragraph must carry two restrictions:

(i) Holders may not operate CMVs over roads other than those specified in paragraph (e)(2) of this section; and

§ 383.3

49 CFR Ch. III (10–1–04 Edition)

(ii) The license is not valid for CMV operation outside the State of Alaska.

(f) *Restricted CDL for certain drivers in farm-related service industries.* (1) A State may, at its discretion, waive the required knowledge and skills tests of subpart H of this part and issue restricted CDLs to employees of these designated farm-related service industries:

- (i) Agri-chemical businesses;
- (ii) Custom harvesters;
- (iii) Farm retail outlets and suppliers;
- (iv) Livestock feeders.

(2) A restricted CDL issued pursuant to this paragraph shall meet all the requirements of this part, except subpart H of this part. A restricted CDL issued pursuant to this paragraph shall be accorded the same reciprocity as a CDL meeting all of the requirements of this part. The restrictions imposed upon the issuance of this restricted CDL shall not limit a person's use of the CDL in a non-CMV during either validated or non-validated periods, nor shall the CDL affect a State's power to administer its driver licensing program for operators of vehicles other than CMVs.

(3) A State issuing a CDL under the terms of this paragraph must restrict issuance as follows:

(i) Applicants must have a good driving record as defined in this paragraph. Drivers who have not held any motor vehicle operator's license for at least one year shall not be eligible for this CDL. Drivers who have between one and two years of driving experience must demonstrate a good driving record for their entire driving history. Drivers with more than two years of driving experience must have a good driving record for the two most recent years. For the purposes of this paragraph, the term *good driving record* means that an applicant:

(A) Has not had more than one license (except in the instances specified in § 383.21);

(B) Has not had *any* license suspended, revoked, or canceled;

(C) Has not had *any* conviction for any type of motor vehicle for the disqualifying offenses contained in § 383.51(b);

(D) Has not had *any* conviction for any type of motor vehicle for serious traffic violations; and

(E) Has not had *any* conviction for a violation of State or local law relating to motor vehicle traffic control (other than a parking violation) arising in connection with any traffic accident, and has no record of an accident in which he/she was at fault.

(ii) Restricted CDLs shall have the same renewal cycle as unrestricted CDLs, but shall be limited to the seasonal period or periods as defined by the State of licensure, provided that the total number of calendar days in any 12-month period for which the restricted CDL is valid does not exceed 180. If a State elects to provide for more than one seasonal period, the restricted CDL is valid for commercial motor vehicle operation only during the currently approved season, and must be revalidated for each successive season. Only one seasonal period of validity may appear on the license document at a time. The good driving record must be confirmed prior to any renewal or revalidation.

(iii) Restricted CDL holders are limited to operating Group B and C vehicles, as described in subpart F of this part.

(iv) Restricted CDLs shall not be issued with *any* endorsements on the license document. Only the limited tank vehicle and hazardous materials endorsement privileges that the restricted CDL automatically confers and are described in paragraph (f)(3)(v) of this section are permitted.

(v) Restricted CDL holders may not drive vehicles carrying any placardable quantities of hazardous materials, except for diesel fuel in quantities of 3,785 liters (1,000 gallons) or less; liquid fertilizers (i.e., plant nutrients) in vehicles or implements of husbandry in total quantities of 11,355 liters (3,000 gallons) or less; and solid fertilizers (i.e., solid plant nutrients) that are not transported with any organic substance.

(vi) Restricted CDL holders may not hold an unrestricted CDL at the same time.

(vii) Restricted CDL holders may not operate a commercial motor vehicle beyond 241 kilometers (150 miles) from

the place of business or the farm currently being served.

(g) *Restricted CDL for certain drivers in the pyrotechnic industry.* (1) A State may, at its discretion, waive the required hazardous materials knowledge tests of subpart H of this part and issue restricted CDLs to part-time drivers operating commercial motor vehicles transporting less than 227 kilograms (500 pounds) of fireworks classified as DOT Class 1.3G explosives.

(2) A State issuing a CDL under the terms of this paragraph must restrict issuance as follows:

(i) The GVWR of the vehicle to be operated must be less than 4,537 kilograms (10,001 pounds);

(ii) If a State believes, at its discretion, that the training required by § 172.704 of this title adequately prepares part-time drivers meeting the other requirements of this paragraph to deal with fireworks and the other potential dangers posed by fireworks transportation and use, the State may waive the hazardous materials knowledge tests of subpart H of this part. The State may impose any requirements it believes is necessary to ensure itself that a driver is properly trained pursuant to § 172.704 of this title.

(iii) A restricted CDL document issued pursuant to this paragraph shall have a statement clearly imprinted on the face of the document that is substantially similar as follows: "For use as a CDL only during the period from June 30 through July 6 for purposes of transporting less than 227 kilograms (500 pounds) of fireworks classified as DOT Class 1.3G explosives in a vehicle with a GVWR of less than 4,537 kilograms (10,001 pounds).

(3) A restricted CDL issued pursuant to this paragraph shall meet all the requirements of this part, except those specifically identified. A restricted CDL issued pursuant to this paragraph shall be accorded the same reciprocity as a CDL meeting all of the requirements of this part. The restrictions imposed upon the issuance of this restricted CDL shall not limit a person's use of the CDL in a non-CMV during either validated or non-validated periods, nor shall the CDL affect a State's power to administer its driver licensing

program for operators of vehicles other than CMVs.

(4) Restricted CDLs shall have the same renewal cycle as unrestricted CDLs, but shall be limited to the seasonal period of June 30 through July 6 of each year or a lesser period as defined by the State of licensure.

(5) Persons who operate commercial motor vehicles during the period from July 7 through June 29 for purposes of transporting less than 227 kilograms (500 pounds) of fireworks classified as DOT Class 1.3G explosives in a vehicle with a GVWR of less than 4,537 kilograms (10,001 pounds) and who also operate such vehicles for the same purposes during the period June 30 through July 6 shall not be issued a restricted CDL pursuant to this paragraph.

[61 FR 9564, Mar. 8, 1996, as amended at 61 FR 14679, Apr. 3, 1996; 62 FR 1296, Jan. 9, 1997; 67 FR 49755, July 31, 2002; 67 FR 61821, Oct. 2, 2002]

§ 383.5 Definitions.

As used in this part:

Administrator means the Federal Motor Carrier Safety Administrator, the chief executive of the Federal Motor Carrier Safety Administration, an agency within the Department of Transportation.

Alcohol or alcoholic beverage means: (a) Beer as defined in 26 U.S.C. 5052(a), of the Internal Revenue Code of 1954, (b) wine of not less than one-half of one per centum of alcohol by volume, or (c) distilled spirits as defined in section 5002(a)(8), of such Code.

Alcohol concentration (AC) means the concentration of alcohol in a person's blood or breath. When expressed as a percentage it means grams of alcohol per 100 milliliters of blood or grams of alcohol per 210 liters of breath.

Alien means any person not a citizen or national of the United States.

Commerce means (a) any trade, traffic or transportation within the jurisdiction of the United States between a place in a State and a place outside of such State, including a place outside of the United States and (b) trade, traffic, and transportation in the United States which affects any trade, traffic, and transportation described in paragraph (a) of this definition.

§ 383.5

49 CFR Ch. III (10–1–04 Edition)

Commercial driver's license (CDL) means a license issued by a State or other jurisdiction, in accordance with the standards contained in 49 CFR part 383, to an individual which authorizes the individual to operate a class of a commercial motor vehicle.

Commercial driver's license information system (CDLIS) means the CDLIS established by FMCSA pursuant to section 12007 of the Commercial Motor Vehicle Safety Act of 1986.

Commercial motor vehicle (CMV) means a motor vehicle or combination of motor vehicles used in commerce to transport passengers or property if the motor vehicle—

(a) Has a gross combination weight rating of 11,794 kilograms or more (26,001 pounds or more) inclusive of a towed unit(s) with a gross vehicle weight rating of more than 4,536 kilograms (10,000 pounds); or

(b) Has a gross vehicle weight rating of 11,794 or more kilograms (26,001 pounds or more); or

(c) Is designed to transport 16 or more passengers, including the driver; or

(d) Is of any size and is used in the transportation of *hazardous materials* as defined in this section.

Controlled substance has the meaning such term has under 21 U.S.C. 802(6) and includes all substances listed on schedules I through V of 21 CFR 1308 (§§ 1308.11 through 1308.15), as they may be amended by the United States Department of Justice.

Conviction means an unvacated adjudication of guilt, or a determination that a person has violated or failed to comply with the law in a court of original jurisdiction or by an authorized administrative tribunal, an unvacated forfeiture of bail or collateral deposited to secure the person's appearance in court, a plea of guilty or nolo contendere accepted by the court, the payment of a fine or court cost, or violation of a condition of release without bail, regardless of whether or not the penalty is rebated, suspended, or probated."

Disqualification means any of the following three actions:

(a) The suspension, revocation, or cancellation of a CDL by the State or jurisdiction of issuance.

(b) Any withdrawal of a person's privileges to drive a CMV by a State or other jurisdiction as the result of a violation of State or local law relating to motor vehicle traffic control (other than parking, vehicle weight or vehicle defect violations).

(c) A determination by the FMCSA that a person is not qualified to operate a commercial motor vehicle under part 391 of this chapter.

Driver applicant means an individual who applies to a State to obtain, transfer, upgrade, or renew a CDL.

Driver's license means a license issued by a State or other jurisdiction, to an individual which authorizes the individual to operate a motor vehicle on the highways.

Driving a commercial motor vehicle while under the influence of alcohol means committing any one or more of the following acts in a CMV—

(a) Driving a CMV while the person's alcohol concentration is 0.04 or more;

(b) Driving under the influence of alcohol, as prescribed by State law; or

(c) Refusal to undergo such testing as is required by any State or jurisdiction in the enforcement of § 383.51(b) or § 392.5(a)(2) of this subchapter.

Eligible unit of local government means a city, town, borough, county, parish, district, or other public body created by or pursuant to State law which has a total population of 3,000 individuals or less.

Employee means any operator of a commercial motor vehicle, including full time, regularly employed drivers; casual, intermittent or occasional drivers; leased drivers and independent, owner-operator contractors (while in the course of operating a commercial motor vehicle) who are either directly employed by or under lease to an employer.

Employer means any person (including the United States, a State, District of Columbia or a political subdivision of a State) who owns or leases a commercial motor vehicle or assigns employees to operate such a vehicle.

Endorsement means an authorization to an individual's CDL required to permit the individual to operate certain types of commercial motor vehicles.

Fatality means the death of a person as a result of a motor vehicle accident.

Felony means an offense under State or Federal law that is punishable by death or imprisonment for a term exceeding 1 year.

Foreign means outside the fifty United States and the District of Columbia.

Gross combination weight rating (GCWR) means the value specified by the manufacturer as the loaded weight of a combination (articulated) vehicle. In the absence of a value specified by the manufacturer, GCWR will be determined by adding the GVWR of the power unit and the total weight of the towed unit and any load thereon.

Gross vehicle weight rating (GVWR) means the value specified by the manufacturer as the loaded weight of a single vehicle.

Hazardous materials means any material that has been designated as hazardous under 49 U.S.C. 5103 and is required to be placarded under subpart F of 49 CFR part 172 or any quantity of a material listed as a select agent or toxin in 42 CFR part 73.

Imminent hazard means the existence of a condition that presents a substantial likelihood that death, serious illness, severe personal injury, or a substantial endangerment to health, property, or the environment may occur before the reasonably foreseeable completion date of a formal proceeding begun to lessen the risk of that death, illness, injury or endangerment.

Motor vehicle means a vehicle, machine, tractor, trailer, or semitrailer propelled or drawn by mechanical power used on highways, except that such term does not include a vehicle, machine, tractor, trailer, semitrailer operated exclusively on a rail.

Nonresident CDL means a CDL issued by a State under either of the following two conditions:

(a) To an individual domiciled in a foreign country meeting the requirements of § 383.23(b)(1).

(b) To an individual domiciled in another State meeting the requirements of § 383.23(b)(2).

Non-CMV means a motor vehicle or combination of motor vehicles not defined by the term "commercial motor vehicle (CMV)" in this section.

Out-of-service order means a declaration by an authorized enforcement offi-

cer of a Federal, State, Canadian, Mexican, or local jurisdiction that a driver, a commercial motor vehicle, or a motor carrier operation, is out-of-service pursuant to §§ 386.72, 392.5, 395.13, 396.9, or compatible laws, or the North American Uniform Out-of-Service Criteria.

Representative vehicle means a motor vehicle which represents the type of motor vehicle that a driver applicant operates or expects to operate.

School bus means a CMV used to transport pre-primary, primary, or secondary school students from home to school, from school to home, or to and from school-sponsored events. School bus does not include a bus used as a common carrier.

Serious traffic violation means conviction of any of the following offenses when operating a CMV, except weight, defect and parking violations:

(a) Excessive speeding, involving any single offense for any speed of 15 miles per hour or more above the posted speed limit;

(b) Reckless driving, as defined by State or local law or regulation, including but not limited to offenses of driving a CMV in willful or wanton disregard for the safety of persons or property;

(c) Improper or erratic traffic lane changes;

(d) Following the vehicle ahead too closely;

(e) A violation, arising in connection with a fatal accident, of State or local law relating to motor vehicle traffic control;

(f) Driving a CMV without obtaining a CDL;

(g) Driving a CMV without a CDL in the driver's possession. Any individual who provides proof to the enforcement authority that issued the citation, by the date the individual must appear in court or pay any fine for such a violation, that the individual held a valid CDL on the date the citation was issued, shall not be guilty of this offense; or

(h) Driving a CMV without the proper class of CDL and/or endorsements for the specific vehicle group being operated or for the passengers or type of cargo being transported.

§ 383.7

State means a State of the United States and the District of Columbia.

State of domicile means that State where a person has his/her true, fixed, and permanent home and principal residence and to which he/she has the intention of returning whenever he/she is absent.

Tank vehicle means any commercial motor vehicle that is designed to transport any liquid or gaseous materials within a tank that is either permanently or temporarily attached to the vehicle or the chassis. Such vehicles include, but are not limited to, cargo tanks and portable tanks, as defined in part 171 of this title. However, this definition does not include portable tanks having a rated capacity under 1,000 gallons.

United States the term United States means the 50 States and the District of Columbia.

Vehicle means a motor vehicle unless otherwise specified.

Vehicle group means a class or type of vehicle with certain operating characteristics.

[52 FR 20587, June 1, 1987, as amended at 53 FR 27648, July 21, 1988; 53 FR 39050, Oct. 4, 1988; 54 FR 40787, Oct. 3, 1989; 59 FR 26028, May 18, 1994; 61 FR 9566, Mar. 8, 1996; 61 FR 14679, Apr. 3, 1996; 62 FR 37151, July 11, 1997; 67 FR 49756, July 31, 2002; 68 FR 23849, May 5, 2003]

§ 383.7 Validity of CDL issued by decertified State.

A CDL issued by a State prior to the date the State is notified by the Administrator, in accordance with the provisions of § 384.405 of this subchapter, that the State is prohibited from issuing CDLs, will remain valid until its stated expiration date.

[67 FR 49756, July 31, 2002]

Subpart B—Single License Requirement

§ 383.21 Number of drivers' licenses.

No person who operates a commercial motor vehicle shall at any time have more than one driver's license.

[64 FR 48110, Sept. 2, 1999]

49 CFR Ch. III (10–1–04 Edition)

§ 383.23 Commercial driver's license.

(a) *General rule.* (1) Effective April 1, 1992, no person shall operate a commercial motor vehicle unless such person has taken and passed written and driving tests which meet the Federal standards contained in subparts F, G, and H of this part for the commercial motor vehicle that person operates or expects to operate.

(2) Except as provided in paragraph (b) of this section, no person may legally operate a CMV unless such person possesses a CDL which meets the standards contained in subpart J of this part, issued by his/her State or jurisdiction of domicile.

(b) *Exception.* (1) If a CMV operator is not domiciled in a foreign jurisdiction which the Administrator has determined tests drivers and issues CDLs in accordance with, or under standards similar to, the standards contained in subparts F, G, and H of this part, the person may obtain a Nonresident CDL from a State which does comply with the testing and licensing standards contained in such subparts F, G, and H of this part.¹

(2) If an individual is domiciled in a State while that State is prohibited from issuing CDLs in accordance with § 384.405 of this subchapter, that individual is eligible to obtain a Nonresident CDL from any State that elects to issue a Nonresident CDL and which complies with the testing and licensing standards contained in subparts F, G, and H of this part.

(c) *Learner's permit.* State learners' permits, issued for limited time periods

¹Effective December 29, 1988, the Administrator determined that commercial drivers' licensees issued by Canadian Provinces and Territories in conformity with the Canadian National Safety Code are in accordance with the standards of this part. Effective November 21, 1991, the Administrator determined that the new *Licencias Federales de Conductor* issued by the United Mexican States are in accordance with the standards of this part. Therefore, under the single license provision of § 383.21, a driver holding a commercial driver's license issued under the Canadian National Safety Code or a new *Licencia Federal de Conductor* issued by Mexico is prohibited from obtaining nonresident CDL, or any other type of driver's license, from a State or other jurisdiction in the United States.

according to State requirements, shall be considered valid commercial drivers' licenses for purposes of behind-the-wheel training on public roads or highways, if the following minimum conditions are met:

(1) The learner's permit holder is at all times accompanied by the holder of a valid CDL;

(2) He/she either holds a valid automobile driver's license, or has passed such vision, sign/symbol, and knowledge tests as the State issuing the learner's permit ordinarily administers to applicants for automotive drivers' licenses; and

(3) He/she does not operate a commercial motor vehicle transporting hazardous materials as defined in § 383.5.

[53 FR 27649, July 21, 1988, as amended at 54 FR 22285, May 23, 1989; 57 FR 31457, July 16, 1992; 67 FR 49756, July 31, 2002; 68 FR 23849, May 5, 2003]

Subpart C—Notification Requirements and Employer Responsibilities

§ 383.31 Notification of convictions for driver violations.

(a) Each person who operates a commercial motor vehicle, who has a commercial driver's license issued by a State or jurisdiction, and who is convicted of violating, in any type of motor vehicle, a State or local law relating to motor vehicle traffic control (other than a parking violation) in a State or jurisdiction other than the one which issued his/her license, shall notify an official designated by the State or jurisdiction which issued such license, of such conviction. The notification must be made within 30 days after the date that the person has been convicted.

(b) Each person who operates a commercial motor vehicle, who has a commercial driver's license issued by a State or jurisdiction, and who is convicted of violating, in any type of motor vehicle, a State or local law relating to motor vehicle traffic control (other than a parking violation), shall notify his/her current employer of such conviction. The notification must be made within 30 days after the date that the person has been convicted. If the driver is not currently employed, he/

she must notify the State or jurisdiction which issued the license according to § 383.31(a).

(c) *Notification.* The notification to the State official and employer must be made in writing and contain the following information:

(1) Driver's full name;

(2) Driver's license number;

(3) Date of conviction;

(4) The specific criminal or other offense(s), serious traffic violation(s), and other violation(s) of State or local law relating to motor vehicle traffic control, for which the person was convicted and any suspension, revocation, or cancellation of certain driving privileges which resulted from such conviction(s);

(5) Indication whether the violation was in a commercial motor vehicle;

(6) Location of offense; and

(7) Driver's signature.

[52 FR 20587, June 1, 1987, as amended at 54 FR 40787, Oct. 3, 1989]

§ 383.33 Notification of driver's license suspensions.

Each employee who has a driver's license suspended, revoked, or canceled by a State or jurisdiction, who loses the right to operate a commercial motor vehicle in a State or jurisdiction for any period, or who is disqualified from operating a commercial motor vehicle for any period, shall notify his/her current employer of such suspension, revocation, cancellation, lost privilege, or disqualification. The notification must be made before the end of the business day following the day the employee received notice of the suspension, revocation, cancellation, lost privilege, or disqualification.

[54 FR 40788, Oct. 3, 1989]

§ 383.35 Notification of previous employment.

(a) Any person applying for employment as an operator of a commercial motor vehicle shall provide at the time of application for employment, the information specified in paragraph (c) of this section.

(b) All employers shall request the information specified in paragraph (c) of this section from all persons applying for employment as a commercial motor vehicle operator. The request

§ 383.37

shall be made at the time of application for employment.

(c) The following employment history information for the 10 years preceding the date the application is submitted shall be presented to the prospective employer by the applicant:

(1) A list of the names and addresses of the applicant's previous employers for which the applicant was an operator of a commercial motor vehicle;

(2) The dates the applicant was employed by these employers; and

(3) The reason for leaving such employment.

(d) The applicant shall certify that all information furnished is true and complete.

(e) An employer may require an applicant to provide additional information.

(f) Before an application is submitted, the employer shall inform the applicant that the information he/she provides in accordance with paragraph (c) of this section may be used, and the applicant's previous employers may be contacted for the purpose of investigating the applicant's work history.

§ 383.37 Employer responsibilities.

No employer may knowingly allow, require, permit, or authorize a driver to operate a CMV in the United States:

(a) During any period in which the driver has a CMV driver's license suspended, revoked, or canceled by a State, has lost the right to operate a CMV in a State, or has been disqualified from operating a CMV;

(b) During any period in which the driver has more than one CMV driver's license;

(c) During any period in which the driver, or the CMV he or she is driving, or the motor carrier operation, is subject to an out-of-service order; or

(d) In violation of a Federal, State, or local law or regulation pertaining to railroad-highway grade crossings.

[64 FR 48110, Sept. 2, 1999]

49 CFR Ch. III (10–1–04 Edition)

Subpart D—Driver Disqualifications and Penalties

§ 383.51 Disqualification of drivers.

(a) *General.* (1) A driver or holder of a CDL who is disqualified must not drive a CMV.

(2) An employer must not knowingly allow, require, permit, or authorize a driver who is disqualified to drive a CMV.

(3) A driver is subject to disqualification sanctions designated in paragraphs (b) and (c) of this section, if the holder of a CDL drives a CMV or non-CMV and is convicted of the violations.

(4) Determining first and subsequent violations. For purposes of determining first and subsequent violations of the offenses specified in this subpart, each conviction for any offense listed in Tables 1 through 4 to this section resulting from a separate incident, whether committed in a CMV or non-CMV, must be counted.

(5) Reinstatement after lifetime disqualification. A State may reinstate any driver disqualified for life for offenses described in paragraphs (b)(1) through (b)(8) of this section (Table 1 to § 383.51) after 10 years if that person has voluntarily entered and successfully completed an appropriate rehabilitation program approved by the State. Any person who has been reinstated in accordance with this provision and who is subsequently convicted of a disqualifying offense described in paragraphs (b)(1) through (b)(8) of this section (Table 1 to § 383.51) must not be reinstated.

(b) *Disqualification for major offenses.* Table 1 to § 383.51 contains a list of the offenses and periods for which a driver must be disqualified, depending upon the type of vehicle the driver is operating at the time of the violation, as follows:

TABLE 1 TO § 383.51

If a driver operates a motor vehicle and is convicted of:					
	For a first conviction or refusal to be tested while operating a CMV, a person required to have a CDL and a CDL holder must be disqualified from operating a CMV for . . .	For a first conviction or refusal to be tested while operating a non-CMV, a CDL holder must be disqualified from operating a CMV for . . .	For a first conviction or refusal to be tested while operating a CMV transporting hazardous materials required to be placarded under the Hazardous Materials Regulations (49 CFR part 172, subpart F), a person required to have a CDL and CDL holder must be disqualified from operating a CMV for . . .	For a second conviction or refusal to be tested in a separate incident of any combination of offenses in this Table while operating a CMV, a person required to have a CDL and a CDL holder must be disqualified from operating a CMV for . . .	For a second conviction or refusal to be tested in a separate incident of any combination of offenses in this Table while operating a non-CMV, a CDL holder must be disqualified from operating a CMV for . . .
(1) Being under the influence of alcohol as prescribed by State law * * *.	1 year	1 year	3 years	Life	Life.
(2) Being under the influence of a controlled substance * * *.	1 year	1 year	3 years	Life	Life.
(3) Having an alcohol concentration of 0.04 or greater while operating a CMV * * *.	1 year	Not applicable ...	3 years	Life	Not applicable.
(4) Refusing to take an alcohol test as required by a State or jurisdiction under its implied consent laws or regulations as defined in § 383.72 of this part * * *.	1 year	1 year	3 years	Life	Life.
(5) Leaving the scene of an accident * * *.	1 year	1 year	3 years	Life	Life.
(6) Using the vehicle to commit a felony, other than a felony described in paragraph (b)(9) of this table * * *.	1 year	1 year	3 years	Life	Life.
(7) Driving a CMV when, as a result of prior violations committed operating a CMV, the driver's CDL is revoked, suspended, or canceled, or the driver is disqualified from operating a CMV.	1 year	Not applicable ...	3 years	Life	Not applicable.
(8) Causing a fatality through the negligent operation of a CMV, including but not limited to the crimes of motor vehicle manslaughter, homicide by motor vehicle and negligent homicide.	1 year	Not applicable ...	3 years	Life	Not applicable.
(9) Using the vehicle in the commission of a felony involving manufacturing, distributing, or dispensing a controlled substance * * *.	Life-not eligible for 10-year reinstatement.	Life-not eligible for 10-year reinstatement.	Life-not eligible for 10-year reinstatement.	Life-not eligible for 10-year reinstatement.	Life-not eligible for 10-year reinstatement

(c) *Disqualification for serious traffic violations.* Table 2 to § 383.51 contains a list of the offenses and the periods for which a driver must be disqualified, de-

pending upon the type of vehicle the driver is operating at the time of the violation, as follows:

TABLE 2 TO § 383.51

If the driver operates a motor vehicle and is convicted of:	For a second conviction of any combination of offenses in this Table in a separate incident within a 3-year period while operating a CMV, a person required to have a CDL and a CDL holder must be disqualified from operating a CMV for . . .	For a second conviction of any combination of offenses in this Table in a separate incident within a 3-year period while operating a non-CMV, a CDL holder must be disqualified from operating a CMV, if the conviction results in the revocation, cancellation, or suspension of the CDL holder's license or non-CMV driving privileges, for . . .	For a third or subsequent conviction of any combination of offenses in this Table in a separate incident within a 3-year period while operating a CMV, a person required to have a CDL and a CDL holder must be disqualified from operating a CMV for . . .	For a third or subsequent conviction of any combination of offenses in this Table in a separate incident within a 3-year period while operating a non-CMV, a CDL holder must be disqualified from operating a CMV, if the conviction results in the revocation, cancellation, or suspension of the CDL holder's license or non-CMV driving privileges, for . . .
(1) Speeding excessively, involving any speed of 24.1 kmph (15 mph) or more above the posted speed limit.	60 days	60 days	120 days	120 days.
(2) driving recklessly, as defined by State or local law or regulation, including but, not limited to, offenses of driving a motor vehicle in willful or wanton disregard for the safety of persons or property.	60 days	60 days	120 days	120 days.
(3) making improper or erratic traffic lane changes.	60 days	60 days	120 days	120 days.
(4) following the vehicle ahead too closely.	60 days	60 days	120 days	120 days.
(5) Violating State or local law relating to motor vehicle traffic control (other than a parking violation) arising in connection with a fatal accident.	60 days	60 days	120 days	120 days.
(6) driving a CMV without obtaining a CDL.	60 days	Not applicable	120 days	Not applicable.
(7) driving a CMV without a CDL in the driver's possession ¹ .	60 days	Not applicable	120 days	Not applicable.
(8) driving a CMV without the proper class of CDL and/or endorsements for the specific vehicle group being operated or for the passengers or type of cargo being transported.	60 days	Not applicable	120 days	Not applicable.

