Q-14. How is an annuity contract that is distributed from a designated Roth account treated for purposes of section 402A?

A-14. A qualified plan distributed annuity contract within the meaning of

§ 1.402(c)-2, A-10(a) that is distributed from a designated Roth account is not treated as a distribution for purposes of section 402 or 402A. Instead, the amounts paid under the annuity contract are treated as distributions for purposes of sections 402 and 402A. Thus, the period after the annuity contract is distributed and before a payment from the annuity contract is made is included in determining whether the five-year period of participation is satisfied. Further, for purposes of determining if a distribution is a qualified distribution, the determination of whether a distribution is made on or after the date the employee attains age 59½, made to a beneficiary or the estate of the employee on or after the employee's death, or attributable to the employee's being disabled within the meaning of section 72(m)(7) is made based on the facts at the time the distribution is made from the annuity contract. Thus for example, if an employee first makes a designated Roth contribution to a designated Roth account in 2006 at age 56, receives a distributed annuity contract within the meaning of § 1.402(c)-2, A-10(a) in 2007 purchased only with assets from the designated Roth account, and then receives a distribution from the contract in 2011 at age 60, the distribution is a qualified distribution.

Q-15. When are section 402A and this § 1.402A-1 applicable?

A-15. Section 402A is applicable for taxable years beginning on or after January 1, 2006. Except as otherwise provided in A-5 and A-13 of this section, the rules of this § 1.402A-1 apply for taxable years beginning on or after January 1, 2007.

[T.D. 9324, 72 FR 21111, Apr. 30, 2007; 72 FR 30974, June 5, 2007, as amended by T.D. 9340, 72 FR 41140, July 26, 2007]

§ 1.402A-2 Reporting and record-keeping requirements with respect to designated Roth accounts.

Q-1. Who is responsible for keeping track of the 5-taxable-year period of participation and the investment in the contract, i.e., the amount of unrecovered designated Roth contributions for the employee?

A-1. The plan administrator or other responsible party with respect to a

plan with a designated Roth account is responsible for keeping track of the 5-taxable-year period of participation for each employee and the amount of investment in the contract (unrecovered designated Roth contributions) on behalf of such employee. For purposes of the preceding sentence, in the absence of actual knowledge to the contrary, the plan administrator or other responsible party is permitted to assume that an employee's taxable year is the calendar year. In the case of a direct rollover from another designated Roth account, the plan administrator or other responsible party of the recipient plan can rely on reasonable representations made by the plan administrator or responsible party with respect to the plan with the other designated Roth account. See A-2 of this section for statements required in the case of rollovers.

Q-2. In the case of an eligible rollover distribution from a designated Roth account, what additional information must be provided with respect to such distribution?

A-2. (a) Pursuant to section 6047(f), if an amount is distributed from a designated Roth account, the plan administrator or other responsible party with respect to the plan must provide a statement as described below in the following situations—

(1) In the case of a direct rollover of a distribution from a designated Roth account under a plan to a designated Roth account under another plan, the plan administrator or other responsible party must provide to the plan administrator or responsible party of the recipient plan either a statement indicating the first year of the 5-taxable-year period described in A-1 of this section and the portion of the distribution that is attributable to investment in the contract under section 72, or a statement that the distribution is a qualified distribution.

(2) If the distribution is not a direct rollover to a designated Roth account under another plan, the plan administrator or responsible party must provide to the employee, upon request, the same information described in paragraph (a)(1) of this A-2, except the statement need not indicate the first

year of the 5-taxable-year period described in A-1 of this section.

(b) The statement described in paragraph (a) of this A-2 must be provided within a reasonable period following the direct rollover or distributee request but in no event later than 30 days following the direct rollover or distributee request.

Q-3. If a plan qualified under section 401(a) or a section 403(b) plan accepts a 60-day rollover of earnings from a designated Roth account, what report to the IRS must be provided with respect to such rollover contribution?

A-3. To the extent required in Forms and Instructions, if a plan qualified under section 401(a), or a section 403(b) plan, accepts a rollover contribution (other than a direct rollover contribution) under section 402(c)(2), or section 403(b)(8)(B), of the portion of a distribution from a designated Roth account that would have been includable in gross income, the plan administrator or other responsible party for the recipient plan must notify the Commissioner of its acceptance of the rollover contribution no later than the due date for filing Form 1099-R, "Distributions From Pensions, Annuities, Retirement or Profit-Sharing Plans, IRAs, Insurance Contracts, etc.," The Forms and Instructions will specify the address to which the notification is required to be sent and will require inclusion of the employee's name and social security number, the amount rolled over, the year in which the rollover contribution was made, and such other information as the Commissioner may prescribe in order to determine that the amount rolled over is a valid rollover contribution.

Q-4. When is this §1.402A-2 applicable?

A-4. The rules of this §1.402A-2 are applicable for taxable years beginning on or after January 1, 2007.

[T.D. 9324, 72 FR 21111, Apr. 30, 2007; 72 FR 30974, June 5, 2007]

§ 1.403(a)-1 Taxability of beneficiary under a qualified annuity plan.

(a) An employee or retired or former employee for whom an annuity contract is purchased by his employer is not required to include in his gross income the amount paid for the contract

§ 1.403(a)-2

26 CFR Ch. I (4-1-08 Edition)

at the time such amount is paid, whether or not his rights to the contract are forfeitable, if the annuity contract is purchased under a plan which meets the requirements of section 404(a)(2). For purposes of the preceding sentence, it is immaterial whether the employer deducts the amounts paid for the contract under such section 404(a)(2). See § 1.403(b)-1 through 1.403(b)-10 for rules relating to annuity contracts which are not purchased under qualified plans but which are purchased by organizations described in section 501(c)(3) and exempt under section 501(a) or which are purchased for employees who perform services for certain public schools.

(b) The amounts received by or made available to any employee referred to in paragraph (a) of this section under such annuity contract shall be included in gross income of the employee for the taxable year in which received or made available, as provided in section 72 (relating to annuities), except that certain total distributions described in section 403(a)(2) are taxable as long-term capital gains. For the treatment of such total distributions, see § 1.403(a)-2. However, for taxable years beginning before January 1, 1964, section 72(e)(3) (relating to the treatment of certain lump sums), as in effect before such date, shall not apply to such amounts. For taxable years beginning after December 31, 1963, such amounts may be taken into account in computations under sections 1301 through 1305 (relating to income averaging).

(c) If upon the death of an employee or of a retired employee, the widow or other beneficiary of such employee is paid, in accordance with the terms of the annuity contract relating to the deceased employee, an annuity or other death benefit, the extent to which the amounts received by or made available to the beneficiary must be included in the beneficiary's income under section 403(a) shall be determined in accordance with the rules presented in paragraph (a)(5) of § 1.402(a)-1.

(d) An individual contract issued after December 31, 1962, or a group contract, which provides incidental life insurance protection may be purchased under a qualified annuity plan. For the rules as to nontransferability of such

contracts issued after December 31, 1962, see § 1.401-9. For the rules relating to the taxation of the cost of the life insurance protection and the proceeds thereunder, see § 1.72-16. Section 403(a) is not applicable to premiums paid after October 26, 1956, for individual contracts which were issued prior to January 1, 1963, and which provide life insurance protection.

(e) As to inclusion of full-time life insurance salesmen within the class of persons considered to be employees, see section 7701(a)(20).

(f) For purposes of this section and § 1.403(a)-2, the term "employee" includes a self-employed individual who is treated as an employee under section 401(c)(1) and paragraph (b) of § 1.401-10, and the term "employer" means the person treated as the employer of such individual under section 401(c)(4). For the rules relating to annuity plans covering self-employed individuals, see section 404(a)(2) and §§ 1.404(a)-8 and 1.401-10 through 1.401-13.

(g) For the treatment of amounts paid to provide medical benefits described in section 401(h) as defined in § 1.401-14, see paragraph (h) of § 1.72-15.

[T.D. 6500, 25 FR 11680, Nov. 26, 1960, as amended by T.D. 6676, 28 FR 10143, Sept. 17, 1963; T.D. 6722, 29 FR 5073, Apr. 14, 1964; T.D. 6783, 29 FR 18359, Dec. 24, 1964; T.D. 6885, 31 FR 7801, June 2, 1966; T.D. 9340, 72 FR 41159, July 26, 2007]

§ 1.403(a)-2 Capital gains treatment for certain distributions.

(a) If the total amounts payable with respect to any employee for whom an annuity contract has been purchased by an employer under a plan which—

(1) Is a plan described in section 403(a)(1) and § 1.403(a)-1, and

(2) Requires that refunds of contributions with respect to annuity contracts purchased under such plan be used to reduce subsequent premiums on the contracts under the plan,

are paid to, or includible in gross income of, the payee within one taxable year of the payee by reason of the employee's death or other separation from the service, or death after such separation from the service, such total payments, to the extent they exceed the net amount contributed by the employee, shall be considered a gain from

the sale or exchange of a capital asset held for more than six months. The “net amount contributed by the employee” is the amount actually contributed by the employee plus any amounts considered to be contributed by the employee under the rules of sections 72(f), 101(b), and paragraph (d) of § 1.403(a)-1, reduced by any amounts theretofore distributed to him which were excludable from his gross income as a return of employee contributions. For example, if under an annuity contract purchased under a plan described in this section, the total distributions payable to the employee’s widow are paid to her in the year in which the employee dies, in the amount of \$8,000, and if \$5,000 thereof is excludable under section 101(b), and if the employee made contributions of \$600 and had received no payments, the remaining amount of \$2,400 will be considered a gain from the sale or exchange of a capital asset held for more than six months.

(b)(1) The term “total amounts” means the balance to the credit of an employee with respect to all annuities under the annuity plan which becomes payable to the payee by reason of the employee’s death or other separation from the service, or by reason of his death after separation from the service. If an employee commences to receive annuity payments on retirement and then a lump sum payment is made to his widow upon his death, the capital gains treatment applies to the lump sum payment, but it does not apply to amounts received before the time the “total amounts” become payable. However, if the total amount to the credit of the employee at the time of his death or other separation from the service or death after separation from the service is paid or includible in the gross income of the payee within one taxable year of the payee, such amount is entitled to the capital gains treatment notwithstanding that in a later taxable year an additional amount is credited to the employee and paid to the payee.

(2) If more than one annuity contract is received under the plan, the capital gains treatment does not apply to any amount received on the surrender thereof unless all contracts under the

plan with respect to a particular employee are surrendered either at the time of the employee’s death or other separation from the service or death after separation from the service. Thus, if an employee receives two contracts on separation from the service and surrenders one of them in the year of separation and receives payments under the other until his death, the capital gains treatment is applicable to the balance paid to his beneficiary on his death if paid within one taxable year of the beneficiary. The amount received by the employee on surrender of the contract in the year of his separation from the service, however, would not receive capital gains treatment since the balance to the credit of the employee with respect to all amounts under the plan did not become payable at that time.

(3) If an employee retires and commences to receive an annuity but subsequently in some succeeding taxable year, he is paid a lump sum in settlement of all future annuity payments, the capital gains treatment does not apply to such lump sum settlement paid during the lifetime of the employee since it is not a payment on account of separation from the service, or death after separation, but is on account of the settlement of future annuity payments.

(4) If the “total amounts” payable under all annuity contracts under the plan with respect to a particular employee are paid or includible in the gross income of several payees within one taxable year on account of the employee’s death or other separation from the service or on account of his death after separation from the service, the capital gains treatment is applicable. Thus, if the balance to the credit of a deceased employee under all annuity contracts provided under an annuity plan becomes payable to two payees, the capital gains treatment is applicable provided the “total amounts” payable are received by or includible in the gross income of both payees within the same taxable year. However, if the “total amounts” payable are made available to each payee and one elects to receive his share in cash while the other makes a timely election under section 72(h) to receive his share as an

§ 1.403(b)-0

annuity, the capital gains treatment does not apply to either payee.

(5) For purposes of determining whether the total amounts payable to an employee have been paid within one taxable year, the term “total amounts” includes amounts under a plan which are attributable to contributions on behalf of an individual while he was self-employed in the business with respect to which the plan was established. Thus, the “total amounts” payable are not paid within one taxable year if amounts remain payable which are so attributable.

(6) The term “total amounts” does not include any amount which has been placed in a separate account for the funding of benefits described in section 401(h). Thus, a distribution under a qualified annuity plan may constitute a distribution of the total amounts payable with respect to an employee even though amounts attributable to the funding of section 401(h) medical benefits as defined in paragraph (a) of § 1.401-14 are not so distributed.

(c) The provisions of this section are not applicable to any amounts paid to a payee to the extent such amounts are attributable to contributions made on behalf of an employee while he was a self-employed individual in the business with respect to which the plan was established. For the taxation of such amounts, see § 1.72-18. For the rules for determining the amount attributable to contributions on behalf of an employee while he was self-employed, see paragraphs (b)(4) and (c)(2) of such section.

[T.D. 6500, 25 FR 11681, Nov. 26, 1960, as amended by T.D. 6676, 28 FR 10143, Sept. 17, 1963; T.D. 6722, 29 FR 5073, Apr. 14, 1964]

§ 1.403(b)-0 Taxability under an annuity purchased by a section 501(c)(3) organization or a public school.

§ 1.403(b)-1 General overview of taxability under an annuity contract purchased by a section 501(c)(3) organization or a public school.

Section 403(b) and §§ 1.403(b)-2 through 1.403(b)-10 provide rules for the Federal income tax treatment of an annuity purchased for an employee by an employer that is either a tax-exempt entity under section 501(c)(3) (relating to certain religious, charitable, scientific, or other types of organizations) or a public school, or for a minister described in section 414(e)(5)(A). See section 403(a) (relating to qualified annuities) for rules regarding the taxation of an annuity purchased under a qualified annuity plan that meets the requirements of section 404(a)(2), and see section 403(c) (relating to nonqualified annuities) for rules regarding the taxation of other types of annuities.

[T.D. 9340, 72 FR 41141, July 26, 2007]

§ 1.403(b)-2 Definitions.

(a) *Application of definitions.* The definitions set forth in this section are applicable for purposes of § 1.403(b)-1, this section and §§ 1.403(b)-3 through 1.403(b)-11.

(b) *Definitions*—(1) *Accumulated benefit* means the total benefit to which a participant or beneficiary is entitled under a section 403(b) contract, including all contributions made to the contract and all earnings thereon.

(2) *Annuity contract* means a contract that is issued by an insurance company qualified to issue annuities in a State and that includes payment in the form of an annuity. See § 1.401(f)-1(d)(2) and (e) for the definition of an annuity, and see § 1.403(b)-8(c)(3) for a special rule for certain State plans. See also §§ 1.403(b)-8(d) and 1.403(b)-9(a) for additional rules regarding the treatment of custodial accounts and retirement income accounts as annuity contracts.

(3) *Beneficiary* means a person who is entitled to benefits in respect of a participant following the participant's death or an alternate payee pursuant to a qualified domestic relations order, as described in § 1.403(b)-10(c).

(4) *Catch-up* amount or *catch-up* limitation for a participant for a taxable year means a section 403(b) elective deferral permitted under section 414(v) (as described in § 1.403(b)-4(c)(2)) or section 402(g)(7) (as described in § 1.403(b)-4(c)(3)).

(5) *Church* means a church as defined in section 3121(w)(3)(A) and a qualified church-controlled organization as defined in section 3121(w)(3)(B).

(6) *Church-related organization* means a church or a convention or association of churches, including an organization described in section 414(e)(3)(A).

(7) *Elective deferral* means an elective deferral under § 1.402(g)-1 (with respect to an employer contribution to a section 403(b) contract) and any other amount that constitutes an elective deferral under section 402(g)(3).

(8) (i) *Eligible employer* means—

(A) A State, but only with respect to an employee of the State performing services for a public school;

(B) A section 501(c)(3) organization with respect to any employee of the section 501(c)(3) organization;

(C) Any employer of a minister described in section 414(e)(5)(A), but only with respect to the minister; or

(D) A minister described in section 414(e)(5)(A), but only with respect to a retirement income account established for the minister.

(ii) An entity is not an eligible employer under paragraph (a)(8)(i)(A) of this section if it treats itself as not being a State for any other purpose of the Internal Revenue Code, and a subsidiary or other affiliate of an eligible employer is not an eligible employer under paragraph (a)(8)(i) of this section if the subsidiary or other affiliate is not an entity described in paragraph (a)(8)(i) of this section.

(9) *Employee* means a common-law employee performing services for the employer, and does not include a former employee or an independent contractor. Subject to any rules in § 1.403(b)-1, this section, and §§ 1.403(b)-3 through 1.403(b)-11 that are specifically applicable to ministers, an employee also includes a minister described in section 414(e)(5)(A) when performing services in the exercise of his or her ministry.

(10) *Employee performing services for a public school* means an employee performing services as an employee for a public school of a State. This definition is not applicable unless the employee's compensation for performing services for a public school is paid by the State. Further, a person occupying an elective or appointive public office is not an employee performing services for a public school unless such office is one to which an individual is elected or appointed only if the individual has received training, or is experienced, in the field of education. The term *public office* includes any elective or appointive office of a State.

(11) *Includible compensation* means the employee's compensation received from an eligible employer that is includible in the participant's gross income for Federal income tax purposes (computed without regard to section 911) for the most recent period that is a year of service. Includible compensation for a minister who is self-employed means the minister's earned income as defined in section 401(c)(2) (computed without regard to section

911) for the most recent period that is a year of service. Includible compensation does not include any compensation received during a period when the employer is not an eligible employer. Includible compensation also includes any elective deferral or other amount contributed or deferred by the eligible employer at the election of the employee that would be includible in the gross income of the employee but for the rules of sections 125, 132(f)(4), 402(e)(2), 402(h)(1)(B), 402(k), or 457(b). The amount of includible compensation is determined without regard to any community property laws. See section 415(c)(3)(A) through (D) for additional rules, and see § 1.403(b)-4(d) for a special rule regarding former employees.

(12) *Participant* means an employee for whom a section 403(b) contract is currently being purchased, or an employee or former employee for whom a section 403(b) contract has previously been purchased and who has not received a distribution of his or her entire accumulated benefit under the contract.

(13) *Plan* means a plan as described in § 1.403(b)-3(b)(3).

(14) *Public school* means a State-sponsored educational organization described in section 170(b)(1)(A)(ii) (relating to educational organizations that normally maintain a regular faculty and curriculum and normally have a regularly enrolled body of pupils or students in attendance at the place where educational activities are regularly carried on).

(15) *Retirement income account* means a defined contribution program established or maintained by a church-related organization to provide benefits under section 403(b) for its employees or their beneficiaries as described in § 1.403(b)-9.

(16) *Section 403(b) contract; section 403(b) plan*—(i) *Section 403(b) contract* means a contract that satisfies the requirements of § 1.403(b)-3. If for any taxable year an employer contributes to more than one section 403(b) contract for a participant or beneficiary, then, under section 403(b)(5), all such contracts are treated as one contract for purposes of section 403(b) and § 1.403(b)-1, this section, and §§ 1.403(b)-

3 through 1.403(b)-11. See also § 1.403(b)-3(b)(1).

(ii) *Section 403(b) plan* means the plan of the employer under which the section 403(b) contracts for its employees are maintained.

(17) *Section 403(b) elective deferral; designated Roth contribution*—(i) *Section 403(b) elective deferral* means an elective deferral that is an employer contribution to a section 403(b) plan for an employee. See § 1.403(b)-5(b) for additional rules with respect to a section 403(b) elective deferral.

(ii) *Designated Roth contribution* under a section 403(b) plan means a section 403(b) elective deferral that satisfies § 1.403(b)-3(c).

(18) *Section 501(c)(3) organization* means an organization that is described in section 501(c)(3) (relating to certain religious, charitable, scientific, or other types of organizations) and exempt from tax under section 501(a).

(19) *Severance from employment* means that the employee ceases to be employed by the employer maintaining the plan. See § 1.401(k)-1(d) for additional guidance concerning severance from employment. See also § 1.403(b)-6(h) for a special rule under which severance from employment is determined by reference to employment with the eligible employer.

(20) *State* means a State, a political subdivision of a State, or any agency or instrumentality of a State. For this purpose, the District of Columbia is treated as a State. In addition, for purposes of determining whether an individual is an employee performing services for a public school, an Indian tribal government is treated as a State, as provided under section 7871(a)(6)(B). See also section 1450(b) of the Small Business Job Protection Act of 1996 (110 Stat. 1755, 1814) for special rules treating certain contracts purchased in a plan year beginning before January 1, 1995, that include contributions by an Indian tribal government as section 403(b) contracts, whether or not those contributions are for employees performing services for a public school.

(21) *Year of service* means each full year during which an individual is a full-time employee of an eligible employer, plus fractional credit for each part of a year during which the indi-

vidual is either a full-time employee of an eligible employer for a part of the year or a part-time employee of an eligible employer. See § 1.403(b)-4(e) for rules for determining years of service.

[T.D. 9340, 72 FR 41141, July 26, 2007; 72 FR 54351, Sept. 25, 2007]

§ 1.403(b)-3 Exclusion for contributions to purchase section 403(b) contracts.

(a) *Exclusion for section 403(b) contracts.* Amounts contributed by an eligible employer for the purchase of an annuity contract for an employee are excluded from the gross income of the employee under section 403(b) only if each of the requirements in paragraphs (a)(1) through (9) of this section is satisfied. In addition, amounts contributed by an eligible employer for the purchase of an annuity contract for an employee pursuant to a cash or deferred election (as defined at § 1.401(k)-1(a)(3)) are not includible in an employee's gross income at the time the cash would have been includible in the employee's gross income (but for the cash or deferred election) if each of the requirements in paragraphs (a)(1) through (9) of this section is satisfied. However, the preceding two sentences generally do not apply to designated Roth contributions; see paragraph (c) of this section and § 1.403(b)-7(e) for special taxation rules that apply with respect to designated Roth contributions under a section 403(b) plan.

(1) *Not a contract issued under qualified plan or eligible governmental plan.* The annuity contract is not purchased under a qualified plan (under section 401(a) or 403(a)) or an eligible governmental plan under section 457(b).

(2) *Nonforfeatability.* The rights of the employee under the annuity contract (disregarding rights to future premiums) are nonforfeitable. An employee's rights under a contract fail to be nonforfeitable unless the employee for whom the contract is purchased has at all times a fully vested and nonforfeitable right (as defined in regulations under section 411) to all benefits provided under the contract. See paragraph (d)(2) of this section for additional rules regarding the nonforfeatability requirement of this paragraph (a)(2).

(3) *Nondiscrimination.* In the case of an annuity contract purchased by an eligible employer other than a church, the contract is purchased under a plan that satisfies section 403(b)(12) (relating to nondiscrimination requirements, including universal availability). See § 1.403(b)-5.

(4) *Limitations on elective deferrals.* In the case of an elective deferral, the contract satisfies section 401(a)(30) (relating to limitations on elective deferrals). A contract does not satisfy section 401(a)(30) as required under this paragraph (a)(4) unless the contract requires that all elective deferrals for an employee not exceed the limits of section 402(g)(1), including elective deferrals for the employee under the contract and any other elective deferrals under the plan under which the contract is purchased and under all other plans, contracts, or arrangements of the employer. See § 1.401(a)-30.

(5) *Nontransferability.* The contract is not transferable. This paragraph (a)(5) does not apply to a contract issued before January 1, 1963. See section 401(g).

(6) *Minimum required distributions.* The contract satisfies the requirements of section 401(a)(9) (relating to minimum required distributions). See § 1.403(b)-6(e).

(7) *Rollover distributions.* The contract provides that, if the distributee of an eligible rollover distribution elects to have the distribution paid directly to an eligible retirement plan, as defined in section 402(c)(8)(B), and specifies the eligible retirement plan to which the distribution is to be paid, then the distribution will be paid to that eligible retirement plan in a direct rollover. See § 1.403(b)-7(b)(2).

(8) *Limitation on incidental benefits.* The contract satisfies the incidental benefit requirements of section 401(a). See § 1.403(b)-6(g).

(9) *Maximum annual additions.* The annual additions to the contract do not exceed the applicable limitations of section 415(c) (treating contributions and other additions as annual additions). See paragraph (b) of this section and § 1.403(b)-4(b) and (f).

(b) *Application of requirements—*(1) *Aggregation of contracts.* In accordance with section 403(b)(5), for purposes of determining whether this section is

satisfied, all section 403(b) contracts purchased for an individual by an employer are treated as purchased under a single contract. Additional aggregation rules apply under section 402(g) for purposes of satisfying paragraph (a)(4) of this section and under section 415 for purposes of satisfying paragraph (a)(9) of this section.

(2) *Disaggregation for excess annual additions.* In accordance with the last sentence of section 415(a)(2), if an excess annual addition is made to a contract that otherwise satisfies the requirements of this section, then the portion of the contract that includes such excess annual addition fails to be a section 403(b) contract (as further described in paragraph (d)(1) of this section) and the remaining portion of the contract is a section 403(b) contract. This paragraph (b)(2) is not satisfied unless, for the year of the excess and each year thereafter, the issuer of the contract maintains separate accounts for each such portion. Thus, the entire contract fails to be a section 403(b) contract if an excess annual addition is made and a separate account is not maintained with respect to the excess.

(3) *Plan in form and operation.* (i) A contract does not satisfy paragraph (a) of this section unless it is maintained pursuant to a plan. For this purpose, a plan is a written defined contribution plan, which, in both form and operation, satisfies the requirements of § 1.403(b)-1, § 1.403(b)-2, this section, and §§ 1.403(b)-4 through 1.403(b)-11. For purposes of § 1.403(b)-1, § 1.403(b)-2, this section, and §§ 1.403(b)-4 through 1.403(b)-11, the plan must contain all the material terms and conditions for eligibility, benefits, applicable limitations, the contracts available under the plan, and the time and form under which benefit distributions would be made. For purposes of § 1.403(b)-1, § 1.403(b)-2, this section, and §§ 1.403(b)-4 through 1.403(b)-11, a plan may contain certain optional features that are consistent with but not required under section 403(b), such as hardship withdrawal distributions, loans, plan-to-plan or annuity contract-to-annuity contract transfers, and acceptance of rollovers to the plan. However, if a plan contains any

optional provisions, the optional provisions must meet, in both form and operation, the relevant requirements under section 403(b), this section, and §§ 1.403(b)-4 through 1.403(b)-11.

(ii) The plan may allocate responsibility for performing administrative functions, including functions to comply with the requirements of section 403(b) and other tax requirements. Any such allocation must identify responsibility for compliance with the requirements of the Internal Revenue Code that apply on the basis of the aggregated contracts issued to a participant under a plan, including loans under section 72(p) and the conditions for obtaining a hardship withdrawal under § 1.403(b)-6. A plan is permitted to assign such responsibilities to parties other than the eligible employer, but not to participants (other than employees of the employer a substantial portion of whose duties are administration of the plan), and may incorporate by reference other documents, including the insurance policy or custodial account, which thereupon become part of the plan.

(iii) This paragraph (b)(3) applies to contributions to an annuity contract by a church only if the annuity is part of a retirement income account, as defined in § 1.403(b)-9.

(4) *Exclusion limited for former employees*—(i) *General rule.* Except as provided in paragraph (b)(4)(ii) of this section and in § 1.403(b)-4(d), the exclusion from gross income provided by section 403(b) does not apply to contributions made for former employees. For this purpose, a contribution is not made for a former employee if the contribution is with respect to compensation that would otherwise be paid for a payroll period that begins before severance from employment.

(ii) *Exceptions.* The exclusion from gross income provided by section 403(b) applies to contributions made for former employees with respect to compensation described in § 1.415(c)-2(e)(3)(i) (relating to certain compensation paid by the later of 2½ months after severance from employment or the end of the limitation year that includes the date of severance from employment), and compensation described in § 1.415(c)-2(e)(4), § 1.415(c)-2(g)(4), or

§ 1.415(c)-2(g)(7) (relating to compensation paid to participants who are permanently and totally disabled or relating to qualified military service under section 414(u)).

(c) *Special rules for designated Roth section 403(b) contributions.* (1) The rules of § 1.401(k)-1(f)(1) and (2) for designated Roth contributions under a qualified cash or deferred arrangement apply to designated Roth contributions under a section 403(b) plan. Thus, a designated Roth contribution under a section 403(b) plan is a section 403(b) elective deferral that is designated irrevocably by the employee at the time of the cash or deferred election as a designated Roth contribution that is being made in lieu of all or a portion of the section 403(b) elective deferrals the employee is otherwise eligible to make under the plan; that is treated by the employer as includible in the employee's gross income at the time the employee would have received the amount in cash if the employee had not made the cash or deferred election (such as by treating the contributions as wages subject to applicable withholding requirements); and that is maintained in a separate account (within the meaning of § 1.401(k)-1(f)(2)).

(2) A designated Roth contribution under a section 403(b) plan must satisfy the requirements applicable to section 403(b) elective deferrals. Thus, for example, designated Roth contributions under a section 403(b) plan must satisfy the requirements of § 1.403(b)-6(d). Similarly, a designated Roth account under a section 403(b) plan is subject to the rules of sections 401(a)(9)(A) and (B) and § 1.403(b)-6(e).

(d) *Effect of failure*—(1) *General rules.* (i) If a contract includes any amount that fails to satisfy the requirements of section 403(b), § 1.403(b)-1, § 1.403(b)-2, this section, or §§ 1.403(b)-4 through 1.403(b)-11, then, except as otherwise provided in paragraph (d)(2) of this section (relating to failure to satisfy non-forfeatability requirements) or § 1.403(b)-4(f) (relating to excess contributions under section 415 and excess deferrals under section 402(g)), the contract is not a section 403(b) contract. In addition, section 403(b)(5) and paragraph (b)(1) of this section provide that, for purposes of determining

whether a contract satisfies section 403(b), all section 403(b) contracts purchased for an individual by an employer are treated as purchased under a single contract. Thus, except as provided in paragraph (b)(2) of this section or as otherwise provided in this paragraph (d), a failure to satisfy section 403(b) with respect to any contract issued to an individual by an employer adversely affects all contracts issued to that individual by that employer.

(ii) In accordance with paragraph (b)(3) of this section, a failure to operate in accordance with the terms of a plan adversely affects all of the contracts issued by the employer to the employee or employees with respect to whom the operational failure occurred. Such a failure does not adversely affect any other contract if the failure is neither a failure to satisfy the nondiscrimination requirements of § 1.403(b)-5 (a nondiscrimination failure) nor a failure of the employer to be an eligible employer as defined in § 1.403(b)-2 (an employer eligibility failure). However, any failure that is not an operational failure adversely affects all contracts issued under the plan, including: a failure to have contracts issued pursuant to a written defined contribution plan which, in form, satisfies the requirements of § 1.403(b)-1, § 1.403(b)-2, this section, and §§ 1.403(b)-4 through 1.403(b)-11 (a written plan failure); a nondiscrimination failure; or an employer eligibility failure.

(iii) See other applicable Internal Revenue Code provisions for the treatment of a contract that is not a section 403(b) contract, such as sections 61, 83, 402(b), and 403(c). Thus, for example, section 403(c) (relating to nonqualified annuities) applies if any annuity contract issued by an insurance company fails to satisfy section 403(b), based on the value of the contract at the time of the failure. However, see paragraph (d)(2) of this section for special rules with respect to the nonforfeitability requirement of paragraph (a)(2) of this section.

(2) *Failure to satisfy nonforfeitability requirement*—(i) *Treatment before contract becomes nonforfeitable*. If an annuity contract issued by an insurance company would qualify as a section 403(b) contract but for the failure to

satisfy the nonforfeitability requirement of paragraph (a)(2) of this section, then the contract is treated as a contract to which section 403(c) applies. See § 1.403(b)-8(d)(4) for a rule under which a custodial account that fails to satisfy the nonforfeitability requirement of paragraph (a)(2) of this section is treated as a section 401(a) qualified plan for certain purposes.

(ii) *Treatment when contract becomes nonforfeitable*—(A) *In general*. Notwithstanding paragraph (d)(2)(i) of this section, on or after the date on which the participant's interest in a contract described in paragraph (d)(2)(i) of this section becomes nonforfeitable, the contract may be treated as a section 403(b) contract if no election has been made under section 83(b) with respect to the contract, the participant's interest in the contract has been subject to a substantial risk of forfeiture (as defined in section 83) before becoming nonforfeitable, each contribution under the contract that is subject to a different vesting schedule is maintained in a separate account, and the contract has at all times satisfied the requirements of paragraph (a) of this section other than the nonforfeitability requirement of paragraph (a)(2) of this section. Thus, for example, for the current year and each prior year, no contribution can have been made to the contract that would cause the contract to fail to be a section 403(b) contract as a result of contributions exceeding the limitations of section 415 (except to the extent permitted under paragraph (b)(2) of this section) or to fail to satisfy the nondiscrimination rules described in § 1.403(b)-5. See also § 1.403(b)-10(a)(1) for a special rule in connection with termination of a section 403(b) plan.

(B) *Partial vesting*. For purposes of applying this paragraph (d), if only a portion of a participant's interest in a contract becomes nonforfeitable in a year, then the portion that is nonforfeitable and the portion that fails to be nonforfeitable are each treated as separate contracts. In addition, for purposes of applying this paragraph (d), if a contribution is made to an annuity contract in excess of the limitations of section 415(c) and the excess is maintained in a separate account, then the

portion of the contract that includes the excess contributions account and the remainder are each treated as separate contracts. Thus, if an annuity contract that includes an excess contributions account changes from forfeitable to nonforfeitable during a year, then the portion that is not attributable to the excess contributions account constitutes a section 403(b) contract (assuming it otherwise satisfies the requirements to be a section 403(b) contract) and is not included in gross income, and the portion that is attributable to the excess contributions account is included in gross income in accordance with section 403(c). See § 1.403(b)-4(f) for additional rules.

[T.D. 9340, 72 FR 41141, July 26, 2007; 72 FR 54352, Sept. 25, 2007]

§ 1.403(b)-4 Contribution limitations.

(a) *Treatment of contributions in excess of limitations.* The exclusion provided under § 1.403(b)-3(a) applies to a participant only if the amounts contributed by the employer for the purchase of an annuity contract for the participant do not exceed the applicable limit under sections 415 and 402(g), as described in this section. Under § 1.403(b)-3(a)(4), a section 403(b) contract is required to include the limits on elective deferrals imposed by section 402(g), as described in paragraph (c) of this section. See paragraph (f) of this section for special rules concerning excess contributions and deferrals. Rollover contributions made to a section 403(b) contract, as described in § 1.403(b)-10(d), are not taken into account for purposes of the limits imposed by section 415, § 1.403(b)-3(a)(9), section 402(g), § 1.403(b)-3(a)(4), and this section, but after-tax employee contributions are taken into account under section 415, § 1.403(b)-3(a)(9), and paragraph (b) of this section.

(b) *Maximum annual contribution*—(1) *General rule.* In accordance with section 415(a)(2) and § 1.403(b)-3(a)(9), the contributions for any participant under a section 403(b) contract (namely, employer nonelective contributions (including matching contributions), section 403(b) elective deferrals, and after-tax employee contributions) are not permitted to exceed the limitations imposed by section 415. Under section

415(c), contributions are permitted to be made for participants in a defined contribution plan, subject to the limitations set forth therein (which are generally the lesser of a dollar limit for a year or the participant's compensation for the year). For purposes of section 415, contributions made for a participant are aggregated to the extent applicable under sections 414(b), (c), (m), (n), and (o). For purposes of section 415(a)(2), §§ 1.403(b)-1 through 1.403(b)-3, this section, and §§ 1.403(b)-5 through 1.403(b)-11, a contribution means any annual addition, as defined in section 415(c).

(2) *Special rules.* See section 415(k)(4) for a special rule under which contributions to section 403(b) contracts are generally aggregated with contributions under other arrangements in applying section 415. For purposes of applying section 415(c)(1)(B) (relating to compensation) with respect to a section 403(b) contract, except as provided in section 415(c)(3)(C), a participant's includible compensation (as defined in § 1.403(b)-2) is substituted for the participant's compensation, as described in section 415(c)(3)(E). Any age 50 catch-up contributions under paragraph (c)(2) of this section are disregarded in applying section 415.

(c) *Section 403(b) elective deferrals*—(1) *Basic limit under section 402(g)(1).* In accordance with section 402(g)(1)(A), the section 403(b) elective deferrals for any individual are included in the individual's gross income to the extent the amount of such deferrals, plus all other elective deferrals for the individual, for the taxable year exceeds the applicable dollar amount under section 402(g)(1)(B). The applicable annual dollar amount under section 402(g)(1)(B) is \$15,000, adjusted for cost-of-living after 2006 in the manner described in section 402(g)(4). See § 1.403(b)-5(b) for a universal availability rule that applies if any employee is permitted to have any section 403(b) elective deferrals made on his or her behalf.

(2) *Age 50 catch-up*—(i) *In general.* In accordance with section 414(v) and the regulations thereunder, a section 403(b) contract may provide for catch-up contributions for a participant who is age 50 by the end of the year, provided that such age 50 catch-up contributions do

not exceed the catch-up limit under section 414(v)(2) for the taxable year. The maximum amount of additional age 50 catch-up contributions for a taxable year under section 414(v) is \$5,000, adjusted for cost-of-living after 2006 in the manner described in section 414(v)(2)(C). For additional requirements, see regulations under section 414(v).

(ii) *Coordination with special section 403(b) catch-up.* In accordance with sections 414(v)(6)(A)(ii) and 402(g)(7)(A), the age 50 catch-up described in this paragraph (c)(2) may apply for any taxable year in which a participant also qualifies for the special section 403(b) catch-up under paragraph (c)(3) of this section.

(3) *Special section 403(b) catch-up for certain organizations—*(i) *Amount of the special section 403(b) catch-up.* In the case of a qualified employee of a qualified organization for whom the basic section 403(b) elective deferrals for any year are not less than the applicable dollar amount under section 402(g)(1)(B), the section 403(b) elective deferral limitation of section 402(g)(1) for the taxable year of the qualified employee is increased by the least of—

- (A) \$3,000;
- (B) The excess of—
- (1) \$15,000, over

(2) The total elective deferrals described in section 402(g)(7)(A)(ii) made for the qualified employee by the qualified organization for prior years; or

- (C) The excess of—

(1) \$5,000 multiplied by the number of years of service of the employee with the qualified organization, over

(2) The total elective deferrals (as defined at § 1.403(b)-2) made for the employee by the qualified organization for prior years.

(ii) *Qualified organization.* (A) For purposes of this paragraph (c)(3), *qualified organization* means an eligible employer that is—

- (1) An educational organization described in section 170(b)(1)(A)(ii);
- (2) A hospital;
- (3) A health and welfare service agency (including a home health service agency);
- (4) A church-related organization; or
- (5) Any organization described in section 414(e)(3)(B)(ii).

(B) All entities that are in a church-related organization or an organization controlled by a church-related organization under section 414(e)(3)(B)(ii) are treated as a single qualified organization (so that years of service and any special section 403(b) catch-up elective deferrals previously made for a qualified employee for a church or other entity within a church-related organization or an organization controlled by the church-related organization are taken into account for purposes of applying this paragraph (c)(3) to the employee with respect to any other entity within the same church-related organization or organization controlled by a church-related organization).

(C) For purposes of this paragraph (c)(3)(ii), a *health and welfare service agency* means—

(1) An organization whose primary activity is to provide services that constitute medical care as defined in section 213(d)(1) (such as a hospice);

(2) A section 501(c)(3) organization whose primary activity is the prevention of cruelty to individuals or animals;

(3) An adoption agency; or

(4) An agency that provides substantial personal services to the needy as part of its primary activity (such as a section 501(c)(3) organization that either provides meals to needy individuals, is a home health service agency, provides services to help individuals who have substance abuse, or provides help to the disabled).

(iii) *Qualified employee.* For purposes of this paragraph (c)(3), *qualified employee* means an employee who has completed at least 15 years of service (as defined under paragraph (e) of this section) taking into account only employment with the qualified organization. Thus, an employee who has not completed at least 15 years of service (as defined under paragraph (e) of this section) taking into account only employment with the qualified organization is not a qualified employee.

(iv) *Coordination with age 50 catch-up.* In accordance with sections 402(g)(1)(C) and 402(g)(7), any catch-up amount contributed by an employee who is eligible for both an age 50 catch-up and a special section 403(b) catch-up is treated first as an amount contributed as a

special section 403(b) catch-up to the extent a special section 403(b) catch-up is permitted, and then as an amount contributed as an age 50 catch-up (to the extent the catch-up amount exceeds the maximum special section 403(b) catch-up after taking into account sections 402(g) and 415(c), this paragraph (c)(3), and any limitations on the special section 403(b) catch-up that are imposed by the terms of the plan).

(4) *Coordination with designated Roth contributions.* See regulations under section 402A for rules for determining whether an elective deferral is a pre-tax elective deferral or a designated Roth contribution.

(5) *Examples.* The provisions of this paragraph (c) are illustrated by the following examples:

Example 1. (i) *Facts illustrating application of the basic dollar limit.* Participant B, who is 45, is eligible to participate in a State university section 403(b) plan in 2006. B is not a qualified employee, as defined in paragraph (c)(3)(iii) of this section. The plan permits section 403(b) elective deferrals, but no other employer contributions are made under the plan. The plan provides limitations on section 403(b) elective deferrals up to the maximum permitted under paragraphs (c)(1) and (3) of this section and the additional age 50 catch-up amount described in paragraph (c)(2) of this section. For 2006, B will receive includible compensation of \$42,000 from the eligible employer. B desires to elect to have the maximum section 403(b) elective deferral possible contributed in 2006. For 2006, the basic dollar limit for section 403(b) elective deferrals under paragraph (c)(1) of this section is \$15,000 and the additional dollar amount permitted under the age 50 catch-up is \$5,000.

(ii) *Conclusion.* B is not eligible for the age 50 catch-up in 2006 because B is 45 in 2006. B is also not eligible for the special section 403(b) catch-up under paragraph (c)(3) of this section because B is not a qualified employee. Accordingly, the maximum section 403(b) elective deferral that B may elect for 2006 is \$15,000.

Example 2. (i) *Facts illustrating application of the includible compensation limitation.* The facts are the same as in *Example 1*, except B's includible compensation is \$14,000.

(ii) *Conclusion.* Under section 415(c), contributions may not exceed 100 percent of includible compensation. Accordingly, the maximum section 403(b) elective deferral that B may elect for 2006 is \$14,000.

Example 3. (i) *Facts illustrating application of the age 50 catch-up.* Participant C, who is 55, is eligible to participate in a State univer-

sity section 403(b) plan in 2006. The plan permits section 403(b) elective deferrals, but no other employer contributions are made under the plan. The plan provides limitations on section 403(b) elective deferrals up to the maximum permitted under paragraphs (c)(1) and (c)(3) of this section and the additional age 50 catch-up amount described in paragraph (c)(2) of this section. For 2006, C will receive includible compensation of \$48,000 from the eligible employer. C desires to elect to have the maximum section 403(b) elective deferral possible contributed in 2006. For 2006, the basic dollar limit for section 403(b) elective deferrals under paragraph (c)(1) of this section is \$15,000 and the additional dollar amount permitted under the age 50 catch-up is \$5,000. C does not have 15 years of service and thus is not a qualified employee, as defined in paragraph (c)(3)(iii) of this section.

(ii) *Conclusion.* C is eligible for the age 50 catch-up in 2006 because C is 55 in 2006. C is not eligible for the special section 403(b) catch-up under paragraph (c)(3) of this section because C is not a qualified employee (as defined in paragraph (c)(3)(iii) of this section). Accordingly, the maximum section 403(b) elective deferral that C may elect for 2006 is \$20,000 (\$15,000 plus \$5,000).

Example 4. (i) *Facts illustrating application of both the age 50 and the special section 403(b) catch-up.* The facts are the same as in *Example 3*, except that C is a qualified employee for purposes of the special section 403(b) catch-up provisions in paragraph (c)(3) of this section. For 2006, the maximum additional section 403(b) elective deferral for which C qualifies under the special section 403(b) catch-up under paragraph (c)(3) of this section is \$3,000.

(ii) *Conclusion.* The maximum section 403(b) elective deferrals that C may elect for 2006 is \$23,000. This is the sum of the basic limit on section 403(b) elective deferrals under paragraph (c)(1) of this section equal to \$15,000, plus the \$3,000 additional special section 403(b) catch-up amount for which C qualifies under paragraph (c)(3) of this section, plus the additional age 50 catch-up amount of \$5,000.

Example 5. (i) *Facts illustrating calculation of years of service with a predecessor organization for purposes of the special section 403(b) catch-up.* Participant A is an employee of hospital H and is eligible to participate in a section 403(b) plan of H in 2006. A does not have 15 years of service with H, but A has previously made special section 403(b) catch-up deferrals to a section 403(b) plan maintained by hospital P which has since been acquired by H.

(ii) *Conclusion.* The special section 403(b) catch-up amount for which A qualifies under paragraph (c)(3) of this section must be calculated taking into account A's prior years

of service and section 403(b) elective deferrals with the predecessor hospital if and only if A did not have any severance from service in connection with the acquisition.

Example 6. (i) Facts illustrating application of the age 50 catch-up and the section 415(c) dollar limitation. The facts are the same as in *Example 4*, except that the employer makes a nonelective contribution for each employee equal to 20 percent of C's compensation (which is \$48,000). Thus, the employer makes a nonelective contribution for C for 2006 equal to \$9,600. The plan provides that a participant is not permitted to make section 403(b) elective deferrals to the extent the section 403(b) elective deferrals would result in contributions in excess of the maximum permitted under section 415 and provides that contributions are reduced in the following order: the special section 403(b) catch-up elective deferrals under paragraph (c)(3) of this section are reduced first; the age 50 catch-up elective deferrals under paragraph (c)(2) of this section are reduced second; and then the basic section 403(b) elective deferrals under paragraph (c)(1) of this section are reduced. For 2006, the applicable dollar limit under section 415(c)(1)(A) is \$44,000.

(ii) *Conclusion.* The maximum section 403(b) elective deferral that C may elect for 2006 is \$23,000. This is the sum of the basic limit on section 403(b) elective deferrals under paragraph (c)(1) of this section equal to \$15,000, plus the \$3,000 additional special section 403(b) catch-up amount for which C qualifies under paragraph (c)(3) of this section, plus the additional age 50 catch-up amount of \$5,000. The limit in paragraph (b) of this section would not be exceeded because the sum of the \$9,600 nonelective contribution and the \$23,000 section 403(b) elective deferrals does not exceed the lesser of \$49,000 (which is the sum of \$44,000 plus the \$5,000 additional age 50 catch-up amount) or \$53,000 (which is the sum of C's includible compensation for 2006 (\$48,000) plus the \$5,000 additional age 50 catch-up amount).

Example 7. (i) Facts further illustrating application of the age 50 catch-up and the section 415(c) dollar limitation. The facts are the same as in *Example 6*, except that C's includible compensation for 2006 is \$58,000 and the plan provides for a nonelective contribution equal to 50 percent of includible compensation, so that the employer nonelective contribution for C for 2006 is \$29,000 (50 percent of \$58,000).

(ii) *Conclusion.* The maximum section 403(b) elective deferral that C may elect for 2006 is \$20,000. A section 403(b) elective deferral in excess of this amount would exceed the sum of the limit in section 415(c)(1)(A) plus the additional age 50 catch-up amount, because the sum of the employer's nonelective contribution of \$29,000 plus a section 403(b) elective deferral in excess of \$20,000 would exceed \$49,000 (the sum of the \$44,000 limit in

section 415(c)(1)(A) plus the \$5,000 additional age 50 catch-up amount). (Note that a section 403(b) elective deferral in excess of \$20,000 would also exceed the limitations of section 402(g) unless a special section 403(b) catch-up were permitted.)

Example 8. (i) Facts further illustrating application of the age 50 catch-up and the section 415(c) dollar limitation. The facts are the same as in *Example 7*, except that the plan provides for a nonelective contribution for C equal to \$44,000 (which is the limit in section 415(c)(1)(A)).

(ii) *Conclusion.* The maximum section 403(b) elective deferral that C may elect for 2006 is \$5,000. A section 403(b) elective deferral in excess of this amount would exceed the sum of the limit in section 415(c)(1)(A) plus the additional age 50 catch-up amount (\$5,000), because the sum of the employer's nonelective contribution of \$44,000 plus a section 403(b) elective deferral in excess of \$5,000 would exceed \$49,000 (the sum of the \$44,000 limit in section 415(c)(1)(A) plus the \$5,000 additional age 50 catch-up amount).

Example 9. (i) Facts illustrating application of the age 50 catch-up and the section 415(c) includible compensation limitation. The facts are the same as in *Example 7*, except that C's includible compensation for 2006 is \$28,000, so that the employer nonelective contribution for C for 2006 is \$14,000 (50 percent of \$28,000).

(ii) *Conclusion.* The maximum section 403(b) elective deferral that C may elect for 2006 is \$19,000. A section 403(b) elective deferral in excess of this amount would exceed the sum of the limit in section 415(c)(1)(B) plus the additional age 50 catch-up amount, because C's includible compensation is \$28,000 and the sum of the employer's nonelective contribution of \$14,000 plus a section 403(b) elective deferral in excess of \$19,000 would exceed \$33,000 (which is the sum of 100 percent of C's includible compensation plus the \$5,000 additional age 50 catch-up amount).

Example 10. (i) Facts illustrating that section 403(b) elective deferrals cannot exceed compensation otherwise payable. Employee D is age 60, has includible compensation of \$14,000, and wishes to contribute section 403(b) elective deferrals of \$20,000 for the year. No nonelective contributions are made for Employee D.

(ii) *Conclusion.* Because a contribution is a section 403(b) elective deferral only if it relates to an amount that would otherwise be included in the participant's compensation, the effective limitation on section 403(b) elective deferrals for a participant whose compensation is less than the basic dollar limit for section 403(b) elective deferrals is the participant's compensation. Thus, D cannot make section 403(b) elective deferrals in excess of D's actual compensation, which is \$14,000, even though the basic dollar limit exceeds that amount.

Example 11. (i) Facts illustrating calculation of the special section 403(b) catch-up. For 2006, employee E, who is age 53, is eligible to participate in a section 403(b) plan of hospital H, which is a section 501(c)(3) organization. H's plan permits section 403(b) elective deferrals and provides for an employer contribution of 10 percent of a participant's compensation. The plan provides limitations on section 403(b) elective deferrals up to the maximum permitted under paragraphs (c)(1), (2), and (3) of this section. For 2006, E's includible compensation is \$50,000. E wishes to elect to have the maximum section 403(b) elective deferral possible contributed in 2006. E has previously made \$62,000 of section 403(b) elective deferrals under the plan, but has never made an election for a special section 403(b) catch-up elective deferral. For 2006, the basic dollar limit for section 403(b) elective deferrals under paragraph (c)(1) of this section is \$15,000, the additional dollar amount permitted under the age 50 catch-up is \$5,000, E's employer will make a nonelective contribution of \$5,000 (10% of \$50,000 compensation), and E is a qualified employee of a qualified employer as defined in paragraph (c)(3) of this section.

(ii) *Conclusion.* The maximum section 403(b) elective deferrals that E may elect under H's section 403(b) plan for 2006 is \$23,000. This is the sum of the basic limit on section 403(b) elective deferrals for 2006 under paragraph (c)(1) of this section equal to \$15,000, plus the \$3,000 maximum additional special section 403(b) catch-up amount for which D qualifies in 2006 under paragraph (c)(3) of this section, plus the additional age 50 catch-up amount of \$5,000. The limitation on the additional special section 403(b) catch-up amount is not less than \$3,000 because the limitation at paragraph (c)(3)(i)(B) of this section is \$15,000 (\$15,000 minus zero) and the limitation at paragraph (c)(3)(i)(C) of this section is \$13,000 (\$5,000 times 15, minus \$62,000 of total deferrals in prior years). These conclusions would be unaffected if H were an eligible governmental employer under section 457(b) that has a section 457(b) eligible governmental plan and E were in the past to have made annual deferrals to that plan, because contributions to a section 457(b) eligible governmental plan do not constitute elective deferrals; and these conclusions would also be the same if H had a section 401(k) plan and E were in the past to have made elective deferrals to that plan, assuming that those elective deferrals did not exceed \$10,000 (\$5,000 times 15, minus the sum of \$62,000 plus \$10,000, equals \$3,000), so as to result in the limitation at paragraph (c)(3)(i)(C) of this section being less than \$3,000.

Example 12. (i) Facts illustrating calculation of the special section 403(b) catch-up in the next calendar year. The facts are the same as in Example 11, except that, for 2007, E has in-

cludible compensation of \$60,000. For 2007, E now has previously made \$85,000 of section 403(b) elective deferrals (\$62,000 deferred before 2006, plus the \$15,000 in basic section 403(b) elective deferrals in 2006, the \$3,000 maximum additional special section 403(b) catch-up amount in 2006, plus the \$5,000 age 50 catch-up amount in 2006). However, the \$5,000 age 50 catch-up amount deferred in 2006 is disregarded for purposes of applying the limitation at paragraph (c)(3)(i)(B) of this section to determine the special section 403(b) catch-up amount. Thus, for 2007, only \$80,000 of section 403(b) elective deferrals are taken into account in applying the limitation at paragraph (c)(3)(i)(B) of this section. For 2007, the basic dollar limit for section 403(b) elective deferrals under paragraph (c)(1) of this section is assumed to be \$16,000, the additional dollar amount permitted under the age 50 catch-up is assumed to be \$5,000, and E's employer contributes \$6,000 (10% of \$60,000) as a non-elective contribution.

(ii) *Conclusion.* The maximum section 403(b) elective deferral that D may elect under H's section 403(b) plan for 2007 is \$21,000. This is the sum of the basic limit on section 403(b) elective deferrals under paragraph (c)(1) of this section equal to \$16,000, plus the additional age 50 catch-up amount of \$5,000. E is not entitled to any additional special section 403(b) catch-up amount for 2007 under paragraph (c)(3) of this section due to the limitation at paragraph (c)(3)(i)(C) of this section (16 times \$5,000 equals \$80,000, minus D's total prior section 403(b) elective deferrals of \$80,000 equals zero).

(d) *Employer contributions for former employees—(1) Includible compensation deemed to continue for nonelective contributions.* For purposes of applying paragraph (b) of this section, a former employee is deemed to have monthly includible compensation for the period through the end of the taxable year of the employee in which he or she ceases to be an employee and through the end of each of the next five taxable years. The amount of the monthly includible compensation is equal to one twelfth of the former employee's includible compensation during the former employee's most recent year of service. Accordingly, nonelective employer contributions for a former employee must not exceed the limitation of section 415(c)(1) up to the lesser of the dollar amount in section 415(c)(1)(A) or the former employee's annual includible

compensation based on the former employee's average monthly compensation during his or her most recent year of service.

(2) *Examples.* The provisions of paragraph (d)(1) of this section are illustrated by the following examples:

Example 1. (i) *Facts.* Private college M is a section 501(c)(3) organization operated on the basis of a June 30 fiscal year that maintains a section 403(b) plan for its employees. In 2004, M amends the plan to provide for a temporary early retirement incentive under which the college will make a nonelective contribution for any participant who satisfies certain minimum age and service conditions and who retires before June 30, 2006. The contribution will equal 110 percent of the participant's rate of pay for one year and will be payable over a period ending no later than the end of the fifth fiscal year that begins after retirement. It is assumed for purposes of this *Example 1* that, in accordance with § 1.401(a)(4)-10(b) and under the facts and circumstances, the post-retirement contributions made for participants who satisfy the minimum age and service conditions and retire before June 30, 2006, do not discriminate in favor of former employees who are highly compensated employees. Employee A retires under the early retirement incentive on March 12, 2006, and A's annual includible compensation for the period from March 1, 2005, through February 28, 2006 (which is A's most recent one year of service) is \$30,000. The applicable dollar limit under section 415(c)(1)(A) is assumed to be \$44,000 for 2006 and \$45,000 for 2007. The college contributes \$30,000 for A for 2006 and \$3,000 for A for 2007 (totaling \$33,000 or 110 percent of \$30,000). No other contributions are made to a section 403(b) contract for A for those years.

(ii) *Conclusion.* The contributions made for A do not exceed A's includible compensation for 2006 or 2007.

Example 2. (i) *Facts.* Private college N is a section 501(c)(3) organization that maintains a section 403(b) plan for its employees. The plan provides for N to make monthly nonelective contributions equal to 20 percent of the monthly includible compensation for each eligible employee. In addition, the plan provides for contributions to continue for 5 years following the retirement of any employee after age 64 and completion of at least 20 years of service (based on the employee's average annual rate of base salary in the preceding 3 calendar years ended before the date of retirement). It is assumed for purposes of this *Example 2* that, in accordance with § 1.401(a)(4)-10(b) and under the facts and circumstances, the post-retirement contributions made for participants who satisfy the minimum age and service conditions do not discriminate in favor of former employees

who are highly compensated employees. Employee B retires on July 1, 2006, at age 64 after completion of 20 or more years of service. At that date, B's annual includible compensation for the most recently ended fiscal year of N is \$72,000 and B's average monthly rate of base salary for 2003 through 2005 is \$5,000. N contributes \$1,200 per month (20 percent of 1/12th of \$72,000) from January of 2006 through June of 2006 and contributes \$1,000 (20 percent of \$5,000) per month for B from July of 2006 through June of 2011. The applicable dollar limit under section 415(c)(1)(A) is \$44,000 for 2006 through 2011. No other contributions are made to a section 403(b) contract for B for those years.

(ii) *Conclusion.* The contributions made for B do not exceed B's includible compensation for any of the years from 2006 through 2010.

Example 3. (i) *Facts.* A public university maintains a section 403(b) under which it contributes annually 10% of compensation for participants, including for the first 5 calendar years following the date on which the participant ceases to be an employee. The plan provides that if a participant who is a former employee dies during the first 5 calendar years following the date on which the participant ceases to be an employee, a contribution is made that is equal to the lesser of—

(A) The excess of the individual's includible compensation for that year over the contributions previously made for the individual for that year; or

(B) The total contributions that would have been made on the individual's behalf thereafter if he or she had survived to the end of the 5-year period.

(ii) Individual C's annual includible compensation is \$72,000 (so that C's monthly includible compensation is \$6,000). A \$600 contribution is made for C for January of the first taxable year following retirement (10% of individual C's monthly includible compensation of \$6,000). Individual C dies during February of that year. The university makes a contribution for individual C for February equal to \$11,400 (C's monthly includible compensation for January and February, reduced by \$600).

(iii) *Conclusion.* The contribution does not exceed the amount of individual C's includible compensation for the taxable year for purposes of section 415(c), but any additional contributions would exceed C's includible compensation for purposes of section 415(c).

(3) *Disabled employees.* See also section 415(c)(3)(C) which sets forth a special rule under which compensation may be treated as continuing for purposes of section 415 for certain former employees who are disabled.

(e) *Special rules for determining years of service—*(1) *In general.* For purposes

of determining a participant's includible compensation under paragraph (b)(2) of this section and a participant's years of service under paragraphs (c)(3) (special section 403(b) catch-up for qualified employees of certain organizations) and (d) (employer contributions for former employees) of this section, an employee must be credited with a full year of service for each year during which the individual is a full-time employee of the eligible employer for the entire work period, and a fraction of a year for each part of a work period during which the individual is a full-time or part-time employee of the eligible employer. An individual's number of years of service equals the aggregate of the annual work periods during which the individual is employed by the eligible employer.

(2) *Work period.* A year of service is based on the employer's annual work period, not the employee's taxable year. For example, in determining whether a university professor is employed full time, the annual work period is the school's academic year. However, in no case may an employee accumulate more than one year of service in a twelve-month period.

(3) *Service with more than one eligible employer.*—(i) *General rule.* With respect to any section 403(b) contract of an eligible employer, except as provided in paragraph (e)(3)(ii) of this section, any period during which an individual is not an employee of that eligible employer is disregarded for purposes of this paragraph (e).

(ii) *Special rule for church employees.* With respect to any section 403(b) contract of an eligible employer that is a church-related organization, any period during which an individual is an employee of that eligible employer and any other eligible employer that is a church-related organization that has an association (as defined in section 414(e)(3)(D)) with that eligible employer is taken into account on an aggregated basis, but any period during which an individual is not an employee of a church-related organization or is an employee of a church-related organization that does not have an association with that eligible employer is disregarded for purposes of this paragraph (e).

(4) *Full-time employee for full year.* Each annual work period during which an individual is employed full time by the eligible employer constitutes one year of service. In determining whether an individual is employed full-time, the amount of work which he or she actually performs is compared with the amount of work that is normally required of individuals performing similar services from which substantially all of their annual compensation is derived.

(5) *Other employees.* (i) An individual is treated as performing a fraction of a year of service for each annual work period during which he or she is a full-time employee for part of the annual work period and for each annual work period during which he or she is a part-time employee either for the entire annual work period or for a part of the annual work period.

(ii) In determining the fraction that represents the fractional year of service for an individual employed full time for part of an annual work period, the numerator is the period of time (such as weeks or months) during which the individual is a full-time employee during that annual work period, and the denominator is the period of time that is the annual work period.

(iii) In determining the fraction that represents the fractional year of service of an individual who is employed part time for the entire annual work period, the numerator is the amount of work performed by the individual, and the denominator is the amount of work normally required of individuals who perform similar services and who are employed full time for the entire annual work period.

(iv) In determining the fraction representing the fractional year of service of an individual who is employed part time for part of an annual work period, the fractional year of service that would apply if the individual were a part-time employee for a full annual work period is multiplied by the fractional year of service that would apply if the individual were a full-time employee for the part of an annual work period.

(6) *Work performed.* For purposes of this paragraph (e), in measuring the

amount of work of an individual performing particular services, the work performed is determined based on the individual's hours of service (as defined under section 410(a)(3)(C)), except that a plan may use a different measure of work if appropriate under the facts and circumstances. For example, a plan may provide for a university professor's work to be measured by the number of courses taught during an annual work period in any case in which that individual's work assignment is generally based on a specified number of courses to be taught.

(7) *Most recent one-year period of service.* For purposes of paragraph (d) of this section, in the case of a part-time employee or a full-time employee who is employed for only part of the year determined on the basis of the employer's annual work period, the employee's most recent periods of service are aggregated to determine his or her most recent one-year period of service. In such a case, there is first taken into account his or her service during the annual work period for which the last year of service's includible compensation is being determined; then there is taken into account his or her service during his or her next preceding annual work period based on whole months; and so forth until the employee's service equals, in the aggregate, one year of service.

(8) *Less than one year of service considered as one year.* If, at the close of a taxable year, an employee has, after application of all of the other rules in this paragraph (e), some portion of one year of service (but has accumulated less than one year of service), the employee is deemed to have one year of service. Except as provided in the previous sentence, fractional years of service are not rounded up.

(9) *Examples.* The provisions of this paragraph (e) are illustrated by the following examples:

Example 1. (i) *Facts.* Individual G is employed half-time in 2004 and 2005 as a clerk by H, a hospital which is a section 501(c)(3) organization. G earns \$20,000 from H in each of those years, and retires on December 31, 2005.

(ii) *Conclusion.* For purposes of determining G's includible compensation during G's last year of service under paragraph (d) of this section, G's most recent periods of service

are aggregated to determine G's most recent one-year period of service. In this case, since D worked half-time in 2004 and 2005, the compensation D earned in those two years are aggregated to produce D's includible compensation for D's last full year in service. Thus, in this case, the \$20,000 that D earned in 2004 and 2005 for D's half-time work are aggregated, so that D has \$40,000 of includible compensation for D's most recent one-year of service for purposes of applying paragraphs (b)(2), (c)(3), and (d) of this section.

Example 2. (i) *Facts.* Individual H is employed as a part-time professor by public University U during the first semester of its two-semester 2004-2005 academic year. While H teaches one course generally for 3 hours a week during the first semester of the academic year, U's full-time faculty members generally teach for 9 hours a week during the full academic year.

(ii) *Conclusion.* For purposes of calculating how much of a year of service H performs in the 2004-2005 academic year (before application of the special rules of paragraphs (e)(7) and (8) of this section concerning less than one year of service), paragraph (e)(5)(iv) of this section is applied as follows: since H teaches one course at U for 3 hours per week for 1 semester and other faculty members at U teach 9 hours per week for 2 semesters, H is considered to have completed $\frac{3}{18}$ or $\frac{1}{6}$ of a year of service during the 2004-2005 academic year, determined as follows:

(A) The fractional year of service if H were a part-time employee for a full year is $\frac{3}{9}$ (number of hours employed divided by the usual number of hours of work required for that position).

(B) The fractional year of service if H were a full-time employee for half of a year is $\frac{1}{2}$ (one semester, divided by the usual 2-semester annual work period).

(C) These fractions are multiplied to obtain the fractional year of service: $\frac{3}{9}$ times $\frac{1}{2}$, or $\frac{3}{18}$, equals $\frac{1}{6}$ of a year of service.

(f) *Excess contributions or deferrals—(1) Inclusion in gross income.* Any contribution made for a participant to a section 403(b) contract for the taxable year that exceeds either the maximum annual contribution limit set forth in paragraph (b) of this section or the maximum annual section 403(b) elective deferral limit set forth in paragraph (c) of this section constitutes an excess contribution that is included in gross income for that taxable year. See § 1.403(b)-3(d)(1)(iii) and (2)(i) for additional rules, including special rules relating to contracts that fail to be non-forfeitable. See also section 4973 for an excise tax applicable with respect to

excess contributions to a custodial account and section 4979(f)(2)(B) for a special rule applicable if excess matching contributions, excess after-tax employee contributions, and excess section 403(b) elective deferrals do not exceed \$100.

(2) *Separate account required for certain excess contributions; distribution of excess elective deferrals.* A contract to which a contribution is made that exceeds the maximum annual contribution limit set forth in paragraph (b) of this section is not a section 403(b) contract unless the excess contribution is held in a separate account which constitutes a separate account for purposes of section 72. See also § 1.403(b)-3(a)(4) and paragraph (f)(4) of this section for additional rules with respect to the requirements of section 401(a)(30) and any excess deferral.

(3) *Ability to distribute excess contributions.* A contract does not fail to satisfy the requirements of § 1.403(b)-3, the distribution rules of § 1.403(b)-6 or 1.403(b)-9, or the funding rules of § 1.403(b)-8 solely by reason of a distribution made from a separate account under paragraph (f)(2) of this section or made under paragraph (f)(4) of this section.

(4) *Excess section 403(b) elective deferrals.* A section 403(b) contract may provide that any excess deferral as a result of a failure to comply with the limitation under paragraph (c) of this section for a taxable year with respect to any section 403(b) elective deferral made for a participant by the employer will be distributed to the participant, with allocable net income, no later than April 15 of the following taxable year or otherwise in accordance with section 402(g). See section 402(g)(2)(A) for rules permitting the participant to allocate excess deferrals among the plans in which the participant has made elective deferrals, and see section 402(g)(2)(C) for special rules to determine the tax treatment of such a distribution.

(5) *Examples.* The provisions of this paragraph (f) are illustrated by the following examples:

Example 1. (i) *Facts.* Individual D's employer makes a \$46,000 contribution for 2006 to an individual annuity insurance policy for Individual D that would otherwise be a section 403(b) contract. The contribution does

not include any elective deferrals and the applicable limit under section 415(c) is \$44,000 for 2006. The \$2,000 section 415(c) excess is put into a separate account under the policy. Employer includes \$2,000 in D's gross income as wages for 2006 and, to the extent of the amount held in the separate account for the section 415(c) excess contribution, does not treat the account as a contract to which section 403(b) applies.

(ii) *Conclusion.* The separate account for the section 415(c) excess contribution is a contract to which section 403(c) applies, but the excess contribution does not cause the rest of the contract to fail section 403(b).

Example 2. (i) *Facts.* Same facts as *Example 1*, except that the contribution is made to purchase mutual funds that are held in a custodial account, instead of an individual annuity insurance policy.

(ii) *Conclusion.* The conclusion is the same as in *Example 1*, except that the purchase constitutes a transfer described in section 83.

Example 3. (i) *Facts.* Same facts as *Example 1*, except that the amount held in the separate account for the section 415(c) excess contribution is subsequently distributed to D.

(ii) *Conclusion.* The distribution is included in gross income to the extent provided under section 72 relating to distributions from a section 403(c) contract.

Example 4. (i) *Facts.* Individual E makes section 403(b) elective deferrals totaling \$15,500 for 2006, when E is age 45 and the applicable limit on section 403(b) elective deferrals is \$15,000. On April 14, 2007, the plan refunds the \$500 excess along with applicable earnings of \$65.

(ii) *Conclusion.* The \$565 payment constitutes a distribution of an excess deferral under paragraph (f)(4) of this section. Under section 402(g), the \$500 excess deferral is included in E's gross income for 2006. The additional \$65 is included in E's gross income for 2007 and, because the distribution is made by April 15, 2007 (as provided in section 402(g)(2)), the \$65 is not subject to the additional 10 percent income tax on early distributions under section 72(t).

[T.D. 9340, 72 FR 41144, July 26, 2007; 72 FR 54352, Sept. 25, 2007]

§ 1.403(b)-5 Nondiscrimination rules.

(a) *Nondiscrimination rules for contributions other than section 403(b) elective deferrals—(1) General rule.* Under section 403(b)(12)(A)(i), employer contributions and after-tax employee contributions to a section 403(b) plan must satisfy all of the following requirements (the nondiscrimination requirements) in the same manner as a qualified plan under section 401(a):

§ 1.403(b)-5

26 CFR Ch. I (4-1-08 Edition)

(i) Section 401(a)(4) (relating to non-discrimination in contributions and benefits), taking section 401(a)(5) into account.

(ii) Section 401(a)(17) (limiting the amount of compensation that can be taken into account).

(iii) Section 401(m) (relating to matching and after-tax employee contributions).

(iv) Section 410(b) (relating to minimum coverage).

(2) *Nonapplication to section 403(b) elective deferrals.* The requirements of this paragraph (a) do not apply to section 403(b) elective deferrals.

(3) *Compensation for testing.* Except as may otherwise be specifically permitted under the provisions referenced in paragraph (a)(1) of this section, compliance with those provisions is tested using compensation as defined in section 414(s) (and without regard to section 415(c)(3)(E)). In addition, for purposes of paragraph (a)(1) of this section, there may be excluded employees who are permitted to be excluded under paragraph (b)(4)(ii)(D) and (E) of this section. However, as provided in paragraph (b)(4)(i) of this section, the exclusion of any employee listed in paragraph (b)(4)(ii)(D) or (E) of this section is subject to the conditions applicable under section 410(b)(4).

(4) *Employer aggregation rules.* See regulations under section 414(b), (c), (m), and (o) for rules treating entities as a single employer for purposes of the nondiscrimination requirements.

(5) *Special rules for governmental plans.* Paragraphs (a)(1)(i), (iii), and (iv) of this section do not apply to a governmental plan as defined in section 414(d) (but contributions to a governmental plan must comply with paragraphs (a)(1)(ii) and (b) of this section).

(b) *Universal availability required for section 403(b) elective deferrals—(1) General rule.* Under section 403(b)(12)(A)(ii), all employees of the eligible employer must be permitted to have section 403(b) elective deferrals contributed on their behalf if any employee of the eligible employer may elect to have the organization make section 403(b) elective deferrals. Further, the employee's right to make elective deferrals also includes the right to designate section

403(b) elective deferrals as designated Roth contributions.

(2) *Effective opportunity required.* For purposes of paragraph (b)(1) of this section, an employee is not treated as being permitted to have section 403(b) elective deferrals contributed on the employee's behalf unless the employee is provided an effective opportunity that satisfies the requirements of this paragraph (b)(2). Whether an employee has an effective opportunity is determined based on all the relevant facts and circumstances, including notice of the availability of the election, the period of time during which an election may be made, and any other conditions on elections. A section 403(b) plan satisfies the effective opportunity requirement of this paragraph (b)(2) only if, at least once during each plan year, the plan provides an employee with an effective opportunity to make (or change) a cash or deferred election (as defined at § 1.401(k)-1(a)(3)) between cash or a contribution to the plan. Further, an effective opportunity includes the right to have section 403(b) elective deferrals made on his or her behalf up to the lesser of the applicable limits in § 1.403(b)-4(c) (including any permissible catch-up elective deferrals under § 1.403(b)-4(c)(2) and (3)) or the applicable limits under the contract with the largest limitation, and applies to part-time employees as well as full-time employees. An effective opportunity is not considered to exist if there are any other rights or benefits (other than rights or benefits listed in § 1.401(k)-1(e)(6)(i)(A), (B), or (D)) that are conditioned (directly or indirectly) upon a participant making or failing to make a cash or deferred election with respect to a contribution to a section 403(b) contract.

(3) *Special rules.* (i) In the case of a section 403(b) plan that covers the employees of more than one section 501(c)(3) organization, the universal availability requirement of this paragraph (b) applies separately to each common law entity (that is, applies separately to each section 501(c)(3) organization). In the case of a section 403(b) plan that covers the employees of more than one State entity, this requirement applies separately to each entity that is not part of a common

payroll. An eligible employer may condition the employee's right to have section 403(b) elective deferrals made on his or her behalf on the employee electing a section 403(b) elective deferral of more than \$200 for a year.

(ii) For purposes of this paragraph (b)(3), an employer that historically has treated one or more of its various geographically distinct units as separate for employee benefit purposes may treat each unit as a separate organization if the unit is operated independently on a day-to-day basis. Units are not geographically distinct if such units are located within the same Standard Metropolitan Statistical Area (SMSA).

(4) *Exclusions*—(i) *Exclusions for special types of employees.* A plan does not fail to satisfy the universal availability requirement of this paragraph (b) merely because it excludes one or more of the types of employees listed in paragraph (b)(4)(ii) of this section. However, the exclusion of any employee listed in paragraph (b)(4)(ii)(D) or (E) of this section is subject to the conditions applicable under section 410(b)(4). Thus, if any employee listed in paragraph (b)(4)(ii)(D) of this section has the right to have section 403(b) elective deferrals made on his or her behalf, then no employee listed in that paragraph (b)(4)(ii)(D) of this section may be excluded under this paragraph (b)(4) and, if any employee listed in paragraph (b)(4)(ii)(E) of this section has the right to have section 403(b) elective deferrals made on his or her behalf, then no employee listed in that paragraph (b)(4)(ii)(E) of this section may be excluded under this paragraph (b)(4).

(ii) *List of special types of excludible employees.* The following types of employees are listed in this paragraph (b)(4)(ii):

(A) Employees who are eligible under another section 403(b) plan, or a section 457(b) eligible governmental plan, of the employer which permits an amount to be contributed or deferred at the election of the employee.

(B) Employees who are eligible to make a cash or deferred election (as defined at § 1.401(k)-1(a)(3)) under a section 401(k) plan of the employer.

(C) Employees who are non-resident aliens described in section 410(b)(3)(C).

(D) Subject to the conditions applicable under section 410(b)(4) (including section 410(b)(4)(B) permitting separate testing for employees not meeting minimum age and service requirements), employees who are students performing services described in section 3121(b)(10).

(E) Subject to the conditions applicable under section 410(b)(4), employees who normally work fewer than 20 hours per week (or such lower number of hours per week as may be set forth in the plan).

(iii) *Special rules.* (A) A section 403(b) plan is permitted to take into account coverage under another plan, as permitted in paragraphs (b)(4)(ii)(A) and (B) of this section, only if the rights to make elective deferrals with respect to that coverage would satisfy paragraphs (b)(2) and (4)(i) of this section if that coverage were provided under the section 403(b) plan.

(B) For purposes of paragraph (b)(4)(ii)(E) of this section, an employee normally works fewer than 20 hours per week if and only if—

(1) For the 12-month period beginning on the date the employee's employment commenced, the employer reasonably expects the employee to work fewer than 1,000 hours of service (as defined in section 410(a)(3)(C)) in such period; and

(2) For each plan year ending after the close of the 12-month period beginning on the date the employee's employment commenced (or, if the plan so provides, each subsequent 12-month period), the employee worked fewer than 1,000 hours of service in the preceding 12-month period. (See, however, section 202(a)(1) of the Employee Retirement Income Security Act of 1974 (ERISA) (88 Stat. 829) Public Law 93-406, and regulations under section 410(a) of the Internal Revenue Code applicable with respect to plans that are subject to Title I of ERISA.)

(c) *Plan required.* Contributions to an annuity contract do not satisfy the requirements of this section unless the contributions are made pursuant to a plan, as defined in § 1.403(b)-3(b)(3), and the terms of the plan satisfy this section.

§ 1.403(b)-6

26 CFR Ch. I (4-1-08 Edition)

(d) *Church plans exception.* This section does not apply to a section 403(b) contract purchased by a church (as defined in § 1.403(b)-2).

(e) *Other rules.* This section only reflects requirements of the Internal Revenue Code applicable for purposes of section 403(b) and does not include other requirements. Specifically, this section does not reflect the requirements of ERISA that may apply with respect to section 403(b) arrangements, such as the vesting requirements at 29 U.S.C. 1053.

[T.D. 9340, 72 FR 41144, July 26, 2007]

§ 1.403(b)-6 Timing of distributions and benefits.

(a) *Distributions generally.* This section provides special rules regarding the timing of distributions from, and the benefits that may be provided under, a section 403(b) contract, including limitations on when early distributions can be made (in paragraphs (b) through (d) of this section), required minimum distributions (in paragraph (e) of this section), and special rules relating to loans (in paragraph (f) of this section) and incidental benefits (in paragraph (g) of this section).

(b) *Distributions from contracts other than custodial accounts or amounts attributable to section 403(b) elective deferrals.* Except as provided in paragraph (c) of this section relating to distributions from custodial accounts, paragraph (d) of this section relating to distributions attributable to section 403(b) elective deferrals, § 1.403(b)-4(f) (relating to correction of excess deferrals), or § 1.403(b)-10(a) (relating to plan termination), a section 403(b) contract is permitted to distribute retirement benefits to the participant no earlier than upon the earlier of the participant's severance from employment or upon the prior occurrence of some event, such as after a fixed number of years, the attainment of a stated age, or disability. See § 1.401-1(b)(1)(ii) for additional guidance. This paragraph (b) does not apply to after-tax employee contributions or earnings thereon.

(c) *Distributions from custodial accounts that are not attributable to section 403(b) elective deferrals.* Except as provided in § 1.403(b)-4(f) (relating to correction of excess deferrals) or § 1.403(b)-

10(a) (relating to plan termination), distributions from a custodial account, as defined in § 1.403(b)-8(d)(2), may not be paid to a participant before the participant has a severance from employment, dies, becomes disabled (within the meaning of section 72(m)(7)), or attains age 59½. Any amounts transferred out of a custodial account to an annuity contract or retirement income account, including earnings thereon, continue to be subject to this paragraph (c). This paragraph (c) does not apply to distributions that are attributable to section 403(b) elective deferrals.

(d) *Distribution of section 403(b) elective deferrals—(1) Limitation on distributions—(i) General rule.* Except as provided in § 1.403(b)-4(f) (relating to correction of excess deferrals) or § 1.403(b)-10(a) (relating to plan termination), distributions of amounts attributable to section 403(b) elective deferrals may not be paid to a participant earlier than the earliest of the date on which the participant has a severance from employment, dies, has a hardship, becomes disabled (within the meaning of section 72(m)(7)), or attains age 59½.

(ii) *Special rule for pre-1989 section 403(b) elective deferrals.* For special rules relating to amounts held as of the close of the taxable year beginning before January 1, 1989 (which does not apply to earnings thereon), see section 1123(e)(3) of the Tax Reform Act of 1986 (100 Stat. 2085, 2475) Public Law 99-514, and section 1011A(c)(11) of the Technical and Miscellaneous Revenue Act of 1988 (102 Stat. 3342, 3476) Public Law 100-647.

(2) *Hardship rules.* A hardship distribution under this paragraph (d) has the same meaning as a distribution on account of hardship under § 1.401(k)-1(d)(3) and is subject to the rules and restrictions set forth in § 1.401(k)-1(d)(3) (including limiting the amount of a distribution in the case of hardship to the amount necessary to satisfy the hardship). In addition, a hardship distribution is limited to the aggregate dollar amount of the participant's section 403(b) elective deferrals under the contract (and may not include any income thereon), reduced by the aggregate dollar amount of the distributions

previously made to the participant from the contract.

(3) *Failure to keep separate accounts.* If a section 403(b) contract includes both section 403(b) elective deferrals and other contributions and the section 403(b) elective deferrals are not maintained in a separate account, then distributions may not be made earlier than the later of—

(i) Any date permitted under paragraph (d)(1) of this section; and

(ii) Any date permitted under paragraph (b) or (c) of this section with respect to contributions that are not section 403(b) elective deferrals (whichever applies to the contributions that are not section 403(b) elective deferrals).

(e) *Minimum required distributions for eligible plans*—(1) *In general.* Under section 403(b)(10), a section 403(b) contract must meet the minimum distribution requirements of section 401(a)(9) (in both form and operation). See section 401(a)(9) for these requirements.

(2) *Treatment as IRAs.* For purposes of applying the distribution rules of section 401(a)(9) to section 403(b) contracts, the minimum distribution rules applicable to individual retirement annuities described in section 408(b) and individual retirement accounts described in section 408(a) apply to section 403(b) contracts. Consequently, except as otherwise provided in paragraphs (e)(3) through (e)(5) of this section, the distribution rules in section 401(a)(9) are applied to section 403(b) contracts in accordance with the provisions in § 1.408-8 for purposes of determining required minimum distributions.

(3) *Required beginning date.* The required beginning date for purposes of section 403(b)(10) is April 1 of the calendar year following the later of the calendar year in which the employee attains age 70½ or the calendar year in which the employee retires from employment with the employer maintaining the plan. However, for any section 403(b) contract that is not part of a governmental plan or church plan, the required beginning date for a 5-percent owner is April 1 of the calendar year following the calendar year in which the employee attains age 70½.

(4) *Surviving spouse rule does not apply.* The special rule in § 1.408-8, A-5

(relating to spousal beneficiaries), does not apply to a section 403(b) contract. Thus, the surviving spouse of a participant is not permitted to treat a section 403(b) contract as the spouse's own section 403(b) contract, even if the spouse is the sole beneficiary.

(5) *Retirement income accounts.* For purposes of § 1.401(a)(9)-6, A-4 (relating to annuity contracts), annuity payments provided with respect to retirement income accounts do not fail to satisfy the requirements of section 401(a)(9) merely because the payments are not made under an annuity contract purchased from an insurance company, provided that the relationship between the annuity payments and the retirement income accounts is not inconsistent with any rules prescribed by the Commissioner in revenue rulings, notices, or other guidance published in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(b) of this chapter). See also § 1.403(b)-9(a)(5) for additional rules relating to annuities payable from a retirement income account).

(6) *Special rules for benefits accruing before December 31, 1986.* (i) The distribution rules provided in section 401(a)(9) do not apply to the undistributed portion of the account balance under the section 403(b) contract valued as of December 31, 1986, exclusive of subsequent earnings (pre-'87 account balance). The distribution rules provided in section 401(a)(9) apply to all benefits under section 403(b) contracts accruing after December 31, 1986 (post-'86 account balance), including earnings after December 31, 1986. Consequently, the post-'86 account balance includes earnings after December 31, 1986, on contributions made before January 1, 1987, in addition to the contributions made after December 31, 1986, and earnings thereon.

(ii) The issuer or custodian of the section 403(b) contract must keep records that enable it to identify the pre-'87 account balance and subsequent changes as set forth in paragraph (d)(6)(iii) of this section and provide such information upon request to the relevant employee or beneficiaries with respect to the contract. If the issuer or custodian does not keep such records,

the entire account balance is treated as subject to section 401(a)(9).

(iii) In applying the distribution rules in section 401(a)(9), only the post-'86 account balance is used to calculate the required minimum distribution for a calendar year. The amount of any distribution from a contract is treated as being paid from the post-'86 account balance to the extent the distribution is required to satisfy the minimum distribution requirement with respect to that contract for a calendar year. Any amount distributed in a calendar year from a contract in excess of the required minimum distribution for a calendar year with respect to that contract is treated as paid from the pre-'87 account balance, if any, of that contract.

(iv) If an amount is distributed from the pre-'87 account balance and rolled over to another section 403(b) contract, the amount is treated as part of the post-'86 account balance in that second contract. However, if the pre-'87 account balance under a section 403(b) contract is directly transferred to another section 403(b) contract (as permitted under § 1.403(b)-10(b)), the amount transferred retains its character as a pre-'87 account balance, provided the issuer of the transferee contract satisfies the recordkeeping requirements of paragraph (e)(6)(ii) of this section.

(v) The distinction between the pre-'87 account balance and the post-'86 account balance provided for under this paragraph (e)(6) of this section has no relevance for purposes of determining the portion of a distribution that is includible in income under section 72.

(vi) The pre-'87 account balance must be distributed in accordance with the incidental benefit requirement of § 1.401-1(b)(1)(i). Distributions attributable to the pre-'87 account balance are treated as satisfying this requirement if all distributions from the section 403(b) contract (including distributions attributable to the post-'86 account balance) satisfy the requirements of § 1.401-1(b)(1)(i) without regard to this section, and distributions attributable to the post-'86 account balance satisfy the rules of this paragraph (e) (without regard to this paragraph (e)(6)). Distributions attributable to

the pre-'87 account balance are treated as satisfying the incidental benefit requirement if all distributions from the section 403(b) contract (including distributions attributable to both the pre-'87 account balance and the post-'86 account balance) satisfy the rules of this paragraph (e) (without regard to this paragraph (e)(6)).

(7) *Application to multiple contracts for an employee.* The required minimum distribution must be separately determined for each section 403(b) contract of an employee. However, because, as provided in paragraph (e)(2) of this section, the distribution rules in section 401(a)(9) apply to section 403(b) contracts in accordance with the provisions in § 1.408-8, the required minimum distribution from one section 403(b) contract of an employee is permitted to be distributed from another section 403(b) contract in order to satisfy section 401(a)(9). Thus, as provided in § 1.408-8, A-9, with respect to IRAs, the required minimum distribution amount from each contract is then totaled and the total minimum distribution taken from any one or more of the individual section 403(b) contracts. However, consistent with the rules in § 1.408-8, A-9, only amounts in section 403(b) contracts that an individual holds as an employee may be aggregated. Amounts in section 403(b) contracts that an individual holds as a beneficiary of the same decedent may be aggregated, but such amounts may not be aggregated with amounts held in section 403(b) contracts that the individual holds as the employee or as the beneficiary of another decedent. Distributions from section 403(b) contracts do not satisfy the minimum distribution requirements for IRAs, nor do distributions from IRAs satisfy the minimum distribution requirements for section 403(b) contracts.

(f) *Loans.* The determination of whether the availability of a loan, the making of a loan, or a failure to repay a loan made from an issuer of a section 403(b) contract to a participant or beneficiary is treated as a distribution (directly or indirectly) for purposes of this section, and the determination of whether the availability of the loan, the making of the loan, or a failure to repay the loan is in any other respect

a violation of the requirements of section 403(b) and §§1.403(b)-1 through 1.403(b)-5, this section, and §§1.403(b)-7 through 1.403(b)-11, depends on the facts and circumstances. Among the facts and circumstances are whether the loan has a fixed repayment schedule and bears a reasonable rate of interest, and whether there are repayment safeguards to which a prudent lender would adhere. Thus, for example, a loan must bear a reasonable rate of interest in order to be treated as not being a distribution. However, a plan loan offset is a distribution for purposes of this section. See §1.72(p)-1, Q&A-13. See also §1.403(b)-7(d) relating to the application of section 72(p) with respect to the taxation of a loan made under a section 403(b) contract. (Further, see section 408(b)(1) of Title I of ERISA and 29 CFR 2550.408b-1 of the Department of Labor regulations concerning additional requirements applicable with respect to plans that are subject to Title I of ERISA.)

(g) *Death benefits and other incidental benefits.* An annuity is not a section 403(b) contract if it fails to satisfy the incidental benefit requirement of §1.401-1(b)(1)(ii) (in form or in operation). For purposes of this paragraph (g), to the extent the incidental benefit requirement of §1.401-1(b)(1)(ii) requires a distribution of the participant's or beneficiary's accumulated benefit, that requirement is deemed to be satisfied if distributions satisfy the minimum distribution requirements of section 401(a)(9). In addition, if a contract issued by an insurance company qualified to issue annuities in a State includes provisions under which, in the event a participant becomes disabled, benefits will be provided by the insurance carrier as if employer contributions were continued until benefit distribution commences, then that benefit is treated as an incidental benefit (as insurance for a deferred annuity benefit in the event of disability) that must satisfy the incidental benefit requirement of §1.401-1(b)(1)(ii) (taking into account any other incidental benefits provided under the plan).

(h) *Special rule regarding severance from employment.* For purposes of this section, severance from employment occurs on any date on which an em-

ployee ceases to be an employee of an eligible employer, even though the employee may continue to be employed either by another entity that is treated as the same employer where either that other entity is not an entity that can be an eligible employer (such as transferring from a section 501(c)(3) organization to a for-profit subsidiary of the section 501(c)(3) organization) or in a capacity that is not employment with an eligible employer (for example, ceasing to be an employee performing services for a public school but continuing to work for the same State employer). Thus, this paragraph (h) does not apply if an employee transfers from one section 501(c)(3) organization to another section 501(c)(3) organization that is treated as the same employer or if an employee transfers from one public school to another public school of the same State employer.

(i) *Certain limitations do not apply to rollover contributions.* The limitations on distributions in paragraphs (b) through (d) of this section do not apply to amounts held in a separate account for eligible rollover distributions as described in §1.403(b)-10(d).

[T.D. 9340, 72 FR 41144, July 26, 2007; 72 FR 54352, Sept. 25, 2007]

§ 1.403(b)-7 Taxation of distributions and benefits.

(a) *General rules for when amounts are included in gross income.* Except as provided in this section (or in §1.403(b)-10(c) relating to payments pursuant to a qualified domestic relations order), amounts actually distributed from a section 403(b) contract are includible in the gross income of the recipient participant or beneficiary (in the year in which so distributed) under section 72 (relating to annuities). For an additional income tax that may apply to certain early distributions that are includible in gross income, see section 72(t).

(b) *Rollovers to individual retirement arrangements and other eligible retirement plans—(1) Timing of taxation of rollovers.* In accordance with sections 402(c), 403(b)(8), and 403(b)(10), a direct rollover in accordance with section 401(a)(31) is not includible in the gross income of a participant or beneficiary in the year rolled over. In addition, any

payment made in the form of an eligible rollover distribution (as defined in section 402(c)(4)) is not includible in gross income in the year paid to the extent the payment is contributed to an eligible retirement plan (as defined in section 402(c)(8)(B)) within 60 days, including the contribution to the eligible retirement plan of any property distributed. For this purpose, the rules of section 402(c)(2) through (7) and (c)(9) apply. Thus, to the extent that a portion of a distribution (including a distribution from a designated Roth account) would be excluded from gross income if it were not rolled over, if that portion of the distribution is to be rolled over into an eligible retirement plan that is not an IRA, the rollover must be accomplished through a direct rollover of the entire distribution to a plan qualified under section 401(a) or section 403(b) plan and that plan must agree to separately account for the amount not includible in income (so that a 60-day rollover to a plan qualified under section 401(a) or another section 403(b) plan is not available for this portion of the distribution). Any direct rollover under this paragraph (b)(1) is a distribution that is subject to the distribution requirements of § 1.403(b)-6.

(2) *Requirement that contract provide rollover options for eligible rollover distributions.* As required in § 1.403(b)-3(a)(7), an annuity contract is not a section 403(b) contract unless the contract provides that if the distributee of an eligible rollover distribution elects to have the distribution paid directly to an eligible retirement plan (as defined in section 402(c)(8)(B)) and specifies the eligible retirement plan to which the distribution is to be paid, then the distribution will be paid to that eligible retirement plan in a direct rollover. For purposes of determining whether a contract satisfies this requirement, the provisions of section 401(a)(31) apply to the annuity as though it were a plan qualified under section 401(a) unless otherwise provided in section 401(a)(31). Thus, the special rule in § 1.401(k)-1(f)(3)(ii) with respect to distributions from a designated Roth account that are expected to total less than \$200 during a year applies to designated Roth accounts under a section 403(b) plan. In applying

the provisions of this paragraph (b)(2), the payor of the eligible rollover distribution from the contract is treated as the plan administrator.

(3) *Requirement that contract payor provide notice of rollover option to distributees.* To ensure that the distributee of an eligible rollover distribution from a section 403(b) contract has a meaningful right to elect a direct rollover, section 402(f) requires that the distributee be informed of the option. Thus, within a reasonable time period before making the initial eligible rollover distribution, the payor must provide an explanation to the distributee of his or her right to elect a direct rollover and the income tax withholding consequences of not electing a direct rollover. For purposes of satisfying the reasonable time period requirement, the plan timing rule provided in section 402(f)(1) and § 1.402(f)-1 applies to section 403(b) contracts.

(4) *Mandatory withholding upon certain eligible rollover distributions from contracts.* If a distributee of an eligible rollover distribution from a section 403(b) contract does not elect to have the eligible rollover distribution paid directly to an eligible retirement plan in a direct rollover, the eligible rollover distribution is subject to 20-percent income tax withholding imposed under section 3405(c). See section 3405(c) and § 31.3405(c)-1 of this chapter for provisions regarding the withholding requirements relating to eligible rollover distributions.

(5) *Automatic rollover for certain mandatory distributions under section 401(a)(31).* In accordance with section 403(b)(10), a section 403(b) plan is required to comply with section 401(a)(31) (including automatic rollover for certain mandatory distributions) in the same manner as a qualified plan.

(c) *Special rules.* See section 402(g)(2)(C) for special rules to determine the tax treatment of a distribution of excess deferrals, and see § 1.401(m)-1(e)(3)(v) for the tax treatment of corrective distributions of after-tax employee contributions and matching contributions to comply with section 401(m). See sections 402(l) and 403(b)(2) for a special rule regarding distributions for certain retired public

safety officers made from a governmental plan for the direct payment of certain premiums.

(d) *Amounts taxable under section 72(p)(1).* In accordance with section 72(p), the amount of any loan from a section 403(b) contract to a participant or beneficiary (including any pledge or assignment treated as a loan under section 72(p)(1)(B)) is treated as having been received as a distribution from the contract under section 72(p)(1), except to the extent set forth in section 72(p)(2) (relating to loans that do not exceed a maximum amount and that are repayable in accordance with certain terms) and §1.72(p)-1. See generally §1.72(p)-1. Thus, except to the extent a loan satisfies section 72(p)(2), any amount loaned from a section 403(b) contract to a participant or beneficiary (including any pledge or assignment treated as a loan under section 72(p)(1)(B)) is includible in the gross income of the participant or beneficiary for the taxable year in which the loan is made. A deemed distribution is not an actual distribution for purposes of §1.403(b)-6, as provided at §1.72(p)-1, Q&A-12 and Q&A-13. (Further, see section 408(b)(1) of Title I of ERISA concerning the effect of non-compliance with Title I loan requirements for plans that are subject to Title I of ERISA.)

(e) *Special rules relating to distributions from a designated Roth account.* If an amount is distributed from a designated Roth account under a section 403(b) plan, the amount, if any, that is includible in gross income and the amount, if any, that may be rolled over to another section 403(b) plan is determined under §1.402A-1. Thus, the designated Roth account is treated as a separate contract for purposes of section 72. For example, the rules of section 72(b) must be applied separately to annuity payments with respect to a designated Roth account under a section 403(b) plan and separately to annuity payments with respect to amounts attributable to any other contributions to the section 403(b) plan.

(f) *Aggregation of contracts.* In accordance with section 403(b)(5), the rules of this section are applied as if all annuity contracts for the employee by the

employer are treated as a single contract.

(g) *Certain rules relating to employment taxes.* With respect to contributions under the Federal Insurance Contributions Act (FICA) under Chapter 21, see section 3121(a)(5)(D) for a special rule relating to section 403(b) contracts. With respect to income tax withholding on distributions from section 403(b) contracts, see section 3405 generally. However, see section 3401 for income tax withholding applicable to annuity contracts or custodial accounts that are not section 403(b) contracts or for cases in which an annuity contract or custodial account ceases to be a section 403(b) contract. See also §1.72(p)-1, Q&A-15, and §35.3405(c)-1, Q&A-11 of this chapter, for special rules relating to income tax withholding for loans made from certain employer plans, including section 403(b) contracts.

[T.D. 9340, 72 FR 41144, July 26, 2007]

§ 1.403(b)-8 Funding.

(a) *Investments.* Section 403(b) and §1.403(b)-3(a) only apply to amounts held in an annuity contract (as defined in §1.403(b)-2), including a custodial account that is treated as an annuity contract under paragraph (d) of this section, or a retirement income account that is treated as an annuity contract under §1.403(b)-9.

(b) *Contributions to the plan.* Contributions to a section 403(b) plan must be transferred to the insurance company issuing the annuity contract (or the entity holding assets of any custodial or retirement income account that is treated as an annuity contract) within a period that is not longer than is reasonable for the proper administration of the plan. For purposes of this requirement, the plan may provide for section 403(b) elective deferrals for a participant under the plan to be transferred to the annuity contract within a specified period after the date the amounts would otherwise have been paid to the participant. For example, the plan could provide for section 403(b) elective deferrals under the plan to be contributed within 15 business days following the month in which these amounts would otherwise have been paid to the participant.

(c) *Annuity contracts*—(1) *Generally*. As defined in § 1.403(b)-2, and except as otherwise permitted under this section, an annuity contract means a contract that is issued by an insurance company qualified to issue annuities in a State and that includes payment in the form of an annuity. This paragraph (c) sets forth additional rules regarding annuity contracts.

(2) *Certain insurance contracts*. Neither a life insurance contract, as defined in section 7702, an endowment contract, a health or accident insurance contract, nor a property, casualty, or liability insurance contract meets the definition of an annuity contract. See § 1.401(f)-4(e). If a contract issued by an insurance company qualified to issue annuities in a State provides death benefits as part of the contract, then that coverage is permitted, assuming that those death benefits do not cause the contract to fail to satisfy any requirement applicable to section 403(b) contracts, for example, assuming that those benefits satisfy the incidental benefit requirement of § 1.401-1(b)(1)(i), as required by § 1.403(b)-6(g).

(3) *Special rule for certain contracts*. This paragraph (c)(3) applies in the case of a contract issued under a State section 403(b) plan established on or before May 17, 1982, or for an employee who becomes covered for the first time under the plan after May 17, 1982, unless the Commissioner had before that date issued any written communication (either to the employer or financial institution) to the effect that the arrangement under which the contract was issued did not meet the requirements of section 403(b). The requirement that the contract be issued by an insurance company qualified to issue annuities in a State does not apply to a contract described in the preceding sentence if one of the following two conditions is satisfied and that condition has been satisfied continuously since May 17, 1982—

(i) Benefits under the contract are provided from a separately funded retirement reserve that is subject to supervision of the State insurance department; or

(ii) Benefits under the contract are provided from a fund that is separate from the fund used to provide statu-

tory benefits payable under a state retirement system and that is part of a State teachers retirement system (including a state university retirement system) to purchase benefits that are unrelated to the basic benefits provided under the retirement system, and the death benefit provided under the contract does not at any time exceed the larger of the reserve or the contribution made for the employee.

(d) *Custodial accounts*—(1) *Treatment as a section 403(b) contract*. Under section 403(b)(7), a custodial account is treated as an annuity contract for purposes of §§ 1.403(b)-1 through 1.403(b)-7, this section and §§ 1.403(b)-9 through 1.403(b)-11. See section 403(b)(7)(B) for special rules regarding the tax treatment of custodial accounts and section 4973(c) for an excise tax that applies to excess contributions to a custodial account.

(2) *Custodial account defined*. A custodial account means a plan, or a separate account under a plan, in which an amount attributable to section 403(b) contributions (or amounts rolled over to a section 403(b) contract, as described in § 1.403(b)-10(d)) is held by a bank or a person who satisfies the conditions in section 401(f)(2), if—

(i) All of the amounts held in the account are invested in stock of a regulated investment company (as defined in section 851(a) relating to mutual funds);

(ii) The requirements of § 1.403(b)-6(c) (imposing restrictions on distributions with respect to a custodial account) are satisfied with respect to the amounts held in the account;

(iii) The assets held in the account cannot be used for, or diverted to, purposes other than for the exclusive benefit of plan participants or their beneficiaries (for which purpose, assets are treated as diverted to the employer if the employer borrows assets from the account); and

(iv) The account is not part of a retirement income account.

(3) *Effect of definition*. The requirement in paragraph (d)(2)(i) of this section is not satisfied if the account includes any assets other than stock of a regulated investment company.

(4) *Treatment of custodial account.* A custodial account is treated as a section 401 qualified plan solely for purposes of subchapter F of subtitle A and subtitle F of the Internal Revenue Code with respect to amounts received by it (and income from investment thereof). This treatment only applies to a custodial account that constitutes a section 403(b) contract under §§ 1.403(b)-1 through 1.403(b)-7, this section and §§ 1.403(b)-9 through 1.403(b)-11 or that would constitute a section 403(b) contract under §§ 1.403(b)-1 through 1.403(b)-7, this section and §§ 1.403(b)-9 through 1.403(b)-11 if the amounts held in the account were to satisfy the non-forfeitability requirement of § 1.403(b)-3(a)(2).

(e) *Retirement income accounts.* See § 1.403(b)-9 for special rules under which a retirement income account for employees of a church-related organization is treated as a section 403(b) contract for purposes of §§ 1.403(b)-1 through 1.403(b)-7, this section and §§ 1.403(b)-9 through 1.403(b)-11.

(f) *Combining assets.* To the extent permitted by the Commissioner in revenue rulings, notices, or other guidance published in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(b) of this chapter), trust assets held under a custodial account and trust assets held under a retirement income account, as described in § 1.403(b)-9(a)(6), may be invested in a group trust with trust assets held under a qualified plan or individual retirement plan. For this purpose, a trust includes a custodial account that is treated as a trust under section 401(f).

[T.D. 9340, 72 FR 41144, July 26, 2007]

§ 1.403(b)-9 Special rules for church plans.

(a) *Retirement income accounts—(1) Treatment as a section 403(b) contract.* Under section 403(b)(9), a retirement income account for employees of a church-related organization (as defined in § 1.403(b)-2) is treated as an annuity contract for purposes of §§ 1.403(b)-1 through 1.403(b)-8, this section, § 1.403(b)-10 and § 1.403(b)-11.

(2) *Retirement income account defined—*
(i) *In general.* A retirement income account means a defined contribution program established or maintained by

a church-related organization under which—

(A) There is separate accounting for the retirement income account's interest in the underlying assets (namely, there must be sufficient separate accounting in order for it to be possible at all times to determine the retirement income account's interest in the underlying assets and to distinguish that interest from any interest that is not part of the retirement income account);

(B) Investment performance is based on gains and losses on those assets; and

(C) The assets held in the account cannot be used for, or diverted to, purposes other than for the exclusive benefit of plan participants or their beneficiaries (and for this purpose, assets are treated as diverted to the employer if there is a loan or other extension of credit from assets in the account to the employer).

(ii) *Plan required.* A retirement income account must be maintained pursuant to a program which is a plan (as defined in § 1.403(b)-3(b)(3)) and the plan document must state (or otherwise evidence in a similarly clear manner) the intent to constitute a retirement income account.

(3) *Ownership or use constitutes distribution.* Any asset of a retirement income account that is owned or used by a participant or beneficiary is treated as having been distributed to that participant or beneficiary. See §§ 1.403(b)-6 and 1.403(b)-7 for rules relating to distributions.

(4) *Coordination of retirement income account with custodial account rules.* A retirement income account that is treated as an annuity contract is not a custodial account (as defined in § 1.403(b)-8(d)(2)), even if it is invested solely in stock of a regulated investment company.

(5) *Life annuities.* A retirement income account may distribute benefits in a form that includes a life annuity only if—

(i) The amount of the distribution form has an actuarial present value, at the annuity starting date, equal to the participant's or beneficiary's accumulated benefit, based on reasonable actuarial assumptions, including regarding interest and mortality; and

§ 1.403(b)-10

26 CFR Ch. I (4-1-08 Edition)

(ii) The plan sponsor guarantees benefits in the event that a payment is due that exceeds the participant's or beneficiary's accumulated benefit.

(6) *Combining retirement income account assets with other assets.* For purposes of § 1.403(b)-8(f) relating to combining assets, retirement income account assets held in trust (including a custodial account that is treated as a trust under section 401(f)) are subject to the same rules regarding combining of assets as custodial account assets. In addition, retirement income account assets are permitted to be commingled in a common fund with amounts devoted exclusively to church purposes (such as a fund from which unfunded pension payments are made to former employees of the church). However, unless otherwise permitted by the Commissioner, no assets of the plan sponsor, other than retirement income account assets, may be combined with custodial account assets or any other assets permitted to be combined under § 1.403(b)-8(f). This paragraph (a)(6) is subject to any additional rules issued by the Commissioner in revenue rulings, notices, or other guidance published in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(b) of this chapter).

(7) *Trust treated as tax exempt.* A trust (including a custodial account that is treated as a trust under section 401(f)) that includes no assets other than assets of a retirement income account is treated as an organization that is exempt from taxation under section 501(a).

(b) *No compensation limitation up to \$10,000.* See section 415(c)(7) for special rules regarding certain annual additions not exceeding \$10,000.

(c) *Special deduction rule for self-employed ministers.* See section 404(a)(10) for a special rule regarding the deductibility of a contribution made by a self-employed minister.

[T.D. 9340, 72 FR 41144, July 26, 2007]

§ 1.403(b)-10 Miscellaneous provisions.

(a) *Plan terminations and frozen plans—(1) In general.* An employer is permitted to amend its section 403(b) plan to eliminate future contributions for existing participants or to limit participation to existing participants and employees (to the extent con-

sistent with § 1.403(b)-5). A section 403(b) plan is permitted to contain provisions that provide for plan termination and that allow accumulated benefits to be distributed on termination. However, in the case of a section 403(b) contract that is subject to the distribution restrictions in § 1.403(b)-6(c) or (d) (relating to custodial accounts and section 403(b) elective deferrals), termination of the plan and the distribution of accumulated benefits is permitted only if the employer (taking into account all entities that are treated as the same employer under section 414(b), (c), (m), or (o) on the date of the termination) does not make contributions to any section 403(b) contract that is not part of the plan during the period beginning on the date of plan termination and ending 12 months after distribution of all assets from the terminated plan. However, if at all times during the period beginning 12 months before the termination and ending 12 months after distribution of all assets from the terminated plan, fewer than 2 percent of the employees who were eligible under the section 403(b) plan as of the date of plan termination are eligible under the alternative section 403(b) contract, the alternative section 403(b) contract is disregarded. To the extent a contract fails to satisfy the nonforfeitability requirement of § 1.403(b)-3(a)(2) at the date of plan termination, the contract is not, and cannot later become, a section 403(b) contract. In order for a section 403(b) plan to be considered terminated, all accumulated benefits under the plan must be distributed to all participants and beneficiaries as soon as administratively practicable after termination of the plan. For this purpose, delivery of a fully paid individual insurance annuity contract is treated as a distribution. The mere provision for, and making of, distributions to participants or beneficiaries upon plan termination does not cause a contract to cease to be a section 403(b) contract. See § 1.403(b)-7 for rules regarding the tax treatment of distributions, including § 1.403(b)-7(b)(1) under which an eligible rollover distribution is not included in gross income if paid in a direct rollover to an eligible retirement

plan or if transferred to an eligible retirement plan within 60 days.

(2) *Employers that cease to be eligible employers.* An employer that ceases to be an eligible employer may no longer contribute to a section 403(b) contract for any subsequent period, and the contract will fail to satisfy § 1.403(b)-3(a) if any further contributions are made with respect to a period after the employer ceases to be an eligible employer.

(b) *Contract exchanges and plan-to-plan transfers—(1) Contract exchanges and transfers—(i) General rule.* If the conditions in paragraph (b)(2) of this section are met, a section 403(b) contract held under a section 403(b) plan is permitted to be exchanged for another section 403(b) contract held under that section 403(b) plan. Further, if the conditions in paragraph (b)(3) of this section are met, a section 403(b) plan is permitted to provide for the transfer of its assets (including any assets held in a custodial account or retirement income account that are treated as section 403(b) contracts) to another section 403(b) plan. In addition, if the conditions in paragraph (b)(4) of this section (relating to permissive service credit and repayments under section 415) are met, a section 403(b) plan is permitted to provide for the transfer of its assets to a qualified plan under section 401(a). However, neither a qualified plan nor an eligible governmental plan under section 457(b) may transfer assets to a section 403(b) plan, and a section 403(b) plan may not accept such a transfer. In addition, a section 403(b) contract may not be exchanged for an annuity contract that is not a section 403(b) contract. Neither a plan-to-plan transfer nor a contract exchange permitted under this paragraph (b) is treated as a distribution for purposes of the distribution restrictions at § 1.403(b)-6. Therefore, such a transfer or exchange may be made before severance from employment or another distribution event. Further, no amount is includible in gross income by reason of such a transfer or exchange.

(ii) *ERISA rules.* See § 1.414(l)-1 for other rules that are applicable to section 403(b) plans that are subject to section 208 of the Employee Retirement

Income Security Act of 1974 (88 Stat. 829, 865).

(2) *Requirements for contract exchange within the same plan—(i) General rule.* A section 403(b) contract of a participant or beneficiary may be exchanged under paragraph (b)(1) of this section for another section 403(b) contract of that participant or beneficiary under the same section 403(b) plan if each of the following conditions are met:

(A) The plan under which the contract is issued provides for the exchange.

(B) The participant or beneficiary has an accumulated benefit immediately after the exchange that is at least equal to the accumulated benefit of that participant or beneficiary immediately before the exchange (taking into account the accumulated benefit of that participant or beneficiary under both section 403(b) contracts immediately before the exchange).

(C) The other contract is subject to distribution restrictions with respect to the participant that are not less stringent than those imposed on the contract being exchanged, and the employer enters into an agreement with the issuer of the other contract under which the employer and the issuer will from time to time in the future provide each other with the following information:

(1) Information necessary for the resulting contract, or any other contract to which contributions have been made by the employer, to satisfy section 403(b), including information concerning the participant's employment and information that takes into account other section 403(b) contracts or qualified employer plans (such as whether a severance from employment has occurred for purposes of the distribution restrictions in § 1.403(b)-6 and whether the hardship withdrawal rules of § 1.403(b)-6(d)(2) are satisfied).

(2) Information necessary for the resulting contract, or any other contract to which contributions have been made by the employer, to satisfy other tax requirements (such as whether a plan loan satisfies the conditions in section 72(p)(2) so that the loan is not a deemed distribution under section 72(p)(1)).

(ii) *Accumulated benefit.* The condition in paragraph (b)(2)(i)(B) of this

section is satisfied if the exchange would satisfy section 414(l)(1) if the exchange were a transfer of assets.

(iii) *Authority for future guidance.* Subject to such conditions as the Commissioner determines to be appropriate, the Commissioner may issue rules of general applicability, in revenue rulings, notices, or other guidance published in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(b) of this chapter), permitting an exchange of one section 403(b) contract for another section 403(b) contract for an exchange that does not satisfy paragraph (b)(2)(i)(C) of this section. Any such rules must require the resulting contract to set forth procedures that the Commissioner determines are reasonably designed to ensure compliance with those requirements of section 403(b) or other tax provisions that depend on either information concerning the participant's employment or information that takes into account other section 403(b) contracts or other employer plans (such as whether a severance from employment has occurred for purposes of the distribution restrictions in § 1.403(b)-6, whether the hardship withdrawal rules of § 1.403(b)-6(d)(2) are satisfied, and whether a plan loan constitutes a deemed distribution under section 72(p)).

(3) *Requirements for plan-to-plan transfers.* (i) A plan-to-plan transfer under paragraph (b)(1) of this section from a section 403(b) plan to another section 403(b) plan is permitted if each of the following conditions are met—

(A) In the case of a transfer for a participant, the participant is an employee or former employee of the employer (or the business of the employer) for the receiving plan.

(B) In the case of a transfer for a beneficiary of a deceased participant, the participant was an employee or former employee of the employer (or business of the employer) for the receiving plan.

(C) The transferor plan provides for transfers.

(D) The receiving plan provides for the receipt of transfers.

(E) The participant or beneficiary whose assets are being transferred has an accumulated benefit immediately after the transfer that is at least equal to the accumulated benefit of that par-

ticipant or beneficiary immediately before the transfer.

(F) The receiving plan provides that, to the extent any amount transferred is subject to any distribution restrictions under § 1.403(b)-6, the receiving plan imposes restrictions on distributions to the participant or beneficiary whose assets are being transferred that are not less stringent than those imposed on the transferor plan.

(G) If a plan-to-plan transfer does not constitute a complete transfer of the participant's or beneficiary's interest in the section 403(b) plan, the transferee plan treats the amount transferred as a continuation of a pro rata portion of the participant's or beneficiary's interest in the section 403(b) plan (for example, a pro rata portion of the participant's or beneficiary's interest in any after-tax employee contributions).

(ii) *Accumulated benefit.* The condition in paragraph (b)(3)(i)(D) of this section is satisfied if the transfer would satisfy section 414(l)(1).

(4) *Purchases of permissive service credit by contract-to-plan transfers from a section 403(b) contract to a qualified plan—*(i) *General rule.* If the conditions in paragraph (b)(4)(ii) of this section are met, a section 403(b) plan may provide for the transfer of assets held in the plan to a qualified defined benefit plan that is a governmental plan (as defined in section 414(d)).

(ii) *Conditions for plan-to-plan transfers.* A transfer may be made under this paragraph (b)(4) only if the transfer is either—

(A) For the purchase of permissive service credit (as defined in section 415(n)(3)(A)) under the receiving defined benefit plan; or

(B) A repayment to which section 415 does not apply by reason of section 415(k)(3).

(c) *Qualified domestic relations orders.* In accordance with the second sentence of section 414(p)(9), any distribution from an annuity contract under section 403(b) (including a distribution from a custodial account or retirement income account that is treated as a section 403(b) contract) pursuant to a qualified domestic relations order is treated in the same manner as a distribution from a plan to which section

401(a)(13) applies. Thus, for example, a section 403(b) plan does not fail to satisfy the distribution restrictions set forth in § 1.403(b)-6(b), (c), or (d) merely as a result of distribution made pursuant to a qualified domestic relations order under section 414(p), so that such a distribution is permitted without regard to whether the employee from whose contract the distribution is made has had a severance from employment or another event permitting a distribution to be made under section 403(b). In the case of a plan that is subject to Title I of ERISA, see also section 206(d)(3) of ERISA under which the prohibition against assignment or alienation of plan benefits under section 206(d)(1) of ERISA does not apply to an order that is determined to be a qualified domestic relations order.

(d) *Rollovers to a section 403(b) contract*—(1) *General rule.* A section 403(b) contract may accept a contribution that is an eligible rollover distribution (as defined in section 402(c)(4)) made from another eligible retirement plan (as defined in section 402(c)(8)(B)). Any amount contributed to a section 403(b) contract as an eligible rollover distribution is not taken into account for purposes of the limits in § 1.403(b)-4, but, except as otherwise specifically provided (for example, at § 1.403(b)-6(i)), is otherwise treated in the same manner as an amount held under a section 403(b) contract for purposes of §§ 1.403(b)-3 through 1.403(b)-9 and this section.

(2) *Special rules relating to after-tax employee contributions and designated Roth contributions.* A section 403(b) plan that receives an eligible rollover distribution that includes after-tax employee contributions or designated Roth contributions is required to obtain information regarding the employee's section 72 basis in the amount rolled over. A section 403(b) plan is permitted to receive an eligible rollover distribution that includes designated Roth contributions only if the plan permits employees to make elective deferrals that are designated Roth contributions.

(e) *Deemed IRAs.* See regulations under section 408(q) for special rules relating to deemed IRAs.

(f) *Defined benefit plans*—(1) *Defined benefit plans generally.* Except for a TEFRA church defined benefit plan as defined in paragraph (f)(2) of this section, section 403(b) does not apply to any contributions or accrual under a defined benefit plan.

(2) *TEFRA church defined benefit plans.* See section 251(e)(5) of the Tax Equity and Fiscal Responsibility Act of 1982, Public Law 97-248, for a provision permitting certain arrangements established by a church-related organization and in effect on September 3, 1982 (a TEFRA church defined benefit plan) to be treated as section 403(b) contract even though it is a defined benefit arrangement. In accordance with section 403(b)(1), for purposes of applying section 415 to a TEFRA church defined benefit plan, the accruals under the plan are limited to the maximum amount permitted under section 415(c) when expressed as an annual addition, and, for this purpose, the rules at § 1.402(b)-1(a)(2) for determining the present value of an accrual under a nonqualified defined benefit plan also apply for purposes of converting the accrual under a TEFRA church defined benefit plan to an annual addition. See section 415(b) for additional limits applicable to TEFRA church defined benefit plans.

(g) *Other rules relating to section 501(c)(3) organizations.* See section 501(c)(3) and regulations thereunder for the substantive standards for tax-exemption under that section, including the requirement that no part of the organization's net earnings inure to the benefit of any private shareholder or individual. See also sections 4941 (self dealing), 4945 (taxable expenditures), and 4958 (excess benefit transactions), and the regulations thereunder, for rules relating to excise taxes imposed on certain transactions involving organizations described in section 501(c)(3).

[T.D. 9340, 72 FR 41144, July 26, 2007]

§ 1.403(b)-11 Applicable dates.

(a) *General rule.* Except as otherwise provided in this section, §§ 1.403(b)-1 through 1.403(b)-10 apply for taxable years beginning after December 31, 2008.

§ 1.403(b)-11

26 CFR Ch. I (4-1-08 Edition)

(b) *Collective bargaining agreements.* In the case of a section 403(b) plan maintained pursuant to one or more collective bargaining agreements that have been ratified and in effect on July 26, 2007, §§ 1.403(b)-1 through 1.403(b)-10 do not apply before the earlier of—

(1) The date on which the last of the collective bargaining agreements terminates (determined without regard to any extension thereof after July 26, 2007); or

(2) July 26, 2010.

(c) *Church conventions; retirement income account.* (1) In the case of a section 403(b) plan maintained by a church-related organization for which the authority to amend the plan is held by a church convention (within the meaning of section 414(e)), §§ 1.403(b)-1 through 1.403(b)-10 do not apply before the first day of the first plan year that begins after December 31, 2009.

(2) In the case of a loan or other extension of credit to the employer that was entered into under a retirement income account before July 26, 2007, the plan does not fail to satisfy § 1.403(b)-9(a)(2)(i)(C) on account of the loan or other extension of credit if the plan takes reasonable steps to eliminate the loan or other extension of credit to the employer before the applicable date for § 1.403(b)-9(a)(2) or as promptly as practical thereafter (including taking steps after July 26, 2007 and before the applicable date).

(d) *Special rules for plans that exclude certain types of employees from elective deferrals.* (1) If, on July 26, 2007, a plan excludes any of the following categories of employees, then the plan does not fail to satisfy § 1.403(b)-5(b) as a result of that exclusion before the first day of the first taxable year that begins after December 31, 2009:

(i) Employees who make a one-time election to participate in a governmental plan described in section 414(d) that is not a section 403(b) plan.

(ii) Professors who are providing services on a temporary basis to another educational organization (as defined under section 170(b)(1)(A)(ii)) for up to one year and for whom section 403(b) contributions are being made at a rate no greater than the rate each such professor would receive under the

section 403(b) plan of the original educational organization.

(iii) Employees who are affiliated with a religious order and who have taken a vow of poverty where the religious order provides for the support of such employees in their retirement from eligibility to make elective deferrals.

(2) If, on July 26, 2007, a plan excludes employees who are covered by a collective bargaining agreement from eligibility to make elective deferrals, the plan does not fail to satisfy § 1.403(b)-5(b) (relating to universal availability) as a result of that exclusion before the later of—

(i) The first day of the first taxable year that begins after December 31, 2008; or

(ii) The earlier of—

(A) The date on which the related collective bargaining agreement terminates (determined without regard to any extension thereof after July 26, 2007); or

(B) July 26, 2010.

(3) In the case of a governmental plan (as defined in section 414(d)) for which the authority to amend the plan is held by a legislative body that meets in legislative session, the plan does not fail to satisfy § 1.403(b)-5(b) as a result of any exclusion in paragraph (d)(1)(i), (d)(1)(ii), (d)(1)(iii), or (d)(2) of this section before the earlier of—

(i) The close of the first regular legislative session of the legislative body with the authority to amend the plan that begins on or after January 1, 2009; or

(ii) January 1, 2011.

(e) *Special rules for plans that permit in-service distributions.* (1) Section 1.403(b)-6(b) does not apply to a contract issued by an insurance company before January 1, 2009.

(2) Any amendment to comply with the requirements of § 1.403(b)-6 (disregarding paragraph (e)(1) of this section) that is adopted before January 1, 2009, or such later date as may be permitted under guidance issued by the Commissioner in revenue rulings, notices, or other guidance published in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(b) of this chapter), does not violate section 204(g) of the Employee Retirement Income Security

Act of 1974 to the extent the amendment eliminates or reduces a right to receive benefit distributions during employment.

(f) *Special rule for life insurance contracts.* Section 1.403(b)-8(c)(2) does not apply to a contract issued before September 24, 2007.

(g) *Special rule for contracts received in an exchange.* Section 1.403(b)-10(b)(2) does not apply to a contract received in an exchange that occurred on or before September 24, 2007 if the exchange (including the contract received in the exchange) satisfies such rules as the Commissioner has prescribed in guidance of general applicability at the time of the exchange.

(h) *Special rule for coordination with regulations under section 415.* Section 1.403(b)-3(b)(4)(ii) is applicable for taxable years beginning on or after July 1, 2007.

(i) *Special rule for coordination with regulations under section 402A.* Sections 1.403(b)-3(c), 1.403(b)-7(e), and 1.403(b)-10(d)(2) are applicable with respect to taxable years beginning on or after January 1, 2007.

[T.D. 9340, 72 FR 41144, July 26, 2007; 72 FR 54352, Sept. 25, 2007]

§ 1.403(c)-1 Taxability of beneficiary under a nonqualified annuity.

(a) *Taxability of vested interest in premiums.* If after August 1, 1969, an employer (whether or not exempt under section 501(a)) pays premiums for an annuity contract for the benefit of an employee, the amount of such premiums shall be included as compensation in the gross income of the employee for the taxable year during which such premiums are paid, but only to the extent that the employee's rights in such premiums are substantially vested (as defined in § 1.83-3(b)) at the time such premiums are paid. The preceding sentence shall not apply to contracts referred to in the transitional rule of paragraph (d) (1), (ii), or (iii) of this section, or to premiums subject to § 1.403(a)-1(a) or excludible under § 1.403(b)-3. If any employer has purchased annuity contracts and transferred them to a trust (other than one described in section 401(a)) that is to provide annuity contracts or benefits for his employees, the amounts so

paid shall be treated as contributions to a trust described in section 402(b). For the rules relating to the taxation of the cost of life insurance protection when rights in a life insurance contract are substantially nonvested, see § 1.83-1(a)(2).

(b) *Taxability of employee when rights under annuity contract change from nonvested to vested—(1) In general.* If, during a taxable year of an employee ending after August 1, 1969, the rights of such employee under an annuity contract purchased for him by an employer (whether or not exempt under section 501(a) or 521(a)) become substantially vested, the value of the annuity contract on the date of such change shall be included in the employee's gross income for such year, to the extent provided in paragraph (b)(2) of this section. The preceding sentence shall not apply, however, to an annuity contract purchased and held as part of a plan which met at the time of such purchase, and continues to meet, the requirements of section 404(a)(2) or an annuity contract referred to in paragraph (d) (ii) or (iii) of this section. For purposes of this section, the value of an annuity contract on the date the employee's rights become substantially vested means the cash surrender value of such contract on such date.

(2) *Extent to which value of annuity contract is includible in employee's gross income.* For purposes of paragraph (b)(1) of this section, the only amount includible in the gross income of the employee is that the portion of the value of the contract on the date of the change that is attributable to premiums which were paid by the employer after August 1, 1969, and which were not excludible from the employer's gross income under § 1.403(b)-3. However, the includible portion does not include—

(i) The value attributable to a premium paid on the date of such change, and

(ii) The value attributable to premiums described in the transitional rule of paragraph (d)(1) (ii) or (iii) of this section.

See § 1.403(b)-3(c) for the treatment of an amount otherwise includible in gross income under section 403(c) as an

§ 1.403(c)-1

26 CFR Ch. I (4-1-08 Edition)

employer contribution for purposes of the exclusion under section 403(b).

(3) *Partial vesting.* If, during any taxable year of an employee, only part of his beneficial interest in an annuity contract becomes substantially vested, then only the corresponding part of the value of the annuity contract on the date of such change is includible in the employee's gross income for such taxable year. In such a case, it is first necessary to compute, under the rules in paragraphs (b)(1) and (2) of this section but without regard to any exclusion allowable under § 1.403(b)-3, the amount which would be includible in the employee's gross income for the taxable year if his entire beneficial interest in the annuity contract had changed to a substantially vested interest during such year. The amount that is includible under this (3) (without regard to the section 403(b) exclusion) is equal to the amount determined under the preceding sentence multiplied by the percent of the employee's beneficial interest which became substantially vested during the taxable year.

(c) *Amounts paid or made available under an annuity contract.* The amounts paid or made available to the employee under an annuity contract subject to this section shall be included in the gross income of the employee for the taxable year in which paid or made available, as provided in section 72 (relating to annuities). Such amounts may be taken into account in computations under sections 1301 through 1305 (relating to income averaging). For rules relating to the treatment of employer contributions as part of the consideration paid by the employee, see section 72(f). See also section 101(b)(2)(D) for rules relating to the treatment of the limited exclusion provided thereunder as part of the consideration paid by the employee.

(d) *Taxability of beneficiary under a nonqualified annuity on or before August 1, 1969.* (1) Except as provided in section 402(d) (relating to taxable years beginning before January 1, 1977), if an employer purchases an annuity contract and if the amounts paid for the contract.

(i) On or before August 1, 1969, or

(ii) After such date, if pursuant to a binding written contract (as defined in

§ 1.83-8(b)(2)) entered into before April 22, 1969, or

(iii) After August 1, 1969, pursuant to a written plan in which the employee participated on April 22, 1969 and under which the obligation of the employer is essentially the same as under a binding written contract, are not subject to paragraph (a) of § 1.403(a)-1 or paragraph (a) of § 1.403-1, the amount of such contribution shall, to the extent it is not excludible under paragraph (b) of § 1.403(b)-1, be included in the income of the employee for the taxable year during which such contribution is made if, at the time the contribution is made, the employee's rights under the annuity contract are nonforfeitable, except for failure to pay future premiums. If the annuity contract was purchased by an employer which is not exempt from tax under section 501(a) or section 521(a), and if the employee's rights under the annuity contract in such a case were forfeitable at the time the employer's contribution was made for the annuity contract, even though they become nonforfeitable later the amount of such contribution is not required to be included in the income of the employee at the time his rights under the contract become nonforfeitable. On the other hand, if the annuity contract is purchased by an employer which is exempt from tax under section 501(a) or section 521(a), all or part of the value of the contract may be includible in the employee's gross income at the time his rights under the contract become nonforfeitable (see section 403(d) prior to the repeal thereof by the Tax Reform Act of 1969 and the regulations thereunder). As to what constitutes nonforfeitable rights of an employee, see § 1.402(b)-1(d)(2). The amounts received by or made available to the employee under the annuity contract shall be included in the gross income of the employee for the taxable year in which received or made available, as provided in section 72 (relating to annuities). For taxable years beginning before January 1, 1964, sections 72(e)(3) (relating to the treatment of certain lump sums), as in effect before such date, shall not apply to such amounts. For taxable years beginning after December 31, 1963, such amounts may be taken into account in

computations under sections 1301 through 1305 (relating to income averaging). For rules relating to the treatment of employer contributions as part of the consideration paid by the employee, see section 72(f). See also section 101(b)(2)(D) for rules relating to the treatment of the limited exclusion provided thereunder as part of the consideration paid by the employee.

(2) If an employer has purchased annuity contracts and transferred them to a trust, or if an employer has made contributions to a trust for the purpose of providing annuity contracts for his employees as provided in section 402(d) (see paragraph (a) of § 1.402(D)-1, the amount so paid or contributed is not required to be included in the income of the employee, but any amount received by or made available to the employee under the annuity contract shall be includible in the gross income of the employee for the taxable year in which received or made available, as provided in section 72 (relating to annuities). For taxable years beginning before January 1, 1964, section 72(e)(3) (relating to the treatment of certain lump sums), as in effect before such date, shall not apply to any amount received by or made available to the employee under the annuity contract. For taxable years beginning after December 31, 1963, amounts received by or made available to the employee under the annuity contract may be taken into account in computations under sections 1301 through 1305 (relating to income averaging). In such case the amount paid or contributed by the employer shall not constitute consideration paid by the employee for such annuity contract in determining the amount of annuity payments required to be included in his gross income under section 72 unless the employee has paid income tax for any taxable year beginning before January 1, 1949, with respect to such payment or contribution by the employer for such year and such tax is not credited or refunded to the employee. In the event such tax has been paid and not credited or refunded the amount paid or contributed by the employer for such year shall constitute consideration paid by the employee for the annuity contract in determining the amount of the an-

nunity required to be included in the income of the employee under section 72.

(3) For taxable years beginning before January 1, 1958, the provisions contained in section 403(c) prior to the amendment made thereto by the Tax Reform Act of 1969 were included in section 403(b) of the Internal Revenue Code of 1954. Therefore, the regulations contained in this paragraph shall, for such taxable years, be considered as the regulations under section 403(b) as in effect for such taxable years. For the rules with respect to contributions paid after August 1, 1969, see paragraphs (a), (b), and (c) of this section.

(Secs. 83 and 7805 of the Internal Revenue Code of 1954 (83 Stat. 588; 68A Stat. 917; 26 U.S.C. 83 and 7805))

[T.D. 7554, 43 FR 31924, July 24, 1978, as amended by T.D. 9340, 72 FR 41159, July 26, 2007]

§ 1.404(a)-1 Contributions of an employer to an employees' trust or annuity plan and compensation under a deferred payment plan; general rule.

(a)(1) Section 404(a) prescribes limitations upon deductions for amounts contributed by an employer under a pension, annuity, stock bonus, or profit-sharing plan, or under any plan of deferred compensation. It is immaterial whether the plan covers present employees only, or present and former employees, or only former employees. Section 404(a) also governs the deductibility of unfunded pensions and death benefits paid directly to former employees or their beneficiaries (see § 1.404(a)-12). For taxable years beginning after 1962, certain self-employed individuals may be covered by pension, annuity, or profit-sharing plans. For the rules relating to the deduction of contributions on behalf of such individuals, see paragraph (a)(2) of § 1.404(a)-8 and § 1.404(e)-1.

(2) Section 404(a) does not apply to a plan which does not defer the receipt of compensation. Furthermore, section 404(a) does not apply to deductions for contributions under a plan which is solely a dismissal wage or unemployment benefit plan, or a sickness, accident, hospitalization, medical expense, recreation, welfare, or similar benefit

plan, or a combination thereof. For example, if under a plan an employer contributes 5 percent of each employee's compensation per month to a fund out of which employees who are laid off will be paid benefits for temporary periods, but employees who are not laid off have no rights to the funds, such a plan is an unemployment benefit plan, and the deductibility of the contributions to it is determined under section 162. As to the deductibility of such contributions, see § 1.162-9.

(3) If, however, the contributions to a pension, profit-sharing, stock bonus, or other plan of deferred compensation can be used to provide any of the benefits referred to in subparagraph (2) of this paragraph, then, except as provided in section 404(c), section 404(a) applies to the entire contribution to the plan. Thus, if in the example described in subparagraph (2) of this paragraph, the employer's contribution on behalf of each employee is set up as a separate account, and if any amount which remains in an employee's account at the time of retirement is paid to him at such time, the deductibility of the contributions to the plan is determined under section 404(a). For the regulations for determining whether the benefits referred to in subparagraph (2) of this paragraph can be included in a qualified pension or profit-sharing plan, see § 1.401-1(b).

(4) As to inclusion of full-time life insurance salesmen within the class of persons considered to be employees, see section 7701(a)(20).

(b) In order to be deductible under section 404(a), contributions must be expenses which would be deductible under section 162 (relating to trade or business expenses) or 212 (relating to expenses for production of income) if it were not for the provision in section 404(a) that they are deductible, if at all, only under section 404(a). Contributions may therefore be deducted under section 404(a) only to the extent that they are ordinary and necessary expenses during the taxable year in carrying on the trade or business or for the production of income and are compensation for personal services actually rendered. In no case is a deduction allowable under section 404(a) for the amount of any contribution for the

benefit of an employee in excess of the amount which, together with other deductions allowed for compensation for such employee's services, constitutes a reasonable allowance for compensation for the services actually rendered. What constitutes a reasonable allowance depends upon the facts in the particular case. Among the elements to be considered in determining this are the personal services actually rendered in prior years as well as the current year and all compensation and contributions paid to or for such employee in prior years as well as in the current year. Thus, a contribution which is in the nature of additional compensation for services performed in prior years may be deductible, even if the total of such contributions and other compensation for the current year would be in excess of reasonable compensation for services performed in the current year, provided that such total plus all compensation and contributions paid to or for such employee in prior years represents a reasonable allowance for all services rendered by the employee by the end of the current year. A contribution under a plan which is primarily for the benefit of shareholders of the employer is not deductible. Such a contribution may constitute a dividend within the meaning of section 316. See also §§ 1.162-6 and 1.162-8. In addition to the limitations referred to above, deductions under section 404(a) are also subject to further conditions and limitations particularly provided therein.

(c) Deductions under section 404(a) are generally allowable only for the year in which the contribution or compensation is paid, regardless of the fact that the taxpayer may make his returns on the accrual method of accounting. Exceptions are made in the case of overpayments as provided in paragraphs (1), (3), and (7) of section 404(a), and, as provided by section 404(a)(6), in the case of payments made by a taxpayer on the accrual method of accounting not later than the time prescribed by law for filing the return for the taxable year of accrual (including extensions thereof). This latter provision is intended to permit a taxpayer on the accrual method to deduct such accrued contribution or compensation

in the year of accrual, provided payment is actually made not later than the time prescribed by law for filing the return for the taxable year of accrual (including extensions thereof), but this provision is not applicable unless, during the taxable year on account of which the contribution is made, the taxpayer incurs a liability to make the contribution, the amount of which is accruable under section 461 for such taxable year. See section 461 and the regulations thereunder. There is another exception in the case of certain taxpayers who are required to make additional contributions as a result of the Act of June 15, 1955 (Public Law 74, 84th Cong., 69 Stat. 134), and the regulations thereunder.

[T.D. 6500, 25 FR 11682, Nov. 26, 1960, as amended by T.D. 6676, 28 FR 10144, Sept. 17, 1963]

§ 1.404(a)-1T Questions and answers relating to deductibility of deferred compensation and deferred benefits for employees. (Temporary)

Q-1: How does the amendment of section 404(b) by the Tax Reform Act of 1984 affect the deduction of contributions or compensation under section 404(a)?

A-1: As amended by the Tax Reform Act of 1984, section 404(b) clarifies that section 404(a) shall govern the deduction of contributions paid and compensation paid or incurred by the employer under a plan, or method or arrangement, deferring the receipt of compensation or providing for deferred benefits to employees, their spouses, or their dependents. See section 404(b) and § 1.404(b)-1T. Section 404 (a) and (d) requires that such a contribution or compensation be paid or incurred for purposes of section 162 or 212 and satisfy the requirements for deductibility under either of those sections. However, notwithstanding the above, section 404 does not apply to contributions paid or accrued with respect to a "welfare benefit fund" (as defined in section 419(e)) after July 18, 1984, in taxable years of employers (and payors) ending after that date. Also, section 463 shall govern the deduction of vacation pay by a taxpayer that has elected the application of such section. For rules relating to the deduction of contribu-

tions paid or accrued with respect to a welfare benefit fund, see section 419, § 1.419-1T and § 1.419A-2T. For rules relating to the deduction of vacation pay for which an election is made under section 463, see § 301.9100-16T of this chapter and § 1.463-1T.

[T.D. 8073, 51 FR 4320, Feb. 4, 1986, as amended by T.D. 8435, 57 FR 43896, Sept. 23, 1992]

§ 1.404(a)-2 Information to be furnished by employer claiming deductions; taxable years ending before December 31, 1971.

(a) For the first taxable year for which a deduction from gross income is claimed under section 404(a) (1), (2), (3), or (7), the employer must file the following information (unless such information has been previously filed in accordance with the regulations under section 23(p) of the Internal Revenue Code of 1939) for each plan involved to establish that it meets the requirements of section 401(a) or 404(a)(2), and that deductions claimed do not exceed the amount allowable under paragraphs (1), (2), (3), and (7) of section 404(a), as the case may be:

(1) Verified copies of all the instruments constituting or evidencing the plan, including trust indentures, group annuity contracts, specimen copy of each type of individual contract, and specimen copy of formal announcement and comprehensive detailed description to employees, with all amendments to any such instruments.

(2) A statement describing the plan which identifies it and which sets forth the name or names of the employers, the effective date of the plan and of any amendments thereto, the method of distribution or of disbursing benefits (whether by trustee, insurance company, or otherwise), the dates when the instruments or amendments were executed, the date of formal announcement and the dates when comprehensive detailed description of the plan and of each amendment thereto were made available to employees generally, the dates when the plan and when the trust or the contract evidencing the plan and of any amendments thereto were put into effect so that contributions thereunder were irrevocable and a summary of the provisions and rules relating to—

(i) Employee eligibility requirements for participation in the plan,
(ii) Employee contributions,
(iii) Employer contributions,
(iv) The basis or formula for determining the amount of each type of benefit and the requirements for obtaining such benefits and the vesting conditions,

(v) The medium of funding (e. g., self-insured, unit purchase group annuity contract, individual level annual premium retirement endowment insurance contracts, etc.) and, if not wholly insured, the medium of contributions and the kind of investments, and
(vi) The discontinuance or modification of the plan and distributions or benefit payments upon liquidation or termination.

(3) A tabulation in columnar form showing the information specified below with respect to each of the 25 highest paid employees covered by the plan in the taxable year, listed in order of their nondeferred compensation (where there are several plans of deferred compensation, the information for each of the plans may be shown on a single tabulation without repetition of the information common to the several plans):

(i) Name.
(ii) Whether an officer.
(iii) Percentage of each class of stock owned directly or indirectly by the employee or members of his family.

(iv) Whether the principal duties consist in supervising the work of other employees.

(v) Year of birth.
(vi) Length of service for employer to the close of the year.

(vii) Total nondeferred compensation paid or accrued during the taxable year with a breakdown of such compensation into the following components:

(A) Basic compensation and overtime pay,

(B) Other direct payments, such as bonuses and commissions,

(C) Compensation paid other than in cash, such as goods, services, insurance not directly related to the benefits or provided from funds under the plan, etc.

(viii) Amount allocated during the year for the benefit of the employee or his beneficiary (including any insur-

ance provided thereby or directly related thereto), less the employee's contributions during the year, under each other plan of deferred compensation.

(ix) Amount allocated during the year for the benefit of the employee or his beneficiary (including any insurance provided thereby or directly related thereto), less the employee's contributions during the year, under the plan. If a profit-sharing or stock bonus plan, also a breakdown of such amounts into the following components:

(A) Amounts originally allocated in the year, and

(B) Amounts reallocated in the year.

(x) Amounts of employee contributions during the year under the plan,

(xi) If a pension or annuity plan,

(A) The retirement age and date and the form of the retirement benefit,

(B) The annual rate or amount of the retirement benefit, and

(C) The aggregate of all of the employee's contributions under the plan,

all based, in the case of an employee who is not on retirement benefit under the plan, upon the assumption of his continued employment at his current rate of compensation until his normal retirement age (or the end of the current year if later) and retirement on such date with the normal form of retirement benefit under the plan.

(4) The following totals:

(i) Total nondeferred compensation paid or accrued during the taxable year for all employees covered under the plan and also for all employees of the employer.

(ii) Total amount allocated during the year for the benefit of employees, former or retired employees, or their beneficiaries (including any insurance provided thereby or directly related thereto), less employee contributions during the year under the plan and, if a profit-sharing or stock bonus plan, also a breakdown of such total into the following components:

(A) Amount originally allocated in the year, and

(B) Amount reallocated in the year.

(5) A schedule showing the total number of employees as of the close of the year for each of the following groups, based on reasonable estimates:

(i) All employees ineligible for coverage under the plan because of requirements as to employment classification, specifying the reasons applicable to the group (as, for example, temporary, seasonal, part time, hourly pay basis, etc.).

(ii) All employees ineligible for coverage under the plan because of requirements as to length of service and not included in subdivision (i) of this subparagraph.

(iii) All employees ineligible for coverage under the plan because of requirements as to minimum age and not included in subdivision (i) or (ii) of this subparagraph.

(iv) All employees ineligible for coverage under the plan solely because of requirements as to minimum rate of compensation.

(v) All employees ineligible for coverage under the plan other than those employees included in subdivision (i), (ii), (iii), or (iv) of this subparagraph, specifying the reason applicable to the group.

(vi) All employees ineligible for coverage under the plan for any reasons, which should be the sum of subdivisions (i) to (v), inclusive, of this subparagraph.

(vii) All employees eligible for coverage but not covered under the plan.

(viii) All employees covered under the plan.

(ix) All employees of the employer, which should be the sum of subdivisions (vi), (vii), and (viii) of this subparagraph.

If it is claimed that the requirements of section 401(a)(3)(A) are satisfied, also the data and computations necessary to show that such requirements are satisfied.

(6) In the case of a trust, a detailed balance sheet and a detailed statement of receipts and disbursements during the year; in the case of a nontrusteed annuity plan, a detailed statement of the names of the insurers, the contributions paid by the employer and by the employees, and a statement as to the amounts and kinds of premium refunds or similar credits made available and the disposition of such credits in the year.

(7) If a pension or annuity plan, a detailed description of all the methods,

factors, and assumptions used in determining costs and in adjusting the costs for actual experience under the plan (including any loadings, contingency reserves, or special factors and the basis of any insured costs or liabilities involved therein) explaining their source and application in sufficient detail to permit ready analysis and verification thereof, and, in the case of a trust, a detailed description of the basis used in valuing the investments held.

(8) A statement of the applicable limitations under section 404(a) (1), (2), (3), or (7) and an explanation of the method of determining such limitations, a summary of the data, and a statement of computations necessary to determine the allowable deductions for the taxable year. Also, in the case of a pension or annuity plan, a summary of the costs or liabilities and adjustments for the year under the plan based on the application of the methods, factors, and assumptions used under the plan, in sufficient detail to permit ready verification of the reasonableness thereof.

(9) A statement of the contributions paid under the plan for the taxable year showing the date and amount of each payment. Also, a summary of the deductions claimed for the taxable year for the plan with a breakdown of the deductions claimed into the following components:

(i) For contributions paid in the taxable year before giving effect to the provisions of paragraph (7) of section 404(a).

(ii) For contributions paid in prior taxable years beginning after December 31, 1941, in accordance with the carryover provisions of paragraphs (1) and (3) of section 404(a), before giving effect to the provisions of paragraph (7) thereof, and in accordance with the carryover provisions of section 404(d).

(iii) Any reductions or increases in the deductions in accordance with the provisions of paragraph (7) of section 404(a). However, if the information in this subdivision is filed prior to the filing of the information required by subparagraph (8) of this paragraph, then, in determining the limit of deduction under paragraph (7) of section 404(a),

the applicable percentage of the compensation otherwise paid or accrued during the year may be used.

(b) For taxable years subsequent to the year for which all of the applicable information under paragraph (a) of this section (or corresponding provisions of prior regulations) has been filed, information is to be filed only to the following extent:

(1) If there is any change in the plan, instruments, methods, factors, or assumptions upon which the data and information specified in paragraph (a) (1), (2), or (7) of this section are based, a detailed statement explaining the change and its effect is to be filed only for the taxable year in which the change is put into effect. However, if there is no such change, unless otherwise requested by the district director, merely a statement that there is no such change is to be filed.

(2) The information specified in paragraph (a)(3) of this section which has been filed for a taxable year, unless otherwise requested by the district director and so long as the plan and the method and basis of allocations are not changed, is to be filed for subsequent years only to the extent of showing in the tabulation such information with respect to employees who, at any time in the taxable year, own, directly or indirectly, more than 5 percent of the voting stock, considering stock so owned by an individual's spouse or minor lineal descendant as owned by the individual for this purpose.

(3) The information specified in paragraph (a) (4), (5), (6), (8), and (9) of this section.

In the case of corporate employers, the information required to be submitted by this paragraph shall, except as otherwise provided by the Commissioner, be filed on Form 2950 for taxable years ending on or after December 31, 1961. In the case of other employers, the information required to be submitted by this paragraph shall, except as otherwise provided by the Commissioner, be filed on Form 2950 for taxable years ending on or after December 31, 1962.

(c) If a deduction is claimed under section 404(a)(5) for the taxable year, the taxpayer shall furnish such information as is necessary to show that the deduction is not allowable under the

other paragraphs of section 404(a), that the amount paid is an ordinary and necessary expense or an expense for the production of income, and that the employees' rights to, or derived from, such employer's contribution or such compensation were nonforfeitable at the time the contribution or compensation was paid. In the case of corporate employers, the information required to be submitted by this paragraph shall, except as otherwise provided by the Commissioner, be filed on Form 2950 for taxable years ending on or after December 31, 1961. In the case of other employers, the information required to be submitted by this paragraph shall, except as otherwise provided by the Commissioner, be filed on Form 2950 for taxable years ending on or after December 31, 1962.

(d) For the purpose of the information required by this section, contributions paid in a taxable year shall include those deemed to be so paid in accordance with the provisions of section 404(a)(6) and shall exclude those deemed to be paid in the prior taxable year in accordance with such provisions. As used in this section, "taxable year" refers to the taxable year of the employer and, unless otherwise requested by the district director, a "year" which is not specified as a "taxable year" may be taken as the taxable year of the employer or as the plan, trust, valuation, or group contract year with respect to which deductions are being claimed provided the same rule is followed consistently so that there is no gap or overlap in the information furnished for each item. In any case the date or period to which each item of information furnished relates should be clearly shown. All the information required by this section should be filed with the tax return for the taxable year in which the deduction is claimed, except that, unless sooner requested by the district director, such information, other than that specified in paragraph (a)(4)(i) and (9) of this section, may be filed within 12 months after the close of the taxable year provided there is filed with the tax return a statement that the information cannot reasonably be filed therewith, setting forth the reasons therefor.

Internal Revenue Service, Treasury

§ 1.404(a)-2A

(e) In any case all the information and data required by this section must be filed in the office of the district director in which the employer files his tax returns and must be filed independently of any information and data otherwise submitted in connection with a determination of the qualification of the trust or plan under section 401(a). The district director may, in addition, require any further information that he considers necessary to determine allowable deductions under section 404 or qualification under section 401. For taxable years ending on or before December 31, 1961, the district director may waive the filing of such information required by this section which he finds unnecessary in a particular case. For taxable years ending after December 31, 1961, the Commissioner may waive the filing of such information.

(f) Records substantiating all data and information required by this section to be filed must be kept at all times available for inspection by internal revenue officers at the main office or place of business of the employer.

(g) In the case of a plan which covers employees, some or all of whom are self-employed individuals and with respect to which a deduction is claimed under section 404(a) (1), (2), (3), or (7), paragraphs (a) and (b) of this section, and the provision of paragraph (d) of this section relating to the time for filing the information required by this section, shall not apply, but in lieu of the information required to be submitted by paragraphs (a) and (b) of this section, the employer shall, with the return for the taxable year in which the deduction is claimed, submit the information required by the form provided by the Internal Revenue Service for such purpose.

(h) When a custodial account forms a part of a plan for which a deduction is claimed under section 404(a) (1), (2), (3), or (7), the information which under this section is to be submitted with respect to a qualified trust must be submitted with respect to such custodial account. Thus, for purposes of this section—

(1) The term “trust” includes custodial account,

(2) The term “trustee” includes custodian, and

(3) The term “trust indenture” includes custodial agreement.

(i) Except as provided under § 1.503(d)-1(a) and § 601.201 of this chapter (Statement of Procedural Rules) in the case of a request for the determination of qualification of a trust under section 401 and exemption under section 501, paragraphs (a) through (h) of this section shall not apply for taxable years ending on or after December 31, 1971. For information to be furnished for taxable years ending on or after December 31, 1971, see § 1.404(a)-2A.

[T.D. 6500, 25 FR 11683, Nov. 26, 1960, as amended by T.D. 6599, 27 FR 4475, May 10, 1962; T.D. 6676, 28 FR 10144, Sept. 17, 1963; T.D. 7165, 37 FR 5025, Mar. 9, 1972; T.D. 7168, 37 FR 5491, Mar. 16, 1972]

§ 1.404(a)-2A Information to be furnished by employer; taxable years ending on or after December 31, 1971, and before December 31, 1975.

(a) *In general.* For any taxable year ending on or after December 31, 1971, any employer who maintains a pension, annuity, stock bonus, profit-sharing, or other funded plan of deferred compensation shall file the forms prescribed by this section. An employer (including a self-employed individual) maintaining such a plan shall furnish such information as is required by the forms and the instructions relating thereto. The forms shall be filed in the manner and at the time prescribed under paragraph (c) of this section. See § 1.404(a)-2 with respect to information to be furnished for taxable years ending before December 31, 1971. For purposes of this section, in the case of a plan of several employers described in § 1.401-1(d), each employer shall be deemed to be maintaining a separate plan corresponding to the plan of which the trust is a part. For information required to be furnished with respect to a funded deferred compensation plan maintained by an employer who is exempt from tax under section 501(a), see § 1.6033-2(a)(2)(ii)(i).

(b) *Forms.* The forms prescribed by this section are:

(1) Form 4848, generally relating to information concerning the qualification of the plan, and deductions for contributions made on behalf of employees or self-employed individuals,

§ 1.404(a)-3

26 CFR Ch. I (4-1-08 Edition)

(2) Form 4849, generally relating to the financial position of the trust, fund, or custodial or fiduciary account which is a part of the plan, and

(3) For any taxable year ending on or after December 31, 1971, and before December 31, 1972, Forms 2950 and 2950SE, relating to the identification of plans to which an employer has made a contribution and information with respect to a deduction for a contribution made on behalf of a self-employed individual, respectively.

(c) *Filing requirements.* (1) Form 4848 shall be filed by the employer for each taxable year during which he maintains a pension, annuity, stock bonus, profit-sharing, or other funded plan of deferred compensation. Such form shall be filed on or before the 15th day of the 5th month following the close of the employer's taxable year. For rules relating to the extension of time for filing, see section 6081 and the regulations thereunder and the instructions for Form 4848.

(2) Form 4849 shall be filed by the employer as an attachment to Form 4848 for each taxable year during which he maintains a pension, annuity, stock bonus, profit-sharing, or other funded plan of deferred compensation unless the employer (i) has been notified in writing that Form 4849 will be filed by the fiduciary for such plan as an attachment to Form 990-P or (ii) is not required to file Form 4849 under the instructions relating thereto.

(3) For any taxable year ending on or after December 31, 1971, and before December 31, 1972, Form 2950 shall be filed with the employer's tax return for any such taxable year during which a pension, annuity, stock bonus, profit-sharing, or other funded plan of deferred compensation is maintained.

(4) For any taxable year ending on or after December 31, 1971, and before December 31, 1972, Form 2950SE shall be filed by each self-employed individual with his income tax return for any such taxable year in which he claims a deduction for contributions made on his behalf.

(d) *Additional information.* In addition to the information otherwise required to be furnished by this section, the district director may require any further information that he considers nec-

essary to determine allowable deductions under section 404 or qualification under section 401.

(e) *Records.* Records substantiating all data and information required by this section to be filed must be kept at all times available for inspection by internal revenue officers at the main office or place of business of the employer.

[T.D. 7165, 37 FR 5025, Mar. 9, 1972, as amended by T.D. 7223, 37 FR 24748, Nov. 21, 1972; T.D. 7551, 43 FR 29292, July 7, 1978]

§ 1.404(a)-3 Contributions of an employer to or under an employees' pension trust or annuity plan that meets the requirements of section 401(a); application of section 404(a)(1).

(a) If contributions are paid by an employer to or under a pension trust or annuity plan for employees and the general conditions and limitations applicable to deductions for such contributions are satisfied (see § 1.404(a)-1), the contributions are deductible under section 404(a) (1) or (2) if the further conditions provided therein are also satisfied. As used in this section, a "pension trust" means a trust forming part of a pension plan and an "annuity plan" means a pension plan under which retirement benefits are provided under annuity or insurance contracts without a trust. This section is also applicable to contributions to a foreign situs pension trust which could qualify for exemption under section 501(a) except that it is not created or organized and maintained in the United States. For the meaning of "pension plan" as used in this section, see paragraph (b)(1)(i) of § 1.401-1. Where disability pensions, insurance, or survivorship benefits incidental and directly related to the retirement benefits under a pension or annuity plan are provided for the employees or their beneficiaries by contributions under the plan, deductions on account of such incidental benefits are also covered under section 404(a) (1) or (2). See paragraph (b)(2) of § 1.72-16 as to taxability to employees of cost of incidental life insurance protection. Similarly, where medical benefits described in section 401(h) as defined in paragraph (a) of § 1.401-14 are provided for retired employees, their

spouses, or their dependents under the plan, deductions on account of such subordinate benefits are also covered under section 404(a) (1) or (2). In order to be deductible under section 404(a)(1), contributions to a pension trust must be paid in a taxable year of the employer which ends with or within a year of the trust for which it is exempt under section 501(a). Contributions paid in such a taxable year of the employer may be carried over and deducted in a succeeding taxable year of the employer in accordance with section 404(a)(1)(D), whether or not such succeeding taxable year ends with or within a taxable year of the trust for which it is exempt under section 501(a). See § 1.404(a)-7 for rules relating to the limitation on the amount deductible in such a succeeding taxable year of the employer. See § 1.404(a)-8 as to conditions for deductions under section 404(a)(2) in the case of an annuity plan. In either case, the deductions are also subject to further limitations provided in section 404(a)(1). The limitations provided in section 404(a)(1) are, with an exception provided for certain years under subparagraph (A) thereof (see § 1.404(a)-4), based on the actuarial costs of the plan.

(b) In determining costs for the purpose of limitations under section 404(a)(1), the effects of expected mortality and interest must be discounted and the effects of expected withdrawals, changes in compensation, retirements at various ages, and other pertinent factors may be discounted or otherwise reasonably recognized. A properly weighted retirement age based on adequate analyses of representative experience may be used as an assumed retirement age. Different basic assumptions or rates may be used for different classes of risks or different groups where justified by conditions or required by contract. In no event shall costs for the purpose of section 404(a)(1) exceed costs based on assumptions and methods which are reasonable in view of the provisions and coverage of the plan, the funding medium, reasonable expectations as to the effects of mortality and interest, reasonable and adequate regard for other factors such as withdrawal and deferred retirement (whether or not discounted) which can

be expected to reduce costs materially, reasonable expenses of operation, and all other relevant conditions and circumstances. In any case, in determining the costs and limitations, an adjustment shall be made on account of any experience more favorable than that assumed in the basis of limitations for prior years. Unless such adjustments are consistently made every year by reducing the limitations otherwise determined by any decrease in liability or cost arising from experience in the next preceding taxable year which was more favorable than the assumptions on which the costs and limitations were based, the adjustment shall be made by some other method approved by the Commissioner.

(c) The amount of a contribution to a pension or annuity plan that is deductible under section 404(a) (1) or (2) depends upon the methods, factors, and assumptions which are used to compute the costs of the plan and the limitation of section 404(a)(1) which is applied. Since the amount that is deductible for one taxable year may affect the amount that is deductible for other taxable years, the methods, factors, and assumptions used in determining costs and the method of determining the limitation which have been used for determining the deduction for a taxable year for which the return has been filed shall not be changed for such taxable year, except when the Commissioner determines that the methods, factors, assumptions, or limitations were not proper, or except when a change is necessitated by reason of the use of different methods, factors, assumptions, or limitations for another taxable year. However, different methods, factors, and assumptions, or a different method of determining the limitation, if they are proper, may be used in determining the deduction for a subsequent taxable year.

(d) Any expenses incurred by the employer in connection with the plan, such as trustee's and actuary's fees, which are not provided for by contributions under the plan are deductible by the employer under section 162 (relating to trade or business expenses), or 212 (relating to expenses for production of income) to the extent that they are ordinary and necessary.

§ 1.404(a)-4

26 CFR Ch. I (4-1-08 Edition)

(e) In case deductions are allowable under section 404(a)(3), as well as under section 404(a) (1) or (2), the limitations under section 404(a) (1) and (3) are determined and applied without giving effect to the provisions of section 404(a)(7) but the amounts allowable as deductions are subject to the further limitations provided in section 404(a)(7). See § 1.404(a)-13.

(f)(1) Amounts contributed by an employer under the plan for the funding of medical benefits described in section 401(h) as defined in paragraph (a) of § 1.401-14 must satisfy the general requirements which are applicable to deductions allowable under section 404 and which are set forth in § 1.404(a)-1 including, for example, the requirements described in paragraph (b) of such section. Accordingly, such amounts must constitute an ordinary and necessary expense relating to either the trade or business or the production of income and must not, when added to all other compensation paid by the employer to the employee on whose behalf such a contribution is made, constitute more than reasonable compensation. However, in determining the amount which is deductible with respect to contributions to provide retirement benefits under the plan, amounts contributed for the funding of medical benefits described in section 401(h) shall not be taken into consideration.

(2) The amounts deductible with respect to employer contributions to fund medical benefits described in section 401(h) shall not exceed the total cost of providing such benefits. The total cost of providing such benefits shall be determined in accordance with any generally accepted actuarial method which is reasonable in view of the provisions and coverage of the plan, the funding medium, and other applicable considerations. The amount deductible for any taxable year with respect to such cost shall not exceed the greater of—

(i) An amount determined by distributing the remaining unfunded costs of past and current service credits as a level amount, or as a level percentage of compensation, over the remaining future service of each employee, or

(ii) 10 percent of the cost which would be required to completely fund or purchase such medical benefits.

In determining the amount deductible, an employer must apply either subdivision (i) of this subparagraph for all employees or subdivision (ii) of this subparagraph for all employees. If contributions paid by an employer in a taxable year to fund such medical benefits under a pension or annuity plan exceed the limitations of this subparagraph but otherwise satisfy the conditions for deduction under section 404, then the excess contributions are carried over and are deductible in succeeding taxable years of the employer which end with or within taxable years of the trust for which it is exempt under section 501(a) in order of time to the extent of the difference between the amount paid and deductible in each succeeding year and the limitation applicable to such year under this subparagraph. For purposes of subdivision (i) of this subparagraph, if the remaining future service of an employee is one year or less, it shall be treated as one year.

[T.D. 6500, 25 FR 11685, Nov. 26, 1960, as amended by T.D. 6722, 29 FR 5073, Apr. 14, 1964; T.D. 7165, 37 FR 5025, Mar. 9, 1972]

§ 1.404(a)-4 Pension and annuity plans; limitations under section 404(a)(1)(A).

(a) Subject to the applicable general conditions and limitations (see § 1.404(a)-3), the initial limitation under section 404(a)(1)(A) is 5 percent of the compensation otherwise paid or accrued during the taxable year to all employees under the pension or annuity plan. This initial 5-percent limitation applies to the first taxable year for which a deduction is allowed for contributions to or under such a plan and also applies to any subsequent year (other than one described in paragraph (d) of this section) for which the 5-percent figure is not reduced as provided in this section. For years to which the initial 5-percent limitation applies, no adjustment on account of prior experience is required. If the contributions do not exceed the initial 5-percent limitation in the first taxable year to which this limitation applies, the taxpayer

need not submit actuarial data for such year.

(b) For the first taxable year following the first year to which the initial 5-percent limitation applies, and for every fifth year thereafter, or more frequently where preferable to the taxpayer, the taxpayer shall submit with his return an actuarial certification of the amount reasonably necessary to provide the remaining unfunded cost of past and current service credits of all employees under the plan with a statement explaining all the methods, factors, and assumptions used in determining such amount. This amount may be determined as the sum of (1) the unfunded past service cost as of the beginning of the year, and (2) the normal cost for the year. Such costs shall be determined by methods, factors, and assumptions appropriate as a basis of limitations under section 404(a)(1)(C). Whenever requested by the district director, a similar certification and statement shall be submitted for the year or years specified in such request. The district director will make periodical examinations of such data at not less than 5-year intervals. Based upon such examinations the Commissioner will reduce the limitation under section 404(a)(1)(A) below the 5-percent limitation for the years with respect to which he finds that the 5-percent limitation exceeds the amount reasonably necessary to provide the remaining unfunded cost of past and current service credits of all employees under the plan. Where the limitation is so reduced, the reduced limitation shall apply until the Commissioner finds that a subsequent actuarial valuation shows a change to be necessary. Such subsequent valuation may be made by the taxpayer at any time and submitted to the district director with a request for a change in the limitation. See, however, paragraph (d) of this section with respect to taxable years to which the limitation under section 404(a)(1)(A) does not apply.