¹Any individual who provides proof to the enforcement authority that issued the citation, by the date the individual must appear in court or pay any fine for such a violation, that the individual held a valid CDL on the date the citation was issued, shall not be guilty of this offense.

(d) *Disqualification for railroad-highway grade crossing offenses.* Table 3 to § 383.51 contains a list of the offenses and the periods for which a driver must

be disqualified, when the driver is operating a CMV at the time of the violation, as follows:

Federal Motor Carrier Safety Administration, DOT

§ 383.51

TABLE 3 TO § 383.51

If the driver is convicted of operating a CMV in violation of a Federal, State or local law because . . .	For a first conviction a person required to have a CDL and a CDL holder must be disqualified from operating a CMV for . . .	For a second conviction of any combination of offenses in this Table in a separate incident within a 3-year period, a person required to have a CDL and a CDL holder must be disqualified from operating a CMV for . . .	For a third or subsequent conviction of any combination of offenses in this Table in a separate incident within a 3-year period, a person required to have a CDL and a CDL holder must be disqualified from operating a CMV for . . .
(1) The driver is not required to always stop, but fails to slow down and check that tracks are clear of an approaching train * * *.	No less than 60 days	No less than 120 days	No less than 1 year.
(2) The driver is not required to always stop, but fails to stop before reaching the crossing, if the tracks are not clear * * *.	No less than 60 days	No less than 120 days	No less than 1 year.
(3) The driver is always required to stop, but fails to stop before driving onto the crossing * * *.	No less than 60 days	No less than 120 days	No less than 1 year.
(4) The driver fails to have sufficient space to drive completely through the crossing without stopping * * *.	No less than 60 days	No less than 120 days	No less than 1 year.
(5) The driver fails to obey a traffic control device or the directions of an enforcement official at the crossing * * *.	No less than 60 days	No less than 120 days	No less than 1 year.
(6) The driver fails to negotiate a crossing because of insufficient undercarriage clearance * * *.	No less than 60 days	No less than 120 days	No less than 1 year.

(e) *Disqualification for violating out-of-service orders.* Table 4 to §383.51 contains a list of the offenses and periods for which a driver must be disqualified when the driver is operating a CMV at the time of the violation, as follows:

TABLE 4 TO § 383.51

If the driver operates a CMV and is convicted of . . .	For a first conviction while operating a CMV, a person required to have a CDL and a CDL holder must be disqualified from operating a CMV for . . .	For a second conviction in a separate incident within a 10-year period while operating a CMV, a person required to have a CDL and a CDL holder must be disqualified from operating a CMV for . . .	For a third or subsequent conviction in a separate incident within a 10-year period while operating a CMV, a person required to have a CDL and a CDL holder must be disqualified from operating a CMV for . . .
(1) Violating a driver or vehicle out-of-service order while transporting nonhazardous materials . . .	No less than 90 days or more than 1 year.	No less than 1 year or more than 5 years.	No less than 3 years or more than 5 years.
(2) Violating a driver or vehicle out-of-service order while transporting hazardous materials required to be placarded under part 172, subpart F of this title, or while operating a vehicle designed to transport 16 or more passengers, including the driver . . .	No less than 180 days or more than 2 years.	No less than 3 years or more than 5 years.	No less than 3 years or more than 5 years.

[67 FR 49756, July 31, 2002, as amended at 68 FR 4396, Jan. 29, 2003]

§ 383.52

49 CFR Ch. III (10–1–04 Edition)

§ 383.52 Disqualification of drivers determined to constitute an imminent hazard.

(a) The Assistant Administrator or his/her designee must disqualify from operating a CMV any driver whose driving is determined to constitute an imminent hazard, as defined in § 383.5.

(b) The period of the disqualification may not exceed 30 days unless the FMCSA complies with the provisions of paragraph (c) of this section.

(c) The Assistant Administrator or his/her delegate may provide the driver an opportunity for a hearing after issuing a disqualification for a period of 30 days or less. The Assistant Administrator or his/her delegate must provide the driver notice of a proposed disqualification period of more than 30 days and an opportunity for a hearing to present a defense to the proposed disqualification. A disqualification imposed under this paragraph may not exceed one year in duration. The driver, or a representative on his/her behalf, may file an appeal of the disqualification issued by the Assistant Administrator's delegate with the Assistant Administrator, Adjudications Counsel, Federal Motor Carrier Safety Administration (Room 8217), 400 Seventh Street, SW., Washington, DC 20590.

(d) Any disqualification imposed in accordance with the provisions of this section must be transmitted by the FMCSA to the jurisdiction where the driver is licensed and must become a part of the driver's record maintained by that jurisdiction.

(e) A driver who is simultaneously disqualified under this section and under other provisions of this subpart, or under State law or regulation, shall serve those disqualification periods concurrently.

[67 FR 49759, July 31, 2002]

§ 383.53 Penalties.

(a) *General rule.* Any person who violates the rules set forth in subparts B and C of this part may be subject to civil or criminal penalties as provided for in 49 U.S.C. 521(b).

(b) *Special penalties pertaining to violation of out-of-service orders—*

(b) *Special penalties pertaining to violation of out-of-service orders—(1) Driver*

violations. A driver who is convicted of violating an out-of-service order shall be subject to a civil penalty of not less than \$1,100 nor more than \$2,750, in addition to disqualification under § 383.51(e).

(2) *Employer violations.* An employer who is convicted of a violation of § 383.37(c) shall be subject to a civil penalty of not less than \$2,750 nor more than \$11,000.

(c) *Special penalties pertaining to rail-road-highway grade crossing violations.* An employer who is convicted of a violation of § 383.37(d) must be subject to a civil penalty of not more than \$10,000.

[59 FR 26028, May 18, 1994, as amended at 64 FR 48111, Sept. 2, 1999; 67 FR 49759, July 31, 2002]

Subpart E—Testing and Licensing Procedures

SOURCE: 53 FR 27649, July 21, 1988, unless otherwise noted.

§ 383.71 Driver application procedures.

(a) *Initial Commercial Driver's License.* Prior to obtaining a CDL, a person must meet the following requirements:

(1) A person who operates or expects to operate in interstate or foreign commerce, or is otherwise subject to part 391 of this title, shall certify that he/she meets the qualification requirements contained in part 391 of this title. A person who operates or expects to operate entirely in intrastate commerce and is not subject to part 391, is subject to State driver qualification requirements and must certify that he/she is not subject to part 391;

(2) Pass a knowledge test in accordance with the standards contained in subparts G and H of this part for the type of motor vehicle the person operates or expects to operate;

(3) Pass a driving or skills test in accordance with the standards contained in subparts G and H of this part taken in a motor vehicle which is representative of the type of motor vehicle the person operates or expects to operate; or provide evidence that he/she has successfully passed a driving test administered by an authorized third party;

(4) Certify that the motor vehicle in which the person takes the driving

Federal Motor Carrier Safety Administration, DOT

§ 383.71

skills test is representative of the type of motor vehicle that person operates or expects to operate;

(5) Provide to the State of issuance the information required to be included on the CDL as specified in subpart J of this part;

(6) Certify that he/she is not subject to any disqualification under §383.51, or any license suspension, revocation, or cancellation under State law, and that he/she does not have a driver's license from more than one State or jurisdiction;

(7) Surrender the applicant's non-CDL driver's licenses to the State; and

(8) Provide the names of all States where the applicant has previously been licensed to drive any type of motor vehicle during the previous 10 years.

(9) If applying for a hazardous materials endorsement, comply with Transportation Security Administration requirements codified in 49 CFR Part 1572, and provide proof of citizenship or immigration status as specified in Table 1 to this section. A lawful permanent resident of the United States requesting a hazardous materials endorsement must additionally provide his or her Bureau of Citizenship and Immigration Services (BCIS) Alien registration number.

TABLE 1 TO §383.71—LIST OF ACCEPTABLE PROOFS OF CITIZENSHIP OR IMMIGRATION

Status	Proof of status
U.S. Citizen	• U.S. Passport • Certificate of birth that bears an official seal and was issued by a State, county, municipal authority, or outlying possession of the United States • Certification of Birth Abroad issued by the U.S. Department of State (Form FS-545 or DS 1350) • Certificate of Naturalization (Form N-550 or N-570) • Certificate of U.S. Citizenship (Form N-560 or N-561)
Lawful Permanent Resident.	• Permanent Resident Card, Alien Registration Receipt Card (Form I-551) • Temporary I-551 stamp in foreign passport • Temporary I-551 stamp on Form I-94, Arrival/Departure Record, with photograph of the bearer • Reentry Permit (Form I-327)

(b) *License transfer.* When applying to transfer a CDL from one State of domicile

to a new State domicile, an applicant shall apply for a CDL from the new State of domicile within no more than 30 days after establishing his/her new domicile. The applicant shall:

(1) Provide to the new State of domicile the certifications contained in §383.71(a) (1) and (6);

(2) Provide to the new State of domicile updated information as specified in subpart J of this part;

(3) If the applicant wishes to retain a hazardous materials endorsement, he/she must comply with the requirements for such endorsement specified in §383.71(a)(9) and State requirements as specified in §383.73(b)(4);

(4) Surrender the CDL from the old State of domicile to the new State of domicile; and

(5) Provide the names of all States where the applicant has previously been licensed to drive any type of motor vehicle during the previous 10 years.

(c) *License renewal.* When applying for a renewal of a CDL, all applicants shall:

(1) Provide certification contained in §383.71(a)(1);

(2) Provide update information as specified in subpart J of this part; and

(3) If a person wishes to retain a hazardous materials endorsement, he/she must comply with the requirements specified in §383.71(a)(9) and pass the test specified in §383.121 for such endorsement.

(4) Provide the names of all States where the applicant has previously been licensed to drive any type of motor vehicle during the previous 10 years.

(d) *License upgrades.* When applying to operate a commercial motor vehicle in a different group or endorsement from the group or endorsement in which the applicant already has a CDL, all persons shall:

(1) Provide the necessary certifications as specified in §383.71(a)(1) and (a)(4);

(2) Pass all tests specified in §383.71(a)(2) and (a)(3) for the new vehicle group and/or different endorsements; and

§ 383.72

49 CFR Ch. III (10–1–04 Edition)

(3) To obtain a hazardous materials endorsement, comply with the requirements for such endorsement specified in § 383.71(a)(9).

(e) *Nonresident CDL.* When an applicant is domiciled in a foreign jurisdiction, as defined in § 383.5, where the commercial motor vehicle operator testing and licensing standards do not meet the standards contained in subparts G and H of this part, as determined by the Administrator, such applicant shall obtain a Nonresident CDL from a State which meets such standards. Such applicant shall:

(1) Complete the requirements to obtain a CDL contained in § 383.71(a); and

(2) After receipt of the CDL, and for as long as it is valid, notify the State which issued the CDL of any adverse action taken by any jurisdiction or governmental agency, foreign or domestic, against his/her driving privileges. Such adverse actions would include but not be limited to license suspension or revocation, or disqualification from operating a commercial motor vehicle for the convictions described in § 383.51. Notifications shall be made within the time periods specified in § 383.33.

(f) If a State uses the alternative method described in § 383.73(i) to achieve the objectives of the certifications in § 383.71(a), then the driver applicant shall satisfy such alternative methods as are applicable to him/her with respect to initial licensing, license transfer, license renewal, and license upgrades.

[53 FR 27649, July 21, 1988, as amended at 67 FR 49759, July 31, 2002; 68 FR 23849, May 5, 2003]

§ 383.72 Implied consent to alcohol testing.

Any person who holds a CDL is considered to have consented to such testing as is required by any State or jurisdiction in the enforcement of §§ 383.51(b)(2)(i) and 392.5(a)(2) of this chapter. Consent is implied by driving a commercial motor vehicle.

[66 FR 49872, Oct. 1, 2001]

§ 383.73 State procedures.

(a) *Initial licensure.* Prior to issuing a CDL to a person, a State shall:

(1) Require the driver applicant to certify, pass tests, and provide information as described in §§ 383.71(a) (1) through (6);

(2) Check that the vehicle in which the applicant takes his/her test is representative of the vehicle group the applicant has certified that he/she operates or expects to operate;

(3) Initiate and complete a check of the applicant's driving record to ensure that the person is not subject to any disqualification under § 383.51, or any license suspension, revocation, or cancellation under State law, and that the person does not have a driver's license from more than one State or jurisdiction. The record check must include, but is not limited to, the following:

(i) A check of the applicant's driving record as maintained by his/her current State of licensure, if any;

(ii) A check with the CDLIS to determine whether the driver applicant already has been issued a CDL, whether the applicant's license has been suspended, revoked, or canceled, or if the applicant has been disqualified from operating a commercial motor vehicle;

(iii) A check with the National Driver Register (NDR) to determine whether the driver applicant has:

(A) Been disqualified from operating a motor vehicle (other than a commercial motor vehicle);

(B) Had a license (other than CDL) suspended, revoked, or canceled for cause in the 3-year period ending on the date of application; or

(C) Been convicted of any offenses contained in section 205(a)(3) of the National Driver Register Act of 1982 (23 U.S.C. 401 note); and

(iv) A request for the applicant's complete driving record from all States where the applicant was previously licensed over the last 10 years to drive any type of motor vehicle. *Exception:* A State is only required to make the driving record check specified in this paragraph (a)(3) for drivers renewing a CDL for the first time after September 30, 2002, provided a notation is made on the driver's record confirming that the driver record check required by this paragraph (a)(3) has been made and noting the date it was done; and

(4) Require the driver applicant to surrender his/her driver's license issued

by another State, if he/she has moved from another State.

(5) For persons applying for a hazardous materials endorsement, require compliance with the standards for such endorsement specified in § 383.71(a)(9).

(b) *License transfers.* Prior to issuing a CDL to a person who has a CDL from another State, a State shall:

(1) Require the driver applicant to make the certifications contained in § 383.71(a);

(2) Complete a check of the driver applicant's record as contained in § 383.73(a)(3);

(3) Request and receive updates of information specified in subpart J of this part;

(4) If such applicant wishes to retain a hazardous materials endorsement, require compliance with standards for such endorsement specified in § 383.71(a)(9) and ensure that the driver has, within the 2 years preceding the transfer, either:

(i) Passed the test for such endorsement specified in § 383.121; or

(ii) Successfully completed a hazardous materials test or training that is given by a third party and that is deemed by the State to substantially cover the same knowledge base as that described in § 383.121; and

(5) Obtain the CDL issued by the applicant's previous State of domicile.

(c) *License Renewals.* Prior to renewing any CDL a State shall:

(1) Require the driver applicant to make the certifications contained in § 383.71(a);

(2) Complete a check of the driver applicant's record as contained in § 383.73(a)(3);

(3) Request and receive updates of information specified in subpart J of this part; and

(4) If such applicant wishes to retain a hazardous materials endorsement, require the driver to pass the test specified in § 383.121 and comply with the standards specified in § 383.71(a)(9) for such endorsement.

(d) *License upgrades.* Prior to issuing an upgrade of a CDL, a State shall:

(1) Require such driver applicant to provide certifications, pass tests, and meet applicable hazardous materials standards specified in § 383.71(d); and

(2) Complete a check of the driver applicant's record as described in § 383.73(a)(3).

(e) *Nonresident CDL.* A State may issue a Nonresident CDL to a person domiciled in a foreign country if the Administrator has determined that the commercial motor vehicle testing and licensing standards in the foreign jurisdiction of domicile do not meet the standards contained in this part. State procedures for the issuance of a nonresident CDL, for any modifications thereto, and for notifications to the CDLIS shall at a minimum be identical to those pertaining to any other CDL, with the following exceptions:

(1) If the applicant is requesting a transfer of his/her Nonresident CDL, the State shall obtain the Nonresident CDL currently held by the applicant and issued by another State;

(2) The State shall add the word "Nonresident" to the face of the CDL, in accordance with § 383.153(b); and

(3) The State shall have established, prior to issuing any Nonresident CDL, the practical capability of disqualifying the holder of any Nonresident CDL, by withdrawing, suspending, canceling, and revoking his/her Nonresident CDL as if the Nonresident CDL were a CDL issued to a resident of the State.

(f) *License issuance.* After the State has completed the procedures described in § 383.73 (a), (b), (c), (d) or (e), it may issue a CDL to the driver applicant. The State shall notify the operator of the CDLIS of such issuance, transfer, renewal, or upgrade within the 10-day period beginning on the date of license issuance.

(g) *Penalties for false information.* If a State determines, in its check of an applicant's license status and record prior to issuing a CDL, or at any time after the CDL is issued, that the applicant has falsified information contained in subpart J of this part or any of the certifications required in § 383.71(a), the State shall at a minimum suspend, cancel, or revoke the person's CDL or his/her pending application, or disqualify the person from operating a commercial motor vehicle for a period of at least 60 consecutive days.

§ 383.75

(h) *Reciprocity.* A State shall allow any person who has a valid CDL which is not suspended, revoked, or canceled, and who is not disqualified from operating a commercial motor vehicle, to operate a commercial motor vehicle in the State.

(i) *Alternative procedures.* A State may implement alternative procedures to the certification requirements of § 383.71(a) (1), (4), and (6), provided those procedures ensure that the driver meets the requirements of those paragraphs.

[53 FR 27649, July 21, 1988, as amended at 54 FR 40788, Oct. 3, 1989; 67 FR 49760, July 31, 2002; 68 FR 23850, May 5, 2003]

§ 383.75 Third party testing.

(a) *Third party tests.* A State may authorize a person (including another State, an employer, a private driver training facility or other private institution, or a department, agency or instrumentality of a local government) to administer the skills tests as specified in subparts G and H of this part, if the following conditions are met:

(1) The tests given by the third party are the same as those which would otherwise be given by the State; and

(2) The third party as an agreement with the State containing, at a minimum, provisions that:

(i) Allow the FMCSA, or its representative, and the State to conduct random examinations, inspections and audits without prior notice;

(ii) Require the State to conduct on-site inspections at least annually;

(iii) Require that all third party examiners meet the same qualification and training standards as State examiners, to the extent necessary to conduct skills tests in compliance with subparts G and H;

(iv) Require that, at least on an annual basis, State employees take the tests actually administered by the third party as if the State employee were a test applicant, or that States test a sample of drivers who were examined by the third party to compare pass/fail results; and

(v) Reserve unto the State the right to take prompt and appropriate remedial action against the third-party testers in the event that the third-party fails to comply with State or

49 CFR Ch. III (10–1–04 Edition)

Federal standards for the CDL testing program, or with any other terms of the third-party contract.

(b) *Proof of testing by a third party.* A driver applicant who takes and passes driving tests administered by an authorized third party shall provide evidence to the State licensing agency that he/she has successfully passed the driving tests administered by the third party.

§ 383.77 Substitute for driving skills tests.

At the discretion of a State, the driving skill test as specified in § 383.113 may be waived for a CMV operator who is currently licensed at the time of his/her application for a CDL, and substituted with either an applicant's driving record and previous passage of an acceptable skills test, or an applicant's driving record in combination with certain driving experience. The State shall impose conditions and limitations to restrict the applicants from whom a State may accept alternative requirements for the skills test described in § 383.113. Such conditions must require at least the following:

(a) An applicant must certify that, during the two-year period immediately prior to applying for a CDL, he/she:

(1) Has not had more than one license (except in the instances specified in § 383.21(b));

(2) Has not had any license suspended, revoked, or canceled;

(3) Has not had any convictions for any type of motor vehicle for the disqualifying offenses contained in § 383.51(b);

(4) Has not had more than one conviction for any type of motor vehicle for serious traffic violations; and

(5) Has not had any conviction for a violation of State or local law relating to motor vehicle traffic control (other than a parking violation) arising in connection with any traffic accident, and has no record of an accident in which he/she was at fault; and

(b) An applicant must provide evidence and certify that:

(1) He/she is regularly employed in a job requiring operation of a CMV, and that either:

(2) He/she has previously taken and passed a skills test given by a State with a classified licensing and testing system, and that the test was behind-the-wheel in a representative vehicle for that applicant's driver's license classification; or

(3) He/she has operated, for at least 2 years immediately preceding application for a CDL, a vehicle representative of the commercial motor vehicle the driver applicant operates or expects to operate.

[53 FR 27649, July 21, 1988, as amended at 55 FR 25606, June 22, 1990; 67 FR 49760, July 31, 2002]

Subpart F—Vehicle Groups and Endorsements

SOURCE: 53 FR 27651, July 21, 1988, unless otherwise noted.

§ 383.91 Commercial motor vehicle groups.

(a) Vehicle group descriptions. Each driver applicant must possess and be tested on his/her knowledge and skills, described in subpart G of this part, for the commercial motor vehicle group(s) for which he/she desires a CDL. The commercial motor vehicle groups are as follows:

(1) Combination vehicle (Group A)—Any combination of vehicles with a gross combination weight rating (GCWR) of 11,794 kilograms or more (26,001 pounds or more) provided the GVWR of the vehicle(s) being towed is in excess of 4,536 kilograms (10,000 pounds).

(2) Heavy Straight Vehicle (Group B)—Any single vehicle with a GVWR of 11,794 kilograms or more (26,001 pounds or more), or any such vehicle towing a vehicle not in excess of 4,536 kilograms (10,000 pounds) GVWR.

(3) Small Vehicle (Group C)—Any single vehicle, or combination of vehicles, that meets neither the definition of Group A nor that of Group B as contained in this section, but that either is designed to transport 16 or more passengers including the driver, or is used in the transportation of materials found to be hazardous for the purposes of the Hazardous Materials Transportation Act and which require the motor vehicle to be placarded under the Hazardous Materials Regulations (49 CFR part 172, subpart F).

(b) *Representative vehicle.* For purposes of taking the driving test in accordance with § 383.113, a representative vehicle for a given vehicle group contained in § 383.91(a), is any commercial motor vehicle which meets the definition of that vehicle group.

(c) *Relation between vehicle groups.* Each driver applicant who desires to operate in a different commercial motor vehicle group from the one which his/her CDL authorizes shall be required to retake and pass all related tests, except the following:

(1) A driver who has passed the knowledge and skills tests for a combination vehicle (Group A) may operate a heavy straight vehicle (Group B) or a small vehicle (Group C), provided that he/she possesses the requisite endorsement(s); and

(2) A driver who has passed the knowledge and skills tests for a heavy straight vehicle (Group B) may operate any small vehicle (Group C), provided that he/she possesses the requisite endorsement(s).

(d) *Vehicle group illustration.* Figure 1 illustrates typical vehicles within each of the vehicle groups defined in this section.

Figure 1
VEHICLE GROUPS AS ESTABLISHED BY FHWA (SECTION 383.91)

[Note: Certain types of vehicles, such as passenger and doubles/triples, will require an endorsement. Please consult text for particulars.]

Group:	*Description:
A	Any combination of vehicles with a GCWR of 26,001 or more pounds provided the GVWR of the vehicle(s) being towed is in excess of 10,000 pounds. (Holders of a Group A license may, with any appropriate endorsements, operate all vehicles within Groups B and C.) Examples include but are not limited to: 
B	Any single vehicle with a GVWR of 26,001 or more pounds, or any such vehicle towing a vehicle not in excess of 10,000 pounds GVWR. (Holders of a Group B license may, with any appropriate endorsements, operate all vehicles within Group C.) Examples include but are not limited to: 
C	Any single vehicle, or combination of vehicles, that does not meet the definition of Group A or Group B as contained herein, but that either is designed to transport 16 or more passengers including the driver, or is placarded for hazardous materials. Examples include but are not limited to: 

* The representative vehicle for the skills test must meet the written description for that group. The silhouettes typify, but do not fully cover, the types of vehicles falling within each group.

[53 FR 27651, July 21, 1988, as amended at 54 FR 47989, Nov. 20, 1989; 61 FR 9566, Mar. 8, 1996]

§ 383.93 Endorsements.

(a) *General.* In addition to taking and passing the knowledge and skills tests described in subpart G of this part, all persons who operate or expect to operate the type(s) of motor vehicles described in paragraph (b) of this section shall take and pass specialized tests to obtain each endorsement. The State shall issue CDL endorsements only to drivers who successfully complete the tests.

(b) *Endorsement descriptions.* An operator must obtain State-issued endorsements to his/her CDL to operate commercial motor vehicles which are:

- (1) Double/triple trailers;
- (2) Passenger vehicles;
- (3) Tank vehicles;
- (4) Used to transport hazardous materials as defined in § 383.5, or
- (5) School buses.

(c) *Endorsement testing requirements.* The following tests are required for the endorsements contained in paragraph (b) of this section:

- (1) *Double/Triple Trailers*—a knowledge test;
- (2) *Passenger*—a knowledge and a skills test;
- (3) *Tank vehicle*—a knowledge test;
- (4) *Hazardous Materials*—a knowledge test; and
- (5) *School bus*—a knowledge and a skills test.

[53 FR 27651, July 21, 1988, as amended at 67 FR 49760, July 31, 2002; 68 FR 23850, May 5, 2003]

§ 383.95 Air brake restrictions.

(a) If an applicant either fails the air brake component of the knowledge test, or performs the skills test in a vehicle not equipped with air brakes, the State shall indicate on the CDL, if issued, that the person is restricted from operating a CMV equipped with air brakes.

(b) For the purposes of the skills test and the restriction, air brakes shall include any braking system operating fully or partially on the air brake principle.

Subpart G—Required Knowledge and Skills

SOURCE: 53 FR 27654, July 21, 1988, unless otherwise noted.

§ 383.110 General requirement.

All drivers of commercial motor vehicles shall have knowledge and skills necessary to operate a commercial motor vehicle safely as contained in this subpart. A sample of the specific types of items which a State may wish to include in the knowledge and skills tests that it administers to CDL applicants is included in the appendix to this subpart G.

§ 383.111 Required knowledge.

All commercial motor vehicle operators must have knowledge of the following general areas:

(a) *Safe operations regulations.* Driver-related elements of the regulations contained in 49 CFR parts 382, 391, 392, 393, 395, 396, and 397, such as: Motor vehicle inspection, repair, and maintenance requirements; procedures for safe vehicle operations; the effects of fatigue, poor vision, hearing, and general health upon safe commercial motor vehicle operation; the types of motor vehicles and cargoes subject to the requirements; and the effects of alcohol and drug use upon safe commercial motor vehicle operations.

(b) *Commercial motor vehicle safety control systems.* Proper use of the motor vehicle's safety system, including lights, horns, side and rear-view mirrors, proper mirror adjustments, fire extinguishers, symptoms of improper operation revealed through instruments, motor vehicle operation characteristics, and diagnosing malfunctions. Commercial motor vehicle drivers shall have knowledge on the correct procedures needed to use these safety systems in an emergency situation, e.g., skids and loss of brakes.

(c) *Safe vehicle control*—(1) *Control systems.* The purpose and function of the controls and instruments commonly found on commercial motor vehicles.

(2) *Basic control.* The proper procedures for performing various basic maneuvers.

§ 383.113

49 CFR Ch. III (10–1–04 Edition)

(3) *Shifting*. The basic shifting rules and terms, as well as shift patterns and procedures for common transmissions.

(4) *Backing*. The procedures and rules for various backing maneuvers.

(5) *Visual search*. The importance of proper visual search, and proper visual search methods.

(6) *Communication*. The principles and procedures for proper communications and the hazards of failure to signal properly.

(7) *Speed management*. The importance of understanding the effects of speed.

(8) *Space management*. The procedures and techniques for controlling the space around the vehicle.

(9) *Night operation*. Preparations and procedures for night driving.

(10) *Extreme driving conditions*. The basic information on operating in extreme driving conditions and the hazards that are encountered in extreme conditions.

(11) *Hazard perceptions*. The basic information on hazard perception and clues for recognition of hazards.

(12) *Emergency maneuvers*. The basic information concerning when and how to make emergency maneuvers.

(13) *Skid control and recovery*. The information on the causes and major types of skids, as well as the procedures for recovering from skids.

(d) *Relationship of cargo to vehicle control*. The principles and procedures for the proper handling of cargo.

(e) *Vehicle inspections*: The objectives and proper procedures for performing vehicle safety inspections, as follows:

(1) The importance of periodic inspection and repair to vehicle safety.

(2) The effect of undiscovered malfunctions upon safety.

(3) What safety-related parts to look for when inspecting vehicles.

(4) Pre-trip/enroute/post-trip inspection procedures.

(5) Reporting findings.

(f) *Hazardous materials knowledge*, such as: What constitutes hazardous material requiring an endorsement to transport; classes of hazardous materials; labeling/placarding requirements; and the need for specialized training as a prerequisite to receiving the endorsement and transporting hazardous cargoes.

(g) *Air brake knowledge as follows*:

(1) Air brake system nomenclature;

(2) The dangers of contaminated air supply;

(3) Implications of severed or disconnected air lines between the power unit and the trailer(s);

(4) Implications of low air pressure readings;

(5) Procedures to conduct safe and accurate pre-trip inspections.

(6) Procedures for conducting enroute and post-trip inspections of air actuated brake systems, including ability to detect defects which may cause the system to fail.

(h) *Operators for the combination vehicle group shall also have knowledge of*:

(1) Coupling and uncoupling—The procedures for proper coupling and uncoupling a tractor to semi-trailer.

(2) Vehicle inspection—The objectives and proper procedures that are *unique* for performing vehicle safety inspections on combination vehicles.

[53 FR 27654, July 21, 1988, as amended at 62 FR 37151, July 11, 1997]

§ 383.113 Required skills.

(a) *Basic vehicle control skills*. All applicants for a CDL must possess and demonstrate basic motor vehicle control skills for each vehicle group which the driver operates or expects to operate. These skills should include the ability to start, to stop, and to move the vehicle forward and backward in a safe manner.

(b) *Safe driving skills*. All applicants for a CDL must possess and demonstrate the safe driving skills for their vehicle group. These skills should include proper visual search methods, appropriate use of signals, speed control for weather and traffic conditions, and ability to position the motor vehicle correctly when changing lanes or turning.

(c) *Air brake skills*. Except as provided in § 393.95, all applicants shall demonstrate the following skills with respect to inspection and operation of air brakes:

(1) *Pre-trip inspection skills*. Applicants shall demonstrate the skills necessary to conduct a pre-trip inspection which includes the ability to:

(i) Locate and verbally identify air brake operating controls and monitoring devices;

(ii) Determine the motor vehicle's brake system condition for proper adjustments and that air system connections between motor vehicles have been properly made and secured;

(iii) Inspect the low pressure warning device(s) to ensure that they will activate in emergency situations;

(iv) Ascertain, with the engine running, that the system maintains an adequate supply of compressed air;

(v) Determine that required minimum air pressure build up time is within acceptable limits and that required alarms and emergency devices automatically deactivate at the proper pressure level; and

(vi) Operationally check the brake system for proper performance.

(2) *Driving skills.* Applicants shall successfully complete the skills tests contained in § 383.113 in a representative vehicle equipped with air brakes.

(d) *Test area.* Skills tests shall be conducted in on-street conditions or under a combination of on-street and off-street conditions.

(e) *Simulation technology.* A State may utilize simulators to perform skills testing, but under no circumstances as a substitute for the required testing in on-street conditions.

§ 383.115 Requirements for double/triple trailers endorsement.

In order to obtain a Double/Triple Trailers endorsement each applicant must have knowledge covering:

(a) Procedures for assembly and hookup of the units;

(b) Proper placement of heaviest trailer;

(c) Handling and stability characteristics including off-tracking, response to steering, sensory feedback, braking, oscillatory sway, rollover in steady turns, yaw stability in steady turns; and

(d) Potential problems in traffic operations, including problems the motor vehicle creates for other motorists due to slower speeds on steep grades, longer passing times, possibility for blocking entry of other motor vehicles on free-ways, splash and spray impacts, aero-

dynamic buffeting, view blockages, and lateral placement.

§ 383.117 Requirements for passenger endorsement.

An applicant for the passenger endorsement must satisfy both of the following additional knowledge and skills test requirements.

(a) *Knowledge test.* All applicants for the passenger endorsement must have knowledge covering at least the following topics:

(1) Proper procedures for loading/unloading passengers;

(2) Proper use of emergency exits, including push-out windows;

(3) Proper responses to such emergency situations as fires and unruly passengers;

(4) Proper procedures at railroad crossings and drawbridges; and

(5) Proper braking procedures.

(b) *Skills test.* To obtain a passenger endorsement applicable to a specific vehicle group, an applicant must take his/her skills test in a passenger vehicle satisfying the requirements of that group as defined in § 383.91.

§ 383.119 Requirements for tank vehicle endorsement.

In order to obtain a Tank Vehicle Endorsement, each applicant must have knowledge covering the following:

(a) Causes, prevention, and effects of cargo surge on motor vehicle handling;

(b) Proper braking procedures for the motor vehicle when it is empty, full and partially full;

(c) Differences in handling of baffled/compartmental tank interiors versus non-baffled motor vehicles;

(d) Differences in tank vehicle type and construction;

(e) Differences in cargo surge for liquids of varying product densities;

(f) Effects of road grade and curvature on motor vehicle handling with filled, half-filled and empty tanks;

(g) Proper use of emergency systems; and

(h) For drivers of DOT specification tank vehicles, retest and marking requirements.

§ 383.121

§ 383.121 Requirements for hazardous materials endorsement.

In order to obtain a Hazardous Material Endorsement each applicant must have such knowledge as is required of a driver of a hazardous materials laden vehicle, from information contained in 49 CFR parts 171, 172, 173, 177, 178, and 397 on the following:

(a) Hazardous materials regulations including:

- (1) Hazardous materials table;
- (2) Shipping paper requirements;
- (3) Marking;
- (4) Labeling;
- (5) Placarding requirements;
- (6) Hazardous materials packaging;
- (7) Hazardous materials definitions and preparation;
- (8) Other regulated material (e.g., ORM-D);
- (9) Reporting hazardous materials accidents; and
- (10) Tunnels and railroad crossings.

(b) Hazardous materials handling including:

- (1) Forbidden Materials and Packages;
- (2) Loading and Unloading Materials;
- (3) Cargo Segregation;
- (4) Passenger Carrying Buses and Hazardous Materials;
- (5) Attendance of Motor Vehicles;
- (6) Parking;
- (7) Routes;
- (8) Cargo Tanks; and
- (9) "Safe Havens."

(c) Operation of emergency equipment including:

- (1) Use of equipment to protect the public;
 - (2) Special precautions for equipment to be used in fires;
 - (3) Special precautions for use of emergency equipment when loading or unloading a hazardous materials laden motor vehicle; and
 - (4) Use of emergency equipment for tank vehicles.
- (d) Emergency response procedures including:
- (1) Special care and precautions for different types of accidents;
 - (2) Special precautions for driving near a fire and carrying hazardous materials, and smoking and carrying hazardous materials;
 - (3) Emergency procedures; and

49 CFR Ch. III (10–1–04 Edition)

(4) Existence of special requirements for transporting Class A and B explosives.

§ 383.123 Requirements for a school bus endorsement.

(a) An applicant for a school bus endorsement must satisfy the following three requirements:

(1) Qualify for passenger vehicle endorsement. Pass the knowledge and skills test for obtaining a passenger vehicle endorsement.

(2) Knowledge test. Must have knowledge covering at least the following three topics:

(i) Loading and unloading children, including the safe operation of stop signal devices, external mirror systems, flashing lights and other warning and passenger safety devices required for school buses by State or Federal law or regulation.

(ii) Emergency exits and procedures for safely evacuating passengers in an emergency.

(iii) State and Federal laws and regulations related to safely traversing highway rail grade crossings.

(3) Skills test. Must take a driving skills test in a school bus of the same vehicle group (see § 383.91(a)) as the school bus applicant will drive.

(b) *Substitute for driving skills test.* (1) At the discretion of a State, the driving skills test required in paragraph (a)(3) of this section may be waived for an applicant who is currently licensed, has experience driving a school bus, has a good driving record, and meets the conditions set forth in paragraph (b)(2) of this section.

(2) An applicant must certify and the State must verify that, during the two-year period immediately prior to applying for the school bus endorsement, the applicant:

(i) Held a valid CDL with a passenger vehicle endorsement to operate a school bus representative of the group he or she will be driving;

(ii) Has not had his or her driver's license or CDL suspended, revoked or canceled or been disqualified from operating a CMV;

(iii) Has not been convicted of any of the disqualifying offenses in § 383.51(b)

while operating a CMV or of any offense in a non-CMV that would be disqualifying under §383.51(b) if committed in a CMV;

(iv) Has not had more than one conviction of any of the serious traffic violations defined in §383.5, while operating any type motor vehicle;

(v) Has not had any conviction for a violation of State or local law relating to motor vehicle traffic control (other than a parking violation) arising in connection with any traffic accident;

(vi) Has not been convicted of any motor vehicle traffic violation that resulted in an accident; and

(vii) Has been regularly employed as a school bus driver, has operated a school bus representative of the group the applicant seeks to drive, and provides evidence of such employment.

(3) After September 30, 2005 the provisions in paragraph (b) of this section do not apply.

[67 FR 49760, July 31, 2002]

APPENDIX TO SUBPART G OF PART 383— REQUIRED KNOWLEDGE AND SKILLS— SAMPLE GUIDELINES

The following is a sample of the specific types of items which a State may wish to include in the knowledge and skills tests that it administers to CDL applicants. This appendix closely follows the framework of §§383.111 and 383.113. It is intended to provide more specific guidance and suggestion to States. Additional detail in this appendix is not binding and States may depart from it at their discretion provided their CDL program tests for the general areas of knowledge and skill specified in §§383.111 and 383.113.

EXAMPLES OF SPECIFIC KNOWLEDGE ELEMENTS

(a) *Safe operations regulations.* Driver-related elements of the following regulations:

(1) Motor vehicle inspection, repair, and maintenance requirements as contained in parts 393 and 396 of this title;

(2) Procedures for safe vehicle operations as contained in part 392 of this title;

(3) The effects of fatigue, poor vision, hearing, and general health upon safe commercial motor vehicle operation as contained in parts 391, 392, and 395 of this title;

(4) The types of motor vehicles and cargoes subject to the requirements contained in part 397 of this title; and

(5) The effects of alcohol and drug use upon safe commercial motor vehicle operations as contained in parts 391 and 395 of this title.

(b) *Commercial motor vehicle safety control systems.* Proper use of the motor vehicle's

safety system, including lights, horns, side and rear-view mirrors, proper mirror adjustments, fire extinguishers, symptoms of improper operation revealed through instruments, motor vehicle operation characteristics, and diagnosing malfunctions. Commercial motor vehicle drivers shall have knowledge on the correct procedures needed to use these safety systems in an emergency situation, e.g., skids and loss of brakes.

(c) *Safe vehicle control*—(1) *Control systems.* The purpose and function of the controls and instruments commonly found on commercial motor vehicles.

(2) *Basic control.* The proper procedures for performing various basic maneuvers, including:

(i) Starting, warming up, and shutting down the engine;

(ii) Putting the vehicle in motion and stopping;

(iii) Backing in a straight line; and

(iv) Turning the vehicle, e.g., basic rules, off-tracking, right/left turns and right curves.

(3) *Shifting.* The basic shifting rules and terms, as well as shift patterns and procedures for common transmissions, including:

(i) Key elements of shifting, e.g., controls, when to shift and double clutching;

(ii) Shift patterns and procedures; and

(iii) Consequences of improper shifting.

(4) *Backing.* The procedures and rules for various backing maneuvers, including:

(i) Backing principles and rules; and

(ii) Basic backing maneuvers, e.g., straight-line backing, and backing on a curved path.

(5) *Visual search.* The importance of proper visual search, and proper visual search methods, including:

(i) Seeing ahead and to the sides;

(ii) Use of mirrors; and

(iii) Seeing to the rear.

(6) *Communication.* The principles and procedures for proper communications and the hazards of failure to signal properly, including:

(i) Signaling intent, e.g., signaling when changing speed or direction in traffic;

(ii) Communicating presence, e.g., using horn or lights to signal presence; and

(iii) Misuse of communications.

(7) *Speed management.* The importance of understanding the effects of speed, including:

(i) Speed and stopping distance;

(ii) Speed and surface conditions;

(iii) Speed and the shape of the road;

(iv) Speed and visibility; and

(v) Speed and traffic flow.

(8) *Space management.* The procedures and techniques for controlling the space around the vehicle, including:

(i) The importance of space management;

(ii) Space cushions, e.g., controlling space ahead/to the rear;

(iii) Space to the sides; and

(iv) Space for traffic gaps.

(9) *Night operation.* Preparations and procedures for night driving, including:

(i) Night driving factors, e.g., driver factors, (vision, glare, fatigue, inexperience), roadway factors, (low illumination, variation in illumination, familiarity with roads, other road users, especially drivers exhibiting erratic or improper driving), vehicle factors (headlights, auxiliary lights, turn signals, windshields and mirrors); and

(ii) Night driving procedures, e.g., preparing to drive at night and driving at night.

(10) *Extreme driving conditions.* The basic information on operating in extreme driving conditions and the hazards that are encountered in extreme conditions, including:

- (i) Adverse weather;
- (ii) Hot weather; and
- (iii) Mountain driving.

(11) *Hazard perceptions.* The basic information on hazard perception and clues for recognition of hazards, including:

- (i) Importance of hazards recognition;
- (ii) Road characteristics; and
- (iii) Road user activities.

(12) *Emergency maneuvers.* The basic information concerning when and how to make emergency maneuvers, including:

- (i) Evasive steering;
- (ii) Emergency stop;
- (iii) Off-road recovery;
- (iv) Brake failure; and
- (v) Blowouts.

(13) *Skid control and recovery.* The information on the causes and major types of skids, as well as the procedures for recovering from skids.

(d) *Relationship of cargo to vehicle control.* The principles and procedures for the proper handling of cargo, including:

(1) The importance of proper cargo handling, e.g., consequences of improperly secured cargo, drivers' responsibilities, Federal/State and local regulations.

(2) Principles of weight distribution.

(3) Principles and methods of cargo securement.

(e) *Vehicle inspections:* The objectives and proper procedures for performing vehicle safety inspections, as follows:

(1) The importance of periodic inspection and repair to vehicle safety and to prevention of enroute breakdowns.

(2) The effect of undiscovered malfunctions upon safety.

(3) What safety-related parts to look for when inspecting vehicles, e.g., fluid leaks, interference with visibility, bad tires, wheel and rim defects, braking system defects, steering system defects, suspension system defects, exhaust system defects, coupling system defects, and cargo problems.

(4) Pre-trip/enroute/post-trip inspection procedures.

(5) Reporting findings.

(f) *Hazardous materials knowledge, as follows:*

(1) What constitutes hazardous material requiring an endorsement to transport; and

(2) Classes of hazardous materials, labeling/placarding requirements, and the need for specialized training as a prerequisite to receiving the endorsement and transporting hazardous cargoes.

(g) *Air brake knowledge as follows:*

(1) General air brake system nomenclature;

(2) The dangers of contaminated air (dirt, moisture and oil) supply;

(3) Implications of severed or disconnected air lines between the power unit and the trailer(s);

(4) Implications of low air pressure readings;

(5) Procedures to conduct safe and accurate pre-trip inspections, including knowledge about:

- (i) Automatic fail-safe devices;
- (ii) System monitoring devices; and
- (iii) Low pressure warning alarms.

(6) Procedures for conducting enroute and post-trip inspections of air actuated brake systems, including ability to detect defects which may cause the system to fail, including:

(i) Tests which indicate the amount of air loss from the braking system within a specified period, with and without the engine running; and

(ii) Tests which indicate the pressure levels at which the low air pressure warning devices and the tractor protection valve should activate.

(h) *Operators for the combination vehicle group shall also have knowledge of:*

(1) *Coupling and uncoupling.* The procedures for proper coupling and uncoupling a tractor to semi-trailer.

(2) *Vehicle inspection*—The objectives and proper procedures that are *unique* for performing vehicle safety inspections on combination vehicles.

EXAMPLES OF SPECIFIC SKILLS ELEMENTS

These examples relate to paragraphs (a) and (b) of §383.113 only.

(a) *Basic vehicle control skills.* All applicants for a CDL must possess and demonstrate the following basic motor vehicle control skills for each vehicle group which the driver operates or expects to operate. These skills shall include:

(1) Ability to start, warm-up, and shut down the engine;

(2) Ability to put the motor vehicle in motion and accelerate smoothly, forward and backward;

(3) Ability to bring the motor vehicle to a smooth stop;

(4) Ability to back the motor vehicle in a straight line, and check path and clearance while backing;

(5) Ability to position the motor vehicle to negotiate and then make left and right turns;

(6) Ability to shift as required and select appropriate gear for speed and highway conditions;

(7) Ability to back along a curved path; and

(8) Ability to observe the road and the behavior of other motor vehicles, particularly before changing speed and direction.

(b) *Safe driving skills.* All applicants for a CDL must possess and demonstrate the following safe driving skills for any vehicle group. These skills shall include:

(1) Ability to use proper visual search methods.

(2) Ability to signal appropriately when changing speed or direction in traffic.

(3) Ability to adjust speed to the configuration and condition of the roadway, weather and visibility conditions, traffic conditions, and motor vehicle, cargo and driver conditions;

(4) Ability to choose a safe gap for changing lanes, passing other vehicles, as well as for crossing or entering traffic;

(5) Ability to position the motor vehicle correctly before and during a turn to prevent other vehicles from passing on the wrong side as well as to prevent problems caused by off-tracking;

(6) Ability to maintain a safe following distance depending on the condition of the road, on visibility, and on vehicle weight; and

(7) Ability to adjust operation of the motor vehicle to prevailing weather conditions including speed selection, braking, direction changes and following distance to maintain control.

Subpart H—Tests

SOURCE: 53 FR 27657, July 21, 1988, unless otherwise noted.

§ 383.131 Test procedures.

(a) *Driver information manuals.* Information on how to obtain a CDL and endorsements shall be included in manuals and made available by States to CDL applicants. All information provided to the applicant shall include the following:

(1) Information on the requirements described in § 383.71, the implied consent to alcohol testing described in § 383.72, the procedures and penalties, contained in § 383.51(b) to which a CDL holder is exposed for refusal to comply with such alcohol testing, State procedures described in § 383.73, and other ap-

propriate driver information contained in subpart E of this part;

(2) Information on vehicle groups and endorsements as specified in subpart F of this part;

(3) The substance of the knowledge and skills which drivers shall have as outlined in subpart G of this part for the different vehicle groups and endorsements;

(4) Details of testing procedures, including the purpose of the tests, how to respond, any time limits for taking the test, and any other special procedures determined by the State of issuance; and

(5) Directions for taking the tests.

(b) *Examiner procedures.* A State shall provide to test examiners details on testing and any other State-imposed requirements in the examiner's manual, and shall ensure that examiners are qualified to administer tests on the basis of training and/or other experience. States shall provide standardized scoring sheets for the skills tests, as well as standardized driving instructions for the applicants. Such examiners' manuals shall contain the following:

(1) Information on driver application procedures contained in § 383.71, State procedures described in § 383.73, and other appropriate driver information contained in subpart E of this part;

(2) Details on information which must be given to the applicant;

(3) Details on how to conduct the tests;

(4) Scoring procedures and minimum passing scores;

(5) Information for selecting driving test routes;

(6) List of the skills to be tested;

(7) Instructions on where and how the skills will be tested;

(8) How performance of the skills will be scored; and

(9) Causes for automatic failure of skills tests.

[53 FR 27657, July 21, 1988, as amended at 53 FR 39051, Oct. 4, 1988]

§ 383.133 Testing methods.

(a) All tests shall be constructed in such a way as to determine if the applicant possesses the required knowledge and skills contained in subpart G of this part for the type of motor vehicle

§ 383.135

or endorsement the applicant wishes to obtain.

(b) States shall develop their own specifications for the tests for each vehicle group and endorsement which must be at least as stringent as the Federal standards.

(c) States shall determine specific methods for scoring the knowledge and skills tests.

(d) Passing scores must meet those standards contained in § 383.135.

(e) Knowledge and skills tests shall be based solely on the information contained in the driver manuals referred to in § 383.131(a).

(f) Each knowledge test shall be valid and reliable so as to assure that driver applicants possess the knowledge required under § 383.111.

(g) Each basic knowledge test, i.e., the test covering the areas referred to in § 383.111 for the applicable vehicle group, shall contain at least 30 items, exclusive of the number of items testing air brake knowledge. Each endorsement knowledge test, and the air brake component of the basic knowledge test as described in § 383.111(g), shall contain a number of questions that is sufficient to test the driver applicant's knowledge of the required subject matter with validity and reliability.

(h) The skills tests shall have administrative procedures, designed to achieve interexaminer reliability, that are sufficient to ensure fairness of pass/fail rates.

§ 383.135 Minimum passing scores.

(a) The driver applicant must correctly answer at least 80 percent of the questions on each knowledge test in order to achieve a passing score on such knowledge test.

(b) To achieve a passing score on the skills test, the driver applicant must demonstrate that he/she can successfully perform all of the skills listed in § 383.113.

(c) If the driver applicant does not obey traffic laws, or causes an accident during the test, he/she shall automatically fail the test.

(d) The scoring of the basic knowledge and skills tests shall be adjusted as follows to allow for the air brake restriction (§ 383.95):

49 CFR Ch. III (10–1–04 Edition)

(1) If the applicant scores less than 80 percent on the air brake component of the basic knowledge test as described in § 383.111(g), the driver will have failed the air brake component and, if the driver is issued a CDL, an air brake restriction shall be indicated on the license; and

(2) If the applicant performs the skills test in a vehicle not equipped with air brakes, the driver will have omitted the air brake component as described in § 383.113(c) and, if the driver is issued a CDL, the air brake restriction shall be indicated on the license.

Subpart I—Requirement for Transportation Security Administration approval of hazardous materials endorsement issuances

§ 383.141 General.

(a) *Applicability date.* Beginning on January 31, 2005, this section applies to State agencies responsible for issuing hazardous materials endorsements for a CDL, and applicants for such endorsements.

(b) *Prohibition.* A State may not issue, renew, upgrade, or transfer a hazardous materials endorsement for a CDL to any individual authorizing that individual to operate a commercial motor vehicle transporting a hazardous material in commerce unless the Transportation Security Administration has determined that the individual does not pose a security risk warranting denial of the endorsement.

(c) *Individual notification.* At least 180 days before the expiration date of the CDL or hazardous materials endorsement, a State must notify the holder of a hazardous materials endorsement that the individual must pass a Transportation Security Administration security screening process as part of any application for renewal of the hazardous materials endorsement. The notice must advise a driver that, in order to expedite the security screening process, he or she should file a renewal application as soon as possible, but not

later than 90 days before the date of expiration of the endorsement. An individual who does not successfully complete the Transportation Security Administration security screening process referenced in paragraph (b) of this section may not be issued a hazardous materials endorsement.

(d) *Hazardous materials endorsement renewal cycle.* Each State must require that hazardous materials endorsements be renewed every 5 years or less so that individuals are subject to a Transportation Security Administration security screening requirement referenced in paragraph (b) of this section at least every 5 years.

[68 FR 24850, May 5, 2003, as amended at 68 FR 63033, Nov. 7, 2003; 69 FR 51393, Aug. 19, 2004]

Subpart J—Commercial Driver's License Document

SOURCE: 53 FR 27657, July 21, 1988, unless otherwise noted.

§ 383.151 General.

The CDL shall be a document that is easy to recognize as a CDL. At a minimum, the document shall contain information specified in § 383.153.

§ 383.153 Information on the document and application.