(c) For the purpose of limitations under section 404(a)(1)(A), "compensation otherwise paid or accrued" means all of the compensation paid or accrued except that for which a deduction is allowable under a plan that qualifies under section 401(a), including a plan

that qualifies under section 404(a)(2). Where two or more pension or annuity plans cover the same employee, under section 404(a)(1)(A) the deductions with respect to each such plan are subject to the limitations applicable to the particular plan and the total deductions for all such plans are also subject to the limitations which would be applicable thereto if they constituted a single plan. Where, because of the particular provisions applicable to a large class of employees under a plan, the costs with respect to such employees are nominal in comparison with their compensation, after the first year to which the initial 5-percent limitation applies, deductions under section 404(a)(1)(A) are subject to limitations determined by considering the plan applicable to such class as if it were a separate plan. Deductions are allowable to the extent of the applicable limitations under section 404(a)(1)(A) even where these are greater than the applicable limitations under section 404(a)(1)(B) or section 404(a)(1)(C).

(d) The limitation under section 404(a)(1)(A) shall not be used for purposes of determining the amount deductible for a taxable year of the employer which ends with or within a taxable year of the pension trust during which it is not exempt under section 501(a), or, in the case of an annuity plan, during which it does not meet the requirements of section 404(a)(2), or which ends after the trust or plan has terminated. See § 1.404(a)-7 for rules relating to the limitation which is applicable for purposes of determining the amount deductible for such a taxable year of the employer.

[T.D. 6500, 25 FR 11685, Nov. 26, 1960, as amended by T.D. 6534, 26 FR 515, Jan. 20, 1961]

§ 1.404(a)-5 Pension and annuity plans; limitations under section 404(a)(1)(B).

(a) Subject to the applicable general conditions and limitations (see § 1.404(a)-3), under section 404(a)(1)(B), deductions may be allowed to the extent of limitations based on costs determined by distributing the remaining unfunded cost of the past and current service credits with respect to all employees covered under the trust or plan as a level amount or level percentage

of compensation over the remaining service of each such employee except that, as to any three individuals with respect to whom more than 50 percent of such remaining unfunded cost attributable to such individuals shall be distributed evenly over a period of at least five taxable years. See, however, paragraph (e) of this section with respect to taxable years to which the limitation under section 404(a)(1)(B) does not apply.

(b) The statutory limitation for any taxable year under section 404(a)(1)(B) is any excess of the amount of the costs described in paragraph (a) of this section for the year over the amount allowable as a deduction under section 404(a)(1)(A).

(c) For this purpose, such excess, adjusted for prior experience, may be computed for each year as follows, all determinations being made as of the beginning of the year:

(1) Determine the value of all benefits expected to be paid, after the beginning of the year for all employees, any former employees, and any other beneficiaries, then covered under the plan.

(2) If employees contribute under the plan, determine the value of all contributions expected to be made after the beginning of the year by employees then covered under the plan.

(3) Determine the value of all funds of the plan as of the beginning of the year.

(4) Determine the amount remaining to be distributed as a level amount or as a level percentage of compensation over the remaining future service of each employee by subtracting from subparagraph (1) of this paragraph the sum of subparagraphs (2) and (3) of this paragraph.

(5) Determine the value of all compensation expected to be paid after the beginning of the year to all employees then covered under the plan.

(6) Determine an accrual rate for each employee by dividing subparagraph (5) of this paragraph into subparagraph (4) of this paragraph.

(7) Compute the excess under section 404(a)(1)(B) for the year by multiplying the compensation paid to all employees covered under the plan during the year by any excess of subparagraph (6) of

this paragraph over 5 percent. In general, where this method is used, the limitation under section 404(a)(1)(B) will be equal to the excess so computed without further adjustment on account of prior favorable experience, provided all the factors and assumptions used are reasonable in view of all applicable considerations (see § 1.404(a)-3) and provided subparagraph (5) of this paragraph is not less than five times the annual rate of compensation in effect at the beginning of the year.

(d) Instead of determining the excess deductible under section 404(a)(1)(B) by the method shown in paragraph (c), such excess may be based upon cost determined by some other method which is reasonable and appropriate under the circumstances. Thus, such excess may be based on the amounts necessary with respect to each individual covered employee to provide the remaining unfunded cost of all his benefits under the plan distributed as a level amount over the period remaining until the normal commencement of his retirement benefits, in accordance with other generally accepted actuarial methods which are reasonable and appropriate in view of the provisions of the plan, the funding medium, and other applicable considerations.

(e) The limitation under section 404(a)(1)(B) shall not be used for purposes of determining the amount deductible for a taxable year of the employer which ends with or within a taxable year of the pension trust during which it is not exempt under section 501(a), or, in the case of an annuity plan, during which it does not meet the requirements of section 404(a)(2), or which ends after the trust or plan has terminated. See § 1.404(a)-7 for rules relating to the limitation which is applicable for purposes of determining the amount deductible for such a taxable year of the employer.

[T.D. 6500, 25 FR 11686, Nov. 26, 1960, as amended by T.D. 6534, 26 FR 515, Jan. 20, 1961]

§ 1.404(a)-6 Pension and annuity plans; limitations under section 404(a)(1)(C).

(a) *Application to a taxable year of the employer which ends with or within a taxable year of the pension trust or annuity plan for which it is exempt under section*

501(a) or meets the requirements of section 404(a)(2). (1) The rules in this paragraph are applicable with respect to the limitation under section 404(a)(1)(C) for taxable years of the employer which end with or within a taxable year of the pension trust for which it is exempt under section 501(a), or, in the case of an annuity plan, during which it meets the requirements of section 404(a)(2). See paragraph (b) of this section for rules relating to the limitation under section 404(a)(1)(C) for other taxable years of the employer.

(2) Subject to the applicable general conditions and limitations (see § 1.404(a)-3), in lieu of amounts deductible under the limitations of section 404(a)(1)(A) and section 404(a)(1)(B), deductions may be allowed under section 404(a)(1)(C) to the extent of limitations based on normal and past service or supplementary costs of providing benefits under the plan. "Normal cost" for any year is the amount actuarially determined which would be required as a contribution by the employer in such year to maintain the plan if the plan had been in effect from the beginning of service of each then included employee and if such costs for prior years had been paid and all assumptions as to interest, mortality, time of payment, etc., had been fulfilled. Past service or supplementary cost at any time is the amount actuarially determined which would be required at such time to meet all the future benefits provided under the plan which would not be met by future normal costs and employee contributions with respect to the employees covered under the plan at such time.

(3) The limitation under section 404(a)(1)(C) for any taxable year to which this paragraph applies is the sum of normal cost for the year plus an amount not in excess of one-tenth of the past service or supplementary cost as of the date the past service or supplementary credits are provided under the plan. For this purpose, the normal cost may be determined by any generally accepted actuarial method and may be expressed either as (i) the aggregate of level amounts with respect to each employee covered under the plan, (ii) a level percentage of payroll with respect to each employee covered

under the plan, or (iii) the aggregate of the single premium or unit costs for the unit credits accruing during the year with respect to each employee covered under the plan, provided, in any case, that the method is reasonable in view of the provisions and coverage of the plan, the funding medium, and other applicable considerations. The limitation may include one-tenth of the past service or supplementary cost as of the date the provisions resulting in such cost were put into effect, but it is subject to adjustments for prior favorable experience. See § 1.404(a)-3. In any case, past service or supplementary costs shall not be included in the limitation for any year in which the amount required to fund fully or to purchase such past service or supplementary credits has been deducted, since no deduction is allowable for any amount (other than the normal cost) which is paid in after such credits are fully funded or purchased.

(b) *Application to a taxable year of the employer which does not end with or within a taxable year of the pension trust or annuity plan for which it is exempt under section 501(a) or meets the requirements of section 404(a)(2).* (1) The rules in this paragraph are applicable with respect to the limitation under section 404(a)(1)(C) for taxable years of the employer which end with or within a taxable year of the pension trust during which it is not exempt under section 501(a), or, in the case of an annuity plan, during which it does not meet the requirements of section 404(a)(2), or which end after the trust or plan has terminated. Since contributions paid in such taxable years of the employer are not deductible under section 404(a)(1) or (2) (except as provided in section 404(a)(6)), the limitation under section 404(a)(1)(C) for such taxable years relates only to the amount of any excess contributions that may be carried over to such taxable years under section 404(a)(1)(D).

(2) Subject to the applicable general conditions and limitations (see § 1.404(a)-3), deductions may be allowed under section 404(a)(1)(C) for taxable years of the employer to which this paragraph applies to the extent of limitations based on past service or supplementary costs of providing benefits

§ 1.404(a)-7

26 CFR Ch. I (4-1-08 Edition)

under the plan. For definition of the “past service or supplementary cost at any time”, see paragraph (a)(2) of this section.

(3) The limitation under section 404(a)(1)(C) for any taxable year to which this paragraph applies is an amount not in excess of one-tenth of the past service or supplementary cost as of the date the past service or supplementary credits are provided under the plan. The limitation under section 404(a)(1)(C) is subject, however, to adjustments for prior favorable experience. In any case, no amounts are deductible under section 404(a)(1)(C) for any year to which this paragraph applies if the amount required to fund fully or to purchase the past service or supplementary credits has been deducted in prior taxable years of the employer.

[T.D. 6534, 26 FR 515, Jan. 20, 1961]

§ 1.404(a)-7 Pension and annuity plans; contributions in excess of limitations under section 404(a)(1); application of section 404(a)(1)(D).

When contributions paid by an employer in a taxable year to or under a pension or annuity plan exceed the limitations applicable under section 404(a)(1) but otherwise satisfy the conditions for deduction under section 404(a)(1) or (2), then in accordance with section 404(a)(1)(D), the excess contributions are carried over and are deductible in succeeding taxable years of the employer in order of time pursuant to the following rules:

(a) In the case of a succeeding taxable year of the employer which ends with or within a taxable year of the pension trust during which it is not exempt under section 501(a), or, in the case of an annuity plan, during which it meets the requirements of section 404(a)(2), such excess contributions are deductible to the extent of the difference between the amount paid and deductible in such succeeding taxable year and the limitation applicable to such year under section 404(a)(1) (A), (B), or (C).

(b) In the case of a succeeding taxable year of the employer which ends with or within a taxable year of the pension trust during which it is not exempt under section 501(a), or, in the

case of an annuity plan, during which it does not meet the requirements of section 404(a)(2), or which ends after the trust or plan has terminated, such excess contributions are deductible to the extent of the limitation applicable to such year under section 404(a)(1)(C) (see paragraph (b) of § 1.404(a)-6).

The provisions of section 404(a)(1)(D) are to be applied before giving effect to the provisions of section 404(a)(7) for any year. The carryover provisions of section 404(a)(1)(D), before effect has been given to section 404(a)(7), may be illustrated by the following example for a plan put into effect in a taxable year ending December 31, 1954:

<i>Taxable Year Ending Dec. 31, 1954</i>	
Amount of contributions paid in year	\$100,000
Limitation applicable to year	60,000
Amount deductible for year	60,000
Excess carried over to succeeding years	40,000

<i>Taxable Year Ending Dec. 31, 1955</i>	
Amount of contributions paid in year	\$25,000
Carried over from previous years	40,000
Total deductible subject to limitation	65,000
Limitation applicable to year	50,000
Amount deductible for year	50,000
Excess carried over to succeeding years	15,000

<i>Taxable Year Ending Dec. 31, 1956</i>	
Amount of contributions paid in year	\$10,000
Carried over from previous years	15,000
Total deductible subject to limitation	25,000
Limitation applicable to year	45,000
Amount deductible for year	25,000
Excess carried over to succeeding years	None

§ 1.404(a)-8 Contributions of an employer under an employees' annuity plan which meets the requirements of section 401(a); application of section 404(a)(2).

(a) If contributions are paid by an employer under an annuity plan for employees and the general conditions and limitations applicable to deductions for such contributions are satisfied (see § 1.404(a)-1), the contributions are deductible under section 404(a)(2) if the further conditions provided therein are satisfied. For the meaning of “annuity plan” as used here, see § 1.404(a)-3. In order that contributions by the employer may be deducted under section 404(a)(2), all of the following conditions must be satisfied:

(1) The contributions must be paid toward the purchase of retirement annuities (or for disability, severance, insurance, survivorship benefits incidental and directly related to such annuities, or medical benefits described in section 401(h) as defined in paragraph (a) of § 1.404(h)-1) under an annuity plan for the exclusive benefit of the employer's employees or their beneficiaries.

(2) The contributions must be paid in a taxable year of the employer which ends with or within a year of the plan for which it meets the applicable requirements set forth in section 401(a) (3), (4), (5), (6), (7), (8), (11), (12), (13), (14), (15), (16), and (19). In the case of a plan which covers a self-employed individual, the contributions must be paid in a taxable year of the employer which ends with or within a year of the plan for which it also meets the requirements of section 401(a), (9), (10), (17), and (18) and of section 401(d) (other than paragraph (1)). In the case of a plan which covers a shareholder-employee within the meaning of section 1379(d), the contributions must be paid in a taxable year of the employer which ends with or within a year of the plan for which it also meets the requirements of section 401(a) (17) and (18). See section 401(a) and the regulations thereunder for the requirements and the applicable effective dates of the respective paragraphs set forth in section 401(a). Any contributions of an employer which are paid in a taxable year of the employer ending with or within a year of the plan for which it meets the applicable requirements of section 401 may be carried over and deducted in a succeeding taxable year of the employer in accordance with section 404(a)(1)(D), whether or not such succeeding taxable year ends with or within a taxable year of the plan for which it meets the requirements set out in section 401 (a) and (d). See section 401(b) and the regulations thereunder for special rules allowing certain plan amendments to be given retroactive effect. See section 404(a)(6) for a special rule for determining the time when a contribution is deemed to have been made.

(3) There must be a definite written arrangement between the employer and

the insurer that refunds of premiums, if any, shall be applied within the taxable year of the employer in which received or within the next succeeding taxable year toward the purchase of retirement annuities (or for disability, severance, insurance, survivorship benefits incidental and directly related to such annuities, or medical benefits described in section 401(h) as defined in paragraph (a) of § 1.401(h)-1 under the plan. For the purpose of this condition, "refunds of premiums" means payments by the insurer on account of credits such as dividends, experience rating credits, or surrender or cancellation credits. The arrangement may be in the form of contract provisions or written directions of the employer or partly in one form and partly in another. This condition will be considered satisfied where—

(i) All credits are applied regularly, as they are determined, toward the premiums next due under the contracts before any further employer contributions are so applied, and

(ii) Under the arrangement,

(A) No refund of premiums may be made during continuance of the plan unless applied as aforesaid, and

(B) If refunds of premiums may be made after discontinuance or termination, whichever is applicable, of the plan on account of surrenders or cancellations before all retirement annuities provided under the plan with respect to service before its discontinuance or termination have been purchased, such refunds will be applied in the taxable year of the employer in which received, or in the next succeeding taxable year, to purchase retirement annuities for employees by a procedure which does not contravene the conditions of section 401(a)(4). If the plan also includes medical benefits described in section 401(h) as defined in paragraph (a) of § 1.401(h)-1, any refund of premiums attributable to such benefits must, in accordance with these rules, be applied toward the purchase of medical benefits described in section 401(h).

(4) Any amounts described in subparagraph (3) of this paragraph which are attributable to contributions on behalf of a self-employed individual must

§ 1.404(a)(8)–1T

26 CFR Ch. I (4–1–08 Edition)

be applied toward the purchase of retirement benefits. Amounts which are so applied are not contributions and thus are not taken into consideration in determining—

(i) The amount deductible with respect to contributions on his behalf, nor

(ii) In the case of an owner-employee, the maximum amount of contributions that may be made on his behalf.

(b) Where the above conditions are satisfied, the amounts deductible under section 404(a)(2) are governed by the limitations provided in section 404(a)(1). See §§ 1.404(a)–3 to 1.404(a)–7, inclusive.

(Sec. 411 Internal Revenue Code of 1954 (88 Stat. 901; 26 U.S.C. 411))

[T.D. 7501, 42 FR 42321, Aug. 23, 1977]

§ 1.404(a)(8)–1T Deductions for plan contributions on behalf of self-employed individuals. (Temporary)

Q: How does the amendment to section 404(a)(8)(D), made by section 713(d)(6) of the Tax Reform Act of 1984 (TRA of 1984), affect section 404(a)(8)(C)?

A: In applying the rules of section 404(a)(8)(C), the Service will treat the amendment to section 404(a)(8)(D) as also having been made to section 404(a)(8)(C), pending enactment of technical corrections to TRA of 1984. The effect of treating the amendment as having also been made to section 404(a)(8)(C) is to increase the amount of contributions on behalf of a self-employed individual that will be treated as satisfying section 162 or 212. Generally, therefore, a contribution on behalf of a self-employed individual is treated as satisfying section 162 or 212 if it is not in excess of the individual's earned income for the year, determined without regard to the deduction allowed by section 404 for the self-employed individual's contribution.

[T.D. 8073, 51 FR 4321, Feb. 4, 1986]

§ 1.404(a)–9 Contributions of an employer to an employees' profit-sharing or stock bonus trust that meets the requirements of section 401(a); application of section 404(a)(3)(A).

(a) If contributions are paid by an employer to a profit-sharing or stock bonus trust for employees and the gen-

eral conditions and limitations applicable to deductions for such contributions are satisfied (see § 1.404(a)–1), the contributions are deductible under section 404(a)(3)(A) if the further conditions provided therein are also satisfied. In order to be deductible under the first, second, or third sentence of section 404(a)(3)(A), the contributions must be paid (or deemed to have been paid under section 404(a)(6)) in a taxable year of the employer which ends with or within a taxable year of the trust for which it is exempt under section 501(a) and the trust must not be designed to provide retirement benefits for which the contributions can be determined actuarially. Excess contributions paid in such a taxable year of the employer may be carried over and deducted in a succeeding taxable year of the employer in accordance with the third sentence of section 404(a)(3)(A), whether or not such succeeding taxable year ends with or within a taxable year of the trust for which it is exempt under section 501(a). This section is also applicable to contributions to a foreign situs profit-sharing or stock bonus trust which could qualify for exemption under section 501(a) except that it is not created or organized and maintained in the United States.

(b) The amount of deductions under section 404(a)(3)(A) for any taxable year is subject to limitations based on the compensation otherwise paid or accrued by the employer during such taxable year to employees who are beneficiaries under the plan. For purposes of computing this limitation, the following rules are applicable:

(1) In the case of a taxable year of the employer which ends with or within a taxable year of the trust for which it is exempt under section 501(a), the limitation shall be based on the compensation otherwise paid or accrued by the employer during such taxable year of the employer to the employees who, in such taxable year of the employer, are beneficiaries of the trust funds accumulated under the plan.

(2) In the case of a taxable year of the employer which ends with or within a taxable year of the trust during which it is not exempt under section 501(a), or which ends after the trust has terminated, the limitation shall be based on

the compensation otherwise paid or accrued by the employer during such taxable year of the employer to the employees who, at any time during the one-year period ending on the last day of the last calendar month during which the trust was exempt under section 501(a), were beneficiaries of the trust funds accumulated under the plan.

For purposes of this paragraph, "compensation otherwise paid or accrued" means all of the compensation paid or accrued except that for which a deduction is allowable under a plan that qualifies under section 401(a), including a plan that qualifies under section 404(a)(2). The limitations under section 404(a)(3)(A) apply to the total amount deductible for contributions to the trust regardless of the manner in which the funds of the trust are invested, applied, or distributed, and no other deduction is allowable on account of any benefits provided by contributions to the trust or by the funds thereof. Where contributions are paid to two or more profit-sharing or stock bonus trusts satisfying the conditions for deduction under section 404(a)(3)(A), such trusts are considered as a single trust in applying these limitations.

(c) The primary limitation on deductions for a taxable year is 15 percent of the compensation otherwise paid or accrued by the employer during such taxable year to the employees who are beneficiaries under the plan. See paragraph (b) of this section for rules for determining who are the beneficiaries under the plan.

(d) In order that the deductions may average 15 percent of compensation otherwise paid or accrued over a period of years, where contributions in some taxable year are less than the primary limitation but contributions in some succeeding taxable year exceed the primary limitation, deductions in each succeeding year are subject to a secondary limitation instead of to the primary limitation. The secondary limitation for any year is equal to the lesser of (1) twice the primary limitation for the year, or (2) any excess of (i) the aggregate of the primary limitations for the year and for all prior years over (ii) the aggregate of the deductions allowed or allowable under the limita-

tions provided in section 404(a)(3)(A) for all prior years. Since contributions paid into a profit-sharing or stock bonus trust are deductible under section 404(a)(3)(A) only if they are paid (or deemed to have been paid under section 404(a)(6)) in a taxable year of the employer which ends with or within a taxable year of the trust for which it is exempt under section 501(a), the secondary limitation described in this paragraph is not applicable with respect to determining amounts deductible for a taxable year of the employer which ends with or within a taxable year of the trust during which it is not exempt under section 501(a), or which ends after the trust has terminated. See paragraph (e) of this section for rules relating to amounts which are deductible in such a taxable year.

(e) In any case when the contributions in a taxable year exceed the amount allowable as a deduction for the year under section 404(a)(3)(A), the excess is deductible in succeeding taxable years, in order of time, in accordance with the following limitations:

(1) If the succeeding taxable year ends with or within a taxable year of the trust for which it is exempt under section 501(a), such excess is deductible in any such succeeding taxable year in which the contributions are less than the primary limitation for that year; but the total deduction for such succeeding taxable year cannot exceed the lesser of (i) the primary limitation for such year, or (ii) the sum of the contributions in such year and the excess contributions not deducted under the limitations of section 404(a)(3)(A) for prior years.

(2) If the succeeding taxable year ends with or within a taxable year of the trust during which it is not exempt under section 501(a), or if such succeeding taxable year ends after the trust has terminated, the total deduction for such succeeding taxable year cannot exceed the lesser of (i) the primary limitation for such succeeding taxable year, or (ii) the excess contributions not deducted under the limitations of section 404(a)(3)(A) for prior years.

In no case, however, are excess contributions deductible in a succeeding taxable year if such contributions were

§ 1.404(a)-10

26 CFR Ch. I (4-1-08 Edition)

not paid (or deemed to have been paid under section 404(a)(6)) in a taxable year of the employer which ends with or within a taxable year of the trust for which it is exempt under section 501(a).

(f) In case deductions are allowable under section 404(a) (1) or (2), as well as under section 404(a)(3)(A), the limitations under section 404(a) (1) and (3)(A)

are determined and applied without giving effect to the provisions of section 404(a)(7), but the amounts allowable as deductions are subject to the further limitations provided in section 404(a)(7). See § 1.404(a)-13.

(g) The provisions of section 404(a)(3)(A) before giving effect to section 404(a)(7), may be illustrated as follows:

ILLUSTRATION OF PROVISIONS OF SECTION 404(A)(3)(A) FOR A PLAN PUT INTO EFFECT IN THE TAXABLE (CALENDAR) YEAR 1954, BEFORE GIVING EFFECT TO SECTION 404(A)(7) (ALL FIGURES REPRESENT THOUSANDS OF DOLLARS AND ALL TAXABLE (CALENDAR) YEARS ARE YEARS WHICH END WITH OR WITHIN A TAXABLE YEAR OF THE TRUST FOR WHICH IT IS EXEMPT UNDER SECTION 501(A))

[T.D. 6500, 25 FR 11687, Nov. 26, 1960, as amended by T.D. 6534, 26 FR 516, Jan. 20, 1961]

§ 1.404(a)-10 Profit-sharing plan of an affiliated group; application of section 404(a)(3)(B).

(a) Section 404(a)(3)(B) allows a corporation a deduction to the extent provided in paragraphs (b) and (c) of this section for a contribution which it makes for another corporation to a profit-sharing plan or a stock bonus plan under which contributions are determined by reference to profits, provided the following tests are met:

(1) The corporation for which the contribution is made and the contributing corporation are members of an affiliated group of corporations as defined in section 1504, relating to the filing of consolidated returns, and both such corporations participate in the

plan. However, it is immaterial whether all the members of such group participate in the plan.

(2) The corporation for which the contribution is made is required under the plan to make the contribution, but such corporation is prevented from making such contribution because it has neither current nor accumulated earnings or profits, or because its current and accumulated earnings or profits are insufficient to make the required contribution. To the extent that such a corporation has any current or accumulated earnings or profits, it is not considered to be prevented from making its required contribution to the plan.

Internal Revenue Service, Treasury

§ 1.404(a)-10

(3) The contribution is made out of the current or accumulated earnings or profits of the contributing corporation.

(b) The amount that is deductible under section 404(a)(3)(B) is determined by applying the rules of section 404(a)(3)(A) and § 1.404(a)-9 as if the contribution were made by the corporation for which it is made. For example, the primary limitation described in paragraph (e) of § 1.404(a)-9 is determined by reference to the compensation otherwise paid or accrued to the employees of the corporation for which the contribution is made, and the secondary limitation described in paragraph (d) of § 1.404(a)-9 and the contribution carryover described in paragraph (c) of § 1.404(a)-9 are determined by reference to the prior contributions and deductions of such corporation. The contributing corporation may deduct the amount so determined subject to the limitations contained in paragraph (c) of this section. The contributing corporation shall not treat such amount as a contribution made by it in applying the rules of section 404(a)(3)(A) and § 1.404(a)-9 either for the taxable year for which the contribution is made or for succeeding taxable years. The corporation for which the contribution is made shall treat the contribution as having been made by it in applying the rules of section 404(a)(3)(A) and § 1.404(a)-9 for succeeding taxable years.

(c) The allowance of the deduction under section 404(a)(3)(B) does not de-

pend upon whether the affiliated group does or does not file a consolidated return. If a consolidated return is filed, it is immaterial which of the participating corporations makes the contribution and takes the deduction or how the contribution or the deduction is allocated among them. However, if a consolidated return is not filed, the contribution which is deductible under section 404(a)(3)(B) by each contributing corporation shall be limited to that portion of its total current and accumulated earnings or profits (adjusted for its contribution deductible without regard to section 404(a)(3)(B)) which the prevented contribution bears to the total current and accumulated earnings or profits of all the participating members of the group having such earnings or profits (adjusted for all contributions deductible without regard to section 404(a)(3)(B)). For the purpose of this section, current earnings or profits shall be computed as of the close of the taxable year without diminution by reason of any dividends during the taxable year, and accumulated earnings or profits shall be computed as of the beginning of the taxable year.

(d) The application of section 404(a)(3)(B) may be illustrated by the following example in which the affiliated group does not file a consolidated return:

(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
A	(\$10,000)	(\$140,000)	(\$150,000)	\$200,000	$\frac{1}{5}$	\$6,000				
B	(5,000)	105,000	100,000	300,000	$\frac{3}{10}$	9,000	\$9,000	\$91,000	$\frac{6}{326} \times$	\$1,674.85
C	75,000	175,000	250,000	500,000	$\frac{1}{2}$	15,000	15,000	235,000	$\frac{6}{326} \times$	4,325.15
									235,000	
Total	60,000	140,000	200,000	1,000,000		30,000	24,000	326,000		6,000.00

- (11) Make-up contribution.

§ 1.404(a)-11

26 CFR Ch. I (4-1-08 Edition)

[T.D. 6500, 25 FR 11688, Nov. 26, 1960]

§ 1.404(a)-11 Trusts created or organized outside the United States; application of section 404(a)(4).

In order that a trust may constitute a qualified trust under section 401(a) and be exempt under section 501(a), it must be created or organized in the United States and maintained at all times as a domestic trust. See paragraph (a) of § 1.401-1. Paragraph (4) of section 404(a) provides, however, that an employer which is a resident, a corporation, or other entity of the United States, making contributions to a foreign stock bonus, pension, or profit-sharing trust, shall be allowed deductions for such contributions, under the applicable conditions and within the prescribed limits of section 404(a), if such foreign trust would qualify for exemption under section 501(a) except for the fact that it is a trust created, organized, or maintained outside the United States. Moreover, if a non-resident alien individual, foreign corporation, or other entity is engaged in trade or business within the United States and makes contributions to a foreign stock bonus, pension, or profit-sharing trust, which would qualify under section 401(a) and be exempt under section 501(a) except that it is created, organized, or maintained outside the United States, such contributions are deductible subject to the conditions and limitations of section 404(a) and to the extent allowed by section 873 or 882(c).

[T.D. 6500, 25 FR 11689, Nov. 26, 1960]

§ 1.404(a)-12 Contributions of an employer under a plan that does not meet the requirements of section 401(a); application of section 404(a)(5).

(a) *In general.* Section 404(a)(5) covers all cases for which deductions are allowable under section 404(a) (for contributions paid by an employer under a stock bonus, pension, profit sharing, or annuity plan or for any compensation paid on account of any employee under a plan deferring the receipt of such compensation) but not allowable under paragraph (1), (2), (3), (4), or (7) of such section. For the rules with respect to the taxability of an employee when

rights under a nonexempt trust become substantially vested, see section 402(b) and the regulations thereunder.

(b) *Contributions made after August 1, 1969—*(1) *In general.* A deduction is allowable for a contribution paid after August 1, 1969, under section 404(a)(5) only in the taxable year of the employer in which or with which ends the taxable year of an employee in which an amount attributable to such contribution is includible in his gross income as compensation, and then only to the extent allowable under section 404(a). See § 1.404(a)-1. For example, if an employer A contributes \$1,000 to the account of its employee E for its taxable (calendar) year 1977, but the amount in the account attributable to that contribution is not includible in E's gross income until his taxable (calendar) year 1980 (at which time the includible amount is \$1,150), A's deduction for that contribution is \$1,000 in 1980 (if allowable under section 404(a)). For purposes of this (1), a contribution is considered to be so includible where the employee or his beneficiary excludes it from his gross income under section 101(b) or subchapter N. To the extent that property of the employer is transferred in connection with such a contribution, such transfer will constitute a disposition of such property by the employer upon which gain or loss is recognized, except as provided in section 1032 and the regulations thereunder. The amount of gain or loss recognized from such disposition shall be the difference between the value of such property used to measure the deduction allowable under this section and the employer's adjusted basis in such property.

(2) *Special rule for unfunded pensions and certain death benefits.* If unfunded pensions are paid directly to former employees, such payments are includible in their gross income when paid, and accordingly, such amounts are deductible under section 404(a)(5) when paid. Similarly, if amounts are paid as a death benefit to the beneficiaries of an employee (for example, by continuing his salary for a reasonable period), and if such amounts meet the requirements of section 162 or 212, such amounts are deductible under section 404(a)(5) in any case when they are not

includible under the other paragraphs of section 404(a).

(3) *Separate accounts for funded plans with more than one employee.* In the case of a funded plan under which more than one employee participates, no deduction is allowable under section 404(a)(5) for any contribution unless separate accounts are maintained for each employee. The requirement of separate accounts does not require that a separate trust be maintained for each employee. However, a separate account must be maintained for each employee to which employer contributions under the plan are allocated, along with any income earned thereon. In addition, such accounts must be sufficiently separate and independent to qualify as separate shares under section 663(c). Nothing shall preclude a trust which loses its exemption under section 501(a) from setting up such accounts and meeting the separate account requirement of section 404(a)(5) with respect to the taxable years in which such accounts are set up and maintained.

(c) *Contributions paid on or before August 1, 1969.* No deduction is allowable under section 404(a)(5) for any contribution paid on or before August 1, 1969, by an employer under a stock bonus, pension, profit-sharing, or annuity plan, or for any compensation paid on account of any employee under plan deferring the receipt of such compensation, except in the year when paid, and then only to the extent allowable under section 404(a). See § 1.404(a)-1. If payments are made under such a plan and the amounts are not deductible under the other paragraphs of section 404(a), they are deductible under section 404(a)(5) to the extent that the rights of individual employees to, or derived from, such employer's contribution or such compensation are nonforfeitable at the time the contribution or compensation is paid. If unfunded pensions are paid directly to former employees, their rights to such payments are nonforfeitable, and accordingly, such amounts are deductible under section 404(a)(5) when paid. Similarly, if amounts are paid as a death benefit to the beneficiaries of an employee (for example, by continuing his salary for a reasonable period), and if such amounts meet the requirements

of section 162 or 212, such amounts are deductible under section 404(a)(5) in any case where they are not deductible under the other paragraphs of section 404(a). As to what constitutes nonforfeitable rights of an employee in other cases, see § 1.402(b)-1(d)(2). If an amount is accrued but not paid during the taxable year, no deduction is allowable for such amount for such year. If an amount is paid during the taxable year to a trust or under a plan and the employee's rights to such amount are forfeitable at the time the amount is paid, no deduction is allowable for such amount for any taxable year.

(Secs. 83 and 7805 of the Internal Revenue Code of 1954 (83 Stat. 588; 68A Stat. 917; 26 U.S.C. 83 and 7805))

[T.D. 7554, 43 FR 31926, July 24, 1978]

§ 1.404(a)-13 Contributions of an employer where deductions are allowable under section 404(a) (1) or (2) and also under section 404(a)(3); application of section 404(a)(7).

(a) Where deductions are allowable under section 404(a) (1) or (2) on account of contributions under a pension or annuity plan and deductions are also allowable under section 404(a)(3) for the same taxable year on account of contributions to a profit-sharing or stock bonus trust, the total deductions under these sections are subject to the provisions of section 404(a)(7) unless no employee who is a beneficiary under the trusts or plans for which deductions are allowable under section 404(a) (1) or (2) is also a beneficiary under the trusts for which deductions are allowable under section 404(a)(3). The provisions of section 404(a)(7) apply only to deductions for overlapping trusts or plans, i.e., for all trusts or plans for which deductions are allowable under section 404(a) (1), (2), or (3) except (1) any trust or plan for which deductions are allowable under section 404(a) (1) or (2) and which does not cover any employee who is also covered under a trust for which deductions are allowable under section 404(a) (3), and (2) any trust for which deductions are allowable under section 404(a)(3) and which does not cover any employee who is also covered under a trust or plan for which deductions are allowable under section 404(a) (1) or (2). The limitations

under section 404(a)(7) for any taxable year of the employer are based on the compensation otherwise paid or accrued during the year by the employer to all employees who, in such year, are beneficiaries of the funds accumulated under one or more of the overlapping trusts or plans. For purposes of the preceding sentence, if the taxable year of the employer with respect to which the limitation is being computed ends with or within a taxable year of any of the overlapping trusts or plans during which any such trust is not exempt under section 501(a) or, in the case of a plan, during which it does not meet the requirements of section 404(a)(2), or if such taxable year of the employer ends after any such trust or plan has terminated, then, with respect to such trust or plan, those employees, and only those employees, who, at any time during the one-year period ending on the last day of the last calendar month during which the trust was exempt under section 501(a), or the plan met the requirements of section 404(a)(2), were beneficiaries of the funds accumulated under such trust or plan shall be considered the beneficiaries of such trust or plan in the taxable year of the employer with respect to which the limitation is being computed. For purposes of this paragraph, "compensation otherwise paid or accrued" means all of the compensation paid or accrued except that for which a deduction is allowable under a plan that qualifies under section 401(a), including a plan that qualifies under section 404(a)(2).

(b) Under section 404(a)(7), any excess of the total amount otherwise deductible for the taxable year under section 404(a) (1), (2), or (3) as contributions to overlapping trusts or plans over 25 percent of the compensation otherwise paid or accrued during the year to all the employees who are beneficiaries under such trusts or plans, is not deductible for such year but is deductible for succeeding taxable years, in order of time, so that the total deduction for

contributions to such trusts or plans for a succeeding taxable year is equal to the lesser of—

(1) 30 percent of the compensation otherwise paid or accrued during the taxable year to all the employees who are beneficiaries under such trusts or plans in the year, or

(2) The sum of (i) the smaller of (a) 25 percent of the compensation otherwise paid or accrued during the taxable year to all employees who are beneficiaries under such trusts or plans in the year, or (b) the total of the amounts otherwise deductible under section 404(a) (1), (2), or (3) for the year for such trusts or plans and (ii) any carryover to the year from prior years under section 404(a)(7), i.e., any excess otherwise deductible under section 404(a) (1), (2), or (3), but not deducted for a prior taxable year because of the limitations under section 404(a)(7).

(c) The limitations under section 404(a)(7) are determined and applied after all the limitations, deductions otherwise allowable, and carryovers under section 404(a) (1), (2), and (3) have been determined and applied, and, in particular, after effect has been given to the carryover provision in section 404(a)(1)(D) and in the second and third sentences of section 404(a)(3)(A). Where the limitations under section 404(a)(7) reduce the total amount deductible, the excess deductible in succeeding years is treated as a carryover which is distinct from, and additional to, any excess contributions carried over and deductible in succeeding years under the provisions in section 404(a)(1)(D) or in the third sentence of section 404(a)(3)(A). The application of the provisions of section 404(a)(7) and the treatment of carryovers for a case where the taxable years are calendar years and the overlapping trusts or plans consist of a pension trust and a profit-sharing trust put into effect in 1954 and covering the same employees may be illustrated as follows:

Internal Revenue Service, Treasury

§ 1.404(a)-14

ILLUSTRATION OF APPLICATION OF PROVISIONS OF SECTION 404(A)(7) AND OF TREATMENT OF CARRYOVERS FOR OVERLAPPING PENSION AND PROFIT-SHARING TRUSTS PUT INTO EFFECT IN 1954 AND COVERING THE SAME EMPLOYEES (ALL FIGURES REPRESENT THOUSANDS OF DOLLARS AND ALL TAXABLE (CALENDAR) YEARS OF THE EMPLOYER ARE YEARS WHICH END WITH OR WITHIN A TAXABLE YEAR OF THE TRUST FOR WHICH IT IS EXEMPT UNDER SECTION 501(A))

	Taxable calendar years			
	1954	1955	1956	1957
BEFORE GIVING EFFECT TO SECTION 404(a)(7)				
Pension trust contributions and limitations, deductions, and carryovers under section 404(a)(1):				
1. Contributions paid in year	\$215	\$85	\$140	\$60
2. Contributions carried over from prior years	0	5	0	20
3. Total deductible for year subject to limitation	215	90	140	80
4. Limitation applicable to year	210	175	120	85
5. Amount deductible for year	210	90	120	80
6. Contributions carried over to succeeding years	5	0	20	0
Profit-sharing trust contributions and limitations, deductions, and carryovers under section 404(a)(3):				
7. Contributions paid in year	200	125	105	65
8. Contributions carried over from prior years	0	35	10	0
9. Total deductible for year subject to limitation	200	160	115	65
10. Limitation applicable to year	165	150	135	¹ 110
11. Amount deductible for year	165	150	115	65
12. Contributions carried over to succeeding years	35	10	0	0
APPLICATION OF SECTION 404(a)(7)				
Totals for pension and profit-sharing trust:				
13. Amount deductible for year under section 404(a)(7):				
(1) 30 percent of compensation covered in year ²	(³)	300	270	180
(2) (i) (a) 25 percent of compensation covered in year ²	275	250	225	150
(b) Total amount otherwise deductible for year: item 5 plus item 11	375	240	235	145
(c) Smaller of (a) or (b)	275	240	225	145
(ii) Carryover from prior years under section 404(a)(7)	0	100	40	10
(iii) Sum of (i)(c) and (ii)	275	340	265	155
(3) Amount deductible: Lesser of (1) or (2)(iii)	275	300	265	155
14. Carryover to succeeding years under section 404(a)(7): item 13(2)(ii) plus item 3(2)(i)(b) minus item 13(3)	100	40	10	0

¹ Includes carryover of 20 from 1956.

² Compensation otherwise paid or accrued during the year to the employees who are beneficiaries under the trusts in the year.

³ 30 percent limitation not applicable to first year of plan.

[T.D. 6500, 25 FR 11689, Nov. 26, 1960, as amended by T.D. 6534, 26 FR 517, Jan. 20, 1961]

§ 1.404(a)-14 Special rules in connection with the Employee Retirement Income Security Act of 1974.

(a) *Purpose of this section.* This section provides rules for determining the deductible limit under section 404(a)(1)(A) of the Internal Revenue Code of 1954 for defined benefit plans.

(b) *Definitions.* For purposes of this section—

(1) *Section 404(a).* The term “old section 404(a)” means section 404(a) as in effect on September 1, 1974. Any reference to section 404 without the designation “old” is a reference to section

404 as amended by the Employee Retirement Income Security Act of 1974.

(2) *Ten-year amortization base.* The term “10-year amortization base” means either the past service and other supplementary pension and annuity credits described in section 404(a)(1)(A)(iii) or any base established in accordance with paragraph (g) of this section. A plan may have several 10-year amortization bases to reflect different plan amendments, changes in actuarial assumptions, changes in funding method, and experience gains and losses of previous years.

(3) *Limit adjustment.* The term “limit adjustment” with respect to any 10-year amortization base is the lesser of—

(i) The level annual amount necessary to amortize the base over 10 years using the valuation rate, or

(ii) The unamortized balance of the base,

in each case using absolute values (solely for the purpose of determining which is the lesser). To compute the level amortization amount, the base may be divided by the present value of an annuity of one dollar, obtained from standard annuity tables on the basis of a given interest rate (the valuation rate) and a known period (the amortization period).

(4) *Absolute value.* The term “absolute value” for any number is the value of that number, treating negative numbers as if they were positive numbers. For example, the absolute value of 5 is 5 and the absolute value of minus 3 is 3. On the other hand, the true value of minus 3 is minus 3. This term is relevant to the computation of the limit adjustment described in paragraph (b)(3) and the remaining amortization period of combined bases described in paragraph (i)(3) of this section.

(5) *Valuation rate.* The term “valuation rate” means the assumed interest rate used to value plan liabilities.

(c) *Use of plan in determining deductible limit for employer’s taxable year.* Although the deductible limit applies for an employer’s taxable year, the deductible limit is determined on the basis of a plan year. If the employer’s taxable year coincides with the plan year, the deductible limit for the taxable year is the deductible limit for the plan year that coincides with that year. If the employer’s taxable year does not coincide with the plan year, the deductible limit under section 404(a)(1)(A) (i), (ii), or (iii) for a given taxable year of the employer is one of the following alternatives:

(1) The deductible limit determined for the plan year commencing within the taxable year.

(2) The deductible limit determined for the plan year ending within the taxable year, or

(3) A weighted average of alternatives (1) and (2). Such an average

may be based, for example, upon the number of months of each plan year falling within the taxable year.

The employer must use the same alternative for each taxable year unless consent to change is obtained from the Commissioner under section 446 (e).

(d) *Computation of deductible limit for a plan year—(1) General rules.* The computation of the deductible limit for a plan year is based on the funding methods, actuarial assumptions, and benefit structure used for purposes of section 412, determined without regard to section 412(g) (relating to the alternative minimum funding standard), for the plan year. The method of valuing assets for purposes of section 404 must be the same method of valuing assets used for purposes of section 412.

(2) *Special adjustments of computations under section 412.* To apply the rules of this section (i.e., rules regarding the computation of normal cost with aggregate type funding methods, unfunded liabilities, and the full funding limitation described in paragraph (k) of the section, where applicable) with respect to a given plan year in computing deductible limits under section 404 (a)(1)(A), the following adjustments must be made:

(i) There must be excluded from the total assets of the plan the amount of any plan contribution for a plan year for which the plan was qualified under section 401(a), 403(a) or 405(a) that has not been previously deducted, even though that amount may have been credited to the funding standard account under section 412(b)(3). In the case of a plan using a spread gain funding method which maintains an unfunded liability (e.g., the frozen initial liability method, but not the aggregate method), the amount described in the preceding sentence must be included in the unfunded liability of the plan.

(ii) There must be included in the total assets of the plan for a plan year the amount of any plan contribution that has been deducted with respect to a prior plan year, even though that amount is considered under section 412 to be contributed in a plan year subsequent to that prior plan year. In the case of a plan using a spread gain funding method which does not maintain an

unfunded liability, the amount described in the preceding sentence must be excluded from the unfunded liability of the plan.

The special adjustments described in paragraph (d)(2) (i) and (ii) of this section apply on a year-by-year basis for purposes of section 404(a)(1)(A) only. Thus, the adjustments have no effect on the computation of the minimum funding requirement under section 412.

(e) *Special computation rules under section 404(a)(1)(A)(i)*—(1) *In general.* For purposes of determining the deductible limit under section 404(a)(1)(A)(i), the deductible limit with respect to a plan year is the sum of—

(i) The amount required to satisfy the minimum funding standard of section 412(a) (determined without regard to section 412(g)) for the plan year and

(ii) An amount equal to the includible employer contributions. The term “includible employer contributions” means employer contributions which were required by section 412 for the plan year immediately preceding such plan year, and which were not deductible under section 404(a) for the prior taxable year of the employer solely because they were not contributed during the prior taxable year (determine with regard to section 404(a)(6)).

(2) *Rule for an employer using alternative minimum funding standard account and computing its deduction under section 404(a)(1)(A)(i).* This paragraph (e)(2) applies if the minimum funding requirements for the plan are determined under the alternative minimum funding standard described in section 412(g) for both the current plan year and the immediately preceding plan year. In that case, the deductible limit under section 404(a)(1)(A)(i) (regarding the minimum funding requirement of section 412) for the current year is the sum of the amount determined under the rules of paragraph (e)(1) of this section.

(i) Plus the charge under section 412(b)(2)(D), and

(ii) Less the credit under section 412(b)(3)(D),

that would be required if in the current plan year the use of the alternative method were discontinued.

(f) *Special computation rules under section 404(a)(1)(A) (ii) and (iii)*—(1) *In gen-*

eral. Subject to the full funding limitation described in paragraph (k) of this section, the deductible limit under section 404(a)(1)(A)(ii) and (iii) is the normal cost of the plan (determined in accordance with paragraph (d) of this section).

(2) *Adjustments in calculating limit under section 404(a)(1)(A)(iii).* In calculating the deductible limit under section 404(a)(1)(A)(iii), the normal cost of the plan is—

(i) Decreased by the limit adjustments to any unamortized bases required by paragraph (g) of this section, for example, bases that are due to a net experience gain, a change in actuarial assumptions, a change in funding method, or a plan provision or amendment which decreases the accrued liability of the plan, and

(ii) Increased by the limit adjustments of any unamortized 10-year amortization bases required by paragraph (g) or (j) of this section, for example, bases that are due to a net experience loss, a change in actuarial assumptions, a change in funding method, or a plan provision or amendment which increases the accrued liability.

(3) *Timing for computations and interest adjustments under section 404(a)(1)(A) (ii) and (iii).* Regardless of the actual time when contributions are made to a plan, in computing the deductible limit under section 404(a)(1)(A) (ii) and (iii) the normal cost and limit adjustments shall be computed as of the date when contributions are assumed to be made (“the computation date”) and adjusted for interest at the valuation rate from the computation date to the earlier of—

(i) The last day of the plan year used to compute the deductible limit for the taxable year, or

(ii) The last day of that taxable year. For additional provisions relating to the timing of computations and interest adjustments, see paragraph (h)(6) of this section (relating to the timing of computations and interest adjustments in the maintenance of 10-year amortization bases). For taxable years beginning before April 22, 1981, computations under the preceding sentence may, as an alternative, be based on prior published positions of the Internal Revenue Service under section 404(a).

(4) *Special limit under section 404(a)(1)(A)(ii).* If the deduction for the plan year is determined solely on the basis of section 404(a)(1)(A)(ii) (that is, without regard to clauses (i) or (iii)), the special limitation contained in section 404(a)(1)(A)(ii), regarding the unfunded cost with respect to any three individuals, applies, notwithstanding the rules contained in paragraphs (d)(2) and (f)(1) of this section.

(g) *Establishment of a 10-year amortization base—(1) Experience gains and losses.* In the case of a plan valued by the use of a funding method which is an immediate gain type of funding method (and therefore separately amortizes rather than includes experience gains and losses as a part of the normal cost of the plan), a 10-year amortization base must be established in any plan year equal to the net experience gain or loss required under section 412 to be determined with respect to that plan year. The base is to be maintained in accordance with paragraph (h) of this section. Such a base must not be established if the deductible limit is determined by use of a funding method which is a spread gain type of funding method (under which experience gains and losses are spread over future periods as a part of the plan's normal cost). Examples of the immediate gain type of funding method are the unit credit method, entry age normal cost method, and the individual level premium cost method. Examples of the spread gain type of funding method are the aggregate cost method, frozen initial liability cost method, and the attained age normal cost method.

(2) *Change in actuarial assumptions.* (i) If the creation of an amortization base is required under the rules of section 412(b) (2)(B)(v) or (3)(B)(iii) (as applied to the funding method used by the plan), a 10-year amortization base must be established at the time of a change in actuarial assumptions used to value plan liabilities. The amount of the base is the difference between the accrued liability calculated on the basis of the new assumptions and the accrued liability calculated on the basis of the old assumptions. Both computations of accrued liability are made as of the date of the change in assumptions.

(ii) A plan using a funding method of the spread gain type does not directly determine an accrued liability. If a plan using such a method is required under section 412(b) (2)(B)(v) or (3)(B)(iii) to create an amortization base, it must establish a base as described in paragraph (g)(2)(i) of this section for a change in actuarial assumptions by determining an accrued liability on the basis of another funding method (of the immediate gain type) that does determine an accrued liability. (The aggregate method is an example of a funding method that is not required under section 412(b) (2)(B)(v) or (3)(B)(iii) to create an amortization base.) The funding method chosen to determine the accrued liability of the plan in these cases must be the same method used to establish all other 10-year amortization bases maintained by the plan, if any. These bases must be maintained in accordance with paragraph (h) of this section.

(3) *Past service or supplemental credits.* A 10-year base must be established when a plan is established or amended, if the creation of an amortizable base is required under the rules of section 412(b)(2)(B) (ii) or (iii), or (b)(3)(B)(i) (as applied to the funding method used by the plan). The amount of the base is the accrued liability arising from, or the decrease in accrued liability resulting from, the establishment or amendment of the plan. The base must be maintained in accordance with paragraph (h) of this section.

(4) *Change in funding method.* If a change in funding method results in an increase or decrease in an unfunded liability required to be amortized under section 412, a 10-year base must be established equal to the increase or decrease in unfunded liability resulting from the change in funding method. The base must be maintained in accordance with paragraph (h) of this section.

(h) *Maintenance of 10-year amortization base—(1) In general.* Each time a 10-year amortization base is established, whether by a change in funding method, by plan amendment, by change in actuarial assumptions, or by experience gains and losses, the base must, except as provided in paragraph (i) of this section, be separately maintained

in order to determine when the unamortized amount of the base is zero. The sum of the unamortized balances of all of the 10-year bases must equal the plan's unfunded liability with the adjustments described in paragraph (d) of this section, if applicable. When the unamortized amount of a base is zero, the deductible limit is no longer adjusted to reflect the amortization of the base.

(2) *First year's base.* See either paragraph (g) or paragraph (i) of this section for rules applicable with respect to the first year of a base.

(3) *Succeeding year's base.* For any plan year after the first year of a base, the unamortized amount of the base is equal to—

(i) The unamortized amount of the base as of the valuation date in the prior plan year, plus

(ii) Interest at the valuation rate from the valuation date in the prior plan year to the valuation date in the current plan year on the amount described in subdivision (i), minus

(iii) The contribution described in paragraph (h)(4) of this section with respect to the base for the prior plan year.

The valuation date is the date as of which plan liabilities are valued under section 412(c)(9). If such a valuation is performed less often than annually for purposes of section 412, bases must be adjusted for purposes of section 404 each year as of the date on which a section 412 valuation would be performed were it required on an annual basis. See paragraph (b)(3) of this section for the definition of valuation rate.

(4) *Contribution allocation with respect to each base.* A portion of the total contribution for the prior plan year is allocated to each base. Generally, this portion equals the product of—

(i) The total contribution described in paragraph (h)(6) of this section with respect to all bases, and

(ii) The ratio of the amount described in paragraph (b)(3)(i) of this section with respect to the base to the sum (using true rather than absolute values) of such amounts with respect to all remaining bases.

However, if the result of this computation with respect to a particular base exceeds the amount necessary to amor-

tize such base fully, the smaller amount shall be deemed the contribution made with respect to such base. The unallocated excess with respect to a now fully amortized base shall be allocated among the other bases as indicated above.

(5) *Other allocation methods.* The Commissioner may authorize the use of methods other than the method described in paragraph (h)(4) of this section for allocating contributions to bases.

(6) *Total contribution for all bases.* The contribution with respect to all bases for the prior plan year (see paragraph (h)(3)(iii) of this section) is the difference between—

(i) The sum of (A) the total deduction (including a carryover deduction) for the prior year, (B) interest on the actual contributions for the prior year (whether or not deductible) at the valuation rate for the period between the dates as of which the contributions are credited under section 412 and the valuation date in the current plan year, and (C) interest on the carryover described in section 404(a)(1)(D) that is available at the beginning of the prior taxable year at the valuation rate for the period between the current and prior valuation dates, and

(ii) The normal cost for the prior plan year and interest on it at the valuation rate from the date as of which the normal cost is calculated to the current valuation date.

(7) *Effect of failure to contribute normal cost plus interest on unamortized amounts.* The failure to make a contribution at least equal to the sum of the normal cost plus interest on the unamortized amounts has the following effects under the preceding rules of this section—

(i) It does not create a new base.

(ii) It results in an increase in the unamortized amount of each base and consequently extends the time before the base is fully amortized.

(iii) The limit adjustment for any base is not increased (in absolute terms) even if the unamortized amount computed under paragraph (h) of this section exceeds the initial 10-year amortization base. Thus, if the total unamortized amount of the plan's bases at the beginning of the plan year

is \$100,000 (which is also the unfunded liability of the plan), and a required \$50,000 normal cost contribution is not made for the plan year, the following effects occur. The total unamortized balance of the plan's bases increases by the \$50,000 normal cost for the year (adjusted for interest), plus interest on the \$100,000 balance of the bases; and, because of that increase, it will take a longer period to amortize the remaining balance of the bases. (The annual amortization amount does not change.)

(8) *Required adjustment to a 10-year base limit adjustment if valuation rate changed.* If there is a change in the valuation rate, the limit adjustment for all unamortized 10-year amortization bases must be changed, in addition to establishing a new base as provided in paragraph (g)(2) of this section. The new limit adjustment for any base is the level amount necessary to amortize the unamortized amount of the base over the remaining amortization period using the new valuation rate. The remaining amortization period of the base is the number of years at the end of which the unamortized amount of the base would be zero if the contribution made with respect to that base equaled the limit adjustment each year. This calculation of the remaining period is made on the basis of the valuation rate used before the change. Both the remaining amortization period and the revised limit adjustment may be determined through the use of standard annuity tables. The remaining period may be computed in terms of fractional years, or it may be rounded off to a full year. The unamortized amount of the base as of the valuation date and the remaining amortization period of that base shall not be changed by any change in the valuation rate.

(i) *Combining bases—(1) General method.* For purposes of section 404 only, and not for purposes of section 412, different 10-year amortization bases may be combined into a single 10-year amortization base if such single base satisfies all of the requirements of paragraph (i) (2), (3), and (4) of this section at the time of the combining of the different bases.

(2) *Unamortized amount.* The unamortized amount of the single base equals the sum, as of the date the com-

bination is made, of the unamortized amount of the bases being combined (treating negative bases as having negative unamortized amounts).

(3) *Remaining amortization period.* The remaining amortization period of the single base is equal to (i) the sum of the separate products of (A) the unamortized amount of each of these bases (using absolute values) and (B) its remaining amortization period, divided by (ii) the sum of the unamortized amounts of each of the bases (using absolute values). For purposes of this paragraph (i)(3), the remaining amortization period of each base being combined is that number of years at the end of which the unamortized amount of the base would be zero if the contribution made with respect to that base equaled the limit adjustment of that base in each year. This number may be determined through the use of standard annuity tables. The remaining amortization period described in this paragraph may be computed in terms of fractional years, or it may be rounded off to a whole year.

(4) *Limit adjustment.* The limit adjustment for the single base is the level amount necessary to amortize the unamortized amount of the combined base over the remaining amortization period described in paragraph (i)(3) of this section, using the valuation rate. This amount may be determined through the use of standard annuity tables.

(5) *Fresh start alternative.* In lieu of combining different 10-year amortization bases, a plan may replace all existing bases with one new 10-year amortization base equal to the unfunded liability of the plan as of the time the new base is being established. This unfunded liability must be determined in accordance with the general rules of paragraphs (d) and (f) of this section. The unamortized amount of the base and the limit adjustment for the base will be determined as though the base were newly established.

(j) *Initial 10-year amortization base for existing plan—(1) In general.* In the case of a plan in existence before the effective date of section 404(a), the 10-year amortization base on the effective date

of section 404(a) is the sum of all 10 percent bases existing immediately before section 404(a) became effective for the plan, determined under the rules of old section 404(a).

(2) *Limit adjustment.* The limit adjustment for the initial base is the lesser of the unamortized amount of such base or the sum of the amounts determined under paragraph (b)(3) of this section using the original balances of the remaining bases (under old section 404(a) rules) as the amount to be amortized.

(3) *Unamortized amount.* The employer may choose either to establish a single initial base reflecting both all prior 10-percent bases and the experience gain or loss for the immediately preceding actuarial period, or to establish a separate base for the prior 10-percent bases and another for the experience gain or loss for the immediately preceding period. If the initial 10-year amortization base reflects the net experience gain or loss from the immediately preceding actuarial period, the unamortized amount of the initial base shall equal the total unfunded liability on the effective date of section 404(a) determined in accordance with the general rules of paragraphs (d) and (f) of this section. If, however, a separate base will be used to reflect that gain or loss, the unamortized amount of the initial base shall equal such unfunded liability on the effective date of section 404(a), reduced by the net experience loss or increased by the net experience gain for the immediately preceding actuarial period. In this case, a separate 10-year amortization base must be established on the effective date equal to the net experience gain or loss. Thus, if the effective date unfunded liability is \$100,000 and an experience loss of \$15,000 is recognized on that date, and if the loss is to be treated as a separate base, the unamortized balances of the two bases would be \$85,000 and \$15,000. If the unfunded liability were the same \$100,000, but a gain of \$15,000 instead of a loss were recognized on that date, the unamortized balances of the two bases would be \$115,000 and a credit base of \$15,000. In both cases, if only one 10-year base is to be established on the effective date, its unamortized balance would be \$100,000 (the unfunded liability of the plan). See paragraphs (d) and

(f) for rules for determining the unfunded liability of the plan.

(k) *Effect of full funding limit on 10-year-amortization bases.* The amount deductible under section 404(a)(1)(A) (i), (ii), or (iii) for a plan year may not exceed the full funding limitation for that year. See section 412 and paragraphs (d), (e), and (f) of this section for rules to be used in the computation of the full funding limitation. If the total deductible contribution (including carryover) for a plan year equals or exceeds the full funding limitation for the year, all 10-year amortization bases maintained by the plan will be considered fully amortized, and the deductible limit for subsequent plan years will not be adjusted to reflect the amortization of these bases.

(l) *Transitional rules—(1) Plan years beginning before April 22, 1981.* In determining the deductible limit for plan years beginning before April 22, 1981, a contribution will be deductible under section 404(a)(1)(A) if the computation of the deductible limit is based on an interpretation of section 404(a)(1)(A) that is reasonable when considered with prior published positions of the Internal Revenue Service. A computation of the deductible limit may satisfy the preceding sentence even if it does not satisfy the rules contained in paragraphs (c) through (i) of this section.

(2) *Transitional approaches.* The deductible limit determined for the first plan year with respect to which a plan applies the rules contained in paragraphs (c) through (i) of this section must be computed using one of the following approaches—

(i) The plan (whether or not in existence before the effective date of section 404(a)) may apply the rules of paragraph (j) for establishing the initial base for an existing plan, treating 10-year bases (if any) as 10 percent bases in adding bases.

(ii) The plan may apply the fresh start alternative for combining bases under paragraph (i)(5).

(iii) The plan may retroactively establish 10-year amortization bases for years with respect to which section 404(a)(1)(A) and the rules of this section would have applied but for the transition rule contained in paragraph (l)(1) of this section. Contributions actually

§ 1.404(b)-1

26 CFR Ch. I (4-1-08 Edition)

deducted are used in retroactively establishing and maintaining these bases under paragraph (h). However, a deduction already taken shall not be recomputed because of the retroactive establishment of a base.

(m) *Effective date of section 404(a).* In the case of a plan which was in existence on January 1, 1974, section 404(a) generally applies for contributions on account of taxable years of an employer ending with or within plan years beginning after December 31, 1974. In the case of a plan not in existence on January 1, 1974, section 404(a) generally applies for contributions on account of taxable years of an employer ending with or within plan years beginning after September 4, 1974. See § 1.410(a)-2(c) for rules concerning the time of plan existence. See also § 1.410(a)-2(d), which provides that a plan in existence on January 1, 1974, may elect to have certain provisions, including the amendments to section 404(a) contained in section 1013 of the Employee Retirement Income Security Act of 1974, apply to a plan year beginning after September 2, 1974, and before the otherwise applicable effective date contained in that section.

[T.D. 7760, 46 FR 6914, Jan. 22, 1981; 46 FR 15685, Mar. 9, 1981]

§ 1.404(b)-1 Method of contribution, etc., having the effect of a plan; effect of section 404(b).

Section 404(a) is not confined to formal stock bonus, pension, profit-sharing, and annuity plans, or deferred compensation plans, but it includes any method of contributions or compensation having the effect of a stock bonus, pension, profit-sharing, or annuity plan, or similar plan deferring the receipt of compensation. Thus, where a corporation pays pensions to a retired employee or employees or to their beneficiaries in such amounts as may be determined from time to time by the board of directors or responsible officers of the company, or where a corporation is under an obligation, whether funded or unfunded, to pay a pension or other deferred compensation to an employee or his beneficiaries, there is a method having the effect of a plan deferring the receipt of compensation for which deductions are governed by

section 404(a). If an employer on the accrual basis defers paying any compensation to an employee until a later year or years under an arrangement having the effect of a stock bonus, pension, profit-sharing, or annuity plan, or similar plan deferring the receipt of compensation, he shall not be allowed a deduction until the year in which the compensation is paid. This provision is not intended to cover the case where an employer on the accrual basis defers payment of compensation after the year of accrual merely because of inability to pay such compensation in the year of accrual, as, for example, where the funds of the company are not sufficient to enable payment of the compensation without jeopardizing the solvency of the company, or where the liability accrues in the earlier year, but the amount payable cannot be exactly determined until the later year.

[T.D. 6500, 25 FR 11690, Nov. 26, 1960]

§ 1.404(b)-1T Method or arrangement of contributions, etc., deferring the receipt of compensation or providing for deferred benefits. (Temporary)

Q-1: As amended by the Tax Reform Act of 1984, what does section 404(b) of the Internal Revenue Code provide?

A-1: As amended, section 404(b) clarifies that any plan, or method or arrangement, deferring the receipt of compensation or providing for deferred benefits (other than compensation) is to be treated as a plan deferring the receipt of compensation for purposes of section 404 (a) and (d). Accordingly, section 404 (a) and (d) (in the case of employees and nonemployees; respectively) shall govern the deduction of contributions paid or compensation paid or incurred with respect to such a plan, or method or arrangement. Section 404 (a) and (d) requires that such a contribution or compensation be paid or incurred for purposes of section 162 or 212 and satisfy the requirements for deductibility under either of those sections. Thus, for example, under section 404 (a)(5) and (b), if otherwise deductible under section 162 or 212, a contribution paid or incurred with respect to a nonqualified plan, or method or arrangement, providing for deferred benefits is deductible in the taxable year

of the employer in which or with which ends the taxable year of the employee in which the amount attributable to the contribution is includible in the gross income of the employee (without regard to any applicable exclusion under Chapter 1, Subtitle A, of the Internal Revenue Code). Section 404 (a) and (d) applies to all compensation and benefit plans, or methods or arrangements, however denominated, which defer the receipt of any amount of compensation or benefit, including fees or other payments. Thus, a limited partnership (using the accrual method of accounting) may not accrue deductions for a fee owed to an unrelated person (using the cash method of accounting) who performs services for the partnership until the partnership taxable year in which or with which ends the taxable year of the service provider in which the fee is included in income. However, notwithstanding the above, section 404 does not apply to contributions paid or accrued with respect to a “welfare benefit fund” (as defined in section 419(e)) after July 18, 1984, in taxable years of employers (and payors) ending after that date. Also, section 463 shall govern the deduction of vacation pay by a taxpayer that has elected the application of such section. For rules relating to the deduction of contributions paid or accrued with respect to a welfare benefit fund, see section 419, § 1.419–1T and § 1.419A–2T. For rules relating to the deduction of vacation pay for which an election is made under section 463, see § 301.9100–16T of this chapter and § 1.463–1T.

Q–2: When does a plan, or method or arrangement, defer the receipt of compensation or benefits for purposes of section 404 (a), (b), and (d)?

A–2: (a) For purposes of section 404 (a), (b), and (d), a plan, or method or arrangement, defers the receipt of compensation or benefits to the extent it is one under which an employee receives compensation or benefits more than a brief period of time after the end of the employer’s taxable year in which the services creating the right to such compensation or benefits are performed. The determination of whether a plan, or method or arrangement, defers the receipts of compensation or benefits is made separately with re-

spect to each employee and each amount of compensation or benefit. Compensation or benefits received by an employee’s spouse or dependent or any other person, but taxable to the employee, are treated as received by the employee for purposes of section 404. An employee is determined to receive compensation or benefits within or beyond a brief period of time after the end of the employer’s taxable year under the rules provided in this Q&A. For the treatment of expenses with respect to transactions between related taxpayers, see section 267.

(b)(1) A plan, or method or arrangement, shall be presumed to be one deferring the receipt of compensation for more than a brief period of time after the end of an employer’s taxable year to the extent that compensation is received after the 15th day of the 3rd calendar month after the end of the employer’s taxable year in which the related services are rendered (“the 2½ month period”). Thus, for example, salary under an employment contract or a bonus under a year-end bonus declaration is presumed to be paid under a plan, or method or arrangement, deferring the receipt of compensation, to the extent that the salary or bonus is received beyond the applicable 2½ month period. Further, salary or a year-end bonus received beyond the applicable 2½ month period by one employee shall be presumed to constitute payment under a plan, or method or arrangement, deferring the receipt of compensation for such employee even though salary or bonus payments to all other employees are not similarly treated because they are received within the 2½ month period. Benefits are “deferred benefits” if, assuming the benefits were cash compensation, such benefits would be considered deferred compensation. Thus, a plan, or method or arrangement, shall be presumed to be one providing for deferred benefits to the extent benefits for services are received by an employee after the 2½ month period following the end of the employer’s taxable year in which the related services are rendered.

(2) The taxpayer may rebut the presumption established under the previous subparagraph with respect to an amount of compensation or benefits

§ 1.404(b)-1T

26 CFR Ch. I (4-1-08 Edition)

only by setting forth facts and circumstances the preponderance of which demonstrates that it was impracticable, either administratively or economically, to avoid the deferral of the receipt by an employee of the amount of compensation or benefits beyond the applicable 2½ month period and that, as of the end of the employer's taxable year such impracticability was unforeseeable. For example, the presumption may be rebutted with respect to an amount of compensation to the extent that receipt of such amount is deferred beyond the applicable 2½ month period (i) either because the funds of the employer were not sufficient to make the payment within the 2½ month period without jeopardizing the solvency of the employer or because it was not reasonably possible to determine within the 2½ month period whether payment of such amount was to be made, and (ii) the circumstance causing the deferral described in (i) was unforeseeable as of the close of the employer's taxable year. Thus, the presumption with respect to the receipt of an amount of compensation or benefit is not rebutted to the extent it was foreseeable, as of the end of the employer's taxable year, that the amount would be received after the applicable 2½ month period. For example, if, as of the end of the employer's taxable year, it is foreseeable that calculation of a year-end bonus to be paid to an employee under a given formula will not be completed and thus the bonus will not be received (and is in fact not received) by the end of the applicable 2½ month period, the presumption that the bonus is deferred compensation is not rebutted.

(c) A plan, or method or arrangement, shall not be considered as deferring the receipt of compensation or benefits for more than a brief period of time after the end of the employer's taxable year to the extent that compensation or benefits are received by the employee on or before the end of the applicable 2½ month period. Thus, for example, salary under an employment contract or a bonus under a year-end bonus declaration is not considered paid under a plan, or method or arrangement, deferring the receipt of compensation to the extent that such salary or bonus is received by the em-

ployee on or before the end of the applicable 2½ month period.

(d) Solely for purposes of applying the rules of paragraphs (b) and (c) of this Q&A, in the case of an employer's taxable year ending on or after July 18, 1984, and on or before March 21, 1986, compensation or benefits that relate to services rendered in such taxable year shall be deemed to have been received within the applicable 2½ month period if such receipt actually occurs after such 2½ month period but on or before March 21, 1986.

Q-3: When does section 404(b), as amended by the Tax Reform Act of 1984, become effective?

A-3: With the exceptions discussed below, section 404(b), as amended, and the rules under Q&A-2 are effective with respect to amounts paid or incurred after July 18, 1984, in taxable years of employers (and payors) ending after that date. In the case of an extended vacation pay plan maintained pursuant to a collective bargaining agreement (a) between employee representatives and one or more employers, and (b) in effect on June 22, 1984, section 404(b) is not effective before the date on which such collective bargaining agreement terminates (determined without regard to any extension thereof agreed to after June 22, 1984). For purposes of the preceding sentence, any plan amendment made pursuant to a collective bargaining agreement relating to the plan which amends the plan solely to conform to any requirement added under section 512 of the Tax Reform Act of 1984 shall not be treated as a termination of such collective bargaining agreement. For purposes of this section, an "extended vacation pay plan" is one under which covered employees gradually over a specified period of years earn the right to additional vacation benefits, no part of which, under the terms of the plan, can be taken until the end of the specified period.

[T.D. 8073, 51 FR 4321, Feb. 4, 1986; 51 FR 7262, Mar. 3, 1986; 51 FR 11303, Apr. 2, 1986, as amended by T.D. 8435, 57 FR 43896, Sept. 23, 1992]

Internal Revenue Service, Treasury

§ 1.404(d)-1T

§ 1.404(c)-1 Certain negotiated plans; effect of section 404(c).

(a) Section 404(a) does not apply to deductions for contributions paid by an employer under a negotiated plan which meets the following conditions:

(1) The contributions under the plan are held in trust for the purpose of paying, either from principal or income or both, for the benefit of employees and their families, at least medical or hospital care, and pensions on retirement or death of employees; and

(2) Such plan was established before January 1, 1954, as a result of an agreement between employee representatives and the Government of the United States during a period of Government operation, under seizure powers, of a major part of the productive facilities of the industry in which such employer is engaged.

If these conditions are met, such contributions shall be deductible under section 162, to the extent that they constitute ordinary and necessary business expenses.

(b) The term “as a result of an agreement” is intended primarily to cover a trust established under the terms of an agreement referred to in paragraph (a)(2) of this section. It will also include a trust established under a plan of an employer, or group of employers, who are in competition with the employers whose facilities were seized by reason of producing the same commodity, and who would therefore be expected to establish such a trust as a reasonable measure to maintain a sound position in the labor market producing the commodity. Thus, for example, if a trust was established under such an agreement in the bituminous coal industry, a similar trust established about the same time in the anthracite coal industry would be covered by this provision.

(c) If any such trust becomes qualified for exemption under section 501(a), the deductibility of contributions by an employer to such trust on or after the date of such qualification would no longer be governed by section 404(c), even though the trust may later lose its exemption under section 501(a).

[T.D. 6500, 25 FR 11690, Nov. 26, 1960]

§ 1.404(d)-1T Questions and answers relating to deductibility of deferred compensation and deferred benefits for independent contractors. (Temporary)

Q-1: How does the amendment of section 404(b) by the Tax Reform Act of 1984 affect the deduction of contributions or compensation under section 404(d)?

A-1: As amended by the Tax Reform Act of 1984, section 404(b) clarifies that section 404(d) shall govern the deduction of contributions paid and compensation paid or incurred by a payor under a plan, or method or arrangement, deferring the receipt of compensation or providing for deferred benefits for service providers with respect to which there is no employer-employee relationship. In such a case, section 404 (a) and (b) and the regulations thereunder apply as if the person providing the services were the employee and the person to whom the services are provided were the employer. Section 404(a) requires that such a contribution or compensation be paid or incurred for purposes of section 162 or 212 and satisfy the requirements for deductibility under either of those sections. However, notwithstanding the above, section 404 does not apply to contributions paid or accrued with respect to a “welfare benefit fund” (as defined in section 419(e)) after June 18, 1984, in taxable years of employers (and payors) ending after that date. Also, section 463 shall govern the deduction of vacation pay by a taxpayer that has elected under such section. For rules relating to the deduction of contributions paid or accrued with respect to a welfare benefit fund, see section 419, § 1.419-1T and § 1.419A-2T. For rules relating to the deduction of vacation pay for which an election is made under section 463, see § 301.9100-16T of this chapter and § 1.463-1T.

[T.D. 8073, 51 FR 4322, Feb. 4, 1986, as amended by T.D. 8435, 57 FR 43896, Sept. 23, 1992]

§ 1.404(e)-1 Contributions on behalf of a self-employed individual to or under a pension, annuity, or profit-sharing plan meeting the requirements of section 401; application of section 404(a) (8), (9), and (10) and section 404 (e) and (f).

(a) *In general.* (1) The Self-Employed Individuals Tax Retirement Act of 1962 (76 Stat. 809) permits certain self-employed individuals to be treated as employees for purposes of pension, annuity, and profit-sharing plans included in paragraph (1), (2), or (3) of section 404(a). Therefore, for taxable years of an employer beginning after December 31, 1962, employer contributions to qualified plans on behalf of self-employed individuals are deductible under section 404 subject to the limitations of paragraphs (b) and (c) of this section.

(2) In the case of contributions to qualified plans on behalf of self-employed individuals, the amount deductible differs from the amount allowed as a deduction. In general, the amount deductible is 10 percent of the earned income derived by the self-employed individual from the trade or business with respect to which the plan is established, or \$2,500, whichever is the lesser. This is the amount referred to in section 401 when reference is made to the amounts which may be deducted under section 404 or the amount of contributions deductible under section 404. Thus, this is the amount taken into consideration in determining whether contributions under the plan are discriminatory. The amount allowed as a deduction with respect to contributions on behalf of a self-employed individual is one-half of the amount deductible. The amount allowed as a deduction is relevant only for purposes of determining the amount an employer may deduct from gross income.

(b) *Determination of the amount deductible.* (1) If a plan covers employees, some of whom are self-employed individuals, the determination of the amount deductible is made on the basis of independent consideration of the common-law employees and of the self-employed individuals. See subparagraphs (2) and (3) of this paragraph. For purposes of determining the amount deductible with respect to contributions on behalf of a self-employed indi-

vidual, such contributions shall be considered to satisfy the conditions of section 162 (relating to trade or business expenses) or 212 (relating to expenses for the production of income), but only to the extent that such contributions do not exceed the earned income of such individual derived from the trade or business with respect to which the plan is established. However, the portion of such contribution, if any, attributable to the purchase of life, accident, health, or other insurance protection shall be considered payment of a personal expense which does not satisfy the requirements of section 162 or 212. See paragraph (f) of this section. For the additional rules applicable where contributions are made by more than one employer on behalf of a self-employed individual, see paragraph (d) of this section.

(2) If contributions are made to a plan included in section 404(a) (1), (2), or (3) on behalf of employees, some of whom are self-employed individuals, the amount deductible with respect to contributions on behalf of the common-law employees covered under the plan shall be determined as if such employees were the only employees for whom contributions and benefits are provided under the plan. Accordingly, for purposes of such determination, the percentage of compensation limitations of section 404(a) (1), (3), and (7) are applicable only with respect to the compensation otherwise paid or accrued during the taxable year by the employer to the common-law employees. Similarly, the costs referred to in section 404(a)(1) (B) and (C) shall be the costs of funding the benefits of the common-law employees. Also, the provisions of section 404(a)(1)(D), (3), and (7), relating to certain carryover deductions, shall be applicable only to amounts contributed, or to the amounts deductible, on behalf of such employees.

(3) If contributions are made to a plan included in section 404(a) (1), (2), or (3) on behalf of individuals some or all of whom are self-employed individuals, the amount deductible in any taxable year with respect to contributions on behalf of such individuals shall be determined as follows:

(i) The provisions of section 404(a) (1), (2), (3), and (7) shall be applied as if such individuals were the only participants for whom contributions and benefits are provided under the plan. Thus, the costs referred to in such provisions shall be the costs of funding the benefits of the self-employed individuals. If such costs are less than an amount equal to the amount determined under subdivision (iii) of this subparagraph, the maximum amount deductible with respect to such individuals shall be the costs of their benefits.

(ii) The provisions of section 404(a)(1)(D), the second and third sentences of section 404(a)(3)(A), and the second sentence of section 404(a)(7), relating to certain carryover deductions, are not applicable to contributions on behalf of self-employed individuals. Contributions on behalf of self-employed individuals are deductible, if at all, only in the taxable year in which the contribution is paid or deemed paid under section 404(a)(6).

(iii) The amount deductible for the taxable year of the employer with respect to contributions on behalf of a self-employed individual shall not exceed the lesser of \$2,500 or 10 percent of the earned income derived by such individual for such taxable year from the trade or business with respect to which the plan is established.

(iv) If a self-employed individual receives in any taxable year earned income with respect to which deductions are allowable to two or more employers, the aggregate amounts deductible shall not exceed the lesser of \$2,500 or 10 percent of such earned income. See paragraph (d) of this section.

(c) *Special limitation on the amount allowed as a deduction for self-employed individuals.* The amount allowed as a deduction under section 404(a) (1), (2), (3), and (7) in any taxable year with respect to contributions made on behalf of a self-employed individual shall be an amount equal to one-half of the amount deductible with respect to such contributions under paragraph (b)(3) of this section. However, for purposes of section 401, the amount which may be deducted, or the amount deductible, under section 404 with respect to contributions made on behalf of self-employed individuals shall be determined

without regard to the special limitation of this paragraph.

(d) *Rules applicable where contributions are made by more than one employer on behalf of a self-employed individual.* (1) Under paragraph (b)(3)(iv) of this section, if a self-employed individual receives in any taxable year earned income with respect to which deductions are allowable to two or more employers, the aggregate amounts deductible shall not exceed the lesser of \$2,500 or 10 percent of such earned income. This limitation does not apply to contributions made under a plan on behalf of an employee who is not self-employed in the trade or business with respect to which the plan is established, even though such employee may be covered as a self-employed individual under a plan or plans established by other trades or businesses.

(2) In any case in which the application of subparagraph (1) of this paragraph reduces the amount otherwise deductible, the amount deductible by each employer shall be that amount which bears the same ratio to the aggregate amount deductible with respect to all trades or businesses (as determined in subparagraph (1) of this paragraph) as the earned income derived from that employer bears to the aggregate of the earned income derived from all of the trades or businesses with respect to which plans are established. The amount allowed as a deduction to each employer is one-half of the amount determined (in accordance with the preceding sentence) to be deductible by such employer.

(e) *Partner's distributive share of contributions and deductions.* For purposes of sections 702(a)(8) and 704, a partner's distributive share of contributions on behalf of self-employed individuals under a qualified pension, annuity, or profit-sharing plan is the contribution made on his behalf, and his distributive share of deductions allowed the partnership under section 404 for contributions on behalf of self-employed individuals is that portion of the deduction which is attributable to contributions made on his behalf under the plan. The contribution on behalf of a partner and the deduction with respect thereto must be accounted for separately by such partner, for his taxable year with

§ 1.404(e)-1A

26 CFR Ch. I (4-1-08 Edition)

or within which the partnership's taxable year ends, as an item described in section 702(a)(8).

(f) *Contributions allocable to insurance protection.* For purposes of determining the amount deductible with respect to contributions on behalf of a self-employed individual, amounts allocable to the purchase of life, accident, health, or other insurance protection shall not be taken into account. Such amounts are neither deductible nor considered as contributions for purposes of determining the maximum amount of contributions that may be made on behalf of an owner-employee. The amount of a contribution allocable to insurance shall be an amount equal to a reasonable net premium cost, as determined by the Commissioner, for such amount of insurance for the appropriate period. See paragraph (b)(5) of § 1.72-16.

(g) *Rules applicable to loans.* For purposes of section 404, any amount paid, directly or indirectly, by an owner-employee in repayment of any loan which under section 72(m)(4)(B) was treated as an amount received from a qualified trust or plan shall be treated as a contribution to such trust or under such plan on behalf of such owner-employee.

(h) *Definitions.* For purposes of section 404 and the regulations thereunder—

(1) The term “employee” includes an employee as defined in section 401(c)(1) and paragraph (b) of § 1.401-10, and the term “employer” means the person treated as the employer of such individual under section 401(c)(4);

(2) The term “owner-employee” means an owner-employee as defined in section 401(c)(3) and paragraph (d) of § 1.401-10;

(3) The term “earned income” means earned income as defined in section 401(c)(2) and paragraph (c) of § 1.401-10; and

(4) The term “compensation” when used with respect to an individual who is an employee described in subparagraph (1) of this paragraph shall be considered to be a reference to the earned income of such individual derived from the trade or business with respect to which the plan is established.

(i) *Years to which this section applies.* This section applies to taxable years of

employers beginning before January 1, 1974. For taxable years beginning after December 31, 1973, see § 1.404(e)-1A.

[T.D. 6673, 28 FR 10145, Sept. 17, 1963; as amended by T.D. 7636, 44 FR 47056, Aug. 10, 1979]

§ 1.404(e)-1A Contributions on behalf of a self-employed individual to or under a qualified pension, annuity, or profit-sharing plan.

(a) *In general.* This section provides rules relating to employer contributions to qualified plans on behalf of self-employed individuals described in subsections (a) (8) and (9), (e), and (f) of section 404. Unless otherwise specifically provided, this section applies to taxable years of an employer beginning after December 31, 1973. See section 1.404(e)-1 for rules relating to plans for self-employed individuals for taxable years beginning before January 1, 1974. Paragraph (b) of this section provides general rules of deductibility, paragraph (c) provides rules relating to defined contribution plans, paragraph (d) provides rules relating to defined benefit plans, paragraph (e) provides rules relating to combinations of plans, paragraph (f) provides rules for partnerships, paragraph (g) provides rules for insurance, paragraph (h) provides rules for loans, and paragraph (i) provides definitions.

(b) *Determination of the amount deductible.* (1) If a defined contribution plan covers employees, some of whom are self-employed individuals, the determination of the amount deductible is made on the basis of independent consideration of the common-law employees and of the self-employed individuals. See subparagraphs (2) and (3) of this paragraph. For purposes of determining the amount deductible with respect to contributions on behalf of a self-employed individual, such contributions shall be considered to satisfy the conditions of section 162 (relating to trade or business expenses) or 212 (relating to expenses for the production of income), but only to the extent that such contributions do not exceed the earned income of such individual derived from the trade or business with respect to which the plan is established. However, the portion of such contribution, if any, attributable

to the purchase of life, accident, health, or other insurance protection shall be considered payment of a personal expense which does not satisfy the requirements of section 162 or 212. See paragraph (g) of this section.

(2)(i) If contributions are made on behalf of employees, some of whom are self-employed individuals, to a defined contribution plan described in section 414(i) and included in section 404(a) (1), (2), or (3), the amount deductible with respect to contributions on behalf of the common-law employees covered under the plan shall be determined as if such employees were the only employees for whom contributions and benefits are provided under the plan. Accordingly, for purposes of such determination, the percentage of compensation limitations of section 404(a) (3) and (7) are applicable only with respect to the compensation otherwise paid or accrued during the taxable year by the employer with respect to the common-law employees. Similarly, the costs referred to in section 404(a)(1) (A) and (B) shall be the costs of funding the benefits of the common-law employees. Also, the provisions of section 404(a)(1)(D), (3), and (7), relating to certain carryover deductions, shall be applicable only to amounts contributed or to the amounts deductible on behalf of such employees.

(ii) The amount deductible, by reason of contributions on behalf of employees to a defined benefit plan, shall be determined without regard to the self-employed or common law status of each employee.

(3)(i) If contributions are made on behalf of individuals, some or all of whom are self-employed individuals, to a defined contribution plan described in section 414(i) and included in section 404(a) (1), (2), or (3), the amount deductible in any taxable year with respect to contributions on behalf of such individuals shall be determined as follows:

(A) The provisions of section 404(a) (1), (2), (3), and (7) shall be applied as if such individuals were the only participants for whom contributions and benefits are provided under the plan. Thus, the costs referred to in such provisions shall be the costs of funding the benefits of the self-employed individuals. If such costs are less than an amount

equal to the amount determined under paragraph (c) of this section, the maximum amount deductible with respect to such individuals shall be the cost of their benefits.

(B) The provisions of section 404(a) (1), (D), the third sentence of section 404(a) (3), (A), and the second sentence of section 404(a)(7), relating to certain carryover deductions are applicable to contributions on behalf of self-employed individuals made in taxable years of an employer beginning after December 31, 1975.

(C) For any employer taxable year in applying the 15 percent limit on deductible contributions set forth section 404(a)(3) and the 25 percent limit in section 404(a)(7) for any taxable year of the employer, the amount deductible under section 404(e)(4) and paragraph (c)(4) of this section (relating to the minimum deduction of \$750 or 100 percent of earned income) shall be substituted for such limits with respect to the self-employed individuals on whose behalf contributions are deductible under section 404(e)(4) for the taxable year of the employer. In addition, although the limitations of section 415 are applicable to the plan for plan years beginning after December 31, 1975, the defined contribution compensation limitation described in section 415(c)(1)(B) shall not be less than the amount deductible under section 404(e)(4) and paragraph (c)(4) of this section with respect to any self-employed individual for the taxable year of the employer ending with or within the limitation year. The special rule in the second sentence of paragraph (3)(A) of section 404(a) is not applicable in determining the amounts deductible on behalf of self-employed individuals.

(ii) The limitations of this subparagraph are not applicable to a defined benefit plan for self-employed individuals.

(c) *Defined contribution plans.* (1) Under section 404(e)(1) in the case of a defined contribution plan, as defined in section 414(i), the amount deductible for the taxable year of the employer with respect to contributions on behalf of a self-employed individual shall not exceed the lesser of \$7,500 or 15 percent of the earned income derived by such individual for such taxable year from

the trade or business with respect to which the plan is established.

(2) Under section 404(e)(2)(A) if a self-employed individual receives in any taxable year earned income with respect to which deductions are allowable to two or more employers under two or more defined contribution plans the aggregate amounts deductible shall not exceed the lesser of \$7,500 or 15 percent of such earned income. This limitation does not apply to contributions made under a plan on behalf of an employee who is not self-employed in the trade or business with respect to which the plan is established.

(3) Under section 404(e)(2)(B) in any case in which the applicable limitation of subparagraph (2) of this paragraph reduces the amount otherwise deductible with respect to contributions on behalf of any employee within the meaning of section 401(c)(1), the amount deductible by each employer for such employee shall be that amount which bears the same ratio to the aggregate amount deductible for such employee with respect to all trades or businesses (as determined in subparagraph (1) of this paragraph) as his earned income derived from the employer bears to the aggregate of his earned income derived from all of the trades or businesses with respect to which plans are established.

Under section 404(e)(4), notwithstanding the provisions of subparagraphs (1) and (2) of this paragraph, the limitations on the amount deductible for the taxable year of the employer with respect to contributions on behalf of a self-employed individual shall not be less than the lesser of \$750 or 100 percent of the earned income derived by such individual for such taxable year from the trade or business with respect to which the plan is established. If such individual receives in any taxable year earned income with respect to which deductions are allowable to two or more employers, 100 percent of such earned income shall be taken into account for purposes of the limitations determined under this subparagraph. This subparagraph does not apply to any taxable year beginning after December 31, 1975, to any employee whose adjusted gross income for that taxable year is greater than \$15,000. In applying

the preceding sentence, the adjusted gross income of an employee for a taxable year is determined separately for each individual, without regard to any community property laws, and without regard to the deduction allowable under section 404(a).

(d) *Defined benefit plans.* In the case of a defined benefit plan, as defined in section 401(j), the special limitations provided by section 404(e) and paragraph (c) of this section do not apply. See section 401(j) for requirements applicable to defined benefit plans.

(e) *Combination of plans.* For special rules applied if a self-employed individual in any taxable year is a participant in both a defined benefit plan and a defined contribution plan, see section 401(j) and the regulations thereunder.

(f) *Partner's distributive share of contributions and deductions.* (1) For purposes of sections 702(a)(8) and 704 in the case of a defined contribution plan, a partner's distributive share of contributions on behalf of self-employed individuals under such a plan is the contribution made on his behalf, and his distributive share of deductions allowed the partnership under section 404 for contributions on behalf of a self-employed individual is that portion of the deduction which is attributable to contributions made on his behalf under the plan. The contribution on behalf of a partner and the deduction with respect thereto must be accounted for separately by such partner, for his taxable year with or within which the partnership's taxable year ends, as an item described in section 702(a)(8).

(2) In the case of a defined benefit plan, a partner's distributive share of contributions on behalf of self-employed individuals and his distributive share of deductions allowed the partnership under section 404 for such contributions is determined in the same manner as his distributive share of partnership taxable income. See section 704, relating to the determination of the distributive share and the regulations thereunder.

(g) *Contributions allocable to insurance protection.* Under Section 404(e)(3), for purposes of determining the amount

deductible with respect to contributions on behalf of a self-employed individual, amounts allocable to the purchase of life, accident, health, or other insurance protection shall not be taken into account. Such amounts are neither deductible nor considered as contributions for purposes of determining the maximum amount of contributions that may be made on behalf of an owner-employee. The amount of a contribution allocable to insurance shall be an amount equal to a reasonable net premium cost, as determined by the Commissioner, for such amount of insurance for the appropriate period. See paragraph (b)(5) of § 1.72-16.

(h) *Rules applicable to loans.* Under section 404(f), for purposes of section 404, any amount paid, directly or indirectly, by an owner-employee in repayment of any loan which under section 72(m)(4)(B) was treated as an amount received from a qualified trust or plan shall be treated as a contribution to such trust or under such plan on behalf of such owner-employee.

(i) *Definitions.* Under section 404(a)(8), for purposes of section 404 and the regulations thereunder—

(1) The term “employee” includes an employee as defined in section 401(c)(1) and the term “employer” means the person treated as the employer of such individual under section 401(c)(4);

(2) The term “owner-employee” means an owner-employee as defined in section 401(c)(3);

(3) The term “earned income” means earned income as defined in section 401(c)(2); and

(4) The term “compensation” when used with respect to an individual who is an employee described in subparagraph (1) of this paragraph shall be considered to be a reference to the earned income of such individual derived from the trade or business with respect to which the plan is established.

[T.D. 7636, 44 FR 47056, Aug. 10, 1979]

§ 1.404(g)-1 Deduction of employer liability payments.

(a) *General rule.* Employer liability payments shall be treated as contributions to a stock bonus, pension, profit-sharing, or annuity plan to which section 404 applies. Such payments that

satisfy the limitations of this section shall be deductible under section 404 when paid without regard to any other limitations in section 404.

(b) *Employer liability payments.* For purposes of this section, employer liability payments mean:

(1) Any payment to the Pension Benefit Guaranty Corporation (PBGC) for termination or withdrawal liability imposed under section 4062 (without regard to section 4062(b)(2)), 4063, or 4064 of the Employee Retirement Income Security Act of 1974 (ERISA). Any bond or escrow payment furnished under section 4063 of ERISA shall not be considered as a payment of liability until applied against the liability of the employer.

(2) Any payment to a non-multiemployer plan pursuant to a commitment to the PBGC made in accordance with PBGC Determination of Plan Sufficiency and Termination of Sufficient Plans. See PBGC regulations, 29 CFR 2617.13(b) for rules concerning these commitments. Such payments shall not exceed an amount necessary to provide for, and used to fund, the benefits guaranteed under section 4022 of ERISA.

(3) Any payment to a multiemployer plan for withdrawal liability imposed under part 1 of subtitle E of title IV of ERISA. Any bond or escrow payment furnished under such part shall not be considered as a payment of liability until applied against the liability of the employer.

(c) *Limitations, etc.*—(1) *Permissible expenses.* A payment shall be deductible under section 404(g) and this section only if the payment satisfies the conditions of section 162 or section 212. Payments made by an entity which is liable for such payments because it is a member of a commonly controlled group of corporations, or trades or businesses, within the meaning of section 414 (b) or (c), shall not fail to satisfy such conditions merely because the entity did not directly employ participants in the plan with respect to which the liability payments were made.

(2) *Qualified plan.* A payment shall be deductible under section 404(g) and this section only if the payment is made in a taxable year of the employer ending

within or with a taxable year of the trust for which the trust is exempt under section 501(a). For purposes of this paragraph, the payment timing rules of section 404(a)(6) shall apply.

(3) *Full funding limitation.* (i) If the employer liability payment is to a plan, the total amount deductible for such payment and for other plan contributions may not exceed an amount equal to the full funding limitation as defined in section 412(c)(7) for the taxable year with respect to which the contributions are deemed made under section 404.

(ii) If the total contributions to the plan for the taxable year including the employer liability payment exceed the amount equal to this full funding limitation, the employer liability payment shall be deductible first.

(iii) Any amount paid in a taxable year in excess of the amount deductible in such year under the full funding limitation shall be treated as a liability payment and be deductible in the succeeding taxable years in order of time to the extent of the difference between the employer liability payments made in each succeeding year and the maximum amount deductible for such year under the full funding limitation.

(4) *Maximum deduction allowable under section 404.* The amount deductible under section 404 is limited to the higher of the maximum amount deductible by the employer under section 404(a) or the amount otherwise deductible under section 404(g). If the contributions are to a plan to which more than one employer contributes, this limit shall apply to each employer separately rather than all employers in the aggregate. Thus, each employer may deduct the greater of its allocable share of the deduction determined under sections 404(a) and 413(b)(7) or 413(c)(6) or its allocable share of the amount deductible under section 404(g). However, pursuant to the rule in subdivision (ii) of subparagraph (3), in determining each employer's allocable share under section 404(a), the total amount deductible under section 404(a) by all employers shall not exceed the difference between the full funding limitation and the total amount deductible by all employers under section 404(g).

(5) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example. In the 1983 taxable year, Employer A makes a withdrawal liability payment of \$700,000 to multiemployer Plan X to which Employer A and Employer B are required to contribute. Employer A's allocable share of the deduction allowable under sections 404(a) and 413(b)(7) in the 1983 taxable year is \$600,000. Employer B's allocable share of the deduction allowable under section 404(a) and 413(b)(7) in the 1983 taxable year is \$400,000.

The full funding limitation for the 1983 taxable year is \$1,000,000. Based on paragraph (c)(4) of this section, Employer A may deduct \$700,000, the amount of the withdrawal liability payment. However, the deduction of Employer B is limited to \$300,000, the difference between the full funding limitation and the amount deductible under section 404(g).

(d) *Effective date etc.—(1) General rule.* This section is effective for employer payments made after September 25, 1980.

(2) *Transitional rule.* For employer payments made before September 26, 1980, for purposes of section 404, any amount paid by an employer under section 4062, 4063, or 4064 of the Employee Retirement Income Security Act of 1974 shall be treated as a contribution to which section 404 applies by such employer to or under a stock bonus, pension, profit-sharing, or annuity plan.

[T.D. 8085, 51 FR 16297, May 2, 1986]

§ 1.404(k)-1T Questions and answers relating to the deductibility of certain dividend distributions. (Temporary)

Q-1: What does section 404(k) provide?

A-1: Section 404(k) allows a corporation a deduction for dividends actually paid in accordance with section 404(k)(2) with respect to stock of such corporation held by an employee stock ownership plan (as defined in section 4975(e)(7)) maintained by the corporation (or by any other corporation that is a member of a "controlled group of corporations" within the meaning of section 409(l)(4) that includes the corporation), but only if such dividends may be immediately distributed under the terms of the plan and all of the applicable qualification and distribution

rules. The deduction is allowed under section 404(k) for the taxable year of the corporation during which the dividends are received by the participants.

Q-2: Is the deductibility of dividends paid to plan participants under section 404(k) affected by a plan provision which permits participants to elect to receive or not receive payment of dividends?

A-2: No. Dividends actually paid in cash to plan participants in accordance with section 404(k) are deductible under section 404(k) despite such an election provision.

Q-3: Are dividends paid in cash directly to plan participants by the corporation and dividends paid to the plan and then distributed in cash to plan participants under section 404(k) treated as distributions under the plan holding stock to which the dividends relate for purposes of sections 72, 401 and 402?

A-3: Generally, yes. However, a deductible dividend under section 404(k) is treated for purposes of section 72 as paid under a contract separate from any other contract that is part of the plan. Thus, a deductible dividend is treated as a plan distribution and as paid under a separate contract providing only for payment of deductible dividends. Therefore, a deductible dividend under section 404(k) is a taxable plan distribution even though an employee has unrecovered employee contributions or basis in the plan.

[T.D. 8073, 51 FR 4322, Feb. 4, 1986]

§ 1.404(k)-3 Disallowance of deduction for reacquisition payments.

Q-1: Are payments to reacquire stock held by an ESOP applicable dividends that are deductible under section 404(k)(1)?

A-1: (a) Payments to reacquire stock held by an ESOP, including reacquisition payments that are used to make benefit distributions to participants or beneficiaries, are not deductible under section 404(k) because—

(1) Those payments do not constitute applicable dividends under section 404(k)(2); and

(2) The treatment of those payments as applicable dividends would constitute, in substance, an avoidance or evasion of taxation within the meaning of section 404(k)(5).

(b) See also § 1.162(k)-1 concerning the disallowance of deductions for amounts paid or incurred by a corporation in connection with the reacquisition of its stock from an ESOP.

Q-2: What is the effective date of this section?

A-2: This section applies with respect to payments to reacquire stock that are made on or after August 30, 2006.

[T.D. 9282, 71 FR 51474, Aug. 30, 2006]

§ 1.405-1 Qualified bond purchase plans.

(a) *Introduction.* Section 405 relates to the requirements for qualification of, and the tax treatment of funds contributed to, retirement plans of an employer for the benefit of his employees which are funded through the purchase of United States retirement plan bonds. Such bonds may be purchased under a qualified bond purchase plan described in section 405(a) and paragraph (b) of this section. The qualified bond purchase plan is an alternative method of providing some of the deferred compensation benefits provided by plans described in section 401. In addition, retirement bonds may be purchased under a qualified pension or profit-sharing plan described in section 401. A qualified bond purchase plan or a qualified pension or profit-sharing plan under which retirement bonds are purchased may cover only common-law employees, self-employed individuals, or both. A qualified bond purchase plan may be established after December 31, 1962, and retirement bonds may be purchased by a qualified pension or profit-sharing plan after December 31, 1962. For the terms and conditions of the retirement bonds, see section 405(b) and Treasury Department Circular, Public Debt Series—No. 1-63.

(b) *Qualified bond purchase plans.* (1) A qualified bond purchase plan is a definite written program and arrangement which is communicated to the employees and established and maintained by an employer solely to purchase for and distribute to his employees or their beneficiaries retirement bonds. These bonds must be purchased in the name of the employee on whose behalf the contributions are made. The plan must be a permanent plan which meets the requirements of section

401(a) (3), (4), (5), (6), (7), (8), (16), and (19), and, if applicable, the requirements of section 401(a) (9) and (10) and of section 401(d) (other than paragraphs (1), (5)(B), (8), (16), and (19)). The rules set forth in the regulations relating to those provisions shall be applicable to qualified bond purchase plans.

(2) A qualified bond purchase plan must provide that an employee's right to the proceeds of a bond purchased in his name are nonforfeitable and will in no event inure to the benefit of the employer or be reallocated in any manner.

(c) *Benefits under a qualified bond purchase plan.* (1) Except as provided in subparagraph (2) of this paragraph, a qualified bond purchase plan must conform to the definition of a pension plan in paragraph (b)(1)(i) of § 1.401-1, or the definition of a profit-sharing plan in paragraph (b)(1)(ii) of § 1.401-1. For example, if the qualified bond purchase plan is a profit-sharing plan, the plan must include the definite allocation formula described in paragraph (b)(1)(ii) of § 1.401-1. In addition, if such a profit-sharing plan covers any owner-employee, the plan must also include the definite contribution formula described in section 401(d)(2)(B).

(2)(i) Under a qualified bond purchase plan, the bonds may be distributed to the employees at any time, and the plan need not prohibit the distribution or redemption of the bonds until the retirement of the employee. Accordingly, even though a qualified bond purchase plan is designed as a pension plan, it need not provide systematically for the payment of definitely determinable benefits. However, provisions for distribution must apply in a nondiscriminatory manner.

(ii) A qualified bond purchase plan which is designed as a pension plan may not contain a formula for contributions or benefits which might require the reallocation of amounts to an employee's credit or which might provide for the reversion of any amounts to the employer.

(d) *Contributions under a qualified bond purchase plan.* (1) The retirement bonds will be issued in the denominations of \$50, \$100, \$500, and \$1,000. Therefore, the contribution otherwise called for under the plan may not coincide with an amount that can be in-

vested in retirement bonds. Accordingly, the plan must provide that the contributions on behalf of an individual employee for any year shall be rounded to the nearest multiple of \$50.

(2) Since the employee's rights to any bonds purchased for him under a qualified bond purchase plan must be nonforfeitable, a qualified bond purchase plan must, in order to conform to the requirements of section 401(a)(4) with respect to the early termination of the plan, restrict the contributions on behalf of any employee to the amount which could be allocated to him under paragraph (c) of § 1.401-4.

(e) *Definitions.* For purposes of this section and §§ 1.405-2 and 1.405-3—

(1) The term "employee" includes an employee as defined in section 401(c)(1) and paragraph (b) of § 1.401-10, and the term "employer" means the person treated as the employer of such individual under section 401(c)(4);

(2) The term "owner-employee" means an owner-employee as defined in section 401(c)(3) and paragraph (d) of § 1.401-10;

(3) The term "earned income" means earned income as defined in section 401(c)(2) and paragraph (c) of § 1.401-10; and

(4) The term "retirement bond" means a United States Retirement Plan Bond, as described in section 405(b) and Treasury Department Circular, Public Debt Series—No. 1-63.

[T.D. 6675, 28 FR 10131, Sept. 17, 1963, as amended by T.D. 7748, 46 FR 1697, Jan. 7, 1981]

§ 1.405-2 Deduction of contributions to qualified bond purchase plans.

(a) *In general.* An employer shall be allowed a deduction for contributions paid to or under a qualified bond purchase plan in the same manner and to the same extent as if such contributions were made to a trust described in section 401(a) which is exempt from tax under section 501(a). A deduction will be allowed only for the taxable year in which the contributions are paid, or treated as paid, except as provided by section 404(a) (1), (3), and (7). For purposes of the deduction, a contribution is paid at the time the application for the bond is made and the full purchase price paid.

(b) *Rules for applying section 404.* If a qualified bond purchase plan is designed as a pension plan as defined in paragraph (b)(1)(i) of § 1.401-1, the limitations of section 404 applicable to qualified pension trusts shall apply. See §§ 1.404(a)-3 through 1.404(a)-7. Similarly, if a qualified bond purchase plan is designed as a profit-sharing plan as defined in paragraph (b)(1)(ii) of § 1.401-1, the limitations of section 404 applicable to qualified profit-sharing trusts shall apply. See §§ 1.404(a)-9 and 1.404(a)-10. In addition, if a qualified bond purchase plan designed as a pension plan covers some or all of the employees who are covered by a qualified profit-sharing plan established and maintained by the same employer, or if a qualified bond purchase plan which is designed as a profit-sharing plan covers some or all the employees who are also covered by a qualified pension or annuity plan established and maintained by the same employer, section 404(a)(7) is applicable. See § 1.404(a)-(13). Furthermore, if a qualified bond purchase plan covers employees some or all of whom are employees within the meaning of section 401(c)(1), the provisions of section 404(a) (8), (9), and (10) and 404(e) shall also apply.

(c) *Accrual method taxpayers.* In the case of a taxpayer using the accrual method of accounting, a contribution to a qualified bond purchase plan will be deemed paid on the last day of the year of accrual if—

(1) During the taxable year of accrual the taxpayer incurs a liability to make the contribution, the amount of which is accruable under section 461 for such taxable year, and

(2) Payment is in fact made no later than the time prescribed by the law for filing the return for the taxable year of accrual (including extensions thereof).

[T.D. 6675, 28 FR 10131, Sept. 17, 1963]

§ 1.405-3 Taxation of retirement bonds.

(a) *In general.* (1) As in the case of employer contributions under a qualified pension, annuity, profit-sharing, or stock bonus plan, employer contributions on behalf of his common-law employees under a qualified bond purchase plan are not includible in the gross income of the employees when made, and employer contributions on

behalf of self-employed individuals are deductible as provided in section 405(c) and § 1.405-2. Further, an employee or his beneficiary does not realize gross income upon the receipt of a retirement bond pursuant to a qualified bond purchase plan or from a trust described in section 401(a) which is exempt from tax under section 501(a). Upon redemption of such a bond, ordinary income will be realized to the extent the proceeds thereof exceed the basis (determined in accordance with paragraph (b) of this section) of the bond. The proceeds of a retirement bond are not entitled to the special tax treatment of section 72(n) and § 1.72-18.

(2) In the event a retirement bond is surrendered for partial redemption and reissuance of the remainder, the person surrendering the bond shall be taxable on the proceeds received to the extent such proceeds exceed the basis in the portion redeemed. In such case, the basis shall be determined (in accordance with paragraph (b) of this section) as if the portion redeemed and the portion reissued had been issued as separate bonds.

(3) In the event a retirement bond is redeemed after the death of the registered owner, the amount taxable (as determined in accordance with subparagraph (1) of this paragraph) is income in respect of a decedent under section 691.

(4) The provisions of section 402(a)(2) are not applicable to a retirement bond. In general, section 402(a)(2) provides for capital gains treatment of certain distributions from a qualified trust which constitute the total distributions payable with respect to any employee. The proceeds of a retirement bond received upon redemption will not be entitled to such capital gain treatment even though the bond is received as a part of, or as the whole of, such a total distribution. Nor will such a bond be taken into consideration in determining whether the distribution represents the total amount payable by the trust with respect to an employee. Thus, a distribution by a qualified trust may constitute a total distribution payable with respect to an employee for purposes of section 402(a)(2)

even though the trust retains retirement bonds registered in the name of such employee.

(b) *Basis.* (1) This paragraph is applicable in determining the basis of any retirement bond distributed pursuant to a qualified bond purchase plan or distributed by a trust qualifying under section 401. In the case of such a bond purchased for an individual at the time he is a common-law employee, the basis is that portion of the purchase price attributable to employee contributions. In the case of such a bond purchased for an individual at the time he is a self-employed individual, the basis shall be determined under subparagraph (3) of this paragraph.

(2) At the time a retirement bond is purchased, there shall be indicated on the application for the retirement bond whether the individual for whom the retirement bond is purchased is a common-law employee or a self-employed individual, and in the case of common-law employees the amount of the purchase price, if any, attributable to the employee's contribution. The answers to these questions will appear on the retirement bond, and when the retirement bond is purchased for a common-law employee, the basis for the retirement bond is presumed to be the amount of the purchase price which the retirement bond indicates was contributed by the employee.

(3)(i) Except as provided in subdivision (ii) of this subparagraph, for purposes of determining the basis of retirement bonds purchased for an individual while he was a self-employed individual, all such bonds redeemed during a taxable year shall be considered in the aggregate as a single retirement bond. The basis of such retirement bonds shall be the difference between the aggregate of their face amounts and the lesser of:

(A) 1 One-half the aggregate of their face amounts, or

(B) The aggregate of the unused amounts allowed as a deduction at the end of the taxable year (as determined in subparagraph (4) of this paragraph).

(ii) The basis of a retirement bond purchased for a self-employed individual which is redeemed after his death is the amount determined by

multiplying the face amount of such retirement bond by a fraction—

(A) The numerator of which is the aggregate of the face amounts of all the bonds registered in the individual's name at his death which were purchased while he was a self-employed individual reduced by the aggregate of the unused amounts allowed as a deduction at his death (as determined in subparagraph (4) of this paragraph), and

(B) The denominator of which is the aggregate of the face amounts of all such bonds.

(4)(i) In the case of retirement bonds purchased under a qualified bond purchase plan, the aggregate of the unused amounts allowed as a deduction at the end of any taxable year shall be an amount equal to the total of the amounts allowable for such taxable year, and the amounts allowed in all prior taxable years, as a deduction under section 405(c) for contributions used to purchase retirement bonds for the registered owner while he was a self-employed individual, reduced by an amount equal to the portion of the face amounts of such retirement bonds redeemed in prior taxable years which were included in the registered owner's gross income.

(ii) In the case of retirement bonds purchased by a trust described in section 401(a) and exempt under section 501(a), there shall be allocated to the retirement bond the deduction under section 404 attributable to the contributions used to purchase the retirement bond. The amount so allocated shall be treated in the same manner as the deduction allowed under section 405(c) for purposes of computing the unused amounts allowed as a deduction under subdivision (i) of this subparagraph. Further, the amount so allocated shall not be included in the investment in the contract for purposes of section 72 in determining the portion of the other assets distributed by the trust included in gross income.

(5) The application of the rule of subparagraphs (3) and (4) of this paragraph may be illustrated by the following examples:

Example 1. B, a self-employed individual, adopts a qualified bond purchase plan in 1963. During 1963 the plan purchased \$2,000 worth

Internal Revenue Service, Treasury

§ 1.406-1

of retirement bonds in his name. As a result of overestimating his income for 1963, only \$400 was allowed B as a deduction pursuant to section 405(c). In 1964, prior to B's retirement in June of that year, the plan purchased a \$500 retirement bond in B's name for which a deduction was allowable pursuant to section 405(c) in the amount of \$250. B redeemed a retirement bond with a face amount of \$500 in September of 1964 and another with a face amount of \$500 in October of 1964. Of the proceeds received in 1964 from the redemption of the bonds, \$1,000 plus interest, B shall exclude from his gross income \$500 (face amount of the retirement bonds, \$1,000, less \$500, one-half of the face amount, the latter being less than the aggregate of the unused amounts allowed as a deduction, \$250 allowable for the taxable year in which the bonds were redeemed plus \$400, the unused amounts allowed in prior taxable years, or \$650). The aggregate of the unused amounts allowed as a deduction shall be reduced by the amount so excluded (\$650 - \$500 = \$150). During the following year, B redeems another retirement bond with a face amount of \$500. Of the proceeds received from the redemption of such retirement bond, \$500 plus interest, B shall exclude from his gross income \$350 (face amount of the retirement bonds, \$500, less \$150, the aggregate of the unused amounts allowed as a deduction, the latter being less than one-half of the face amount of the bond, \$250). The aggregate of the unused amounts allowed as a deduction is reduced to zero (\$150 - \$150 = 0). Upon redemption of the remaining retirement bonds registered in B's name, B shall exclude from his gross income with respect to such proceeds an amount equal to the face amounts of the bonds redeemed.

Example 2. C, a self-employed individual, participated in a qualified bond purchase plan during the years 1963 through 1966. The plan purchased in his name retirement bonds in the aggregate of \$10,000. C deducted \$4,000 from his gross income for the four years (\$1,000 for each year) with respect to the purchase of such retirement bonds. C retired in December of 1966 and during the following year redeemed one retirement bond with a face amount of \$1,000. C excluded from his gross income \$500 of the proceeds of the bond. C died without redeeming any of the remaining retirement bonds registered in his name. The basis of each remaining retirement bond shall be determined by multiplying the face amount of each retirement bond by $\$5,500 \div \$9,000$. The numerator is the aggregate of the face amounts registered in C's name (as a self-employed individual) at his death, \$9,000, reduced by the aggregate of the unused amounts allowed as a deduction at his death, \$3,500 (amounts allowed as a deduction under section 405(c), \$4,000, reduced by the portion of the face amount of the retirement bond redeemed by C which was in-

cluded in C's gross income, \$500), or \$5,500. The denominator is the face amount of the retirement bonds registered in his name as a self-employed individual at his death, \$9,000.

[T.D. 6675, 28 FR 10131, Sept. 17, 1963]

§ 1.406-1 Treatment of certain employees of foreign subsidiaries as employees of the domestic corporation.

(a) *Scope*—(1) *General rule.* For purposes of applying the rules in part 1 of subchapter D of chapter 1 of subtitle A of the Code and the regulations thereunder with respect to a pension, profit-sharing, or stock bonus plan described in section 401(a), an annuity plan described in section 403(a), or a bond purchase plan described in section 405(a), of a domestic corporation, an individual who is a citizen of the United States and who is an employee of a foreign subsidiary (as defined in section 3121(1)(8) and the regulations thereunder) of such domestic corporation shall be treated as an employee of such domestic corporation if the requirements of paragraph (b) of this section are satisfied.

(2) *Cross-references.* For rules relating to nondiscrimination requirements and the determination of compensation, see paragraph (c) of this section. For rules under which termination of the status of an individual as an employee of the domestic corporation in certain instances will not be considered as separation from service for certain purposes, see paragraph (d) of this section. For rules regarding deductibility of contribution, see paragraph (e) of this section. For rules regarding treatment of such individual as an employee of the domestic corporation under related provisions, see paragraph (f) of this section.

(b) *Application of this section*—(1) *Requirements.* This section shall apply and the employee of the foreign subsidiary shall be treated as an employee of domestic corporation for the purposes set forth in paragraph (a)(1) of this section only if each of the following requirements is satisfied:

(i) The domestic corporation must have entered into an agreement under section 3121(l) to provide social security coverage which applies to the foreign subsidiary of which such individual is an employee and which has

not been terminated under section 3121(l)(3) or (4).

(ii) The plan, referred to in paragraph (a)(1) of this section, must expressly provide for contributions or benefits for individuals who are citizens of the United States and who are employees of one or more of its foreign subsidiaries to which an agreement entered into by such domestic corporation under section 3121(l) applies. The plan must apply to all of the foreign subsidiaries to which such agreement applies.

(iii) Contributions under a funded plan of deferred compensation (whether or not a plan described in section 401(a), 403(a), or 405(a)) must not be provided by any other person with respect to the remuneration paid to such individual by the foreign subsidiary.

(2) *Supplementary rules.* Subparagraph (l)(ii) of this paragraph does not modify the requirements for qualification of a plan described in section 401(a), 403(a), or 405(a) and the regulations thereunder. It is not necessary that the plan provide benefits or contributions for all United States citizens who are employees of such foreign subsidiaries. If the plan is amended to cover individuals who are employees by reason of paragraph (a)(1) of this section, the plan will not qualify unless it meets the coverage requirements of section 410(b)(1) (section 401(a)(3), as in effect on September 1, 1974, for plan years to which section 410 does not apply; see § 1.410(a)-2 for the effective dates of section 401) and the nondiscrimination requirements of section 401(a)(4). In addition, the administrative rules contained in § 1.401(a)-3(e) (relating to the determination of the contributions or benefits provided by the employer under the Social Security Act) will also apply for purposes of determining whether the plan meets the requirements of section 401. For purposes of subparagraph (l)(iii) of this paragraph, contributions will not be considered as provided under a funded plan merely because the foreign subsidiary is required under the laws of the foreign jurisdiction to pay social insurance taxes or to make similar payments with respect to the wages paid to the employee.

(c) *Special rules—(1) Nondiscrimination requirements.* For purposes of applying

sections 401(a)(4) and 410(b)(1)(B) (section 401(a)(3)(B), as in effect on September 1, 1974, for plan years to which section 410 does not apply) and the regulations thereunder (relating to non-discrimination concerning benefits and contributions and coverage of employees) with respect to an employee of the foreign subsidiary who is treated as an employee of the domestic corporation under paragraph (a)(1) of this section—

(i) If the employee is an officer, shareholder, or (with respect to plan years to which section 410 does not apply) person whose principal duties consist in supervising the work of other employees of the foreign subsidiary of the domestic corporation, he shall be treated as having such capacity with respect to the domestic corporation; and

(ii) The determination as to whether the employee is a highly compensated employee shall be made by comparing his total compensation (determined under subparagraph (2) of this paragraph) with the compensation of all the employees of the domestic corporation (including individuals treated as employees of the domestic corporation pursuant to section 406 and this section).

(2) *Determination of compensation.* For purposes of applying section 401(a)(5) and the regulations thereunder, relating to classifications that will not be considered discriminatory, with respect to an employee of the foreign subsidiary who is treated as an employee of the domestic corporation under paragraph (a)(1) of this section—

(i) The total compensation of the employee shall be the remuneration of the employee from the foreign subsidiary (including any allowances that are paid to the employee because of his employment in a foreign country) which would constitute his total compensation if his services had been performed for the domestic corporation;

(ii) The basic or regular rate of compensation of the employee shall be determined for the employee in the same manner as it is determined under section 401 for other employees of the domestic corporation; and

(iii) The amount paid by the domestic corporation which is equivalent to the tax imposed with respect to the

employee by section 3101 (relating to the tax on employees under the Federal Insurance Contributions Act) shall be treated as having been paid by the employee and shall be included in his compensation.

(d) *Termination of status as deemed employee not to be treated as separation from service for purposes of capital gain provisions and limitation of tax.* For purposes of applying the rules, relating to the treatment of certain distributions which are made after an employee's separation from service, set forth in section 72(n) as in effect on September 1, 1974 (with respect to taxable years ending after December 31, 1969, and to which section 402(e) does not apply), and in sections 402(a)(2) and (e) and 403(a)(2) with respect to distributions or payments made after December 31, 1973, and in taxable years beginning after December 31, 1973) with respect to an employee of a foreign subsidiary who is treated as an employee of a domestic corporation under paragraph (a)(1) of this section, the employee shall not be considered as separated from the service of the domestic corporation solely by reason of the occurrence of any one or more of the following events:

(1) The termination, under the provisions of section 3121(l), of the agreement entered into by the domestic corporation under that section which covers the employment of the employee;

(2) The employee's becoming an employee of another foreign subsidiary of the domestic corporation with respect to which such agreement does not apply,

(3) The employee's ceasing to be an employee of the foreign subsidiary by reason of which employment he was treated as an employee of such domestic corporation, if he becomes an employee of another corporation controlled by such domestic corporation; or

(4) The termination of the provision of the plan described in paragraph (b)(1)(ii) of this section, for coverage of United States citizens who are employees of foreign subsidiaries covered by an agreement under section 3121(l).

For purposes of subparagraph (3) of this paragraph, a corporation is considered to be controlled by a domestic corpora-

tion if such domestic corporation owns directly or indirectly more than 50 percent of the voting stock of the corporation.

(e) *Deductibility of contributions—(1) In general.* For purposes of applying sections 404 and 405(c) with respect to the deduction for contributions made to or under a pension, profit-sharing, or stock bonus plan described in section 401(a), an annuity plan described in section 403(a), or a bond purchase plan described in section 405(a), by a domestic corporation, or by another corporation which is entitled to deduct its contributions under section 404(a)(3)(B), on behalf of an employee of a foreign subsidiary treated as an employee of the domestic corporation under paragraph (a)(1) of this section—

(i) Except as provided in subdivision (ii) of this subparagraph, no deduction shall be allowed to such domestic corporation or to any other corporation which would otherwise be entitled to deduct its contributions on behalf of such employee under one of such sections;

(ii) There shall be allowed as a deduction from the gross income of the foreign subsidiary which is effectively connected with the conduct of a trade or business within the United States (within the meaning of section 882 and the regulations thereunder) an amount which is allocable and apportionable to such gross income under the rules of § 1.861-8 and which in no event may exceed the amount which (but for subdivision (i) of this subparagraph) would be deductible under section 404 or section 405(c) by the domestic corporation if the individual were an employee of the domestic corporation and if his compensation were paid by the domestic corporation; and

(iii) Any reference to compensation shall be considered to be a reference to the total compensation of such individual (determined by applying paragraph (c)(2) of this section).

(2) *Year of deduction.* Any amount deductible by the foreign subsidiary under section 406(d) and this paragraph shall be deductible for its taxable year with or within which ends the taxable year of the domestic corporation for which the contribution was made.

(3) *Special rules.* Whether contributions to a plan on behalf of an employee of the foreign subsidiary who is treated as an employee of the domestic corporation under paragraph (a)(1) of this section, or whether forfeitures with regard to such employee, will require an inclusion in the income of the domestic corporation or an adjustment in the basis of its stock in the foreign subsidiary, shall be determined in accordance with the rules of general application of subtitle A of chapter 1 of the Code (relating to income taxes). For example, an unreimbursed contribution by the domestic corporation to a plan which meets the requirements of section 401(a) will be treated, to the extent each employee's rights to the contribution are nonforfeitable, as a contribution of capital to the foreign subsidiary to the extent that such contributions are made on behalf of the employees of such subsidiary.

(f) *Treatment as an employee of the domestic corporation under related provisions.* An individual who is treated as an employee of a domestic corporation under paragraph (a)(1) of this section shall also be treated as an employee of such domestic corporation, with respect to the plan having the provision described in paragraph (b)(1)(ii) of this section, for purposes of applying section 72(d) (relating to employees' annuities), section 72(f) (relating to special rules for computing employees' contributions), section 101(b) (relating to employees' death benefits), section 2039 (relating to annuities), and section 2517 (relating to certain annuities under qualified plans) and the regulations thereunder.

(g) *Nonexempt trust.* If the plan of the domestic corporation is a qualified plan described under section 401(a), the fact that a trust which forms a part of such plan is not exempt from tax under section 501(a) shall not affect the treatment of an employee of a foreign subsidiary as an employee of a domestic corporation under section 406(a) and paragraph (a)(1) of this section.

(Sec. 411 Internal Revenue Code of 1954 (88 Stat. 901; 26 U.S.C. 411))

[T.D. 7501, 42 FR 42321, Aug. 23, 1978]

§ 1.407-1 Treatment of certain employees of domestic subsidiaries engaged in business outside the United States as employees of the domestic parent corporation.

(a) *Scope—(1) General rule.* For purposes of applying the rules in part 1 of subchapter D of chapter 1 of subtitle A of the Code and the regulations thereunder with respect to a pension, profit-sharing, or stock bonus plan described in section 401(a), an annuity plan described in section 403(a), or a bond purchase plan described in section 405(a), of a domestic parent corporation (as defined in paragraph (b)(3)(ii) of this section), an individual who is a citizen of the United States and who is an employee of a domestic subsidiary (as defined in paragraph (b)(3)(i) of this section) of such domestic parent corporation shall be treated as an employee of such domestic parent corporation if the requirements of paragraph (b) of this section are satisfied.

(2) *Cross-references.* For rules relating to nondiscrimination requirements and the determination of compensation, see paragraph (c) of this section. For rules under which termination of the status of an individual as an employee of the domestic parent corporation in certain instances will not be considered as separation from service for certain purposes, see paragraph (d) of this section. For rules regarding deductibility of contributions, see paragraph (e) of this section. For rules regarding treatment of such individual as an employee of the domestic parent corporation under related provisions, see paragraph (f) of this section.

(b) *Application of this section—(1) Requirements.* This section shall apply and the employee of the domestic subsidiary shall be treated as an employee of the domestic parent corporation for the purposes set forth in paragraph (a)(1) of this section only if each of the following requirements is satisfied:

(i) The plan, referred to in paragraph (a)(1) of this section, must expressly provide for contributions of benefits for individuals who are citizens of the United States and who are employees of one or more of the domestic subsidiaries of the domestic parent corporation. The plan must apply to every domestic subsidiary.

(ii) Contributions under a funded plan of deferred compensation (whether or not a plan described in section 401(a), 403(a), or 405(a)) must not be provided by any other person with respect to the remuneration paid to such individual by the domestic subsidiary.

(2) *Supplementary rules.* Subparagraph (1)(i) of this paragraph does not modify the requirements for qualification of a plan described in section 401(a), 403(a), or 405(a) and the regulations thereunder. It is not necessary that the plan provide benefits or contributions for all United States citizens who are employees of such domestic subsidiaries. If the plan is amended to cover individuals who are employees by reason of paragraph (a)(1) of this section, the plan will not qualify unless it meets the coverage requirements of section 410(b)(1) (section 401(a)(3), as in effect on September 1, 1974, for plan years to which section 410 does not apply; see § 1.410 (a)-2 for the effective dates of section 401) and the nondiscrimination requirements of section 410(a)(4). The administrative rules contained in § 1.401 (a)-3(e) (relating to the determination of the contributions or benefits provided by the employer under the Social Security Act) will also apply for purposes of determining whether the plan meets the requirements of section 401. For purposes of subparagraph (1)(ii) of this paragraph, contributions will not be considered as provided under a funded plan merely because the domestic subsidiary employer pays the tax imposed by section 3111 (relating to tax on employers under the Federal Insurance Contributions Act) with respect to such employee or is required under the laws of a foreign jurisdiction to pay social insurance taxes or to make similar payments with respect to the wages paid to the employee.

(3) *Definitions*—(i) *Domestic subsidiary.* For purposes of this section, a corporation shall be treated as a domestic subsidiary for any taxable year only if each of the following requirements is satisfied:

(A) It is a domestic corporation 80 percent or more of the outstanding voting stock of which is owned by another domestic corporation;

(B) 95 percent of more of its gross income for the three-year period imme-

diately preceding the close of its taxable year which ends on or before the close of the taxable year of such other domestic corporation (or for such part of such period during which it was in existence) was derived from sources without the United States, determined pursuant to sections 861 through 864 and the regulations thereunder; and

(C) 90 percent or more of its gross income for such period (or such part) was derived from the active conduct of a trade or business.

If for the period (or part thereof) referred to in (B) and (C) of this subdivision such corporation has no gross income, the provisions of (B) and (C) shall be treated as satisfied if it is reasonable to anticipate that, with respect to the first taxable year thereafter for which such corporation has gross income, such provisions will be satisfied.

(ii) *Domestic parent corporation.* The domestic parent corporation of any domestic subsidiary is the domestic corporation which owns 80 percent or more of the outstanding voting stock of such domestic subsidiary.

(c) *Special rules*—(1) *Nondiscrimination requirements.* For purposes of applying sections 401(a)(4) and 410(b)(1)(B) (section 401(a)(3)(B), as in effect on September 1, 1974, for plan years to which section 410 does not apply) and the regulation thereunder (relating to nondiscrimination concerning benefits and contributions and coverage of employees) with respect to an employee of the domestic subsidiary who is treated as an employee of the domestic parent corporation under paragraph (a)(1) of this section—

(i) If the employee is an officer, shareholder, or (with respect to plan years to which section 410 does not apply) a person whose principal duties consist in supervising the work of other employees of the domestic subsidiary of the domestic parent corporation, he shall be treated as having such capacity with respect to the domestic parent corporation; and

(ii) The determination as to whether the employee is a highly compensated employee shall be made by comparing his total compensation determined under subparagraph (2) of this paragraph with the compensation of all the

employees of the domestic parent corporation (including individuals treated as employees of the domestic parent corporation pursuant to section 407 and this section).

(2) *Determination of compensation.* For purposes of applying section 401(a) (5) and the regulations thereunder, relating to classifications that will not be considered discriminatory, with respect to an employee of the domestic subsidiary who is treated as an employee of the domestic parent corporation under paragraph (a)(1) of this section—

(i) The total compensation of the employee shall be the remuneration of the employee from the domestic subsidiary (including any allowances that are paid to the employee because of his employment in a foreign country) which would constitute his total compensation if his services had been performed for such domestic parent corporation; and

(ii) The basic or regular rate of compensation of the employee shall be determined for the employee in the same manner as it is determined under section 401 for other employees of the domestic parent corporation.

(d) *Termination of status as deemed employee not to be treated as separation from service for purposes of capital gain provisions and limitation of tax.* For purposes of applying the rules, relating to treatment of certain distributions which are made after an employee's separation from service, set forth in section 72(n) as in effect on September 1, 1974 (with respect to taxable years ending after December 31, 1969, and to which section 402(e) does not apply), and in sections 402 (a)(2) and (e) and 403(a)(2) (with respect to distributions or payments made after December 31, 1973, and in taxable years beginning after December 31, 1973) with respect to an employee of a domestic subsidiary who is treated as an employee of a domestic parent corporation under paragraph (a)(1) of this section, the employee shall not be considered as separated from the service of the domestic parent corporation solely by reason of the occurrence of any one or more of the following events:

(1) The fact that the corporation of which such individual is an employee ceases, for any taxable year, to be a do-

mestic subsidiary within the mean of paragraph (b)(3)(i) of this section;

(2) The employee' ceasing to be an employee of the domestic subsidiary of such domestic parent corporation, if he becomes an employee of another corporation controlled by such domestic parent corporation; or

(3) The termination of the provision of the plan described in paragraph (b)(1)(i) of this section, requiring coverage of the United States citizens who are employees of domestic subsidiaries of the domestic parent corporation.

For purposes of subparagraph (2) of this paragraph, a corporation is considered to be controlled by a domestic parent corporation if the domestic parent corporation owns directly or indirectly more than 50 percent of the voting stock of the corporation.

(e) *Deductibility of contributions—(1) In general.* For purposes of applying sections 404 and 405(c) with respect to the deduction for contributions made to or under a pension, profit-sharing, or stock bonus plan described in section 401(a), and annuity plan described in section 403(a), or a bond purchase plan described in section 405(a), by a domestic parent corporation, or by another corporation which is entitled to deduct its contributions under section 404(a)(3)(B), on behalf of an employee of a domestic subsidiary treated as an employee of the domestic parent corporation under paragraph (a)(1) of this section—

(i) Except as provided in subdivision (ii) of this subparagraph, no deduction shall be allowed to the domestic parent corporation which would otherwise be entitled to deduct its contributions on behalf of such employee under one of such sections;

(ii) There shall be allowed as a deduction to the domestic subsidiary of which such individual is an employee an amount equal to the amount which (but for subdivision (i) of this subparagraph) would be deductible under section 404 or section 405(c) by the domestic parent corporation if the individual were an employee of the domestic parent corporation and if his compensation were paid by the domestic corporation; and

(iii) Any reference to compensation shall be considered to be a reference to

the total compensation of such individual determined by applying paragraph (c)(2) of this section).

(2) *Year of deduction.* Any amount deductible by the domestic subsidiary under section 407(d) and this paragraph shall be deductible for its taxable year with or within which ends the taxable year of the domestic parent corporation for which the contribution was made.

(3) *Special rules.* Whether contributions to a plan on behalf of an employee of the domestic subsidiary who is treated as an employee of the domestic parent corporation under paragraph (a)(1) of this section, or whether forfeitures with regard to such employee, will require an inclusion in the income of the domestic parent corporation or an adjustment in the basis of its stock in the domestic subsidiary, shall be determined in accordance with the rules of general application of subtitle A of chapter 1 of the Code (relating to income taxes). For an example, and unreimbursed contribution by the domestic parent corporation to a plan which meets the requirements of section 401(a) will be treated, to the extent each employee's rights to the contribution are nonforfeitable, as a contribution of capital to the domestic subsidiary to the extent that such contributions are made on behalf of the employees of such subsidiary.

(f) *Treatment as an employee of the domestic parent corporation under related provisions.* An individual who is treated as an employee of a domestic parent corporation under paragraph (a)(1) of this section shall also be treated as an employee of such domestic corporation, with respect to the plan having the provision described in paragraph (b)(1)(i) of this section, for purposes of applying section 72(d) (relating to special rules for computing employees' contributions), section 72(f) (relating to special rules for computing employees' contributions), section 101(b) (relating to employees' section 101(b) (relating to employees' death benefits), section 2039 (relating to annuities), and section 2517 (relating to certain annuities under qualified plans) and the regulations thereunder.

(g) *Nonexempt trust.* If the plan of the domestic parent corporation is a quali-

fied plan described under section 401(a), the fact that a trust which forms a part of such plan is not exempt from tax under section 501(a) shall not affect the treatment of an employee of a domestic subsidiary as an employee of a domestic parent corporation under section 407(a) and paragraph (a)(1) of this section.

(Sec. 411 Internal Revenue Code of 1954 (88 Stat. 901; 26 U.S.C. 411))

[T.D. 7501, 42 FR 42323, Aug. 23, 1977]

§ 1.408-1 General rules.

(a) *In general.* Section 408 prescribes rules relating to individual retirement accounts and individual retirement annuities. In addition to the rules set forth in §§ 1.408-2 and 1.408-3, relating respectively to individual retirement accounts and individual retirement annuities, the rules set forth in this section shall also apply.

(b) *Exemption from tax.* The individual retirement account or individual retirement annuity is exempt from all taxes under subtitle A of the Code other than the taxes imposed under section 511, relating to tax on unrelated business income of charitable, etc., organizations.

(c) *Sanctions—(1) Excess contributions.* If an individual retirement account or individual retirement annuity accepts and retains excess contributions, the individual on whose behalf the account is established or who is the owner of the annuity will be subject to the excise tax imposed by section 4973.

(2) *Prohibited transactions by owner or beneficiary of individual retirement account—(i)* Under section 408(e)(2), if, during any taxable year of the individual for whose benefit any individual retirement account is established, that individual or the individual's beneficiary engages in any transaction prohibited by section 4975 with respect to such account, such account ceases to be an individual retirement account as of the first day of such taxable year. In any case in which any individual retirement account ceases to be an individual retirement account by reason of the preceding sentence as of the first day of any taxable year, section 408(d)(1) applies as if there were a distribution on such first day in an

§ 1.408-2

26 CFR Ch. I (4-1-08 Edition)

amount equal to the fair market value (on such first day) of all assets in the account (on such first day). The preceding sentence applies even though part of the fair market value of the individual retirement account as of the first day of the taxable year is attributable to excess contributions which may be returned tax-free under section 408(d)(4) or 408(d)(5).

(ii) If the trust with which the individual engages in any transaction described in subdivision (i) of this subparagraph is established by an employer or employee association under section 408(c), only the employee who engages in the prohibited transaction is subject to disqualification of his separate account.

(3) *Prohibited transaction by person other than owner or beneficiary of account.* If any person other than the individual on whose behalf an individual retirement account is established or the individual's beneficiary engages in any transaction prohibited by section 4975 with respect to such account, such person shall be subject to the taxes imposed by section 4975.

(4) *Pledging account as security.* Under section 408(e)(4), if, during any taxable year of the individual for whose benefit an individual retirement account is established, that individual uses the account or any portion thereof as security for a loan, the portion so used is treated as distributed to that individual.

(5) *Borrowing on annuity contract.* Under section 408(e)(3), if during any taxable year the owner of an individual retirement annuity borrows any money under or by use of such contract, the contract ceases to be an individual retirement annuity as of the first day of such taxable year. See § 1.408-3(c).

(6) *Premature distributions.* If a distribution (whether a deemed distribution or an actual distribution) is made from an individual retirement account, or individual retirement annuity, to the individual for whose benefit the account was established, or who is the owner of the annuity, before the individual attains age 59½ (unless the individual has become disabled within the meaning of section 72(m)(7)), the tax under Chapter 1 of the Code for the taxable year in which such distribution is

received is increased under section 408(f)(1) or (f)(2). The increase equals 10 percent of the amount of the distribution which is includible in gross income for the taxable year. Except in the case of the credits allowable under section 31, 39, or 42, no credit can be used to offset the increased tax described in this subparagraph. See, however, § 1.408-4(c)(3).

(d) *Limitation on contributions and benefits.* An individual retirement account or individual retirement annuity is subject to the limitation on contributions and benefits imposed by section 415 for years beginning after December 31, 1975.

(e) *Community property laws.* Section 408 shall be applied without regard to any community property laws.

[T.D. 7714, 45 FR 52790, Aug. 8, 1980]

§ 1.408-2 Individual retirement accounts.

(a) *In general.* An individual retirement account must be a trust or a custodial account (see paragraph (d) of this section). It must satisfy the requirements of paragraph (b) of this section in order to qualify as an individual retirement account. It may be established and maintained by an individual, by an employer for the benefit of his employees (see paragraph (c) of this section), or by an employee association for the benefit of its members (see paragraph (c) of this section).

(b) *Requirements.* An individual retirement account must be a trust created or organized in the United States (as defined in section 7701(a)(9)) for the exclusive benefit of an individual or his beneficiaries. Such trust must be maintained at all times as a domestic trust in the United States. The instrument creating the trust must be in writing and the following requirements must be satisfied.

(1) *Amount of acceptable contributions.* Except in the case of a contribution to a simplified employee pension described in section 408(k) and a rollover contribution described in section 408(d)(3), 402(a)(5), 402(a)(7), 403(a)(4), 403(b)(8) or 409(b)(3)(C), the trust instrument must provide that contributions may not be accepted by the trustee for the taxable year in excess of \$1,500 on behalf of any individual for

whom the trust is maintained. An individual retirement account maintained as a simplified employee pension may provide for the receipt of up to \$7,500 for a calendar year.

(2) *Trustee.* (i) The trustee must be a bank (as defined in section 408(n) and the regulations thereunder) or another person who demonstrates, in the manner described in paragraph (e) of this section, to the satisfaction of the Commissioner, that the manner in which the trust will be administered will be consistent with the requirements of section 408 and this section.

(ii) Section 11.408(a)(2)-1 of the Temporary Income Tax Regulations under the Employee Retirement Income Security Act of 1974 is superseded by this subparagraph (2).

(3) *Life insurance contracts.* No part of the trust funds may be invested in life insurance contracts. An individual retirement account may invest in annuity contracts which provide, in the case of death prior to the time distributions commence, for a payment equal to the sum of the premiums paid or, if greater, the cash value of the contract.

(4) *Nonforfeiture.* The interest of any individual on whose behalf the trust is maintained in the balance of his account must be nonforfeitable.

(5) *Prohibition against commingling.* (i) The assets of the trust must not be commingled with other property except in a common trust fund or common investment fund.

(ii) For purposes of this subparagraph, the term "common investment fund" means a group trust created for the purpose of providing a satisfactory diversification or investments or a reduction of administrative expenses for the individual participating trusts, and which group trust satisfies the requirements of section 408(c) (except that it need not be established by an employer or an association of employees) and the requirements of section 401(a) in the case of a group trust in which one of the individual participating trusts is an employees' trust described in section 401(a) which is exempt from tax under section 501(a).

(iii) For purposes of this subparagraph, the term "individual participating trust" means an employees' trust described in section 401(a) which

is exempt from tax under section 501(a) or a trust which satisfies the requirements of section 408(a) provided that in the case of such an employees' trust, such trust would be permitted to participate in such a group trust if all the other individual participating trusts were employees' trusts described in section 401(a) which are exempt from tax under section 501(a).

(6) *Distribution of interest.* (i) The trust instrument must provide that the entire interest of the individual for whose benefit the trust is maintained must be distributed to him in accordance with paragraph (b)(6)(ii) or (iii) of this section.

(ii) Unless the provisions of paragraph (b)(6)(iii) of this section apply, the entire interest of the individual must be actually distributed to him not later than the close of his taxable year in which he attains age 70½.

(iii) In lieu of distributing the individual's entire interest as provided in paragraph (b)(6)(ii) of this section, the interest may be distributed commencing not later than the taxable year described in such paragraph (b)(6)(ii). In such case, the trust must expressly provide that the entire interest of the individual will be distributed to the individual and the individual's beneficiaries, in a manner which satisfies the requirements of paragraph (b)(6)(v) of this section, over any of the following periods (or any combination thereof)—

- (A) The life of the individual,
- (B) The lives of the individual and spouse,
- (C) A period certain not extending beyond the life expectancy of the individual, or
- (D) A period certain not extending beyond the joint life and last survivor expectancy of the individual and spouse.

(iv) The life expectancy of the individual or the joint life and last survivor expectancy of the individual and spouse cannot exceed the period computed by use of the expected return multiples in § 1.72-9, or, in the case of payments under a contract issued by an insurance company, the period computed by use of the mortality tables of such company.

(v) If an individual's entire interest is to be distributed over a period described in paragraph (b)(6)(iii) of this section, beginning in the year the individual attains 70½ the amount to be distributed each year must be not less than the lesser of the balance of the individual's entire interest or an amount equal to the quotient obtained by dividing the entire interest of the individual in the trust at the beginning of such year (including amounts not in the individual retirement account at the beginning of the year because they have been withdrawn for the purpose of making a rollover contribution to another individual retirement plan) by the life expectancy of the individual (or the joint life and last survivor expectancy of the individual and spouse (whichever is applicable)), determined in either case as of the date the individual attains age 70 in accordance with paragraph (b)(6)(iv) of this section, reduced by one for each taxable year commencing after the individual's attainment of age 70½. An annuity or endowment contract issued by an insurance company which provides for non-increasing payments over one of the periods described in paragraph (b)(6)(iii) of this section beginning not later than the close of the taxable year in which the individual attains age 70½ satisfies this provision. However, no distribution need be made in any year, or a lesser amount may be distributed, if beginning with the year the individual attains age 70½ the aggregate amounts distributed by the end of any year are at least equal to the aggregate of the minimum amounts required by this subdivision to have been distributed by the end of such year.

(vi) If an individual's entire interest is distributed in the form of an annuity contract, then the requirements of section 408(a)(6) are satisfied if the distribution of such contract takes place before the close of the taxable year described in subdivision (ii) of this subparagraph, and if the individual's interest will be paid over a period described in subdivision (iii) of this subparagraph and at a rate which satisfies the requirements of subdivision (v) of this subparagraph.

(vii) In determining whether paragraph (b)(6)(v) of this section is satis-

fied, all individual retirement plans maintained for an individual's benefit (except those under which he is a beneficiary described in section 408(a)(7)) at the close of the taxable year in which he reaches age 70½ must be aggregated. Thus, the total payments which such individual receives in any taxable year must be at least equal to the amount he would have been required to receive had all the plans been one plan at the close of the taxable year in which he attained age 70½.

(7) *Distribution upon death.* (i) The trust instrument must provide that if the individual for whose benefit the trust is maintained dies before the entire interest in the trust has been distributed to him, or if distribution has been commenced as provided in paragraph (b)(6) of this section to the surviving spouse and such spouse dies before the entire interest has been distributed to such spouse, the entire interest (or the remaining part of such interest if distribution thereof has commenced) must, within 5 years after the individual's death (or the death of the surviving spouse) be distributed or applied to the purchase of an immediate annuity for this beneficiary or beneficiaries (or the beneficiary or beneficiaries of the surviving spouse) which will be payable for the life of such beneficiary or beneficiaries (or for a term certain not extending beyond the life expectancy of such beneficiary or beneficiaries) and which annuity contract will be immediately distributed to such beneficiary or beneficiaries. A contract described in the preceding sentence is not includible in gross income upon distribution. Section 1.408-4(e) provides rules applicable to the taxation of such contracts. The first sentence of this paragraph (b)(7) shall have no application if distributions over a term certain commenced before the death of the individual for whose benefit the trust was maintained and the term certain is for a period permitted under paragraph (b)(6)(iii) (C) or (D) of this section.

(ii) Each such beneficiary (or beneficiary of a surviving spouse) may elect to treat the entire interest in the trust (or the remaining part of such interest if distribution thereof has commenced)

as an account subject to the distribution requirements of section 408(a)(6) and paragraph (b)(6) of this section instead of those of section 408(a)(7) and paragraph (b)(7) of this section. Such an election will be deemed to have been made if such beneficiary treats the account in accordance with the requirements of section 408(a)(6) and paragraph (b)(6) of this section. An election will be considered to have been made by such beneficiary if either of the following occurs: (A) any amounts in the account (including any amounts that have been rolled over, in accordance with the requirements of section 408(d)(3)(A)(i), into an individual retirement account, individual retirement annuity, or retirement bond for the benefit of such individual) have not been distributed within the appropriate time period required by section 408(a)(7) and paragraph (b)(7) of this section; or (B) any additional amounts are contributed to the account (or to the account, annuity, or bond to which the beneficiary has rolled such amounts over, as described in (1) above) which are subject, or deemed to be subject, to the distribution requirements of section 408(a)(6) and paragraph (b)(6) of this section.

(8) *Definition of beneficiaries.* The term “beneficiaries” on whose behalf an individual retirement account is established includes (except where the context indicates otherwise) the estate of the individual, dependents of the individual, and any person designated by the individual to share in the benefits of the account after the death of the individual.

(c) *Accounts established by employers and certain association of employees—(1) In general.* A trust created or organized in the United States (as defined in section 7701(a)(9)) by an employer for the exclusive benefit of his employees or their beneficiaries, or by an association of employees for the exclusive benefit of its members or their beneficiaries, is treated as an individual retirement account if the requirements of paragraphs (c)(2) and (c)(3) of this section are satisfied under the written governing instrument creating the trust. A trust described in the preceding sentence is for the exclusive benefit of employees or members even though it

may maintain an account for former employees or members and employees who are temporarily on leave.

(2) *General requirements.* The trust must satisfy the requirements of paragraphs (b) (1) through (7) of this section.

(3) *Special requirement.* There must be a separate accounting for the interest of each employee or member.

(4) *Definitions—(i) Separate accounting.* For purposes of paragraph (c)(3) of this section, the term “separate accounting” means that separate records must be maintained with respect to the interest of each individual for whose benefit the trust is maintained. The assets of the trust may be held in a common trust fund, common investment fund, or common fund for the account of all individuals who have an interest in the trust.

(ii) *Employee association.* For purposes of this paragraph and section 408(c), the term “employee association” means any organization composed of two or more employees, including but not limited to, an employee association described in section 501(c)(4). Such association may include employees within the meaning of section 401(c)(1). There must be, however, some nexus between the employees (e.g., employees of same employer, employees in the same industry, etc.) in order to qualify as an employee association described in this subdivision (ii).

(d) *Custodial accounts.* For purposes of this section and section 408(a), a custodial account is treated as a trust described in section 408(a) if such account satisfies the requirements of section 408(a) except that it is not a trust and if the assets of such account are held by a bank (as defined in section 401(d)(1) and the regulations thereunder) or such other person who satisfies the requirements of paragraph (b)(2)(ii) of this section. For purposes of this chapter, in the case of a custodial account treated as a trust by reason of the preceding sentence, the custodian of such account will be treated as the trustee thereof.

(e)(1) *In general.* The trustee of a trust described in paragraph (b) of this section may be a person other than a bank if the person demonstrates to the satisfaction of the Commissioner that

the manner in which the person will administer trusts will be consistent with the requirements of section 408. The person must demonstrate by written application that the requirements of paragraph (e)(2) to (e)(6) of this section will be met. The written application must be sent to address prescribed by the Commissioner in revenue rulings, notices, and other guidance published in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(b) of this chapter). For procedural and administrative rules, see paragraph (e)(7) of this section.

(2) *Fiduciary ability.* The applicant must demonstrate in detail its ability to act within the accepted rules of fiduciary conduct. Such demonstration must include the following elements of proof:

(i) *Continuity.* (A) The applicant must assure the uninterrupted performance of its fiduciary duties notwithstanding the death or change of its owners. Thus, for example, there must be sufficient diversity in the ownership of the applicant to ensure that the death or change of its owners will not interrupt the conduct of its business. Therefore, the applicant cannot be an individual.

(B) Sufficient diversity in the ownership of an incorporated applicant is demonstrated in the following circumstances:

(1) Individuals each of whom owns more than 20 percent of the voting stock in the applicant own, in the aggregate, no more than 50 percent of such stock;

(2) The applicant has issued securities registered under section 12 (b) of the Securities Exchange Act of 1934 (15 U.S.C. 78l (b)) or required to be registered under section 12(g) (1) of that Act (15 U.S.C. 78l (g)(1)); or

(3) The applicant has a parent corporation within the meaning of section 1563 (a) (1) that has issued securities registered under section 12 (b) of the Securities Exchange Act of 1934 (15 U.S.C. 78l (b)) or required to be registered under Section 12 (g) (1) of that Act (15 U.S.C. 78l (g)(1)).

(C) Sufficient diversity in the ownership of an applicant that is a partnership means that—

(1) Individuals each of whom owns more than 20 percent of the profits in-

terest in the partnership own, in the aggregate, no more than 50 percent of such profits interest, and

(2) Individuals each of whom owns more than 20 percent of the capital interest in the partnership own, in the aggregate, no more than 50 percent of such capital interest.

(D) For purposes of this subdivision, the ownership of stock and of capital and profits interests shall be determined in accordance with the rules for constructive ownership of stock provided in section 1563 (e) and (f) (2). For this purpose, the rules for constructive ownership of stock provided in section 1563(e) and (f) (2) shall apply to a capital or profits interest in a partnership as if it were a stock interest.

(ii) *Established location.* The applicant must have an established place of business in the United States where it is accessible during every business day.

(iii) *Fiduciary experience.* The applicant must have fiduciary experience or expertise sufficient to ensure that it will be able to perform its fiduciary duties. Evidence of fiduciary experience must include proof that a significant part of the business of the applicant consists of exercising fiduciary powers similar to those it will exercise if its application is approved. Evidence of fiduciary expertise must include proof that the applicant employs personnel experienced in the administration of fiduciary powers similar to those the applicant will exercise if its application is approved.

(iv) *Fiduciary responsibility.* The applicant must assure compliance with the rules of fiduciary conduct set out in paragraph (e)(5) of this section.

(v) *Financial responsibility.* The applicant must exhibit a high degree of solvency commensurate with the obligations imposed by this paragraph. Among the factors to be taken into account are the applicant's net worth, its liquidity, and its ability to pay its debts as they come due.

(3) *Capacity to account.* The applicant must demonstrate in detail its experience and competence with respect to accounting for the interests of a large number of individuals (including calculating and allocating income earned and paying out distributions to payees). Examples of accounting for the

interests of a large number of individuals include accounting for the interests of a large number of shareholders in a regulated investment company and accounting for the interests of a large number of variable annuity contract holders.

(4) *Fitness to handle funds*—(i) *In general.* The applicant must demonstrate in detail its experience and competence with respect to other activities normally associated with the handling of retirement funds.

(ii) *Examples.* Examples of activities normally associated with the handling of retirement funds include:

(A) To Receive, issue receipts for, and safely keep securities;

(B) To collect income;

(C) To execute such ownership certificates, to keep such records, make such returns, and render such statements as are required for Federal tax purposes;

(D) To give proper notification regarding all collections;

(E) To collect matured or called principal and properly report all such collections;

(F) To exchange temporary for definitive securities;

(G) To give proper notification of calls, subscription rights, defaults in principal or interest, and the formation of protective committees;

(H) To buy, sell, receive, or deliver securities on specific directions.

(5) *Rules of fiduciary conduct.* The applicant must demonstrate that under applicable regulatory requirements, corporate or other governing instruments, or its established operating procedures:

(i) *Administration of fiduciary powers.*

(A)(1) The owners or directors of the applicant will be responsible for the proper exercise of fiduciary powers by the applicant. Thus, all matters pertinent thereto, including the determination of policies, the investment and disposition of property held in a fiduciary capacity, and the direction and review of the actions of all employees utilized by the applicant in the exercise of its fiduciary powers, will be the responsibility of the owners or directors. In discharging this responsibility, the owners or directors may assign to designated employees, by action duly

recorded, the administration of such of the applicant's fiduciary powers as may be proper to assign.

(2) A written record will be made of the acceptance and of the relinquishment or closing out of all fiduciary accounts, and of the assets held for each account.

(3) If the applicant has the authority or the responsibility to render any investment advice with regard to the assets held in or for each fiduciary account, the advisability of retaining or disposing of the assets will be determined at least once during each period of 12 months.

(B) All employees taking part in the performance of the applicant's fiduciary duties will be adequately bonded. Nothing in this subdivision (i)(B) shall require any person to be bonded in contravention of section 412(d) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1112(d)).

(C) The applicant will employ or retain legal counsel who will be readily available to pass upon fiduciary matters and to advise the applicant.

(D) In order to segregate the performance of its fiduciary duties from other business activities, the applicant will maintain a separate trust division under the immediate supervision of an individual designated for that purpose. The trust division may utilize the personnel and facilities of other divisions of the applicant, and other divisions of the applicant may utilize the personnel and facilities of the trust division, as long as the separate identity of the trust division is preserved.

(ii) *Adequacy of net worth*—(A) *Initial net worth requirement.* In the case of applications received after January 5, 1995, no initial application will be accepted by the Commissioner unless the applicant has a net worth of not less than \$250,000 (determined as of the end of the most recent taxable year). Thereafter, the applicant must satisfy the adequacy of net worth requirements of paragraph (e)(5)(ii)(B) and (C) of this section.

(B) No fiduciary account will be accepted by the applicant unless the applicant's net worth (determined as of the end of the most recent taxable year) exceeds the greater of—

(1) \$100,000, or

(2) Four percent (or, in the case of a passive trustee described in paragraph (e)(6)(i)(A) of this section, two percent) of the value of all of the assets held by the applicant in fiduciary accounts (determined as of the most recent valuation date).

(C) The applicant will take whatever lawful steps are necessary (including the relinquishment of fiduciary accounts) to ensure that its net worth (determined as of the close of each taxable year) exceeds the greater of—

(1) \$50,000, or

(2) Two percent (or, in the case of a passive trustee described in paragraph (e)(6)(i)(A) of this section, one percent) of the value of all of the assets held by the applicant in fiduciary accounts (determined as of the most recent valuation date).

(D) *Assets held by members of SIPC*—(1) For purposes of satisfying the adequacy-of-net-worth requirement of this paragraph, a special rule is provided for nonbank trustees that are members of the Securities Investor Protection Corporation (SIPC) created under the Securities Investor Protection Act of 1970 (SIPA)(15 U.S.C. 78aaa *et seq.*, as amended). The amount that the net worth of a nonbank trustee that is a member of SIPC must exceed is reduced by two percent for purposes of paragraph (e)(5)(ii)(B)(2), and one percent for purposes of paragraph (e)(5)(ii)(C)(2), of the value of assets (determined on an account-by-account basis) held for the benefit of customers (as defined in 15 U.S.C. 78fff-2(e)(4)) in fiduciary accounts by the nonbank trustee to the extent of the portion of each account that does not exceed the dollar limit on advances described in 15 U.S.C. 78fff-3(a), as amended, that would apply to the assets in that account in the event of a liquidation proceeding under the SIPA.

(2) The provisions of this special rule for assets held in fiduciary accounts by members of SIPC are illustrated in the following example.

Example: (a) Trustee X is a broker-dealer and is a member of the Securities Investor Protection Corporation. Trustee X also has been approved as a nonbank trustee for individual retirement accounts (IRAs) by the Commissioner but not as a passive nonbank trustee. Trustee X is the trustee for four IRAs. The total assets of each IRA (for which

Trustee X is the trustee) as of the most recent valuation date before the last day of Trustee X's taxable year ending in 1995 are as follows: the total assets for IRA-1 is \$3,000,000 (all of which is invested in securities); the value of the total assets for IRA-2 is \$500,000 (\$200,000 of which is cash and \$300,000 of which is invested in securities); the value of the total assets for IRA-3 is \$400,000 (all of which is invested in securities); and the value of the total assets of IRA-4 is \$200,000 (all of which is cash). The value of all assets held in fiduciary accounts, as defined in § 1.408-2(e)(6)(viii)(A), is \$4,100,000.

(b) The dollar limit on advances described in 15 U.S.C. § 78fff-3(a) that would apply to the assets in each account in the event of a liquidation proceeding under the Securities Investor Protection Act of 1970 in effect as of the last day of Trustee X's taxable year ending in 1995 is \$500,000 per account (no more than \$100,000 of which is permitted to be cash). Thus, the dollar limit that would apply to IRA-1 is \$500,000; the dollar limit for IRA-2 is \$400,000 (\$100,000 of the cash and the \$300,000 of the value of the securities); the dollar limit for IRA-3 is \$400,000 (the full value of the account because the value of the account is less than \$500,000 and no portion of the account is cash); and the dollar limit for IRA-4 is \$100,000 (the entire account is cash and the dollar limit per account for cash is \$100,000). The aggregate dollar limits of the four IRAs is \$1,400,000.

(c) For 1996, the amount determined under § 1.408-2(e)(5)(ii)(B) is determined as follows for Trustee X: (1) four percent of \$4,100,000 equals \$164,000; (2) two percent of \$1,400,000 equals \$28,000; and (3) \$164,000 minus \$28,000 equals \$136,000. Thus, because \$136,000 exceeds \$100,000, the minimum net worth necessary for Trustee X to accept new accounts for 1996 is \$136,000.

(d) For 1996, the amount determined under § 1.408-2(e)(5)(ii)(C) for Trustee X is determined as follows: (1) two percent of \$4,100,000 equals \$82,000; (2) one percent of \$1,400,000 equals \$14,000; and (3) \$82,000 minus \$14,000 equals \$68,000. Thus, because \$68,000 exceeds \$50,000, the minimum net worth necessary for Trustee X to avoid a mandatory relinquishment of accounts for 1996 is \$68,000.

(E) The applicant will determine the value of the assets held by it in trust at least once in each calendar year and no more than 18 months after the preceding valuation. The assets will be valued at their fair market value, except that the assets of an employee pension benefit plan to which section 103(b)(3)(A) of the Employee Retirement Income Security Act of 1974 (29

U.S.C. 1023(b)(3)(A)) applies will be considered to have the value stated in the most recent annual report of the plan.

(iii) *Audits.* (A) At least once during each period of 12 months, the applicant will cause detailed audits of the fiduciary books and records to be made by a qualified public accountant. At that time, the applicant will ascertain whether the fiduciary accounts have been administered in accordance with law, this paragraph, and sound fiduciary principles. The audits shall be conducted in accordance with generally accepted auditing standards, and shall involve whatever tests of the fiduciary books and records of the applicant are considered necessary by the qualified public accountant.

(B) In the case of an applicant which is regulated, supervised, and subject to periodic examination by a State or Federal agency, such applicant may adopt an adequate continuous audit system in lieu of the periodic audits required by paragraph (e)(5)(iii)(A) of this section.

(C) A report of the audits and examinations required under this subdivision, together with the action taken thereon, will be noted in the fiduciary records of the applicant.

(iv) *Funds awaiting investment or distribution.* Funds held in a fiduciary capacity by the applicant awaiting investment or distribution will not be held uninvested or undistributed any longer than is reasonable for the proper management of the account.

(v) *Custody of investments.* (A) Except for investments pooled in a common investment fund in accordance with the provisions of paragraph (e)(5)(vi) of this section and for investments of accounts established under section 408(q) on or after August 1, 2003, the investments of each account will not be commingled with any other property.

(B) Assets of accounts requiring safekeeping will be deposited in an adequate vault. A permanent record will be kept of assets deposited in or withdrawn from the vault.

(vi) *Common investment funds.* The assets of an account may be pooled in a common investment fund (as defined in paragraph (e)(5)(viii)(C) of this section) if the applicant is authorized under applicable law to administer a common

investment fund and if pooling the assets in a common investment fund is not in contravention of the plan documents or applicable law. The common investment fund must be administered as follows:

(A) Each common investment fund must be established and maintained in accordance with a written agreement, containing appropriate provisions as to the manner in which the fund is to be operated, including provisions relating to the investment powers and a general statement of the investment policy of the applicant with respect to the fund; the allocation of income, profits and losses; the terms and conditions governing the admission or withdrawal of participations in the funds; the auditing of accounts of the applicant with respect to the fund; the basis and method of valuing assets held by the fund, setting forth specific criteria for each type of asset; the minimum frequency for valuation of assets of the fund; the period following each such valuation date during which the valuation may be made (which period in usual circumstances may not exceed 10 business days); the basis upon which the fund may be terminated; and such other matters as may be necessary to define clearly the rights of participants in the fund. A copy of the agreement must be available at the principal office of the applicant for inspection during all business hours, and upon request a copy of the agreement must be furnished to the employer, the plan administrator, any participant or beneficiary of an account, or the individual for whose benefit the account is established or that individual's beneficiary.

(B) All participations in the common investment fund must be on the basis of a proportionate interest in all of the investments.

(C) Not less frequently than once during each period of 3 months the applicant must determine the value of the assets in the fund as of the date set for the valuation of assets. No participation may be admitted to or withdrawn from the fund except (1) on the basis of such valuation and (2) as of such valuation date. No participation may be admitted to or withdrawn from the fund unless a written request for or notice of intention of taking such action has

been entered on or before the valuation date in the fiduciary records of the applicant. No request or notice may be canceled or countermanded after the valuation date.

(D)(1) The applicant must at least once during each period of 12 months cause an adequate audit to be made of the common investment fund by a qualified public accountant.

(2) The applicant must at least once during each period of 12 months prepare a financial report of the fund which, based upon the above audit, must contain a list of investments in the fund showing the cost and current value of each investment; a statement for the period since the previous report showing purchases, with cost; sales, with profit or loss; any other investment changes; income and disbursements; and an appropriate notation as to any investments in default.

(3) The applicant must transmit and certify the accuracy of the financial report to the administrator of each plan participating in the common investment fund within 120 days after the end of the plan year.