(a) All CDLs shall contain the following information:

(1) The prominent statement that the license is a "Commercial Driver's License" or "CDL," except as specified in § 383.153(b).

(2) The full name, signature, and mailing address of the person to whom such license is issued;

(3) Physical and other information to identify and describe such person including date of birth (month, day, and year), sex, and height;

(4) Color photograph of the driver;

(5) The driver's State license number;

(6) The name of the State which issued the license;

(7) The date of issuance and the date of expiration of the license;

(8) The group or groups of commercial motor vehicle(s) that the driver is authorized to operate, indicated as follows:

(i) A for Combination Vehicle;

(ii) B for Heavy Straight Vehicle; and
(iii) C for Small Vehicle.

(9) The endorsement(s) for which the driver has qualified, if any, indicated as follows:

(i) T for double/triple trailers;

(ii) P for passenger;

(iii) N for tank vehicle;

(iv) H for hazardous materials;

(v) X for a combination of tank vehicle and hazardous materials endorsements;

(vi) S for school bus; and

(vii) At the discretion of the State, additional codes for additional groupings of endorsements, as long as each such discretionary code is fully explained on the front or back of the CDL document.

(b) If the CDL is a Nonresident CDL, it shall contain the prominent statement that the license is a "Nonresident Commercial Driver's License" or "Nonresident CDL." The word "Nonresident" must be conspicuously and unmistakably displayed, but may be noncontiguous with the words "Commercial Driver's License" or "CDL."

(c) If the State has issued the applicant an air brake restriction as specified in § 383.95, that restriction must be indicated on the license.

(d) Except in the case of a Nonresident CDL:

(1) A driver applicant must provide his/her Social Security Number on the application of a CDL; and

(2) The State must provide the Social Security Number to the CDLIS.

[53 FR 27657, July 21, 1988, as amended at 67 FR 49760, July 31, 2002]

§ 383.155 Tamperproofing requirements.

States shall make the CDL tamperproof to the maximum extent practicable. At a minimum, a State shall use the same tamperproof method used for noncommercial drivers' licenses.

PART 384—STATE COMPLIANCE WITH COMMERCIAL DRIVER'S LICENSE PROGRAM

Subpart A—General

Sec.

384.101 Purpose and scope.

§ 384.101

- 384.103 Applicability.
- 384.105 Definitions.
- 384.107 Matter incorporated by reference.

Subpart B—Minimum Standards for Substantial Compliance by States

- 384.201 Testing program.
- 384.202 Test standards.
- 384.203 Driving while under the influence.
- 384.204 CDL issuance and information.
- 384.205 CDLIS information.
- 384.206 State record checks.
- 384.207 Notification of licensing.
- 384.208 Notification of disqualification.
- 384.209 Notification of traffic violations.
- 384.210 Limitation on licensing.
- 384.211 Return of old licenses.
- 384.212 Domicile requirement.
- 384.213 Penalties for driving without a proper CDL.
- 384.214 Reciprocity.
- 384.215 First offenses.
- 384.216 Second offenses.
- 384.217 Drug offenses.
- 384.218 Second serious traffic violation.
- 384.219 Third serious traffic violation.
- 384.220 National Driver Register information.
- 384.221 Out-of-service regulations (intoxicating beverage).
- 384.222 Violation of out-of-service orders.
- 384.223 Railroad-highway grade crossing violation.
- 384.224 Noncommercial motor vehicle violations.
- 384.225 Record of violations.
- 384.226 Prohibition on masking convictions.
- 384.227–384.230 [Reserved]
- 384.231 Satisfaction of State disqualification requirement.
- 384.232 Required timing of record checks.
- 384.233 Background records checks.

Subpart C—Procedures for Determining State Compliance

- 384.301 Substantial compliance—general requirement.
- 384.303 [Reserved]
- 384.305 State certifications for Federal fiscal years after FY 1994.
- 384.307 FMCSA program reviews of State compliance.
- 384.309 Results of compliance determination.

Subpart D—Consequences of State Noncompliance

- 384.401 Withholding of funds based on noncompliance.
- 384.403 Period of availability; effect of compliance and noncompliance.
- 384.405 Decertification of State CDL program.
- 384.407 Emergency CDL grants.

49 CFR Ch. III (10–1–04 Edition)

AUTHORITY: 49 U.S.C. 31136, 31301 *et seq.*, 31502; Sec. 103 of Pub. L. 106–159, 113 Stat. 1753; and 49 CFR 1.73.

SOURCE: 59 FR 26039, May 18, 1994, unless otherwise noted.

EDITORIAL NOTE: Nomenclature changes to part 384 appear at 66 FR 49872, Oct. 1, 2001.

Subpart A—General

§ 384.101 Purpose and scope.

(a) *Purpose.* The purpose of this part is to ensure that the States comply with the provisions of section 12009(a) of the Commercial Motor Vehicle Safety Act of 1986 (49 U.S.C. 31311(a)).

(b) *Scope.* This part:

(1) Includes the minimum standards for the actions States must take to be in substantial compliance with each of the 22 requirements of 49 U.S.C. 31311(a);

(2) Establishes procedures for determinations to be made of such compliance by States; and

(3) Specifies the consequences of State noncompliance.

[62 FR 37152, July 11, 1997]

§ 384.103 Applicability.

The rules in this part apply to all States.

§ 384.105 Definitions.

(a) The definitions in part 383 of this title apply to this part, except where otherwise specifically noted.

(b) As used in this part:

Issue and issuance mean initial licensure, license transfers, license renewals, license upgrades, and nonresident commercial driver's licenses (CDLs), as described in § 383.73 of this title.

Licensing entity means the agency of State government that is authorized to issue drivers' licenses.

Year of noncompliance means any Federal fiscal year during which—

(1) A State fails to submit timely certification as prescribed in subpart C of this part; or

(2) The State does not meet one or more of the standards of subpart B of this part, based on a final determination by the FMCSA under § 384.307(c) of this part.

§ 384.107 Matter incorporated by reference.

(a) *Incorporation by reference.* This part includes references to certain matter or materials. The text of the materials is not included in the regulations contained in this part. The materials are hereby made a part of the regulations in this part. The Director of the Office of the Federal Register has approved the materials incorporated by reference in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. For materials subject to change, only the specific version approved by the Director of the Office of the Federal Register and specified in the regulation are incorporated. Material is incorporated as it exists on the date of the approval and a notice of any change in these materials will be published in the FEDERAL REGISTER.

(b) *Materials incorporated.* The AAMVANet, Inc.'s "Commercial Driver License Information System (CDLIS) State Procedures," Version 2.0, October 1998, IBR approved for § 384.231(d).

(c) *Addresses.* (1) All of the materials incorporated by reference are available for inspection at:

(i) The Department of Transportation Library, 400 Seventh Street, SW, Washington, DC 20590 in Room 2200. These documents are also available for inspection and copying as provided in 49 CFR part 7.

(ii) The National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

(2) Information and copies of all of the materials incorporated by reference may be obtained by writing to: American Association of Motor Vehicle Administrators, Inc., 4301 Wilson Blvd, Suite 400, Arlington, VA 22203.

[67 FR 49761, July 31, 2002]

Subpart B—Minimum Standards for Substantial Compliance by States**§ 384.201 Testing program.**

The State shall adopt and administer a program for testing and ensuring the fitness of persons to operate commercial motor vehicles (CMVs) in accordance with the minimum Federal standards contained in part 383 of this title.

§ 384.202 Test standards.

No State shall authorize a person to operate a CMV unless such person passes a knowledge and driving skills test for the operation of a CMV in accordance with part 383 of this title.

§ 384.203 Driving while under the influence.

(a) The State must have in effect and enforce through licensing sanctions the disqualifications prescribed in § 383.51(b) of this subchapter for driving a CMV with a 0.04 alcohol concentration.

(b) Nothing in this section shall be construed to require a State to apply its criminal or other sanctions for driving under the influence to a person found to have operated a CMV with an alcohol concentration of 0.04, except licensing sanctions including suspension, revocation, or cancellation.

(c) A State that enacts and enforces through licensing sanctions the disqualifications prescribed in § 383.51(b) of this subchapter for driving a CMV with a 0.04 alcohol concentration and gives full faith and credit to the disqualification of CMV drivers by other States shall be deemed in substantial compliance with section 12009(a)(3) of the Commercial Motor Vehicle Safety Act of 1986 (49 U.S.C. 31311(a)(3)).

[67 FR 49761, July 31, 2002]

§ 384.204 CDL issuance and information.

(a) *General rule.* The State shall authorize a person to operate a CMV only by issuance of a CDL, unless a waiver under the provisions of § 383.7 applies, which contains, at a minimum, the information specified in part 383, subpart J, of this title.

§ 384.205

(b) *Exceptions*—(1) *Training*. The State may authorize a person, who does not hold a CDL valid in the type of vehicle in which training occurs, to undergo behind-the-wheel training in a CMV only by means of a learner's permit issued and used in accordance with § 383.23(c) of this title.

(2) *Confiscation of CDL pending enforcement*. A State may allow a CDL holder whose CDL is held in trust by that State or any other State in the course of enforcement of the motor vehicle traffic code, but who has not been convicted of a disqualifying offense under § 383.51 based on such enforcement, to drive a CMV while holding a dated receipt for such CDL.

§ 384.205 CDLIS information.

Before issuing a CDL to any person, the State shall, within the period of time specified in § 384.232, perform the check of the Commercial Driver's License Information System (CDLIS) in accordance with § 383.73(a)(3)(ii) of this title, and, based on that information, shall issue the license, or, in the case of adverse information, promptly implement the disqualifications, licensing limitations, denials, and/or penalties that are called for in any applicable section(s) of this subpart.

§ 384.206 State record checks.

(a) *Required checks*—(1) *Issuing State's records*. Before issuing a CDL to any person, the State shall, within the period of time specified in § 384.232, check its own driving record for such person in accordance with § 383.73(a)(3) of this title.

(2) *Other States' records*. Before the initial or transfer issuance of a CDL to a person, and before renewing a CDL held by any person, the issuing State must:

(i) Require the applicant to provide the names of all States where the applicant has previously been licensed to operate any type of motor vehicle.

(ii) Within the time period specified in § 384.232, request the complete driving record from all States where the applicant was licensed within the previous 10 years to operate any type of motor vehicle.

(iii) States receiving a request for the driving record of a person currently

49 CFR Ch. III (10–1–04 Edition)

or previously licensed by the State must provide the information within 30 days.

(b) *Required action*. Based on the findings of the State record checks prescribed in this section, the State shall issue the license, or, in the case of adverse information, promptly implement the disqualifications, licensing limitations, denials, and/or penalties that are called for in any applicable section(s) of this subpart.

[59 FR 26039, May 18, 1994, as amended at 67 FR 49761, July 31, 2002]

§ 384.207 Notification of licensing.

Within the period defined in § 383.73(f) of this title, the State shall:

(a) Notify the operator of the CDLIS of each CDL issuance;

(b) Notify the operator of the CDLIS of any changes in driver identification information; and

(c) In the case of transfer issuances, implement the Change State of Record transaction, as specified by the operator of the CDLIS, in conjunction with the previous State of record and the operator of the CDLIS.

§ 384.208 Notification of disqualification.

(a) No later than 10 days after disqualifying a CDL holder licensed by another State, or revoking, suspending, or canceling an out-of-State CDL holder's privilege to operate a commercial motor vehicle for at least 60 days, the State must notify the State that issued the license of the disqualification, revocation, suspension, or cancellation.

(b) The notification must include both the disqualification and the violation that resulted in the disqualification, revocation, suspension, or cancellation. The notification and the information it provides must be recorded on the driver's record.

[67 FR 49761, July 31, 2002]

§ 384.209 Notification of traffic violations.

(a) *Required notification with respect to CDL holders*. Whenever a person who holds a CDL from another State is convicted of a violation of any State or local law relating to motor vehicle traffic control (other than a parking

violation), in any type of vehicle, the licensing entity of the State in which the conviction occurs must notify the licensing entity in the State where the driver is licensed of this conviction within the time period established in paragraph (c) of this section.

(b) *Required notification with respect to non-CDL holders.* Whenever a person who does not hold a CDL, but who is licensed to drive by another State, is convicted of a violation in a CMV of any State or local law relating to motor vehicle traffic control (other than a parking violation), the licensing entity of the State in which the conviction occurs must notify the licensing entity in the State where the driver is licensed of this conviction within the time period established in paragraph (c) of this section.

(c) *Time period for notification of traffic violations.* (1) Beginning on September 30, 2005, the notification must be made within 30 days of the conviction.

(2) Beginning on September 30, 2008, the notification must be made within 10 days of the conviction.

[67 FR 49761, July 31, 2002]

§ 384.210 Limitation on licensing.

A State must not knowingly issue a CDL or a commercial special license or permit (including a provisional or temporary license) permitting a person to drive a CMV during a period in which:

(a) A person is disqualified from operating a CMV, as disqualification is defined by § 383.5 of this subchapter, or under the provisions of § 383.73(g) or § 384.231(b)(2) of this subchapter;

(b) The CDL holder's noncommercial driving privilege has been revoked, suspended, or canceled; or

(c) Any type of driver's license held by such person is suspended, revoked, or canceled by the State where the driver is licensed for any State or local law related to motor vehicle traffic control (other than parking violations).

[67 FR 49761, July 31, 2002]

§ 384.211 Return of old licenses.

The State shall not issue a CDL to a person who possesses a driver's license issued by another State or jurisdiction

unless such person first surrenders the driver's license issued by such other State or jurisdiction in accordance with §§ 383.71(a)(7) and (b)(4) of this title.

§ 384.212 Domicile requirement.

(a) The State shall issue CDLs only to those persons for whom such State is the State of domicile as defined in § 383.5 of this title; except that the State may issue a nonresident CDL under the conditions specified in §§ 383.23(b), 383.71(e), and 383.73(e) of this title.

(b) The State shall require any person holding a CDL issued by another State to apply for a transfer CDL from the State within 30 days after establishing domicile in the State, as specified in § 383.71(b) of this title.

§ 384.213 State penalties for drivers of CMVs.

The State must impose on drivers of CMVs appropriate civil and criminal penalties that are consistent with the penalties prescribed under part 383, subpart D, of this subchapter.

[67 FR 49761, July 31, 2002]

§ 384.214 Reciprocity.

The State shall allow any person to operate a CMV in the State who is not disqualified from operating a CMV and who holds a CDL which is—

(a) Issued to him or her by any other State or jurisdiction in accordance with part 383 of this title;

(b) Not suspended, revoked, or canceled; and

(c) Valid, under the terms of part 383, subpart F, of this title, for the type of vehicle being driven.

§ 384.215 First offenses.

(a) *General rule.* The State must disqualify from operating a CMV each person who is convicted, as defined in § 383.5 of this subchapter, in any State or jurisdiction, of a disqualifying offense specified in items (1) through (8) of Table 1 to § 383.51 of this subchapter, for no less than one year.

(b) *Special rule for hazardous materials offenses.* If the offense under paragraph (a) of this section occurred while the

§ 384.216

driver was operating a vehicle transporting hazardous materials required to be placarded under the Hazardous Materials Transportation Act (implementing regulations at 49 CFR 177.823), the State shall disqualify the person for no less than three years.

[59 FR 26039, May 18, 1994, as amended at 67 FR 49762, July 31, 2002]

§ 384.216 Second offenses.

(a) *General rule.* The State must disqualify for life from operating a CMV each person who is convicted, as defined in § 383.5 of this subchapter, in any State or jurisdiction, of a subsequent offense as described in Table 1 to § 383.51 of this subchapter.

(b) *Special rule for certain lifetime disqualifications.* A driver disqualified for life under Table 1 to § 383.51 may be reinstated after 10 years by the driver's State of residence if the requirements of § 383.51(a)(5) have been met.

[67 FR 49762, July 31, 2002]

§ 384.217 Drug offenses.

The State must disqualify from operating a CMV for life each person who is convicted, as defined in § 383.5 of this subchapter, in any State or jurisdiction of a first offense, of using a CMV in the commission of a felony described in item (9) of Table 1 to § 383.51 of this subchapter. The State shall not apply the special rule in § 384.216(b) to lifetime disqualifications imposed for controlled substance felonies as detailed in item (9) of Table 1 to § 383.51 of this subchapter.

[67 FR 49762, July 31, 2002]

§ 384.218 Second serious traffic violation.

The State must disqualify from operating a CMV for a period of not less than 60 days each person who, in a three-year period, is convicted, as defined in § 383.5 of this subchapter, in any State(s) or jurisdiction(s), of two serious traffic violations as specified in Table 2 to § 383.51.

[67 FR 49762, July 31, 2002]

49 CFR Ch. III (10–1–04 Edition)

§ 384.219 Third serious traffic violation.

The State must disqualify from operating a CMV for a period of not less than 120 days each person who, in a three-year period, is convicted, as defined in § 383.5 of this subchapter, in any State(s) or jurisdiction(s), of three serious traffic violations as specified in Table 2 to § 383.51. This disqualification period must be in addition to any other previous period of disqualification.

[67 FR 49762, July 31, 2002]

§ 384.220 National Driver Register information.

Before issuing a CDL to any person, the State shall, within the period of time specified in § 384.232, perform the check of the National Driver Register in accordance with § 383.73(a)(3)(iii) of this title, and, based on that information, promptly implement the disqualifications, licensing limitations, and/or penalties that are called for in any applicable section(s) of this subpart.

§ 384.221 Out-of-service regulations (intoxicating beverage).

The State shall adopt, and enforce on operators of CMVs as defined in §§ 383.5 and 390.5 of this title, the provisions of § 392.5 (a) and (c) of this title in accordance with the Motor Carrier Safety Assistance Program as contained in 49 CFR part 350 and applicable policy and guidelines.

§ 384.222 Violation of out-of-service orders.

The State must have and enforce laws and/or regulations applicable to drivers of CMVs and their employers, as defined in § 383.5 of this subchapter, which meet the minimum requirements of §§ 383.37(c), Table 4 to 383.51, and 383.53(b) of this subchapter.

[67 FR 49762, July 31, 2002]

§ 384.223 Railroad-highway grade crossing violation.

The State must have and enforce laws and/or regulations applicable to CMV drivers and their employers, as defined in § 383.5 of this subchapter,

Federal Motor Carrier Safety Administration, DOT

§ 384.231

which meet the minimum requirements of §§ 383.37(d), Table 3 to 383.51, and 383.53(c) of this subchapter.

[67 FR 49762, July 31, 2002]

§ 384.224 Noncommercial motor vehicle violations.

The State must have and enforce laws and/or regulations applicable to drivers of non-CMV's, as defined in § 383.5 of this subchapter, which meet the minimum requirements of Tables 1 and 2 to § 383.51 of this subchapter.

[67 FR 49762, July 31, 2002]

§ 384.225 Record of violations.

The State must:

(a) *CDL holders.* Record and maintain as part of the driver history all convictions, disqualifications and other licensing actions for violations of any State or local law relating to motor vehicle traffic control (other than a parking violation) committed in any type of vehicle.

(b) *A person required to have a CDL.* Record and maintain as part of the driver history all convictions, disqualifications and other licensing actions for violations of any State or local law relating to motor vehicle traffic control (other than a parking violation) committed while the driver was operating a CMV.

(c) Make driver history information required by this section available to the users designated in paragraph (e) of this section, or to their authorized agent, within 10 days of:

(1) Receiving the conviction or disqualification information from another State; or

(2) The date of the conviction, if it occurred in the same State.

(d) Retain on the driver history record all convictions, disqualifications and other licensing actions for violations for at least 3 years or longer as required under § 384.231(d).

(e) Only the following users or their authorized agents may receive the designated information:

(1) *States*—All information on all driver records.

(2) *Secretary of Transportation*—All information on all driver records.

(3) *Driver*—Only information related to that driver's record.

(4) *Motor Carrier or Prospective Motor Carrier*—After notification to a driver, all information related to that driver's, or prospective driver's, record.

[67 FR 49762, July 31, 2002]

§ 384.226 Prohibition on masking convictions.

The State must not mask, defer imposition of judgment, or allow an individual to enter into a diversion program that would prevent a CDL driver's conviction for any violation, in any type of motor vehicle, of a State or local traffic control law (except a parking violation) from appearing on the driver's record, whether the driver was convicted for an offense committed in the State where the driver is licensed or another State.

[67 FR 49762, July 31, 2002]

§§ 384.227–384.230 [Reserved]

§ 384.231 Satisfaction of State disqualification requirement.

(a) *Applicability.* The provisions of §§ 384.203, 384.206(b), 384.210, 384.213, 384.215 through 384.219, 384.221 through 384.224, and 384.231 of this part apply to the State of licensure of the person affected by the provision. The provisions of § 384.210 of this part also apply to any State to which a person makes application for a transfer CDL.

(b) *Required action.* (1) *CDL holders.* A State must satisfy the requirement of this part that the State disqualify a person who holds a CDL by, at a minimum, suspending, revoking, or canceling the person's CDL for the applicable period of disqualification.

(2) *A person required to have a CDL.* A State must satisfy the requirement of this subpart that the State disqualify a person required to have a CDL who is convicted of an offense or offenses necessitating disqualification under § 383.51 of this subchapter. At a minimum, the State must implement the limitation on licensing provisions of § 384.210 and the timing and record-keeping requirements of paragraphs (c) and (d) of this section so as to prevent such a person from legally obtaining a CDL from any State during the applicable disqualification period(s) specified in this subpart.

§ 384.232

(c) *Required timing.* The State must disqualify a driver as expeditiously as possible.

(d) *Recordkeeping requirements.* The State must conform to the requirements of the October 1998 edition of the AAMVAnet, Inc.'s "Commercial Driver License Information System (CDLIS) State Procedures," Version 2.0. (Incorporated by reference, see § 384.107.) These requirements include the maintenance of such driver records and driver identification data on the CDLIS as the FMCSA finds are necessary to the implementation and enforcement of the disqualifications called for in §§ 384.215 through 384.219, and 384.221 through 384.224 of this part.

[67 FR 49762, July 31, 2002]

§ 384.232 Required timing of record checks.

The State shall perform the record checks prescribed in §§ 384.205, 384.206, and 384.220, no earlier than 10 days prior to issuance for licenses issued before October 1, 1995. For licenses issued after September 30, 1995, the State shall perform the record checks no earlier than 24 hours prior to issuance if the license is issued to a driver who does not currently possess a valid CDL from the same State and no earlier than 10 days prior to issuance for all other drivers.

§ 384.233 Background records checks.

(a) The State shall comply with Transportation Security Administration requirements concerning background records checks for drivers seeking to obtain, renew, transfer or upgrade a hazardous materials endorsement in 49 CFR Part 1572, to the extent those provisions impose requirements on the State.

(b) The State shall comply with each requirement of 49 CFR 383.141.

[68 FR 23850, May 5, 2003]

Subpart C—Procedures for Determining State Compliance

§ 384.301 Substantial compliance-general requirements

(a) To be in substantial compliance with 49 U.S.C. 31311(a), a State must meet each and every standard of sub-

49 CFR Ch. III (10–1–04 Edition)

part B of this part by means of the demonstrable combined effect of its statutes, regulations, administrative procedures and practices, organizational structures, internal control mechanisms, resource assignments (facilities, equipment, and personnel), and enforcement practices.

(b) A State shall come into substantial compliance with the requirements of subpart B of this part in effect as of September 30, 2002 as soon as practical, but, unless otherwise specifically provided in this part, not later than three years after September 30, 2002.

[67 FR 49763, July 31, 2002]

§ 384.303 [Reserved]

§ 384.305 State certifications for Federal fiscal years after FY 1994.

(a) *Certification requirement.* Prior to January 1 of each Federal fiscal year after FY 1994, each State shall review its compliance with this part and certify to the Federal Motor Carrier Safety Administrator as prescribed in paragraph (b) of this section. The certification shall be submitted as a signed original and four copies to the State Director or Officer-in-Charge, Federal Motor Carrier Safety Administration, located in that State.

(b) *Certification content.* The certification shall consist of a statement signed by the Governor of the State, or by an official designated by the Governor, and reading as follows: "I (name of certifying official), (position title), of the State (Commonwealth) of _____, do hereby certify that the State (Commonwealth) has continuously been in substantial compliance with all requirements of 49 U.S.C. 31311(a), as defined in 49 CFR 384.301, since [the first day of the current Federal fiscal year], and contemplates no changes in statutes, regulations, or administrative procedures, or in the enforcement thereof, which would affect such substantial compliance through [the last date of the current Federal fiscal year]."

(Approved by the Office of Management and Budget under control number 2125–0542)

[59 FR 26039, May 18, 1994, as amended at 62 FR 37152, July 11, 1997]

§ 384.307 FMCSA program reviews of State compliance.

(a) *FMCSA Program Reviews.* Each State's CDL program will be subject to review to determine whether or not the State meets the general requirement for substantial compliance in § 384.301. The State must cooperate with the review and provide any information requested by the FMCSA.

(b) *Preliminary FMCSA determination and State response.* If, after review, a preliminary determination is made either that the State has not submitted the required annual self-certification or that the State does not meet one or more of the minimum standards for substantial compliance under subpart B of this part, the State will be informed accordingly.

(c) *Reply.* The State will have up to 30 calendar days to respond to the preliminary determination. The State's reply must explain what corrective action it either has implemented or intends to implement to correct the deficiencies cited in the notice or, alternatively, why the FMCSA preliminary determination is incorrect. The State must provide documentation of corrective action as required by the agency. Corrective action must be adequate to correct the deficiencies noted in the program review and be implemented on a schedule mutually agreed upon by the agency and the State. Upon request by the State, an informal conference will be provided during this time.

(d) *Final FMCSA determination.* If, after reviewing a timely response by the State to the preliminary determination, a final determination is made that the State is not in compliance with the affected standard, the State will be notified of the final determination. In making its final determination, the FMCSA will take into consideration the corrective action either implemented or planned to be implemented in accordance with the mutually agreed upon schedule.

(e) *State's right to judicial review.* Any State aggrieved by an adverse decision under this section may seek judicial review under 5 U.S.C. Chapter 7.

[67 FR 49763, July 31, 2002]

§ 384.309 Results of compliance determination.

(a) A State shall be determined not substantially in compliance with 49 U.S.C. 31311(a) for any fiscal year in which it:

(1) Fails to submit the certification as prescribed in this subpart; or

(2) Does not meet one or more of the standards of subpart B of this part, as established in a final determination by the FMCSA under § 384.307(c).

(b) A State shall be in substantial compliance with 49 U.S.C. 31311(a) for any fiscal year in which neither of the eventualities in paragraph (a) of this section occurs.

[62 FR 37152, July 11, 1997]

Subpart D—Consequences of State Noncompliance**§ 384.401 Withholding of funds based on noncompliance.**

(a) *Following the first year of non-compliance.* A State is subject to both of the following sanctions:

(1) An amount equal to five percent of the Federal-aid highway funds required to be apportioned to any State under each of sections 104(b)(1), (b)(3), and (b)(4) of title 23, U.S.C., shall be withheld on the first day of the fiscal year following such State's first year of noncompliance under this part.

(2) The Motor Carrier Safety Assistance Program (MCSAP) grant funds authorized under section 103(b)(1) of the Motor Carrier Safety Improvement Act of 1999 (Public Law 106-159, 113 Stat. 1754) shall be withheld from a State on the first day of the fiscal year following the fiscal year in which the FMCSA determined that the State was not in substantial compliance with subpart B of this part.

(b) *Following second and subsequent year(s) of noncompliance.* A State is subject to both of the following sanctions:

(1) An amount equal to ten percent of the Federal-aid funds required to be apportioned to any State under each of sections 104(b)(1), (b)(3), and (b)(4) of title 23, U.S.C., shall be withheld on the first day of the fiscal year following such State's second or subsequent year of noncompliance under this part.

§ 384.403

49 CFR Ch. III (10–1–04 Edition)

(2) The Motor Carrier Safety Assistance Program (MCSAP) grant funds authorized under section 103(b)(1) of the Motor Carrier Safety Improvement Act of 1999 (Public Law 106–159, 113 Stat. 1753) shall be withheld from a State on the first day of the fiscal year following the fiscal year in which the FMCSA determined that the State had not returned to substantial compliance with subpart B of this part.

[67 FR 49763, July 31, 2002]

§ 384.403 Availability of funds withheld for noncompliance.

(a) Federal-aid highway funds withheld from a State under § 384.401(a)(1) or (b)(1) shall not thereafter be available for apportionment to the State.

(b) MCSAP funds withheld from a State under § 384.401(a)(2) or (b)(2) remain available until June 30 of the fiscal year in which they were withheld. If before June 30 the State submits a document signed by the Governor or his or her delegate certifying, and the FMCSA determines, that the State is now in substantial compliance with the standards of subpart B of this part, the withheld funds shall be restored to the State. After June 30, unrestored funds shall lapse and be allocated in accordance with § 350.313 of this subchapter to all States currently in substantial compliance with subpart B of this part.

[67 FR 49763, July 31, 2002]

§ 384.405 Decertification of State CDL program.

(a) *Prohibition on CDL licensing activities.* The Administrator may prohibit a State found to be in substantial noncompliance from performing any of the following four licensing transactions:

- (1) Issuance of initial CDLs.
- (2) Renewal of CDLs.
- (3) Transfer of out-of-State CDLs to the State.
- (4) Upgrade of CDLs.

(b) *Conditions considered in making decertification determination.* The Administrator will consider, but is not limited to, the following five conditions in determining whether the CDL program of a State in substantial noncompliance should be decertified:

- (1) The State computer system does not check the Commercial Driver's Li-

cense Information System (CDLIS) and/or National Driver Register (NDR) as required by § 383.73 of this subchapter when processing CDL applicants, drivers transferring a CDL issued by another State, CDL renewals and/or upgrades.

(2) The State does not disqualify drivers convicted of disqualifying offenses in commercial motor vehicles.

(3) The State does not transmit convictions for out of State drivers to the State where the driver is licensed.

(4) The State does not properly administer knowledge and/or skills tests to CDL applicants or drivers.

(5) The State fails to submit a corrective action plan for a substantial compliance deficiency or fails to implement a corrective action plan within the agreed upon time frame.

(c) *Standard for considering deficiencies.* The deficiencies described in paragraph (b) of this section must affect a substantial number of either CDL applicants or drivers.

(d) *Decertification: preliminary determination.* If the Administrator finds that a State is in substantial noncompliance with subpart B of this part, as indicated by the factors specified in § 384.405(b), among other things, the FMCSA will inform the State that it has made a preliminary determination of noncompliance and that the State's CDL program may therefore be decertified. Any response from the State, including factual or legal arguments or a plan to correct the noncompliance, must be submitted within 30 calendar days after receipt of the preliminary determination.

(e) *Decertification: final determination.* If, after considering all material submitted by the State in response to the FMCSA preliminary determination, the Administrator decides that substantial noncompliance exists which warrants decertification of the CDL program, he or she will issue a decertification order prohibiting the State from issuing CDLs until such time as the Administrator determines that the condition(s) causing the decertification has (have) been corrected.

(f) *Recertification of a State.* The Governor of the decertified State or his or her designated representative must

submit a certification and documentation that the condition causing the decertification has been corrected. If the FMCSA determines that the condition causing the decertification has been satisfactorily corrected, the Administrator will issue a recertification order, including any conditions that must be met in order to begin issuing CDLs in the State.

(g) *State's right to judicial review.* Any State aggrieved by an adverse decision under this section may seek judicial review under 5 U.S.C. Chapter 7.

(h) *Validity of previously issued CDLs.* A CDL issued by a State prior to the date the State is prohibited from issuing CDLs in accordance with provisions of paragraph (a) of this section, will remain valid until its stated expiration date.

[67 FR 49763, July 31, 2002]

§ 384.407 Emergency CDL grants.

The FMCSA may provide grants of up to \$1,000,000 per State from funds made available under 49 U.S.C. 31107(a), to assist States whose CDL programs may fail to meet the compliance requirements of subpart B of this part, but which are determined by the FMCSA to be making a good faith effort to comply with these requirements.

[67 FR 49764, July 31, 2002]

PART 385—SAFETY FITNESS PROCEDURES

Subpart A—General

Sec.

- 385.1 Purpose and scope.
- 385.3 Definitions and acronyms.
- 385.4 Matter incorporated by reference.
- 385.5 Safety fitness standard.
- 385.7 Factors to be considered in determining a safety rating.
- 385.9 Determination of a safety rating.
- 385.11 Notification of safety fitness determination.
- 385.13 Unsatisfactory rated motor carriers; prohibition on transportation; ineligibility for Federal contracts.
- 385.14 Motor carriers, brokers, and freight forwarders delinquent in paying civil penalties: prohibition on transportation.
- 385.15 Administrative review.
- 385.17 Change to safety rating based upon corrective actions.
- 385.19 Safety fitness information.

Subpart B—Safety Monitoring System for Mexico-Domiciled Carriers

- 385.101 Definitions.
- 385.103 Safety monitoring system.
- 385.105 Expedited action.
- 385.107 The safety audit.
- 385.109 The compliance review.
- 385.111 Suspension and revocation of Mexico-domiciled carrier registration.
- 385.113 Administrative review.
- 385.115 Reapplying for provisional registration.
- 385.117 Duration of safety monitoring system.
- 385.119 Applicability of safety fitness and enforcement procedures.

Subpart C—Certification of Safety Auditors, Safety Investigators, and Safety Inspectors

- 385.201 Who is qualified to perform a review of a motor carrier?
- 385.203 What are the requirements to obtain and maintain certification?
- 385.205 How can a person who has lost his or her certification be re-certified?

Subpart D—New Entrant Safety Assurance Program

- 385.301 What is a motor carrier required to do before beginning interstate operations?
- 385.303 How does a motor carrier register with the FMCSA?
- 385.305 What happens after the FMCSA receives a request for new entrant registration?
- 385.307 What happens after a motor carrier begins operations as a new entrant?
- 385.309 What is the purpose of the safety audit?
- 385.311 What will the safety audit consist of?
- 385.313 Who will conduct the safety audit?
- 385.315 Where will the safety audit be conducted?
- 385.317 Will a safety audit result in a safety fitness determination by the FMCSA?
- 385.319 What happens after the completion of the safety audit?
- 385.321 What failures of safety management practices disclosed by the safety audit will result in a notice to a new entrant that its DOT new entrant registration will be revoked?
- 385.323 May the FMCSA extend the period under § 385.319(c) for a new entrant to take corrective action to remedy its safety management practices?
- 385.325 What happens after a new entrant has been notified under § 385.319(c) to take corrective action to remedy its safety management practices?
- 385.327 What happens when a new entrant receives a notice under § 385.319(c) that

§ 385.1

its new entrant registration will be revoked and it believes the FMCSA made an error in its determination?

385.329 May a new entrant that has had its U.S. DOT registration revoked and its operations placed out of service (OOS) re-apply?

385.331 What happens if a new entrant operates a CMV after having been issued an order placing its interstate operations out of service (OOS)?

385.333 What happens at the end of the 18-month safety monitoring period?

385.335 If the FMCSA conducts a compliance review on a new entrant, will the new entrant also be subject to a safety audit?

385.337 What happens if a new entrant refuses to permit a safety audit to be performed on its operations?

Subpart E—Hazardous Materials Safety Permits

385.401 What is the purpose and scope of this subpart?

385.402 What definitions are used in this subpart?

385.403 Who must hold a safety permit?

385.405 How does a motor carrier apply for a safety permit?

385.407 What conditions must a motor carrier satisfy for FMCSA to issue a safety permit?

385.409 When may a temporary safety permit be issued to a motor carrier?

385.411 Must a motor carrier obtain a safety permit if it has a State permit?

385.413 What happens if a motor carrier receives a proposed safety rating that is less than Satisfactory?

385.415 What operational requirements apply to the transportation of a hazardous material for which a permit is required?

385.417 Is a motor carrier's safety permit number available to others?

385.419 How long is a safety permit effective?

385.421 Under what circumstances will a safety permit be subject to revocation or suspension by FMCSA?

385.423 Does a motor carrier have a right to an administrative review of a denial, suspension, or revocation of a safety permit?

APPENDIX A TO PART 385—EXPLANATION OF SAFETY AUDIT EVALUATION CRITERIA

APPENDIX B TO PART 385—EXPLANATION OF SAFETY RATING PROCESS

AUTHORITY: 49 U.S.C. 113, 504, 521(b), 5105(e), 5109, 5113, 13901–13905, 31136, 31144, 31148, and 31502; Sec. 350 of Pub. L. 107–87; and 49 CFR 1.73.

SOURCE: 53 FR 50968, Dec. 19, 1988, unless otherwise noted.

49 CFR Ch. III (10–1–04 Edition)

EDITORIAL NOTE: Nomenclature changes to part 385 appear at 66 FR 49872, Oct. 1, 2001.

Subpart A—General

§ 385.1 Purpose and scope.

(a) This part establishes the FMCSA's procedures to determine the safety fitness of motor carriers, to assign safety ratings, to direct motor carriers to take remedial action when required, and to prohibit motor carriers receiving a safety rating of "unsatisfactory" from operating a CMV.

(b) This part establishes the safety assurance program for a new entrant motor carrier initially seeking to register with FMCSA to conduct interstate operations. It also describes the consequences that will occur if the new entrant fails to maintain adequate basic safety management controls.

(c) This part establishes the safety permit program for a motor carrier to transport the types and quantities of hazardous materials listed in § 385.403.

(d) The provisions of this part apply to all motor carriers subject to the requirements of this subchapter, except non-business private motor carriers of passengers.

[65 FR 50934, Aug. 22, 2000, as amended at 67 FR 31982, May 13, 2002; 69 FR 39366, June 30, 2004]

§ 385.3 Definitions and acronyms.

Applicable safety regulations or requirements means 49 CFR chapter III, subchapter B—Federal Motor Carrier Safety Regulations or, if the carrier is an intrastate motor carrier subject to the hazardous materials safety permit requirements in subpart E of this part, the equivalent State standards; and 49 CFR chapter I, subchapter C—Hazardous Materials Regulations.

CMV means a commercial motor vehicle as defined in § 390.5 of this subchapter.

Commercial motor vehicle shall have the same meaning as described in § 390.5 of this subchapter, except that this definition will also apply to intrastate motor vehicles subject to the hazardous materials safety permit requirements of subpart E of this part.

FMCSA means the Federal Motor Carrier Safety Administration.

Federal Motor Carrier Safety Administration, DOT

§ 385.4

FMCSRs mean Federal Motor Carrier Safety Regulations (49 CFR parts 350–399).

HMRs means the Hazardous Materials Regulations (49 CFR parts 100–178).

New entrant is a motor carrier not domiciled in Mexico that applies for a United States Department of Transportation (DOT) identification number in order to initiate operations in interstate commerce.

New entrant registration is the registration (US DOT number) granted a new entrant before it can begin interstate operations in an 18-month monitoring period. A safety audit must be performed on a new entrant's operations within 18 months after receipt of its US DOT number and it must be found to have adequate basic safety management controls to continue operating in interstate commerce at the end of the 18-month period.

Preventable accident on the part of a motor carrier means an accident (1) that involved a commercial motor vehicle, and (2) that could have been averted but for an act, or failure to act, by the motor carrier or the driver.

Reviews. For the purposes of this part:

(1) *Compliance review* means an on-site examination of motor carrier operations, such as drivers' hours of service, maintenance and inspection, driver qualification, commercial drivers license requirements, financial responsibility, accidents, hazardous materials, and other safety and transportation records to determine whether a motor carrier meets the safety fitness standard. A compliance review may be conducted in response to a request to change a safety rating, to investigate potential violations of safety regulations by motor carriers, or to investigate complaints or other evidence of safety violations. The compliance review may result in the initiation of an enforcement action.

(2) *Safety Audit* means an examination of a motor carrier's operations to provide educational and technical assistance on safety and the operational requirements of the FMCSRs and applicable HMRs and to gather critical safety data needed to make an assessment of the carrier's safety performance and

basic safety management controls. Safety audits do not result in safety ratings.

(3) *Safety management controls* means the systems, policies programs, practices, and procedures used by a motor carrier to ensure compliance with applicable safety and hazardous materials regulations which ensure the safe movement of products and passengers through the transportation system, and to reduce the risk of highway accidents and hazardous materials incidents resulting in fatalities, injuries, and property damage.

RSPA means the Research and Special Programs Administration.

Safety ratings: (1) *Satisfactory safety rating* means that a motor carrier has in place and functioning adequate safety management controls to meet the safety fitness standard prescribed in § 385.5. Safety management controls are adequate if they are appropriate for the size and type of operation of the particular motor carrier.

(2) *Conditional safety rating* means a motor carrier does not have adequate safety management controls in place to ensure compliance with the safety fitness standard that could result in occurrences listed in § 385.5 (a) through (k).

(3) *Unsatisfactory safety rating* means a motor carrier does not have adequate safety management controls in place to ensure compliance with the safety fitness standard which has resulted in occurrences listed in § 385.5 (a) through (k).

(4) *Unrated carrier* means that a safety rating has not been assigned to the motor carrier by the FMCSA.

[53 FR 50968, Dec. 19, 1988, as amended at 56 FR 40805, Aug. 16, 1991; 62 FR 60042, Nov. 6, 1997; 67 FR 12779, Mar. 19, 2002; 67 FR 31983, May 13, 2002; 69 FR 39367, June 30, 2004]

§ 385.4 Matter incorporated by reference.

(a) *Incorporation by reference*. Part 385 includes references to certain matter or materials, as listed in paragraph (b) of this section. The text of the materials is not included in the regulations contained in part 385. The materials are hereby made a part of the regulations in part 385. The Director of the

§ 385.5

Federal Register has approved the materials incorporated by reference in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. For materials subject to change, only the specific version in the regulation is incorporated. Material is incorporated as it exists on the date of the approval and a notice of any changes in these materials will be published in the FEDERAL REGISTER.

(b) *Matter or materials referenced in part 385.* The matter or materials in this paragraph are incorporated by reference in the corresponding sections noted.

(1) “North American Standard Out-of-Service Criteria and Level VI Inspection Procedures and Out-of-Service Criteria for Commercial Highway Vehicles Transporting Transuranics and Highway Route Controlled Quantities of Radioactive Materials as defined in 49 CFR Part 173.403,” January 1, 2004. Information and copies may be obtained from the Commercial Vehicle Safety Alliance, 1101 17th Street, NW, Suite 803, Washington, DC 20036. Phone number (202) 775-1623.

(2) All of the materials incorporated by reference are available for inspection at: The Federal Motor Carrier Safety Administration, Office of Enforcement and Compliance, 400 Seventh Street, SW, Washington, DC 20590; and the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call (202) 741-6030, or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

[69 FR 39367, June 30, 2004]

§ 385.5 Safety fitness standard.

The Satisfactory safety rating is based on the degree of compliance with the safety fitness standard for motor carriers. For intrastate motor carriers subject to the hazardous materials safety permit requirements of subpart E of this part, the motor carrier must meet the equivalent State requirements. To meet the safety fitness standard, the motor carrier must demonstrate it has adequate safety management controls in place, which function effectively to ensure acceptable compliance with applicable safety re-

49 CFR Ch. III (10-1-04 Edition)

quirements to reduce the risk associated with:

- (a) Commercial driver’s license standard violations (part 383),
- (b) Inadequate levels of financial responsibility (part 387),
- (c) The use of unqualified drivers (part 391),
- (d) Improper use and driving of motor vehicles (part 392),
- (e) Unsafe vehicles operating on the highways (part 393),
- (f) Failure to maintain accident registers and copies of accident reports (part 390),
- (g) The use of fatigued drivers (part 395),
- (h) Inadequate inspection, repair, and maintenance of vehicles (part 396),
- (i) Transportation of hazardous materials, driving and parking rule violations (part 397),
- (j) Violation of hazardous materials regulations (parts 170 through 177), and
- (k) Motor vehicle accidents and hazardous materials incidents.

[53 FR 50968, Dec. 19, 1988, as amended at 58 FR 33776, June 21, 1993; 69 FR 39367, June 30, 2004]

§ 385.7 Factors to be considered in determining a safety rating.

The factors to be considered in determining the safety fitness and assigning a safety rating include information from safety reviews, compliance reviews and any other data. The factors may include all or some of the following:

- (a) Adequacy of safety management controls. The adequacy of controls may be questioned if their degree of formalization, automation, etc., is found to be substantially below the norm for similar carriers. Violations, accidents or incidents substantially above the norm for similar carriers will be strong evidence that management controls are either inadequate or not functioning properly.
- (b) Frequency and severity of regulatory violations.
- (c) Frequency and severity of driver/vehicle regulatory violations identified in roadside inspections.
- (d) Number and frequency of out-of-service driver/vehicle violations.

(e) Increase or decrease in similar types of regulatory violations discovered during safety or compliance reviews.

(f) Frequency of accidents; hazardous materials incidents; accident rate per million miles; preventable accident rate per million miles; and other accident indicators; and whether these accident and incident indicators have improved or deteriorated over time.

(g) The number and severity of violations of state safety rules, regulations, standards, and orders applicable to commercial motor vehicles and motor carrier safety that are compatible with Federal rules, regulations, standards, and orders.

[53 FR 50968, Dec. 19, 1988, as amended at 58 FR 33776, June 21, 1993]

§ 385.9 Determination of a safety rating.

(a) Following a compliance review of a motor carrier operation, the FMCSA, using the factors prescribed in § 385.7 as computed under the Safety Fitness Rating Methodology set forth in appendix B of this part, shall determine whether the present operations of the motor carrier are consistent with the safety fitness standard set forth in § 385.5, and assign a safety rating accordingly.

(b) Unless otherwise specifically provided in this part, a safety rating will be issued to a motor carrier within 30 days following the completion of a compliance review.

[62 FR 60042, Nov. 6, 1997]

§ 385.11 Notification of safety fitness determination.

(a) The FMCSA will provide a motor carrier written notice of any safety rating resulting from a compliance review as soon as practicable, but not later than 30 days after the review. The notice will take the form of a letter issued from the FMCSA's headquarters office and will include a list of FMCSR and HMR compliance deficiencies which the motor carrier must correct.

(b) If the safety rating is "satisfactory" or improves a previous "unsatisfactory" safety rating, it is final and becomes effective on the date of the notice.

(c) In all other cases, a notice of a proposed safety rating will be issued. It becomes the final safety rating after the following time periods:

(1) For motor carriers transporting hazardous materials in quantities requiring placarding or transporting passengers by CMV—45 days after the date of the notice.

(2) For all other motor carriers operating CMVs—60 days after the date of the notice.

(d) A proposed safety rating of "unsatisfactory" is a notice to the motor carrier that the FMCSA has made a preliminary determination that the motor carrier is "unfit" to continue operating in interstate commerce, and that the prohibitions in § 385.13 will be imposed after 45 or 60 days if necessary safety improvements are not made.

(e) A motor carrier may request the FMCSA to perform an administrative review of a proposed or final safety rating. The process and the time limits are described in § 385.15.

(f) A motor carrier may request a change to a proposed or final safety rating based upon its corrective actions. The process and the time limits are described in § 385.17.

[65 FR 50934, Aug. 22, 2000]

§ 385.13 Unsatisfactory rated motor carriers; prohibition on transportation; ineligibility for Federal contracts.

(a) Generally, a motor carrier rated "unsatisfactory" is prohibited from operating a CMV. Information on motor carriers, including their most current safety rating, is available from the FMCSA on the Internet at <http://www.safersys.org>, or by telephone at (800) 832-5660.

(1) Motor carriers transporting hazardous materials in quantities requiring placarding, and motor carriers transporting passengers in a CMV, are prohibited from operating a CMV beginning on the 46th day after the date of the FMCSA's notice of proposed "unsatisfactory" rating.

(2) All other motor carriers rated from reviews completed on or after November 20, 2000 are prohibited from operating a CMV beginning on the 61st

day after the date of the FMCSA's notice of proposed "unsatisfactory" rating. If the FMCSA determines the motor carrier is making a good-faith effort to improve its safety fitness, the FMCSA may allow the motor carrier to operate for up to 60 additional days.

(b) A Federal agency must not use a motor carrier that holds an "unsatisfactory" rating to transport passengers in a CMV or to transport hazardous materials in quantities requiring placarding.

(c) A Federal agency must not use a motor carrier for other CMV transportation if that carrier holds an "unsatisfactory" rating which became effective on or after January 22, 2001.

(d) *Penalties.* If a proposed "unsatisfactory" safety rating becomes final, the FMCSA will issue an order placing its interstate operations out of service. Any motor carrier that operates CMVs in violation of this section will be subject to the penalty provisions listed in 49 U.S.C. 521(b).

[65 FR 50934, Aug. 22, 2000]

§ 385.14 Motor carriers, brokers, and freight forwarders delinquent in paying civil penalties: prohibition on transportation.

(a) A CMV owner or operator that has failed to pay civil penalties imposed by the FMCSA, or has failed to abide by a payment plan, may be prohibited from operating CMVs in interstate commerce under 49 CFR 386.83.

(b) A broker, freight forwarder, or for-hire motor carrier that has failed to pay civil penalties imposed by the FMCSA, or has failed to abide by a payment plan, may be prohibited from operating in interstate commerce, and its registration may be suspended under the provisions of 49 CFR 386.84.

[65 FR 78427, Dec. 15, 2000]

§ 385.15 Administrative review.

(a) A motor carrier may request the FMCSA to conduct an administrative review if it believes the FMCSA has committed an error in assigning its proposed safety rating in accordance with § 385.15(c) or its final safety rating in accordance with § 385.11(b).

(b) The motor carrier's request must explain the error it believes the

FMCSA committed in issuing the safety rating. The motor carrier must include a list of all factual and procedural issues in dispute, and any information or documents that support its argument.

(c) The motor carrier must submit its request in writing to the Chief Safety Officer, Federal Motor Carrier Safety Administration, 400 Seventh Street, SW., Washington DC 20590.

(1) If a motor carrier has received a notice of a proposed "unsatisfactory" safety rating, it should submit its request within 15 days from the date of the notice. This time frame will allow the FMCSA to issue a written decision before the prohibitions outlined in § 385.13 (a)(1) and (2) take effect. Failure to petition within this 15-day period may prevent the FMCSA from issuing a final decision before such prohibitions take effect.

(2) A motor carrier must make a request for an administrative review within 90 days of the date of the proposed safety rating issued under § 385.11 (c) or a final safety rating issued under § 385.11 (b), or within 90 days after denial of a request for a change in rating under § 385.17(i).

(d) The FMCSA may ask the motor carrier to submit additional data and attend a conference to discuss the safety rating. If the motor carrier does not provide the information requested, or does not attend the conference, the FMCSA may dismiss its request for review.

(e) The FMCSA will notify the motor carrier in writing of its decision following the administrative review. The FMCSA will complete its review:

(1) Within 30 days after receiving a request from a hazardous materials or passenger motor carrier that has received a proposed or final "unsatisfactory" safety rating.

(2) Within 45 days after receiving a request from any other motor carrier that has received a proposed or final "unsatisfactory" safety rating.

(f) The decision constitutes final agency action.

(g) Any motor carrier may request a rating change under the provisions of § 385.17.

[65 FR 50935, Aug. 22, 2000]

§ 385.17 Change to safety rating based upon corrective actions.

(a) A motor carrier that has taken action to correct the deficiencies that resulted in a proposed or final rating of “conditional” or “unsatisfactory” may request a rating change at any time.

(b) A motor carrier must make this request in writing to the FMCSA Service Center for the geographic area where the carrier maintains its principal place of business. The addresses and geographical boundaries of the Service Centers are listed in § 390.27 of this chapter.

(c) The motor carrier must base its request upon evidence that it has taken corrective actions and that its operations currently meet the safety standard and factors specified in §§ 385.5 and 385.7. The request must include a written description of corrective actions taken, and other documentation the carrier wishes the FMCSA to consider.

(d) The FMCSA will make a final determination on the request for change based upon the documentation the motor carrier submits, and any additional relevant information.

(e) The FMCSA will perform reviews of requests made by motor carriers with a proposed or final “unsatisfactory” safety rating in the following time periods after the motor carrier’s request:

(1) Within 30 days for motor carriers transporting passengers in CMVs or placardable quantities of hazardous materials.

(2) Within 45 days for all other motor carriers.

(f) The filing of a request for change to a proposed or final safety rating under this section does not stay the 45-day period specified in § 385.13(a)(1) for motor carriers transporting passengers or hazardous materials. If the motor carrier has submitted evidence that corrective actions have been taken pursuant to this section and the FMCSA cannot make a final determination within the 45-day period, the period before the proposed safety rating becomes final may be extended for up to 10 days at the discretion of the FMCSA.