(E) When participations are withdrawn from a common investment fund, distributions may be made in cash or ratably in kind, or partly in cash and partly in kind: *Provided*, That all distributions as of any one valuation date must be made on the same basis.

(F) If for any reason an investment is withdrawn in kind from a common investment fund for the benefit of all participants in the fund at the time of such withdrawal and such investment is not distributed ratably in kind, it must be segregated and administered or realized upon for the benefit ratably of all participants in the common investment fund at the time of withdrawal.

(vii) *Books and records.* (A) The applicant must keep its fiduciary records separate and distinct from other records. All fiduciary records must be so kept and retained for as long as the contents thereof may become material in the administration of any internal revenue law. The fiduciary records must contain full information relative to each account.

(B) The applicant must keep an adequate record of all pending litigation to which it is a party in connection with the exercise of fiduciary powers.

(viii) *Definitions.* For purposes of this paragraph (e)(5), and paragraph (e)(2)(v), and paragraph (e)(7) of this section—

(A) The term “account” or “fiduciary account” means a trust described in section 401(a) (including a custodial account described in section 401(f)), a custodial account described in section 403(b)(7), or an individual retirement account described in section 408(a) (including a custodial account described in section 408(h)).

(B) The term “plan administrator” means an administrator as defined in § 1.414(g)-1.

(C) The term “common investment fund” means a trust that satisfies the following requirements:

(1) The trust consists of all or part of the assets of several accounts that have been established with the applicant, and

(2) The trust is described in section 401(a) and is exempt from tax under section 501(a), or is a trust that is created for the purpose of providing a satisfactory diversification of investments or a reduction of administrative expenses for the participating accounts and that satisfies the requirements of section 408(c).

(D) The term “fiduciary records” means all matters which are written, transcribed, recorded, received or otherwise come into the possession of the applicant and are necessary to preserve information concerning the acts and events relevant to the fiduciary activities of the applicant.

(E) The term “qualified public accountant” means a qualified public accountant, as defined in section 103(a)(3)(D) of the Employee Retirement Income Security Act of 1974, 29 U.S.C. 1023(a)(3)(D), who is independent of the applicant.

(F) The term “net worth” means the amount of the applicant’s assets less the amount of its liabilities, as determined in accordance with generally accepted accounting principles.

(6) *Special rules—(i) Passive trustee.* (A) An applicant that undertakes to act

only as a passive trustee may be relieved of one or more of the requirements of this paragraph upon clear and convincing proof that such requirements are not germane, under all the facts and circumstances, to the manner in which the applicant will administer any trust. A trustee is a passive trustee only if under the written trust instrument the trustee has no discretion to direct the investment of the trust funds or any other aspect of the business administration of the trust, but is merely authorized to acquire and hold particular investments specified by the trust instrument. Thus, for example, in the case of an applicant that undertakes merely to acquire and hold the stock of regulated investment companies, the requirements of paragraph (e)(5)(i)(A)(3) in its place, and (i)(D), and (vi) of this section shall not apply and no negative inference shall be drawn from the applicant's failure to demonstrate its experience of competence with respect to the activities described in paragraph (e)(4)(ii)(E) to (H) of this section.

(B) The notice of approval issued to an applicant that is approved by reason of this subdivision shall state that the applicant is authorized to act only as a passive trustee.

(ii) *Federal or State regulation.* Evidence that an applicant is subject to Federal or State regulation with respect to one or more relevant factors shall be given weight in proportion to the extent that such regulatory standards are consonant with the requirements of section 401. Such evidence may be submitted in addition to, or in lieu of, the specific proofs required by this paragraph.

(iii) *Savings account.* (A) An applicant will be approved to act as trustee under this subdivision if the following requirements are satisfied:

(1) The applicant is a credit union, industrial loan company, or other financial institution designated by the Commissioner;

(2) The investment of the trust assets will be solely in deposits in the applicant;

(3) Deposits in the applicant are insured (up to the dollar limit prescribed by applicable law) by an agency or instrumentality of the United States, or

by an organization established under a special statute the business of which is limited to insuring deposits in financial institutions and providing related services.

(B) Any applicant that satisfies the requirements of this subdivision is hereby approved, and (notwithstanding subparagraph (2) of this paragraph) is not required to submit a written application. This approval takes effect on the first day after December 22, 1976, on which the applicant satisfies the requirements of this subdivision, and continues in effect for so long as the applicant continues to satisfy those requirements.

(C) If deposits are insured, but not in the manner provided in paragraph (e)(6)(iii)(A)(3) of this section, the applicant must submit an application. The application, notwithstanding subparagraph (2) of this paragraph, will be limited to a complete description of the insurance of applicant's deposits. The applicant will be approved if the Commissioner approves of the applicant's insurance.

(iv) *Notification of Commissioner.* The applicant must notify the Commissioner in writing of any change that affects the continuing accuracy of any representation made in the application required by this paragraph, whether the change occurs before or after the applicant receives a notice of approval. The notification must be addressed to address prescribed by the Commissioner in revenue rulings, notices, and other guidance published in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(b) of this chapter).

(v) *Substitution of trustee.* No applicant will be approved unless the applicant undertakes to act as trustee only under trust instruments which contain a provision to the effect that the grantor is to substitute another trustee upon notification by the Commissioner that such substitution is required because the applicant has failed to comply with the requirements of this paragraph or is not keeping such records, or making such returns, or rendering such statements as are required by forms or regulations.

(7) *Procedure and administration—(i) Notice of approval.* If the applicant is approved, a written notice of approval

will be issued to the applicant. The notice of approval will state the day on which it becomes effective, and (except as otherwise provided therein) will remain effective until revoked. This paragraph does not authorize the applicant to accept any fiduciary account before such notice of approval becomes effective.

(ii) *Notice of disapproval.* If the applicant is not approved, a written notice will be furnished to the applicant containing a statement of the reasons why the applicant has not been approved.

(iii) *Copy to be furnished.* The applicant must not accept a fiduciary account until after the plan administrator or the person for whose benefit the account is to be established is furnished with a copy of the written notice of approval issued to the applicant. This provision is effective six months after April 20, 1979 for new accounts accepted thereafter. For accounts accepted before that date, the administrator must be notified before the later of the effective date of this provision or six months after acceptance of the account.

(iv) *Grounds for revocation.* The notice of approval issued to an applicant will be revoked if the Commissioner determines that the applicant is unwilling or unable to administer fiduciary accounts in a manner consistent with the requirements of this paragraph. Generally, the notice will not be revoked unless the Commissioner determines that the applicant has knowingly, willfully, or repeatedly failed to administer fiduciary accounts in a manner consistent with the requirements of this paragraph, or has administered a fiduciary account in a grossly negligent manner.

(v) *Procedures for revocation.* The notice of approval issued to an applicant may be revoked in accordance with the following procedures:

(A) If the Commissioner proposes to revoke the notice of approval issued to an applicant, the Commissioner will advise the applicant in writing of the proposed revocation and of the reasons therefor.

(B) Within 60 days after the receipt of such written advice, the applicant may protest the proposed revocation by submitting a written statement of facts,

law, and arguments opposing such revocation to address prescribed by the Commissioner in revenue rulings, notices, and other guidance published in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(b) of this chapter. In addition, the applicant may request a conference in the National Office.

(C) If the applicant consents to the proposed revocation, either before or after a National Office conference, or if the applicant fails to file a timely protest, the Commissioner will revoke the notice of approval that was issued to the applicant.

(D) If, after considering the applicant's protest and any information developed in conference, the Commissioner determines that the applicant is unwilling or unable to administer fiduciary accounts in a manner consistent with the requirements of this paragraph, the Commissioner will revoke the notice of approval that was issued to the applicant and will furnish the applicant with a written statement of findings on which the revocation is based.

(E) If at any time the Commissioner determines that immediate action is necessary to protect the interest of the Internal Revenue Service or of any fiduciary account, the notice of approval issued to the applicant will be suspended at once, pending a final decision to be based on the applicant's protest and any information developed in conference.

(8) *Special rules for governmental units*—(i) *In general.* A governmental unit that seeks to qualify as a nonbank trustee of a deemed IRA that is part of its qualified employer plan must demonstrate to the satisfaction of the Commissioner that it is able to administer the trust in a manner that is consistent with the requirements of section 408. The demonstration must be made by written application to the Commissioner. Notwithstanding the requirement of paragraph (e)(1) of this section that a person must demonstrate by written application that the requirements of paragraphs (e)(2) through (e)(6) of this section will be met in order to qualify as a nonbank trustee, a governmental unit that maintains a plan qualified under section 401(a), 403(a), 403(b) or 457 need not

demonstrate that all of these requirements will be met with respect to any individual retirement accounts maintained by that governmental unit pursuant to section 408(q). For example, a governmental unit need not demonstrate that it satisfies the net worth requirements of paragraph (e)(3)(ii) of this section if it demonstrates instead that it possesses taxing authority under applicable law. The Commissioner, in his discretion, may exempt a governmental unit from certain other requirements upon a showing that the governmental unit is able to administer the deemed IRAs in the best interest of the participants. Moreover, in determining whether a governmental unit satisfies the other requirements of paragraphs (e)(2) through (e)(6) of this section, the Commissioner may apply the requirements in a manner that is consistent with the applicant's status as a governmental unit.

(ii) *Governmental unit.* For purposes of this special rule, the term *governmental unit* means a state, political subdivision of a state, and any agency or instrumentality of a state or political subdivision of a state.

(iii) *Additional rules.* The Commissioner may in revenue rulings, notices, or other guidance of general applicability provide additional rules for governmental units seeking approval as nonbank trustees.

(iv) *Effective/applicability date.* This section is applicable for written applications made on or after June 18, 2007. The rules in this section also may be relied on for applications submitted on or after August 1, 2003 (or such earlier application as the Commissioner deems appropriate) and before June 18, 2007.

[T.D. 7714, 45 FR 52791, Aug. 8, 1980, as amended by T.D. 8635, 60 FR 65549, Dec. 20, 1995; 61 FR 11307, Mar. 20, 1996; T.D. 9142, 69 FR 43739, July 22, 2004; T.D. 9331, 72 FR 33388, June 18, 2007]

§ 1.408-3 Individual retirement annuities.

(a) *In general.* An individual retirement annuity is an annuity contract or endowment contract (described in paragraph (e)(1) of this section) issued by an insurance company which is qualified to do business under the law of the jurisdiction in which the con-

tract is sold and which satisfies the requirements of paragraph (b) of this section. A participation certificate in a group contract issued by an insurance company described in this paragraph will be treated as an individual retirement annuity if the contract satisfies the requirements of paragraph (b) of this section; the certificate of participation sets forth the requirements of paragraphs (1) through (5) of section 408 (b); the contract provides for a separate accounting of the benefit allocable to each participant-owner; and the group contract is for the exclusive benefit of the participant owners and their beneficiaries. For purposes of this title, a participant-owner of a group contract described in this paragraph shall be treated as the owner of an individual retirement annuity. A contract will not be treated as other than an individual retirement annuity merely because it provides for waiver of premium on disability. An individual retirement annuity contract which satisfies the requirements of section 408 (b) need not be purchased under a trust if the requirements of paragraph (b) of this section are satisfied. An individual retirement endowment contract may not be held under a trust which satisfies the requirements of section 408 (a). Distribution of the contract is not a taxable event. Distributions under the contract are includible in gross income in accordance with the provisions of § 1.408-4 (e).

(b) *Requirements—(1) Transferability.* The annuity or the endowment contract must not be transferable by the owner. An annuity or endowment contract is transferable if the owner can transfer any portion of his interest in the contract to any person other than the issuer thereof. Accordingly, such a contract is transferable if the owner can sell, assign, discount, or pledge as collateral for a loan or as security for the performance of an obligation or for any other purpose his interest in the contract to any person other than the issuer thereof. On the other hand, a contract is not to be considered transferable merely because the contract contains: a provision permitting the individual to designate a beneficiary to receive the proceeds in the event of his

death, a provision permitting the individual to elect a joint and survivor annuity, or other similar provisions.

(2) *Annual premium.* Except in the case of a contribution to a simplified employee pension described in section 408 (k), the annual premium on behalf of any individual for the annuity or the endowment contract cannot exceed \$1,500. Any refund of premiums must be applied before the close of the calendar year following the year of the refund toward the payment of future premiums or the purchase of additional benefits.

(3) *Distribution.* The entire interest of the owner must be distributed to him in the same manner and over the same period as described in § 1.408-2 (b) (6).

(4) *Distribution upon death.* If the owner dies before the entire interest has been distributed to him, or if distribution has commenced to the surviving spouse, the remaining interest must be distributed in the same manner, over the same period, and to the same beneficiaries as described in § 1.408-2 (b) (7).

(5) *Nonforfeatability.* The entire interest of the owner in the annuity or endowment contract must be nonforfeitable.

(6) *Flexible premium.* [Reserved]

(c) *Disqualification.* If during any taxable year the owner of an annuity borrows any money under the annuity or endowment contract or by use of such contract (including, but not limited to, pledging the contract as security for any loan), such contract will cease to be an individual retirement annuity as of the first day of such taxable year, and will not be an individual retirement annuity at any time thereafter. If an annuity or endowment contract which constitutes an individual retirement annuity is disqualified as a result of the preceding sentence, an amount equal to the fair market value of the contract as of the first day of the taxable year of the owner in which such contract is disqualified is deemed to be distributed to the owner. Such owner shall include in gross income for such year an amount equal to the fair market value of such contract as of such first day. The preceding sentence applies even though part of the fair market value of the individual retirement

annuity as of the first day of the taxable year is attributable to excess contributions which may be returned tax-free under section 408(d)(4) or 408(d)(5).

(d) *Premature distribution tax on deemed distribution.* If the individual has not attained age 59½ before the beginning of the year in which the disqualification described in paragraph (c) of this section occurs, see section 408(f)(2) for additional tax on premature distributions.

(e) *Endowment contracts—(1) Additional requirement for endowment contracts.* No contract providing life insurance protection issued by a company described in paragraph (a) of this section shall be treated as an endowment contract for purposes of this section if—

(i) Such contract matures later than the taxable year in which the individual in whose name the contract is purchased attains the age of 70½;

(ii) Such contract is not for the exclusive benefit of such individual or his beneficiaries;

(iii) Premiums under the contract may increase over the term of the contract;

(iv) When all premiums are paid when due, the case value of such contract at maturity is less than the death benefit payable under the contract at any time before maturity;

(v) The death benefit does not, at some time before maturity, exceed the greater of the cash value or the sum of premiums paid under the contract;

(vi) Such contract does not provide for a cash value;

(vii) Such contract provides that the life insurance element of such contract may increase over the term of such contract, unless such increase is merely because such contract provides for the purchase of additional benefits;

(viii) Such contract provides insurance other than life insurance and waiver of premiums upon disability; or

(ix) Such contract is issued after November 6, 1978.

(2) *Treatment of proceeds under endowment contract upon death of individual.* In the case of the payment of a death benefit under an endowment contract upon the death of the individual in whose name the contract is purchased, the portion of such payment which is

equal to the cash value immediately before the death of such individual is not excludable from gross income under section 101(a) and is treated as a distribution from an individual retirement annuity. The remaining portion, if any, of such payment constitutes current life insurance protection and is excludable under section 101(a). If a death benefit is paid under an endowment contract at a date or dates later than the death of the individual, section 101(d) is applicable only to the portion of the benefit which is attributable to the amount excludable under section 101(a).

[T.D. 7714, 45 FR 52792, Aug. 8, 1980]

§ 1.408-4 Treatment of distributions from individual retirement arrangements.

(a) *General rule*—(1) *Inclusion in income*. Except as otherwise provided in this section, any amount actually paid or distributed or deemed paid or distributed from an individual retirement account or individual retirement annuity shall be included in the gross income of the payee or distributee for the taxable year in which the payment or distribution is received.

(2) *Zero basis*. Notwithstanding section 1015(d) or any other provision of the Code, the basis (or investment in the contract) of any person in such an account or annuity is zero. For purposes of this section, an assignment of an individual's rights under an individual retirement account or an individual retirement annuity shall, except as provided in § 1.408-4(g) (relating to transfer incident to divorce), be deemed a distribution to such individual from such account or annuity of the amount assigned.

(b) *Rollover contribution*—(1) *To individual retirement arrangement*. Paragraph (a)(1) of this section shall not apply to any amount paid or distributed from an individual retirement account or individual retirement annuity to the individual for whose benefit the account was established or who is the owner of the annuity if the entire amount received (including the same amount of money and any other property) is paid into an individual retirement account, annuity (other than an endowment contract), or bond created

for the benefit of such individual not later than the 60th day after the day on which he receives the payment or distribution.

(2) *To qualified plan*. Paragraph (a)(1) of this section does not apply to any amount paid or distributed from an individual retirement account or individual retirement annuity to the individual for whose benefit the account was established or who is the owner of the annuity if—

(i) No amount in the account or no part of the value of the annuity is attributable to any source other than a rollover contribution from an employees' trust described in section 401(a) which is exempt from tax under section 501(a) or a rollover contribution from an annuity plan described in section 403(a) and the earnings on such sums, and

(ii) The entire amount received (including the same amount of money and any other property) represents the entire amount in the account and is paid into another such trust or plan (for the benefit of such individual) not later than the 60th day after the day on which the payment or distribution is received.

This subparagraph does not apply if any portion of the rollover contribution described in paragraph (b)(2)(i) of this section is attributable to an employees' trust forming part of a plan or an annuity under which the individual was an employee within the meaning of section 401(c)(1) at the time contributions were made on his behalf under the plan.

(3) *To section 403(b) contract*. [Reserved]

(4) *Frequency limitation*. (i) For taxable years beginning on or before December 31, 1977, paragraph (b)(1) of this section does not apply to any amount received by an individual from an individual retirement account, annuity or bond if at any time during the 3-year period ending on the day of receipt, the individual received any other amount from an individual retirement account, annuity or bond which was not includible in his gross income because of the application of paragraph (b)(1) of this section.

(ii) [Reserved]

(c) *Excess contributions returned before due date of return*—(1) *Excess contribution.* The rules in this paragraph (c) apply for purposes of determining net income attributable to IRA contributions made before January 1, 2004, and returned pursuant to section 408(d)(4). The rules in § 1.408-11 apply for purposes of determining net income attributable to IRA contributions made on or after January 1, 2004, and returned pursuant to section 408(d)(4). For purposes of this paragraph, excess contributions are the excess of the amounts contributed to an individual retirement account or paid for an individual retirement annuity during the taxable year over the amount allowable as a deduction under section 219 or 220 for the taxable year.

(2) *General rule.* (i) Paragraph (a)(1) of this section does not apply to the distribution of any excess contribution paid during a taxable year to an account or annuity if: the distribution is received on or before the date prescribed by law (including extensions) for filing the individual's return for such taxable year; no deduction is allowed under section 219 or section 220 with respect to the excess contribution; and the distribution is accompanied by the amount of net income attributable to the excess contribution as of the date of the distribution as determined under subdivision (ii).

(ii) The amount of net income attributable to the excess contributions is an amount which bears the same ratio to the net income earned by the account during the computation period as the excess contribution bears to the sum of the balance of the account as of the first day of the taxable year in which the excess contribution is made and the total contribution made for such taxable year. For purposes of this paragraph, the term "computation period" means the period beginning on the first day of the taxable year in which the excess contribution is made and ending on the date of the distribution from the account.

(iii) For purposes of paragraph (c)(2)(ii), the net income earned by the account during the computation period is the fair market value of the balance of the account immediately after the distribution increased by the amount

of distributions from the account during the computation period, and reduced (but not below zero) by the sum of: (A) the fair market value of the balance of the account as of the first day of the taxable year in which the excess contribution is made and (B) the contributions to the account made during the computation period.

(3) *Time of inclusion.* (i) For taxable years beginning before January 1, 1977, the amount of net income determined under subparagraph (2) is includible in the gross income of the individual for the taxable year in which it is received. The amount of net income thus distributed is subject to the tax imposed by section 408(f)(1) for the year includible in gross income.

(ii) [Reserved]

(4) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example. On January 1, 1975, A, age 55, who is a calendar-year taxpayer, contributes \$1,500 to an individual retirement account established for his benefit. For 1975, A is entitled to a deduction of \$1,400 under section 219. For 1975, A does not claim as deductions any other items listed in section 62. A's gross income for 1975 is \$9,334. On April 1, 1976, \$107 is distributed to A from his individual retirement account. As of such date, the balance of the account is \$1,498 [\$1,605 - \$107]. There were no other distributions from the account as of such date. The net amount of income earned by the account is \$105 [\$1,498 + \$107 - (0 + \$1,500)]. The net income attributable to the excess contribution is \$7. [\$105 × (\$100/\$1,500)]. A's adjusted gross income for 1975 is his gross income for 1975 (\$9,334) reduced by the amount allowable to A as a deduction under section 219 (\$1,400), or \$7,934. A will include the \$7 of the \$107 distributed on April 1, 1976, in his gross income for 1976. Further, A will pay an additional income tax of \$.70 for 1976 under section 408(f)(1).

(d) *Deemed distribution*—(1) *General rule.* In any case in which an individual retirement account ceases to be an individual retirement account by reason of the application of section 408(e)(2), paragraph (a)(1) of this section shall apply as if there were a distribution on the first day of the taxable year in which such account ceases to be an individual retirement account of an amount equal to the fair market value on such day of all of the assets in the account on such day. In the case of a

deemed distribution from an individual retirement annuity, see §1.408-3(d).

(2) *Using account as security.* In any case in which an individual for whose benefit an individual retirement account is established uses, directly or indirectly, all or any portion of the account as security for a loan, paragraph (a)(1) of this section shall apply as if there were distributed on the first day of the taxable year in which the loan was made an amount equal to that portion of the account used as security for such loan.

(e) *Distribution of annuity contracts.* Paragraph (a)(1) of this section does not apply to any annuity contract which is distributed from an individual retirement account and which satisfies the requirements of paragraphs (b) (1), (3), (4) and (5) of section 408. Amounts distributed under such contracts will be taxable to the distributee under section 72. For purposes of applying section 72 to a distribution from such a contract, the investment in such contract is zero.

(f) *Treatment of assets distributed from an individual retirement account for the purchase of an endowment contract.* Under section 408(e)(5), if all, or any portion, of the assets of an individual retirement account are used to purchase an endowment contract described in §1.408-3(e) for the benefit of the individual for whose benefit the account is established—

(1) The excess, if any, of the total amount of assets used to purchase such contract over the portion of the assets attributable to life insurance protection shall be treated as a rollover contribution described in section 408(d)(3), and

(2) The portion of the assets attributable to life insurance protection shall be treated as a distribution described in paragraph (a)(91) of this section, except that the provisions of section 408(f) shall not apply to such amount.

(g) *Transfer incident to divorce—(1) General rule.* The transfer of an individual's interest, in whole or in part, in an individual retirement account, individual retirement annuity, or a retirement bond, to his former spouse under a valid divorce decree or a written instrument incident to such divorce shall

not be considered to be a distribution from such an account or annuity to such individual or his former spouse; nor shall it be considered a taxable transfer by such individual to his former spouse notwithstanding any other provision of Subtitle A of the Code.

(2) *Spousal account.* The interest described in this paragraph (g) which is transferred to the former spouse shall be treated as an individual retirement account of such spouse if the interest is an individual retirement account; an individual retirement annuity of such spouse if such interest is an individual retirement annuity; and a retirement bond of such spouse if such interest is a retirement bond.

[T.D. 7714, 45 FR 52793, Aug. 8, 1980, as amended by T.D. 9056, 68 FR 23588, May 5, 2003]

§ 1.408-5 Annual reports by trustees or issuers.

(a) *In general.* The trustee of an individual retirement account or the issuer of an individual retirement annuity shall make annual calendar year reports concerning the status of the account or annuity. The report shall contain the information required in paragraph (b) and be furnished or filed in the manner and time specified in paragraph (c).

(b) *Information required to be included in the annual reports.* The annual calendar year report shall contain the following information for transactions occurring during the calendar year—

(1) The amount of contributions;

(2) The amount of distributions;

(3) In the case of an endowment contract, the amount of the premium paid allocable to the cost of life insurance;

(4) The name and address of the trustee or issuer; and

(5) Such other information as the Commissioner may require.

(c) *Manner and time for filing.* (1) The annual report shall be furnished to the individual on whose behalf the account is established or in whose name the annuity is purchased (or the beneficiary of the individual or owner). The report shall be furnished on or before the 30th day of June following the calendar year for which the report is required.

(2) The Commissioner may require the annual report to be filed with the

Service at the time the Commissioner specifies.

(d) *Penalties.* Section 6693 prescribes penalties for failure to file the annual report.

(e) *Effective date.* This section shall apply to reports for calendar years after 1978.

(f) *Reports for years prior to 1979.* For years prior to 1979, a trustee or issuer shall make reports in the time and manner as the Commissioner requires.

[T.D. 7714, 45 FR 52795, Aug. 8, 1980]

§ 1.408-6 Disclosure statements for individual retirement arrangements.

(a) *In general*—(1) *General rule.* Trustees and issuers of individual retirement accounts and annuities are, under the authority of section 408(i), required to provide disclosure statements. This section sets forth these requirements.

(2) [Reserved]

(b)–(c) [Reserved]

(d) *Requirements.* (1)–(3) [Reserved]

(4) *Disclosure statements*—(i) Under the authority contained in section 408(i), a disclosure statement shall be furnished in accordance with the provisions of this subparagraph by the trustee of an individual retirement account described in section 408(a) or the issuer of an individual retirement annuity described in section 408(b) or of an endowment contract described in section 408(b) to the individual (hereinafter referred to as the “benefited individual”) for whom such an account, annuity, or contract is, or is to be, established.

(ii)(A)(1) The trustee or issuer shall furnish, or cause to be furnished, to the benefited individual, a disclosure statement satisfying the requirements of subdivisions (iii) through (viii) of this subparagraph, as applicable, and a copy of the governing instrument to be used in establishing the account, annuity, or endowment contract. The copy of such governing instrument need not be filled in with financial and other data pertaining to the benefited individual; however, such copy must be complete in all other respects. The disclosure statement and copy of the governing instrument must be received by the benefited individual at least seven days preceding the earlier of the date of establishment or purchase of the account, annuity, or endowment con-

tract. A disclosure statement or copy of the governing instrument required by this subparagraph may be received by the benefited individual less than seven days preceding, but no later than, the earlier of the date of establishment or purchase, if the benefited individual is permitted to revoke the account, annuity, or endowment contract pursuant to a procedure which satisfies the requirements of subdivision (ii)(A)(2) of this subparagraph.

(2) A procedure for revocation satisfies the requirements of this subdivision (ii)(A)(2) of this subparagraph if the benefited individual is permitted to revoke the account, or endowment contract by mailing or delivering, at his option, a notice of revocation on or before a day not less than seven days after the earlier of the date of establishment or purchase and, upon revocation, is entitled to a return of the entire amount of the consideration paid by him for the account, annuity, or endowment contract without adjustment for such items as sales commissions, administrative expenses or fluctuation in market value. The procedure may require that the notice be in writing or that it be oral, or it may require both a written and an oral notice. If an oral notice is required or permitted, the procedure must permit it to be delivered by telephone call during normal business hours. If a written notice is required or permitted, the procedure must provide that, if mailed, it shall be deemed mailed on the date of the postmark (or if sent by certified or registered mail, the date of certification or registration) if it is deposited in the mail in the United States in an envelope, or other appropriate wrapper, first class postage prepaid, properly addressed.

(B) If after a disclosure statement has been furnished, or caused to be furnished, to the benefited individual pursuant to paragraph (d)(4)(ii)(A) of this section and—

(1) On or before the earlier of the date of establishment or purchase, or

(2) On or before the last day on which the benefited individual is permitted to revoke the account, annuity, or endowment contract (if the benefited individual has a right to revoke the account, annuity, or endowment contract

pursuant to the rules of subdivision (ii)(A) of this subparagraph).

there becomes effective a material adverse change in the information set forth in such disclosure statement or a material change in the governing instrument to be used in establishing the account, annuity, or contract, the trustee or issuer shall furnish, or cause to be furnished, to the benefited individual such amendments to any previously furnished disclosure statement or governing instrument as may be necessary to adequately inform the benefited individual of such change. The trustee or issuer shall be treated as satisfying this subdivision (ii)(B) of this subparagraph only if material required to be furnished by this subdivision is received by the benefited individual at least seven days preceding the earlier of the date of establishment or purchase of the account, annuity, or endowment contract or if the benefited individual is permitted to revoke the account, annuity, or endowment contract on or before a date not less than seven days after the date on which such material is received, pursuant to a procedure for revocation otherwise satisfying the provisions of subdivision (ii)(A)(2) of this subparagraph.

(C) If the governing instrument is amended after the account, annuity, or endowment contract is no longer subject to revocation pursuant to subdivision (ii)(A) or (B) of this subparagraph, the trustee or issuer shall not later than the 30th day after the later of the date on which the amendment is adopted or becomes effective, deliver or mail to the last known address of the benefited individual a copy of such amendment and, if such amendment affects a matter described in subdivisions (iii) through (viii) of this subparagraph, a disclosure statement with respect to such matter meeting the requirements of subdivision (iv) of this subparagraph.

(D) For purposes of subdivision (ii)(A) and (B) of this subparagraph, if a disclosure statement, governing instrument, or an amendment to either, is mailed to the benefited individual, it shall be deemed (in the absence of evidence to the contrary) to be received by the benefited individual seven days after the date of mailing.

(E) In the case of a trust described in section 408(c) (relating to certain retirement savings arrangements for employees or members of associations of employees), the following special rules shall be applied:

(1) For purposes of this subparagraph, references to the benefited individual's account, annuity, or endowment contract shall refer to the benefited individual's interest in such trust, and

(2) The provisions of subdivision (ii) of this subparagraph shall be applied by substituting "the date on which the benefited individual's interest in such trust commences" for "the earlier of the date of establishment or purchase" wherever it appear therein.

Thus, for example, if an employer establishes a trust described in section 408(c) for the benefit of employees, and the trustee furnishes an employee with a disclosure statement and a copy of the governing instrument (as required by this subparagraph) on the date such employee's interest in the trust commences, such employee must be given a right to revoke such interest within a period of at least seven days. If any contribution has been made within such period (whether by the employee or by the employer), the full amount of such contribution must be paid to such employee pursuant to subdivision (ii)(A)(2) of this subparagraph.

(iii) The disclosure statement required by this subparagraph shall set forth in nontechnical language the following matters as such matters relate to the account, annuity, or endowment contract (as the case may be):

(A) Concise explanations of—

(1) The statutory requirements prescribed in section 408(a) (relating to an individual retirement account) or section 408(b) (relating to an individual retirement annuity and an endowment contract), and any additional requirements (whether or not required by law) that pertain to the particular retirement savings arrangement.

(2) The income tax consequences of establishing an account, annuity, or endowment contract (as the case may be) which meets the requirements of section 408(a) relating to an individual retirement account) or section 408(b) (relating to an individual retirement annuity and an endowment contract),

including the deductibility of contributions to, the tax treatment of distributions (other than premature distributions) from, the availability of income tax free rollovers to and from, and the tax status of such account, annuity, or endowment contract.

(3) The limitations and restrictions on the deduction for retirement savings under section 219, including the ineligibility of certain individuals who are active participants in a plan described in section 219(b)(2)(A) or for whom amounts are contributed under a contract described in section 219(b)(2)(B) to make deductible contributions to an account or for an annuity or endowment contract.

(4) The circumstances under which the benefited individual may revoke the account, annuity, or endowment contract, and the procedure therefor (including the name, address, and telephone number of the person designated to receive notice of such revocation). Such explanation shall be prominently displayed at the beginning of the disclosure statement.

(B) Statements to the effect that—

(1) If the benefited individual or his beneficiary engages in a prohibited transaction, described in section 4975(c) with respect to an individual retirement account, the account will lose its exemption from tax by reason of section 408(e)(2)(A), and the benefited individual must include in gross income, for the taxable year during which the benefited individual or his beneficiary engages in the prohibited transaction the fair market value of the account.

(2) If the owner of an individual retirement annuity or endowment contract described in section 408(b) borrows any money under, or by use of, such annuity or endowment contract, then, under section 408(e)(3), such annuity or endowment contract loses its section 408(b) classification, and the owner must include in gross income, for the taxable year during which the owner borrows any money under, or by use of, such annuity or endowment contract, the fair market value of the annuity or endowment contract.

(3) If a benefited individual uses all or any portion of an individual retirement account as security for a loan, then, under section 408(e)(4), the por-

tion so used is treated as distributed to such individual and the benefited individual must include such distribution in gross income for the taxable year during which he so uses such account.

(4) An additional tax of 10 percent is imposed by section 408(f) on distributions (including amounts deemed distributed as the result of a prohibited loan or use as security for a loan) made before the benefited individual has attained age 59½, unless such distribution is made on account of death or disability, or unless a rollover contribution is made with such distribution.

(5) Sections 2039(e) (relating to exemption from estate tax of annuities under certain trusts and plans) and 2517 (relating to exemption from gift tax of specified transfers of certain annuities under qualified plans) apply (including the manner in which such sections apply) to the account, annuity, or endowment contract.

(6) Section 402(a)(2) and (e) (relating to tax on lump sum distributions) is not applicable to distributions from an account, annuity, or endowment contract.

(7) A minimum distribution is required under section 408(a) (6) or (7) and 408(b) (3) or (4) (including a brief explanation of the amount of minimum distribution) and that if the amount distributed from an account, annuity, or endowment contract during the taxable year of the payee is less than the minimum required during such year, an excise tax, which shall be paid by the payee, is imposed under section 4974, in an amount equal to 50 percent of the excess of the minimum required to be distributed over the amount actually distributed during the year.

(8) An excise tax is imposed under section 4973 on excess contributions (including a brief explanation of an excess contribution).

(9) The benefited individual must file Form 5329 (Return for Individual Retirement Savings Arrangement) with the Internal Revenue for each taxable year during which the account, annuity, or endowment contract is maintained.

(10) The account or contract has or has not (as the case may be) been approved as to form for use as an account, annuity, or endowment contract

by the Internal Revenue Service. For purposes of this subdivision, if a favorable opinion or determination letter with respect to the form of a prototype trust, custodial account, annuity, or endowment contract has been issued by the Internal Revenue Service, or the instrument which establishes an individual retirement trust account or an individual retirement custodial account utilizes the precise language of a form currently provided by the Internal Revenue Service (including any additional language permitted by such form), such account or contract may be treated as approved as to form.

(11) The Internal Revenue Service approval is a determination only as to the form of the account, annuity, or endowment contract, and does not represent a determination of the merits of such account, annuity, or endowment contract.

(12) The proceeds from the account, annuity or endowment contract may be used by the benefited individual as a rollover contribution to another account or annuity or retirement bond in accordance with the provisions of section 408(d)(3).

(13) In the case of an endowment contract described in section 408(b), no deduction is allowed under section 219 for that portion of the amounts paid under the contract for the taxable year properly allocable to the cost of life insurance.

(14) If applicable, in the event that the benefited individual revokes the account, annuity, or endowment contract, pursuant to the procedure described in the disclosure statement (see subdivision (A)(4) of this subdivision (iii)), the benefited individual is entitled to a return of the entire amount of the consideration paid by him for the account, annuity, or endowment contract without adjustment for such items as sales commissions, administrative expenses or fluctuation in market value.

(15) Further information can be obtained from any district office of the Internal Revenue Service.

To the extent that information on the matters described in subdivisions (iii) (A) and (B) of this subparagraph is provided in a publication of the Internal Revenue Service relating to indi-

vidual retirement savings arrangements, such publication may be furnished by the trustee or issuer in lieu of providing information relating to such matters in a disclosure statement.

(C) The financial disclosure required by paragraph (d)(4) (v), (vi), and (vii) of this section.

(iv) In the case of an amendment to the terms of an account, annuity, or endowment contract described in paragraph (d)(4)(i) of this section, the disclosure statement required by this subparagraph need not repeat material contained in the statement furnished pursuant to paragraph (d)(4)(iii) of this section, but it must set forth in non-technical language those matters described in paragraph (d)(4)(iii) of this section which are affected by such amendment.

(v) With respect to an account, annuity, or endowment contract described in paragraph (d)(4)(i) of this section (other than an account or annuity which is to receive only a rollover contribution described in paragraph (d)(4)(vi) of this section and to which no deductible contributions will be made), the disclosure statement must set forth in cases where either an amount is guaranteed over period of time (such as in the case of a non-participating endowment or annuity contract), or a projection of growth of the value of the account, annuity, or endowment contract can reasonably be made (such as in the case of a participating endowment or annuity contract (other than a variable annuity) or pass-book savings account), the following:

(A) To the extent that an amount is guaranteed,

(1) The amount, determined without regard to any portion of a contribution which is not deductible, that would be guaranteed to be available to the benefited individual if (i) level annual contributions in the amount of \$1,000 were to be made on the first day of each year, and (ii) the benefited individual were to withdraw in a single sum the entire amount of such account, annuity, or endowment contract at the end of each of the first five years during which contributions are to be made, at the end of the year in which the benefited individual attains the ages of 60, 65, and 70, and at the end of any other

year during which the increase of the guaranteed available amount is less than the increase of the guaranteed available amount during any preceding year for any reason other than decrease of cessation of contributions, and

(2) A statement that the amount described in subdivision (v)(A)(1) of this subparagraph is guaranteed, and the period for which guaranteed;

(B) To the extent a projection of growth of the value of the account, annuity, or endowment contract can reasonably be made but the amounts are not guaranteed.

(1) The amount, determined without regard to any portion of a contribution which is not deductible, and upon the basis of an earnings rate no greater than, and terms no different from, those currently in effect, that would be available to the benefited individual if (i) level annual contributions in the amount of \$1,000 were to be made on the first day of each year, and (ii) the benefited individual were to withdraw in a single sum the entire amount of such account, annuity, or endowment contract at the end of each of the first five years during which contributions are to be made, at the end of each of the years in which the benefited individual attains the ages of 60, 65, and 70, and at the end of any other year during which the increase of the available amount is less than the increase of the available amount during any preceding year for any reason other than decrease or cessation of contributions, and

(2) A statement that the amount described in paragraph (d)(4)(v)(B)(1) of this section is a projection and is not guaranteed and a statement of the earnings rate and terms on the basis of which the projection is made;

(C) The portion of each \$1,000 contribution attributable to the cost of life insurance, which would not be deductible, for each year during which contributions are to be made; and

(D) The sales commission (including any commission attributable to the sale of life insurance), if any, to be charged in each year, expressed as a percentage of gross annual contributions (including any portion attrib-

utable to the cost of life insurance) to be made for each year.

(vi) With respect to an account or annuity described in paragraph (d)(4)(i) of this section to which a rollover contribution described in section 402(a)(5)(A), 403(a)(4)(A), 408(d)(3)(A) or 409(b)(3)(C) will be made, the disclosure statement must set forth, in cases where an amount is guaranteed over a period of time (such as in the case of a non-participating annuity contract, or a projection of growth of the value of the account or annuity can reasonably be made (such as in the case of a participating annuity contract (other than a variable annuity) or a passbook savings account), the following:

(A) To the extent guaranteed,

(1) The amount that would be guaranteed to be available to the benefited individual if (i) Such a rollover contribution in the amount of \$1,000 were to be made on the first day of the year, (ii) No other contribution were to be made, and (iii) The benefited individual were to withdraw in a single sum the entire amount of such account or annuity at the end of each of the first five years after the contribution is made, at the end of the year in which the benefited individual attains the ages of 60, 65, and 70, and at the end of any other year during which the increase of the guaranteed available amount is less than the increase of the guaranteed available amount during any preceding year, and

(2) A statement that the amount described in paragraph (d)(vi)(A)(1) of this section is guaranteed;

(B) To the extent that a projection of growth of the value of the account or annuity can reasonably be made but the amounts are not guaranteed,

(1) The amount, determined upon the basis of an earnings rate no greater than, and terms no different from, those currently in effect, that would be available to the benefited individual if (i) such a rollover contribution in the amount of \$1,000 were to be made on the first day of the year, (ii) no other contribution were to be made, and (iii) the benefited individual were to withdraw in a single sum the entire amount of such account or annuity at the end of each of the first five years after the contribution is made, at the end of

each of the years in which the benefited individual attains the ages 60, 65, 70, and at the end of any other year during which the increase of the available amount is less than the increase of the available amount during any preceding year, and

(2) A statement that the amount described in paragraph (d)(4)(vi)(B)(1) of this section is a projection and is not guaranteed and a statement of the earnings rate and terms on the basis of which the projection is made; and

(C) The sales commission, if any, to be charged in each year, expressed as a percentage of the assumed \$1,000 contribution.

(vii) With respect to an account, annuity, or endowment contract described in paragraph (d)(4)(i) of this section, in all cases not subject to paragraph (d)(4)(v) or (vi) of this section (such as in the case of a mutual fund or variable annuity), the disclosure statement must set forth information described in subdivisions (A) through (C) of this subdivisions (vii) based (as applicable with respect to the type or types of contributions to be received by the account, annuity, or endowment contract) upon the assumption of (1) level annual contributions of \$1,000 on the first day of each year, (2) a rollover contribution of \$1,000 on the first day of the year and no other contributions, or (3) a rollover contribution of \$1,000 on the first day of the year plus level annual contributions of \$1,000 on the first day of each year.

(A) A description (in nontechnical language) with respect to the benefited individual's interest in the account, annuity, or endowment contract, of:

(1) Each type of charge, and the amount thereof, which may be made against a contribution,

(2) The method for computing and allocating annual earnings, and

(3) Each charge (other than those described in complying with paragraph (d)(4)(vii)(A)(1) of this section) which may be applied to such interest in determining the net amount of money available to the benefited individual and the method of computing each such charge;

(B) A statement that growth in value of the account, annuity, or endowment

contract is neither guaranteed nor projected; and

(C) The portion of each \$1,000 contribution attributable to the cost of life insurance, which would not be deductible, for every year during which contributions are to be made.

(viii) A disclosure statement, or an amendment thereto, furnished pursuant to the provisions of this subparagraph may contain information in addition to that required by paragraph (d)(4)(iii) through (vii) of this section. However, such disclosure statement will not be considered to comply with the provisions of this subparagraph if the substance of such additional material or the form in which it is presented causes such disclosure statement to be false or misleading with respect to the information required to be disclosed by this paragraph.

(ix) The provisions of section 6693, relating to failure to provide reports on individual retirement accounts or annuities, shall apply to any trustee or issuer who fails to furnish, or cause to be furnished, a disclosure statement, a copy of the governing instrument, or an amendment to either, as required by this paragraph.

(x) This section shall be effective for disclosure statements and copies of governing instruments mailed, or delivered without mailing, after February 14, 1977.

(xi) This section does not reflect the amendments made by section 1501 of the Tax Reform Act of 1976 (90 Stat. 1734) relating to retirement savings for certain married individuals.

[T.D. 7714, 45 FR 52795, Aug. 8, 1980; 45 FR 56802, Aug. 26, 1980]

§ 1.408-7 Reports on distributions from individual retirement plans.

(a) *Requirement of report.* The trustee of an individual retirement account or the issuer of an individual retirement annuity who makes a distribution during any calendar year to an individual from such account or under such annuity shall make a report on Form W-2P (in the case of distributions that are not total distributions) or Form 1099R (in the case of total distributions), and their related transmittal forms, for such year. The return must show the name and address of the person to

whom the distribution was made, the aggregate amount of such distribution, and such other information as is required by the forms.

(b) *Amount subject to this section.* The amounts subject to reporting under paragraph (a) include all amounts distributed or made available to which section 408(d) applies.

(c) *Time and place for filing.* The report required under this section for any calendar year shall be filed after the close of that year and on or before February 28 of the following year with the appropriate Internal Revenue Service Center.

(d) *Statement to recipients.* (1) Each trustee or issuer required to file Form 1099R or Form W-2P under this section shall furnish to the person whose identifying number is (or should be) shown on the forms a copy of the form.

(2) Each statement required by this paragraph to be furnished to recipients shall be furnished to such person after November 30 of the year of the distribution and on or before January 31 of the following year.

(e) *Effective date.* This section is effective for calendar years beginning after December 31, 1977.

[T.D. 7714, 45 FR 52798, Aug. 8, 1980]

§ 1.408-8 Distribution requirements for individual retirement plans.

The following questions and answers relate to the distribution rules for IRAs provided in sections 408(a)(6) and 408(b)(3).

Q-1. Is an IRA subject to the distribution rules provided in section 401(a)(9) for qualified plans?

A-1. (a) Yes, an IRA is subject to the required minimum distribution rules provided in section 401(a)(9). In order to satisfy section 401(a)(9) for purposes of determining required minimum distributions for calendar years beginning on or after January 1, 2003, the rules of §§ 1.401(a)(9)-1 through 1.401(a)(9)-9 and 1.401(a)(9)-6 for defined contribution plans must be applied, except as otherwise provided in this section. For example, whether the 5-year rule or the life expectancy rule applies to distributions after death occurring before the IRA owner's required beginning date is determined in accordance with § 1.401(a)(9)-3 and the rules of

§ 1.401(a)(9)-4 apply for purposes of determining an IRA owner's designated beneficiary. Similarly, the amount of the minimum distribution required for each calendar year from an individual account is determined in accordance with § 1.401(a)(9)-5. For purposes of this section, the term *IRA* means an individual retirement account or annuity described in section 408(a) or (b). The IRA owner is the individual for whom an IRA is originally established by contributions for the benefit of that individual and that individual's beneficiaries.

(b) For purposes of applying the required minimum distribution rules in §§ 1.401(a)(9)-1 through 1.401(a)(9)-9 and 1.401(a)(9)-6 for qualified plans, the IRA trustee, custodian, or issuer is treated as the plan administrator, and the IRA owner is substituted for the employee.

(c) See A-14 and A-15 of § 1.408A-6 for rules under section 401(a)(9) that apply to a Roth IRA.

Q-2. Are IRAs that receive employer contributions under a simplified employee pension (defined in section 408(k)) or a SIMPLE IRA (defined in section 408(p)) treated as IRAs for purposes of section 401(a)(9)?

A-2. Yes, IRAs that receive employer contributions under a simplified employee pension (defined in section 408(k)) or a SIMPLE plan (defined in section 408(p)) are treated as IRAs, rather than employer plans, for purposes of section 401(a)(9) and are, therefore, subject to the distribution rules in this section.

Q-3. In the case of distributions from an IRA, what does the term *required beginning date* mean?

A-3. In the case of distributions from an IRA, the term *required beginning date* means April 1 of the calendar year following the calendar year in which the individual attains age 70½.

Q-4. What portion of a distribution from an IRA is not eligible for rollover because the amount is a required minimum distribution?

A-4. The portion of a distribution that is a required minimum distribution from an IRA and thus not eligible for rollover is determined in the same manner as provided in A-7 of § 1.402(c)-2 for distributions from qualified plans.

For example, if a minimum distribution is required under section 401(a)(9) for a calendar year, an amount distributed during a calendar year from an IRA is treated as a required minimum distribution under section 401(a)(9) to the extent that the total required minimum distribution for the year under section 401(a)(9) for that IRA has not been satisfied. This requirement may be satisfied by a distribution from the IRA or, as permitted under A-9 of this section, from another IRA.

Q-5. May an individual's surviving spouse elect to treat such spouse's entire interest as a beneficiary in an individual's IRA upon the death of the individual (or the remaining part of such interest if distribution to the spouse has commenced) as the spouse's own account?

A-5. (a) The surviving spouse of an individual may elect, in the manner described in paragraph (b) of this A-5, to treat the spouse's entire interest as a beneficiary in an individual's IRA (or the remaining part of such interest if distribution thereof has commenced to the spouse) as the spouse's own IRA. This election is permitted to be made at any time after the individual's date of death. In order to make this election, the spouse must be the sole beneficiary of the IRA and have an unlimited right to withdraw amounts from the IRA. If a trust is named as beneficiary of the IRA, this requirement is not satisfied even if the spouse is the sole beneficiary of the trust. If the surviving spouse makes the election, the required minimum distribution for the calendar year of the election and each subsequent calendar year is determined under section 401(a)(9)(A) with the spouse as IRA owner and not section 401(a)(9)(B) with the surviving spouse as the deceased IRA owner's beneficiary. However, if the election is made in the calendar year containing the IRA owner's death, the spouse is not required to take a required minimum distribution as the IRA owner for that calendar year. Instead, the spouse is required to take a required minimum distribution for that year, determined with respect to the deceased IRA owner under the rules of A-4(a) of § 1.401(a)(9)-5, to the extent such

a distribution was not made to the IRA owner before death.

(b) The election described in paragraph (a) of this A-5 is made by the surviving spouse redesignating the account as an account in the name of the surviving spouse as IRA owner rather than as beneficiary. Alternatively, a surviving spouse eligible to make the election is deemed to have made the election if, at any time, either of the following occurs—

(1) Any amount in the IRA that would be required to be distributed to the surviving spouse as beneficiary under section 401(a)(9)(B) is not distributed within the time period required under section 401(a)(9)(B); or

(2) Any additional amount is contributed to the IRA which is subject, or deemed to be subject, to the lifetime distribution requirements of section 401(a)(9)(A).

(c) The result of an election described in paragraph (b) of this A-5 is that the surviving spouse shall then be considered the IRA owner for whose benefit the trust is maintained for all purposes under the Internal Revenue Code (e.g., section 72(t)).

Q-6. How is the benefit determined for purposes of calculating the required minimum distribution from an IRA?

A-6. For purposes of determining the minimum distribution required to be made from an IRA in any calendar year, the account balance of the IRA as of December 31 of the calendar year immediately preceding the calendar year for which distributions are required to be made is substituted in A-3 of § 1.401(a)(9)-5 for the account balance of the employee. Except as provided in A-7 and A-8 of this section, no adjustments are made for contributions or distributions after that date.

Q-7. What rules apply in the case of a rollover to an IRA of an amount distributed by a qualified plan or another IRA?

A-7. If the surviving spouse of an employee rolls over a distribution from a qualified plan, such surviving spouse may elect to treat the IRA as the spouse's own IRA in accordance with the provisions in A-5 of this section. In the event of any other rollover to an IRA of an amount distributed by a qualified plan or another IRA, the rules

in § 1.401(a)(9)-7 will apply for purposes of determining the account balance for the receiving IRA and the required minimum distribution from the receiving IRA. However, because the value of the account balance is determined as of December 31 of the year preceding the year for which the required minimum distribution is being determined and not as of a valuation date in the preceding year, the account balance of the receiving IRA is only adjusted if the amount is not received in the calendar year in which the amount rolled over is distributed. In that case, for purposes of determining the required minimum distribution for the calendar year in which such amount is actually received, the account balance of the receiving IRA as of December 31 of the preceding year must be adjusted by the amount received in accordance with A-2 of § 1.401(a)(9)-7.

Q-8. What rules apply in the case of a transfer (including a recharacterization) from one IRA to another?

A-8. (a) *General rule.* In the case of a trustee-to-trustee transfer from one IRA to another IRA that is not a distribution and rollover, the transfer is not treated as a distribution by the transferor IRA for purposes of section 401(a)(9). Accordingly, the minimum distribution requirement with respect to the transferor IRA must still be satisfied. Except as provided in paragraph (b) of this A-8 for recharacterizations, after the transfer the employee's account balance and the required minimum distribution under the transferee IRA are determined in the same manner as an account balance and required minimum distribution are determined under an IRA receiving a rollover contribution under A-7 of this section.

(b) *Recharacterizations.* If an amount is contributed to a Roth IRA that is a conversion contribution or failed conversion contribution and that amount (plus net income allocable to that amount) is transferred to another IRA (transferee IRA) in a subsequent year as a recharacterized contribution, the recharacterized contribution (plus allocable net income) must be added to the December 31 account balance of the transferee IRA for the year in which the conversion or failed conversion occurred.

Q-9. Is the required minimum distribution from one IRA of an owner permitted to be distributed from another IRA in order to satisfy section 401(a)(9)?

A-9. Yes, the required minimum distribution must be calculated separately for each IRA. The separately calculated amounts may then be totaled and the total distribution taken from any one or more of the individual's IRAs under the rules set forth in this A-9. Generally, only amounts in IRAs that an individual holds as the IRA owner may be aggregated. However, amounts in IRAs that an individual holds as a beneficiary of the same decedent and which are being distributed under the life expectancy rule in section 401(a)(9)(B)(iii) or (iv) may be aggregated, but such amounts may not be aggregated with amounts held in IRAs that the individual holds as the IRA owner or as the beneficiary of another decedent. Distributions from section 403(b) contracts or accounts will not satisfy the distribution requirements from IRAs, nor will distributions from IRAs satisfy the distribution requirements from section 403(b) contracts or accounts. Distributions from Roth IRAs (defined in section 408A) will not satisfy the distribution requirements applicable to IRAs or section 403(b) accounts or contracts and distributions from IRAs or section 403(b) contracts or accounts will not satisfy the distribution requirements from Roth IRAs.

Q-10. Is any reporting required by the trustee, custodian, or issuer of an IRA with respect to the minimum amount that is required to be distributed from that IRA?

A-10. Yes, the trustee, custodian, or issuer of an IRA is required to report information with respect to the minimum amount required to be distributed from the IRA for each calendar year to individuals or entities, at the time, and in the manner, prescribed by the Commissioner in revenue rulings, notices, and other guidance published in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(b) of this chapter) as well as the applicable Federal tax forms and accompanying instructions.

Q-11. Which amounts distributed from an IRA are taken into account in

determining whether section 401(a)(9) is satisfied?

A-11. (a) *General rule.* Except as provided in paragraph (b) of this A-11, all amounts distributed from an IRA are taken into account in determining whether section 401(a)(9) is satisfied, regardless of whether the amount is includible in income.

(b) Amounts not taken into account. The following amounts are not taken into account in determining whether the required minimum amount with respect to an IRA for a calendar year has been distributed—

(1) Contributions returned pursuant to section 408(d)(4), together with the income allocable to these contributions;

(2) Contributions returned pursuant to section 408(d)(5);

(3) Corrective distributions of excess simplified employee pension contributions under section 408(k)(6)(C), together with the income allocable to these distributions; and

(4) Similar items designated by the Commissioner in revenue rulings, notices, and other guidance published in the Internal Revenue Bulletin. See § 601.601(d)(2)(ii)(b) of this chapter.

[T.D. 8987, 67 FR 19024, Apr. 17, 2002, as amended by T.D. 9130, 69 FR 33293, June 15, 2004]

§ 1.408-11 Net income calculation for returned or recharacterized IRA contributions.

(a) *Net income calculation for returned IRA contributions*—(1) *General rule.* For purposes of returned contributions under section 408(d)(4), the net income attributable to a contribution made to an IRA is determined by allocating to the contribution a *pro rata* portion of the earnings on the assets in the IRA during the period the IRA held the contribution. This attributable net income is calculated by using the following formula:

$$\text{Net Income} = \text{Contribution} \times \frac{(\text{Adjusted Closing Balance} - \text{Adjusted Opening Balance})}{\text{Adjusted Opening Balance.}}$$

(2) *Special rule.* If an IRA is established with a contribution and no other contributions, distributions or transfers are made to or from that IRA, then the subsequent distribution of the entire account balance of the IRA pursuant to section 408(d)(4) will satisfy the requirement of that Internal Revenue Code section that the return of a contribution be accompanied by the amount of net income attributable to the contribution.

(b) *Definitions.* For purposes of this section the following definitions apply:

(1) *Adjusted opening balance.* The term *adjusted opening balance* means the fair market value of the IRA at the beginning of the computation period plus the amount of any contributions or transfers (including the contribution that is distributed as a returned contribution pursuant to section 408(d)(4) and recharacterizations of contributions pursuant to section 408A(d)(6)) made to the IRA during the computation period.

(2) *Adjusted closing balance.* The term *adjusted closing balance* means the fair market value of the IRA at the end of the computation period plus the amount of any distributions or transfers (including recharacterizations of contributions pursuant to section 408A(d)(6)) made from the IRA during the computation period.

(3) *Computation period.* The term *computation period* means the period beginning immediately prior to the time that the contribution being returned was made to the IRA and ending immediately prior to the removal of the contribution. If more than one contribution was made as a regular contribution and is being returned from the IRA, the computation period begins immediately prior to the time the first contribution being returned was contributed.

(4) *Regular contribution.* The term *regular contribution* means an IRA contribution made by the IRA owner that is neither a trustee-to-trustee transfer

from another IRA nor a rollover from another IRA or retirement plan.

(c) *Additional rules.* (1) When an IRA asset is not normally valued on a daily basis, the fair market value of the asset at the beginning of the computation period is deemed to be the most recent, regularly determined, fair market value of the asset, determined as of a date that coincides with or precedes the first day of the computation period. In addition, solely for purposes of this section, notwithstanding A-3 of § 1.408A-5, recharacterized contributions are taken into account for the period they are actually held in a particular IRA.

(2) In the case of an IRA that has received more than one regular contribution for a particular taxable year, the last regular contribution made to the IRA for the year is deemed to be the contribution that is distributed as a returned contribution under section 408(d)(4), up to the amount of the contribution identified by the IRA owner as the amount distributed as a returned contribution.

(3) In the case of an individual who owns multiple IRAs, the net income calculation is performed only on the IRA containing the contribution being returned, and that IRA is the IRA that must distribute the contribution.

(d) *Examples.* The following examples illustrate the net income calculation under section 408(d)(4) and this section:

Example 1. (i) On May 1, 2004, when her IRA is worth \$4,800, Taxpayer A makes a \$1,600 regular contribution to her IRA. Taxpayer A requests that \$400 of the May 1, 2004, contribution be returned to her pursuant to section 408(d)(4). Pursuant to this request, on February 1, 2005, when the IRA is worth \$7,600, the IRA trustee distributes to Taxpayer A the \$400 plus attributable net income. During this time, no other contributions have been made to the IRA and no distributions have been made.

(ii) The adjusted opening balance is \$6,400 [\$4,800 + \$1,600] and the adjusted closing balance is \$7,600. Thus, the net income attributable to the \$400 May 1, 2004, contribution is \$75 [\$400 × (\$7,600 - \$6,400) ÷ \$6,400]. Therefore, the total to be distributed on February 1, 2005, pursuant to § 408(d)(4) is \$475.

Example 2. (i) Beginning in January 2004, Taxpayer B contributes \$300 on the 15th of each month to an IRA for 2004, resulting in an excess regular contribution of \$600 for that year. Taxpayer B requests that the \$600

excess regular contribution be returned to her pursuant to section 408(d)(4). Pursuant to this request, on March 1, 2005, when the IRA is worth \$16,000, the IRA trustee distributes to Taxpayer B the \$600 plus attributable net income. The excess regular contributions to be returned are deemed to be the last two made in 2004: the \$300 December 15 contribution and the \$300 November 15 contribution. On November 15 the IRA was worth \$11,000 immediately prior to the contribution. No distributions or transfers have been made from the IRA and no contributions or transfers, other than the monthly contributions (including \$300 in January and February 2005), have been made.

(ii) As of the beginning of the computation period (November 15), the adjusted opening balance is \$12,200 [\$11,000 + \$300 + \$300 + \$300] and the adjusted closing balance is \$16,000. Thus, the net income attributable to the excess regular contributions is \$187 [\$600 × (\$16,000 - \$12,200) ÷ \$12,200]. Therefore, the total to be distributed as returned contributions on March 1, 2005, to correct the excess regular contribution is \$787 [\$600 + \$187].

[T.D. 9056, 68 FR 23588, May 5, 2003]

§ 1.408(q)-1 Deemed IRAs in qualified employer plans.

(a) *In general.* Under section 408(q), a qualified employer plan may permit employees to make voluntary employee contributions to a separate account or annuity established under the plan. If the requirements of section 408(q) and this section are met, such account or annuity is treated in the same manner as an individual retirement plan under section 408 or 408A (and contributions to such an account or annuity are treated as contributions to an individual retirement plan and not to the qualified employer plan). The account or annuity is referred to as a deemed IRA.

(b) *Types of IRAs.* If the account or annuity meets the requirements applicable to traditional IRAs under section 408, the account or annuity is deemed to be a traditional IRA, and if the account or annuity meets the requirements applicable to Roth IRAs under section 408A, the account or annuity is deemed to be a Roth IRA. Simplified employee pensions (SEPs) under section 408(k) and SIMPLE IRAs under section 408(p) may not be used as deemed IRAs.

(c) *Separate entities.* Except as provided in paragraphs (d) and (g) of this section, the qualified employer plan

and the deemed IRA are treated as separate entities under the Internal Revenue Code and are subject to the separate rules applicable to qualified employer plans and IRAs, respectively. Issues regarding eligibility, participation, disclosure, nondiscrimination, contributions, distributions, investments, and plan administration are generally to be resolved under the separate rules (if any) applicable to each entity under the Internal Revenue Code.

(d) *Exceptions.* The following exceptions to treatment of a deemed IRA and the qualified employer plan as separate entities apply:

(1) The plan document of the qualified employer plan must contain the deemed IRA provisions and a deemed IRA must be in effect at the time the deemed IRA contributions are accepted. Notwithstanding the preceding sentence, employers that provided deemed IRAs for plan years beginning before January 1, 2004, (but after December 31, 2002) are not required to have such provisions in their plan documents before the end of such plan years.

(2) The requirements of section 408(a)(5) regarding commingling of assets do not apply to deemed IRAs. Accordingly, the assets of a deemed IRA may be commingled for investment purposes with those of the qualified employer plan. However, the restrictions on the commingling of plan and IRA assets with other assets apply to the assets of the qualified employer plan and the deemed IRA.

(e) *Application of distribution rules.* (1) Rules applicable to distributions from qualified employer plans under the Internal Revenue Code and regulations do not apply to distributions from deemed IRAs. Instead, the rules applicable to distributions from IRAs apply to distributions from deemed IRAs. Also, any restrictions that a trustee, custodian, or insurance company is permitted to impose on distributions from traditional and Roth IRAs may be imposed on distributions from deemed IRAs (for example, early withdrawal penalties on annuities).

(2) The required minimum distribution rules of section 401(a)(9) must be met separately with respect to the qualified employer plan and the

deemed IRA. The determination of whether a qualified employer plan satisfies the required minimum distribution rules of section 401(a)(9) is made without regard to whether a participant satisfies the required minimum distribution requirements with respect to the deemed IRA that is established under such plan.

(f) *Additional rules*—(1) *Trustee.* The trustee or custodian of an individual retirement account must be a bank, as required by section 408(a)(2), or, if the trustee is not a bank, as defined in section 408(n), the trustee must have received approval from the Commissioner to serve as a nonbank trustee or nonbank custodian pursuant to § 1.408-2(e). For further guidance regarding governmental units serving as nonbank trustees of deemed IRAs established under section 408(q), see § 1.408-2T(e)(8).

(2) *Trusts.* (i) *General rule.* Deemed IRAs that are individual retirement accounts may be held in separate individual trusts, a single trust separate from a trust maintained by the qualified employer plan, or in a single trust that includes the qualified employer plan. A deemed IRA trust must be created or organized in the United States for the exclusive benefit of the participants. If deemed IRAs are held in a single trust that includes the qualified employer plan, the trustee must maintain a separate account for each deemed IRA. In addition, the written governing instrument creating the trust must satisfy the requirements of section 408(a) (1), (2), (3), (4), and (6).

(ii) *Application of section 408(a)(3).* If deemed IRAs are held in a single trust that includes the qualified employer plan, section 408(a)(3) is treated as satisfied if no part of the separate accounts of any of the deemed IRAs is invested in life insurance contracts, regardless of whether the separate account for the qualified employer plan invests in life insurance contracts.

(iii) *Separate accounts for traditional and Roth deemed IRAs.* The rules of section 408A(b) and the regulations thereunder, requiring each Roth IRA to be clearly designated as a Roth IRA, will not fail to be satisfied solely because Roth deemed IRAs and traditional deemed IRAs are held in a single trust, provided that the trustee maintains

separate accounts for the Roth deemed IRAs and traditional deemed IRAs of each participant, and each of those accounts is clearly designated as such.

(3) *Annuity contracts.* Deemed IRAs that are individual retirement annuities may be held under a single annuity contract or under separate annuity contracts. However, the contract must be separate from any annuity contract or annuity contracts of the qualified employer plan. In addition, the contract must satisfy the requirements of section 408(b) and there must be separate accounting for the interest of each participant in those cases where the individual retirement annuities are held under a single annuity contract.

(4) *Deductibility.* The deductibility of voluntary employee contributions to a traditional deemed IRA is determined in the same manner as if they were made to any other traditional IRA. Thus, for example, taxpayers with compensation that exceeds the limits imposed by section 219(g) may not be able to make contributions to deemed IRAs, or the deductibility of such contributions may be limited in accordance with sections 408 and 219(g). However, section 219(f)(5), regarding the taxable year in which amounts paid by an employer to an individual retirement plan are includible in the employee's income, is not applicable to deemed IRAs.

(5) *Rollovers and transfers.* The same rules apply to rollovers and transfers to and from deemed IRAs as apply to rollovers and transfers to and from other IRAs. Thus, for example, the plan may provide that an employee may request and receive a distribution of his or her deemed IRA account balance and may roll it over to an eligible retirement plan in accordance with section 408(d)(3), regardless of whether that employee may receive a distribution of any other plan benefits.

(6) *Nondiscrimination.* The availability of a deemed IRA is not a benefit, right or feature of the qualified employer plan under § 1.401(a)(4)-4.

(7) *IRA assets and benefits not taken into account in determining benefits under or funding of qualified employer plan.* Neither the assets held in the deemed IRA portion of the qualified employer plan, nor any benefits attrib-

utable thereto, shall be taken into account for purposes of:

(i) Determining the benefits of employees and their beneficiaries under the plan (within the meaning of section 401(a)(2)); or

(ii) Determining the plan's assets or liabilities for purposes of section 404 or 412.

(g) *Disqualifying defects*—(1) *Single trust.* If the qualified employer plan fails to satisfy the qualification requirements applicable to it, either in form or operation, any deemed IRA that is an individual retirement account and that is included as part of the trust of that qualified employer plan does not satisfy section 408(q). Accordingly, any account maintained under such a plan as a deemed IRA ceases to be a deemed IRA at the time of the disqualifying event. In addition, the deemed IRA also ceases to satisfy the requirements of sections 408(a) and 408A. Also, if any one of the deemed IRAs fails to satisfy the applicable requirements of sections 408 or 408A, and the assets of that deemed IRA are included as part of the trust of the qualified employer plan, section 408(q) does not apply and the plan will fail to satisfy the plan's qualification requirements.

(2) *Separate trusts and annuities.* If the qualified employer plan fails to satisfy its qualification requirements, either in form or operation, but the assets of a deemed IRA are held in a separate trust (or where a deemed IRA is an individual retirement annuity), then the deemed IRA does not automatically fail to satisfy the applicable requirements of section 408 or 408A. Instead, its status as an IRA will be determined by considering whether the account or the annuity satisfies the applicable requirements of sections 408 and 408A (including, in the case of individual retirement accounts, the prohibition against the commingling of assets under section 408(a)(5)). Also, if a deemed IRA fails to satisfy the requirements of a qualified IRA and the assets of the deemed IRA are held in a separate trust (or where the deemed IRA is an individual retirement annuity), the qualified employer plan will not fail

the qualification requirements applicable to it under the Code solely because of the failure of the deemed IRA.

(h) *Definitions.* The following definitions apply for purposes of this section:

(1) *Qualified employer plan.* A *qualified employer plan* is a plan described in section 401(a), an annuity plan described in section 403(a), a section 403(b) plan, or a governmental plan under section 457(b).

(2) *Voluntary employee contribution.* A *voluntary employee contribution* is any contribution (other than a mandatory contribution within the meaning of section 411(c)(2)(C)) which is made by an individual as an employee under a qualified employer plan that allows employees to elect to make contributions to deemed IRAs and with respect to which the individual has designated the contribution as a contribution to which section 408(q) applies.

(3) *Employee.* An *employee* includes any individual who is an employee under the rules applicable to the qualified employer plan under which the deemed IRA is established.

(i) *Effective date.* This section applies to accounts or annuities established under section 408(q) on or after August 1, 2003.

[T.D. 9142, 69 FR 43739, July 22, 2004]

§ 1.408A-0 Roth IRAs; table of contents.

This table of contents lists the regulations relating to Roth IRAs under section 408A of the Internal Revenue Code as follows:

- § 1.408A-1 Roth IRAs in general.
- § 1.408A-2 Establishing Roth IRAs.
- § 1.408A-3 Contributions to Roth IRAs.
- § 1.408A-4 Converting amounts to Roth IRAs.
- § 1.408A-5 Recharacterized contributions.
- § 1.408A-6 Distributions.
- § 1.408A-7 Reporting.
- § 1.408A-8 Definitions.
- § 1.408A-9 Effective date.

[T.D. 8816, 64 FR 5601, Feb. 4, 1999]

§ 1.408A-1 Roth IRAs in general.

This section sets forth the following questions and answers that discuss the background and general features of Roth IRAs:

Q-1. What is a Roth IRA?

A-1. (a) A Roth IRA is a new type of individual retirement plan that individuals can use, beginning in 1998. Roth IRAs are described in section 408A, which was added by the Taxpayer Relief Act of 1997 (TRA 97), Public Law 105-34 (111 Stat. 788).

(b) Roth IRAs are treated like traditional IRAs except where the Internal Revenue Code specifies different treatment. For example, aggregate contributions (other than by a conversion or other rollover) to all an individual's Roth IRAs are not permitted to exceed \$2,000 for a taxable year. Further, income earned on funds held in a Roth IRA is generally not taxable. Similarly, the rules of section 408(e), such as the loss of exemption of the account where the owner engages in a prohibited transaction, apply to Roth IRAs in the same manner as to traditional IRAs.

Q-2. What are the significant differences between traditional IRAs and Roth IRAs?

A-2. There are several significant differences between traditional IRAs and Roth IRAs under the Internal Revenue Code. For example, eligibility to contribute to a Roth IRA is subject to special modified AGI (adjusted gross income) limits; contributions to a Roth IRA are never deductible; qualified distributions from a Roth IRA are not includible in gross income; the required minimum distribution rules under section 408(a)(6) and (b)(3) (which generally incorporate the provisions of section 401(a)(9)) do not apply to a Roth IRA during the lifetime of the owner; and contributions to a Roth IRA can be made after the owner has attained age 70½.

[T.D. 8816, 64 FR 5601, Feb. 4, 1999]

§ 1.408A-2 Establishing Roth IRAs.

This section sets forth the following questions and answers that provide rules applicable to establishing Roth IRAs:

Q-1. Who can establish a Roth IRA?

A-1. Except as provided in A-3 of this section, only an individual can establish a Roth IRA. In addition, in order to be eligible to contribute to a Roth IRA for a particular year, an individual

§ 1.408A-3

26 CFR Ch. I (4-1-08 Edition)

must satisfy certain compensation requirements and adjusted gross income limits (see § 1.408A-3 A-3).

Q-2. How is a Roth IRA established?

A-2. A Roth IRA can be established with any bank, insurance company, or other person authorized in accordance with § 1.408-2(e) to serve as a trustee with respect to IRAs. The document establishing the Roth IRA must clearly designate the IRA as a Roth IRA, and this designation cannot be changed at a later date. Thus, an IRA that is designated as a Roth IRA cannot later be treated as a traditional IRA. However, see § 1.408A-4 A-1(b)(3) for certain rules for converting a traditional IRA to a Roth IRA with the same trustee by redesignating the traditional IRA as a Roth IRA, and see § 1.408A-5 for rules for recharacterizing certain IRA contributions.

Q-3. Can an employer or an association of employees establish a Roth IRA to hold contributions of employees or members?

A-3. Yes. Pursuant to section 408(c), an employer or an association of employees can establish a trust to hold contributions of employees or members made under a Roth IRA. Each employee's or member's account in the trust is treated as a separate Roth IRA that is subject to the generally applicable Roth IRA rules. The employer or association of employees may do certain acts otherwise required by an individual, for example, establishing and designating a trust as a Roth IRA.

Q-4. What is the effect of a surviving spouse of a Roth IRA owner treating an IRA as his or her own?

A-4. If the surviving spouse of a Roth IRA owner treats a Roth IRA as his or her own as of a date, the Roth IRA is treated from that date forward as though it were established for the benefit of the surviving spouse and not the original Roth IRA owner. Thus, for example, the surviving spouse is treated as the Roth IRA owner for purposes of applying the minimum distribution requirements under section 408(a)(6) and (b)(3). Similarly, the surviving spouse is treated as the Roth IRA owner rather than a beneficiary for purposes of determining the amount of any distribution from the Roth IRA that is includible in gross income and whether

the distribution is subject to the 10-percent additional tax under section 72(t).

[T.D. 8816, 64 FR 5601, Feb. 4, 1999]

§ 1.408A-3 Contributions to Roth IRAs.

This section sets forth the following questions and answers that provide rules regarding contributions to Roth IRAs:

Q-1. What types of contributions are permitted to be made to a Roth IRA?

A-1. There are two types of contributions that are permitted to be made to a Roth IRA: regular contributions and qualified rollover contributions (including conversion contributions). The term regular contributions means contributions other than qualified rollover contributions.

Q-2. When are contributions permitted to be made to a Roth IRA?

A-2. (a) The provisions of section 408A are effective for taxable years beginning on or after January 1, 1998. Thus, the first taxable year for which contributions are permitted to be made to a Roth IRA by an individual is the individual's taxable year beginning in 1998.

(b) Regular contributions for a particular taxable year must generally be contributed by the due date (not including extensions) for filing a Federal income tax return for that taxable year. (See § 1.408A-5 regarding recharacterization of certain contributions.)

Q-3. What is the maximum aggregate amount of regular contributions an individual is eligible to contribute to a Roth IRA for a taxable year?

A-3. (a) The maximum aggregate amount that an individual is eligible to contribute to all his or her Roth IRAs as a regular contribution for a taxable year is the same as the maximum for traditional IRAs: \$2,000 or, if less, that individual's compensation for the year.

(b) For Roth IRAs, the maximum amount described in paragraph (a) of this A-3 is phased out between certain levels of modified AGI. For an individual who is not married, the dollar amount is phased out ratably between modified AGI of \$95,000 and \$110,000; for a married individual filing a joint return, between modified AGI of \$150,000

and \$160,000; and for a married individual filing separately, between modified AGI of \$0 and \$10,000. For this purpose, a married individual who has lived apart from his or her spouse for the entire taxable year and who files separately is treated as not married. Under section 408A(c)(3)(A), in applying the phase-out, the maximum amount is rounded up to the next higher multiple of \$10 and is not reduced below \$200 until completely phased out.

(c) If an individual makes regular contributions to both traditional IRAs and Roth IRAs for a taxable year, the maximum limit for the Roth IRA is the lesser of—

(1) The amount described in paragraph (a) of this A-3 reduced by the amount contributed to traditional IRAs for the taxable year; and

(2) The amount described in paragraph (b) of this A-3. Employer contributions, including elective deferrals, made under a SEP or SIMPLE IRA Plan on behalf of an individual (including a self-employed individual) do not reduce the amount of the individual's maximum regular contribution.

(d) The rules in this A-3 are illustrated by the following examples:

Example 1. In 1998, unmarried, calendar-year taxpayer B, age 60, has modified AGI of \$40,000 and compensation of \$5,000. For 1998, B can contribute a maximum of \$2,000 to a traditional IRA, a Roth IRA or a combination of traditional and Roth IRAs.

Example 2. The facts are the same as in *Example 1*. However, assume that B violates the maximum regular contribution limit by contributing \$2,000 to a traditional IRA and \$2,000 to a Roth IRA for 1998. The \$2,000 to B's Roth IRA would be an excess contribution to B's Roth IRA for 1998 because an individual's contributions are applied first to a traditional IRA, then to a Roth IRA.

Example 3. The facts are the same as in *Example 1*, except that B's compensation is \$900. The maximum amount B can contribute to either a traditional IRA or a Roth (or a combination of the two) for 1998 is \$900.

Example 4. In 1998, unmarried, calendar-year taxpayer C, age 60, has modified AGI of \$100,000 and compensation of \$5,000. For 1998, C contributes \$800 to a traditional IRA and \$1,200 to a Roth IRA. Because C's \$1,200 Roth IRA contribution does not exceed the phased-out maximum Roth IRA contribution of \$1,340 and because C's total IRA contributions do not exceed \$2,000, C's Roth IRA contribution does not exceed the maximum permissible contribution.

Q-4. How is compensation defined for purposes of the Roth IRA contribution limit?

A-4. For purposes of the contribution limit described in A-3 of this section, an individual's compensation is the same as that used to determine the maximum contribution an individual can make to a traditional IRA. This amount is defined in section 219(f)(1) to include wages, commissions, professional fees, tips, and other amounts received for personal services, as well as taxable alimony and separate maintenance payments received under a decree of divorce or separate maintenance. Compensation also includes earned income as defined in section 401(c)(2), but does not include any amount received as a pension or annuity or as deferred compensation. In addition, under section 219(c), a married individual filing a joint return is permitted to make an IRA contribution by treating his or her spouse's higher compensation as his or her own, but only to the extent that the spouse's compensation is not being used for purposes of the spouse making a contribution to a Roth IRA or a deductible contribution to a traditional IRA.

Q-5. What is the significance of modified AGI and how is it determined?

A-5. Modified AGI is used for purposes of the phase-out rules described in A-3 of this section and for purposes of the \$100,000 modified AGI limitation described in § 1.408A-4 A-2(a) (relating to eligibility for conversion). As defined in section 408A(c)(3)(C)(i), modified AGI is the same as adjusted gross income under section 219(g)(3)(A) (used to determine the amount of deductible contributions that can be made to a traditional IRA by an individual who is an active participant in an employer-sponsored retirement plan), except that any conversion is disregarded in determining modified AGI. For example, the deduction for contributions to an IRA is not taken into account for purposes of determining adjusted gross income under section 219 and thus does not apply in determining modified AGI for Roth IRA purposes.

Q-6. Is a required minimum distribution from an IRA for a year included in income for purposes of determining modified AGI?

A-6. (a) Yes. For taxable years beginning before January 1, 2005, any required minimum distribution from an IRA under section 408(a)(6) and (b)(3) (which generally incorporate the provisions of section 401(a)(9)) is included in income for purposes of determining modified AGI.

(b) For taxable years beginning after December 31, 2004, and solely for purposes of the \$100,000 limitation applicable to conversions, modified AGI does not include any required minimum distributions from an IRA under section 408(a)(6) and (b)(3).

Q-7. Does an excise tax apply if an individual exceeds the aggregate regular contribution limits for Roth IRAs?

A-7. Yes. Section 4973 imposes an annual 6-percent excise tax on aggregate amounts contributed to Roth IRAs that exceed the maximum contribution limits described in A-3 of this section. Any contribution that is distributed, together with net income, from a Roth IRA on or before the tax return due date (plus extensions) for the taxable year of the contribution is treated as not contributed. Net income described in the previous sentence is includible in gross income for the taxable year in which the contribution is made. Aggregate excess contributions that are not distributed from a Roth IRA on or before the tax return due date (with extensions) for the taxable year of the contributions are reduced as a deemed Roth IRA contribution for each subsequent taxable year to the extent that the Roth IRA owner does not actually make regular IRA contributions for such years. Section 4973 applies separately to an individual's Roth IRAs and other types of IRAs.

[T.D. 8816, 64 FR 5601, Feb. 4, 1999]

§ 1.408A-4 Converting amounts to Roth IRAs.

This section sets forth the following questions and answers that provide rules applicable to Roth IRA conversions:

Q-1. Can an individual convert an amount in his or her traditional IRA to a Roth IRA?

A-1. (a) Yes. An amount in a traditional IRA may be converted to an amount in a Roth IRA if two requirements are satisfied. First, the IRA

owner must satisfy the modified AGI limitation described in A-2(a) of this section and, if married, the joint filing requirement described in A-2(b) of this section. Second, the amount contributed to the Roth IRA must satisfy the definition of a qualified rollover contribution in section 408A(e) (i.e., it must satisfy the requirements for a rollover contribution as defined in section 408(d)(3), except that the one-rollover-per-year limitation in section 408(d)(3)(B) does not apply).

(b) An amount can be converted by any of three methods—

(1) An amount distributed from a traditional IRA is contributed (rolled over) to a Roth IRA within the 60-day period described in section 408(d)(3)(A)(i);

(2) An amount in a traditional IRA is transferred in a trustee-to-trustee transfer from the trustee of the traditional IRA to the trustee of the Roth IRA; or

(3) An amount in a traditional IRA is transferred to a Roth IRA maintained by the same trustee. For purposes of sections 408 and 408A, redesignating a traditional IRA as a Roth IRA is treated as a transfer of the entire account balance from a traditional IRA to a Roth IRA.

(c) Any converted amount is treated as a distribution from the traditional IRA and a qualified rollover contribution to the Roth IRA for purposes of section 408 and section 408A, even if the conversion is accomplished by means of a trustee-to-trustee transfer or a transfer between IRAs of the same trustee.

(d) A transaction that is treated as a failed conversion under § 1.408A-5 A-9(a)(1) is not a conversion.

Q-2. What are the modified AGI limitation and joint filing requirements for conversions?

A-2. (a) An individual with modified AGI in excess of \$100,000 for a taxable year is not permitted to convert an amount to a Roth IRA during that taxable year. This \$100,000 limitation applies to the taxable year that the funds are paid from the traditional IRA, rather than the year they are contributed to the Roth IRA.

(b) If the individual is married, he or she is permitted to convert an amount

to a Roth IRA during a taxable year only if the individual and the individual's spouse file a joint return for the taxable year that the funds are paid from the traditional IRA. In this case, the modified AGI subject to the \$100,000 limit is the modified AGI derived from the joint return using the couple's combined income. The only exception to this joint filing requirement is for an individual who has lived apart from his or her spouse for the entire taxable year. If the married individual has lived apart from his or her spouse for the entire taxable year, then such individual can treat himself or herself as not married for purposes of this paragraph, file a separate return and be subject to the \$100,000 limit on his or her separate modified AGI. In all other cases, a married individual filing a separate return is not permitted to convert an amount to a Roth IRA, regardless of the individual's modified AGI.

Q-3. Is a remedy available to an individual who makes a failed conversion?

A-3. (a) Yes. See § 1.408A-5 for rules permitting a failed conversion amount to be recharacterized as a contribution to a traditional IRA. If the requirements in § 1.408A-5 are satisfied, the failed conversion amount will be treated as having been contributed to the traditional IRA and not to the Roth IRA.

(b) If the contribution is not recharacterized in accordance with § 1.408A-5, the contribution will be treated as a regular contribution to the Roth IRA and, thus, an excess contribution subject to the excise tax under section 4973 to the extent that it exceeds the individual's regular contribution limit. This is the result regardless of which of the three methods described in A-1(b) of this section applies to this transaction. Additionally, the distribution from the traditional IRA will not be eligible for the 4-year spread and will be subject to the additional tax under section 72(t) (unless an exception under that section applies).

Q-4. Do any special rules apply to a conversion of an amount in an individual's SEP IRA or SIMPLE IRA to a Roth IRA?

A-4. (a) An amount in an individual's SEP IRA can be converted to a Roth

IRA on the same terms as an amount in any other traditional IRA.

(b) An amount in an individual's SIMPLE IRA can be converted to a Roth IRA on the same terms as a conversion from a traditional IRA, except that an amount distributed from a SIMPLE IRA during the 2-year period described in section 72(t)(6), which begins on the date that the individual first participated in any SIMPLE IRA Plan maintained by the individual's employer, cannot be converted to a Roth IRA. Pursuant to section 408(d)(3)(G), a distribution of an amount from an individual's SIMPLE IRA during this 2-year period is not eligible to be rolled over into an IRA that is not a SIMPLE IRA and thus cannot be a qualified rollover contribution. This 2-year period of section 408(d)(3)(G) applies separately to the contributions of each of an individual's employers maintaining a SIMPLE IRA Plan.

(c) Once an amount in a SEP IRA or SIMPLE IRA has been converted to a Roth IRA, it is treated as a contribution to a Roth IRA for all purposes. Future contributions under the SEP or under the SIMPLE IRA Plan may not be made to the Roth IRA.

Q-5. Can amounts in other kinds of retirement plans be converted to a Roth IRA?

A-5. No. Only amounts in another IRA can be converted to a Roth IRA. For example, amounts in a qualified plan or annuity plan described in section 401(a) or 403(a) cannot be converted directly to a Roth IRA. Also, amounts held in an annuity contract or account described in section 403(b) cannot be converted directly to a Roth IRA.

Q-6. Can an individual who has attained at least age 70½ by the end of a calendar year convert an amount distributed from a traditional IRA during that year to a Roth IRA before receiving his or her required minimum distribution with respect to the traditional IRA for the year of the conversion?

A-6. (a) No. In order to be eligible for a conversion, an amount first must be eligible to be rolled over. Section

§ 1.408A-4

26 CFR Ch. I (4-1-08 Edition)

408(d)(3) prohibits the rollover of a required minimum distribution. If a minimum distribution is required for a year with respect to an IRA, the first dollars distributed during that year are treated as consisting of the required minimum distribution until an amount equal to the required minimum distribution for that year has been distributed.

(b) As provided in A-1(c) of this section, any amount converted is treated as a distribution from a traditional IRA and a rollover contribution to a Roth IRA and not as a trustee-to-trustee transfer for purposes of section 408 and section 408A. Thus, in a year for which a minimum distribution is required (including the calendar year in which the individual attains age 70½), an individual may not convert the assets of an IRA (or any portion of those assets) to a Roth IRA to the extent that the required minimum distribution for the traditional IRA for the year has not been distributed.

(c) If a required minimum distribution is contributed to a Roth IRA, it is treated as having been distributed, subject to the normal rules under section 408(d)(1) and (2), and then contributed as a regular contribution to a Roth IRA. The amount of the required minimum distribution is not a conversion contribution.

Q-7. What are the tax consequences when an amount is converted to a Roth IRA?

A-7. (a) Any amount that is converted to a Roth IRA is includible in gross income as a distribution according to the rules of section 408(d)(1) and (2) for the taxable year in which the amount is distributed or transferred from the traditional IRA. Thus, any portion of the distribution or transfer that is treated as a return of basis under section 408(d)(1) and (2) is not includible in gross income as a result of the conversion.

(b) The 10-percent additional tax under section 72(t) generally does not apply to the taxable conversion amount. But see § 1.408A-6 A-5 for circumstances under which the taxable conversion amount would be subject to the additional tax under section 72(t).

(c) Pursuant to section 408A(e), a conversion is not treated as a rollover

for purposes of the one-rollover-per-year rule of section 408(d)(3)(B).

Q-8. Is there an exception to the income-inclusion rule described in A-7 of this section for 1998 conversions?

A-8. Yes. In the case of a distribution (including a trustee-to-trustee transfer) from a traditional IRA on or before December 31, 1998, that is converted to a Roth IRA, instead of having the entire taxable conversion amount includible in income in 1998, an individual includes in gross income for 1998 only one quarter of that amount and one quarter of that amount for each of the next 3 years. This 4-year spread also applies if the conversion amount was distributed in 1998 and contributed to the Roth IRA within the 60-day period described in section 408(d)(3)(A)(i), but after December 31, 1998. However, see § 1.408A-6 A-6 for special rules requiring acceleration of inclusion if an amount subject to the 4-year spread is distributed from the Roth IRA before 2001.

Q-9. Is the taxable conversion amount included in income for all purposes?

A-9. Except as provided below, any taxable conversion amount includible in gross income for a year as a result of the conversion (regardless of whether the individual is using a 4-year spread) is included in income for all purposes. Thus, for example, it is counted for purposes of determining the taxable portion of social security payments under section 86 and for purposes of determining the phase-out of the \$25,000 exemption under section 469(i) relating to the disallowance of passive activity losses from rental real estate activities. However, as provided in § 1.408A-3 A-5, the taxable conversion amount (and any resulting change in other elements of adjusted gross income) is disregarded for purposes of determining modified AGI for section 408A.

Q-10. Can an individual who makes a 1998 conversion elect not to have the 4-year spread apply and instead have the full taxable conversion amount includible in gross income for 1998?

A-10. Yes. Instead of having the taxable conversion amount for a 1998 conversion included over 4 years as provided under A-8 of this section, an individual can elect to include the full taxable conversion amount in income for

1998. The election is made on Form 8606 and cannot be made or changed after the due date (including extensions) for filing the 1998 Federal income tax return.

Q-11. What happens when an individual who is using the 4-year spread dies, files separately, or divorces before the full taxable conversion amount has been included in gross income?

A-11. (a) If an individual who is using the 4-year spread described in A-8 of this section dies before the full taxable conversion amount has been included in gross income, then the remainder must be included in the individual's gross income for the taxable year that includes the date of death.

(b) However, if the sole beneficiary of all the decedent's Roth IRAs is the decedent's spouse, then the spouse can elect to continue the 4-year spread. Thus, the spouse can elect to include in gross income the same amount that the decedent would have included in each of the remaining years of the 4-year period. Where the spouse makes such an election, the amount includible under the 4-year spread for the taxable year that includes the date of the decedent's death remains includible in the decedent's gross income and is reported on the decedent's final Federal income tax return. The election is made on either Form 8606 or Form 1040, in accordance with the instructions to the applicable form, for the taxable year that includes the decedent's date of death and cannot be changed after the due date (including extensions) for filing the Federal income tax return for the spouse's taxable year that includes the decedent's date of death.

(c) If a Roth IRA owner who is using the 4-year spread and who was married in 1998 subsequently files separately or divorces before the full taxable conversion amount has been included in gross income, the remainder of the taxable conversion amount must be included in the Roth IRA owner's gross income over the remaining years in the 4-year period (unless accelerated because of distribution or death).

Q-12. Can an individual convert a traditional IRA to a Roth IRA if he or she is receiving substantially equal periodic payments within the meaning of

section 72(t)(2)(A)(iv) from that traditional IRA?

A-12. Yes. Not only is the conversion amount itself not subject to the early distribution tax under section 72(t), but the conversion amount is also not treated as a distribution for purposes of determining whether a modification within the meaning of section 72(t)(4)(A) has occurred. Distributions from the Roth IRA that are part of the original series of substantially equal periodic payments will be nonqualified distributions from the Roth IRA until they meet the requirements for being a qualified distribution, described in § 1.408A-6 A-1(b). The additional 10-percent tax under section 72(t) will not apply to the extent that these nonqualified distributions are part of a series of substantially equal periodic payments. Nevertheless, to the extent that such distributions are allocable to a 1998 conversion contribution with respect to which the 4-year spread for the resultant income inclusion applies (see A-8 of this section) and are received during 1998, 1999, or 2000, the special acceleration rules of § 1.408A-6 A-6 apply. However, if the original series of substantially equal periodic payments does not continue to be distributed in substantially equal periodic payments from the Roth IRA after the conversion, the series of payments will have been modified and, if this modification occurs within 5 years of the first payment or prior to the individual becoming disabled or attaining age 59½, the taxpayer will be subject to the recapture tax of section 72(t)(4)(A).

Q-13. Can a 1997 distribution from a traditional IRA be converted to a Roth IRA in 1998?

A-13. No. An amount distributed from a traditional IRA in 1997 that is contributed to a Roth IRA in 1998 would not be a conversion contribution. See A-3 of this section regarding the remedy for a failed conversion.

Q-14. [Reserved]. For further guidance, see § 1.408A-4T, Q-14.

A-14. [Reserved]. For further guidance, see § 1.408A-4T, A-14.

[T.D. 8816, 64 FR 5603, Feb. 4, 1999, as amended by T.D. 9220, 70 FR 48871, Aug. 22, 2005]

§ 1.408A-4T Converting amounts to Roth IRAs.

Q-1—Q-13 [Reserved]

A-1—Q-13 [Reserved]

Q-14. What is the amount that is includable in income as a distribution when a conversion involves an annuity contract?

A-14. (a) *In general.* Notwithstanding § 1.408-4(e), when part or all of a traditional IRA that is an individual retirement annuity described in section 408(b) is converted to a Roth IRA, for purposes of determining the amount includible in gross income as a distribution under § 1.408A-4, A-7, the amount that is treated as distributed is the fair market value of the annuity contract on the date the annuity contract is converted. Similarly, when a traditional IRA that is an individual retirement account described in section 408(a) holds an annuity contract as an account asset and the traditional IRA is converted to a Roth IRA, for purposes of determining the amount includible in gross income as a distribution under § 1.408A-4, A-7, the amount that is treated as distributed with respect to the annuity contract is the fair market value of the annuity contract on the date that the annuity contract is distributed or treated as distributed from the traditional IRA.

(b) *Determination of fair market value—*

(1) *General rule.* For purposes of this A-14, the fair market value of an individual retirement annuity issued by a company regularly engaged in the selling of contracts of that character generally is established as follows—

(A) If the conversion occurs soon after the contract was sold and there have been no material changes in market conditions, the fair market value of the contract is established through the sale of the particular contract by the company (*i.e.*, the actual premiums paid for such contract);

(B) If the conversion occurs after the contract has been in force for some time and no further premium payments are to be made, the fair market value of the contract is established through the sale by the company of comparable contracts;

(C) If the conversion occurs after the contract has been in force for some time and future premium payments are

to be made, the fair market value of the contract is established through an approximation that is based on the interpolated terminal reserve at the date of the conversion, plus the proportionate part of the gross premium last paid before the date of the conversion which covers the period extending beyond that date. However, if, because of the unusual nature of the contract, this approximation is not reasonably close to the full value, this method may not be used. Thus, this method may not be used to determine the fair market value of an annuity contract where the reserve does not reflect the value of all relevant features of the contract.

(2) *Additional guidance.* Additional guidance regarding the fair market value of an individual retirement annuity, including formulas to be used for determining fair market value, may be issued by the Commissioner in revenue rulings, notices, or other guidance published in the Internal Revenue Bulletin (See § 601.601(d)(2)(ii)(b)).

(c) *Effective date.* The provisions of this A-14 are applicable to any conversion where an annuity contract is distributed or treated as distributed from a traditional IRA on or after August 19, 2005.

(d) *Definitions.* The definitions set forth in § 1.408A-8 apply for purposes of this A-14.

[T.D. 9220, 70 FR 48871, Aug. 22, 2005]

§ 1.408A-5 Recharacterized contributions.

This section sets forth the following questions and answers that provide rules regarding recharacterizing IRA contributions:

Q-1. Can an IRA owner recharacterize certain contributions (*i.e.*, treat a contribution made to one type of IRA as made to a different type of IRA) for a taxable year?

A-1. (a) Yes. In accordance with section 408A(d)(6), except as otherwise provided in this section, if an individual makes a contribution to an IRA (the FIRST IRA) for a taxable year and then transfers the contribution (or a portion of the contribution) in a trustee-to-trustee transfer from the trustee

of the FIRST IRA to the trustee of another IRA (the SECOND IRA), the individual can elect to treat the contribution as having been made to the SECOND IRA, instead of to the FIRST IRA, for Federal tax purposes. A transfer between the FIRST IRA and the SECOND IRA will not fail to be a trustee-to-trustee transfer merely because both IRAs are maintained by the same trustee. For purposes of section 408A(d)(6), redesignating the FIRST IRA as the SECOND IRA will be treated as a transfer of the entire account balance from the FIRST IRA to the SECOND IRA.

(b) This recharacterization election can be made only if the trustee-to-trustee transfer from the FIRST IRA to the SECOND IRA is made on or before the due date (including extensions) for filing the individual's Federal income tax return for the taxable year for which the contribution was made to the FIRST IRA. For purposes of this section, a conversion that is accomplished through a rollover of a distribution from a traditional IRA in a taxable year that, 60 days after the distribution (as described in section 408(d)(3)(A)(i)), is contributed to a Roth IRA in the next taxable year is treated as a contribution for the earlier taxable year.

Q-2. What is the proper treatment of the net income attributable to the

amount of a contribution that is being recharacterized?

A-2. (a) The net income attributable to the amount of a contribution that is being recharacterized must be transferred to the SECOND IRA along with the contribution.

(b) If the amount of the contribution being recharacterized was contributed to a separate IRA and no distributions or additional contributions have been made from or to that IRA at any time, then the contribution is recharacterized by the trustee of the FIRST IRA transferring the entire account balance of the FIRST IRA to the trustee of the SECOND IRA. In this case, the net income (or loss) attributable to the contribution being recharacterized is the difference between the amount of the original contribution and the amount transferred.

(c)(1) If paragraph (b) of this A-2 does not apply, then, for purposes of determining net income attributable to IRA contributions, the net income attributable to the amount of a contribution is determined by allocating to the contribution a *pro rata* portion of the earnings on the assets in the IRA during the period the IRA held the contribution. This attributable net income is calculated by using the following formula:

$$\text{Net Income} = \text{Contribution} \times \frac{(\text{Adjusted Closing Balance} - \text{Adjusted Opening Balance})}{\text{Adjusted Opening Balance.}}$$

(2) For purposes of this paragraph (c), the following definitions apply:

(i) The term *adjusted opening balance* means the fair market value of the IRA at the beginning of the computation period plus the amount of any contributions or transfers (including the contribution that is being recharacterized pursuant to section 408A(d)(6) and any other recharacterizations) made to the IRA during the computation period.

(ii) The term *adjusted closing balance* means the fair market value of the IRA at the end of the computation period plus the amount of any distributions or

transfers (including contributions returned pursuant to section 408(d)(4) and recharacterizations of contributions pursuant to section 408A(d)(6)) made from the IRA during the computation period.

(iii) The term *computation period* means the period beginning immediately prior to the time the particular contribution being recharacterized is made to the IRA and ending immediately prior to the recharacterizing transfer of the contribution. If a series of regular contributions was made to the IRA, and consecutive contributions

in that series are being recharacterized, the computation period begins immediately prior to the time the first of the regular contributions being recharacterized was made.

(3) When an IRA asset is not normally valued on a daily basis, the fair market value of the asset at the beginning of the computation period is deemed to be the most recent, regularly determined, fair market value of the asset, determined as of a date that coincides with or precedes the first day of the computation period. In addition, solely for purposes of this paragraph (c), notwithstanding A-3 of this section, recharacterized contributions are taken into account for the period they are actually held in a particular IRA.

(4) In the case of an individual with multiple IRAs, the net income calculation is performed only on the IRA containing the particular contribution to be recharacterized, and that IRA is the IRA from which the recharacterizing transfer must be made.

(5) In the case of multiple contributions made to an IRA for a particular year that are eligible for recharacterization, the IRA owner can choose (by date and by dollar amount, not by specific assets acquired with those dollars) which contribution, or portion thereof, is to be recharacterized.

(6) The following examples illustrate the net income calculation under section 408A(d)(6) and this paragraph:

Example 1. (i) On March 1, 2004, when her Roth IRA is worth \$80,000, Taxpayer A makes a \$160,000 conversion contribution to the Roth IRA. Subsequently, Taxpayer A discovers that she was ineligible to make a Roth conversion contribution in 2004 and so she requests that the \$160,000 be recharacterized to a traditional IRA pursuant to section 408A(d)(6). Pursuant to this request, on March 1, 2005, when the IRA is worth \$225,000, the Roth IRA trustee transfers to a traditional IRA the \$160,000 plus allocable net income. No other contributions have been made to the Roth IRA and no distributions have been made.

(ii) The adjusted opening balance is \$240,000 [\$80,000 + \$160,000] and the adjusted closing balance is \$225,000. Thus the net income allocable to the \$160,000 is - \$10,000 [\$160,000 × (\$225,000 - \$240,000) ÷ \$240,000]. Therefore, in order to recharacterize the March 1, 2004, \$160,000 conversion contribution on March 1, 2005, the Roth IRA trustee must transfer

from Taxpayer A's Roth IRA to her traditional IRA \$150,000 [\$160,000 - \$10,000].

Example 2. (i) On April 1, 2004, when her traditional IRA is worth \$100,000, Taxpayer B converts the entire amount, consisting of 100 shares of stock in ABC Corp. and 100 shares of stock in XYZ Corp., by transferring the shares to a Roth IRA. At the time of the conversion, the 100 shares of stock in ABC Corp. are worth \$50,000 and the 100 shares of stock in XYZ Corp. are also worth \$50,000. Taxpayer B decides that she would like to recharacterize the ABC Corp. shares back to a traditional IRA. However, B may choose only by dollar amount the contribution or portion thereof that is to be recharacterized. On the date of transfer, November 1, 2004, the 100 shares of stock in ABC Corp. are worth \$40,000 and the 100 shares of stock in XYZ Corp. are worth \$70,000. No other contributions have been made to the Roth IRA and no distributions have been made.

(ii) If B requests that \$50,000 (which was the value of the ABC Corp. shares at the time of conversion) be recharacterized, the net income allocable to the \$50,000 is \$5,000 [\$50,000 × (\$110,000 - \$100,000) ÷ \$100,000]. Therefore, in order to recharacterize \$50,000 of the April 1, 2004, conversion contribution on November 1, 2004, the Roth IRA trustee must transfer from Taxpayer B's Roth IRA to a traditional IRA assets with a value of \$55,000 [\$50,000 + \$5,000].

(iii) If, on the other hand, B requests that \$40,000 (which was the value of the ABC Corp. shares on November 1) be recharacterized, the net income allocable to the \$40,000 is \$4,000 [\$40,000 × (\$110,000 - \$100,000) ÷ \$100,000]. Therefore, in order to recharacterize \$40,000 of the April 1, 2004, conversion contribution on November 1, 2004, the Roth IRA trustee must transfer from Taxpayer B's Roth IRA to a traditional IRA assets with a value of \$44,000 [\$40,000 + \$4,000].

(iv) Regardless of the amount of the contribution recharacterized, the determination of that amount (or of the net income allocable thereto) is not affected by whether the recharacterization is accomplished by the transfer of shares of ABC Corp. or of shares of XYZ Corp.

(7) This paragraph (c) applies for purposes of determining net income attributable to IRA contributions, made on or after January 1, 2004. For purposes of determining net income attributable to IRA contributions made before January 1, 2004, see paragraph (c) of this A-2 of § 1.408A-5 (as it appeared in the April 1, 2003, edition of 26 CFR part 1).

Q-3. What is the effect of recharacterizing a contribution made to the FIRST IRA as a contribution made to the SECOND IRA?

A-3. The contribution that is being recharacterized as a contribution to the SECOND IRA is treated as having been originally contributed to the SECOND IRA on the same date and (in the case of a regular contribution) for the same taxable year that the contribution was made to the FIRST IRA. Thus, for example, no deduction would be allowed for a contribution to the FIRST IRA, and any net income transferred with the recharacterized contribution is treated as earned in the SECOND IRA, and not the FIRST IRA.

Q-4. Can an amount contributed to an IRA in a tax-free transfer be recharacterized under A-1 of this section?

A-4. No. If an amount is contributed to the FIRST IRA in a tax-free transfer, the amount cannot be recharacterized as a contribution to the SECOND IRA under A-1 of this section. However, if an amount is erroneously rolled over or transferred from a traditional IRA to a SIMPLE IRA, the contribution can subsequently be recharacterized as a contribution to another traditional IRA.

Q-5. Can an amount contributed by an employer under a SIMPLE IRA Plan or a SEP be recharacterized under A-1 of this section?

A-5. No. Employer contributions (including elective deferrals) under a SIMPLE IRA Plan or a SEP cannot be recharacterized as contributions to another IRA under A-1 of this section. However, an amount converted from a SEP IRA or SIMPLE IRA to a Roth IRA may be recharacterized under A-1 of this section as a contribution to a SEP IRA or SIMPLE IRA, including the original SEP IRA or SIMPLE IRA.

Q-6. How does a taxpayer make the election to recharacterize a contribution to an IRA for a taxable year?

A-6. (a) An individual makes the election described in this section by notifying, on or before the date of the transfer, both the trustee of the FIRST IRA and the trustee of the SECOND IRA, that the individual has elected to treat the contribution as having been made to the SECOND IRA, instead of the FIRST IRA, for Federal tax purposes. The notification of the election must include the following information: the type and amount of the con-

tribution to the FIRST IRA that is to be recharacterized; the date on which the contribution was made to the FIRST IRA and the year for which it was made; a direction to the trustee of the FIRST IRA to transfer, in a trustee-to-trustee transfer, the amount of the contribution and net income allocable to the contribution to the trustee of the SECOND IRA; and the name of the trustee of the FIRST IRA and the trustee of the SECOND IRA and any additional information needed to make the transfer.

(b) The election and the trustee-to-trustee transfer must occur on or before the due date (including extensions) for filing the individual's Federal income tax return for the taxable year for which the recharacterized contribution was made to the FIRST IRA, and the election cannot be revoked after the transfer. An individual who makes this election must report the recharacterization, and must treat the contribution as having been made to the SECOND IRA, instead of the FIRST IRA, on the individual's Federal income tax return for the taxable year described in the preceding sentence in accordance with the applicable Federal tax forms and instructions.

(c) The election to recharacterize a contribution described in this A-6 may be made on behalf of a deceased IRA owner by his or her executor, administrator, or other person responsible for filing the final Federal income tax return of the decedent under section 6012(b)(1).

Q-7. If an amount is initially contributed to an IRA for a taxable year, then is moved (with net income attributable to the contribution) in a tax-free transfer to another IRA (the FIRST IRA for purposes of A-1 of this section), can the tax-free transfer be disregarded, so that the initial contribution that is transferred from the FIRST IRA to the SECOND IRA is treated as a recharacterization of that initial contribution?

A-7. Yes. In applying section 408A(d)(6), tax-free transfers between IRAs are disregarded. Thus, if a contribution to an IRA for a year is followed by one or more tax-free transfers between IRAs prior to the recharacterization, then for purposes of section

408A(d)(6), the contribution is treated as if it remained in the initial IRA. Consequently, an individual may elect to recharacterize an initial contribution made to the initial IRA that was involved in a series of tax-free transfers by making a trustee-to-trustee transfer from the last IRA in the series to the SECOND IRA. In this case the contribution to the SECOND IRA is treated as made on the same date (and for the same taxable year) as the date the contribution being recharacterized was made to the initial IRA.

Q-8. If a contribution is recharacterized, is the recharacterization treated as a rollover for purposes of the one-rollover-per-year limitation of section 408(d)(3)(B)?

A-8. No, recharacterizing a contribution under A-1 of this section is never treated as a rollover for purposes of the one-rollover-per-year limitation of section 408(d)(3)(B), even if the contribution would have been treated as a rollover contribution by the SECOND IRA if it had been made directly to the SECOND IRA, rather than as a result of a recharacterization of a contribution to the FIRST IRA.

Q-9. If an IRA owner converts an amount from a traditional IRA to a Roth IRA and then transfers that amount back to a traditional IRA in a recharacterization, may the IRA owner subsequently reconvert that amount from the traditional IRA to a Roth IRA?

A-9. (a)(1) Except as otherwise provided in paragraph (b) of this A-9, an IRA owner who converts an amount from a traditional IRA to a Roth IRA during any taxable year and then transfers that amount back to a traditional IRA by means of a recharacterization may not reconvert that amount from the traditional IRA to a Roth IRA before the beginning of the taxable year following the taxable year in which the amount was converted to a Roth IRA or, if later, the end of the 30-day period beginning on the day on which the IRA owner transfers the amount from the Roth IRA back to a traditional IRA by means of a recharacterization (regardless of whether the recharacterization occurs during the taxable year in which the amount was converted to a Roth IRA or the fol-

lowing taxable year). Thus, any attempted reconversion of an amount prior to the time permitted under this paragraph (a)(1) is a failed conversion of that amount. However, see § 1.408A-4 A-3 for a remedy available to an individual who makes a failed conversion.

(2) For purposes of paragraph (a)(1) of this A-9, a failed conversion of an amount resulting from a failure to satisfy the requirements of § 1.408A-4 A-1(a) is treated as a conversion in determining whether an IRA owner has previously converted that amount.

(b)(1) An IRA owner who converts an amount from a traditional IRA to a Roth IRA during taxable year 1998 and then transfers that amount back to a traditional IRA by means of a recharacterization may reconvert that amount once (but no more than once) on or after November 1, 1998 and on or before December 31, 1998; the IRA owner may also reconvert that amount once (but no more than once) during 1999. The rule set forth in the preceding sentence applies without regard to whether the IRA owner's initial conversion or recharacterization of the amount occurred before, on, or after November 1, 1998. An IRA owner who converts an amount from a traditional IRA to a Roth IRA during taxable year 1999 that has not been converted previously and then transfers that amount back to a traditional IRA by means of a recharacterization may reconvert that amount once (but no more than once) on or before December 31, 1999. For purposes of this paragraph (b)(1), a failed conversion of an amount resulting from a failure to satisfy the requirements of § 1.408A-4 A-1(a) is not treated as a conversion in determining whether an IRA owner has previously converted that amount.

(2) A reconversion by an IRA owner during 1998 or 1999 for which the IRA owner is not eligible under paragraph (b)(1) of this A-9 will be deemed an excess reconversion (rather than a failed conversion) and will not change the IRA owner's taxable conversion amount. Instead, the excess reconversion and the last preceding recharacterization will not be taken into account for purposes of determining the IRA owner's taxable conversion amount, and the IRA owner's taxable

conversion amount will be based on the last reconversion that was not an excess reconversion (unless, after the excess reconversion, the amount is transferred back to a traditional IRA by means of a recharacterization). An excess reconversion will otherwise be treated as a valid reconversion.

(3) For purposes of this paragraph (b), any reconversion that an IRA owner made before November 1, 1998 will not be treated as an excess reconversion and will not be taken into account in determining whether any later reconversion is an excess reconversion.

(c) In determining the portion of any amount held in a Roth IRA or a traditional IRA that an IRA owner may not reconvert under this A-9, any amount previously converted (or reconverted) is adjusted for subsequent net income thereon.

Q-10. Are there examples to illustrate the rules in this section?

A-10. The rules in this section are illustrated by the following examples:

Example 1. In 1998, Individual C converts the entire amount in his traditional IRA to a Roth IRA. Individual C thereafter determines that his modified AGI for 1998 exceeded \$100,000 so that he was ineligible to have made a conversion in that year. Accordingly, prior to the due date (plus extensions) for filing the individual's Federal income tax return for 1998, he decides to recharacterize the conversion contribution. He instructs the trustee of the Roth IRA (FIRST IRA) to transfer in a trustee-to-trustee transfer the amount of the contribution, plus net income, to the trustee of a new traditional IRA (SECOND IRA). The individual notifies the trustee of the FIRST IRA and the trustee of the SECOND IRA that he is recharacterizing his IRA contribution (and provides the other information described in A-6 of this section). On the individual's Federal income tax return for 1998, he treats the original amount of the conversion as having been contributed to the SECOND IRA and not the Roth IRA. As a result, for Federal tax purposes, the contribution is treated as having been made to the SECOND IRA and not to the Roth IRA. The result would be the same if the conversion amount had been transferred in a tax-free transfer to another Roth IRA prior to the recharacterization.

Example 2. In 1998, an individual makes a \$2,000 regular contribution for 1998 to his traditional IRA (FIRST IRA). Prior to the due date (plus extensions) for filing the individual's Federal income tax return for 1998, he decides that he would prefer to contribute to a Roth IRA instead. The individual instructs

the trustee of the FIRST IRA to transfer in a trustee-to-trustee transfer the amount of the contribution, plus attributable net income, to the trustee of a Roth IRA (SECOND IRA). The individual notifies the trustee of the FIRST IRA and the trustee of the SECOND IRA that he is recharacterizing his \$2,000 contribution for 1998 (and provides the other information described in A-6 of this section). On the individual's Federal income tax return for 1998, he treats the \$2,000 as having been contributed to the Roth IRA for 1998 and not to the traditional IRA. As a result, for Federal tax purposes, the contribution is treated as having been made to the Roth IRA for 1998 and not to the traditional IRA. The result would be the same if the conversion amount had been transferred in a tax-free transfer to another traditional IRA prior to the recharacterization.

Example 3. The facts are the same as in Example 2, except that the \$2,000 regular contribution is initially made to a Roth IRA and the recharacterizing transfer is made to a traditional IRA. On the individual's Federal income tax return for 1998, he treats the \$2,000 as having been contributed to the traditional IRA for 1998 and not the Roth IRA. As a result, for Federal tax purposes, the contribution is treated as having been made to the traditional IRA for 1998 and not the Roth IRA. The result would be the same if the contribution had been transferred in a tax-free transfer to another Roth IRA prior to the recharacterization, except that the only Roth IRA trustee the individual must notify is the one actually making the recharacterization transfer.

Example 4. In 1998, an individual receives a distribution from traditional IRA 1 and contributes the entire amount to traditional IRA 2 in a rollover contribution described in section 408(d)(3). In this case, the individual cannot elect to recharacterize the contribution by transferring the contribution amount, plus net income, to a Roth IRA, because an amount contributed to an IRA in a tax-free transfer cannot be recharacterized. However, the individual may convert (other than by recharacterization) the amount in traditional IRA 2 to a Roth IRA at any time, provided the requirements of § 1.408A-4 A-1 are satisfied.

[T.D. 8816, 64 FR 5605, Feb. 4, 1999, as amended by T.D. 9056, 68 FR 23589, May 5, 2003]

§ 1.408A-6 Distributions.

This section sets forth the following questions and answers that provide rules regarding distributions from Roth IRAs:

Q-1. How are distributions from Roth IRAs taxed?

A-1. (a) The taxability of a distribution from a Roth IRA generally depends on whether or not the distribution is a qualified distribution. This A-1 provides rules for qualified distributions and certain other nontaxable distributions. A-4 of this section provides rules for the taxability of distributions that are not qualified distributions.

(b) A distribution from a Roth IRA is not includible in the owner's gross income if it is a qualified distribution or to the extent that it is a return of the owner's contributions to the Roth IRA (determined in accordance with A-8 of this section). A qualified distribution is one that is both—

(1) Made after a 5-taxable-year period (defined in A-2 of this section); and

(2) Made on or after the date on which the owner attains age 59½, made to a beneficiary or the estate of the owner on or after the date of the owner's death, attributable to the owner's being disabled within the meaning of section 72(m)(7), or to which section 72(t)(2)(F) applies (exception for first-time home purchase).

(c) An amount distributed from a Roth IRA will not be included in gross income to the extent it is rolled over to another Roth IRA on a tax-free basis under the rules of sections 408(d)(3) and 408A(e).

(d) Contributions that are returned to the Roth IRA owner in accordance with section 408(d)(4) (corrective distributions) are not includible in gross income, but any net income required to be distributed under section 408(d)(4) together with the contributions is includible in gross income for the taxable year in which the contributions were made.

Q-2. When does the 5-taxable-year period described in A-1 of this section (relating to qualified distributions) begin and end?

A-2. The 5-taxable-year period described in A-1 of this section begins on the first day of the individual's taxable year for which the first regular contribution is made to any Roth IRA of the individual or, if earlier, the first day of the individual's taxable year in which the first conversion contribution is made to any Roth IRA of the individual. The 5-taxable-year period ends on the last day of the individual's fifth

consecutive taxable year beginning with the taxable year described in the preceding sentence. For example, if an individual whose taxable year is the calendar year makes a first-time regular Roth IRA contribution any time between January 1, 1998, and April 15, 1999, for 1998, the 5-taxable-year period begins on January 1, 1998. Thus, each Roth IRA owner has only one 5-taxable-year period described in A-1 of this section for all the Roth IRAs of which he or she is the owner. Further, because of the requirement of the 5-taxable-year period, no qualified distributions can occur before taxable years beginning in 2003. For purposes of this A-2, the amount of any contribution distributed as a corrective distribution under A-1(d) of this section is treated as if it was never contributed.

Q-3. If a distribution is made to an individual who is the sole beneficiary of his or her deceased spouse's Roth IRA and the individual is treating the Roth IRA as his or her own, can the distribution be a qualified distribution based on being made to a beneficiary on or after the owner's death?

A-3. No. If a distribution is made to an individual who is the sole beneficiary of his or her deceased spouse's Roth IRA and the individual is treating the Roth IRA as his or her own, then, in accordance with § 1.408A-2 A-4, the distribution is treated as coming from the individual's own Roth IRA and not the deceased spouse's Roth IRA. Therefore, for purposes of determining whether the distribution is a qualified distribution, it is not treated as made to a beneficiary on or after the owner's death.

Q-4. How is a distribution from a Roth IRA taxed if it is not a qualified distribution?

A-4. A distribution that is not a qualified distribution, and is neither contributed to another Roth IRA in a qualified rollover contribution nor constitutes a corrective distribution, is includible in the owner's gross income to the extent that the amount of the distribution, when added to the amount of all prior distributions from the owner's Roth IRAs (whether or not they were qualified distributions) and reduced by the amount of those prior distributions previously includible in gross income,

exceeds the owner's contributions to all his or her Roth IRAs. For purposes of this A-4, any amount distributed as a corrective distribution is treated as if it was never contributed.

Q-5. Will the additional tax under 72(t) apply to the amount of a distribution that is not a qualified distribution?

A-5. (a) The 10-percent additional tax under section 72(t) will apply (unless the distribution is excepted under section 72(t)) to any distribution from a Roth IRA includible in gross income.

(b) The 10-percent additional tax under section 72(t) also applies to a nonqualified distribution, even if it is not then includible in gross income, to the extent it is allocable to a conversion contribution, if the distribution is made within the 5-taxable-year period beginning with the first day of the individual's taxable year in which the conversion contribution was made. The 5-taxable-year period ends on the last day of the individual's fifth consecutive taxable year beginning with the taxable year described in the preceding sentence. For purposes of applying the tax, only the amount of the conversion contribution includible in gross income as a result of the conversion is taken into account. The exceptions under section 72(t) also apply to such a distribution.

(c) The 5-taxable-year period described in this A-5 for purposes of determining whether section 72(t) applies to a distribution allocable to a conversion contribution is separately determined for each conversion contribution, and need not be the same as the 5-taxable-year period used for purposes of determining whether a distribution is a qualified distribution under A-1(b) of this section. For example, if a calendar-year taxpayer who received a distribution from a traditional IRA on December 31, 1998, makes a conversion contribution by contributing the distributed amount to a Roth IRA on February 25, 1999 in a qualifying rollover contribution and makes a regular contribution for 1998 on the same date, the 5-taxable-year period for purposes of this A-5 begins on January 1, 1999, while the 5-taxable-year period for purposes of A-1(b) of this section begins on January 1, 1998.

Q-6. Is there a special rule for taxing distributions allocable to a 1998 conversion?

A-6. Yes. In the case of a distribution from a Roth IRA in 1998, 1999 or 2000 of amounts allocable to a 1998 conversion with respect to which the 4-year spread for the resultant income inclusion applies (see §1.408A-4 A-8), any income deferred as a result of the election to years after the year of the distribution is accelerated so that it is includible in gross income in the year of the distribution up to the amount of the distribution allocable to the 1998 conversion (determined under A-8 of this section). This amount is in addition to the amount otherwise includible in the owner's gross income for that taxable year as a result of the conversion. However, this rule will not require the inclusion of any amount to the extent it exceeds the total amount of income required to be included over the 4-year period. The acceleration of income inclusion described in this A-6 applies in the case of a surviving spouse who elects to continue the 4-year spread in accordance with §1.408A-4 A-11(b).

Q-7. Is the 5-taxable-year period described in A-1 of this section redetermined when a Roth IRA owner dies?

A-7. (a) No. The beginning of the 5-taxable-year period described in A-1 of this section is not redetermined when the Roth IRA owner dies. Thus, in determining the 5-taxable-year period, the period the Roth IRA is held in the name of a beneficiary, or in the name of a surviving spouse who treats the decedent's Roth IRA as his or her own, includes the period it was held by the decedent.

(b) The 5-taxable-year period for a Roth IRA held by an individual as a beneficiary of a deceased Roth IRA owner is determined independently of the 5-taxable-year period for the beneficiary's own Roth IRA. However, if a surviving spouse treats the Roth IRA as his or her own, the 5-taxable-year period with respect to any of the surviving spouse's Roth IRAs (including the one that the surviving spouse treats as his or her own) ends at the earlier of the end of either the 5-taxable-year period for the decedent or the 5-taxable-year period applicable to the spouse's own Roth IRAs.

Q-8. How is it determined whether an amount distributed from a Roth IRA is allocated to regular contributions, conversion contributions, or earnings?

A-8. (a) Any amount distributed from an individual's Roth IRA is treated as made in the following order (determined as of the end of a taxable year and exhausting each category before moving to the following category)—

- (1) From regular contributions;
- (2) From conversion contributions, on a first-in-first-out basis; and
- (3) From earnings.

(b) To the extent a distribution is treated as made from a particular conversion contribution, it is treated as made first from the portion, if any, that was includible in gross income as a result of the conversion.

Q-9. Are there special rules for determining the source of distributions under A-8 of this section?

A-9. Yes. For purposes of determining the source of distributions, the following rules apply:

(a) All distributions from all an individual's Roth IRAs made during a taxable year are aggregated.

(b) All regular contributions made for the same taxable year to all the individual's Roth IRAs are aggregated and added to the undistributed total regular contributions for prior taxable years. Regular contributions for a taxable year include contributions made in the following taxable year that are identified as made for the taxable year in accordance with § 1.408A-3 A-2. For example, a regular contribution made in 1999 for 1998 is aggregated with the contributions made in 1998 for 1998.

(c) All conversion contributions received during the same taxable year by all the individual's Roth IRAs are aggregated. Notwithstanding the preceding sentence, all conversion contributions made by an individual during 1999 that were distributed from a traditional IRA in 1998 and with respect to which the 4-year spread applies are treated for purposes of A-8(b) of this section as contributed to the individual's Roth IRAs prior to any other conversion contributions made by the individual during 1999.

(d) A distribution from an individual's Roth IRA that is rolled over to another Roth IRA of the individual in

accordance with section 408A(e) is disregarded for purposes of determining the amount of both contributions and distributions.

(e) Any amount distributed as a corrective distribution (including net income), as described in A-1(d) of this section, is disregarded in determining the amount of contributions, earnings, and distributions.

(f) If an individual recharacterizes a contribution made to a traditional IRA (FIRST IRA) by transferring the contribution to a Roth IRA (SECOND IRA) in accordance with § 1.408A-5, then, pursuant to § 1.408A-5 A-3, the contribution to the Roth IRA is taken into account for the same taxable year for which it would have been taken into account if the contribution had originally been made to the Roth IRA and had never been contributed to the traditional IRA. Thus, the contribution to the Roth IRA is treated as contributed to the Roth IRA on the same date and for the same taxable year that the contribution was made to the traditional IRA.

(g) If an individual recharacterizes a regular or conversion contribution made to a Roth IRA (FIRST IRA) by transferring the contribution to a traditional IRA (SECOND IRA) in accordance with § 1.408A-5, then pursuant to § 1.408A-5 A-3, the contribution to the Roth IRA and the recharacterizing transfer are disregarded in determining the amount of both contributions and distributions for the taxable year with respect to which the original contribution was made to the Roth IRA.

(h) Pursuant to § 1.408A-5 A-3, the effect of income or loss (determined in accordance with § 1.408A-5 A-2) occurring after the contribution to the FIRST IRA is disregarded in determining the amounts described in paragraphs (f) and (g) of this A-9. Thus, for purposes of paragraphs (f) and (g), the amount of the contribution is determined based on the original contribution.

Q-10. Are there examples to illustrate the ordering rules described in A-8 and A-9 of this section?

A-10. Yes. The following examples illustrate these ordering rules:

Example 1. In 1998, individual B converts \$80,000 in his traditional IRA to a Roth IRA.

B has a basis of \$20,000 in the conversion amount and so must include the remaining \$60,000 in gross income. He decides to spread the \$60,000 income by including \$15,000 in each of the 4 years 1998–2001, under the rules of § 1.408A-4 A-8. B also makes a regular contribution of \$2,000 in 1998. If a distribution of \$2,000 is made to B anytime in 1998, it will be treated as made entirely from the regular contributions, so there will be no Federal income tax consequences as a result of the distribution.

Example 2. The facts are the same as in *Example 1*, except that the distribution made in 1998 is \$5,000. The distribution is treated as made from \$2,000 of regular contributions and \$3,000 of conversion contributions that were includible in gross income. As a result, B must include \$18,000 in gross income for 1998: \$3,000 as a result of the acceleration of amounts that otherwise would have been included in later years under the 4-year-spread rule and \$15,000 includible under the regular 4-year-spread rule. In addition, because the \$3,000 is allocable to a conversion made within the previous 5 taxable years, the 10-percent additional tax under section 72(t) would apply to this \$3,000 distribution for 1998, unless an exception applies. Under the 4-year-spread rule, B would now include in gross income \$15,000 for 1999 and 2000, but only \$12,000 for 2001, because of the accelerated inclusion of the \$3,000 distribution.

Example 3. The facts are the same as in *Example 1*, except that B makes an additional \$2,000 regular contribution in 1999 and he does not take a distribution in 1998. In 1999, the entire balance in the account, \$90,000 (\$84,000 of contributions and \$6,000 of earnings), is distributed to B. The distribution is treated as made from \$4,000 of regular contributions, \$60,000 of conversion contributions that were includible in gross income, \$20,000 of conversion contributions that were not includible in gross income, and \$6,000 of earnings. Because a distribution has been made within the 4-year-spread period, B must accelerate the income inclusion under the 4-year-spread rule and must include in gross income the \$45,000 remaining under the 4-year-spread rule in addition to the \$6,000 of earnings. Because \$60,000 of the distribution is allocable to a conversion made within the previous 5 taxable years, it is subject to the 10-percent additional tax under section 72(t) as if it were includible in gross income for 1999, unless an exception applies. The \$6,000 allocable to earnings would be subject to the tax under section 72(t), unless an exception applies. Under the 4-year-spread rule, no amount would be includible in gross income for 2000 or 2001 because the entire amount of the conversion that was includible in gross income has already been included.

Example 4. The facts are the same as in *Example 1*, except that B also makes a \$2,000 regular contribution in each year 1999

through 2002 and he does not take a distribution in 1998. A distribution of \$85,000 is made to B in 2002. The distribution is treated as made from the \$10,000 of regular contributions (the total regular contributions made in the years 1998–2002), \$60,000 of conversion contributions that were includible in gross income, and \$15,000 of conversion contributions that were not includible in gross income. As a result, no amount of the distribution is includible in gross income; however, because the distribution is allocable to a conversion made within the previous 5 years, the \$60,000 is subject to the 10-percent additional tax under section 72(t) as if it were includible in gross income for 2002, unless an exception applies.

Example 5. The facts are the same as in *Example 4*, except no distribution occurs in 2002. In 2003, the entire balance in the account, \$170,000 (\$90,000 of contributions and \$80,000 of earnings), is distributed to B. The distribution is treated as made from \$10,000 of regular contributions, \$60,000 of conversion contributions that were includible in gross income, \$20,000 of conversion contributions that were not includible in gross income, and \$80,000 of earnings. As a result, for 2003, B must include in gross income the \$80,000 allocable to earnings, unless the distribution is a qualified distribution; and if it is not a qualified distribution, the \$80,000 would be subject to the 10-percent additional tax under section 72(t), unless an exception applies.

Example 6. Individual C converts \$20,000 to a Roth IRA in 1998 and \$15,000 (in which amount C had a basis of \$2,000) to another Roth IRA in 1999. No other contributions are made. In 2003, a \$30,000 distribution, that is not a qualified distribution, is made to C. The distribution is treated as made from \$20,000 of the 1998 conversion contribution and \$10,000 of the 1999 conversion contribution that was includible in gross income. As a result, for 2003, no amount is includible in gross income; however, because \$10,000 is allocable to a conversion contribution made within the previous 5 taxable years, that amount is subject to the 10-percent additional tax under section 72(t) as if the amount were includible in gross income for 2003, unless an exception applies. The result would be the same whichever of C's Roth IRAs made the distribution.

Example 7. The facts are the same as in *Example 6*, except that the distribution is a qualified distribution. The result is the same as in *Example 6*, except that no amount would be subject to the 10-percent additional tax under section 72(t), because, to be a qualified distribution, the distribution must be made on or after the date on which the owner attains age 59½, made to a beneficiary or the estate of the owner on or after the date of the owner's death, attributable to the owner's being disabled within the meaning of section 72(m)(7), or to which section

72(t)(2)(F) applies (exception for a first-time home purchase). Under section 72(t)(2), each of these conditions is also an exception to the tax under section 72(t).

Example 8. Individual D makes a \$2,000 regular contribution to a traditional IRA on January 1, 1999, for 1998. On April 15, 1999, when the \$2,000 has increased to \$2,500, D recharacterizes the contribution by transferring the \$2,500 to a Roth IRA (pursuant to § 1.408A-5 A-1). In this case, D's regular contribution to the Roth IRA for 1998 is \$2,000. The \$500 of earnings is not treated as a contribution to the Roth IRA. The results would be the same if the \$2,000 had decreased to \$1,500 prior to the recharacterization.

Example 9. In December 1998, individual E receives a distribution from his traditional IRA of \$300,000 and in January 1999 he contributes the \$300,000 to a Roth IRA as a conversion contribution. In April 1999, when the \$300,000 has increased to \$350,000, E recharacterizes the conversion contribution by transferring the \$350,000 to a traditional IRA. In this case, E's conversion contribution for 1998 is \$0, because the \$300,000 conversion contribution and the earnings of \$50,000 are disregarded. The results would be the same if the \$300,000 had decreased to \$250,000 prior to the recharacterization. Further, since the conversion is disregarded, the \$300,000 is not includible in gross income in 1998.

Q-11. If the owner of a Roth IRA dies prior to the end of the 5-taxable-year period described in A-1 of this section (relating to qualified distributions) or prior to the end of the 5-taxable-year period described in A-5 of this section (relating to conversions), how are different types of contributions in the Roth IRA allocated to multiple beneficiaries?

A-11. Each type of contribution is allocated to each beneficiary on a pro-rata basis. Thus, for example, if a Roth IRA owner dies in 1999, when the Roth IRA contains a regular contribution of \$2,000, a conversion contribution of \$6,000 and earnings of \$1,000, and the owner leaves his Roth IRA equally to four children, each child will receive one quarter of each type of contribution. Pursuant to the ordering rules in A-8 of this section, an immediate distribution of \$2,000 to one of the children will be deemed to consist of \$500 of regular contributions and \$1,500 of conversion contributions. A beneficiary's inherited Roth IRA may not be aggregated with any other Roth IRA maintained by such beneficiary (except for other Roth IRAs the beneficiary inher-

ited from the same decedent), unless the beneficiary, as the spouse of the decedent and sole beneficiary of the Roth IRA, elects to treat the Roth IRA as his or her own (see A-7 and A-14 of this section).

Q-12. How do the withholding rules under section 3405 apply to Roth IRAs?

A-12. Distributions from a Roth IRA are distributions from an individual retirement plan for purposes of section 3405 and thus are designated distributions unless one of the exceptions in section 3405(e)(1) applies. Pursuant to section 3405(a) and (b), nonperiodic distributions from a Roth IRA are subject to 10-percent withholding by the payor and periodic payments are subject to withholding as if the payments were wages. However, an individual can elect to have no amount withheld in accordance with section 3405(a)(2) and (b)(2).

Q-13. Do the withholding rules under section 3405 apply to conversions?

A-13. Yes. A conversion by any method described in § 1.408A-4 A-1 is considered a designated distribution subject to section 3405. However, a conversion occurring in 1998 by means of a trustee-to-trustee transfer of an amount from a traditional IRA to a Roth IRA established with the same or a different trustee is not required to be treated as a designated distribution for purposes of section 3405. Consequently, no withholding is required with respect to such a conversion (without regard to whether or not the individual elected to have no withholding).

Q-14. What minimum distribution rules apply to a Roth IRA?

A-14. (a) No minimum distributions are required to be made from a Roth IRA under section 408(a)(6) and (b)(3) (which generally incorporate the provisions of section 401(a)(9)) while the owner is alive. The post-death minimum distribution rules under section 401(a)(9)(B) that apply to traditional IRAs, with the exception of the at-least-as-rapidly rule described in section 401(a)(9)(B)(i), also apply to Roth IRAs.

(b) The minimum distribution rules apply to the Roth IRA as though the Roth IRA owner died before his or her required beginning date. Thus, generally, the entire interest in the Roth

IRA must be distributed by the end of the fifth calendar year after the year of the owner's death unless the interest is payable to a designated beneficiary over a period not greater than that beneficiary's life expectancy and distribution commences before the end of the calendar year following the year of death. If the sole beneficiary is the decedent's spouse, such spouse may delay distributions until the decedent would have attained age 70½ or may treat the Roth IRA as his or her own.

(c) Distributions to a beneficiary that are not qualified distributions will be includible in the beneficiary's gross income according to the rules in A-4 of this section.

Q-15. Does section 401(a)(9) apply separately to Roth IRAs and individual retirement plans that are not Roth IRAs?

A-15. Yes. An individual required to receive minimum distributions from his or her own traditional or SIMPLE IRA cannot choose to take the amount of the minimum distributions from any Roth IRA. Similarly, an individual required to receive minimum distributions from a Roth IRA cannot choose to take the amount of the minimum distributions from a traditional or SIMPLE IRA. In addition, an individual required to receive minimum distributions as a beneficiary under a Roth IRA can only satisfy the minimum distributions for one Roth IRA by distributing from another Roth IRA if the Roth IRAs were inherited from the same decedent.

Q-16. How is the basis of property distributed from a Roth IRA determined for purposes of a subsequent disposition?

A-16. The basis of property distributed from a Roth IRA is its fair market value (FMV) on the date of distribution, whether or not the distribution is a qualified distribution. Thus, for example, if a distribution consists of a share of stock in XYZ Corp. with an FMV of \$40.00 on the date of distribution, for purposes of determining gain or loss on the subsequent sale of the share of XYZ Corp. stock, it has a basis of \$40.00.

Q-17. What is the effect of distributing an amount from a Roth IRA and contributing it to another type of retirement plan other than a Roth IRA?

A-17. Any amount distributed from a Roth IRA and contributed to another type of retirement plan (other than a Roth IRA) is treated as a distribution from the Roth IRA that is neither a rollover contribution for purposes of section 408(d)(3) nor a qualified rollover contribution within the meaning of section 408A(e) to the other type of retirement plan. This treatment also applies to any amount transferred from a Roth IRA to any other type of retirement plan unless the transfer is a recharacterization described in § 1.408A-5.

Q-18. Can an amount be transferred directly from an education IRA to a Roth IRA (or distributed from an education IRA and rolled over to a Roth IRA)?

A-18. No amount may be transferred directly from an education IRA to a Roth IRA. A transfer of funds (or distribution and rollover) from an education IRA to a Roth IRA constitutes a distribution from the education IRA and a regular contribution to the Roth IRA (rather than a qualified rollover contribution to the Roth IRA).

Q-19. What are the Federal income tax consequences of a Roth IRA owner transferring his or her Roth IRA to another individual by gift?

A-19. A Roth IRA owner's transfer of his or her Roth IRA to another individual by gift constitutes an assignment of the owner's rights under the Roth IRA. At the time of the gift, the assets of the Roth IRA are deemed to be distributed to the owner and, accordingly, are treated as no longer held in a Roth IRA. In the case of any such gift of a Roth IRA made prior to October 1, 1998, if the entire interest in the Roth IRA is reconveyed to the Roth IRA owner prior to January 1, 1999, the Internal Revenue Service will treat the gift and reconveyance as never having occurred for estate tax, gift tax, and generation-skipping tax purposes and for purposes of this A-19.

[T.D. 8816, 64 FR 5607, Feb. 4, 1999]

§ 1.408A-7 Reporting.

This section sets forth the following questions and answers that relate to the reporting requirements applicable to Roth IRAs:

Q-1. What reporting requirements apply to Roth IRAs?

A-1. Generally, the reporting requirements applicable to IRAs other than Roth IRAs also apply to Roth IRAs, except that, pursuant to section 408A(d)(3)(D), the trustee of a Roth IRA must include on Forms 1099-R and 5498 additional information as described in the instructions thereto. Any conversion of amounts from an IRA other than a Roth IRA to a Roth IRA is treated as a distribution for which a Form 1099-R must be filed by the trustee maintaining the non-Roth IRA. In addition, the owner of such IRAs must report the conversion by completing Form 8606. In the case of a recharacterization described in § 1.408A-5 A-1, IRA owners must report such transactions in the manner prescribed in the instructions to the applicable Federal tax forms.

Q-2. Can a trustee rely on reasonable representations of a Roth IRA contributor or distributee for purposes of fulfilling reporting obligations?

A-2. A trustee maintaining a Roth IRA is permitted to rely on reasonable representations of a Roth IRA contributor or distributee for purposes of fulfilling reporting obligations.

[T.D. 8816, 64 FR 5610, Feb. 4, 1999]

§ 1.408A-8 Definitions.

This section sets forth the following question and answer that provides definitions of terms used in the provisions of §§ 1.408A-1 through 1.408A-7 and this section:

Q-1. Are there any special definitions that govern in applying the provisions of §§ 1.408A-1 through 1.408A-7 and this section?

A-1. Yes, the following definitions govern in applying the provisions of §§ 1.408A-1 through 1.408A-7 and this section. Unless the context indicates otherwise, the use of a particular term excludes the use of the other terms.

(a) *Different types of IRAs*—(1) *IRA*. Sections 408(a) and (b), respectively, describe an individual retirement account and an individual retirement annuity. The term IRA means an IRA described in either section 408(a) or (b), including each IRA described in paragraphs (a)(2) through (5) of this A-1. However, the term IRA does not include an education IRA described in section 530.

(2) *Traditional IRA*. The term traditional IRA means an individual retirement account or individual retirement annuity described in section 408(a) or (b), respectively. This term includes a SEP IRA but does not include a SIMPLE IRA or a Roth IRA.

(3) *SEP IRA*. Section 408(k) describes a simplified employee pension (SEP) as an employer-sponsored plan under which an employer can make contributions to IRAs established for its employees. The term SEP IRA means an IRA that receives contributions made under a SEP. The term SEP includes a salary reduction SEP (SARSEP) described in section 408(k)(6).

(4) *SIMPLE IRA*. Section 408(p) describes a SIMPLE IRA Plan as an employer-sponsored plan under which an employer can make contributions to SIMPLE IRAs established for its employees. The term SIMPLE IRA means an IRA to which the only contributions that can be made are contributions under a SIMPLE IRA Plan or rollovers or transfers from another SIMPLE IRA.

(5) *Roth IRA*. The term Roth IRA means an IRA that meets the requirements of section 408A.

(b) *Other defined terms or phrases*—(1) *4-year spread*. The term 4-year spread is described in § 1.408A-4 A-8.

(2) *Conversion*. The term conversion means a transaction satisfying the requirements of § 1.408A-4 A-1.

(3) *Conversion amount or conversion contribution*. The term conversion amount or conversion contribution is the amount of a distribution and contribution with respect to which a conversion described in § 1.408A-4 A-1 is made.

(4) *Failed conversion*. The term failed conversion means a transaction in which an individual contributes to a Roth IRA an amount transferred or distributed from a traditional IRA or Simple IRA (including a transfer by redesignation) in a transaction that does not constitute a conversion under § 1.408A-4 A-1.

(5) *Modified AGI*. The term modified AGI is defined in § 1.408A-3 A-5.

(6) *Recharacterization*. The term recharacterization means a transaction described in § 1.408A-5 A-1.

(7) *Recharacterized amount or recharacterized contribution.* The term recharacterized amount or recharacterized contribution means an amount or contribution treated as contributed to an IRA other than the one to which it was originally contributed pursuant to a recharacterization described in § 1.408A-5 A-1.

(8) *Taxable conversion amount.* The term taxable conversion amount means the portion of a conversion amount includible in income on account of a conversion, determined under the rules of section 408(d)(1) and (2).

(9) *Tax-free transfer.* The term tax-free transfer means a tax-free rollover described in section 402(c), 402(e)(6), 403(a)(4), 403(a)(5), 403(b)(8), 403(b)(10) or 408(d)(3), or a tax-free trustee-to-trustee transfer.

(10) *Treat an IRA as his or her own.* The phrase treat an IRA as his or her own means to treat an IRA for which a surviving spouse is the sole beneficiary as his or her own IRA after the death of the IRA owner in accordance with the terms of the IRA instrument or in the manner provided in the regulations under section 408(a)(6) or (b)(3).

(11) *Trustee.* The term trustee includes a custodian or issuer (in the case of an annuity) of an IRA (except where the context clearly indicates otherwise).

[T.D. 8816, 64 FR 5610, Feb. 4, 1999]

§ 1.408A-9 Effective date.

This section contains the following question and answer providing the effective date of §§ 1.408A-1 through 1.408A-8:

Q-1. To what taxable years do §§ 1.408A-1 through 1.408A-8 apply?

A-1 Sections 1.408A-1 through 1.408A-8 apply to taxable years beginning on or after January 1, 1998.

[T.D. 8816, 64 FR 5611, Feb. 4, 1999]

§ 1.408A-10 Coordination between designated Roth accounts and Roth IRAs.

Q-1. Can an eligible rollover distribution, within the meaning of section 402(c)(4), from a designated Roth account, as defined in A-1 of § 1.402A-1, be rolled over to a Roth IRA?

A-1. Yes. An eligible rollover distribution, within the meaning of section 402(c)(4), from a designated Roth account may be rolled over to a Roth IRA. For purposes of this section, a designated Roth account means a designated Roth account as defined in A-1 of § 1.402A-1.

Q-2. Can an eligible rollover distribution from a designated Roth account be rolled over to a Roth IRA even if the distributee is not otherwise eligible to make regular or conversion contributions to a Roth IRA?

A-2. Yes. An individual may establish a Roth IRA and roll over an eligible rollover distribution from a designated Roth account to that Roth IRA even if such individual is not eligible to make regular contributions or conversion contributions (as described in section 408A(c)(2) and (d)(3), respectively) because of the modified adjusted gross income limits in section 408A(b)(3).

Q-3. For purposes of the ordering rules on distributions from Roth IRAs, what portion of a distribution from a rollover contribution from a designated Roth account is treated as contributions?

A-3. (a) Under section 408A(d)(4), distributions from Roth IRAs are deemed to consist first of regular contributions, then of conversion contributions, and finally, of earnings. For purposes of section 408A(d)(4), the amount of a rollover contribution that is treated as a regular contribution is the portion of the distribution that is treated as investment in the contract under A-6 of § 1.402A-1, and the remainder of the rollover contribution is treated as earnings. Thus, the entire amount of any qualified distribution from a designated Roth account that is rolled over into a Roth IRA is treated as a regular contribution to the Roth IRA. Accordingly, a subsequent distribution from the Roth IRA in the amount of that rollover contribution is not includible in gross income under the rules of A-8 of § 1.408A-6.

(b) If the entire account balance of a designated Roth account is distributed to an employee and only a portion of the distribution is rolled over to a Roth IRA within the 60-day period described in section 402(c)(3), and at the

time of the distribution, the investment in the contract exceeds the balance in the designated Roth account, the portion of investment in the contract that exceeds the amount used to determine the taxable amount of the distribution is treated as a regular contribution for purposes of section 408A(d)(4).

Q-4. In the case of a rollover from a designated Roth account to a Roth IRA, when does the 5-taxable-year period (described in section 408A(d)(2)(B) and A-1 of § 1.408A-6) for determining qualified distributions from a Roth IRA begin?

A-4. (a) The 5-taxable-year period for determining a qualified distribution from a Roth IRA (described in section 408A(d)(2)(B) and A-1 of § 1.408A-6) begins with the earlier of the taxable year described in A-2 of § 1.408A-6 or the taxable year in which a rollover contribution from a designated Roth account is made to a Roth IRA. The 5-taxable-year period described in this A-4 and the 5-taxable-year period of participation described in A-4 of § 1.402A-1 are determined independently.

(b) The following examples illustrate the application of this A-4:

Example 1. Employee D began making designated Roth contributions under his employer's 401(k) plan in 2006. Employee D, who is over age 59½, takes a distribution from D's designated Roth account in 2008, prior to the end of the 5-taxable-year period of participation used to determine qualified distributions from a designated Roth account. The distribution is an eligible rollover distribution and D rolls it over in accordance with sections 402(c) and 402A(c)(3) to D's Roth IRA, which was established in 2003. Any subsequent distribution from the Roth IRA of the amount rolled in, plus earnings thereon, would not be includible in gross income (because it would be a qualified distribution within the meaning of section 408A(d)(2)).

Example 2. The facts are the same as in *Example 1*, except that the Roth IRA is D's first Roth IRA and is established with the rollover in 2008, which is the only contribution made to the Roth IRA. If a distribution is made from the Roth IRA prior to the end of the 5-taxable-year period used to determine qualified distributions from a Roth IRA (which begins in 2008, the year of the rollover which established the Roth IRA) the distribution would not be a qualified distribution within the meaning of section 408A(d)(2), and any amount of the distribution that exceeded the portion of the rollover

contribution that consisted of investment in the contract is includible in D's gross income.

Example 3. The facts are the same as in *Example 2*, except that the distribution from the designated Roth account and the rollover to the Roth IRA occur in 2011 (after the end of the 5-taxable-year period of participation used to determine qualified distributions from a designated Roth account). If a distribution is made from the Roth IRA prior to the expiration of the 5-taxable-year period used to determine qualified distributions from a Roth IRA, the distribution would not be a qualified distribution within the meaning of section 408A(d)(2), and any amount of the distribution that exceeded the amount rolled in is includible in D's gross income.

Q-5. Can amounts distributed from a Roth IRA be rolled over to a designated Roth account as defined in A-1 of § 1.402A-1?

A-5. No. Amounts distributed from a Roth IRA may be rolled over or transferred only to another Roth IRA and are not permitted to be rolled over to a designated Roth account under a section 401(a) or section 403(b) plan. The same rule applies even if all the amounts in the Roth IRA are attributable to a rollover distribution from a designated Roth account in a plan.

Q-6. When is this § 1.408A-10 applicable?

A-6. The rules of this § 1.408A-10 apply for taxable years beginning on or after January 1, 2006.

[T.D. 9324, 72 FR 21115, Apr. 30, 2007]

§ 1.409-1 Retirement bonds.

(a) *In general.* Section 409 authorizes the issuance of bonds under the Second Liberty Bond Act the purchase price of which would be deductible under section 219. Section 409 also prescribes the tax treatment of such bonds. See paragraph (b) of this section.

(b) *Income tax treatment of bonds—(1) General rule.* Except as provided in paragraph (b)(2) of this section, the entire proceeds upon redemption of a retirement bond described in section 409(a) shall be included in the gross income of the taxpayer entitled to such proceeds. If a bond has not been tendered for redemption by the registered owner before the close of the taxable year in which he attains age 70½, he must include in his gross income for such taxable year the amount of the

proceeds he would have received if the bond had been redeemed at age 70½. The provisions of sections 72 and 1232 do not apply to a retirement bond.

(2) *Exceptions.* (i) If a retirement bond is redeemed within 12 months after the issue date, the proceeds are excluded from gross income if no deduction is allowed under section 219 on account of the purchase of such bond. For definition of issue date, see 31 CFR 346.1(c).

(ii) If a retirement bond is redeemed after the close of the taxable year in which the registered owner attains age 70½ the proceeds from the redemption of the bond are excludable from the gross income of the registered owner or his beneficiary to the extent that such proceeds were includible in the gross income of the registered owner for such taxable year.

(iii) If a retirement bond is surrendered for reissuance in the same or lesser face amount, the difference between current redemption value of the bond surrendered for reissuance and the current surrender value of the bond reissued is includible in the gross income of the registered owner.

(3) *Basis.* The basis of a retirement bond is zero.

(c) *Rollover.* The first sentence of paragraph (b)(1) of this section shall not apply in any case in which a retirement bond is redeemed by the registered owner before the close of the taxable year in which he attains the age of 70½ if he transfers the entire amount of the proceeds of such redemption to—

(1) An individual retirement account described in section 408(a) or an individual retirement annuity described in section 408(b) (other than an endowment contract described in § 1.408-3(e)), or

(2) An employees' trust which is described in section 401(a) which is exempt from tax under section 501(a), or an annuity plan described in section 403(a), for the benefit of the registered owner, on or before the 60th day after the day on which he received the proceeds of such redemption. This subparagraph shall not apply in the case of a transfer to a trust or plan described in (c)(2) of this section unless no part of the purchase price of the retirement bond redeemed is attributable to any

source other than a rollover contribution from such an employees' trust or annuity plan (other than an annuity plan or employees' trust forming part of a plan under which the individual was an employee within the meaning of section 401(c)(1) at the time contributions were made on his behalf under the plan).

(d) *Additional tax.*—(1) *Early redemption.* Except as provided in paragraph (d)(2) of this section, under section 409(c) if a retirement bond is redeemed by the registered owner before he attains age 59½, his tax under chapter 1 of the Code is increased by an amount equal to 10 percent of the proceeds of the redemption includible in his gross income for the taxable year. Except in the case of the credits allowable under sections 31, 39, or 42, no credit can be used to offset the tax described in the preceding sentence.

(2) *Limitations.* Paragraph (d)(1) of this section shall not apply if—

(i) During the taxable year of the registered owner in which a retirement bond is redeemed, the registered owner becomes disabled within the meaning of section 72(m)(7), or

(ii) A retirement bond is tendered for redemption in accordance with paragraph (b)(2)(i) of this section.

- [T.D. 9321, 72 FR 19276, Apr. 17, 2007]
- § 1.409A-1 Definitions and covered plans.**
- (a) *Nonqualified deferred compensation plan*—(1) *In general.* Except as otherwise provided in this paragraph (a), the term *nonqualified deferred compensation plan* means any plan (within the meaning of paragraph (c) of this section) that provides for the deferral of compensation (within the meaning of paragraph (b) of this section). Whether a plan provides for the deferral of compensation generally is determined at the time the service provider obtains a legally binding right to the compensation under the plan, and is not affected by any retroactive change to the plan to characterize the right as one that does not provide for the deferral of compensation. For example, amounts deferred under a nonqualified deferred compensation plan do not become an excluded death benefit if the plan is

amended so that the amounts are payable only upon the death of the service provider. If a principal purpose of a plan is to achieve a result with respect to a deferral of compensation that is inconsistent with the purposes of section 409A, the Commissioner may treat the plan as a nonqualified deferred compensation plan for purposes of section 409A and the regulations thereunder.

(2) *Qualified employer plans.* The term *nonqualified deferred compensation plan* does not include a qualified employer plan. The term *qualified employer plan* means any of the following plans:

(i) Any plan described in section 401(a) and a trust exempt from tax under section 501(a) or that is described in section 402(d).

(ii) Any annuity plan described in section 403(a).

(iii) Any annuity contract described in section 403(b).

(iv) Any simplified employee pension (within the meaning of section 408(k)).

(v) Any simple retirement account (within the meaning of section 408(p)).

(vi) Any plan under which an active participant makes deductible contributions to a trust described in section 501(c)(18).

(vii) Any eligible deferred compensation plan (within the meaning of section 457(b)).

(viii) Any plan described in section 415(m).

(ix) Any plan described in § 1022(i)(2) of the Employee Retirement Income Security Act of 1974, Public Law 93-406 (88 Stat. 829, 942) (Sept. 2, 1974) (ERISA).

(3) *Certain foreign plans*—(i) *Participation addressed by treaty.* With respect to an individual for a taxable year, the term *nonqualified deferred compensation plan* does not include any scheme, trust, arrangement, or plan maintained with respect to such individual, to the extent contributions made by or on behalf of such individual to such scheme, trust, arrangement, or plan, or credited allocations, accrued benefits, earnings, or other amounts constituting income, of such individual under such scheme, trust, arrangement, or plan, are excludable by such individual for Federal income tax purposes pursuant to any bilateral income tax convention, or

other bilateral or multilateral agreement, to which the United States is a party.

(ii) *Participation by nonresident aliens, certain resident aliens, and bona fide residents of possessions.* With respect to an alien individual for a taxable year during which such individual is a nonresident alien, a resident alien classified as a resident alien solely under section 7701(b)(1)(A)(ii) (and not section 7701(b)(1)(A)(i)), or a bona fide resident of a possession (within the meaning of section 937(a)), the term *nonqualified deferred compensation plan* does not include any broad-based foreign retirement plan (within the meaning of paragraph (a)(3)(v) of this section).

(iii) *Participation by U.S. citizens and lawful permanent residents.* With respect to an individual for a given taxable year during which such individual is a U.S. citizen or a resident alien classified as a resident alien under section 7701(b)(1)(A)(i), other than an individual who is also a bona fide resident of a possession (within the meaning of section 937(a)), the term *nonqualified deferred compensation plan* does not include a broad-based foreign retirement plan (within the meaning of paragraph (a)(3)(v) of this section), but only with respect to a plan, or a portion of a plan where such portion may be distinguished, providing for nonelective deferrals of modified foreign earned income, and earnings with respect to such nonelective deferrals, and only to the extent that the amounts deferred under all such plans of the service recipient, or all portions of such plans, in which the service provider participates in such taxable year, do not exceed the applicable limits under section 415(b) (applied to nonaccount balance plans as defined in paragraph (c)(2)(i)(C) of this section) and section 415(c) (applied to account balance plans as defined in paragraph (c)(2)(i)(A) of this section) that would be applicable if such plans were plans subject to section 415 and the modified foreign earned income of such individual were treated as compensation for purposes of applying section 415(b) and (c). For purposes of this paragraph (a)(3)(iii), the term *modified foreign earned income* means foreign earned income as defined in section 911(b)(1) without regard to section

911(b)(1)(B)(iv) and without regard to the requirement that the income be attributable to services performed during the period described in section 911(d)(1)(A) or (B). The provisions of this paragraph (a)(3)(iii) do not apply to any individual with respect to any taxable year in which the individual is simultaneously eligible to participate in a broad-based foreign retirement plan and a qualified employer plan described in paragraph (a)(2) of this section. For purposes of this paragraph (a)(3)(iii), an individual is eligible to participate in a qualified employer plan if under the terms of the plan and without further amendment or action by the plan sponsor, the individual is eligible to make or receive contributions or accrue benefits under the plan (regardless of whether the individual has elected to participate in the plan).

(iv) *Plans subject to a totalization agreement and similar plans.* The term *nonqualified deferred compensation plan* does not include any social security system of a jurisdiction to the extent that benefits provided under or contributions made to the system are subject to an agreement entered into pursuant to section 233 of the Social Security Act (42 U.S.C. 433) with any foreign jurisdiction. In addition, the term *nonqualified deferred compensation plan* does not include a social security system of a foreign jurisdiction to the extent that benefits are provided under or contributions are made to a government-mandated plan as part of that foreign jurisdiction's social security system.

(v) *Broad-based foreign retirement plan.* The term *broad-based foreign retirement plan* means a scheme, trust, arrangement, or plan (regardless of whether sponsored by a U.S. person) that is written and that, in the case of an employer-maintained plan, satisfies the following conditions:

(A) The plan is nondiscriminatory insofar as the employees who, under the terms of the plan (alone or in combination with other comparable plans) and without further amendment or action by the employer, are eligible to make or receive contributions or accrue benefits under the plan other than earnings (regardless of whether the employee has elected to participate in the

plan), are a wide range of employees, substantially all of whom are non-resident aliens, resident aliens classified as resident aliens solely under section 7701(b)(1)(A)(ii) (and not section 7701(b)(1)(A)(i)), or bona fide residents of a possession (within the meaning of section 937(a)), including rank and file employees.

(B) The plan (alone or in combination with other comparable plans) actually provides significant benefits for a substantial majority of such covered employees.

(C) The benefits actually provided under the plan to such covered employees are nondiscriminatory.

(D) The plan contains provisions or is the subject of tax law provisions or other legal restrictions that generally discourage employees from using plan benefits for purposes other than retirement or restrict access to plan benefits before separation from service, including (but not limited to), restricting in-service distributions except in events similar to an unforeseeable emergency (as defined in § 1.409A-3(i)(3)(i)) or hardship (as defined for purposes of section 401(k)(2)(B)(i)(IV)), or for educational purposes or the purchase of a primary residence.

(4) *Section 457 plans.* A nonqualified deferred compensation plan under section 457(f) may constitute a nonqualified deferred compensation plan for purposes of this paragraph (a). The rules of section 409A apply to nonqualified deferred compensation plans separately and in addition to any requirements applicable to such plans under section 457(f). In addition, non-elective deferred compensation of non-employees described in section 457(e)(12) and a grandfathered plan or arrangement described in § 1.457-2(k)(4) may constitute a nonqualified deferred compensation plan for purposes of this paragraph (a). The term *nonqualified deferred compensation plan* does not include a length of service award to a bona fide volunteer under section 457(e)(11)(A)(ii). For purposes of the application of section 409A to a plan to which section 457 applies, a payment under the plan generally means the provision of cash or property to the service provider, provided that for purposes of the application of the short-

term deferral rule set forth in paragraph (b)(4) of this section, the inclusion in income of an amount under section 457(f) is treated as a payment of the amount.

(5) *Certain welfare benefits.* The term *nonqualified deferred compensation plan* does not include a plan, or a portion of a plan, to the extent that the plan provides bona fide vacation leave, sick leave, compensatory time, disability pay, or death benefits. For these purposes, the terms “disability pay” and “death benefits” have the same meanings as provided in § 31.3121(v)(2)-1(b)(4)(iv)(C) of this chapter, provided that for purposes of this paragraph, such disability pay and death benefits may be provided through insurance and the lifetime benefits payable under the plan are not treated as including the value of any taxable term life insurance coverage or taxable disability insurance coverage provided under the plan. The term *nonqualified deferred compensation plan* also does not include any Archer Medical Savings Account as described in section 220, any Health Savings Account as described in section 223, or any other medical reimbursement arrangement, including a health reimbursement arrangement, that satisfies the requirements of section 105 and section 106 such that the benefits or reimbursements provided under such arrangement are not includible in income.

(b) *Deferral of compensation*—(1) *In general.* Except as otherwise provided in paragraphs (b)(3) through (b)(12) of this section, a plan provides for the deferral of compensation if, under the terms of the plan and the relevant facts and circumstances, the service provider has a legally binding right during a taxable year to compensation that, pursuant to the terms of the plan, is or may be payable to (or on behalf of) the service provider in a later taxable year. Such compensation is deferred compensation for purposes of section 409A, this section and §§ 1.409A-2 through 1.409A-6. A legally binding right to an amount that will be excluded from income when and if received does not constitute a deferral of compensation, unless the service provider has received the right in exchange for, or has the right to ex-

change the right for, an amount that will be includible in income (other than due to participation in a cafeteria plan described in section 125). A service provider does not have a legally binding right to compensation to the extent that compensation may be reduced unilaterally or eliminated by the service recipient or other person after the services creating the right to the compensation have been performed. However, if the facts and circumstances indicate that the discretion to reduce or eliminate the compensation is available or exercisable only upon a condition, or the discretion to reduce or eliminate the compensation lacks substantive significance, a service provider will be considered to have a legally binding right to the compensation. Whether the discretion to reduce or eliminate the compensation lacks substantive significance depends on all the relevant facts and circumstances. However, where the service provider to whom the compensation may be paid has effective control of the person retaining the discretion to reduce or eliminate the compensation, or has effective control over any portion of the compensation of the person retaining the discretion to reduce or eliminate the compensation, or is a member of the family (as defined in section 267(c)(4) applied as if the family of an individual includes the spouse of any member of the family) of the person retaining the discretion to reduce or eliminate the compensation, the discretion to reduce or eliminate the compensation will not be treated as having substantive significance. For this purpose, compensation is not considered subject to unilateral reduction or elimination merely because it may be reduced or eliminated by operation of the objective terms of the plan, such as the application of a nondiscretionary, objective provision creating a substantial risk of forfeiture. Similarly, a service provider does not fail to have a legally binding right to compensation merely because the amount of compensation is determined under a formula that provides for benefits to be offset by benefits provided under another plan (including a plan that is qualified under section 401(a)), or because benefits are reduced due to

actual or notional investment losses, or, in a final average pay plan, subsequent decreases in compensation.

(2) *Earnings.* References to the deferral of compensation or deferred compensation include references to earnings. When the right to earnings is specified under the terms of the plan, the legally binding right to earnings arises at the time of the deferral of the compensation to which the earnings relate. A plan may provide that the time and form of payment of earnings is treated separately from the time and form of payment of the underlying compensation, so that, provided that the rules of section 409A are otherwise met, a plan may provide that earnings will be paid at a separate time or in a separate form from the payment of the underlying compensation. For the application of the deferral election rules to current payments of earnings and dividend equivalents, see § 1.409A-3(e).

(3) *Compensation payable pursuant to the service recipient's customary payment timing arrangement.* A deferral of compensation does not occur solely because compensation is paid after the last day of the service provider's taxable year pursuant to the timing arrangement under which the service recipient normally compensates service providers for services performed during a payroll period described in section 3401(b), or with respect to a non-employee service provider, a period not longer than the payroll period described in section 3401(b) or if no such payroll period exists, a period not longer than the earlier of the normal timing arrangement under which the service provider normally compensates non-employee service providers or 30 days after the end of the service provider's taxable year.

(4) *Short-term deferrals—(i) In general.* A deferral of compensation does not occur under a plan with respect to any payment (as defined in § 1.409A-2(b)(2)) that is not a deferred payment, provided that the service provider actually or constructively receives such payment on or before the last day of the applicable 2½ month period. The following rules apply for purposes of this paragraph (b)(4)(i):

(A) The applicable 2½ month period is the period ending on the later of the 15th day of the third month following

the end of the service provider's first taxable year in which the right to the payment is no longer subject to a substantial risk of forfeiture or the 15th day of the third month following the end of the service recipient's first taxable year in which the right to the payment is no longer subject to a substantial risk of forfeiture.

(B) A payment is treated as actually or constructively received if the payment is includible in income, including if the payment is includible in income under section 83, the economic benefit doctrine, section 402(b), or section 457(f).

(C) A right to a payment that is never subject to a substantial risk of forfeiture is considered to be no longer subject to a substantial risk of forfeiture on the first date the service provider has a legally binding right to the payment.

(D) A payment is a deferred payment if it is made pursuant to a provision of a plan that provides for the payment to be made or completed on or after any date, or upon or after the occurrence of any event, that will or may occur later than the end of the applicable 2½ month period, such as a separation from service, death, disability, change in control event, specified time or schedule of payment, or unforeseeable emergency, regardless of whether an amount is actually paid as a result of the occurrence of such a payment date or event during the applicable 2½ month period. If a plan provides that the service provider or service recipient may make an election under the plan (including an election under § 1.409A-2(a)(4)) of a different payment date, schedule, or event, such right is disregarded for this purpose. In such cases, whether a plan provides for a deferred payment is determined based on the payment date, schedule, or event that would apply if no such election were made, except that if the plan would not provide for a deferred payment absent such an election, and the service provider or service recipient makes such an election, whether the plan provides for a deferred payment is determined based upon the payment date, schedule, or event that the service provider or service recipient in fact elected.

(E) A stock right provides for a deferred payment if such right includes any provision pursuant to which the holder of the stock right will or may have the right to exercise the stock right after the applicable 2½ month period.

(F) This paragraph (b)(4)(i) is applied separately to each payment (as defined in § 1.409A-2(b)(2)) required to be made under a plan.

(G) If a plan provides for a deferred payment with respect to part of a payment (for example a life annuity or a series of installment amounts treated as a single payment), the plan provides for a deferred payment with respect to the entire payment.

(ii) *Certain delayed payments.* A payment that otherwise qualifies as a short-term deferral under paragraph (b)(4)(i) of this section but is made after the applicable 2½ month period may continue to qualify as a short-term deferral if the taxpayer establishes that it was administratively impracticable to make the payment by the end of the applicable 2½ month period and, as of the date upon which the legally binding right to the compensation arose, such impracticability was unforeseeable, or the taxpayer establishes that making the payment by the end of the applicable 2½ month period would have jeopardized the ability of the service recipient to continue as a going concern, and provided further that the payment is made as soon as administratively practicable or as soon as the payment would no longer have such effect. For purposes of this paragraph (b)(4)(ii), an action or failure to act of the service provider or a person under the service provider's control, such as a failure to provide necessary information or documentation, is not an unforeseeable event. In addition, a payment that otherwise qualifies as a short-term deferral under paragraph (b)(4)(i) of this section but is made after the applicable 2½ month period may continue to qualify as a short-term deferral if the taxpayer establishes that the service recipient reasonably anticipated that the service recipient's deduction with respect to such payment otherwise would not be permitted by application of section 162(m), and, as of the date the legally

binding right to the payment arose, a reasonable person would not have anticipated the application of section 162(m) at the time of the payment, and provided further that the payment is made as soon as reasonably practicable following the first date on which the service recipient anticipates or reasonably should anticipate that, if the payment were made on such date, the service recipient's deduction with respect to such payment would no longer be restricted due to the application of section 162(m). For additional rules applicable to certain transaction-based compensation, see § 1.409A-3(i)(5)(iv)(A).

(iii) *Examples.* The following examples illustrate the provisions of this paragraph (b)(4). In these examples, except as otherwise noted, each employee and each employer has a calendar year taxable year and each employee is an individual who is employed by the specified employer.

Example 1. On November 1, 2008, Employer Z awards a bonus to Employee A such that Employee A has a legally binding right to the payment as of November 1, 2008, that is not subject to a substantial risk of forfeiture. The bonus plan does not provide for a payment date or a deferred payment. The bonus plan will not be considered to have provided for a deferral of compensation if the bonus is paid or made available to Employee A on or before March 15, 2009.

Example 2. Employer Y has a taxable year ending August 31. On November 1, 2008, Employer Y awards a bonus to Employee B so that Employee B has a legally binding right to the payment as of November 1, 2008, that is not subject to a substantial risk of forfeiture. The bonus plan does not provide for a payment date or a deferred payment. The bonus plan will not be considered to have provided for a deferral of compensation if the bonus is paid or made available to Employee B on or before November 15, 2009.

Example 3. On November 1, 2008, Employer X awards a bonus to Employee C such that Employee C has a legally binding right to the payment as of November 1, 2008. Under the bonus plan, Employee C will forfeit the bonus unless Employee C continues performing services through December 31, 2010. The right to the payment is subject to a substantial risk of forfeiture through December 31, 2010. Employee C has the right to make a written election not later than December 31, 2009, to receive the bonus on or after December 31, 2015, but Employee C does not make such election. The bonus plan does not provide for a default payment date or a deferred payment in the absence of an election by

Employee C. The bonus plan will not be considered to have provided for a deferral of compensation if the bonus is paid or made available to Employee C on or before March 15, 2011.

Example 4. On November 1, 2008, Employer W awards a bonus to Employee D such that Employee D has a legally binding right to the payment as of November 1, 2008. Under the bonus plan, the bonus will be determined based on services performed during the period from January 1, 2009 through December 31, 2010. The bonus is scheduled to be paid as a lump sum payment on February 15, 2011. Under the bonus plan, Employee D will forfeit the bonus unless Employee D continues performing services through the scheduled payment date (February 15, 2011). Provided that at all times before the scheduled payment date Employee D is required to continue to perform services to retain the right to the bonus, and the bonus is paid on or before March 15, 2012, the bonus plan will not be considered to have provided for a deferral of compensation.

Example 5. On November 1, 2008, Employer V awards a bonus to Employee E such that Employee E has a legally binding right to the payment as of November 1, 2008. Under the bonus plan, Employee E will forfeit the bonus unless Employee E continues performing services through December 31, 2010. Under the bonus plan, the bonus is scheduled to be paid as a lump sum payment on July 1, 2011. By specifying a payment date after the applicable 2½ month period, the bonus plan provides for a deferred payment. The bonus plan provides for a deferral of compensation, and will not qualify as a short-term deferral regardless of whether the bonus is paid or made available on or before March 15, 2011 (and generally any payment before June 1, 2011 would constitute an impermissible acceleration of a payment).

Example 6. On November 1, 2008, Employer U awards a bonus to Employee F such that Employee F has a legally binding right to the payment as of November 1, 2008, that is not subject to a substantial risk of forfeiture. The bonus plan provides for a lump sum payment upon Employee F's separation from service. Because the separation from service is an event that may occur after the applicable 2½ month period, the bonus plan provides for a deferred payment and therefore provides for a deferral of compensation. Accordingly, the bonus plan will not qualify as a short-term deferral regardless of whether Employee F separates from service and the bonus is paid or made available on or before March 15, 2009.

Example 7. On November 1, 2008, Employer T grants Employee G a legally binding right to the payment of a life annuity with the first annuity payment on November 1, 2013, provided that Employee G continues performing services for Employer T continu-

ously through November 1, 2013. Because the life annuity is treated as a single payment, and because all payments of the life annuity may not occur during the applicable 2½ month period, the plan provides for a deferred payment and none of the amounts payable under the annuity will qualify as a short-term deferral, so that section 409A applies to all amounts that are payable under the plan.

Example 8. On November 1, 2008, Employer S grants Employee H a stock right providing for an exercise price less than the fair market value of the underlying stock on November 1, 2008. The stock right is subject to a substantial risk of forfeiture requiring services through November 1, 2010. The stock right becomes exercisable when the substantial risk of forfeiture lapses and expires on November 1, 2013. Employee H continues providing services through November 1, 2010, at which time the substantial risk of forfeiture lapses. The stock right provides for a deferred payment and will not qualify as a short-term deferral regardless of whether Employee H exercises the stock right on or before March 15, 2011.

(5) *Stock options, stock appreciation rights, and other equity-based compensation*—(i) *Stock rights*—(A) *Nonstatutory stock options not providing for the deferral of compensation.* An option to purchase service recipient stock does not provide for a deferral of compensation if—

(1) The exercise price may never be less than the fair market value of the underlying stock (disregarding lapse restrictions as defined in § 1.83-3(i)) on the date the option is granted and the number of shares subject to the option is fixed on the original date of grant of the option;

(2) The transfer or exercise of the option is subject to taxation under section 83 and § 1.83-7; and

(3) The option does not include any feature for the deferral of compensation other than the deferral of recognition of income until the later of the following:

(i) The exercise or disposition of the option under § 1.83-7.

(ii) The time the stock acquired pursuant to the exercise of the option first becomes substantially vested (as defined in § 1.83-3(b)).

(B) *Stock appreciation rights not providing for the deferral of compensation.* A right to compensation based on the appreciation in value of a specified number of shares of service recipient stock

occurring between the date of grant and the date of exercise of such right (a stock appreciation right) does not provide for a deferral of compensation if—

(1) Compensation payable under the stock appreciation right cannot be greater than the excess of the fair market value of the stock (disregarding lapse restrictions as defined in § 1.83-3(i)) on the date the stock appreciation right is exercised over an amount specified on the date of grant of the stock appreciation right (the stock appreciation right exercise price), with respect to a number of shares fixed on or before the date of grant of the right;

(2) The stock appreciation right exercise price may never be less than the fair market value of the underlying stock (disregarding lapse restrictions as defined in § 1.83-3(i)) on the date the right is granted; and

(3) The stock appreciation right does not include any feature for the deferral of compensation other than the deferral of recognition of income until the exercise of the stock appreciation right.

(C) *Stock rights that may provide for the deferral of compensation.* An option to purchase stock other than service recipient stock, or a stock appreciation right with respect to stock other than service recipient stock, generally will provide for the deferral of compensation within the meaning of this paragraph (b). If under the terms of an option to purchase service recipient stock (other than an incentive stock option described in section 422 or a stock option granted under an employee stock purchase plan described in section 423), the exercise price is or could become less than the fair market value of the stock (disregarding lapse restrictions as defined in § 1.83-3(i)) on the date of grant, the grant of the option generally will provide for the deferral of compensation within the meaning of this paragraph (b). If under the terms of a stock appreciation right with respect to service recipient stock, the compensation payable under the stock appreciation right is or could be any amount greater than, with respect to a predetermined number of shares, the excess of the fair market value of the stock (disregarding lapse restrictions as defined in § 1.83-3(i)) on the date the

stock appreciation right is exercised over the fair market value of the stock (disregarding lapse restrictions as defined in § 1.83-3(i)) on the date of grant of the stock appreciation right, the grant of the stock appreciation right generally will provide for a deferral of compensation within the meaning of this paragraph (b).

(D) *Feature for the deferral of compensation.* To the extent a stock right provides a right other than the right to receive cash or stock on the date of exercise and such additional right would otherwise allow compensation to be deferred beyond the date of exercise, the entire arrangement (including the underlying stock right) provides for the deferral of compensation. For purposes of this paragraph (b)(5)(i), neither the right to receive substantially nonvested stock (as defined in § 1.83-3(b)) upon the exercise of a stock right, nor the right to pay the exercise price with previously acquired shares, constitutes a feature for the deferral of compensation.

(E) *Rights to dividends.* For purposes of this paragraph (b)(5)(i), the right, directly or indirectly contingent upon the exercise of a stock right, to receive an amount equal to all or part of the dividends or other distributions (other than stock dividends described in paragraph (b)(5)(v)(H) of this section) declared and paid on the number of shares underlying the stock right between the date of grant and the date of exercise of the stock right constitutes an offset to the exercise price of the stock option or an increase in the amount payable under the stock appreciation right (generally causing such stock right to be subject to section 409A). A plan providing a right to dividends or other distributions declared and paid on the number of shares underlying a stock right, the payment of which is not contingent upon, or otherwise payable on, the exercise of the stock right, may provide for a deferral of compensation, but the existence of the right to receive such an amount will not be treated as a reduction to the exercise price of (or an increase to the compensation payable under) the stock right. Thus, a right to such dividends or distributions that is not contingent, directly or indirectly, upon

the exercise of a stock right will not cause the related stock right to fail to satisfy the requirements of the exclusion from the definition of a deferral of compensation provided in paragraphs (b)(5)(i)(A) and (B) of this section.

(ii) *Statutory stock options.* The grant of an incentive stock option as described in section 422, or the grant of an option under an employee stock purchase plan described in section 423 (including the grant of an option with an exercise price discounted in accordance with section 423(b)(6) and the accompanying regulations), does not constitute a deferral of compensation. However, the exclusion for statutory stock options under this paragraph (b)(5)(ii) does not apply to a modification, extension, or renewal of a statutory option that is treated as the grant of a new option that is not a statutory option. See § 1.424-1(e). In such event, the option is treated for purposes of this paragraph (b) as if it had been a nonstatutory stock option from the date of the original grant. Accordingly, if such modification, extension, or renewal of the stock option would have been treated as the grant of a new option or as causing the option to have had a deferral feature from the date of grant under paragraph (b)(5)(v) of this section, the modification, extension, or renewal of the stock option is treated as the grant of a new option or as causing the option to have had a deferral feature from the date of grant for purposes of this paragraph (b)(5).

(iii) *Service recipient stock*—(A) *In general.* Except as otherwise provided in paragraphs (b)(5)(iii)(B), (C), and (D) of this section, the term *service recipient stock* means a class of stock that, as of the date of grant, is common stock for purposes of section 305 and the regulations thereunder of a corporation that is an eligible issuer of service recipient stock (as defined in paragraph (b)(5)(iii)(E) of this section). Notwithstanding the foregoing, the term *service recipient stock* does not include a class of stock that has any preference as to distributions other than distributions of service recipient stock and distributions in liquidation of the issuer. The term *service recipient stock* also does not include any stock that is subject to a mandatory repurchase obligation

(other than a right of first refusal), or a put or call right that is not a lapse restriction as defined in § 1.83-3(i), if the stock price under such right or obligation is based on a measure other than the fair market value (disregarding lapse restrictions as defined in § 1.83-3(i)) of the equity interest in the corporation represented by the stock.

(B) *American depositary receipts.* An American depositary receipt or American depositary share may constitute service recipient stock, to the extent that the stock traded on a foreign securities market to which the American depositary receipt or American depositary share relates qualifies as service recipient stock.

(C) *Mutual company units.* Mutual company units may constitute service recipient stock. For this purpose, the term *mutual company unit* means a fixed percentage of the overall value of a non-stock mutual company or association. For purposes of determining the value of the mutual company unit, the unit may be valued in accordance with the rules set forth in paragraph (b)(5)(iv)(B) of this section governing valuation of service recipient stock the shares of which are not traded on an established securities market, applied as if the mutual company were a stock corporation with one class of common stock and the number of shares of such stock determined according to such fixed percentage. For example, an appreciation right based on the appreciation of 10 mutual company units, where each unit is defined as one percent of the overall value of the mutual company, would be valued as if the appreciation right were based upon 10 shares of a corporation, with 100 shares of common stock (and no other class of stock), the shares of which are not readily tradable on an established securities market.

(D) *Other entities.* An interest in an entity other than a corporation or non-stock mutual company or association may constitute service recipient stock to the extent designated by the Commissioner in revenue procedures, notices, or other guidance published in the Internal Revenue Bulletin (see § 601.601(d)(2) of this chapter).

(E) *Eligible issuer of service recipient stock*—(1) *In general.* The term *eligible issuer of service recipient stock* means only the corporation for which the service provider provides direct services on the date of grant of the stock right (if the entity receiving such services is a corporation), and any corporation in a chain of corporations or other entities in which each corporation or other entity has a controlling interest in another corporation or other entity in the chain, ending with the corporation or other entity that has a controlling interest in the corporation or other entity for which the service provider provides direct services on the date of grant of the stock right. For this purpose, the term *controlling interest* has the same meaning as provided in § 1.414(c)-2(b)(2)(i), provided that the language “at least 50 percent” is used instead of “at least 80 percent” each place it appears in § 1.414(c)-2(b)(2)(i). In addition, where the use of such stock with respect to the grant of a stock right to such service provider is based upon legitimate business criteria, the term *controlling interest* has the same meaning as provided in § 1.414(c)-2(b)(2)(i), provided that the language “at least 20 percent” is used instead of “at least 80 percent” each place it appears in § 1.414(c)-2(b)(2)(i). For purposes of determining ownership of an interest in an organization, the rules of §§ 1.414(c)-3 and 1.414(c)-4 apply. The determination of whether a grant is based on legitimate business criteria is based on the facts and circumstances, focusing primarily on whether there is a sufficient nexus between the service provider and the issuer of the stock right so that the grant serves a legitimate non-tax business purpose other than simply providing compensation to the service provider that is excluded from the requirements of section 409A. For example, stock of a corporation that owns an interest in a joint venture involving an operating business, used with respect to stock rights granted to service providers of the joint venture who are former service providers of such corporation, generally will constitute use of service recipient stock based upon legitimate business criteria, and therefore could constitute service recipient

stock with respect to such service providers if the corporation owns at least 20 percent of the joint venture and the other requirements of this paragraph (b)(5)(iii) are met. Similarly, the legitimate business criteria requirement generally would be met if the corporate venturer issued such a right to an employee of the joint venture who it reasonably expected would in the future become an employee of the corporate venturer. However, where a service provider has no real nexus with a corporate venturer, such as generally happens when the corporate venturer is a passive investor in the service recipient joint venture, a stock right issued to that employee on the investor corporation’s stock generally would not be based upon legitimate business criteria. Similarly, where a corporation holds only a minority interest in an entity that in turn holds a minority interest in the entity for which the service provider performs services, such that the corporation holds only an insubstantial indirect interest in the entity receiving the services, legitimate business criteria generally would not exist for issuing a stock right on the corporation’s stock to the service provider.

(2) *Investment vehicles.* Notwithstanding the provisions of paragraph (b)(5)(iii)(E)(1) of this section, except as to a service provider providing services directly to such corporation, for purposes of this paragraph (b)(5), an eligible issuer of service recipient stock does not include any corporation whose primary purpose is to serve as an investment vehicle with respect to the corporation’s minority ownership interests in entities other than the service recipient.

(3) *Corporate structures established or transactions undertaken for purposes of avoiding coverage under section 409A.* Notwithstanding the provisions of paragraph (b)(5)(iii)(E)(1) of this section, an eligible issuer of service recipient stock does not include any corporation within a group of entities treated as a single service recipient if a purpose of the establishment of the structure of the ownership, or a purpose of a significant transaction between or among two or more entities comprising a single service recipient, is to provide

deferred compensation not subject to the application of section 409A. If an entity becomes a member of a group of corporations or other entities treated as a single service recipient, and the primary source of income or value of such entity arises from the provision of management services to other members of the service recipient group, it is presumed that such structure was established for purposes of avoiding the application of section 409A if any stock rights are issued with respect to such entity.

(4) *Substitutions and assumptions by reason of a corporate transaction.* If the requirements of paragraph (b)(5)(v)(D) of this section are met such that the substitution of a new stock right pursuant to a corporate transaction for an outstanding stock right, or the assumption of an outstanding stock right pursuant to a corporate transaction, would not be treated as the grant of a new stock right or a change in the form of payment for purposes of this section and §§ 1.409A-2 through 1.409A-6, the stock underlying the stock right that replaced the stock right that is substituted or assumed will be treated as service recipient stock for purposes of applying this paragraph (b)(5) to the replacement stock rights if such underlying stock otherwise satisfies the requirements of paragraph (b)(5)(iii)(A) of this section. For example, if by reason of a spinoff transaction (under which the stock of a subsidiary corporation is distributed to the stockholders of a distributing corporation), a stock option to purchase distributing corporation stock is replaced with a stock option to purchase distributing corporation stock and a stock option to purchase the spun off subsidiary corporation's stock (each otherwise satisfying the requirements of paragraph (b)(5)(iii)(A) of this section), and where such substitution is not treated as a modification of the original stock option pursuant to paragraph (b)(5)(v)(D) of this section, both the distributing corporation stock and the subsidiary corporation stock are treated as service recipient stock for purposes of applying this paragraph (b)(5) to the replacement stock options.

(iv) *Determination of the fair market value of service recipient stock—(A) Stock*

readily tradable on an established securities market. For purposes of paragraph (b)(5)(i) of this section, in the case of service recipient stock that is readily tradable on an established securities market, the fair market value of the stock may be determined based upon the last sale before or the first sale after the grant, the closing price on the trading day before or the trading day of the grant, the arithmetic mean of the high and low prices on the trading day before or the trading day of the grant, or any other reasonable method using actual transactions in such stock as reported by such market. The determination of fair market value also may be determined using an average selling price during a specified period that is within 30 days before or 30 days after the applicable valuation date, provided that the program under which the stock right is granted, including a program with a single participant, must irrevocably specify the commitment to grant the stock right with an exercise price set using such an average selling price before the beginning of the specified period. For this purpose, the term *average selling price* refers to the arithmetic mean of such selling prices on all trading days during the specified period, or the average of such prices over the specified period weighted based on the volume of trading of such stock on each trading day during such specified period. To satisfy this requirement, the service recipient must designate the recipient of the stock right, the number and class of shares of stock that are subject to the stock right, and the method for determining the exercise price including the period over which the averaging will occur, before the beginning of the specified averaging period. Notwithstanding the foregoing provisions of this paragraph (b)(5)(iv)(A), where applicable foreign law requires that a compensatory stock right be priced based upon a specific price averaging method and period, a stock right granted in accordance with such applicable foreign law will be treated as meeting the requirements of this paragraph (b)(5)(iv)(A), provided that the averaging period does not exceed 30 days.

(B) *Stock not readily tradable on an established securities market*—(1) *In general.* For purposes of paragraph (b)(5)(i) of this section, in the case of service recipient stock that is not readily tradable on an established securities market, the fair market value of the stock as of a valuation date means a value determined by the reasonable application of a reasonable valuation method. The determination whether a valuation method is reasonable, or whether an application of a valuation method is reasonable, is made based on the facts and circumstances as of the valuation date. Factors to be considered under a reasonable valuation method include, as applicable, the value of tangible and intangible assets of the corporation, the present value of anticipated future cash-flows of the corporation, the market value of stock or equity interests in similar corporations and other entities engaged in trades or businesses substantially similar to those engaged in by the corporation the stock of which is to be valued, the value of which can be readily determined through nondiscretionary, objective means (such as through trading prices on an established securities market or an amount paid in an arm's length private transaction), recent arm's length transactions involving the sale or transfer of such stock or equity interests, and other relevant factors such as control premiums or discounts for lack of marketability and whether the valuation method is used for other purposes that have a material economic effect on the service recipient, its stockholders, or its creditors. The use of a valuation method is not reasonable if such valuation method does not take into consideration in applying its methodology all available information material to the value of the corporation. Similarly, the use of a value previously calculated under a valuation method is not reasonable as of a later date if such calculation fails to reflect information available after the date of the calculation that may materially affect the value of the corporation (for example, the resolution of material litigation or the issuance of a patent) or the value was calculated with respect to a date that is more than 12 months earlier than the date

for which the valuation is being used. The service recipient's consistent use of a valuation method to determine the value of its stock or assets for other purposes, including for purposes unrelated to compensation of service providers, is also a factor supporting the reasonableness of such valuation method.

(2) *Presumption of reasonableness.* For purposes of this paragraph (b)(5)(iv)(B), the use of any of the following methods of valuation is presumed to result in a reasonable valuation, provided that the Commissioner may rebut such a presumption upon a showing that either the valuation method or the application of such method was grossly unreasonable:

(i) A valuation of a class of stock determined by an independent appraisal that meets the requirements of section 401(a)(28)(C) and the regulations as of a date that is no more than 12 months before the relevant transaction to which the valuation is applied (for example, the date of grant of a stock option).

(ii) A valuation based upon a formula that, if used as part of a nonlapse restriction (as defined in § 1.83-3(h)) with respect to the stock, would be considered to be the fair market value of the stock pursuant to § 1.83-5, provided that such stock is valued in the same manner for purposes of any transfer of any shares of such class of stock (or any substantially similar class of stock) to the issuer or any person that owns stock possessing more than 10 percent of the total combined voting power of all classes of stock of the issuer (applying the stock attribution rules of § 1.424-1(d)), other than an arm's length transaction involving the sale of all or substantially all of the outstanding stock of the issuer, and such valuation method is used consistently for all such purposes, and provided further that this paragraph (b)(5)(iv)(B)(2)(ii) does not apply with respect to stock subject to a stock right payable in stock, where the stock acquired pursuant to the exercise of the stock right is transferable other than through the operation of a nonlapse restriction.

(iii) A valuation, made reasonably and in good faith and evidenced by a written report that takes into account

the relevant factors described in paragraph (b)(5)(iv)(B)(1) of this section, of illiquid stock of a start-up corporation. For this purpose, illiquid stock of a start-up corporation means service recipient stock of a corporation that has no material trade or business that it or any predecessor to it has conducted for a period of 10 years or more and has no class of equity securities that are traded on an established securities market (as defined in paragraph (k) of this section), where such stock is not subject to any put, call, or other right or obligation of the service recipient or other person to purchase such stock (other than a right of first refusal upon an offer to purchase by a third party that is unrelated to the service recipient or service provider and other than a right or obligation that constitutes a lapse restriction as defined in § 1.83-3(i)), and provided that this paragraph (b)(5)(iv)(B)(2)(iii) does not apply to the valuation of any stock if the service recipient or service provider may reasonably anticipate, as of the time the valuation is applied, that the service recipient will undergo a change in control event as described in § 1.409A-3(i)(5)(v) or § 1.409A-3(i)(5)(vii) within the 90 days following the action to which the valuation is applied, or make a public offering of securities within the 180 days following the action to which the valuation is applied. For purposes of this paragraph (b)(5)(iv)(B)(2)(iii), a valuation will not be treated as made reasonably and in good faith unless the valuation is performed by a person or persons that the corporation reasonably determines is qualified to perform such a valuation based on the person's or persons' significant knowledge, experience, education, or training. Generally, a person will be qualified to perform such a valuation if a reasonable individual, upon being apprised of such knowledge, experience, education, and training, would reasonably rely on the advice of such person with respect to valuation in deciding whether to accept an offer to purchase or sell the stock being valued. For this purpose, significant experience generally means at least five years of relevant experience in business valuation or appraisal, financial accounting, investment banking, private

equity, secured lending, or other comparable experience in the line of business or industry in which the service recipient operates.

(3) *Use of alternative methods.* For purposes of this paragraph (b)(5), a different valuation method may be used for each separate action for which a valuation is relevant, provided that a single valuation method is used for each separate action and, once used, may not retroactively be altered. For example, one valuation method may be used to establish the exercise price of a stock option, and a different valuation method may be used to determine the value at the date of the repurchase of stock pursuant to a put or call right. However, once an exercise price or amount to be paid has been established, the exercise price or amount to be paid may not be changed through the retroactive use of another valuation method. In addition, notwithstanding the foregoing, where after the date of grant, but before the date of exercise or transfer, of the stock right, the service recipient stock to which the stock right relates becomes readily tradable on an established securities market, the service recipient must use the valuation method set forth in paragraph (b)(5)(iv)(A) of this section for purposes of determining the payment at the date of exercise or the purchase of the stock, as applicable.

(v) *Modifications, extensions, substitutions, and assumptions of stock rights—*
(A) *Treatment of modified and extended stock rights.* A modification of the terms of a stock right within the meaning of paragraph (b)(5)(v)(B) of this section is considered to be the grant of a new stock right. The new stock right may or may not constitute a deferral of compensation under paragraph (b)(5)(i) of this section, determined at the date of grant of the new stock right. If there is an extension of a stock right (within the meaning of paragraph (b)(5)(v)(C) of this section), the stock right is treated as having had an additional deferral feature from the original date of grant of the stock right, and therefore will be treated as a plan providing for the deferral of compensation from the original grant date for purposes of this paragraph (b).

(B) *Modification in general.* Except as otherwise provided in paragraph (b)(5)(v) of this section, the term *modification* means any change in the terms of the stock right (or change in the terms of the plan pursuant to which the stock right was granted or in the terms of any other agreement governing the stock right) that may provide the holder of the stock right with a direct or indirect reduction in the exercise price of the stock right regardless of whether the holder in fact benefits from the change in terms. A change in the terms of the stock right shortening the period during which the stock right is exercisable is not a modification. It is not a modification to add a feature providing the ability to tender previously acquired stock for the stock purchasable under the stock right, or to withhold or have withheld shares of stock to facilitate the payment of the exercise price or the employment taxes or required withholding taxes resulting from the exercise of the stock right. In addition, it is not a modification for the grantor to exercise discretion specifically reserved under a stock right with respect to the transferability of the stock right.

(C) *Extensions—(1) In general.* An extension of a stock right refers to the provision to the holder of an additional period of time within which to exercise the stock right beyond the time originally prescribed under the terms of the stock right, the conversion or exchange of a stock right for a legally binding right to compensation in a future taxable year, or the addition of any feature for the deferral of compensation not permitted in paragraph (b)(5)(i)(A)(3) of this section (in the case of a stock option) or not permitted in paragraph (b)(5)(i)(B)(3) of this section (in the case of a stock appreciation right) to the terms of the stock right, other than at a time when the exercise price of the stock right equals or exceeds the fair market value of the service recipient stock that could be purchased (in the case of an option) or the fair market value of the service recipient stock used to determine the payment to the service provider (in the case of a stock appreciation right), and includes a renewal of

such right that has such effect. It is not an extension if the exercise period of a stock right is extended to a date no later than the earlier of the latest date upon which the stock right could have expired by its original terms under any circumstances or the 10th anniversary of the original date of grant of the stock right. If the exercise period of a stock right is extended at a time when the exercise price of the stock right equals or exceeds the fair market value of the service recipient stock that could be purchased (in the case of an option) or the fair market value of the service recipient stock used to determine the payment to the service provider (in the case of a stock appreciation right), it is not an extension of the original stock right. Instead, in such a case, the original stock right is treated as modified rather than extended and a new stock right is treated as having been granted for purposes of this section. In addition, it is not an extension of a stock right if the expiration of the stock right is tolled while the holder cannot exercise the stock right because such an exercise would violate an applicable Federal, state, local, or foreign law, or would jeopardize the ability of the service recipient to continue as a going concern, provided that the period during which the stock right may be exercised is not extended more than 30 days after the exercise of the stock right first would no longer violate an applicable Federal, state, local, and foreign laws or would first no longer jeopardize the ability of the service recipient to continue as a going concern. For this purpose, a provision of foreign law shall be considered applicable only to foreign earned income (as defined under section 911(b)(1) without regard to section 911(b)(1)(B)(iv) and without regard to the requirement that the income be attributable to services performed during the period described in section 911(d)(1)(A) or (B)) from sources within the foreign country that promulgated such law.

(2) *Certain extensions before April 10, 2007.* An extension of a stock right before April 10, 2007 solely in order to provide the holder of such stock right an additional period of time beyond the time originally prescribed under the

terms of such stock right within which to exercise the stock right is disregarded for purposes of applying the rules contained in paragraph (b)(5)(v)(C)(1) of this section. For purposes of applying the rules contained in paragraph (b)(5)(v)(C)(1) of this section on and after April 10, 2007, such a stock right is treated as having specified at the date of grant the time within which to exercise such stock right that was prescribed under the terms of such stock right in effect on April 10, 2007. Nothing in this paragraph (b)(5)(v)(C)(2) affects any other action treated as the extension of a stock right, including the addition of a deferral feature.

(3) *Examples.* The following examples illustrate the provisions of this paragraph (b)(5)(v)(C). In the examples, each employee is an individual employed by the specified employer, and each employee and each employer has a calendar year taxable year.

Example 1. On July 1, 2009, Employer Z grants Employee A a nonstatutory stock option that does not provide for the deferral of compensation in accordance with paragraph (b)(5)(i)(A) of this section. The terms of the nonstatutory stock option provide that the exercise period of the stock option expires on the earlier of July 1, 2019, or 3 months after Employee A's separation from service. On July 1, 2011, Employee A separates from service. On the same day, Employee A and Employer Z change the exercise period of the option so that it expires on July 1, 2013. Because the exercise period of the stock right is not extended beyond July 1, 2019, the change is not an extension for purposes of this paragraph (b)(5)(v)(C).

Example 2. The facts are the same as in *Example 1* except that Employee A separates from service on July 1, 2018, and on the same day, Employee A and Employer Z change the exercise period of the option so that it expires on July 1, 2020. As of July 1, 2018, the fair market value of the underlying stock exceeds the exercise price. Because the exercise period of the stock right is extended beyond July 1, 2019, the change is an extension for purposes of this paragraph (b)(5)(v)(C).

Example 3. The facts are the same as in *Example 2* except that as of July 1, 2018, the fair market value of the underlying stock is less than the exercise price of the option. Because the exercise period of the stock right is extended at a time when the fair market value of the underlying stock is less than the exercise price, the change is not an extension for purposes of this paragraph (b)(5)(v)(C) and the change is treated as a modification of

the option, resulting in the extension of the exercise period being treated as the grant of a new option on July 1, 2018.

Example 4. On July 1, 2009, Employer Y grants to Employee B a stock appreciation right with respect to 200 shares of Employer Y common stock that does not provide for the deferral of compensation in accordance with paragraph (b)(5)(i)(B) of this section. Upon exercise of the stock appreciation right, Employee B is entitled to receive the excess of the fair market value of a share of Employer Y common stock on the date of exercise over \$100 (the fair market value of a share of Employer Y common stock on July 1, 2009), multiplied by the number of shares with respect to which Employee B is exercising the right. The exercise period of the right expires on the earlier of July 1, 2019, or 3 months after Employee B separates from service. Employee B cannot exercise the stock appreciation right with respect to more than 100 shares unless Employee B continues to be employed by Employer Y through June 30, 2014. On July 1, 2011, when the fair market value of a share of Employer Y common stock is \$200, Employee B and Employer Y amend the stock appreciation right to provide that the right will be exercisable only during calendar year 2018, except that before January 1, 2017, Employee B may elect to designate calendar year 2023 or any subsequent calendar year before 2033 as the year in which the right will be exercisable. The amendment constitutes an extension of the stock appreciation right under paragraph (b)(5)(v)(C)(1) of this section. Under paragraph (b)(5)(v)(A) of this section, the stock appreciation right is treated as having had an additional deferral feature from the original date of grant (July 1, 2009) of the right, and therefore is treated as a plan providing for the deferral of compensation from that date. During the period from July 1, 2009, through June 30, 2011, the provisions of the stock appreciation right relating to the time and form of payment did not satisfy the requirements of § 1.409A-3(a). Therefore, the stock appreciation right provides for a deferral of compensation that does not comply with section 409A.

(D) *Substitutions and assumptions of stock rights by reason of a corporate transaction.* If the requirements of § 1.424-1 (without regard to the requirement described in § 1.424-1(a)(2) that an eligible corporation be the employer of the optionee) would be met if the stock right were a statutory option, the substitution of a new stock right pursuant to a corporate transaction (as defined in § 1.424-1(a)(3)) for an outstanding stock right or the assumption of an outstanding stock right pursuant to a

corporate transaction will not be treated as the grant of a new stock right or a change in the form of payment for purposes of this section and §§ 1.409A-2 through 1.409A-6. For purposes of the preceding sentence, the requirement of § 1.424-1(a)(5)(iii) will be deemed to be satisfied if the ratio of the exercise price to the fair market value of the shares subject to the stock right immediately after the substitution or assumption is not greater than the ratio of the exercise price to the fair market value of the shares subject to the stock right immediately before the substitution or assumption. In the case of a transaction described in section 355 in which the stock of the distributing corporation and the stock distributed in the transaction are both readily tradable on an established securities market immediately after the transaction, for purposes of this paragraph (b)(5)(v), the requirements of § 1.424-1(a)(5) related to the fair market value of the stock may be satisfied by—

(1) Using the last sale before or the first sale after the specified date as of which such valuation is being made, the closing price on the last trading day before or the trading day of a specified date, the arithmetic mean of the high and low prices on the last trading day before or the trading day of such specified date, or any other reasonable method using actual transactions in such stock as reported by such market on a specified date, for the stock of the distributing corporation and the stock distributed in the transaction, provided the specified date is designated before such specified date, and such specified date is not more than 60 days after the transaction;

(2) Using the arithmetic mean of such market prices on trading days during a specified period designated before the beginning of such specified period, where such specified period is not longer than 30 days and ends no later than 60 days after the transaction; or

(3) Using an average of such prices during such prespecified period weighted based on the volume of trading of such stock on each trading day during such prespecified period.

(E) *Acceleration of date when exercisable.* Although with respect to a stock right not immediately exer-

cisable in full, a change in the terms of the right solely to accelerate or delay, within the original term of the stock right, the time at which the stock right (or any portion of such stock right) may be exercised is not a modification for purposes of this section, with respect to a stock right subject to section 409A, such an acceleration may constitute an impermissible acceleration of a payment date under § 1.409A-3(j) or a subsequent deferral under § 1.409A-2(b).

(F) *Discretionary added benefits.* If a change to a stock right provides, either by its terms or in substance, that the holder may receive an additional benefit under the stock right at the future discretion of the grantor, and the addition of such benefit would constitute a modification or extension, then the addition of such discretion is a modification or extension at the time that the stock right is changed to provide such discretion.

(G) *Change in underlying stock increasing value.* A change in the terms of the stock subject to a stock right that increases the value of the stock is a modification of such stock right, except to the extent that a new stock right is substituted for such stock right by reason of the change in the terms of the stock in accordance with paragraph (b)(5)(v)(D) of this section.

(H) *Change in the number of shares purchasable.* If a stock right is amended solely to increase the number of shares subject to the stock right, the increase is not considered a modification of the stock right but is treated as the grant of a new additional stock right to which the additional shares are subject. Notwithstanding the previous sentence, if the exercise price and number of shares subject to a stock right are proportionally adjusted to reflect a stock split (including a reverse stock split) or stock dividend, and the only effect of the stock split or stock dividend is to increase (or decrease) on a pro rata basis the number of shares owned by each shareholder of the class of stock subject to the stock right, then there is no modification of the stock right if it is proportionally adjusted to reflect the stock split or stock dividend and the aggregate exercise price of the stock right is not less

than the aggregate exercise price before the stock split or stock dividend.

(I) *Rescission of changes.* A change to the terms of a stock right (or change in the terms of the plan pursuant to which the stock right was granted or in the terms of any other agreement governing the right) is not considered a modification or extension of the stock right to the extent the change in the terms of the stock right is rescinded by the earlier of the date the stock right is exercised or the last day of the service provider's taxable year during which such change occurred. Thus, for example, if the terms of a stock right granted to an individual employee with a calendar year taxable year are changed on March 1 in a manner that would result in an extension of the stock right, and the change is rescinded on November 1 of the same year, and the stock right is not exercised before the change is rescinded, the stock right is not considered extended under this paragraph (b)(5)(v).

(J) *Successive modifications and extensions.* The rules of this paragraph (b)(5)(v) apply as well to successive modifications and extensions.

(K) *Modifications and extensions in effect on October 23, 2004.* For purposes of the application of section 409A and these regulations to a stock right, if a legally binding right to a modification or extension of such stock right existed on October 23, 2004, such modification or extension is disregarded, and the stock right is treated as if granted with the terms and conditions in effect on October 23, 2004.

(vi) *Meaning and use of certain terms—*
(A) *Option.* The term *option* means the right or privilege of an individual to purchase stock from a corporation by virtue of an offer of the corporation continuing for a stated period of time, whether or not irrevocable, to sell such stock at a price determined under paragraph (b)(5)(vi)(D) of this section, such individual being under no obligation to purchase. While no particular form of words is necessary, the option must express an offer to sell at the option price, the maximum number of shares purchasable under the option, and the period of time during which the offer remains open. The term *option* includes a warrant that meets the requirements

of this paragraph (b)(5)(vi)(A). An option may be granted as part of or in conjunction with an employee stock purchase plan or subscription contract. An option must be in writing (in paper or electronic form) provided that such writing is adequate to establish an option right or privilege that is enforceable under applicable law.

(B) *Date of grant of option.* (1) The language the *date of grant of the option*, and similar phrases, refer to the date when the granting corporation completes the corporate action necessary to create the legally binding right constituting the option. A corporate action creating the legally binding right constituting the option is not considered complete until the date on which the maximum number of shares that can be purchased under the option and the minimum exercise price are fixed or determinable, and the class of underlying stock and the identity of the service provider is designated. Ordinarily, if the corporate action provides for an immediate offer of stock for sale to a service provider, or provides for a particular date on which such offer is to be made, the date of the granting of the option is the date of such corporate action if the offer is to be made immediately, or the date provided as the date of the offer, as the case may be. However, an unreasonable delay in the giving of notice of such offer to the service provider will be taken into account as indicating that the corporation provided that the offer was to be made at the subsequent date on which such notice is given.

(2) If the corporation imposes a condition on the granting of an option (as distinguished from a condition governing the exercise of the option), such condition generally will be given effect in accordance with the intent of the corporation. However, if the grant of an option is subject to approval by stockholders, the date of grant of the option will be determined as if the option had not been subject to such approval. A condition that does not require corporate action, such as the approval of, or registration with, some regulatory or government agency, for example, a stock exchange or the Securities and Exchange Commission, is ordinarily considered a condition upon

the exercise of the option unless the corporate action clearly indicates that the option is not to be granted until such condition has been satisfied.

(3) In general, a condition imposed upon the exercise of an option will not operate to make ineffective the granting of the option. For example, on June 1, 2008, Corporation A grants to X, an employee, an option to purchase 5,000 shares of the corporation's common stock, exercisable by X on or after June 1, 2009, provided X is employed by the corporation on June 1, 2009, and provided that A's profits during the fiscal year preceding the year of exercise exceed \$200,000. Such an option is granted to X on June 1, 2008, and will be treated as outstanding as of such date.

(C) *Stock*. The term *stock* means capital stock of any class, including voting or nonvoting common or preferred stock. Except as otherwise provided, the term *stock* includes both treasury stock and stock of original issue. Special classes of stock authorized to be issued to and held by employees are within the scope of the term *stock* for this purpose, provided such stock otherwise possesses the rights and characteristics of capital stock.

(D) *Exercise price*. The term *exercise price* means the consideration in cash or property that, pursuant to the terms of the option, is the price at which the stock subject to the option is purchased. The term *exercise price* does not include any amounts paid as interest under a deferred payment plan or treated as interest.

(E) *Exercise*. The term *exercise*, when used in reference to an option, means the act of acceptance by the holder of the option of the offer to sell contained in the option. In general, the time of exercise is the time when there is a sale or a contract to sell between the corporation and the individual. A promise to pay the exercise price does not constitute an exercise of the option unless the holder of the option is subject to personal liability on such promise. An agreement or undertaking by the service provider to make payments under a stock purchase plan does not constitute the exercise of an option to the extent the payments made remain

subject to withdrawal by or refund to the service provider.

(F) *Transfer*. The term *transfer*, when used in reference to the transfer to an individual of a share of stock pursuant to the exercise of an option, means the transfer of ownership of such share, or the transfer of substantially all the rights of ownership. Such transfer must, within a reasonable time, be evidenced on the books of the corporation. A transfer may occur even if a share of stock is subject to a substantial risk of forfeiture or is not otherwise transferable immediately after the date of exercise. A transfer does not fail to occur merely because, under the terms of the arrangement, the individual may not dispose of the share for a specified period of time, or the share is subject to a right of first refusal or a right to acquire the share at the share's fair market value at the time of the sale.

(G) *Readily tradable*. For purposes of this section and §§1.409A-2 through 1.409A-6, stock is treated as readily tradable if it is regularly quoted by brokers or dealers making a market in such stock.

(H) *Application to stock appreciation rights*. For purposes of this section and §§1.409A-2 through 1.409A-6, the definitions provided in paragraphs (b)(5)(vi)(A) through (G) of this section may be applied by analogy to the issuance of, exercise of, or payment upon the exercise of, a stock appreciation right.

(6) *Restricted property, section 402(b) trusts, and section 403(c) annuities—(i) In general*. If a service provider receives property from, or pursuant to, a plan maintained by a service recipient, there is no deferral of compensation merely because the value of the property is not includible in income by reason of the property being substantially nonvested (as defined in §1.83-3(b)), or is includible in income solely due to a valid election under section 83(b). For purposes of this paragraph (b)(6)(i), a transfer of property includes the transfer of a beneficial interest in a trust or annuity plan, or a transfer to or from a trust or under an annuity plan, to the extent such a transfer is subject to section 83, section 402(b) or section 403(c).

In addition, for purposes of this paragraph (b), a right to compensation income that will be required to be included in income under section 402(b)(4)(A) is not a deferral of compensation.

(ii) *Promises to transfer property.* A plan under which a service provider obtains a legally binding right to receive property in a future taxable year where the property will be substantially vested (as defined in § 1.83-3(b)) at the time of transfer of the property may provide for the deferral of compensation and, accordingly, may constitute a nonqualified deferred compensation plan. A legally binding right to receive property in a future taxable year where the property will be substantially nonvested (as defined in § 1.83-3(b)) at the time of transfer of the property will not provide for the deferral of compensation and, accordingly, will not constitute a nonqualified deferred compensation plan unless offered in conjunction with another legally binding right that constitutes a deferral of compensation.

(7) *Arrangements between partnerships and partners.* [Reserved]

(8) *Certain foreign plans—(i) Plans with respect to compensation covered by treaty or other international agreement.* A plan in which a service provider participates does not provide for a deferral of compensation for purposes of this paragraph (b) to the extent that the compensation under the plan would have been excluded from gross income for Federal income tax purposes under the provisions of any bilateral income tax convention or other bilateral or multilateral agreement to which the United States is a party if the compensation had been paid to the service provider at the time that the legally binding right to the compensation first arose or, if later, the time that the legally binding right was no longer subject to a substantial risk of forfeiture.

(ii) *Plans with respect to certain other compensation.* A plan in which a service provider participates does not provide for a deferral of compensation for purposes of this paragraph (b) to the extent that compensation under the plan would not have been includible in gross income for Federal tax purposes if it had been paid to the service provider at

the time that the legally binding right to the compensation first arose or, if later, the time that the legally binding right was no longer subject to a substantial risk of forfeiture, due to one of the following:

(A) The service provider was a non-resident alien at such time and the compensation would not have been includible in gross income under section 872.

(B) The service provider was a qualified individual (as defined in section 911(d)(1)) at such time, the compensation would have been foreign earned income within the meaning of section 911(b)(1) (without regard to section 911(b)(1)(B)(iv)) if paid at such time, and the amount of such compensation was equal to or less than the excess (if any) of the maximum exclusion amount under section 911(b)(2)(D) for such taxable year over the amount of foreign earned income actually excluded from gross income by such qualified individual for such taxable year under section 911(a)(1).

(C) The compensation would have been excludible from gross income under section 893.

(D) The compensation would have been excludible from gross income under section 931 or section 933.

(iii) *Tax equalization agreements.* A tax equalization agreement does not provide for a deferral of compensation if payments made under such tax equalization agreement are made no later than the end of the second taxable year of the service provider beginning after the taxable year of the service provider in which the service provider's U.S. Federal income tax return is required to be filed (including any extensions) for the year to which the compensation subject to the tax equalization payment relates, or, if later, the second taxable year of the service provider beginning after the latest such taxable year in which the service provider's foreign tax return or payment is required to be filed or made for the year to which the compensation subject to the tax equalization payment relates. Where such payments arise due to an audit, litigation or similar proceeding, the right to the payments will not be treated as resulting in a deferral of compensation if the payments are

scheduled and made in accordance with the provisions of § 1.409A-3(i)(1)(v) (timing of tax gross-up payments). For purposes of this paragraph (b)(8)(iii), the term *tax equalization agreement* refers to an agreement, method, program, or other arrangement that provides payments intended to compensate the service provider for some or all of the excess of the taxes actually imposed by a foreign jurisdiction on the compensation paid by the service recipient to the service provider over the taxes that would be imposed if the compensation were subject solely to United States Federal, state, and local income tax, or some or all of the excess of the United States Federal, state, and local income tax actually imposed on the compensation paid by the service to the service provider over the taxes that would be imposed if the compensation were subject solely to taxes in the foreign jurisdiction, provided that the payment made under such agreement, method, program, or other arrangement may not exceed such excess and the amount necessary to compensate for the additional taxes on the amount paid under the agreement, method, program, or other arrangement.

(iv) *Certain limited deferrals of a non-resident alien.* With respect to a non-resident alien, a foreign plan does not provide for a deferral of compensation if the amounts deferred under the foreign plan based upon services performed by the nonresident alien in the United States (including amounts deferred based upon service credits or compensation received due to services performed in the United States) do not exceed the applicable dollar amount under section 402(g)(1)(B) for the taxable year. If the amounts deferred under the foreign plan based upon the services performed by the nonresident alien in the United States exceed the applicable dollar amount, an amount of such deferrals equal to such amount is treated as not deferred under a nonqualified deferred compensation plan. For purposes of this paragraph (b)(8)(iv), the term *foreign plan* means a plan that, together with all substantially similar plans, is maintained by a service recipient for a substantial number of participants, substantially all of whom are nonresident aliens or resi-

dent aliens classified as resident aliens solely under section 7701(b)(1)(A)(ii) (and not section 7701(b)(1)(A)(i)).

(v) *Additional foreign plans.* A plan in which a service provider participates does not provide for a deferral of compensation for purposes of this paragraph (b) to the extent designated by the Commissioner in revenue procedures, notices, or other guidance published in the Internal Revenue Bulletin (see § 601.601(d)(2) of this chapter).

(vi) *Earnings.* Earnings on compensation excluded from the definition of deferral of compensation pursuant to this paragraph (b)(8) are also not treated as a deferral of compensation.

(9) *Separation pay plans*—(i) *In general.* A plan that otherwise provides for a deferral of compensation under this paragraph (b) does not fail to provide a deferral of compensation merely because the right to payment of the compensation is conditioned upon a separation from service. However, paragraphs (b)(9)(ii), (iii), (iv), and (v) of this section provide rules concerning the extent to which certain separation pay plans do not provide for the deferral of compensation. The exceptions contained in paragraphs (b)(9)(ii), (iii), (iv), and (v) of this section may be used in combination, such that compensation under a plan that would be excepted under one of those paragraphs may be treated as excepted under another of those paragraphs, so that other compensation under a plan may be treated as excepted under the first of such paragraphs. Notwithstanding any other provision of this paragraph (b)(9), any payment or benefit, or entitlement to a payment or benefit, that acts as a substitute for, or replacement of, amounts deferred by the service recipient under a separate nonqualified deferred compensation plan constitutes a payment or a deferral of compensation under the separate nonqualified deferred compensation plan, and does not constitute a payment or deferral of compensation under a separation pay plan. If a service provider receives a payment at separation from service and also has a legally binding right to an amount of deferred compensation that would be forfeited upon the separation from service, whether the payment acts as an acceleration of vesting and substitute

payment for the amount of deferred compensation forfeited, or whether the deferred compensation is treated as forfeited and the amount paid is treated as a separate payment of current compensation, is determined based on the facts and circumstances, provided that, where the separation from service is voluntary, it is presumed that the payment results from an acceleration of vesting followed by a payment of the deferred compensation that is subject to section 409A. Accordingly, any change in the payment schedule to accelerate or defer the payments would be subject to the rules of section 409A. The presumption that a right to a payment is not a new right, but is instead a right substituted for a pre-existing forfeited right, may be rebutted by demonstrating that the service provider would have obtained the right to the payment regardless of the forfeiture of the nonvested right. A factor indicating that the service provider would have obtained a right to a payment regardless of the forfeiture of the nonvested right is that the amount to which the service provider obtains a right is materially less than an amount equal to the present value of the forfeited amount multiplied by a fraction, the numerator of which is the period of service the service provider actually completed, and the denominator of which is the full period of service the service provider would have been required to complete to receive the full amount of the payment. For example, where a service provider is entitled to a future payment only if the service provider completes three years of service and at the time of termination the service provider has completed one year of service, the presumption could be rebutted if the payment to the service provider is materially less than the present value of one-third of the nonvested amount. Another such factor is that the payment to the service provider is of a type customarily made to service providers who separate from service with the service recipient and do not forfeit nonvested rights to deferred compensation (for example, a payment of accrued but unused leave or a payment for a release of actual or potential claims).

(ii) *Collectively bargained separation pay plans.* A separation pay plan does not provide for a deferral of compensation to the extent the plan is a collectively bargained separation pay plan that provides for separation pay only upon an involuntary separation from service or pursuant to a window program. Only the portion of the separation pay plan attributable to employees covered by a bona fide collective bargaining agreement is considered to be provided under a collectively bargained separation pay plan. A collectively bargained separation pay plan is a separation pay plan that meets the following conditions:

(A) The separation pay plan is contained within an agreement that the Secretary of Labor determines to be a collective bargaining agreement.

(B) The separation pay provided by the collective bargaining agreement was the subject of arm's length negotiations between employee representatives and one or more employers, and the agreement between employee representatives and one or more employers satisfies section 7701(a)(46).

(C) The circumstances surrounding the agreement evidence good faith bargaining between adverse parties over the separation pay to be provided under the agreement.

(iii) *Separation pay due to involuntary separation from service or participation in a window program.* A separation pay plan that is not described in paragraph (b)(9)(ii) of this section and that provides for separation pay only upon an involuntary separation from service (as defined in paragraph (n) of this section) or pursuant to a window program does not provide for a deferral of compensation to the extent that the separation pay, or portion of the separation pay, provided under the plan meets the following requirements:

(A) The separation pay (other than amounts described in paragraphs (b)(9)(iv) and (v) of this section) does not exceed two times the lesser of—

(1) The sum of the service provider's annualized compensation based upon the annual rate of pay for services provided to the service recipient for the taxable year of the service provider

preceding the taxable year of the service provider in which the service provider has a separation from service with such service recipient (adjusted for any increase during that year that was expected to continue indefinitely if the service provider had not separated from service); or

(2) The maximum amount that may be taken into account under a qualified plan pursuant to section 401(a)(17) for the year in which the service provider has a separation from service.

(B) The plan provides that the separation pay described in paragraph (b)(9)(iii)(A) of this section must be paid no later than the last day of the second taxable year of the service provider following the taxable year of the service provider in which occurs the separation from service.

(iv) *Foreign separation pay plans.* A separation pay plan (including a plan providing payments upon a voluntary separation from service) does not provide for deferred compensation to the extent the plan provides for amounts of separation pay required to be provided under the applicable law of a foreign jurisdiction. For this purpose, a provision of foreign law shall be considered applicable only to foreign earned income (as defined under section 911(b)(1) without regard to section 911(b)(1)(B)(iv) and without regard to the requirement that the income be attributable to services performed during the period described in section 911(d)(1)(A) or (B)) from sources within the foreign country that promulgated such law.

(v) *Reimbursements and certain other separation payments—(A) In general.* To the extent a separation pay plan (including a plan providing payments upon a voluntary separation from service) entitles a service provider to payment by the service recipient of reimbursements that are not otherwise excludible from gross income for expenses that the service provider could otherwise deduct under section 162 or section 167 as business expenses incurred in connection with the performance of services (ignoring any applicable limitation based on adjusted gross income), or of reasonable outplacement expenses and reasonable moving expenses actually incurred by the service

provider and directly related to the termination of services for the service recipient, such plan does not provide for a deferral of compensation to the extent such rights apply during a limited period of time (regardless of whether such rights extend beyond the limited period of time). For purposes of this paragraph (b)(9)(v)(A), the reimbursement of reasonable moving expenses includes the reimbursement of all or part of any loss the service provider actually incurs due to the sale of a primary residence in connection with a separation from service.

(B) *Medical benefits.* To the extent a separation pay plan (including a plan providing payments due to a voluntary separation from service) entitles a service provider to reimbursement by the service recipient of payments of medical expenses incurred and paid by the service provider but not reimbursed by a person other than the service recipient and allowable as a deduction under section 213 (disregarding the requirement of section 213(a) that the deduction is available only to the extent that such expenses exceed 7.5 percent of adjusted gross income), such plan does not provide for a deferral of compensation to the extent such rights apply during the period of time during which the service provider would be entitled (or would, but for such plan, be entitled) to continuation coverage under a group health plan of the service recipient under section 4980B (COBRA) if the service provider elected such coverage and paid the applicable premiums.

(C) *In-kind benefits and direct service recipient payments.* A service provider's entitlement to in-kind benefits from the service recipient, or a payment by the service recipient directly to the person providing the goods or services to the service provider, is treated as not providing for a deferral of compensation for purposes of this paragraph (b), if a right to reimbursement by the service recipient for a payment for such benefits, goods, or services by the service provider would not be treated as providing for a deferral of compensation under this paragraph (b)(9)(v).

(D) *Limited payments.* If not otherwise excluded, a taxpayer may treat a right

or rights under a separation pay plan to a payment or payments as not providing for a deferral of compensation to the extent such payments in the aggregate do not exceed the applicable dollar amount under section 402(g)(1)(B) for the year of the separation from service.

(E) *Limited period of time.* For purposes of paragraphs (b)(9)(v)(A) and (C) of this section, a limited period of time in which expenses may be incurred, or in which in-kind benefits may be provided by the service recipient or a third party that the service recipient will pay, does not include periods beyond the last day of the second taxable year of the service provider following the taxable year of the service provider in which the separation from service occurred, provided that the period during which the reimbursements for such expenses must be paid may not extend beyond the third taxable year of the service provider following the taxable year of the service provider in which the separation from service occurred.

(vi) *Window programs—definition.* The term *window program* refers to a program established by a service recipient in connection with an impending separation from service to provide separation pay, where such program is made available by the service recipient for a limited period of time (no longer than 12 months) to service providers who separate from service during that period or to service providers who separate from service during that period under specified circumstances. A program will not be considered a window program if a service recipient establishes a pattern of repeatedly providing for similar separation pay in similar situations for substantially consecutive, limited periods of time. Whether the recurrence of these programs constitutes a pattern is determined based on the facts and circumstances. Although no one factor is determinative, relevant factors include whether the benefits are on account of a specific business event or condition, the degree to which the separation pay relates to the event or condition, and whether the event or condition is temporary or discrete or is a permanent aspect of the employer's business.

(10) *Certain indemnification and liability insurance plans.* A plan in which a service provider participates does not provide for a deferral of compensation for purposes of this paragraph (b) to the extent that the plan provides (to the extent permissible under applicable law), for the indemnification of, or the purchase of an insurance policy providing for payments of, all or part of the expenses incurred or damages paid or payable by a service provider with respect to a bona fide claim against the service provider or service recipient, including amounts paid or payable by the service provider upon the settlement of a bona fide claim against the service provider or service recipient, where such claim is based on actions or failures to act by the service provider in his or her capacity as a service provider of the service recipient.

(11) *Legal settlements.* An agreement to which a service provider is a party does not provide for a deferral of compensation for purposes of this paragraph (b) to the extent that the agreement provides for amounts paid as settlements or awards resolving bona fide legal claims based on wrongful termination, employment discrimination, the Fair Labor Standards Act, or worker's compensation statutes, including claims under applicable Federal, state, local, or foreign laws, or for reimbursements or payments of reasonable attorneys fees or other reasonable expenses incurred by the service provider related to such bona fide legal claims, regardless of whether such settlements, awards, or reimbursement or payment of expenses pursuant to such claims are treated as compensation or wages for Federal tax purposes. Whether the execution of a waiver of any or all of such types of claims indicates that the amounts are paid as an award or settlement of an actual bona fide claim for damages under applicable law is determined based on the facts and circumstances. This paragraph (b)(11) does not apply to any deferred amounts that did not arise as a result of an actual bona fide claim for damages under applicable law, such as amounts that would have been deferred or paid regardless of the existence of such claim, even if such amounts are paid or modified as part of a settlement or award

resolving an actual bona fide claim. For this purpose, a provision of foreign law shall be considered applicable only to foreign earned income (as defined under section 911(b)(1) without regard to section 911(b)(1)(B)(iv) and without regard to the requirement that the income be attributable to services performed during the period described in section 911(d)(1)(A) or (B)) from sources within the foreign country that promulgated such law.

(12) *Certain educational benefits.* A plan in which a service provider participates does not provide for a deferral of compensation to the extent the plan provides for taxable educational benefits. For purposes of this paragraph (b)(12), the term *educational benefits* refers solely to benefits provided to a service provider, consisting solely of educational assistance for the education of the service provider, as defined in section 127(c) and the accompanying regulations, and does not refer to any benefits provided for the education of any other person, including any spouse, child, or other family member of the service provider.

(c) *Plan*—(1) *In general.* The term *plan* includes any agreement, method, program, or other arrangement, including an agreement, method, program, or other arrangement that applies to one person or individual. A plan may be adopted unilaterally by the service recipient or may be negotiated or agreed to by the service recipient and one or more service providers or service provider representatives. An agreement, method, program, or other arrangement may constitute a plan regardless of whether it is an employee benefit plan under section 3(3) of ERISA, as amended (29 U.S.C. 1002(3)). The requirements of section 409A are applied as if a separate plan or plans is maintained for each service provider. For purposes of determining the terms of a plan, general provisions of the plan that purport to nullify noncompliant plan terms, or to supply any specific plan terms required by this section, § 1.409A-2 or § 1.409A-3, are disregarded.

(2) *Plan aggregation rules*—(i) *In general.* Except as otherwise provided, the following rules apply with respect to the application of this section and §§ 1.409A-2 through 1.409A-6 to deferrals

of compensation with respect to a service provider:

(A) All deferrals of compensation at the election of that service provider under all plans of the service recipient that are account balance plans, except to the extent that the plan is described in paragraph (c)(2)(i)(D), (E), (F), (G), or (H) of this section, are treated as deferred under a single plan. For purposes of this paragraph, the term *account balance plan* means—

(1) An agreement, method, program, or other arrangement that is an account balance plan as defined in § 31.3121(v)(2)-1(c)(1)(ii)(A) of this chapter, including mandatorily bifurcating the agreement, method, program, or other arrangement in accordance with the rules provided in § 31.3121(v)-1(c)(1)(iii)(B) of this chapter; or

(2) An agreement, method, program, or other arrangement that would be described in paragraph (c)(2)(i)(A)(I) of this section if the service provider were an employee.

(B) All deferrals of compensation other than at the election of that service provider, including deferrals reflecting matching by the service recipient with respect to amounts a service provider elects to defer, under all plans of the service recipient that are account balance plans, except to the extent the plan is described in paragraph (c)(2)(i)(D), (E), (F), (G), or (H) of this section, are treated as deferred under a single plan. For purposes of this paragraph (c)(2)(i)(B), the term “account balance plan” has the same meaning as provided in paragraph (c)(2)(i)(A) of this section.

(C) All deferrals of compensation with respect to that service provider under all plans of the service recipient that are nonaccount balance plans, except to the extent such plan is described in paragraph (c)(2)(i)(D), (E), (F), (G), or (H) of this section, are treated as deferred under a single plan. For purposes of this paragraph (c)(2)(i)(C), the term *nonaccount balance plan* means—

(1) An agreement, method, program, or other arrangement that is a nonaccount balance plan as defined in § 31.3121(v)(2)-1(c)(2)(i) of this chapter, including mandatorily bifurcating the agreement, method, program, or other

arrangement in accordance with the rules provided in § 31.3121(v)-1(c)(1)(iii)(B) of this chapter; or

(2) An agreement, method, program, or other arrangement that would be described in paragraph (c)(2)(i)(C)(I) of this section if the service provider were an employee.

(D) All deferrals of compensation with respect to that service provider under all separation pay plans (as defined in paragraph (m) of this section) of the service recipient to the extent an amount deferred under the plans is not described in paragraph (c)(2)(i)(E) of this section and is payable solely upon an involuntary separation from service within the meaning of paragraph (n) of this section or as a result of participation in a window program, are treated as deferred under a single plan.

(E) All deferrals of compensation with respect to that service provider under all plans of the service recipient to the extent such amounts deferred consist of rights to in-kind benefits or reimbursements of expenses, such as membership fees, or expenses related to aircraft or vehicle usage, to the extent that the right to the in-kind benefit or reimbursement, separately or in the aggregate, does not constitute a substantial portion of either the overall compensation earned by the service provider for performing services for the service recipient or the overall compensation received due to a separation from service, are treated as deferred under a single plan.

(F) All deferrals of compensation with respect to that service provider under all plans of the service recipient to the extent that the taxation of such compensation is governed by § 1.61-22 or § 1.7872-15 (split-dollar life insurance arrangements), or the taxation of such compensation would be governed by § 1.61-22 or § 1.7872-15 but for the operation of § 1.61-22(j) (effective date provisions), are treated as deferred under a single plan.

(G) All deferrals of compensation with respect to that service provider under all agreements, methods, programs, or other arrangements of the service recipient to the extent the deferrals under the agreements, methods, programs, or other arrangements are

deferrals of amounts that would be treated as modified foreign earned income (meaning foreign earned income as defined under section 911(b)(1) without regard to section 911(b)(1)(B)(iv) and without regard to the requirement that the income be attributable to services performed during the period described in section 911(d)(1)(A) or (B)) if paid to the service provider at the time the amount is first deferred, and provided further that substantially all the participants in such agreements, methods, programs, or other arrangements and any substantially similar agreements, methods, programs, or other arrangements are nonresident aliens and that the service provider does not participate in a substantially identical agreement, method, program, or other arrangement that does not meet the requirements of this paragraph (c)(2)(i)(G) (a domestic arrangement), are treated as deferred under a single plan.

(H) All deferrals of compensation with respect to that service provider under all plans of the service recipient to the extent such plans are stock rights (as defined in paragraph (l) of this section) subject to section 409A, are treated as deferred under a single plan.

(I) All deferrals of compensation with respect to that service provider under all plans of the service recipient to the extent such plans are not described in paragraph (c)(2)(i)(A), (B), (C), (D), (E), (F), (G), or (H) of this section are treated as deferred under a single plan.

(ii) *Dual status.* Agreements, methods, programs, and other arrangements in which a service provider participates are not aggregated with other agreements, methods, programs, and other arrangements to the extent the service provider participates in one set of agreements, methods, programs, and other arrangements due to status as an employee of the service recipient (employee arrangements) and another set of agreements, methods, programs, and other arrangements due to status as an independent contractor of the service recipient (independent contractor arrangements). For example, where a service provider deferred amounts under an independent contractor arrangement while providing services as

an independent contractor, and then becomes eligible for and defers amounts under a separate employee arrangement after being hired as an employee, the two arrangements will not be aggregated for purposes of this paragraph (c)(2). Where an employee also is a member of the board of directors of the service recipient (or a similar position with respect to a non-corporate service recipient), the arrangements under which the employee participates as a director (director arrangements) are not aggregated with employee arrangements, provided that the director arrangements are substantially similar to arrangements provided to service providers providing services only as directors (or similar positions with respect to non-corporate service recipients). For example, an employee director who participates in an employee arrangement and a director arrangement generally may treat the two arrangements as separate plans, provided that the director arrangement is substantially similar to arrangements providing benefits to non-employee directors. To the extent a plan in which an employee director participates is not substantially similar to arrangements in which non-employee directors participate, such plan is treated as an employee plan for purposes of this paragraph (c)(2). Director plans and independent contractor plans are aggregated for purposes of this paragraph (c)(2).

(3) *Establishment of plan*—(i) *In general*. A plan does not satisfy the requirements of section 409A and this section and §§ 1.409A-2 through 1.409A-3 and §§ 1.409A-5 through 1.409A-6, unless the plan is established and maintained by a service recipient in accordance with the requirements of this section, §§ 1.409A-2 through 1.409A-3 and §§ 1.409A-5 through 1.409A-6. For purposes of this paragraph (c)(3), a plan is established on the latest of the date on which it is adopted, the date on which it is effective, and the date on which the material terms of the plan are set forth in writing. The material terms of the plan may be set forth in writing in one or more documents. For purposes of this paragraph (c)(3)(i), a plan will be deemed to be set forth in writing if it is set forth in any other form that is

approved by the Commissioner. The material terms of the plan include the amount (or the method or formula for determining the amount) of deferred compensation to be provided under the plan and the time and form of payment. Notwithstanding the foregoing, a plan will be deemed to be established as of the date the participant obtains a legally binding right to a deferral of compensation, provided that the plan is otherwise established under the rules of this paragraph (c)(3)(i) by the end of the taxable year of the service provider in which the legally binding right arises, or with respect to an amount not payable in the year immediately following the taxable year of the service provider in which the legally binding right arises (the subsequent year), the 15th day of the third month of the subsequent year.

(ii) *Initial deferral election provisions*. If a plan provides a service provider or a service recipient with an initial deferral election, the plan satisfies the requirements of this paragraph (c)(3) if the plan sets forth in writing, on or before the date the applicable election is required to be irrevocable to satisfy the requirements of § 1.409A-2(a), the conditions under which such election may be made.

(iii) *Subsequent deferral election provisions*. If a plan permits a subsequent deferral election described in § 1.409A-2(b), the plan satisfies the requirements of this paragraph (c)(3) if the plan sets forth in writing, on or before the date the election is required to be irrevocable to meet the requirements of § 1.409A-2(b), the conditions under which such election may be made.

(iv) *Payment accelerations*. Except as explicitly provided in § 1.409A-3, a plan is not required to set forth in writing the conditions under which a payment may be accelerated if such acceleration is permitted under § 1.409A-3(j)(4).

(v) *Six-month delay for specified employees*. A plan must provide that distributions to a specified employee may not be made before the date that is six months after the date of separation from service or, if earlier, the date of death (the six-month delay rule). The six-month delay rule, required for payments due to the separation from service of a specified employee, must be

written in the plan. A plan does not fail to be established and maintained merely because it does not contain the six-month delay rule when the service provider who has a right to compensation deferred under such plan is not a specified employee. However, such provision must be set forth in writing on or before the date such service provider first becomes a specified employee. In general, this means the provision must be set forth in writing on or before the specified employee effective date (as defined in paragraph (i)(3) of this section) for the first list of specified employees that includes such service provider.

(vi) *Plan amendments.* In the case of an amendment that increases the amount deferred under a nonqualified deferred compensation plan, the plan is not considered established with respect to the additional amount deferred until the plan, as amended, is established in accordance with paragraph (c)(3)(i) of this section.

(vii) *Transition rule for written plan requirement.* For purposes of this paragraph (c)(3), a legally enforceable unwritten plan that was adopted and effective before December 31, 2007, is treated as established under this section as of the later of the date on which it was adopted or became effective, provided that the material terms of the plan are set forth in writing on or before December 31, 2007.

(viii) *Plan aggregation rules.* The plan aggregation rules of paragraph (c)(2)(i) of this section do not apply to the written plan requirements of this paragraph (c)(3). Accordingly, deferrals of compensation under an agreement, method, program, or other arrangement that fails to meet the requirements of section 409A solely due to a failure to meet the written plan requirements of this paragraph (c)(3) are not aggregated with deferrals of compensation under other agreements, methods, programs, or other arrangements that meet such requirements.

(d) *Substantial risk of forfeiture—(1) In general.* Compensation is subject to a substantial risk of forfeiture if entitlement to the amount is conditioned on the performance of substantial future services by any person or the occurrence of a condition related to a pur-

pose of the compensation, and the possibility of forfeiture is substantial. For purposes of this paragraph (d), a condition related to a purpose of the compensation must relate to the service provider's performance for the service recipient or the service recipient's business activities or organizational goals (for example, the attainment of a prescribed level of earnings or equity value or completion of an initial public offering). For purposes of this paragraph (d), if a service provider's entitlement to the amount is conditioned on the occurrence of the service provider's involuntary separation from service without cause, the right is subject to a substantial risk of forfeiture if the possibility of forfeiture is substantial. An amount is not subject to a substantial risk of forfeiture merely because the right to the amount is conditioned, directly or indirectly, upon the refraining from the performance of services. Except as provided with respect to certain transaction-based compensation under § 1.409A-3(i)(5)(iv), the addition of any risk of forfeiture after the legally binding right to the compensation arises, or any extension of a period during which compensation is subject to a risk of forfeiture, is disregarded for purposes of determining whether such compensation is subject to a substantial risk of forfeiture. An amount will not be considered subject to a substantial risk of forfeiture beyond the date or time at which the recipient otherwise could have elected to receive the amount of compensation, unless the present value of the amount subject to a substantial risk of forfeiture (disregarding, in determining the present value, the risk of forfeiture) is materially greater than the present value of the amount the recipient otherwise could have elected to receive absent such risk of forfeiture. For this purpose, compensation that the service provider would receive for continuing to perform services regardless of whether the service provider elected to receive the amount that is subject to a substantial risk of forfeiture is not taken into account in determining whether the present value of the right to the amount subject to a substantial risk of forfeiture is materially greater

than the amount the recipient otherwise could have elected to receive absent such risk of forfeiture. For example, a salary deferral generally may not be made subject to a substantial risk of forfeiture. But, for example, where a bonus plan provides an election between a cash payment or restricted stock units with a present value that is materially greater (disregarding the risk of forfeiture) than the present value of such cash payment and that will be forfeited absent continued services for a period of years, the right to the restricted stock units generally will be treated as subject to a substantial risk of forfeiture.

(2) *Stock rights.* A stock right is not subject to a substantial risk of forfeiture at the earlier of the first date the holder may exercise the stock right and receive cash or property that is substantially vested (as defined in § 1.83-3(b)) or the first date that the stock right is not subject to a forfeiture condition that would constitute a substantial risk of forfeiture. Accordingly, a stock option that the service provider may exercise immediately and receive substantially vested stock is not subject to a substantial risk of forfeiture, even if the stock option automatically terminates upon the service provider's separation from service.

(3) *Enforcement of forfeiture condition—(i) In general.* In determining whether the possibility of forfeiture is substantial in the case of rights to compensation granted by a service recipient to a service provider that owns a significant amount of the total combined voting power or value of all classes of equity of the service recipient (where the service provider's ownership is determined with application of the attribution rules under section 318 if the service recipient is a corporation, or if the service recipient is an entity that is not a corporation, with application by analogy of the attribution rules under section 318), all relevant facts and circumstances will be taken into account in determining whether the probability of the service recipient enforcing such condition is substantial, including—

(A) The service provider's relationship to other equity holders and the extent of their control, potential control

and possible loss of control of the service recipient;

(B) The position of the service provider in the service recipient and the extent to which the service provider is subordinate to other service providers;

(C) The service provider's relationship to the officers and directors of the service recipient (or similar positions with respect to a noncorporate service recipient);

(D) The person or persons who must approve the service provider's discharge; and

(E) Past actions of the service recipient in enforcing the restrictions.

(ii) *Examples.* The following examples illustrate the rules of paragraph (d)(3)(i) of this section:

Example 1. A service provider would be considered as having deferred compensation subject to a substantial risk of forfeiture, but for the fact that the service provider owns 20 percent of the single class of stock in the transferor corporation. If the remaining 80 percent of the class of stock is owned by an unrelated individual (or members of such an individual's family) so that the possibility of the corporation enforcing a restriction on such rights is substantial, then such rights are subject to a substantial risk of forfeiture.

Example 2. A service provider would be considered as having deferred compensation subject to a substantial risk of forfeiture, but for the fact that the service provider, who is president of the corporation, also owns 4 percent of the voting power of all the stock of a corporation. If the remaining stock is so diversely held by the public that the president, in effect, controls the corporation, then the possibility of the corporation enforcing a restriction on the right to deferred compensation of the president is not substantial, and such rights are not subject to a substantial risk of forfeiture.

(e) *Performance-based compensation—*

(1) *In general.* The term *performance-based compensation* means compensation the amount of which, or the entitlement to which, is contingent on the satisfaction of preestablished organizational or individual performance criteria relating to a performance period of at least 12 consecutive months. Organizational or individual performance criteria are considered preestablished if established in writing by not later than 90 days after the commencement of the period of service to which the

criteria relates, provided that the outcome is substantially uncertain at the time the criteria are established. Performance-based compensation may include payments based on performance criteria that are not approved by a compensation committee of the board of directors (or similar entity in the case of a non-corporate service recipient) or by the stockholders or members of the service recipient. Performance-based compensation does not include any amount or portion of any amount that will be paid either regardless of performance, or based upon a level of performance that is substantially certain to be met at the time the criteria is established. In addition, except as provided in paragraph (e)(3) of this section, compensation is not performance-based compensation merely because the amount of such compensation is determined by reference to the value of the service recipient or the stock of the service recipient. Where a portion of an amount of compensation would qualify as performance-based compensation if the portion were the sole amount available under the plan, that portion of the award will not fail to qualify as performance-based compensation if that portion is designated separately or otherwise separately identifiable under the terms of the plan, and the amount of each portion is determined independently of the other. Compensation may be performance-based compensation where the amount will be paid regardless of satisfaction of the performance criteria due to the service provider's death, disability, or a change in control event (as defined in § 1.409A-3(i)(5)(i)), provided that a payment made under such circumstances without regard to the satisfaction of the performance criteria will not constitute performance-based compensation. For purposes of this paragraph (e)(1), a disability refers to any medically determinable physical or mental impairment resulting in the service provider's inability to perform the duties of his or her position or any substantially similar position, where such impairment can be expected to result in death or can be expected to last for a continuous period of not less than six months.

(2) *Payments based upon subjective performance criteria.* The term *performance-based compensation* includes payments based upon subjective performance criteria, provided that—

(i) The subjective performance criteria are bona fide and relate to the performance of the participant service provider, a group of service providers that includes the participant service provider, or a business unit for which the participant service provider provides services (which may include the entire organization); and

(ii) The determination that any subjective performance criteria have been met is not made by the participant service provider or a family member of the participant service provider (as defined in section 267(c)(4) applied as if the family of an individual includes the spouse of any member of the family), or a person under the effective control of the participant service provider or such a family member, and no amount of the compensation of the person making such determination is effectively controlled in whole or in part by the service provider or such a family member.

(3) *Equity-based compensation.* Compensation is performance-based compensation if it is based solely on an increase in the value of the service recipient, or a share of stock in the service recipient, after the date of a grant or award. However, compensation payable for a service period that is equal to the value of a predetermined number of shares of stock, and is variable only to the extent that the value of such shares appreciates or depreciates, generally will not be performance-based compensation. Notwithstanding the foregoing, the attainment of a prescribed value for the service recipient (or a portion thereof), or a share of stock in the service recipient, may be used as a preestablished organizational criterion for purposes of providing performance-based compensation, provided that the other requirements of paragraph (e)(1) of this section are satisfied. In addition, an award of equity-based compensation may constitute performance-based compensation if entitlement to the compensation is subject to a condition that would cause

the award to otherwise qualify as performance-based compensation, such as a performance-based vesting condition. A provision that allows a service provider to defer compensation that would be realized upon the exercise of a stock right generally constitutes an additional deferral feature for purposes of the definition of a deferral of compensation under paragraph (b)(5) of this section.

(f) *Service provider*—(1) *In general.* The term *service provider* includes an individual, corporation, subchapter S corporation, partnership, personal service corporation (as defined in section 269A(b)(1)), noncorporate entity that would be a personal service corporation if it were a corporation, qualified personal service corporation (as defined in section 448(d)(2)), and noncorporate entity that would be a qualified personal service corporation if it were a corporation, for any taxable year in which such individual, corporation, subchapter S corporation, partnership, or other entity accounts for gross income from the performance of services under the cash receipts and disbursements method of accounting. The term *service provider* generally includes a person who has separated from service (a former service provider).

(2) *Independent contractors*—(i) *In general.* Except as otherwise provided in paragraph (f)(2)(iv) of this section, section 409A does not apply to an amount deferred under a plan between a service provider and service recipient with respect to a particular trade or business in which the service provider participates, including earnings credited to such deferred amount, if during the service provider's taxable year in which the service provider obtains a legally binding right to the payment of the amount deferred each of the following applies:

(A) The service provider is actively engaged in the trade or business of providing services, other than as an employee or as a member of the board of directors of a corporation (or similar position with respect to an entity that is not a corporation).

(B) The service provider provides significant services to two or more service recipients to which the service provider is not related and that are not related

to one another (as defined in paragraph (f)(2)(ii) of this section).

(C) The service provider is not related to the service recipient, applying the definition of related person contained in paragraph (f)(2)(ii) of this section subject to the modification that the language "20 percent" is not used instead of "50 percent" each place "50 percent" appears in sections 267(b) and 707(b)(1).

(ii) *Related person.* For purposes of this paragraph (f)(2), a person is related to another person if the persons bear a relationship to each other that is specified in section 267(b) or 707(b)(1), subject to the modifications that the language "20 percent" is used instead of "50 percent" each place it appears in sections 267(b) and 707(b)(1), and section 267(c)(4) is applied as if the family of an individual includes the spouse of any member of the family; or the persons are engaged in trades or businesses under common control (within the meaning of section 52(a) and (b)). In addition, an individual is related to an entity if the individual is an officer of an entity that is a corporation, or holds a position substantially similar to an officer of a corporation with an entity that is not a corporation.

(iii) *Significant services.* Whether a service provider is providing significant services depends on the facts and circumstances of each case. However, for purposes of paragraph (f)(2)(i) of this section, a service provider who provides services to two or more service recipients to which the service provider is not related and that are not related to one another is deemed to be providing significant services to two or more of such service recipients for a given taxable year, if the revenues generated from the services provided to any service recipient or group of related service recipients during such taxable year do not exceed 70 percent of the total revenue generated by the service provider from the trade or business of providing such services. In addition, in the case of a service provider who has been providing services in a trade or business for a period of not less than three consecutive years, for purposes of paragraph (f)(2)(i) of this section, a service provider who provides services to two or more service

recipients to which the service provider is not related and that are not related to one another is deemed to be providing significant services to two or more of such service recipients for a given taxable year if in each of the prior three taxable years the revenues generated from the services provided to any service recipient or group of related service recipients during such prior taxable years did not exceed 70 percent of the total revenue generated by the service provider from the trade or business of providing such services and, at the time an amount is deferred, the service provider does not know or have reason to anticipate that the revenues generated from the services provided to any service recipient or group of related service recipients during the current year will exceed 70 percent of the total revenue generated by the service provider from the trade or business of providing such services.

(iv) *Management services.* This paragraph (f)(2) does not apply to a service provider to the extent the service provider provides management services to a service recipient. For purposes of this paragraph (f)(2)(iv), the term *management services* means services that involve the actual or de facto direction or control of the financial or operational aspects of a trade or business of the service recipient, or investment management or advisory services provided to a service recipient whose primary trade or business includes the investment of financial assets (including investments in real estate), such as a hedge fund or a real estate investment trust.

(v) *Services provided to related persons.* Section 409A does not apply to an amount deferred under a plan that is a bona fide agreement, method, program, or other arrangement between a service provider and a related service recipient arising in the ordinary course of a particular trade or business in which the service provider is engaged to the extent that—

(A) The service provider provides services to the service recipient as an independent contractor;

(B) During the service provider's taxable year in which the amount is deferred, the service provider qualifies for the safe harbor provided in para-

graph (f)(2)(iii) of this section with respect to such trade or business; and

(C) Such agreement, method, program, or other arrangement and the practices thereunder (including billing and collection practices), are substantially similar to the agreements, methods, programs, or other arrangements and practices applicable to one or more unrelated service recipients to whom the service provider provides substantial services and that produce a majority of the total revenue that the service provider earns from the trade or business of providing such services during the taxable year.

(g) *Service recipient.* Except as otherwise specifically provided in these regulations, the term *service recipient* means the person for whom the services are performed and with respect to whom the legally binding right to compensation arises, and all persons with whom such person would be considered a single employer under section 414(b) (employees of controlled group of corporations), and all persons with whom such person would be considered a single employer under section 414(c) (employees of partnerships, proprietorships, etc., under common control). For example, if the service provider is an employee, the service recipient generally is the employer (including all persons treated as a single employer under section 414(b) or (c)). Notwithstanding the foregoing, section 409A applies to a plan that provides for the deferral of compensation, even if the payment of the compensation is not made by the person for whom services are performed.

(h) *Separation from service—(1) Employees—(i) In general.* An employee separates from service with the employer if the employee dies, retires, or otherwise has a termination of employment with the employer. However, for purposes of this paragraph (h)(1), the employment relationship is treated as continuing intact while the individual is on military leave, sick leave, or other bona fide leave of absence if the period of such leave does not exceed six months, or if longer, so long as the individual retains a right to reemployment with the service recipient under an applicable statute or by contract. For purposes of this paragraph (h)(1), a

leave of absence constitutes a bona fide leave of absence only if there is a reasonable expectation that the employee will return to perform services for the employer. If the period of leave exceeds six months and the individual does not retain a right to reemployment under an applicable statute or by contract, the employment relationship is deemed to terminate on the first date immediately following such six-month period. Notwithstanding the foregoing, where a leave of absence is due to any medically determinable physical or mental impairment that can be expected to result in death or can be expected to last for a continuous period of not less than six months, where such impairment causes the employee to be unable to perform the duties of his or her position of employment or any substantially similar position of employment, a 29-month period of absence may be substituted for such six-month period.

(ii) *Termination of employment.* Whether a termination of employment has occurred is determined based on whether the facts and circumstances indicate that the employer and employee reasonably anticipated that no further services would be performed after a certain date or that the level of bona fide services the employee would perform after such date (whether as an employee or as an independent contractor) would permanently decrease to no more than 20 percent of the average level of bona fide services performed (whether as an employee or an independent contractor) over the immediately preceding 36-month period (or the full period of services to the employer if the employee has been providing services to the employer less than 36 months). Facts and circumstances to be considered in making this determination include, but are not limited to, whether the employee continues to be treated as an employee for other purposes (such as continuation of salary and participation in employee benefit programs), whether similarly situated service providers have been treated consistently, and whether the employee is permitted, and realistically available, to perform services for other service recipients in the same line of business. An employee is pre-

sumed to have separated from service where the level of bona fide services performed decreases to a level equal to 20 percent or less of the average level of services performed by the employee during the immediately preceding 36-month period. An employee will be presumed not to have separated from service where the level of bona fide services performed continues at a level that is 50 percent or more of the average level of service performed by the employee during the immediately preceding 36-month period. No presumption applies to a decrease in the level of bona fide services performed to a level that is more than 20 percent and less than 50 percent of the average level of bona fide services performed during the immediately preceding 36-month period. The presumption is rebuttable by demonstrating that the employer and the employee reasonably anticipated that as of a certain date the level of bona fide services would be reduced permanently to a level less than or equal to 20 percent of the average level of bona fide services provided during the immediately preceding 36-month period or full period of services provided to the employer if the employee has been providing services to the service recipient for a period of less than 36 months (or that the level of bona fide services would not be so reduced). For example, an employee may demonstrate that the employer and employee reasonably anticipated that the employee would cease providing services, but that, after the original cessation of services, business circumstances such as termination of the employee's replacement caused the employee to return to employment. Although the employee's return to employment may cause the employee to be presumed to have continued in employment because the employee is providing services at a rate equal to the rate at which the employee was providing services before the termination of employment, the facts and circumstances in this case would demonstrate that at the time the employee originally ceased to provide services, the employee and the service recipient reasonably anticipated that the employee would not provide services in the future. Notwithstanding the foregoing provisions of

this paragraph (h)(1)(ii), a plan may treat another level of reasonably anticipated permanent reduction in the level of bona fide services as a separation from service, provided that the level of reduction required must be designated in writing as a specific percentage, and the reasonably anticipated reduced level of bona fide services must be greater than 20 percent but less than 50 percent of the average level of bona fide services provided in the immediately preceding 36 months. The plan must specify the definition of separation from service on or before the date on which a separation from service is designated as a time of payment of the applicable amount deferred, and once designated, any change to the definition of separation from service with respect to such amount deferred will be subject to the rules regarding subsequent deferrals and the acceleration of payments. For purposes of this paragraph (h)(1)(ii), for periods during which an employee is on a paid bona fide leave of absence (as defined in paragraph (h)(1)(i) of this section) and has not otherwise terminated employment pursuant to paragraph (h)(1)(i) of this section, the employee is treated as providing bona fide services at a level equal to the level of services that the employee would have been required to perform to receive the compensation paid with respect to such leave of absence. Periods during which an employee is on an unpaid bona fide leave of absence (as defined in paragraph (h)(1)(i) of this section) and has not otherwise terminated employment pursuant to paragraph (h)(1)(i) of this section, are disregarded for purposes of this paragraph (h)(1)(ii) (including for purposes of determining the applicable 36-month (or shorter) period).

(2) *Independent contractors*—(i) *In general*. An independent contractor is considered to have a separation from service with the service recipient upon the expiration of the contract (or in the case of more than one contract, all contracts) under which services are performed for the service recipient if the expiration constitutes a good-faith and complete termination of the contractual relationship. An expiration does not constitute a good faith and complete termination of the contrac-

tual relationship if the service recipient anticipates a renewal of a contractual relationship or the independent contractor becoming an employee. For this purpose, a service recipient is considered to anticipate the renewal of the contractual relationship with an independent contractor if it intends to contract again for the services provided under the expired contract, and neither the service recipient nor the independent contractor has eliminated the independent contractor as a possible provider of services under any such new contract. Further, a service recipient is considered to intend to contract again for the services provided under an expired contract if the service recipient's doing so is conditioned only upon incurring a need for the services, the availability of funds, or both.

(ii) *Special rule*. Notwithstanding paragraph (h)(2)(i) of this section, a plan is considered to satisfy the requirement described in § 1.409A-3(a)(1) with respect to an amount payable upon a separation from service if, with respect to amounts payable to a service provider who is an independent contractor, the plan provides that—

(A) No amount will be paid to the service provider before a date at least 12 months after the day on which the contract expires under which the service provider performs services for the service recipient (or, in the case of more than one contract, all such contracts expire); and

(B) No amount payable to the service provider on that date will be paid to the service provider if, after the expiration of the contract (or contracts) and before that date, the service provider performs services for the service recipient as an independent contractor or an employee.

(3) *Definition of service recipient and employer*. For purposes of this paragraph (h), the term *service recipient* or *employer* means the service recipient as defined in paragraph (g) of this section, provided that in applying section 1563(a)(1), (2), and (3) for purposes of determining a controlled group of corporations under section 414(b), the language “at least 50 percent” is used instead of “at least 80 percent” each place it appears in section 1563(a)(1), (2), and (3), and in applying § 1.414(c)-2

for purposes of determining trades or businesses (whether or not incorporated) that are under common control for purposes of section 414(c), “at least 50 percent” is used instead of “at least 80 percent” each place it appears in § 1.414(c)-2. A plan may provide with respect to a deferral of compensation under the plan that in applying sections 1563(a)(1), (2), and (3) for purposes of determining a controlled group of corporations under section 414(b), another defined percentage greater than 50 percent, but not greater than 80 percent, is used instead of “at least 80 percent” at each place it appears in sections 1563(a)(1), (2), and (3), and in applying § 1.414(c)-2 for purposes of determining trades or businesses (whether or not incorporated) that are under common control for purposes of section 414(c), another defined percentage greater than 50 percent, but not greater than 80 percent, is used instead of “at least 80 percent” at each place it appears in § 1.414(c)-2. In addition, where the use of such definition of service recipient for purposes of determining a separation from service is based upon legitimate business criteria, the plan may provide that for purposes of a deferral of compensation under the plan that in applying sections 1563(a)(1), (2), and (3) for purposes of determining a controlled group of corporations under section 414(b), the language “at least 20 percent” or another defined percentage not less than 20 percent but not greater than 50 percent is used instead of “at least 80 percent” at each place it appears in sections 1563(a)(1), (2), and (3), and in applying § 1.414(c)-2 for purposes of determining trades or businesses (whether or not incorporated) that are under common control for purposes of section 414(c), the language “at least 20 percent” or another defined percentage not less than 20 percent but not greater than 50 percent is used instead of “at least 80 percent” at each place it appears in § 1.414(c)-2. Where a definition of service recipient or employer other than the definition provided in the first sentence of this paragraph (h)(3) (the 50 percent standard) is used, the plan must designate in writing the alternate definition no later than the last date at which the time and form of payment of the applicable amount deferred must

be elected in accordance with § 1.409A-2(a), and any change in the definition for such amounts deferred will constitute a change in the time and form of payment subject to the rules governing subsequent deferral elections under § 1.409A-2(b) and the acceleration of payments under § 1.409A-3(j).

(4) *Asset purchase transactions.* Where as part of a sale or other disposition of assets by one service recipient (seller) to an unrelated service recipient (buyer), a service provider of the seller would otherwise experience a separation from service with the seller, the seller and the buyer may retain the discretion to specify, and may specify, whether a service provider providing services to the seller immediately before the asset purchase transaction and providing services to the buyer after and in connection with the asset purchase transaction has experienced a separation from service for purposes of this paragraph (h), provided that the asset purchase transaction results from bona fide, arm’s length negotiations, all service providers providing services to the seller immediately before the asset purchase transaction and providing services to the buyer after and in connection with the asset purchase transaction are treated consistently (regardless of position at the seller) for purposes of applying the provisions of any nonqualified deferred compensation plan, and such treatment is specified in writing no later than the closing date of the asset purchase transaction. For purposes of this paragraph (h)(4), references to a sale or other disposition of assets, or an asset purchase transaction, refer only to a transfer of substantial assets, such as a plant or division or substantially all the assets of a trade or business. For purposes of this paragraph (h)(4), whether a service recipient is related to another service recipient is determined under the rules provided in paragraph (f)(2)(ii) of this section.

(5) *Dual status.* If a service provider provides services both as an employee of a service recipient and as an independent contractor of a service recipient, the service provider must separate from service both as an employee and as an independent contractor to be

treated as having separated from service. If a service provider ceases providing services as an independent contractor and begins providing services as an employee, or ceases providing services as an employee and begins providing services as an independent contractor, the service provider will not be considered to have a separation from service until the service provider has ceased providing services in both capacities. Notwithstanding the foregoing, if a service provider provides services both as an employee of a service recipient and a member of the board of directors of a corporate service recipient (or an analogous position with respect to a non-corporate service recipient), the services provided as a director are not taken into account in determining whether the service provider has a separation from service as an employee for purposes of a nonqualified deferred compensation plan in which the service provider participates as an employee that is not aggregated with any plan in which the service provider participates as a director under paragraph (c)(2)(ii) of this section. In addition, if a service provider provides services both as an employee of a service recipient and a member of the board of directors of a corporate service recipient (or an analogous position with respect to a non-corporate service recipient), the services provided as an employee are not taken into account in determining whether the service provider has a separation from service as a director for purposes of a nonqualified deferred compensation plan in which the service provider participates as a director that is not aggregated with any plan in which the service provider participates as an employee under paragraph (c)(2)(ii) of this section.

(6) *Collectively bargained plans covering multiple employers.* Notwithstanding the foregoing provisions of this paragraph (h), to the extent a plan is established pursuant to a bona fide collective bargaining agreement covering services performed by employees for multiple employers, such plan may define a separation from service in a reasonable manner that treats the employee as not having separated from service during periods in which the employee is not providing services but is

available to perform services covered by the collective bargaining agreement for one or more employers, provided that the definition also provides that the employee must be deemed to have separated from service at a specified date not later than the end of any period of at least 12 consecutive months during which the employee has not provided any services covered by the collective bargaining agreement to any participating employer. This paragraph (h)(6) applies only if the definition of separation from service provided by the collective bargaining agreement was the subject of arm's length negotiations between employee representatives and two or more employers, the agreement between employee representatives and such employers satisfies section 7701(a)(46), and the circumstances surrounding the agreement evidence good faith bargaining between adverse parties over such definition.

(i) *Specified employee—(1) In general.* The term *specified employee* means a service provider who, as of the date of the service provider's separation from service, is a key employee of a service recipient any stock of which is publicly traded on an established securities market or otherwise. For purposes of this paragraph (i)(1), a service provider is a key employee if the service provider meets the requirements of section 416(i)(1)(A)(i), (ii), or (iii) (applied in accordance with the regulations thereunder and disregarding section 416(i)(5)) at any time during the 12-month period ending on a specified employee identification date. If a service provider is a key employee as of a specified employee identification date, the service provider is treated as a key employee for purposes of this paragraph (i) for the entire 12-month period beginning on the specified employee effective date.

(2) *Definition of compensation.* For purposes of identifying a specified employee by applying the requirements of section 416(i)(1)(A)(i), (ii), and (iii), the definition of compensation under § 1.415(c)-2(a) is used, applied as if the service recipient were not using any safe harbor provided in § 1.415(c)-2(d), were not using any of the elective special timing rules provided in § 1.415(c)-

2(e), and were not using any of the elective special rules provided in § 1.415(c)-2(g). Notwithstanding the foregoing, a service recipient may elect to use any available definition of compensation under section 415 and the regulations thereunder in accordance with the election requirements set forth in paragraph (i)(8) of this section, including any available safe harbor and any available election under the timing rules or special rules, provided that the definition is applied consistently to all employees of the service recipient for purposes of identifying specified employees. A service recipient may elect to use such an alternative definition regardless of whether another definition of compensation is being used for purposes of a qualified plan sponsored by the service recipient. However, once a list of specified employees has become effective, the service recipient cannot change the definition of compensation for purposes of identifying specified employees for the period with respect to which such list is effective.

(3) *Specified employee identification date.* Unless another date is designated in accordance with the requirements of this paragraph (i)(3) and paragraph (i)(8) of this section, the specified employee identification date is December 31. A service recipient may designate in accordance with the requirements of paragraph (i)(8) of this section any other date as the specified employee identification date, provided that a service recipient must use the same specified employee identification date with respect to all nonqualified deferred compensation plans, and any change to the specified employee identification date may not be effective for a period of at least 12 months. The service recipient may designate a specified employee identification date in each plan or in a separate document applicable to all plans, provided that the service recipient will not be treated as having designated a specified employee identification date before the designation is legally binding on the service recipient and all affected service providers. Any designation of a specified employee identification date made on or before December 31, 2007, may be applied to any separation from service occurring on or after January 1,

2005, unless and until subsequently changed pursuant to this paragraph (i)(3).

(4) *Specified employee effective date.* Unless another date is designated in accordance with the requirements of this paragraph (i)(4) and paragraph (i)(8) of this section, the specified employee effective date is the first day of the fourth month following the specified employee identification date. A service recipient may designate in accordance with the requirements of paragraph (i)(8) of this section any date following the specified employee identification date as the specified employee effective date, provided that such date may not be later than the first day of the fourth month following the specified employee identification date, and provided further that a service recipient must use the same specified employee effective date with respect to all nonqualified deferred compensation plans, and any change to the specified employee effective date may not be effective for a period of at least 12 months. The service recipient may designate a specified employee effective date through inclusion in each plan document or through a separate document applicable to all plans, provided that the service recipient will not be treated as having designated a specified employee effective date on any date before the designation is legally binding on the service recipient and all affected service providers. Any designation of a specified employee effective date made on or before December 31, 2007, may be applied to any separation from service occurring on or after January 1, 2005, unless and until subsequently changed pursuant to this paragraph (i)(4).

(5) *Alternative methods of satisfying the six-month delay rule.* A plan may provide, in accordance with the requirements of paragraph (i)(8) of this section, for an alternative method to identify service providers who will be subject to the six-month delay rule provided in section 409A(a)(2)(B)(i), provided that the alternative method is reasonably designed to include all specified employees (determined without respect to any available service recipient elections), the alternative method

is an objectively determinable standard providing no direct or indirect election to any service provider regarding its application, and the alternative method results in either all service providers or no more than 200 service providers being identified in the class as of any date. Use of such an alternative method will not be treated as a change in the time and form of payment for purposes of § 1.409A-2(b) (the subsequent deferral rules), even if the service provider is not a specified employee when the payment is delayed.

(6) *Corporate transactions*—(i) *Mergers and acquisitions of public service recipients*. If as a result of a corporate transaction, two or more separate service recipients, more than one of which has stock outstanding that is publicly traded on an established securities market or otherwise immediately before the transaction, become one service recipient, any stock of which is publicly traded on an established securities market or otherwise immediately after the transaction (resulting public service recipient), the resulting public service recipient's next specified employee identification date and specified employee effective date following the corporate transaction are the specified employee identification date and specified employee effective date that the acquiring service recipient would have been required to use absent such transaction. For this purpose, in the case of a corporate merger, the acquiring service recipient is the service recipient that included the surviving corporation in such merger, in the case of an acquisition by a corporation of the stock of another corporation, the acquiring service recipient is the service recipient that included the corporation that acquired such stock, and in all other cases, the surviving service recipient is determined on the basis of all of the facts and circumstances. For the period between the transaction and the next specified employee effective date, the list of specified employees of the resulting public service recipient is determined by combining the lists of specified employees of all service recipients participating in the transaction that were in effect at the date of the corporate transaction, ranking such specified employees in order of

the amount of compensation used to determine each specified employee's status as a specified employee, and treating the top 50 of such specified employees, plus any employees described in section 416(i)(1)(ii) or section 416(i)(1)(iii) and the regulations thereunder (relating to 1-percent and 5-percent owners) who are not included in such top 50 specified employees, as specified employees for the period between the corporate transaction and the next specified employee effective date. Alternatively, the resulting service recipient may elect in accordance with the requirements of paragraph (i)(8) of this section to use any reasonable method to determine the specified employees of the resulting service recipient, including the use of an alternative method of compliance described in paragraph (i)(5) of this section, provided that such method is adopted no later than 90 days after the corporate transaction and applied prospectively from the date the method is adopted.

(ii) *Mergers and acquisitions of non-public service recipients*. If as part of a corporate transaction a service recipient that does not have outstanding stock that is publicly traded on an established securities market or otherwise immediately before the transaction (initial private service recipient), and a service recipient with stock outstanding that is publicly traded on an established securities market or otherwise immediately before the transaction (initial public service recipient), become a single service recipient having stock that is publicly traded on an established securities market or otherwise immediately after the transaction (resulting public service recipient), the resulting public service recipient's next specified employee identification date and specified employee effective date following the corporate transaction are the specified employee identification date and specified employee effective date that the initial public service recipient would have been required to use absent such transaction. For the period after the date of the corporate transaction and before the next specified employee effective date, the specified employees of

the initial public service recipient immediately before the transaction continue to be the specified employees of the resulting public service recipient, and no service providers of the initial private service recipient are required to be treated as specified employees.

(iii) *Spinoffs*. If as part of a corporate transaction, a service recipient with stock outstanding that is publicly traded on an established securities market or otherwise immediately before the transaction (initial public service recipient), becomes two or more separate service recipients, each with stock outstanding that is publicly traded on an established securities market or otherwise immediately after the transaction (post-transaction public service recipients), the next specified employee identification date of each of the post-transaction public service recipients is the specified employee identification date that the initial public service recipient would have been required to use absent such transaction. For the period after the date of the corporate transaction and before the next specified employee effective date, the specified employees of the initial public service recipient immediately before the transaction continue to be the specified employees of the post-transaction public service recipients.

(iv) *Public offerings and other corporate transactions*. If as part of an initial public offering or corporate transaction not described in paragraph (i)(6)(ii) or (iii) of this section, a service recipient with no outstanding stock that is publicly traded on an established securities market or otherwise immediately before such offering or other transaction (initial private service recipient), becomes one or more service recipients with stock outstanding that is publicly traded on an established securities market or otherwise immediately after such offering or other transaction (post-transaction public service recipient), each post-transaction public service recipient has a specified employee identification date of December 31 and a specified employee effective date of April 1, effective retroactively to the December 31 and April 1 next preceding the offering or other transaction for purposes of

identifying the specified employees between the corporation transaction and the next December 31. Alternatively, a post-transaction public service recipient may elect in accordance with the requirements of paragraph (i)(8) of this section, a specified employee identification date and specified employee effective date on or before the date of the offering or other transaction. If a public service recipient makes such an election, for the period after the offering or other transaction and before the next specified employee effective date, the specified employees of the post-transaction public service recipient consist of the service providers that at the time of the offering or other transaction would have been classified as specified employees of the initial private service recipient, had the initial private service recipient elected the same specified employee identification date and specified employee effective date as selected by the post-transaction public service recipient, and had such initial private service recipient had stock publicly traded on an established securities market or otherwise as of the specified employee identification date preceding the transaction.

(v) *Alternative methods of compliance*. For purposes of this paragraph (i)(6), references to specified employees as of a corporate transaction or offering include any specified employees identified through the use of an alternative method described in paragraph (i)(5) of this section, where the use of such alternative method was established and effective at the time of the corporate transaction or offering.

(7) *Nonresident alien employees*. For purposes of determining whether an employee meets the requirements of section 416(i)(1)(A)(i), (ii), or (iii) (applied in accordance with the regulations thereunder and disregarding section 416(i)(5)), and therefore is a key employee, the incorporation of the rules of § 1.415(c)-2(g)(5) regarding the definition of compensation applies. Accordingly, the rule of § 1.415(c)-2(g)(5)(i), generally requiring the treatment as compensation of certain compensation excludible from an employee's gross income due to the location of the services or the identity of the employer, applies. In addition, a service

recipient may elect in accordance with paragraph (i)(8) of this section to apply the rule of § 1.415(c)-2(g)(5)(ii) to not treat as compensation certain compensation excludible from an employee's gross income on account of the location of the services or the identity of the employer that is not effectively connected with the conduct of a trade or business within the United States. A service recipient may elect to apply the rule of § 1.415-2(g)(5)(ii) regardless of whether the service recipient has elected to apply the rule to a qualified plan sponsored by the service recipient; however, once a list of specified employees has become effective, any election of the rule for that period may not be changed. Notwithstanding the foregoing, any election of the rule made before January 1, 2008, may be effective with respect to any specified employee identification date on or before December 31, 2007.

(8) *Elections affecting the identification of specified employees.* The elections described in paragraphs (i)(2) through (7) of this section are effective only as of the date that all necessary corporate action has been taken to make such elections binding for purposes of all affected nonqualified deferred compensation plans in which the service providers of the service recipient that would become a specified employee due to the application of such election participate. Where a taxpayer attempts to make an election under paragraph (i)(2), (3), (4), (5), (6), or (7) of this section but such election is not binding on all the affected nonqualified deferred compensation plans and applied consistently to all such service providers, the election is not effective and the rule under paragraph (i)(2), (3), (4), (5), (6), or (7) of this section, as applicable, that would apply absent an election is applicable for identifying specified employees.

(j) *Nonresident alien.* (1) Except as provided in paragraph (j)(2) of this section, the term *nonresident alien* means an individual who is—

(i) A nonresident alien within the meaning of section 7701(b)(1)(B); or

(ii) A dual resident taxpayer within the meaning of § 301.7701(b)-7(a)(1) of this chapter with respect to any taxable year in which such individual is

treated as a nonresident alien for purposes of computing the individual's U.S. income tax liability.

(2) The term *nonresident alien* does not include—

(i) A nonresident alien with respect to whom an election is in effect for the taxable year under section 6013(g) to be treated as a resident of the United States;

(ii) A former citizen or long-term resident (within the meaning of section 877(e)(2)) who expatriated after June 3, 2004, and has not complied with the requirements of section 7701(n); or

(iii) An individual who is treated as a citizen or resident of the United States for the taxable year under section 877(g).

(k) *Established securities market.* The term *established securities market* means an established securities market within the meaning of § 1.897-1(m).

(l) *Stock right.* The term *stock right* means a stock option (other than an incentive stock option described in section 422 or an option granted pursuant to an employee stock purchase plan described in section 423) or a stock appreciation right.

(m) *Separation pay plan.* The term *separation pay plan* means any plan that provides separation pay or, where a plan provides both amounts that are separation pay and that are not separation pay, that portion of the plan that provides separation pay. The term *separation pay* means any deferral of compensation (before the application of the exclusions from the definition of a deferral of compensation set forth in paragraph (b)(9) of this section) that will not be paid under any circumstances unless the service provider has had a separation from service, whether voluntary or involuntary, including payments in the form of reimbursements of expenses incurred, and the provision of in-kind benefits. A deferral of compensation that the service provider may receive without a separation from service does not become separation pay merely because the service provider elects to receive or receives the payment after or upon a separation from service. A deferral of compensation does not fail to be separation pay merely because the payment is conditioned upon the execution of a release

of claims, noncompetition or non-disclosure provisions, or other similar requirements. Notwithstanding the foregoing, any amount, or entitlement to any amount, that acts as a substitute for, or replacement of, amounts deferred by the service recipient under a nonqualified deferred compensation plan constitutes a payment of compensation or deferral of compensation under such nonqualified deferred compensation plan.

(n) *Involuntary separation from service*—(1) *In general.* An involuntary separation from service means a separation from service due to the independent exercise of the unilateral authority of the service recipient to terminate the service provider's services, other than due to the service provider's implicit or explicit request, where the service provider was willing and able to continue performing services. An involuntary separation from service may include the service recipient's failure to renew a contract at the time such contract expires, provided that the service provider was willing and able to execute a new contract providing terms and conditions substantially similar to those in the expiring contract and to continue providing such services. The determination of whether a separation from service is involuntary is based on all the facts and circumstances. Any characterization of the separation from service as voluntary or involuntary by the service provider and the service recipient in the documentation of the separation from service is presumed to properly characterize the nature of the separation from service. However, the presumption may be rebutted where the facts and circumstances indicate otherwise. For example, if a separation from service is designated as a voluntary separation from service or resignation, but the facts and circumstances indicate that absent such voluntary separation from service the service recipient would have terminated the service provider's services, and that the service provider had knowledge that the service provider would be so terminated, the separation from service is involuntary.

(2) *Separations from service for good reason*—(i) *In general.* Notwithstanding paragraph (n)(1) of this section, a serv-

ice provider's voluntary separation from service will be treated for purposes of this section and §§ 1.409A-2 through 1.409A-6 as an involuntary separation from service if the separation from service occurs under certain limited bona fide conditions, where the avoidance of the requirements of section 409A is not a purpose of the inclusion of these conditions in the plan or of the actions by the service recipient in connection with the satisfaction of these conditions, and a voluntary separation from service under such conditions effectively constitutes an involuntary separation from service. Generally such conditions will be prespecified under an agreement to provide compensation upon a separation from service for good reason. Such a good reason (or a similar condition) must be defined to require actions taken by the service recipient resulting in a material negative change to the service provider in the service relationship, such as the duties to be performed, the conditions under which such duties are to be performed, or the compensation to be received for performing such services. Other factors taken into account in determining whether a separation from service for good reason effectively constitutes an involuntary separation from service include the extent to which the payments upon a separation from service for good reason are in the same amount and are to be made at the same time and in the same form as payments available upon an actual involuntary separation from service, and whether the service provider is required to give the service recipient notice of the existence of the condition that would result in treatment as a separation from service for good reason and a reasonable opportunity to remedy the condition.

(ii) *Safe harbor.* For purposes of this section and §§ 1.409A-2 through 1.409A-6, if a plan provides that a voluntary separation from service will be treated as an involuntary separation from service if the separation from service occurs under certain express conditions, a separation from service satisfying the conditions set forth in the plan will be treated as an involuntary separation

from the service if the necessary conditions (or set of conditions) require the following:

(A) The separation from service must occur during a pre-determined limited period of time not to exceed two years following the initial existence of one or more of the following conditions arising without the consent of the service provider:

(1) A material diminution in the service provider's base compensation.

(2) A material diminution in the service provider's authority, duties, or responsibilities.

(3) A material diminution in the authority, duties, or responsibilities of the supervisor to whom the service provider is required to report, including a requirement that a service provider report to a corporate officer or employee instead of reporting directly to the board of directors of a corporation (or similar governing body with respect to an entity other than a corporation).

(4) A material diminution in the budget over which the service provider retains authority.

(5) A material change in the geographic location at which the service provider must perform the services.

(6) Any other action or inaction that constitutes a material breach by the service recipient of the agreement under which the service provider provides services.

(B) The amount, time, and form of payment upon the separation from service must be substantially identical to the amount, time and form of payment payable due to an actual involuntary separation from service, to the extent such a right exists.

(C) The service provider must be required to provide notice to the service recipient of the existence of the condition described in paragraph (n)(2)(ii)(A) of this section within a period not to exceed 90 days of the initial existence of the condition, upon the notice of which the service recipient must be provided a period of at least 30 days during which it may remedy the condition and not be required to pay the amount.

(3) *Special rule for certain collectively bargained plans.* Notwithstanding the foregoing, for purposes of this paragraph (n), to the extent a plan is sub-

ject to a bona fide collective bargaining agreement covering services performed for multiple employers under which an employee must separate from service with all such employers in order to receive a payment, such plan may use any reasonable definition of involuntary separation from service, provided that such definition is consistent with any definition of a separation from service adopted under paragraph (h)(6) of this section, and provided further that the definition of an involuntary separation from service provided by the collective bargaining agreement was the subject of arm's length negotiations between employee representatives and two or more employers, the agreement between employee representatives and such employers satisfies section 7701(a)(46), and the circumstances surrounding the agreement evidence good faith bargaining between adverse parties over such definition.

(o) *Earnings.* Whether a deferred amount constitutes earnings on an amount deferred, or actual or notional income attributable to an amount deferred, is determined under the principles defining income attributable to the amount taken into account under § 31.3121(v)(2)-1(d)(2) of this chapter. Accordingly, with respect to an account balance plan, earnings on an amount deferred generally include an amount credited on behalf of a service provider under the terms of the plan that reflects a rate of return that does not exceed either the rate of return on a pre-determined actual investment or, if the income does not reflect the rate of return on a predetermined actual investment, a reasonable rate of interest. With respect to nonaccount balance plans, earnings on an amount deferred generally include an increase, due solely to the passage of time, in the present value of the future payments to which the service provider has obtained a legally binding right, the present value of which constituted the amount deferred (determined as of the date such amount was deferred), but only if the amount deferred was determined using reasonable actuarial assumptions and methods. A right to earnings on an amount deferred generally is treated as a right to a deferral

§ 1.409A-2

26 CFR Ch. I (4-1-08 Edition)

of compensation for purposes of this section and §§ 1.409A-2 through 1.409A-6. However, for purposes of any provision of this section and §§ 1.409A-2 through 1.409A-6 referring to earnings on deferred compensation (or similar terms), the use of an unreasonable rate of return, or unreasonable actuarial assumptions and methods, generally will result in the treatment of some or all of such a right to deferred compensation as a right only to deferred compensation, and not a right to earnings on deferred compensation, so that the provision will not be applicable. With respect to plans that are neither account balance plans nor nonaccount balance plans, these rules apply by analogy.

(p) *In-kind benefits.* The term *in-kind benefits* refers to services provided to or on behalf of a service provider, such as financial planning services, or tangible personal or real property made available for use by or on behalf of the service provider, such as the use of an aircraft or vehicle, and does not refer to a transfer of property within the meaning of section 83 and the regulations thereunder, or a promise to transfer, or an option to purchase or receive, property in the future.

(q) *Application of definitions and rules.* The definitions and rules set forth in paragraphs (a) through (p) of this section apply for purposes of section 409A, this section, and §§ 1.409A-2 through 1.409A-6.

[T.D. 9321, 72 FR 19276, Apr. 17, 2007; 72 FR 41620, July 31, 2007]

§ 1.409A-2 Deferral elections.

(a) *Initial elections as to the time and form of payment—(1) In general.* A plan that is, or constitutes part of, a non-qualified deferred compensation plan meets the requirements of section 409A(a)(4)(B) only if under the terms of the plan, compensation for services performed during a service provider's taxable year (the service year) may be deferred at the service provider's election only if the election to defer such compensation is made and becomes irrevocable not later than the latest date permitted in this paragraph (a). An election will not be considered to be revocable merely because the service provider or service recipient may make

an election to change the time and form of payment pursuant to paragraph (b) of this section, or the service recipient may accelerate the time of payment pursuant to § 1.409A-3(j)(4) (exceptions to prohibition on accelerated payments). Whether a plan provides a service provider an opportunity to elect the time or form of payment of compensation is determined based upon all the facts and circumstances surrounding the determination of the time and form of payment of the compensation. For purposes of this section, an election to defer includes an election as to the time of the payment, an election as to the form of the payment or an election as to both the time and the form of the payment, but does not include an election as to the medium of payment (for example, an election between a payment of cash or a payment of property). Except as otherwise expressly provided in this section, an election will not be considered made until such election becomes irrevocable under the terms of the applicable plan. Accordingly, a plan may provide that an election to defer may be changed at any time before the last permissible date for making such an election. Where a plan provides the service provider a right to make an initial deferral election, and further provides that the election remains in effect until terminated or modified by the service provider, the election will be treated as made as of the date such election becomes irrevocable as to compensation for services performed during the relevant service year. For example, where a plan provides that a service provider's election to defer a set percentage will remain in effect until changed or revoked, but that as of each December 31 the election becomes irrevocable with respect to salary payable in connection with services performed in the immediately following year, the initial deferral election with respect to salary payable with respect to services performed in the immediately following year will be deemed to have been made as of the December 31 upon which the

election became irrevocable. For purposes of this paragraph (a), the reference to a service period or a performance period refers to the period of service for which the right to the compensation arises, and may include periods before the grant of a legally binding right to the compensation. For example, where a service recipient grants a bonus based upon services performed in the calendar year 2010, but retains the discretion to rescind the bonus until 2011 such that the promise of the bonus is not a legally binding right, the period of service or performance period to which the compensation relates is the calendar year 2010.

(2) *Service recipient elections.* A plan that provides for a deferral of compensation for services performed during a service provider's taxable year that does not provide the service provider with an opportunity to elect the time or form of payment of such compensation must designate the time and form of payment by no later than the later of the time the service provider first has a legally binding right to the compensation or, if later, the time the service provider would be required under this section to make such an election if the service provider were provided such an election. Such designation is treated as an initial deferral election for purposes of this section. Where a plan permits a service recipient to exercise discretion to disregard a service provider election as to the time or form of a payment, any service provider election that is subject to such discretion will be treated as revocable so long as such discretion may be exercised.

(3) *General rule.* A plan that is, or constitutes part of, a nonqualified deferred compensation plan meets the requirements of section 409A(a)(4)(B) if under the terms of the plan, compensation for services performed during a service provider's taxable year (the service year) may be deferred at the service provider's election only if the election to defer such compensation is made not later than the close of the service provider's taxable year next preceding the service year.

(4) *Initial deferral election with respect to short-term deferrals.* If a service provider has a legally binding right to a

payment of compensation in a subsequent taxable year that, absent a deferral election, would be treated as a short-term deferral within the meaning of § 1.409A-1(b)(4), an election to defer such compensation may be made in accordance with the requirements of paragraph (b) of this section, applied as if the amount were a deferral of compensation and the scheduled payment date for the amount were the date the substantial risk of forfeiture lapses. Notwithstanding the requirements of paragraph (b) of this section, such a deferral election may provide that the deferred amounts will be payable upon a change in control event (as defined in § 1.409A-3(i)(5)) without regard to the five-year additional deferral requirement in paragraph (b) of this section.

(5) *Initial deferral election with respect to certain forfeitable rights.* If a service provider has a legally binding right to a payment in a subsequent year that is subject to a condition requiring the service provider to continue to provide services for a period of at least 12 months from the date the service provider obtains the legally binding right to avoid forfeiture of the payment, an election to defer such compensation may be made on or before the 30th day after the service provider obtains the legally binding right to the compensation, provided that the election is made at least 12 months in advance of the earliest date at which the forfeiture condition could lapse. For purposes of this paragraph (a)(5), a condition will not be treated as failing to require the service provider to continue to provide services for a period of at least 12 months from the date the service provider obtains the legally binding right merely because the condition immediately lapses upon the death or disability (as defined in § 1.409A-3(i)(4)) of the service provider, or upon a change in control event (as defined in § 1.409A-3(i)(5)), provided that if death, disability, or a change in control event occurs and the condition lapses before the end of such 12-month period, a deferral election may be given effect only if the deferral election is permitted under this section without regard to this paragraph (a)(5).

(6) *Initial deferral election with respect to fiscal year compensation.* In the case

of a service recipient with a taxable year that is not the same as the taxable year of the service provider, a plan may provide that fiscal year compensation may be deferred at the service provider's election if the election to defer such compensation is made not later than the close of the service recipient's taxable year immediately preceding the first taxable year of the service recipient in which any services are performed for which such compensation is payable. For purposes of this paragraph (a)(6), the term *fiscal year compensation* means compensation relating to a period of service coextensive with one or more consecutive taxable years of the service recipient, of which no amount is paid or payable during the service recipient's taxable year or years constituting the period of service. For example, fiscal year compensation generally would include a bonus to an individual employee with a calendar year taxable year that is based on a service period consisting of the service recipient's two consecutive taxable years ending September 30, 2011, where the amount will be paid after the end of the second of such taxable years, but would not include either a bonus based on a service period consisting of one or more calendar years or salary that would otherwise be paid during such taxable years of the service recipient.

(7) *First year of eligibility*—(i) *In general.* In the case of the first year in which a service provider becomes eligible to participate in a plan, the service provider may make an initial deferral election within 30 days after the date the service provider becomes eligible to participate in such plan, with respect to compensation paid for services to be performed after the election. In the case of a plan that does not provide for service provider elections with respect to the time or form of a payment, the time and form of the payment must be specified on or before the date that is 30 days after the date the service provider first becomes eligible to participate in such plan. For compensation that is earned based upon a specified performance period (for example, an annual bonus), where a deferral election is made in the first year of eligibility but after the beginning of the performance period, the election must

apply only to the compensation paid for services performed after the election. For this purpose, an election will be deemed to apply to compensation paid for services performed after the election if the election applies to no more than an amount equal to the total amount of the compensation for the performance period multiplied by the ratio of the number of days remaining in the performance period after the election over the total number of days in the performance period.

(ii) *Eligibility to participate.* For purposes of this paragraph (a)(7), a service provider is eligible to participate in a plan at any time during which, under the plan's terms and without further amendment or action by the service recipient, the service provider is eligible to accrue an amount of deferred compensation under the plan other than earnings on amounts previously deferred, even if the service provider has elected not to accrue (or has not elected to accrue) an amount of deferred compensation. Where a service provider has been paid all amounts deferred under a plan, and on and before the date of the last payment was not eligible to continue (or to elect to continue) to participate in the plan for periods after the last payment (other than through an election of a different time and form of payment with respect to the amounts paid), the service provider may be treated as initially eligible to participate in a plan as of the first date following such payment that the service provider becomes eligible to accrue an additional amount of deferred compensation. Where a service provider has ceased being eligible to participate in a plan (other than the accrual of earnings), regardless of whether all amounts deferred under the plan have been paid, and subsequently becomes eligible to participate in the plan again, the service provider may be treated as being initially eligible to participate in the plan if the service provider had not been eligible to participate in the plan (other than the accrual of earnings) at any time during the 24-month period ending on the date the service provider again becomes eligible to participate in the plan.

(iii) *Application to excess benefit plans.* For purposes of this paragraph (a)(7), a

service provider is treated as initially eligible to participate in an excess benefit plan as of the first day of the service provider's taxable year immediately following the first year the service provider accrues a benefit under the excess benefit plan; and any election made within 30 days following such date is treated as applying to benefits accrued under such plan for services performed before the election. For purposes of this paragraph (a)(7), the term *excess benefit plan* means all non-qualified deferred compensation plans in which a service provider participates, to the extent such plans do not provide for an election between current compensation (including a short-term deferral) and deferred compensation and solely provide deferred compensation equal to the excess of the benefits the service provider would have accrued under a qualified employer plan (as defined in § 1.409A-1(a)(2)) in which the service provider also participates, in the absence of one or more of the limits incorporated into the plan to reflect one or more of the limits on contributions or benefits applicable to the qualified employer plan under the Internal Revenue Code, over the benefits the service provider actually accrues under the qualified employer plan. For purposes of this paragraph (a)(7), once a service provider has accrued a benefit or deferred compensation under a plan in any year, the service provider will not become eligible for an initial deferral election based upon an accrual or deferral under an excess benefit plan in a subsequent year, even if the benefit or deferred compensation accrued in a previous year is forfeited or eliminated.

(8) *Initial deferral election with respect to performance-based compensation.* In the case of any performance-based compensation (as defined in § 1.409A-1(e)), an initial deferral election may be made with respect to such performance-based compensation on or before the date that is six months before the end of the performance period, provided that the service provider performs services continuously from the later of the beginning of the performance period or the date the performance criteria are established through the date an election is made under this

paragraph (a)(8), and provided further that in no event may an election to defer performance-based compensation be made after such compensation has become readily ascertainable. For purposes of this paragraph (a)(8), if the performance-based compensation is a specified or calculable amount, the compensation is readily ascertainable if and when the amount is first substantially certain to be paid. If the performance-based compensation is not a specified or calculable amount because, for example, the amount may vary based upon the level of performance, the compensation, or any portion of the compensation, is readily ascertainable when the amount is first both calculable and substantially certain to be paid. For this purpose, the performance-based compensation is bifurcated between the portion that is readily ascertainable and the amount that is not readily ascertainable. Accordingly, in general any minimum amount that is both calculable and substantially certain to be paid will be treated as readily ascertainable.

(9) *Nonqualified deferred compensation plans linked to qualified employer plans or certain other arrangements.* If a non-qualified deferred compensation plan provides that the amount deferred under the plan is determined under the formula for determining benefits under a qualified employer plan (as defined in § 1.409A-1(a)(2)) or a broad-based foreign retirement plan (as defined in § 1.409A-1(a)(3)(v)) maintained by the service recipient but applied without regard to one or more limitations applicable to the qualified employer plan under the Internal Revenue Code or to the broad-based foreign retirement plan under other applicable law, or that the amount deferred under the non-qualified deferred compensation plan is determined as an amount offset by some or all of the benefits provided under the qualified employer plan or the broad-based foreign retirement plan, an increase in amounts deferred under the nonqualified deferred compensation plan that results directly from the operation of the qualified employer plan or broad-based foreign retirement plan (other than service provider actions described in paragraphs

(a)(9)(iii) and (iv) of this section) including changes in benefit limitations applicable to the qualified employer plan or the broad-based foreign retirement plan under the Internal Revenue Code or other applicable law does not constitute a deferral election under the nonqualified deferred compensation plan, provided that such operation does not otherwise result in a change in the time or form of a payment under the nonqualified deferred compensation plan, and provided further that such change in the amounts deferred under the nonqualified deferred compensation plan does not exceed that change in the amounts deferred under the qualified employer plan or the broad-based foreign retirement plan, as applicable. In addition, with respect to such a nonqualified deferred compensation plan, the following actions or failures to act will not constitute a deferral election under the nonqualified deferred compensation plan even if in accordance with the terms of the nonqualified deferred compensation plan, the actions or inactions result in an increase in the amounts deferred under the plan, provided that such actions or inactions do not otherwise affect the time or form of payment under the nonqualified deferred compensation plan and provided further that with respect to actions or inactions described in paragraphs (a)(9)(i) or (ii), the change in the amount deferred under the nonqualified deferred compensation plan does not exceed the change in the amounts deferred under the qualified employer plan or the broad-based foreign retirement plan, as applicable:

(i) A service provider's action or inaction under the qualified employer plan or broad-based foreign retirement plan with respect to whether to elect to receive a subsidized benefit or an ancillary benefit under the qualified employer plan or broad-based foreign retirement plan.

(ii) The amendment of a qualified employer plan or broad-based foreign retirement plan to add or remove a subsidized benefit or an ancillary benefit, or to freeze or limit future accruals of benefits under the qualified plan or freeze or limit future accruals of benefits or reduce existing benefits

under the broad-based foreign retirement plan.

(iii) A service provider's action or inaction under a qualified employer plan with respect to elective deferrals and other employee pre-tax contributions subject to the contribution restrictions under section 401(a)(30) or section 402(g), including an adjustment to a deferral election under such qualified employer plan, provided that for any given taxable year, the service provider's action or inaction does not result in an increase in the amounts deferred under all nonqualified deferred compensation plans in which the service provider participates (other than amounts described in paragraph (a)(9)(iv) of this section) in excess of the limit with respect to elective deferrals under section 402(g)(1)(A), (B), and (C) in effect for the taxable year in which such action or inaction occurs.

(iv) A service provider's action or inaction under a qualified employer plan with respect to elective deferrals and other employee pre-tax contributions subject to the contribution restrictions under section 401(a)(30) or section 402(g), and after-tax contributions by the service provider to a qualified employer plan that provides for such contributions, that affects the amounts that are credited under one or more nonqualified deferred compensation plans as matching amounts or other similar amounts contingent on such elective deferrals, employee pre-tax contributions, or after-tax contributions, provided that the total of such matching or contingent amounts, as applicable, never exceeds 100 percent of the matching or contingent amounts that would be provided under the qualified employer plan absent any plan-based restrictions that reflect limits on qualified plan contributions under the Internal Revenue Code.

(10) *Changes in elections under a cafeteria plan.* A change in an election under a cafeteria plan does not constitute a deferral election with respect to an amount deferred under a nonqualified deferred compensation plan to the extent that the change in the amount deferred under the nonqualified deferred compensation plan results solely from the application of the change in amount eligible to be

treated as compensation under the terms of the nonqualified deferred compensation plan resulting from the election change under the cafeteria plan, to a benefit formula under the nonqualified deferred compensation plan based upon the service provider's eligible compensation, and only to the extent that such change applies in the same manner as any other increase or decrease in compensation would apply to such benefit formula.

(11) *Initial deferral election with respect to certain separation pay.* In the case of separation pay (as defined in §1.409A-1(m)), where such separation pay is the subject of bona fide, arm's length negotiations at the time of the separation from service, an initial deferral election may be made at any time up to the time the service provider obtains a legally binding right to the payment. This paragraph (a)(11) does not apply to any separation pay to which the service provider obtained a legally binding right before the negotiations at the time of the separation from service, including a right to a payment subject to a condition such as that the service provider separate from service other than for cause. In the case of separation pay due to participation in a window program (as defined in §1.409A-1(b)(9)(vi)), an initial deferral election may be made at any time before the time the election to participate in the window program becomes irrevocable.

(12) *Initial deferral election with respect to certain commissions—(i) Sales commission compensation.* For purposes of this paragraph (a), a service provider earning sales commission compensation is treated as providing the services to which such compensation relates only in the service provider's taxable year in which the customer remits payment to the service recipient or, if applied consistently to all similarly situated service providers, the service provider's taxable year in which the sale occurs. For purposes of this paragraph (a)(12), the term *sales commission compensation* means compensation or portions of compensation earned by a service provider if a substantial portion of the services provided by such service provider to a service recipient consist of the direct sale of a product or service to an unrelated customer, the com-

pensation paid by the service recipient to the service provider consists of either a portion of the purchase price for the product or service or an amount substantially all of which is calculated by reference to the volume of sales, and payment of the compensation is either contingent upon the service recipient receiving payment from an unrelated customer for the product or services or, if applied consistently to all similarly situated service providers, is contingent upon the closing of the sales transaction and such other requirements as may be specified by the service recipient before the closing of the sales transaction. For this purpose, a customer is treated as an unrelated customer only if the customer is not related to either the service provider or the service recipient. A person is treated as related to another person if the person would be treated as related to the other person under §1.409A-1(f)(2)(ii) or the person would be treated as providing management services to the other person under §1.409A-1(f)(2)(iv).

(ii) *Investment commission compensation.* For purposes of this paragraph (a), a service provider earning investment commission compensation is treated as providing the services to which such compensation relates over the 12 months preceding the date as of which the overall value of the assets or asset accounts is determined for purposes of the calculation of the investment commission compensation. For purposes of this paragraph (a)(12), the term *investment commission compensation* means the compensation or the portion of compensation earned by a service provider if a substantial portion of the services provided by such service provider to a service recipient to which such compensation relates consists of sales of financial products or other direct customer services to an unrelated customer with respect to customer assets or customer asset accounts, the customer retains the right to terminate the customer relationship and may move or liquidate the assets or asset accounts without undue delay (which may be subject to a reasonable notice period), such compensation consists of a portion of the value of the overall assets or asset account balance,

an amount substantially all of which is calculated by reference to the increase in the value of the overall assets or account balance during a specified period, or both, and the value of the overall assets or account balance and investment commission compensation is determined at least annually. For this purpose, a customer is treated as an unrelated customer only if the customer is not related to either the service provider or the service recipient. A person is treated as related to another person if the person would be treated as related to the other person under § 1.409A-1(f)(2)(ii) or the person would be treated as providing management services to the other person under § 1.409A-1(f)(2)(iv).

(iii) *Commission compensation and related persons.* The rules of paragraphs (a)(12)(i) and (ii) of this section apply to sales commission compensation and investment commission compensation involving a related customer, provided that substantial sales from which commission compensation arises are made, or substantial services from which commission compensation arises are provided, to unrelated customers by the service recipient, the sales and service arrangement and the commission arrangement with respect to the related customer are bona fide, arise from the service recipient's ordinary course of business, and are substantially the same, both in terms and in practice, as the terms and practices applicable to unrelated customers (as defined in such paragraphs) to which individually or in the aggregate substantial sales are made or substantial services provided by the service recipient.

(13) *Initial deferral election with respect to compensation paid for final payroll period—(i) In general.* Unless a plan provides otherwise, compensation payable after the last day of the service provider's taxable year solely for services performed during the final payroll period described in section 3401(b) containing the last day of the service provider's taxable year or, with respect to a non-employee service provider, a period not longer than the payroll period described in section 3401(b), where such amount is payable pursuant to the timing arrangement under which the service recipient normally compensates

service providers for services performed during a payroll period described in section 3401(b), or with respect to a non-employee service provider, a period not longer than the payroll period described in section 3401(b), is treated as compensation for services performed in the subsequent taxable year in which the payment is made. The preceding sentence does not apply to any compensation paid during such period for services performed during any period other than such final payroll period, such as a payment of an annual bonus. Any amendment of a plan after December 31, 2007, to add a provision providing for a differing treatment of such compensation may not be effective for 12 months from the date the amendment is executed and enacted.

(ii) *Transition rule.* For purposes of this paragraph (a)(13), a plan that was adopted and effective before December 31, 2007, whether written or unwritten, will be treated as designating such compensation for services performed in the taxable year in which the payroll period ends, unless otherwise set forth in writing before December 31, 2007.

(14) *Elections to annualize recurring part-year compensation.* In the case of a service provider receiving recurring part-year compensation, an election to defer all or a portion of the recurring part-year compensation to be earned during a particular service period is considered to meet the requirements of this paragraph (a) if the election is made before the services for which the recurring part-year compensation is paid begin, and the election does not defer payment of any of the recurring part-year compensation to a date beyond the last day of the 13th month following the first date of the service period. For purposes of this paragraph (a)(14), the term *recurring part-year compensation* means compensation paid for services rendered in a position that the service recipient and service provider reasonably anticipate will continue on similar terms and conditions in subsequent years, and will require services to be provided during successive service periods each of which comprises less than 12 months (for example, a teacher providing services during a school year comprised of 10 consecutive

months), and each of which periods begins in one taxable year of the service provider and ends in the next such taxable year. The rules of this paragraph (a)(14) apply to a particular amount of compensation only once, so that an amount deferred under this rule may not again be treated as recurring part-year compensation for purposes of this paragraph and subject to a second deferral election under this paragraph (a)(14).

(15) *USERRA rights.* The requirements of this paragraph (a) are deemed satisfied to the extent an initial deferral election is provided to satisfy the requirements of the Uniformed Service Employment and Reemployment Rights Act of 1994, as amended, 38 U.S.C. 4301-4334.

(b) *Subsequent changes in time and form of payment—(1) In general.* A plan that permits under a subsequent election a delay in a payment or a change in the form of payment (a subsequent deferral election), including a subsequent deferral election made by a service provider or a service recipient, satisfies the requirements of section 409A(a)(4)(C) only if the conditions of this paragraph (b) are met. For purposes of this paragraph (b), except as otherwise expressly provided in this section, a subsequent deferral election is not considered made until such election becomes irrevocable under the terms of the plan. Accordingly, a plan may provide that a subsequent deferral election may be changed at any time before the last permissible date for making such a subsequent deferral election. Where a plan permits a subsequent deferral election, the requirements of this paragraph are satisfied only if the following conditions are met:

(i) The plan requires that such election not take effect until at least 12 months after the date on which the election is made.

(ii) In the case of an election related to a payment not described in § 1.409A-3(a)(2) (payment on account of disability), § 1.409A-3(a)(3) (payment on account of death), or § 1.409A-3(a)(6) (payment on account of the occurrence of an unforeseeable emergency), the plan requires that the payment with respect to which such election is made be de-

ferred for a period of not less than five years from the date such payment would otherwise have been paid (or in the case of a life annuity or installment payments treated as a single payment, five years from the date the first amount was scheduled to be paid).

(iii) The plan requires that any election related to a payment described in § 1.409A-3(a)(4) (payment at a specified time or pursuant to a fixed schedule) be made not less than 12 months before the date the payment is scheduled to be paid (or in the case of a life annuity or installment payments treated as a single payment, 12 months before the date the first amount was scheduled to be paid).

(2) *Definition of payments for purposes of subsequent changes in the time or form of payment—(i) In general.* Except as provided in paragraphs (b)(2)(ii) and (iii) of this section, the term *payment* refers to each separately identified amount to which a service provider is entitled to payment under a plan on a determinable date, and includes amounts applied for the benefit of the service provider. An amount is separately identified only if the amount may be objectively determined under a nondiscretionary formula. For example, an amount identified as 10 percent of the account balance as of a specified payment date would be a separately identified amount. A payment includes the provision of any taxable benefit, including payment in cash or in kind. In addition, a payment includes, but is not limited to, the transfer, cancellation, or reduction of an amount of deferred compensation in exchange for benefits under a welfare benefit plan, a fringe benefit excludible under section 119 or section 132, or any other benefit that is excludible from gross income. For additional rules relating to the application of this paragraph (b) to amounts payable at a fixed time or pursuant to a fixed schedule, see § 1.409A-3(i)(1).

(ii) *Life annuities—(A) In general.* The entitlement to a life annuity is treated as the entitlement to a single payment. Accordingly, an election to delay payment of a life annuity, or to change the form of payment of a life annuity, must be made at least 12 months before the scheduled commencement of the

§ 1.409A-2

26 CFR Ch. I (4-1-08 Edition)

life annuity, and must defer the payment for a period of not less than five years from the originally scheduled commencement of the life annuity. For purposes of § 1.409A-1, this section, and §§ 1.409A-3 through 1.409A-6, the term *life annuity* means a series of substantially equal periodic payments, payable not less frequently than annually, for the life (or life expectancy) of the service provider, or a series of substantially equal periodic payments, payable not less frequently than annually, for the life (or life expectancy) of the service provider, followed upon the death or end of the life expectancy of the service provider by a series of substantially equal periodic payments, payable not less frequently than annually, for the life (or life expectancy) of the service provider's designated beneficiary (if any). Notwithstanding the foregoing, a schedule of payments does not fail to be an annuity solely because such plan provides for an immediate payment of the actuarial present value of all remaining annuity payments if the actuarial present value of the remaining annuity payments falls below a predetermined amount, and the immediate payment of such amount does not constitute an accelerated payment for purposes of § 1.409A-3(j), provided that such feature, including the predetermined amount, is established by no later than the time and form of payment is otherwise required to be established, and provided further that any change in such feature, including the predetermined amount, is a change in the time and form of payment. A change in designated beneficiary before any annuity payment has been made under the plan is not a change in the time or form of payment. A change in the form of a payment before any annuity payment has been made under the plan, from one type of life annuity to another type of life annuity with the same scheduled date for the first annuity payment, is not considered a change in the time and form of a payment, provided that the annuities are actuarially equivalent applying reasonable actuarial methods and assumptions. For purposes of this paragraph (b)(2)(ii), a requirement that a service provider obtain the consent of a spouse or other potential recipient of a sur-

vivor annuity to change a beneficiary or form of payment is disregarded, so that any annuity form that the service recipient could elect to receive with such consent is considered currently available.

(B) *Certain features disregarded.* Notwithstanding the foregoing provisions of this paragraph (b)(2)(ii), the following features are disregarded for purposes of determining whether a payment form is a life annuity within the meaning of this paragraph (b)(2)(ii), but are not disregarded for purposes of determining whether a life annuity is the actuarial equivalent of another life annuity except as otherwise provided in this paragraph (b)(2)(ii):

(1) Term certain features under which annuity payments continue for the longer of the life of the annuitant or a fixed period of time.

(2) Pop-up features under which payments increase upon the death of the beneficiary or another event that eliminates the right to a survivor annuity.

(3) Cash refund features under which payment is provided upon the death of the last annuitant in an amount that is not greater than the excess of the present value of the annuity at the annuity starting date over the total of payments before the death of the last annuitant.

(4) Features under which an annuity form of payment provides higher periodic payments before the expected commencement of benefits under the Social Security Act (42 U.S.C. ch. 7) or the Railroad Retirement Act (45 U.S.C. 231 *et seq.*) and lower periodic payments after such expected commencement date, so that the combined periodic payments under the arrangement and the Social Security Act or the Railroad Retirement Act, as applicable, are approximately level before and after such expected commencement date (Social Security or Railroad Retirement leveling features).

(5) Features providing for an increase in the annuity payment in a manner described in § 1.401(a)(9)-6, Q&A-14(a)(1) or (2) (eligible cost-of-living adjustments).

(C) *Subsidized joint and survivor annuities.* For purposes of this paragraph (b)(2)(ii), a joint and survivor annuity

will not fail to be treated as actuarially equivalent to a single life annuity due solely to the value of a subsidized survivor annuity benefit, provided that the annual lifetime annuity benefit available to the service provider under the joint and survivor annuity is not greater than the annual lifetime annuity benefit available to the service provider under the single life annuity alternative, and provided that the annual survivor annuity benefit is not greater than the annual lifetime annuity benefit available to the service provider under the joint and survivor annuity.

(D) *Actuarial assumptions and methods.* For purposes of this paragraph (b)(2)(ii), at any given time the same actuarial assumptions and methods must be used in valuing each annuity payment option, in determining whether the payments are actuarially equivalent and such assumptions must be reasonable. This requirement applies over the entire term of the service provider's participation in the plan, such that the annuity payment must be actuarially equivalent at all times for the annuity payment options to be treated as one time and form of payment. There is no requirement that the same actuarial methods and assumptions be used over the term of a service provider's participation in a plan. Accordingly, a plan may change the actuarial assumptions and methods used to determine the life annuity payments provided that all of the actuarial assumptions and methods are reasonable.

(iii) *Installment payments.* The entitlement to a series of installment payments that is not a life annuity is treated as the entitlement to a single payment, unless the plan provides at all times with respect to the amount deferred that the right to the series of installment payments is to be treated as a right to a series of separate payments. For purposes of § 1.409A-1, this section, and §§ 1.409A-3 through 1.409A-6, a series of installment payments refers to an entitlement to the payment of a series of substantially equal periodic amounts to be paid over a predetermined period of years, except to the extent any increase (or decrease) in the amount reflects reasonable earnings (or losses) through the date the amount is paid. For this purpose, a se-

ries of installment payments over a predetermined period and a series of installment payments over a shorter or longer period, or a series of installment payments over the same predetermined period but with a different commencement date, are different times and forms of payment. Accordingly, a change in the predetermined period or the commencement date is a change in the time and form of payment. Notwithstanding the foregoing, a schedule of payments does not fail to be an installment payment solely because such plan provides for an immediate payment of all remaining installments if the present value of the deferred amount to be paid in the remaining installment payments falls below a predetermined amount, and the immediate payment of such amount does not constitute an accelerated payment for purposes of § 1.409A-3(j), provided that such feature including the predetermined amount is established by no later than the time and form of payment is otherwise required to be established, and provided further that any change in such feature including the predetermined amount is a change in the time and form of payment.

(iv) *Transition rule.* For purposes of this section, a plan that was adopted and effective before December 31, 2007, whether written or unwritten, that fails to make a designation as to whether the entitlement to a series of payments is to be treated as an entitlement to a series of separate payments under paragraph (b)(2)(iii) of this section, may make such designation on or before December 31, 2007, provided such designation is set forth in writing on or before December 31, 2007.

(3) *Beneficiaries.* The rules of this paragraph (b) governing changes in the time and form of payment apply to elections by beneficiaries with respect to the time and form of payment, as well as elections by service providers or service recipients with respect to the time and form of payment to beneficiaries. An election to change the identity of a beneficiary does not constitute a change in the time and form of payment merely because the election changes the identity of the recipient of the payment, if the time and form of the payment is not otherwise

changed. In addition, an election to change the identity of a beneficiary before the initial payment of a life annuity does not constitute a change in the time and form of payment if the change in the time of payments stems solely from the different life expectancy of the new beneficiary, such as in the case of a joint and survivor annuity.

(4) *Domestic relations orders.* The rules of this paragraph (b) governing changes in the time and form of payment do not apply to elections by individuals other than a service provider, with respect to payments to a person other than the service provider, to the extent such elections are reflected in, or made in accordance with, the terms of a domestic relations order (as defined in section 414(p)(1)(B)).

(5) *Coordination with prohibition against acceleration of payments.* For purposes of applying the prohibition against the acceleration of payments in § 1.409A-3(j), the definition of payment is the same as the definition in paragraph (b)(2) of this section. Accordingly, a change in the form of a payment that results in a more rapid schedule for payments generally will not constitute an acceleration of a payment, if the change in the form of payment is made in compliance with the subsequent deferral rules. For example, a change in form from a 10-year installment payment treated as a single payment to a lump-sum payment would not constitute an acceleration if the change in the form of the payment is made in compliance with the requirements of paragraph (b)(1) of this section, generally meaning that the election to change to a lump-sum payment must be made at least 12 months before the installment payments were scheduled to commence and the lump-sum payment could not be made until at least five years after the date the installment payments were scheduled to commence. See § 1.409A-3(j)(4)(i) with respect to situations in which the failure to accelerate a payment or the modification of a plan term relating to certain accelerated payments will not be subject to the rules of this paragraph (b).

(6) *Application to multiple payment events.* In the case of a plan that per-

mits a payment upon each of a number of potential permissible payment events, such as the earlier of a fixed date or separation from service, the requirements of paragraph (b)(1) of this section are applied separately to each payment (as defined in paragraph (b)(2) of this section) due upon each payment event. Notwithstanding the foregoing, the addition or deletion of a permissible payment event to a plan under which amounts were previously deferred is subject to the rules of this paragraph (b) where the addition or deletion of the permissible payment event may result in a change in the time or form of payment of the amount deferred. For application of the rules governing accelerations of payments to the addition of a permissible payment event to amounts deferred, see § 1.409A-3(j).

(7) *Delay of payments under certain circumstances.* A payment may be delayed to a date after the designated payment date under any of the circumstances described in this paragraph (b)(7), and the provision will not fail to meet the requirements of establishing a permissible payment event and the delay in the payment will not constitute a subsequent deferral election, so long as the service recipient treats all payments to similarly situated service providers on a reasonably consistent basis.

(i) *Payments subject to section 162(m).* A payment may be delayed to the extent that the service recipient reasonably anticipates that if the payment were made as scheduled, the service recipient's deduction with respect to such payment would not be permitted due to the application of section 162(m), provided that the payment is made either during the service provider's first taxable year in which the service recipient reasonably anticipates, or should reasonably anticipate, that if the payment is made during such year, the deduction of such payment will not be barred by application of section 162(m) or during the period beginning with the date of the service provider's separation from service and ending on the later of the last day of the taxable year of the service recipient in which the service provider separates from service or the 15th day of

the third month following the service provider's separation from service, and provided further that where any scheduled payment to a specific service provider in a service recipient's taxable year is delayed in accordance with this paragraph, the delay in payment will be treated as a subsequent deferral election unless all scheduled payments to that service provider that could be delayed in accordance with this paragraph are also delayed. Where the payment is delayed to a date on or after the service provider's separation from service, the payment will be considered a payment upon a separation from service for purposes of the rules under § 1.409A-3(i)(2) (payments to specified employees upon a separation from service) and, in the case of a specified employee, the date that is six months after a service provider's separation from service is substituted for any reference to a service provider's separation from service in the first sentence of this paragraph. No election may be provided to the service provider with respect to the timing of the payment under this paragraph (b)(7)(i).

(ii) *Payments that would violate Federal securities laws or other applicable law.* A payment may be delayed where the service recipient reasonably anticipates that the making of the payment will violate Federal securities laws or other applicable law; provided that the payment is made at the earliest date at which the service recipient reasonably anticipates that the making of the payment will not cause such violation. The making of a payment that would cause inclusion in gross income or the application of any penalty provision or other provision of the Internal Revenue Code is not treated as a violation of applicable law.

(iii) *Other events and conditions.* A service recipient may delay a payment upon such other events and conditions as the Commissioner may prescribe in generally applicable guidance published in the Internal Revenue Bulletin (see § 601.601(d)(2) of this chapter). For additional rules applicable to certain delayed payments pursuant to a change in control event, see § 1.409A-3(i)(5)(iv). For additional rules applicable to amounts payable because of an unforeseeable emergency, see § 1.409A-3(i)(3).

(8) *USERRA rights.* The requirements of this paragraph (b) are deemed met to the extent an election to change the time or form of a payment of deferred compensation is provided to satisfy the requirements of the Uniformed Services Employment and Reemployment Rights Act of 1994, as amended, 38 U.S.C. 4301-4344.

(9) *Examples.* The following examples illustrate the application of the provisions of this section. For purposes of these examples, each employee is an individual with a calendar year taxable year, and is employed by the specified employer:

Example 1. Initial election to defer salary. Employer ZZ sponsors a plan under which Employee A may elect to defer a percentage of Employee A's salary. Employee A has participated in the plan in prior years. To satisfy the requirements of this section with respect to salary earned in calendar year 2008, if Employee A elects to defer any amount of such salary, the deferral election (including an election as to the time and form of payment) must be made no later than December 31, 2007.

Example 2. Designation of time and form of payment where an initial deferral election is not provided. Employer YY has a taxable year ending September 30. On July 1, 2008, Employer YY enters into a legally binding obligation to pay Employee B a \$10,000 bonus. The amount is not subject to a substantial risk of forfeiture and does not qualify as performance-based compensation as described in § 1.409A-1(e). Employer YY does not provide Employee B an election as to the time and form of payment. Unless the amount is to be paid in accordance with the short-term deferral rule of § 1.409A-1(b)(4), Employer YY must specify the time and form of payment on or before July 1, 2008, to satisfy the requirements of this section.

Example 3. Initial election to defer bonus payable based on services during calendar year. Employer XX has a taxable year ending September 30. Employee C participates in a bonus plan under which Employee C is entitled to a bonus for services performed during the calendar year that, absent an election by Employee C, will be paid on March 15 of the following year. The amount is not subject to a substantial risk of forfeiture and does not qualify as performance-based compensation as described in § 1.409A-1(e). If Employee C elects to defer the payment of the bonus with respect to services rendered during calendar year 2008, Employee C must elect the time and form of payment not later than December 31, 2007, to satisfy the requirements of this section.

Example 4. Initial election to defer bonus payable based on services during fiscal year other than calendar year. Employer WW has a taxable year ending September 30. Employee D participates in a bonus plan under which Employee D is entitled to a bonus for services performed during Employer WW's fiscal year that, absent an election by Employee D, will be paid on December 15 of the calendar year in which the fiscal year ends. The amount is not subject to a substantial risk of forfeiture and does not qualify as performance-based compensation as described in § 1.409A-1(e). The amount qualifies as fiscal year compensation. If Employee D elects to defer the payment of the amount related to the fiscal year ending September 30, 2009, to satisfy the requirements of this section Employee D must elect the time and form of payment not later than September 30, 2008.

Example 5. Initial election to defer bonus payable only if service provider completes at least 12 months of services after the election. Employer VV has a calendar year taxable year. On March 1, 2008, Employer VV grants Employee E a \$10,000 bonus, payable on March 1, 2010 (with reasonable interest), provided that Employee E continues performing services as an employee of Employer VV through March 1, 2010. The amount does not qualify as performance-based compensation as described in § 1.409A-1(e), and Employee E already participates in another account balance non-qualified deferred compensation plan. Employee E may make an initial deferral election on or before March 31, 2008 (within 30 days after obtaining a legally binding right), because at least 12 months of additional services are required after the date of election for the risk of forfeiture to lapse.

Example 6. Initial election to defer bonus that would otherwise constitute a short-term deferral. The same facts as Example 5, except that Employee E does not make an initial deferral election on or before March 31, 2008. Because the right to the compensation would not be treated as a deferral of compensation pursuant to § 1.409A-1(b)(4) absent a deferral election (because the arrangement would be treated as a short-term deferral), Employee E may make an initial deferral election provided that the election may not become effective for 12 months and must defer the payment at least 5 years from March 1, 2010 (the first date the payment could become substantially vested). Accordingly, Employee E may make an election before March 1, 2009, provided that the election defers the payment to a date on or after March 1, 2015 (other than a payment due to death, disability, unforeseeable emergency, or a change in control event).

Example 7. Initial election to defer sales commissions. Employer UU has a calendar year taxable year. As part of Employee F's services for Employer UU, Employee F sells refrigerators to customers unrelated to Em-

ployee F or Employer UU. Under the employment arrangement, Employee F is entitled to 10% of the sales price of any refrigerator Employee F sells, payable only upon the receipt of payment from the customer who purchased the refrigerator. For purposes of the initial deferral rule, Employee F is treated as performing the services related to each refrigerator sale in the calendar year in which each customer pays for the refrigerator.

Example 8. Initial election to defer renewal sales commissions. The same facts as Example 7, except that Employee F also sells warranties related to the refrigerators sold. Under the warranty arrangement, refrigerator warranty customers are entitled in a future year to extend the warranty for an additional cost to be paid at the time of the extension. Under Employee F's arrangement with Employer UU, Employee F is entitled to 10% of the amount paid for an extension of any warranty, payable upon the receipt of payment from the customer extending the warranty. For purposes of the initial deferral election rule, Employee F is treated as performing the services related to the amount paid for the extension of the warranty in the taxable year in which the customer pays for the warranty extension.

Example 9. Initial election to defer investment commissions. Employer TT is in the trade or business of managing financial assets for customer accounts. Customers who deposit funds in an account with Employer TT are entitled to remove the account balance of such account upon 60 days notice to Employer TT. Employee G sells financial products and provides continuing customer service to certain unrelated customers involving the deposit and maintenance of funds in customer accounts managed by Employer TT. Under the employment arrangement, Employee G is entitled to a set percentage of the aggregate value of the assets held in the accounts of customers to whom Employee G sold financial products and provides customer service. Under the arrangement, the aggregate value of the assets held in the accounts is determined as of June 30 of each year, and unless Employee G elects to defer the payment, the amount is payable to Employee G in a lump sum on December 31 of the year in which the valuation is made. Employee G has no control over the valuation of the assets held in the accounts, or the calculation of the amount due Employee G. For purposes of the initial deferral rule, Employee G is treated as providing the services to which a payment relates during the July 1 through June 30 period ending on the June 30 date as of which the assets held in the account are valued.

Example 10. Initial election to defer part-year compensation. Employee H provides services as a teacher to Employer SS, a school system. The period of services routinely begins

on the second Monday of August of one year and ends on the first Friday of June of the subsequent year. Employer SS provides an election to Employee H to receive the compensation for the period of services ratably over the period beginning on the second Monday of August of one year and ending on the last day of August of the subsequent year. Because the compensation constitutes recurring part-year compensation, as defined in paragraph (a)(14) of this section, and because the schedule will provide that all of the recurring part-year compensation is paid no later than September 30 of the subsequent year, Employee H will be deemed to have made a timely deferral election with respect to such recurring part-year compensation if Employee H elects before the first day of the service period to have the recurring part-year compensation paid under such schedule.

Example 11. Initial election to defer negotiated separation pay. Employer RR decides to terminate Employee J's employment involuntarily. As part of the process of terminating Employee J, Employer RR enters into bona fide, arm's length negotiations with respect to the terms of Employee J's termination of employment. As part of the process, Employer RR offers Employee J an amount that is in addition to any amounts to which Employee J is otherwise entitled, payable either as a lump sum payment at the end of 3 years or in 3 annual payments starting at the date of termination of employment. The election of the time and form of payment by Employee J may be made at any time before Employee J accepts the offer and obtains a legally binding right to the additional amount. The election may not apply to any amount to which Employee J already had a legally binding right.

Example 12. Election of time and form of payments under a window program. Employer QQ establishes a window program, as defined in § 1.409A-1(b)(9)(vi). Individuals who elect to terminate employment under the window program are entitled to receive an amount equal to 2 weeks pay multiplied by every year of service with Employer QQ. The individuals participating in the window program may elect to receive the payment as either a lump sum payment payable on the first day of the month after making the election to participate in the window program, or as a payment of 3 equal annual installments on each January 1 of the first 3 years following the election to participate in the window program. Employee K is eligible to participate in the window program. Employee K will be treated as making a timely deferral election if the election as to the time and form of payment is made on or before the date Employee K's election to participate in the window program becomes irrevocable.

Example 13. Initial election to defer salary earned during final payroll period beginning in one calendar year and ending in the subsequent

calendar year. Employer PP pays the salary of its employees, including Employee L, on a bi-weekly basis. One bi-weekly payroll period runs from December 24, 2008, through January 6, 2009, with a scheduled payment date of January 13, 2009. Employer PP sponsors, and Employee L participates in, a non-qualified deferred compensation plan under which Employee L may defer a specified percentage of his annual salary. The plan does not specify that any salary compensation paid for the payroll period in which falls January 1 is to be treated as compensation for services performed during the year preceding the year in which falls that January 1. For purposes of applying the initial deferral election rules, Employee L is deemed to have performed the services for the payroll period December 24, 2008, through January 6, 2009, during the calendar year 2009.

Example 14. Application of deferral election rules and anti-acceleration rules to a non-qualified deferred compensation plan linked to a qualified plan. Employee M participates in a qualified retirement plan that is a defined benefit plan that offers a subsidized early retirement benefit to employees who have attained age 55 and completed 30 years of service. Employee M, who has attained age 55 and completed 30 years of service, also participates in a nonqualified deferred compensation plan, under which the benefit payable is calculated under a formula, with that benefit then reduced by any benefit that Employee M has accrued under the qualified retirement plan. In 2008, Employee M fails to elect the subsidized early retirement benefit under the qualified retirement plan, with the effect that the amounts payable under the nonqualified deferred compensation plan are increased by an amount equal to the reduction in the benefit payable under the qualified plan. In 2009, Employer NN amends the qualified retirement plan to increase benefits under the plan, resulting in a decrease in the amounts payable under the nonqualified deferred compensation plan equal to the increase in the benefit payable under the qualified plan. Neither of these actions constitutes a deferral election or an acceleration of a payment under the nonqualified deferred compensation plan.

Example 15. Subsequent deferral election. Employee N participates in a nonqualified deferred compensation plan. Employee N elects to be paid in a lump sum payment at the earlier of age 65 or separation from service. Employee N anticipates that he will work after age 65, and wishes to defer payment to a later date. Provided that Employee N continues in employment and makes the election by his 64th birthday, Employee N may elect to receive a lump sum payment at the earlier of age 70 or separation from service.

Example 16. Subsequent deferral election rule—change in form of payment from lump sum

payment to life annuity. Employee P participates in a nonqualified deferred compensation plan. Employee P elects to be paid in a lump sum payment at age 65. Employee P wishes to change the payment form to a life annuity. Provided that Employee P makes the election on or before his 64th birthday, Employee P may elect to receive a life annuity commencing at age 70.

Example 17. Subsequent deferral election rule—change in form of payment from life annuity to lump sum payment. Employee Q participates in a nonqualified deferred compensation plan. Employee Q elects to be paid in a life annuity at age 65. Employee Q wishes to change the payment form to a lump sum payment. Provided that Employee Q makes the election on or before his 64th birthday, Employee Q may elect to receive a lump sum payment at age 70.

Example 18. Subsequent deferral election rule—installment payments designated as separate payments. Employee R, whose taxable year is the calendar year, participates in a nonqualified deferred compensation plan that provides for payment in a series of 5 equal annual amounts, each designated as a separate payment. The first payment is scheduled to be made on January 1, 2010. Provided that Employee R makes the election on or before January 1, 2009, Employee R may elect for the first payment scheduled to be made on January 1, 2010, to be made on January 1, 2015. If Employee R makes that election, but does not elect to defer the remaining payments, the remaining payments continue to be due upon January 1 of the 4 consecutive calendar years commencing on January 1, 2011.

Example 19. Subsequent deferral election rule—change in form of payment from installment payments not designated as separate payments to lump sum payment. Employee S participates in a nonqualified deferred compensation plan that provides for payment in a series of 5 equal annual amounts that are not designated as a series of 5 separate payments. The first amount is scheduled to be paid on January 1, 2010. Employee S wishes to receive the entire amount equal to the sum of all 5 of the amounts to be paid as a lump sum payment. Provided that Employee S makes the election on or before January 1, 2009, Employee S may elect to receive a lump sum payment on or after January 1, 2015.