(g) The FMCSA may allow a motor carrier with a proposed rating of “un-

satisfactory” (except those transporting passengers in CMVs or placardable quantities of hazardous materials) to continue to operate in interstate commerce for up to 60 days beyond the 60 days specified in the proposed rating, if the FMCSA determines that the motor carrier is making a good faith effort to improve its safety status. This additional period would begin on the 61st day after the date of the notice of the proposed “unsatisfactory” rating.

(h) If the FMCSA determines that the motor carrier has taken the corrective actions required and that its operations currently meet the safety standard and factors specified in §§ 385.5 and 385.7, the agency will notify the motor carrier in writing of its upgraded safety rating.

(i) If the FMCSA determines that the motor carrier has not taken all the corrective actions required, or that its operations still fail to meet the safety standard and factors specified in §§ 385.5 and 385.7, the agency will notify the motor carrier in writing.

(j) Any motor carrier whose request for change is denied in accordance with paragraph (i) of this section may request administrative review under the procedures of § 385.15. The motor carrier must make the request within 90 days of the denial of the request for a rating change. If the proposed rating has become final, it shall remain in effect during the period of any administrative review.

[65 FR 50935, Aug. 22, 2000]

§ 385.19 Safety fitness information.

(a) Final ratings will be made available to other Federal and State agencies in writing, telephonically or by remote computer access.

(b) The final safety rating assigned to a motor carrier will be made available to the public upon request. Any person requesting the assigned rating of a motor carrier shall provide the FMCSA with the motor carrier’s name, principal office address, and, if known, the USDOT number or the ICCMC docket number, if any.

(c) Requests should be addressed to the Office of Data Analysis and Information Systems (MC RIS), Federal Motor Carrier Safety Administration,

§ 385.101

400 Seventh Street, SW., Washington, DC 20590. The information can also be found at the SAFER website: <http://www.safersys.org>.

(d) Oral requests by telephone to (800) 832-5660 will be given an oral response.

[62 FR 60043, Nov. 6, 1997, as amended at 66 FR 49872, Oct. 1, 2001]

Subpart B—Safety Monitoring System for Mexico-Domiciled Carriers

[67 FR 12771, Mar. 19, 2002]

§ 385.101 Definitions

Compliance Review means a compliance review as defined in § 385.3 of this part.

Provisional certificate of registration means the registration under § 368.6 of this subchapter that the FMCSA grants to a Mexico-domiciled motor carrier to provide interstate transportation of property within the United States solely within the municipalities along the United States-Mexico border and the commercial zones of such municipalities. It is provisional because it will be revoked if the registrant does not demonstrate that it is exercising basic safety management controls during the safety monitoring period established in this subpart.

Provisional operating authority means the registration under § 365.507 of this subchapter that the FMCSA grants to a Mexico-domiciled motor carrier to provide interstate transportation within the United States beyond the municipalities along the United States-Mexico border and the commercial zones of such municipalities. It is provisional because it will be revoked if the registrant is not assigned a Satisfactory safety rating following a compliance review conducted during the safety monitoring period established in this subpart.

Safety audit means an examination of a motor carrier's operations to provide educational and technical assistance on safety and the operational requirements of the FMCSRs and applicable HMRs and to gather critical safety data needed to make an assessment of the carrier's safety performance and basic safety management controls.

49 CFR Ch. III (10–1–04 Edition)

Safety audits do not result in safety ratings.

§ 385.103 Safety monitoring system.

(a) *General.* Each Mexico-domiciled carrier operating in the United States will be subject to an oversight program to monitor its compliance with applicable Federal Motor Carrier Safety Regulations (FMCSRs), Federal Motor Vehicle Safety Standards (FMVSSs), and Hazardous Materials Regulations (HMRs).

(b) *Roadside monitoring.* Each Mexico-domiciled carrier that receives provisional operating authority or a provisional Certificate of Registration will be subject to intensified monitoring through frequent roadside inspections.

(c) *CVSA decal.* Each Mexico-domiciled carrier granted provisional operating authority under part 365 of this subchapter must have on every commercial motor vehicle it operates in the United States a current decal attesting to a satisfactory inspection by a Commercial Vehicle Safety Alliance (CVSA) inspector.

(d) *Safety audit.* The FMCSA will conduct a safety audit on a Mexico-domiciled carrier within 18 months after the FMCSA issues the carrier a provisional Certificate of Registration under part 368 of this subchapter.

(e) *Compliance review.* The FMCSA will conduct a compliance review on a Mexico-domiciled carrier within 18 months after the FMCSA issues the carrier provisional operating authority under part 365 of this subchapter.

§ 385.105 Expedited action.

(a) A Mexico-domiciled motor carrier committing any of the following violations identified through roadside inspections, or by any other means, may be subjected to an expedited safety audit or compliance review, or may be required to submit a written response demonstrating corrective action:

(1) Using drivers not possessing, or operating without, a valid *Licencia Federal de Conductor*. An invalid *Licencia Federal de Conductor* includes one that is falsified, revoked, expired, or missing a required endorsement.

(2) Operating vehicles that have been placed out of service for violations of

the Commercial Vehicle Safety Alliance (CVSA) North American Standard Out-of-Service Criteria, without making the required repairs.

(3) Involvement in, due to carrier act or omission, a hazardous materials incident within the United States involving:

(i) A highway route controlled quantity of a Class 7 (radioactive) material as defined in § 173.403 of this title;

(ii) Any quantity of a Class 1, Division 1.1, 1.2, or 1.3 explosive as defined in § 173.50 of this title; or

(iii) Any quantity of a poison inhalation hazard Zone A or B material as defined in §§ 173.115, 173.132, or 173.133 of this title.

(4) Involvement in, due to carrier act or omission, two or more hazardous material incidents occurring within the United States and involving any hazardous material not listed in paragraph (a)(3) of this section and defined in chapter I of this title.

(5) Using a driver who tests positive for controlled substances or alcohol or who refuses to submit to required controlled substances or alcohol tests.

(6) Operating within the United States a motor vehicle that is not insured as required by part 387 of this chapter.

(7) Having a driver or vehicle out-of-service rate of 50 percent or more based upon at least three inspections occurring within a consecutive 90-day period.

(b) Failure to respond to an agency demand for a written response demonstrating corrective action within 30 days will result in the suspension of the carrier's provisional operating authority or provisional Certificate of Registration until the required showing of corrective action is submitted to the FMCSA.

(c) A satisfactory response to a written demand for corrective action does not excuse a carrier from the requirement that it undergo a safety audit or compliance review, as appropriate, during the provisional registration period.

§ 385.107 The safety audit.

(a) The criteria used in a safety audit to determine whether a Mexico-domiciled carrier exercises the necessary

basic safety management controls are specified in Appendix A to this part.

(b) If the FMCSA determines, based on the safety audit, that the Mexico-domiciled carrier has adequate basic safety management controls, the FMCSA will provide the carrier written notice of this finding as soon as practicable, but not later than 45 days after the completion of the safety audit. The carrier's Certificate of Registration will remain provisional and the carrier's on-highway performance will continue to be closely monitored for the remainder of the 18-month provisional registration period.

(c) If the FMCSA determines, based on the safety audit, that the Mexico-domiciled carrier's basic safety management controls are inadequate, it will initiate a suspension and revocation proceeding in accordance with § 385.111 of this subpart.

(d) The safety audit is also used to assess the basic safety management controls of Mexico-domiciled applicants for provisional operating authority to operate beyond United States municipalities and commercial zones on the United States-Mexico border under § 365.507 of this subchapter.

§ 385.109 The compliance review.

(a) The criteria used in a compliance review to determine whether a Mexico-domiciled carrier granted provisional operating authority under § 365.507 of this subchapter exercises the necessary basic safety management controls are specified in Appendix B to this part.

(b) *Satisfactory Rating.* If the FMCSA assigns a Mexico-domiciled carrier a Satisfactory rating following a compliance review conducted under this subpart, the FMCSA will provide the carrier written notice as soon as practicable, but not later than 45 days after the completion of the compliance review. The carrier's operating authority will remain in provisional status and its on-highway performance will continue to be closely monitored for the remainder of the 18-month provisional registration period.

(c) *Conditional Rating.* If the FMCSA assigns a Mexico-domiciled carrier a

§ 385.111

49 CFR Ch. III (10–1–04 Edition)

Conditional rating following a compliance review conducted under this subpart, it will initiate a revocation proceeding in accordance with § 385.111 of this subpart. The carrier's provisional operating authority will not be suspended prior to the conclusion of the revocation proceeding.

(d) *Unsatisfactory Rating.* If the FMCSA assigns a Mexico-domiciled carrier an Unsatisfactory rating following a compliance review conducted under this subpart, it will initiate a suspension and revocation proceeding in accordance with § 385.111 of this subpart.

§ 385.111 Suspension and revocation of Mexico-domiciled carrier registration.

(a) If a carrier is assigned an "Unsatisfactory" safety rating following a compliance review conducted under this subpart, or a safety audit conducted under this subpart determines that a carrier does not exercise the basic safety management controls necessary to ensure safe operations, the FMCSA will provide the carrier written notice, as soon as practicable, that its registration will be suspended effective 15 days from the service date of the notice unless the carrier demonstrates, within 10 days of the service date of the notice, that the compliance review or safety audit contains material error.

(b) For purposes of this section, material error is a mistake or series of mistakes that resulted in an erroneous safety rating or an erroneous determination that the carrier does not exercise the necessary basic safety management controls.

(c) If the carrier demonstrates that the compliance review or safety audit contained material error, its registration will not be suspended. If the carrier fails to show a material error in the safety audit, the FMCSA will issue an Order:

(1) Suspending the carrier's provisional operating authority or provisional Certificate of Registration and requiring it to immediately cease all further operations in the United States; and

(2) Notifying the carrier that its provisional operating authority or provisional Certificate of Registration will

be revoked unless it presents evidence of necessary corrective action within 30 days from the service date of the Order.

(d) If a carrier is assigned a "Conditional" rating following a compliance review conducted under this subpart, the provisions of subparagraphs (a) through (c) of this section will apply, except that its provisional registration will not be suspended under paragraph (c)(1) of this section.

(e) If a carrier subject to this subpart fails to provide the necessary documents for a safety audit or compliance review upon reasonable request, or fails to submit evidence of the necessary corrective action as required by § 385.105 of this subpart, the FMCSA will provide the carrier with written notice, as soon as practicable, that its registration will be suspended 15 days from the service date of the notice unless it provides all necessary documents or information. This suspension will remain in effect until the necessary documents or information are produced and:

(1) A safety audit determines that the carrier exercises basic safety management controls necessary for safe operations;

(2) The carrier is rated Satisfactory or Conditional after a compliance review; or

(3) The FMCSA determines, following review of the carrier's response to a demand for corrective action under § 385.105, that the carrier has taken the necessary corrective action.

(f) If a carrier commits any of the violations specified in § 385.105(a) of this subpart after the removal of a suspension issued under this section, the suspension will be automatically reinstated. The FMCSA will issue an Order requiring the carrier to cease further operations in the United States and demonstrate, within 15 days from the service date of the Order, that it did not commit the alleged violation(s). If the carrier fails to demonstrate that it did not commit the violation(s), the FMCSA will issue an Order revoking its provisional operating authority or provisional Certificate of Registration.

(g) If the FMCSA receives credible evidence that a carrier has operated in violation of a suspension order issued under this section, it will issue an

Order requiring the carrier to show cause, within 10 days of the service date of the Order, why its provisional operating authority or provisional Certificate of Registration should not be revoked. If the carrier fails to make the necessary showing, the FMCSA will revoke its registration.

(h) If a Mexico-domiciled motor carrier operates a commercial motor vehicle in violation of a suspension or out-of-service order, it is subject to the penalty provisions in 49 U.S.C. 521(b)(2)(A), not to exceed \$10,000 for each offense.

(i) Notwithstanding any provision of this subpart, a carrier subject to this subpart is also subject to the suspension and revocation provisions of 49 U.S.C. 13905 for repeated violations of DOT regulations governing its motor carrier operations.

§ 385.113 Administrative review.

(a) A Mexico-domiciled motor carrier may request the FMCSA to conduct an administrative review if it believes the FMCSA has committed an error in assigning a safety rating or suspending or revoking the carrier's provisional operating authority or provisional Certificate of Registration under this subpart.

(b) The carrier must submit its request in writing, in English, to the Associate Administrator for Enforcement, Federal Motor Carrier Safety Administration, 400 Seventh Street, SW., Washington DC 20590.

(c) The carrier's request must explain the error it believes the FMCSA committed in assigning the safety rating or suspending or revoking the carrier's provisional operating authority or provisional Certificate of Registration and include any information or documents that support its argument.

(d) The FMCSA will complete its administrative review no later than 10 days after the carrier submits its request for review. The Associate Administrator's decision will constitute the final agency action.

§ 385.115 Reapplying for provisional registration.

(a) A Mexico-domiciled motor carrier whose provisional operating authority or provisional Certificate of Registra-

tion has been revoked may reapply under part 365 or 368 of this subchapter, as appropriate, no sooner than 30 days after the date of revocation.

(b) The Mexico-domiciled motor carrier will be required to initiate the application process from the beginning. The carrier will be required to demonstrate how it has corrected the deficiencies that resulted in revocation of its registration and how it will ensure that it will have adequate basic safety management controls. It will also have to undergo a pre-authorization safety audit if it applies for provisional operating authority under part 365 of this subchapter.

§ 385.117 Duration of safety monitoring system.

(a) Each Mexico-domiciled carrier subject to this subpart will remain in the safety monitoring system for at least 18 months from the date FMCSA issues its provisional Certificate of Registration or provisional operating authority, except as provided in paragraphs (c) and (d) of this section.

(b) If, at the end of this 18-month period, the carrier's most recent safety audit or safety rating was Satisfactory and no additional enforcement or safety improvement actions are pending under this subpart, the Mexico-domiciled carrier's provisional operating authority or provisional Certificate of Registration will become permanent.

(c) If, at the end of this 18-month period, the FMCSA has not been able to conduct a safety audit or compliance review, the carrier will remain in the safety monitoring system until a safety audit or compliance review is conducted. If the results of the safety audit or compliance review are satisfactory, the carrier's provisional operating authority or provisional Certificate of Registration will become permanent.

(d) If, at the end of this 18-month period, the carrier's provisional operating authority or provisional Certificate of Registration is suspended under § 385.111(a) of this subpart, the carrier will remain in the safety monitoring system until the FMCSA either:

(1) Determines that the carrier has taken corrective action; or

§ 385.119

(2) Completes measures to revoke the carrier's provisional operating authority or provisional Certificate of Registration under § 385.111(c) of this subpart.

§ 385.119 Applicability of safety fitness and enforcement procedures.

At all times during which a Mexico-domiciled motor carrier is subject to the safety monitoring system in this subpart, it is also subject to the general safety fitness procedures established in subpart A of this part and to compliance and enforcement procedures applicable to all carriers regulated by the FMCSA.

Subpart C—Certification of Safety Auditors, Safety Investigators, and Safety Inspectors

SOURCE: 67 FR 12779, Mar. 19, 2002, unless otherwise noted.

§ 385.201 Who is qualified to perform a review of a motor carrier?

(a) An FMCSA employee, or a State or local government employee funded through MCSAP, who was qualified to perform a compliance review before June 17, 2002, may perform a compliance review, safety audit or roadside inspection if he or she complies with § 385.203(b).

(b) A person who was not qualified to perform a compliance review before June 17, 2002, may perform a compliance review, safety audit or roadside inspection after complying with the requirements of § 385.203(a).

§ 385.203 What are the requirements to obtain and maintain certification?

(a) After June 17, 2002, a person who is not qualified under § 385.201(a) may not perform a compliance review, safety audit, or roadside inspection unless he or she has been certified by FMCSA or a State or local agency applying the FMCSA standards after successfully completing classroom training and examinations on the FMCSRs and HMRs as described in detail on the FMCSA website (www.fmcsa.dot.gov). These employees must also comply with the maintenance of certification/qualification requirements of paragraph (b) of this section.

49 CFR Ch. III (10–1–04 Edition)

(b) *Maintenance of certification/qualification.* A person may not perform a compliance review, safety audit, or roadside inspection unless he or she meets the quality-control and periodic re-training requirements adopted by the FMCSA to ensure the maintenance of high standards and familiarity with amendments to the FMCSRs and HMRs. These maintenance of certification/qualification requirements are described in detail on the FMCSA website (www.fmcsa.dot.gov).

(c) The requirements of paragraphs (a) and (b) of this section for training, performance and maintenance of certification/qualification, which are described on the FMCSA website (www.fmcsa.dot.gov), are also available in hard copy from the Office of Professional Development and Training, FMCSA, 400 7th Street, SW., Washington, DC 20590.

§ 385.205 How can a person who has lost his or her certification be re-certified?

He or she must successfully complete the requirements of § 385.203(a) and (b).

Subpart D—New Entrant Safety Assurance Program

SOURCE: 67 FR 31983, May 13, 2002, unless otherwise noted.

§ 385.301 What is a motor carrier required to do before beginning interstate operations?

(a) Before a motor carrier of property or passengers begins interstate operations, it must register with the FMCSA and receive a USDOT number. In addition, for-hire motor carriers must obtain operating authority from FMCSA following the registration procedures described in 49 CFR part 365, unless providing transportation exempt from 49 CFR part 365 registration requirements.

(b) This subpart applies to motor carriers domiciled in the United States and Canada.

(c) A Mexico-domiciled motor carrier of property or passengers must register with the FMCSA by following the registration procedures described in 49 CFR part 365 or 368, as appropriate. The

Federal Motor Carrier Safety Administration, DOT

§385.313

regulations in this subpart do not apply to Mexico-domiciled carriers.

§385.303 How does a motor carrier register with the FMCSA?

A motor carrier may contact the FMCSA by internet (www.fmcsa.dot.gov); or Washington, DC headquarters by mail at, FMCSA, 400 7th Street SW., Washington, DC 20590; fax (703) 280-4003; or telephone 1-800-832-5660, and request the application materials for a new entrant motor carrier.

§385.305 What happens after the FMCSA receives a request for new entrant registration?

(a) The requester for new entrant registration will be directed to the FMCSA Internet website (www.fmcsa.dot.gov) to secure and/or complete the application package online.

(b) The application package will contain the following:

(1) Educational and technical assistance material regarding the requirements of the FMCSRs and HMRs, if applicable.

(2) The Form MCS-150, The Motor Carrier Identification Report.

(3) The Form MCS-150A, The Safety Certification for Applications for U.S. DOT Number.

(4) Application forms to obtain operating authority under 49 CFR 365, as appropriate.

(c) Upon completion of the application forms, the new entrant will be issued a USDOT number.

(d) For-hire motor carriers, unless providing transportation exempt from 49 CFR part 365 registration requirements, must also comply with the procedures established in 49 CFR part 365 to obtain operating authority before operating in interstate commerce.

§385.307 What happens after a motor carrier begins operations as a new entrant?

After a new entrant satisfies all applicable pre-operational requirements, it will be subject to the new entrant safety monitoring procedures for a period of 18 months. During this 18-month period:

(a) The new entrant's roadside safety performance will be closely monitored

to ensure the new entrant has basic safety management controls that are operating effectively. An accident rate or driver or vehicle violation rate that is higher than the industry average for similar motor carrier operations may cause the FMCSA to conduct an expedited safety audit or compliance review at any time.

(b) A safety audit will be conducted on the new entrant, once it has been in operation for enough time to have sufficient records to allow the agency to evaluate the adequacy of its basic safety management controls. This period will generally be at least 3 months.

(c) All records and documents required for the safety audit shall be made available for inspection upon request by an individual certified under FMCSA regulations to perform safety audits.

§385.309 What is the purpose of the safety audit?

The purpose of a safety audit is to:

(a) Provide educational and technical assistance to the new entrant; and

(b) Gather safety data needed to make an assessment of the new entrant's safety performance and adequacy of its basic safety management controls.

§385.311 What will the safety audit consist of?

The safety audit will consist of a review of the new entrant's safety management systems and a sample of required records to assess compliance with the FMCSRs, applicable HMRs and related record-keeping requirements as specified in Appendix A of this part. The areas for review include, but are not limited to, the following:

(a) Driver qualification;

(b) Driver duty status;

(c) Vehicle maintenance;

(d) Accident register; and

(e) Controlled substances and alcohol use and testing requirements.

§385.313 Who will conduct the safety audit?

An individual certified under the FMCSA regulations to perform safety audits will conduct the safety audit.

§ 385.315

§ 385.315 Where will the safety audit be conducted?

The safety audit will generally be conducted at the new entrant's business premises.

§ 385.317 Will a safety audit result in a safety fitness determination by the FMCSA?

A safety audit will not result in a safety fitness determination. Safety fitness determinations follow completion of a compliance review.

§ 385.319 What happens after the completion of the safety audit?

(a) Upon the completion of the safety audit, the auditor will review the findings with the new entrant.

(b) If the FMCSA determines that the safety audit discloses that the new entrant has adequate basic safety management controls, the FMCSA will provide the new entrant written notice as soon as practicable, but not later than 45 days after the completion of the safety audit, that it has adequate basic safety management controls. The new entrant's safety performance will continue to be closely monitored for the remainder of the 18-month period of new entrant registration.

(c) If the FMCSA determines that the findings of the safety audit disclose that the new entrant's basic safety management controls are inadequate, it will provide the new entrant written notice, as soon as practicable, but not later than 45 days after the completion of the safety audit, that its USDOT new entrant registration will be revoked and its operations placed out-of-service unless it takes the actions specified in the notice to remedy its safety management practices within:

(1) 45 days of the date of the notice if the new entrant transports passengers in a CMV designed or used to transport 16 or more passengers, including the driver, or transports hazardous materials requiring placarding; or

(2) 60 days of the date of the notice for all other new entrants.

49 CFR Ch. III (10–1–04 Edition)

§ 385.321 What failures of safety management practices disclosed by the safety audit will result in a notice to a new entrant that its DOT new entrant registration will be revoked?

The failures of safety management practices consist of a lack of basic safety management controls as described in Appendix A of this part and will result in a notice to a new entrant that its DOT new entrant registration will be revoked.

§ 385.323 May the FMCSA extend the period under § 385.319(c) for a new entrant to take corrective action to remedy its safety management practices?

(a) If a new entrant that transports passengers in a CMV designed or used to transport 16 or more passengers, including the driver, or transports hazardous materials in quantities requiring placarding, has submitted evidence that corrective actions have been taken pursuant to § 385.319(c) and the FMCSA cannot make a determination regarding the adequacy of the corrective actions within the 45 day period, the period may be extended for up to 10 days at the discretion of the FMCSA.

(b) The FMCSA may extend the 60-day period in § 385.319(c)(2), for up to an additional 60 days provided FMCSA determines that the new entrant is making a good faith effort to remedy its safety management practices.

§ 385.325 What happens after a new entrant has been notified under § 385.319(c) to take corrective action to remedy its safety management practices?

(a) If the new entrant provides evidence of corrective action acceptable to the FMCSA within the time period provided in § 385.319(c), including any extension of that period authorized under § 385.323, the FMCSA will provide written notification to the new entrant that its DOT new entrant registration will not be revoked and it may continue operations.

(b) If a new entrant, after being notified that it is required to take corrective action to improve its safety management practices, fails to submit a

written response demonstrating corrective action acceptable to FMCSA within the time specified in § 385.319(c), including any extension of that period authorized under § 385.323, the FMCSA will revoke its new entrant registration and issue an out-of-service order effective on:

(1) Day 46 from the date of notification if the new entrant transports passengers in a CMV designed to transport 16 or more passengers, including the driver, or transports hazardous materials in quantities requiring placarding; or

(2) Day 61 from the date of notification for all other new entrants; or

(3) If an extension has been granted under § 385.323, the day following the expiration of the extension date.

(c) The new entrant may not operate in interstate commerce on or after the effective date of the out-of-service order.

§ 385.327 What happens when a new entrant receives a notice under § 385.319(c) that its new entrant registration will be revoked and it believes the FMCSA made an error in its determination?

(a) If a new entrant receives a revocation notice, it may request the FMCSA to conduct an administrative review if it believes the FMCSA has committed an error in determining that its basic safety management controls were inadequate.

(1) The request must be made to the Field Administrator of the appropriate FMCSA Service Center.

(2) The request must explain the error the new entrant believes the FMCSA committed in its determination.

(3) The request must include a list of all factual and procedural issues in dispute, and any information or documents that support the new entrant's argument.

(b) The new entrant should submit its request no later than 15 days from the date of the notice of the inadequacy of its basic safety management controls. Submitting the request within 15 days will allow the FMCSA to issue a written decision before the prohibitions outlined in § 385.319(c) take effect. Failure to petition within this 15-day period may prevent the FMCSA

from issuing a final decision before the prohibitions take effect.

(c) The FMCSA may request that the new entrant submit additional data and attend a conference to discuss the issue(s) in dispute. If the new entrant does not attend the conference, or does not submit the requested data, the FMCSA may dismiss the new entrant's request for review.

(d) The FMCSA will complete its review and notify the new entrant in writing of its decision within 30 days after receiving a request for review from a hazardous materials or passenger new entrant and within 45 days from any other new entrant.

(e) A new entrant must make a request for an administrative review within:

(1) 90 days of the date when it was initially notified under § 385.319(c) that its basic safety management controls were inadequate; or

(2) 90 days after it was notified that its corrective action under § 385.319(c) was insufficient and its basic safety management controls remain inadequate.

(f) The Field Administrator's decision constitutes the final agency action.

(g) Notwithstanding this subpart, a new entrant is subject to the suspension and revocation provisions of 49 U.S.C. 13905 for violations of DOT regulations governing motor carrier operations.

§ 385.329 May a new entrant that has had its U.S. DOT registration revoked and its operations placed out of service (OOS) reapply?

(a) A new entrant whose U.S. DOT registration has been revoked and whose operations have been placed OOS by the FMCSA may reapply under § 385.301 no sooner than 30 days after the date of revocation.

(b) The motor carrier will be required to initiate the process from the beginning, and will be required to demonstrate that it has corrected the deficiencies that resulted in revocation of its registration and otherwise will ensure that it will have adequate basic safety management controls.

§ 385.331

§ 385.331 What happens if a new entrant operates a CMV after having been issued an order placing its interstate operations out of service (OOS)?

If a new entrant operates a CMV in violation of an out-of-service (OOS) order and § 385.325(b), it is subject to the penalty provisions in 49 U.S.C. 521(b)(2)(A), not to exceed \$10,000 for each offense.

§ 385.333 What happens at the end of the 18-month safety monitoring period?