Example 20. Subsequent deferral election rule—change in form of payment from installment payments designated as separate payments to lump sum payment. Employee T participates in a nonqualified deferred compensation plan that provides for payment in a series of 5 equal annual amounts each of which is designated as a separate payment. The first amount is scheduled to be paid on January 1, 2010. Employee T wishes to receive the entire amount equal to the sum of all 5 of the amounts in a single lump sum payment.

Provided that Employee T makes the election on or before January 1, 2009, Employee T may elect to receive a lump sum payment on or after January 1, 2019.

Example 21. Subsequent deferral election rule—change in form of payment from one life annuity form to another life annuity form. Employee U participates in a nonqualified deferred compensation plan that permits Employee U to elect before Employee U's separation from service whether to be paid in the form of a single life annuity beginning on the first day of the month following Employee U's separation from service, or an annuity beginning on the first day of the month following Employee U's separation from service under which annuity payments continue for Employee U's lifetime but not less than 10 years. The two types of annuities are actuarially equivalent at all times applying reasonable actuarial methods and assumptions. For purposes of this section, the two types of annuities are treated as a single form of payment. Accordingly, the election provided under the plan is not treated as providing a subsequent deferral election or accelerated payment, and an election by Employee U under the plan between the two annuity options made before the first scheduled payment date for an annuity payment is not treated as a subsequent deferral election or an acceleration of a payment.

Example 22. Subsequent deferral election rule—change in time of payment from payment at specified age to payment at later of specified age or separation from service. Employee V participates in a nonqualified deferred compensation plan that provides for a lump sum payment at age 65. Employee V wishes to modify the plan so that the deferred amount will be payable upon the later of Employee V's attainment of a specified age or separation from service. Provided that Employee V makes such election on or before his 64th birthday, Employee V may modify the plan so Employee V will receive a lump sum payment upon the later of age 70 or separation from service.

Example 23. Subsequent deferral election rule—change in time of payment from payment at separation from service to payment at later of separation from service or specified age. Employee W participates in a nonqualified deferred compensation plan that provides for a lump sum payment at separation from service. Employee W wishes to make the payment payable upon the later of separation from service or a predetermined age. Provided that Employee W makes such election on or before the date 1 year before a separation from service, Employee W may elect to receive a lump sum payment upon the later of the date 5 years following a separation from service or at a specified age.

Example 24. Subsequent deferral election rule—change in time of payment from payment at separation from service to payment at a

change in control event. Employee X participates in a nonqualified deferred compensation plan that provides for a lump sum payment at separation from service. Employee X wishes to change the payment provision such that the payment is payable upon a change in control event. A change in the distribution provision to provide for a payment only upon a change in control event will violate the rules governing payment provisions, because the change could result in an acceleration if the change in control event occurs before Employee X separates from service, or a subsequent deferral if the change in control does not occur until after Employee X separates from service. However, provided that Employee X makes such election on or before the date 1 year before a separation from service, Employee X may elect to receive a payment upon the later of a change in control event or 5 years following a separation from service.

(c) *Special rules for certain resident aliens.* For the first taxable year of an individual in which such individual is a resident alien, a nonqualified deferred compensation plan is deemed to meet the requirements of paragraph (a) of this section if, with respect to compensation payable for services performed during that first taxable year or with respect to compensation the right to which is subject to a substantial risk of forfeiture as of the first day of that first taxable year, an initial deferral election is made by the end of such first taxable year, provided that the initial deferral election may not apply to amounts that have already been paid or made available to the service provider before the election is made. For any year after the first taxable year in which an individual is classified as a resident alien, this paragraph (c) does not apply, provided that a taxable year may again be treated as the first taxable year in which an individual is classified as a resident alien if such individual is classified as a resident alien in that taxable year and has not been classified as a resident alien for the three consecutive taxable years immediately preceding that taxable year.

[T.D. 9321, 72 FR 19276, Apr. 17, 2007; 72 FR 41621, July 31, 2007]

§ 1.409A-3 Permissible payments.

(a) *In general.* The requirements of section 409A(a)(2)(A) are met only if the plan provides that an amount of de-

ferred compensation under the plan may be paid only upon an event or at a time set forth in this paragraph (a):

(1) The service provider's separation from service (as defined in § 1.409A-1(h) and in accordance with paragraph (i)(2) of this section).

(2) The service provider becoming disabled (in accordance with paragraph (i)(4) of this section).

(3) The service provider's death.

(4) A time or a fixed schedule specified under the plan (in accordance with paragraph (i)(1) of this section).

(5) A change in the ownership or effective control of the corporation, or in the ownership of a substantial portion of the assets of the corporation (in accordance with paragraph (i)(5) of this section).

(6) The occurrence of an unforeseeable emergency (in accordance with paragraph (i)(3) of this section).

(b) *Designation of payment upon a permissible payment event.* Except as otherwise specified in this section, a plan provides for the payment upon an event described in paragraph (a)(1), (2), (3), (5), or (6) of this section if the plan provides the date of the event is the payment date, or specifies another payment date that is objectively determinable and nondiscretionary at the time the event occurs. A plan may also provide that a payment upon an event described in paragraph (a)(1), (2), (3), (5), or (6) of this section is to be made in accordance with a schedule that is objectively determinable and nondiscretionary based on the date the event occurs and that would qualify as a fixed schedule under paragraph (i)(1) of this section if the payment event were instead a fixed date, provided that the schedule must be fixed at the time the permissible payment event is designated. In addition, a plan may provide that a payment, including a payment that is part of a schedule, is to be made during a designated taxable year of the service provider that is objectively determinable and nondiscretionary at the time the payment event occurs such as, for example, a schedule of three substantially equal payments payable during the first three taxable years following the taxable year in which a separation from service occurs. A plan may also provide

that a payment, including a payment that is part of a schedule, is to be made during a designated period objectively determinable and nondiscretionary at the time the payment event occurs, but only if the designated period both begins and ends within one taxable year of the service provider or the designated period is not more than 90 days and the service provider does not have a right to designate the taxable year of the payment (other than an election that complies with the subsequent deferral election rules of § 1.409A-2(b)). Where a plan provides for a period of more than one day following a payment event during which a payment may be made, such as within 90 days following the date of the event, the payment date for purposes of the subsequent deferral rules under § 1.409A-2(b) is treated as the first possible date upon which a payment could be made under the terms of the plan. A plan may provide for payment upon the earliest or latest of more than one event or time, provided that each event or time is described in paragraphs (a)(1) through (6) of this section. For examples illustrating the provisions of this paragraph, see paragraph (i)(1)(vi) of this section.

(c) *Designation of alternative specified dates or payment schedules based upon date of permissible event.* Except as otherwise provided in this paragraph (c), for an amount of deferred compensation under a plan, the plan may designate only one time and form of payment upon the occurrence of each event described in paragraph (a)(1), (2), (3), (5), or (6) of this section. For example, a plan does not satisfy the requirements of this paragraph (c) if it provides for one payment date or schedule of payments if a specified event occurs on a Monday, but another payment date or schedule of payments if the event occurs on any other day of the week. However, a plan that provides for a payment upon an event described in paragraph (a)(2), (3), (5), or (6) of this section may allow for an alternative payment schedule if the event occurs on or before one (but not more than one) specified date, provided that the addition or deletion of such a different time and form of payment applicable to an existing deferral is subject to

§ 1.409A-2(b) (subsequent deferral elections) and paragraph (j) of this section (accelerated payments). For example, a plan may provide that a service provider will receive a lump sum payment of the service provider's entire benefit under the plan on the first day of the month following a change in control event that occurs before the service provider attains age 55, but will receive 5 substantially equal annual payments commencing on the first day of the month following a change in control event that occurs on or after the service provider attains age 55. In the case of a plan that provides that a payment upon an event described in paragraph (a)(1) of this section (a payment upon a separation from service), a different time and form of payment may be designated with respect to a separation from service under each of the following conditions, provided that the addition or deletion of such a different time and form of payment applicable to an existing deferral is subject to § 1.409A-2(b) and paragraph (j) of this section:

(1) A separation from service during a limited period of time not to exceed two years following a change in control event (as defined in paragraph (i)(5) of this section).

(2) A separation from service before or after a specified date (for example, the attainment of a specified age), or a separation from service before or after a combination of a specified date, such as attaining a specified age, and a specified period of service determined under a predetermined, nondiscretionary, objective formula or pursuant to the method for crediting service under a qualified plan sponsored by the service recipient.

(3) A separation from service not described in paragraphs (c)(1) or (c)(2) of this section.

(d) *When a payment is treated as made upon the designated payment date.* Except as otherwise specified in this section, a payment is treated as made upon the date specified under the plan (including a date specified under paragraph (a)(4) of this section) if the payment is made at such date or a later date within the same taxable year of the service provider or, if later, by the 15th day of the third calendar month

following the date specified under the plan and the service provider is not permitted, directly or indirectly, to designate the taxable year of the payment. In addition, a payment is treated as made upon the date specified under the plan (including a date specified under paragraph (a)(4) of this section) and is not treated as an accelerated payment if the payment is made no earlier than 30 days before the designated payment date and the service provider is not permitted, directly or indirectly, to designate the taxable year of the payment. For purposes of this paragraph, if the date specified is only a designated taxable year of the service provider, or a period of time during such a taxable year, the date specified under the plan is treated as the first day of such taxable year or the first day of the period of time during such taxable year, as applicable. The payment with respect to a stock right generally occurs upon the exercise of the stock right, so that where a stock right designates a fixed exercise date, the stock right will be deemed to have been paid at such date if the exercise and payment occur on such date or a later date within the same taxable year of the service provider or, if later, by the 15th day of the third calendar month following the exercise date specified under the plan. If calculation of the amount of the payment is not administratively practicable due to events beyond the control of the service provider (or service provider's beneficiary), the payment will be treated as made upon the date specified under the plan if the payment is made during the first taxable year of the service provider in which the calculation of the amount of the payment is administratively practicable. For purposes of this paragraph, the inability of a service recipient to calculate the amount or timing of a payment due to a failure of a service provider (or service provider's beneficiary) to provide reasonably available information necessary to make such calculation does not constitute an event beyond the control of the service provider. Similarly, if the making of the payment at the date specified under the plan would jeopardize the ability of the service recipient to continue as a going concern, the

payment will be treated as made upon the date specified under the plan if the payment is made during the first taxable year of the service provider in which the making of the payment would not have such effect.

(e) *Designation of time and form of payment with respect to earnings.* A non-qualified deferred compensation plan that provides for actual or notional earnings to be credited on amounts of deferred compensation may specify, in accordance with the requirements of § 1.409A-2(a) (initial deferral elections), that such earnings are treated separately from the right to the other amounts deferred under the plan for purposes of designating the time and form of payments under such plan, provided that to satisfy the requirements of this paragraph (e), actual or notional earnings must be credited at least annually. For these purposes, a right to dividend equivalents may be treated analogously to a right to actual or notional earnings on an amount of deferred compensation. For purposes of this paragraph (e), the term *dividend equivalents* means the right to an amount equal to all or a specified portion of dividends declared and paid, if any, on a specified number of shares of stock.

(f) *Substitutions.* Except as otherwise provided under these regulations, the payment of an amount as a substitute for a payment of deferred compensation will be treated as a payment of the deferred compensation. A forfeiture or voluntary relinquishment of an amount of deferred compensation will not be treated as a payment of the compensation, but there is no forfeiture or voluntary relinquishment for this purpose if an amount is paid, or a legally binding right to a payment is created, that acts as a substitute for the forfeited or voluntarily relinquished amount. Whether a payment or a right to a payment acts as a substitute for a payment of deferred compensation is determined based on all the facts and circumstances. However, where the payment of an amount results in an actual or potential reduction of, or current or future offset to, an amount of deferred compensation, or if the service provider receives a loan the repayment of which is secured

by or may be accomplished through an offset of or a reduction in an amount deferred under a nonqualified deferred compensation plan, the payment or loan is a substitute for the deferred compensation. In addition, where a service provider's right to deferred compensation is made subject to anticipation, alienation, sale, transfer, assignment, pledge, encumbrance, attachment, or garnishment by creditors of the service provider or the service provider's beneficiary, the deferred compensation is treated as having been paid. For the treatment of certain offsets, see paragraph (j)(4)(xiii) of this section. Even where there is no explicit reduction or offset, the payment of an amount or creation of a new right to a payment proximate to the purported forfeiture or voluntary relinquishment of a right to deferred compensation is presumed to be a substitute for the deferred compensation. The presumption is rebuttable by a showing that the compensation paid would have been received regardless of the forfeiture or voluntary relinquishment of the right to deferred compensation. Factors indicating that a payment would have been received regardless of such forfeiture or voluntarily relinquishment include that the amount paid is materially less than the forfeited or relinquished amount, or consists of a type of payment customarily made in the ordinary course of business of the service recipient to service providers who do not forfeit or relinquish deferred compensation (for example, a payment of accrued but unused leave or a payment for a release of actual or potential claims). See § 1.409A-1(b)(9)(i) with respect to certain separation pay plans.

(g) *Disputed payments and refusals to pay.* If a service recipient fails to make a payment in whole or in part as of the date specified under a plan, either intentionally or unintentionally, other than with the express or implied consent of the service provider, the payment will be treated as made upon the date specified under the plan if the service provider accepts the portion (if any) of the payment that the service recipient is willing to make (unless such acceptance will result in a relinquishment of the claim to all or part of the remaining amount), makes prompt

and reasonable, good faith efforts to collect the remaining portion of the payment, and any further payment (including payment of a lesser amount that satisfies the obligation to make the payment) is made no later than the end of the first taxable year of the service provider in which the service recipient and the service provider enter into a legally binding settlement of such dispute, the service recipient concedes that the amount is payable, or the service recipient is required to make such payment pursuant to a final and nonappealable judgment or other binding decision. For purposes of this paragraph (g), efforts to collect the payment will be presumed not to be prompt, reasonable, good faith efforts, unless the service provider provides notice to the service recipient within 90 days of the latest date upon which the payment could have been timely made in accordance with the terms of the plan and these regulations, and unless, if not paid, the service provider takes further enforcement measures within 180 days after such latest date. For purposes of this paragraph (g), a service recipient is not treated as having failed to make a payment where pursuant to the terms of the plan the service provider is required to request payment, or otherwise provide information or take any other action, and the service provider has failed to take such action. In addition, for purposes of this paragraph (g), the service provider is deemed to have requested that a payment not be made, rather than the service recipient having failed to make such payment, where the service recipient's decision to refuse to make the payment is made by the service provider or a member of the service provider's family (as defined in section 267(c)(4) applied as if the family of an individual includes the spouse of any member of the family), or any person or group of persons over whom the service provider or service provider's family member has effective control, or any person any portion of whose compensation is controlled the service provider or service provider's family member.

(h) *Special rule for certain resident aliens.* An agreement, method, program, or other arrangement that is, or

constitutes part of, a nonqualified deferred compensation plan is deemed to meet the requirements of this section with respect to any amount payable in the first taxable year of the service provider in which a service provider is a resident alien, and with respect to any amount payable in a subsequent taxable year if no later than the last day of the first taxable year of the service provider in which the service provider is a resident alien, the plan is amended as necessary so that the times and forms of payment of amounts payable in a subsequent year comply with the provisions of this section. For any year after the first taxable year of an individual in which the individual is a resident alien, this paragraph (h) does not apply, provided that a taxable year may again be treated as the first taxable year in which an individual is a resident alien if such individual has not been a resident alien for at least three consecutive taxable years immediately preceding the taxable year in which the service provider is again a resident alien.

(i) *Definitions and special rules*—(1) *Specified time or fixed schedule*—(i) *In general.* Amounts are payable at a specified time or pursuant to a fixed schedule if objectively determinable amounts are payable at a date or dates that are nondiscretionary and objectively determinable at the time the amount is deferred. An amount is objectively determinable for this purpose if the amount is specifically identified or if the amount may be determined at the time payment is due pursuant to an objective, nondiscretionary formula specified at the time the amount is deferred (for example, 50 percent of a specified account balance). Except as otherwise provided in paragraph (i)(1) of this section, an amount is not objectively determinable if the amount of the payment is based all or in part upon the occurrence of an event, including the consummation of a transaction by, or a payment of an amount to, a service recipient. If an amount is payable in a service provider's taxable year (or pursuant to a fixed schedule of taxable years of the service provider) that is designated at the time the amount is deferred and that is objectively determinable, the amount is

treated as payable at a specified time (or pursuant to a fixed schedule), provided that for purposes of the application of the subsequent deferral rules contained in § 1.409A-2(b), the specified time or fixed schedule of payments is deemed to refer to the first day of the relevant taxable year or years. A specified time or fixed schedule also includes the designation at the time the amount is deferred of a defined period or periods within the service provider's taxable year or taxable years that are objectively determinable, provided that no such defined period may begin within one taxable year and end within another taxable year, and provided further that for purposes of the application of the subsequent deferral rules contained in § 1.409A-2(b), the specified time or fixed schedule of payments is deemed to refer to the first day of the relevant period in which the payment will be made. A plan may provide that a payment upon the lapse of a substantial risk of forfeiture is to be made in accordance with a fixed schedule that is objectively determinable based on the date the substantial risk of forfeiture lapses (disregarding any discretionary acceleration of the lapse of the substantial risk of forfeiture), provided that the schedule must be fixed on the date the time and form of payment are designated, and any change in the fixed schedule will constitute a change in the time and form of payment. For example, a plan that provides for a bonus payment subject to the condition that the service provider complete three years of service, and subject to the further condition that such requirement of continued services will lapse upon the occurrence of an initial public offering, which condition if applied alone would constitute a substantial risk of forfeiture, may provide that a service provider is entitled to substantially equal payments on each of the first three anniversaries of the date the substantial risk of forfeiture lapses (the earlier of three years of service or the date of an initial public offering).

(ii) *Payment schedules with formula and fixed limitations*—(A) *Individual limitations.* A schedule of payments does not fail to be a fixed schedule of payments where the amount of a payment or payments that may be paid at a

§ 1.409A-3

specified time or during a specified period is limited by an objective nondiscretionary formula or a specified amount that is not under the effective control of the service provider and is not subject to the exercise of discretion by the service recipient, where such limitation is established on or before the date the time and form of payment is otherwise required to be set under these regulations, and the plan specifies the time and form of any payment that will be made or completed after its original payment date due to the application of the limitation. A change in the limitation or a change in the time and form of any payment that exceeds the limitation is subject to the requirements of § 1.409A-2(b) (subsequent deferral elections) and paragraph (j) of this section (accelerated payments). For purposes of this paragraph, a plan provision that reduces a schedule of periodic payments on a dollar-for-dollar basis by the amount of Social Security payments received or receivable may be treated as a nondiscretionary, objective formula limitation, if such reduction does not otherwise affect the time of payment of the deferred compensation (other than a forfeiture due to the reduction), including changes based on the service provider's eligibility or elections related to Social Security benefits. Similarly, a plan provision that reduces a schedule of periodic payments on a dollar-for-dollar basis by the amount of bona fide disability pay (within the meaning of § 1.409A-1(a)(5)) received or receivable may be treated as a nondiscretionary, objective formula limitation, if the disability payments are made pursuant to a plan sponsored by the service recipient that covers a substantial number of service providers and was established before the service provider became disabled, and if such reduction does not otherwise affect the time of payment of the deferred compensation (other than a forfeiture due to the reduction). Whether an amendment to, or other change in the benefit payable under, such bona fide disability plan results in an acceleration of a payment for purposes of paragraph (j) of this section or a subsequent election to delay the time or change the form of payment for purposes of

26 CFR Ch. I (4-1-08 Edition)

§ 1.409A-2(b) is determined based on all of the relevant facts and circumstances.

(B) *Limitations on aggregate payments to all participants in substantially identical plans.* A schedule of payments does not fail to be a fixed schedule of payments where the amount of the aggregate payments that will be made during a specified period of time to all participants in substantially identical plans is limited by an objective nondiscretionary formula or specified amount that is not under the effective control of the service provider and is not subject to the exercise of discretion by the service recipient, where the limit is established on or before the date the time and form of payment of the amount deferred is otherwise required to be set under these regulations, the method of allocating payments among the participants where there is an overall limitation on the aggregate amount that may be paid to a group of service providers during a specified period is an objective nondiscretionary allocation method that is not under the effective control of the service provider and is not subject to the exercise of discretion by the service recipient, the method is established on or before the date the time and form of payment of the amount deferred is otherwise required to be set, and the plan specifies the time and form of any payment of any amount that will be paid after its original payment date due to the application of the limitation. A change in the limitation or a change in the time and form of payment of any payment that is not otherwise made at the scheduled payment date due to application of the formula limitation is subject to the requirements of § 1.409A-2(b) (subsequent deferral elections) and paragraph (j) of this section (accelerated payments).

(iii) *Payment schedules determined by timing of payments received by the service recipient.* A payment schedule determined by reference to the timing of payments received by the service recipient (not including payments from one entity to another entity where both entities are treated as part of a single service recipient), meets the requirements of a specified date or fixed

schedule of payments if the following conditions are met:

(A) The payments due to the service recipient arise from bona fide and routine transactions in the ordinary course of business of the service recipient.

(B) The service provider does not have effective control of the service recipient, the person from whom such amounts are due, or the collection of any of the amounts due to the service recipient.

(C) The payment schedule provides an objective, nondiscretionary method of identification of the payments to the service recipient from which the amount of the payment from the service recipient to the service provider is determined.

(D) The payment schedule provides an objective, nondiscretionary schedule under which the payments will be made to the service provider.

(E) The payments to the service recipient from which the amount of the payments from service recipient to the service provider are determined result from sales of a type that the service recipient is in the trade or business of making and makes frequently, and either all such sales by the service recipient are taken into account for purposes of determining the payment to the service provider, or there is a legitimate, non-tax business reason for identifying the specific sales taken into account.

(iv) *Reimbursement or in-kind benefit plans*—(A) *General rule.* A plan that provides for reimbursements of expenses incurred by a service provider, or in-kind benefits, meets the requirements of a specified date or fixed schedule of payments with respect to such reimbursements or benefits if the following conditions are met:

(1) The plan provides an objectively determinable nondiscretionary definition of the expenses eligible for reimbursement or of the in-kind benefits to be provided.

(2) The plan provides for the reimbursement of expenses incurred or for the provision of the in-kind benefits during an objectively and specifically prescribed period (including the lifetime of the service provider).

(3) The plan provides that the amount of expenses eligible for reimbursement, or in-kind benefits provided, during a service provider's taxable year may not affect the expenses eligible for reimbursement, or in-kind benefits to be provided, in any other taxable year.

(4) The reimbursement of an eligible expense is made on or before the last day of the service provider's taxable year following the taxable year in which the expense was incurred.

(5) The right to reimbursement or in-kind benefits is not subject to liquidation or exchange for another benefit.

(B) *Medical reimbursement arrangements.* Notwithstanding the foregoing, an arrangement providing for the reimbursement of expenses referred to in section 105(b) will not be deemed to fail to meet the requirements of paragraph (i)(1)(iv)(A)(3) of this section solely because the arrangement provides for a limit on the amount of expenses that may be reimbursed under such arrangement over some or all of the period in which the reimbursement arrangement remains in effect.

(v) *Tax gross-up payments.* A plan providing a right to a tax gross-up payment will be treated as providing for payment at a specified time or on a fixed schedule of payments if the plan provides that payment will be made, and the payment is made, by the end of the service provider's taxable year next following the service provider's taxable year in which the service provider remits the related taxes. For purposes of this paragraph (i)(1)(v), the term *tax gross-up payment* refers to a payment to reimburse the service provider in an amount equal to all or a designated portion of the Federal, state, local, or foreign taxes imposed upon the service provider as a result of compensation paid or made available to the service provider by the service recipient, including the amount of additional taxes imposed upon the service provider due to the service recipient's payment of the initial taxes on such compensation. In addition, a right to the reimbursement of expenses incurred due to a tax audit or litigation addressing the existence or amount of a tax liability, whether Federal, state, local, or foreign, satisfies the requirement of a

fixed time and form of payment if the right to the reimbursement provides that payment will be made, and the payment is made, by the end of the service provider's taxable year following the service provider's taxable year in which the taxes that are the subject of the audit or litigation are remitted to the taxing authority, or where as a result of such audit or litigation no taxes are remitted, the end of the service provider's taxable year following the service provider's taxable year in which the audit is completed or there is a final and nonappealable settlement or other resolution of the litigation. Nothing in this paragraph (i)(1)(v) otherwise alters the application of section 409A to the underlying compensation arrangement or other arrangement that results in the taxes subject to the right to the tax gross-up payment.

(vi) *Examples.* The following examples (in which each employee is an individual whose taxable year is the calendar year) illustrate the principles of paragraphs (a), (b), (c), (d), and (i)(1) of this section:

Example 1. Employee A provides services as an employee of Employer Z, but is not a specified employee. Employee A participates in a nonqualified deferred compensation plan providing for a lump sum payment payable on or before December 31 of the calendar year in which Employee A separates from service. The plan provides for a payment upon a separation from service in compliance with this section.

Example 2. Employee B provides services as an employee of Employer Y, but is not a specified employee. Employee B participates in a nonqualified deferred compensation plan providing for a lump sum payment payable on or before the 90th day immediately following the date upon which Employee B separates from service. Employer Y retains the sole discretion to determine when during the 90-day period the payment will be made. Although the plan does not specify a period during one calendar year in which the payment will be made, the plan provides for a payment upon a separation from service in compliance with this section because the period over which the payment may be made is not longer than 90 days.

Example 3. Employee C provides services as an employee of Employer X, but is not a specified employee. Employee C participates in a nonqualified deferred compensation plan providing for a lump sum payment payable on or before the 180th day following the date

upon which Employee C separates from service. Employer X retains the sole discretion to determine when during the 180-day period the payment will be made. Because the plan does not specify a period during one calendar year in which the payment will be made, and because the period over which the payment may be made is longer than 90 days, the plan does not provide for a payment upon a separation from service that complies with this section.

Example 4. Employee D provides services as an employee of Employer W, but is not a specified employee. Employee D participates in a nonqualified deferred compensation plan providing for 10 installment payments payable on the first 10 anniversaries of the date Employee D separates from service, provided that no installment payment in any year may be more than 1% of Employer W's net income for the previous calendar year, and provided further that the excess over such limit that would otherwise be payable but is not paid due to application of the limit will become payable as of the first installment payment date at which time such amount, in combination with any installment payment otherwise due Employee D, does not exceed 1% of Employer W's net income for the previous calendar year. Provided that Employee D does not retain effective control of the calculation of Employer W's net income or the amount that Employee D will not be paid due to application of the limit, the plan provides for a schedule of payments upon a separation from service that complies with this section.

Example 5. Employee E and Employee F provide services as employees of Employer V, but neither is a specified employee. Employee E and Employee F both participate in substantially identical nonqualified deferred compensation plans providing for 10 installment payments payable on the first 10 anniversaries of the date the respective employee separates from service, provided that the total amount of installment payments in any year may not be more than 1% of Employer V's net income for the previous year, that where any payments are not made due to application of the limit the determination of the amount not paid to a particular employee will be made by applying the overall limit proportionately based upon the installment payment due the employee that year, and that the excess over such limit that would otherwise be payable but is not paid due to application of the limit will become payable as of the first installment payment date at which time such amount, in combination with any installment payments otherwise due the participants, does not exceed 1% of Employer V's net income for the previous calendar year. Provided that neither Employee E nor Employee F retains effective control of the calculation of Employer

V's net income or the amount that the respective employee will not be paid due to application of the limit, the plan provides for a schedule of payments upon a separation from service that complies with this section.

Example 6. Employee G provides services as an employee of Employer U, but is not a specified employee. As a bona fide part of this employment relationship, Employee G provides professional services to clients of Employer U as part of the bona fide, ordinary course of Employer U's trade or business. Under an arrangement between Employee G and Employer U, Employer U agrees to pay Employee G upon Employee G's separation from service an amount equal to 5% of any amount collected from Company T, a client of Employer U for which Employee G performed services during his employment with Employer U, during the 36 months following Employee G's separation from service. Under the arrangement, the amounts due to Employee G based upon payments received by Employer U during any calendar year are payable to Employee G on April 1 of the subsequent calendar year. Provided that Employee G does not have effective control of Employer U, Company T, or the collection of any amounts due Employer Y from Company T, the arrangement provides for a schedule of payments upon a separation from service that complies with this section.

Example 7. Employee H provides services as an employee of Employer S, but is not a specified employee. Under a plan sponsored by Employer S, Employee H has a legally binding right upon a separation from service to the reimbursement of country club dues paid in the calendar year of the separation from service and each of the next 3 calendar years following the separation from service in an amount not to exceed \$30,000 in any calendar year, provided that the amount of dues paid in any calendar year that are eligible for reimbursement equals only the amount actually expended during such calendar year, and the maximum amount available for reimbursement in any calendar year will not be increased or decreased to reflect the amount expended or reimbursed in a prior or subsequent calendar year. The plan further provides that any reimbursement must be paid to Employee H by December 31 of the calendar year following the year in which Employee H pays the country club dues. The reimbursement plan provides for a schedule of payments upon a separation from service that complies with this section.

Example 8. Employee J provides services as an employee of Employer Q, but is not a specified employee. Under a plan sponsored by Employer Q, Employee J has a legally binding right upon a separation from service to the reimbursement of country club dues paid during the calendar year in which the separation from service occurs and the next

3 calendar years in a total amount not to exceed \$90,000. The plan further provides that any reimbursement must be paid to Employee J by December 31 of the calendar year following the year in which Employee J pays the country club dues. Because the reimbursement of a payment of country club dues in one calendar year may affect the amount of country club dues available for reimbursement in another calendar year, the plan does not provide for a schedule of payments upon a separation from service that complies with this section.

(2) *Separation from service—required delay in payment to a specified employee pursuant to a separation from service—(i) In general.* In the case of any service provider who is a specified employee (as defined in §1.409A-1(i)) as of the date of a separation from service, the requirements of paragraph (a)(1) of this section permitting a payment upon a separation from service are satisfied only if payments may not be made before the date that is six months after the date of separation from service (or, if earlier than the end of the six-month period, the date of death of the specified employee). For this purpose, a service provider who is not a specified employee as of the date of a separation from service will not be treated as subject to this requirement even if the service provider would have become a specified employee if the service provider had continued to provide services through the next specified employee effective date. Similarly, a service provider who is treated as a specified employee as of the date of a separation from service will be subject to this requirement even if the service provider would not have been treated as a specified employee after the next specified employee effective date had the specified employee continued providing services through the next specified employee effective date. Notwithstanding the foregoing, this paragraph (i)(2)(i) does not apply to a payment made under the circumstances described in paragraph (j)(4)(ii) (domestic relations order), (j)(4)(iii) (conflicts of interest), or (j)(4)(vi) (payment of employment taxes) of this section.

(ii) *Application of payment rules to delayed payments.* The required delay in payment is met if payments to which a specified employee would otherwise be

entitled during the first six months following the date of separation from service are accumulated and paid on the first day of the seventh month following the date of separation from service, or if each payment to which a specified employee is otherwise entitled upon a separation from service is delayed by six months. A service recipient may retain discretion to choose which method will be implemented, provided that no direct or indirect election as to the method may be provided to the service provider. For an affected specified employee, a date upon which the plan or the service recipient designates that the payment will be made after the six-month delay is treated as a fixed payment date for purposes of paragraph (d) of this section once the separation from service has occurred.

(3) *Unforeseeable emergency*—(i) *Definition*. For purposes of §§ 1.409A-1 and 1.409A-2, this section, and §§ 1.409A-4 through 1.409A-6, an *unforeseeable emergency* is a severe financial hardship to the service provider resulting from an illness or accident of the service provider, the service provider's spouse, the service provider's beneficiary, or the service provider's dependent (as defined in section 152, without regard to section 152(b)(1), (b)(2), and (d)(1)(B)); loss of the service provider's property due to casualty (including the need to rebuild a home following damage to a home not otherwise covered by insurance, for example, not as a result of a natural disaster); or other similar extraordinary and unforeseeable circumstances arising as a result of events beyond the control of the service provider. For example, the imminent foreclosure of or eviction from the service provider's primary residence may constitute an unforeseeable emergency. In addition, the need to pay for medical expenses, including non-refundable deductibles, as well as for the costs of prescription drug medication, may constitute an unforeseeable emergency. Finally, the need to pay for the funeral expenses of a spouse, a beneficiary, or a dependent (as defined in section 152, without regard to section 152(b)(1), (b)(2), and (d)(1)(B)) may also constitute an unforeseeable emergency. Except as otherwise provided in

this paragraph (i)(3)(i), the purchase of a home and the payment of college tuition are not unforeseeable emergencies. Whether a service provider is faced with an unforeseeable emergency permitting a distribution under this paragraph (i)(3)(i) is to be determined based on the relevant facts and circumstances of each case, but, in any case, a distribution on account of unforeseeable emergency may not be made to the extent that such emergency is or may be relieved through reimbursement or compensation from insurance or otherwise, by liquidation of the service provider's assets, to the extent the liquidation of such assets would not cause severe financial hardship, or by cessation of deferrals under the plan. A plan may provide for a payment upon a specific type or types of unforeseeable emergency, without providing for payment upon all unforeseeable emergencies, provided that any event upon which a payment may be made qualifies as an unforeseeable emergency.

(ii) *Amount of payment permitted upon an unforeseeable emergency*. Distributions because of an unforeseeable emergency must be limited to the amount reasonably necessary to satisfy the emergency need (which may include amounts necessary to pay any Federal, state, local, or foreign income taxes or penalties reasonably anticipated to result from the distribution). Determinations of amounts reasonably necessary to satisfy the emergency need must take into account any additional compensation that is available if the plan provides for cancellation of a deferral election upon a payment due to an unforeseeable emergency. See paragraph (j)(4)(viii) of this section. However, the determination of amounts reasonably necessary to satisfy the emergency need is not required to take into account any additional compensation that is available from a qualified employer plan as defined in § 1.409A-1(a)(2) (including any amount available by obtaining a loan under the plan), or that due to the unforeseeable emergency is available under another nonqualified deferred compensation plan (including a plan that would provide for deferred compensation except due to the application of the effective date provisions

under § 1.409A-6). The payment may be made from any plan in which the service provider participates that provides for payment upon an unforeseeable emergency, provided that the plan under which the payment was made must be designated at the time of payment.

(iii) *Payments due to an unforeseeable emergency.* A service provider may retain discretion with respect to whether to apply for a payment upon an unforeseeable emergency, and a service recipient may retain discretion with respect to whether to make a payment available under the plan due to an unforeseeable emergency. A service provider who has experienced an unforeseeable emergency will not be treated as making a subsequent deferral election under § 1.409A-2(b) (subsequent deferral election rules) if the service provider does not apply for or elect to receive a payment available under the plan. A service recipient will not be treated as making a subsequent deferral election under § 1.409A-2(b) (subsequent deferral election rules) if the service recipient exercises its discretion not to make a payment otherwise available due to an unforeseeable emergency.

(4) *Disability*—(i) *In general.* For purposes of §§ 1.409A-1 and 1.409A-2, this section, and §§ 1.409A-4 through 1.409A-6, except as otherwise specifically provided, a service provider is considered disabled if the service provider meets one of the following requirements:

(A) The service provider is unable to engage in any substantial gainful activity by reason of any medically determinable physical or mental impairment that can be expected to result in death or can be expected to last for a continuous period of not less than 12 months.

(B) The service provider is, by reason of any medically determinable physical or mental impairment that can be expected to result in death or can be expected to last for a continuous period of not less than 12 months, receiving income replacement benefits for a period of not less than three months under an accident and health plan covering employees of the service provider's employer.

(ii) *Limited plan definition of disability.* A plan may provide for a payment upon any disability, and need not provide for a payment upon all disabilities, provided that any disability upon which a payment may be made under the plan complies with the provisions of this paragraph (i)(4).

(iii) *Determination of disability.* A plan may provide that a service provider will be deemed disabled if determined to be totally disabled by the Social Security Administration or Railroad Retirement Board. A plan may also provide that a service provider will be deemed disabled if determined to be disabled in accordance with a disability insurance program, provided that the definition of disability applied under such disability insurance program complies with the requirements of this paragraph (i)(4).

(5) *Change in the ownership or effective control of a corporation, or a change in the ownership of a substantial portion of the assets of a corporation*—(i) *In general.* Pursuant to section 409A(a)(2)(A)(v), a plan may permit a payment upon the occurrence of a change in the ownership of the corporation (as defined in paragraph (i)(5)(v) of this section), a change in effective control of the corporation (as defined in paragraph (i)(5)(vi) of this section), or a change in the ownership of a substantial portion of the assets of the corporation (as defined in paragraph (i)(5)(vii) of this section) (collectively referred to as a change in control event). To qualify as a change in control event, the occurrence of the event must be objectively determinable and any requirement that any other person or group, such as a plan administrator or compensation committee, certify the occurrence of a change in control event must be strictly ministerial and not involve any discretionary authority. The plan may provide for a payment on a particular type or types of change in control events, and need not provide for a payment on all such events, provided that each event upon which a payment is provided qualifies as a change in control event. For rules regarding the ability of the service recipient to terminate the plan and pay amounts of deferred compensation upon a change in

control event, see paragraph (j)(4)(ix)(B) of this section.

(ii) *Identification of relevant corporation*—(A) *In general.* To constitute a change in control event with respect to the service provider, the change in control event must relate to—

(1) The corporation for whom the service provider is performing services at the time of the change in control event;

(2) The corporation that is liable for the payment of the deferred compensation (or all corporations liable for the payment if more than one corporation is liable) but only if either the deferred compensation is attributable to the performance of service by the service provider for such corporation (or corporations) or there is a bona fide business purpose for such corporation or corporations to be liable for such payment and, in either case, no significant purpose of making such corporation or corporations liable for such payment is the avoidance of Federal income tax; or

(3) A corporation that is a majority shareholder of a corporation identified in paragraph (i)(5)(ii)(A)(1) or (2) of this section, or any corporation in a chain of corporations in which each corporation is a majority shareholder of another corporation in the chain, ending in a corporation identified in paragraph (i)(5)(ii)(A)(1) or (2) of this section.

(B) *Majority shareholder.* For purposes of this paragraph (i)(5)(ii), a majority shareholder is a shareholder owning more than 50 percent of the total fair market value and total voting power of such corporation.

(C) *Example.* The following example illustrates the rules of this paragraph (i)(5)(ii):

Example. Corporation A is a majority shareholder of Corporation B, which is a majority shareholder of Corporation C. A change in ownership of Corporation B constitutes a change in control event to service providers performing services for Corporation B or Corporation C, and to service providers for which Corporation B or Corporation C is solely liable for payments under the plan (for example, former employees), but is not a change in control event as to Corporation A or any other corporation of which Corporation A is a majority shareholder unless the sale constitutes a change in the own-

ership of a substantial portion of Corporation A's assets (see paragraph (i)(5)(vii) of this section).

(iii) *Attribution of stock ownership.* For purposes of paragraph (i)(5) of this section, section 318(a) applies to determine stock ownership. Stock underlying a vested option is considered owned by the individual who holds the vested option (and the stock underlying an unvested option is not considered owned by the individual who holds the unvested option). For purposes of the preceding sentence, however, if a vested option is exercisable for stock that is not substantially vested (as defined by § 1.83-3(b) and (j)), the stock underlying the option is not treated as owned by the individual who holds the option.

(iv) *Special rules for certain delayed payments pursuant to a change in control event*—(A) *Certain transaction-based compensation.* Payments of compensation related to a change in control event described in paragraph (i)(5)(v) of this section (change in the ownership of a corporation) or paragraph (i)(5)(vii) of this section (change in the ownership of a substantial portion of a corporation's assets), that occur because a service recipient purchases its stock held by the service provider or because the service recipient or a third party purchases a stock right held by a service provider, or that are calculated by reference to the value of stock of the service recipient (collectively, transaction-based compensation), may be treated as paid at a designated date or pursuant to a payment schedule that complies with the requirements of section 409A if the transaction-based compensation is paid on the same schedule and under the same terms and conditions as apply to payments to shareholders generally with respect to stock of the service recipient pursuant to a change in control event described in paragraph (i)(5)(v) of this section (change in the ownership of a corporation) or as apply to payments to the service recipient pursuant to a change in control event described in paragraph (i)(5)(vii) of this section (change in the ownership of a substantial portion of a corporation's assets), and to the extent that the transaction-based compensation is paid not later than five years

after the change in control event, the payment of such compensation will not violate the initial or subsequent deferral election rules set out in § 1.409A-2(a) and (b) solely as a result of such transaction-based compensation being paid pursuant to such schedule and terms and conditions. If before and in connection with a change in control event described in paragraph (i)(5)(v) or (i)(5)(vii) of this section, transaction-based compensation that would otherwise be payable as a result of such event is made subject to a condition on payment that constitutes a substantial risk of forfeiture (as defined in § 1.409A-1(d), without regard to the provisions of that section under which additions or extensions of forfeiture conditions are disregarded) and the transaction-based compensation is payable under the same terms and conditions as apply to payments made to shareholders generally with respect to stock of the service recipient pursuant to a change in control event described in paragraph (i)(5)(v) of this section or to payments to the service recipient pursuant to a change in control event described in paragraph (i)(5)(vii) of this section, for purposes of determining whether such transaction-based compensation is a short-term deferral the requirements of § 1.409A-1(b)(4) are applied as if the legally binding right to such transaction-based compensation arose on the date that it became subject to such substantial risk of forfeiture.

(B) *Certain nonvested compensation.* Notwithstanding the provisions of § 1.409A-1(d) (definition of a substantial risk of forfeiture) that disregard the extension or modification of a condition for purposes of determining whether a condition on payment constitutes a substantial risk of forfeiture, a condition that is a substantial risk of forfeiture that otherwise would lapse as a result of a change in control event described in paragraph (i)(5)(v) or (i)(5)(vii) of this section may be extended or modified before and in connection with such event to provide for a condition on payment that will not lapse as a result of such change in control event, and such extended or modified condition will be treated as continuing to subject the amount to a substantial risk of forfeiture, provided

that the transaction constituting the change in control event is a bona fide arm's length transaction between the service recipient or its shareholders and one or more parties who are unrelated to the service recipient and service provider (applying the rules of § 1.409A-1(f)(2)(ii)) and the modified or extended condition to which the payment is subject would otherwise be treated as a substantial risk of forfeiture under § 1.409A-1(d) (without regard to the provisions disregarding additions or extensions of forfeiture conditions). In such a case, the continued application of a fixed schedule of payments based upon the lapse of the substantial risk of forfeiture, so that payments commence upon the lapse of the modified or extended condition on payment, will not be treated as a change in the fixed schedule of payments for purposes of § 1.409A-2(b) (subsequent deferral elections) or paragraph (j) of this section (prohibition on the acceleration of payments).

(v) *Change in the ownership of a corporation—(A) In general.* Except as provided in paragraph (i)(5)(vi)(C) of this section, a change in the ownership of a corporation occurs on the date that any one person, or more than one person acting as a group (as defined in paragraph (i)(5)(v)(B) of this section), acquires ownership of stock of the corporation that, together with stock held by such person or group, constitutes more than 50 percent of the total fair market value or total voting power of the stock of such corporation. A non-qualified deferred compensation plan may provide that amounts payable upon a change in the ownership of a corporation will be paid only if the conditions in the preceding sentence are satisfied but substituting a percentage specified in the plan that is higher than 50 percent for the words "50 percent" in the preceding sentence, but only if the provision is set forth in the plan no later than the date by which the time and form of payment must be established under § 1.409A-2. However, if any one person, or more than one person acting as a group, is considered to own more than 50 percent of the total fair market value or total

voting power of the stock of a corporation (or such higher percentage specified in accordance with the preceding sentence), the acquisition of additional stock by the same person or persons is not considered to cause a change in the ownership of the corporation (or to cause a change in the effective control of the corporation (within the meaning of paragraph (i)(5)(vi) of this section)). An increase in the percentage of stock owned by any one person, or persons acting as a group, as a result of a transaction in which the corporation acquires its stock in exchange for property will be treated as an acquisition of stock for purposes of this section. This section applies only when there is a transfer of stock of a corporation (or issuance of stock of a corporation) and stock in such corporation remains outstanding after the transaction (see paragraph (i)(5)(vii) of this section for rules regarding the transfer of assets of a corporation). See § 1.280G-1, Q&A-27(d), *Example 1*, *Example 2*, *Example 5*, and *Example 6*.

(B) *Persons acting as a group.* For purposes of paragraph (i)(5)(v)(A) of this section, persons will not be considered to be acting as a group solely because they purchase or own stock of the same corporation at the same time, or as a result of the same public offering. However, persons will be considered to be acting as a group if they are owners of a corporation that enters into a merger, consolidation, purchase or acquisition of stock, or similar business transaction with the corporation. If a person, including an entity, owns stock in both corporations that enter into a merger, consolidation, purchase or acquisition of stock, or similar transaction, such shareholder is considered to be acting as a group with other shareholders only with respect to the ownership in that corporation before the transaction giving rise to the change and not with respect to the ownership interest in the other corporation. See § 1.280G-1, Q&A-27(d), *Example 3* and *Example 4*.

(vi) *Change in the effective control of a corporation—(A) In general.* Notwithstanding that a corporation has not undergone a change in ownership under paragraph (i)(5)(v) of this section, a change in the effective control of the

corporation occurs only on either of the following dates:

(1) The date any one person, or more than one person acting as a group (as determined under paragraph (i)(5)(v)(B) of this section), acquires (or has acquired during the 12-month period ending on the date of the most recent acquisition by such person or persons) ownership of stock of the corporation possessing 30 percent or more of the total voting power of the stock of such corporation. A nonqualified deferred compensation plan may provide that amounts payable upon an effective change in control of a corporation will be paid only if the conditions in the preceding sentence are satisfied but substituting a percentage specified in the plan that is higher than 30 percent for the word “30 percent” in the preceding sentence, but only if the percentage is set forth in the plan no later than the date by which the time and form of payment must be established under § 1.409A-2).

(2) The date a majority of members of the corporation’s board of directors is replaced during any 12-month period by directors whose appointment or election is not endorsed by a majority of the members of the corporation’s board of directors before the date of the appointment or election, provided that for purposes of this paragraph (i)(5)(vi)(A) the term *corporation* refers solely to the relevant corporation identified in paragraph (i)(5)(ii) of this section for which no other corporation is a majority shareholder for purposes of that paragraph. For example, if Corporation A is a publicly held corporation with no majority shareholder, and Corporation A is the majority shareholder of Corporation B, which is the majority shareholder of Corporation C, the term *corporation* for purposes of this paragraph (i)(5)(vi)(A)(2) would refer solely to Corporation A. A nonqualified deferred compensation plan may provide that amounts payable upon a change in the effective control of a corporation will be paid only if the conditions in the first sentence of this paragraph are satisfied substituting a portion of the members of the corporation’s board of directors that is higher than the words “a majority of the members of the corporation’s board of

directors” in the first sentence of this paragraph, but only if the higher portion is set forth in the plan no later than the date by which the time and form of payment must be established under § 1.409A-2(a)).

(B) *Multiple change in control events.* A change in effective control may occur in a transaction in which one of the two corporations involved in the transaction has a change in control event under paragraph (i)(5)(v) or (i)(5)(vii) of this section. Thus, for example, assume Corporation P transfers more than 40 percent of the total gross fair market value of its assets to Corporation O in exchange for 35 percent of O’s stock. P has undergone a change in ownership of a substantial portion of its assets under paragraph (i)(5)(vii) of this section and O has a change in effective control under this paragraph (i)(5)(vi).

(C) *Acquisition of additional control.* If any one person, or more than one person acting as a group, is considered to effectively control a corporation (within the meaning of this paragraph (i)(5)(vi)), the acquisition of additional control of the corporation by the same person or persons is not considered to cause a change in the effective control of the corporation (or to cause a change in the ownership of the corporation within the meaning of paragraph (i)(5)(v) of this section).

(D) *Persons acting as a group.* Persons will not be considered to be acting as a group solely because they purchase or own stock of the same corporation at the same time, or as a result of the same public offering. However, persons will be considered to be acting as a group if they are owners of a corporation that enters into a merger, consolidation, purchase or acquisition of stock, or similar business transaction with the corporation. If a person, including an entity, owns stock in both corporations that enter into a merger, consolidation, purchase or acquisition of stock, or similar transaction, such shareholder is considered to be acting as a group with other shareholders in a corporation only with respect to the ownership in that corporation before the transaction giving rise to the change and not with respect to the ownership interest in the other cor-

poration. See § 1.280G-1, Q&A-27(d), *Example 4*.

(vii) *Change in the ownership of a substantial portion of a corporation’s assets—*

(A) *In general.* A change in the ownership of a substantial portion of a corporation’s assets occurs on the date that any one person, or more than one person acting as a group (as determined in paragraph (i)(5)(v)(B) of this section), acquires (or has acquired during the 12-month period ending on the date of the most recent acquisition by such person or persons) assets from the corporation that have a total gross fair market value equal to or more than 40 percent of the total gross fair market value of all of the assets of the corporation immediately before such acquisition or acquisitions (or such higher amount specified by the plan no later than the date by which the time and form of payment must be established under § 1.409A-2). For this purpose, gross fair market value means the value of the assets of the corporation, or the value of the assets being disposed of, determined without regard to any liabilities associated with such assets.

(B) *Transfers to a related person—(1)* There is no change in control event under this paragraph (i)(5)(vii) when there is a transfer to an entity that is controlled by the shareholders of the transferring corporation immediately after the transfer, as provided in this paragraph (i)(5)(vii)(B). A transfer of assets by a corporation is not treated as a change in the ownership of such assets if the assets are transferred to—

(i) A shareholder of the corporation (immediately before the asset transfer) in exchange for or with respect to its stock;

(ii) An entity, 50 percent or more of the total value or voting power of which is owned, directly or indirectly, by the corporation;

(iii) A person, or more than one person acting as a group, that owns, directly or indirectly, 50 percent or more of the total value or voting power of all the outstanding stock of the corporation; or

(iv) An entity, at least 50 percent of the total value or voting power of which is owned, directly or indirectly,

by a person described in paragraph (i)(5)(vii)(B)(I)(iii) of this section.

(2) For purposes of this paragraph (i)(5)(vii)(B) and except as otherwise provided in this paragraph (i), a person's status is determined immediately after the transfer of the assets. For example, a transfer to a corporation in which the transferor corporation has no ownership interest before the transaction, but that is a majority-owned subsidiary of the transferor corporation after the transaction is not treated as a change in the ownership of the assets of the transferor corporation.

(C) *Persons acting as a group.* Persons will not be considered to be acting as a group solely because they purchase assets of the same corporation at the same time. However, persons will be considered to be acting as a group if they are owners of a corporation that enters into a merger, consolidation, purchase or acquisition of assets, or similar business transaction with the corporation. If a person, including an entity shareholder, owns stock in both corporations that enter into a merger, consolidation, purchase or acquisition of assets, or similar transaction, such shareholder is considered to be acting as a group with other shareholders in a corporation only to the extent of the ownership in that corporation before the transaction giving rise to the change and not with respect to the ownership interest in the other corporation. See § 1.280G-1, Q&A-27(d), *Example 4*.

(6) *Certain back-to-back arrangements—(i) In general.* This paragraph (i)(6) applies where a service provider is providing services to a service recipient (the intermediate service recipient), who in turn is providing services to another service recipient (the ultimate service recipient), the services provided by the service provider to the intermediate service recipient are closely related to the services provided by the intermediate service recipient to the ultimate service recipient, there is a nonqualified deferred compensation plan providing for payments by the ultimate service recipient to the intermediate service recipient (the ultimate service recipient plan), there is a nonqualified deferred compensation plan or other agreement, method, pro-

gram, or other arrangement providing for payments of compensation by the intermediate service recipient to the service provider (the intermediate service recipient plan), and the intermediate service recipient plan provides for a payment upon the occurrence of an event described in paragraph (a)(1), (2), (3), (5), or (6) of this section. In such a case, notwithstanding the generally applicable limits on payments in paragraph (a) of this section, the ultimate service recipient plan may provide for a payment to the intermediate service recipient upon the occurrence of a payment event under the intermediate service recipient plan described in paragraph (a)(1), (2), (3), (5), or (6) of this section if the time and form of payment is defined as the same time and form of payment provided under the intermediate service recipient plan, the amount of the payment under the ultimate service recipient plan does not exceed the amount of the payment under the intermediate service recipient plan, and the ultimate service recipient plan and the intermediate service recipient plan otherwise satisfy the requirements of section 409A (regardless of whether such plan is subject to section 409A).

(ii) *Example.* The provisions of paragraph (i)(6)(i) of this section are illustrated by the following example:

Example. Company B (intermediate service recipient) provides services to Company C (ultimate service recipient). Employee A (service provider) provides services to Company B that are closely related to the services Company B provides to Company C. Pursuant to a nonqualified deferred compensation plan meeting the requirements of section 409A, Employee A is entitled to a payment of deferred compensation upon a separation from service with Company B (the intermediate service recipient plan). Under an arrangement between Company B and Company C (the ultimate service recipient plan), Company C agrees to pay an amount of deferred compensation to Company B upon Employee A's separation from service with Company B, in accordance with the time, form and amount of payment provided in the intermediate service recipient plan. Provided that the intermediate service recipient plan and the ultimate service recipient plan otherwise comply with the requirements of section 409A (regardless of whether such arrangements are subject to section 409A), Company C's payment to Company B of the

amount due under the ultimate service recipient plan upon the separation from service of Employee A from Company B may constitute a permissible payment event for purposes of paragraph (a) of this section.

(j) *Prohibition on acceleration of payments*—(1) *In general.* Except as provided in paragraph (j)(4) of this section, a nonqualified deferred compensation plan may not permit the acceleration of the time or schedule of any payment or amount scheduled to be paid pursuant to the terms of the plan, and no such accelerated payment may be made whether or not provided for under the terms of such plan. For purposes of determining whether a payment of deferred compensation has been made, the rules of paragraph (f) of this section (substituted payments) apply. For purposes of this paragraph (j), an impermissible acceleration does not occur if payment is made in accordance with plan provisions or an election as to the time and form of payment in effect at the time of initial deferral (or added in accordance with the rules applicable to subsequent deferral elections under § 1.409A-2(b)) pursuant to which payment is required to be made on an accelerated schedule as a result of an intervening event that is an event described in paragraph (a)(1), (2), (3), (5), or (6) of this section. For example, a plan may provide that a participant will receive six installment payments commencing at separation from service, and also provide that if the participant dies after such payments commence but before all payments have been made, all remaining amounts will be paid in a lump sum payment. Additionally, it is not an acceleration of the time or schedule of payment of a deferral of compensation if a service recipient waives or accelerates the satisfaction of a condition constituting a substantial risk of forfeiture applicable to such deferral of compensation, provided that the requirements of section 409A (including the requirement that the payment be made upon a permissible payment event) are otherwise satisfied with respect to such deferral of compensation. For example, if a nonqualified deferred compensation plan provides for a lump sum payment of the vested benefit upon separation from service, and the

benefit vests under the plan only after 10 years of service, it is not a violation of the requirements of section 409A if the service recipient reduces the vesting requirement to five years of service, even if a service provider becomes vested as a result and receives a payment in connection with a separation from service before the service provider would have completed 10 years of service. However, if the plan in this example had provided for a payment at a fixed date, rather than at separation from service, the date of payment could not be accelerated due to the accelerated vesting. For the definition of a payment for purposes of this paragraph (j), see § 1.409A-2(b)(5) (coordination of the subsequent deferral election rules with the prohibition on acceleration of payments). For other permissible payments, see § 1.409A-2(b)(2)(iii) (certain immediate payments of remaining installments) and paragraph (d) of this section (certain payments made no more than 30 days before the designated payment date).

(2) *Application to multiple payment events.* Generally, the addition of a permissible payment event, the deletion of a permissible payment event, or the substitution of one permissible payment event for another permissible payment event, results in an acceleration of a payment if the addition, deletion, or substitution could result in the payment being made at an earlier date than such payment would have been made absent such addition, deletion, or substitution. Notwithstanding the previous sentence, the addition of death, disability (as defined in paragraph (i)(4) of this section), or an unforeseeable emergency (as defined in paragraph (i)(3) of this section), as a potentially earlier alternative payment event to an amount previously deferred will not be treated as resulting in an acceleration of a payment, even if such addition results in the payment being paid at an earlier time than such payment would have been made absent the addition of the payment event. However, the addition of such a payment event as a potentially later alternative payment event generally is subject to the rules governing changes in the time and form of payment (see § 1.409A-2(b)).

(3) *Beneficiaries.* The rules of this paragraph (j) apply to elections by beneficiaries with respect to the time and form of payment, as well as elections by service providers or service recipients with respect to the time and form of payment to beneficiaries. An election to change the identity of a beneficiary does not constitute an acceleration of a payment merely because the election changes the identity of the recipient of the payment, if the time and form of the payment is not otherwise changed. In addition, an election before the commencement of a life annuity to change the identity of a beneficiary does not constitute an acceleration of a payment if the change in the time of payments stems solely from the different life expectancy of the new beneficiary, such as in the case of a joint and survivor annuity, and does not change the commencement date of the life annuity.

(4) *Exceptions*—(i) *In general.* Except as otherwise expressly provided, a plan may provide for the acceleration of a payment in accordance with paragraphs (j)(4)(ii) through (xiv) of this section, or may provide a service recipient discretion to accelerate payments in accordance with the provisions of paragraphs (j)(4)(ii) through (xiv) of this section. A plan may not provide a service provider discretion with respect to whether a payment will be accelerated, and a service recipient may not provide a service provider a direct or indirect election as to whether the service recipient's discretion to accelerate a payment will be exercised, even if such acceleration would be permitted under paragraphs (j)(4)(ii) through (xiv) of this section. Whether a service recipient has provided a service provider an election as to whether the service recipient's discretion to accelerate a payment will be exercised is determined based on all the facts and circumstances, including whether similarly situated service providers have been treated differently. Except as otherwise provided in paragraphs (j)(4)(ii) through (xiv) of this section, the plan need not set forth the exception in writing, and provided all other requirements of this section are met, the making of such a payment or the addition of a plan term permitting the making

of such a payment will not constitute the acceleration of a payment, and the failure to make such a payment or the deletion or modification of a plan term permitting the making of such a payment will not be subject to the rules regarding a change in the time and form of payment under § 1.409A-2(b).

(ii) *Domestic relations order.* A plan may provide for acceleration of the time or schedule of a payment under the plan to an individual other than the service provider, or a payment under such plan may be made to an individual other than the service provider, to the extent necessary to fulfill a domestic relations order (as defined in section 414(p)(1)(B)).

(iii) *Conflicts of interest*—(A) *Compliance with ethics agreements with the Federal government.* A plan may provide for acceleration of the time or schedule of a payment under the plan, or a payment may be made under a plan, to the extent necessary for any Federal officer or employee in the executive branch to comply with an ethics agreement with the Federal government.

(B) *Compliance with ethics laws or conflicts of interest laws.* A plan may provide for acceleration of the time or schedule of a payment under the plan, or a payment may be made under a plan, to the extent reasonably necessary to avoid the violation of an applicable Federal, state, local, or foreign ethics law or conflicts of interest law (including where such payment is reasonably necessary to permit the service provider to participate in activities in the normal course of his or her position in which the service provider would otherwise not be able to participate under an applicable rule). A payment is reasonably necessary to avoid the violation of a Federal, state, local, or foreign ethics law or conflicts of interest law if the payment is a necessary part of a course of action that results in compliance with a Federal, state, local, or foreign ethics law or conflicts of interest law that would be violated absent such course of action, regardless of whether other actions would also result in compliance with the Federal, state, local, or foreign ethics law or conflicts of interest law. For this purpose, a provision of foreign law is considered applicable only to foreign

earned income (as defined under section 911(b)(1) without regard to section 911(b)(1)(B)(iv) and without regard to the requirement that the income be attributable to services performed during the period described in section 911(d)(1)(A) or (B)) from sources within the foreign country that promulgated such law.

(iv) *Section 457 plans.* A plan subject to section 457(f) may provide for an acceleration of the time or schedule of a payment to a service provider, or a payment may be made under such a plan, to pay Federal, state, local, and foreign income taxes due upon a vesting event, provided that the amount of such payment is not more than an amount equal to the Federal, state, local, and foreign income tax withholding that would have been remitted by the employer if there had been a payment of wages equal to the income includible by the service provider under section 457(f) at the time of the vesting.

(v) *Limited cashouts.* A plan may require or provide a service recipient discretion to require (or be amended to require or to provide a service recipient discretion to require), a mandatory lump sum payment of amounts deferred under the plan that do not exceed a specified amount, provided that such plan term or amendment is executed and effective, and any required exercise of service recipient discretion is evidenced in writing, no later than the date of such payment, and provided that—

(A) The payment results in the termination and liquidation of the entirety of the service provider's interest under the plan, including all agreements, methods, programs, or other arrangements with respect to which deferrals of compensation are treated as having been deferred under a single nonqualified deferred compensation plan under § 1.409A-1(c)(2); and

(B) The payment is not greater than the applicable dollar amount under section 402(g)(1)(B).

(vi) *Payment of employment taxes.* A plan may provide for the acceleration of the time or schedule of a payment, or a payment may be made under the plan, to pay the Federal Insurance Contributions Act (FICA) tax imposed

under section 3101, section 3121(a), and section 3121(v)(2), or the Railroad Retirement Act tax imposed under section 3201, section 3211, section 3231(e)(1), and section 3231(e)(8), where applicable, on compensation deferred under the plan (the FICA or RRTA amount). Additionally, a plan may provide for the acceleration of the time or schedule of a payment, or a payment may be made under the plan, to pay the income tax at source on wages imposed under section 3401 or the corresponding withholding provisions of applicable state, local, or foreign tax laws as a result of the payment of the FICA or RRTA amount, and to pay the additional income tax at source on wages attributable to the pyramiding section 3401 wages and taxes. However, the total payment under this acceleration provision must not exceed the aggregate of the FICA or RRTA amount, and the income tax withholding related to such FICA or RRTA amount.

(vii) *Payment upon income inclusion under section 409A.* A plan may provide for the acceleration of the time or schedule of a payment, or a payment under such plan may be made, at any time the plan fails to meet the requirements of section 409A and these regulations. Such payment may not exceed the amount required to be included in income as a result of the failure to comply with the requirements of section 409A and these regulations.

(viii) *Cancellation of deferrals following an unforeseeable emergency or hardship distribution.* A plan may provide for a cancellation of a service provider's deferral election, or such a cancellation may be made, due to an unforeseeable emergency or a hardship distribution pursuant to § 1.401(k)-1(d)(3). The deferral election must be cancelled, not merely postponed or otherwise delayed. Accordingly, any later deferral election will be subject to the provisions governing initial deferral elections. See § 1.409A-2(a).

(ix) *Plan terminations and liquidations.* A plan may provide for the acceleration of the time and form of a payment, or a payment under such plan may be made, where the acceleration of the payment is made pursuant to a termination and liquidation of the plan

§ 1.409A-3

26 CFR Ch. I (4-1-08 Edition)

in accordance with one of the following:

(A) The service recipient's termination and liquidation of the plan within 12 months of a corporate dissolution taxed under section 331, or with the approval of a bankruptcy court pursuant to 11 U.S.C. § 503(b)(1)(A), provided that the amounts deferred under the plan are included in the participants' gross incomes in the latest of the following years (or, if earlier, the taxable year in which the amount is actually or constructively received).

(1) The calendar year in which the plan termination and liquidation occurs.

(2) The first calendar year in which the amount is no longer subject to a substantial risk of forfeiture.

(3) The first calendar year in which the payment is administratively practicable.

(B) The service recipient's termination and liquidation of the plan pursuant to irrevocable action taken by the service recipient within the 30 days preceding or the 12 months following a change in control event (as defined in paragraph (i)(5) of this section), provided that this paragraph will only apply to a payment under a plan if all agreements, methods, programs, and other arrangements sponsored by the service recipient immediately after the time of the change in control event with respect to which deferrals of compensation are treated as having been deferred under a single plan under § 1.409A-1(c)(2) are terminated and liquidated with respect to each participant that experienced the change in control event, so that under the terms of the termination and liquidation all such participants are required to receive all amounts of compensation deferred under the terminated agreements, methods, programs, and other arrangements within 12 months of the date the service recipient irrevocably takes all necessary action to terminate and liquidate the agreements, methods, programs, and other arrangements. Solely for purposes of this paragraph (j)(4)(ix)(B), the applicable service recipient with the discretion to liquidate and terminate the agreements, methods, programs, and other arrangements

is the service recipient that is primarily liable immediately after the transaction for the payment of the deferred compensation.

(C) The service recipient's termination and liquidation of the plan, provided that—

(1) The termination and liquidation does not occur proximate to a downturn in the financial health of the service recipient;

(2) The service recipient terminates and liquidates all agreements, methods, programs, and other arrangements sponsored by the service recipient that would be aggregated with any terminated and liquidated agreements, methods, programs, and other arrangements under § 1.409A-1(c) if the same service provider had deferrals of compensation under all of the agreements, methods, programs, and other arrangements that are terminated and liquidated;

(3) No payments in liquidation of the plan are made within 12 months of the date the service recipient takes all necessary action to irrevocably terminate and liquidate the plan other than payments that would be payable under the terms of the plan if the action to terminate and liquidate the plan had not occurred;

(4) All payments are made within 24 months of the date the service recipient takes all necessary action to irrevocably terminate and liquidate the plan; and

(5) The service recipient does not adopt a new plan that would be aggregated with any terminated and liquidated plan under § 1.409A-1(c) if the same service provider participated in both plans, at any time within three years following the date the service recipient takes all necessary action to irrevocably terminate and liquidate the plan.

(D) Such other events and conditions as the Commissioner may prescribe in generally applicable guidance published in the Internal Revenue Bulletin (see § 601.601(d)(2) of this chapter).

(x) *Certain distributions to avoid a non-allocation year under section 409(p).* A plan may provide for an acceleration of the time and form of a payment, or a payment may be made under such plan,

to prevent the occurrence of a non-allocation year (within the meaning of section 409(p)(3)) in the plan year of an employee stock ownership plan next following the plan year in which such payment is made, provided that the amount distributed may not exceed 125 percent of the minimum amount of distribution necessary to avoid the occurrence of a nonallocation year. Solely for purposes of determining permissible distributions under this paragraph (j)(4)(x), synthetic equity (within the meaning of section 409(p)(6)(C) and § 1.409(p)-1(f)) granted during the plan year of the employee stock ownership plan in which such payment is made is disregarded for purposes of determining whether the subsequent plan year would result in a nonallocation year.

(xi) *Payment of state, local, or foreign taxes.* A plan may provide for an acceleration of the time and form of a payment, or a payment may be made under such plan, to reflect payment of state, local, or foreign tax obligations arising from participation in the plan that apply to an amount deferred under the plan before the amount is paid or made available to the participant (the state, local, or foreign tax amount). Such payment may not exceed the amount of such taxes due as a result of participation in the plan. Such payment may be made by distributions to the participant in the form of withholding pursuant to provisions of applicable state, local, or foreign law or by distribution directly to the participant. Additionally, an arrangement may provide for the acceleration of the time or schedule of payment, or a payment may be made under such arrangement, to pay the income tax at source on wages imposed under section 3401 as a result of such payment and to pay the additional income tax at source on wages imposed under section 3401 attributable to such additional section 3401 wages and taxes. However, the total payment under this acceleration provision must not exceed the aggregate of the state, local, and foreign tax amount, and the income tax withholding related to such state, local, and foreign tax amount.

(xii) *Cancellation of deferral elections due to disability.* A plan may provide for a cancellation of a service provider's

deferral election, or a cancellation of such election may be made, where such cancellation occurs by the later of the end of the taxable year of the service provider or the 15th day of the third month following the date the service provider incurs a disability. For purposes of this paragraph, a disability refers to any medically determinable physical or mental impairment resulting in the service provider's inability to perform the duties of his or her position or any substantially similar position, where such impairment can be expected to result in death or can be expected to last for a continuous period of not less than six months.

(xiii) *Certain offsets.* A plan may provide for the acceleration of the time or schedule of a payment, or a payment may be made under such plan, as satisfaction of a debt of the service provider to the service recipient, where such debt is incurred in the ordinary course of the service relationship between the service recipient and the service provider, the entire amount of reduction in any of the service recipient's taxable years does not exceed \$5,000, and the reduction is made at the same time and in the same amount as the debt otherwise would have been due and collected from the service provider.

(xiv) *Bona fide disputes as to a right to a payment.* A plan may provide for the acceleration of the time or schedule of one or more payments, or a payment may be made under such plan, where such payments occur as part of a settlement between the service provider and the service recipient of an arm's length, bona fide dispute as to the service provider's right to the deferred amount. Discretion to accelerate payments, other than due to an arm's length settlement of a bona fide dispute as to the service provider's right to the deferred amount, is not permitted under this paragraph (j)(4)(xiv). Whether a payment qualifies for the exception under this paragraph is based on all relevant facts and circumstances. A payment will be presumed not to meet this exception unless the payment is subject to a substantial reduction in the value of the payment made in relation to the amount that would have been payable had there been no dispute as to the

service provider's right to the payment. For this purpose, a reduction that is less than 25 percent of the present value of the deferred amount in dispute generally is not a substantial reduction. In addition, a payment will be presumed not to meet this exception if the payment is made proximate to a downturn in the financial health of the service recipient.

(5) *Nonqualified deferred compensation plans linked to qualified employer plans or certain other arrangements.* If a nonqualified deferred compensation plan provides that the amount deferred under the plan is the amount determined under the formula determining benefits under a qualified employer plan (as defined in § 1.409A-1(a)(2)), or a broad-based foreign retirement plan (as defined in § 1.409A-1(a)(3)(v)) maintained by the service recipient but applied without regard to one or more limitations applicable to the qualified employer plan under the Internal Revenue Code or to the broad-based foreign retirement plan under other applicable law, or that the amount deferred under the nonqualified deferred compensation plan is determined as an amount offset by some or all of the benefits provided under the qualified employer plan or broad-based foreign retirement plan, a decrease in amounts deferred under the nonqualified deferred compensation plan that results directly from the operation of the qualified employer plan or broad-based foreign retirement plan (other than service provider actions described in paragraphs (j)(5)(iii) and (iv) of this section) including changes in benefit limitations applicable to the qualified employer plan or the broad-based foreign retirement plan under the Internal Revenue Code or other applicable law does not constitute an acceleration of a payment under the nonqualified deferred compensation plan, provided that such operation does not otherwise result in a change in the time or form of a payment under the nonqualified deferred compensation plan, and provided further that the change in the amounts deferred under the nonqualified deferred compensation plan does not exceed such change in the amounts deferred under the qualified employer plan or the broad-based foreign retirement plan, as applicable.

In addition, with respect to such a nonqualified deferred compensation plan, the following actions or failures to act will not constitute an acceleration of a payment under the nonqualified deferred compensation plan even if in accordance with the terms of the nonqualified deferred compensation plan, the actions or inactions result in a decrease in the amounts deferred under the plan, provided that such actions or inactions do not otherwise affect the time or form of payment under the nonqualified deferred compensation plan, and provided further that with respect to actions or inactions described in paragraphs (j)(5)(i) and (ii) of this section, the change in the amount deferred under the nonqualified deferred compensation plan does not exceed the change in the amounts deferred under the qualified employer plan or the broad-based foreign retirement plan, as applicable:

(i) A service provider's action or inaction under the qualified employer plan or broad-based foreign retirement plan with respect to whether to elect to receive a subsidized benefit or an ancillary benefit under the qualified employer plan or broad-based foreign retirement plan.

(ii) The amendment of a qualified employer plan or broad-based foreign retirement plan to increase benefits provided under such plan, or to add or remove a subsidized benefit or an ancillary benefit.

(iii) A service provider's action or inaction under a qualified employer plan with respect to elective deferrals and other employee pre-tax contributions subject to the contribution restrictions under section 401(a)(30) or section 402(g), including an adjustment to a deferral election under such qualified employer plan, provided that for any given taxable year, the service provider's action or inaction does not result in a decrease in the amounts deferred under all nonqualified deferred compensation plans in which the service provider participates (other than amounts described in paragraph (j)(5)(iv) of this section) in excess of the limit with respect to elective deferrals under section 402(g)(1)(A), (B), and (C) in effect for the taxable year in which such action or inaction occurs.

Internal Revenue Service, Treasury

§ 1.409A-6

(iv) A service provider's action or inaction under a qualified employer plan with respect to elective deferrals and other employee pre-tax contributions subject to the contributions restrictions under section 401(a)(30) or section 402(g), and after-tax contributions by the service provider to a qualified employer plan that provides for such contributions, that affects the amounts that are credited under one or more nonqualified deferred compensation plans as matching amounts or other similar amounts contingent on such elective deferrals, pre-tax contributions, or after-tax contributions, provided that the total of such matching or contingent amounts, as applicable, never exceeds 100 percent of the matching or contingent amounts that would be provided under the qualified employer plan absent any plan-based restrictions that reflect limits on qualified plan contributions under the Internal Revenue Code.

(6) *Changes in elections under a cafeteria plan.* A change in an election under a cafeteria plan (as defined in section 125(d)) does not result in an accelerated payment of an amount deferred under a nonqualified deferred compensation plan to the extent that the change in the amount deferred under the nonqualified deferred compensation plan results solely from the application of the change in amount eligible to be treated as compensation under the terms of the nonqualified deferred compensation plan resulting from the election change under the cafeteria plan, to a benefit formula under the nonqualified deferred compensation plan based upon the service provider's eligible compensation, and only to the extent that such change applies in the same manner as any other increase or decrease in compensation would apply to such benefit formula.

[T.D. 9321, 72 FR 19276, Apr. 17, 2007; 72 FR 41622, July 31, 2007]

§ 1.409A-4 Calculation of income inclusion [Reserved]

§ 1.409A-5 Funding [Reserved]

§ 1.409A-6 Application of section 409A and effective dates.

(a) *Statutory application and effective dates—*(1) *Application to amounts deferred—*(i) *In general.* Except as otherwise provided in this section, section 409A applies with respect to amounts deferred in taxable years beginning after December 31, 2004, and with respect to amounts deferred in taxable years beginning before January 1, 2005, if the plan under which the deferral is made is materially modified after October 3, 2004. For amounts deferred in taxable years beginning before January 1, 2005, under a plan that is materially modified after October 3, 2004, whether the plan complies with the requirements of section 409A and these regulations is determined by reference to the terms of the plan in effect as of, and any actions taken under the plan on or after, the date of the material modification. Section 409A is applicable with respect to earnings on amounts deferred only to the extent that section 409A is applicable with respect to the amounts deferred. Accordingly, section 409A does not apply with respect to earnings on amounts deferred before January 1, 2005, unless section 409A applies with respect to the amounts deferred. For this purpose, a right to earnings that is subject to a substantial risk of forfeiture (as defined in § 1.83-3(c)) or a requirement to perform further services, on an amount deferred that is not subject to a substantial risk of forfeiture (as defined in § 1.83-3(c)) or a requirement to perform further services, is not treated as earnings on the amount deferred, but a separate right to compensation. Except as otherwise provided in applicable guidance (see § 601.601(d)(2) of this chapter), the provisions of §§ 1.409A-1 through 1.409A-5 and this section provide the exclusive means of identifying agreements, methods, programs, or other arrangements subject to section 409A, and the exclusive means of satisfying the requirements of section 409A with respect to such agreements, methods, programs, or other arrangements.

(ii) *Collectively bargained plans.* Section 409A does not apply with respect to amounts deferred under a plan maintained pursuant to one or more bona fide collective bargaining agreements in effect on October 3, 2004, for the period ending on the earlier of the date on which the last of such collective bargaining agreements terminates (determined without regard to any extension thereof after October 3, 2004) or December 31, 2009.

(2) *Identification of date of deferral for statutory effective date purposes.* For purposes of determining whether section 409A is applicable with respect to an amount, the amount is considered deferred before January 1, 2005, if before January 1, 2005, the service provider had a legally binding right to be paid the amount, and the right to the amount was earned and vested. For purposes of this paragraph (a)(2), a right to an amount was earned and vested only if the amount was not subject to a substantial risk of forfeiture (as defined in § 1.83-3(c)) or a requirement to perform further services. Amounts to which the service provider did not have a legally binding right before January 1, 2005 (for example, because the service recipient retained discretion to reduce the amount), will not be considered deferred before January 1, 2005. In addition, amounts to which the service provider had a legally binding right before January 1, 2005, but the right to which was subject to a substantial risk of forfeiture or a requirement to perform further services after December 31, 2004, are not considered deferred before January 1, 2005, for purposes of the effective date. Notwithstanding the foregoing, an amount to which the service provider had a legally binding right before January 1, 2005, but for which the service provider was required to continue performing services to retain the right only through the completion of the payroll period (as defined in § 1.409A-1(b)(3)) that includes December 31, 2004, is not treated as subject to a requirement to perform further services (or a substantial risk of forfeiture) for purposes of the effective date. For purposes of this paragraph (a)(2), a stock option, stock appreciation right, or similar compensation that on or before

December 31, 2004, was immediately exercisable for cash or substantially vested property (as defined in § 1.83-3(b)) is treated as earned and vested, regardless of whether the right would terminate if the service provider ceased providing services for the service recipient.

(3) *Calculation of amount of compensation deferred for statutory effective date purposes—(i) Nonaccount balance plans.* The amount of compensation deferred before January 1, 2005, under a nonqualified deferred compensation plan that is a nonaccount balance plan (as defined in § 1.409A-1(c)(2)(i)(C)), equals the present value of the amount to which the service provider would have been entitled under the plan if the service provider voluntarily terminated services without cause on December 31, 2004, and received a payment of the benefits available from the plan on the earliest possible date allowed under the plan to receive a payment of benefits following the termination of services, and received the benefits in the form with the maximum value.

(ii) *Account balance plans.* The amount of compensation deferred before January 1, 2005, under a nonqualified deferred compensation plan that is an account balance plan (as defined in § 1.409A-1(c)(2)(i)(A)), equals the portion of the service provider's account balance as of December 31, 2004, the right to which was earned and vested (as defined in paragraph (a)(2) of this section) as of December 31, 2004, plus any future contributions to the account, the right to which was earned and vested (as defined in paragraph (a)(2) of this section) as of December 31, 2004, to the extent such contributions are actually made.

(iii) *Equity-based compensation plans.* For purposes of determining the amounts deferred before January 1, 2005, under an equity-based compensation plan, the rules of paragraph (a)(3)(ii) of this section governing account balance plans are applied except that the account balance is deemed to be the amount of the payment available to the service provider on December 31, 2004 (or that would be available to the service provider if the right were immediately exercisable) the right to which is earned and vested (as defined

in paragraph (a)(2) of this section) as of December 31, 2004. For this purpose, the payment available to the service provider excludes any exercise price or other amount that must be paid by the service provider.

(iv) *Earnings.* Earnings on amounts deferred under a plan before January 1, 2005, include only income (whether actual or notional) attributable to the amounts deferred under a plan as of December 31, 2004, or to such income. For example, notional interest earned under the plan on amounts deferred in an account balance plan as of December 31, 2004, generally will be treated as earnings on amounts deferred under the plan before January 1, 2005. Similarly, an increase in the amount of payment available pursuant to a stock option, stock appreciation right, or other equity-based compensation above the amount of payment available as of December 31, 2004, due to appreciation in the underlying stock after December 31, 2004, or accrual of other earnings such as dividends, is treated as earnings on the amount deferred. In the case of a nonaccount balance plan, earnings include the increase, due solely to the passage of time, in the present value of the future payments to which the service provider has obtained a legally binding right, the present value of which constituted the amounts deferred under the plan before January 1, 2005. Thus, for each year, there will be an increase (determined using the same interest rate used to determine the amounts deferred under the plan before January 1, 2005) resulting from the shortening of the discount period before the future payments are made, plus, if applicable, an increase in the present value resulting from the service provider's survivorship during the year. However, an increase in the potential benefits under a nonaccount balance plan due to, for example, an application of an increase in compensation after December 31, 2004, to a final average pay plan or subsequent eligibility for an early retirement subsidy, does not constitute earnings on the amounts deferred under the plan before January 1, 2005.

(v) *Definition of plan.* For purposes of paragraphs (a)(1), (2), and (3) of this section, the term "plan" has the mean-

ing provided in § 1.409A-1(c), except that the plan aggregation rules do not apply for purposes of the actuarial assumptions and methods used in paragraph (a)(3)(i) of this section. Accordingly, different reasonable actuarial assumptions and methods may be used to calculate the amounts deferred by a service provider in two different agreements, methods, programs, or other arrangements each of which constitutes a nonaccount balance plan.

(4) *Material modifications*—(i) *In general.* Except as otherwise provided, a modification of a plan is a material modification if a benefit or right existing as of October 3, 2004, is materially enhanced or a new material benefit or right is added, and such material enhancement or addition affects amounts earned and vested before January 1, 2005. Such material benefit enhancement or addition is a material modification whether it occurs pursuant to an amendment or to the service recipient's exercise of discretion under the terms of the plan. For example, an amendment to a plan to add a provision that payments of deferred amounts earned and vested before January 1, 2005, may be allowed upon request if service providers are required to forfeit 20 percent of the amount of the payment (a haircut) would be a material modification to the plan. Similarly, a material modification would occur if a service recipient exercised discretion to accelerate vesting of a benefit under the plan to a date on or before December 31, 2004. However, it is not a material modification for a service recipient to exercise discretion over the time and manner of payment of a benefit to the extent such discretion is provided under the terms of the plan as of October 3, 2004. It is not a material modification for a service provider to exercise a right permitted under the plan as in effect on October 3, 2004. The amendment of a plan to bring the plan into compliance with the provisions of section 409A will not be treated as a material modification. However, a plan amendment or the exercise of discretion under the terms of the plan that materially enhances an existing benefit or right or adds a new material benefit or right will be considered a

material modification even if the enhanced or added benefit would be permitted under section 409A. For example, the addition of a right to a payment upon an unforeseeable emergency of an amount earned and vested before January 1, 2005, would be considered a material modification. The reduction of an existing benefit is not a material modification. For example, the removal of a haircut provision generally would not constitute a material modification. The following modifications also are not material modifications for purposes of this paragraph (a)(4)(i):

(A) The establishment of or contributions to a trust or other arrangement from which benefits under the plan are to be paid is not a material modification of the plan, provided that the contribution to the trust or other arrangement would not otherwise cause an amount to be includible in the service provider's gross income.

(B) The modification of a provision requiring the immediate cancellation of a current deferral election, to require the cancellation of deferrals for the same length of time beginning with the first date at which the application of such cancellation would not violate section 409A (for example, the first date of the service provider's first taxable year following the cancellation).

(C) Compliance with a domestic relations order (as defined in § 1.409A-3(j)(4)(ii)) with respect to payments to an individual other than the service provider, or an amendment to a plan to require compliance with a domestic relations order with respect to payments to an individual other than the service provider.

(D) The modification of a plan providing a life annuity form of payment to permit an election between the existing life annuity form of payment and other forms of annuity payments that would be treated as a single form of payment with the existing life annuity form of payment under § 1.409A-2(b)(2)(ii).

(E) The modification of a grandfathered plan to add a limited cashout feature consistent with § 1.409A-3(j)(4)(v) (exception to prohibition on accelerated payments).

(ii) *Adoptions of new plans.* It is presumed that the adoption of a new plan

or the grant of an additional benefit under an existing plan after October 3, 2004, and before January 1, 2005, constitutes a material modification of a plan. However, the presumption may be rebutted by demonstrating that the adoption of the plan or grant of the additional benefit was consistent with the service recipient's historical compensation practices. For example, the presumption that the grant of a discounted stock option on November 1, 2004, is a material modification of a plan may be rebutted by demonstrating that the grant was consistent with the historic practice of granting substantially similar discounted stock options (both as to terms and amounts) each November for a significant number of years. Notwithstanding paragraph (a)(4)(i) of this section and this paragraph (a)(4)(ii), the grant of an additional benefit under an existing plan that consists of a deferral of additional compensation not otherwise provided under the plan as of October 3, 2004, will be treated as a material modification of the plan only as to the additional deferral of compensation, if the plan explicitly identifies the additional deferral of compensation and provides that the additional deferral of compensation is subject to section 409A. Accordingly, amendments to conform a plan to the requirements of section 409A with respect to deferrals under a plan occurring after December 31, 2004, will not constitute a material modification of the plan with respect to amounts deferred that are earned and vested on or before December 31, 2004, provided that there is no concurrent material modification with respect to the amount of, or rights to, amounts deferred that were earned and vested on or before December 31, 2004. Similarly, a grant of an additional benefit under a new plan adopted after October 3, 2004, and before January 1, 2005, will not be treated as a material modification of an existing plan to the extent that the new plan explicitly identifies additional deferrals of compensation and provides that the additional deferrals of compensation are subject to section 409A.

(iii) *Suspension or termination of a plan.* A cessation of deferrals under, or termination of, a plan, pursuant to the

provisions of such plan, is not a material modification. Amending a plan to provide participants an election whether to terminate participation in a plan generally constitutes a material modification of the plan.

(iv) *Changes to investment measures—account balance plans.* With respect to an account balance plan (as defined in § 1.409A-1(c)(2)(i)(A)), it is not a material modification to change a notional investment measure to, or to add to an existing investment measure, an investment measure that qualifies as a predetermined actual investment within the meaning of § 31.3121(v)(2)-1(d)(2) of this chapter or, for any given taxable year, reflects a reasonable rate of interest (determined in accordance with § 31.3121(v)(2)-1(d)(2)(i)(C) of this chapter).

(v) *Stock rights.* The modification, extension, or renewal of a stock right will not constitute a material modification of the stock right, if the modification, extension, or renewal would not be treated as the grant of a new stock right under § 1.409A-1(b)(5)(v)(A), and would not result in the stock right being treated as having had a deferral feature from the date of grant pursuant to § 1.409A-1(b)(5)(v)(C).

(vi) *Rescission of modifications.* Any modification to the terms of a plan that would inadvertently result in treatment as a material modification under this section is not considered a material modification of the plan to the extent the modification in the terms of the plan is rescinded by the earlier of a date before the right is exercised (if the change grants a discretionary right) or the last day of the taxable year of the service provider during which such change occurred. Thus, for example, if a service recipient modifies the terms of a plan on March 1 to allow an individual employee to elect a new change in the time or form of payment without realizing that such a change constituted a material modification that would subject the plan to the requirements of section 409A, and the modification is rescinded on November 1, then if no change in the time or form of payment has been made pursuant to the modification before November 1, the plan is

not considered materially modified under this section.

(vii) *Definition of plan.* For purposes of this paragraph (a)(4), the term “plan” has the same meaning provided in § 1.409A-1(c), except that the plan aggregation rules of § 1.409A-1(c)(2) do not apply.

(b) *Regulatory applicability date.* § 1.409A-1, § 1.409A-2, § 1.409A-3 and this section are applicable for taxable years beginning on or after January 1, 2008.

[T.D. 9321, 72 FR 19276, Apr. 17, 2007; 72 FR 41623, July 31, 2007]

§ 1.409(p)-1 Prohibited allocation of securities in an S corporation.

(a) *Organization of this section and definition—(1) Organization of this section.* Section 409(p) applies if a nonallocation year occurs in an ESOP that holds shares of stock of an S corporation that are employer securities. Paragraph (b) of this section sets forth the general rule under section 409(p)(1) and (2) prohibiting any accrual or allocation to a disqualified person in a nonallocation year. Paragraph (c) of this section sets forth rules under section 409(p)(3), (5), and (7) for determining whether a year is a nonallocation year, generally based on whether disqualified persons own at least 50 percent of the shares of the S corporation, either taking into account only the outstanding shares of the S corporation (including shares held by the ESOP) or taking into account both the outstanding shares and synthetic equity of the S corporation. Paragraphs (d), (e), and (f) of this section contain definitions of disqualified person under section 409(p)(4) and (5), deemed-owned ESOP shares under section 409(p)(4)(C), and synthetic equity under section 409(p)(6)(C). Paragraph (g) of this section contains a standard for determining when the principal purpose of the ownership structure of an S corporation constitutes an avoidance or evasion of section 409(p).

(2) *Definitions.* The following definitions apply for purposes of section 409(p) and this section, as well as for purposes of section 4979A, which imposes an excise tax on certain events.

(i) *Deemed-owned ESOP shares* has the meaning set forth in paragraph (e) of this section.

(ii) *Disqualified person* has the meaning set forth in paragraph (d) of this section.

(iii) *Employer* has the meaning set forth in § 1.410(b)-9.

(iv) *Employer securities* means employer securities within the meaning of section 409(l).

(v) *ESOP* means an employee stock ownership plan within the meaning of section 4975(e)(7).

(vi) *Prohibited allocation* has the meaning set forth in paragraph (b)(2) of this section.

(vii) *S corporation* means S corporation within the meaning of section 1361.

(viii) *Synthetic equity* has the meaning set forth in paragraph (f) of this section.

(b) *Prohibited allocation in a nonallocation year*—(1) *General rule.* Section 409(p)(1) provides that an ESOP holding employer securities consisting of stock in an S corporation must provide that no portion of the assets of the plan attributable to (or allocable in lieu of) such employer securities may, during a nonallocation year, accrue under the ESOP, or be allocated directly or indirectly under any plan of the employer (including the ESOP) meeting the requirements of section 401(a), for the benefit of any disqualified person.

(2) *Additional rules*—(i) *Prohibited allocation definition.* For purposes of section 409(p) and this section, a *prohibited allocation* means an impermissible accrual or an impermissible allocation. Whether there is impermissible accrual is determined under paragraph (b)(2)(ii) of this section and whether there is an impermissible allocation is determined under paragraph (b)(2)(iii) of this section. The amount of the prohibited allocation is equal to the sum of the amount of the impermissible accrual plus the amount of the impermissible allocation.

(ii) *Impermissible accrual.* There is an impermissible accrual to the extent that employer securities consisting of stock in an S corporation owned by the ESOP and any assets attributable thereto are held under the ESOP for the benefit of a disqualified person during a nonallocation year. For this purpose, assets attributable to stock in an S corporation owned by an ESOP in-

clude any distributions, within the meaning of section 1368, made on S corporation stock held in a disqualified person's account in the ESOP (including earnings thereon), plus any proceeds from the sale of S corporation securities held for a disqualified person's account in the ESOP (including any earnings thereon). Thus, in the event of a nonallocation year, all S corporation shares and all other ESOP assets attributable to S corporation stock, including distributions, sales proceeds, and earnings on either distributions or proceeds, held for the account of such disqualified person in the ESOP during that year are an impermissible accrual for the benefit of that person, whether attributable to contributions in the current year or in prior years.

(iii) *Impermissible allocation.* An impermissible allocation occurs during a nonallocation year to the extent that a contribution or other annual addition (within the meaning of section 415(c)(2)) is made with respect to the account of a disqualified person, or the disqualified person otherwise accrues additional benefits, directly or indirectly under the ESOP or any other plan of the employer qualified under section 401(a) (including a release and allocation of assets from a suspense account, as described at § 54.4975-11(c) and (d) of this chapter) that, for the nonallocation year, would have been added to the account of the disqualified person under the ESOP and invested in employer securities consisting of stock in an S corporation owned by the ESOP but for a provision in the ESOP that precludes such addition to the account of the disqualified person, and investment in employer securities during a nonallocation year.

(iv) *Effects of prohibited allocation*—(A) *Deemed distribution.* If a plan year is a nonallocation year, the amount of any prohibited allocation in the account of a disqualified person as of the first day of the plan year, as determined under this paragraph (b)(2), is treated as distributed from the ESOP (or other plan of the employer) to the disqualified person on the first day of the plan year. In the case of an impermissible accrual or impermissible allocation that is not in the account of the disqualified person as of the first day of

the plan year, the amount of the prohibited allocation, as determined under this paragraph (b)(2), is treated as distributed on the date of the prohibited allocation. Thus, the fair market value of assets in the disqualified person's account that constitutes an impermissible accrual or allocation is included in gross income (to the extent in excess of any investment in the contract allocable to such amount) and is subject to any additional income tax that applies under section 72(t). A deemed distribution under this paragraph (b)(2)(iv)(A) is not an actual distribution from the ESOP. Thus, the amount of the prohibited allocation is not an eligible rollover distribution under section 402(c). However, for purposes of applying sections 72 and 402 with respect to any subsequent distribution from the ESOP, the amount that the disqualified person previously took into account as income as a result of the deemed distribution is treated as investment in the contract.

(B) *Other effects.* If there is a prohibited allocation, then the plan fails to satisfy the requirements of section 4975(e)(7) and ceases to be an ESOP. In such a case, the exemption from the excise tax on prohibited transactions for loans to leveraged ESOPs contained in section 4975(d)(3) would cease to apply to any loan (with the result that the employer would owe an excise tax with respect to the previously exempt loan). As a result of these failures, the plan would lose the prohibited transaction exemption for loans to an ESOP under section 4975(d)(3) of the Code and section 408(b)(3) of Title I of the Employee Retirement Income Security Act of 1974, as amended (ERISA). Finally, a plan that does not operate in accordance with its terms to reflect section 409(p) fails to satisfy the qualification requirements of section 401(a), which would cause the corporation's S election to terminate under section 1362. See also section 4979A(a) which imposes an excise tax in certain events, including a prohibited allocation under section 409(p).

(C) *Example.* The rules of this paragraph (b)(2)(iv) are illustrated by the following example:

Example. (i) *Facts.* Corporation M, an S corporation under section 1361, establishes Plan

P as an ESOP in 2006, with a calendar plan year. Plan P is a qualified plan that includes terms providing that a prohibited allocation will not occur during a nonallocation year in accordance with section 409(p). On December 31, 2006, all of the 1,000 outstanding shares of stock of Corporation M, with a fair market value of \$30 per share, are contributed to Plan P and allocated among accounts established within Plan P for the benefit of Corporation M's three employees, individuals A, B, and C, based on their compensation for 2006. As a result, on December 31, 2006, participant A's account includes 800 of the shares (\$24,000); participant B's account includes 140 of the shares (\$4,200); and participant C's account includes the remaining 60 shares (\$1,800). The plan year 2006 is a nonallocation year, participants A and B are disqualified persons on December 31, 2006, and a prohibited allocation occurs for A and B on December 31, 2006.

(ii) *Conclusion.* On December 31, 2006, participants A and B each have a deemed distribution as a result of the prohibited allocation, resulting in income of \$24,000 for participant A and \$4,200 for participant B. Corporation M owes an excise tax under section 4979A, based on an amount involved of \$28,200. Plan P ceases to be an ESOP on the date of the prohibited allocation (December 31, 2006) and also fails to satisfy the qualification requirements of section 401(a) on that date due to the failure to comply with the provisions requiring compliance with section 409(p). As a result of having an ineligible shareholder under section 1361(b)(1)(B), Corporation M ceases to be an S corporation under section 1361 on December 31, 2006.

(v) *Prevention of prohibited allocation—*
(A) *Transfer of account to non-ESOP.* An ESOP may prevent a nonallocation year or a prohibited allocation during a nonallocation year by providing for assets (including S corporation securities) allocated to the account of a disqualified person (or a person reasonably expected to become a disqualified person absent a transfer described in this paragraph (b)(2)(v)(A)) to be transferred into a separate portion of the plan that is not an ESOP, as described in § 54.4975-11(a)(5) of this chapter, or to another plan of the employer that satisfies the requirements of section 401(a) and that is not an ESOP. Any such transfer must be effectuated by an affirmative action taken no later than the date of the transfer, and all subsequent actions (including benefit statements) generally must be consistent with the transfer having occurred on

that date. In the event of such a transfer involving S corporation securities, the recipient plan is subject to tax on unrelated business taxable income under section 512.

(B) *Relief from nondiscrimination requirement.* Pursuant to this paragraph (b)(2)(v)(B), if a transfer described in paragraph (b)(2)(v)(A) of this section is made from an ESOP to a separate portion of the plan or to another qualified plan of the employer that is not an ESOP, then both the ESOP and the plan or portion of a plan that is not an ESOP do not fail to satisfy the requirements of § 1.401(a)(4)-4 merely because of the transfer. Further, subsequent to the transfer, that plan will not fail to satisfy the requirements of § 1.401(a)(4)-4 merely because of the benefits, rights, and features with respect to the transferred benefits if those benefits, rights, and features would satisfy the requirements of § 1.401(a)(4)-4 if the mandatory disaggregation rule for ESOPs at § 1.410(b)-7(c)(2) did not apply.

(c) *Nonallocation year.* A year is a nonallocation year if it is described in the general definition in paragraph (c)(1) of this section or if the special rule of paragraph (c)(3) of this section applies.

(1) *General definition.* For purposes of section 409(p) and this section, a *nonallocation year* means a plan year of an ESOP during which, at any time, the ESOP holds any employer securities that are shares of an S corporation and either—

(i) Disqualified persons own at least 50 percent of the number of outstanding shares of stock in the S corporation (including deemed-owned ESOP shares); or

(ii) Disqualified persons own at least 50 percent of the sum of:

(A) The outstanding shares of stock in the S corporation (including deemed-owned ESOP shares); and

(B) The shares of synthetic equity in the S corporation owned by disqualified persons.

(2) *Attribution rules.* For purposes of this paragraph (c), the rules of section 318(a) apply to determine ownership of shares in the S corporation (including deemed-owned ESOP shares) and synthetic equity. However, for this purpose, section 318(a)(4) (relating to op-

tions to acquire stock) is disregarded and, in applying section 318(a)(1), the members of an individual's family include members of the individual's family under paragraph (d)(2) of this section. In addition, an individual is treated as owning deemed-owned ESOP shares of that individual notwithstanding the employee trust exception in section 318(a)(2)(B)(i). If the attribution rules in paragraph (f)(1) of this section apply, then the rules of paragraph (f)(1) of this section are applied before (and in addition to) the rules of this paragraph (c)(2).

(3) *Special rule for avoidance or evasion.* (i) Any ownership structure described in paragraph (g)(3) of this section results in a nonallocation year. In addition, each individual referred to in paragraph (g)(3) of this section is treated as a disqualified person and the individual's interest in the separate entity described in paragraph (g)(3) of this section is treated as synthetic equity.

(ii) Pursuant to section 409(p)(7)(B), the Commissioner, in revenue rulings, notices, and other guidance published in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(b) of this chapter), may provide that a nonallocation year occurs in any case in which the principal purpose of the ownership structure of an S corporation constitutes an avoidance or evasion of section 409(p). For any year that is a nonallocation year under this paragraph (c)(3), the Commissioner may treat any person as a disqualified person. See paragraph (g) of this section for guidance regarding when the principal purpose of an ownership structure of an S corporation involving synthetic equity constitutes an avoidance or evasion of section 409(p).

(4) *Special rule for certain stock rights.*

(i) For purposes of paragraph (c)(1) of this section, a person is treated as owning stock if the person has an exercisable right to acquire the stock, the stock is both issued and outstanding, and the stock is held by persons other than the ESOP, the S corporation, or a related entity (as defined in paragraph (f)(3) of this section).

(ii) This paragraph (c)(4) applies only if treating persons as owning the shares described in paragraph (c)(4)(i) of this section results in a nonallocation year. This paragraph (c)(4) does

not apply to a right to acquire stock of an S corporation held by a shareholder that is subject to Federal income tax that, under § 1.1361-1(l)(2)(iii)(A) or (l)(4)(iii)(C), would not be taken into account in determining if an S corporation has a second class of stock, provided that a principal purpose of the right is not the avoidance or evasion of section 409(p). Under the last sentence of paragraph (f)(2)(i) of this section, this paragraph (c)(4)(ii) does not apply for purposes of determining ownership of deemed-owned ESOP shares or whether an interest constitutes synthetic equity.

(5) *Application with respect to shares treated as owned by more than one person.* For purposes of applying paragraph (c)(1) of this section, if, by application of the rules of paragraph (c)(2), (c)(4), or (f)(1) of this section, any share is treated as owned by more than one person, then that share is counted as a single share and that share is treated as owned by disqualified persons if any of the owners is a disqualified person.

(6) *Effect of nonallocation year.* See paragraph (b) of this section for a prohibition applicable during a nonallocation year. See also section 4979A for an excise tax applicable in certain cases, including section 4979A(a)(3) and (4) which applies during a nonallocation year (whether or not there is a prohibited allocation during the year).

(d) *Disqualified persons.* A person is a disqualified person if the person is described in paragraph (d)(1), (d)(2), or (d)(3) of this section.

(1) *General definition.* For purposes of section 409(p) and this section, a *disqualified person* means any person for whom—

(i) The number of such person's deemed-owned ESOP shares of the S corporation is at least 10 percent of the number of the deemed-owned ESOP shares of the S corporation;

(ii) The aggregate number of such person's deemed-owned ESOP shares and synthetic equity shares of the S corporation is at least 10 percent of the sum of—

(A) The total number of deemed-owned ESOP shares of the S corporation; and

(B) The person's synthetic equity shares of the S corporation;

(iii) The aggregate number of the S corporation's deemed-owned ESOP shares of such person and of the members of such person's family is at least 20 percent of the number of deemed-owned ESOP shares of the S corporation; or

(iv) The aggregate number of the S corporation's deemed-owned ESOP shares and synthetic equity shares of such person and of the members of such person's family is at least 20 percent of the sum of—

(A) The total number of deemed-owned ESOP shares of the S corporation; and

(B) The synthetic equity shares of the S corporation owned by such person and the members of such person's family.

(2) *Treatment of family members; definition—*(i) *Rule.* Each member of the family of any person who is a disqualified person under paragraph (d)(1)(iii) or (iv) of this section and who owns any deemed-owned ESOP shares or synthetic equity shares is a disqualified person.

(ii) *General definition.* For purposes of section 409(p) and this section, *member of the family* means, with respect to an individual—

(A) The spouse of the individual;

(B) An ancestor or lineal descendant of the individual or the individual's spouse;

(C) A brother or sister of the individual or of the individual's spouse and any lineal descendant of the brother or sister; and

(D) The spouse of any individual described in paragraph (d)(2)(ii)(B) or (C) of this section.

(iii) *Spouse.* A spouse of an individual who is legally separated from such individual under a decree of divorce or separate maintenance is not treated as such individual's spouse under paragraph (d)(2)(ii) of this section.

(3) *Special rule for certain nonallocation years.* See paragraph (c)(3) of this section (relating to avoidance or evasion of section 409(p)) for special rules under which certain persons are treated as disqualified persons.

(4) *Example.* The rules of this paragraph (d) are illustrated by the following examples:

Example 1. (i) Facts. An S corporation has 800 outstanding shares, of which 100 are owned by individual O and 700 are held in an employee stock ownership plan (ESOP) during 2006, including 200 shares held in the ESOP account of O, 65 shares held in the ESOP account of participant P, 65 shares held in the ESOP account of participant Q who is P's spouse, and 14 shares held in the ESOP account of R, who is the daughter of P and Q. There are no unallocated suspense account shares in the ESOP. The S corporation has no synthetic equity.

(ii) Conclusion. Under paragraph (d)(1)(i) of this section, O is a disqualified person during 2006 because O's account in the ESOP holds at least 10% of the shares owned by the ESOP (200 is 28.6% of 700). During 2006, neither P, Q, nor R is a disqualified person under paragraph (d)(1)(i) of this section, because each of their accounts holds less than 10% of the shares owned by the ESOP. However, each of P, Q, and R is a disqualified person under paragraph (d)(1)(iii) of this section because P and members of P's family own at least 20% of the deemed-owned ESOP shares (144 (the sum of 65, 65 and 14) is 20.6% of 700). As a result, disqualified persons own at least 50% of the outstanding shares of the S corporation during 2006 (O's 100 directly owned shares, O's 200 deemed-owned shares, P's 65 deemed-owned shares, Q's 65 deemed-owned shares, and R's 14 deemed-owned shares are 55.5% of 800).

Example 2. (i) Facts. An S corporation has shares that are owned by an ESOP and various individuals. Individuals S and T are married and have a son, U. Individuals V and W are married and have a daughter, X. Individuals U and X are married. Individual V has a brother Y. Their percentages of the deemed-owned ESOP shares of the S corporation are as follows: T has 6%; U has 7%; and V has 8%. Neither S, W, X, nor Y has any deemed-owned ESOP shares and the S corporation has no synthetic equity. However, individual S and individual Y each own directly a number of shares of the outstanding shares of the S corporation.

(ii) Conclusion. In this example, individual U is a disqualified person under paragraph (d)(1) of this section (because U's family consists of S, T, U, V, W, and X, and, in the aggregate, those persons own more than 20% of the deemed-owned ESOP shares) and individual X is also a disqualified person under paragraph (d)(1) of this section (because T's family consists of S, T, U, V, W, and X, and, in the aggregate, those persons own more than 20% of the deemed-owned ESOP shares). Further, individuals T and V are each a disqualified person under paragraph (d)(2) of this section because each is a member of a family that includes one or more disqualified persons and each has deemed-owned ESOP shares. However, individuals S, W, and Y are not disqualified persons under this paragraph

(d). For example, S does not own more than 10% of the deemed-owned ESOP shares, and S's family, which consists of S, T, U, and X, owns, in the aggregate, only 13% of the deemed-owned ESOP shares (X's parents are not members of S's family because the family members of a person do not include the parents-in-law of the person's descendants). Further, note that, for purposes of determining whether the ESOP has a nonallocation year under paragraph (c) of this section, the shares directly owned by S and Y would be taken into account as shares owned by disqualified persons under the attribution rules in paragraph (c)(2) of this section.

(e) Deemed-owned ESOP shares. For purposes of section 409(p) and this section, a person is treated as owning his or her deemed-owned ESOP shares. Deemed-owned ESOP shares owned by a person mean, with respect to any person—

(1) Any shares of stock in the S corporation constituting employer securities that are allocated to such person's account under the ESOP; and

(2) Such person's share of the stock in the S corporation that is held by the ESOP but is not allocated to the account of any participant or beneficiary (with such person's share to be determined in the same proportion as the shares released and allocated from a suspense account, as described at § 54.4975-11(c) and (d) of the Excise Tax Regulations, under the ESOP for the most recently ended plan year for which there were shares released and allocated from a suspense account, or if there has been no such prior release and allocation from a suspense account, then determined in proportion to a reasonable estimate of the shares that would be released and allocated in the first year of a loan repayment).

(f) Synthetic equity and rights to acquire stock of the S corporation—(1) Ownership of synthetic equity. For purposes of section 409(p) and this section, synthetic equity means the rights described in paragraph (f)(2) of this section. Synthetic equity is treated as owned by the person that has any of the rights specified in paragraph (f)(2) of the section. In addition, the attribution rules as set forth in paragraph (c)(2) of this section apply for purposes of attributing ownership of synthetic equity.

(2) *Synthetic equity*—(i) *Rights to acquire stock of the S corporation*—(A) *General rule.* Synthetic equity includes any stock option, warrant, restricted stock, deferred issuance stock right, stock appreciation right payable in stock, or similar interest or right that gives the holder the right to acquire or receive stock of the S corporation in the future. Rights to acquire stock in an S corporation with respect to stock that is, at all times during the period when such rights are effective, both issued and outstanding, and held by a person other than the ESOP, the S corporation, or a related entity are not synthetic equity but only if that person is subject to federal income taxes. (See also paragraph (c)(4) of this section.)

(B) *Exception for certain rights of first refusal.* A right of first refusal to acquire stock held by an ESOP is not treated as a right to acquire stock of an S corporation under this paragraph if the right to acquire stock would not be taken into account under § 1.1361-1(l)(2)(iii)(A) in determining if an S corporation has a second class of stock and the price at which the stock is acquired under the right of first refusal is not less than the price determined under section 409(h). See § 54.4975-11(d)(5) of the Excise Tax Regulations. The right of first refusal must also comply with the requirements of § 54.4975-7(b)(9) of the Excise Tax Regulations. This paragraph (f)(2)(i)(B) does not apply if, based on the facts and circumstances, the Commissioner finds that the right to acquire stock held by the ESOP constitutes an avoidance or an evasion of section 409(p). See also section 408(d) of ERISA, under which the exemption provided by section 408(e) of ERISA (and the related exemption at section 4975(d)(13) of the Code) does not apply to an owner-employee, including an employee or officer of an S corporation who is a 5 percent owner.

(ii) *Special rule for certain stock rights.* Synthetic equity also includes a right to a future payment (payable in cash or any other form other than stock of the S corporation) from an S corporation that is based on the value of the stock of the S corporation, such as appreciation in such value. Thus, for example, synthetic equity includes a stock appreciation right with respect to stock

of an S corporation that is payable in cash or a phantom stock unit with respect to stock of an S corporation that is payable in cash.

(iii) *Rights to acquire interests in or assets of an S corporation or a related entity.* Synthetic equity includes a right to acquire stock or other similar interests in a related entity to the extent of the S corporation's ownership. Synthetic equity also includes a right to acquire assets of an S corporation or a related entity other than either rights to acquire goods, services, or property at fair market value in the ordinary course of business or fringe benefits excluded from gross income under section 132.

(iv) *Special rule for nonqualified deferred compensation.* (A) Synthetic equity also includes any of the following with respect to an S corporation or a related entity: any remuneration to which section 404(a)(5) applies; remuneration for which a deduction would be permitted under section 404(a)(5) if separate accounts were maintained; any right to receive property, as defined in § 1.83-3(e) of the Income Tax Regulations (including a payment to a trust described in section 402(b) or to an annuity described in section 403(c)) in a future year for the performance of services; any transfer of property in connection with the performance of services to which section 83 applies to the extent that the property is not substantially vested within the meaning of § 1.83-3(i) by the end of the plan year in which transferred; and a split-dollar life insurance arrangement under § 1.61-22(b) entered into in connection with the performance of services (other than one under which, at all times, the only economic benefit that will be provided under the arrangement is current life insurance protection as described in § 1.61-22(d)(3)). Synthetic equity also includes any other remuneration for services under a plan, method, or arrangement deferring the receipt of compensation to a date that is after the 15th day of the 3rd calendar month after the end of the entity's taxable year in which the related services are rendered. However, synthetic equity does not include benefits under a plan that is an eligible retirement plan

within the meaning of section 402(c)(8)(B).

(B) For purposes of applying paragraph (f)(2)(iv)(A) of this section with respect to an ESOP, synthetic equity does not include any interest described in such paragraph (f)(2)(iv)(A) of this section to the extent that—

(1) The interest is nonqualified deferred compensation (within the meaning of section 3121(v)(2)) that was outstanding on December 17, 2004;

(2) The interest is an amount that was taken into account (within the meaning of § 31.3121(v)(2)-1(d) of this chapter) prior to January 1, 2005, for purposes of taxation under chapter 21 of the Internal Revenue Code (or income attributable thereto); and

(3) The interest was held before the first date on which the ESOP acquires any employer securities.

(v) *No overlap among shares of deemed-owned ESOP shares or synthetic equity.* Synthetic equity under this paragraph (f)(2) does not include shares that are deemed-owned ESOP shares (or any rights with respect to deemed-owned ESOP shares to the extent such rights are specifically provided under section 409(h)). In addition, synthetic equity under a specific subparagraph of this paragraph (f)(2) does not include anything that is synthetic equity under a preceding provision of paragraph (f)(2)(i), (ii), (iii), or (iv) of this section.

(3) *Related entity.* For purposes of this paragraph (f), *related entity* means any entity in which the S corporation holds an interest and which is a partnership, a trust, an eligible entity that is disregarded as an entity that is separate from its owner under § 301.7701-3 of this chapter, or a qualified subchapter S subsidiary under section 1361(b)(3).

(4) *Number of synthetic shares—(i) Synthetic equity determined by reference to S corporation shares.* In the case of synthetic equity that is determined by reference to shares of stock of the S corporation, the person who is entitled to the synthetic equity is treated as owning the number of shares of stock deliverable pursuant to such synthetic equity. In the case of synthetic equity that is determined by reference to shares of stock of the S corporation, but for which payment is made in cash or other property (besides stock of the

S corporation), the number of shares of synthetic equity treated as owned is equal to the number of shares of stock having a fair market value equal to the cash or other property (disregarding lapse restrictions as described in § 1.83-3(i)). Where such synthetic equity is a right to purchase or receive S corporation shares, the corresponding number of shares of synthetic equity is determined without regard to lapse restrictions as described in § 1.83-3(i) or to any amount required to be paid in exchange for the shares. Thus, for example, if a corporation grants an employee of an S corporation an option to purchase 100 shares of the corporation's stock, exercisable in the future only after the satisfaction of certain performance conditions, the employee is the deemed owner of 100 synthetic equity shares of the corporation as of the date the option is granted. If the same employee were granted 100 shares of restricted S corporation stock (or restricted stock units), subject to forfeiture until the satisfaction of performance or service conditions, the employee would likewise be the deemed owner of 100 synthetic equity shares from the grant date. However, if the same employee were granted a stock appreciation right with regard to 100 shares of S corporation stock (whether payable in stock or in cash), the number of synthetic equity shares the employee is deemed to own equals the number of shares having a value equal to the appreciation at the time of measurement (determined without regard to lapse restrictions).

(ii) *Synthetic equity determined by reference to shares in a related entity.* In the case of synthetic equity that is determined by reference to shares of stock (or similar interests) in a related entity, the person who is entitled to the synthetic equity is treated as owning shares of stock of the S corporation with the same aggregate value as the number of shares of stock (or similar interests) of the related entity (with such value determined without regard to any lapse restriction as defined at § 1.83-3(i)).

(iii) *Other synthetic equity—(A) General rule.* In the case of any synthetic equity to which neither paragraph (f)(4)(i) of this section nor paragraph

(f)(4)(ii) of this section apply, the person who is entitled to the synthetic equity is treated as owning on any date a number of shares of stock in the S corporation equal to the present value (on that date) of the synthetic equity (with such value determined without regard to any lapse restriction as defined at § 1.83-3(i)) divided by the fair market value of a share of the S corporation's stock as of that date.

(B) *Use of annual or more frequent determination dates.* A year is a nonallocation year if the thresholds in paragraph (c) of this section are met at any time during that year. However, for purposes of this paragraph (f)(4)(iii), an ESOP may provide that the number of shares of S corporation stock treated as owned by a person who is entitled to synthetic equity to which this paragraph (f)(4)(iii) applies is determined annually (or more frequently), as of the first day of the ESOP's plan year or as of any other reasonable determination date or dates during a plan year. If the ESOP so provides, the number of shares of synthetic equity to which this paragraph (f)(4)(iii) applies that are treated as owned by that person for any period from a given determination date through the date immediately preceding the next following determination date is the number of shares treated as owned on the given determination date.

(C) *Use of triennial recalculations.* (1) Although an ESOP must have a determination date that is no less frequent than annually, if the terms of the ESOP so provide, then the number of shares of synthetic equity with respect to grants of synthetic equity to which this paragraph (f)(4)(iii) applies may be fixed for a specified period from a determination date identified under the ESOP through the day before a determination date that is not later than the third anniversary of the identified determination date. Thus, the ESOP must provide for the number of shares of synthetic equity to which this paragraph (f)(4)(iii) applies to be re-determined not less frequently than every three years, based on the S corporation share value on a determination date that is not later than the third anniversary of the identified determination date and the aggregate present value of

the synthetic equity to which this paragraph (f)(4)(iii) applies (including all grants made during the three-year period) on that determination date.

(2) However, additional accruals, allocations, or grants (to which this paragraph (f)(4)(iii) applies) that are made during such three-year period are taken into account on each determination date during that period, based on the number of synthetic equity shares resulting from the additional accrual, allocation, or grant (determined as of the determination date on or next following the date of the accrual, allocation, or grant). See *Example 3* of paragraph (h) of this section for an example illustrating this paragraph (f)(4)(iii)(C).

(3) If, as permitted under this paragraph (f)(4)(iii)(C), an ESOP provides for the number of shares of synthetic equity to be fixed for a specified period from a determination date to a subsequent determination date, then that subsequent determination date can be changed to a new determination date, subject to the following conditions:

(i) The change in the subsequent determination date must be effectuated through a plan amendment adopted before the new determination date;

(ii) The new determination date must be earlier than the prior determination date (that is, the new determination date must be earlier than the determination date applicable in the absence of the plan amendment);

(iii) The conditions in paragraph (f)(4)(iii)(C)(2) of this section must be satisfied measured from the new determination date; and

(iv) Except to the extent permitted by the Commissioner in revenue rulings, notices, or other guidance published in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(b) of this chapter), the change must be adopted in connection with either a change in the plan year of the ESOP or a merger, consolidation, or transfer of plan assets of the ESOP under section 414(l) (and the new determination date must be consistent with that plan year change or section 414(l) event).

(4) *Conditions for application of rules.* This paragraph (f)(4)(iii)(C) only applies with respect to grants of synthetic equity to which this paragraph

(f)(4)(iii) applies. In addition, paragraph (f)(4)(iii)(C) of this section applies only if the fair market value of a share of the S corporation securities on any determination date is not unrepresentative of the value of the S corporation securities throughout the rest of the plan year and only if the terms of the ESOP include provisions conforming to paragraph (f)(4)(iii)(C)(I) of this section which are consistently used by the ESOP for all persons. In addition, paragraph (f)(4)(iii)(C)(I) of this section applies only if the terms of the ESOP include provisions conforming to paragraphs (f)(4)(iii)(C)(I) of this section which are consistently used by the ESOP for all persons.

(iv) *Adjustment of number of synthetic equity shares where ESOP owns less than 100 percent of S corporation.* The number of synthetic shares otherwise determined under this paragraph (f)(4) is decreased ratably to the extent that shares of the S corporation are owned by a person who is not an ESOP and who is subject to Federal income taxes. For example, if an S corporation has 200 outstanding shares, of which individual A owns 50 shares and the ESOP owns the other 150 shares, and individual B would be treated under this paragraph (f)(4) as owning 100 synthetic equity shares of the S corporation but for this paragraph (f)(4)(iv), then, under the rule of this paragraph (f)(4)(iv), the number of synthetic shares treated as owned by B under this paragraph (f)(4) is decreased from 100 to 75 (because the ESOP only owns 75 percent of the outstanding stock of the S corporation, rather than 100 percent).

(v) *Special rule for shares with greater voting power than ESOP shares.* Notwithstanding any other provision of this paragraph (f)(4), if a synthetic equity right includes (directly or indirectly) a right to purchase or receive shares of S corporation stock that have per-share voting rights greater than the per-share voting rights of one or more shares of S corporation stock held by the ESOP, then the number of shares of deemed owned synthetic equity attributable to such right is not less than the number of shares that would have the same voting rights if the shares had the same per-share voting rights as shares held by the ESOP

with the least voting rights. For example, if shares of S corporation stock held by the ESOP have one voting right per share, then an individual who holds an option to purchase one share with 100 voting rights is treated as owning 100 shares of synthetic equity.

(g) *Avoidance or evasion of section 409(p) involving synthetic equity*—(1) *General rule.* Paragraph (g)(2) of this section sets forth a standard for determining whether the principal purpose of the ownership structure of an S corporation involving synthetic equity constitutes an avoidance or evasion of section 409(p). Paragraph (g)(3) of this section identifies certain specific ownership structures that constitute an avoidance or evasion of section 409(p). See also paragraph (c)(3) of this section for a rule under which the ownership structures in paragraph (g)(3) of this section result in a nonallocation year for purposes of section 409(p).

(2) *Standard for determining when there is an avoidance or evasion of section 409(p) involving synthetic equity.* For purposes of section 409(p) and this section, whether the principal purpose of the ownership structure of an S corporation involving synthetic equity constitutes an avoidance or evasion of section 409(p) is determined by taking into account all the surrounding facts and circumstances, including all features of the ownership of the S corporation's outstanding stock and related obligations (including synthetic equity), any shareholders who are taxable entities, and the cash distributions made to shareholders, to determine whether, to the extent of the ESOP's stock ownership, the ESOP receives the economic benefits of ownership in the S corporation that occur during the period that stock of the S corporation is owned by the ESOP. Among the factors indicating that the ESOP receives those economic benefits include shareholder voting rights, the right to receive distributions made to shareholders, and the right to benefit from the profits earned by the S corporation, including the extent to which actual distributions of profits are made from the S corporation to the ESOP and the extent to which the ESOP's ownership interest in undistributed profits and future profits is subject to

Internal Revenue Service, Treasury

§ 1.409(p)-1

dilution as a result of synthetic equity. For example, the ESOP's ownership interest is not subject to dilution if the total amount of synthetic equity is a relatively small portion of the total number of shares and deemed-owned shares of the S corporation.

(3) *Specific transactions that constitute an avoidance or evasion of section 409(p) involving segregated profits.* Taking into account the standard in paragraph (g)(2) of this section, the principal purpose of the ownership structure of an S corporation constitutes an avoidance or evasion of section 409(p) in any case in which—

(i) The profits of the S corporation generated by the business activities of a specific individual or individuals are not provided to the ESOP, but are instead substantially accumulated and held for the benefit of the individual or individuals on a tax-deferred basis within an entity related to the S corporation, such as a partnership, trust, or corporation (such as in a subsidiary that is a disregarded entity), or any other method that has the same effect of segregating profits for the benefit of such individual or individuals (such as nonqualified deferred compensation described in paragraph (f)(2)(iv) of this section);

(ii) The individual or individuals for whom profits are segregated have

rights to acquire 50 percent or more of those profits directly or indirectly (for example, by purchase of the subsidiary); and

(iii) A nonallocation year would occur if this section were separately applied with respect to either the separate entity or whatever method has the effect of segregating profits of the individual or individuals, treating such entity as a separate S corporation owned by an ESOP (or in the case of any other method of segregation of profits by treating those profits as the only assets of a separate S corporation owned by an ESOP).

(h) *Examples.* The rules of this section are illustrated by the following examples:

Example 1. Relating to determination of disqualified persons and nonallocation year if there is no synthetic equity. (i) *Facts.* Corporation X is a calendar year S corporation that maintains an ESOP. X has a single class of common stock, of which there are a total of 1,200 shares outstanding. X has no synthetic equity. In 2006, individual A, who is not an employee of X (and is not related to any employee of X), owns 100 shares directly, B, who is an employee of X, owns 100 shares directly, and the remaining 1,000 shares are owned by an ESOP maintained by X for its employees. The ESOP's 1,000 shares are allocated to the accounts of individuals who are employees of X (none of whom are related), as set forth in columns 1 and 2 in the following table:

1 Shareholders	2 Deemed- owned ESOP shares (total of 1,000)	3 Percentage deemed- owned ESOP shares	4 Disqualified person
B	330	33	Yes.
C	145	14.5	Yes.
D	75	7.5	No.
E	30	3	No.
F	20	2	No.
Other participants	¹ 400	(²)	No.

¹None exceed 10 shares.

²1% or less.

(ii) *Conclusion with respect to disqualified persons.* As shown in column 4 in the table contained in paragraph (i) of *Example 1*, individuals B and C are disqualified persons for 2006 under paragraph (d)(1) of this section because each owns at least 10% of X's deemed-owned ESOP shares. However, the synthetic equity shares owned by any person do not affect the calculation for any other person's ownership of shares.

(iii) *Conclusion with respect to nonallocation year.* 2006 is not a nonallocation year under

section 409(p) because disqualified persons do not own at least 50% of X's outstanding shares (the 100 shares owned directly by B, B's 330 deemed-owned ESOP shares, plus C's 145 deemed-owned ESOP shares equal only 47.9% of the 1,200 outstanding shares of X).

Example 2. Relating to determination of disqualified persons and nonallocation year if there is synthetic equity. (i) *Facts.* The facts are the same as in *Example 1*, except that, as

§ 1.409(p)-1

26 CFR Ch. I (4-1-08 Edition)

shown in column 4 of the table in this *Example 2*, individuals E and F have options to ac-

quire 110 and 130 shares, respectively, of the common stock of X from X:

1 Shareholder	2 Deemed- owned ESOP shares (total of 1,000)	3 Percentage deemed- owned ESOP shares	4 Options (240)	5 Shareholder percentage of deemed-owned ESOP plus synthetic eq- uity shares	6 Disqualified person
B	330	33			Yes (col. 3).
C	145	14.5			Yes (col. 3).
D	75	7.5			No.
E	30	3	110	11.1% ([30+ 91.7] di- vided by 1,091.7).	Yes (col. 5).
F	20	2	130	11.6% ([20 +108.3] di- vided by 1,108.3).	Yes (col. 5).
Other participants	¹ 400	(²)			No.

¹ None exceeds 10 shares.

² 1% or less.

(ii) *Conclusion with respect to disqualified persons.* Individual E's synthetic equity shares are counted in determining whether E is a disqualified person for 2006, and individual F's synthetic equity shares are counted in determining whether F is a disqualified person for 2006. Applying the rule of paragraph (f)(4)(iv) of this section, E's option to acquire 110 shares of the S corporation converts under paragraph (f)(4)(iv) of this section, into 91.7 shares of synthetic equity (110 times the ratio of the 1,000 deemed-owned ESOP shares to the sum of the 1,000 deemed-owned ESOP shares plus the 200 shares held outside the ESOP by A and B). Similarly, F's option to acquire 130 shares of the S corporation converts into 108.3 shares of synthetic equity (130 times the ratio of the 1,000 deemed-owned ESOP shares to the sum of the 1,000 deemed-owned ESOP shares plus the 200 shares held outside the ESOP by A and B). However, the synthetic equity shares owned by any person do not affect the calculation for any other person's ownership of shares. Accordingly, as shown in column 6 in the table contained in paragraph (i) of *Example 2*, individuals B, C, E, and F are disqualified persons for 2006.

(iii) *Conclusion with respect to nonallocation year.* The 100 shares owned directly by B, B's 330 deemed-owned ESOP shares, C's 145 deemed-owned ESOP shares, E's 30 deemed-owned ESOP shares, E's 91.7 synthetic equity shares, F's 20 deemed-owned ESOP shares, plus F's 108.3 synthetic equity shares total 825, which equals 58.9% of 1,400, which is the sum of the 1,200 outstanding shares of X and

the 200 shares of synthetic equity shares of X held by disqualified persons. Thus, 2006 is a nonallocation year for X's ESOP under section 409(p) because disqualified persons own at least 50% of the total shares of outstanding stock of X and the total synthetic equity shares of X held by disqualified persons. In addition, independent of the preceding conclusion, 2006 would be a nonallocation year because disqualified persons own at least 50% of X's outstanding shares because the 100 shares owned directly by B, B's 330 deemed-owned ESOP shares, C's 145 deemed-owned ESOP shares, E's 30 deemed-owned ESOP shares, plus F's 20 deemed-owned ESOP shares equal 52.1% of the 1,200 outstanding shares of X.

Example 3. Relating to determination of number of shares of synthetic equity. (i) *Facts.* Corporation Y is a calendar year S corporation that maintains an ESOP. Y has a single class of common stock, of which there are a total of 1,000 shares outstanding, all of which are owned by the ESOP. Y has no synthetic equity, except for four grants of nonqualified deferred compensation that are made to an individual during the period from 2005 through 2011, as set forth in column 2 in the following table. The ESOP provides for the special rules in paragraph (f)(4)(iii) of this section to determine the number of shares of synthetic equity owned by that individual with a determination date of January 1 and the triennial rule redetermining value, as shown in columns 4 and 5:

¹ Determination date	² Present value of nonqualified deferred compensation on determination date	³ Share value on determination date	⁴ New shares of synthetic equity on determination date	⁵ Aggregate number of synthetic equity shares on determination date
January 1, 2005	A grant is made on January 1, 2005, with a present value of \$1,000. An additional grant of nonqualified deferred compensation with a present value of \$775 is made on March 1, 2005.	\$10 per share	100	100
January 1, 2006	An additional grant is made on December 31, 2005, which has a present value of \$800 on January 1, 2006. The March 1, 2005, grant has a present value on January 1, 2006, of \$800.	\$8 per share	200	300
January 1, 2007	No new grants made	\$12 per share		300
January 1, 2008	An additional grant is made on December 31, 2007, which has a present value of \$3,000 on January 1, 2008. The grants made during 2005 through 2007 have an aggregate present value on January 1, 2008, of \$3,750.	\$15 per share	200	450
January 1, 2009	No new grants are made	\$11 per share		450
January 1, 2010	No new grants are made	\$22 per share		450
January 1, 2011	No new grants are made. The grants made during 2005 through 2008 have an aggregate present value on January 1, 2011, of \$7,600.	\$20 per share		380

§ 1.409(p)-1T

26 CFR Ch. I (4-1-08 Edition)

(ii) *Conclusion.* The grant made on January 1, 2005, is treated as 100 shares until the determination date in 2008. The grant made on March 1, 2005, is not taken into account until the 2006 determination date and its present value on that date, along with the then present value of the grant made on December 31, 2005, is treated as a number of shares that are based on the \$8 per share value on the 2006 determination date, with the resulting number of shares continuing to apply until the determination date in 2008. On the January 1, 2008, determination date, the grant made on the preceding day is taken into account at its present value of \$3,000 on January 1, 2008 and the \$15 per share value on that date with the resulting number of shares (200) continuing to apply until the next determination date. In addition, on the January 1, 2008, determination date, the number of shares determined under other grants made between January 1, 2005 and December 31, 2007, must be revalued. Accordingly, the aggregate value of all nonqualified deferred compensation granted during that period is determined to be \$3750 on January 1, 2008, and the corresponding number of shares of synthetic equity based on the \$15 per share value is determined to be 250 shares on the 2008 determination date, with the resulting aggregate number of shares (450) continuing to apply until the determination date in 2011. On the January 1, 2011, determination date, the aggregate value of all nonqualified deferred compensation is determined to be \$7,600 and the corresponding number of shares of synthetic equity based on the \$20 per share value on the 2011 determination date is determined to be 380 shares (with the resulting number of shares continuing to apply until the day before the determination date in 2014, assuming no further grants are made).

(i) *Effective dates—(1) Statutory effective date.* (i) Except as otherwise provided in paragraph (i)(1)(ii) of this section, section 409(p) applies for plan years ending after March 14, 2001.

(ii) If an ESOP holding stock in an S corporation was established on or before March 14, 2001, and the election under section 1362(a) with respect to that S corporation was in effect on March 14, 2001, section 409(p) applies for plan years beginning on or after January 1, 2005.

(2) *Regulatory effective date.* This section applies for plan years beginning on or after January 1, 2006. For plan years beginning before January 1, 2006, § 1.409(p)-1T (as it appeared in the April

1, 2005, edition of 26 CFR part 1) applies.

[T.D. 9302, 71 FR 76137, Dec. 20, 2006]

§ 1.409(p)-1T Prohibited allocations of securities in an S corporation (temporary).

(a) *Organization of this section.* Section 409(p) applies if a nonallocation year occurs in an employee stock ownership plan (ESOP), as defined in section 4975(e)(7), that holds shares of stock of an S corporation, as defined in section 1361, that are employer securities as defined in section 409(l). Paragraph (b) of this section sets forth the general rule under section 409(p)(1) and (2) prohibiting any accrual or allocation to a disqualified person in a nonallocation year. Paragraph (c) of this section sets forth rules under section 409(p)(3), (5), and (7) for determining whether a year is a nonallocation year, generally based on whether disqualified persons own at least 50 percent of the shares of the S corporation, either taking into account only the outstanding shares of the S corporation (including shares held by the ESOP) or taking into account both the outstanding shares and synthetic equity of the S corporation. Paragraphs (d), (e), and (f) of this section contain definitions of disqualified person under section 409(p)(4) and (5), deemed-owned ESOP shares under section 409(p)(4)(C), and synthetic equity under section 409(p)(6)(C). Paragraph (g) of this section contains a standard for determining when the principal purpose of the ownership structure of an S corporation constitutes an avoidance or evasion of section 409(p). The definitions used in section 409(p) and this section are also applicable for purposes of section 4979A, which imposes an excise tax on certain events, including a nonallocation year under section 409(p).

(b) *Prohibited allocation in a nonallocation year—(1) General rule.* An ESOP holding employer securities consisting of stock in an S corporation must provide that no portion of the assets of the plan attributable to (or allocable in lieu of) such employer securities may, during a nonallocation year, accrue under the ESOP, or be allocated directly or indirectly under any plan of

the employer (including the ESOP) meeting the requirements of section 401(a), for the benefit of any disqualified person (a prohibited allocation).

(2) *Additional rules*—(i) *Prohibited allocation definition*. For purposes of section 409(p)(2)(A) and paragraph (b)(1) of this section, there is a prohibited allocation (*i.e.*, assets accrue or are allocated as prohibited under paragraph (b)(1) of this section) if there is either an impermissible accrual as defined in paragraph (b)(2)(ii) of this section or an impermissible allocation as defined in paragraph (b)(2)(iii) of this section. The amount of the prohibited allocation is equal to the sum of the impermissible accrual plus the amount of the impermissible allocation (if any).

(ii) *Impermissible accrual*. There is an impermissible accrual to the extent (and only to the extent) that employer securities consisting of stock in an S corporation owned by the ESOP and any assets attributable thereto are held under the ESOP for the benefit of a disqualified person during a nonallocation year. For this purpose, assets attributable to S corporation securities include any distributions, within the meaning of section 1368, made on S corporation stock held in a disqualified person's account in the ESOP (including earnings thereon), plus any proceeds from the sale of S corporation securities held for a disqualified person's account in the ESOP (including any earnings thereon). Thus, for example, in the event of a nonallocation year, all S corporation shares and all other ESOP assets attributable to S corporation stock, including distributions, sales proceeds, and earnings on either the distribution or proceeds, held for the account of such disqualified person in the ESOP during that year are an impermissible accrual for the benefit of that person, whether attributable to contributions in the current year or in prior years.

(iii) *Impermissible allocation*. An impermissible allocation means any allocation for a disqualified person directly or indirectly under any plan of the employer qualified under section 401(a) that occurs during a nonallocation year to the extent that a contribution or other annual addition is made, or the disqualified person otherwise ac-

crued additional benefits, under the ESOP or any other plan of the employer qualified under section 401(a) (including a release and allocation of assets from a suspense account, as described at § 54.4975–11(c) and (d) of this chapter) that, for the nonallocation year, would otherwise have been added to the account of the disqualified person under the ESOP and invested in employer securities consisting of stock in an S corporation owned by the ESOP but for a provision in the ESOP to comply with section 409(p).

(iv) *Effects of prohibited allocation*—(A) *Deemed distribution*. If there is a prohibited allocation, the amount of the prohibited allocation, as determined under this paragraph (b)(2), is treated as distributed from the ESOP (or other plan of the employer) to the disqualified person on the first day of the plan year on which there is an impermissible accrual or on the date of the allocation in the case of an additional impermissible accrual or impermissible allocation during the plan year but after the first day of the plan year. Thus, the fair market value of assets in the disqualified person's account that constitutes an impermissible accrual or allocation is included in gross income (to the extent in excess of any investment in the contract allocable to such amount) and is subject to any additional income tax that applies under section 72(t). A deemed distribution under this paragraph (b)(2)(iv)(A) is not an actual distribution from the ESOP. Thus, the amount of the prohibited allocation is not an eligible rollover distribution under section 402(c). However, for purposes of applying sections 72 and 402 with respect to any subsequent distribution from the ESOP, the amount that the disqualified person previously took into account as income as a result of the deemed distribution is treated as an investment in the contract.

(B) *Other effects*. If there is a prohibited allocation, then the plan fails to satisfy the requirements of section 4975(e)(7) and ceases to be an ESOP. In such a case, the exemption from the excise tax on prohibited transactions for loans to leveraged ESOPs contained in section 4975(d)(3) would cease to apply to any loan (with the result that the

employer would owe an excise tax with respect to the previously exempt loan) and, further, the exception in section 512(e)(3) would not apply to the plan (with the result that the plan may owe income tax as a result of unrelated business taxable income under section 512 with respect to S corporation stock held by the plan). See also section 4979A(a) which imposes an excise tax in certain events, including a prohibited allocation under section 409(p).

(v) *Prevention of prohibited allocation.*—(A) *Transfer of account to non-ESOP.* An ESOP may prevent a non-allocation year or a prohibited allocation during a nonallocation year by permitting assets (including S corporation securities) allocated to the account of a disqualified person (or a person reasonably expected to become a disqualified person absent a transfer described in this paragraph (b)(2)(v)(A)) to be transferred into a separate portion of the plan that is not an ESOP, as described in § 54.4975-11(a)(5) of this chapter, or to another plan of the employer that satisfies the requirements of section 401(a) (and that is not an ESOP). In the event of such a transfer involving S corporation securities, the recipient plan is subject to tax on unrelated business taxable income under section 512.

(B) *Relief from nondiscrimination requirement.* Pursuant to this paragraph (b)(2)(v)(B), if a transfer described in paragraph (b)(2)(v)(A) of this section is made from an ESOP to a separate portion of the plan or to another qualified plan of the employer that is not an ESOP, then both the ESOP and the plan or portion of a plan that is not an ESOP will not fail to satisfy the requirements of § 1.401(a)(4)-4 merely because of the transfer. Further, subsequent to the transfer, that plan will not fail to satisfy the requirements of § 1.401(a)(4)-4 merely because of the benefits, rights, or features with respect to the transferred benefits if those benefits, rights, or features would satisfy the requirements of § 1.401(a)(4)-4 if the mandatory disaggregation rule for ESOPs at § 1.410(b)-7(c)(2) did not apply.

(c) *Nonallocation year.*—(1) *Definition generally.* For purposes of section 409(p) and this section, a *nonallocation year*

means a plan year of an ESOP during which, at any time, the ESOP holds any employer securities that are shares of an S corporation and either—

(i) Disqualified persons own at least 50 percent of the number of outstanding shares of stock in the S corporation (including deemed-owned ESOP shares); or

(ii) Disqualified persons own at least 50 percent of the sum of:

(A) The outstanding shares of stock in the S corporation (including deemed-owned ESOP shares), plus

(B) The shares of synthetic equity in the S corporation owned by disqualified persons.

(2) *Attribution rules.* For purposes of this paragraph (c), the rules of section 318(a) apply to determine ownership of shares in the S corporation (including deemed-owned ESOP shares) and synthetic equity. However, for this purpose, section 318(a)(4) (relating to options to acquire stock) is disregarded and, in applying section 318(a)(1), the members of an individual's family include members of the individual's family under paragraph (d)(2) of this section. In addition, an individual is treated as owning deemed-owned ESOP shares of that individual notwithstanding the employee trust exception in section 318(a)(2)(B)(i). If the attribution rules in paragraph (f)(1) of this section apply, then the rules of paragraph (f)(1) of this section are applied before the rules of this paragraph (c)(2).

(3) *Special rule for avoidance or evasion.* (i) The ownership structures described in paragraph (g)(3) of this section result in a nonallocation year. In addition, under the ownership structures described in paragraph (g)(3) of this section, the individual referred to in paragraph (g)(3) of this section is treated as a disqualified person and that person's interest in the separate entity is treated as synthetic equity.

(ii) Under section 409(p)(7)(B), the Commissioner, in revenue rulings, notices, and other guidance published in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(b) of this chapter), may provide that a nonallocation year occurs in any case in which the principal purpose of the ownership structure of an S corporation constitutes an avoidance or evasion of section 409(p).

For any year that is a nonallocation year under this paragraph (c)(3), the Commissioner may treat any person as a disqualified person. See paragraph (g) of this section for guidance regarding when the principal purpose of an ownership structure of an S corporation involving synthetic equity constitutes an avoidance or evasion of section 409(p).

(4) *Special rule for certain stock rights.*

(i) For purposes of paragraph (c)(1) of this section, a person is treated as owning stock that the person has a right to acquire if, at all times during the period when such right is effective, the stock that the person has the right to acquire is both issued and outstanding and is held by persons other than the ESOP, the S corporation, or a related entity (as defined in paragraph (f)(3) of this section).

(ii) This paragraph (c)(4) applies only if treating persons as owning the shares described in paragraph (c)(4)(i) of this section results in a nonallocation year. This paragraph (c)(4) does not apply to a right to acquire stock of an S corporation held by a shareholder subject to Federal income tax that, under § 1.1361–1(l)(2)(iii) or (l)(4)(iii)(C), would not be taken into account in determining if an S corporation has a second class of stock provided that a principal purpose of the right is not the avoidance or evasion of section 409(p). Under the last sentence of paragraph (f)(2)(i) of this section, this paragraph (c)(4)(ii) does not apply for purposes of determining ownership of deemed-owned ESOP shares or whether an interest constitutes synthetic equity.

(5) *Application with respect to shares treated as owned by more than one person.* For purposes of applying paragraph (c)(1) of this section, if, by application of the rules of paragraph (c)(2), (c)(4), or (f)(1) of this section, any share is treated as owned by more than one person, then that share is counted as a single share and that share is treated as owned by disqualified persons if any of the owners is a disqualified person.

(6) *Effect of nonallocation year.* See paragraph (b) of this section for a prohibition applicable during a nonallocation year. See also section 4979A for an excise tax applicable in certain cases, including section 4979A(a)(3) and (4) which applies during a nonallocation

year (whether or not there is a prohibited allocation during the year).

(d) *Disqualified persons*—(1) *General definition.* For purposes of section 409(p) and this section, a *disqualified person* means any person for whom—

(i) The number of such person's deemed-owned ESOP shares of the S corporation is at least 10 percent of the number of the deemed-owned ESOP shares of the S corporation;

(ii) The aggregate number of such person's deemed-owned ESOP shares and synthetic equity shares of the S corporation is at least 10 percent of the sum of:

(A) The total number of deemed-owned ESOP shares; and

(B) The person's synthetic equity shares of the S corporation;

(iii) The aggregate number of the S corporation's deemed-owned ESOP shares of such person and of the members of such person's family is at least 20 percent of the number of deemed-owned ESOP shares of the S corporation; or

(iv) The aggregate number of the S corporation's deemed-owned ESOP shares and synthetic equity shares of such person and of the members of such person's family is at least 20 percent of the sum of:

(A) The total number of deemed-owned ESOP shares, and

(B) The synthetic equity shares of the S corporation owned by such person and the members of such person's family.

(2) *Treatment of family members; definition*—(i) *Rule.* Each member of the family of any person who is a disqualified person under paragraph (d)(1) (iii) or (iv) of this section is a disqualified person.

(ii) *General definition.* For purposes of section 409(p) and this section, *member of the family* means, with respect to an individual—

(A) The spouse of the individual;

(B) An ancestor or lineal descendant of the individual or the individual's spouse;

(C) A brother or sister of the individual or of the individual's spouse and any lineal descendant of the brother or sister; and

(D) The spouse of any individual described in paragraph (d)(2)(ii) (B) or (C) of this section.

(iii) *Spouse.* A spouse of an individual who is legally separated from such individual under a decree of divorce or separate maintenance is not treated as such individual's spouse under paragraph (d)(2)(ii)(A) of this section.

(3) *Special rule for certain nonallocation years.* See paragraph (c)(3) of this section (relating to avoidance or evasion of section 409(p)) for special rules permitting certain persons to be treated as disqualified persons in certain nonallocation years.

(4) *Example.* The rules of this paragraph (d) are illustrated by the following example:

Example. (i) *Facts.* An S corporation has 800 outstanding shares of which 100 are owned by individual O and 700 are held in an employee stock ownership plan (ESOP) during 2005, including 200 shares held in the ESOP account of O, 65 shares held in the ESOP account of participant P, and 40 shares held in the ESOP account of participant Q who is P's spouse. The S corporation has no synthetic equity.

(ii) *Conclusion.* O is a disqualified person during 2005 because O's account in the ESOP holds at least 10 percent of the shares owned by the ESOP (200 is 28.6 percent of 700). In addition, P is a disqualified person during 2005 because, under paragraph (d)(2) of this section, P is treated as owning the shares held by Q and P's total deemed-owned shares are thus at least 10 percent of the shares owned by the plan (65 plus 40 is more than 10 percent of 700). In addition, Q is a disqualified person as a result of the rules in paragraph (d)(2) of this section. As a result, disqualified persons own at least 50 percent of the outstanding shares of the S corporation during 2005 (O's 100 directly owned shares, O's 200 deemed-owned shares, P's 65 deemed-owned shares, plus Q's 40 deemed owned shares are 50.6 percent of 800).

(e) *Deemed-owned ESOP shares.* For purposes of section 409(p) and this section, a person is treated as owning his or her deemed-owned ESOP shares.

Deemed-owned ESOP shares mean, with respect to any person—

(1) Any shares of stock in the S corporation constituting employer securities that are allocated to such person's account under the ESOP; and

(2) Such person's share of the stock in the S corporation that is held by the ESOP but is not allocated to the account of any participant or beneficiary

(with such person's share to be determined in the same proportion as the shares released and allocated from a suspense account, as described at § 54.4975-11(c) and (d) of this chapter, under the ESOP for the most recently ended plan year for which there were shares released and allocated from a suspense account, or if there has been no such prior release and allocation from a suspense account, then determined in proportion to a reasonable estimate of the shares that would be released and allocated in the first year of loan repayment).

(f) *Synthetic equity*—(1) *Ownership of synthetic equity.* For purposes of section 409(p) and this section, synthetic equity is treated as owned by a person in the same manner as stock is treated as owned by a person, directly or under the rules of section 318(a)(2) and (3). *Synthetic equity* means the rights described in paragraph (f)(2) of this section.

(2) *Synthetic equity*—(i) *Rights to acquire stock of the S corporation.* Synthetic equity includes any stock option, warrant, restricted stock, deferred issuance stock right, stock appreciation right payable in stock, or similar interest or right that gives the holder the right to acquire or receive stock of the S corporation in the future. Rights to acquire stock in an S corporation with respect to stock that is, at all times during the period when such rights are effective, both issued and outstanding and held by persons (who are subject to federal income taxes) other than the ESOP, the S corporation, or a related entity are not synthetic equity (but see paragraph (c)(4) of this section).

(ii) *Special rule for certain stock rights.* Synthetic equity also includes a right to a future payment (payable in cash or any other form other than stock of the S corporation) from an S corporation that is based on the value of the stock of the S corporation, such as appreciation in such value. Thus, synthetic equity includes a stock appreciation right with respect to stock of an S corporation that is payable in cash or a phantom stock unit with respect to stock of an S corporation that is payable in cash.

(iii) *Rights to acquire interests in or assets of an S corporation or a related entity.* Synthetic equity includes a right to acquire stock or other similar interests in a related entity to the extent of the S corporation's ownership. Synthetic equity also includes a right to acquire assets of an S corporation or a related entity other than either rights to acquire goods, services, or property at fair market value in the ordinary course of business or fringe benefits excluded from gross income under section 132.

(iv) *Special rule for nonqualified deferred compensation.* (A) Synthetic equity also includes any of the following with respect to an S corporation or a related entity: any remuneration to which section 404(a)(5) applies; remuneration for which a deduction would be permitted under section 404(a)(5) if separate accounts were maintained; any right to receive property to which section 83 applies (including a payment to a trust described in section 402(b) or to an annuity described in section 403(c)) in a future year for the performance of services; any transfer of property (to which section 83 applies) in connection with the performance of services to the extent that the property is not substantially vested within the meaning of § 1.83–3(i) by the end of the plan year in which transferred; and a split-dollar life insurance arrangement under § 1.61–22(b) entered into in connection with the performance of services (other than one under which, at all times, the only economic benefit that will be provided under the arrangement is current life insurance protection as described in § 1.61–22(d)(3)). Synthetic equity also includes any other remuneration for services under a plan, or method or arrangement, deferring the receipt of compensation to a date that is after the 15th day of the 3rd calendar month after the end of the entity's taxable year in which the related services are rendered. However, synthetic equity does not include benefits under a plan that is an eligible retirement plan within the meaning of section 402(c)(8)(B).

(B) For purposes of applying paragraph (f)(2)(iv)(A) of this section with respect to an ESOP, synthetic equity

does not include any interest described in such paragraph (f)(2)(iv)(A) of this section to the extent that—

(1) The interest is nonqualified deferred compensation (within the meaning of section 3121(v)(2)) that was outstanding on December 17, 2004;

(2) The interest is an amount that was taken into account (within the meaning of § 31.3121(v)(2)–1(d) of this chapter) prior to January 1, 2005, for purposes of taxation under chapter 21 of the Internal Revenue Code (or income attributable thereto); and

(3) The interest was held before the first date on which the ESOP acquires any employer securities.

(v) *No overlap among shares of deemed-owned ESOP shares or synthetic equity.* Synthetic equity under this paragraph (f)(2) does not include shares that are deemed-owned ESOP shares (or any rights with respect to deemed-owned ESOP shares to the extent such rights are specifically permitted under section 409(h)). In addition, synthetic equity under a specific subparagraph of this paragraph (f)(2) does not include anything that is synthetic equity under paragraph (f)(2)(i), (ii), (iii) or (iv) of this section.

(3) *Related entity.* For purposes of this paragraph (f), *related entity* means any entity in which the S corporation holds an interest and which is a partnership, a trust, an eligible entity that is disregarded as an entity that is separate from its owner under § 301.7701–3 of this chapter, or a Qualified Subchapter S Subsidiary under section 1361(b)(3).

(4) *Number of synthetic shares—*(i) *Synthetic equity determined by reference to S corporation shares.* In the case of synthetic equity that is determined by reference to shares of stock of the S corporation, the person who is entitled to the synthetic equity is treated as owning the number of shares of stock deliverable pursuant to such synthetic equity. In the case of synthetic equity that is determined by reference to shares of stock of the S corporation, but for which payment is made in cash or other property (besides stock of the S corporation), the number of shares of synthetic equity treated as owned is equal to the number of shares of stock having a fair market value equal to the cash or other property (disregarding

lapse restrictions as described in § 1.83-3(i)). Where such synthetic equity is a right to purchase or receive S corporation shares, the corresponding number of shares of synthetic equity is determined without regard to lapse restrictions as described in § 1.83-3(i) or to any amount required to be paid in exchange for the shares. Thus, for example, if a corporation grants an employee of an S corporation an option to purchase 100 shares of the corporation's stock, exercisable in the future only after the satisfaction of certain performance conditions, the employee is the deemed owner of 100 synthetic equity shares of the corporation as of the date the option is granted. If the same employee were granted 100 shares of restricted S corporation stock (or restricted stock units), subject to forfeiture until the satisfaction of performance or service conditions, the employee would likewise be the deemed owner of 100 synthetic equity shares from the grant date. However, if the same employee were granted a stock appreciation right with regard to 100 shares of S corporation stock (whether payable in stock or in cash), the number of synthetic equity shares the employee is deemed to own equals the number of shares having a value equal to the appreciation at the time of measurement (determined without regard to lapse restrictions).

(ii) *Synthetic equity determined by reference to shares in a related entity.* In the case of synthetic equity that is determined by reference to shares of stock (or similar interests) in a related entity, the person who is entitled to the synthetic equity is treated as owning shares of stock of the S corporation with the same aggregate value as the number of shares of stock (or similar interests) of the related entity (with such value determined without regard to any lapse restriction as defined at § 1.83-3(i)).

(iii) *Other synthetic equity—(A) General rule.* In the case of any synthetic equity to which neither paragraph (f)(4)(i) nor paragraph (f)(4)(ii) of this section apply, the person who is entitled to the synthetic equity is treated as owning on any date a number of shares of stock in the S corporation equal to the present value (on that

date) of the synthetic equity (with such value determined without regard to any lapse restriction as defined at § 1.83-3(i)) divided by the fair market value of a share of the S corporation's stock as of that date.

(B) *Special rules—(1) Use of annual or more frequent determination dates.* For purposes of this paragraph (f)(4)(iii), while the determination of whether there is a nonallocation year depends on day-by-day determinations under paragraph (c) of this section, the number of shares of S corporation stock treated as owned by a person who is entitled to synthetic equity to which this paragraph (f)(4)(iii) applies is permitted to be determined only annually (or more frequently), as of the first day of the ESOP's plan year or as of any other reasonable determination date or dates during a plan year. If the ESOP so provides, the number of shares of synthetic equity to which this paragraph (f)(4)(iii) applies that are treated as owned by that person for any period from a given determination date through the date immediately preceding the next following determination date is the number of shares treated as owned on the given determination date.

(2) *Use of triannual recalculations.* In addition, if the terms of the ESOP so provide, then the number of shares of synthetic equity with respect to grants of synthetic equity to which this paragraph (f)(4)(iii) applies may be fixed for a specified period from a determination date identified under the ESOP through a date that is not later than the day before the determination date that is on or immediately preceding the third anniversary of the identified determination date. Additional accruals, allocations, or grants (to which this paragraph (f)(4)(iii) applies) that are made during such three-year period are taken into account on each determination date during that period, based on the number of synthetic equity shares resulting from the additional accrual, allocation, or grant (determined as of the determination date on or next following the date of the accrual, allocation, or grant). However, the ESOP must provide for the number of shares of synthetic equity to which this paragraph (f)(4)(iii) applies to be

re-determined not less frequently than every three years, based on the S corporation share value on a determination date that is not later than the third anniversary of the identified determination date and the aggregate present value of the synthetic equity to which this paragraph (f)(4)(iii) applies (including all grants made during the three-year period) on that determination date. See *Example 3* of paragraph (h) of this section for an example illustrating this paragraph (f)(4)(iii)(B)(2).

(3) *Conditions for application of rules.* Paragraph (f)(4)(iii)(B) of this section only applies with respect to grants of synthetic equity to which this paragraph (f)(4)(iii) applies. In addition, paragraph (f)(4)(iii)(B)(1) of this section applies only if the fair market value of a share of the S corporation securities on any determination date is not unrepresentative of the value of the S corporation securities throughout the rest of the plan year and only if the terms of the ESOP include provisions conforming to paragraph (f)(4)(iii)(B)(1) of this section which are consistently used by the ESOP for all persons. In addition, paragraph (f)(4)(iii)(B)(2) of this section applies only if the terms of the ESOP include provisions conforming to paragraphs (f)(4)(iii)(B)(1) and (2) of this section which are consistently used by the ESOP for all persons.

(iv) *Adjustment of number of synthetic equity shares where ESOP owns less than 100% of S corporation.* Under this paragraph (f)(4)(iv), the number of synthetic shares otherwise determined under this paragraph (f)(4) is decreased ratably to the extent that shares of the S corporation are owned by a person who is not an ESOP (and who is subject to Federal income taxes). For example, if an S corporation has 200 outstanding shares, of which individual A owns 50 shares and the ESOP owns the other 150 shares, and individual B would be treated under this paragraph (f)(4) as owning 200 synthetic equity shares of the S corporation but for this paragraph (f)(4)(iv), then, under the rule of this paragraph (f)(4)(iv), the number of synthetic shares treated as owned by B under this paragraph (f)(4) is decreased from 200 to 150 (because the ESOP only

owns 75% of the outstanding stock of the S corporation, rather than 100%).

(v) *Special rule for shares with greater voting power than ESOP shares.* Notwithstanding any other provision of this paragraph (f)(4), if a synthetic equity right includes (directly or indirectly) a right to purchase or receive shares of S corporation stock that have per-share voting rights greater than the per-share voting rights of one or more shares of S corporation stock held by the ESOP, then the number of shares of deemed owned synthetic equity attributable to such right is not less than the number of shares that would have the same voting rights if the shares had the same per-share voting rights as shares held by the ESOP with the least voting rights. For example, if shares of S corporation stock held by the ESOP have one voting right per share, then an individual who holds an option to purchase one share with 100 voting rights is treated as owning 100 shares of synthetic equity.

(g) *Avoidance or evasion of section 409(p) involving synthetic equity—(1) General rule.* Paragraph (g)(2) of this section sets forth a standard for determining whether the principal purpose of the ownership structure of an S corporation involving synthetic equity constitutes an avoidance or evasion of section 409(p). Paragraph (g)(3) of this section identifies certain specific ownership structures that constitute an avoidance or evasion of section 409(p). See also paragraph (c)(3) of this section for a rule under which the ownership structures in paragraph (g)(3) result in a nonallocation year for purposes of section 409(p).

(2) *Standard for determining when there is an avoidance or evasion of section 409(p) involving synthetic equity—*For purposes of section 409(p) and this section, whether the principal purpose of the ownership structure of an S corporation involving synthetic equity constitutes an avoidance or evasion of section 409(p) is determined by taking into account all the surrounding facts and circumstances, including all features of the ownership of the S corporation's outstanding stock and related obligations (including synthetic

equity), any shareholders who are taxable entities, and the cash distributions made to shareholders, to determine whether, to the extent of the ESOP's stock ownership, the ESOP receives the economic benefits of ownership in the S corporation that occur during the period that stock of the S corporation is owned by the ESOP. Among the factors indicating that the ESOP receives these economic benefits include shareholder voting rights, the right to receive distributions made to shareholders, and the right to benefit from the profits earned by the S corporation, including the extent to which actual distributions of profits are made from the S corporation to the ESOP and the extent to which the ESOP's ownership interest in undistributed profits and future profits is subject to dilution as a result of synthetic equity, for example, the ESOP's ownership interest is not subject to dilution if the total amount of synthetic equity is a relatively small portion of the total number of shares and deemed-owned shares of the S corporation.

(3) *Specific transactions that constitute an avoidance or evasion of section 409(p) involving segregated profits.* Taking into account the standard in paragraph (g)(2) of this section, the principal purpose of the ownership structure of an S corporation constitutes an avoidance or evasion of section 409(p) in any case in which—

(i) The profits of the S corporation generated by the business activities of a specific individual or individuals are not provided to the ESOP, but are instead substantially accumulated and held for the benefit of that individual or individuals on a tax-deferred basis within an entity related to the S corporation, such as a partnership, trust,

or corporation (such as in a subsidiary that is a disregarded entity), or any other method that has the same effect of segregating profits for the benefit of such individual or individuals (such as nonqualified deferred compensation described in paragraph (f)(2)(iv) of this section);

(ii) The individual or individuals for whom profits are segregated have rights to acquire 50 percent or more of those profits directly or indirectly (for example, by purchase of the subsidiary); and

(iii) A nonallocation year would occur if this section were separately applied with respect to either the separate entity or whatever method has the effect of segregating profits of the individual or individuals, treating such entity as a separate S corporation owned by an ESOP (or in the case of any other method of segregation of profits by treating those profits as the only assets of a separate S corporation owned by an ESOP).

(h) *Examples.* The rules of this section are illustrated by the following examples:

Example 1. Relating to determination of disqualified persons and nonallocation year if there is no synthetic equity. (i) *Facts.* Corporation X is a calendar year S corporation that maintains an ESOP. X has a single class of common stock, of which there are a total of 1,200 shares outstanding. X has no synthetic equity. In 2006, individual A, who is not an employee of X (and is not related to any employee of X), owns 100 shares directly, individual B owns 100 shares directly, and the remaining 1,000 shares are owned by an ESOP maintained by X for its employees. The ESOP's 1,000 shares are allocated to the accounts of individuals who are employees of X (none of whom are related), as set forth in columns 1 and 2 in the following table:

1 Shareholders	2 Deemed-owned ESOP shares (total of 1,000)	3 Percentage deemed-owned ESOP shares	4 Disqualified person
B	330	33	Yes.
C	145	14.5	Yes.
D	75	7.5	No.
E	30	3	No.
F	20	2	No.
Other participants	400 (none exceed 10 shares)	1 or less	No.

(ii) *Conclusion with respect to disqualified persons.* As shown in column 4 in the table

above, individuals B and C are disqualified persons for 2006 under paragraph (d)(1) of this

Internal Revenue Service, Treasury

§ 1.409(p)–1T

section because each owns at least 10% of X's deemed-owned ESOP shares.

(iii) *Conclusion with respect to nonallocation year.* However, 2006 is not a nonallocation year under section 409(p) because disqualified persons do not own at least 50% of X's outstanding shares (the 100 shares owned directly by B, B's 330 deemed-owned ESOP shares, plus C's 145 deemed-owned ESOP

shares equal only 47.9% of the 1,200 outstanding shares of X).

Example 2. Relating to determination of disqualified persons and nonallocation year if there is synthetic equity. (i) *Facts.* The facts are the same as in *Example 1*, except that, as shown in column 4 of the table in this *example 2*, individuals E and F have options to acquire 110 and 130 shares, respectively, of the common stock of X from X:

1 Shareholders	2 Deemed-owned ESOP shares (total of 1,000)	3 Percentage deemed- owned ESOP shares	4 Options (240)	5 Shareholder percent- age of deemed-owned ESOP plus synthetic equity shares	6 Disqualified person
B	330	33			Yes (col. 3).
C	145	14.5			Yes (col. 3).
D	75	7.5			No.
E	30	3	110	11.1% ([30 + 91.7] di- vided by 1,091.7).	Yes (col. 5).
F	20	2	130	11.6% ([20 + 108.3] di- vided by 1,108.3).	Yes (col. 5).
Other participants	400 (none exceeds 10 shares).	1 or less			No.

(ii) *Conclusion with respect to disqualified persons.* Applying the rule of paragraph (f)(4)(iv) of this section, E's option to acquire 110 shares of the S corporation converts into 91.7 shares of synthetic equity (110 times the ratio of the 1,000 deemed-owned ESOP shares to the sum of the 1,000 deemed-owned ESOP shares plus the 200 shares held outside the ESOP by A and B). Similarly, F's option to acquire 130 shares of the S corporation converts into 108.3 shares of synthetic equity (130 times the ratio of the 1,000 deemed-owned ESOP shares to the sum of the 1,000 deemed-owned ESOP shares plus the 200 shares held outside the ESOP by A and B). Accordingly, as shown in column 6 in the table above, individual E's synthetic equity shares are counted in determining whether E is a disqualified person for 2006, and individual F's synthetic equity shares are counted in determining whether F is a disqualified person for 2006, but the synthetic equity shares owned by any person do not affect the calculation for any other person's ownership of shares. Accordingly, individuals B, C, E, and F are disqualified persons for 2006.

(iii) *Conclusion with respect to nonallocation year.* The 100 shares owned directly by B, B's 330 deemed-owned ESOP shares, C's 145 deemed-owned ESOP shares, E's 30 deemed-owned ESOP shares, E's 91.7 synthetic equity shares, F's 20 deemed-owned ESOP shares, plus F's 108.3 synthetic equity shares total 825, which equals 58.9% of 1,400, which is the

sum of the 1,200 outstanding shares of X and the 200 shares of synthetic equity shares of X held by disqualified persons. Thus, 2006 is a nonallocation year for X's ESOP under section 409(p) because disqualified persons own at least 50% of the total shares of outstanding stock of X and the total synthetic equity shares of X held by disqualified persons. In addition, independent of the preceding conclusion, 2006 would be a nonallocation year because disqualified persons own at least 50% of X's outstanding shares because the 100 shares owned directly by B, B's 330 deemed-owned ESOP shares, C's 145 deemed-owned ESOP shares, E's 30 deemed-owned ESOP shares, plus F's 20 deemed-owned ESOP shares equal 52.1% of the 1,200 outstanding shares of X.

Example 3. Relating to determination of number of shares of synthetic equity. (i) *Facts.* Corporation Y is a calendar year S corporation that maintains an ESOP. Y has a single class of common stock, of which there are a total of 1,000 shares outstanding, all of which are owned by the ESOP. Y has no synthetic equity, except for four grants of nonqualified deferred compensation that are made to an individual during the period from 2005 through 2011, as set forth in column 2 in the following table, and the ESOP uses the special rules in paragraph (f)(4)(iii) of this section to determine the number of shares of synthetic equity owned by that individual, as shown in columns 4 and 5:

§ 1.409(p)–1T

26 CFR Ch. I (4–1–08 Edition)

1 Determination date	2 Present value of nonqualified deferred compensation on determination date	3 Share value on determination date	4 New shares of synthetic equity on determination date	5 Aggregate number of synthetic equity shares on determination date
January 1, 2005	A grant is made on January 1, 2005 with a present value of \$1,000. An additional grant of nonqualified deferred compensation with a present value of \$775 is made on March 1, 2005.	\$10 per share	100	100
January 1, 2006	An additional grant is made on December 31, 2005 which has a present value of \$800 on January 1, 2006. The March 1, 2005 grant has a present value on January 1, 2006 of \$800.	\$8 per share	200	300
January 1, 2007	No new grants made	\$12 per share		300
January 1, 2008	An additional grant is made on December 31, 2007 which has a present value of \$3,000 on January 1, 2008. The grants made during 2005 through 2007 have an aggregate present value on January 1, 2008 of \$3,750.	\$15 per share	200	450
January 1, 2009	No new grants are made	\$11 per share		450
January 1, 2010	No new grants are made	\$22 per share		450
January 1, 2011	No new grants are made. The grants made during 2005 through 2008 have an aggregate present value on January 1, 2011 of \$7,600.	\$20 per share		380

(ii) *Conclusion.* The grant made on January 1, 2005, is treated as 100 shares until the determination date in 2008. The grant made on March 1, 2005, is not taken into account until the 2006 determination date and its present value on that date, along with the then present value of the grant made on the preceding day, is treated as a number of shares that are based on the \$8 per share value on the 2006 determination date, with the resulting number of shares continuing to apply until the determination date in 2008. On the January 1, 2008, determination date, the grant made on the preceding day is taken into account at its present value of \$3,000 on January 1, 2008 and the \$15 per share value on that date with the resulting number of shares (200) continuing to apply until the next determination date. In addition, on the January 1, 2008, determination date, the number of shares determined under other grants made between January 1, 2005 and December 31, 2007, must be revalued. Accordingly, the aggregate value of all nonqualified deferred compensation granted during that period is determined to be \$3750 on January 1, 2008, and the corresponding number of shares of synthetic equity based on the \$15 per share value is determined to be 250 shares on the 2008 determination date, with the resulting aggregate number of shares (450) continuing to apply until the determination date in 2011. On the January 1, 2011, determination date, the aggregate value of all nonqualified deferred compensation is determined to be \$7,600 and the corresponding number of shares of synthetic equity based

on the \$20 per share value on the 2011 determination date is determined to be 380 shares (with the resulting number of shares continuing to apply until the determination date in 2014, assuming no further grants are made).

(i) *Effective dates*—(1) *Statutory effective date.* (i) Except as otherwise provided in paragraph (i)(1)(ii) of this section, section 409(p) applies for plan years ending after March 14, 2001.

(ii) If an ESOP holding stock in an S corporation was established on or before March 14, 2001, and the election under section 1362(a) with respect to that S corporation was in effect on March 14, 2001, section 409(p) applies for plan years beginning on or after January 1, 2005.

(2) *Regulation effective date*—(i) *General effective date.* Except as otherwise provided in paragraph (i)(2)(ii) of this section, this section applies for plan years beginning on or after January 1, 2005.

(ii) *Rules for plan years beginning before January 1, 2005.* (A) Except as provided in this paragraph (i)(2)(ii), § 1.409(p)–1T as in effect prior to December 17, 2004 (see § 1.409(p)–1T in 26 CFR part 1 revised as of April 1, 2004) applies for plan years ending after October 20,

2003, and beginning before January 1, 2005.

(B) Paragraphs (c)(3) and (g) of this section apply for plan years ending on or after December 31, 2004, but do not apply with respect to an interest held in a qualified subchapter S subsidiary (QSUB) of an S corporation or another entity to which paragraph (g)(3) of this section applies before March 15, 2004 if:

(1) All interests in the entity held by individuals who would be disqualified persons under paragraph (g)(3) of this section or under guidance issued by the Commissioner before March 15, 2004 are distributed to those individuals as compensation on or before March 15, 2004; and

(2) No such individual has been a participant in the ESOP of the S corporation at any time after October 20, 2003 and before March 15, 2004.

(C) Paragraph (f)(2)(iv)(B) of this section (providing that synthetic equity does not include certain preexisting nonqualified deferred compensation) applies for plan years ending before January 1, 2005.

(D) Paragraph (f)(4)(iv) of this section (permitting an adjustment of the number of synthetic equity shares where an ESOP owns less than 100% of an S corporation) applies for plan years ending before January 1, 2005.

(E) In no event does this paragraph (i)(2)(ii) apply for any plan year ending before January 1, 2005, for an ESOP holding stock in an S corporation that was established on or before March 14, 2001, if the election under section 1362(a) with respect to that S Corporation was in effect on March 14, 2001.

(iii) *Transition rules.* (A) Assets held in the account of a disqualified person as of the last day of the first plan year beginning before January 1, 2005, will not be treated as an impermissible accrual with respect to that disqualified person under paragraph (b)(2)(ii) of this section for the first plan year beginning on or after January 1, 2005, to the extent those assets are not held in that person's account on or after July 1, 2005. Thus, for example, to the extent the assets allocated to the account of a disqualified person as of the last day of the first plan year beginning before January 1, 2005, are transferred to a non-ESOP portion of the plan as de-

scribed in paragraph (b)(2)(v)(A) of this section before July 1, 2005, those assets will not be treated as an impermissible accrual under paragraph (b)(2)(ii) of this section for the period from the first day of the first plan year beginning on or after January 1, 2005 through June 30, 2005. However, see section 4979A(a)(3), (a)(4), and (e)(2)(C) for excise tax provisions that apply to all deemed-owned shares during the first nonallocation year for the ESOP.

(B) An individual is not treated as a disqualified person during the period from the first day of the first plan year beginning on or after January 1, 2005 through June 30, 2005 if that person would not be a disqualified person during that period under the modified rules of this paragraph (i)(2)(iii)(B) as of any date during that same period. Further, solely for the purpose of determining whether the first plan year beginning on or after January 1, 2005 is a nonallocation year under section 409(p) and this section, if that plan year would not have been a nonallocation year under the modified rules of this paragraph (i)(2)(iii)(B), then synthetic equity that is not owned by a person on July 1, 2005 is disregarded during the period from the first day of the first plan year beginning on or after January 1, 2005 through June 30, 2005. For purposes of this paragraph (i)(2)(iii)(B), the *modified rules of this paragraph (i)(2)(iii)(B)* are the rules in § 1.409(p)–1T as in effect prior to December 17, 2004 (see § 1.409(p)–1T in 26 CFR Part 1 revised as of April 1, 2004), modified to exclude from the definition of synthetic equity any stock option, stock appreciation right (payable in cash or stock), or similar rights with respect to shares of the S corporation or a related entity where the facts and circumstances indicate that there is no reasonable likelihood that the holder of the right will receive the shares (or equivalent value). For this purpose, there is no reasonable likelihood that the holder of the right will receive the shares (or equivalent value) in any case in which the option is based on an exercise price that is more than 200% of the fair market value of the shares on the date of grant or the right (in the case of a stock appreciation right or similar

§ 1.410(a)-1

26 CFR Ch. I (4-1-08 Edition)

right to acquire shares of the S corporation or a related entity) is payable only if the appreciation exceeds 100% of the fair market value of the shares on the date of grant.

(C) For the period from the first day of the first plan year beginning on or after January 1, 2005 through June 30, 2005, there is no nonallocation year under this section if there would be no nonallocation year under this section during that period if this section were applied without regard to paragraph (f)(4)(v) of this section (relating to voting rights).

(D) This paragraph (iii) does not apply to an ESOP for which the first plan year beginning on or after January 1, 2005 begins after June 30, 2005.

[T.D. 9164, 69 FR 75460, Dec. 17, 2004; 70 FR 11121, Mar. 8, 2005]

§ 1.410(a)-1 Minimum participation standards; general rules.

(a) *In general.* A plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) unless the plan satisfies—

(1) The minimum age and service requirements of section 410(a)(1) and § 1.410(a)-3,

(2) The maximum age requirements of section 410(a)(2) and § 1.410(a)-4, and

(3) The minimum coverage requirements of section 410(b)(1) and § 1.410(b)-1.

(b) *Organization of regulations relating to minimum participation standards—(1) General rules.* This section prescribes general rules relating to the minimum participation standards provided by Section 410.

(2) *Effective dates.* Section 1.410(a)-2 provides rules under section 1017 of the Employee Retirement Income Security Act of 1974 relating to effective dates under section 410.

(3) *Age and service conditions.* Section 1.410(a)-3 provides rules under section 410(a)(1) relating to minimum age and service conditions.

(4) *Maximum age and time of participation.* Section 1.410(a)-4 provides rules under section 410(a)(2) and (4) relating to maximum age and time of participation.

(5) *Year of service; breaks in service.* For rules relating to years of service and breaks in service, see 29 CFR Part

2530 (Department of Labor regulations relating to minimum standards for employee pension benefit plans). See § 1.410(a)-5 for rules under section 410(a)(3)(B) relating to seasonal industries and for certain rules under section 410(a)(5) relating to breaks in service.

(6) *Breaks in service.* Section 1.410(a)-6 provides special rules under section 1017(f) of the Employee Retirement Income Security Act of 1974 relating to amendment of break in service rules.

(7) *Elapsed time.* Section 1.410(a)-7 provides rules under sections 410 and 411 relating to the elapsed time method of crediting years of service.

(8) *Coverage.* Section 1.410(b)-1 provides rules relating to the minimum coverage requirements provided by section 410(b)(1).

(9) *Church election.* Section 1.410(d)-1 provides rules relating to the election by a church to have participation, vesting, funding, etc., provisions apply.

(c) *Application of participation standards to certain plans—(1) General rule.* Except as provided in subparagraph (2) of this paragraph, section 410 does not apply to—

(i) A governmental plan (within the meaning of section 414(d) and the regulations thereunder),

(ii) A church plan (within the meaning of section 414(e) and the regulations thereunder) which has not made the election provided by section 410(d) and the regulations thereunder,

(iii) A plan which has not provided for employer contributions at any time after September 2, 1974, and

(iv) A plan established and maintained by a society, order, or association described in section 501(c)(8) or (9), if no part of the contributions to or under such plan are made by employers of participants in such plan.

(2) *Participation requirements.* A plan described in subparagraph (1) of this paragraph shall, for purposes of section 401(a), be treated as meeting the requirements of section 410 if such plan meets the coverage requirements resulting from the application of section 401(a)(3) as in effect on September 1, 1974. Such coverage requirements include the rules in § 1.410(b)-1(d) (special rules relating to minimum coverage requirements), that interpret statutory

provisions substantially identical to section 401(a)(3) as in effect on September 1, 1974. In applying the rules of that paragraph (d) to plans described in this paragraph (c) employees whose principal duties consist in supervising the work of other employees shall be treated as officers, shareholders, and highly compensated employees.

(d) *Supersession.* Section 11.410(a)-1 through 11.410(d)-1 inclusive, of the Temporary Income Tax Regulation under the Employee Retirement Income Security Act of 1974 are superseded by this section and §§ 1.410(a)-2 through 1.410(d)-1.

(Sec. 410 (88 Stat. 898; 26 U.S.C. 410))

[T.D. 7508, 42 FR 47193, Sept. 20, 1977, as amended by T.D. 7703, 45 FR 40980, June 17, 1980; T.D. 7735, 45 FR 74722, Nov. 12, 1980]

§ 1.410(a)-2 Effective dates.

(a) *Plans not in existence on January 1, 1974.* Under section 1017(a) of the Employee Retirement Income Security Act of 1974, in the case of a plan which was not in existence on January 1, 1974, section 410 and the regulations thereunder apply for plan years beginning after September 2, 1974. See paragraph (c) of this section for time plan is considered in existence.

(b) *Plans in existence on January 1, 1974.* Under section 1017(b) of the Employee Retirement Income Security Act of 1974, in the case of a plan which was in existence on January 1, 1974, section 410 and the regulations thereunder apply for plan years beginning after December 31, 1975. See paragraph (c) of this section for time plan is considered to be in existence.

(c) *Time of plan existence—(1) General rule.* For purposes of this section, a plan is considered to be in existence on a particular day if—

(i) The plan on or before that day was reduced to writing and adopted by the employer (including, in the case of a corporate employer, formal approval by the employer's board of directors and, if required, shareholder), even though no amounts had been contributed under the plan as of such day, and

(ii) The plan was not terminated on or before that day.

(2) *Collectively bargained plan.* Notwithstanding subparagraph (1) of this paragraph, a plan described in section

413(a), relating to a plan maintained pursuant to a collective bargaining agreement, is considered to be in existence on a particular day if—

(i) On or before that day there is a legally enforceable agreement to establish such a plan signed by the employer, and

(ii) The employer contributions to be made to the plan are set forth in the agreement.

(3) *Special rule.* If a plan is considered to be in existence on January 1, 1974, under subparagraph (1) of this paragraph, any other plan with which such existing plan is merged or consolidated shall also be considered to be in existence on such date.

(d) *Certain existing plans may elect new provisions—(1) In general.* The plan administrator (as defined in section 414(g)) of a plan that was in existence on January 1, 1974, may elect to have the provisions of the Code relating to participation, vesting, funding, and form of benefit (as in effect from time to time) apply to a plan year selected by the plan year selected by the plan administrator which begins after September 2, 1974, but before the otherwise applicable effective dates determined under section 1017 (b) or (c), 1021, or 1024 of the Employee Retirement Income Security Act of 1974, and to all subsequent plan years. The provisions referred to are the amendments to the Code made by sections 1011, 1012, 1013, 1015, 1016(a) (1) through (11) and (13) through (27), 1021, and 1022(b) of the Employee Retirement Income Security Act of 1974.

(2) *Election is irrevocable.* Any election made under this paragraph, once made shall be irrevocable.

(3) *Procedure and time for making election.* An election under this paragraph shall be made by attaching a statement to either the annual return required under section 6058(a) (or an amended return) with respect to the plan which is filed for the first plan year for which the election is effective or to a written request for a determination letter relating to the qualification of the plan under section 401(a), 403(a), or 405(a) of the Code and, if trustee, the exempt status under section 501(a) of the Code of a trust constituting a part of the plan. If the election is made with a

§ 1.410(a)-3

26 CFR Ch. I (4-1-08 Edition)

written request for a determination letter, the election may be conditioned upon issuance of a favorable determination letter and will become irrevocable upon issuance of such letter. The statement shall indicate that the election is made under section 1017(d) of the Employee Retirement Income Security Act of 1974 and the first plan year for which the election is effective.

(e) *Examples.* The rules of this section are illustrated by the following examples:

Example 1. A plan is adopted on January 2, 1974, effective as of January 1, 1974. The plan is not considered to have been in existence on January 1, 1974.

Example 2. A plan was in existence on January 1, 1974, and was amended on November 1, 1974, to increase benefits. The fact that the plan was amended is not relevant and the amended plan is considered to be in existence on January 1, 1974.

Example 3. (i) A subsidiary business corporation is a member of a controlled group of corporations within the meaning of IRC section 1563(a). On November 1, 1974, the plan of the parent corporation is amended to provide coverage for employees of the subsidiary corporation. This amendment of the parent corporation's plan does not affect the effective date of section 410 with respect to the parent corporation's plan. No distinction is made for this purpose between employees of the parent corporation and employees of the subsidiary corporation.

(ii) If the subsidiary adopted a separate plan on November 1, 1974, under paragraph (a) of this section, section 410 would apply to that plan for its first plan year beginning after September 2, 1974. However, the adoption of a different plan by the subsidiary would not affect the time section 410 applies to the plan of the parent corporation. If, instead of adopting its own separate plan, the subsidiary merely executed an adoption agreement under the terms of the parent plan providing that a subsidiary, upon the execution of an adoption agreement, will become part of the parent plan, the effective date of section 410 with respect to such plan will not be affected by the adoption of the plan by the subsidiary.

(Sec. 410 (88 Stat. 898; 26 U.S.C. 410))

[T.D. 7508, 42 FR 47194, Sept. 20, 1977]

§ 1.410(a)-3 Minimum age and service conditions.

(a) *General rule.* Except as provided by paragraph (b) or (c) of this section, a plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) if the plan requires,

as a condition of participation in the plan, that an employee complete a period of service with the employer or employers maintaining the plan extending beyond the later of—

(1) *Age 25.* The date on which the employee attains the age of 25; or

(2) *One year of service.* The date on which the employee completes 1 year of service.

(b) *Special rule for plan with 3-year 100 percent vesting.* A plan which provides that after not more than 3 years of service each participant's right to his accrued benefit under the plan is completely nonforfeitable (within the meaning of section 411 and the regulations thereunder) at the time such benefit accrues satisfies the requirements of paragraph (a) of this section if the period of service required by the plan as a condition of participation does not extend beyond the later of—

(1) *Age 25.* The date on which the employee attains the age of 25; or

(2) *Three years of service.* The date on which the employee completes 3 years of service.

(c) *Special rule for employees of certain educational institutions.* A plan maintained exclusively for employees of an educational institution (as defined in section 170(b)(1)(A)(ii)) by an employer exempt from tax under section 501(a) which provides that after 1 year of service each participant's right to his accrued benefit under the plan is completely nonforfeitable (within the meaning of section 411 and the regulations thereunder) at the time such benefit accrues satisfies the requirements of paragraph (a) of this section if the period of service required by the plan as a condition of participation does not extend beyond the later of—

(1) *Age 30.* The date on which the employee attains the age of 30; or

(2) *One year of service.* The date on which the employee completes 1 year of service.

(d) *Other conditions.* Section 410(a), § 1.410(a)-4, and this section relate solely to age and service conditions and do not preclude a plan from establishing conditions, other than conditions relating to age or service, which must be satisfied by plan participants. For example, such provisions would not preclude a qualified plan from requiring,

as a condition of participation, that an employee be employed within a specified job classification. See section 410(b) and the regulations thereunder for rules with respect to coverage of employees under qualified plans.

(e) *Age and service requirements*—(1) *General rule.* For purposes of applying the rules of this section, plan provisions may be treated as imposing age or service requirements even though the provisions do not specifically refer to age or service. Plan provisions which have the effect of requiring an age or service requirement with the employer or employers maintaining the plan will be treated as if they imposed an age or service requirement. In general, a plan under which an employee cannot participate unless he retires will impose an age and service requirement. However, a plan may provide benefits which supplement benefits provided for employees covered under a pension plan, as defined in section 3(2) of the Employee Retirement Income Security Act of 1974, satisfying the requirements of section 410(a)(1) without violating the age and service rules.

(2) *Examples.* The rules of this paragraph are illustrated by the following examples:

Example 1. Corporation A is divided into two divisions. In order to work in division 2 an employee must first have been employed in division 1 for 5 years. A plan provision which required division 2 employment for participation will be treated as a service requirement because such a provision has the effect of requiring 5 years of service.

Example 2. Plan B requires as a condition of participation that each employee have had a driver's license for 15 years or more. This provision will be treated as an age requirement because such a provision has the effect of requiring an employee to attain a specified age.

Example 3. A plan which requires 1 year of service as a condition of participation also excludes a part-time or seasonal employee if his customary employment is for not more than 20 hours per week or 5 months in any plan year. The plan does not qualify because the provision could result in the exclusion by reason of a minimum service requirement of an employee who has completed a year of service. The plan would not qualify even though after excluding all such employees, the plan satisfied the coverage requirements of section 410(b).

Example 4. Employer A establishes a plan which covers employees after they retire and

does not cover current employees unless they retire. Any employee who works past age 60 is treated as retired. The plan fails to satisfy the requirements of section 410(a) because the plan imposes a minimum age and service requirement in excess of that allowed by this section.

Example 5. Employer B establishes plan X, which provides that employees covered by qualified plan Y will receive benefits supplementing their benefits under plan Y to take into account cost of living increases after retirement. Plan X is not treated as imposing an age of service requirement.

Example 6. Employer C establishes a qualified plan satisfying the minimum age and service requirements. At a later time, entry into the plan is frozen so that employees not covered at that time cannot participate in the plan. The limitation on new participants is not treated as imposing a minimum age and service requirement.

(Sec. 410 (88 Stat. 898; 26 U.S.C. 410))

[T.D. 7508, 42 FR 47194, Sept. 20, 1977]

§ 1.410(a)-3T Minimum age and service conditions (temporary).

(a) [Reserved]

(b) *Special rule for plan with 2-year 100 percent vesting.* A plan which provides that after not more than 2 years of service each participant's right to his or her accrued benefit under the plan is completely nonforfeitable (within the meaning of section 411 and the regulations thereunder) at the time such benefit accrues satisfies the requirements of paragraph (a) of this section if the period of service required by the plan as a condition of participation does not extend beyond the later of—

(1) [Reserved]

(2) *Two years of service.* The date on which the employee completes 2 years of service. For employees not described in § 1.411(a)-3T(e)(1), which describes employees with one hour of service in any plan year beginning after December 31, 1988, or later in the case of certain collectively bargained plans, the preceding sentence shall be applied by substituting "3 years of service" for "2 years of service".

[T.D. 8170, 53 FR 239, Jan. 6, 1988]

§ 1.410(a)-4 Maximum age conditions and time of participation.

(a) *Maximum age conditions*—(1) *General rule.* A plan is not a qualified plan (and a trust forming a part of such plan

§ 1.410(a)-4

26 CFR Ch. I (4-1-08 Edition)

is not a qualified trust) if the plan excludes from participation (on the basis of age) an employee who has attained an age specified by the plan unless—

(i) The plan is a defined benefit plan or a target benefit plan, and

(ii) The employee begins employment with the employer after the employee has attained an age specified by the plan, which age is not more than 5 years before normal retirement age (within the meaning of section 411(a)(8) and § 1.411(a)-7.

For purposes of this paragraph, a target benefit plan is a defined contribution plan under which the amount of employer contributions allocated to each participant is determined under a plan formula which does not allow employer discretion and on the basis of the amount necessary to provide a target benefit specified by the plan for such participant. Such target benefit must be the type of benefit which is provided by a defined benefit plan and the targeted benefit must not discriminate in favor of employees who are officers, shareholders, or highly compensated. For purposes of this paragraph, in the determination of the time an employee begins employment, any such time which is included in a period of service which may be disregarded under the break in service rules need not be taken into account.

(2) *Examples.* The rules provided by this paragraph are illustrated by the following examples:

Example 1. A defined benefit plan provides that an employee will become a participant upon completion of 3 years of service if at such time the employee is less than age 60. The normal retirement age under the plan is age 65. The plan also provides full and immediate vesting for each of the plan's participants. Under the plan, an employee hired at age 58 would be denied participation on account of service for the first 3 years and on account of maximum age for the remaining years even though the employee was hired more than 5 years prior to the normal retirement date. The plan therefore does not satisfy section 410(a)(2).

Example 2. A defined benefit plan provides a normal retirement age of the later of age 65 or completion of 10 years of service. Because no employee could ever be hired within 5 years of his normal retirement age, the plan could not exclude employees for being over a specified age.

Example 3. Prior to the effective date of section 410, a defined benefit plan with a normal retirement age of 65 contained a maximum age 55 requirement for participation. Because of the maximum age requirement, and employee hired at age 58 was excluded from the plan. This employee is age 61 at the time that section 410 first applies to the plan. The employee cannot be excluded from participation because of age. The exclusion under section 410(a)(2) is not applicable in this instance because the employee's age at the time of hire, 58, was not within 5 years of the normal retirement age specified in the plan.

Example 4. Employee A was hired at age 50 and participated in a defined benefit plan until separating from service at age 55 with 5 years of service and with no vested benefit. At age 61, employee A was rehired within 5 years of the normal retirement age of 65 after he incurred 6 consecutive breaks in service. Because A's consecutive number of 1-year breaks (6) exceeds his years of service prior to such breaks (5), his service before the breaks may be disregarded. Consequently, A's initial employment date falling within such period may be disregarded and the plan could exclude A on account of his age because his employment commenced within 5 years of normal retirement age.

(b) *Time of participation—(1) General rule.* A plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) unless under the plan any employee who has satisfied the applicable minimum age and service requirements specified in § 1.410(a)-3, and who is otherwise entitled to participate in the plan, commences participation in the plan no later than the earlier of—

(i) The first day of the first plan year beginning after the date on which such employee first satisfied such requirements, or

(ii) The date 6 months after the date on which he first satisfied such requirements,

unless such employee was separated from service and has not returned before the date referred to in subdivision (i) or (ii), whichever is applicable. If such separated employee returns to service after either of such dates without incurring a 1-year break in service, the employee must commence participation immediately upon his return. In the case of a plan using the elapsed time method described in § 1.410(a)-7, such an employee who has a period of absence commencing before the date

Internal Revenue Service, Treasury

§ 1.410(a)-5

referred to in subdivision (i) or (ii) (whichever is applicable) must commence participation as of such applicable date no later than the date such absence ended. However, if an employee's prior service is disregarded on account of the plan's break-in-service rules then, for purposes of this subparagraph, such service is also disregarded for purposes of determining the date on which such employee first satisfied the minimum age and service requirements.

(2) *Examples.* The rules provided by this paragraph are illustrated by the following examples:

Example 1. A calendar year plan provides that an employee may enter the plan only on the first semi-annual entry date, January 1 or July 1, after he has satisfied the applicable minimum age and service requirements specified in section 410(a)(1). The plan satisfies the requirements of this paragraph because an employee is eligible to participate no later than the earlier of (1) the first day of the first plan year beginning after he satisfied the applicable minimum age and service requirements, or (2) the date 6 months after he satisfied such requirements.

Example 2. A plan provides that an employee is not eligible to participate until the first day of the first plan year beginning after he has satisfied the minimum age and service requirements of section 410(a)(1). In this case, an employee who satisfies the "6 month" rule described in subparagraph (1) of this paragraph will not be eligible to participate in the plan. Therefore, the plan does not satisfy the requirements of this paragraph.

Example 3. A calendar year plan provides that an employee may enter the plan only on the first semi-annual entry date, January 1 or July 1, after he has satisfied the applicable minimum age and service requirements specified in section 410(a)(1). Employee A after 10 years of service separated from service in 1976 with a vested benefit. On February 1, 1990, A returns to employment covered by the plan. Assuming A completes a year of service after his return, A must participate immediately on his return, February 1. A's prior service cannot be disregarded, because he had a vested benefit when he separated from service. Therefore, the plan may not postpone his participation until July 1.

Example 4. Assume the same facts as in example (3). The plan has the break-in-service rule described in section 410(a)(5)(D) and § 1.410(a)-5(c)(4). Employee B, after he had 5 years of service but no vested benefit incurs 5 consecutive 1-year breaks. Because B's prior service can be disregarded, the plan may postpone B's participation in the plan

under the rule described in section 410(a)(4) and this paragraph.

(Sec. 410 (88 Stat. 898; 26 U.S.C. 410))

[T.D. 7508, 42 FR 47195, Sept. 20, 1977, as amended by T.D. 7703, 45 FR 40980, June 17, 1980]

§ 1.410(a)-5 Year of service; break in service.

(a) *Year of service.* For the rules relating to years of service under subparagraphs (A), (C), and (D) of section 410(a)(3), see regulations prescribed by the Secretary of Labor under 29 CFR Part 2530, relating to minimum standards for employee pension benefit plans.

Rules relating to a general rule for a year of service, hours of service, and maritime industries apply for purposes of section 410(a) and the regulations thereunder.

(b) *Seasonal industries.* For rules which relate to seasonal industries under section 410(a)(3)(B), see regulations prescribed by the Secretary of Labor under 29 CFR Part 2530, relating to minimum standards for employee pension benefits plans.

(c) *Breaks in service—(1) General rule.* This paragraph provides rules with respect to breaks in service under section 410(a)(5). Except as provided in subparagraphs (2), (3), (4), and (5) of this paragraph, all of an employee's years of service with the employer or employers maintaining a plan are taken into account in computing his period of service under the plan for purposes of section 410(a)(1) and § 1.410(a)-3.

(2) *Employees under 3-year 100 percent vesting schedule—(i) General rule.* In the case of an employee who incurs a 1-year break in service under a plan which provides that after not more than 3 years of service, each participant's right to his accrued benefit under the plan is completely non-forfeitable (within the meaning of section 411 and the regulations thereunder) at the time such benefit accrues, the employee's service before the break in service is not required to be taken into account after the break in service in determining the employee's years of service under section 410(a)(1) and § 1.410(a)-3 if such employee has not satisfied such service requirement.

§ 1.410(a)-5

26 CFR Ch. I (4-1-08 Edition)

(ii) *Example.* The rules of this subparagraph are illustrated by the following example.

Example. A qualified plan computing service by the actual counting of hours provides full and immediate vesting. The plan can not require as a condition of participation that an employee complete 3 consecutive years of service with the employer because the requirement as to consecutive years is not permitted under section 410(a) (5). However, such a plan can require 3 years without a break in service, i.e., 3 years with no intervening years in which the employee fails to complete more than 500 hours of service. Under a plan containing such a participation requirement, the following example illustrates when employees would become eligible to participate.

Year	Hours of service completed		
	Employee A	Employee B	Employee C
1	1,000	1,000	1,000
2	1,000	1,000	500
3	1,000	700	1,000
4	1,000	1,000	700
5	1,000	1,000	1,000
6	1,000	1,000	1,000

NOTE. Employee A will have satisfied the plan's service requirement at the end of year 3. Employee B at the end of year 4, and Employee C at the end of year 6.

(3) *One-year break in service—(i) In general.* In computing the period of service of an employee who has incurred a 1-year break in service, for purposes of section 410(a)(1) and § 1.410(a)-3, a plan may disregard the employee's service before the break until the employee completes a year of service after such break in service.

(ii) *Examples.* The rules provided by this subparagraph are illustrated by the following examples.

Example 1. Employee A completes a year of service under a plan computing service by the actual counting of hours for the 12-month period ending December 31, 1980, and incurs a 1-year break in service for the 12-month period ending December 31, 1981. The plan does not contain the provisions permitted by section 410(a)(5)(B) (relating to 3-year 100 percent vesting) and section 410(a)(5)(D) (relating to nonvested participants). Thereafter, he does not complete a year of service. As of January 1, 1982, in computing his period of service under the plan his service prior to December 31, 1981, is not required to be taken into account for purposes of section 410(a)(1) and § 1.410(a)-3.

Example 2. The employee in example (1) completes a year of service for the 12-month period ending December 31, 1982. Prior to De-

cember 31, 1982, in computing the employee's period of service as of any date occurring in 1982, the employee's service before December 31, 1981, is not required to be taken into account for purposes of section 410(a)(1) and § 1.410(a)-3. Because the employee completed a year of service for the 12-month period ending December 31, 1982, however, his period of service is redetermined as of January 1, 1982. Upon completion of a year of service for 1982, the employee's period of service, determined as of any date occurring in 1982, includes service prior to December 31, 1981.

(4) *Nonvested participants—(i) General rule.* In the case of a participant in a plan who does not have any nonforfeitable right under the plan to his employer-derived accrued benefit and who incurs a 1-year break in service, for purposes of section 410(a)(1) and § 1.410(a)-3 the plan may disregard his years of service prior to such break if the number of his consecutive 1-year breaks in service equals or exceeds his aggregate number of years of service prior to such break. In the case of a plan using the elapsed time method described in Department of Labor regulations, the plan may disregard such years of service prior to such break if the period of severance is at least 1 year and the period of severance equals or exceeds the prior period of service, whether or not consecutive, completed before such period of severance. The plan may in computing such aggregate number of years of service prior to such break disregard any years of service which could have been disregarded under this subparagraph by reason of any prior break in service.

(ii) *Examples.* The rules of this subparagraph are illustrated by the following example:

Example. In 1980, A, who was hired at age 35, separates from the service of X Corporation after completing 4 years of service. At this time A had no vested benefits. In 1985, after incurring 5 consecutive one-year breaks in service, A was reemployed. Under section 410(a)(5)(D), A's 4 years of service may be disregarded because they are exceeded by the number of years of consecutive one-year breaks (5) after such service.

(d) *Special continuity rule for certain plans.* For special rules for computing years of service in the case of a plan maintained by more than one employer, see regulations prescribed by the Secretary of Labor under 29 CFR

Internal Revenue Service, Treasury

§ 1.410(a)-7

Part 2530, relating to minimum standards for employee pension benefit plans.

(Sec. 410 (88 Stat. 898; 26 U.S.C. 410))

[T.D. 7508, 42 FR 47196, Sept. 20, 1977; T.D. 7508, 42 FR 57123, Nov. 1, 1977, as amended by T.D. 7703, 45 FR 40980, June 17, 1980]

§ 1.410(a)-6 Amendment of break in service rules; Transition period.

(a) *In general.* Under section 1017(f) (1) of the Employee Retirement Income Security Act of 1974, a plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) if the rules of the plan relating to breaks in service are amended, and—

(1) Such amendment is effective after January 1, 1974, and before the date on which section 410 becomes applicable to the plan, and

(2) Under such amendment, any employee's participation in the plan commences at any date later than the later of—

(i) The date on which his participation would commence under the break in service rules of section 410(a)(5), or

(ii) The earliest date on which his participation would commence under the plan as in effect on or after January 1, 1974.

(b) *Break in service rules.* For purposes of paragraph (a), the term “break in service rules” means the rules provided by a plan relating to circumstances under which a period of an employee's service or plan participation is disregarded for purposes of determining his rights to participate in the plan, if under such rules such service is disregarded by reason of the employee's failure to complete a required period of service within a specified period of time.

(Sec. 410 (88 Stat. 898; 26 U.S.C. 410))

[T.D. 7508, 42 FR 47197, Sept. 20, 1977; 43 FR 2721, Jan. 19, 1978]

§ 1.410(a)-7 Elapsed time.

(a) *In general—*(1) *Introduction to elapsed time method of crediting service.*

(i) 29 CFR 2530.200b-2 sets forth the general method of crediting service for an employee. The general method is based upon the actual counting of hours of service during the applicable 12-consecutive-month computation period.

The equivalencies set forth in 29 CFR 2530.200b-3 are also methods for crediting hours of service during computation periods. Under the general method and the equivalencies an employee receives a year's credit (in units of years of service or years of participation) for a computation period during which the employee is credited with a specified number of hours of service. In general, an employee's statutory entitlement with respect to eligibility to participate, vesting and benefit accrual is determined by totalling the number of years' credit to which an employee is entitled.

(ii) Under the alternative method set forth in this section, by contrast, an employee's statutory entitlement with respect to eligibility to participate, vesting and benefit accrual is not based upon the actual completion of a specified number of hours of service during a 12-consecutive-month period. Instead, such entitlement is determined generally with reference to the total period of time which elapses while the employee is employed (i.e., while the employment relationship exists) with the employer or employers maintaining the plan. The alternative method set forth in this section is designed to enable a plan to lessen the administrative burdens associated with the maintenance of records of an employee's hours of service by permitting each employee to be credited with his or her total period of service with the employer or employers maintaining the plan, irrespective of the actual hours of service completed in any 12-consecutive-month period.

(2) *Overview of the operation of the elapsed time method.* (i) Under the elapsed time method of crediting service, a plan is generally required to take into account the period of time which elapses while the employee is employed (i.e., while the employment relationship exists) with the employer or employers maintaining the plan, regardless of the actual number of hours he or she completes during such period. Under this alternative method of crediting service, an employee's service is required to be taken into account for purposes of eligibility to participate and vesting as of the date he or she first performs an hour of service within

the meaning of 29 CFR 2530.200b-2 (a) (1) for the employer or employers maintaining the plan. Service is required to be taken into account for the period of time from the date the employee first performs such an hour of service until the date he or she severs from service with the employer or employers maintaining the plan.

(ii) The date the employee severs from service is the earlier of the date the employee quits, is discharged, retires or dies, or the first anniversary of the date the employee is absent from service for any other reason (e.g., disability, vacation, leave of absence, layoff, etc.). Thus, for example, if an employee quits, the severance from service date is the date the employee quits. On the other hand, if an employee is granted a leave of absence (and if no intervening event occurs), the severance from service date will occur one year after the date the employee was first absent on leave, and this one year of absence is required to be taken into account as service for the employer or employers maintaining the plan. Because the severance from service date occurs on the earlier of two possible dates (i.e., quit, discharge, retirement or death or the first anniversary of an absence from service for any other reason), a quit, discharge, retirement or death within the year after the beginning of an absence for any other reason results in an immediate severance from service. Thus, for example, if an employee dies at the end of a four-week absence resulting from illness, the severance from service date is the date of death, rather than the first anniversary date of the first day of absence for illness.

(iii) In addition, for purposes of eligibility to participate and vesting under the elapsed time method of crediting service, an employee who has severed from service by reason of a quit, discharge or retirement may be entitled to have a period of time of 12 months or less taken into account by the employer or employers maintaining the plan if the employee returns to service within a certain period of time and performs an hour of service within the meaning of 29 CFR 2530.200b-2 (a) (1). In general, the period of time during which the employee must return to

service begins on the date the employee severs from service as a result of a quit, discharge or retirement and ends on the first anniversary of such date. However, if the employee is absent for any other reason (e.g., layoff) and then quits, is discharged or retires, the period of time during which the employee may return and receive credit begins on the severance from service date and ends one year after the first day of absence (e.g., first day of layoff). As a result of the operation of these rules, a severance from service (e.g., a quit), or an absence (e.g., layoff) followed by a severance from service, never results in a period of time of more than one year being required to be taken into account after an employee severs from service or is absent from service.

(iv) For purposes of benefit accrual under the elapsed time method of crediting service, an employee is entitled to have his or her service taken into account from the date he or she begins to participate in the plan until the severance from service date. Periods of severance under any circumstances are not required to be taken into account. For example, a participant who is discharged on December 14, 1980 and rehired on October 14, 1981 is not required to be credited with the 10 month period of severance for benefit accrual purposes.

(3) *Overview of certain concepts relating to the elapsed time method—(i) In general.* The rules with respect to the elapsed time method of crediting service are based on certain concepts which are defined in paragraph (b) of this section. These concepts are applied in the substantive rules contained in paragraphs (c), (d), (e), (f) and (g) of this section. The purpose of this subparagraph is to summarize these concepts.

(ii) *Employment commencement date.* (A) A concept which is necessary in order to credit service accurately under any service crediting method is the establishment of a starting point for crediting service. The employment commencement date, which is the date on which an employee first performs an hour of service within the meaning of 29 CFR 2530.200b-2 (a) (1) for the employer or employers maintaining the plan, is used to establish the date upon

which an employee must begin to receive credit for certain purposes (e.g., eligibility to participate and vesting).

(B) In order to credit accurately an employee's total service with an employer or employers maintaining the plan, a plan also may provide for an "adjusted" employment commencement date (*i.e.*, a recalculation of the employment commencement date to reflect noncreditable periods of severance) or a reemployment commencement date as defined in paragraph (b) (3) of this section. Fundamentally, all three concepts rely upon the performance of an hour of service to provide a starting point for crediting service. One purpose of these three concepts is to enable plans to satisfy the requirements of this section in a variety of ways.

(C) The fundamental rule with respect to these concepts is that any plan provision is permissible so long as it satisfies the minimum standards. Thus, for example, although the rules of this section provide that credit must begin on the employment commencement date, a plan is permitted to "adjust" the employment commencement date to reflect periods of time for which service is not required to be credited. Similarly, a plan may wish to credit service under the elapsed time method as discrete periods of service and provide for a reemployment commencement date. Certain plans may wish to provide for both concepts, although it is not a requirement of this section that plans so provide.

(iii) *Severance from service date.* Another fundamental concept of the elapsed time method of crediting service is the severance from service date, which is defined as the earlier of the date on which an employee quits, retires, is discharged or dies, or the first anniversary of the first date of absence for any other reason. One purpose of the severance from service date is to provide the endpoint for crediting service under the elapsed time method. As a general proposition, service is credited from the employment commencement date (*i.e.*, the starting point) until the severance from service date (*i.e.*, the endpoint). A complementary purpose of the severance from service date is to establish the starting point

for measuring a period of severance from service in order to determine a "break in service" (see paragraph (a)(3)(v) of this section). A third purpose of such date is to establish the starting point for measuring the period of time which may be required to be taken into account under the service spanning rules (see paragraph (a)(3)(vi) of this section).

(iv) *Period of service.* A third elapsed time concept is the use of the "period of service" rather than the "year of service" in determining service to be taken into account for purposes of eligibility to participate, vesting and benefit accrual. For purposes of eligibility to participate and vesting, the period of service runs from the employment commencement date or reemployment commencement date until the severance from service date. For purposes of benefit accrual, a period of service runs from the date that a participant commences participation under the plan until the severance from service date. Because the endpoint of the period of service is marked by the severance from service date, an employee is credited with the period of time which runs during any absence from service (other than for reason of a quit, retirement, discharge or death) which is 12 months or less. Thus, for example, a three week absence for vacation is taken into account as part of a period of service and does not trigger a severance from service date.

(v) *Period of severance.* A period of severance begins on the severance from service date and ends when an employee returns to service with the employer or employers maintaining the plan. The purpose of the period of severance is to apply the statutory "break in service" rules to an elapsed time method of crediting service.

(vi) *Service spanning.* Under the elapsed time method of crediting service, a plan is required to credit periods of service and, under the service spanning rules, certain periods of severance of 12 months or less for purposes of eligibility to participate and vesting. Under the first service spanning rule, if an employee severs from service as a result of quit, discharge or retirement and then returns to service within 12

months, the period of severance is required to be taken into account. Also, a situation may arise in which an employee is absent from service for any reason other than quit, discharge, retirement or death and during the absence a quit, discharge or retirement occurs. The second service spanning rule provides in that set of circumstances that a plan is required to take into account the period of time between the severance from service date (*i.e.*, the date of quit, discharge or retirement) and the first anniversary of the date on which the employee was first absent, if the employee returns to service on or before such first anniversary date.

(4) *Organization and applicability.* (i) The substantive rules for crediting service under the elapsed time method with respect to eligibility to participate are contained in paragraph (c), the rules with respect to vesting are contained in subparagraph (d), and the rules with respect to benefit accrual are contained in paragraph (e). The format of the rules is designed to enable a plan to use the elapsed time method of crediting service either for all purposes or for any one or combination of purposes under sections 410 and 411. Thus, for example, a plan may credit service for eligibility to participate purposes by the use of the general method of crediting service set forth in 29 CFR 2530.200b-2 or by the use of any of the equivalencies set forth in 29 CFR 2530.200b-3, while the plan may credit service for vesting and benefit accrual purposes by the use of the elapsed time method of crediting service.

(ii) A plan using the elapsed time method of crediting service for one or more classifications of employees covered under the plan may use the general method of crediting service set forth in 29 CFR 2530.200b-2 or any of the equivalencies set forth in 29 CFR 2530.200b-3 for other classifications of employees, provided that such classifications are reasonable and are consistently applied. Thus, for example, a plan may provide that part-time employees are credited under the general method of crediting service set forth in 29 CFR 2530.200b-2 and full-time employees are credited under the elapsed time method. A classification, how-

ever, will not be deemed to be reasonable or consistently applied if such classification is designed with an intent to preclude an employee or employees from attaining his or her statutory entitlement with respect to eligibility to participate, vesting or benefit accrual. For example, a classification applied so that any full-time employee credited with less than 1,000 hours of service during a given 12-consecutive-month period would be considered part-time and subject to the general method of crediting service rather than the elapsed time method would not be reasonable.

(iii) Notwithstanding paragraph (a) (4) (i) and (ii) of this section, the use of the elapsed time method for some purposes or the use of the elapsed time method for some employees may, under certain circumstances, result in discrimination prohibited under section 401(a)(4), even though the use of the elapsed time method for such purposes, and for such employees, is permitted under this section.

(5) *More than one employer plans.* For special rules for computing years of service in the case of a plan maintained by more than one employer, see 29 CFR Part 2530 (Department of Labor regulations relating to minimum standards for employee pension benefit plans).

(b) *Definitions*—(1) *Employment commencement date.* For purposes of this section, the term “employment commencement date” shall mean the date on which the employee first performs an hour of service within the meaning of 29 CFR 2530.200b-2 (a)(1) for the employer or employers maintaining the plan.

(2) *Severance from service date.* For purposes of this section, a “severance from service” shall occur on the earlier of—

(i) The date on which an employee quits, retires, is discharged or dies; or

(ii) The first anniversary of the first date of a period in which an employee remains absent from service (with or without pay) with the employer or employers maintaining the plan for any reason other than quit, retirement, discharge or death, such as vacation, holiday, sickness, disability, leave of absence or layoff.

(3) *Reemployment commencement date.* For purposes of this section, the term “reemployment commencement date” shall mean the first date, following a period of severance from service which is not required to be taken into account under the service spanning rules in paragraphs (c)(2)(iii) and (d)(1)(iii) of this section, on which the employee performs an hour of service within the meaning of 29 CFR 2530.200b-2(a)(1) for the employer or employers maintaining the plan.

(4) *Participation commencement date.* For purposes of this section, the term “participation commencement date” shall mean the date a participant first commences participation under the plan.

(5) *Period of severance.* For purposes of this section, the term “period of severance” shall mean the period of time commencing on the severance from service date and ending on the date on which the employee again performs an hour of service within the meaning of 29 CFR 2530.200b-2(a)(1) for an employer or employers maintaining the plan.

(6) *Period of service—(i) General rule.* For purposes of this section, the term “period of service” shall mean a period of service commencing on the employee’s employment commencement date or reemployment commencement date, whichever is applicable, and ending on the severance from service date.

(ii) *Aggregation rule.* Unless a plan provides in some manner for an “adjusted” employment commencement date or similar method of consolidating periods of service, periods of service shall be aggregated unless such periods may be disregarded under section 410(a)(5) or 411(a)(4).

(iii) *Other federal law.* Nothing in this section shall be construed to alter, amend, modify, invalidate, impair or supersede any law of the United States or any rule or regulation issued under such law. Thus, for example, nothing in this section shall be construed as denying an employee credit for a “period of service” if credit is required by a separate federal law. Furthermore, the nature and extent of such credit shall be determined under such law.

(c) *Eligibility to participate—(1) General rule.* For purposes of section 410(a)(1)(A), a plan generally may not

require as a condition of participation in the plan that an employee complete a period of service with the employer or employers maintaining the plan extending beyond the later of—

(i) The date on which the employee attains the age of 25; or

(ii) The date on which the employee completes a one-year period of service. See the regulations under section 410(a) (relating to eligibility to participate).

(2) *Determination of one-year period of service.* (i) For purposes of determining the date on which an employee satisfies the service requirement for initial eligibility to participate under the plan, a plan using the elapsed time method of crediting service shall provide that an employee who completes the 1-year period of service requirement on the first anniversary of his employment commencement date satisfies the minimum service requirement as of such date. In the case of an employee who fails to complete a one-year period of service on the first anniversary of his employment commencement date, a plan which does not contain a provision permitted by section 410(a)(5)(D) (rule of parity) shall provide for the aggregation of periods of service so that a one-year period of service shall be completed as of the date the employee completes 12 months of service (30 days are deemed to be a month in the case of the aggregation of fractional months) or 365 days of service.

(ii) For purposes of section 410(a)(1)(B)(i), a “3-year period of service” shall be deemed to be “3 years of service.”

(iii) *Service spanning rules.* In determining a 1-year period of service for purposes of initial eligibility to participate and a period of service for purposes of retention of eligibility to participate, in addition to taking into account an employee’s period of service, a plan shall take into account the following periods of severance—

(A) If an employee severs from service by reason of a quit, discharge or retirement and the employee then performs an hour of service within the meaning of 29 CFR 2530.200b-2(a)(1) within 12 months of the severance from service date, the plan is required to

take into account the period of severance; and

(B) Notwithstanding paragraph (c)(2)(iii)(A) of this section, if an employee severs from service by reason of a quit, discharge or retirement during an absence from service of 12 months or less for any reason other than a quit, discharge, retirement or death, and then performs an hour of service within the meaning of 29 CFR 2530.200b-2(a)(1) within 12 months of the date on which the employee was first absent from service, the plan is required to take into account the period of severance.

(iv) For purposes of determining an employee's retention of eligibility to participate in the plan, a plan shall take into account an employee's entire period of service unless certain periods of service may be disregarded under section 410(a)(5) of the Code.

(v) *Example.* Employee W, age 31, completed 6 months of service and was laid off. After 2 months of layoff, W quit. Five months later, W returned to service. For purposes of eligibility to participate, W was required to be credited with 13 months of service (8 months of service and 5 months of severance). If, on the other hand, W had not returned to service within the first 10 months of severance (i.e., within 12 months after the first day of layoff), W would be required to be credited with only 8 months of service.

(3) *Entry date requirements*—(i) *General rule.* For purposes of section 410(a)(4), it is necessary for a plan to provide that any employee who has satisfied the minimum age and service requirements, and who is otherwise entitled to participate in the plan, commences participation in the plan no later than the earlier of—

(A) The first day of the first plan year beginning after the date on which such employee satisfied such requirements, or

(B) The date six months after the date on which he satisfied such requirements, unless such employee was separated from service before the date referred to in subdivision (i) (A) or (B), whichever is applicable. See the regulations under section 410(a) (relating to eligibility to participate).

(ii) *Separation from service*—(A) *Definition.* For purposes of this section, the

term “separated from service” includes a severance from service or an absence from service for any reason other than a quit, discharge, retirement or death, regardless of the duration of such absence. Accordingly, if an employee is laid off for a period of six weeks, the employee shall be deemed to be “separated from service” during such period for purposes of the entry date requirements.

(B) *Application.* A period of severance which is taken into account under the service spanning rules in paragraph (c)(2)(iii) of this section or an absence of 12 months or less may result in an employee satisfying the plan's minimum service requirement during such period of time. In addition, once an employee satisfies the plan's minimum service requirement, either before or during such period of time, such period of time may contain an entry date applicable to such employee. In the case of an employee whose period of severance is taken into account and such period contains an entry date applicable to the employee, he or she shall be made a participant in the plan (if otherwise eligible) no later than the date on which he or she ended the period of severance. In the case of an employee whose period of absence contains an entry date applicable to such employee, he or she, no later than the date such absence ended, shall be made a participant in the plan (if otherwise eligible) as of the first applicable entry date which occurred during such absence from service.

(iii) *Examples.* For purposes of the following examples, assume that the plan provides for a minimum age requirement of 25 and a minimum service requirement of one year, and provides for semi-annual entry dates.

(A) Employee A, age 35, worked for 10 months in a job classification covered under the plan, became disabled for nine consecutive months and then returned to service. During the period of absence, A completed a 1-year period of service and passed a semi-annual entry date after satisfying the minimum service requirement. Accordingly, the plan is required to make A a participant no later than his return to service effective as of the applicable entry date.

(B) Employee B, after satisfying the minimum age and service requirements, quit work before the next semi-annual entry date, and then returned to service before incurring a 1-year period of severance, but after such semi-annual entry date. Employee B is entitled to become a participant immediately upon his return to service effective as of the date of his return.

(4) *Break in service.* For purposes of applying the break in service rules under section 410(a)(5) (B) and (C), the term “1-year period of severance” shall be substituted for the term “1-year break in service”. A 1-year period of severance shall be determined on the basis of a 12-consecutive-month period beginning on the severance from service date and ending on the first anniversary of such date, provided that the employee during such 12-consecutive-month period does not perform an hour of service within the meaning of 29 CFR 2530.200b-2(a)(1) for the employer or employers maintaining the plan.

(5) *One-year hold-out*—(i) *General rule.* (A) For purposes of section 410(a)(5)(C), in determining the period of service of an employee who has incurred a 1-year period of severance, a plan may disregard the employee’s period of service before such period of severance until the employee completes a 1-year period of service after such period of severance.

(B) *Example.* Assume that a plan provides for a minimum service requirement of 1-year and provides for semi-annual entry dates, but does not contain the provisions permitted by section 410(a)(5)(D) (relating to the rule of parity). Employee G, age 40, completed a seven-month period of service, quit and then returned to service 15 months later, thereby incurring a 1-year period of severance. After working four months, G was laid off for nine months and then returned to work again. Although the plan may hold employee G out from participation in the plan until the completion of a 1-year period of service after the 1-year (or greater) period of severance, once the 1-year hold-out is completed, the plan is required to provide the employee with such statutory entitlement as arose during the 1-year hold-out. Accordingly, employee G satisfied the 1-year hold-out

requirement as of the eighth month of layoff, and G is entitled to become a participant in the plan immediately upon his return to service after the nine-month layoff effective as of the first applicable entry date occurring after the date on which he satisfied the 1-year of service requirement (i.e., the first applicable entry date after the first month of layoff). See the regulations under section 410 (a) (relating to eligibility to participate).

(6) *Rule of parity*—(i) *General rule.* For purposes of section 410(a)(5)(D), in the case of a participant who does not have any nonforfeitable right under the plan to his accrued benefit derived from employer contributions and who incurs a 1-year period of severance, a plan, in determining an employee’s period of service for purposes of section 410(a)(1), may disregard his period of service if his latest period of severance equals or exceeds his prior periods of service, whether or not consecutive, completed before such period of severance. See the regulations under section 410(a) (relating to eligibility to participate).

(ii) In determining whether a completely nonvested employee’s service may be disregarded under the rule of parity, a plan is not permitted to apply the rule until the employee incurs a 1-year period of severance. Accordingly, a plan may not disregard a period of service of less than one year until an employee has incurred a period of severance of at least one year.

(iii) *Example.* Assume that a plan provides for a minimum service requirement of one year and provides for the rule of parity. An employee works for three months, quits and then is rehired 10 months later. Such employee is entitled to receive 13 months of credit for purposes of eligibility to participate and vesting (see the service spanning rules). Although the period of severance exceeded the period of service, the three months of service may not be disregarded because no 1-year period of severance occurred.

(d) *Vesting*—(1) *General rule.* (i) For purposes of section 411(a)(2), relating to vesting in accrued benefits derived from employer contributions, a plan which determines service to be taken in account on the basis of elapsed time

shall provide that an employee is credited with a number of years of service equal to at least the number of whole years of the employee's period of service, whether or not such periods of service were completed consecutively.

(ii) In order to determine the number of whole years of an employee's period of service, a plan shall provide that non-successive periods of service must be aggregated and that less than whole year periods of service (whether or not consecutive) must be aggregated on the basis that 12 months of service (30 days are deemed to be a month in the case of the aggregation of fractional months) or 365 days of service equal a whole year of service.

(iii) *Service spanning rules.* In determining a participant's period of service for vesting purposes, a plan shall take into account the following periods of severance—

(A) If an employee severs from service by reason of a quit, discharge or retirement and the employee then performs an hour of service within the meaning of 29 CFR 2530.200b-2(a)(1) within 12 months of the severance from service date, the plan is required to take into account the period of severance; and

(B) Notwithstanding paragraph (d)(1)(iii)(A) of this section, if an employee severs from service by reason of a quit, discharge or retirement during an absence from service of 12 months or less for any reason other than a quit, discharge, retirement or death, and then performs an hour of service within the meaning of 29 CFR 2530.200b-2(a)(1) within 12 months of the date on which the employee was first absent from service, the plan is required to take into account the period of severance.

(iv) For purposes of determining an employee's nonforfeitable percentage of accrued benefits derived from employer contributions, a plan, after calculating an employee's period of service in the manner prescribed in this paragraph, may disregard any remaining less than whole year, 12-month or 365-day period of service. Thus, for example, if a plan provides for the statutory five to fifteen year graded vesting, an employee with a period (or periods) of service which yield 5 whole year periods of service and an additional 321-

day period of service is twenty-five percent vested in his or her employer-derived accrued benefits (based solely on the 5 whole year periods of service).

(2) *Service which may be disregarded.*

(i) For purposes of section 411(a)(4), in determining the nonforfeitable percentage of an employee's right to his or her accrued benefits derived from employer contributions, all of an employee's period or periods of service with an employer or employers maintaining the plan shall be taken into account unless such service may be disregarded under paragraph (d)(2)(ii) of this section.

(ii) For purposes of paragraph (d)(2)(i) of this section, the following periods of service may be disregarded—

(A) The period of service completed by an employee before the date on which he attains age 22;

(B) In the case of a plan which requires mandatory employee contributions, the period of service which falls within the period of time to which a particular employee contribution relates, if the employee had the opportunity to make a contribution for such period of time and failed to do so;

(C) The period of service during any period for which the employer did not maintain the plan or a predecessor plan;

(D) The period of service which is not required to be taken into account by reason of a period of severance which constitutes a break in service within the meaning of paragraph (d)(4) of this section;

(E) The period of service completed by an employee prior to January 1, 1971, unless the employee completes a period of service of at least 3 years at any time after December 31, 1970; and

(F) The period of service completed before the first plan year for which this section applies to the plan, if such service would have been disregarded under the plan rules relating to breaks in service in effect at that time. See the regulations under section 411(a) (relating to vesting).

(3) *Seasonal industry.* [Reserved]

(4) *Break in service.* For purposes of applying the break in service rules, the term "1-year period of severance" shall be substituted for the term "1-year break in service". A 1-year period of

severance shall be a 12-consecutive-month period beginning on the severance from service date and ending on the first anniversary of such date, provided that the employee during such 12-consecutive-month period fails to perform an hour of service within the meaning of 29 CFR 2530.200b-2(a)(1) for an employer or employers maintaining the plan.

(5) *One-year hold-out.* For purposes of section 411(a)(6)(B), in determining the nonforfeitable percentage of the right to accrued benefits derived from employer contributions of an employee who has incurred a 1-year period of severance, the period of service completed before such period of severance is not required to be taken into account until the employee has completed a 1-year period of service after his return to service. See the regulations under section 411(a) (relating to vesting).

(6) *Vesting in pre-break accruals.* For purposes of section 411(a)(6)(C), a “1-year period of severance” shall be deemed to constitute a “1-year break in service.” See the regulations under section 411(a) (relating to vesting).

(7) *Rule of parity—(i) General rule.* For purposes of section 411(a)(6)(D), in the case of an employee who is a non-vested participant in employer-derived benefits at the time he incurs a 1-year period of severance, the period of service completed by such participant before such period of severance is not required to be taken into account for purposes of determining the vested percentage of his or her right to employer-derived benefits if at such time the consecutive period of severance equals or exceeds his prior periods of service, whether or not consecutive, completed before such period of severance. See the regulations under section 411(a) (relating to vesting).

(e) *Benefit accrual.* (1) For purposes of section 411(b), a plan may provide that a participant's service with an employer or employers maintaining the plan shall be determined on the basis of the participant's total period of service beginning on the participation commencement date and ending on the severance from service date.

(2) Under section 411(b)(3)(A), a defined benefit pension plan may determine an employee's service for pur-

poses of benefit accrual on any basis which is reasonable and consistent and which takes into account all service during the employee's participation in the plan which is included in a period of service required to be taken into account under section 410(a)(5) (relating to service which must be taken into account for purposes of determining an employee's eligibility to participate). A plan which provides for the determination of an employee's service with an employer or employers maintaining the plan on the basis permitted under paragraph (e)(1) of this section will be deemed to meet the requirements of section 411(b)(3)(A), provided that the plan meets the requirements of 29 CFR 2530.204-3, relating to plans which determine an employee's service for purposes of benefit accrual on a basis other than computation periods. Specifically, under 29 CFR 2530.204-3, it must be possible to prove that, despite the fact that benefit accrual under such a plan is not based on computation periods, the plan's provisions meet at least one of the three benefit accrual rules of section 411(b)(1) under all circumstances. Further, 29 CFR 2530.204-3 prohibits such a plan from disregarding service under section 411(b)(3)(C) (which would otherwise permit a plan to disregard service performed by an employee during a computation period in which the employee is credited with less than 1,000 hours). See the regulations under section 411(b) (relating to benefit accrual).

(f) *Transfers between methods of crediting service—(1) Single plan.* A plan may provide that an employee's service for purposes of eligibility to participate, vesting or benefit accrual shall be determined on the basis of computation periods under the general method set forth in 29 CFR 2530.200b-2 for certain classes of employees but under the alternative method permitted under this section for other classes of employees if the plan provides as follows—

(i) In the case of an employee who transfers from a class of employees whose service is determined on the basis of computation periods to a class

§ 1.410(a)-8

26 CFR Ch. I (4-1-08 Edition)

of employees whose service is determined on the alternative basis permitted under this section, the employee shall receive credit for a period of service consisting of—

(A) A number of years equal to the number of years of service credited to the employee before the computation period during which the transfer occurs; and

(B) The greater of (1) the period of service that would be credited to the employee under the elapsed time method for his service during the entire computation period in which the transfer occurs or (2) the service taken into account under the computation periods method as of the date of the transfer.

In addition, the employee shall receive credit for service subsequent to the transfer commencing on the day after the last day of the computation period in which the transfer occurs.

(ii) In the case of an employee who transfers from a class of employees whose service is determined on the alternative basis permitted under this section to a class of employees whose service is determined on the basis of computation periods—

(A) The employee shall receive credit, as of the date of the transfer, for a number of years of service equal to the number of 1-year periods of service credited to the employee as of the date of the transfer, and

(B) The employee shall receive credit, in the computation period which includes the date of the transfer, for a number of hours of service determined by applying one of the equivalencies set forth in 29 CFR 2530.200b-3 (e) (1) to any fractional part of a year credited to the employee under this section as of the date of the transfer. Such equivalency shall be set forth in the plan and shall apply to all similarly situated employees.

(2) *More than one plan.* In the case of an employee who transfers from a plan using either the general method of determining service on the basis of computation periods set forth in 29 CFR 2530.200b-2 or the method of determining service permitted under this section to a plan using the other method of determining service, all service required to be credited under the plan to which the employee transfers shall

be determined by applying the rules of paragraph (f)(1) of this section.

(g) *Amendments to change method of crediting service.* A plan may be amended to change the method of crediting service for any purpose or for any class of employees between the general method set forth in 29 CFR 2530.200-2 and the method permitted under this section, if such amendment contains provisions under which each employee with respect to whom the method of crediting service is changed is treated in the same manner as an employee who transfers from one class of employees to another under paragraph (f)(1) of this section.

(h) *Transitional rule.* For plans in existence on [insert the date of the publication of this document], the provisions of paragraph (f) of this section are effective for plan years beginning after December 31, 1983.

[T.D. 7703, 45 FR 40980, June 17, 1980]

§ 1.410(a)-8 Five consecutive 1-year breaks in service, transitional rules under the Retirement Equity Act of 1984.

Sections 410(a)(5)(D) and 411(a)(6)(D), as amended by the Retirement Equity Act of 1984 (REA 1984), permit a plan to disregard years of service that were disregarded under the plan provisions satisfying those sections (as in effect on August 22, 1984) as of the day before the REA amendments apply to the plan. Under section 302(a) of REA 1984, the new break-in-service rules generally apply to plan years beginning after December 31, 1984. Thus, for example, assume a plan has a calendar plan year and disregarded years of service as permitted by sections 410(a)(5)(D) and 411(a)(6)(D) as in effect on August 22, 1984. An employee completed two years of service in 1981 and 1982, and then incurred two consecutive 1-year breaks in service in 1983 and 1984. The plans may disregard the prior years of service even though the employee did not incur five consecutive 1-year breaks in service. On the other hand, assume the employee completed three consecutive years of service beginning in 1980, and incurred two 1-year breaks in service in 1983 and 1984. Because, as of December 31, 1984, the years of service credited before 1983

Internal Revenue Service, Treasury

§ 1.410(a)-9

could not be disregarded, whether the plan may subsequently disregard those years of service would be governed by the rules enacted by REA 1984.

[T.D. 8219, 53 FR 31851, Aug. 22, 1988; 53 FR 48534, Dec. 1, 1988]

§ 1.410(a)-8T Year of service; break in service (temporary).

(a)-(b) [Reserved]

(c) *Breaks in service.*

(1) [Reserved]

(2) *Employees under 2-year 100 percent vesting schedule*—(i) *General rule.* In the case of an employee who incurs a 1-year break in service under a plan which provides that after not more than 2 years of service each participant's right to his accrued benefit under the plan is completely non-forfeitable (within the meaning of section 411 and the regulations thereunder) at the time such benefit accrues, the employee's service before the break in service is not required to be taken into account after the break in service in determining the employee's years of service under section 410(a)(1) and § 1.410(a)-3 if such employee has not satisfied such service requirement.

(ii) *Example.* The rules of this subparagraph are illustrated by the following example:

Example. A qualified plan computing service by the actual counting of hours provides full and immediate vesting. The plan can not require as a condition of participation that an employee complete 2 consecutive years of service with the employer because the requirement as to consecutive years is not permitted under section 410(a)(5). However, such a plan can require 2 years without a break in service, i.e., 2 years with no intervening years in which the employee fails to complete more than 500 hours of service. Under a plan containing such a participation requirement, the following example illustrates when employees would become eligible to participate.

Year	Hours of service completed		
	Employee A	Employee B	Employee C
1	1,000	1,000	1,000
2	1,000	700	500
3	1,000	1,000	1,000
4	1,000	1,000	700
5	1,000	1,000	1,000

NOTE: Employee A will have satisfied the plan's service requirement at the end of year 2, Employee B at the end of year 3, and Employee C at the end of year 5.

(3) *One-year break in service*—

(i) [Reserved]

(ii) *Examples.* The rules provided by this subparagraph are illustrated by the following examples:

Example 1. Employee A completes a year of service under a plan computing service by the actual counting of hours for the 12-month period ending December 31, 1989, and incurs a 1-year break in service for the 12-month period ending December 31, 1990. The plan does not contain the provisions permitted by section 410(a)(5)(B) (relating to 2-year 100 percent vesting) and section 410(a)(5)(D) (relating to nonvested participants). Thereafter, he does not complete a year of service. As of January 1, 1991, in computing his period of service under the plan his service prior to December 31, 1990, is not required to be taken into account for purposes of section 410(a)(1) and § 1.410(a)-3.

[T.D. 8170, 53 FR 239, Jan. 6, 1988]

§ 1.410(a)-9 Maternity and paternity absence.

(a) *Elapsed time*—(1) *Rule.* For purposes of applying the rules of § 1.410(a)-7 (relating to the elapsed time method of crediting service) to absences described in sections 410(a)(5)(E) and 411(a)(6)(E) (relating to maternity or paternity absence), the severance from service date of an employee who is absent from service beyond the first anniversary of the first day of absence by reason of a maternity or paternity absence described in section 410(a)(5)(E)(i) or 411(a)(6)(E)(i) is the second anniversary of the first day of such absence. The period between the first and second anniversaries of the first day of absence from work is neither a period of service nor a period of severance. This rule applies to maternity and paternity absences beginning on or after the first day of the first plan year in which the plan is required to credit service under sections 410(a)(5)(E) and 411(a)(6)(E).

(2) *Example.* The rules of this section are illustrated by the following example:

Assume an individual works until June 30, 1986; is first absent from employment on July 1, 1986, on account of maternity or paternity absence; and on July 1, 1989, performs an hour of service. The period of service

§ 1.410(a)-9T

must include the period from employment commencement date until June 30, 1987 (one year after the date of separation for any reason other than a quit, discharge, retirement, or death). The period from July 1, 1987, to June 30, 1988, is neither a period of service nor a period of severance. The period of severance would be from July 1, 1988, to June 30, 1989.

(b) *Other methods.* This paragraph provides a safe harbor for plans that compute years of service under the hours of service methods or permitted equivalencies. Such a plan will be treated as satisfying the requirements of sections 410(a)(5)(E) and 411(a)(6)(E) if the plan increases the minimum period of consecutive 1-year breaks required to disregard any service (or deprive any employee of any right) by one. Thus, a plan will satisfy sections 410(a)(5)(E) and 411(a)(6)(E) without having to compute service for maternity or paternity and sections 410(a)(5)(D) and 411(a)(4)(D) and (a)(6)(C), by increasing the period of consecutive breaks-in-service from 5 to 6.

[T.D. 8219, 53 FR 31852, Aug. 22, 1988; 53 FR 48534, Dec. 1, 1988]

§ 1.410(a)-9T Elapsed time (temporary).

(a)-(b) [Reserved]

(c) *Eligibility to participate.*

(1) [Reserved]

(2) *Determination of one-year period of service.*

(i) [Reserved]

(ii) For purposes of section 410(a)(1)(B)(i), a "2-year period of service" shall be deemed to be "2 years of service."

(d) *Vesting—(1) General rule.*

(i)-(iii) [Reserved]

(iv) For purposes of determining an employee's nonforfeitable percentage of accrued benefits derived from employer contributions, a plan, after calculating an employee's period of service in the manner prescribed in this paragraph, may disregard any remaining less than whole year, 12-month or 365-day period of service. Thus, for example, if a plan provides for the statutory three to seven year graded vesting, an employee with a period (or periods) of service which yields 3 whole year periods of service and an additional 321-day period of service is twenty

26 CFR Ch. I (4-1-08 Edition)

ty percent vested in his or her employer-derived accrued benefits (based solely on the 3 whole year periods of service).

[T.D. 8170, 53 FR 239, Jan. 6, 1988]

§ 1.410(b)-0 Table of contents.

This section contains a listing of the major headings of §§ 1.410(b)-1 through 1.410(b)-10.

§ 1.410(b)-1 Minimum coverage requirements (before 1994).

- (a) In general.
- (b) Coverage tests.
 - (1) Percentage test.
 - (2) Classification test.
- (c) Exclusion of certain employees.
 - (1) Bargaining unit.
 - (2) Air pilots.
 - (3) Nonresident aliens.
- (d) Special rules.
 - (1) Highly compensated.
 - (2) Discrimination.
 - (3) Multiple plans.
 - (4) Profit-sharing plans.
 - (5) Certain classifications.
 - (6) Integration with Social Security Act.
 - (7) Different age and service requirements.
- (i) Application.
- (ii) General rule.
- (8) Certain controlled groups.
- (9) Transitional rule.
- (e) Example.

§ 1.410(b)-2 Minimum coverage requirements (after 1993).

- (a) In general.
- (b) Requirements with respect to employees.
 - (1) In general.
 - (2) Ratio percentage test.
- (i) In general.
- (ii) Examples.
- (3) Average benefit test.
- (4) Certain tax credit employee stock ownership plans.
- (5) Employers with no nonhighly compensated employees.
- (6) Plans benefiting no highly compensated employees.
- (7) Plans benefiting collectively bargained employees.
- (c) Requirements with respect to former employees.
 - (1) Former employees tested separately.
 - (2) Testing former employees.
- (d) Nonelective contributions under section 403(b) plans.
- (e) Certain governmental and church plans.
- (f) Certain acquisitions or dispositions.
- (g) Additional rules.

§ 1.410(b)-3 Employees and former employees who benefit under a plan.

- (a) Employees benefiting under a plan.

Internal Revenue Service, Treasury

§ 1.410(b)-0

- (1) In general.
- (2) Exceptions to allocation or accrual requirement.
- (i) Section 401(k) and 401(m) plans.
- (ii) Section 415 limits.
- (iii) Certain employees treated as benefiting.
- (iv) Section 412(i) plans.
- (3) Examples.
- (b) Former employees benefiting under a plan.
- (1) In general.
- (2) Examples.

§ 1.410(b)-4 Nondiscriminatory classification test.

- (a) In general.
- (b) Reasonable classification established by the employer.
- (c) Nondiscriminatory classification.

§ 1.410(b)-10 Effective dates and transition rules.

- (a) Statutory effective dates.
 - (1) In general.
 - (2) Special statutory effective date for collective bargaining agreements.
 - (i) In general.
 - (ii) Example.
 - (iii) Plan maintained pursuant to a collective bargaining agreement.
- (b) Regulatory effective dates.
 - (1) In general.
 - (2) Plans of tax-exempt organizations.
- (c) Compliance during transition period.
- (d) Effective date for governmental plans.

[T.D. 8363, 56 FR 47641, Sept. 19, 1991; 57 FR 10954, Mar. 31, 1992, as amended by T.D. 8487, 58 FR 46838, Sept. 3, 1993; T.D. 8548, 59 FR 32914, June 27, 1994; T.D. 9275, 71 FR 41359, July 21, 2006]

§ 1.410(b)-1 Minimum coverage requirements (before 1994).

(a) *In general.* A plan is not a qualified plan (and a trust forming a part of the plan is not a qualified trust) unless the plan satisfies section 410(b)(1). For plan years prior to the applicable effective date set forth in § 1.410(b)-10, a plan satisfies section 410(b)(1) if it satisfies the requirements of paragraph (b)(1) or (b)(2) of this section. See also § 1.410(b)-2 for plan years beginning on or after the applicable effective date set forth in § 1.410(b)-10.

(b) *Coverage tests*—(1) *Percentage test.* A plan satisfies the requirements of this subparagraph if it benefits—

(i) Seventy percent or more of all employees, or

(ii) Eighty percent or more of all employees who are eligible to benefit under the plan if 70 percent or more of all the employees are eligible to benefit under the plan,

excluding in each case employees who have not satisfied the minimum age and service requirements (if any) prescribed by the plan, as of the date coverage is tested, as a condition of participation and employees permitted to be excluded under paragraph (c) of this section. The percentage requirements of this subparagraph refer to a percentage of active employees, including employees temporarily on leave, such as those in the Armed Forces of the United States, if such employees are eligible under the plan.

(2) *Classification test.* A plan satisfies the requirements of section 410(b)(1) and this subparagraph if it benefits such employees as qualify under a classification of employees set up by the employer, which classification is found by the Internal Revenue Service not to be discriminatory in favor of employees who are officers, shareholders, or highly compensated. For purposes of this subparagraph, except as provided by paragraph (c) of this section, all active employees (including employees who do not satisfy the minimum age or service requirements of the plan) are taken into account.

(c) *Exclusion of certain employees.* Under section 410(b)(2), for purposes of section 410(b)(1) and paragraph (b) of this section, there shall be excluded from consideration employees described in subparagraphs (1), (2), and (3) of this paragraph.

(1) *Bargaining unit.* Under section 410(b)(2)(A) and this paragraph, there may be excluded from consideration employees not included in the plan who are included in a unit of employees covered by an agreement which the Secretary of Labor finds to be a collective bargaining agreement between employee representatives and one or more employers, if the Internal Revenue Service finds that retirement benefits were the subject of good faith bargaining between such employee representatives and such employer or employers. For purposes of determining whether such bargaining occurred, it is not material that such employees are not covered by another plan or that the plan was not considered in such bargaining.

(2) *Air pilots.* Under section 410(b)(2)(B) and this paragraph there may be excluded from consideration, in the case of a plan established or maintained pursuant to an agreement which the Secretary of Labor finds to be a collective bargaining agreement between air pilots represented in accordance with title II of the Railway Labor Act and one or more employers all employees not covered by such agreement. Section 410(b)(2)(B) and this subparagraph do not apply to a plan if the plan provides contributions or benefits for employees whose principal duties are

not customarily performed aboard aircraft in flight.

(3) *Nonresident aliens.* Under section 410(b)(2)(C) and this paragraph, there may be excluded from consideration employees who are nonresident aliens and who receive no earned income (within the meaning of section 911(b) and the regulations thereunder) from the employer which constitutes income from sources within the United States (within the meaning of section 861(a)(3) and the regulations thereunder).

(d) *Special rules—(1) Highly compensated.* The classification of an employee as highly compensated for purposes of section 410(b)(1)(B) and § 1.410(b)-1(b)(2) is made on the basis of the facts and circumstances of each case, taking into account the level of the employee's compensation and the level of compensation paid by the employer to other employees, whether or not covered by the plan. Average compensation levels determined on a local, regional, or national basis, are not relevant for this purpose. Further, the classification of an employee as highly compensated is not made solely on the basis of the number or percentage of employees whose compensation exceeds, or is exceeded by, the employee's.

(2) *Discrimination.* The determination as to whether a plan discriminates in favor of employees who are officers, shareholders, or highly compensated is made on the basis of the facts and circumstances of each case, allowing a reasonable difference between the ratio of such employees benefited by the plan to all such employees of the employer and the ratio of the employees (other than officers, shareholders, or highly compensated) of the employer benefited by the plan to all employees (other than officers, shareholders, or highly compensated). A showing that a specified percentage of employees covered by a plan are not officers, shareholders, or highly compensated, is not in itself sufficient to establish that the plan does not discriminate in favor of employees who are officers, shareholders, or highly compensated.

(3) *Multiple plans—(i)* An employer may designate two or more plans as

constituting a single plan which is intended to qualify for purposes of section 410(b)(1) and this section, in which case all plans so designated shall be considered as a single plan in determining whether the requirements of such section are satisfied by each of the separate plans. A determination that the combination of plans so designated does not satisfy such requirements does not preclude a determination that one or more of such plans, considered separately, satisfies such requirements.

(ii) Notwithstanding subdivision (i) of this subparagraph, a plan which is subject to the limitations of section 401(a)(17) of the Code or section 301(d)(3) of the Tax Reduction Act of 1975 cannot be considered with any other plan which covers any employee covered by such plan.

(4) *Profit-sharing plans.* Employees under a profit-sharing plan who receive the amounts allocated to their accounts before the expiration of a period of time or the occurrence of a contingency specified in the plan shall not be considered covered by the plan. Thus, in case a plan permits employees to receive immediately the amounts allocated to their accounts, or to have such amounts paid to a profit-sharing plan for them, the employees who receive the shares immediately shall not be considered covered by the plan.

(5) *Certain classifications.* See section 401(a)(5) and the regulations thereunder for rules relating to classifications of employees which are not considered to be discriminatory per se for purposes of section 410(b)(1)(B) and § 1.410(b)-1(b)(2).

(6) *Integration with Social Security Act.* See section 401(a)(5) and the regulations thereunder for rules relating to integration of plans with the Social Security Act.

(7) *Different age and service requirements—(i) Application.* The rules of this subparagraph (7) apply to a plan which must satisfy the minimum age and service requirements of section 410(a)(1)(A) in order to be a qualified plan. Accordingly, the rules are inapplicable to plans described in section 410(c)(1) (see § 1.410(a)-1(c)(1)); plans satisfying the alternative minimum age and service requirements of section 410(a)(1)(B) but not satisfying the re-

quirements of section 410(a)(1)(A); and plans which provide contributions or benefits for employees, some or all of whom are owner-employees (see section 401(a)(10)).

(ii) *General rules.* A provision for different age and service requirements for present and future employees either upon establishment or subsequent amendment is not, of itself, discriminatory under section 410(b)(1)(B) even though present employees who are officers, shareholders, or highly compensated cannot meet the age and service requirements for future employees at the time the plan is established or amended and even though present participants who are officers, shareholders, or highly compensated would not have satisfied the age and service requirements for future employees at the time they became participants in the plan. Furthermore, prohibited discrimination will be deemed not to arise in operation, solely because of such different requirements, when future employees are added to the employer's work force.

(8) *Certain controlled groups.* In applying the percentage test and classification test described in paragraph (b) (1) and (2) of this section for a year, all the employees of corporations or trades and businesses whose employees are treated as employed by a single employer by reason of section 414 (b) or (c) must be taken into account. The preceding sentence shall apply for a plan year if, on 1 day in each quarter of such plan year, such corporations are members of a controlled group of corporations (within the meaning of section 414(b)) of such trades or businesses are under common control (within the meaning of section 414(c)).

(9) *Transitional rule.* In the case of a cash and deferred profit-sharing plan, in existence on June 27, 1974, the requirements of paragraph (b)(2) of this section are satisfied if over one-half of the participants in the plan are among the lowest paid two-thirds of all eligible employees. This subparagraph shall not apply after December 31, 1977.

(e) *Example.* The rules provided by this section are illustrated by the following example:

Example. An employer established a non-contributory defined benefit plan covering

all employees of its ABC Division who are hired prior to age 60 and who are at least 25 years old. The normal retirement age under the plan is age 65. The employer has 100 employees including 20 employees who are under age 25 and 10 employees who were hired over age 60. The plan does not cover 15 employees who are over age 25 and were hired before age 60 because they are not in the ABC Division. Of these 15 excluded employees, 3 have less than 1 year of service. In addition, 12 of the 55 employees covered have less than one year of service. The plan can be shown not to satisfy the requirements of IRC section 410(b)(1)(A) as follows:

(i) Number of employees	100
(ii) Number of employees excluded on account of minimum age and service	20
(iii) (i)-(ii)	80
(iv) Number of employees who must be covered if plan is to satisfy IRC section 410(b)(1)(A), 70% of (iii)	56
(v) Number of employees actually covered	55

Because the number of employees covered is less than the number of employees who must be covered, the plan does not satisfy the percentage coverage requirements of IRC section 410(b)(1)(A).

(Sec. 410 (88 Stat. 898; 26 U.S.C. 410))

[T.D. 7508, 42 FR 47197, Sept. 20, 1977, as amended by T.D. 7735, 45 FR 74722, Nov. 12, 1980; T.D. 8363, 56 FR 47643, Sept. 19, 1991; T.D. 8487, 58 FR 46839, Sept. 3, 1993]

§ 1.410(b)-2 Minimum coverage requirements (after 1993).

(a) *In general.* A plan is a qualified plan for a plan year only if the plan satisfies section 410(b) for the plan year. A plan satisfies section 410(b) for a plan year if and only if it satisfies paragraph (b) of this section with respect to employees for the plan year and paragraph (c) of this section with respect to former employees for the plan year. The rules in paragraphs (a), (b), and (c) of this section apply to all plans as a condition of qualification, including plans under which no employee is able to accrue any additional benefits (for example, frozen plans). Paragraphs (d), (e), and (f) of this section provide special rules for nonelective section 403(b) plans subject to section 403(b)(12)(A)(i), for governmental and church plans subject to section 410(c), and for certain acquisitions or dispositions, respectively. See § 1.410(b)-7 for rules for determining the "plan" subject to section 410(b).

(b) *Requirements with respect to employees—(1) In general.* A plan satisfies

this paragraph (b) for a plan year if and only if it satisfies at least one of the tests in paragraphs (b)(2) through (b)(7) of this section for the plan year.

(2) *Ratio percentage test—(i) In general.* A plan satisfies this paragraph (b)(2) for a plan year if and only if the plan's ratio percentage for the plan year is at least 70 percent. This test incorporates both the percentage test of section 410(b)(1)(A) and the ratio test of section 410(b)(1)(B). See § 1.410(b)-9 for the definition of ratio percentage.

(ii) *Examples.* The following examples illustrate the ratio percentage test of this paragraph (b)(2).

Example 1. For a plan year, Plan A benefits 70 percent of an employer's nonhighly compensated employees and 100 percent of the employer's highly compensated employees. The plan's ratio percentage for the year is 70 percent (70 percent/100 percent), and thus the plan satisfies the ratio percentage test.

Example 2. For a plan year, Plan B benefits 40 percent of the employer's nonhighly compensated employees and 60 percent of the employer's highly compensated employees. Plan B fails to satisfy the ratio percentage test because the plan's ratio percentage is only 66.67 percent (40 percent/60 percent).

(3) *Average benefit test.* A plan satisfies this paragraph (b)(3) for a plan year if and only if the plan satisfies both the nondiscriminatory classification test of § 1.410(b)-4 and the average benefit percentage test of § 1.410(b)-5 for the plan year.

(4) *Certain tax credit employee stock ownership plans.* A plan satisfies this paragraph (b)(4) for a plan year if and only if the plan—

(i) Is a tax credit employee stock ownership plan (as defined in section 409(a)),

(ii) Is the only plan of the employer that is intended to qualify under section 401(a), and

(iii) Is a plan that satisfies the rule set forth in section 410(b)(6)(D).

This paragraph (b)(4) is available only for plan years for which the tax credit employee stock ownership plan receives contributions for which the employer is allowed a tax credit under section 41 (as in effect prior to its repeal by the Tax Reform Act of 1986) or section 48(n) (as in effect prior to its amendment by the Tax Reform Act of 1984). The requirement of this paragraph (b)(4) that the plan be the only

§ 1.410(b)-2

26 CFR Ch. I (4-1-08 Edition)

plan of the employer that is intended to qualify under section 401(a) is not satisfied if the employer has only one plan, but that plan is treated as two or more separate plans under the mandatory disaggregation rules of § 1.410(b)-7(c).

(5) *Employers with no nonhighly compensated employees.* A plan satisfies this paragraph (b)(5) for a plan year if and only if the plan is maintained by an employer that has no nonhighly compensated employees at any time during the plan year.

(6) *Plans benefiting no highly compensated employees.* A plan satisfies this paragraph (b)(6) for a plan year if and only if the plan benefits no highly compensated employees for the plan year.

(7) *Plans benefiting collectively bargained employees.* A plan that benefits solely collectively bargained employees for a plan year satisfies this paragraph (b)(7) for the plan year. If a plan (within the meaning of § 1.410(b)-7(b)) benefits both collectively bargained employees and noncollectively bargained employees for a plan year, § 1.410(b)-7(c)(4) provides that the portion of the plan that benefits collectively bargained employees is treated as a separate plan from the portion of the plan that benefits noncollectively bargained employees. Thus, the mandatorily disaggregated portion of the plan that benefits the collectively bargained employees automatically satisfies this paragraph (b)(7) for the plan year and hence section 410(b). See § 1.410(b)-9 for the definitions of collectively bargained employee and noncollectively bargained employee.

(c) *Requirements with respect to former employees—(1) Former employees tested separately.* Former employees are tested separately from employees for purposes of section 410(b). Thus, former employees are disregarded in applying the ratio percentage test, the nondiscriminatory classification test, and the average benefit percentage test with respect to the coverage of employees under a plan, and employees are disregarded in applying this section with respect to the coverage of former employees under a plan.

(2) *Testing former employees.* A plan satisfies section 410(b) with respect to former employees if and only if, under

all of the relevant facts and circumstances (including the group of nonexcludable former employees not benefiting under the plan), the group of former employees benefiting under the plan does not discriminate significantly in favor of highly compensated former employees.

(d) *Nonelective contributions under section 403(b) plans.* For plan years beginning on or after January 1, 1989, a plan subject to section 403(b)(12)(A)(i) with respect to nonelective contributions (i.e., contributions not made pursuant to a salary reduction agreement) is treated as a plan subject to the requirements of this section. For this purpose, a plan described in the preceding sentence must satisfy the requirements of this section without regard to section 410(c) and paragraph (e) of this section. For plan years beginning before the effective date set forth in § 1.410(b)-10(d), any plan described in section 410(c)(1)(A) (regarding governmental plans) satisfies the requirements of this section.

(e) *Certain governmental and church plans.* The requirements of section 410(b) do not apply to a plan described in section 410(c)(1) (other than a plan subject to section 403(b)(12)(A)(i) or a plan with respect to which an election has been made under section 410(d)). Such a plan must satisfy section 401(a)(3) as in effect on September 1, 1974. For this purpose, a plan that satisfies section 410(b) (without regard to this paragraph (e)) is treated as satisfying section 401(a)(3) as in effect on September 1, 1974. For plan years beginning before the effective date set forth in § 1.410(b)-10(d), any plan described in section 410(c)(1)(A) (regarding governmental plans) satisfies the requirements of this section and is thus treated as satisfying the requirements of section 401(a)(3) as in effect on September 1, 1974. See § 1.410(b)-10(b)(2) for a special rule for plans of tax-exempt organizations.

(f) *Certain acquisitions or dispositions.* Section 410(b)(6)(C) (relating to certain acquisitions or dispositions) provides a special rule whereby a plan may be treated as satisfying section 410(b) for

a limited period of time after an acquisition or disposition if it satisfies section 410(b) (without regard to the special rule) immediately before the acquisition or disposition and there is no significant change in the plan or in the coverage of the plan other than the acquisition or disposition. For purposes of section 410(b)(6)(C) and this paragraph (f), the terms “acquisition” and “disposition” refer to an asset or stock acquisition, merger, or other similar transaction involving a change in employer of the employees of a trade or business.

(g) *Additional rules.* The Commissioner may, in revenue rulings, notices, and other guidance of general applicability, provide any additional rules that may be necessary or appropriate in applying the minimum coverage requirements of section 410(b), including (without limitation) additional rules limiting or expanding the methods in § 1.410(b)-5(d) and (e) for determining employee benefit percentages.

[T.D. 8363, 56 FR 47643, Sept. 19, 1991; 57 FR 10817, Mar. 31, 1992, as amended by T.D. 8487, 58 FR 46839, Sept. 3, 1993; T.D. 8548, 59 FR 32914, June 27, 1994]

§ 1.410(b)-3 Employees and former employees who benefit under a plan.

(a) *Employees benefiting under a plan—*
(1) *In general.* Except as provided in paragraph (a)(2) of this section, an employee is treated as benefiting under a plan for a plan year if and only if for that plan year, in the case of a defined contribution plan, the employer receives an allocation taken into account under § 1.401(a)(4)-2(c)(2)(ii), or in the case of a defined benefit plan, the employee has an increase in a benefit accrued or treated as an accrued benefit under section 411(d)(6).

(2) *Exceptions to allocation or accrual requirement—*(i) *Section 401(k) and 401(m) plans.* Notwithstanding paragraph (a)(1) of this section, an employee is treated as benefiting under a section 401(k) plan for a plan year if and only if the employee is an eligible employee as defined in § 1.401(k)-6 under the plan. Similarly, an employee is treated as benefiting under a section 401(m) plan for a plan year if and only if the employee is an eligible employee as de-

finied in § 1.401(m)-5 under the plan for the plan year.

(ii) *Section 415 limits—*(A) *General rule for defined benefit plans.* In determining whether an employee is treated as benefiting under a defined benefit plan for a plan year, plan provisions that implement the limits of section 415 are disregarded. Any plan provision that provides for increases in an employee's accrued benefit under the plan due solely to adjustments under section 415(d)(1), additional years of participation or service under section 415(b)(5), or changes in the defined contribution fraction under section 415(e) is also disregarded, but only if such provision applies uniformly to all employees in the plan.

(B) *Defined benefit plans taking section 415 limits into account under section 401(a)(4) testing.* Paragraph (a)(2)(ii)(A) of this section does not apply in the case of a defined benefit plan that uses the option in § 1.401(a)(4)-3(d)(2)(ii)(B) to take into account plan provisions implementing the provisions of section 415 in determining accrual rates under the section 401(a)(4) general test.

(C) *Defined contribution plans.* A defined contribution plan is permitted to apply the rule in the first sentence of paragraph (a)(2)(ii)(A) of this section in determining whether an employee is treated as benefiting under the plan, provided it applies the rule on a consistent basis for all employees in the plan.

(iii) *Certain employees treated as benefiting—*(A) *In general.* An employee is treated as benefiting under a plan for a plan year if the employee satisfies all of the applicable conditions for accruing a benefit or receiving an allocation for the plan year but fails to have an increase in accrued benefit or to receive an allocation solely because of one or more of the conditions set forth in paragraphs (a)(2)(iii) (B) through (F) of this section.

(B) *Certain plan limits.* The employee's benefit would otherwise exceed a limit that is applicable on a uniform basis to all employees in the plan. Thus, for example, if the formula under a defined benefit plan takes into account only the first 30 years of service for accrual purposes, an employee who has completed more than 30 years of service is

still treated as benefiting under the plan.

(C) *Benefits previously accrued.* The benefit previously accrued by the employee is greater than the benefit that would be determined under the plan if the benefit previously accrued were disregarded. This could happen, for example, when the plan is applying the wear-away formula of § 1.401(a)(4)-13(c)(4)(ii) and the employee's frozen accrued benefit exceeds the benefit determined under the current formula.

(D) *Benefit offset arrangements.* The plan offsets the employee's current benefit accrual under an offset arrangement described in § 1.401(a)(4)-3(f)(9) (without regard to whether the offset is attributable to pre-participation service or past service).

(E) *Target benefit plans.* In the case of a target benefit plan that satisfies the nondiscriminatory amount requirement of § 1.401(a)(4)-1(b)(2) by satisfying the safe harbor in § 1.401(a)(4)-8(b)(3), the employee's theoretical reserve is greater than or equal to the actuarial present value of the fractional rule benefit.

(F) *Post-normal retirement age adjustments.* The employee has attained normal retirement age under a defined benefit plan and fails to accrue a benefit because of the provisions of section 411(b)(1)(H)(iii) regarding adjustments for delayed retirement.

(iv) *Section 412(i) plans—(A) General rule.* Notwithstanding paragraph (a)(1) of this section, an employee is treated as benefiting under an insurance contract plan within the meaning of section 412(i) for a plan year if and only if a premium is paid on behalf of the employee for the plan year.

(B) *Exceptions.* Notwithstanding paragraph (a)(2)(iv)(A) of this section, an employee is treated as benefiting under an insurance contract plan within the meaning of section 412(i) for a plan year if the sole reason that a premium is not paid on behalf of the employee is one of the reasons described in paragraph (a)(2)(iii) of this section. In addition, an employee is treated as benefiting under an insurance contract plan, within the meaning of section 412(i), that is a defined benefit plan if a premium is not paid on behalf of the employee solely because the insurance

contracts that have previously been purchased on behalf of the employee guarantee to provide for the employee's projected normal retirement benefit without regard to future premium payments.

(3) *Examples.* The following examples illustrate the determination of whether an employee is benefiting under a plan for purposes of section 410(b).

Example 1. An employer has 35 employees who are eligible under a defined benefit plan. The plan requires 1,000 hours of service to accrue a benefit. Only 30 employees satisfy the 1,000-hour requirement and accrue a benefit. The five employees who do not satisfy the 1,000-hour requirement during the plan year are taken into account in testing the plan under section 410(b) but are treated as not benefiting under the plan.

Example 2. An employer maintains a section 401(k) plan. Only employees who are at least age 21 and who complete one year of service are eligible employees under the plan within the meaning of § 1.401(k)-6. Under the rule of paragraph (a)(2)(i) of this section, only employees who have satisfied these age and service conditions are treated as benefiting under the plan.

Example 3. The facts are the same as in Example 2, except that the employer also maintains a section 401(m) plan that provides matching contributions contingent on elective contributions under the section 401(k) plan. The matching contributions are contingent on employment on the last day of the plan year. Under § 1.401(m)-5, because matching contributions are contingent on employment on the last day of the plan year, not all employees who are eligible employees under the section 401(k) plan are eligible employees under the section 401(m) plan. Thus, employees who have satisfied the age and service conditions but who do not receive a matching contribution because they are not employed on the last day of the plan year are treated as not benefiting under the section 401(m) portion of the plan.

(b) *Former employees benefiting under a plan—(1) In general.* A former employee is treated as benefiting for a plan year if and only if the plan provides an allocation or benefit increase described in paragraph (a)(1) of this section to the former employee for the plan year. Thus, for example, a former employee benefits under a defined benefit plan for a plan year if the plan is amended to provide an ad hoc cost-of-living adjustment in the former employee's benefits. In contrast, because an increase

in benefits payable under a plan pursuant to an automatic cost-of-living provision adopted and effective before the beginning of the plan year is previously accrued, a former employee is not treated as benefiting in a subsequent plan year merely because the former employee receives an increase pursuant to such an automatic cost-of-living provision. Any accrual or allocation for an individual during the plan year that arises from the individual's status as an employee is treated as an accrual or allocation of an employee. Similarly, any accrual or allocation for an individual during the plan year that arises from the individual's status as a former employee is treated as an accrual or allocation of a former employee. It is possible for an individual to accrue a benefit both as an employee and as a former employee in a given plan year. During the plan year in which an individual ceases performing services for the employer, the individual is treated as an employee in applying section 410(b) with respect to employees and is treated as a former employee in applying section 410(b) with respect to former employees.

(2) *Examples.* The following examples illustrate the determination of whether a former employee benefits under a plan for purposes of section 410(b).

Example 1. Employer A amends its defined benefit plan in the 1995 plan year to provide an ad hoc cost-of-living increase of 5 percent for all retirees. Former employees who receive this increase are treated as benefiting under the plan for the 1995 plan year.

Example 2. Employer B maintains a defined benefit plan with a calendar plan year. In the 1995 plan year, Employer B amends the plan to provide that an employee who has reached early retirement age under the plan and who retires before July 31 of the 1995 plan year will receive an unreduced benefit, even though the employee has not yet reached normal retirement age. This early retirement window benefit is provided to employees based on their status as employees. Thus, although individuals who take advantage of the benefit become former employees, the window benefit is treated as provided to employees and is not treated as a benefit for former employees.

Example 3. The facts are the same as *Example 2*, except that on September 1, 1995, Employer B also amends the defined benefit plan to provide an ad hoc cost-of-living increase effective for all former employees. An individual who ceases performing services

for the employer before July 31, 1995, under the early retirement window, and then receives the ad hoc cost-of-living increase, is treated as benefiting for the 1995 plan year both as an employee with respect to the early retirement window, and as a former employee with respect to the ad hoc COLA.

[T.D. 8363, 56 FR 47644, Sept. 19, 1991; 57 FR 10954, Mar. 31, 1992, as amended by T.D. 8487, 58 FR 46839, Sept. 3, 1993; T.D. 9169, 69 FR 78153, 78154, Dec. 29, 2004]

§ 1.410(b)-4 Nondiscriminatory classification test.

(a) *In general.* A plan satisfies the nondiscriminatory classification test of this section for a plan year if and only if, for the plan year, the plan benefits the employees who qualify under a classification established by the employer in accordance with paragraph (b) of this section, and the classification of employees is nondiscriminatory under paragraph (c) of this section.

(b) *Reasonable classification established by the employer.* A classification is established by the employer in accordance with this paragraph (b) if and only if, based on all the facts and circumstances, the classification is reasonable and is established under objective business criteria that identify the category of employees who benefit under the plan. Reasonable classifications generally include specified job categories, nature of compensation (i.e., salaried or hourly), geographic location, and similar bona fide business criteria. An enumeration of employees by name or other specific criteria having substantially the same effect as an enumeration by name is not considered a reasonable classification.

(c) *Nondiscriminatory classification—(1) General rule.* A classification is nondiscriminatory under this paragraph (c) for a plan year if and only if the group of employees included in the classification benefiting under the plan satisfies the requirements of either paragraph (c)(2) or (c)(3) of this section for the plan year.

(2) *Safe harbor.* A plan satisfies the requirement of this paragraph (c)(2) for a plan year if and only if the plan's ratio percentage is greater than or equal to the employer's safe harbor percentage, as defined in paragraph (c)(4)(i) of this section. See § 1.410(b)-9

§ 1.410(b)-4

26 CFR Ch. I (4-1-08 Edition)

for the definition of a plan's ratio percentage.

(3) *Facts and circumstances*—(i) *General rule.* A plan satisfies the requirements of this paragraph (c)(3) if and only if—

(A) The plan's ratio percentage is greater than or equal to the unsafe harbor percentage, as defined in paragraph (c)(4)(ii) of this section, and

(B) The classification satisfies the factual determination of paragraph (c)(3)(ii) of this section.

(ii) *Factual determination.* A classification satisfies this paragraph (c)(3)(ii) if and only if, based on all the relevant facts and circumstances, the Commissioner finds that the classification is nondiscriminatory. No one particular fact is determinative. Included among the facts and circumstances relevant in determining whether a classification is nondiscriminatory are the following—

(A) The underlying business reason for the classification. The greater the business reason for the classification, the more likely the classification is to be nondiscriminatory. Reducing the employer's cost of providing retirement benefits is not a relevant business reason.

(B) The percentage of the employer's employees benefiting under the plan. The higher the percentage, the more likely the classification is to be nondiscriminatory.

(C) Whether the number of employees benefiting under the plan in each salary range is representative of the number of employees in each salary range of the employer's workforce. In general, the more representative the percentages of employees benefiting under the plan in each salary range, the more likely the classification is to be nondiscriminatory.

(D) The difference between the plan's ratio percentage and the employer's safe harbor percentage. The smaller the difference, the more likely the classification is to be nondiscriminatory.

(E) The extent to which the plan's average benefit percentage (determined under § 1.410(b)-5) exceeds 70 percent.

(4) *Definitions*—(i) *Safe harbor percentage.* The safe harbor percentage of an employer is 50 percent, reduced by $\frac{3}{4}$ of

a percentage point for each whole percentage point by which the nonhighly compensated employee concentration percentage exceeds 60 percent. See paragraph (c)(4)(iv) for a table that illustrates the safe harbor percentage and unsafe harbor percentage.

(ii) *Unsafe harbor percentage.* The unsafe harbor percentage of an employer is 40 percent, reduced by $\frac{3}{4}$ of a percentage point for each whole percentage point by which the nonhighly compensated employee concentration percentage exceeds 60 percent. However, in no case is the unsafe harbor percentage less than 20 percent.

(iii) *Nonhighly compensated employee concentration percentage.* The nonhighly compensated employee concentration percentage of an employer is the percentage of all the employees of the employer who are nonhighly compensated employees. Employees who are excludable employees for purposes of the average benefit test are not taken into account.

(iv) *Table.* The following table sets forth the safe harbor and unsafe harbor percentages at each nonhighly compensated employee concentration percentage:

Nonhighly compensated employee concentration percentage	Safe harbor percentage	Unsafe harbor percentage
0-60	50.00	40.00
61	49.25	39.25
62	48.50	38.50
63	47.75	37.75
64	47.00	37.00
65	46.25	36.25
66	45.50	35.50
67	44.75	34.75
68	44.00	34.00
69	43.25	33.25
70	42.50	32.50
71	41.75	31.75
72	41.00	31.00
73	40.25	30.25
74	39.50	29.50
75	38.75	28.75
76	38.00	28.00
77	37.25	27.25
78	36.50	26.50
79	35.75	25.75
80	35.00	25.00
81	34.25	24.25
82	33.50	23.50
83	32.75	22.75
84	32.00	22.00
85	31.25	21.25
86	30.50	20.50
87	29.75	20.00
88	29.00	20.00
89	28.25	20.00
90	27.50	20.00

Internal Revenue Service, Treasury

§ 1.410(b)-5

Nonhighly compensated employee concentration percentage	Safe harbor percentage	Unsafe harbor percentage
91	26.75	20.00
92	26.00	20.00
93	25.25	20.00
94	24.50	20.00
95	23.75	20.00
96	23.00	20.00
97	22.25	20.00
98	21.50	20.00
99	20.75	20.00

(5) *Examples.* The following examples illustrate the rules in this paragraph (c).

Example 1. Employer A has 200 nonexcludable employees, of whom 120 are nonhighly compensated employees and 80 are highly compensated employees. Employer A maintains a plan that benefits 60 nonhighly compensated employees and 72 highly compensated employees. Thus, the plan's ratio percentage is 55.56 percent ($[60/120]/[72/80]=50\%/90\%=0.5556$), which is below the percentage necessary to satisfy the ratio percentage test of § 1.410(b)-2(b)(2). The employer's nonhighly compensated employee concentration percentage is 60 percent (120/200); thus, Employer A's safe harbor percentage is 50 percent and its unsafe harbor percentage is 40 percent. Because the plan's ratio percentage is greater than the safe harbor percentage, the plan's classification satisfies the safe harbor of paragraph (c)(2) of this section.

Example 2. The facts are the same as in *Example 1*, except that the plan benefits only 40 nonhighly compensated employees. The plan's ratio percentage is thus 37.03 percent ($[40/120]/[72/80]=33.33\%/90\%=0.3703$). Under these facts, the plan's classification is below the unsafe harbor percentage and is thus considered discriminatory.

Example 3. The facts are the same as in *Example 1*, except that the plan benefits 45 nonhighly compensated employees. The plan's ratio percentage is thus 41.67 percent ($[45/120]/[72/80]=37.50\%/90\%=0.4167$), above the unsafe harbor percentage (40 percent) and below the safe harbor percentage (50 percent). The Commissioner may determine that the classification is nondiscriminatory after considering all the relevant facts and circumstances.

Example 4. Employer B has 10,000 nonexcludable employees, of whom 9,600 are nonhighly compensated employees and 400 are highly compensated employees. Employer B maintains a plan that benefits 600 nonhighly compensated employees and 100 highly compensated employees. Thus, the plan's ratio percentage is 25.00 percent ($[600/9,600]/[100/400]=6.25\%/25\%=0.2500$), which is below the percentage necessary to satisfy the ratio percentage test of § 1.410(b)-2(b)(2). Employer B's

nonhighly compensated employee concentration percentage is 96 percent (9,600/10,000); thus, Employer B's safe harbor percentage is 23 percent, and its unsafe harbor percentage is 20 percent. Because the plan's ratio percentage (25.00 percent) is greater than the safe harbor percentage (23.00 percent), the plan's classification satisfies the safe harbor of paragraph (c)(2) of this section.

Example 5. The facts are the same as in *Example 4*, except that the plan benefits only 400 nonhighly compensated employees. The plan's ratio percentage is thus 16.67 percent ($[400/9,600]/[100/400]=4.17\%/25\%=0.1667$). The plan's ratio percentage is below the unsafe harbor percentage and thus the classification is considered discriminatory.

Example 6. The facts are the same as in *Example 4*, except that the plan benefits 500 nonhighly compensated employees. The plan's ratio percentage is thus 20.83 percent ($[500/9,600]/[100/400]=5.21\%/25\%=0.2083$), above the unsafe harbor percentage (20 percent) and below the safe harbor percentage (23 percent). The Commissioner may determine that the classification is nondiscriminatory after considering all the facts and circumstances.

[T.D. 8363, 56 FR 47645, Sept. 19, 1991; 57 FR 10954, Mar. 31, 1992]

§ 1.410(b)-5 Average benefit percentage test.

(a) *General rule.* A plan satisfies the average benefit percentage test of this section for a plan year if and only if the average benefit percentage of the plan for the plan year is at least 70 percent. A plan is deemed to satisfy this requirement if it satisfies paragraph (f) of this section for the plan year.

(b) *Determination of average benefit percentage.* The average benefit percentage of a plan for a plan year is the percentage determined by dividing the actual benefit percentage of the nonhighly compensated employees in plans in the testing group for the testing period that includes the plan year by the actual benefit percentage of the highly compensated employees in plans in the testing group for that testing period. See paragraph (d)(3)(ii) of this section for the definition of testing period.

(c) *Determination of actual benefit percentage.* The actual benefit percentage of a group of employees for a testing period is the average of the employee benefit percentages, calculated separately with respect to each of the employees in the group for the testing period. All nonexcludable employees of

§ 1.410(b)-5

26 CFR Ch. I (4-1-08 Edition)

the employer are taken into account for this purpose, even if they are not benefiting under any plan that is taken into account.

(d) *Determination of employee benefit percentages*—(1) *Overview.* This paragraph (d) provides rules for determining employee benefit percentages. See paragraph (e) of this section for alternative methods for determining employee benefit percentages.

(2) *Employee contributions and employer-provided benefits disregarded.* Only employer-provided contributions and benefits are taken into account in determining employee benefit percentages. Therefore, employee contributions (including both employee contributions allocated to separate accounts and employee contributions not allocated to separate accounts), and benefits derived from such contributions, are not taken into account in determining employee benefit percentages.

(3) *Plans and plan years taken into account*—(i) *Testing group.* All plans included in the testing group under § 1.410(b)-7(e)(1), and only those plans, are taken into account in determining an employee's employee benefit percentage.

(ii) *Testing period.* An employee's employee benefit percentage is determined on the basis of plan years ending with or within the same calendar year. These plan years are referred to in this section as the relevant plan years or, in the aggregate, as the testing period.

(4) *Contributions or benefits basis.* Employee benefit percentages may be determined on either a contributions or a benefits basis. Employee benefit percentages for any testing period must be determined on the same basis (contributions or benefits) for all plans in the testing group.

(5) *Determination of employee benefit percentage*—(i) *General rule.* The employee benefit percentage for an employee for a testing period is the rate that would be determined for that employee for purposes of applying the general test for nondiscrimination in §§ 1.401(a)(4)-2, 1.401(a)(4)-3, 1.401(a)(4)-8 or 1.401(a)(4)-9, if all the plans in the testing group were aggregated for purposes of section 410(b). Thus, if employee benefit percentages are deter-

mined on a contributions basis, each employee's employee benefit percentage is the aggregate normal allocation rate that would be determined for the employee under § 1.401(a)(4)-9(b)(2)(ii)(A) (if the plans in the testing group include both defined benefit and defined contribution plans), the allocation rate that would be determined for the employee under § 1.401(a)(4)-2(c)(2) (if the plans in the testing group include only defined contribution plans), or the equivalent normal allocation rate that would be determined for the employee under § 1.401(a)(4)-8(c)(2) (if the plans in the testing group include only defined benefit plans). Similarly, if employee benefit percentages are determined on a benefits basis, each employee's employee benefit percentage is the aggregate normal accrual rate that would be determined for the employee under § 1.401(a)(4)-9(b)(2)(ii)(B), the normal accrual rate that would be determined for the employee under § 1.401(a)(4)-3(d), or the equivalent accrual rate that would be determined for the employee under § 1.401(a)(4)-8(b)(2), depending on whether the plans in the testing group include both defined benefit and defined contribution plans, only defined benefit plans, or only defined contribution plans.

(ii) *Plans with differing plan years.* If not all the plans in the testing group share the same plan year, § 1.410(b)-7(d)(5) would ordinarily prohibit them from being aggregated for purposes of section 410(b). In such a case, employee benefit percentages are determined by applying the rules of paragraph (d)(5)(i) of this section separately to each subset of plans in the testing group that share the same plan year (or the same accrual computation period) and aggregating the results for all plans in the testing group. Thus, an employee's employee benefit percentage is determined as the sum of these separate employee benefit percentages that are determined consistently for all the plans in the testing group (except for differences attributable solely to the differences in plan years).

(iii) *Options and consistency requirements.* In determining employee benefit percentages under this paragraph (d)(5), any optional or alternative

methods or rules available for determining rates in §§ 1.401(a)(4)-2, 1.401(a)(4)-3, 1.401(a)(4)-8, or 1.401(a)(4)-9, whichever is applicable, may be applied. Thus, for example, employee benefit percentages may generally be calculated using any of the alternative methods of determining average annual compensation or plan year compensation under § 1.401(a)(4)-12, and using any underlying definition of compensation that satisfies section 414(s). Except as otherwise specifically permitted, the determination of employee benefit percentages must be made on a consistent basis for all employees and for all plans in the testing group as required by §§ 1.401(a)(4)-2(c)(2)(vi), 1.401(a)(4)-3(d)(2)(i), 1.401(a)(4)-8(b)(2)(iv), 1.401(a)(4)-8(c)(2)(iv) or 1.401(a)(4)-9(b)(2)(iv).

(6) *Permitted disparity*—(i) *In general.* Permitted disparity may be imputed in determining employee benefit percentages as provided in §§ 1.401(a)(4)-2, 1.401(a)(4)-3, 1.401(a)(4)-8, or 1.401(a)(4)-9, whichever is applicable. When separate employee benefit percentages are determined for individual plans under paragraph (e)(2) of this section (or for subsets of plans that have the same plan year as described in paragraph (d)(5)(ii) of this section), permitted disparity may be imputed for an employee only in one individual plan (or subset of plans) and may not be imputed for the same employee in another individual plan (or subset of plans). However, if the same average annual compensation or plan year compensation is used to determine employee benefit percentages in more than one plan, the employee's employee benefit percentages for those plans may be summed prior to imputing permitted disparity.

(ii) *Plans which may not use permitted disparity.* Permitted disparity may be reflected in the determination of rates only to the extent that the plans for which rates are being determined are plans for which the permitted disparity of section 401(l) is available. Thus, for example, if a section 401(k) plan is included in the testing group and permitted disparity is imputed under § 1.401(a)(4)-2(c)(iv), then employee benefit percentages are determined by first calculating an adjusted allocation rate (within the meaning of

§ 1.401(a)(4)-7(b)(1)) without regard to the amount of allocations under the section 401(k) plan and adding to it the allocation rate for the section 401(k) plan. See § 1.401(l)-1(a)(4) for a list of types of plans for which permitted disparity is not available.

(7) *Requirements for certain plans providing early retirement benefits*—(i) *General rule.* If any defined benefit plan in the testing group provides for early retirement benefits in addition to normal retirement benefits to any highly compensated employee, and the average actuarial reduction for any one of these benefits commencing in the five years prior to the plan's normal retirement age is less than four percent per year, then the aggregate most valuable allocation rate, equivalent most valuable accrual rate, aggregate most valuable accrual rate, or most valuable accrual rate must be substituted for the related normal rates in paragraph (d)(5) of this section.

(ii) *Exception.* Paragraph (d)(7)(i) of this section does not apply if early retirement benefits with average actuarial reductions described in that paragraph are currently available, within the meaning of § 1.401(a)(4)-4(b), under plans in the testing group to a percentage of nonhighly compensated employees that is at least 70 percent of the percentage of highly compensated employees to whom these benefits are currently available.

(e) *Additional optional rules*—(1) *Overview.* This paragraph (e) contains various alternative methods for determining employee benefit percentages for a testing period.

(2) *Determination of employee benefit percentages as the sum of separately determined rates*—(i) *In general.* Employee benefit percentages may be determined as the sum of separately determined employee benefit percentages for each of the plans in the testing group that are aggregated under paragraphs (d)(5)(i) or (ii) of this section, provided that these employee benefit percentages are determined on a consistent basis for all of these plans pursuant to paragraph (d)(5)(iii) of this section.

(ii) *Exception from consistency requirement.* The consistency requirement of paragraph (e)(2)(i) of this section is not

violated merely because employee benefit percentages are not determined in a consistent manner for all of the plans in the testing group and the inconsistencies in determination of rates among plans are described in paragraph (e)(2)(iii) of this section. The exception in this paragraph (e)(2)(ii) applies only if it is reasonable to believe that the inconsistencies do not result in an average benefit percentage that is significantly higher than the average benefit percentage that would be determined had employee benefit percentages been determined on a consistent basis pursuant to paragraph (d)(5)(iii) of this section.

(iii) *Permitted inconsistencies.* The following inconsistencies between plans are permitted under this paragraph (e)(2)—

(A) Use of different underlying definitions of section 414(s) compensation in the determination of rates;

(B) Use of different definitions of average annual compensation;

(C) Use of different testing ages;

(D) Use of different fresh-start dates;

(E) Use of different actuarial assumptions for normalization; or

(F) Disregard of actuarial increases after normal retirement age and QPSA charges without regard to any requirement for uniformity in the actuarial increases or QPSA charges.

(3) *Determination of employee benefit percentages without regard to plans of another type—(i) General rule.* Employee benefit percentages may be determined under plans of one type (i.e., defined benefit plans or defined contribution plans) by treating all plans of the other type (i.e., defined contribution plans or defined benefit plans, respectively) as if they were not part of the testing group, using the method provided in this paragraph (e)(3). If this method is used to determine whether a defined contribution plan satisfies the average benefit percentage test, employee benefit percentages under all defined contribution plans in the testing group must be determined on a contributions basis, and benefits under any defined benefit plans may not be included in the employee benefit percentage. Similarly, if this method is used to determine whether a defined benefit plan satisfies the average benefit percentage

test, employee benefit percentages under all defined benefit plans in the testing group must be determined on a benefits basis, and allocations under any defined contribution plans may not be included in the employee benefit percentage.

(ii) *Restriction on use of separate testing group determination method.* A plan does not satisfy the average benefit percentage test using the method provided in this paragraph (e)(3) unless each of the plans in the testing group of the other type (i.e., defined benefit plan or defined contribution plan) than the plan being tested satisfies the average benefit test of § 1.410(b)-2(b)(3) using the method in this paragraph (e)(3) or satisfies the ratio percentage test of § 1.410(b)-2(b)(2).

(iii) *Treatment of permitted disparity.* Although under the general rule of this paragraph (e)(3) plans of another type are disregarded in determining employee benefit percentages, the permitted disparity used by those plans (including any permitted disparity that is used by those plans to satisfy § 1.401(a)(4)-1(b)(2)) is nonetheless taken into account in determining the extent to which permitted disparity may be used in determining employee benefit percentages.

(iv) *Example.* The following example illustrates the rules of this paragraph (e)(3):

Example. Employer A maintains two defined benefit plans, neither of which covers a group of employees that satisfies the ratio percentage test of § 1.410(b)-2(b)(2), and a profit-sharing plan and a section 401(k) plan, each of which benefits a group of employees that satisfies the ratio percentage test of § 1.410(b)-2(b)(2). The defined benefit plans will satisfy the average benefit percentage test if the actual benefit percentage of all nonexcludable nonhighly compensated employees, computed on a benefits basis without regard to contributions under the profit-sharing plan or the section 401(k) plan, is at least 70 percent of the actual benefit percentage of all nonexcludable highly compensated employees, computed on a benefits basis without regard to contributions under the profit-sharing plan or the section 401(k) plan.

(4) *Simplified method for determining employee benefit percentages for certain defined benefit plans—(i) In general.* An

employee's employee benefit percentage with respect to a plan may be determined under the simplified method of paragraph (e)(4)(ii) of this section, provided the following conditions are satisfied:

(A) The only plans included in the testing group are defined benefit plans, and employee benefit percentages under these plans are determined on a benefits basis.

(B) Employee benefit percentages under the plans in the testing group are not required to be determined by taking into account early retirement benefits under paragraph (d)(7) of this section.

(C) The plan is a safe harbor defined benefit plan described in § 1.401(a)(4)-3(b).

(ii) *Simplified method*—(A) *Section 401(l) plans*. Under the simplified method of this paragraph (e)(4)(ii), an employee's employee benefit percentage with respect to a section 401(l) plan described in § 1.401(a)(4)-3(b)(3) (i.e., a unit credit plan) may be deemed equal to the employee's excess benefit percentage or gross benefit percentage (as defined in § 1.401(l)-1(c) (14) or (18), respectively), whichever is applicable under the plan's benefit formula in the plan year. In the case of a section 401(l) plan described in § 1.401(a)(4)-3(b)(4) (i.e., a fractional accrual plan), an employee's employee benefit percentage with respect to that plan may be deemed equal to the rate at which the excess or gross benefit, whichever is applicable, accrues for the employee in the plan year, taking into account the plan's benefit formula and the employee's projected service at normal retirement age. The use of this simplified method will be treated as an imputation of permitted disparity. See paragraph (d)(6) of this section for a restriction on multiple use of permitted disparity.

(B) *Other plans*. Under the simplified method of this paragraph (e)(4)(ii), an employee's employee benefit percentage with respect to a plan described in § 1.401(a)(4)-3(b)(3) that is not a section 401(l) plan and that is not imputing permitted disparity may be deemed equal to the employee's benefit rate in the plan year under the plan's benefit formula. In the case of a plan described

in § 1.401(a)(4)-3(b)(4) that is not a section 401(l) plan and that is not imputing permitted disparity, an employee's employee benefit percentage with respect to that plan may be deemed equal to the rate at which the benefit accrues for the employee in the plan year, taking into account the plan's benefit formula and an employee's projected service at normal retirement age.

(5) *Three-year averaging period*. An employee's employee benefit percentage may be determined for a testing period as the average of the employee's employee benefit percentages determined separately for the testing period and for the immediately preceding one or two testing periods (referred to in this section as an averaging period). Employee benefit percentages of a particular employee that are averaged together within an averaging period must be determined on a consistent basis for all testing periods within the averaging period.

(6) *Alternative methods of determining compensation*. Employee benefit percentages may be determined on the basis of any definition of compensation that satisfies § 1.414(s)-1(d) (without regard to whether the definition satisfies § 1.414(s)-1(d)(3)), provided that the same definition is used for all employees and it is reasonable to believe that the definition does not result in an average benefit percentage that is significantly higher than the average benefit percentage that would be determined had employee benefit percentages been determined using a definition of compensation that also satisfies § 1.414(s)-1(d)(3).

(f) *Special rule for certain collectively bargained plans*. A plan (as determined without regard to the mandatory disaggregation rule of § 1.410(b)-7(c)(5)) that benefits both collectively bargained employees and noncollectively bargained employees is deemed to satisfy the average benefit percentage test of this section if—

(1) The provisions of the plan applicable to each employee in the plan are identical to the provisions of the plan applicable to every other employee in the plan, including the plan benefit or allocation formula, any optional forms of benefit, any ancillary benefit, and

§ 1.410(b)-6

26 CFR Ch. I (4-1-08 Edition)

any other right or feature under the plan, and

(2) The plan would satisfy the ratio percentage test of § 1.410(b)-2(b)(2), if §§ 1.410(b)-6(d) and 1.410(b)-7(c)(5) (the excludable employee and mandatory disaggregation rules for collectively bargained and noncollectively bargained employees) did not apply.

[T.D. 8363, 56 FR 47646, Sept. 19, 1991; 57 FR 10817, 10954, Mar. 31, 1992, as amended by T.D. 8487, 58 FR 46840, Sept. 3, 1993]

§ 1.410(b)-6 Excludable employees.

(a) *Employees*—(1) *In general.* For purposes of applying section 410(b) with respect to employees, all employees of the employer, other than the excludable employees described in paragraphs (b) through (i) of this section, are taken into account. Excludable employees are not taken into account with respect to a plan even if they are benefiting under the plan, except as otherwise provided in paragraph (b) of this section.

(2) *Rules of application.* Except as specifically provided otherwise, excludable employees are determined separately with respect to each plan for purposes of testing that plan under section 410(b). Thus, in determining whether a particular plan satisfies the ratio percentage test of § 1.410(b)-2(b)(2), paragraphs (b) through (i) of this section are applied solely with reference to that plan. Similarly, in determining whether two or more plans that are permissively aggregated and treated as a single plan under § 1.410(b)-7(d) satisfy the ratio percentage test of § 1.410(b)-2(b)(2), paragraphs (b) through (i) of this section are applied solely with reference to the deemed single plan. In determining whether a plan satisfies the average benefit percentage test of § 1.410(b)-5, the rules of this section are applied by treating all plans in the testing group as a single plan.

(b) *Minimum age and service exclusions*—(1) *In general.* If a plan applies minimum age and service eligibility conditions permissible under section 410(a)(1) and excludes all employees who do not meet those conditions from benefiting under the plan, then all employees who fail to satisfy those conditions are excludable employees with respect to that plan. An employee is

treated as meeting the age and service requirements on the date that any employee with the same age and service (including service permitted to be taken into account for purposes of non-discrimination testing under § 1.401(a)(4)-11(d)(3)) would be eligible to commence participation in the plan, as provided in section 410(b)(4)(C).

(2) *Multiple age and service conditions.* If a plan, including a plan for which an employer chooses the treatment under paragraph (b)(3) of this section, has two or more different sets of minimum age and service eligibility conditions, those employees who fail to satisfy all of the different sets of age and service conditions are excludable employees with respect to the plan. Except as provided in paragraph (b)(3) of this section, an employee who satisfies any one of the different sets of conditions is not an excludable employee with respect to the plan. Differences in the manner in which service is credited (e.g., hours of service calculated in accordance with 29 CFR 2530.200b-2 for hourly employees and elapsed time calculated in accordance with § 1.410(a)-7 for salaried employees) for purposes of applying a service condition are not taken into account in determining whether multiple age and service eligibility conditions exist.

(3) *Plans benefiting certain otherwise excludable employees*—(i) *In general.* An employer may treat a plan benefiting otherwise excludable employees as two separate plans, one for the otherwise excludable employees and one for the other employees benefiting under the plan. See § 1.410(b)-7(c)(3) regarding permissive disaggregation of plans benefiting otherwise excludable employees. The effect of this rule is that employees who would be excludable under paragraph (b)(1) of this section (applied without regard to section 410(a)(1)(B)) but for the fact that the plan does not apply the greatest permissible minimum age and service conditions may be treated as excludable employees with respect to the plan. This treatment is available only if the plan satisfies section 410(b) and § 1.410(b)-2 with respect to these otherwise excludable employees in the manner described in paragraph (b)(3)(ii) of this section.

(ii) *Testing portion of plan benefiting otherwise excludable employees.* In determining whether the plan that benefits employees who would otherwise be excludable under paragraph (b)(1) of this section (applied without regard to section 410(a)(1)(B)) satisfies section 410(b) and § 1.410(b)-2, employees who have satisfied the greatest permissible minimum age and service conditions with respect to the plan are excludable employees. In addition, if the plan being tested applies minimum age and service conditions and those conditions are less than the maximum permissible minimum age and service conditions, employees who have not satisfied the lower minimum age and service conditions actually provided for in the plan are excludable employees. Thus, for example, if the plan requires attainment of age 18 and 3 months of service, employees who have not attained age 18 or 3 months of service with the employer are excludable employees.

(4) *Examples.* The following examples illustrate the minimum age and service condition rules of this paragraph (b). In each example, the employer is not treated as operating qualified separate lines of business under section 414(r).

Example 1. An employer maintains Plan A for hourly employees and Plan B for salaried employees. Plan A has no minimum age or service condition. Plan B has no minimum age condition and requires 1 year of service. The employer treats Plans A and B as a single plan for purposes of section 410(b). Because Plan A imposes no minimum age or service condition, all employees of the employer automatically satisfy the minimum age and service conditions of Plan A. Therefore, no employees are excludable under this paragraph (b) in testing Plans A and B for purposes of section 410(b).

Example 2. An employer maintains three plans. Plan C benefits employees in Division C who satisfy the plan's minimum age and service condition of age 21 and 1 year of service. Plan D benefits employees in Division D who satisfy the plan's minimum age and service condition of age 18 and 1 year of service. Plan E benefits employees in Division E who satisfy the plan's minimum age and service condition of age 21 and 6 months of service. The employer treats Plans D and E as a single plan for purposes of section 410(b). In testing Plan C under the ratio percentage test or the nondiscriminatory classification test of section 410(b), employees who are not at least age 21 or who do not have at least 1 year of service are excludable employees

under paragraph (b)(1) of this section. In testing Plans D and E, employees who do not satisfy the age and service requirements of either of the two plans are excludable employees under paragraph (b)(2) of this section. Thus, an employee is excludable with respect to Plans D and E only if the employee is not at least age 18 with at least 1 year of service or is not at least age 21 with at least 6 months of service. Thus, an employee who is 19 years old and has 11 months of service is excludable. Similarly, an employee who is 17 years old and has performed 2 years of service is also excludable.

Example 3. An employer maintains three plans. Plan F benefits all employees in Division F (the plan does not apply any minimum age or service condition). Plan G benefits employees in Division G who satisfy the plan's minimum age and service condition of age 18 and 1 year of service. Plan H benefits employees in Division H who satisfy the plan's minimum age and service condition of age 21 and 6 months of service. In testing the employer's plans under the average benefit percentage test provided in § 1.410(b)-5, Plans F, G, and H are treated as a single plan and, as such, use the lowest minimum age and service condition under the rule of paragraph (b)(2) of this section. Therefore, because Plan F does not apply any minimum age or service condition, no employee is excludable under this paragraph (b).

Example 4. An employer maintains Plan J, which does not apply any minimum age or service conditions. Plan J benefits all employees in Division 1 but does not benefit employees in Division 2. Although Plan J has no minimum age or service condition, the employer wants to exclude employees whose age and service is below the permissible minimums provided in section 410(b)(1)(A). The employer has 110 employees who either do not have 1 year of service or are not at least age 21. Of these 110 employees, 10 are highly compensated employees and 100 are nonhighly compensated employees. Five of these highly compensated employees, or 50 percent, work in Division 1 and thus benefit under Plan J. Thirty-five of these nonhighly compensated employees, or 35 percent, work in Division 1 and thus benefit under Plan J. Plan J satisfies the ratio percentage test of section 410(b) with respect to employees who do not satisfy the greatest permissible minimum age and service requirement because the ratio percentage of that group of employees is 70 percent. Thus, in determining whether or not Plan J satisfies section 410(b), the 110 employees may be treated as excludable employees in accordance with paragraph (b)(3)(i) of this section.

(c) *Certain nonresident aliens—(1) General rule.* An employee who is a nonresident alien (within the meaning of section 7701(b)(1)(B)) and who receives

no earned income (within the meaning of section 911(d)(2)) from the employer that constitutes income from sources within the United States (within the meaning of section 861(a)(3)) is treated as an excludable employee.

(2) *Special treaty rule.* In addition, an employee who is a nonresident alien (within the meaning of section 7701(b)(1)(B)) and who does receive earned income (within the meaning of section 911(d)(2)) from the employer that constitutes income from sources within the United States (within the meaning of section 861(a)(3)) is permitted to be excluded, if all of the employee's earned income from the employer from sources within the United States is exempt from United States income tax under an applicable income tax convention. This paragraph (c)(2) applies only if all employees described in the preceding sentence are so excluded.

(d) *Collectively bargained employees—*(1) *General rule.* A collectively bargained employee is an excludable employee with respect to a plan that benefits solely noncollectively bargained employees. If a plan (within the meaning of § 1.410(b)-7(b)) benefits both collectively bargained employees and noncollectively bargained employees for a plan year, § 1.410(b)-7(c)(4) provides that the portion of the plan that benefits the collectively bargained employees is treated as a separate plan from the portion of the plan that benefits the noncollectively bargained employees. Thus, a collectively bargained employee is always an excludable employee with respect to the mandatorily disaggregated portion of any plan that benefits noncollectively bargained employees.

(2) *Definition of collectively bargained employee—*(i) *In general.* A collectively bargained employee is an employee who is included in a unit of employees covered by an agreement that the Secretary of Labor finds to be a collective bargaining agreement between employee representatives and one or more employers, provided that there is evidence that retirement benefits were the subject of good faith bargaining between employee representatives and the employer or employers. An employee is a collectively bargained em-

ployee regardless of whether the employee benefits under any plan of the employer. See section 7701(a)(46) and § 301.7701-17T of this chapter for additional requirements applicable to the collective bargaining agreement. An employee who performs hours of service during the plan year as both a collectively bargained employee and a noncollectively bargained employee is treated as a collectively bargained employee with respect to the hours of service performed as a collectively bargained employee and a noncollectively bargained employee with respect to the hours of service performed as a noncollectively bargained employee. See § 1.410(b)-7(c) for disaggregation rules for plans benefiting collectively bargained and noncollectively bargained employees.

(ii) *Special rules for certain employees in multiemployer plans—*(A) *In general.* For purposes of this paragraph (d), in testing the disaggregated portion of a multiemployer plan benefiting noncollectively bargained employees, a noncollectively bargained employee who benefits under the plan may be treated as a collectively bargained employee with respect to all of the employee's hours of service under the rules of paragraphs (d)(2)(ii) (B) through (E) of this section, if the employee is or was a member of a unit of employees covered by a collective bargaining agreement and that agreement or a successor agreement provides for the employee to benefit under the plan in the current plan year. For this purpose, provisions of a participation agreement or similar document are taken into account in determining whether a collective bargaining agreement provides for an employee to benefit under a multiemployer plan.

(B) *Employees who were collectively bargained employees during a portion of the current plan year.* An employee described in paragraph (d)(2)(ii)(A) of this section who performs services for one or more employers that are parties to the collective bargaining agreement, for the plan, or for the employee representative both as a collectively bargained employee and as a noncollectively bargained employee during a plan year may be treated as a collectively bargained employee for the plan

year, provided that at least half of the employee's hours of service during the plan year are performed as a collectively bargained employee.

(C) *Employees who were collectively bargained employees during the collective bargaining agreement.* An employee described in paragraph (d)(2)(ii)(A) of this section who was a collectively bargained employee with respect to all of the employee's hours of service during a plan year (including employees who are treated as collectively bargained employees with respect to all of their hours of service during a plan year under paragraph (d)(2)(ii) (B) or (E) of this section) may be treated as a collectively bargained employee with respect to all of the employee's hours of service for the duration of the collective bargaining agreement applicable for such plan year or, if later, until the end of the following plan year. For this purpose, a collective bargaining agreement is applicable for a plan year if it provided for the employee to benefit in the plan and was effective for any portion of that plan year. This paragraph (d)(2)(ii)(C) does not apply unless the terms of the plan providing for benefit accruals treat the employee in a manner that is generally no more favorable than similarly-situated employees who are collectively bargained employees.

(D) *Employees who previously were collectively bargained employees.* An employee who was treated as a collectively bargained employee pursuant to paragraph (d)(2)(ii)(C) of this section may be treated as a collectively bargained employee with respect to all of the employee's hours of service after the end of the period described in paragraph (d)(2)(ii)(C) of this section, provided that the employee is performing services for one or more employers that are parties to the collective bargaining agreement, for the plan, or for the employee representative. This paragraph (d)(2)(ii)(D) does not apply unless the terms of the plan providing for benefit accruals treat the employee in a manner that is generally no more favorable than similarly-situated employees who are collectively bargained employees, and no more than five percent of the employees covered under the multiemployer plan are noncollectively bargained employees (deter-

mined without regard to this paragraph (d)(2)(ii)(D)). In determining whether more than five percent of the employees covered under the multiemployer plan are noncollectively bargained employees, those employees who are described in paragraphs (d)(2)(ii) (B) and (C) of this section are treated as collectively bargained employees.

(E) *Transition rule.* For a plan year beginning before the applicable effective date of these regulations as set forth in § 1.410(b)-10 (b) or (d), any employee described in paragraph (d)(2)(ii)(A) of this section may be treated as a collectively bargained employee with respect to all of the employee's hours of service for that plan year.

(F) *Consistency requirement.* The rules in paragraphs (d)(2) (i) and (ii) of this section must be applied to all employees on a reasonable and consistent basis for the plan year.

(iii) *Covered by a collective bargaining agreement—(A) General rule.* For purposes of paragraph (d)(2)(i) of this section, an employee is included in a unit of employees covered by a collective bargaining agreement if and only if the employee is represented by a bona fide employee representative that is a party to the collective bargaining agreement under which the plan is maintained. Thus, for example, an employee of either a plan or the employee representative that is a party to the collective bargaining agreement under which the plan is maintained is not included in a unit of employees covered by the collective bargaining agreement under which the plan is maintained merely because the employee is covered under the plan pursuant to an agreement entered into by the plan or employee representative on behalf of the employee (other than in the capacity of an employee representative with respect to the employee). This is the case even if all of such employees benefiting under the plan constitute only a de minimis percentage of the total employees benefiting under the plan.

(B) *Plans covering professional employees—(1) In general.* An employee is not considered included in a unit of employees covered by a collective bargaining agreement for a plan year for

§ 1.410(b)-6

26 CFR Ch. I (4-1-08 Edition)

purposes of paragraph (d)(2)(iii)(A) of this section if, for the plan year, more than 2 percent of the employees who are covered pursuant to the agreement are professionals. This rule applies to all employees under the agreement, nonprofessionals as well as professionals. Thus, no employees covered by such an agreement are excludable employees with respect to employees who are not covered by a collective bargaining agreement.

(2) *Multiple collective bargaining agreements.* This paragraph (d)(2)(iii)(B) is applied separately with respect to each collective bargaining agreement. Thus, for example, if a plan benefits two groups of employees, one included in a unit of employees covered by collective bargaining agreement X, more than 2 percent of whom are professionals, and another included in a unit of employees covered by collective bargaining agreement Y, none of whom are professionals, the group covered by agreement X is not considered covered by a collective bargaining agreement and the group covered by agreement Y is considered covered by a collective bargaining agreement.

(3) *Application of minimum coverage tests.* If a plan covers more than 2 percent professional employees, no employees in the plan are treated as covered by a collective bargaining agreement. A plan that covers more than 2 percent professional employees must satisfy section 410(b) without regard to section 413(b) and the special rule in § 1.410(b)-2(b)(7) of this section (regarding collectively bargained plans). In such cases, all nonexcludable employees must be taken into account. For this purpose, employees included in other collective bargaining units are excludable employees. However, the employees who are not covered by a collective bargaining agreement and the employees who are covered by an agreement that has more than 2 percent professionals are not excludable employees.

(iv) *Examples.* The following examples illustrate the collective bargaining unit rules of this section.

Example 1. An employer has 700 collectively bargained employees (none of whom is a professional employee) and 300 noncollectively bargained employees (200 of whom are highly

compensated employees). For purposes of applying the ratio percentage test of § 1.410(b)-2(b)(2) to Plan X, which benefits only the 300 noncollectively bargained employees, the 700 collectively bargained employees are treated as excludable employees pursuant to paragraph (d) of this section.

Example 2. (i) An employer has 1,500 employees in the following categories:

	Noncollectively bargained employees	Collectively bargained employees	Total
Highly compensated employees	100	100	200
Nonhighly compensated employees	900	400	1,300
Total	1,000	500	1,500

The employer maintains Plan Y, which benefits 1,100 employees, including all of the noncollectively bargained employees (except for 100 nonhighly compensated employees who are noncollectively bargained employees), and 200 of the collectively bargained employees (including the 100 highly compensated employees who are collectively bargained employees). There are no professional employees covered by the collective bargaining agreement. In accordance with § 1.410(b)-7(c)(4), the employer must apply the ratio percentage test of § 1.410(b)-2(b)(2) to Plan Y as if the plan were two separate plans, one benefiting the noncollectively bargained employees and the other benefiting the collectively bargained employees.

(ii) In testing the portion of Plan Y that benefits the noncollectively bargained employees, the collectively bargained employees are excludable employees. That portion's ratio percentage is 88.89 percent $([800/900] / [100/100] = 88.89\% / 100\% = 0.8889)$, and thus it satisfies the ratio percentage test. The portion of Plan Y that benefits collectively bargained employees automatically satisfies section 410(b) under the special rule in § 1.410(b)-2(b)(7).

(e) *Employees of qualified separate lines of business.* If an employer is treated as operating qualified separate lines of business for purposes of section 410(b) in accordance with § 1.414(r)-1 (b), in testing a plan that benefits employees of one qualified separate line of business, the employees of the other qualified separate lines of business of the employer are treated as excludable employees. The rule in this paragraph (e) does not apply for purposes of satisfying the nondiscriminatory classification requirement of section 410(b)(5)(B).

See §§ 1.414(r)-1(c)(2) and 1.414(r)-8 (separate application of section 410(b) to the employees of a qualified separate line of business). In addition, the rule in this paragraph (e) does not apply to a plan that is tested under the special rule for employer-wide plans in § 1.414(r)-1(c)(2)(ii) for a plan year.

(f) *Certain terminating employees*—(1) *In general.* An employee may be treated as an excludable employee for a plan year with respect to a particular plan if—

(i) The employee does not benefit under the plan for the plan year,

(ii) The employee is eligible to participate in the plan,

(iii) The plan has a minimum period of service requirement or a requirement that an employee be employed on the last day of the plan year (last-day requirement) in order for an employee to accrue a benefit or receive an allocation for the plan year,

(iv) The employee fails to accrue a benefit or receive an allocation under the plan solely because of the failure to satisfy the minimum period of service or last-day requirement,

(v) The employee terminates employment during the plan year with no more than 500 hours of service, and the employee is not an employee as of the last day of the plan year (for purposes of this paragraph (f)(1)(v), a plan that uses the elapsed time method of determining years of service may use either 91 consecutive calendar days or 3 consecutive calendar months instead of 500 hours of service, provided it uses the same convention for all employees during a plan year), and

(vi) If this paragraph (f) is applied with respect to any employee with respect to a plan for a plan year, it is applied with respect to all employees with respect to the plan for the plan year.

(2) *Hours of service.* For purposes of this paragraph (f), the term “hours of service” has the same meaning as provided for such term by 29 CFR 2530.200b-2 under the general method of crediting service for the employee. If one of the equivalencies set forth in 29 CFR 2530.200b-3 is used for crediting service under the plan, the 500-hour requirement must be adjusted accordingly.

(3) *Examples.* The following examples illustrate the provision of this paragraph (f).

Example 1. An employer has 35 employees who are eligible to participate under a defined contribution plan. The plan provides that an employee will not receive an allocation of contributions for a plan year unless the employee is employed by the employer on the last day of the plan year. Only 30 employees are employed by the employer on the last day of the plan year. Two of the five employees who terminated employment before the last day of the plan year had 500 or fewer hours of service during the plan year, and the remaining three had more than 500 hours of service during the year. Of the five employees who were no longer employed on the last day of the plan year, the two with 500 hours of service or less during the plan year are treated as excludable employees for purposes of section 410(b), and the remaining three who had over 500 hours of service during the plan year are taken into account in testing the plan under section 410(b) but are treated as not benefiting under the plan.

Example 2. An employer has 30 employees who are eligible to participate under a defined contribution plan. The plan requires 1,000 hours of service to receive an allocation of contributions or forfeitures. Ten employees do not receive an allocation because of their failure to complete 1,000 hours of service. Three of the 10 employees who failed to satisfy the minimum service requirement completed 500 or fewer hours of service and terminated their employment. Two of the employees completed more than 500, but fewer than 1,000 hours of service and terminated their employment. The remaining five employees did not terminate employment. Under the rule in paragraph (f) of this section, the three terminated employees who completed 500 or fewer hours of service are treated as excludable employees for the portion of the plan year they are employed. The other seven employees who do not receive an allocation are taken into account in testing the plan under section 410(b) but are treated as not benefiting under the plan.

Example 3. An employer maintains two plans, Plan A for salaried employees and Plan B for hourly employees. Of the 100 salaried employees, two do not receive an allocation under Plan A for the plan year because they terminate employment before completing 500 hours of service. Of the 300 hourly employees, 50 do not receive an allocation under Plan B for the plan year because they terminate employment before completing 500 hours. In applying section 410(b) to Plan A,

§ 1.410(b)-6

26 CFR Ch. I (4-1-08 Edition)

the two employees who did not receive an allocation under Plan A are excludable employees, but the 50 who did not receive an allocation under Plan B are not excludable employees, because they were not eligible to participate under Plan A.

(g) *Employees of certain governmental or tax-exempt entities*—(1) *Plans covered.* For purposes of testing either a section 401(k) plan, or a section 401(m) plan that is provided under the same general arrangement as a section 401(k) plan, an employer may treat as excludable those employees described in paragraphs (g)(2) and (3) of this section.

(2) *Employees of governmental entities.* Employees of governmental entities who are precluded from being eligible employees under a section 401(k) plan by reason of section 401(k)(4)(B)(ii) may be treated as excludable employees if more than 95 percent of the employees of the employer who are not precluded from being eligible employees by reason of section 401(k)(4)(B)(ii) benefit under the plan for the year.

(3) *Employees of tax-exempt entities.* Employees of an organization described in section 403(b)(1)(A)(i) who are eligible to make salary reduction contributions under section 403(b) may be treated as excludable with respect to a section 401(k) plan, or a section 401(m) plan that is provided under the same general arrangement as a section 401(k) plan, if—

(i) No employee of an organization described in section 403(b)(1)(A)(i) is eligible to participate in such section 401(k) plan or section 401(m) plan; and

(ii) At least 95 percent of the employees who are neither employees of an organization described in section 403(b)(1)(A)(i) nor employees of a governmental entity who are precluded from being eligible employees under a section 401(k) plan by reason of section 401(k)(4)(B)(ii) are eligible to participate in such section 401(k) plan or section 401(m) plan.

(h) *Former employees*—(1) *In general.* For purposes of applying section 410(b) with respect to former employees, all former employees of the employer are taken into account, except that the employer may treat a former employee described in paragraph (h)(2) or (h)(3) of this section as an excludable former employee. If either (or both) of the

former employee exclusion rules under paragraphs (h)(2) and (h)(3) of this section is applied, it must be applied to all former employees for the plan year on a consistent basis.

(2) *Employees terminated before a specified date.* The employer may treat a former employee as excludable if—

(i) The former employee became a former employee either prior to January 1, 1984, or prior to the tenth calendar year preceding the calendar year in which the current plan year begins, and

(ii) The former employee became a former employee in a calendar year that precedes the earliest calendar year in which any former employee who benefits under the plan in the current plan year became a former employee.

(3) *Previously excludable employees.* The employer may treat a former employee as excludable if the former employee was an excludable employee (or would have been an excludable employee if these regulations had been in effect) under the rules of paragraphs (b) through (g) of this section during the plan year in which the former employee became a former employee. If the employer treats a former employee as excludable pursuant to this paragraph (h)(3), the former employee is not taken into account with respect to a plan even if the former employee is benefiting under the plan.

(i) *Former employees treated as employees.* An employer may treat as excludable employees all formerly nonhighly compensated employees who are treated as employees of the employer under § 1.410(b)-9 solely because they have increases in accrued benefits under a defined benefit plan that are based on ongoing service or compensation credits (including imputed service or compensation) after they cease to perform services for the employer.

[T.D. 8363, 56 FR 47652, Sept. 19, 1991, as amended by T.D. 8376, 56 FR 63433, Dec. 4, 1991; T.D. 8363, 57 FR 10817, Mar. 31, 1992; T.D. 8487, 58 FR 46842, Sept. 3, 1993; T.D. 8487, 59 FR 16984, Apr. 11, 1994; T.D. 8548, 59 FR 32914, June 27, 1994; T.D. 9275, 71 FR 41359, July 21, 2006]

§ 1.410(b)-7 Definition of plan and rules governing plan disaggregation and aggregation.

(a) *In general.* This section provides a definition of “plan.” First, this section sets forth a definition of plan within the meaning of section 401(a) or 403(a). Then certain mandatory disaggregation and permissive aggregation rules are applied. The result is the definition of plan that applies for purposes of sections 410(b) and 401(a)(4). Thus, in general, the term “plan” as used in this section initially refers to a plan described in section 414(l) and to an annuity plan described in section 403(a), and the term “plan” as used in other sections under these regulations means the plan determined after application of this section. Paragraph (b) of this section provides that each single plan under section 414(l) is treated as a single plan for purposes of section 410(b). Paragraph (c) of this section describes the rules for certain plans that must be treated as comprising two or more separate plans, each of which is a single plan subject to section 410(b). Paragraph (d) of this section provides a rule permitting an employer to aggregate certain separate plans to form a single plan for purposes of section 410(b). Paragraph (e) of this section provides rules for determining the testing group of plans taken into account in determining whether a plan satisfies the average benefit percentage test of § 1.410(b)-5.

(b) *Separate asset pools are separate plans.* Each single plan within the meaning of section 414(l) is a separate plan for purposes of section 410(b). See § 1.414(l)-1(b). For example, if only a portion of the assets under a defined benefit plan is available, on an ongoing basis, to provide the benefits of certain employees, and the remaining assets are available only in certain limited cases to provide such benefits (but are available in all cases for the benefit of other employees), there are two separate plans. Similarly, the defined contribution portion of a plan described in section 414(k) is a separate plan from the defined benefit portion of that same plan. A single plan under section 414(l) is a single plan for purposes of section 410(b), even though the plan comprises separate written documents

and separate trusts, each of which receives a separate determination letter from the Internal Revenue Service. A defined contribution plan does not comprise separate plans merely because it includes more than one trust, or merely because it provides for separate accounts and permits employees to direct the investment of the amounts allocated to their accounts. Further, a plan does not comprise separate plans merely because assets are separately invested in individual insurance or annuity contracts for employees.

(c) *Mandatory disaggregation of certain plans—(1) Section 401(k) and 401(m) plans.* The portion of a plan that is a section 401(k) plan and the portion that is not a section 401(k) plan are treated as separate plans for purposes of section 410(b). Similarly, the portion of a plan that is a section 401(m) plan and the portion that is not a section 401(m) plan are treated as separate plans for purposes of section 410(b). Thus, a plan that consists of elective contributions under a section 401(k) plan, employee and matching contributions under a section 401(m) plan, and contributions other than elective, employee, or matching contributions is treated as three separate plans for purposes of section 410(b). In addition, the portion of a plan that consists of contributions described in § 1.401(k)-2(a)(5) (i.e., contributions that fail to satisfy the allocation or compensation requirements applicable to elective contributions and are therefore required to be tested separately) and the portion of the plan that does not consist of such contributions are treated as separate plans for purposes of section 410(b). Similarly, the portion of a plan that consists of contributions described in § 1.410(m)-1(b)(4)(ii) (i.e., matching contributions that fail to satisfy the allocation and other requirements applicable to matching contributions and are therefore required to be tested separately) and the portion of the plan that does not consist of such contributions are treated as separate plans for purposes of section 410(b).

(2) *ESOPs and non-ESOPs.* The portion of a plan that is an ESOP and the portion of the plan that is not an ESOP

are treated as separate plans for purposes of section 410(b), except as otherwise permitted under § 54.4975-11(e) of this Chapter.

(3) *Plans benefiting otherwise excludable employees.* If an employer applies section 410(b) separately to the portion of a plan that benefits only employees who satisfy age and service conditions under the plan that are lower than the greatest minimum age and service conditions permissible under section 410(a), the plan is treated as comprising separate plans, one benefiting the employees who have satisfied the lower minimum age and service conditions but not the greatest minimum age and service conditions permitted under section 410(a) and one benefiting employees who have satisfied the greatest minimum age and service conditions permitted under section 410(a). See § 410(b)-6(b)(3)(ii) for rules about testing otherwise excludable employees.

(4) *Plans benefiting certain disaggregation populations of employees—*(i) *In general—*(A) *Single plan must be treated as separate plans.* If a plan (i.e., a single plan within the meaning of section 414(l)) benefits employees of more than one disaggregation population, the plan must be disaggregated and treated as separate plans, each separate plan consisting of the portion of the plan benefiting the employees of each disaggregation population. See paragraph (c)(4)(ii) of this section for the definition of disaggregation population.

(B) *Benefit accruals or allocations attributable to current status.* Except as otherwise provided in paragraph (c)(4)(i)(C) of this section, in applying the rule of paragraph (c)(4)(i)(A) of this section, the portion of the plan benefiting employees of a disaggregation population consists of all benefits accrued by, or all allocations made to, employees while they were members of the disaggregation population.

(C) *Exceptions for certain benefit accruals—*(1) *Attribution of benefits to first disaggregation population.* If employees benefiting under a plan change from one disaggregation population to a second disaggregation population, benefits they accrue while members of the second disaggregation population that are attributable to years of service pre-

viously credited while the employees were members of the first disaggregation population may be treated as provided to them in their status as members of the first disaggregation population and thus included in the portion of the plan benefiting employees of the first disaggregation population. This special treatment is available only if it is applied on a consistent basis, if it does not result in significant discrimination in favor of highly compensated employees, and if the plan provision providing the additional benefits applies on the same terms to all similarly-situated employees. For example, if all formerly collectively bargained employees accrue additional benefits under a plan after becoming noncollectively bargained employees, then those benefit increases may be treated as included in the portion of the plan benefiting collectively bargained employees if they are attributable to years of service credited while the employees were collectively bargained (e.g., where the additional benefits result from compensation increases that occur while the employees are noncollectively bargained or from plan amendments affecting benefits earned while collectively bargained that are adopted while the employees are noncollectively bargained) and if such treatment does not result in significant discrimination in favor of highly compensated employees.

(2) *Attribution of benefits to current disaggregation population.* If employees benefiting under a plan change from one disaggregation population to another disaggregation population, benefits they accrue while members of the first disaggregation population may be treated as provided to them in their current status and thus included in the portion of the plan benefiting employees of the disaggregation population of which they are currently members. This special treatment is available only if it is applied on a consistent basis and if it does not result in significant discrimination in favor of highly compensated employees.

(D) *Change in disaggregation populations—*(1) *Reasonable treatment.* If, in previous years, the configuration of a plan's disaggregation populations differed from their configuration for the

current year, for purposes of the benefits accrued by, or allocations made to, an employee for those years, the employee's status as a member of a current disaggregation population for those years must be determined on a reasonable basis. A different configuration occurs, for example, if disaggregation populations exist for the first time, such as when an employer is first treated as operating qualified separate lines of business, or if the existing disaggregation populations change, such as when an employer redesignates its qualified separate lines of business.

(2) *Example.* The following example illustrates the application of this paragraph (c)(4)(i)(D).

Example. (a) Employer X operates Divisions M and N, which are treated as qualified separate lines of business for the first time in 1998. Thus, the disaggregation populations of employees of Division M and employees of Division N exist for the first time. Since 1981 Employer X has maintained a defined benefit plan, Plan P, for employees of Division M. Plan P provides a normal retirement benefit of one percent of average annual compensation for each year of service up to 25. Employee A has worked for Division M since 1981 and has never worked for Division N. Employee B has worked for Division N since 1989 and worked for Division M from 1981 to 1988. Employee C has worked in the headquarters of Employer X since 1981. For the period 1981 to 1988 Employee C was credited with years of service under Plan P.

(b) For purposes of the benefits accrued by Employee A under Plan P during years 1981 through 1997, Employee A is reasonably treated as having been a member of the Division M disaggregation population for those years. For purposes of the benefits accrued by Employee B under Plan P during years 1981 through 1988, Employee B is reasonably treated as having been a member of the Division M disaggregation population for 1981 through 1988 and as having changed to the Division N disaggregation population for 1989 through 1997. For purposes of the benefits accrued by Employee C under Plan P during years 1981 through 1988, Employee C is reasonably treated as having been a member of the Division M disaggregation population for those years. Moreover, any benefit accruals for Employee B and Employee C in years after 1988, that result from increases in average annual compensation after 1988 and that are attributable to years of service credited for 1981 through 1988, may be treated as provided to Employee B and Employee C in their status as members of the Division M disaggregation population if the require-

ments of paragraph (c)(4)(i)(C)(1) of this section are otherwise met.

(ii) *Definition of disaggregation population—(A) Plan benefiting employees of qualified separate lines of business.* If an employer is treated as operating qualified separate lines of business for purposes of section 410(b) in accordance with § 1.414(r)-1(b), and a plan benefits employees of more than one qualified separate line of business, the employees of each qualified separate line of business are separate disaggregation populations. In this case, the portion of the plan benefiting the employees of each qualified separate line of business is treated as a separate plan maintained by that qualified separate line of business. However, employees of different qualified separate lines of business who are benefiting under a plan that is tested under the special rule for employer-wide plans in § 1.414(r)-1(c)(2)(ii) for a plan year are not separate disaggregation populations merely because they are employees of different qualified separate lines of business.

(B) *Plan benefiting collectively bargained employees.* If a plan benefits both collectively bargained employees and noncollectively bargained employees, the collectively bargained employees are one disaggregation population and the noncollectively bargained employees are another disaggregation population. If the population of collectively bargained employees includes employees covered under different collective bargaining agreements, the population of employees covered under each collective bargaining agreement is also a separate disaggregation population.

(C) *Plan maintained by more than one employer.* If a plan benefits employees of more than one employer, the employees of each employer are separate disaggregation populations. In this case, the portion of the plan benefiting the employees of each employer is treated as a separate plan maintained by that employer, which must satisfy section 410(b) by reference only to that employer's employees. However, for purposes of this paragraph (c)(4)(ii)(C), if the plan of one employer (or, in the case of a plan maintained by more than one employer, the plan provisions applicable to the employees of one employer) treats compensation or service

with another employer as compensation or service with the first employer, then the current accruals attributable to that compensation or service are treated as provided to an employee of the first employer under the plan of the first employer (or the portion of a plan maintained by more than one employer benefiting employees of the first employer), and the provisions of paragraph (c)(4)(i)(C) of this section do not apply to those accruals. Thus, for example, if Plan A maintained by Employer X imputes service or compensation for an employee of Employer Y, then Plan A is not treated as benefiting the employees of more than one employer merely because of this imputation.

(5) *Additional rule for plans benefiting employees of more than one qualified separate line of business.* If a plan benefiting employees of more than one qualified separate line of business satisfies the reasonable classification requirement of § 1.410(b)-4(b) before the application of paragraph (c)(4) of this section, then any portion of the plan that is treated as a separate plan as a result of the application of paragraphs (c)(4)(i)(A) and (ii)(A) of this section is deemed to satisfy that requirement.

(d) *Permissive aggregation for ratio percentage and nondiscriminatory classification tests—(1) In general.* Except as provided in paragraphs (d)(2) and (d)(3) of this section, for purposes of applying the ratio percentage test of § 1.410(b)-2(b)(2) or the nondiscriminatory classification test of § 1.410(b)-4, an employer may designate two or more separate plans (determined after application of paragraph (b) of this section) as a single plan. If an employer treats two or more separate plans as a single plan under this paragraph, the plans must be treated as a single plan for all purposes under sections 401(a)(4) and 410(b).

(2) *Rules of disaggregation.* An employer may not aggregate portions of a plan that are disaggregated under the rules of paragraph (c) of this section. Similarly, an employer may not aggregate two or more separate plans that would be disaggregated under the rules of paragraph (c) of this section if they were portions of the same plan. In addition, an employer may not aggregate

an ESOP with another ESOP, except as permitted under § 54.4975-11(e) of this Chapter.

(3) *Duplicative aggregation.* A plan may not be combined with two or more plans to form more than one single plan. Thus, for example, an employer that maintains plans A, B, and C may not aggregate plans A and B and plans A and C to form two single plans. However, the employer may apply the permissive aggregation rules of this paragraph (d) to form any one (and only one) of the following combinations: plan ABC, plans AB and C, plans AC and B, or plans A and BC.

(4) *Special rule for plans benefiting employees of a qualified separate line of business.* For purposes of paragraph (d)(1) of this section, an employer that is treated as operating qualified separate lines of business for purposes of section 410(b) in accordance with § 1.414(r)-1(b) is permitted to aggregate the portions of two or more plans that benefit employees of the same qualified separate line of business (regardless of whether the employer elects to aggregate the portions of the same plans that benefit employees of the other qualified separate lines of business of the employer), provided that none of the plans is tested under the special rule for employer-wide plans in § 1.414(r)-1(c)(2)(ii). Thus, the employer is permitted to apply paragraph (d)(1) of this section with respect to two or more separate plans determined after the application of paragraphs (b) and (c)(4) of this section, but may not aggregate a plan that is tested under the special rule for employer-wide plans in § 1.414(r)-1(c)(2)(ii) for a plan year with any portion of a plan that does not rely on that special rule for the plan year. In all other respects, the provisions of this paragraph (d) regarding permissive aggregation apply, including (but not limited to) the disaggregation rules under paragraph (d)(2) of this section (including the mandatory disaggregation rule of paragraph (c)(4) of this section), and the prohibition on duplicative aggregation under paragraph (d)(3) of this section. This paragraph (d)(4) applies only in the case of

Internal Revenue Service, Treasury

§ 1.410(b)-8

an employer that is treated as operating qualified separate lines of business for purposes of section 410(b) in accordance with § 1.414(r)-1(b). See §§ 1.414(r)-1(c)(2) and 1.414(r)-8 (separate application of section 410(b) to the employees of a qualified separate line of business).

(5) *Same plan year requirement.* Two or more plans may not be aggregated and treated as a single plan under this paragraph (d) unless they have the same plan year.

(e) *Determination of plans in testing group for average benefit percentage test—(1) In general.* For purposes of applying the average benefit percentage test of § 1.410(b)-5 with respect to a plan, all plans in the testing group must be taken into account. For this purpose, the plans in the testing group are the plan being tested and all other plans of the employer that could be permissively aggregated with that plan under paragraph (d) of this section. Whether two or more plans could be permissively aggregated under paragraph (d) of this section is determined (i) without regard to the rule in paragraph (d)(4) of this section that portions of two or more plans benefiting employees of the same line of business may not be aggregated if any of the plans is tested under the special rule for employer-wide plans in § 1.414(r)-1(c)(2)(ii), (ii) without regard to paragraph (d)(5) of this section, and (iii) by applying paragraph (d)(2) of this section without regard to paragraphs (c)(1) and (c)(2) of this section.