(a) If a safety audit has been performed within the 18-month period, and the new entrant is not currently subject to an order placing its operations out-of-service under § 385.325(b) or under a notice ordering it to take specified actions to remedy its safety management controls under § 385.319(c), the FMCSA will remove the new entrant designation and notify the new entrant in writing that its registration has become permanent. Thereafter, the FMCSA will evaluate the motor carrier on the same basis as any other carrier.

(b) If a new entrant is determined to be “unfit” after a compliance review its new entrant registration will be revoked. (See § 385.13)

(c) A new entrant that has reached the conclusion of the 18-month period but is under an order to correct its safety management practices under § 385.319(c) will have its new entrant registration removed following FMCSA’s determination that the specified actions have been taken to remedy its safety management practices. The motor carrier will be notified in writing that its new entrant designation is removed and that its registration has become permanent. Thereafter, the FMCSA will evaluate the motor carrier on the same basis as any other carrier.

(d) If a safety audit or compliance review has not been performed by the end of the 18-month monitoring period through no fault of the motor carrier, the carrier will be permitted to continue operating as a new entrant until a safety audit or compliance review is performed and a final determination is made regarding the adequacy of its safety management controls. Based on

49 CFR Ch. III (10–1–04 Edition)

the results of the safety audit or compliance review, the FMCSA will either:

(1) Remove the new entrant designation and notify the new entrant in writing that its registration has become permanent; or

(2) Revoke the new entrant registration in accordance with § 385.319(c).

§ 385.335 If the FMCSA conducts a compliance review on a new entrant, will the new entrant also be subject to a safety audit?

If the FMCSA conducts a compliance review on a new entrant that has not previously been subject to a safety audit and issues a safety fitness determination, the new entrant will not have to undergo a safety audit under this subpart. However, the new entrant will continue to be subject to the 18-month safety-monitoring period prior to removal of the new entrant designation.

§ 385.337 What happens if a new entrant refuses to permit a safety audit to be performed on its operations?

(a) If a new entrant refuses to permit a safety audit to be performed on its operations, the FMCSA will provide the carrier with written notice that its registration will be revoked and its operations placed out of service unless the new entrant agrees in writing, within 10 days from the service date of the notice, to permit the safety audit to be performed. The initial refusal to permit a safety audit to be performed may subject the new entrant to the penalty provisions in 49 U.S.C. 521(b)(2)(A).

(b) If the new entrant does not agree to undergo a safety audit as specified in paragraph (a) of this section, its registration will be revoked and its interstate operations placed out of service effective on the 11th day from the service date of the notice issued under paragraph (a) of this section.

Subpart E—Hazardous Materials Safety Permits

SOURCE: 69 FR 39367, June 30, 2004, unless otherwise noted.

§ 385.401 What is the purpose and scope of this subpart?

(a) This subpart contains the requirements for obtaining and maintaining a safety permit to transport certain hazardous materials. No one may transport the materials listed in § 385.403 without a safety permit required by this subpart.

(b) This subpart includes:

(1) Definitions of terms used in this subpart;

(2) The list of hazardous materials that require a safety permit if transported in commerce;

(3) The requirements and procedures a carrier must follow in order to be issued a safety permit and maintain a safety permit;

(4) The procedures for a motor carrier to follow to initiate an administrative review of a denial, suspension, or revocation of a safety permit.

§ 385.402 What definitions are used in this subpart?

(a) The definitions in parts 390 and 385 of this chapter apply to this subpart, except where otherwise specifically noted.

(b) As used in this part,

Hazardous material has the same meaning as under § 171.8 of this title: A substance or material that the Secretary of Transportation has determined is capable of posing an unreasonable risk to health, safety, and property when transported in commerce, and has designated as hazardous under Sec. 5103 of Federal hazardous materials transportation law (49 U.S.C. 5103). The term includes hazardous substances, hazardous wastes, marine pollutants, elevated temperature materials, materials designated as hazardous in the Hazardous Materials Table (see § 172.101 of this title), and materials that meet the defining criteria for hazard classes and divisions in part 173 of this title.

Hazmat employee has the same meaning as under § 171.8 of this title: A person who is employed by a hazmat employer as defined under § 171.8 of this title, and who in the course of employment directly affects hazardous materials transportation safety. This term includes an owner-operator of a motor vehicle that transports hazardous ma-

terials in commerce. This term includes an individual who, during the course of employment:

(1) Loads, unloads, or handles hazardous materials;

(2) Manufactures, tests, reconditions, repairs, modifies, marks, or otherwise represents containers, drums, or packaging as qualified for use in the transportation of hazardous materials;

(3) Prepares hazardous materials for transportation;

(4) Is responsible for the safe transportation of hazardous materials; or

(5) Operates a vehicle used to transport hazardous materials.

Liquefied natural gas (LNG) means a Division 2.1 liquefied natural gas material that is transported in a liquid state with a methane content of 85 percent or more.

Safety permit means a document issued by FMCSA that contains a permit number and confers authority to transport in commerce the hazardous materials listed in § 385.403.

Shipment means the offering or loading of hazardous materials at one loading facility using one transport vehicle, or the transport of that transport vehicle.

§ 385.403 Who must hold a safety permit?

After the date following January 1, 2005, that a motor carrier is required to file a Motor Carrier Identification Report Form (MCS-150) according to the schedule set forth in § 390.19(a) of this chapter, the motor carrier may not transport in interstate or intrastate commerce any of the following hazardous materials, in the quantity indicated for each, unless the motor carrier holds a safety permit:

(a) A highway route-controlled quantity of a Class 7 (radioactive) material, as defined in § 173.403 of this title;

(b) More than 25 kg (55 pounds) of a Division 1.1, 1.2, or 1.3 (explosive) material or an amount of a Division 1.5 (explosive) material requiring placarding under part 172 of this title;

(c) More than one liter (1.08 quarts) per package of a "material poisonous by inhalation," as defined in § 171.8 of this title, that meets the criteria for "hazard zone A," as specified in § 173.116(a) or § 173.133(a) of this title;

§ 385.405

49 CFR Ch. III (10–1–04 Edition)

(d) A “material poisonous by inhalation,” as defined in §171.8 of this title, that meets the criteria for “hazard zone B,” as specified in §173.116(a) or §173.133(a) of this title in a bulk packaging (capacity greater than 450 L [119 gallons]);

(e) A “material poisonous by inhalation,” as defined in §171.8 of this title, that meets the criteria for “hazard zone C,” or “hazard zone D,” as specified in §173.116(a) of this title, in a packaging having a capacity equal to or greater than 13,248 L (3,500) gallons; or

(f) A shipment of compressed or refrigerated liquefied methane or liquefied natural gas, or other liquefied gas with a methane content of at least 85 percent, in a bulk packaging having a capacity equal to or greater than 13,248 L (3,500 gallons).

§ 385.405 How does a motor carrier apply for a safety permit?

(a) *Application form(s)*. To apply for a new safety permit or renewal of the safety permit, a motor carrier must complete and submit Form MCS–150B, Combined Motor Carrier Identification Report and HM Permit Application.

(1) The Form MCS–150B will also satisfy the requirements for obtaining and renewing a DOT identification number; there is no need to complete Form MCS–150, Motor Carrier Identification Report.

(2) A new entrant, as defined in §385.3, must also submit Form MCS–150A, Safety Certification for Application (Safety Certification for Application for USDOT Number) (see subpart D of this part).

(b) *Where to get forms and instructions*. The forms listed in paragraph (a) of this section, and instructions for completing the forms, may be obtained on the Internet at <http://www.fmcsa.dot.gov>, or by contacting FMCSA at Federal Motor Carrier Safety Administration, MC–RIS, Room 8214, 400 7th Street, SW, Washington, DC 20590, Telephone: 1–800–832–5660.

(c) *Signature and certification*. An official of the motor carrier must sign and certify that the information is correct on each form the motor carrier submits.

(d) *Updating information on Form MCS–150B*. A motor carrier holding a

safety permit must report to FMCSA any change in the information on its Form MCS–150B within 30 days of the change. The motor carrier must use Form MCS–150B to report the new information (contact information in paragraph (b) of this section).

§ 385.407 What conditions must a motor carrier satisfy for FMCSA to issue a safety permit?

(a) *Motor carrier safety performance*.

(1) The motor carrier must have a “Satisfactory” safety rating assigned by either FMCSA, pursuant to the Safety Fitness Procedures of this part, or the State in which the motor carrier has its principal place of business, if the State has adopted and implemented safety fitness procedures that are equivalent to the procedures in subpart A of this part; and,

(2) FMCSA will not issue a safety permit to a motor carrier that:

(i) Does not certify that it has a satisfactory security program as required in §385.407(b);

(ii) Has a crash rate in the top 30 percent of the national average as indicated in the FMCSA Motor Carrier Management Information System (MCMIS); or

(iii) Has a driver, vehicle, hazardous materials, or total out-of-service rate in the top 30 percent of the national average as indicated in the MCMIS.

(b) *Satisfactory security program*. The motor carrier must certify that it has a satisfactory security program, including:

(1) A security plan meeting the requirements of part 172, subpart I of this title, and addressing how the carrier will ensure the security of the written route plan required by this part;

(2) A communications plan that allows for contact between the commercial motor vehicle operator and the motor carrier to meet the periodic contact requirements in §385.415(c)(1); and

(3) Successful completion by all hazmat employees of the security training required in §172.704(a)(4) and (a)(5) of this title.

(c) *Registration with the Research and Special Programs Administration (RSPA)*. The motor carrier must be registered with RSPA in accordance with part 107, subpart G of this title.

§ 385.409 When may a temporary safety permit be issued to a motor carrier?

(a) *Temporary safety permit.* If a motor carrier does not meet the criteria in § 385.407(a), FMCSA may issue it a temporary safety permit. To obtain a temporary safety permit a motor carrier must certify on Form MCS-150B that it is operating in full compliance with the HMRs; with the FMCSRs, and/or comparable State regulations, whichever is applicable; and with the minimum financial responsibility requirements in part 387 of this chapter or in State regulations, whichever is applicable.

(b) FMCSA will not issue a temporary safety permit to a motor carrier that:

(1) Does not certify that it has a satisfactory security program as required in § 385.407(b);

(2) Has a crash rate in the top 30 percent of the national average as indicated in the FMCSA's MCMIS; or

(3) Has a driver, vehicle, hazardous materials, or total out-of-service rate in the top 30 percent of the national average as indicated in the MCMIS.

(c) A temporary safety permit shall be valid for 180 days after the date of issuance or until the motor carrier is assigned a new safety rating, whichever occurs first.

(1) A motor carrier that receives a Satisfactory safety rating will be issued a safety permit (see § 385.421).

(2) A motor carrier that receives a less than Satisfactory safety rating is ineligible for a safety permit and will be subject to revocation of its temporary safety permit.

(d) If a motor carrier has not received a safety rating within the 180-day time period, FMCSA will extend the effective date of the temporary safety permit for an additional 60 days, provided the motor carrier demonstrates that it is continuing to operate in full compliance with the FMCSRs and HMRs.

§ 385.411 Must a motor carrier obtain a safety permit if it has a State permit?

Yes. However, if FMCSA is able to verify that a motor carrier has a safety permit issued by a State under a program that FMCSA has determined to

be equivalent to the provisions of this subpart, FMCSA will immediately issue a safety permit to the motor carrier upon receipt of an application in accordance with § 385.405, without further inspection or investigation.

§ 385.413 What happens if a motor carrier receives a proposed safety rating that is less than Satisfactory?

(a) If a motor carrier does not already have a safety permit, it will not be issued a safety permit (including a temporary safety permit) unless and until a Satisfactory safety rating is issued to the motor carrier.

(b) If a motor carrier holds a safety permit (including a temporary safety permit), the safety permit will be subject to revocation or suspension (see § 385.421).

§ 385.415 What operational requirements apply to the transportation of a hazardous material for which a permit is required?

(a) *Information that must be carried in the vehicle.* During transportation, the following must be maintained in each commercial motor vehicle that transports a hazardous material listed in § 385.403 and must be made available to an authorized official of a Federal, State, or local government agency upon request.

(1) A copy of the safety permit or another document showing the permit number, provided that document clearly indicates the number is the FMCSA Safety Permit number;

(2) A written route plan that meets the requirements of § 397.101 of this chapter for highway route-controlled Class 7 (radioactive) materials or § 397.67 of this chapter for Division 1.1, 1.2, and 1.3 (explosive) materials; and

(3) The telephone number, including area code or country code, of an employee of the motor carrier or representative of the motor carrier who is familiar with the routing of the permitted material. The motor carrier employee or representative must be able to verify that the shipment is within the general area for the expected route for the permitted material. The telephone number, when called, must be answered directly by the motor carrier or its representative

at all times while the permitted material is in transportation including storage incidental to transportation. Answering machines are not sufficient to meet this requirement.

(b)(1) *Inspection of vehicle transporting Class 7 (radioactive) materials.* Before a motor carrier may transport a highway route controlled quantity of a Class 7 (radioactive) material, the motor carrier must have a pre-trip inspection performed on each motor vehicle to be used to transport a highway route controlled quantity of a Class 7 (radioactive) material, in accordance with the requirements of the “North American Standard Out-of-Service Criteria and Level VI Inspection Procedures and Out-of-Service Criteria for Commercial Highway Vehicles Transporting Transuranics and Highway Route Controlled Quantities of Radioactive Materials as defined in 49 CFR Part 173.403,” January 1, 2004, which is incorporated by reference. The Director of the Federal Register has approved the materials incorporated by reference in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Information and copies may be obtained from the Commercial Vehicle Safety Alliance, 1101 17th Street, NW, Suite 803, Washington, DC 20036. Phone number (202) 775-1623.

(2) All materials incorporated by reference are available for inspection at the Federal Motor Carrier Safety Administration, Office of Enforcement and Compliance, 400 Seventh Street, SW., Washington, DC 20590; and the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call (202) 741-6030, or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

(c) *Additional requirements.* A motor carrier transporting hazardous materials requiring a permit under this part must also meet the following requirements:

(1) The operator of a motor vehicle used to transport a hazardous material listed in § 385.403 must follow the communications plan required in § 385.407(b)(2) to make contact with the carrier at the beginning and end of each duty tour, and at the pickup and

delivery of each permitted load. Contact may be by telephone, radio or via an electronic tracking or monitoring system. The motor carrier or driver must maintain a record of communications for 6 months after the initial acceptance of a shipment of hazardous material for which a safety permit is required. The record of communications must contain the name of the driver, identification of the vehicle, permitted material(s) being transported, and the date, location, and time of each contact required under this section.

(2) The motor carrier should contact the Transportation Security Administration’s Transportation Security Coordination Center (703-563-3236 or 703-563-3237) at any time the motor carrier suspects its shipment of a hazardous material listed in § 385.403 is lost, stolen or otherwise unaccounted for.

§ 385.417 Is a motor carrier’s safety permit number available to others?

Upon request, a motor carrier must provide the number of its safety permit to a person who offers a hazardous material listed in § 385.403 for transportation in commerce. A motor carrier’s permit number will also be available to the public on the FMCSA Safety and Fitness Electronic Records System at <http://www.safersys.org>.

§ 385.419 How long is a safety permit effective?

Unless suspended or revoked, a safety permit (other than a temporary safety permit) is effective for two years, except that:

(a) A safety permit will be subject to revocation if a motor carrier fails to submit a renewal application (Form MCS-150B) in accordance with the schedule set forth for filing Form MCS-150 in § 390.19(a) of this chapter; and

(b) An existing safety permit will remain in effect pending FMCSA’s processing of an application for renewal if a motor carrier submits the required application (Form MS-150B) in accordance with the schedule set forth in § 390.19(a)(2) and (a)(3) of this chapter.

§ 385.421 Under what circumstances will a safety permit be subject to revocation or suspension by FMCSA?

(a) *Grounds.* A safety permit will be subject to revocation or suspension by FMCSA for the following reasons:

(1) A motor carrier fails to submit a renewal application (Form MCS-150B) in accordance with the schedule set forth in § 390.19(a)(2) and (a)(3) of this chapter;

(2) A motor carrier provides any false or misleading information on its application (Form MCS-150B), on Form MCS-150A (when required), or as part of updated information it is providing on Form MCS-150B (see § 385.405(d));

(3) A motor carrier is issued a final safety rating that is less than Satisfactory;

(4) A motor carrier fails to maintain a satisfactory security plan as set forth in § 385.407(b);

(5) A motor carrier fails to comply with applicable requirements in the FMCSRs, the HMRs, or compatible State requirements governing the transportation of hazardous materials, in a manner showing that the motor carrier is not fit to transport the hazardous materials listed in § 385.403;

(6) A motor carrier fails to comply with an out-of-service order;

(7) A motor carrier fails to comply with any other order issued under the FMCSRs, the HMRs, or compatible State requirements governing the transportation of hazardous materials, in a manner showing that the motor carrier is not fit to transport the hazardous materials listed in § 385.403;

(8) A motor carrier fails to maintain the minimum financial responsibility required by § 387.9 of this chapter or an applicable State requirement;

(9) A motor carrier fails to maintain current hazardous materials registration with the Research and Special Programs Administration; or

(10) A motor carrier loses its operating rights or has its registration suspended in accordance with § 386.83 or § 386.84 of this chapter for failure to pay a civil penalty or abide by a payment plan.

(b) *Determining whether a safety permit is revoked or suspended.* A motor carrier's safety permit will be suspended

the first time any of the conditions specified in paragraph (a) of this section are found to apply to the motor carrier. A motor carrier's safety permit will be revoked if any of the conditions specified in paragraph (a) of this section are found to apply to the motor carrier and the carrier's safety permit has been suspended in the past for any of the reasons specified in paragraph (a) of this section.

(c) *Effective date of suspension or revocation.* A suspension or revocation of a safety permit is effective:

(1) Immediately after FMCSA determines that an imminent hazard exists, after FMCSA issues a final safety rating that is less than Satisfactory, or after a motor carrier loses its operating rights or has its registration suspended for failure to pay a civil penalty or abide by a payment plan;

(2) Thirty (30) days after service of a written notification that FMCSA proposes to suspend or revoke a safety permit, if the motor carrier does not submit a written request for administrative review within that time period; or

(3) As specified in § 385.423(c), when the motor carrier submits a written request for administrative review of FMCSA's proposal to suspend or revoke a safety permit.

(4) A motor carrier whose safety permit has been revoked will not be issued a replacement safety permit or temporary safety permit for 365 days from the time of revocation.

§ 385.423 Does a motor carrier have a right to an administrative review of a denial, suspension, or revocation of a safety permit?

A motor carrier has a right to an administrative review pursuant to the following procedures and conditions:

(a) *Less than Satisfactory safety rating.* If a motor carrier is issued a proposed safety rating that is less than Satisfactory, it has the right to request (1) an administrative review of a proposed safety rating, as set forth in § 385.15, and (2) a change to a proposed safety rating based on corrective action, as set forth in § 385.17. After a motor carrier has had an opportunity for administrative review of, or change to, a proposed safety rating, FMCSA's issuance of a final safety rating constitutes

final agency action, and a motor carrier has no right to further administrative review of FMCSA's denial, suspension, or revocation of a safety permit when the motor carrier has been issued a final safety rating that is less than Satisfactory.

(b) *Failure to pay civil penalty or abide by payment plan.* If a motor carrier is notified that failure to pay a civil penalty will result in suspension or termination of its operating rights, it has the right to an administrative review of that proposed action in a show cause proceeding, as set forth in § 386.83(b) or § 386.84(b) of this chapter. The decision by FMCSA's Chief Safety Officer in the show cause proceeding constitutes final agency action, and a motor carrier has no right to further administrative review of FMCSA's denial, suspension, or revocation of a safety permit when the motor carrier has lost its operating rights or had its registration suspended for failure to pay a civil penalty or abide by a payment plan.

(c) *Other grounds.* Under circumstances other than those set forth in paragraphs (a) and (b) of this section, a motor carrier may submit a written request for administrative review within 30 days after service of a written notification that FMCSA has denied a safety permit, that FMCSA has immediately suspended or revoked a safety permit, or that FMCSA has proposed to suspend or revoke a safety permit. The rules for computing time limits for service and requests for extension of time in §§ 386.31 and 386.33 of this chapter apply to the proceedings on a request for administrative review under this section.

(1) The motor carrier must send or deliver its written request for administrative review to FMCSA Chief Safety Officer, with a copy to FMCSA Chief Counsel, at the following addresses:

(i) FMCSA Chief Safety Officer, Federal Motor Carrier Safety Administration, c/o Adjudications Counsel (MC-CC), 400 Seventh Street, SW., Washington, DC 20590.

(ii) FMCSA Chief Counsel, Federal Motor Carrier Safety Administration, Office of the Chief Counsel, Room 8125, 400 Seventh Street, SW., Washington, DC 20590.

(2) A request for administrative review must state the specific grounds for review and include all information, evidence, and arguments upon which the motor carrier relies to support its request for administrative review.

(3) Within 30 days after service of a written request for administrative review, the Office of the Chief Counsel shall submit to the Chief Safety Officer a written response to the request for administrative review. The Office of the Chief Counsel must serve a copy of its written response on the motor carrier requesting administrative review.

(4) The Chief Safety Officer may decide a motor carrier's request for administrative review on the written submissions, hold a hearing personally, or refer the request to an administrative law judge for a hearing and recommended decision. The Chief Safety Officer or administrative law judge is authorized to specify, and must notify the parties of, specific procedural rules to be followed in the proceeding (which may include the procedural rules in part 386 of this chapter that are considered appropriate).

(5) If a request for administrative review is referred to an administrative law judge, the recommended decision of the administrative law judge becomes the final decision of the Chief Safety Officer 45 days after service of the recommended decision is served, unless either the motor carrier or the Office of the Chief Counsel submits a petition for review to the Chief Safety Officer (and serves a copy of its petition on the other party) within 15 days after service of the recommended decision. In response to a petition for review of a recommended decision of an administrative law judge:

(i) The other party may submit a written reply within 15 days of service of the petition for review.

(ii) The Chief Safety Officer may adopt, modify, or set aside the recommended decision of an administrative law judge, and may also remand the petition for review to the administrative law judge for further proceedings.

(6) The Chief Safety Officer will issue a final decision on any request for administrative review when:

(i) The request for administrative review has not been referred to an administrative law judge;

(ii) A petition for review of a recommended decision by an administrative law judge has not been remanded to the administrative law judge for further proceedings; or

(iii) An administrative law judge has held further proceedings on a petition for review and issued a supplementary recommended decision.

(7) The decision of the Chief Safety Officer (including a recommended decision of an administrative law judge that becomes the decision of the Chief Safety Officer under paragraph (c)(5) of this section) constitutes final agency action, and there is no right to further administrative reconsideration or review.

(8) Any appeal of a final agency action under this section must be taken to an appropriate United States Court of Appeals. Unless the Court of Appeals issues a stay pending appeal, the final agency action shall not be suspended while the appeal is pending.

APPENDIX A TO PART 385—EXPLANATION OF SAFETY AUDIT EVALUATION CRITERIA

I. GENERAL

(a) Section 210 of the Motor Carrier Safety Improvement Act (49 U.S.C. 31144) directed the Secretary to establish a procedure whereby each owner and each operator granted new authority must undergo a safety review within 18 months after the owner or operator begins operations. The Secretary was also required to establish the elements of this safety review, including basic safety management controls. The Secretary, in turn, delegated this to the FMCSA.

(b) To meet the safety standard, a motor carrier must demonstrate to the FMCSA that it has basic safety management controls in place which function adequately to ensure minimum acceptable compliance with the applicable safety requirements. A “safety audit evaluation criteria” was developed by the FMCSA, which uses data from the safety audit and roadside inspections to determine that each owner and each operator applicant for new entrant registration, provisional operating authority, or provisional Certificate of Registration has basic safety management controls in place. The term “safety audit” is the equivalent to the “safety review” required by Sec. 210. Using “safety audit” avoids any possible confusion with the safety reviews previously conducted by the agency

that were discontinued on September 30, 1994.

(c) The safety audit evaluation process developed by the FMCSA is used to:

1. Evaluate basic safety management controls and determine if each owner and each operator is able to operate safely in interstate commerce; and

2. Identify owners and operators who are having safety problems and need improvement in their compliance with the FMCSRs and the HMRs, before they are granted permanent registration.

II. SOURCE OF THE DATA FOR THE SAFETY AUDIT EVALUATION CRITERIA

(a) The FMCSA’s evaluation criteria are built upon the operational tool known as the safety audit. This tool was developed to assist auditors and investigators in assessing the adequacy of a new entrant’s basic safety management controls.

(b) The safety audit is a review of a Mexico-domiciled or new entrant motor carrier’s operation and is used to:

1. Determine if a carrier has the basic safety management controls required by 49 U.S.C. 31144;

2. Meet the requirements of Section 350 of the DOT Appropriations Act; and

3. In the event that a carrier is found not to be in compliance with applicable FMCSRs and HMRs, the safety audit can be used to educate the carrier on how to comply with U.S. safety rules.

(c) Documents such as those contained in the driver qualification files, records of duty status, vehicle maintenance records, and other records are reviewed for compliance with the FMCSRs and HMRs. Violations are cited on the safety audit. Performance-based information, when available, is utilized to evaluate the carrier’s compliance with the vehicle regulations. Recordable accident information is also collected.

III. DETERMINING IF THE CARRIER HAS BASIC SAFETY MANAGEMENT CONTROLS

(a) During the safety audit, the FMCSA gathers information by reviewing a motor carrier’s compliance with “acute” and “critical” regulations of the FMCSRs and HMRs.

(b) Acute regulations are those where non-compliance is so severe as to require immediate corrective actions by a motor carrier regardless of the overall basic safety management controls of the motor carrier.

(c) Critical regulations are those where noncompliance relates to management and/or operational controls. These are indicative of breakdowns in a carrier’s management controls.

(d) The list of the acute and critical regulations, which are used in determining if a

Pt. 385, App. A

49 CFR Ch. III (10–1–04 Edition)

carrier has basic safety management controls in place, is included in Appendix B, VII. List of Acute and Critical Regulations.

(e) Noncompliance with acute and critical regulations are indicators of inadequate safety management controls and usually higher than average accident rates.