(2) *Examples.* The following example illustrates the rules of this paragraph (e).

Example 1. Employer X is treated as operating two qualified separate lines of business for purposes of section 410(b) in accordance with section 414(r), QSLOB1 and QSLOB2. Employer X must apply the rules in § 1.414(r)-8 to determine whether its plans satisfy section 410(b) on a qualified-separate-line-of-business basis. Employer X maintains the following plans:

(a) Plan A, the portion of Employer X's employer-wide section 401(k) plan that benefits all noncollectively bargained employees of QSLOB1,

(b) Plan B, the portion of Employer X's employer-wide section 401(k) plan that benefits all noncollectively bargained employees of QSLOB2,

(c) Plan C, a defined benefit plan that benefits all hourly noncollectively bargained employees of QSLOB1,

(d) Plan D, a defined benefit plan that benefits all collectively bargained employees of QSLOB1,

(e) Plan E, an ESOP that benefits all noncollectively bargained employees of QSLOB1,

(f) Plan F, a profit-sharing plan that benefits all salaried noncollectively bargained employees of QSLOB1.

Assume that Plan F does not satisfy the ratio percentage test of § 1.410(b)-2(b)(2) on a qualified-separate-line-of-business basis, but does satisfy the nondiscriminatory classification test of § 1.410(b)-4 on both an employer-wide and a qualified-separate-line-of-business basis. Therefore, to satisfy section 410(b), Plan F must satisfy the average benefit percentage test of § 1.410(b)-5 on a qualifiedseparate-line-ofbu5ine55 basis. The plans in the testing group used to determine whether Plan F satisfies the average benefit percentage test of § 1.4 10(b)-5 are Plans A, C, E, and F.

Example 2. The facts are the same as in *Example 1*, except that Employer X applies the special rule for employer-wide plans in § 1.414(r)-1(c)(2)(ii) to its employer-wide section 401(k) plan. To satisfy section 410(b), Plan F must satisfy the average benefit percentage test of § 1.4 10(b)-5. Since paragraph (c)(4) of this section no longer applies to Plans A and B, they are treated as a single plan (Plan AB). The plans in the testing group used to determine whether Plan F satisfies the average benefit percentage test of § 1.4 10(b)-5 are therefore Plans A, B, C, E, and F. However, the employees of QSLOB 2 continue to be excludable employees for purposes of determining whether Plan F satisfies the average benefit percentage test. See § 1.410(b)-6(e).

(f) *Section 403(b) plans.* In determining whether a plan satisfies section 410(b), a plan subject to section 403(b)(12)(A)(i) is disregarded. However, in determining whether a plan subject to section 403(b)(12)(A)(i) satisfied section 410(b), plans that are not subject to section 403(b)(12)(A)(i) may be taken into account.

[T.D. 8363, 56 FR 47655, Sept. 19, 1991, as amended by T.D. 8376, 56 FR 63433, Dec. 4, 1991; T.D. 8363, 57 FR 10819, 10954, Mar. 31, 1992; T.D. 8487, 58 FR 46843, Sept. 3, 1993; T.D. 8548, 59 FR 32914, June 27, 1994; T.D. 9169, 69 FR 78153, Dec. 29, 2004]

§ 1.410(b)-8 Additional rules.

(a) *Testing methods—(1) In general.* A plan must satisfy section 410(b) for a

§ 1.410(b)-9

26 CFR Ch. I (4-1-08 Edition)

plan year using one of the testing options in paragraphs (a)(2) through (a)(4) of this section. Whichever testing option is used for the plan year must also be used for purposes of applying section 401(a)(4) to the plan for the plan year. The annual testing option in paragraph (a)(4) of this section must be used in applying section 410(b) to a section 401(k) plan or a section 401(m) plan, and in applying the average benefit percentage test of § 1.410(b)-5. For purposes of this paragraph (a), the plan provisions and other relevant facts as of the last day of the plan year regarding which employees benefit under the plan for the plan year are applied to the employees taken into account under the testing option used for the plan year. For this purpose, amendments retroactively correcting a plan in accordance with § 1.401(a)(4)-11(g) are taken into account as plan provisions in effect as of the last day of the plan year.

(2) *Daily testing option.* A plan satisfies section 410(b) for a plan year if it satisfies § 1.410(b)-2 on each day of the plan year, taking into account only those employees (or former employees) who are employees (or former employees) on that day.

(3) *Quarterly testing option.* A plan is deemed to satisfy section 410(b) for a plan year if the plan satisfies § 1.410(b)-2 on at least one day in each quarter of the plan year, taking into account for each of those days only those employees (or former employees) who are employees (or former employees) on that day. The preceding sentence does not apply if the plan's eligibility rules or benefit formula operate to cause the four quarterly testing days selected by the employer not to be reasonably representative of the coverage of the plan over the entire plan year.

(4) *Annual testing option.* A plan satisfies section 410(b) for a plan year if it satisfies § 1.410(b)-2 as of the last day of the plan year, taking into account all employees (or former employees) who were employees (or former employees) on any day during the plan year.

(5) *Example.* The following example illustrates this paragraph (a).

Example. Plan A is a defined contribution plan that is not a section 401(k) plan or a section 401(m) plan, and that conditions allocations on an employee's employment on the

last day of the plan year. Plan A is being tested for the 1995 calendar plan year using the daily testing option in paragraph (a)(2) of this section. In testing the plan for compliance with section 410(b) on March 11, 1995, Employee X is taken into account because he was an employee on that day and was not an excludable employee with respect to Plan A on that day. Employee X was a participant in Plan A on March 11, 1995, was employed on December 31, 1995, and received an allocation under Plan A for the 1995 plan year. Under these facts, Employee X is treated as benefiting under Plan A on March 11, 1995, even though Employee X had not satisfied all of the conditions for receiving an allocation on that day, because Employee X satisfied all of those conditions as of the last day of the plan year.

(b) *Family member aggregation rule.* For purposes of section 410(b), and in accordance with section 414(q)(6), a highly compensated employee who is a 5-percent owner or one of the ten most highly compensated employees and any family member (or members) of such a highly compensated employee who is also an employee of the employer are to be treated as a single highly compensated employee. If any member of that group is benefiting under a plan, the deemed single employee is treated as benefiting under the plan. If no member of that group is benefiting under a plan, the deemed single employee is treated as not benefiting under the plan.

[T.D. 8363, 56 FR 47656, Sept. 19, 1991]

§ 1.410(b)-9 Definitions.

In applying this section and §§ 1.410(b)-2 through 1.410(b)-10, the definitions in this section govern unless otherwise provided.

Collectively bargained employee. *Collectively bargained employee* means a collectively bargained employee within the meaning of § 1.410(b)-6(d)(2).

Defined benefit plan. *Defined benefit plan* means a defined benefit plan within the meaning of section 414(j). The portion of a plan described in section 414(k) that does not consist of separate accounts is treated as a defined benefit plan.

Defined contribution plan. *Defined contribution plan* means a defined contribution plan within the meaning of section 414(i). The portion of a plan described

in section 414(k) that consists of separate accounts is treated as a defined contribution plan.

Employee. *Employee* means an individual who performs services for the employer who is either a common law employee of the employer, a self-employed individual who is treated as an employee pursuant to section 401(c)(1), or a leased employee (not excluded under section 414(n)(5)) who is treated as an employee of the employer-recipient under section 414(n)(2) or 414(o)(2). Individuals that an employer treats as employees under section 414(n) pursuant to the requirements of section 414(o) are considered to be leased employees for purposes of this rule. In addition, an individual must be treated as an employee with respect to allocations under a defined contribution plan taken into account under § 1.401(a)(4)–2(c)(ii) and with respect to increases in accrued benefits (within the meaning of 411(a)(7)) under a defined benefit plan that are based on ongoing service or compensation (including imputed service or compensation) credits.

Employer. *Employer* means the employer maintaining the plan and those employers required to be aggregated with the employer under sections 414(b), (c), (m), or (o). An individual who owns the entire interest of an unincorporated trade or business is treated as an employer. Also, a partnership is treated as the employer of each partner and each employee of the partnership.

ESOP. *ESOP* or *employee stock ownership plan* means an employee stock ownership plan within the meaning of section 4975(e)(7) or a tax credit employee stock ownership plan within the meaning of section 409(a).

Former employee. *Former employee* means an individual who was, but has ceased to be, an employee of the employer (i.e., the individual has ceased performing services as an employee for the employer). An individual is treated as a former employee beginning on the day after the day on which the individual ceases performing services as an employee for the employer. Thus, an individual who ceases performing services as an employee for an employer during a plan year is both an employee and a former employee for the plan

year. Notwithstanding the foregoing, an individual is an employee (and not a former employee) to the extent that the individual is treated as an employee with respect to the plan for the plan year under the definition of employee in this section.

Highly compensated employee. *Highly compensated employee* means an employee who is a highly compensated employee within the meaning of section 414(q) or a former employee treated as an employee under the definition of employee in this section who is a highly compensated former employee within the meaning of section 414(q).

Highly compensated former employee. *Highly compensated former employee* means a former employee who is a highly compensated former employee within the meaning of section 414(q).

Multiemployer plan. *Multiemployer plan* means a multiemployer plan within the meaning of section 414(f).

Noncollectively bargained employee. *Noncollectively bargained employee* means an employee who is not a collectively bargained employee.

Nonhighly compensated employee. *Nonhighly compensated employee* means an employee who is not a highly compensated employee.

Nonhighly compensated former employee. *Nonhighly compensated former employee* means a former employee who is not a highly compensated former employee.

Plan year. *Plan year* means the plan year of the plan as defined in the written plan document. In the absence of a specifically designated plan year, the plan year is deemed to be the calendar year.

Plan year compensation. *Plan year compensation* means plan year compensation within the meaning of § 1.401(a)(4)–12.

Professional employee. *Professional employee* means any highly compensated employee who, on any day of the plan year, performs professional services for the employer as an actuary, architect, attorney, chiropractist, chiropractor, dentist, executive, investment banker, medical doctor, optometrist, osteopath, podiatrist, psychologist, certified or other public accountant, stockbroker, or veterinarian, or in any other professional capacity determined by

§ 1.410(b)-10

26 CFR Ch. I (4-1-08 Edition)

the Commissioner in a notice or other document of general applicability to constitute the performance of services as a professional.

Ratio percentage. With respect to a plan for a plan year, a plan's *ratio percentage* means the percentage (rounded to the nearest hundredth of a percentage point) determined by dividing the percentage of the nonhighly compensated employees who benefit under the plan by the percentage of the highly compensated employees who benefit under the plan. The percentage of the nonhighly compensated employees who benefit under the plan is determined by dividing the number of nonhighly compensated employees benefiting under the plan by the total number of nonhighly compensated employees of the employer. The percentage of the highly compensated employees who benefit under the plan is determined by dividing the number of highly compensated employees benefiting under the plan by the total number of highly compensated employees of the employer.

Section 401(k) plan. Section 401(k) plan means a plan consisting of elective contributions described in § 1.40(k)-1(g)(3) under a qualified cash or deferred arrangement described in § 1.401(k)-1(a)(4)(i). Thus, a section 401(k) plan does not include a plan (or portion of a plan) that consists of contributions under a nonqualified cash or deferred arrangement, or qualified nonelective or qualified matching contributions treated as elective contributions under § 1.401(k)-1(a)(6).

Section 401(l) plan. Section 401(l) plan means a plan that—

(1) Provides for a disparity in employer-provided benefits or contributions that satisfies section 401(l) in form, and

(2) Relies on one of the safe harbors of § 1.401(a)(4)-2(b)(2), 1.401(a)(4)-3(b), 1.401(a)(4)-8(b)(3), or 1.401(a)(4)-8(c)(3)(iii)(B) to satisfy section 401(a)(4).

Section 401(m) plan. Section 401(m) plan means a plan consisting of employee contributions described in § 1.401(m)-1(f)(6) or matching contributions described in § 1.40(m)-1(f)(12), or both. Thus, a section 401(m) plan does not include a plan (or portion of a plan) that consists of elective contributions or

qualified nonelective contributions treated as matching contributions under § 1.401(m)-1(b)(5).

[T.D. 8363, 56 FR 47657, Sept. 19, 1991; 57 FR 10817, 10954, Mar. 31, 1992, as amended by T.D. 8487, 58 FR 46843, Sept. 3, 1993; T.D. 9169, 69 FR 78153, Dec. 29, 2004]

EDITORIAL NOTE: By T.D. 9169, 69 FR 78153, Dec. 29, 2004, the Internal Revenue Service published a document in the FEDERAL REGISTER, attempting to amend § 1.410(b)-9 by removing “1.401(k)-1(g)(3) and 1.401(m)-1(f)(12)” and inserting “1.401(k)-6 and 1.401(m)-1(f)(12)”. However, because of inaccurate language, this amendment could not be incorporated.

§ 1.410(b)-10 Effective dates and transition rules.

(a) **Statutory effective dates—**(1) *In general.* Except as set forth in paragraph (a)(2) of this section, the minimum coverage rules of section 410(b) as amended by section 1112 of the Tax Reform Act of 1986 apply to plan years beginning on or after January 1, 1989.

(2) **Special statutory effective date for collective bargaining agreements—**(i) *In general.* As provided for by section 1112(e)(2) of the Tax Reform Act of 1986, in the case of a plan maintained pursuant to one or more collective bargaining agreements between employee representatives and one or more employers ratified before March 1, 1986, the minimum coverage rules of section 410(b) as amended by section 1112 of the Tax Reform Act of 1986 do not apply to employees covered by any such agreement in plan years beginning before the earlier of—

(A) January 1, 1991; or

(B) The later of January 1, 1989, or the date on which the last of such collective bargaining agreements terminates (determined without regard to any extension thereof after February 28, 1986). For purposes of this paragraph (a)(2), any extension or renegotiation of a collective bargaining agreement, which extension or renegotiation is ratified after February 28, 1986, is to be disregarded in determining the date on which the agreement terminates.

(ii) **Example.** The following example illustrates this paragraph (a)(2).

Example. Employer A maintains Plan 1 pursuant to a collective bargaining agreement.

Plan 1 covers 100 of Employer A's noncollectively bargained employees and 900 of Employer A's collectively bargained employees. Employer A also maintains Plan 2, which covers Employer A's other 400 noncollectively bargained employees. The collective bargaining agreement under which Plan 1 is maintained was entered into on January 1, 1986, and expires December 31, 1992. Because Plan 1 is a plan maintained pursuant to a collective bargaining agreement, section 410(b) applies to the first plan year beginning on or after January 1, 1991. In applying section 410(b) to Plan 2, the 100 noncollectively bargained employees in Plan 1 must be taken into account. The deferred effective date for plans maintained pursuant to a collective bargaining agreement is not applicable in determining how section 410(b) is applied to a plan that is not maintained pursuant to a collective bargaining agreement.

(iii) *Plan maintained pursuant to a collective bargaining agreement.* For purposes of this paragraph (a)(2), a plan is maintained pursuant to one or more collective bargaining agreements between employee representatives and one or more employers, if one or more of the agreements were ratified before March 1, 1986. Only plans maintained pursuant to agreements that the Secretary of Labor finds to be collective bargaining agreements and that satisfy section 7701(a)(46) are eligible for the deferred effective date under this paragraph (a)(2). A plan will not be treated as a plan maintained pursuant to one or more collective bargaining agreements eligible for the deferred effective date under this paragraph (a)(2) unless the plan would be a plan maintained pursuant to one or more collective bargaining agreements under the principles applied under section 1017(c) of the Employee Retirement Income Security Act of 1974. See H.R. Rep. No. 1280, 93rd Cong. 2d Sess. 266 (1974).

(b) *Regulatory effective dates—(1) In general.* Except as otherwise provided in this section, §§ 1.410(b)-2 through 1.410(b)-9 apply to plan years beginning on or after January 1, 1994.

(2) *Plans of tax-exempt organizations.* In the case of plans maintained by organizations exempt from income taxation under section 501(a), including plans subject to section 403(b)(12)(A)(i) (nonelective plans), §§ 1.410(b)-2 through 1.410(b)-9 apply to plan years beginning on or after January 1, 1996,

to the extent such plans are subject to section 410(b).

(c) *Compliance during transition period.* For plan years beginning before the effective date of these regulations, as set forth in paragraph (b) of this section, and on or after the statutory effective date as set forth in paragraph (a) of this section, a plan must be operated in accordance with a reasonable, good faith interpretation of section 410(b). Whether a plan is operated in accordance with a reasonable, good faith interpretation of section 410(b) will generally be determined based on all of the relevant facts and circumstances, including the extent to which an employer has resolved unclear issues in its favor. If a plan's classification has been determined by the Commissioner to be nondiscriminatory and there have been no significant changes in or omissions of a material fact, the classification will be treated as nondiscriminatory for the relevant plan year. A plan will be deemed to be operated in accordance with a reasonable, good faith interpretation of section 410(b) if it is operated in accordance with the terms of §§ 1.410(b)-2 through 1.410(b)-9.

(d) *Effective date for governmental plans.* In the case of governmental plans described in section 414(d), including plans subject to section 403(b)(12)(A)(i) (nonelective plans) § 1.410(b)-2 through § 1.410(b)-10 apply to plan years beginning on or after January 1, 1996, or 90 days after the opening of the first legislative session beginning on or after January 1, 1996, of the governing body with authority to amend the plan, if that body does not meet continuously. Such plans are deemed to satisfy section 410(b) (and in the case of such plans that are not subject to section 403(b)(12)(A)(i), section 401(a)(3) as in effect on September 1, 1974) for plan years before that effective date. For purposes of this section, the governing body with authority to amend the plan is the legislature, board, commission, council, or other governing body with authority to amend the plan. See § 1.410(b)-2(d) and (e).

(e) *Effective date for provisions relating to exclusion of employees of certain tax-exempt entities.* The provisions in

§ 1.410(d)-1

26 CFR Ch. I (4-1-08 Edition)

§ 1.410(b)-6(g) apply to plan years beginning after December 31, 1996. For plan years to which § 1.410(b)-6 applies that begin before January 1, 1997, § 1.410(b)-6(g) (as it appeared in the April 1, 2005 edition of 26 CFR part 1) applies.

[T.D. 8487, 58 FR 46844, Sept. 3, 1993, as amended by T.D. 9275, 71 FR 41359, July 21, 2006]

§ 1.410(d)-1 Election by church to have participation, vesting, funding, etc. provisions apply.

(a) *In general.* If a church or convention or association of churches which maintains any church plan, as defined in section 414(e), makes an election under this section, certain provisions of the Code and Title I of the Employee Retirement Income Security Act of 1974 (the “Act”) shall apply to such church plan as if such plan were not a church plan. The provisions of the Code referred to are section 410 (relating to minimum participation standards), section 411 (relating to minimum vesting standards), section 412 (relating to minimum funding standards), section 4975 (relating to prohibited transactions), and paragraphs (11), (12), (13), (14), (15), and (19) of section 401(a) (relating to joint and survivor annuities, mergers and consolidations, assignment or alienation of benefits, time of benefit commencement, certain social security increases, and withdrawals of employee contributions, respectively).

(b) *Election is irrevocable.* An election under this section with respect to any church plan shall be binding with respect to such plan and, once made, shall be irrevocable.

(c) *Procedure for making election—(1) Time of election.* An election under this section may be made for plan years for which the provisions of section 410(d) of the Code apply to the church plan. By reason of section 1017(b) of the Act section 410(d) does not apply to a plan in existence on January 1, 1974, for plan years beginning before January 1, 1976. Section 1017(d) of the Act permits a plan administrator to elect to have certain provisions of the Code (including section 410(d)) apply to a plan before the otherwise applicable effective dates of such provisions. See § 1.410(a)-2(d). Therefore, for a plan in existence on January 1, 1974, an election under sec-

tion 410(d) of the Code may be made for a plan year beginning before January 1, 1976, only if an election has been made under section 1017(d) of the Act with respect to that plan year.

(2) *By whom election is to be made.* The election provided by this section may be made only by the plan administrator of the church plan.

(3) *Manner of making election.* The plan administrator may elect to have the provisions of the Code described in paragraph (a) of this section apply to the church plan as it is were not a church plan by attaching the statement described in subparagraph (5) of this paragraph to either (i) the annual return required under section 6058(a) (or an amended return) with respect to the plan which is filed for the first plan year for which the election is effective or (ii) a written request for a determination letter relating to the qualification of the plan under section 401(a), 403(a), or 405(a) of the Code and if trustees, the exempt status under section 501(a) of the Code of a trust constituting a part of the plan.

(4) *Conditional election.* If an election is made with a written request for a determination letter, the election may be conditioned upon issuance of a favorable determination letter and will become irrevocable upon issuance of such letter.

(5) *Statement.* The statement described in subparagraph (3) of this paragraph shall indicate (i) that the election is made under section 410(d) of the Code and (ii) the first plan year for which it is effective.

(Sec. 410 (88 Stat. 898; 26 U.S.C. 410))

[T.D. 7508, 42 FR 47198, Sept. 20, 1977]

§ 1.411(a)-1 Minimum vesting standards; general rules.

(a) *In general.* A plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) unless—

(1) The plan provides that an employee's right to his normal retirement benefit (see § 1.411(a)-7(c)) is nonforfeitable (see § 1.411(a)-4) upon and after the attainment of normal retirement age (see § 1.411(a)-7(b)),

Internal Revenue Service, Treasury

§ 1.411(a)-1

(2) The plan provides that an employee's rights in his accrued benefit derived from his own contributions (see § 1.411(c)-1) are nonforfeitable at all times, and

(3) The plan satisfies the requirements of—

(A) Section 411(a)(2) and § 1.411(a)-3 (relating to vesting in accrued benefit derived from employer contributions), and

(B) In the case of a defined benefit plan, section 411(b)(1) and § 1.411(b)-1 (relating to accrued benefit).

(b) *Organization of regulations relating to minimum vesting standards*—(1) *General rules*. This section prescribes general rules relating to the minimum vesting standards provided by section 411.

(2) *Effective dates*. Section 1.411(a)-2 provides rules under section 1017 of the Employee Retirement Income Security Act of 1974 relating to effective dates under section 411.

(3) *Employer contributions*. Section 1.411(a)-3 provides rules under section 411(a)(2) relating to vesting in employer-derived accrued benefits.

(4) *Certain forfeitures*. Section 1.411(a)-4 provides rules under section 411(a)(3) relating to certain permitted forfeitures, suspensions, etc. under qualified plans.

(5) *Nonforfeitable percentage*. Section 1.411(a)-5 provides rules under section 411(a)(4) relating to service included in the determination of an employee's nonforfeitable percentage under section 411(a)(2) and § 1.411(a)-3.

(6) *Years of service; break in service*. Section 1.411(a)-6 provides rules under section 411(a) (5) and (6) of the Internal Revenue Code of 1954 relating to years of service and breaks in service. Rules prescribed by the Secretary of Labor, relating to years of service and breaks in service under part 2 of subtitle B of title I of the Employee Retirement Income Security Act of 1974 are provided under 29 CFR Part 2530 (Department of Labor regulations relating to minimum standards for employee pension benefit plans).

(7) *Definitions and special rules*. Section 1.411(a)-7 provides definitions and special rules under section 411(a) (7), (8), and (9), for purposes of section 411 and the regulations thereunder.

(8) *Changes in vesting schedule*. Section 1.411(a)-8 provides rules under section 411(a)(10) relating to changes in the vesting schedule of a plan.

(9) *Breaks in service*. Section 1.411(a)-9 provides special rules relating to breaks in service.

(10) *Accrued benefits*. See § 1.411(b)-1 for rules under section 411(b) relating to accrued benefit requirements under defined benefit plans.

(11) *Allocation of accrued benefits*. See § 1.411(c)-1 for rules under section 411(c) relating to allocation of accrued benefits between employer and employee contributions.

(12) *Discrimination, etc.* See § 1.411(d)-1 for rules relating to the coordination of section 411 with section 401(a)(4) (relating to discrimination) and other rules under section 411(d).

(c) *Application of standards to certain plans*—(1) *General rule*. Except as provided in subparagraph (2) of this paragraph, section 411 does not apply to—

(i) A governmental plan (within the meaning of section 414(d) and the regulations thereunder),

(ii) A church plan (within the meaning of section 414(e) and the regulations thereunder) which has not made the election provided by section 410(d) and the regulations thereunder,

(iii) A plan which has not provided for employer contributions at any time after September 2, 1974, and

(iv) A plan established and maintained by a society, order, or association described in section 501(c) (8) or (9), if no part of the contributions to or under such plan are made by employers of participants in such plan.

(2) *Vesting requirements*. A plan described in subparagraph (1) of this paragraph shall, for purposes of section 401(a), be treated as meeting the requirements of section 411 if such plan meets the vesting requirements resulting from the application of section 401(a)(4) and section 401(a)(7) as in effect on September 1, 1974.

(d) *Supersession*. Sections 1.411(a)-1 through 1.411(d)-3, inclusive, of the Temporary Income Tax Regulations

§ 1.411(a)-2

26 CFR Ch. I (4-1-08 Edition)

under the Employee Retirement Income Security Act of 1974 are superseded by this section and §§ 1.411(a)-2 through 1.411(d)-3.

(Sec. 411 (88 Stat. 901; 26 U.S.C. 411))

[T.D. 7501, 42 FR 42324, Aug. 23, 1977]

§ 1.411(a)-2 Effective dates.

(a) *Plan not in existence on January 1, 1974.* Under section 1017(a) of the Employee Retirement Income Security Act of 1974, in the case of a plan which was not in existence on January 1, 1974, section 411 and the regulations thereunder apply for plan years beginning after September 2, 1974. See paragraph (c) of this section for time plan is considered in existence.

(b) *Plans in existence on January 1, 1974.* Under section 1017(b) of the Employee Retirement Income Security Act of 1974, in the case of a plan which was in existence on January 1, 1974, section 411 and the regulations thereunder apply for plan years beginning after December 31, 1975. See paragraph (c) of this section for time plan is considered to be in existence.

(c) *Time of plan existence—(1) General rule.* For purposes of this section, a plan is considered to be in existence on a particular day if—

(i) The plan on or before that day was reduced to writing and adopted by the employer (including, in the case of a corporate employer, formal approval by the employer's board of directors and, if required, shareholders), even though no amounts had been contributed under the plan as of such day, and

(ii) The plan was not terminated on or before that day.

For example, if a plan was adopted on January 2, 1974, effective as of January 1, 1974, the plan is not considered to have been in existence on January 1, 1974, because it was not both adopted and in writing on January 1, 1974.

(2) *Collectively-bargained plan.* Notwithstanding paragraph (c) (1) of this section, a plan described in section 413 (a), relating to a plan maintained pursuant to a collective-bargaining agreement, is considered to be in existence on a particular day if—

(i) On or before that day there is a legally enforceable agreement to estab-

lish such a plan signed by the employer, and

(ii) The employer contributions to be made to the plan are set forth in the agreement.

(3) *Special rule.* If a plan is considered to be in existence under subparagraph (1) of this paragraph, any other plan with which such existing plan is merged or consolidated shall also be considered to be in existence on such date.

(d) *Existing plans under collective-bargaining agreements.* For a special effective date rule for certain plans maintained pursuant to a collective bargaining agreement, see section 1017(c)(1) of the Employee Retirement Income Security Act of 1974 (88 Stat. 932).

(e) *Certain existing plans may elect new provisions.* The plan administrator may elect to have the provisions of the Code relating to participation, vesting, funding, and form of benefit apply to a selected plan year. See § 1.410(a)-2(d) for rules relating to such an election.

(f) *Application of rules.* The requirements of section 411 do not apply to employees who separate from service with the employer prior to the first plan year to which such requirements apply and who never return to service with the employer in a plan year to which section 411 applies.

(Sec. 411 (88 Stat. 901; 26 U.S.C. 411))

[T.D. 7501, 42 FR 42325, Aug. 23, 1977]

§ 1.411(a)-3 Vesting in employer-derived benefits.

(a) *In general—(1) Alternative requirements.* A plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) unless the plan satisfies the requirements of section 411(a)(2) and this section. A plan satisfies the requirements of this section if it satisfies the requirements of paragraph (b), (c), or (d) of this section.

(2) *Composite arrangements.* A plan will not be considered to satisfy the requirements of paragraph (b), (c), or (d) of this section unless it satisfies all requirements of a particular one of such paragraphs with respect to all of an employee's years of service. A plan which, for example, satisfies the requirements of paragraph (b) (but not

Internal Revenue Service, Treasury

§ 1.411(a)-3

(c) or (d)) for an employee's first 9 years of service and satisfies the requirements of paragraph (c) (but not (b)) for all of his remaining years of service, does not satisfy the requirements of this section. A plan is not precluded from satisfying the requirement of one such paragraph with respect to one group of employees and another such paragraph with respect to another group provided that the groups are not so structured as to evade the requirements of this paragraph. For example, if plan A provides that employees who commence participation before age 30 are subject to the "rule of 45" vesting schedule and employees who commence participation after age 30 are subject to the full vesting after 10 years schedule, plan A would be so structured as to evade the requirements of this paragraph.

(3) *Plan amendments.* A plan which satisfies the requirements of a particular one of such paragraphs for each of an employee's years of service and which is amended so that, as amended, it satisfies the requirements of another such paragraph for all such years of service, satisfies the requirements of this section even though, as amended, it does not satisfy the requirements of the paragraph which were satisfied prior to the amendment. See § 1.411(a)-8 for rules relating to employee election where the vesting schedule is amended.

(b) *10-year vesting.* A plan satisfies the requirements of section 411(a)(2) (A) and this paragraph if an employee who has completed 10 years of service has a nonforfeitable right to 100 percent of his accrued benefit derived from employer contributions.

(c) *5- to 15-year vesting.* A plan satisfies the requirements of section 411(a)(2) (B) and this paragraph if an employee who has completed at least 5 years of service has a nonforfeitable right to a percentage of his accrued benefit derived from employer contribution which percentage is not less than the nonforfeitable percentage determined under the following table:

Completed years of service	Nonforfeitable percentage
5	25
6	30

Completed years of service	Nonforfeitable percentage
7	35
8	40
9	45
10	50
11	60
12	70
13	80
14	90
15 or more	100

(d) *Rule of 45.* A plan satisfies the requirements of section 411(a)(2)(C) and this paragraph if an employee is entitled to the greater of the two percentages determined under paragraph (d) (1) or (2) of this section.

(1) *Age and service test.* An employee who is not separated from the service, who has completed at least 5 years of service, and with respect to whom the sum of his age and years of service equals or exceeds 45, has a nonforfeitable right to a percentage of his accrued benefit derived from employer contributions which is not less than the nonforfeitable percentage corresponding to his number of completed years of service to the sum of his age and completed years of service (whichever percentage is the lesser) determined under the following table:

Completed years of service	Sum of age and service	Nonforfeitable percentage
5	45 or 46	50
6	47 or 48	60
7	49 or 50	70
8	51 or 52	80
9	53 or 54	90
10 or more	55 or more	100

(2) *Service test.* An employee who has completed at least 10 years of service has a nonforfeitable right to a percentage of his accrued benefit derived from employer contributions determined under the following table:

Completed years of service	Nonforfeitable percentage
10	50
11	60
12	70
13	80
14	90
15	100

(3) *Computation of age.* For purposes of subparagraph (1) of this paragraph,

§ 1.411(a)-3T

26 CFR Ch. I (4-1-08 Edition)

the age of an employee is his age on his last birthday.

(e) *Examples.* The rules provided by this section are illustrated by the following examples:

Example 1. Plan B provides that each employee's rights to his employer-derived accrued benefit are nonforfeitable as follows:

Completed years of service	Nonforfeitable percentage
2 or less	0
3	30
4	35
5	40
6	45
7	50
8	55
9	60
10	65
11	70
12	75
13	80
14	85
15	100

Plan B does not satisfy the requirements of paragraph (c) of this section (relating to 5-15-year vesting) because the nonforfeitable percentage provided by the plan after completion of 14 years of service (85 percent) is less than the percentage required by paragraph (c) of this section at that time (90 percent). The fact that the nonforfeitable percentage provided by the plan for years prior to the 13th year of service is greater than the percentage required under paragraph (c) of this section is immaterial. The plan fails to satisfy the requirements of paragraph (c) of this section even if it is demonstrated that the value of the vesting provided by the plan to the employee is at least equal to the value of the vesting rate required by that paragraph.

Example 2. Plan C provides for plan participation after the completion of 1 year of service. The plan provides that each employee's rights to his employer-derived accrued benefit are 100 percent nonforfeitable after 10 years of plan participation rather than service. The plan does not satisfy the requirements of paragraph (b) of this section because, under the plan, an employee obtains a 100 percent nonforfeitable right to his employer-derived accrued benefit only after completion of more than 10 years of service.

Example 3. Plan D provides that each employee's rights to his employer-derived accrued benefit are nonforfeitable in accordance with the following schedule:

Completed years of service	Nonforfeitable percentage
0-9	0
10	50

Completed years of service	Nonforfeitable percentage
11	60
12	70
13	80
14	90
15	100

The plan does not satisfy the requirements of paragraph (b) of this section after the 9th year of service. It does not satisfy the requirements of paragraph (c) of this section for years prior to the 10th year of service. It does not satisfy the requirements of paragraph (d)(1) of this section for any year of service prior to the 10th year. The plan does not satisfy the requirements of this section because it does not satisfy the requirements of a particular one of the three paragraphs for each of an employee's years of service.

Example 4. Plan G provides that each employee's rights to his employer-derived accrued benefit are 100 percent nonforfeitable upon completion of 5 years of service. The plan satisfies the requirements of paragraphs (b), (c), and (d) of this section and, because it satisfies the requirements of at least one of such paragraphs for all of an employee's years of service, it satisfies the requirements of this section.

(Sec. 411 (88 Stat. 901; 26 U.S.C. 411))

[T.D. 7501, 42 FR 42325, Aug. 23, 1977]

§ 1.411(a)-3T Vesting in employer-derived benefits (temporary).

(a) *In general*—(1) [Reserved]

(2) *Composite arrangements.* A plan will not be considered to satisfy the requirements of paragraph (b), (c), or (d) of this section unless it satisfies all requirements of a particular one of such paragraphs with respect to all of an employee's years of service. A plan which, for example, satisfies the requirements of paragraph (b) (but not (c) or (d)) for an employee's first 4 years of service and satisfies the requirements of paragraph (c) (but not (b)) for all of his remaining years of service does not satisfy the requirements of this section. A plan is not precluded from satisfying the requirements of one such paragraph with respect to one group of employees and another such paragraph with respect to another group provided that the groups are not so structured as to evade the requirements of this paragraph.

(b) *5-year vesting.* A plan satisfies the requirements of section 411(a)(2)(A) and this paragraph if an employee who has

Internal Revenue Service, Treasury

§ 1.411(a)–3T

completed 5 years of service has a nonforfeitable right to 100 percent of his or her accrued benefits derived from employer contributions.

(c) *3- to 7-year vesting.* A plan satisfies the requirements of section 411(a)(2)(B) and this paragraph if an employee who has completed at least 3 years of service has a nonforfeitable right to a percentage of his accrued benefit derived from employer contributions, which percentage is not less than the nonforfeitable percentage determined under the following table:

Completed years of service	Nonforfeitable percentage
3	20
4	40
5	60
6	80
7 or more	100

(d) *Multiemployer plans.* A plan satisfies the requirements of section 411(a)(2)(C) and this paragraph if—

(1) The plan is a multiemployer plan (within the meaning of section 414(f)), and

(2) Under the plan—

(i) An employee who is covered pursuant to a collective bargaining agreement described in section 414(f)(1)(B) has a nonforfeitable right to 100 percent of the employee's accrued benefit derived from employer contributions not later than upon completion of 10 years of service, and

(ii) The requirements of paragraph (b) or (c) of this section are met with respect to employees who are not covered pursuant to a collective bargaining agreement described in section 414(f)(1)(B).

(iii) For purposes of this provision, an employee is not covered pursuant to a collective bargaining agreement unless the employee is represented by a bona fide employee representative that is a party to the collective bargaining agreement pursuant to which the multiemployer plan is maintained. Thus, for example, an employee of either the multiemployer plan or the employee representative is not covered pursuant to the collective bargaining agreement under which the plan is maintained even if the employee is covered pursuant to an agreement entered into by the multiemployer plan or employee

representative on behalf of the employee and even if all such employees covered under the plan constitute only a de minimis percentage of the total employees covered under the plan.

(e) *Effective date.* (1) The provisions of this section apply to all employees who have one hour of service in any plan year beginning after—

(i) December 31, 1988, or

(ii) In the case of a plan maintained pursuant to one or more collective bargaining agreements between employee representatives and one or more employers ratified before March 1, 1986, for employees covered by any such agreement, the earlier of—

(A) The later of—

(1) January 1, 1989, or

(2) The date on which the last of such collective bargaining agreements terminates (determined without regard to any extension thereof after February 28, 1986), or

(B) January 1, 1991.

(2) For employees not described in paragraph (e)(1), above, the regulations in effect prior to January 1, 1989, shall be applied to determine the requirements of this section.

(f) *Examples.* The rules provided by this section are illustrated by the following examples:

Example 1. Plan B provides that each employee's rights to his employer-derived accrued benefit are nonforfeitable as follows:

Completed years of service	Nonforfeitable percentage
1	0
2	10
3	25
4	45
5	65
6	75
7	100

Plan B does not satisfy the requirements of paragraph (c) of this section (relating to 3- to 7-year vesting) because the nonforfeitable percentage provided by the plan after completion of 6 years of service (75 percent) is less than the percentage required by paragraph (c) of this section at that time (80 percent). The fact that the nonforfeitable percentage provided by the plan for years prior to the 6th year of service is greater than the percentage required under paragraph (c) of this section is immaterial. The plan fails to satisfy the requirements of paragraph (c) of this section even if it is demonstrated that the value of the vesting provided by the plan

§ 1.411(a)-4

26 CFR Ch. I (4-1-08 Edition)

to the employees is at least equal to the value of the vesting rate required by this paragraph.

Example 2. Plan C provides for plan participation after the completion of 1 year of service. The plan provides that each employee's rights to his employer-derived accrued benefits are 100 percent nonforfeitable after 5 years of plan participation rather than service. The plan does not satisfy the requirements of paragraph (b) of this section because, under the plan, an employee obtains a 100 percent nonforfeitable right to his or her employer-derived accrued benefit only after completion of more than 5 years of service.

Example 3. Plan D provides that each employee's rights to his employer-derived accrued benefits are nonforfeitable in accordance with the following schedule:

Completed years of service	Nonforfeitable percentage
0 to 4	0
5	60
6	80
7	100

The plan does not satisfy the requirements of paragraph (b) of this section after the 4th year of service. It does not satisfy the requirements of paragraph (c) of this section for years prior to the 5th year of service. The plan does not satisfy the requirements of this section because it does not satisfy the requirements of a particular one of the two paragraphs for each of an employee's years of service.

Example 4. Plan G provides that each employee's rights to his employer-derived accrued benefit are 100 percent nonforfeitable upon completion of 3 years of service. The plan satisfies the requirements of paragraphs (b) and (c) of this section and, because it satisfies the requirements of at least one of such paragraphs for all of an employee's years of service, it satisfies the requirements of this section.

[T.D. 8170, 53 FR 240, Jan. 6, 1988]

§ 1.411(a)-4 Forfeitures, suspensions, etc.

(a) *Nonforfeitability.* Certain rights in an accrued benefit must be nonforfeitable to satisfy the requirements of section 411(a). This section defines the term "nonforfeitable" for purposes of these requirements. For purposes of section 411 and the regulations thereunder, a right to an accrued benefit is considered to be nonforfeitable at a particular time if, at that time and thereafter, it is an unconditional right. Except as provided by paragraph (b) of this section, a right which, at a par-

ticular time, is conditioned under the plan upon a subsequent event, subsequent performance, or subsequent forbearance which will cause the loss of such right is a forfeitable right at that time. Certain adjustments to plan benefits such as adjustments in excess of reasonable actuarial reductions, can result in rights being forfeitable. Rights which are conditioned upon a sufficiency of plan assets in the event of a termination or partial termination are considered to be forfeitable because of such condition. However, a plan does not violate the nonforfeitability requirements merely because in the event of a termination an employee does not have any recourse toward satisfaction of his nonforfeitable benefits from other than the plan assets or the Pension Benefit Guaranty Corporation. Furthermore, nonforfeitable rights are not considered to be forfeitable by reason of the fact that they may be reduced to take into account benefits which are provided under the Social Security Act or under any other Federal or State law and which are taken into account in determining plan benefits. To the extent that rights are not required to be nonforfeitable to satisfy the minimum vesting standards, or the nondiscrimination requirements of section 401(a)(4), they may be forfeited without regard to the limitations on forfeitability required by this section. The right of an employee to repurchase his accrued benefit for example under section 411(a)(3)(D), is an example of a right which is required to satisfy such standards. Accordingly, such a right is subject to the limitations on forfeitability. Rights which are required to be prospectively nonforfeitable under the vesting standards are nonforfeitable and may not be forfeited until it is determined that such rights are, in fact, in excess of the vesting standards. Thus, employees have a right to vest in the accrued benefits if they continue in employment of employers maintaining the plan unless a forfeitable event recognized by section 411 occurs. For example, if a plan covered employees in Division A of Corporation X under a plan utilizing a 10-year 100 percent vesting schedule, the plan could not forfeit employees' rights on account of their moving to service in Division B of

Corporation X prior to completion of 10 years of service even though employees are not vested at that time.

(b) *Special rules.* For purposes of paragraph (a) of this section a right is not treated as forfeitable—

(1) *Death*—(i) *General rule.* In the case of a participant's right to his employer-derived accrued benefit, merely because such accrued benefit is forfeitable by the participant to the extent it has not been paid or distributed to him prior to his death. This subparagraph shall not apply to a benefit which must be paid to a survivor in order to satisfy the requirements of section 401(a)(11).

(ii) *Employee contributions.* A participant's right in his accrued benefit derived from his own contributions must be nonforfeitable at all times. Such a right is not treated as forfeitable merely because, after commencement of annuity or pension payments in a benefit form provided under the plan, the participant dies without receiving payments equal in amount to his nonforfeitable accrued benefit derived from his contributions determined at the time of commencement.

(2) *Suspension of benefits upon reemployment of retiree.* In the case of certain suspensions of benefits under section 411(a)(3)(B), see regulations prescribed by the Secretary of Labor under 29 CFR Part 2530 (Department of Labor regulations relating to minimum standards for employee pension benefit plans).

(3) *Retroactive plan amendment.* In the case of a participant's right to his employer-derived accrued benefit, merely because such benefit is subject to reduction to the extent provided by a plan amendment described in section 412(c)(8) and the regulations thereunder, which amendment is given retroactive effect in accordance with such section.

(4) *Other forfeiture rules*—(i) *Withdrawal of mandatory contributions.* For rules allowing forfeitures on account of the withdrawal of mandatory contributions, see § 1.411(a)-7(d) (2) and (3).

(ii) *Additional requirements.* For additional requirements relating to nonforfeatability of benefits in the event of a withdrawal by the employee, see section 401(a)(19) and § 1.401(a)-19.

(5) *Multiemployer plan.* In the case of a multiemployer plan described in section 414(f), merely because an employee's accrued benefit which results from service with an employer before such employer was required to contribute to the plan is forfeitable on account of the cessation of contributions by the employer of the employee. This subparagraph shall not apply to an employee's accrued benefit with respect to an employer which accrued under a plan maintained by that employer prior to the adoption by that employer of the multiemployer plan.

(6) *Lost beneficiary; escheat.* In the case of a benefit which is payable, merely because the benefit is forfeitable on account of the inability to find the participant or beneficiary to whom payment is due, provided that the plan provides for reinstatement of the benefit if a claim is made by the participant or beneficiary for the forfeited benefit. In addition, a benefit which is lost by reason of escheat under applicable state law is not treated as a forfeiture.

(7) *Certain matching contributions.* A matching contribution (within the meaning of section 401(m)(4)(A) and § 1.401(m)-1(a)(2)) is not treated as forfeitable even if under the plan it may be forfeited under § 1.401(m)-2(b)(1) because the contribution to which it relates is treated as an excess contribution (within the meaning of § 1.402(k)-2(b)(2)(ii) and 1.401(k)-6), excess deferral (within the meaning of § 1.402(g)-1(e)(1)(iii)), or excess aggregate contribution (within the meaning of § 1.401(m)-5).

(c) *Examples.* The rules of this section are illustrated by the following examples:

Example 1. Corporation A's plan provides that an employee is fully vested in his employer-derived accrued benefit after completion of 5 years of service. The plan also provides that, if an employee works for a competitor he forfeits his rights in the plan. Such provision could result in the forfeiture of an employee's rights which are required to be nonforfeitable under section 411 and therefore the plan would not satisfy the requirements of section 411. If the plan limited the forfeiture to employees who completed less than 10 years of service, the plan would not fail to satisfy the requirements of section 411 because the forfeitures under this

provision are limited to rights which are in excess of the minimum required to be nonforfeitable under section 411(a)(2)(A).

Example 2. Plan B provides that if an employee does not apply for benefits within 5 years after the attainment of normal retirement age, the employee loses his plan benefits. Such a plan provision could result in forfeiture of an employee's rights which are required to be nonforfeitable under section 411 and, therefore, the plan would not satisfy the requirements of section 411.

(Sec. 411 (88 Stat. 901; 26 U.S.C. 411))

[T.D. 7501, 42 FR 42326, Aug. 23, 1977, as amended by T.D. 8357, 56 FR 40549, Aug. 15, 1991; T.D. 9169, 69 FR 78153, Dec. 29, 2004; T.D. 9219, 70 FR 47126, Aug. 12, 2005]

EDITORIAL NOTE: By T.D. 9169, 69 FR 78153, Dec. 29, 2004, § 1.411(a)-(b)(7) was amended by removing the reference to § 1.401(k)-1(f)(2) and (g)(7). However, the reference does not appear in the paragraph.

§ 1.411(a)-4T Forfeitures, suspensions, etc. (temporary).

(a) *Nonforfeitability.* Certain rights in an accrued benefit must be nonforfeitable to satisfy the requirements of section 411(a). This section defines the term "nonforfeitable" for purposes of these requirements. For purposes of section 411 and the regulations thereunder, a right to an accrued benefit is considered to be nonforfeitable at a particular time if, at that time and thereafter, it is an unconditional right. Except as provided by paragraph (b) of this section, a right which, at a particular time, is conditioned under the plan upon a subsequent event, subsequent performance, or subsequent forbearance which will cause the loss of such right is a forfeitable right at that time. Certain adjustments to plan benefits, such as adjustments in excess of reasonable actuarial reductions, can result in rights being forfeitable. Rights which are conditioned upon a sufficiency of plan assets in the event of a termination or partial termination are considered to be forfeitable because of such condition. However, a plan does not violate the nonforfeitability requirements merely because in the event of a termination an employee does not have any recourse toward satisfaction of his nonforfeitable benefits from other than the plan assets, the Pension Benefit Guaranty Corporation, or a trust established and maintained

pursuant to sections 4041(c)(3)(B) (ii) or (iii) and section 4049 of ERISA with respect to the plan. Furthermore, nonforfeitable rights are not considered to be forfeitable by reason of the fact that they may be reduced as allowed under sections 401(a)(5) and 401(l). To the extent that rights are not required to be nonforfeitable to satisfy the minimum vesting standards, or the non-discrimination requirements of section 401(a)(4), they may be forfeited without regard to the limitations on forfeitability required by this section. The right of an employee to repurchase his accrued benefit for example under section 411(a)(3)(D), is an example of a right which is required to satisfy such standards. Accordingly, such a right is subject to the limitations on forfeitability. Rights which are required to be prospectively nonforfeitable under the vesting standards are nonforfeitable and may not be forfeited until it is determined that such rights are, in fact, in excess of the vesting standards. Thus, employees have a right to vest in the accrued benefits if they continue in employment of employers maintaining the plan unless a forfeitable event recognized by section 411 occurs. For example, if a plan covered employees in Division A of Corporation X under a plan utilizing a 5-year 100 percent vesting schedule, the plan could not forfeit employees' rights on account of their moving to service in Division B of Corporation X prior to completion of 5 years of service even though employees are not vested at that time.

(b) [Reserved]

(c) *Examples.* The rules of this section are illustrated by the following examples:

Example 1. Corporation A's plan provides that an employee is fully vested in his employer-derived accrued benefit after completion of 3 years of service. The plan also provides that if the employee works for a competitor he forfeits his rights in the plan. Such provision could result in the forfeiture of an employee's rights which are required to be nonforfeitable under section 411 and therefore the plan would not satisfy the requirements of section 411. If the plan limited the forfeiture to employees who completed less than 5 years of service, the plan would not fail to satisfy the requirements of section 411 because the forfeitures under this provision are limited to rights which are in

Internal Revenue Service, Treasury

§ 1.411(a)-5

excess of the minimum required to be non-forfeitable under section 411(a)(2)(A).

[T.D. 8170, 53 FR 241, Jan. 6, 1988]

§ 1.411(a)-5 Service included in determination of nonforfeitable percentage.

(a) *In general.* Under section 411(a)(4), for purposes of determining the nonforfeitable percentage of an employee's right to his employer-derived accrued benefit under section 411(a)(2) and § 1.411(a)-3, all of an employee's years of service with an employer or employers maintaining the plan shall be taken into account except that years of service described in paragraph (b) of this section may be disregarded.

(b) *Certain service.* For purposes of paragraph (a) of this section, the following years of service may be disregarded:

(1) *Service before age 22.* (i) In the case of a plan which satisfies the requirements of section 411(a)(2) (A) or (B) (relating to 10-year vesting and 5-15-year vesting, respectively), a year of service completed by an employee before he attains age 22.

(ii) In the case of a plan which does not satisfy the requirements of section 411(a)(2) (A) or (B), a year of service completed by an employee before he attains age 22 if the employee is not a participant (for purposes of section 410) in the plan at any time during such year.

(iii) For purposes of this subparagraph in the case of a plan utilizing computation periods, service during a computation period described in section 411(a)(5)(A) within which the employee attains age 22 may not be disregarded. In the case of a plan utilizing the elapsed time method described in § 1.410(a)-7, service on or after the date on which the employee attains age 22 may not be disregarded.

(2) *Contributory plans.* In the case of a plan utilizing computation periods, a year of service completed by an employee under a plan which requires mandatory contributions (within the meaning of section 411(c)(2)(C) and § 1.411(c)-1(c)(4)) to be made by the employee for such year, if the employee does not participate for such year solely because of his failure to make all mandatory contributions to the plan

for such year. If the employee contributes any part of the mandatory contributions for the year, such year may not be excluded by reason of this subparagraph. In the case of a plan utilizing the elapsed time method described in § 1.410(a)-7, the service which may be disregarded is the period with respect to which the mandatory contribution is not made.

(3) *Plan not maintained—(i) In general.* An employee's years of service with an employer during any period for which the employer did not maintain the plan or a predecessor plan may be disregarded for purposes of section 411(a)(2). Paragraph (b)(3)(ii) of this section provides rules regarding the period prior to the adoption of a plan. Paragraph (b)(3)(iii) of this section provides rules regarding the period after the termination of a plan. Paragraph (b)(3)(iv) of this section provides rules regarding employers who have certain relationships with other employers maintaining the plan.

(ii) *Period prior to adoption.* The period for which a plan is not maintained by an employer includes the period before the plan was established. For purposes of this subdivision, a plan is established on the first day of the plan year in which the plan is adopted even though the plan is adopted after such first day. Except as provided in paragraph (b)(3)(iv) of this section if an employer adopts a plan which has previously been established by another employer or group of employers, the plan is not maintained by the adopting employer prior to the first day of the plan year in which the plan is adopted by the adopting employer. In the case of a transfer of assets or liabilities (including a merger or consolidation) involving two plans maintained by a single employer, the successor (or transferee) plan is treated as if it was established at the same time as the date of the establishment of the earliest component plan. In the case of a plan merger, consolidation, or transfer of plan assets or liabilities involving plans of two or more employers, the successor plan is treated as if it were established on each of the separate dates on which such component plan was established for the employees of each employer.

Thus, for example, if employer A establishes a plan January 1, 1970, and employer B establishes a plan January 1, 1980, and the plans were subsequently merged, then the merged plan would be treated as if it were in existence on January 1, 1970, with respect to A's employees and as if it were in existence on January 1, 1980, with respect to B's employees.

(iii) *Period after termination or withdrawal.* The period for which a plan is not maintained by an employer includes the period after the plan is terminated. For purposes of this section, a plan is terminated at the date there is a termination of the plan within the meaning of section 411(d)(3)(A) and the regulations thereunder. Notwithstanding the preceding sentence, if contributions to or under a plan are made after termination, the plan is treated as being maintained until such contributions cease, whether or not accruals are made after such termination. If, after termination of a plan in circumstances under which the employer may be liable to the Pension Benefit Guaranty Corporation under section 4062 of the Act, employer contributions are made to or under the plan to fund benefits accrued at the time of termination, such contributions shall, for purposes of this paragraph, be deemed to be payments in satisfaction of employer liability to such Corporation rather than contributions to or under the plan. In the case of a plan maintained by more than one employer, the period for which the plan is not maintained by the withdrawing employer includes the period after the withdrawal from the plan.

(iv) *Certain employers.* For purposes of this subparagraph—

(A) *Predecessor employers.* Service with a predecessor employer who maintained the plan of the current employer is treated as service with such current employer (see section 414(a)(1) and the regulations thereunder), and certain service with a predecessor employer who did not maintain the plan of the current employer is treated as service with the current employer (see section 414(a)(2) and the regulations thereunder).

(B) *Related employers.* Service with an employer is treated as service for cer-

tain related employers for the period during which the employers are related. These related employers include members of a controlled group of corporations (within the meaning of section 1563(a), determined without regard to subsections (a)(4) and (e)(3) (C) thereof) and trades or businesses (whether or not incorporated) which are under common control (see section 414 (b) and (c) and 29 CFR Part 2530, Department of Labor regulations relating to minimum standards for employee pension benefits plans).

(C) *Plan maintained by more than one employer.* Service with an employer who maintains a plan is treated as service for each other employer who maintains that plan for the period during which the employers are maintaining the plan (see section 413 (b)(4) and (c)(3) and 29 CFR Part 2530, Department of Labor regulations relating to minimum standards for employee pension benefit plans).

(v) *Predecessor plan—(A) General rule.* In the case of an employee who was covered by a predecessor plan, the time the successor of such plan is maintained for such employee includes the time the predecessor plan was maintained if, as of the later of the time the predecessor plan is terminated or the successor plan is established, the employee's years of service under the predecessor plan are not equalled or exceeded by the aggregate number of consecutive 1-year breaks in service occurring after such years of service. Years of service and breaks in service, without regard to whether the employee has nonforfeitable rights under the predecessor plan, are determined under section 411(a) (5) and (6) except that years between the termination date of the predecessor plan and the date of establishment of the successor plan do not count as years of service.

(B) *Definition of predecessor plan.* For purposes of this section, if—

(1) An employer establishes a retirement plan (within the meaning of section 7476(d)) qualified under subchapter D of chapter 1 of the Code within the 5-year period immediately preceding or following the date another such plan terminates, and

(2) The other plan is terminated during a plan year to which this section applies.

The terminated plan is a predecessor plan with respect to such other plan.

(C) *Example.* The rules provided by this subparagraph are illustrated by the following example:

Example. (1) Employer X's qualified plan A terminated on January 1, 1977, Employer X established qualified plan B on January 1, 1981. Under paragraph (b)(3)(v)(B) of this section, plan A is a predecessor plan with respect to plan B because plan B is established within the 5-year period immediately following the date plan A terminated.

(2) Employee C was not covered by the A plan. Under the general rule in subdivision (v)(A) of this subparagraph, plan B is not maintained until January 1, 1981, with respect to Employee C.

(3) Employee D was covered by the A plan. On December 31, 1976, D had 4 years of service. D had 4 consecutive 1-year breaks in service because, during the years between the termination of plan A and the establishment of plan B, he did not have more than 500 hours of service in any applicable computation period. Because D's consecutive 1-year breaks (4) equal his years of service prior to his breaks (4), plan B is not maintained until January 1, 1981, with respect to employee D.

(4) Employee E was covered by the A plan. On December 31, 1975, E had 6 years of service. E had a 1-year break in service in 1976. E also had 4 consecutive 1-year breaks in service for the period between plan A's termination and plan B's establishment. Because E's years of service (6) are not less than his consecutive 1-year breaks (5), plan B is maintained for E as of the establishment date of plan A.

(4) *Break in service.* A year of service which is not required to be taken into account by reason of a break in service (within the meaning of section 411(a)(6) and § 1.411(a)-6)).

(5) *Service before January 1, 1971.* A year of service completed by an employee prior to January 1, 1971, unless the employee completes at least 3 years of service at any time after December 31, 1970. For purposes of determining if an employee completes 3 years of service, whether or not consecutive, the exceptions of section 411(a)(4) are not applicable. For the meaning of the term "year of service", see regulations prescribed by the Secretary of Labor under 29 CFR Part 2530,

relating to minimum standards for employee pension benefit plans.

(6) *Service before effective date.* A year of service completed before the first plan year for which this section applies to the plan, if such service would have been disregarded under the plan rules relating to breaks in service (whether or not such rules are so designated in the plan) as such rules were in effect from time to time under the plan. For this purpose, plan rules which result in the loss of prior vesting or benefit accruals of an employee, or which deny an employee eligibility to participate, by reason of separation or failure to complete a required period of service within a specified period of time (e.g., 300 hours in one year) will be considered break in service rules. See § 1.411(a)-9 for requirements relating to certain amendments to the break in service rules of a plan.

(i) [Reserved]

(ii) *Examples.* The rules of this subparagraph are illustrated by the following examples:

Example 1. The A plan in 1971 provides for immediate participation and vesting at normal retirement age. Employees accrue a unit benefit based on their compensation in each year. The plan provides that if an employee is not employed on the last day of the calendar year, he loses all accrued benefits. The requirement of employment on the last day of the year is a break in service rule because employees can lose benefits by reason of their separation. Accordingly, in the case of employees who separate and do not return by the close of the year, service which is completed prior to separation may be disregarded.

Example 2. The B plan in 1971 excludes from plan participation employees who work less than 1,200 hours per year. Because years of less than 1,200 hours are not taken into account under the B plan for eligibility to participate, such years are excluded under rules relating to breaks in service. Therefore, the years can be disregarded under this subparagraph.

Example 3. The C plan in 1971 provides for immediate participation and provides accruals and vesting credit for 1,200 hours or more in a given year. The plan provides that if a participant works less than 300 hours in a given year, he loses all prior vesting and benefit credits. The 300 hour rule is a break in service rule because the failure to complete 300 hours results in the loss of vesting and prior service credit. The 1,200 hour requirement is not a break in service rule because

§ 1.411(a)-6

26 CFR Ch. I (4-1-08 Edition)

even though employees do not increase vesting or accrue benefits for service between 300 and 1,200 hours, they cannot lose prior vesting or benefits for such service. Accordingly, the C plan can disregard completed years only on account of less than 300 hours of service by an employee.

(c) *Special continuity rule for certain plans.* For special rules for computing years of service in the case of a plan maintained by more than one employer, see 29 CFR Part 2530 (Department of Labor regulations relating to minimum standards for employee pension benefit plans).

(Sec. 411 (88 Stat. 901, 26 U.S.C. 411))

[T.D. 7501, 42 FR 42327, Aug. 23, 1977, as amended by T.D. 7703, 45 FR 40985, June 17, 1980]

§ 1.411(a)-6 Year of service; hours of service; breaks in service.

(a) *Year of service.* Under section 411(a)(5)(A), for purposes of the regulations thereunder, the term “year of service” is defined in regulations prescribed by the Secretary of Labor under section 203(b)(2)(A) of the Employee Retirement Income Security Act of 1974. For special rules applicable to seasonal industries and maritime industries, see regulations prescribed by the Secretary of Labor under subparagraphs (C) and (D) of section 203(b)(2) of the Employee Retirement Income Security Act of 1974.

(b) *Hours of service.* Under section 411(a)(5)(B), for purposes of the regulations thereunder, the term “hours of service” has the meaning provided by section 410(a)(3)(C). See regulations prescribed by the Secretary of Labor under 29 CFR Part 2530, relating to minimum standards for employee pension benefit plans.

(c) *Breaks in service.* Under section 411(a)(6), for purposes of § 1.411(a)-5(b)(4) and of this paragraph—

(1) *In general*—(i) *Year of service after 1-year break in service.* In the case of any employee who has incurred a 1-year break in service, years of service completed before such break are not required to be taken into account until the employee has completed one year of service after his return to service.

(ii) *Defined contribution plan.* In the case of a participant in a defined contribution plan or in an insured defined

benefit plan (which plan satisfies the requirements of section 411 (b)(1)(F) and § 1.411(b)-1) who has incurred a 1-year break in service, years of service completed after such break are not required to be taken into account for purposes of determining the nonforfeitable percentage of the participant's right to employer-derived benefits which accrued before such break. This subdivision does not permit years of service completed before a 1-year break in service to be disregarded in determining the nonforfeitable percentage of a participant's right to employer-derived benefits which accrue after such break.

(iii) *Nonvested participants.* In the case of an employee who is a nonvested participant in employer-derived benefits at the time he incurs a 1-year break in service, years of service completed by such participant before such break are not required to be taken into account for purposes of determining the nonforfeitable percentage of his right to employer-derived benefits if at such time the number of consecutive 1-year breaks in service included in his most recent break in service equals or exceeds the aggregate number of his years of service, whether or not consecutive, completed before such break. In the case of a plan utilizing the elapsed time method described in § 1.410(a)-7, the condition in the preceding sentence shall be satisfied if the period of severance is at least one year and the consecutive period of severance equals or exceeds his prior period of service, whether or not consecutive, completed before such period of severance. In computing the aggregate number of years of service prior to such break, years of service which could have been disregarded under this subdivision by reason of any prior break in service may be disregarded.

(2) *One-year break in service defined.* The term “1-year break in service” means a calendar year, plan year, or other 12-consecutive month period designated by a plan (and not prohibited under regulations prescribed by the Secretary of Labor) during which the participant has not completed more than 500 hours of service. In the case of a plan utilizing the elapsed time method, the term “1-year break in service”

Internal Revenue Service, Treasury

§ 1.411(a)-6

means a 12-consecutive month period beginning on the severance from service date or any anniversary thereof and ending on the next succeeding anniversary of such date; provided, however, that the employee during such 12-consecutive-month period does not complete any hours of service within the meaning of 29 CFR Part 2530.200b-2(a) for the employer or employers maintaining the plan. See regulations prescribed by the Secretary of Labor under 29 CFR Part 2530, relating to minimum standards for employee pension benefit plans.

(d) *Examples.* The rules provided by this section are illustrated by the following examples:

Example 1. (i) X Corporation maintains a defined contribution plan to which section 411 applies. The plan uses the calendar year as the vesting computation period. In 1980, Employee A, who was hired at age 35, separates from the service of X Corporation after completing 4 years of service. At the time of his separation, Employee A had a nonforfeitable right to 25 percent of his employer-derived accrued benefit which was not distributed. In 1985, after incurring 5 consecutive one-year breaks in service, Employee A is re-employed by X Corporation and becomes an active participant in the plan. The plan provides that, for 1985 and all subsequent years, Employee A's previous years of service will not be taken into account for purposes of computing the nonforfeitable percentage of his employer-derived accrued benefit, solely because of his break in service.

(ii) The plan fails to satisfy section 411. Section 411(a)(6)(B) would permit the plan to disregard Employee A's prior service for purposes of computing his nonforfeitable percentage in 1985 only, but such service must be taken into account in subsequent years unless there is another break in service. Under section 411(a)(6)(C), the plan is not required to take Employee A's post-break service into account for purposes of computing his nonforfeitable right to his prebreak employer-derived accrued benefits. This provision, however, would not permit the plan to disregard pre-break service in determining his nonforfeitable right to his benefit accrued after the break. The exception provided by section 411(a)(6)(D) does not apply in the case of a participant who has any nonforfeitable right to his accrued benefit derived from employer contributions.

Example 2. (i) X Corporation maintains a qualified plan to which sections 410 and 411 (relating to minimum participation standards and minimum vesting standards, respectively) apply. The plan permits participation upon completion of a year of service and pro-

vides that 100% of an employee's employer-derived accrued benefit vests after 10 years of service. The plan uses the calendar year as the vesting computation period. The plan provides that an employee who completes at least 1,000 hours of service in a 12-month period is credited with a year of service for participation and vesting purposes. The plan also provides that an employee who does not complete more than 500 hours of service in that 12-month period incurs a one-year break in service. The plan includes the rule described in section 411 (a)(6)(D) for participation and vesting purposes. Under this rule, an employee's years of service prior to a break in service may be disregarded under certain circumstances if he has no vested right to any employer-derived benefit under the plan. The plan does not contain the rule described in section 411(a)(6)(B) (relating to the requirement of one year of service after a one-year break in service).

(ii) Employee A commences employment with the X Corporation on January 1, 1977. Employee A's employment history for 1977 through 1989 is as follows:

Year ending December 31	Hours of service completed
1977	1,000
1978	800
1979	1,000
1980	400
1981	1,000
1982	0
1983	400
1984	1,000
1985	0
1986	0
1987	500
1988	200
1989	1,000

Employee A's status as a participant during this period is determined as follows:

1978: Employee A was a plan participant on January 1, 1978, because he completed a year of service (1,000 hours) in 1977. He did not complete a year of service in 1978 because he completed fewer than 1,000 hours in that year. Because he completed more than 500 hours of service in 1978, however, Employee A did not incur a one-year break in service that year.

1979: Employee A completes a year of service in 1979. Because he did not incur a one-year break in service in 1978, the plan may not disregard his 1977 service for purposes of determining his years of service as of January 1, 1979.

1980: Employee A incurs a one-year break in service in 1980.

1981: Because Employee A had completed 2 years of service prior to 1981 and had incurred one 1-year break in service prior to 1981, under section 411(a)(6)(D), the plan may

§ 1.411(a)-7

26 CFR Ch. I (4-1-08 Edition)

not disregard his pre-1980 service in 1981. Employee A completes a year of service in 1981.

1982: Employee A incurs a one-year break in service in 1982.

1983: Employee A incurs a one-year break in service in 1983. As of the end of 1983, he has completed 3 years of service and has incurred 2 consecutive one-year breaks in service.

1984: Employee A completes a year of service in 1984. Under section 411(a)(6)(D), his pre-1982 service may not be disregarded in 1984 because, as of the beginning of 1984, his pre-1984 years of service (3) exceed his consecutive one-year breaks in service (2).

1984-1988: Employee A incurs 4 consecutive one-year breaks in service during the years 1985 through 1988.

1989: Employee A's pre-1989 service is disregarded in 1989 and all subsequent plan years because his years of service as of January 1, 1989, equal the number of consecutive one-year breaks he has incurred as of that date. Therefore, as of the beginning of 1989, Employee A is not a plan participant. Employee A completes a year of service in 1989. (Although section 411(a)(6)(D) does not prohibit the plan provision under which Employee A's pre-1989 service is disregarded, that section does not require such a provision in a qualified plan.)

(Sec. 411 (88 Stat. 901; 26 U.S.C. 411))

[T.D. 7501, 42 FR 42329, Aug. 23, 1977, as amended by T.D. 7703, 45 FR 40985, June 17, 1980]

§ 1.411(a)-7 Definitions and special rules.

(a) *Accrued benefit.* For purposes of section 411 and the regulations thereunder, the term "accrued benefit" means—

(1) *Defined benefit plan.* In the case of a defined benefit plan—

(i) If the plan provides an accrued benefit in the form of an annual benefit commencing at normal retirement age, such accrued benefit, or

(ii) If the plan does not provide an accrued benefit in the form described in subdivision (i) of this subparagraph, an annual benefit commencing at normal retirement age which is the actuarial equivalent (determined under section 411(c)(3) and § 1.411(c)-(5) of the accrued benefit determined under the plan. In general, the term "accrued benefits" refers only to pension or retirement benefits. Consequently, accrued benefits do not include ancillary benefits not directly related to retirement benefits such as payment of med-

ical expenses (or insurance premiums for such expenses), disability benefits not in excess of the qualified disability benefit (see section 411(a)(9) and paragraph (c)(3) of this section), life insurance benefits payable as a lump sum, incidental death benefits, current life insurance protection, or medical benefits described in section 401(h). For purposes of this paragraph a subsidized early retirement benefit which is provided by a plan is not taken into account, except to the extent of determining the normal retirement benefit under the plan (see section 411(a)(9) and paragraph (c) of this section). The accrued benefit includes any optional settlement at normal retirement age under actuarial assumptions no less favorable than those which would be applied if the employee were terminating his employment at normal retirement age. The accrued benefit does not include any subsidized value in a joint and survivor annuity to the extent that the annual benefit of the joint and survivor annuity does not exceed the annual benefit of a single life annuity.

(2) *Defined contribution plan.* In the case of a defined contribution plan, the balance of the employee's account held under the plan.

(b) *Normal retirement age*—(1) *General rule.* For the purposes of section 411 and the regulations thereunder, the term "normal retirement age" means the earlier of—

(i) The time specified by a plan at which a plan participant attains normal retirement age, or

(ii) The later of—

(A) The time the plan participant attains age 65, or

(B) The 10th anniversary of the date the plan participant commences participation in the plan.

If a plan, or the employer sponsoring the plan, imposes a requirement that an employee retire upon reaching a certain age, the normal retirement age may not exceed that mandatory retirement age. The preceding sentence will apply if the employer consistently enforces a mandatory retirement age rule, whether or not set forth in the plan or any related document. For purposes of subdivision (i) of this subparagraph, if an age is not specified by a plan as the normal retirement age then

the normal retirement age under the plan is the earliest age beyond which the participant's benefits under the plan are not greater solely on account of his age or service. For purposes of paragraph (b)(1)(ii)(B) of this section, participation commences on the first day of the first year in which the participant commenced his participation in the plan, except that years which may be disregarded under section 410(a)(5)(D) may be disregarded in determining when participation commenced.

(2) *Examples.* The provisions of this paragraph are illustrated by the following examples:

Example 1. Plan A defines normal retirement age as age 65. Under the plan, benefits payable to participants who retire at or after age 60 are not reduced on account of early retirement. For purposes of section 411 and the vesting regulations, normal retirement age under Plan A is age 65 (determined under subparagraph (1)(i) of this paragraph). This is true even if in operation all participants retire at age 60.

Example 2. Plan B does not specify any age as the normal retirement age. Under the plan, participants who have attained age 55 are entitled to benefits commencing upon retirement but the benefits of participants who retire before attaining age 70 are subject to reduction on account of early retirement. For purposes of section 411 and the vesting regulations the normal retirement age under Plan B is the later of (i) age 65, or (ii) the 10th anniversary of the date a plan participant commences participation in the plan (assuming such date is prior to age 70).

Example 3. The facts are the same as in example (2). Employee X first became a participant in Plan B on January 1, 1980 at age 53. His participation continued until December 31, 1980, when he separated from the service with no vested benefits. After incurring 5 consecutive 1-year breaks in service, Employee X again becomes an employee and a plan participant on January 1, 1986, at age 59. For purposes of section 411, Employee X's normal retirement age under Plan B is age 69, the 10th anniversary of the date on which his year of plan participation commenced. His participation in 1980 may be disregarded under the last sentence of paragraph (b)(1) of this section.

(c) *Normal retirement benefit*—(1) *In general.* For purposes of section 411 and the regulations thereunder, the term “normal retirement benefit” means the periodic benefit under the plan commencing upon early retirement (if any)

or at normal retirement age, whichever benefit is greater.

(2) *Periodic benefit.* For purposes of subparagraph (1) of this paragraph—

(i) In the case of a plan under which a benefit is payable as an annuity in the same form upon early retirement and at normal retirement age, the greater benefit is determined by comparing the amount of such annuity payments.

(ii) In the case of a plan under which an annuity benefit payable upon early retirement is not in the same form as an annuity benefit payable at normal retirement age, the greater benefit is determined by converting the annuity benefit payable upon early retirement age into the same form of annuity benefit as is payable at normal retirement age and by comparing the amount of the converted early retirement benefit payment with the amount of the normal retirement benefit payment.

(iii) In the case of a plan which is integrated with the Social Security Act or any other Federal or State law, the periodic benefit payable upon and after early retirement age is adjusted for any increases in such benefits occurring on or after early retirement age which are taken into account under the plan. See however, section 401(a)(15) and the regulations thereunder.

(3) *Benefits included.* For purposes of this paragraph, the normal retirement benefit under a plan shall be determined without regard to ancillary benefits not directly related to retirement benefits such as medical benefits or disability benefits not in excess of the qualified disability benefit; see section 411(a)(7) and paragraph (a)(1) of this section. For this purpose, a qualified disability benefit is a disability benefit which is not in excess of the amount of the benefit which would be payable to the participant if he separated from service at normal retirement age.

(4) *Early retirement benefit; social security supplement.* (i) For purposes of this paragraph, the early retirement benefit under a plan shall be determined without regard to any social security supplement.

(ii) For purposes of this subparagraph, a social security supplement is a benefit for plan participants which—

§ 1.411(a)-7

26 CFR Ch. I (4-1-08 Edition)

(A) Commences before the age and terminates before the age when participants are entitled to old-age insurance benefits, unreduced on account of age, under title II of the Social Security Act, as amended (see section 202 (a) and (g) of such Act), and

(B) Does not exceed such old-age insurance benefit.

(5) *Special limitation.* If a defined benefit plan bases its normal retirement benefits on employee compensation, the compensation must reflect the compensation which would have been paid for a full year of participation within the meaning of section 411(b)(3). If an employee works less than a full year of participation, the compensation used to determine benefits under the plan for such year of participation must be multiplied by the ratio of the number of hours for a complete year of participation to the number of hours worked in such year. A plan whose benefit formula is computed on a computation base which cannot decrease is not required to adjust employee compensation in the manner described in the previous sentence. Thus, for example, if a plan provided a benefit based on an employee's compensation for his highest five consecutive years or a separate benefit for each year of participation based on the employee's compensation for such year the plan would not have to so adjust compensation. However, if a plan provided a benefit based on an employee's compensation for the employee's last five years or the five highest consecutive years out of the last 10 years, the compensation, would have to be so adjusted. For special rules for applying the limitations on proration of a year of participation for benefit accrual, see regulations prescribed by the Secretary of Labor under 29 CFR Part 2530, relating to minimum standards for employee pension benefit plans.

(6) *Examples.* The provisions of this paragraph are illustrated by the following examples:

Example 1. Plan A provides for a benefit equal to 1% of high 5 years compensation for each year of service and a normal retirement age of 65. The plan also provides for a full unreduced accrued benefit without any actuarial reduction for any employee at age 55 with 30 years of service. Even though the actuarial value of the early retirement benefit could exceed the value of the benefit at the

normal retirement age, the normal retirement benefit would not include the greater value of the early retirement benefit because actuarial subsidies are ignored.

Example 2. Plan B provides the following benefits: (1) at normal retirement age 65, \$300/mo. for life and (2) at early retirement age 60, \$400/mo. for life. The normal retirement benefit is \$400/mo., the greater of the benefit payable at normal retirement age (\$300) or early retirement (\$400).

Example 3. Assume the same facts as example (2) except that the early retirement benefit of \$400 is reduced to \$300 upon attainment of age 65. If each employee's social security benefit at age 65 is not less than \$100, the \$100 would be considered to be a social security supplement and would therefore be ignored. Consequently, the normal retirement benefit would be \$300.

Example 4. Plan C provides a benefit at normal retirement age equal to 1% per year of service, multiplied by the participant's compensation averaged over the 5 years immediately prior to retirement. An early retirement benefit is provided upon attainment of age 60 equal to the benefit accrued to date of early retirement reduced by 4 percent for each year by which the early retirement date precedes the normal retirement age of 65. Employee A was hired at age 30, participated immediately, and retired at age 65. Employee A's annual compensation was \$50,000 between ages 55-60 and was reduced to \$33,000 after age 60. The following table indicates the amount of annual benefit that would have been provided by the plan formula if the employee retired at or after age 60:

Age	Final average computed	Percent accrued benefit	Reduction	Annual benefit
	(1)—	(2)—	(3)—	(4)—
60	\$50,000	30	0.80	*\$12,000
61	46,600	31	.84	12,135
62	43,200	32	.88	12,165
63	39,800	33	.92	12,083
64	36,400	34	.96	11,881
65	33,000	35	1.00	11,550

NOTE. Col. (1) times col. (2) times col. (3) equals col. (4).

The normal retirement benefit is the greater of the benefit payable at normal retirement age or the early retirement benefit. Employee A's normal retirement benefit is \$12,165, the greatest annual benefit Employee A would be entitled to.

(d) *Rules relating to certain distributions and cash-outs of accrued benefits—*

(1) *In general.* This paragraph sets forth vesting rules applicable to certain distributions from qualified plans and their related trusts (other than class year plans). Subparagraphs (2) and (3)

set forth the exceptions to nonforfeiture on account of withdrawal of mandatory contributions provided by section 411(a)(3)(D). When a plan utilizes these exceptions with respect to a given participant's accrued benefit, such accrued benefit is not subject to the cash-out rules or vesting rules of subparagraphs (4) or (5), respectively. Section 411 prescribes certain requirements with respect to accrued benefits under a qualified plan. These requirements would generally not be satisfied if the plan disregarded service in computing accrued benefits even though amounts were distributed on account of such service. Subparagraph (4) of this paragraph sets forth rules under section 411(a)(7)(B) which allow a plan to make distributions and compute accrued benefits without regard to the accrued benefit attributable to the distribution. When a defined contribution plan utilizes this exception with respect to an accrued benefit, the plan is not required to satisfy the rules of subparagraph (5) of this paragraph. Subparagraph (5) of this paragraph sets forth a vesting requirement applicable to certain distributions from defined contribution plans. Subparagraph (6) sets forth other rules which pertain to the distribution rules of this paragraph.

(2) *Withdrawal of mandatory contribution*—(i) *General rule*. In the case of a participant's right to his employer-derived accrued benefit, a right is not treated as forfeitable merely because all or a portion of such benefit may be forfeited on account of the withdrawal by the participant of any amount attributable to his accrued benefit derived from his mandatory contributions (within the meaning of section 411(c)(2)(C) and § 1.411(c)-1) before he has become a 50 percent vested participant (within the meaning of § 1.401(a)-19(b)(2)). For purposes of determining the vested percentage, the plan may disregard service after the withdrawal. For example, assume that a plan utilizes 1000 hours for computing years of service and that for the computation period employee A had 1000 hours of service. If A was 40 percent vested at the beginning of the period but only had 800 hours at the time of the withdrawal, the plan could treat A as only

40 percent vested because service after the withdrawal can be disregarded. On the other hand, if A had 1000 hours at the time of the withdrawal, he must receive a year of service for the computation period, even though service is not taken into account until the end of such period.

(ii) *Plan repayment provision*. (A) Subdivision (i) of this subparagraph shall not apply unless, at the time the amount described in such subdivision is withdrawn by the participant, the plan provides the employee with a right to restoration of his employer-derived accrued benefit to the extent forfeited in accordance with such subdivision upon repayment to the plan of the full amount of the withdrawal.

(B) In the case of a defined benefit plan (as defined in section 414(j)) the restoration of the employee's employer-derived accrued benefit may be conditioned upon repayment of interest on the full amount of the distribution. Such interest shall be computed on the amount of the distribution from the date of such distribution to the date of repayment, compounded annually from the date of distribution, at the rate determined under section 411(c)(2)(C) in effect on the date of repayment. A plan may provide for repayment of interest which is less than the amount determined under the preceding sentence.

(C) In the case of both defined benefit plans and defined contribution plans, the plan repayment provision described in this subparagraph may provide that the employee must repay the full amount of the distribution in order to have the forfeited benefit restored. The plan provision may not require that such repayment be made sooner than the time described in paragraph (d)(2)(ii)(D) of this section.

(D)(1) If a distribution is on account of separation from service, the time for repayment may not end before the earlier of—

(i) 5 years after the first day the employee is subsequently employed, or

(ii) The close of the first period of consecutive 1-year breaks in service commencing after the distribution.

If the distribution occurs for any other reason, the time for repayment may not end earlier than 5 years after the date of distribution. Nevertheless, a

§ 1.411(a)-7

26 CFR Ch. I (4-1-08 Edition)

plan provision may provide for a longer period in which the employee may repay. For example, a plan could allow repayments to be made at any time before normal retirement age.

(2) In the case of a plan utilizing the elapsed time method, described in § 1.410(a)-7, the minimum time for repayment shall be determined as in paragraph (d)(2)(ii)(D)(1) of this section except as provided in this subdivision. The 5 consecutive 1-year break periods shall be determined by substituting the term "1-year period of severance" for the term "1-year break in service". Also, the repayment period both commences and closes in a manner determined by the Commissioner that is consistent with the rules in § 1.410(a)-7 and the substitution in section 411(a)(6)(C) and (D) of a 5-year break-in-service rule for the former 1-year break-in-service rule.

(E) A defined benefit plan using the break-in-service rule described in section 410(a)(5)(D) or a defined contribution plan using the break-in-service rule described in section 411(a)(6)(C) for determining employees' accrued benefits is not required to provide for repayment by an employee whose accrued benefit is disregarded by reason of a plan provision using these rules.

(iii) *Computation of benefit.* In the case of a defined contribution plan, the employer-derived accrued benefit required to be restored by this subparagraph shall not be less than the amount in the account balance of the employee which was forfeited, unadjusted by any subsequent gains or losses.

(iv) *Delayed forfeiture.* A defined contribution plan may, in lieu of the forfeiture and restoration described in this subparagraph, provide that the forfeiture does not occur until the expiration of the time for repayment described in subdivision (ii) of this subparagraph provided that the conditions of this subparagraph are satisfied.

(3) *Withdrawal of mandatory contributions; accruals before September 2, 1974—*

(i) *General rule.* In the case of a participant's right to the portion of the employer-derived benefit which accrued prior to September 2, 1974, a right is not treated as forfeitable merely because all or part of such portion may

be forfeited on account of the withdrawal by the participant of an amount attributable to his benefit derived from mandatory contributions (within the meaning of section 411(c)(2)(C) and § 1.411(c)-1(c)(4)) made by the participant before September 2, 1974, if the amount so subject to forfeiture is no more than proportional to such amounts withdrawn. This subparagraph shall not apply to any plan to which any mandatory contribution (within the meaning of section 411(c)(2)(C) and § 1.411(c)-1(c)(4)) is made after September 2, 1974.

(ii) *Defined contribution plan.* In the case of a defined contribution plan, the portion of a participant's employer-derived benefit which accrued prior to September 2, 1974, shall be determined on the basis of a separate accounting between benefits accruing before and after such date. Gains, losses, withdrawals, forfeitures, and other credits or charges must be separately allocated to such benefits. Any allocation made on a reasonable and consistent basis prior to September 1, 1977, shall satisfy the requirements of this subdivision.

(iii) *Defined benefit plan.* In the case of a defined benefit plan, the portion of a participant's employer-derived benefit which accrued prior to September 2, 1974, shall be determined in a manner consistent with the determination of an accrued benefit under section 411(b)(1)(D) (see § 1.411(b)-1(c)). Any method of determining such accrued benefit which the Commissioner finds to be reasonable shall satisfy the requirements of this subdivision.

(4) *Certain cash-outs of accrued benefits—*(i) *Involuntary cash-outs.* For purposes of determining an employee's right to an accrued benefit derived from employer contributions under a plan, the plan may disregard service performed by the employee with respect to which—

(A) The employee receives a distribution of the present value of his entire nonforfeitable benefit at the time of the distribution;

(B) The requirements of section 411(a)(11) are satisfied at the time of the distribution;

Internal Revenue Service, Treasury

§ 1.411(a)-7

(C) The distribution is made due to the termination of the employee's participation in the plan; and

(D) The plan has a repayment provision which satisfies the requirements of paragraph (d)(4)(iv) of this section in effect at the time of the distribution.

(ii) *Voluntary cash-outs.* For purposes of determining an employee's accrued benefit derived from employer contributions under a plan, the plan may disregard service performed by the employee with respect to which—

(A) The employee receives a distribution of the present value of his nonforfeitable benefit attributable to such service at the time of such distribution,

(B) The employee voluntarily elects to receive such distribution,

(C) The distribution is made on termination of the employee's participation in the plan, and

(D) The plan has a repayment provision in effect at the time of the distribution which satisfies the requirements of subdivision (iv) of this subparagraph.

A distribution shall be deemed to be made on termination of participation in the plan if it is made not later than the close of the second plan year following the plan year in which such termination occurs. For purposes of determining the nonforfeitable benefit, the plan may disregard service after the distribution as illustrated in subparagraph (2)(i) of this subparagraph.

(iii) *Disregard of service.* Service of an employee permitted to be disregarded under subdivision (i) or (ii) of the subparagraph is not required to be taken into account in computing the employee's accrued benefit under the plan. In the case of a voluntary distribution described in subdivision (ii) of this subparagraph which is less than the present value of the employee's total nonforfeitable benefit immediately prior to the distribution, the accrued benefit not required to be taken into account is such total accrued benefit multiplied by a fraction, the numerator of which is the amount of the distribution and the denominator of which is the present value of his total nonforfeitable benefit immediately prior to such distribution. For example, A who is 50 percent vested in an ac-

count balance of \$1,000 receives a voluntary distribution of \$250. The accrued benefit which can be disregarded equals \$1,000 times \$250/\$500, or \$500. However, such service may not by reason of this paragraph be disregarded for purposes of determining an employee's years of service under sections 410(a)(3) and 411(a)(4).

(iv) *Plan repayment provision.* (A) A plan repayment provision satisfies the requirements of this subdivision if, under the provision, the accrued benefit of an employee that is disregarded by a plan under this subparagraph is restored upon repayment to the plan by the employee of the full amount of the distribution. An accrued benefit is not restored unless all of the optional forms of benefit and subsidies relating to such benefit are also restored. A plan is not required to provide for repayment of an accrued benefit unless the employee—

(1) Received a distribution that is in a plan year to which section 411 applies (see § 1.411(a)-2), which distribution is less than the amount of his accrued benefit determined under the same optional form of benefit as the distribution was made, and

(2) Resumes employment covered under the plan.

(B) *Example.* Plan A provides a single sum distribution equal to the present value of the normal form of the accrued benefit payable at normal retirement age which is a single life annuity. Plan A also provides a subsidized joint and survivor annuity and a subsidized early retirement annuity benefit. A participant who is fully vested and receives a single sum distribution equal to the present value of the single life annuity normal retirement benefit is not required to be provided the right under the plan to repay the distribution upon subsequent reemployment even though the participant received a distribution that did not reflect the value of the subsidy in the joint and survivor annuity or the value of the early retirement annuity subsidy. This is true whether or not the participant had satisfied at the time of the distribution all of the conditions necessary to receive the subsidies. However, if a participant does not receive

§ 1.411(a)-7

26 CFR Ch. I (4-1-08 Edition)

his total accrued benefit in the optional form of benefit under which his benefit was distributed, the plan must provide for repayment. If the employee repays the distribution in accordance with section 411(a)(7), the plan must restore the employee's accrued benefit which would include the right to receive the subsidized joint and survivor annuity and the subsidized early retirement annuity benefit.

(C) A plan may impose the same conditions on repayments for the restoration of employer-derived accrued benefits that are allowed as conditions for restoration of employer-derived accrued benefits upon repayment of mandatory contributions under paragraphs (d)(2)(ii) (B), (C), (D) and (E) of this section.

(v) In the case of a defined contribution plan, the employer-derived accrued benefit required to be restored by this subparagraph shall not be less than the amount in the account balance of the employee, both the amount distributed and the amount forfeited, unadjusted by any subsequent gains or losses. Thus, for example, if an employee received a distribution of \$250 when he was 25 percent vested in an account balance of \$1,000, upon repayment of \$250 the account balance may not be less than \$1,000 even if, because of plan losses, the account balance, if not distributed, would have been reduced to \$500.

(vi) For purposes of paragraph (d)(4)(i) of this section, a distribution shall be deemed to be made due to the termination of an employee's participation in the plan if it is made no later than the close of the second plan year following the plan year in which such termination occurs, or if such distribution would have been made under the plan by the close of such second plan year but for the fact that the present value of the nonforfeitable accrued benefit then exceeded the cash-out limit in effect under § 1.411(a)-11(c)(3)(ii). For purposes of determining the entire nonforfeitable benefit, the plan may disregard service after the distribution, as illustrated in paragraph (d)(2)(i) of this section.

(vii) *Effective date.* Paragraphs (d)(4)(i) and (vi) of this section apply to distributions made on or after March

22, 1999. However, an employer is permitted to apply paragraphs (d)(4)(i) and (vi) of this section to plan years beginning on or after August 6, 1997. Otherwise, for distributions prior to March 22, 1999, §§ 1.411(a)-7 and 1.411(a)-7T, in effect prior to October 17, 2000 (as contained in 26 CFR part 1, revised as of April 1, 2000) apply.

(5) *Vesting requirement for defined contribution plans—(i) Application.* The requirements of this subparagraph apply to a defined contribution plan which makes distributions to employees from their accounts attributable to employer contributions at a time when—

(A) Employees are less than 100 percent vested in such accounts, and

(B) Under the plan, employees can increase their percentage of vesting in such accounts after the distributions.

(ii) *Requirements.* In order for a plan, to which this subparagraph applies, to satisfy the vesting requirements of section 411, account balances under the plan (with respect to which percentage vesting can increase) must be computed in a manner which satisfies either subdivision (iii) (A) or (B) of this subparagraph.

(iii) *Permissible methods.* A plan may provide for either of the following methods, but not both, for computing account balances with respect to which percentage vesting can increase and from which distributions are made:

(A)(1) A separate account is established for the employee's interest in the plan as of the time of the distribution, and

(2) At any relevant time the employee's vested portion of the separate account is not less than an amount ("X") determined by the formula: $X = P(AB + (R \times D)) - (R \times D)$. For purposes of applying the formula: P is the vested percentage at the relevant time; AB is the account balance at the relevant time; D is the amount of the distribution; R is the ratio of the account balance at the relevant time to the account balance after distribution; and the relevant time is the time at which, under the plan, the vested percentage in the account cannot increase.

A plan is not required to provide for separate accounts provided that account balances are maintained under a

method that has the same effect as under this subdivision.

(B) At any relevant time the employee's vested portion is not less than an amount ("X") determined by the formula: $X = P(AB + D) - D$. For purposes of applying the formula, the terms have the same meaning as under subdivision (iii)(A)(2) of this subparagraph.

(C) An application of the methods described in subdivisions (iii) (A) and (B) of this subparagraph is illustrated by the following examples:

Example 1. The X defined contribution plan uses the method described in subdivision (iii)(A) of this subparagraph for computing account balances and the break in service rule described in section 411(a)(6)(C) (service after a 1-year break does not increase the vesting percentage in account balances accrued prior to the break). The plan distributes \$250 to A when A's account balance prior to the distribution equals \$1,000 and he is 25 percent vested. At the time of the distribution, A has not incurred a 1-year break so that his vesting percentage can increase. Six years later, when A is 60 percent vested, he incurs a 1-year break so that his vesting percentage cannot increase. At this time his separate account balance equals \$1,500. $R = \$1,500 / \$750$ or 2. A's separate account must equal 60 percent $(\$1,500 + (2 \times \$250)) - (2 \times \$250)$ or 60 percent $(\$1,500 + \$500) - \$500$, or \$1,200 - \$500 equals \$700.

Example 2. The Y defined contribution plan uses the method described in subdivision (iii)(B) of this subparagraph for computing account balances and the break in service rule described in section 411(a)(6)(C). The plan distributes \$250 to B when B's account balance prior to the distribution equals \$1,000 and he is 25 percent vested. At the time of the distribution, B has not incurred a 1-year break so that his vesting percentage can increase. Six years later, when A is 60 percent vested, he incurs a 1-year break so that his vesting percentage cannot increase. At this time his account balance equals \$1,500. B's separate account must equal 60 percent $(\$1,500 + \$250) - \$250$, 60% of $\$1,750 - \$250$ equals \$800.

(6) *Other rules*—(i) *Distributions on separation or other event.* None of the rules of this paragraph preclude distributions to employees upon separation from service or any other event recognized by the plan for commencing distributions. Such a distribution must, of course, satisfy the applicable qualification requirements pertaining to such distributions. For example, a profitsharing plan could pay the vested

portion of an account balance to an employee when he separated from service, but in order to satisfy section 411 the plan might not be able to forfeit the nonvested account balance until the employee has a 1-year break in service. Similarly, the fact that a plan cannot disregard an accrued benefit attributable to service for which an employee has received a distribution because the plan does not satisfy the cash-out requirements of subparagraph (4) of this paragraph does not mean that the employee's accrued benefit (computed by taking into account such service) cannot be offset by the accrued benefit attributable to the distribution.

(ii) *Joint and survivor requirements.* See § 1.401(a)-11(a)(2) (relating to joint and survivor annuities) for special rules applicable to certain distributions described in this paragraph.

(iii) *Plan repayments.* (A) Under subparagraphs (2) and (4) of this paragraph, a plan may be required to restore accrued benefits in the event of repayment by an employee.

(B) For purposes of applying the limitations of section 415 (c) and (e), in the case of a defined contribution plan, the repayment by the employee and the restoration by the employer shall not be treated as annual additions.

(C) In the case of a defined contribution plan, the permissible sources for restoration of the accrued benefit are: income or gain to the plan, forfeitures, or employer contributions. Notwithstanding the provisions of § 1.401-1(b)(1)(ii), contributions may be made for such an accrued benefit by a profit-sharing plan even though there are no profits. In order for such a plan to be qualified, account balances (accrued benefits) generally must correspond to assets in the plan. Accordingly, there cannot be an unfunded account balance. However, an account balance will not be deemed to be unfunded in the case of a restoration if assets for the restored benefit are provided by the

§ 1.411(a)-8

26 CFR Ch. I (4-1-08 Edition)

end of the plan year following the plan year in which the repayment occurs.

(Sec. 411 (88 Stat. 901; 26 U.S.C. 411))

[T.D. 7501, 42 FR 42329, Aug. 23, 1977, as amended by T.D. 8038, 50 FR 29374, July 19, 1985; T.D. 8219, 53 FR 31852, Aug. 22, 1988; 53 FR 48534, Dec. 1, 1988; T.D. 8794, 63 FR 70337, Dec. 21, 1998; T.D. 8891, 65 FR 44681, July 19, 2000]

§ 1.411(a)-8 Changes in vesting schedule.

(a) *Requirement of prior schedule.* Under section 411(a)(10)(A), for plan years for which section 411 applies, a plan will be treated as not meeting the minimum vesting standards of section 411(a)(2) if the plan does not satisfy the requirements of this paragraph. If the vesting schedule of a plan is amended, then as of the date such amendment is adopted, the plan satisfies the requirements of this paragraph if, under the plan as amended, in the case of an employee who is a participant on—

(1) The date the amendment is adopted, or

(2) The date the amendment is effective, if later.

The nonforfeitable percentage (determined as of such date) of such employee's right to his employer-derived accrued benefit is not less than his percentage computed under the plan without regard to such amendment.

(b) *Election of former schedule—(1) In general.* Under section 411 (a)(10)(B), for plan years for which section 411 applies, if the vesting schedule of a plan is amended, the plan will not be treated as meeting the minimum vesting standards of section 411 (a)(2) unless the plan as amended, provides that each participant whose nonforfeitable percentage of his accrued benefit derived from employer contributions is determined under such schedule, and who has completed at least 5 years of service with the employer, may elect, during the election period, to have the nonforfeitable percentage of his accrued benefit derived from employer contributions determined without regard to such amendment. Notwithstanding the preceding sentence, no election need be provided for any participant whose nonforfeitable percentage under the plan, as amended, at any time cannot be less than such percent-

age determined without regard to such amendment.

(2) *Election period.* For purposes of subparagraph (1) of this paragraph, the election period under the plan must begin no later than the date the plan amendment is adopted and end no earlier than the latest of the following dates:

(i) The date which is 60 days after the day the plan amendment is adopted,

(ii) The date which is 60 days after the day the plan amendment becomes effective, or

(iii) The date which is 60 days after the day the participant is issued written notice of the plan amendment by the employer or plan administrator.

(3) *Service requirement.* For purposes of subparagraph (1) of this paragraph, a participant shall be considered to have completed 5 years of service if such participant has completed 5 years of service, whether or not consecutive, without regard to the exceptions of section 411(a)(4) prior to the expiration of the election period described in subparagraph (2) of this paragraph. For the meaning of the term “year of service”, see regulations prescribed by the Secretary of Labor under 29 CFR Part 2530, relating to minimum standards for employee pension benefit plans.

(4) *Election only by participant.* The election described in subparagraph (1) of this paragraph is available only to an individual who is a participant in the plan at the time such election is made.

(5) *Election may be irrevocable.* A plan, as amended, shall not fail to meet the minimum vesting standards of section 411(a)(2) by reason of section 411(a)(10)(B) merely because such plan provides that the election described in subparagraph (1) of this paragraph is irrevocable.

(6) *Relationship with section 411(a)(2).* The election described in subparagraph (1) of this paragraph is available for a vesting schedule which does not satisfy the requirements of section 411(a)(2) only if under such schedule all participants have a 50 percent nonforfeitable right after 10 years of service, and a 100 percent nonforfeitable right after 15 years of service, in their employer-derived accrued benefit. If the vesting schedule provides less vesting than the

percentages required by the preceding sentence, the plan can be amended to provide for such vesting.

(c) *Special rules*—(1) *Amendment of vesting schedule*. For purposes of this section, an amendment of a vesting schedule is each plan amendment which directly or indirectly affects the computation of the nonforfeitable percentage of employees' rights to employer-derived accrued benefits. Consequently, such an amendment, for example, includes each change in the plan which affects either the plan's computation of years of service or of vesting percentages for years of service.

(2) *Aggregation of amendments*. All plan amendments which are: (i) amendments of a vesting schedule within the meaning of subparagraph (1) of this paragraph and (ii) adopted and effective at the same time, shall be deemed to be a single amendment for purposes of applying the rules in paragraphs (a) and (b) of this section.

(3) *Relationship with section 411(d)(6)*. For additional requirements relating to section 411(d)(6), see § 1.411(d)-3(a)(3).

(Sec. 411 (88 Stat. 901; 26 U.S.C. 411))

[T.D. 7501, 42 FR 42333, Aug. 23, 1977, as amended by T.D. 9280, 71 FR 45383, Aug. 9, 2006]

§ 1.411(a)-8T Changes in vesting schedule (temporary).

(a) [Reserved]

(b) *Election of former schedule*—(1) *In general*. Under section 411(a)(10)(B), for plan years for which section 411 applies, if the vesting schedule of a plan is amended, the plan will not be treated as meeting the minimum vesting standards of section 411(a)(2) unless the plan as amended provides that each participant whose nonforfeitable percentage of his accrued benefit derived from employer contributions is determined under such schedule, and who has completed at least 3 years of service with the employer, may elect, during the election period, to have the nonforfeitable percentage of his accrued benefit derived from employer contributions determined without regard to such amendment. Notwithstanding the preceding sentence, no election need be provided for any participant whose nonforfeitable percent-

age under the plan, as amended, at any time cannot be less than such percentage determined without regard to such amendment. For employees not described in § 1.411(a)-3T(e)(1), this section shall be applied by substituting "5 years of service" for "3 years of service" where such language appears.

(2) *Election period*. For purposes of subparagraph (1) of this paragraph, the election period under the plan must begin no later than the date the plan amendment is adopted and end no earlier than the latest of the following dates:

(i) The date which is 60 days after the day the plan amendment is adopted,

(ii) The date which is 60 days after the day the plan amendment becomes effective, or

(iii) The date which is 60 days after the day the participant is issued written notice of the plan amendment by the employer or plan administrator.

(3) *Service requirement*. For purposes of subparagraph (1) of this paragraph, a participant shall be considered to have completed 3 years of service if such participant has completed 3 years of service, whether or not consecutive, without regard to the exceptions of section 411(a)(4) prior to the expiration of the election period described in subparagraph (2) of this paragraph. For the meaning of the term "year of service", see regulations prescribed by the Secretary of Labor under 29 CFR Part 2530, relating to minimum standards for employee pension benefit plans.

[T.D. 8170, 53 FR 241, Jan. 6, 1988]

§ 1.411(a)-9 Amendment of break in service rules; transitional period.

(a) *In general*. Under section 1017(f)(2) of the Employee Retirement Income Security Act of 1974, a plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) if the rules of the plan relating to breaks in service are amended, and—

(1) Such amendment is effective after January 1, 1974, and before the effective date of section 411, and

(2) Under such amendment, the nonforfeitable percentage of any employee's right to his employer-derived accrued benefit is less than the lesser of the nonforfeitable percentage of such employee's right to such benefit—

(i) Under the break in service rules provided by section 411(a)(6) and § 1.411(a)-6(c), or

(ii) The greatest such percentage under the plan as in effect on or after January 1, 1974 (provided the break in service rules of the plan were not in violation of any law or rule of law on January 1, 1974).

(b) *Break in service rules.* For purposes of paragraph (a), the term “break in service rules” means the rules provided by a plan relating to circumstances under which a period of an employee’s service or plan participation is disregarded, for purposes of determining the extent to which his rights to his accrued benefit under the plan are unconditional, if under such rules such service is disregarded by reason of the employee’s failure to complete a required period of service within a specified period of time. For this purpose, plan rules which result in the loss of prior vesting or benefit accruals of an employee, or which deny an employee eligibility to participate, by reason of separation or failure to complete a required period of service within a specified period of time (e.g., 300 hours in one year) will be considered break in service rules. For purposes of section 411(b)(3), service described under the plan’s break in service rules, as in effect before the effective date of section 411, need not be counted.

(Sec. 411 (88 Stat. 901; 26 U.S.C. 411))

[T.D. 7501, 42 FR 42333, Aug. 23, 1977]

§ 1.411(a)-11 Restriction and valuation of distributions.

(a) *Scope—(1) In general.* Section 411(a)(11) restricts the ability of a plan to distribute any portion of a participant’s accrued benefit without the participant’s consent. Section 411(a)(11) also restricts the ability of defined benefit plans to distribute any portion of a participant’s accrued benefit in optional forms of benefit without complying with specified valuation rules for determining the amount of the distribution. If the consent requirements or the valuation rules of this section are not satisfied, the plan fails to satisfy the requirements of section 411(a).

(2) *Accrued benefit.* For purposes of this section, an accrued benefit is val-

ued taking into consideration the particular optional form in which the benefit is to be distributed. The value of an accrued benefit is the present value of the benefit in the distribution form determined under the plan. For example, a plan that provides a subsidized early retirement annuity benefit may specify that the optional single sum distribution form of benefit available at early retirement age is the present value of the subsidized early retirement annuity benefit. In this case, the subsidized early retirement annuity benefit must be used to apply the valuation requirements of this section and the resulting amount of the single sum distribution. However, if a plan that provides a subsidized early retirement annuity benefit specifies that the single sum distribution benefit available at early retirement age is the present value of the normal retirement annuity benefit, then the normal retirement annuity benefit is used to apply the valuation requirements of this section and the resulting amount of the single sum distribution available at early retirement age.

(b) *General consent rules.* A plan must satisfy the participant consent requirement with respect to the distribution of a participant’s nonforfeitable accrued benefit with a present value in excess of the cash-out limit in effect under paragraph (c)(3)(ii) of this section. See paragraphs (c) (3) and (4) for situations where no consent is required.

(c) *Consent, etc. requirements—(1) General rule.* If an accrued benefit is immediately distributable, section 411(a)(11) permits plans to provide for the distribution of any portion of a participant’s nonforfeitable accrued benefits only if the applicable consent requirements are satisfied.

(2) *Consent.* (i) No consent is valid unless the participant has received a general description of the material features of the optional forms of benefit available under the plan. In addition, so long as a benefit is immediately distributable, a participant must be informed of the right, if any, to defer receipt of the distribution. Furthermore, consent is not valid if a significant detriment is imposed under the plan on any participant who does not consent

to a distribution. Whether or not a significant detriment is imposed shall be determined by the Commissioner by examining the particular facts and circumstances.

(ii) Consent of the participant to the distribution must not be made before the participant receives the notice of his or her rights specified in this paragraph (c)(2) and must not be made more than 90 days before the date the distribution commences.

(iii) A plan must provide a participant with notice of the rights specified in this paragraph (c)(2) at a time that satisfies either paragraph (c)(2)(iii)(A) or (B) of this section:

(A) This paragraph (c)(2)(iii)(A) is satisfied if the plan provides a participant with notice of the rights specified in this paragraph (c)(2) no less than 30 days and no more than 90 days before the date the distribution commences. However, if the participant, after having received this notice, affirmatively elects a distribution, a plan will not fail to satisfy the consent requirement of section 411(a)(11) merely because the distribution commences less than 30 days after the notice was provided to the participant, provided the plan administrator clearly indicates to the participant that the participant has a right to at least 30 days to consider whether to consent to the distribution.

(B) This paragraph (c)(2)(iii)(B) is satisfied if the plan—

(1) Provides the participant with notice of the rights specified in this paragraph (c)(2);

(2) Provides the participant with a summary of the notice within the time period described in paragraph (c)(2)(iii)(A) of this section; and

(3) If the participant so requests after receiving the summary described in paragraph (c)(2)(iii)(B)(2) of this section, provides the notice to the participant without charge and no less than 30 days before the date the distribution commences, subject to the rules for the participant's waiver of that 30-day period. The summary described in paragraph (c)(2)(iii)(B)(2) of this section must advise the participant of the right, if any, to defer receipt of the distribution, must set forth a summary of the distribution options under the plan, must refer the participant to the

most recent version of the notice (and, in the case of a notice provided in any document containing information in addition to the notice, must identify that document and must provide a reasonable indication of where the notice may be found in that document, such as by index reference or by section heading), and must advise the participant that, upon request, a copy of the notice will be provided without charge.

(iv) For purposes of satisfying the requirements of this paragraph (c)(2), the plan administrator may substitute the annuity starting date, within the meaning of § 1.401(a)-20, Q&A-10, for the date the distribution commences.

(v) See § 1.401(a)-20, Q&A-24 for a special rule applicable to consents to plan loans.

(3) *Cash-out limit.* (i) Written consent of the participant is required before the commencement of the distribution of any portion of an accrued benefit if the present value of the nonforfeitable total accrued benefit is greater than the cash-out limit in effect under paragraph (c)(3)(ii) of this section on the date the distribution commences. The consent requirements are deemed satisfied if such value does not exceed the cash-out limit, and the plan may distribute such portion to the participant as a single sum. Present value for this purpose must be determined in the same manner as under section 417(e); see § 1.417(e)-1(d).

(ii) The cash-out limit in effect for a date is the amount described in section 411(a)(11)(A) for the plan year that includes that date. The cash-out limit in effect for dates in plan years beginning on or after August 6, 1997, is \$5,000. The cash-out limit in effect for dates in plan years beginning before August 6, 1997, is \$3,500.

(iii) *Effective date.* Paragraphs (c)(3)(i) and (ii) of this section apply to distributions made on or after October 17, 2000. However, an employer is permitted to apply the \$5,000 cash-out limit described in paragraph (c)(3)(ii) of this section to plan years beginning on or after August 6, 1997. Otherwise, for distributions prior to October 17, 2000, §§ 1.411(a)-11 and 1.411(a)-11T in effect prior to October 17, 2000 (as contained in 26 CFR Part 1 revised as of April 1, 2000) apply.

(4) *Immediately distributable.* Participant consent is required for any distribution while it is immediately distributable, *i.e.*, prior to the later of the time a participant has attained normal retirement age (as defined in section 411(a)(8)) or age 62. Once a distribution is no longer immediately distributable, a plan may distribute the benefit in the form of a QJSA in the case of a benefit subject to section 417 or in the normal form in other cases without consent.

(5) *Death of participant.* The consent requirements of section 411(a)(11) do not apply after the death of the participant.

(6) *QDROs.* The consent requirements of section 411(a)(11) do not apply to payments to an alternate payee, defined in section 414(p)(8), except as provided in a qualified domestic relations order pursuant to section 414(p).

(7) *Section 401(a)(9), etc.* The consent requirements of section 411(a)(11) do not apply to the extent that a distribution is required to satisfy the requirements of section 401(a)(9) or 415. See section 401(a)(9) and the regulations thereunder and § 1.401(a)-20 Q&A 23 for guidance on these requirements. Notwithstanding any provision to the contrary in section 401(a)(14) or § 1.401(a)-14, a plan may not distribute a participant's nonforfeitable accrued benefit with a present value in excess of the cash-out limit in effect under paragraph (c)(3)(ii) of this section while the benefit is immediately distributable unless the participant consents to such distribution. The failure of a participant to consent is deemed to be an election to defer commencement of payment of the benefit for purposes of section 401(a)(14) and § 1.401(a)-14.

(8) *Delegation to Commissioner.* The Commissioner, in revenue rulings, notices, and other guidance published in the Internal Revenue Bulletin, may modify, or provide additional guidance with respect to, the notice and consent requirements of this section. See § 601.601(d)(2)(ii)(b) of this chapter.

(d) *Distribution valuation requirements.* In determining the present value of any distribution of any accrued benefit from a defined benefit plan, the plan must take into account specified valuation rules. For this purpose, the valuation rules are the same valuation

rules for valuing distributions as set forth in section 417(e); see § 1.417(e)-1(d). This paragraph (d) applies both before and after the participant's death regardless of whether the accrued benefit is immediately distributable. This paragraph also applies whether or not the participant's consent is required under paragraphs (b) and (c) of this section.

(e) *Special rules—(1) Plan termination.* The requirements of this section apply before, on and after a plan termination. If a defined contribution plan terminates and the plan does not offer an annuity option (purchased from a commercial provider), then the plan may distribute a participant's accrued benefit without the participant's consent. The preceding sentence does not apply if the employer, or any entity within the same controlled group as the employer, maintains another defined contribution plan, other than an employee stock ownership plan (as defined in section 4975(e)(7)). In such a case, the participant's accrued benefit may be transferred without the participant's consent to the other plan if the participant does not consent to an immediate distribution from the terminating plan. See section 411(d)(6) and the regulations thereunder for other rules applicable to transferee plans and plan terminations.

(2) *ESOP dividends.* The requirements of this section do not apply to any distribution of dividends to which section 404(k) applies.

(3) *Other rules.* See § 1.401(a)-20 Q&As 14, 17 and 24 for other rules that apply to the section 411(a)(11) requirements.

(f) *Medium for notice and consent—(1) Notice.* The notice of a participant's rights described in paragraph (c)(2) of this section or the summary of that notice described in paragraph (c)(2)(iii)(B)(2) of this section must be provided on a written paper document. However, see § 1.401(a)-21 of this chapter for rules permitting the use of electronic media to provide applicable notices to recipients with respect to retirement plans.

(2) *Consent.* The consent described in paragraphs (c)(2) and (3) of this section must be given on a written paper document. However, see § 1.401(a)-21 of this chapter for rules permitting the use of

Internal Revenue Service, Treasury

§ 1.411(b)-1

electronic media to make participant elections with respect to retirement plans.

[T.D. 8219, 53 FR 31853, Aug. 22, 1988; 53 FR 48534, Dec. 1, 1988, as amended by T.D. 8620, 60 FR 49221, Sept. 22, 1995; T.D. 8796, 63 FR 70011, Dec. 18, 1998; T.D. 8794, 63 FR 70338, Dec. 21, 1998; T.D. 8873, 65 FR 6006, Feb. 8, 2000; T.D. 8891, 65 FR 44681, 44682, July 19, 2000; T.D. 9294, 71 FR 61887, Oct. 20, 2006]

§ 1.411(b)-1 Accrued benefit requirements.

(a) *Accrued benefit requirements*—(1) *In general.* Under section 411(b), for plan years beginning after the applicable effective date of section 411, rules are provided for the determination of the accrued benefit to which a participant is entitled under a plan. Under a defined contribution plan, a participant's accrued benefit is the balance to the credit of the participant's account. Under a defined benefit plan, a participant's accrued benefit is his accrued benefit determined under the plan. A defined benefit plan is not a qualified plan unless the method provided by the plan for determining accrued benefits satisfies at least one of the alternative methods (described in paragraph (b) of this section) for determining accrued benefits with respect to all active participants under the plan. A defined benefit plan may provide that accrued benefits for participants are determined under more than one plan formula. In such a case, the accrued benefits under all such formulas must be aggregated in order to determine whether or not the accrued benefits under the plan for participants satisfy one of the alternative methods. A plan may satisfy different methods with respect to different classifications of employees, or separately satisfy one method with respect to the accrued benefits for each such classification, provided that such classifications are not so structured as to evade the accrued benefit requirements of section 411(b) and this section. (For example, if a plan provides that employees who commence participation at or before age 40 accrue benefits in a manner which satisfies the 133⅓ percent method of determining accrued benefits and employees who commence participation after age 40 accrue benefits in a manner which sat-

isfies the 3 percent method of determining accrued benefits, the plan would be so structured as to evade the requirements of section 411(b).) A defined benefit plan does not satisfy the requirements of section 411(b) and this section merely because the accrued benefit is defined as the "reserve under the plan". Special rules are provided for the first two years of service by a participant, certain insured defined benefit plans, and certain reductions in accrued benefits due to increasing age or service. In addition, a special rule is provided with respect to accruals for service before the effective date of section 411.

(2) *Cross references*—(i) *3 percent method.* For rules relating to the 3 percent method of determining accrued benefits, see paragraph (b)(1) of this section.

(ii) *133⅓ percent method.* For rules relating to the 133⅓ percent method of determining accrued benefits, see paragraph (b)(2) of this section.

(iii) *Fractional method.* For rules relating to the fractional method of determining accrued benefits, see paragraph (b)(3) of this section.

(iv) *Accruals before effective date.* For rules relating to accruals for service before the effective date of section 411, see paragraph (c) of this section.

(v) *First 2 years of service.* For special rules relating to determination of accrued benefit for first 2 continuous years of service, see paragraph (d)(1) of this section.

(vi) *Certain insured plans.* For special rules relating to determination of accrued benefit under a defined benefit plan funded exclusively by insurance contracts, see paragraph (d)(2) of this section.

(vii) *Accruals decreased by increasing age or service.* For special rules relating to prohibition of decrease in accrued benefit on account of increasing age or service, see paragraph (d)(3) of this section.

(viii) *Separate accounting.* For rules relating to requirements for separate accounting, see paragraph (e) of this section.

(ix) *Year of participation.* For definition of "year of participation", see paragraph (f) of this section.

(b) *Defined benefit plans.* A defined benefit plan satisfies the requirements

§ 1.411(b)-1

26 CFR Ch. I (4-1-08 Edition)

of section 411(b)(1) and this paragraph for a plan year to which section 411 and this section apply if it satisfies the requirements of subparagraph (1), (2), or (3) of this paragraph for such year.

(1) *3 percent method*—(i) *General rule.* A defined benefit plan satisfies the requirements of this paragraph for a plan year if, as of the close of the plan year, the accrued benefit to which each participant is entitled, computed as if the participant separated from the service as of the close of such plan year, is not less than 3 percent of the 3 percent method benefit, multiplied by the number of years (not in excess of $33\frac{1}{3}$) of his participation in the plan including years after his normal retirement age. For purposes of this subparagraph, the “3 percent method benefit” is the normal retirement benefit to which the participant would be entitled if he commenced participation at the earliest possible entry age for any individual who is or could be a participant under the plan and if he served continuously until the earlier of age 65 or the normal retirement age under the plan.

(ii) *Special rules*—(A) *Compensation.* In the case of a plan providing a retirement benefit based upon compensation during any period, the normal retirement benefit to which a participant would be entitled is determined as if he continued to earn annually the average rate of compensation which he earned during consecutive years of service, not in excess of 10, for which his compensation was the highest. For purposes of this subdivision (A), the number of consecutive years of service used in computing average compensation shall be the number of years of service specified under the plan (not in excess of 10) for computing normal retirement benefits.

(B) *Social security, etc.* For purposes of this subparagraph, for any plan year, social security benefits and all relevant factors used to compute benefits, e.g., consumer price index, are treated as remaining constant as of the beginning of the current plan year for all subsequent plan years.

(C) *Computation in certain cases.* In the case of any plan to which the provisions of section 411(b)(1)(D) and paragraph (c) of this section are applicable, for any plan year the accrued benefit of

any participant shall not be less than the accrued benefit otherwise determined under this subparagraph, reduced by the excess of the accrued benefit determined under this subparagraph as of the first day of the first plan year to which section 411 applies over the accrued benefit determined under section 411(b)(1)(D) and paragraph (c) of this section and increased by the amount determined under paragraph (c)(2)(v) of this section.

(iii) *Examples.* The application of this subparagraph is illustrated by the following examples.

Example 1. The M Corporation’s defined benefit plan provides an annual retirement benefit commencing at age 65 or \$4 per month for each year of participation. As a condition of participation, the plan requires that an employee have attained age 25. The normal retirement age specified under the plan is age 65. The plan provides for no limit on the number of years of credited service. A, age 40, is a participant in the M Corporation’s plan.

A has completed 12 years of participation in the plan of the M Corporation as of the close of the plan year. Under subdivision (i) of this subparagraph, the normal retirement benefit commencing at age 65 to which a participant would be entitled if he commenced participation at the earliest possible entry age (25) under the plan and served continuously until normal retirement age (65) is an annual benefit of \$1,920 [$40 \times (12 \times \$4)$]. Under paragraph (b)(1)(i) of this section, the plan does not satisfy the requirements of this subparagraph unless A has accrued an annual benefit of at least \$691 [$0.03 \times (\$1,920 \times 12)$] as of the close of the plan year. Under the M Corporation plan, A is entitled to an accrued benefit of \$576 [$(12 \times 12) \times \$4$] as of the close of the plan year. Thus, with respect to A, the accrued benefit provided under the M Corporation plan does not satisfy the requirements of this subparagraph.

Example 2. Assume the same facts as in example (1) except that the M Corporation’s plan provides that only the first 30 years of participation are taken into account. Under subdivision (i) of this subparagraph, the normal retirement benefit commencing at age 65 to which a participant would be entitled if he commenced participation at the earliest possible entry age under the plan (25) and served continuously until normal retirement age (65) is an annual benefit of \$1,440 [$30 \times \$48$]. Under paragraph (b)(1)(i) of this section, the plan does not satisfy the requirements of this subparagraph unless A has accrued an annual benefit of at least \$518 [$0.03 \times (\$1,440 \times 12)$] as of the close of the plan

year. Under the M Corporation plan, A is entitled to an accrued benefit of \$576 $[(12 \times \$48)]$. Thus, with respect to A, the accrued benefit provided under the M Corporation plan satisfies the requirements of this subparagraph.

Example 3. The N Corporation's defined benefit plan provides an annual retirement benefit commencing at age 65 of 50 percent of average compensation for the highest 3 consecutive years of compensation for an employee with 25 years of participation. A participant who separates from service before age 65 is entitled to 2 percent of average compensation for the highest 3 consecutive years of compensation for each year of participation not in excess of 25. The plan has no minimum age or service requirement for participation. The normal retirement age specified under the plan is age 65. On December 31, 1990, B, age 40, is a participant in the N Corporation's plan. B began employment with the N Corporation and became a participant in the N Corporation's plan on January 1, 1980. Under this subparagraph, the normal retirement benefit to which a participant would be entitled if he commenced participation at the earliest possible entry age (0) under the plan and served continuously until normal retirement age (65) is 50 percent of average compensation for the highest 3 consecutive years of compensation per year commencing at age 65. Under this subparagraph, B must have accrued an annual benefit of at least 16.5 percent of his highest 3 consecutive years of compensation per year commencing at age 65 $[0.03 \times 50 \text{ percent of average compensation for the highest 3 consecutive years of compensation} \times 11]$ as of the close of the plan year. Under the N Corporation plan, B has accrued an annual benefit of 22 percent of average compensation for his highest 3 consecutive years of compensation per year commencing at age 65. Thus, with respect to B, the accrued benefit under the N Corporation plan satisfies the requirements of this subparagraph.

Example 4. The P Corporation's defined benefit plan provides an annual retirement benefit commencing at age 65 of 50 percent of average compensation for the 3 consecutive years of compensation from the P Corporation next preceding normal retirement age. The plan has no minimum age or service requirement for participation. The normal retirement age under the plan is age 65. On December 31, 1990, C, age 55, separates from service with the P Corporation. C began employment with the P Corporation and became a participant in the P Corporation's plan on January 1, 1980. As of December 31, 1990, C's average compensation for the 3 consecutive years preceding his separation from service is \$15,000. Under this subparagraph, the normal retirement benefit to which a participant would be entitled if he commenced participation at the earliest possible entry age (0) under the plan and served con-

tinuously until normal retirement age (65) is an annual benefit of 50 percent of average compensation for the 3 consecutive years of compensation from the P Corporation next preceding normal retirement age commencing at age 65. C must have accrued an annual benefit of at least \$2,475 commencing at age 65 $[0.03 \times (0.050 \times \$15,000) \times 11]$ as of his separation from the service with the P Corporation in order for the P Corporation's plan to satisfy the requirements of this subparagraph with respect to C.

Example 5. On December 31, 1985, the R Corporation's defined benefit plan provided an annual retirement benefit commencing at age 65 of \$100 for each year of participation, not to exceed 30. As a condition of participation, the plan requires that an employee have attained age 25. The normal retirement age specified under the plan is age 65. The appropriate computation period is the calendar year. On January 1, 1986, the plan is amended to provide an annual retirement benefit commencing at age 65 of \$200 for each year of participation (before and after the amendment), not to exceed 30. B, age 40, is a participant in the R Corporation's plan. B has completed 15 years of participation in the plan of the R Corporation as of December 31, 1990. Under paragraph (b)(1)(i) of this section, the normal retirement benefit commencing at age 65 to which a participant would be entitled if he commenced participation at the earliest possible entry age (25) under the plan and served continuously until normal retirement age (65) is an annual benefit of \$6,000 $[30 \times \$200]$. Under subdivision (i) of this subparagraph, the plan does not satisfy the requirements of this subparagraph unless B has accrued an annual benefit of at least \$2,700 $[0.03 \times \$6,000 \times 15]$ as of December 31, 1990. Under the R Corporation plan, B is entitled to an accrued benefit of \$3,000 $[\$200 \times 15]$ as of December 31, 1990. Thus, with respect to B, the accrued benefit provided under the R Corporation plan satisfies the requirements of this subparagraph.

Example 6. On December 31, 1995, the J Corporation's defined benefit plan provided an annual retirement benefit commencing at age 65 of \$4,800 after 30 years of participation. The normal retirement age specified under the plan is age 65. The appropriate computation period is the calendar year. On January 1, 1996, the plan is amended to provide an annual retirement benefit commencing at age 65 of \$6,000. A, age 40, is a participant in the J Corporation's plan since its adoption on January 1, 1986. Under paragraph (b)(1)(i) of this section, on December 31, 1995, the normal retirement benefit commencing at age 65 to which a participant would be entitled if he commenced participation at the earliest possible entry age (0) under the plan and served continuously until normal retirement age (65) is an annual benefit of \$4,800. Under paragraph (b)(1)(i) of this

§ 1.411(b)-1

26 CFR Ch. I (4-1-08 Edition)

section, on January 1, 1996, the normal retirement benefit commencing at age 65 to which a participant would be entitled if he commenced participation at the earliest possible entry age (0) under the plan and served continuously until normal retirement age (65) is an annual benefit of \$6,000. Under subdivision (i) of this subparagraph, the plan does not satisfy the requirements of this subparagraph unless A has an accrued benefit on December 31, 1995 of at least \$1,440 [$\$4,800 \times 0.02 \times 10$] and an accrued benefit on January 1, 1996 of at least \$1,800 [$\$6,000 \times 0.03 \times 10$].

Example 7. The X Company's defined benefit plan provides an annual retirement benefit commencing at age 65 of \$4 per month for each year of participation (not to exceed 30). As a condition of participation, the plan requires that an employee have attained age 25. The normal retirement age specified under the plan is age 65. D, age 68, is a participant in the X Company's plan. D has completed 20 years of participation in the X Company plan as of the close of the plan year. Under paragraph (b)(1)(i) of this section, the normal retirement benefit commencing at age 65 to which a participant would be entitled if he commenced participation at the earliest possible entry age (25) under the plan and served continuously until normal retirement age (65) is an annual benefit, commencing at age 65, of \$1,440 [$30 \times \$48$]. Under paragraph (b)(1)(i) of this section, the plan does not satisfy the requirements of this subparagraph unless D has accrued an annual benefit, commencing at age 65, of \$864 [$0.03 \times \$1,440 \times 20$] as of the close of the plan year. Under the X Company plan, D has accrued an annual benefit, commencing at age 65, of \$960 [$20 \times \$48$]. Thus, with respect to D the accrued benefit provided under the X Company plan satisfies the requirements of this subparagraph.

Example 8. Assume the same facts as in example (7) except that for purposes of determining accrued benefits under the plan the X Company's plan disregards all years of participation after normal retirement age. Under paragraph (b)(1)(i) of this section, the normal retirement benefit commencing at age 65 to which a participant would be entitled if he commenced participation at the earliest possible entry age (25) under the plan and served continuously until normal retirement age (65) is an annual benefit of \$1,440 [$30 \times \$48$]. Under paragraph (b)(1)(i) of this section the plan does not satisfy the requirements of this subparagraph unless D has accrued an annual benefit, commencing at age 65, of \$864 [$0.03 \times \$1,440 \times 20$] as of the close of the plan year. Under the X Company's plan D has accrued an annual benefit commencing at age 65, of \$816 [$17 \times \$48$]. Thus, with respect to D, the accrued benefit provided under the X Company plan does not

satisfy the requirements of this subparagraph.

(2) *133⅓ percent rule*—(i) *General rule.* A defined benefit plan satisfies the requirements of this subparagraph for a particular plan year if—

(A) Under the plan the accrued benefit payable at the normal retirement age (determined under the plan) is equal to the normal retirement benefit (determined under the plan), and

(B) The annual rate at which any individual who is or could be a participant can accrue the retirement benefits payable at normal retirement age under the plan for any later plan year cannot be more than 133⅓ percent of the annual rate at which he can accrue benefits for any plan year beginning on or after such particular plan year and before such later plan year.

(ii) *Special rules.* For purposes of this subparagraph—

(A) *Plan amendments.* Any amendment to the plan which is in effect for the current plan year shall be treated as if it were in effect for all other plan years.

(B) *Change in accrual rate.* Any change in an accrual rate which change does not apply to any individual who is or could be a participant in the plan year is disregarded. Thus, for example, if for its plan year beginning January 1, 1980, a defined benefit plan provides an accrued benefit in plan year 1980 of 2 percent of a participant's average compensation for his highest 3 years of compensation for each year of service and provides that in plan year 1981 the accrued benefit will be 3 percent of such average compensation, the plan will not be treated as failing to satisfy the requirements of this subparagraph for plan year 1980 because in plan year 1980 the change in the accrual rate does not apply to any individual who is or could be a participant in plan year 1980. However, if, for example, a defined benefit plan provided for an accrued benefit of 1 percent of a participant's average compensation for his highest 3 years of compensation for each of the first 10 years of service and 1.5 percent of such average compensations for each year of service thereafter, the plan will be treated as failing to satisfy the requirements of this subparagraph for

the plan year even though no participant is actually accruing at the 1.5 percent rate because an individual who could be a participant and who had over 10 years of service would accrue at the 1.5 percent rate, which rate exceeds 133⅓ percent of the 1 percent rate.

(C) *Early retirement benefits.* The fact that certain benefits under the plan may be payable to certain participants before normal retirement age is disregarded. Thus, the requirements of subdivision (i) of this subparagraph must be satisfied without regard to any benefit payable prior to the normal retirement benefit (such as an early retirement benefit which is not the normal retirement benefit (see § 1.411(a)-7(c)).

(D) *Social security, etc.* For purposes of this paragraph, for any plan year, social security benefits and all relevant factors used to compute benefits, e.g., consumer price index, are treated as remaining constant as of the beginning of the current plan year for all subsequent plan years.

(E) *Postponed retirement.* A plan shall not be treated as failing to satisfy the requirements of this subparagraph for a plan year merely because no benefits under the plan accrue to a participant who continues service with the employer after such participant has attained normal retirement age.

(F) *Computation of benefit.* A plan shall not satisfy the requirements of this subparagraph if the base for the computation of retirement benefits changes solely by reason of an increase in the number of years of participation. Thus, for example, a plan will not satisfy the requirements of this subparagraph if it provides a benefit, commencing at normal retirement age, of the sum of (1) 1 percent of average compensation for a participant's first 3 years of participation multiplied by his first 10 years of participation (or, if less than 10 his total years of participation) and (2) 1 percent of average compensation for a participant's 3 highest years of participation multiplied by each year of participation subsequent to the 10th year.

(iii) *Examples.* The application of this subparagraph is illustrated by the following examples:

Example 1. On January 1, 1980, the R Corporation's defined benefit plan provides for an annual benefit (commencing at age 65) of a percentage of a participant's average compensation for the period of 5 consecutive years of participation for which his compensation is the highest. The percentage is 2 percent for each of the first 20 years of participation and 1 percent per year thereafter. The appropriate computation period is the calendar year. The R Corporation's plan satisfies the requirements of this subparagraph because the 133⅓ percent rule does not restrict subsequent accrual rate decreases.

Example 2. On January 1, 1980, the J Corporation's defined benefit plan provides for an annual benefit (commencing at age 65) of a percentage of a participant's average compensation for the period of his final 5 consecutive years of participation. The percentage is 1 percent for each of the first 5 years of participation; 1⅓ percent for each of the next 5 years of participation; and 1⅞ percent for each year thereafter. The appropriate computation period is the calendar year. Even though no single accrual rate under the J Corporation's plan exceeds 133⅓ percent of the immediately preceding accrual rate, the J Corporation's plan does not satisfy the requirements of this subparagraph because the rate of accrual for all years of participation in excess of 10 (1⅞ percent) exceeds 133⅓ percent of the rate of accrual for any of the first 5 years of participation (1 percent).

Example 3. On January 1, 1980, the C Corporation's defined benefit plan provides for an annual benefit (commencing at age 65) of a percentage of a participant's average compensation for the period of 3 consecutive years of participation for which his compensation is the highest. The percentage is 2 percent for each of the first 5 years of participation; 1 percent for each of the next 5 years of participation; and 1½ percent for each year thereafter. The appropriate computation period is the calendar year. Even though the average rate of accrual under the C Corporation's plan is not less rapidly than ratably, the C Corporation's plan does not satisfy the requirements of this subparagraph because the rate of accrual for all years of participation in excess of 10 (1½ percent) for any employee who is actually accruing benefits or who could accrue benefits exceeds 133⅓ percent of the rate of accrual for the sixth through tenth years of participation, respectively (1 percent).

(3) *Fractional rule—(i) In general.* A defined benefit plan satisfies the requirements of this paragraph if the accrued benefit to which any participant is entitled is not less than the fractional rule benefit multiplied by a fraction (not exceeding 1)—

§ 1.411(b)-1

26 CFR Ch. I (4-1-08 Edition)

(A) The numerator of which is his total number of years of participation in the plan, and

(B) The denominator of which is the total number of years he would have participated in the plan if he separated from the service at the normal retirement age under the plan.

(ii) *Special rules.* For purposes of this subparagraph—

(A) *Fractional rule benefit.* The “fractional rule benefit” is the annual benefit commencing at the normal retirement age under the plan to which a participant would be entitled if he continued to earn annually until such normal retirement age the same rate of compensation upon which his normal retirement benefit would be computed. Such rate of compensation shall be computed on the basis of compensation taken into account under the plan (but taking into account average compensation for no more than the 10 years of service immediately preceding the determination). For purposes of this subdivision (A), the normal retirement benefit shall be determined as if the participant had attained normal retirement age on the date any such determination is made.

(B) *Social security, etc.* For purposes of this subparagraph, for any plan year, social security benefits and all relevant factors used to compute benefits, e.g., consumer price index, are treated as remaining constant as of the beginning of the current plan year for all subsequent plan years.

(C) *Postponed retirement.* A plan shall not be treated as failing to satisfy the requirements of this subparagraph merely because no benefits under the plan accrue to a participant who continues service with the employer after such participant has attained normal retirement age under the plan.

(D) *Computation in certain cases.* In the case of any plan to which the provisions of section 411(b)(1)(D) and paragraph (c) of this section are applicable, for any plan year the accrued benefit of any participant shall not be less than the accrued benefit otherwise determined under this subparagraph, reduced by the excess of the accrued benefit determined under this subparagraph as of the first day of the first plan year to which section 411 applies

over the accrued benefit determined under section 411(b)(1)(D) and paragraph (c) of this section and increased by the amount determined under paragraph (c)(2)(v) of this section.

(iii) *Examples.* The application of this subparagraph is illustrated by the following examples:

Example 1. The R Corporation’s defined benefit plan provides an annual retirement benefit commencing at age 65 of 30 percent of a participant’s average compensation for his highest 3 consecutive years of participation. If a participant separates from service prior to normal retirement age, the R Corporation’s plan provides a benefit equal to an amount which bears the same ratio to 30 percent of such average compensation as the participant’s actual number of years of participation in the plan bears to the number of years the participant would have participated in the plan had he separated from service at age 65. The plan further provides that normal retirement age is age 65. A, age 55, is a participant in the R Corporation’s plan for the current year, and A has 15 years of participation in the R Corporation’s plan. As of the current year, A’s average compensation for his highest 3 years of compensation is \$20,000. The R Corporation’s plan satisfies the requirements of this subparagraph because if A separates from the service in the current year he will be entitled to an annual benefit of \$3,600 commencing at age 65 [$0.3 \times \$20,000 \times 15/25$].

Example 2. The J Corporation’s defined benefit plan provides a normal retirement benefit of 1 percent per year of a participant’s average compensation from the employer. In the case of a participant who separates from service prior to normal retirement age (65), the plan provides that the annual benefit is an amount which is equal to 1 percent of such compensation multiplied by the number of years of plan participation actually completed by the participant. The plan year of the J Corporation’s plan is the calendar year. B, age 55, is a participant in the J Corporation’s plan for the current year. B became a participant in the J Corporation’s plan on January 1, 1980. As of December 31, 1990, B’s compensation history is as follows:

Year	Compensation
1980	\$17,000
1981	18,000
1982	20,000
1983	20,000
1984	21,000
1985	22,000
1986	23,000
1987	25,000
1988	26,000
1989	29,000
1990	32,000

If B separates from service on December 31, 1990, he would be entitled to an annual benefit of \$2,530 commencing at age 65. Because the J Corporation's plan does not limit the number of years of compensation to be taken into account in determining the normal retirement benefit, B's rate of compensation for purposes of determining his normal retirement benefit is \$23,600 [$\$18,000 + \$20,000 + \$20,000 + \$21,000 + \$22,000 + \$23,000 + \$25,000 + \$26,000 + \$29,000 + \$32,000$]/10.

Under this subparagraph, B's accrued benefit under the J Corporation's plan as of December 31, 1990 must be not less than \$2,561 per year commencing at age 65 [$0.01 \times (\$17,000 + \$18,000 + \$20,000 + \$20,000 + \$21,000 + \$22,000 + \$23,000 + \$25,000 + \$26,000 + \$29,000 + \$32,000 + (\$23,600 \times 10)) \times 11/21$]. Thus, the J Corporation's plan would not satisfy the requirements of this subparagraph.

(c) *Accruals for service before effective date*—(1) *General rule.* For a plan year to which section 411 applies, a defined benefit plan does not satisfy the requirements of section 411(b)(1) and this section unless, under the plan, the accrued benefit of each participant for plan years beginning before section 411 applies is not less than the greater of—

(i) Such participant's accrued benefit (as of the day before section 411 applies) determined under the plan as in effect from time to time prior to September 2, 1974 (without regard to any amendment adopted after such date), or

(ii) One-half of the accrued benefit that would be determined with respect to the participant as of the day before section 411 applies if the participant's accrued benefit were computed for such prior plan years under a method which satisfies the requirements of section 411(b)(1) (A), (B), or (C) and paragraph (b) (1), (2), or (3) of this section. See 29 CFR Part 2530, Department of Labor regulations relating to minimum standards for employee pension benefit plans, for time participation deemed to begin.

(2) *Special rules*—(i) A plan shall not be deemed to fail to satisfy the requirements of section 411(b) and this section merely because the method for computing the accrued benefit of a participant for years of participation prior to the first plan year for which section 411 is effective with respect to the plan is not the same method for computing the accrued benefit of a participant for

years of participation subsequent to such plan year.

(ii) For purposes of paragraph (c)(1)(ii) of this section, section 411(b)(1)(A) and paragraph (b)(1) of this section shall be applied as if the participant separated from service with the employer on the day before the first day of the first plan year to which section 411 applies.

(iii) For purposes of paragraph (c)(1)(ii) of this section, section 411(b)(1)(B) and paragraph (b)(2) of this section shall be applied in the following manner:

(A) Except as provided in (c)(2)(iii)(B) of this section, section 411(b)(1)(B) and paragraph (b)(2) of this section shall be applied as if the participant separated from service with the employer on the day before the first day of the first plan year to which section 411 applies.

(B) In the case that the plan does not satisfy the requirements of section 411(b)(1)(B) and paragraph (b)(2) of this section at any time prior to the day specified in (c)(2)(iii)(A) of this section, the plan shall be deemed revised to the extent necessary to satisfy the requirements of section 411(b)(1)(B) and paragraph (b)(2) of this section for all plan years beginning before the applicable effective date of section 411 and this section. For purposes of the preceding sentence, a plan shall not be deemed revised to the extent necessary to satisfy the requirements of section 411(b)(1)(B) and paragraph (b)(2) of this section for a plan year if the benefit a participant would receive if he were employed until normal retirement age is reduced by such revision or if the revised rate of accrual with respect to such accrued benefit does not otherwise satisfy the requirements of section 411(b)(1)(B) and paragraph (b)(2) of this section.

(iv) For purposes of paragraph (c)(1)(ii) of this section, section 411(b)(1)(C) and paragraph (b)(3) of this section shall be applied as if the participant separated from service on the day before the first day of the first plan year to which section 411 applies.

(v) The excess of the accrued benefit payable at normal retirement age of any participant determined under section 411(b)(1) (A), (B), or (C) (without regard to section 411(b)(1)(D)), and

§ 1.411(b)-1

26 CFR Ch. I (4-1-08 Edition)

paragraph (b)(1), (2), or (3) of this section (without regard to this paragraph) as of the day before the first day of the first plan year to which section 411 and this section applies over the accrued benefit determined under paragraph (c)(1) of this section shall be accrued in accordance with the provisions of the plan as in effect after the applicable effective date of section 411, as if the plan had been initially adopted on such effective date.

(d) *Special rules*—(1) *First 2 years of service*. Notwithstanding paragraphs (1), (2), and (3) of paragraph (b) of this section, under section 411(b)(1)(E) and this subparagraph, a plan shall not be treated as failing to satisfy the requirements of paragraph (b) of this section solely because the accrual of benefits under the plan does not become effective until the employee has completed 2 continuous years of service. For purposes of this subparagraph, continuous years of service are years of service (within the meaning of section 410(a)(3)(A)) which are not separated by a break in service (within the meaning of section 410(a)(5)). For years of service beginning after such 2 years of service, the accrued benefit of an employee shall not be less than that to which the employee would be entitled if section 411(b)(1)(E) and this subparagraph did not apply. Thus, for example, a plan which otherwise satisfies the requirements of paragraph (b)(2) of this section provides for a rate of accrual of 1 percent of average compensation for the highest 3 years of compensation beginning with the third year of service of a participant shall not be treated as satisfying paragraph (b)(2) of this section because as of the time the employee completes 3 continuous years of service there is no accrual during the first 2 years of service. In addition, a plan which otherwise satisfies the requirements of paragraph (b)(1) of this section and which requires that an employee must attain age 25 and complete 1 year of service prior to becoming a participant will not satisfy the requirements of paragraph (b)(1) of this section if an employee who completes 2 years of service prior to attaining age 25 does not begin accruals immediately upon commencement of participation in the plan. For rules relating to years

of service, see 29 CFR part 2530, Department of Labor regulations relating to minimum standards for employee pension benefit plans.

(2) *Certain insured defined benefit plans*. Notwithstanding paragraphs (b) (1), (2), and (3) of this section, a defined benefit plan satisfies the requirements of paragraph (b) of this section if such plan is funded exclusively by the purchase of contracts from a life insurance company and such contracts satisfy the requirements of sections 412(i) (2) and (3) and the regulations thereunder. The preceding sentence is applicable only if an employee's accrued benefit as of any applicable date is not less than the cash surrender value such employee's insurance contracts would have on such applicable date if the requirements of section 412(i) (4), (5), and (6) and the regulations thereunder were satisfied.

(3) *Accrued benefit may not decrease on account of increasing age or service*. Notwithstanding paragraphs (b) (1), (2), and (3) of this section and paragraphs (d) (1) and (2) of this section, a defined benefit plan shall be treated as not satisfying the requirements of paragraphs (b) and (d) of this section if the participant's accrued benefit is reduced on account of any increase in his age or years of service. The preceding sentence shall not apply to social security supplements described in § 1.411(a)-7(c)(4).

(e) *Separate accounting*. A plan satisfies the requirements of this paragraph if the requirements of paragraph (e) (1) or (2) of this paragraph are met.

(1) *Defined benefit plan*. In the case of a defined benefit plan, the requirements of this paragraph are satisfied if the plan requires separate accounting for the portion of each employee's accrued benefit derived from any voluntary employee contributions permitted under the plan. For purposes of this subparagraph the term "voluntary employee contributions" means all employee contributions which are not mandatory contributions within the meaning of section 411(c)(2)(C) and the regulations thereunder. See § 1.411(c)-1(b)(1) for rules requiring the determination of such an accrued benefit by the use of a separate account.

(2) *Defined contribution plan.* In the case of a defined contribution plan, the requirements of this paragraph are not satisfied unless the plan requires separate accounting for each employee's accrued benefit. If a plan utilizes the break in service rule of section 411(a)(6)(C), an employee could have different percentages of vesting between pre-break and post-break accrued benefits. In such a case, the requirements of this paragraph are not satisfied unless the plan computes accrued benefits in a manner which takes into account different percentages. A plan which provides separate accounts for pre-break and post-break accrued benefits will be deemed to compute benefits in a reasonable manner.

(f) *Year of participation—(1) In general.* This paragraph is inapplicable to a defined contribution plan. For purposes of determining an employee's accrued benefit, a "year of participation" is a period of service determined under regulations prescribed by the Secretary of Labor in 29 CFR Part 2530, relating to minimum standards for employee pension benefit plans.

(2) *Additional rule relating to year of participation.* A trust shall not constitute a qualified trust if the plan of which such trust is a part provides for the crediting of a year of participation, or part thereof, and such credit results in the discrimination prohibited by section 401(a)(4).

(g) *Additional illustrations.* The application of this section may be illustrated by the following example:

Example. (i) The S Corporation established a defined benefit plan on January 1, 1980. The plan provides a minimum age for participation of age 25. The normal retirement age under the plan is age 65. The appropriate computation periods are the calendar year. The plan provides an annual benefit, commencing at age 65, equal to \$96 per year of service for the first 25 years of service, and \$48 per year of service for each additional year of service.

(ii) The plan of the S Corporation does not satisfy the requirements of section 411(b)(1)(A) and paragraph (b)(1) of this section because the accrued benefit under the plan at some point will be less than the accrued benefit required under section 411(b)(1)(A) and paragraph (b)(1) of this section (i.e., 3 percent $\times$ normal retirement benefit $\times$ years of participation).

(iii) The plan of the S Corporation does satisfy the requirements of section 411(b)(1)(B) and paragraph (b)(2) of this section because the rate of benefit accrual is equal in each of the first 25 years of service and the rate decreases thereafter.

(iv) The plan of the S Corporation does satisfy the requirements of section 411(b)(1)(C) and paragraph (b)(3) of this section because the accrued benefit under the plan will equal or exceed the normal retirement benefit multiplied by the fraction described in paragraph (b)(3)(i) of this section.

(Sec. 411 (88 Stat. 901; 26 U.S.C. 411))

[T.D. 7501, 42 FR 42334, Aug. 23, 1977]

§ 1.411(c)-1 Allocation of accrued benefits between employer and employee contributions.

(a) *Accrued benefit derived from employer contributions.* For purposes of section 411 and the regulations thereunder, under section 411(c)(1), an employee's accrued benefit derived from employer contributions under a plan as of any applicable date is the excess, if any, of—

(1) The total accrued benefit under the plan provided for the employee as of such date, over

(2) The accrued benefit provided for the employee, derived from contributions made by the employee under the plan as of such date.

For computation of accrued benefit derived from employee contributions to a defined contribution plan or from voluntary employee contributions to a defined benefit plan, see paragraph (b) of this section. For computation of accrued benefit derived from mandatory employee contributions to a defined benefit plan, see paragraph (c) of this section.

(b) *Accrued benefit derived from employee contribution to defined contribution plan, etc.* For purposes of section 411 and the regulations thereunder, under section 411(c)(2)(A) the accrued benefit derived from employee contributions to a defined contribution plan is determined under paragraph (b) (1) or (2) of this section, whichever applies. Under section 411(d)(5), the accrued benefit derived from voluntary employee contributions to a defined benefit plan is determined under paragraph (b)(1) of this section.

(1) *Separate accounts maintained.* If a separate account is maintained with

respect to an employee's contributions and all income, expenses, gains, and losses attributable thereto, the accrued benefit determined under this subparagraph as of any applicable date is the balance of such account as of such date.

(2) *Separate accounts not maintained.* If a separate account is not maintained with respect to an employee's contributions and the income, expenses, gains, and losses attributable thereto, the accrued benefit determined under this subparagraph is the employee's total accrued benefit determined under the plan multiplied by a fraction—

(i) The numerator of which is the total amount of the employee's contributions under the plan less withdrawals, and

(ii) The denominator of which is the sum of (A) the amount described in paragraph (b)(2)(i) of this section, and (B) the total contributions made under the plan by the employer on behalf of the employee less withdrawals.

For purposes of this subparagraph, contributions include all amounts which are contributed to the plan even if such amounts are used to provide ancillary benefits, such as incidental life insurance, health insurance, or death benefits, and withdrawals include only amounts distributed to the employee and do not reflect the cost of any death benefits under the plan.

(c) *Accrued benefit derived from mandatory employee contributions to a defined benefit plan—*(1) *General rule.* In the case of a defined benefit plan (as defined in section 414(j)) the accrued benefit derived from contributions made by an employee under the plan as of any applicable date is an annual benefit, in the form of a single life annuity (without ancillary benefits) commencing at normal retirement age, equal to the amount of the employee's accumulated contributions (determined under paragraph (c)(3) of this section) multiplied by the appropriate conversion factor (determined under paragraph (c)(2) of this section). Paragraph (e) of this section provides rules for actuarial adjustments where the benefit is to be determined in a form other than the form described in this paragraph.

(2) *Appropriate conversion factor.* For purposes of this paragraph, the term "appropriate conversion factor" means the factor necessary to convert an amount equal to the accumulated contributions to a single life annuity (without ancillary benefits) commencing at normal retirement age and shall be 10 percent for a normal retirement age of 65 years. For other normal retirement ages the appropriate conversion factor shall be the factor as determined by the Commissioner.

(3) *Accumulated contributions.* For purposes of section 411(c) and this section, the term "accumulated contributions" means the total of—

(i) All mandatory contributions made by the employee (determined under paragraph (c)(4) of this section),

(ii) Interest (if any) on such contributions, computed at the rate provided by the plan to the end of the last plan year to which section 411(a)(2) does not apply (by reason of the applicable effective date), and

(iii) Interest on the sum of the amounts determined under paragraphs (c)(3)(i) and (ii) of this section compounded annually at the rate of 5 percent per annum from the beginning of the first plan year to which section 411(a)(2) applies (by reason of the applicable effective date) to the date on which the employee would attain normal retirement age.

For example, if under section 1017 of the Employee Retirement Income Security Act of 1974, section 411(a)(2) of the Code applies for plan years beginning after December 31, 1975, and for plan years beginning before 1975, the plan provided for 3 percent interest on employee contributions, an employee's accumulated contributions would be computed by crediting interest at the rate provided by the plan (3 percent) for plan years beginning before 1976 and by crediting interest at the rate of 5 percent (or another rate prescribed under section 411(c)(2)(D)) thereafter. Section 1017 of the Employee Retirement Income Security Act of 1974 and § 1.411(a)-2 provide the effective dates for the application of section 411(a)(2).

(4) *Mandatory contributions.* For purposes of section 411(c) and this section the term "mandatory contributions" means amounts contributed to the plan

by the employee which are required as a condition of his employment, as a condition of his participation in the plan, or as a condition of obtaining benefits (or additional benefits) under the plan attributable to employer contributions. For example, if the benefit derived from employer contributions depends upon a specified level of employee contributions, employee contributions up to that level would be treated as mandatory contributions. Mandatory contributions, otherwise satisfying the requirements of this subparagraph, include amounts contributed to the plan which are used to provide ancillary benefits such as incidental life insurance, health insurance, or death benefits.

(d) *Limitation on accrued benefit.* The accrued benefit derived from mandatory employee contributions under a defined benefit plan (determined under paragraph (c) of this section) shall not exceed the greater of—

(1) The accrued benefit of the employee under the plan, or

(2) The accrued benefit derived from employee contributions determined without regard to any interest under section 411(c)(2)(C) (ii) and (iii) and under paragraphs (c)(3) (ii) and (iii) of this section.

(e) *Actuarial adjustments for defined benefit plans—*(1) *Accrued benefit.* In the case of a defined benefit plan (as defined in section 414(j)) if an employee's accrued benefit is to be determined as an amount other than an annual benefit commencing at normal retirement age, such benefit (determined under section 411(c)(1) and paragraph (a) of this section) shall be the actuarial equivalent of such benefit, as determined by the Commissioner.

(2) *Accrued benefit derived from employee contributions.* In the case of a defined benefit plan (as defined in section 414(j)) if the accrued benefit derived from mandatory contributions made by an employee is to be determined with respect to a benefit other than an annual benefit in the form of a single life annuity (without ancillary benefits) commencing at normal retirement age, such benefit shall be the actuarial equivalent of such benefit (determined under section 411(c)(2)(B) and para-

graph (c) of this section) as determined by the Commissioner.

(f) *Suspension of benefits, etc.—*(1) *Suspensions.* No adjustment to an accrued benefit is required on account of any suspension of benefits if such suspension is permitted under section 203(a)(3)(B) of the Employee Retirement Income Security Act of 1974 (88 Stat. 855) (Code section 411(a)(3)(B)).

(2) *Employment after retirement.* No actuarial adjustment to an accrued benefit is required on account of employment after normal retirement age. For example, if a plan with a normal retirement age of 65 provides a benefit of \$400 a month payable at age 65 the same \$400 benefit (with no upward adjustment) could be paid to an employee who retires at age 68.

(Sec. 411 (88 Stat. 901; 26 U.S.C. 411))

[T.D. 7501, 42 FR 42338, Aug. 23, 1977]

§ 1.411(d)-1 Coordination of vesting and discrimination requirements.
[Reserved]

§ 1.411(d)-2 Termination or partial termination; discontinuance of contributions.

(a) *General rule—*(1) *Required non-forfeiture.* A plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) unless the plan provides that—

(i) Upon the termination or partial termination of the plan, or

(ii) In addition, in the case of a plan to which section 412 (relating to minimum funding standards) does not apply, upon the complete discontinuance of contributions under the plan,

the rights of each affected employee to benefits accrued to the date of such termination or partial termination (or, in the case of a plan to which section 412 does not apply, discontinuance), to the extent funded, or the rights of each employee to the amounts credited to his account at such time, are non-forfeitable (within the meaning of § 1.411(a)-4).

(2) *Required allocation.* (i) A plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) unless the plan provides for the allocation of any previously unallocated funds to the employees covered by the plan upon the termination

or partial termination of the plan (or, in the case of a plan to which section 412 does not apply, upon the complete discontinuance of contributions under the plan). Such provision may be incorporated in the plan at its inception or by an amendment made prior to the termination or partial termination of the plan for the discontinuance of contributions thereunder. In the case of a defined contribution plan under which unallocated forfeitures are held in a suspense account in order to satisfy the requirements of section 415, this subdivision shall not require such plan to provide for allocations from the suspense account to the extent that such allocations would result in annual additions to participants' accounts in excess of amounts permitted under section 415 for the year for which such allocations would be made.

(ii) Any provision for the allocation of unallocated funds which is found by the Secretary of Labor or the Pension Benefit Guaranty Corporation (whichever is appropriate) to satisfy the requirements of section 4044 or section 403(d)(1) of the Employee Retirement Income Security Act of 1974 is acceptable if it specifies the method to be used and does not conflict with the provisions of section 401(a)(4) of the Internal Revenue Code of 1954 and the regulations thereunder. Any allocation of funds required by paragraph (1), (2), (3), or (4)(A) of section 4044(a) of such Act shall be deemed not to result in discrimination prohibited by section 401(a)(4) of the Code (see, however, paragraph (e) of this section). Notwithstanding the preceding sentence, in the case of a plan which establishes subclasses or categories pursuant to section 4044(b)(6) of such Act, the allocation of funds by the use of such subclasses or categories shall not be deemed not to result in discrimination prohibited by the Code. The allocation of unallocated funds may be in cash or in the form of other benefits provided under the plan. However, the allocation of the funds contributed by the employer among the employees need not necessarily benefit all the employees covered by the plan.

(iii) Paragraphs (a)(2) (i) and (ii) of this section do not require the allocation of amounts to the account of any

employee if such amounts are not required to be used to satisfy the liabilities with respect to employees and their beneficiaries under the plan (see section 401(a)(2)).

(b) *Partial termination*—(1) *General rule.* Whether or not a partial termination of a qualified plan occurs (and the time of such event) shall be determined by the Commissioner with regard to all the facts and circumstances in a particular case. Such facts and circumstances include: the exclusion, by reason of a plan amendment or severance by the employer, of a group of employees who have previously been covered by the plan; and plan amendments which adversely affect the rights of employees to vest in benefits under the plan.

(2) *Special rule.* If a defined benefit plan ceases or decreases future benefit accruals under the plan, a partial termination shall be deemed to occur if, as a result of such cessation or decrease, a potential reversion to the employer, or employers, maintaining the plan (determined as of the date such cessation or decrease is adopted) is created or increased. If no such reversion is created or increased, a partial termination shall be deemed not to occur by reason of such cessation or decrease. However, the Commissioner may determine that a partial termination of such a plan occurs pursuant to subparagraph (1) of this paragraph for reasons other than such cessation or decrease.

(3) *Effect of partial termination.* If a termination of a qualified plan occurs, the provisions of section 411(d)(3) apply only to the part of the plan that is terminated.

(c) *Termination*—(1) *Application.* This paragraph applies to a plan other than a plan described in section 411(e)(1) (relating to governmental, certain church plans, etc.).

(2) *Plans subject to termination insurance.* For purposes of this section, a plan to which title IV of the Employee Retirement Income Security Act of 1974 applies is considered terminated on a particular date if, as of that date—

(i) The plan is voluntarily terminated by the plan administrator under section 4041 of the Employee Retirement Income Security Act of 1974, or

(ii) The Pension Benefit Guaranty Corporation terminates the plan under section 4042 of the Employee Retirement Income Security Act of 1974.

For purposes of this subparagraph, the particular date of termination shall be the date of termination determined under section 4048 of such Act.

(3) *Other plans.* In the case of a plan not described in paragraph (c)(2) of this section, a plan is considered terminated on a particular date if, as of that date, the plan is voluntarily terminated by the employer, or employers, maintaining the plan.

(d) *Complete discontinuance*—(1) *General rule.* For purposes of this section, a complete discontinuance of contributions under the plan is contrasted with a suspension of contributions under the plan which is merely a temporary cessation of contributions by the employer. A complete discontinuance of contributions may occur although some amounts are contributed by the employer under the plan if such amounts are not substantial enough to reflect the intent on the part of the employer to continue to maintain the plan. The determination of whether a complete discontinuance of contributions under the plan has occurred will be made with regard to all the facts and circumstances in the particular case, and without regard to the amount of any contributions made under the plan by employees. Among the factors to be considered in determining whether a suspension constitutes a discontinuance are:

(i) Whether the employer may merely be calling an actual discontinuance of contributions a suspension of such contributions in order to avoid the requirement of full vesting as in the case of a discontinuance, or for any other reason;

(ii) Whether contributions are recurring and substantial; and

(iii) Whether there is any reasonable probability that the lack of contributions will continue indefinitely.

(2) *Time of discontinuance.* In any case in which a suspension of a profit-sharing plan maintained by a single employer is considered a discontinuance, the discontinuance becomes effective not later than the last day of the taxable year of the employer following the

last taxable year of such employer for which a substantial contribution was made under the profit-sharing plan. In the case of a profit-sharing plan maintained by more than one employer, the discontinuance becomes effective not later than the last day of the plan year following the plan year within which any employer made a substantial contribution under the plan.

(e) *Contributions or benefits which remain forfeitable.* Under section 411(d)(2) and (3), section 411(a) and this section do not apply to plan benefits which may not be provided for designated employees in the event of early termination of the plan under provisions of the plan adopted pursuant to regulations prescribed by the Secretary or his delegate to preclude the discrimination prohibited by section 401(a)(4). Accordingly, in such a case, plan benefits may be required to be reallocated without regard to this section. See § 1.401-4(c).

(Sec. 411 (88 Stat. 901; 26 U.S.C. 411))

[T.D. 7501, 42 FR 42339, Aug. 23, 1977]

§ 1.411(d)-3 Section 411(d)(6) protected benefits.

(a) *Protection of accrued benefits*—(1) *General rule.* Under section 411(d)(6)(A), a plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) if a plan amendment decreases the accrued benefit of any plan participant, except as provided in section 412(c)(8), section 4281 of the Employee Retirement Income Security Act of 1974 as amended (ERISA), or other applicable law (see, for example, sections 418D and 418E of the Internal Revenue Code, and section 1541(a)(2) of the Taxpayer Relief Act of 1997, Public Law 105-34 (111 Stat. 788, 1085)). For purposes of this section, a plan amendment includes any changes to the terms of a plan, including changes resulting from a merger, consolidation, or transfer (as defined in section 414(l)) or a plan termination. The protection of section 411(d)(6) applies to a participant's entire accrued benefit under the plan as of the applicable amendment date, without regard to whether the entire accrued benefit was accrued before a participant's severance from employment or whether any portion was the result of an increase in the accrued

benefit of the participant pursuant to a plan amendment adopted after the participant's severance from employment.

(2) *Plan provisions taken into account—*

(i) *Direct or indirect reduction in accrued benefit.* For purposes of determining whether a participant's accrued benefit is decreased, all of the amendments to the provisions of a plan affecting, directly or indirectly, the computation of accrued benefits are taken into account. Plan provisions indirectly affecting the computation of accrued benefits include, for example, provisions relating to years of service and compensation.

(ii) *Amendments effective with the same applicable amendment date.* In determining whether a reduction in a participant's accrued benefit has occurred, all plan amendments with the same applicable amendment date are treated as one amendment. Thus, if two amendments have the same applicable amendment date and one amendment, standing alone, increases participants' accrued benefits and the other amendment, standing alone, decreases participants' accrued benefits, the amendments are treated as one amendment and will only violate section 411(d)(6) if, for any participant, the net effect is to decrease participants' accrued benefit as of that applicable amendment date.

(iii) *Multiple amendments—(A) General rule.* A plan amendment violates the requirements of section 411(d)(6) if it is one of a series of plan amendments that, when taken together, have the effect of reducing or eliminating a section 411(d)(6) protected benefit in a manner that would be prohibited by section 411(d)(6) if accomplished through a single amendment.

(B) *Determination of the time period for combining plan amendments.* For purposes of applying the rule in paragraph (a)(2)(iii)(A) of this section, generally only plan amendments adopted within a 3-year period are taken into account.

(3) *Application of section 411(a) non-forfeatability provisions with respect to section 411(d)(6) protected benefits—(i) In general.* The rules of this paragraph (a) apply to a plan amendment that decreases a participant's accrued benefits, or otherwise places greater restrictions or conditions on a partici-

pant's rights to section 411(d)(6) protected benefits, even if the amendment merely adds a restriction or condition that is permitted under the vesting rules in section 411(a)(3) through (11). However, such an amendment does not violate section 411(d)(6) to the extent it applies with respect to benefits that accrue after the applicable amendment date. See section 411(a)(10) and § 1.411(a)-8 for additional rules relating to changes in a plan's vesting schedule.