(f) Parts of the FMCSRs and the HMRs having similar characteristics are combined together into six regulatory areas called “factors.” The regulatory factors, evaluated on the basis of the adequacy of the carrier’s safety management controls, are:

1. Factor 1—General: Parts 387 and 390;
2. Factor 2—Driver: Parts 382, 383 and 391;
3. Factor 3—Operational: Parts 392 and 395;
4. Factor 4—Vehicle: Part 393, 396 and inspection data for the last 12 months;
5. Factor 5—Hazardous Materials: Parts 171, 177, 180 and 397; and
6. Factor 6—Accident: Recordable Accident Rate per Million Miles.

(g) For each instance of noncompliance with an acute regulation, 1.5 points will be assessed.

(h) For each instance of noncompliance with a critical regulation, 1 point will be assessed.

A. Vehicle Factor

(a) When at least three vehicle inspections are recorded in the Motor Carrier Management Information System (MCMIS) during the twelve months before the safety audit or performed at the time of the review, the Vehicle Factor (Part 396) will be evaluated on the basis of the Out-of-Service (OOS) rates and noncompliance with acute and critical regulations. The results of the review of the OOS rate will affect the Vehicle Factor as follows:

1. If the motor carrier has had at least three roadside inspections in the twelve months before the safety audit, and the vehicle OOS rate is 34 percent or higher, one point will be assessed against the carrier. That point will be added to any other points assessed for discovered noncompliance with acute and critical regulations of part 396 to determine the carrier’s level of safety management control for that factor; and

2. If the motor carrier’s vehicle OOS rate is less than 34 percent, or if there are less than three inspections, the determination of the carrier’s level of safety management controls will only be based on discovered noncompliance with the acute and critical regulations of part 396.

(b) Over two million inspections occur on the roadside each year. This vehicle inspection information is retained in the MCMIS and is integral to evaluating motor carriers’ ability to successfully maintain their vehicles, thus preventing them from being placed OOS during roadside inspections. Each safety audit will continue to have the requirements of part 396, Inspection, Repair, and Maintenance,

reviewed as indicated by the above explanation.

B. The Accident Factor

(a) In addition to the five regulatory factors, a sixth factor is included in the process to address the accident history of the motor carrier. This factor is the recordable accident rate, which the carrier has experienced during the past 12 months. Recordable accident, as defined in 49 CFR 390.5, means an accident involving a commercial motor vehicle operating on a public road in interstate or intrastate commerce which results in a fatality; a bodily injury to a person who, as a result of the injury, immediately receives medical treatment away from the scene of the accident; or one or more motor vehicles incurring disabling damage as a result of the accident requiring the motor vehicle to be transported away from the scene by a tow truck or other motor vehicle.

(b) Experience has shown that urban carriers, those motor carriers operating entirely within a radius of less than 100 air miles (normally urban areas), have a higher exposure to accident situations because of their environment and normally have higher accident rates.

(c) The recordable accident rate will be used in determining the carrier’s basic safety management controls in Factor 6, Accident. It will be used only when a carrier incurs two or more recordable accidents within the 12 months before the safety audit. An urban carrier (a carrier operating entirely within a radius of 100 air miles) with a recordable rate per million miles greater than 1.7 will be deemed to have inadequate basic safety management controls for the accident factor. All other carriers with a recordable accident rate per million miles greater than 1.5 will be deemed to have inadequate basic safety management controls for the accident factor. The rates are the result of roughly doubling the national average accident rate in Fiscal Years 1994, 1995, and 1996.

(d) The FMCSA will continue to consider preventability when a new entrant contests the evaluation of the accident factor by presenting compelling evidence that the recordable rate is not a fair means of evaluating its accident factor. Preventability will be determined according to the following standard: “If a driver, who exercises normal judgment and foresight, could have foreseen the possibility of the accident that in fact occurred, and avoided it by taking steps within his/her control which would not have risked causing another kind of mishap, the accident was preventable.”

C. Factor Ratings

For Factors 1 through 5, if the combined violations of acute and or critical regulations for each factor is equal to three or

more points, the carrier is determined not to have basic safety management controls for that individual factor.

If the recordable accident rate is greater than 1.7 recordable accidents per million miles for an urban carrier (1.5 for all other carriers), the carrier is determined to have inadequate basic safety management controls.

IV. OVERALL DETERMINATION OF THE CARRIER'S BASIC SAFETY MANAGEMENT CONTROLS

(a) If the carrier is evaluated as having inadequate basic safety management controls in at least three separate factors, the carrier will be considered to have inadequate safety management controls in place and corrective action will be necessary in order to avoid having its new entrant registration, provisional operating authority, or provisional Certificate of Registration revoked.

(b) For example, FMCSA evaluates a carrier finding:

(1) One instance of noncompliance with a critical regulation in part 387 scoring one point for Factor 1;

(2) Two instances of noncompliance with acute regulations in part 382 scoring three points for Factor 2;

(3) Three instances of noncompliance with critical regulations in part 396 scoring three points for Factor 4; and

(4) Three instances of noncompliance with acute regulations in parts 171 and 397 scoring four and one-half (4.5) points for Factor 5.

(c) In this example, the carrier scored three or more points for Factors 2, 4 and 5 and FMCSA determined the carrier had inadequate basic safety management controls in at least three separate factors. FMCSA will require corrective action in order to avoid having the carrier's new entrant registration revoked, or having the provisional operating authority or provisional Certificate of Registration suspended and possibly revoked.

[67 FR 12773, Mar. 19, 2002, as amended at 67 FR 31985, May 13, 2002]

APPENDIX B TO PART 385—EXPLANATION OF SAFETY RATING PROCESS

(a) Section 215 of the Motor Carrier Safety Act of 1984 (49 U.S.C. 31144) directed the Secretary of Transportation to establish a procedure to determine the safety fitness of owners and operators of commercial motor vehicles operating in interstate or foreign commerce. The Secretary, in turn, delegated this responsibility to the Federal Motor Carrier Safety Administration (FMCSA).

(b) As directed, FMCSA promulgated a safety fitness regulation, entitled "Safety Fitness Procedures," which established a procedure to determine the safety fitness of motor carriers through the assignment of

safety ratings and established a "safety fitness standard" which a motor carrier must meet to obtain a *satisfactory* safety rating.

(c) To meet the safety fitness standard, a motor carrier must demonstrate to the FMCSA that it has adequate safety management controls in place which function effectively to ensure acceptable compliance with the applicable safety requirements. A "safety fitness rating methodology" (SFRM) was developed by the FMCSA, which uses data from compliance reviews (CRs) and roadside inspections to rate motor carriers.

(d) The safety rating process developed by FMCSA is used to:

1. Evaluate safety fitness and assign one of three safety ratings (*satisfactory*, *conditional* or *unsatisfactory*) to motor carriers operating in interstate commerce. This process conforms to 49 CFR 385.5, Safety fitness standard, and §385.7, Factors to be considered in determining a safety rating.

2. Identify motor carriers needing improvement in their compliance with the Federal Motor Carrier Safety Regulations (FMCSRs) and applicable Hazardous Material Regulations (HMRs). These are carriers rated *unsatisfactory* or *conditional*.

(e) The hazardous materials safety permit requirements of part 385, subpart E apply to intrastate motor carriers. Intrastate motor carriers that are subject to the hazardous materials safety permit requirements in subpart E will be rated using equivalent State requirements whenever the FMCSRs are referenced in this appendix.

I. SOURCE OF DATA FOR RATING METHODOLOGY

(a) The FMCSA's rating process is built upon the operational tool known as the CR. This tool was developed to assist Federal and State safety specialists in gathering pertinent motor carrier compliance and accident information.

(b) The CR is an in-depth examination of a motor carrier's operations and is used (1) to rate unrated motor carriers, (2) to conduct a follow-up investigation on motor carriers rated *unsatisfactory* or *conditional* as a result of a previous review, (3) to investigate complaints, or (4) in response to a request by a motor carrier to reevaluate its safety rating. Documents such as those contained in driver qualification files, records of duty status, vehicle maintenance records, and other records are thoroughly examined for compliance with the FMCSRs and HMRs. Violations are cited on the CR document. Performance-based information, when available, is utilized to evaluate the carrier's compliance with the vehicle regulations. Recordable accident information is also collected.

II. CONVERTING CR INFORMATION INTO A SAFETY RATING

(a) The FMCSA gathers information through an in-depth examination of the motor carrier's compliance with identified "acute" or "critical" regulations of the FMCSRs and HMRs.

(b) Acute regulations are those identified as such where noncompliance is so severe as to require immediate corrective actions by a motor carrier regardless of the overall safety posture of the motor carrier. An example of an acute regulation is §383.37(b), allowing, requiring, permitting, or authorizing an employee with more than one Commercial Driver's License (CDL) to operate a commercial motor vehicle. Noncompliance with §383.37(b) is usually discovered when the motor carrier's driver qualification file reflects that the motor carrier had knowledge of a driver with more than one CDL, and still permitted the driver to operate a commercial motor vehicle. If the motor carrier did not have such knowledge or could not reasonably be expected to have such knowledge, then a violation would not be cited.

(c) Critical regulations are those identified as such where noncompliance relates to management and/or operational controls. These are indicative of breakdowns in a carrier's management controls. An example of a critical regulation is §395.3(a)(1), requiring or permitting a property-carrying commercial motor vehicle driver to drive more than 11 hours.

(d) The list of the acute and critical regulations which are used in determining safety ratings is included at the end of this document.

(e) Noncompliance with acute regulations and patterns of non-compliance with critical regulations are quantitatively linked to inadequate safety management controls and usually higher than average accident rates. The FMCSA has used noncompliance with acute regulations and patterns of noncompliance with critical regulations since 1989 to determine motor carriers' adherence to the Safety fitness standard in §385.5.

(f) The regulatory factors, evaluated on the basis of the adequacy of the carrier's safety management controls, are (1) Parts 387 and 390; (2) Parts 382, 383 and 391; (3) Parts 392 and 395; (4) Parts 393 and 396 when there are less than three vehicle inspections in the last 12 months to evaluate; and (5) Parts 397, 171, 177 and 180.

(g) For each instance of noncompliance with an acute regulation or each pattern of noncompliance with a critical regulation during the CR, one point will be assessed. A pattern is more than one violation. When a number of documents are reviewed, the number of violations required to meet a pattern is equal to at least 10 percent of those examined.

(h) However, each pattern of noncompliance with a critical regulation relative to Part 395, Hours of Service of Drivers, will be assessed two points.

A. Vehicle Factor

(a) When a total of *three or more inspections are recorded in the Motor Carrier Management Information System (MCMIS) during the twelve months prior to the CR or performed at the time of the review*, the Vehicle Factor (Parts 393 and 396) will be evaluated on the basis of the Out-of-Service (OOS) rates and noncompliance with acute regulations and/or a pattern of noncompliance with critical regulations. The results of the review of the OOS rate will affect the Vehicle Factor rating as follows:

1. If a motor carrier has three or more roadside vehicle inspections in the twelve months prior to the carrier review, or three vehicles inspected at the time of the review, or a combination of the two totaling three or more, and the vehicle OOS rate is 34 percent or greater, the initial factor rating will be *conditional*. The requirements of Part 396, Inspection, Repair, and Maintenance, will be examined during each review. The results of the examination could lower the factor rating to *unsatisfactory* if noncompliance with an acute regulation or a pattern of noncompliance with a critical regulation is discovered. If the examination of the Part 396 requirements reveals no such problems with the systems the motor carrier is required to maintain for compliance, the Vehicle Factor remains *conditional*.

2. If a carrier's vehicle OOS rate is less than 34 percent, the initial factor rating will be *satisfactory*. If noncompliance with an acute regulation or a pattern of noncompliance with a critical regulation is discovered during the examination of Part 396 requirements, the factor rating will be lowered to *conditional*. If the examination of Part 396 requirements discovers no such problems with the systems the motor carrier is required to maintain for compliance, the Vehicle Factor remains *satisfactory*.

(b) Nearly two million vehicle inspections occur on the roadside each year. This vehicle inspection information is retained in the MCMIS and is integral to evaluating motor carriers' ability to successfully maintain their vehicles, thus preventing them from being placed OOS during roadside inspections. Since many of the roadside inspections are targeted to visibly defective vehicles and since there are a limited number of inspections for many motor carriers, the use of that data is limited. Each CR will continue to have the requirements of Part 396, Inspection, Repair, and Maintenance, reviewed as indicated by the above explanation.

B. Accident Factor

(a) In addition to the five regulatory rating factors, a sixth factor is included in the process to address the accident history of the motor carrier. This factor is the recordable accident rate which the carrier has experienced during the past 12 months. *Recordable* accident, as defined in 49 CFR 390.5, means an accident involving a commercial motor vehicle operating on a public road in interstate or intrastate commerce which results in a fatality; bodily injury to a person who, as a result of the injury, immediately receives medical treatment away from the scene of the accident; one or more motor vehicles incurring disabling damage as a result of the accident requiring the motor vehicle to be transported away from the scene by a tow truck or other motor vehicle.

(b) Recordable accidents per million miles were computed for each CR performed in Fiscal Years 1994, 1995 and 1996. The national average for all carriers rated was 0.747, and .839 for carriers operating entirely within the 100 air mile radius.

(c) Experience has shown that urban carriers, those motor carriers operating primarily within a radius of less than 100 air miles (normally in urban areas) have a higher exposure to accident situations because of their environment and normally have higher accident rates.

(d) The recordable accident rate will be used to rate Factor 6, Accident. It will be used only when a motor carrier incurs two or more recordable accidents occurred within the 12 months prior to the CR. An urban carrier (a carrier operating entirely within a radius of 100 air miles) with a recordable accident rate greater than 1.7 will receive an *unsatisfactory* rating for the accident factor. All other carriers with a recordable accident rate greater than 1.5 will receive an *unsatisfactory* factor rating. The rates are a result of roughly doubling the national average accident rate for each type of carrier rated in Fiscal Years 1994, 1995 and 1996.

(e) The FMCSA will continue to consider preventability when a motor carrier contests a rating by presenting compelling evidence that the recordable rate is not a fair means of evaluating its accident factor. Preventability will be determined according to the following standard: "If a driver, who exercises normal judgment and foresight could have foreseen the possibility of the accident that in fact occurred, and avoided it by taking steps within his/her control which would not have risked causing another kind of mishap, the accident was preventable."

C. Factor Ratings

(a) Parts of the FMCSRs and the HMRs having similar characteristics are combined together into five regulatory areas called "factors."

(b) The following table shows the five regulatory factors, parts of the FMCSRs and HMRs associated with each factor, and the accident factor. Factor Ratings are determined as follows:

FACTORS

Factor 1 General=Parts 387 and 390
 Factor 2 Driver=Parts 382, 383 and 391
 Factor 3 Operational=Parts 392 and 395
 Factor 4 Vehicle=Parts 393 and 396
 Factor 5 Haz. Mat.=Parts 397, 171, 177 and 180
 Factor 6 Accident Factor=Recordable Rate
 "Satisfactory"—if the acute and/or critical=0 points
 "Conditional"—if the acute and/or critical=1 point
 "Unsatisfactory"—if the acute and/or critical=2 or more points

III. SAFETY RATING

A. Rating Table

(a) The ratings for the six factors are then entered into a rating table which establishes the motor carrier's safety rating.

(b) The FMCSA has developed a computerized rating formula for assessing the information obtained from the CR document and is using that formula in assigning a safety rating.

MOTOR CARRIER SAFETY RATING TABLE

Factor ratings		Overall Safety rating
Unsatisfactory	Conditional	
0	2 or fewer	Satisfactory
0	more than 2	Conditional
1	2 or fewer	Conditional
1	more than 2	Unsatisfactory
2 or more	0 or more	Unsatisfactory

B. Proposed Safety Rating

(a) The proposed safety rating will appear on the CR. The following appropriate information will appear after the last entry on the CR, MCS-151, part B.

"Your proposed safety rating is SATISFACTORY."

OR

"Your proposed safety rating is CONDITIONAL." The proposed safety rating will become the final safety rating 45 days after you receive this notice.

OR

"Your proposed safety rating is UNSATISFACTORY." The proposed safety rating will become the final safety rating 45 days after you receive this notice

(b) Proposed safety ratings of *conditional* or *unsatisfactory* will list the deficiencies discovered during the CR for which corrective actions must be taken.

(c) Proposed *unsatisfactory* safety ratings will indicate that, if the *unsatisfactory* rating becomes final, the motor carrier will be subject to the provision of §385.13, which prohibits motor carriers rated *unsatisfactory* from transporting hazardous materials requiring placarding or more than 15 passengers, including the driver.

IV. ASSIGNMENT OF FINAL RATING/MOTOR CARRIER NOTIFICATION

When the official rating is determined in Washington, D.C., the FMCSA notifies the motor carrier in writing of its safety rating as prescribed in §385.11. A proposed *conditional* safety rating (which is an improvement of an existing *unsatisfactory* rating) becomes effective as soon as the official safety rating from Washington, D.C. is issued, and the carrier may also avail itself of relief under the §385.15, Administrative Review and §385.17, Change to safety rating based on corrective actions.

V. MOTOR CARRIER RIGHTS TO A CHANGE IN THE SAFETY RATING

Under §§385.15 and 385.17, motor carriers have the right to petition for a review of their ratings *if there are factual or procedural disputes*, and to request another review after corrective actions have been taken. They are the procedural avenues a motor carrier which believes its safety rating to be in error may exercise, and the means to request another review after corrective action has been taken.

VI. CONCLUSION

(a) The FMCSA believes this “safety fitness rating methodology” is a reasonable approach for assigning a safety rating which best describes the current safety fitness posture of a motor carrier as required by the safety fitness regulations (§385.9). This methodology has the capability to incorporate regulatory changes as they occur.

(b) Improved compliance with the regulations leads to an improved rating, which in turn increases safety. This increased safety is our regulatory goal.

VII. LIST OF ACUTE AND CRITICAL REGULATIONS.

§382.115(a) Failing to implement an alcohol and/or controlled substances testing program (domestic motor carrier) (acute).

§382.201 Using a driver known to have an alcohol concentration of 0.04 or greater (acute).

§382.211 Using a driver who has refused to submit to an alcohol or controlled sub-

stances test required under part 382 (acute).

§382.213(b) Using a driver known to have used a controlled substance (acute).

§382.215 Using a driver known to have tested positive for a controlled substance (acute).

§382.301(a) Using a driver before the motor carrier has received a negative pre-employment controlled substance test result (critical).

§382.303(a) Failing to conduct post accident testing on driver for alcohol and/or controlled substances (critical).

§382.305 Failing to implement a random controlled substances and/or an alcohol testing program (acute).

§382.305(b)(1) Failing to conduct random alcohol testing at an annual rate of not less than the applicable annual rate of the average number of driver positions (critical).

§382.305(b)(2) Failing to conduct random controlled substances testing at an annual rate of not less than the applicable annual rate of the average number of driver positions (critical).

§382.309(a) Using a driver who has not undergone a return-to-duty alcohol test with a result indicating an alcohol concentration of less than 0.02 (acute).

§382.309(b) Using a driver who has not undergone a return-to-duty controlled substances test with a result indicating a verified negative result for controlled substances (acute).

§382.503 Allowing a driver to perform safety sensitive function, after engaging in conduct prohibited by subpart B, without being evaluated by substance abuse professional, as required by §382.605 (critical).

§382.505(a) Using a driver within 24 hours after being found to have an alcohol concentration of 0.02 or greater but less than 0.04 (acute).

§382.605(c)(1) Using a driver who has not undergone a return-to-duty alcohol test with a result indicating an alcohol concentration of less than .02 or with verified negative test result, after engaging in conduct prohibited by part 382 subpart B (acute).

§382.605(c)(2)(ii) Failing to subject a driver who has been identified as needing assistance to at least six unannounced follow-up alcohol and/or controlled substance tests in the first 12 months following the driver's return to duty (critical).

§383.23(a) Operating a commercial motor vehicle without a valid commercial driver's license (critical).

§383.37(a) Knowingly allowing, requiring, permitting, or authorizing an employee with a commercial driver's license which is suspended, revoked, or canceled by a state or who is disqualified to operate a commercial motor vehicle (acute).

§383.37(b) Knowingly allowing, requiring, permitting, or authorizing an employee

- with more than one commercial driver's license to operate a commercial motor vehicle (acute).
- § 383.51(a) Knowingly allowing, requiring, permitting, or authorizing a driver to drive who is disqualified to drive a commercial motor vehicle (acute).
- § 387.7(a) Operating a motor vehicle without having in effect the required minimum levels of financial responsibility coverage (acute).
- § 387.7(d) Failing to maintain at principal place of business required proof of financial responsibility (critical).
- § 387.31(a) Operating a passenger carrying vehicle without having in effect the required minimum levels of financial responsibility (acute).
- § 387.31(d) Failing to maintain at principal place of business required proof of financial responsibility for passenger carrying vehicles (critical).
- § 390.15(b)(2) Failing to maintain copies of all accident reports required by State or other governmental entities or insurers (critical).
- § 390.35 Making, or causing to make fraudulent or intentionally false statements or records and/or reproducing fraudulent records (acute).
- § 391.11(b)(4) Using a physically unqualified driver (acute).
- § 391.15(a) Using a disqualified driver (acute).
- § 391.45(a) Using a driver not medically examined and certified (critical).
- § 391.45(b)(1) Using a driver not medically examined and certified during the preceding 24 months (critical).
- § 391.51(a) Failing to maintain driver qualification file on each driver employed (critical).
- § 391.51(b)(2) Failing to maintain inquiries into driver's driving record in driver's qualification file (critical).
- § 391.51(b)(7) Failing to maintain medical examiner's certificate in driver's qualification file (critical).
- § 392.2 Operating a motor vehicle not in accordance with the laws, ordinances, and regulations of the jurisdiction in which it is being operated (critical).
- § 392.4(b) Requiring or permitting a driver to drive while under the influence of, or in possession of, a narcotic drug, amphetamine, or any other substance capable of rendering the driver incapable of safely operating a motor vehicle (acute).
- § 392.5(b)(1) Requiring or permitting a driver to drive a motor vehicle while under the influence of, or in possession of, an intoxicating beverage (acute).
- § 392.5(b)(2) Requiring or permitting a driver who shows evidence of having consumed an intoxicating beverage within 4 hours to operate a motor vehicle (acute).
- § 392.6 Scheduling a run which would necessitate the vehicle being operated at speeds in excess of those prescribed (critical).
- § 392.9(a)(1) Requiring or permitting a driver to drive without the vehicle's cargo being properly distributed and adequately secured (critical).
- § 395.1(h)(1)(i) Requiring or permitting a property-carrying commercial motor vehicle driver to drive more than 15 hours (Driving in Alaska) (critical).
- § 395.1(h)(1)(ii) Requiring or permitting a property-carrying commercial motor vehicle driver to drive after having been on duty 20 hours (Driving in Alaska) (critical).
- § 395.1(h)(1)(iii) Requiring or permitting a property-carrying commercial motor vehicle driver to drive after having been on duty more than 70 hours in 7 consecutive days (Driving in Alaska) (critical).
- § 395.1(h)(1)(iv) Requiring or permitting a property-carrying commercial motor vehicle driver to drive after having been on duty more than 80 hours in 8 consecutive days (Driving in Alaska) (critical).
- § 395.1(h)(2)(i) Requiring or permitting a passenger-carrying commercial motor vehicle driver to drive more than 15 hours (Driving in Alaska) (critical).
- § 395.1(h)(2)(ii) Requiring or permitting a passenger-carrying commercial motor vehicle driver to drive after having been on duty 20 hours (Driving in Alaska) (critical).
- § 395.1(h)(2)(iii) Requiring or permitting a passenger-carrying commercial motor vehicle driver to drive after having been on duty more than 70 hours in 7 consecutive days (Driving in Alaska) (critical).
- § 395.1(h)(2)(iv) Requiring or permitting a passenger-carrying commercial motor vehicle driver to drive after having been on duty more than 80 hours in 8 consecutive days (Driving in Alaska) (critical).
- § 395.1(o) Requiring or permitting a short-haul property-carrying commercial motor vehicle driver to drive after having been on duty 16 consecutive hours (critical).
- § 395.3(a)(1) Requiring or permitting a property-carrying commercial motor vehicle driver to drive more than 11 hours (critical).
- § 395.3(a)(2) Requiring or permitting a property-carrying commercial motor vehicle driver to drive after the end of the 14th hour after coming on duty (critical).
- § 395.3(b)(1) Requiring or permitting a property-carrying commercial motor vehicle driver to drive after having been on duty more than 60 hours in 7 consecutive days (critical).
- § 395.3(b)(2) Requiring or permitting a property-carrying commercial motor vehicle driver to drive after having been on duty more than 70 hours in 8 consecutive days (critical).
- § 395.3(c)(1) Requiring or permitting a property-carrying commercial motor vehicle

- driver to restart a period of 7 consecutive days without taking an off-duty period of 34 or more consecutive hours (critical).
- § 395.3(c)(2) Requiring or permitting a property-carrying commercial motor vehicle driver to restart a period of 8 consecutive days without taking an off-duty period of 34 or more consecutive hours (critical).
- § 395.5(a)(1) Requiring or permitting a passenger-carrying commercial motor vehicle driver to drive more than 10 hours (critical).
- § 395.5(a)(2) Requiring or permitting a passenger-carrying commercial motor vehicle driver to drive after having been on duty 15 hours (critical).
- § 395.5(b)(1) Requiring or permitting a passenger-carrying commercial motor vehicle driver to drive after having been on duty more than 60 hours in 7 consecutive days (critical).
- § 395.5(b)(2) Requiring or permitting a passenger-carrying commercial motor vehicle driver to drive after having been on duty more than 70 hours in 8 consecutive days (critical).
- § 395.8(a) Failing to require driver to make a record of duty status (critical).
- § 395.8(e) False reports of records of duty status (critical).
- § 395.8(i) Failing to require driver to forward within 13 days of completion, the original of the record of duty status (critical).
- § 395.8(k)(1) Failing to preserve driver's record of duty status for 6 months (critical).
- § 395.8(k)(1) Failing to preserve driver's records of duty status supporting documents for 6 months (critical).
- § 396.3(b) Failing to keep minimum records of inspection and vehicle maintenance (critical).
- § 396.9(c)(2) Requiring or permitting the operation of a motor vehicle declared "out-of-service" before repairs were made (acute).
- § 396.11(a) Failing to require driver to prepare driver vehicle inspection report (critical).
- § 396.11(c) Failing to correct Out-of-Service defects listed by driver in a driver vehicle inspection report before the vehicle is operated again (acute).
- § 396.17(a) Using a commercial motor vehicle not periodically inspected (critical).