(ii) *Exception for changes in a plan's vesting computation period.* Notwithstanding paragraph (a)(3)(i) of this section, a plan amendment that satisfies the applicable requirements under 29 CFR 2530.203-2(c) (rules relating to vesting computation periods) does not fail to satisfy the requirements of section 411(d)(6) merely because the plan amendment changes the plan's vesting computation period.

(4) *Examples.* The following examples illustrate the application of this paragraph (a):

Example 1. (i) Facts. Plan A provides an annual benefit of 2% of career average pay times years of service commencing at normal retirement age (age 65). Plan A is amended on November 1, 2006, effective as of January 1, 2007, to provide for an annual benefit of 1.3% of final pay times years of service, with final pay computed as the average of a participant's highest 3 consecutive years of compensation. As of January 1, 2007, Participant M has 16 years of service, M's career average pay is \$37,500, and the average of M's highest 3 consecutive years of compensation is \$67,308. Thus, Participant M's accrued benefit as of the applicable amendment date is increased from \$12,000 per year at normal retirement age (2% times \$37,500 times 16 years of service) to \$14,000 per year at normal retirement age (1.3% times \$67,308 times 16 years of service). As of January 1, 2007, Participant N has 6 years of service, N's career average pay is \$50,000, and the average of N's highest 3 consecutive years of compensation is \$51,282. Participant N's accrued benefit as of the applicable amendment date is decreased from \$6,000 per year at normal retirement age (2% times \$50,000 times 6 years of service) to \$4,000 per year at normal retirement age (1.3% times \$51,282 times 6 years of service).

(ii) *Conclusion.* While the plan amendment increases the accrued benefit of Participant M, the plan amendment fails to satisfy the requirements of section 411(d)(6)(A) because the amendment decreases the accrued benefit of Participant N below the level of the

Internal Revenue Service, Treasury

§ 1.411(d)-3

accrued benefit of Participant N immediately before the applicable amendment date.

Example 2. (i) Facts. The facts are the same as Example 1, except that Plan A includes a provision under which Participant N's accrued benefit cannot be less than what it was immediately before the applicable amendment date (so that Participant N's accrued benefit could not be less than \$6,000 per year at normal retirement age).

(ii) Conclusion. The amendment does not violate the requirements of section 411(d)(6)(A) with respect to Participant M (whose accrued benefit has been increased) or with respect to Participant N (although Participant N would not accrue any benefits until the point in time at which the new formula amount would exceed the amount payable under the minimum provision, approximately 3 years after the amendment becomes effective).

Example 3. (i) Facts. Employer N maintains Plan C, a qualified defined benefit plan under which an employee becomes a participant upon completion of 1 year of service and is vested in 100% of the employer-derived accrued benefit upon completion of 5 years of service. Plan C provides that a former employee's years of service prior to a break in service will be reinstated upon completion of 1 year of service after being rehired. Plan C has participants who have fewer than 5 years of service and who are accordingly 0% vested in their employer-derived accrued benefits. On December 31, 2007, effective January 1, 2008, Plan C is amended, in accordance with section 411(a)(6)(D), to provide that any non-vested participant who has at least 5 consecutive 1-year breaks in service and whose number of consecutive 1-year breaks in service exceeds his or her number of years of service before the breaks will have his or her pre-break service disregarded in determining vesting under the plan.

(ii) Conclusion. Under paragraph (a)(3) of this section, the plan amendment does not satisfy the requirements of this paragraph (a), and thus violates section 411(d)(6), because the amendment places greater restrictions or conditions on the rights to section 411(d)(6) protected benefits, as of January 1, 2008, for participants who have fewer than 5 years of service, by restricting the ability of those participants to receive further vesting protections on benefits accrued as of that date.

Example 4. (i) Facts. (A) Employer O sponsors Plan D, a qualified profit sharing plan under which each employee has a nonforfeitable right to a percentage of his or her employer-derived accrued benefit based on the following table:

Completed years of service	Nonforfeitable percentage
Fewer than 3	0
3	20
4	40
5	60
6	80
7	100

(B) In January 2006, Employer O acquires Company X, which maintains Plan E, a qualified profit sharing plan under which each employee who has completed 5 years of service has a nonforfeitable right to 100% of the employer-derived accrued benefit. In 2007, Plan E is merged into Plan D. On the effective date for the merger, Plan D is amended to provide that the vesting schedule for participants of Plan E is the 7-year graded vesting schedule of Plan D. In accordance with section 411(a)(10)(A), the plan amendment provides that any participant of Plan E who had completed 5 years of service prior to the amendment is fully vested. In addition, as required under section 411(a)(10)(B), the amendment provides that any participant in Plan E who has at least 3 years of service prior to the amendment is permitted to make an irrevocable election to have the vesting of his or her nonforfeitable right to the employer-derived accrued benefit determined under either the 5-year cliff vesting schedule or the 7-year graded vesting schedule. Participant G, who has an account balance of \$10,000 on the applicable amendment date, is a participant in Plan E with 2 years of service as of the applicable amendment date. As of the date of the merger, Participant G's nonforfeitable right to G's employer-derived accrued benefit is 0% under both the 7-year graded vesting schedule of Plan D and the 5-year cliff vesting schedule of Plan E.

(ii) Conclusion. Under paragraph (a)(3) of this section, the plan amendment does not satisfy the requirements of this paragraph (a) and violates section 411(d)(6), because the amendment places greater restrictions or conditions on the rights to section 411(d)(6) protected benefits with respect to G and any participant who has fewer than 5 years of service and who elected (or was made subject to) the new vesting schedule. A method of avoiding a section 411(d)(6) violation with respect to account balances attributable to benefits accrued as of the applicable amendment date and earnings thereon would be for Plan D to provide for the vested percentage of G and each other participant in Plan E to be no less than the greater of the vesting percentages under the two vesting schedules (for example, for G and each other participant in Plan E to be 20% vested upon completion of 3 years of service, 40% vested upon completion of 4 years of service, and fully vested upon completion of 5 years of service) for those account balances and earnings.

(b) *Protection of section 411(d)(6)(B) protected benefits*—(1) *General rule*—(i) *Prohibition against plan amendments eliminating or reducing section 411(d)(6)(B) protected benefits.* Except as provided in this section, a plan is treated as decreasing an accrued benefit if it is amended to eliminate or reduce a section 411(d)(6)(B) protected benefit as defined in paragraph (g)(15) of this section. This paragraph (b)(1) applies to participants who satisfy (either before or after the plan amendment) the preamendment conditions for a section 411(d)(6)(B) protected benefit.

(ii) *Contingent benefits.* The rules of paragraph (b)(1)(i) of this section apply to participants who satisfy (either before or after the plan amendment) the preamendment conditions for the section 411(d)(6)(B) protected benefit even if the condition on which the eligibility for the section 411(d)(6)(B) protected benefit depends is an unpredictable contingent event (e.g., a plant shutdown).

(iii) *Application of general rules in paragraph (a) of this section to section 411(d)(6)(B) protected benefits.* For purposes of determining whether a participant's section 411(d)(6)(B) protected benefit is eliminated or reduced, the rules of paragraph (a) of this section apply to section 411(d)(6)(B) protected benefits in the same manner as they apply to accrued benefits described in section 411(d)(6)(A). As an example of the application of paragraph (a)(2)(ii) of this section to section 411(d)(6)(B) protected benefits, if there are two amendments with the same applicable amendment date and one amendment increases accrued benefits and the other amendment decreases the early retirement factors that are used to determine the early retirement annuity, the amendments are treated as one amendment and only violate section 411(d)(6) if, after the two amendments, the net dollar amount of any early retirement annuity with respect to the accrued benefit of any participant as of the applicable amendment date is lower than it would have been without the two amendments. As an example of the application of paragraph (a)(2)(iii) of this section to section 411(d)(6)(B) protected benefits, a series of amendments made within a 3-year period

that, when taken together, have the effect of reducing or eliminating early retirement benefits or retirement-type subsidies in a manner that adversely affects the rights of any participant in a more than *de minimis* manner violates section 411(d)(6)(B) even if each amendment would be permissible pursuant to paragraphs (c), (d), or (f) of this section.

(2) *Permissible elimination of section 411(d)(6)(B) protected benefits*—(i) *In general.* A plan is permitted to be amended to eliminate a section 411(d)(6)(B) protected benefit if the elimination is in accordance with this section or § 1.411(d)-4.

(ii) *Increases in payment amounts do not eliminate an optional form of benefit.* An amendment is not treated as eliminating an optional form of benefit or eliminating or reducing an early retirement benefit or retirement-type subsidy under the plan, if, effective after the plan amendment, there is another optional form of benefit available to the participant under the plan that is of inherently equal or greater value (within the meaning of § 1.401(a)(4)-4(d)(4)(i)(A)). Thus, for example, a change in the method of calculating a joint and survivor annuity from using a 90% adjustment factor on account of the survivorship payment at particular ages for a participant and a spouse to using a 91% adjustment factor at the same ages is not treated as an elimination of an optional form of benefit. Similarly, a plan that offers a subsidized qualified joint and survivor annuity option for married participants under which the amount payable during the participant's lifetime is not less than the amount payable under the plan's straight life annuity is permitted to be amended to eliminate the straight life annuity option for married participants.

(3) *Permissible elimination of benefits that are not section 411(d)(6) protected benefits*—(i) *In general.* Section 411(d)(6) does not provide protection for benefits that are ancillary benefits, other rights and features, or any other benefits that are not described in section 411(d)(6). See § 1.411(d)-4, Q&A-1(d). However, a plan may not be amended to recharacterize a retirement-type benefit as an ancillary benefit. Thus, for example, a

plan amendment to recharacterize any portion of an early retirement subsidy as a social security supplement that is an ancillary benefit violates section 411(d)(6).

(ii) *No protection for future benefit accruals.* Section 411(d)(6) only protects benefits that accrue before the applicable amendment date. Thus, a plan is permitted to be amended to eliminate or reduce an early retirement benefit, a retirement-type subsidy, or an optional form of benefit with respect to benefits that accrue after the applicable amendment date without violating section 411(d)(6). However, section 4980F(e) of the Internal Revenue Code and section 204(h) of ERISA require notice of an amendment to an applicable pension plan that either provides for a significant reduction in the rate of future benefit accrual or that eliminates or significantly reduces an early retirement benefit or a retirement-type subsidy. See § 54.4980F-1 of this chapter generally, and see § 54.4980F-1, Q&A-7(b) and Q&A-8(c) of this chapter, with respect to the circumstances under which such notice is required for a reduction in an early retirement benefit or retirement-type subsidy.

(4) *Examples.* The following examples illustrate the application of this paragraph (b):

Example 1. (i) *Facts involving amendments to an early retirement subsidy.* Plan A provides an annual benefit of 2% of career average pay times years of service commencing at normal retirement age (age 65). Plan A is amended on November 1, 2006, effective as of January 1, 2007, to provide for an annual benefit of 1.3% of final pay times years of service, with final pay computed as the average of a participant's highest 3 consecutive years of compensation. Participant M is age 50, M has 16 years of service, M's career average pay is \$37,500, and the average of M's highest 3 consecutive years of compensation is \$67,308. Thus, M's accrued benefit as of the effective date of the amendment is increased from \$12,000 per year at normal retirement age (2% times \$37,500 times 16 years of service) to \$14,000 per year at normal retirement age (1.3% times \$67,308 times 16 years of service). (These facts are similar to the facts in *Example 1* in paragraph (a)(4) of this section.) Before the amendment, Plan A permitted a former employee to commence distribution of benefits as early as age 55 and, for a participant with at least 15 years of service, actuarially reduced the amount payable in the form of a straight life annuity commencing

before normal retirement age by 3% per year from age 60 to age 65 and by 7% per year from age 55 through age 59. Thus, before the amendment, the amount of M's early retirement benefit that would be payable for commencement at age 55 was \$6,000 per year (\$12,000 per year minus 3% for 5 years and minus 7% for 5 more years). The amendment also alters the actuarial reduction factor so that, for a participant with at least 15 years of service, the amount payable in a straight life annuity commencing before normal retirement age is reduced by 6% per year. As a result, the amount of M's early retirement benefit at age 55 becomes \$5,600 per year after the amendment (\$14,000 minus 6% for 10 years).

(ii) *Conclusion.* The straight life annuity payable under Plan A at age 55 is an optional form of benefit that includes an early retirement subsidy. The plan amendment fails to satisfy the requirements of section 411(d)(6)(B) because the amendment decreases the optional form of benefit payable to Participant M below the level that Participant M was entitled to receive immediately before the effective date of the amendment. If instead Plan A had included a provision under which M's straight life annuity payable at any age could be not be less than what it was immediately before the amendment (so that M's straight life annuity payable at age 55 could not be less than \$6,000 per year), then the amendment would not fail to satisfy the requirements of section 411(d)(6)(B) with respect to M's straight life annuity payable at age 55 (although the straight life annuity payable to M at age 55 would not increase until the point in time at which the new formula amount with the new actuarial reduction factors exceeds the amount payable under the minimum provision, approximately 14 months after the amendment becomes effective).

Example 2. (i) *Facts involving plant shutdown benefits.* Plan B permits participants who have a severance from employment before normal retirement age (age 65) to commence distributions at any time after age 55 with the amount payable to be actuarially reduced using reasonable actuarial assumptions regarding interest and mortality specified in the plan, but provides that the annual reduction for any participant who has at least 20 years of service and who has a severance from employment after age 55 is only 3% per year (which is a smaller reduction than would apply under reasonable actuarial reductions). Plan B also provides 2 plant shutdown benefits to participants who have a severance of employment as a result of a plant shutdown. First, the favorable 3% per year actuarial reduction applies for commencement of benefits after age 55 and before age 65 for any participant who has at least 10 years of service and who has a severance from employment as a result of a plant

§ 1.411(d)-3

26 CFR Ch. I (4-1-08 Edition)

shutdown. Second, all participants who have at least 20 years of service and who have a severance from employment after age 55 (and before normal retirement age at age 65) as a result of a plant shutdown will receive supplemental payments. Under the supplemental payments, an additional amount equal to the participant's estimated old-age insurance benefit under the Social Security Act is payable until age 65. The supplemental payments are not a QSUPP, as defined in § 1.401(a)(4)-12, because the plan's terms do not state that the supplement is treated as an early retirement benefit that is protected under section 411(d)(6).

(ii) *Conclusion with respect to plant shutdown benefits.* The benefits payable with the 3% annual reduction are retirement-type benefits. The excess of the actuarial present value of the early retirement benefit using the 3% annual reduction over the actuarial present value of the normal retirement benefit is a retirement-type subsidy and the right to receive payments of the benefit at age 55 is an early retirement benefit. These conclusions apply not only with respect to the rights that apply to participants who have at least 20 years of service, but also to participants with at least 10 years of service who have a severance from employment as a result of a plant shutdown. Thus, the right to receive benefits based on a 3% annual reduction for participants with at least 10 years of service at the time of a plant shutdown is an early retirement benefit that provides a retirement-type subsidy and is a section 411(d)(6)(B) protected benefit (even though no plant shutdown has occurred). Therefore, a plan amendment cannot eliminate this benefit with respect to benefits accrued before the applicable amendment date, even before the occurrence of the plant shutdown. Because the plan provides that the supplemental payments cannot exceed the OASDI benefit under the Social Security Act, the supplemental payments constitute a social security supplement (but not a QSUPP as defined in § 1.401(a)(4)-12), which is an ancillary benefit that is not a section 411(d)(6)(B) protected benefit and accordingly is not taken into account in determining whether a prohibited reduction has occurred.

Example 3. (i) *Facts.* Plan C, a multiemployer defined benefit plan in which participation is limited to electricians in the construction industry, provides that a participant may elect to commence distributions only if the participant is not currently employed by a participating employer and provides that, if the participant has a specified number of years of service and attains a specified age, the distribution is without any actuarial reduction for commencement before normal retirement age. Since the plan's inception, Plan C has provided for suspension of pension benefits during periods of dis-

qualifying employment (ERISA section 203(a)(3)(B) service). Before 2007, the plan defined disqualifying employment to include any job as an electrician in the particular industry and geographic location to which Plan C applies. This definition of disqualifying employment did not cover a job as an electrician supervisor. In 2005, Participant E, having rendered the specified number of years of service and attained the specified age to retire with a fully subsidized early retirement benefit, retires from E's job as an electrician with Employer Y and starts a position with Employer Z as an electrician supervisor. Employer Z is not a participating employer in Plan C but is an employer in the same industry and geographic location as Employer Y. When E left service with Employer Y, E's position as an electrician supervisor was not disqualifying employment for purposes of Plan C's suspension of pension benefit provision, and E elected to commence benefit payments in 2005. In 2006, effective January 1, 2007, Plan C is amended to expand the definition of disqualifying employment to include any job (including supervisory positions) as an electrician in the same industry and geographic location to which Plan C applies. The plan's definition of disqualifying employment satisfies the requirements of section 411(a)(3)(B). On January 1, 2007, E's pension benefits are suspended because of E's disqualifying employment as an electrician supervisor.

(ii) *Conclusion.* Under paragraphs (a)(3) and (b)(1) of this section, the 2007 plan amendment violates section 411(d)(6), because the amendment places greater restrictions or conditions on a participant's rights to section 411(d)(6) protected benefits to the extent it applies with respect to benefits that accrued before January 1, 2007. The result would be the same even if the amendment did not apply to former employees and instead applied only to participants who were actively employed at the time of the applicable amendment.

(c) *Permissible elimination of optional forms of benefit that are redundant—(1) General rule.* Except as otherwise provided in paragraph (c)(5) of this section, a plan is permitted to be amended to eliminate an optional form of benefit for a participant with respect to benefits accrued before the applicable amendment date if—

(i) The optional form of benefit is redundant with respect to a retained optional form of benefit, within the meaning of paragraph (c)(2) of this section;

(ii) The plan amendment is not applicable with respect to an optional form

of benefit with an annuity commencement date that is earlier than the number of days in the maximum QJSA explanation period (as defined in paragraph (g)(9) of this section) after the date the amendment is adopted; and

(iii) The requirements of paragraph (e) of this section are satisfied in any case in which either:

(A) The retained optional form of benefit for the participant does not commence on the same annuity commencement date as the optional form of benefit that is being eliminated; or

(B) As of the date the amendment is adopted, the actuarial present value of the retained optional form of benefit for the participant is less than the actuarial present value of the optional form of benefit that is being eliminated.

(2) *Similar types of optional forms of benefit are redundant*—(i) *General rule.* An optional form of benefit is redundant with respect to a retained optional form of benefit if, after the amendment becomes applicable—

(A) There is a retained optional form of benefit available to the participant that is in the same family of optional forms of benefit, within the meaning of paragraphs (c)(3) and (4) of this section, as the optional form of benefit being eliminated; and

(B) The participant's rights with respect to the retained optional form of benefit are not subject to materially greater restrictions (such as conditions relating to eligibility, restrictions on a participant's ability to designate the person who is entitled to benefits following the participant's death, or restrictions on a participant's right to receive an in-kind distribution) than applied to the optional form of benefit being eliminated.

(ii) *Special rule for core options.* An optional form of benefit that is a core option as defined in paragraph (g)(5) of this section may not be eliminated as a redundant benefit under the rules of this paragraph (c) unless the retained optional form of benefit and the eliminated core option are identical except for differences described in paragraph (c)(3)(ii) of this section. Thus, for example, a particular 10-year term certain and life annuity may not be eliminated by plan amendment unless the

retained optional form of benefit is another 10-year term certain and life annuity.

(3) *Family of optional forms of benefit*—

(i) *In general.* Paragraph (c)(4) of this section describes certain families of optional forms of benefits. Not every optional form of benefit that is offered under a plan necessarily fits within a family of optional forms of benefit as described in paragraph (c)(4) of this section. Each optional form of benefit that is not included in any particular family of optional forms of benefit listed in paragraph (c)(4) of this section is in a separate family of optional forms of benefit with other optional forms of benefit that would be identical to that optional form of benefit but for differences that are disregarded under paragraph (c)(3)(ii) of this section.

(ii) *Certain differences among optional forms of benefit*—(A) *Differences in actuarial factors and annuity starting dates.* The determination of whether two optional forms of benefit are within a family of optional forms of benefit is made without regard to actuarial factors or annuity starting dates. Thus, any optional forms of benefit that are part of the same generalized optional form (within the meaning of paragraph (g)(8) of this section) are in the same family of optional forms of benefit. For example, if a plan has a single-sum distribution option for some participants that is calculated using a 5% interest rate and a specific mortality table (but no less than the minimum present value as determined under section 417(e)) and another single-sum distribution option for other participants that is calculated using the applicable interest rate as defined in section 417(e)(3)(A)(ii)(II) and the applicable mortality table as defined in section 417(e)(3)(A)(ii)(I), both single-sum distribution options are part of the same generalized optional form and thus in the same family of optional forms of benefit under the rules of paragraph (c)(3)(i) of this section. However, differences in actuarial factors and annuity starting dates are taken into account for purposes of the requirements in paragraph (e)(3) of this section.

(B) *Differences in pop-up provisions and cash refund features for joint and contingent options.* The determination

of whether two optional forms of benefit are within a family of optional forms of benefit relating to joint and contingent families (as described in paragraph (c)(4)(i) and (ii) of this section) is made without regard to the following features—

(1) Pop-up provisions (under which payments increase upon the death of the beneficiary or another event that causes the beneficiary not to be entitled to a survivor annuity);

(2) Cash refund features (under which payment is provided upon the death of the last annuitant in an amount that is not greater than the excess of the present value of the annuity at the annuity starting date over the total of payments before the death of the last annuitant); or

(3) Term-certain provisions for optional forms of benefit within a joint and contingent family.

(C) *Differences in social security leveling features, refund of employee contributions features, and retroactive annuity starting date features.* The determination of whether 2 optional forms of benefit are within a family of optional forms of benefit is made without regard to social security leveling features, refund of employee contributions features, or retroactive annuity starting date features. But see paragraph (c)(5) of this section for special rules relating to social security leveling, refund of employee contributions, and retroactive annuity starting date features in optional forms of benefit.

(4) *List of families.* The following are families of optional forms of benefit for purposes of this paragraph (c):

(i) *Joint and contingent options with continuation percentages of 50% to 100%.* An optional form of benefit is within the 50% or more joint and contingent family if it provides a life annuity to the participant and a survivor annuity to an individual that is at least 50% and no more than 100% of the annuity payable during the joint lives of the participant and the participant's survivor.

(ii) *Joint and contingent options with continuation percentages less than 50%.* An optional form of benefit is within the less than 50% joint and contingent family if it provides a life annuity to the participant and a survivor annuity

to an individual that is less than 50% of the annuity payable during the joint lives of the participant and the participant's survivor.

(iii) *Term certain and life annuity options with a term of 10 years or less.* An optional form of benefit is within the 10 years or less term certain and life family if it is a life annuity with a guarantee that payments will continue to the participant's beneficiary for the remainder of a fixed period that is 10 years or less if the participant dies before the end of the fixed period.

(iv) *Term certain and life annuity options with a term longer than 10 years.* An optional form of benefit is within the longer than 10 years term certain and life family if it is a life annuity with a guarantee that payments will continue to the participant's beneficiary for the remainder of a fixed period that is in excess of 10 years if the participant dies before the end of the fixed period.

(v) *Level installment payment options over a period of 10 years or less.* An optional form of benefit is within the 10 years or less installment family if it provides for substantially level payments to the participant for a fixed period of at least 2 years and not in excess of 10 years with a guarantee that payments will continue to the participant's beneficiary for the remainder of the fixed period if the participant dies before the end of the fixed period.

(vi) *Level installment payment options over a period of more than 10 years.* An optional form of benefit is within the more than 10 years installment family if it provides for substantially level payments to the participant for a fixed period that is in excess of 10 years with a guarantee that payments will continue to the participant's beneficiary for the remainder of the fixed period if the participant dies before the end of the fixed period.

(5) *Special rules for certain features included in optional forms of benefit.* For purposes of applying this paragraph (c), to the extent an optional form of benefit that is being eliminated includes either a social security leveling feature or a refund of employee contributions feature, the retained optional form of benefit must also include that feature, and, to the extent that the optional form of benefit that is being eliminated

does not include a social security leveling feature or a refund of employee contributions feature, the retained optional form of benefit must not include that feature. For purposes of applying this paragraph (c), to the extent an optional form of benefit that is being eliminated does not include a retroactive annuity starting date feature, the retained optional form of benefit must not include the feature.

(6) *Separate application of redundancy rules for bifurcated benefits.* If a plan permits the participant to make different distribution elections with respect to two or more separate portions of the participant's benefit, the rules of this paragraph (c) are permitted to be applied separately to each such portion of the participant's benefit as if that portion were the participant's entire benefit. Thus, for example, if one set of distribution elections applies to a portion of the participant's accrued benefit and another set of distribution elections applies to the other portion of the participant's accrued benefit, then with respect to one portion of the participant's benefit, the determination of whether any optional form of benefit is within a family of optional forms of benefit is permitted to be made disregarding elections that apply to the other portion of the participant's benefit. Similarly, if a participant can elect to receive any portion of the accrued benefit in a single sum and the remainder pursuant to a set of distribution elections, the rules of this paragraph (c) are permitted to be applied separately to the set of distribution elections that apply to the portion of the participant's accrued benefit that is not payable in a single sum (for example, for the portion of a participant's benefit that is not paid in a single sum, the determination of whether any optional form of benefit is within a family of optional forms of benefit is permitted to be made disregarding the fact that the other portion of the participant's benefit is paid in a single sum).

(d) *Permissible elimination of noncore optional forms of benefit where core options are offered*—(1) *General rule.* Except as otherwise provided in paragraph (d)(2) of this section, a plan is permitted to be amended to eliminate

an optional form of benefit for a participant with respect to benefits accrued before the applicable amendment date if—

(i) After the amendment becomes applicable, each of the core options described in paragraph (g)(5) of this section is available to the participant with respect to benefits accrued before and after the amendment;

(ii) The plan amendment is not applicable with respect to an optional form of benefit with an annuity commencement date that is earlier than 4 years after the date the amendment is adopted; and

(iii) The requirements of paragraph (e) of this section are satisfied in any case in which either:

(A) One or more of the core options are not available commencing on the same annuity commencement date as the optional form of benefit that is being eliminated; or

(B) As of the date the amendment is adopted, the actuarial present value of the benefit payable under any core option with the same annuity commencement date is less than the actuarial present value of benefits payable under the optional form of benefit that is being eliminated.

(2) *Special rules*—(i) *Treatment of certain features included in optional forms of benefit.* For purposes of applying this paragraph (d), to the extent an optional form of benefit that is being eliminated includes either a social security leveling feature or a refund of employee contributions feature, at least one of the core options must also be available with that feature, and, to the extent that the optional form of benefit that is being eliminated does not include a social security leveling feature or a refund of employee contributions feature, each of the core options must be available without that feature. For purposes of applying this paragraph (d), to the extent an optional form of benefit that is being eliminated does not include a retroactive annuity starting date feature, each of the core options must be available without that feature.

(ii) *Eliminating the most valuable option for a participant with a short life expectancy.* For purposes of applying this

paragraph (d), if the most valuable option for a participant with a short life expectancy (as defined in paragraph (g)(5)(iii) of this section) is eliminated, then, after the plan amendment, an optional form of benefit that is identical, except for differences described in paragraph (c)(3)(ii) of this section, must be available to the participant. However, such a plan amendment cannot eliminate a refund of employee contributions feature from the most valuable option for a participant with a short life expectancy.

(iii) *Single-sum distributions.* A plan amendment is not treated as satisfying this paragraph (d) if it eliminates an optional form of benefit that includes a single-sum distribution that applies with respect to at least 25% of the participant's accrued benefit as of the date the optional form of benefit is eliminated. But see § 1.411(d)-4, Q&A-2(b)(2)(v), relating to involuntary single-sum distributions for benefits with a present value not in excess of the maximum dollar amount in section 411(a)(11).

(iv) *Application of multiple amendment rule to core option rule.* Notwithstanding paragraph (a)(2)(iii)(B) of this section, if a plan is amended to eliminate an optional form of benefit using the core options rule in this paragraph (d), then the employer must wait 3 years after the first annuity commencement date for which the optional form of benefit is no longer available before making any changes to the core options offered under the plan (other than a change that is not treated as an elimination under paragraph (b)(2)(ii) of this section). Thus, for example, if a plan amendment eliminates an optional form of benefit for a participant using the core options rule under this paragraph (d), with an adoption date of January 1, 2006 and an effective date of January 1, 2010, the plan would not be permitted to be amended to make changes to the core options offered under the plan (and the core options would continue to apply with respect to the participant's accrued benefit) until January 1, 2013.

(v) *Special rule for joint and contingent annuity core option.* If a plan offers joint and contingent annuities under which a participant is entitled to a life

annuity with a survivor annuity for the individual designated by the participant (including a non-spousal contingent annuitant) with continuation percentage options of both 50% and 100% (after adjustments permitted under paragraph (g)(5)(ii) of this section to comply with applicable law), the plan is permitted to treat both of these options as core options for purposes of this paragraph (d), in lieu of a 75% joint and contingent annuity. Thus, such a plan is permitted to use the rules of this paragraph (d) if the plan satisfies all of the requirements of this paragraph (d) (taking into account the modification rule in paragraph (g)(5)(ii) of this section) other than the requirement of offering a 75% joint and contingent annuity as described in paragraph (g)(5)(i)(B) of this section.

(e) *Permissible plan amendments under paragraphs (c) and (d) eliminating or reducing section 411(d)(6)(B) protected benefits that are burdensome and of de minimis value—(1) In general.* A plan amendment that, pursuant to paragraph (c)(1)(iii) or (d)(1)(iii) of this section, is required to satisfy this paragraph (e) satisfies this paragraph (e) if—

(i) The amendment eliminates section 411(d)(6)(B) protected benefits that create significant burdens or complexities for the plan and its participants as described in paragraph (e)(2) of this section; and

(ii) The amendment does not adversely affect the rights of any participant in a more than *de minimis* manner as described in paragraph (e)(3) of this section.

(2) *Plan amendments eliminating section 411(d)(6)(B) protected benefits that create significant burdens and complexities—(i) Facts and circumstances analysis—(A) In general.* The determination of whether a plan amendment eliminates section 411(d)(6)(B) protected benefits that create significant burdens or complexities for the plan and its participants is based on facts and circumstances.

(B) *Early retirement benefits.* In the case of an amendment that eliminates an early retirement benefit, relevant factors include whether the annuity starting dates under the plan considered in the aggregate are burdensome

or complex (e.g., the number of categories of early retirement benefits, whether the terms and conditions applicable to the plan's early retirement benefits are difficult to summarize in a manner that is concise and readily understandable to the average plan participant, and whether those different early retirement benefits were added to the plan as a result of a plan merger, transfer, or consolidation), and whether the effect of the plan amendment is to reduce the number of categories of early retirement benefits.

(C) *Retirement-type subsidies and actuarial factors.* In the case of a plan amendment eliminating a retirement-type subsidy or changing the actuarial factors used to determine optional forms of benefit, relevant factors include whether the actuarial factors used for determining optional forms of benefit available under the plan considered in the aggregate are burdensome or complex (e.g., the number of different retirement-type subsidies and other actuarial factors available under the plan, whether the terms and conditions applicable to the plan's retirement-type subsidies are difficult to summarize in a manner that is concise and readily understandable to the average plan participant, whether the plan is eliminating one or more generalized optional forms, whether the plan is replacing a complex optional form of benefit that contains a retirement-type subsidy with a simpler form, and whether the different retirement-type subsidies and other actuarial factors were added to the plan as a result of a plan merger, transfer, or consolidation), and whether the effect of the plan amendment is to reduce the number of categories of retirement-type subsidies or other actuarial factors.

(D) *Example.* The following example illustrates the application of this paragraph (e)(2)(i):

Example. (i) *Facts.* Plan A is a defined benefit plan under which employees may select a distribution in the form of a straight life annuity, a straight life annuity with cost-of-living increases, a 50% qualified joint and survivor annuity with a pop-up provision, or a 10-year term certain and life annuity. On January 15, 2007, Plan A is amended, effective June 1, 2007, to eliminate the 50% qualified joint and survivor annuity with a pop-up provision as described in paragraph

(c)(3)(ii)(B)(1) of this section and replace it with a 50% qualified joint and survivor annuity without the pop-up provision (and using the same actuarial factor).

(ii) *Conclusion.* Plan A satisfies the requirements of paragraph (e)(2)(i)(B) of this section because, based on the relevant facts and circumstances (e.g., the amendment replaces a complex optional form of benefit with a simpler form), the amendment eliminates section 411(d)(6)(B) protected benefits that create significant burdens and complexities. Accordingly, the plan amendment is permitted to eliminate the pop-up provision, provided that the plan amendment satisfies all the other applicable requirements in paragraph (c) or (d) of this section. For example, the plan amendment must not eliminate the most valuable option for a participant with a short life expectancy (as defined in paragraph (g)(5)(iii) of this section) and the plan amendment must not adversely affect the rights of any participant in a more than *de minimis* manner, taking into account the actuarial factors for the joint and survivor annuity with the pop-up provision and the joint and survivor annuity without the pop-up provision, as described in paragraph (e)(3) of this section.

(ii) *Presumptions for certain amendments—(A) Presumption for amendments eliminating certain annuity starting dates.* If the annuity starting dates under the plan considered in the aggregate are burdensome or complex, then elimination of any one of the annuity starting dates is presumed to eliminate section 411(d)(6)(B) protected benefits that create significant burdens or complexities for the plan and its participants. However, if the effect of a plan amendment with respect to a set of optional forms of benefit is merely to substitute one set of annuity starting dates for another set of annuity starting dates, without any reduction in the number of different annuity starting dates, then the plan amendment does not satisfy the requirements of this paragraph (e)(2).

(B) *Presumption for amendments changing certain actuarial factors.* If the actuarial factors used for determining benefit distributions available under a generalized optional form considered in the aggregate are burdensome or complex, then replacing some of the actuarial factors for the generalized optional form is presumed to eliminate section 411(d)(6)(B) protected benefits

that create significant burdens or complexities for the plan and its participants. However, if the effect is merely to substitute one set of actuarial factors for another set of actuarial factors, without any reduction in the number of different actuarial factors or the complexity of those factors, then the plan amendment does not satisfy the requirements of this paragraph (e)(2) unless the change of actuarial factors is merely to replace one or more of the plan's actuarial factors for determining optional forms of benefit with new actuarial factors that are more accurate (e.g., reflecting more recent mortality experience or more recent market rates of interest).

(iii) *Restrictions against creating burdens or complexities.* See paragraphs (a)(2)(iii) and (b)(1)(iii) of this section for general rules applicable to multiple amendments. In accordance with these rules, a plan amendment does not eliminate a section 411(d)(6)(B) protected benefit that creates burdens and complexities for a plan and its participants if, less than 3 years earlier, a plan was previously amended to add another retirement-type subsidy in order to facilitate the elimination of the original retirement-type subsidy, even if the elimination of the other subsidy would not adversely affect the rights of any plan participant in a more than *de minimis* manner as provided in paragraph (e)(3) of this section.

(3) *Elimination of early retirement benefits or retirement-type subsidies that are de minimis—*(i) *Rules for retained optional forms of benefit under paragraph (c) of this section.* For purposes of paragraph (c) of this section, the elimination of an optional form of benefit does not adversely affect the rights of any participant in a more than *de minimis* manner if—

(A) The retained optional form of benefit described in paragraph (c) of this section has substantially the same annuity commencement date as the optional form of benefit that is being eliminated, as described in paragraph (e)(4) of this section; and

(B) Either the actuarial present value of the benefit payable in the optional form of benefit that is being eliminated does not exceed the actuarial present

value of the benefit payable in the retained optional form of benefit by more than a *de minimis* amount, as described in paragraph (e)(5) of this section, or the amendment satisfies the requirements of paragraph (e)(6) of this section relating to a delayed effective date.

(ii) *Rules for core options under paragraph (d) of this section.* For purposes of paragraph (d) of this section, the elimination of an optional form of benefit does not adversely affect the rights of any participant in a more than *de minimis* manner if, with respect to each of the core options—

(A) The core option is available after the amendment with substantially the same annuity commencement date as the optional form of benefit that is being eliminated, as described in paragraph (e)(4) of this section; and

(B) Either the actuarial present value of the benefit payable in the optional form of benefit that is being eliminated does not exceed the actuarial present value of the benefit payable under the core option by more than a *de minimis* amount, as described in paragraph (e)(5) of this section, or the amendment satisfies the requirements of paragraph (e)(6) of this section.

(4) *Definition of substantially the same annuity starting dates.* For purposes of applying paragraphs (e)(3)(i)(A) and (ii)(A) of this section, annuity starting dates are considered substantially the same if they are within 6 months of each other.

(5) *Definition of de minimis difference in actuarial present value.* For purposes of applying paragraph (e)(3)(i)(B) and (ii)(B) of this section, a difference in actuarial present value between the optional form of benefit being eliminated and the retained optional form of benefit or core option is not more than a *de minimis* amount if, as of the date the amendment is adopted, the difference between the actuarial present value of the eliminated optional form of benefit and the actuarial present value of the retained optional form of benefit or core option is not more than the greater of—

(i) 2% of the present value of the retirement-type subsidy (if any) under the eliminated optional form of benefit prior to the amendment; or

(ii) 1% of the greater of the participant's compensation (as defined in section 415(c)(3)) for the prior plan year or the participant's average compensation for his or her high 3 years (within the meaning of section 415(b)(1)(B) and (b)(3)).

(6) *Delayed effective date*—(i) *General rule.* For purposes of applying paragraph (e)(3)(i)(B) and (ii)(B) of this section, an amendment that eliminates an optional form of benefit satisfies the requirements of this paragraph (e)(6) if the elimination of the optional form of benefit is not applicable to any annuity commencement date before the end of the expected transition period for that optional form of benefit.

(ii) *Determination of expected transition period*—(A) *General rule.* The expected transition period for a plan amendment eliminating an optional form of benefit is the period that begins when the amendment is adopted and ends when it is reasonable to expect, with respect to a section 411(d)(6)(B) protected benefit (*i.e.*, not taking into account benefits that accrue in the future), that the form being eliminated would be subsumed by another optional form of benefit after taking into account expected future benefit accruals.

(B) *Determination of expected transition period using conservative actuarial assumptions.* The expected transition period for a plan amendment eliminating an optional form of benefit must be determined in accordance with actuarial assumptions that are reasonable at the time of the amendment and that are conservative (*i.e.*, reasonable actuarial assumptions that are likely to result in the longest period of time until the eliminated optional form of benefit would be subsumed). For this purpose, actuarial assumptions are not treated as conservative unless they include assumptions that a participant's compensation will not increase and that future benefit accruals will not exceed accruals in recent periods.

(C) *Effect of subsequent amendments reducing future benefit accruals on the expected transition period.* If, during the expected transition period for a plan amendment eliminating an optional form of benefit, the plan is subsequently amended to reduce the rate of future benefit accrual (or otherwise to

lengthen the expected transition period), thus that subsequent plan amendment must provide that the elimination of the optional form of benefit is void or must provide for the effective date for elimination of the optional form of benefit to be further extended to a new expected transition period that satisfies this paragraph (e)(6) taking into account the subsequent amendment.

(iii) *Applicability of the delayed effective date rule limited to employees who continue to accrue benefits through the end of expected transition period.* An amendment eliminating an optional form of benefit under this paragraph (e)(6) must be limited to participants who continue to accrue benefits under the plan through the end of the expected transition period. Thus, for example, the plan amendment may not apply to any participant who has a severance from employment during the expected transition period.

(iv) *Special rule for section 204(h) notice.* See § 54.4980F-1(b), Q&A-8(c) of this chapter for a special rule relating to this paragraph (e)(6).

(f) *Utilization test*—(1) *General rule.* A plan is permitted to be amended to eliminate all of the optional forms of benefit that comprise a generalized optional form (as defined in paragraph (g)(8) of this section) for a participant with respect to benefits accrued before the applicable amendment date if—

(i) None of the optional forms of benefit being eliminated is a core option, within the meaning of paragraph (g)(5) of this section;

(ii) The plan amendment is not applicable with respect to an optional form of benefit with an annuity commencement date that is earlier than the number of days in the maximum Qualified Joint and Survivor Annuity explanation period (as defined in paragraph (g)(9) of this section) after the date the amendment is adopted;

(iii) During the look-back period—

(A) The generalized optional form has been available to at least the applicable number of participants who are taken into account under paragraph (f)(3) and (4) of this section; and

(B) No participant has elected any optional form of benefit that is part of the generalized optional form with an

annuity commencement date that is within the look-back period.

(2) *Look-back period*—(i) *In general.* For purposes of this paragraph (f), the look-back period is the period that includes—

(A) The portion of the plan year in which such plan amendment is adopted that precedes the date of adoption (the pre-adoption period); and

(B) The 2 plan years immediately preceding the pre-adoption period.

(ii) *Special look-back period rules*—(A) *12-month plan year.* In the look-back period, at least 1 of the plan years must be a 12-month plan year.

(B) *Permitted 3-month exclusion in the pre-adoption period.* A plan is permitted to exclude from the look-back period the calendar month in which the amendment is adopted and the preceding 1 or 2 calendar months to the extent those preceding months are contained within the pre-adoption period.

(C) *Permission to extend the look-back period.* In order to have a look-back period that satisfies the minimum applicable number of participants requirement in paragraph (f)(1)(iii)(A) of this section, the look-back period described in paragraph (f)(2)(i)(B) of this section is permitted to be expanded, so as to include the 3, 4, or 5 plan years immediately preceding the plan year in which the amendment is adopted. Thus, in determining the look-back period, a plan is permitted to substitute the 3, 4, or 5 plan years immediately preceding the pre-adoption period for the 2 plan years described in paragraph (f)(2)(i)(B) of this section. However, if a plan does not satisfy the minimum applicable number of participants requirement of paragraph (f)(1)(iii)(A) of this section using the pre-adoption period and the immediately preceding 5 plan years, the plan is not permitted to be amended in accordance with the utilization test in this paragraph (f).

(3) *Participants taken into account.* A participant is taken into account for purposes of this paragraph (f) only if the participant was eligible to elect to commence payment of an optional form of benefit that is part of the generalized optional form being eliminated with an annuity commencement date that is within the look-back period.

However, a participant is not taken into account if the participant—

(i) Did not elect any optional form of benefit with an annuity commencement date that was within the look-back period;

(ii) Elected an optional form of benefit that included a single-sum distribution that applied with respect to at least 25% of the participant's accrued benefit;

(iii) Elected an optional form of benefit that was only available during a limited period of time and that contained a retirement-type subsidy where the subsidy that is part of the generalized optional form being eliminated was not extended to any optional form of benefit with the same annuity commencement date; or

(iv) Elected an optional form of benefit with an annuity commencement date that was more than 10 years before normal retirement age.

(4) *Determining the applicable number of participants.* For purposes of applying the rules in this paragraph (f), the applicable number of participants is 50 participants. However, notwithstanding paragraph (f)(3)(ii) of this section, a plan is permitted to take into account any participant who elected an optional form of benefit that included a single-sum distribution that applied with respect to at least 25% of the participant's accrued benefit, but only if the applicable number of participants is increased to 1,000 participants.

(5) *Default elections.* For purposes of this paragraph (f), an election includes the payment of an optional form of benefit that applies in the absence of an affirmative election.

(g) *Definitions and use of terms.* The definitions in this paragraph (g) apply for purposes of this section.

(1) *Actuarial present value.* The term *actuarial present value* means actuarial present value (within the meaning of § 1.401(a)(4)-12) determined using reasonable actuarial assumptions.

(2) *Ancillary benefit.* The term *ancillary benefit* means—

(i) A social security supplement under a defined benefit plan (other than a QSUPP as defined in § 1.401(a)(4)-12);

(ii) A benefit payable under a defined benefit plan in the event of disability

(to the extent that the benefit exceeds the benefit otherwise payable), but only if the total benefit payable in the event of disability does not exceed the maximum qualified disability benefit, as defined in section 411(a)(9);

(iii) A life insurance benefit;

(iv) A medical benefit described in section 401(h);

(v) A death benefit under a defined benefit plan other than a death benefit which is a part of an optional form of benefit; or

(vi) A plant shutdown benefit or other similar benefit in a defined benefit plan that does not continue past retirement age and does not affect the payment of the accrued benefit, but only to the extent that such plant shutdown benefit, or other similar benefit (if any), is permitted in a qualified pension plan (see § 1.401-1(b)(1)(i)).

(3) *Annuity commencement date.* The term *annuity commencement date* generally means the annuity starting date, except that, in the case of a retroactive annuity starting date under section 417(a)(7), *annuity commencement date* means the date of the first payment of benefits pursuant to a participant election of a retroactive annuity starting date, as defined in § 1.417(e)-1(b)(3)(iv).

(4) *Applicable amendment date.* The term *applicable amendment date*, with respect to a plan amendment, means the later of the effective date of the amendment or the date the amendment is adopted.

(5) *Core options*—(i) *General rule.* With respect to a plan, the term *core options* means—

(A) A straight life annuity generalized optional form under which the participant is entitled to a level life annuity with no benefit payable after the participant's death;

(B) A 75% joint and contingent annuity generalized optional form under which the participant is entitled to a life annuity with a survivor annuity for any individual designated by the participant (including a non-spousal contingent annuitant) that is 75% of the amount payable during the participant's life (but see paragraph (d)(2)(v) of this section for a special rule relating to the joint and contingent annuity core option);

(C) A 10-year term certain and life annuity generalized optional form under which the participant is entitled to a life annuity with a guarantee that payments will continue to any person designated by the participant for the remainder of a fixed period of 10 years if the participant dies before the end of the 10-year period; and

(D) The most valuable option for a participant with a short life expectancy (as defined in paragraph (g)(5)(iii) of this section).

(ii) *Modification of core options to satisfy other requirements.* An annuity does not fail to be a core option (e.g., a joint and contingent annuity described in paragraph (g)(5)(i)(B) of this section or a 10-year term certain and life annuity described in paragraph (g)(5)(i)(C) of this section) as a result of differences to comply with applicable law, such as limitations on death benefits to comply with the incidental benefit requirement of § 1.401-1(b)(1)(i) or on account of the spousal consent rules of section 417.

(iii) *Most valuable option for a participant with a short life expectancy*—(A) *General definition.* Except as provided in paragraph (g)(5)(iii)(B) of this section, *most valuable option for a participant with a short life expectancy* means, for an annuity starting date, the optional form of benefit that is reasonably expected to result in payments that have the largest actuarial present value in the case of a participant who dies shortly after the annuity starting date, taking into account both payments due to the participant prior to the participant's death and any payments due after the participant's death. For this purpose, a plan is permitted to assume that the spouse of the participant is the same age as the participant. In addition, a plan is permitted to assume that the optional form of benefit that is the most valuable option for a participant with a short life expectancy when the participant is age 70½ also is the most valuable option for a participant with a short life expectancy at all older ages, and that the most valuable option for a participant with a short life expectancy at age 55 is the most valuable option for a participant with a short life expectancy at all younger ages.

(B) *Safe harbor hierarchy*—(1) A plan is permitted to treat a single-sum distribution option with an actuarial present value that is not less than the actuarial present value of any optional form of benefit eliminated by the plan amendment as the most valuable option for a participant with a short life expectancy for all of a participant's annuity starting dates if such single-sum distribution option is available at all such dates, without regard to whether the option was available before the plan amendment.

(2) If the plan before the amendment does not offer a single-sum distribution option as described in paragraph (g)(5)(iii)(B)(1) of this section, a plan is permitted to treat a joint and contingent annuity with a continuation percentage that is at least 75% and that is at least as great as the highest continuation percentage available before the amendment as the most valuable option for a participant with a short life expectancy for all of a participant's annuity starting dates if such joint and contingent annuity is available at all such dates, without regard to whether the option was available before the plan amendment.

(3) If the plan before the amendment offers neither a single-sum distribution option as described in paragraph (g)(5)(iii)(B)(1) of this section nor a joint and contingent annuity with a continuation percentage as described in paragraph (g)(5)(iii)(B)(2) of this section, a plan is permitted to treat a term certain and life annuity with a term certain period no less than 15 years as the most valuable option for a participant with a short life expectancy for each annuity starting date if such 15-year term certain and life annuity is available at all annuity starting dates, without regard to whether the option was available before the plan amendment.

(6) *Definitions of types of section 411(d)(6)(B) protected benefits*—(i) *Early retirement benefit*. The term *early retirement benefit* means the right, under the terms of a plan, to commence distribution of a retirement-type benefit at a particular date after severance from employment with the employer and before normal retirement age. Different

early retirement benefits result from differences in terms relating to timing.

(ii) *Optional form of benefit*—(A) *In general*. The term *optional form of benefit* means a distribution alternative (including the normal form of benefit) that is available under the plan with respect to an accrued benefit or a distribution alternative with respect to a retirement-type benefit. Different optional forms of benefit exist if a distribution alternative is not payable on substantially the same terms as another distribution alternative. The relevant terms include all terms affecting the value of the optional form, such as the method of benefit calculation and the actuarial factors or assumptions used to determine the amount distributed. Thus, for example, different optional forms of benefit may result from differences in terms relating to the payment schedule, timing, commencement, medium of distribution (*e.g.*, in cash or in kind), election rights, differences in eligibility requirements, or the portion of the benefit to which the distribution alternative applies. Likewise, differences in the normal retirement ages of employees or in the form in which the accrued benefit of employees is payable at normal retirement age under a plan are taken into account in determining whether a distribution alternative constitutes one or more optional forms of benefit.

(B) *Death benefits*. If a death benefit is payable after the annuity starting date for a specific optional form of benefit and the same death benefit would not be provided if another optional form of benefit were elected by a participant, then that death benefit is part of the specific optional form of benefit and is thus protected under section 411(d)(6). A death benefit is not treated as part of a specific optional form of benefit merely because the same benefit is not provided to a participant who has received his or her entire accrued benefit prior to death. For example, a \$5,000 death benefit that is payable to all participants except any participant who has received his or her accrued benefit in a single-sum distribution is not part of a specific optional form of benefit.

(iii) *Retirement-type benefit*. The term *retirement-type benefit* means—

(A) The payment of a distribution alternative with respect to an accrued benefit; or

(B) The payment of any other benefit under a defined benefit plan (including a QSUPP as defined in § 1.401(a)(4)-12) that is permitted to be in a qualified pension plan, continues after retirement, and is not an ancillary benefit.

(iv) *Retirement-type subsidy*. The term *retirement-type subsidy* means the excess, if any, of the actuarial present value of a retirement-type benefit over the actuarial present value of the accrued benefit commencing at normal retirement age or at actual commencement date, if later, with both such actuarial present values determined as of the date the retirement-type benefit commences. Examples of retirement-type subsidies include a subsidized early retirement benefit and a subsidized qualified joint and survivor annuity.

(v) *Subsidized early retirement benefit or early retirement subsidy*. The terms *subsidized early retirement benefit* or *early retirement subsidy* mean the right, under the terms of a plan, to commence distribution of a retirement-type benefit at a particular date after severance from employment with the employer and before normal retirement age where the actuarial present value of the optional forms of benefit available to the participant under the plan at that annuity starting date exceeds the actuarial present value of the accrued benefit commencing at normal retirement age (with such actuarial present values determined as of the annuity starting date). Thus, an early retirement subsidy is an early retirement benefit that provides a retirement-type subsidy.

(7) *Eliminate; elimination; reduce; reduction*. The terms *eliminate* or *elimination* when used in connection with a section 411(d)(6)(B) protected benefit mean to eliminate or the elimination of an optional form of benefit or an early retirement benefit and to reduce or a reduction in a retirement-type subsidy. The terms *reduce* or *reduction* when used in connection with a retirement-type subsidy mean to reduce or a reduction in the amount of the subsidy. For purposes of this section, an *elimination* includes a *reduction* and a *reduction* includes an *elimination*.

nation includes a *reduction* and a *reduction* includes an *elimination*.

(8) *Generalized optional form*. The term *generalized optional form* means a group of optional forms of benefit that are identical except for differences due to the actuarial factors that are used to determine the amount of the distributions under those optional forms of benefit and the annuity starting dates.

(9) *Maximum QJSA explanation period*. The term *maximum QJSA explanation period* means the maximum number of days before an annuity starting date for a qualified joint and survivor annuity for which a written explanation relating to the qualified joint and survivor annuity would satisfy the timing requirements of section 417(a)(3) and § 1.417(e)-1(b)(3)(ii).

(10) *Other right and feature*. The term *other right or feature* has the meaning set forth at § 1.401(a)(4)-4(e)(3)(ii).

(11) *Refund of employee contributions feature*. The term *refund of employee contributions features* means a feature with respect to an optional form of benefit that provides for employee contributions and interest thereon to be paid in a single sum at the annuity starting date with the remainder to be paid in another form beginning on that date.

(12) *Retirement; retirement age*. For purposes of this section, the date of *retirement* means the annuity starting date. Thus, *retirement age* means a participant's age at the annuity starting date.

(13) *Retroactive annuity starting date feature*. The term *retroactive annuity starting date* feature means a feature with respect to an optional form of benefit under which the annuity starting date for the distribution occurs on or before the date the written explanation required by section 417(a)(3) is provided to the participant.

(14) *Section 411(d)(6) protected benefit*. The term *section 411(d)(6) protected benefit* means the accrued benefit of a participant as of the applicable amendment date described in section 411(d)(6)(A) and any section 411(d)(6)(B) protected benefit.

(15) *Section 411(d)(6)(B) protected benefit*. The term *section 411(d)(6)(B) protected benefit* means the portion of an early retirement benefit, a retirement-

type subsidy, or an optional form of benefit attributable to benefits accrued before the applicable amendment date.

(16) *Social security leveling feature.* The term *social security leveling feature* means a feature with respect to an optional form of benefit commencing prior to a participant's expected commencement of social security benefits that provides for a temporary period of higher payments which is designed to result in an approximately level amount of income when the participant's estimated old age benefits from Social Security are taken into account.

(h) *Examples.* The following examples illustrate the application of paragraphs (c) through (g) of this section:

Example 1. (i) Facts involving elimination of optional forms of benefit as redundant. Plan C is a defined benefit plan under which employees may elect to commence distributions at any time after the later of termination of employment or attainment of age 55. At each potential annuity commencement date, Plan C permits employees to select, with spousal consent where required, a straight life annuity or any of a number of actuarially equivalent alternative forms of payment, including a straight life annuity with cost-of-living increases and a joint and contingent annuity with the participant having the right to select any beneficiary and any continuation percentage from 1% to 100%, subject to modification to the extent necessary to satisfy the requirements of the incidental benefit requirement of § 1.401-1(b)(1)(i). The amount of any alternative payment is determined as the actuarial equivalent of the straight life annuity payable at the same age using reasonable actuarial assumptions. On June 2, 2006, Plan C is amended to delete all continuation percentages for joint and contingent options other than 25%, 50%, 75%, or 100%, effective with respect to annuity commencement dates that are on or after January 1, 2007.

(ii) *Conclusion—(A) Categorization of family members under the redundancy rule.* The optional forms of benefit described in paragraph (i) of this *Example 1* are members of 4 families: a straight life annuity; a straight life annuity with cost-of-living increases; joint and contingent options with continuation percentages of less than 50%; and joint and contingent options with continuation percentages of 50% or more. The amendment does not affect either of the first 2 families, but affects the 2 families relating to joint and contingent options.

(B) *Conclusion for elimination of optional forms of benefit as redundant.* The amendment satisfies the requirements of paragraph (c) of this section. First, the eliminated optional

forms of benefit are redundant with respect to the retained optional forms of benefit because each eliminated joint and contingent annuity option with a continuation percentage of less than 50% is redundant with respect to the 25% continuation option and each eliminated joint and contingent annuity option with a continuation percentage of 50% or higher is redundant with respect to any one of the retained 50%, 75%, or 100% continuation options. In addition, to the extent that the optional form of benefit that is being eliminated does not include a social security leveling feature, return of employee contribution feature, or retroactive annuity starting date feature, the retained optional form of benefit does not include that feature. Second, the amendment is not effective with respect to annuity commencement dates before September 1, 2006, as required under paragraph (c)(1)(ii) of this section. Third, the plan amendment does not eliminate any available core option, including the most valuable option for a participant with a short life expectancy, treating a joint and contingent annuity with a 100% continuation percentage as this optional form of benefit pursuant to paragraph (g)(5)(iii)(B)(2) of this section. Finally, the amendment need not satisfy the requirements of paragraph (e) of this section because the retained optional forms of benefit are available on the same annuity commencement dates and have the same actuarial present value as the optional forms of benefit that are being eliminated.

Example 2. (i) Facts involving elimination of optional forms of benefit as redundant if additional restrictions are imposed. The facts are the same as *Example 1*, except that the plan amendment also restricts the class of beneficiaries that may be elected under the 4 retained joint and contingent annuities to the employee's spouse.

(ii) *Conclusion.* The amendment fails to satisfy the requirements of paragraph (c)(2)(i)(B) of this section because the retained joint and contingent annuities have materially greater restrictions on the beneficiary designation than did the eliminated joint and contingent annuities. Thus, the joint and contingent annuities being eliminated are not redundant with respect to the retained joint and contingent annuities. In addition, the amendment fails to satisfy the requirements of the core option rules in paragraph (d) of this section because the amendment fails to be limited to annuity commencement dates that are at least 4 years after the date the amendment is adopted, the amendment fails to include the core option in paragraph (g)(5)(i)(B) of this section because the participant does not have the right to designate any beneficiary, and the amendment fails to include the core option described in paragraph (g)(5)(i)(C) of this section because the plan does not provide a 10-year term certain and life annuity.

Example 3. (i) Facts involving elimination of a social security leveling feature and a period certain annuity as redundant. Plan D is a defined benefit plan under which participants may elect to commence distributions in the following actuarially equivalent forms, with spousal consent if applicable: a straight life annuity; a 50%, 75%, or 100% joint and contingent annuity; a 5-year, 10-year, or a 15-year term certain and life annuity; and an installment refund annuity (*i.e.*, an optional form of benefit that provides a period certain, the duration of which is based on the participant's age), with the participant having the right to select any beneficiary. In addition, each annuity offered under the plan, if payable to a participant who is less than age 65, is available both with and without a social security leveling feature. The social security leveling feature provides for an assumed commencement of social security benefits at any age selected by the participant between age 62 and 65. Plan D is amended on June 2, 2006, effective as of January 1, 2007, to eliminate the installment refund form of benefit and to restrict the social security leveling feature to an assumed social security commencement age of 65.

(ii) *Conclusion.* The amendment satisfies the requirements of paragraph (c) of this section. First, the installment refund annuity option is redundant with respect to the 15-year certain and life annuity (except for advanced ages where, because of shorter life expectancies, the installment refund annuity option is redundant with respect to the 5-year certain and life annuity and also redundant with respect to the 10-year certain and life annuity). Second, with respect to restricting the social security leveling feature to an assumed social security commencement age of 65, under paragraph (c)(3)(ii)(C) of this section, straight life annuities with social security leveling features that have different social security commencement ages are treated as members of the same family as straight life annuities without social security leveling features. To the extent an optional form of benefit that is being eliminated includes a social security leveling feature, the retained optional form of benefit must also include that feature, but it is permitted to have a different assumed age for commencement of social security benefits. Third, to the extent that the optional form of benefit that is being eliminated does not include a social security leveling feature, a return of employee contribution feature, or retroactive annuity starting date feature, the retained optional form of benefit must not include that feature. Fourth, the plan amendment does not eliminate any available core option, including the most valuable option for a participant with a short life expectancy, treating a joint and contingent annuity with a 100% continuation percentage as this optional form of benefit pursuant to

paragraph (g)(5)(iii)(B)(2) of this section. Fifth, the amendment is not effective with respect to annuity commencement dates before September 1, 2006, as required under paragraph (c)(1)(ii) of this section. The amendment need not satisfy the requirements of paragraph (e) of this section because the retained optional forms of benefit are available on the same annuity commencement dates and have the same actuarial present value as the optional forms of benefit that are being eliminated.

Example 4. (i) Facts involving elimination of noncore options. Employer N sponsors Plan E, a defined benefit plan that permits every participant to elect payment in the following actuarially equivalent optional forms of benefit (Plan E's uniformly available options), with spousal consent if applicable: a straight life annuity; a 50%, 75%, or 100% joint and contingent annuity with no restrictions on designation of beneficiaries; and a 5-, 10-, or 15-year term certain and life annuity. In addition, each can be elected in conjunction with a social security leveling feature, with the participant permitted to select a social security commencement age from age 62 to age 67. None of Plan E's uniformly available options include a single-sum distribution. The plan has been in existence for over 30 years, during which time Employer N has acquired a large number of other businesses, including merging over 20 defined benefit plans of acquired entities into Plan E. Many of the merged plans offered optional forms of benefit that were not among Plan E's uniformly available options, including some plans funded through insurance products, often offering all of the insurance annuities that the insurance carrier offers, and with some of the merged plans offering single-sum distributions. In particular, under the XYZ acquisition that occurred in 1990, the XYZ acquired plan offered a single-sum distribution option that was frozen at the time of the acquisition. On April 1, 2006, each single-sum distribution option applies to less than 25% of the XYZ participants' accrued benefits. Employer N has generally, but not uniformly, followed the practice of limiting the optional forms of benefit for an acquired unit to an employee's service before the date of the merger, and has uniformly followed this practice with respect to each of the early retirement subsidies in the acquired unit's plan. As a result, as of April 1, 2007, Plan E includes a large number of generalized optional forms which are not members of families of optional forms of benefit identified in paragraph (c)(4) of this section, but there are no participants who are entitled to any early retirement subsidies because any subsidies have been subsumed by the actuarially reduced accrued benefit. Plan E is amended in April of 2007 to eliminate all of the optional forms of benefit that Plan E offers other

than Plan E's uniformly available options, except that the amendment does not eliminate any single-sum distribution option except with respect to XYZ participants and permits any commencement date that was permitted under Plan E before the amendment. Plan E also eliminates the single-sum distribution option for XYZ participants. Further, each of Plan E's uniformly available options has an actuarial present value that is not less than the actuarial present value of any optional form of benefit offered before the amendment. The amendment is effective with respect to annuity commencement dates that are on or after May 1, 2011.

(ii) *Conclusion.* The amendment satisfies the requirements of paragraph (d) of this section. First, Plan E, as amended, does not eliminate any single-sum distribution option as provided in paragraph (d)(2)(iii) of this section except for single-sum distribution options that apply to less than 25% of a plan participant's accrued benefit as of the date the option is eliminated (May 1, 2011). Second, Plan E, as amended, includes each of the core options as defined in paragraph (g)(5) of this section, including offering the most valuable option for a participant with a short life expectancy (treating the 100% joint and contingent annuity as this benefit, under paragraph (g)(5)(iii)(B)(2) of this section). The 100% joint and contingent annuity option (and not the grandfathered single-sum distribution option) is the most valuable option for a participant with a short life expectancy because the grandfathered single-sum distribution option is not available with respect to a participant's entire accrued benefit. In addition, as required under paragraph (d)(2) of this section, to the extent an optional form of benefit that is being eliminated includes either a social security leveling feature or a refund of employee contributions feature, at least one of the core options is available with that feature and, to the extent that the optional form of benefit that is being eliminated does not include a social security leveling feature or a refund of employee contributions feature, each of the core options is available without that feature. Third, the amendment is not effective with respect to annuity commencement dates that are less than 4 years after the date the amendment is adopted. Finally, the amendment need not satisfy the requirements of paragraph (e) of this section because the retained optional forms of benefit are available on the same annuity commencement date and have the same actuarial present value as the optional forms of benefit that are being eliminated. The conclusion that the amendment satisfies the requirements of paragraph (d) of this section

assumes that no amendments are made to change the core options before May 1, 2014.

Example 5. (i) *Facts involving reductions in actuarial present value.* (A) Plan F is a defined benefit plan providing an accrued benefit of 1% of the average of a participant's highest 3 consecutive years' pay times years of service, payable as a straight life annuity beginning at the normal retirement age at age 65. Plan F permits employees to elect to commence actuarially reduced distributions at any time after the later of termination of employment or attainment of age 55. At each potential annuity commencement date, Plan F permits employees to select, with spousal consent, either a straight life annuity, a joint and contingent annuity with the participant having the right to select any beneficiary and a continuation percentage of 50%, 66 2/3%, 75%, or 100%, or a 10-year certain and life annuity with the participant having the right to select any beneficiary, subject to modification to the extent necessary to satisfy the requirements of the incidental benefit requirement of § 1.401-1(b)(1)(i). The amount of any joint and contingent annuity and the 10-year certain and life annuity is determined as the actuarial equivalent of the straight life annuity payable at the same age using reasonable actuarial assumptions. The plan covers employees at 4 divisions, one of which, Division X, was acquired on January 1, 1999. The plan provides for distributions before normal retirement age to be actuarially reduced, but, if a participant retires after attainment of age 55 and completion of 10 years of service, the applicable early retirement reduction factor is 3% per year for the years between age 65 and 62 and 6% per year for the ages from 62 to 55 for all employees at any division, except for employees who were in Division X on January 1, 1999, for whom the early retirement reduction factor for retirement after age 55 and 10 years of service is 5% for each year before age 65. On June 2, 2006, effective January 1, 2007, Plan F is amended to change the early retirement reduction factors for all employees of Division X to be the same as for other employees, effective with respect to annuity commencement dates that are on or after January 1, 2008, but only with respect to participants who are employees on or after January 1, 2008 and only if Plan F continues accruals at the current rate through January 1, 2008 (or the effective date of the change in reduction factors is delayed to reflect the change in the accrual rate). For purposes of this *Example 5*, it is assumed that an actuarially equivalent early retirement factor would have a reduction shown in column 4 of the following table, which compares the reduction factors for Division X before and after the amendment:

Age (1)	Old division X factor (as a %) (2)	New factor (as a %) (3)	Actuarially equiv- alent factor (as a %) (4)	Column 3 minus column 2 (5)
65	NA	NA	NA	NA
64	95	97	91.1	+2
63	90	94	83.2	+4
62	85	91	76.1	+5
61	80	85	69.8	+5
60	75	79	64.1	+4
59	70	73	59.0	+3
58	65	67	54.3	+2
57	60	61	50.1	+1
56	55	55	46.3	0
55	50	49	42.8	-1

(B) On January 1, 2007, the employee with the largest number of years of service is Employee E, who is age 54 and has 20 years of service. For 2006, Employee E's compensation is \$80,000 and E's highest 3 consecutive years of pay on January 1, 2007 is \$75,000. Employee E's accrued benefit as of the January 1, 2007 effective date of the amendment is a life annuity of \$15,000 per year at normal retirement age (1% times \$75,000 times 20 years of service) and E's early retirement benefit commencing at age 55 has a present value of \$91,397 as of January 1, 2007. It is assumed for purposes of this example that the longest expected transition period for any active employee does not exceed 5 months (20 years and 5 months, times 1% times 49% exceeds 20 years times 1% times 50%). Finally, it is assumed for purposes of this example that the amendment reduces optional forms of benefit which are burdensome or complex.

(ii) *Conclusion concerning application of section 411(d)(6)(B).* The amendment reducing the early retirement factors has the effect of eliminating the existing optional forms of benefit (where the amount of the benefit is based on preamendment early retirement factors in any case where the new factors result in a smaller amount payable) and adding new optional forms of benefit (where the amount of benefit is based on the different early retirement factors). Accordingly, the elimination must satisfy the requirements of paragraph (c) or (d) of this section if the amount payable at any date is less than would have been payable under the plan before the amendment.

(iii) *Conclusion concerning application of redundancy rules.* The amendment satisfies the requirements of paragraph (c)(1)(i) and (ii) of this section (see paragraphs (iv) through (vi) of this Example 5 below for the requirements of paragraph (c)(1)(iii) of this section). First, with respect to each eliminated optional form of benefit (i.e., with respect to each optional form of benefit with the Old Division X Factor), after the amendment there is a retained optional form of benefit that is in the same family of optional forms of benefit (i.e., the optional form of benefit with the

New Factor). Second, the amendment is not effective with respect to annuity commencement dates that are less than the time period required under paragraph (c)(1)(ii) of this section. Third, to the extent that the plan amendment eliminates the most valuable option for a participant with a short life expectancy, the retained optional form of benefit is identical except for differences in actuarial factors.

(iv) *Conclusion concerning application of the requirements under paragraph (e) of this section.* The plan amendment must satisfy the requirements of paragraph (e) of this section because, as of the December 2, 2006 adoption date, the actuarial present value of the early retirement subsidy is less than the actuarial present value of the early retirement subsidy being eliminated. The plan amendment satisfies the requirements under paragraph (e)(1)(i) and (2) of this section because the amendment eliminates optional forms of benefit that create significant burdens or complexities for the plan and its participants. See below for the *de minimis* requirement under paragraph (e)(1)(ii) and (3) of this section.

(v) *Conclusion concerning application of de minimis rules under paragraph (e)(5) of this section.* In order to satisfy the requirements under paragraph (e)(1)(ii) and (3) of this section, the amendment must satisfy the requirements of either paragraph (e)(5) or paragraph (e)(6) of this section. The amendment does not satisfy the requirements of paragraph (e)(5) of this section because the reduction in the actuarial present value is more than a *de minimis* amount under paragraph (e)(5) of this section. For example, for Employee E, the amount of the joint and contingent annuity payable at age 55 is reduced from \$7,500 (50% of \$15,000) to \$7,350 (49% of \$15,000) and the reduction in present value as a result of the amendment is \$1,828 (\$91,397—\$89,569). In this case, the retirement-type subsidy at age 55 is the excess of the present value of the 50% early retirement benefit over the present value of the deferred payment of the accrued benefit, or \$13,921 (\$97,269—\$83,348) and the present value at age

54 of the retirement-type subsidy is \$13,081. The reduction in present value is more than the greater of 2% of the present value of the retirement-type subsidy and 1% of E's compensation because the reduction in present value exceeds \$800 (the greater of \$262, which is 2% of the present value of the retirement-type subsidy for the benefit being eliminated, and \$800, which is 1% of E's compensation of \$80,000).

(vi) *Conclusion involving application of de minimis rules under paragraph (e)(6) of this section relating to expected transition period.* The amendment satisfies the requirements of paragraph (e)(6) of this section and, thus, satisfies the requirements of paragraph (c) of this section, including the requirement in paragraph (c)(1)(iii) of this section that paragraph (e) of this section be satisfied. First, as assumed under the facts above, the amendment reduces optional forms of benefit that are burdensome or complex. Second, the plan amendment is not effective for annuity commencement dates before January 1, 2008, and that date is not earlier than the longest expected transition period for any participant in Plan F on the date of the amendment. Third, the amendment does not apply to any participant who has a severance from employment during the transition period. If, however, a later plan amendment reduces accruals under Plan F, the initial plan amendment will no longer satisfy the requirements of paragraph (e)(6) of this section (and must be voided) unless, as part of the later amendment, the expected transition period is extended to reflect the reduction in accruals under Plan F.

Example 6. (i) *Facts involving elimination of noncore options using utilization test—(A) In general.* Plan G is a calendar year defined benefit plan under which participants may elect to commence distributions after termination of employment in the following actuarially equivalent forms, with spousal consent, if applicable: a straight life annuity; a 50%, 75%, or 100% joint and contingent annuity; or a 5-year, 10-year, or a 15-year term certain and life annuity. A participant is permitted to elect a single-sum distribution if the present value of the participant's nonforfeitable accrued benefit is not greater than \$5,000. The annuities offered under the plan are generally available both with and without a social security leveling feature. The social security leveling feature provides for an assumed commencement of social security benefits at any age selected by the participant between the ages of 62 and 67. Under Plan G, the normal retirement age is defined as age 65.

(B) *Utilization test.* In 2007, the plan sponsor of Plan G, after reviewing participants' benefit elections, determines that, during the period from January 1, 2005, through June 30, 2007, no participant has elected a 5-year term certain and life annuity with a social secu-

rity leveling option. During that period, Plan G has made the 5-year term certain and life annuity with a social security leveling option available to 142 participants who were at least age 55 and who elected optional forms of benefit with an annuity commencement dates during that period. In addition, during that period, 20 of the 142 participants elected a single-sum distribution and there was no retirement-type subsidy available for a limited period of time. Plan G, in accordance with paragraph (f)(1) of this section, is amended on September 15, 2007, effective as of January 1, 2008, to eliminate all 5-year term certain and life annuities with a social security leveling option for all annuity commencement dates on or after January 1, 2008.

(ii) *Conclusion.* The amendment satisfies the requirements of paragraph (f) of this section. First, the 5-year term certain and life annuity with a social security leveling option is not a core option as defined in paragraph (g)(5) of this section. Second, the plan amendment is not applicable with respect to an optional form of benefit with an annuity commencement date that is earlier than the number of days in the maximum QJSA explanation period after the date the amendment is adopted. Third, the 5-year term certain and life annuity with a social security leveling option has been available to at least 50 participants who are taken into account for purposes of paragraph (f) of this section during the look-back period. Fourth, during the look-back period, no participant elected any optional form that is part of the generalized optional form being eliminated (for example, the 5-year term and life annuity with a social security leveling option).

(i) [Reserved]

(j) *Effective dates—(1) General effective date.* Except as otherwise provided in this paragraph (j), the rules of this section apply to amendments adopted on or after August 12, 2005.

(2) *Effective date for rules relating to contingent event benefits.* Paragraph (b)(1)(ii) of this section applies to amendments adopted after December 31, 2005.

(3) *Effective dates for rules relating to section 411(a) nonforfeatability provisions—(i) Application of suspension of benefit rules to section 411(d)(6) protected benefits.* With respect to a plan amendment that places greater restrictions or conditions on a participant's rights to section 411(d)(6) protected benefits by adding or modifying a plan provision relating to suspension of benefit payments during a period of employment or reemployment, the rules provided in paragraph (a)(3) of this section

apply to periods beginning on or after June 7, 2004.

(ii) *Application of section 411(a) non-forfeiture provisions to section 411(d)(6) protected benefits.* With respect to a plan amendment that places greater restrictions or conditions on a participant's rights to section 411(d)(6) protected benefits other than a plan amendment described in paragraph (j)(3)(i) of this section, the rules provided in paragraph (a)(3) of this section apply to plan amendments adopted after August 9, 2006.

(4) *Effective date for change to redundancy rule regarding bifurcation of benefits.* The rules provided in paragraph (c)(6) of this section are applicable for amendments adopted after August 9, 2006.

(5) *Effective date for rules relating to utilization test.* The rules provided in paragraph (f) of this section are applicable for amendments adopted after December 31, 2006.

[T.D. 9219, 70 FR 47116, Aug. 12, 2005, as amended by T.D. 9280, 71 FR 45383, Aug. 9, 2006; 71 FR 55108, Sept. 21, 2006]

§ 1.411(d)-4 Section 411(d)(6) protected benefits.

Q-1: What are "section 411(d)(6) protected benefits"?

A-1: (a) *In general.* The term "section 411(d)(6) protected benefit" includes any benefit that is described in one or more of the following categories—

(1) Benefits described in section 411(d)(6)(A),

(2) Early retirement benefits (as defined in § 1.411(d)-3(g)(6)(i)) and retirement-type subsidies (as defined in § 1.411(d)-3(g)(6)(iv)), and

(3) Optional forms of benefit described in section 411(d)(6)(B)(ii).

Such benefits, to the extent they have accrued, are subject to the protection of section 411(d)(6) and, where applicable, the definitely determinable requirement of section 401(a) (including section 401(a)(25)) and cannot, therefore, be reduced, eliminated, or made subject to employer discretion except to the extent permitted by regulations.

(b) *Optional forms of benefit—(1) In general.* The term *optional form of benefit* has the same meaning as in § 1.411(d)-3(g)(6)(ii). Under this definition, different optional forms of benefit

exist if a distribution alternative is not payable on substantially the same terms as another distribution alternative. Thus, for example, different optional forms of benefit may result from differences in terms relating to the payment schedule, timing, commencement, medium of distribution (*e.g.*, in cash or in kind), election rights, differences in eligibility requirements, or the portion of the benefit to which the distribution alternative applies.

(2) *Examples.* The following examples illustrate the meaning of the term "optional form of benefit." Other issues, such as the requirement that the optional forms satisfy section 401(a)(4), are not addressed in these examples and no inferences are intended with respect to such requirements. Assume that the distribution forms, including those not described in these examples, provided under the plan in each of the following examples are identical in all respects not described.

Example 1. A plan permits each participant to receive his benefit under the plan as a single sum distribution; a level monthly distribution schedule over 15 years; a single life annuity; a joint and 50 percent survivor annuity; a joint and 75 percent survivor annuity; a joint and 50 percent survivor annuity with a benefit increase for the participant if the beneficiary dies before a specified date; and joint and 50 percent survivor annuity with a 10 year certain feature. Each of these benefit distribution options is an optional form of benefit (without regard to whether the values of these options are actuarially equivalent).

Example 2. A plan permits each participant who is employed by division A to receive his benefit in a single sum distribution payable upon termination from employment and each participant who is employed by division B in a single sum distribution payable upon termination from employment on or after the attainment of age 50. This plan provides two single sum optional forms of benefit.

Example 3. A plan permits each participant to receive his benefit in a single life annuity that commences in the month after the participant's termination from employment or in a single life annuity that commences upon the completion of five consecutive one year breaks in service. These are two optional forms of benefit.

Example 4. A profit-sharing plan permits each participant who is employed by division A to receive an in-service distribution upon the satisfaction of objective criteria set forth in the plan designed to determine

whether the participant has a heavy and immediate financial need, and each participant who is employed by division B to receive an in-service distribution upon the satisfaction of objective criteria set forth in the plan designed to determine whether the participant has a heavy and immediate financial need attributable to extraordinary medical expenses. These in-service distribution options are two optional forms of benefits.

Example 5. A profit-sharing plan permits each participant who is employed by division A to receive an in-service distribution up to \$5,000 and each participant who is employed by division B to receive an in-service distribution of up to his total benefit. These in-service distribution options differ as to the portion of the accrued benefit that may be distributed in a particular form and are, therefore, two optional forms of benefit.

Example 6. A profit-sharing plan provides for a single sum distribution on termination of employment. The plan is amended in 1991 to eliminate the single sum optional form of benefit with respect to benefits accrued after the date of amendment. This single sum optional form of benefit continues to be a single optional form of benefit although, over time, the percentage of various employees' accrued benefits that are potentially payable under this single sum may vary because the form is only available with respect to benefits accrued up to and including the date of the amendment.

Example 7. A profit-sharing plan permits each participant to receive a single sum distribution of his benefit in cash or in the form of a specified class of employer stock. This plan provides two single sum distribution optional forms of benefit.

Example 8. A stock bonus plan permits each participant to receive a single sum distribution of his benefit in cash or in the form of the property in which such participant's benefit was invested prior to the distribution. This plan's single sum distribution option provides two optional forms of benefit.

Example 9. A defined benefit plan provides for an early retirement benefit payable upon termination of employment after attainment of age 55 and either after ten years of service or, if earlier, upon plan termination to employees of Division A and provides for an identical early retirement benefit payable on the same terms with the exception of payment on plan termination to employees of Division B. The plan provides for two optional forms of benefit.

Example 10. A profit-sharing plan provides for loans secured by an employee's account balance. In the event of default on such a loan, there is an execution on such account balances. Such execution is a distribution of the employee's accrued benefits under the plan. A distribution of an accrued benefit contingent on default under a plan loan se-

cured by such accrued benefits is an optional form of benefit under the plan.

(c) *Plan terms*—(1) *General rule.* Generally, benefits described in section 411(d)(6)(A), early retirement benefits, retirement-type subsidies, and optional forms of benefit are section 411(d)(6) protected benefits only if they are provided under the terms of a plan. However, if an employer establishes a pattern of repeated plan amendments providing for similar benefits in similar situations for substantially consecutive, limited periods of time, such benefits will be treated as provided under the terms of the plan, without regard to the limited periods of time, to the extent necessary to carry out the purposes of section 411(d)(6) and, where applicable, the definitely determinable requirement of section 401(a), including section 401(a)(25). A pattern of repeated plan amendments providing that a particular optional form of benefit is available to certain named employees for a limited period of time is within the scope of this rule and may result in such optional form of benefit being treated as provided under the terms of the plan to all employees covered under the plan without regard to the limited period of time and the limited group of named employees.

(2) *Effective date.* The provisions of paragraph (c)(1) of this Q&A-1 are effective as of July 11, 1988. Thus, patterns or repeated plan amendments adopted and effective before July 11, 1988 will be disregarded in determining whether such amendments have created an ongoing optional form of benefit under the plan.

(d) *Benefits that are not section 411(d)(6) protected benefits.* The following benefits are examples of items that are not section 411(d)(6) protected benefits:

- (1) Ancillary life insurance protection;
- (2) Accident or health insurance benefits;
- (3) Social security supplements described in section 411(a)(9), except qualified social security supplements as defined in § 1.401(a)(4)-12;
- (4) The availability of loans (other than the distribution of an employee's accrued benefit upon default under a loan);

(5) The right to make after-tax employee contributions or elective deferrals described in section 402(g)(3);

(6) The right to direct investments;

(7) The right to a particular form of investment (e.g., investment in employer stock or securities or investment in certain types of securities, commercial paper, or other investment media);

(8) The allocation dates for contributions, forfeitures, and earnings, the time for making contributions (but not the conditions for receiving an allocation of contributions or forfeitures for a plan year after such conditions have been satisfied), and the valuation dates for account balances;

(9) Administrative procedures for distributing benefits, such as provisions relating to the particular dates on which notices are given and by which elections must be made; and

(10) Rights that derive from administrative and operational provisions, such as mechanical procedures for allocating investment experience among accounts in defined contribution plans.

Q-2: To what extent may section 411(d)(6) protected benefits under a plan be reduced or eliminated?

A-2:

(a) *Reduction or elimination of section 411(d)(6) protected benefits*—(1) *In general.* A plan is not permitted to be amended to eliminate or reduce a section 411(d)(6) protected benefit that has already accrued, except as provided in § 1.411(d)-3 or this section. This is generally the case even if such elimination or reduction is contingent upon the employee's consent. However, a plan may be amended to eliminate or reduce section 411(d)(6) protected benefits with respect to benefits not yet accrued as of the later of the amendment's adoption date or effective date without violating section 411(d)(6).

(2) *Selection of optional forms of benefit*—(i) *General rule.* A plan may treat a participant as receiving his entire nonforfeitable accrued benefit under the plan if the participant receives his benefit in an optional form of benefit in an amount determined under the plan that is at least the actuarial equivalent of the employee's nonforfeitable accrued benefit payable at normal retirement age under the plan. This is

true even though the participant could have elected to receive an optional form of benefit with a greater actuarial value than the value of the optional form received, such as an optional form including retirement-type subsidies, and without regard to whether such other, more valuable optional form could have commenced immediately or could have become available only upon the employee's future satisfaction of specified eligibility conditions.

(ii) *Election of an optional form.* Except as provided in paragraph (a)(2)(iii) of this Q&A-2, a plan does not violate section 411(d)(6) merely because an employee's election to receive a portion of his nonforfeitable accrued benefit in one optional form of benefit precludes the employee from receiving that portion of his benefit in another optional form of benefit. Such employee retains all 411(d)(6) protected rights with respect to the entire portion of such employee's nonforfeitable accrued benefit for which no distribution election was made. For purposes of this rule, an elective transfer of an otherwise distributable benefit is treated as the selection of an optional form of benefit. See Q&A-3 of this section.

(iii) *Buy-back rule.* Notwithstanding paragraph (a)(2)(ii) of this Q&A-2, an employee who received a distribution of his nonforfeitable benefit from a plan that is required to provide a repayment opportunity to such employee if he returns to service within the applicable period pursuant to the requirements of section 411(a)(7) and who, upon subsequent reemployment, repays the full amount of such distribution in accordance with section 411(a)(7)(C) must be reinstated in the full array of section 411(d)(6) protected benefits that existed with respect to such benefit prior to distribution.

(iv) *Examples.* The rules in this paragraph (a)(2) can be illustrated by the following examples:

Example 1. Defined benefit plan X provides, among its optional forms of benefit, for a subsidized early retirement benefit payable in the form of an annuity and available to employees who terminate from employment on or after their 55th birthdays. In addition plan X provides for a single sum distribution available on termination from employment or termination of the plan. The single sum distribution is determined on the basis of the

present value of the accrued normal retirement benefit and does not take the early retirement subsidy into account. Plan X is terminated December 31, 1991. Employees U, age 47, V, age 55, and W, age 47, all continue in the service of the employer. Employees X, age 47, Y, age 55 and Z, age 47, terminate from employment with the employer during 1991. Employees U and V elect to take the single sum optional form of distribution at the time of plan termination. Employees X and Y elect to take the single sum distribution on termination from employment with the employer. The elimination of the subsidized early retirement benefit with respect to employees U, V, X and Y does not result in a violation of section 411(d)(6). This is the result even though employees U and X had not yet satisfied the conditions for the subsidized early retirement benefit. Because employees W and Z have not selected an optional form of benefit, they continue to have a 411(d)(6) protected right to the full array of section 411(d)(6) protected benefits provided under the plan, including the single sum distribution form and the subsidized early retirement benefit.

Example 2. A partially vested employee receives a single sum distribution of the present value of his entire nonforfeitable benefit on account of separation from service under a defined benefit plan providing for a repayment provision. Upon reemployment with the employer such employee makes repayment in the required amount in accordance with section 411(a)(7). Such employee may, upon subsequent termination of employment, elect to take such repaid benefits in any optional form provided under the plan as of the time of the employee's initial separation from service. If the plan was amended prior to such repayment, to eliminate the single sum optional form of benefit with respect to benefits accrued after the date of the amendment, such participant has a 411(d)(6) protected right to take distribution of the repaid benefit in the form of a single sum distribution.

(3) *Certain transactions*—(i) *Plan mergers and benefit transfers.* The prohibition against the reduction or elimination of section 411(d)(6) protected benefits already accrued applies to plan mergers, spinoffs, transfers, and transactions amending or having the effect of amending a plan or plans to transfer plan benefits. Thus, for example, if plan A, a profit-sharing plan that provides for distribution of plan benefits in annual installments over ten or twenty years, is merged with plan B, a profit-sharing plan that provides for distribution of plan benefits in annual installments over life expectancy at

time of retirement, the merged plan must retain the ten or twenty year installment option for participants with respect to benefits already accrued under plan A as of the merger and the installments over life expectancy for participants with benefits already accrued under plan B. Similarly, for example, if an employee's benefit under a defined contribution plan is transferred to another defined contribution plan (whether or not of the same employer), the optional forms of benefit available with respect to the employee's benefit accrued under the transferor plan may not be eliminated or reduced except as otherwise permitted under this regulation. See Q&A-3 of this section with respect to the transfer of benefits between and among defined benefit and defined contribution plans.

(ii) *Annuity contracts*—(A) *General rule.* The right of a participant to receive a benefit in the form of cash payments from the plan and the right of a participant to receive that benefit in the form of the distribution of an annuity contract that provides for cash payments that are identical in all respects to the cash payments from the plan except with respect to the source of the payments are not separate optional forms of benefit. Therefore, for example, if a plan includes an optional form of benefit under which benefits are distributed in the medium of an annuity contract that provides for cash payments, that optional form of benefit may be modified by a plan amendment that substitutes cash payments from the plan for the annuity contract, where those cash payments from the plan are identical to the cash payments payable from the annuity contract in all respects except with respect to the source of the payments. The protection provided by section 411(d)(6) may not be avoided by the use of annuity contracts. Thus, section 411(d)(6) protected benefits already accrued may not be eliminated or reduced merely because a plan uses annuity contracts to provide such benefits, without regard to whether the plan, a participant, or a beneficiary of a participant holds the contract or whether such annuity contracts are purchased as a result of the termination of the plan. However, to the extent that an annuity contract

constitutes payment of benefits in a particular optional form elected by the participant, the plan does not violate section 411(d)(6) merely because it provides that other optional forms are no longer available with respect to such participant. See paragraph (a)(2) of this Q&A-2.

(B) *Examples.* The provisions of this paragraph (a)(3)(ii) can be illustrated by the following examples:

Example 1. A profit-sharing plan that is being terminated satisfies section 411(d)(6) only if the plan makes available to participants annuity contracts that provide for all section 411(d)(6) protected benefits under the plan that may not otherwise be reduced or eliminated pursuant to this Q&A-2. Thus, if such a plan provided for a single sum distribution upon attainment of early retirement age, and a provision for payment in the form of 10 equal annual installments, the plan would satisfy section 411(d)(6) only if the participants had the opportunity to elect to have their benefits provided under an annuity contract that provided for the same single sum distribution upon the attainment of the participant's early retirement age and the same 10 year installment optional form of benefit.

Example 2. A defined benefit plan permits each participant who separates from service on or after age 62 to receive a qualified joint and survivor annuity or a single life annuity commencing 45 days after termination from employment. For a participant who separates from service before age 62, payments under these optional forms of benefit commence 45 days after the participant's 62nd birthday. Under the plan, a participant is to elect among these optional forms of benefit during the 90-day period preceding the annuity starting date. However, during such period, a participant may defer both benefit commencement and the election of a particular benefit form to any later date, subject to section 401(a)(9). In January 1990, the employer decides to terminate the plan as of July 1, 1990. The plan will fail to satisfy section 411(d)(6) unless the optional forms of benefit provided under the plan are preserved under the annuity contract purchased on plan termination. Thus, such annuity contract must provide a participant the same optional benefit commencement rights that the plan provided. In addition, such contract must provide the same election rights with respect to such benefit options. This is the case even if, for example, in conjunction with the termination, the employer amended the plan to permit participants to elect a qualified joint and survivor annuity, single life annuity, or single sum distribution commencing on July 1, 1990.

(4) *Benefits payable to a spouse or beneficiary.* Section 411(d)(6) protected benefits may not be eliminated merely because they are payable with respect to a spouse or other beneficiary.

(b) *Section 411(d)(6) protected benefits that may be eliminated or reduced only as permitted by the Commissioner—(1) In general.* The Commissioner may, consistent with the provisions of this section, provide for the elimination or reduction of section 411(d)(6) protected benefits that have already accrued only to the extent that such elimination or reduction does not result in the loss to plan participants of either a valuable right or an employer-subsidized optional form of benefit where a similar optional form of benefit with a comparable subsidy is not provided or to the extent such elimination or reduction is necessary to permit compliance with other requirements of section 401(a) (e.g., sections 401(a)(4), 401(a)(9) and 415). The Commissioner may exercise this authority only through the publication of revenue rulings, notices, and other documents of general applicability.

(2) *Section 411(d)(6) protected benefits that may be eliminated or reduced.* The elimination or reduction of certain section 411(d)(6) protected benefits that have already accrued in the following situations does not violate section 411(d)(6). The rules with respect to permissible eliminations and reductions provided in this paragraph (b)(2) generally are effective January 30, 1986; however, the rules of paragraphs (b)(2)(iii) (A) and (B) and (b)(2)(viii) of this Q&A-2 are effective for plan amendments that are adopted and effective on or after September 6, 2000. These exceptions create no inference with respect to whether any other applicable requirements are satisfied (for example, requirements imposed by section 401(a)(9) and section 401(a)(14)).

(i) *Change in statutory requirement.* A plan may be amended to eliminate or reduce a section 411(d)(6) protected benefit if the following three requirements are met: the amendment constitutes timely compliance with a change in law affecting plan qualification; there is an exercise of section 7805(b) relief by the Commissioner; and the elimination or reduction is made

only to the extent necessary to enable the plan to continue to satisfy the requirements for qualified plans. In general, the elimination or reduction of a section 411(d)(6) protected benefit will not be treated as necessary if it is possible through other modifications to the plan (e.g., by expanding the availability of an optional form of benefit to additional employees) to satisfy the applicable qualification requirement.

(ii) *Joint and survivor annuity.* A plan that provides a range of three or more actuarially equivalent joint and survivor annuity options may be amended to eliminate any of such options, other than the options with the largest and smallest optional survivor payment percentages, even if the effect of such amendment is to change which of the options is the qualified joint and survivor annuity under section 417. Thus, for example, if a money purchase pension plan provides three joint and survivor annuity options with survivor payments of 50%, 75% and 100%, respectively, that are uniform with respect to age and are actuarially equivalent, then the employer may eliminate the option with the 75% survivor payment, even if this option had been the qualified joint and survivor annuity under the plan.

(iii) *In-kind distributions*—(A) *In-kind distributions payable under defined contribution plans in the form of marketable securities other than employer securities.* If a defined contribution plan includes an optional form of benefit under which benefits are distributed in the form of marketable securities, other than securities of the employer, that optional form of benefit may be modified by a plan amendment that substitutes cash for the marketable securities as the medium of distribution. For purposes of this paragraph (b)(2)(iii)(A) and paragraph (b)(2)(iii)(B) of this Q&A-2, the term *marketable securities* means marketable securities as defined in section 731(c)(2), and the term *securities of the employer* means securities of the employer as defined in section 402(e)(4)(E)(ii).

(B) *Amendments to defined contribution plans to specify medium of distribution.* If a defined contribution plan includes an optional form of benefit under which benefits are distributable to a partici-

pant in a medium other than cash, the plan may be amended to limit the types of property in which distributions may be made to the participant to the types of property specified in the amendment. For this purpose, the types of property specified in the amendment must include all types of property (other than marketable securities that are not securities of the employer) that are allocated to the participant's account on the effective date of the amendment and in which the participant would be able to receive a distribution immediately before the effective date of the amendment if a distributable event occurred. In addition, a plan amendment may provide that the participant's right to receive a distribution in the form of specified types of property is limited to the property allocated to the participant's account at the time of distribution that consists of property of those specified types.

(C) *In-kind distributions after plan termination.* If a plan includes an optional form of benefit under which benefits are distributed in specified property, that optional form of benefit may be modified for distributions after plan termination by substituting cash for the specified property as the medium of distribution to the extent that, on plan termination, an employee has the opportunity to receive the optional form of benefit in the form of the specified property. This exception is not available, however, if the employer that maintains the terminating plan also maintains another plan that provides an optional form of benefit under which benefits are distributed in the specified property.

(D) *Examples.* The following examples illustrate the application of this paragraph (b)(2)(iii):

Example 1. (i) An employer maintains a profit-sharing plan under which participants may direct the investment of their accounts. One investment option available to participants is a fund invested in common stock of the employer. The plan provides that the participant has the right to a distribution in the form of cash upon termination of employment. In addition, the plan provides that, to the extent a participant's account is invested in the employer stock fund, the participant may receive an in-kind distribution

of employer stock upon termination of employment. On October 18, 2000, the plan is amended, effective on January 1, 2001, to remove the fund invested in employer common stock as an investment option under the plan and to provide for the stock held in the fund to be sold. The amendment permits participants to elect how the sale proceeds are to be reallocated among the remaining investment options, and provides for amounts not so reallocated as of January 1, 2001, to be allocated to a specified investment option.

(ii) The plan does not fail to satisfy section 411(d)(6) solely on account of the plan amendment relating to the elimination of the employer stock investment option, which is not a section 411(d)(6) protected benefit. See paragraph (d)(7) of Q&A-1 of this section. Moreover, because the plan did not provide for distributions of employer securities except to the extent participants' accounts were invested in the employer stock fund, the plan is not required operationally to offer distributions of employer securities following the amendment. In addition, the plan would not fail to satisfy section 411(d)(6) on account of a further plan amendment, effective after the plan has ceased to provide for an employer stock fund investment option (and participants' accounts have ceased to be invested in employer securities), to eliminate the right to a distribution in the form of employer stock. See paragraph (b)(2)(iii)(B) of this Q&A-2.

Example 2. (i) An employer maintains a profit-sharing plan under which a participant, upon termination of employment, may elect to receive benefits in a single-sum distribution either in cash or in kind. The plan's investments are limited to a fund invested in employer stock, a fund invested in XYZ mutual funds (which are marketable securities), and a fund invested in shares of PQR limited partnership (which are not marketable securities).

(ii) The following alternative plan amendments would not cause the plan to fail to satisfy section 411(d)(6):

(A) A plan amendment that limits non-cash distributions to a participant on termination of employment to a distribution of employer stock and shares of PQR limited partnership. See paragraph (b)(2)(iii)(A) of this Q&A-2.

(B) A plan amendment that limits non-cash distributions to a participant on termination of employment to a distribution of employer stock and shares of PQR limited partnership, and that also provides that only participants with employer stock allocated to their accounts as of the effective date of the amendment have the right to distributions in the form of employer stock, and that only participants with shares of PQR limited partnership allocated to their accounts as of the effective date of the amendment have the right to distributions in the form of

shares of PQR limited partnership. To comply with the plan amendment, the plan administrator retains a list of participants with employer stock allocated to their accounts as of the effective date of the amendment, and a list of participants with shares of PQR limited partnership allocated to their accounts as of the effective date of the amendment. See paragraphs (b)(2)(iii) (A) and (B) of this Q&A-2.

(C) A plan amendment that limits non-cash distributions to a participant on termination of employment to a distribution of employer stock and shares of PQR limited partnership to the extent that those assets are allocated to the participant's account at the time of the distribution. See paragraphs (b)(2)(iii) (A) and (B) of this Q&A-2.

(D) A plan amendment that limits non-cash distributions to a participant on termination of employment to a distribution of employer stock and shares of PQR limited partnership, and that provides that only participants with employer stock allocated to their accounts as of the effective date of the amendment have the right to distributions in the form of employer stock, and that only participants with shares of PQR limited partnership allocated to their accounts as of the effective date of the amendment have the right to distributions in the form of shares of PQR limited partnership, and that further provides that the distribution of that stock or those shares is available only to the extent that those assets are allocated to those participants' accounts at the time of the distribution. To comply with the plan amendment, the plan administrator retains a list of participants with employer stock allocated to their accounts as of the effective date of the amendment, and a list of participants with shares of PQR limited partnership allocated to their accounts as of the effective date of the amendment. See paragraphs (b)(2)(iii) (A) and (B) of this Q&A-2.

Example 3. (i) An employer maintains a stock bonus plan under which a participant, upon termination of employment, may elect to receive benefits in a single-sum distribution in employer stock. This is the only plan maintained by the employer under which distributions in employer stock are available. The employer decides to terminate the stock bonus plan.

(ii) If the plan makes available a single-sum distribution in employer stock on plan termination, the plan will not fail to satisfy section 411(d)(6) solely because the optional form of benefit providing a single-sum distribution in employer stock on termination of employment is modified to provide that such distribution is available only in cash. See paragraph (b)(2)(iii)(C) of this Q&A-2.

(iv) *Coordination with diversification requirement.* A tax credit employee

stock ownership plan (as defined in section 409(a)) or an employee stock ownership plan (as defined in section 4975(e)(7)) may be amended to provide that a distribution is not available in employer securities to the extent that an employee elects to diversify benefits pursuant to section 401(a)(28).

(v) *Involuntary distributions.* A plan may be amended to provide for the involuntary distribution of an employee's benefit to the extent such involuntary distribution is permitted under sections 411(a)(11) and 417(e). Thus, for example, an involuntary distribution provision may be amended to require that an employee who terminates from employment with the employer receive a single sum distribution in the event that the present value of the employee's benefit is not more than \$3,500, by substituting the cash-out limit in effect under § 1.411(a)-11(c)(3)(ii) for \$3,500, without violating section 411(d)(6). In addition, for example, the employer may amend the plan to reduce the involuntary distribution threshold from the cash-out limit in effect under § 1.411(a)-11(c)(3)(ii) to any lower amount and to eliminate the involuntary single sum option for employees with benefits between the cash-out limit in effect under § 1.411(a)-11(c)(3)(ii) and such lower amount without violating section 411(d)(6). This rule does not permit a plan provision permitting employer discretion with respect to optional forms of benefit for employees the present value of whose benefit is less than the cash-out limit in effect under § 1.411(a)-11(c)(3)(ii).

(vi) *Distribution exception for certain profit-sharing plans—(A) In general.* If a defined contribution plan that is not subject to section 412 and does not provide for an annuity option is terminated, the plan may be amended to provide for the distribution of a participant's accrued benefit upon termination in a single sum optional form without the participant's consent. The preceding sentence does not apply if the employer maintains any other defined contribution plan (other than an employee stock ownership plan as defined in section 4975(e)(7)).

(B) *Examples.* The provisions of this paragraph (b)(2)(vi) can be illustrated by the following examples:

Example 1. Employer X maintains a defined contribution plan that is not subject to section 412. The plan provides for distribution in the form of equal installments over five years or equal installments over twenty years. X maintains no other defined contribution plans. X terminates its defined contribution plan after amending the plan to provide for the distribution of all participants' accrued benefits in the form of single sum distributions, without obtaining participant consent. Pursuant to the rule in this paragraph (b)(2)(iv), this amendment does not violate the requirements of section 411(d)(6).

Example 2. Corporations X and Y are members of controlled group employer XY. Both X and Y maintain defined contribution plans. X's plan, which is not subject to section 412, covers only employees working for X. Y's plan, which is subject to section 412, covers only employees working for Y. X terminates its defined contribution plan. Because employer XY maintains another defined contribution plan, plan X may not provide for the distribution of participants' accrued benefits upon termination without a participants' consent.

(vii) *Distribution of benefits on default of loans.* Notwithstanding that the distribution of benefits arising from an execution on an account balance used to secure a loan on which there has been a default is an optional form of benefit, a plan may be amended to eliminate or change a provision for loans, even if such loans would be secured by an employee's account balance.

(viii) *Provisions for transfer of benefits between and among defined contribution plans and defined benefit plans.* A plan may be amended to eliminate provisions permitting the transfer of benefits between and among defined contribution plans and defined benefit plans.

(ix) *De minimis change in the timing of an optional form of benefit.* A plan may be amended to modify an optional form of benefit by changing the timing of the availability of such optional form if, after the change, the optional form is available at a time that is within two months of the time such optional form was available before the amendment. To the extent the optional form of benefit is available prior to termination of employment, six months may be substituted for two months in the prior sentence. Thus, for example, a

plan that makes in-service distributions available to employees once every month may be amended to make such in-service distributions available only once every six months. This exception to section 411(d)(6) relates only to the timing of the availability of the optional form of benefit. Other aspects of an optional form of benefit may not be modified and the value of such optional form may not be reduced merely because of an amendment permitted by this exception.

(x) *Amendment of hardship distribution standards.* A qualified cash or deferred arrangement that permits hardship distributions under § 1.401(k)-1(d)(3) may be amended to specify or modify non-discriminatory and objective standards for determining the existence of an immediate and heavy financial need, the amount necessary to meet the need, or other conditions relating to eligibility to receive a hardship distribution. For example, a plan will not be treated as violating section 411(d)(6) merely because it is amended to specify or modify the resources an employee must exhaust to qualify for a hardship distribution or to require employees to provide additional statements or representations to establish the existence of a hardship. A qualified cash or deferred arrangement may also be amended to eliminate hardship distributions. The provisions of this paragraph also apply to profit-sharing or stock bonus plans that permit hardship distributions, whether or not the hardship distributions are limited to those described in § 1.401(k)-1(d)(3).

(xi) *Section 415 benefit limitations.* Accrued benefits under a plan as of the first day of the first limitation year beginning after December 31, 1986, that exceed the benefit limitations under section 415 (b) or (e), effective on the first day of the plan's first limitation year beginning after December 31, 1986, because of a change in the terms and conditions of the plan made after May 5, 1986, or the establishment of a plan after that date, may be reduced to the level permitted under section 415 (b) or (e).

(c) *Multiple amendments—(1) General rule.* A plan amendment violates the requirements of section 411(d)(6) if it is one of a series of plan amendments

that, when taken together, have the effect of reducing or eliminating a section 411(d)(6) protected benefit in a manner that would be prohibited by section 411(d)(6) if accomplished through a single amendment.

(2) *Determination of time period for combining plan amendments.* For purposes of paragraph (c)(1) of this Q&A-2, generally only plan amendments adopted within a 3-year period are taken into account. But see Q&A-1(c)(1) of this section for rules relating to repeated plan amendments.

(d) *ESOP and stock bonus plan exception—(1) In general.* Subject to the limitations in paragraph (d)(2) of this Q&A-2, a tax credit employee stock ownership plan (as defined in section 409(a)) or an employee stock ownership plan (as defined in section 4975(e)(7)) will not be treated as violating the requirements of section 411(d)(6) merely because of any of the circumstances described in paragraphs (d)(1)(i) through (d)(1)(iv) of this Q&A-2. In addition, a stock bonus plan that is not an employee stock ownership plan will not be treated as violating the requirements of section 411(d)(6) merely because of any of the circumstances described in paragraphs (d)(1)(ii) and (d)(1)(iv) of this Q&A-2.

(i) *Single sum or installment optional forms of benefit.* The employer eliminates, or retains the discretion to eliminate, with respect to all participants, a single sum optional form or installment optional form with respect to benefits that are subject to section 409(h)(1)(B), provided such elimination or retention of discretion is consistent with the distribution and payment requirements otherwise applicable to such plans (e.g., those required by section 409).

(ii) *Employer becomes substantially employee-owned or is an S corporation.* The employer eliminates, or retains the discretion to eliminate, with respect to all participants, optional forms of benefit by substituting cash distributions for distributions in the form of employer stock with respect to benefits subject to section 409(h) in the circumstances described in paragraph (d)(1)(ii)(A) or (B) of this Q&A-2, but only if the employer otherwise meets the requirements of section 409(h)(2)—

(A) The employer becomes substantially employee-owned; or

(B) For taxable years of the employer beginning after December 31, 1997, the employer is an S corporation as defined in section 1361.

(iii) *Employer securities become readily tradable.* The employer eliminates, or retains the discretion to eliminate, with respect to all participants, in cases in which the employer securities become readily tradable, optional forms of benefit by substituting distributions in the form of employer securities for distributions in cash with respect to benefits that are subject to section 409(h).

(iv) *Employer securities cease to be readily tradable or certain sales.* The employer eliminates, or retains the discretion to eliminate, with respect to all participants, optional forms of benefit by substituting cash distributions for distributions in the form of employer stock with respect to benefits that are subject to section 409(h) in the following circumstances:

(A) The employer stock ceases to be readily tradable;

(B) The employer stock continues to be readily tradable but there is a sale of substantially all of the stock of the employer or a sale of substantially all of the assets of a trade or business of the employer and, in either situation, the purchasing employer continues to maintain the plan.

In the situation described in paragraph (d)(1)(iv)(B) of this Q&A-2, the employer may also substitute distributions in the purchasing employer's stock for distributions in the form of employer stock of the predecessor employer.

(2) *Limitations on ESOP and stock bonus plan exceptions—(i) Nondiscrimination requirement.* Plan amendments and the retention and exercise of discretion permitted under the exceptions in paragraph (d)(1) must meet the nondiscrimination requirements of section 401(a)(4).

(ii) *ESOP investment requirement.* Except as provided in paragraph (d)(2)(iii) of this Q&A-2, benefits provided by employee stock ownership plans will not be eligible for the exceptions in paragraph (d)(1) of this Q&A-2 unless the benefits have been held in a tax credit

employee stock ownership plan (as defined in section 409(a)) or an employee stock ownership plan (as defined in section 4975(e)(7)) subject to section 409(h) for the five-year period prior to the exercise of employer discretion or any amendment affecting such benefits and permitted under paragraph (d)(1) of this Q&A-2. For purposes of the preceding sentence, if benefits held under an employee stock ownership plan are transferred to a plan that is an employee stock ownership plan at the time of transfer, then the consecutive periods under the transferor and transferee employee stock ownership plans may be aggregated for purposes of meeting the five-year requirement. If the benefits are held in an employee stock ownership plan throughout the entire period of their existence, and such total period of existence is less than five years, then such lesser period may be substituted for the five year requirement.

(3) *Effective date.* The provisions of this paragraph (d) are effective beginning with the first day of the first plan year commencing on or after January 1, 1989. Prior to this effective date the reduction or elimination of a section 411(d)(6) protected benefit by a tax credit employee stock ownership plan (as defined in section 409(a)) or an employee stock ownership plan (as defined in section 4975(e)(7)) will not be treated as violating the requirements of section 411(d)(6) if such reduction or elimination reflects a reasonable interpretation of the statutory language of section 411(d)(6)(C).

(4) *Additional exceptions and requirements.* The Commissioner may, in revenue rulings, notices or other documents of general applicability, prescribe such additional rules and exceptions, consistent with the purposes of this section, as may be necessary or appropriate.

(e) *Permitted plan amendments affecting alternative forms of payment under defined contribution plans—(1) General rule.* A defined contribution plan does not violate the requirements of section 411(d)(6) merely because the plan is amended to eliminate or restrict the

ability of a participant to receive payment of accrued benefits under a particular optional form of benefit for distributions with annuity starting dates after the date the amendment is adopted if, after the plan amendment is effective with respect to the participant, the alternative forms of payment available to the participant include payment in a single-sum distribution form that is otherwise identical to the optional form of benefit that is being eliminated or restricted.

(2) *Otherwise identical single-sum distribution.* For purposes of this paragraph (e), a single-sum distribution form is otherwise identical to an optional form of benefit that is eliminated or restricted pursuant to paragraph (e)(1) of this Q&A-2 only if the single-sum distribution form is identical in all respects to the eliminated or restricted optional form of benefit (or would be identical except that it provides greater rights to the participant) except with respect to the timing of payments after commencement. For example, a single-sum distribution form is not otherwise identical to a specified installment form of benefit if the single-sum distribution form is not available for distribution on the date on which the installment form would have been available for commencement, is not available in the same medium of distribution as the installment form, or imposes any condition of eligibility that did not apply to the installment form. However, an otherwise identical distribution form need not retain rights or features of the optional form of benefit that is eliminated or restricted to the extent that those rights or features would not be protected from elimination or restriction under section 411(d)(6) or this section.

(3) *Example.* The following example illustrates the application of this paragraph (e):

Example. (i) P is a participant in Plan M, a qualified profit-sharing plan with a calendar plan year that is invested in mutual funds. The distribution forms available to P under Plan M include a distribution of P's vested account balance under Plan M in the form of distribution of various annuity contract forms (including a single life annuity and a joint and survivor annuity). The annuity payments under the annuity contract forms begin as of the first day of the month fol-

lowing P's severance from employment (or as of the first day of any subsequent month, subject to the requirements of section 401(a)(9)). P has not previously elected payment of benefits in the form of a life annuity, and Plan M is not a direct or indirect transferee of any plan that is a defined benefit plan or a defined contribution plan that is subject to section 412. Distributions on the death of a participant are made in accordance with plan provisions that comply with section 401(a)(11)(B)(iii)(I). On September 2, 2005, Plan M is amended so that, effective for payments that begin on or after November 1, 2005, P is no longer entitled to any distribution in the form of the distribution of an annuity contract. However, after the amendment is effective, P is entitled to receive a single-sum cash distribution of P's vested account balance under Plan M payable as of the first day of the month following P's severance from employment (or as of the first day of any subsequent month, subject to the requirements of section 401(a)(9)).

(ii) Plan M does not violate the requirements of section 411(d)(6) (or section 401(a)(11)) merely because, as of November 1, 2005, the plan amendment has eliminated P's option to receive a distribution in any of the various annuity contract forms previously available.

(4) *Effective date.* This paragraph (e) is applicable on January 25, 2005.

Q-3 Does the transfer of benefits between and among defined benefit plans and defined contribution plans (or similar transactions) violate the requirements of section 411(d)(6)?

A-3 (a) *Transfers and similar transactions—(1) General rule.* Section 411(d)(6) protected benefits may not be eliminated by reason of transfer or any transaction amending or having the effect of amending a plan or plans to transfer benefits. Thus, for example, except as otherwise provided in this section, an employer who maintains a money purchase pension plan that provides for a single sum optional form of benefit may not establish another plan that does not provide for this optional form of benefit and transfer participants' account balances to such new plan.

(2) *Defined benefit feature and separate account feature.* The defined benefit feature of an employee's benefit under a defined benefit plan and the separate account feature of an employee's benefit under a defined contribution plan are section 411(d)(6) protected benefits. Thus, for example, the elimination of

the defined benefit feature of an employee's benefit under a defined benefit plan, through transfer of benefits from a defined benefit plan to a defined contribution plan or plans, will violate section 411(d)(6).

(3) *Waiver prohibition.* In general, except as provided in paragraph (b) of this Q&A-3, a participant may not elect to waive section 411(d)(6) protected benefits. Thus, for example, the elimination of the defined benefit feature of a participant's benefit under a defined benefit plan by reason of a transfer of such benefits to a defined contribution plan pursuant to a participant election, at a time when the benefit is not distributable to the participant, violates section 411(d)(6).

(4) *Direct rollovers.* A direct rollover described in Q&A-3 of § 1.401(a)(31)-1 that is paid to a qualified plan is not a transfer of assets and liabilities that must satisfy the requirements of section 414(l), and is not a transfer of benefits for purposes of applying the requirements under section 411(d)(6) and paragraph (a)(1) of this Q&A-3. Therefore, for example, if such a direct rollover is made to another qualified plan, the receiving plan is not required to provide, with respect to amounts paid to it in a direct rollover, the same optional forms of benefit that were provided under the plan that made the direct rollover. See § 1.401(a)(31)-1, Q&A-14.

(b) *Elective transfers of benefits between defined contribution plans—(1) General rule.* A transfer of a participant's entire benefit between qualified defined contribution plans (other than any direct rollover described in Q&A-3 of § 1.401(a)(31)-1) that results in the elimination or reduction of section 411(d)(6) protected benefits does not violate section 411(d)(6) if the following requirements are met—

(i) *Voluntary election.* The plan from which the benefits are transferred must provide that the transfer is conditioned upon a voluntary, fully-informed election by the participant to transfer the participant's entire benefit to the other qualified defined contribution plan. As an alternative to the transfer, the participant must be offered the opportunity to retain the participant's section 411(d)(6) protected benefits

under the plan (or, if the plan is terminating, to receive any optional form of benefit for which the participant is eligible under the plan as required by section 411(d)(6)).

(ii) *Types of plans to which transfers may be made.* To the extent the benefits are transferred from a money purchase pension plan, the transferee plan must be a money purchase pension plan. To the extent the benefits being transferred are part of a qualified cash or deferred arrangement under section 401(k), the benefits must be transferred to a qualified cash or deferred arrangement under section 401(k). To the extent the benefits being transferred are part of an employee stock ownership plan as defined in section 4975(e)(7), the benefits must be transferred to another employee stock ownership plan. Benefits transferred from a profit-sharing plan other than from a qualified cash or deferred arrangement, or from a stock bonus plan other than an employee stock ownership plan, may be transferred to any type of defined contribution plan.

(iii) *Circumstances under which transfers may be made.* The transfer must be made either in connection with an asset or stock acquisition, merger, or other similar transaction involving a change in employer of the employees of a trade or business (*i.e.*, an acquisition or disposition within the meaning of § 1.410(b)-2(f)) or in connection with the participant's change in employment status to an employment status with respect to which the participant is not entitled to additional allocations under the transferor plan.

(2) *Applicable qualification requirements.* A transfer described in this paragraph (b) is a transfer of assets or liabilities within the meaning of section 414(l)(1) and, thus, must satisfy the requirements of section 414(l). In addition, this paragraph (b) only provides relief under section 411(d)(6); a transfer described in this paragraph must satisfy all other applicable qualification requirements. Thus, for example, if the survivor annuity requirements of sections 401(a)(11) and 417 apply to the plan from which the benefits are transferred, as described in this paragraph (b), but do not otherwise

apply to the receiving plan, the requirements of sections 401(a)(11) and 417 must be met with respect to the transferred benefits under the receiving plan. In addition, the vesting provisions under the receiving plan must satisfy the requirements of section 411(a)(10) with respect to the amounts transferred.

(3) *Status of elective transfer as other right or feature.* A right to a transfer of benefits from a plan pursuant to the elective transfer rules of this paragraph (b) is an other right or feature within the meaning of § 1.401(a)(4)-4(e)(3), the availability of which is subject to the nondiscrimination requirements of section 401(a)(4) and § 1.401(a)(4)-4. However, for purposes of applying the rules of § 1.401(a)(4)-4, the following conditions are to be disregarded in determining the employees to whom the other right or feature is available—

(i) A condition restricting the availability of the transfer to benefits of participants who are transferred to a different employer in connection with a specified asset or stock disposition, merger, or other similar transaction involving a change in employer of the employees of a trade or business (*i.e.*, a disposition within the meaning of § 1.410(b)-2(f)), or in connection with any such disposition, merger, or other similar transaction.

(ii) A condition restricting the availability of the transfer to benefits of participants who have a change in employment status to an employment status with respect to which the participant is not entitled to additional allocations under the transferor plan.

(c) *Elective transfers of certain distributable benefits between qualified plans—*
(1) *In general.* A transfer of a participant's benefits between qualified plans that results in the elimination or reduction of section 411(d)(6) protected benefits does not violate section 411(d)(6) if—

(i) The transfer occurs at a time at which the participant's benefits are distributable (within the meaning of paragraph (c)(3) of this Q&A-3);

(ii) For a transfer that occurs on or after January 1, 2002, the transfer occurs at a time at which the participant is not eligible to receive an immediate

distribution of the participant's entire nonforfeitable accrued benefit in a single-sum distribution that would consist entirely of an eligible rollover distribution within the meaning of section 401(a)(31)(C);

(iii) The voluntary election requirements of paragraph (b)(1)(i) of this Q&A-3 are met;

(iv) The participant is fully vested in the transferred benefit in the transferee plan;

(v) In the case of a transfer from a defined contribution plan to a defined benefit plan, the defined benefit plan provides a minimum benefit, for each participant whose benefits are transferred, equal to the benefit, expressed as an annuity payable at normal retirement age, that is derived solely on the basis of the amount transferred with respect to such participant; and

(vi) The amount of the benefit transferred, together with the amount of any contemporaneous section 401(a)(31) direct rollover to the transferee plan, equals the entire nonforfeitable accrued benefit under the transferor plan of the participant whose benefit is being transferred, calculated to be at least the greater of the single-sum distribution provided for under the plan for which the participant is eligible (if any) or the present value of the participant's accrued benefit payable at normal retirement age (calculated by using interest and mortality assumptions that satisfy the requirements of section 417(e) and subject to the limitations imposed by section 415).

(2) *Treatment of transfer—*(i) *In general.* A transfer of benefits pursuant to this paragraph (c) generally is treated as a distribution for purposes of section 401(a). For example, the transfer is subject to the cash-out rules of section 411(a)(7), the early termination requirements of section 411(d)(2), and the survivor annuity requirements of sections 401(a)(11) and 417. A transfer pursuant to the elective transfer rules of this paragraph (c) is not treated as a distribution for purposes of the minimum distribution requirements of section 401(a)(9).

(ii) *Status of elective transfer as optional form of benefit.* A right to a transfer of benefits from a plan pursuant to

the elective transfer rules of this paragraph (c) is an optional form of benefit under section 411(d)(6), the availability of which is subject to the nondiscrimination requirements of section 401(a)(4) and § 1.401(a)(4)-4.

(3) *Distributable benefits.* For purposes of paragraph (c)(1)(i) of this Q&A-3, a participant's benefits are distributable on a particular date if, on that date, the participant is eligible, under the terms of the plan from which the benefits are transferred, to receive an immediate distribution of these benefits (e.g., in the form of an immediately commencing annuity) from that plan under provisions of the plan not inconsistent with section 401(a).

(d) *Effective date.* This Q&A-3 is applicable for transfers made on or after September 6, 2000.

Q-4: May a plan provide that the employer may, through the exercise of discretion, deny a participant a section 411(d)(6) protected benefit for which the participant is otherwise eligible?

A-4: (a) *In general.* Except as provided in paragraph (d) of Q&A-2 of this section with respect to certain employee stock ownership plans, a plan that permits the employer, either directly or indirectly, through the exercise of discretion, to deny a participant a section 411(d)(6) protected benefit provided under the plan for which the participant is otherwise eligible (but for the employer's exercise of discretion) violates the requirements of section 411(d)(6). A plan provision that makes a section 411(d)(6) protected benefit available only to those employees as the employer may designate is within the scope of this prohibition. Thus, for example, a plan provision under which only employees who are designated by the employer are eligible to receive a subsidized early retirement benefit constitutes an impermissible provision under section 411(d)(6). In addition, a pension plan that permits employer discretion to deny the availability of a section 411(d)(6) protected benefit violates the definitely determinable requirement of section 401(a), including section 401(a)(25). See § 1.401-1(b)(1)(i). This is the result even if the plan specifically limits the employer's discretion to choosing among section 411(d)(6) protected benefits, including

optional forms of benefit, that are actuarially equivalent. In addition, the provisions of sections 411(a)(11) and 417(e) that allow a plan to make involuntary distributions of certain amounts are not excepted from this limitation on employer discretion. Thus, for example, a plan may not permit employer discretion with respect to whether benefits will be distributed involuntarily in the event that the present value of the employee's benefit is not more than the cash-out limit in effect under § 1.411(a)-11(c)(3)(ii) within the meaning of sections 411(a)(11) and 417(e). (An exception is provided for such provisions with respect to the nondiscrimination requirements of section 401(a)(4). See § 1.401(a)(4)-4(b)(2)(ii)(C).)

(b) *Exception for administrative discretion.* A plan may permit limited discretion with respect to the ministerial or mechanical administration of the plan, including the application of objective plan criteria specifically set forth in the plan. Such plan provisions do not violate the requirements of section 411(d)(6) or the definitely determinable requirement of section 401(a), including section 401(a)(25). For example, these requirements are not violated by the following provisions that permit limited administrative discretion:

(1) Commencement of benefit payments as soon as administratively feasible after a stated date or event;

(2) Employer authority to determine whether objective criteria specified in the plan (e.g., objective criteria designed to identify those employees with a heavy and immediate financial need or objective criteria designed to determine whether an employee has a permanent and total disability) have been satisfied; and

(3) Employer authority to determine, pursuant to specific guidelines set forth in the plan, whether the participant or spouse is dead or cannot be located.

Q-5: When will the exercise of discretion by some person or persons, other than the employer, be treated as employer discretion?

A-5: For purposes of applying the rules of this section and § 1.401(a)-4, the term "employer" includes plan administrator, fiduciary, trustee, actuary,

independent third party, and other persons. Thus, if a plan permits any person, other than the participant (and other than the participant's spouse), the discretion to deny or limit the availability of a section 411(d)(6) protected benefit for which the employee is otherwise eligible under the plan (but for the exercise of such discretion), such plan violates the requirements of sections 401(a), including section 411(d)(6) and, where applicable, the definitely determinable requirement of section 401(a), including section 401(a)(25).

Q-6: May a plan condition the availability of a section 411(d)(6) protected benefit on the satisfaction of objective conditions that are specifically set forth in the plan?

A-6: (a) *Certain objective conditions permissible*—(1) *In general.* The availability of a section 411(d)(6) protected benefit may be limited to employees who satisfy certain objective conditions provided the conditions are ascertainable, clearly set forth in the plan and not subject to the employer's discretion except to the extent reasonably necessary to determine whether the objective conditions have been met. Also, the availability of the section 411(d)(6) protected benefit must meet the nondiscrimination requirements of section 401(a)(4). See § 1.401(a)-4.

(2) *Examples of permissible conditions.* The following examples illustrate of permissible objective conditions: a plan may deny a single sum distribution form to employees for whom life insurance is not available at standard rates as defined under the terms of the plan at the time the single sum distribution would otherwise be payable; a plan may provide that a single sum distribution is available only if the employee is in extreme financial need as defined under the terms of the plan at the time the single sum distribution would otherwise be payable; a plan may condition the availability of a single sum distribution on the execution of a covenant not to compete, provided that objective conditions with respect to the terms of such covenant and the employees and circumstances requiring execution of such covenant are set forth in the plan.

(b) *Conditions based on factors within employer's discretion generally impermissible.* A plan may not limit the availability of section 411(d)(6) protected benefits permitted under the plan on objective conditions that are within the employer's discretion. For example, the availability of section 411(d)(6) protected benefits in a plan may not be conditioned on a determination with respect to the level of the plan's funded status, because the amount of plan funding is within the employer's discretion. However, for example, although conditions based on the plan's funded status are impermissible, a plan may limit the availability of a section 411(d)(6) protected benefit (e.g., a single sum distribution) in an objective manner, such as the following:

(1) Single sum distributions of \$25,000 and less are available without limit; and

(2) Single sum distributions in excess of \$25,000 are available for a year only to the extent that the total amount of such single sum distributions for the year is not greater than \$5,000,000; and

(3) An objective and nondiscriminatory method for determining which particular single sum distributions will not be available during a year in order for the \$5,000,000 limit to be satisfied is set forth in the plan.

Q-7: May a plan be amended to add employer discretion or conditions restricting the availability of a section 411(d)(6) protected benefit?

A-7: No. The addition of employer discretion or objective conditions with respect to a section 411(d)(6) protected benefit that has already accrued violates section 411(d)(6). Also, the addition of conditions (whether or not objective) or any change to existing conditions with respect to section 411(d)(6) protected benefits that results in any further restriction violates section 411(d)(6). However, the addition of objective conditions to a section 411(d)(6) protected benefit may be made with respect to benefits accrued after the later of the adoption or effective date of the amendment. In addition, objective conditions may be imposed on section 411(d)(6) protected benefits accrued as of the date of an amendment where permitted under the transitional rules of § 1.401(a)-4 Q&A-5 and Q&A-8 of this

section. Finally, objective conditions may be imposed on section 411(d)(6) protected benefits to the extent permitted by the permissible benefit cut-back provisions of Q&A-2 of this section.

Q-8: If a plan contains an impermissible employer discretion provision with respect to a section 411(d)(6) protected benefit, what acceptable alternative exist for amending the plan without violating the requirements of section 411(d)(6)?

A-8: (a) *In general.* The following rules apply for purposes of making necessary amendments to existing plans (as defined in Q&A-9 of this section) that contain discretion provisions with respect to the availability of section 411(d)(6) protected benefits that violate the requirements of section 401(a), including sections 401(a)(25) and 411(d)(6), and this section. These transitional rules are provided under the authority of section 411(d)(6) and section 7805(b).

(b) *Transitional alternatives.* If the availability of an optional form of benefit, early or late retirement benefit, or retirement-type subsidy under an existing plan is conditioned on the exercise of employer discretion, the plan must be amended either to eliminate the optional form of benefit, early or late retirement benefit, or retirement-type subsidy to make such benefit available to all participants without limitation, or to apply objective and nondiscriminatory conditions to the availability of the optional form of benefit, early or later retirement benefit, or retirement-type subsidy. See paragraph (d) of this Q&A-8 for rules limiting the period during which section 411(d)(6) protected benefits may be eliminated or reduced under this paragraph.

(c) *Compliance and amendment date provisions—(1) Operational compliance requirement.* On or before the applicable effective date for the plan (as determined under Q&A-9 of this section), the plan sponsor must select one of the alternatives permitted under paragraph (b) of the Q&A-8 with respect to each affected section 411(d)(6) protected benefit and the plan must be operated in accordance with this selection. This is an operational requirement and does not require a plan amendment prior to

the period set forth in paragraph (c)(2) of this Q&A-8. There are no special reporting requirements under the Code or this section with respect to this selection.

(2) *Deferred amendment date.* If paragraph (c)(1) of this Q&A-8 is satisfied, a plan amendment conforming the plan to the particular alternative selected under paragraph (b) of this Q&A-8 must be adopted within the time period permitted for amending plans in order to meet the requirements of section 410(b) as amended by TRA '86. The plan amendment to conform the plan to these regulations may be made at an earlier date. Such conforming amendment must be consistent with the sponsor's selection as reflected by plan practice during the period from the effective date to the date the amendment is adopted. Thus, for example, if any existing calendar year noncollectively bargained defined benefit plan has a single sum distribution option that is subject to employer discretion as of August 1, 1986, and such employer makes one or more single sum distributions available on or after January 1, 1989 and before the effective date by which plan amendment is required pursuant to this section, then such employer may not adopt a plan amendment eliminating the single sum distribution, but rather must adopt an amendment eliminating the discretion provision. Any objective conditions that are adopted as part of such amendment must not be inconsistent with the plan practice for the applicable period prior to the amendment. A conforming amendment under this paragraph (c)(2) must be made with respect to each section 411(d)(6) protected benefit for which such amendment is required and must be retroactive to the applicable effective date.

(d) *Limitation on transitional alternatives.* The transitional alternatives permitting the elimination or reduction of section 411(d)(6) protected benefits are only permissible until the applicable effective date for the plan (see Q&A-9 of this section). After the applicable effective date, any amendment (other than one permitted under paragraph (c)(2) of this Q&A-8) that eliminates or reduces a section 411(d)(6) protected benefit or imposes new objective

conditions on the availability of such benefit will fail to qualify for the exception to section 411(d)(6) provided in this Q&A-8. This is the case without regard to whether the section 411(d)(6) protected benefit is subject to employer discretion.

Q-9: What are the applicable effective date rules for purposes of this section?

A-9: (a) *General effective date.* Except as otherwise provided in this section, the provisions of this section are effective January 30, 1986.

(b) *New plans—(1) In general.* Unless otherwise provided in paragraph (b)(2) of this Q&A-9, plans that are either adopted or made effective on or after August 1, 1986, are “new plans”. With respect to such new plans, this section is effective August 1, 1986. This effective date is applicable to such plans whether or not they are collectively bargained.

(2) *Exception with respect to certain new plans.* Plans that are new plans as defined in paragraph (b)(1) of this Q&A-9; under which the availability of a section 411(d)(6) protected benefit is subject to employer discretion; and that receive a favorable determination letter that covered such plan provisions with respect to an application submitted prior to July 11, 1988, will be treated as existing plans with respect to such section 411(d)(6) protected benefit for purposes of the transitional rules of this section. Thus, such plans are eligible for the compliance and amendment alternatives set forth in the transitional rule in Q&A-8 of this section.

(c) *Existing plans—(1) In general.* Plans, including plans that are adoptions of master or prototype plans, that are both adopted and in effect prior to August 1, 1986, are “existing plans” for purposes of this section. In addition, a plan that is established after July 31, 1986, but before January 1, 1989, as an initial adoption of a master or prototype plan for which a favorable opinion letter was issued by the Service after July 18, 1985 and before January 1, 1989, will be deemed to be an existing plan for purposes of this section. See sections 4.01 and 4.02 of Rev. Proc. 84-23, 1984-1 C.B. 457, 459, for the definitions of master prototype plans. However, if such plan ceases to be cov-

ered under an opinion letter of the type described above, as a result of amendment of the plan or adoption of a new plan, prior to the first day of the first plan year beginning on or after January 1, 1989, then the effective date for such plan will be determined as though the plan were a new plan initially adopted as of the date of such amendment or adoption of a new plan. Finally, new plans described in paragraph (b)(2) of this Q&A-9 are treated as existing plans with respect to certain section 411(d)(6) protected benefits. Subject to the limitations in paragraph (c) of this Q&A-9, the effective dates set forth in paragraphs (c)(2), (c)(3), and (c)(4) of this Q&A-9 apply to these existing plans for purposes of this section:

(2) *Existing noncollectively bargained plans.* With respect to existing plans other than collectively bargained plans this section is effective for the first day of the first plan year commencing on or after January 1, 1989.

(3) *Existing collectively bargained plans.* With respect to existing collectively bargained plans this section is effective for the later of the first day of the first plan year commencing on or after January 1, 1989, or the first day of the first plan year that the requirements of section 410(b) as amended by TRA '86 apply to such plan.

(4) *Existing master and prototype plans.* With respect to existing plans that are adoptions of master or prototype plans the effective date will be the first day of the first plan year commencing on or after January 1, 1989.

(d) *Delayed effective date not applicable to new alternatives or conditions—(1) In general.* The delayed effective dates in paragraphs (c)(2) and (c)(3) of this Q&A-9 for existing plans are only applicable with respect to a section 411(d)(6) protected benefit if both the section 411(d)(6) protected benefit and the condition providing employer discretion as to the availability of such benefit are both adopted and in effect prior to August 1, 1986. If the preceding sentence is not satisfied with respect to a particular section 411(d)(6) protected benefit, this section is effective with respect to such section 411(d)(6) protected benefit as if the plan were a new plan.

(2) *Addition of discretion on or after January 30, 1986.* The delayed effective dates in paragraphs (c)(2) and (c)(3) of this Q&A-9 are not available with respect to any section 411(d)(6) protected benefit if the section 411(d)(6) protected benefit was provided for in the plan prior to January 30, 1986, and the availability of such benefit was made subject to the exercise of employer discretion on or after January 30, 1986. If the conditions set forth in this paragraph are not satisfied with respect to a particular section 411(d)(6) protected benefit, this section is effective with respect to such section 411(d)(6) protected benefit as if the plan were a new plan. A limited exception is provided with respect to existing plans that provided a particular section 411(d)(6) protected benefit prior to January 30, 1986, and then amended the plan after January 30, 1986, and before August 1, 1986, to add a provision for employer discretion with respect to the availability of such benefit. Such plans are required to have been amended retroactively by December 31, 1987, to remove such provision for employer discretion, and, if the benefit made subject to such discretion was subsequently eliminated, the plan is required to have been further amended, by the same date, to retroactively reinstate the benefit.

(3) *Exception for certain amendments covered by a favorable determination letter.* If an amendment adding a section 411(d)(6) protected benefit subject to employer discretion was adopted or made effective after August 1, 1986, and the plan receives a favorable determination letter covering such provision with respect to an application for such letter made prior to July 11, 1988, then the effective date for purposes of amending such provision under the transitional rules is the applicable effective date determined under the rules with respect to existing plans.

(e) *Transitional rule effective date.* The transitional rule provided in Q&A-8 of this section is effective January 30, 1986.

Q-10: If a plan provides for an age 70½ distribution option that commences prior to retirement from employment with the employer maintaining the plan, to what extent may the plan be

amended to eliminate this distribution option?

A-10: (a) *In general.* The right to commence benefit distributions in a particular form and at a particular time prior to retirement from employment with the employer maintaining the plan is a separate optional form of benefit within the meaning of section 411(d)(6)(B) and Q&A-1 of this section, even if the plan provision creating this right was included in the plan solely to comply with section 401(a)(9), as in effect for years before January 1, 1997. Therefore, except as otherwise provided in paragraph (b) of this Q&A-10 or any other Q&A in this section, a plan amendment violates section 411(d)(6) if it eliminates an age 70½ distribution option (within the meaning of paragraph (c) of this Q&A-10) to the extent that it applies to benefits accrued as of the later of the adoption date or effective date of the amendment.

(b) *Permitted elimination of age 70½ distribution option.* An amendment of a plan will not violate the requirements of section 411(d)(6) merely because the amendment eliminates an age 70½ distribution option to the extent that the option provides for distribution to an employee prior to retirement from employment with the employer maintaining the plan, provided that—

(1) The amendment eliminating this optional form of benefit applies only to benefits with respect to employees who attain age 70½ in or after a calendar year, specified in the amendment, that begins after the later of—

(i) December 31, 1998; or

(ii) The adoption date of the amendment;

(2) The plan does not, except to the extent required by section 401(a)(9), preclude an employee who retires after the calendar year in which the employee attains age 70½ from receiving benefits in any of the same optional forms of benefit (except for the difference in the timing of the commencement of payments) that would have been available had the employee retired in the calendar year in which the employee attained age 70½; and

(3) The amendment is adopted no later than—

(i) The last day of the remedial amendment period that applies to the

plan for changes under the Small Business Job Protection Act of 1996 (110 Stat. 1755); or

(ii) Solely in the case of a plan maintained pursuant to one or more collective bargaining agreements between employee representatives and one or more employers ratified before September 3, 1998, the last day of the twelfth month beginning after the date on which the last of such collective bargaining agreements terminates (determined without regard to any extension thereof on or after September 3, 1998), if later than the date described in paragraph (b)(3)(i) of this Q&A-10. For purposes of this paragraph (b)(3)(ii), the rules of § 1.410(b)-10(a)(2) apply for purposes of determining whether a plan is maintained pursuant to one or more collective bargaining agreements, except that September 3, 1998 is substituted for March 1, 1986, as the date before which the collective bargaining agreements must be ratified.

(c) *Age 70½ distribution option.* For purposes of this Q&A-10, an age 70½ distribution option is an optional form of benefit under which benefits payable in a particular distribution form (including any modifications that may be elected after benefit commencement) commence at a time during the period that begins on or after January 1 of the calendar year in which an employee attains age 70½ and ends April 1 of the immediately following calendar year.

(d) *Examples.* The provisions of this Q&A-10 are illustrated by the following examples:

Example 1. Plan A, a defined benefit plan, provides each participant with a qualified joint and survivor annuity (QJSA) that is available at any time after the later of age 65 or retirement. However, in accordance with section 401(a)(9) as in effect prior to January 1, 1997, Plan A provides that if an employee does not retire by the end of the calendar year in which the employee attains age 70½, then the QJSA commences on the following April 1. On October 1, 1998, Plan A is amended to provide that, for an employee who is not a 5-percent owner and who attains age 70½ after 1998, benefits may not commence before the employee retires but must commence no later than the April 1 following the later of the calendar year in which the employee retires or the calendar year in which the employee attains age 70½. This amendment satisfies this Q&A-10 and does not violate section 411(d)(6).

Example 2. Plan B, a money purchase pension plan, provides each participant with a choice of a QJSA or a single sum distribution commencing at any time after the later of age 65 or retirement. In addition, in accordance with section 401(a)(9) as in effect prior to January 1, 1997, Plan B provides that benefits will commence in the form of a QJSA on April 1 following the calendar year in which the employee attains age 70½, except that, with spousal consent, a participant may elect to receive annual installment payments equal to the minimum amount necessary to satisfy section 401(a)(9) (calculated in accordance with a method specified in the plan) until retirement, at which time a participant may choose between a QJSA and a single sum distribution (with spousal consent). On June 30, 1998, Plan B is amended to provide that, for an employee who is not a 5-percent owner and who attains age 70½ after 1998, benefits may not commence prior to retirement but benefits must commence no later than April 1 after the later of the calendar year in which the employee retires or the calendar year in which the employee attains age 70½. The amendment further provides that the option described above to receive annual installment payments prior to retirement will not be available under the plan to an employee who is not a 5-percent owner and who attains age 70½ after 1998. This amendment satisfies this Q&A-10 and does not violate section 411(d)(6).

Example 3. Plan C, a profit-sharing plan, contains two distribution provisions. Under the first provision, in any year after an employee attains age 59½, the employee may elect a distribution of any specified amount not exceeding the balance of the employee's account. In addition, the plan provides a section 401(a)(9) override provision under which, if, during any year following the year that the employee attains age 70½, the employee does not elect an amount at least equal to the minimum amount necessary to satisfy section 401(a)(9) (calculated in accordance with a method specified in the plan), Plan C will distribute the difference by December 31 of that year (or for the year the employee attains age 70½, by April 1 of the following year). On December 31, 1996, Plan C is amended to provide that, for an employee other than an employee who is a 5-percent owner in the year the employee attains age 70½, in applying the section 401(a)(9) override provision, the later of the year of retirement or year of attainment of age 70½, is substituted for the year of attainment of age 70½. After the amendment, Plan C still permits each employee to elect to receive the same amount as was available before the amendment. Because this amendment does not eliminate an optional form of benefit, the amendment does not violate section 411(d)(6). Accordingly, the amendment is not required

§ 1.411(d)-4

26 CFR Ch. I (4-1-08 Edition)

to satisfy the conditions of paragraph (b) of this Q&A-10.

(e) *Effective date.* This Q&A-10 applies to amendments adopted and effective after June 5, 1998.

Q-11: To what extent may a plan amendment that is made pursuant to the Taxpayer Relief Act of 1997 (TRA '97) (Public Law 105-34, 111 Stat. 788), reduce or eliminate section 411(d)(6) protected benefits?

A-11: A plan amendment does not violate the requirements of section 411(d)(6) merely because the plan amendment reduces or eliminates section 411(d)(6) protected benefits as of the effective date of the plan amendment, provided that—

(a) The plan amendment is made pursuant to an amendment made by title XV, or subtitle H of title X, of TRA '97; and

(b) The plan amendment is adopted no later than the last day of any remedial amendment period that applies to the plan pursuant to §§ 1.401(b)-1 and 1.401(b)-1T for changes under TRA '97.

Q-12. Is there a transition period during which a plan is permitted to eliminate a right to in-service distributions in connection with an amendment to ensure that the plan's normal retirement age satisfies the requirements of § 1.401(a)-1(b)(2)?

A-12. (a) *In general.* A plan amendment that changes the normal retirement age under the plan to a later normal retirement age pursuant to § 1.401(a)-1(b)(2) does not violate section 411(d)(6) merely because it eliminates a right to an in-service distribution prior to the amended normal retirement age. However, this paragraph does not provide relief from any other applicable requirements; for example, this relief does not permit the amendment to violate section 411(a)(9) (requiring that the normal retirement benefit not be less than the greater of any early retirement benefit payable under the plan or the benefit under the plan commencing at normal retirement age), section 411(a)(10) (if the amendment changes the plan's vesting rules), section 411(d)(6) (other than elimination of the right to an in-service distribution prior to the amended normal retirement age), or section 4980F (relating to an amendment that reduces the rate of

future benefit accrual). This paragraph only applies to a plan amendment that is adopted after May 22, 2007 and on or before the last day of the applicable remedial amendment period under § 1.401(b)-1 with respect to the requirements of § 1.401(a)-1(b)(2) and (3).

(b) *Example.* The following example illustrates the application of this section:

(i) *Facts.* (A) Plan A is a defined benefit plan intended to be qualified under section 401(a). Plan A is maintained by a calendar year taxpayer and has a normal retirement age that is age 45. For employees who cease employment before normal retirement age with a vested benefit, Plan A permits benefits to commence at any date after the attainment of normal retirement age through attainment of age 70½ and provides for benefits to be actuarially increased to the extent they commence after normal retirement age. For employees who continue employment after attainment of normal retirement age, Plan A provides for benefits to continue to accrue and permits benefits to commence at any time, with an actuarial increase in benefits to apply to the extent benefits do not commence after normal retirement age. Age 45 is an age that is earlier than the earliest age that is reasonably representative of the typical retirement age for the industry in which the covered workforce is employed.

(B) On February 18, 2008, Plan A is amended, effective May 22, 2007, to change its normal retirement age to the later of age 65 or the fifth anniversary of participation in the plan. The amendment provides full vesting for any participating employee who is employed on May 21, 2007, and who terminates employment on or after attaining age 45. The amendment provides employees who cease employment before the revised normal retirement age and who are entitled to a vested benefit with the right to be able to commence benefits at any date from age 45 to age 70½. The plan amendment also revises the plan's benefit accrual formula so that the benefit for prior service (payable commencing at the revised normal retirement age or any other age after age 45) is not less than would have applied under the plan's formula before the amendment (also payable commencing at the corresponding dates), based on the benefit accrued on May 21, 2007, and provides for service thereafter to have the same rate of future benefit accrual. Thus, for any participant employed on May 21, 2007, with respect to benefits accrued for service after May 21, 2007, the amount payable under the plan (as amended) at any benefit commencement date after age 45 is the same amount that would have been payable at that benefit commencement date under the plan prior to amendment. The plan

amendment also eliminates the right to an in-service distribution between age 45 and the revised normal retirement age. Plan A has been operated since May 22, 2007, in conformity with the amendment adopted on February 18, 2008.

(ii) *Conclusion.* The plan amendment does not violate section 411(d)(6). Although the amendment eliminates the right to commence benefits in-service between age 45 and the revised normal retirement age, the amendment is made before the last day of the remedial amendment period applicable to the plan under § 1.401(b)-1 with respect to the requirements of § 1.401(a)-1(b)(2) and (3), and therefore the amendment is permitted under paragraph (a) of this A-12. Further, the amendment does not result in a reduction in any benefit for service after May 22, 2007.

Thus, the amendment does not result in a reduction in any benefit for future service, and advance notice of a significant reduction in the rate of future benefit accrual is not required under section 4980F.

[53 FR 26058, July 11, 1988, as amended by T.D. 8360, 56 FR 47602, Sept. 19, 1991; T.D. 8357, 56 FR 40549, Aug. 15, 1991; T.D. 8360, 57 FR 4721, Feb. 7, 1992; T.D. 8485, 58 FR 46828, Sept. 3, 1993; T.D. 8581, 59 FR 66180, Dec. 23, 1994; T.D. 8769, 63 FR 30623, June 5, 1998; T.D. 8781, 63 FR 47173, Sept. 4, 1998; T.D. 8794, 63 FR 70338, Dec. 21, 1998; T.D. 8806, 64 FR 1126, Jan. 8, 1999; T.D. 8806, 64 FR 38826, July 20, 1999; T.D. 8891, 65 FR 44682, July 19, 2000; T.D. 8900, 65 FR 53906, Sept. 6, 2000; T.D. 9169, 69 FR 78153, Dec. 29, 2004; T.D. 9176, 70 FR 3476, Jan. 25, 2005; 70 FR 11121, Mar. 8, 2005; T.D. 9219, 70 FR 47126, Aug. 12, 2005; T.D. 9325, 72 FR 28607, May 22, 2007]

§ 1.411(d)-5 Class year plans; plan years beginning after October 22, 1986.

(a) *Plan years beginning prior to 1989.*

(1) The requirements of section 411(a)(2) shall be treated as satisfied in the case of a class-year plan if such plan provides that 100 percent of each employee's right to or derived from the contributions of the employer on the employee's behalf with respect to any plan year is nonforfeitable not later than when such participant was performing services for the employer as of the close of each of 5 plan years (whether or not consecutive) after the plan year for which the contributions were made.

(2) For purposes of paragraph (a)(1) of this section if—

(i) Any contributions are made on behalf of a participant with respect to any plan year, and

(ii) Before such participant meets the requirements of paragraph (a)(1) of this section, such participant was not performing services for the employer as of the close of each of any 5 consecutive plan years after such plan year, then the plan may provide that the participant forfeits any right to or derived from the contributions made with respect to such plan year.

(3) This paragraph (a) applies to contributions made for plan years beginning after October 22, 1986.

(b) *Plan years beginning after 1988.* (1) The special class year vesting rule in section 411(d)(4) was repealed by section 1113(b) of the Tax Reform Act of 1986 (1986 Act). The repeal is generally effective for plan years beginning after December 31, 1988. See section 1111(e) of the 1986 Act for a special effective date rule applicable to certain plans maintained pursuant to collective bargaining agreements.

(2)(i) This subparagraph (2) provides a special rule for class year plans that were in compliance with section 411(d)(4) immediately before the first plan year beginning after section 411(d)(4) is repealed. These plans are not required to retroactively compute years of service under the general section 411(a)(2) rules. Instead, a participant must receive a year of service for each such prior plan year if the employee was performing services on the last day of such year. Similarly, if the participant was not performing services on the last day of such years, the participant will be treated as if a one-year break-in-service occurred for such plan year. This subdivision (i) applies to plan years to which this section applies.

(ii) In the case of a plan year to which § 1.411(d)-3 applied, a class year plan must compute years of service and breaks in service in a manner consistent with the rules in this paragraph (b)(2)(i), giving appropriate regard to the statutory changes made to section 411(d)(4).

[T.D. 8219, 53 FR 31854, Aug. 22, 1988; 53 FR 48534, Dec. 1, 1988]

§ 1.412(b)-2 Amortization of experience gains in connection with certain group deferred annuity contracts.

(a) *Experience gain treatment.* Dividends, rate credits, and credits for forfeitures arising in a plan described in paragraph (b) of this section are experience gains described in section 412(b)(3)(B)(ii) (relating to the amortization of experience gains).

(b) *Plan.* A plan is described in this paragraph (b) if—

(1) The plan is funded solely through a group deferred annuity contract,

(2) The annual single premium required under the contract for the purchase of the benefits accruing during the plan year is treated as the normal cost of the plan for that year, and

(3) The amount necessary to pay in equal annual installments, over the appropriate amortization period, an amount equal to the single premium necessary to provide all past service benefits not initially funded, together with interest thereon, is treated as the annual amortization amount determined under section 412(b)(2)(B) (i), (ii) or (iii).

(c) *Effective date.* This section applies for the first plan year to which section 412 applies that begins after May 22, 1981.

[T.D. 7764, 46 FR 6923, Jan. 22, 1981]

§ 1.412(b)-5 Election of the alternative amortization method of funding.

(a) *Alternative amortization method in general.* Section 1013(d) of the Employee Retirement Income Security Act of 1974 provides an alternative method which may be used by certain multiemployer plans (as defined in section 414(f)) which were in existence on January 1, 1974, for funding certain unfunded past service liability. The multiemployer plans which may elect to use this alternative method are those plans (1) under which, on January 1, 1974, contributions were based on a percentage of pay, (2) which use actuarial assumptions with respect to pay that are reasonably related to past and projected experience, and (3) which use rates of interest that are determined on the basis of reasonable actuarial assumptions. The unfunded past service liability to which this method applies is that amount existing as of the date

12 months after the date on which section 412 first applies to the plan. The alternative method allows the plan to fund this liability over a period of 40 plan years by charging the funding standard account with an equal annual percentage of the aggregate pay of all participants in the plan instead of the level dollar charges required under section 412(b)(2)(B). Paragraphs (b), (c), (d) and (e) of this section contain procedural rules for electing this alternative method.

(b) *Election procedure.* To elect the alternative amortization method, a multiemployer plan must attach a statement to the annual report required under section 6058(a) for the plan year for which the election is made, stating that the alternative method for funding unfunded past service liability is being adopted. Advance approval from the Internal Revenue Service is not required. The alternative method must be adopted on or before the last day prescribed for filing the annual report corresponding to the last plan year beginning before January 1, 1982.

(c) *Charges to which the alternative amortization method is applicable.* Once elected, the alternative amortization method is applicable to the unfunded past service liability existing as of the date 12 months after the date on which section 412 first applies to the plan. This results in charges to the funding standard account which are in lieu of—

(1) Charges required under clause (i) of section 412(b)(2)(B), and

(2) Charges required under clause (iii) of section 412(b)(2)(B) if the plan amendments referred to in such clause result in a net increase in the unfunded past service liability existing as of the date 12 months after the date on which section 412 first applies to the plan. Such charges generally will arise only with respect to plan amendments adopted in the first plan year to which section 412 applies.

If the election is made on an annual report corresponding to a plan year after the first plan year to which section 412 applies, recomputation of the contributions due in the prior years (to which section 412 applied) will be necessary.

(d) *Limitation.* The sum of the charges described in this paragraph may not be less than the interest on the unfunded

past service liabilities described in section 412(b)(2)(B) (i) and (iii), determined as of the date 12 months after the date on which section 412 first applies to the plan.

(e) *Reporting requirements.* Each annual report required by section 6058(a) and periodic report of the actuary required by section 6059 must include all additional information relevant to the use of the alternative amortization method as may be required by the applicable forms and the instructions for such forms.

[T.D. 7702, 45 FR 40113, June 13, 1980]

§ 1.412(c)(1)-1 Determinations to be made under funding method—terms defined.

(a) *Actuarial cost method and funding method.* Section 3 (31) of the Employee Retirement Income Security Act of 1974 (“ERISA”) provides certain acceptable (and unacceptable) actuarial cost methods which may (or may not) be used by employee plans. The term “funding method” when used in section 412 has the same meaning as the term “actuarial cost method” in section 3 (31) of ERISA. For shortfall method for certain collectively bargained plans, see § 1.412(c)(1)-2; for principles applicable to funding methods in general, see regulations under section 412(c)(3).

(b) *Computations included in funding method.* The funding method of a plan includes not only the overall funding method used by the plan but also each specific method of computation used in applying the overall method. However, the choice of which actuarial assumptions are appropriate to the overall method or to the specific method of computation is not a part of the funding method. For example, the decision to use or not to use a mortality factor in the funding method of a plan is not a part of such funding method. Similarly, the specific mortality rate determined to be applicable to a particular plan year is not part of the funding method. See section 412(c)(5) for the requirement of approval to change the funding method used by a plan.

[T.D. 7733, 45 FR 75202, Nov. 14, 1980]

§ 1.412(c)(1)-2 Shortfall method.

(a) *In general—(1) Shortfall method.* The shortfall method is a funding method that adapts a plan’s underlying funding method for purposes of section 412. As such, the use of the shortfall method is subject to section 412(c)(3). A plan described in paragraph (a)(2) of this section may elect to determine the charges to the funding standard account required by section 412(b) under the shortfall method. These charges are computed on the basis of an estimated number of units of service or production (for which a certain amount per unit is to be charged). The difference between the net amount charged under this method and the net amount that otherwise would have been charged under section 412 for the same period is a shortfall loss (gain) and is to be amortized over certain subsequent plan years.

(2) *Eligibility for use of shortfall.* No plan may use the shortfall method unless—

(i) The plan is a collectively bargained plan described in section 413(a), and

(ii) Contributions to the plan are made at a rate specified under the terms of a legally binding agreement applicable to the plan.

For purposes of this section, a plan maintained by a labor organization which is exempt from tax under section 501(c)(5) is treated as a collectively bargained plan and the governing rules of the organization (such as its constitution, bylaws, or other document that can be altered only through action of a convention of the organization) are treated as a collectively bargained agreement.

(b) *Computation and effect of net shortfall charge—(1) In general.* The “net shortfall charge” to the funding standard account under the shortfall method is the product of (i) the estimated unit charge described in paragraph (c) of this section that applies for a particular plan year, multiplied by (ii) the actual number of base units (for example, units of service or production) which occurred during that plan year. When the shortfall method is used, the net shortfall charge is a substitute for the specific charges and credits to the

§ 1.412(c)(1)–2

26 CFR Ch. I (4–1–08 Edition)

funding standard account described in section 412 (b)(2) and (3)(B).

(2) *Example.* Paragraph (b)(1) of this section may be illustrated by the following example:

Example. A pension plan uses the calendar year as the plan year and the shortfall method. Its estimated unit charge applicable to 1980 is 80 cents per hour of covered employment. During 1980, there were 125,000 hours of covered employment. The net shortfall charge for the plan year is \$100,000 (*i.e.*, $125,000 \times \$.80$), regardless of the amount which would be charged and credited to the funding standard account under section 412 (b)(2) and (3)(B) had the shortfall method not applied. The funding standard account for 1980 will be separately credited for the amount considered contributed for the plan year under section 412 (b)(3)(A). The other items which may be credited, if applicable, are a waived funding deficiency and the alternative minimum funding standard credit adjustment under section 412(b)(3)(C) and (D) because these items are not credits under section 412(b)(3)(B).

(3) *Plans with more than one contract, contribution rate, employer, or benefit level—(i) General rule.* A single plan with more than one contract, contribution rate, employer, or benefit level may compute a separate net shortfall charge for each contract, contribution rate, each employer, or each benefit level. The sum of these charges is the plan's total net shortfall charge. under § 1.412(c)(1)–1(b), the use of separate computations would be a specific method of computation used in applying the overall funding method. See also paragraph (f)(5) of this section.

(ii) *Single valuation.* Only one actuarial valuation shall be made for the single plan on each actuarial valuation date.

(iii) *Reasonableness test.* The specific method of computation of the net shortfall charge must be reasonable, determined in the light of the facts and circumstances.

(c) *Estimated unit charge.* The estimated unit charge is the annual computation charge described in paragraph (d) of this section divided by the estimated base units of service or production described in paragraph (e) of this section.

(d) *Annual computation charge.* The annual computation charge for a plan year is the sum of the following amounts:

(1) The net charges and credits which, but for using the shortfall method, would be made under section 412 (b)(2) and (b)(3)(B).

(2) The amount described in paragraph (g)(3) of this section, if applicable, for amortization of shortfall gain or loss.

(e) *Estimated base units—(1) In general.* The estimated base units are the expected units of service or production for a plan year (hours, days, tons, dollars of compensation, etc.), determined as of the base unit estimation date for that plan year under paragraph (f) of this section. This estimate must be based on the past experience of the plan and the reasonable expectations of the plan for the plan year. The specific type of unit used must be described in the statement of funding method for the plan year. (See paragraph (i)(3) of this section for reporting requirements.)

(2) *Reasonable expectations.* The reasonableness of expectations used under paragraph (e)(1) of this section is determined under the facts and circumstances of the plan for each plan year as of the relevant base unit estimation date. Expectations will be considered unreasonable if, for example, they do not reflect a consistent and substantial decline or growth in actual base units that has occurred over the course of recent years and that is likely to continue beyond the base unit estimation date. This determination of reasonableness is independent of determinations made under section 412(c)(3) of the reasonableness of actuarial assumptions.

(f) *Base unit estimation date—(1) In general.* The base unit estimation date for the current plan year is determined under this paragraph (f). This date shall be an actuarial valuation date no earlier than the last actuarial valuation date occurring at least one year before the earliest date any current collectively bargained agreement in existence during the plan year came into effect.

(2) *Four-month rule.* For purposes of this paragraph (f), a current collectively bargained agreement is one in effect during at least four months of the current plan year.

(3) *Effective date of agreement.* For purposes of this paragraph (f), a collectively bargained agreement shall be deemed to have come into effect on the effective date of the agreement containing the currently effective provision for contributions to the plan or the benefits provided under the plan.

(4) *Long-term contract rule.* The effective date of a collectively bargained agreement shall be deemed not to occur prior to the first day of the third plan year preceding the current year.

(5) *Special rule for plans computing separate net shortfall charge.* A plan that computes a separate net shortfall charge for each contract, contribution rate, employer, or benefit level under paragraph (b)(3) of this section shall determine the base unit estimation date for each separate charge without regard to any collectively bargained agreement that does not relate to that contract, contribution rate, employer, or benefit level. If a collective bargaining agreement requiring contribu-

tions by a certain employer, or prescribing a certain benefit level, is in effect on December 31, 1980, the preceding sentence shall not apply to the computation of a separate net shortfall charge for that employer or benefit level until the earlier of—

(i) The first plan year beginning after the date on which expires the collective bargaining agreement requiring contributions by that employer (or the last collective bargaining agreement relating to that benefit level), or

(ii) The first plan year beginning after December 31, 1983.

(6) *Example.* The rules contained in paragraph (f) of this section are illustrated by the following table. In the table, “V” signifies actuarial valuation date (January 1 in each case shown); “B” signifies beginning of a contract; and “E” signifies end of a contract. The table shows the resulting earliest base unit estimation date with respect to the following assumed items:

COMPUTATION OF EARLIEST BASE UNIT ESTIMATION DATE

Example	Plan year (calendar year basis)											
	1973	1974	1975	1976	1977	1978	1979	1980	1981	1982	1983	1984
Plan A	V			V			V			V		
Contract 1			E/B			E/B		E/B				E/B
Base unit estimation date ¹				1973	1973	1973	1976	1976	1979	1979	1979	1979
Plan B	V ²			V			V			V		
Contract 2		²	²	B*		E/B				E/B*		
Contract 3	E/B			E/B		E/B				E/B		
Base unit estimation date ¹				1973	1973	1973	1976	1976	1976	1976	1979	1979
Plan C	V	V	V	V	V	V	V	V	V	V	V	V
Contract 4			E/B			E/B*				E/B*		
Contract 5			E/B			E/B*					E/B*	
Base unit estimation date ¹				1974	1974	1977	1977	1977	1977	1978	1979	1981

¹ The base unit estimation date may be on or any time after the actuarial valuation date in the year indicated on this line.

² No contract.

* Denotes that a prior contract ends and a new contract begins prior to the fifth month of a plan year.

(g) *Amortization of shortfall gain or loss—(1) Definition.* The shortfall gain for a plan is the excess for the plan year of—

(i) The net shortfall charge computed under paragraph (b) of this section over

(ii) The annual computation charge described in paragraph (d) of this section.

The shortfall loss for a plan is the excess for the plan year of the annual computation charge over the net shortfall charge.

(2) *Shortfall amortization period—(i)*

First year. The plan year in which the amortization of a shortfall gain or loss must begin is the earlier of two years: the fifth plan year following the plan year in which the shortfall gain or loss arose, or the first plan year beginning after the latest scheduled expiration date of a collectively bargained agreement in effect with respect to the plan during the plan year in which the shortfall gain or loss arose. For purposes of this subparagraph, a contract

§ 1.412(c)(1)-2

26 CFR Ch. I (4-1-08 Edition)

expiring on the last day of a plan year shall be deemed to be renewed on such last day for the same period of years as the contract that succeeds the expiring contract.

(ii) *Last year.* The plan year in which the amortization of a shortfall gain or loss must end is the 15th plan year following the plan year in which the shortfall gain or loss arose. For a multiemployer plan described in section 414(f), the amortization must end with the 20th plan year instead of the 15th.

(3) *Annual amortization amount.* The shortfall gain or loss must be amortized in equal annual installments. The total amount to be amortized must be adjusted for interest at the rate used for determining the plan's normal cost.

(4) *Shortfall gain or loss under spread gain type of funding method—(i) In general.* A spread gain type of funding method spreads experience gains and losses over future periods as part of a plan's normal cost. (Examples of spread gain types of funding methods are the aggregate cost method, the frozen initial liability method, and the attained age normal method.) However, a shortfall gain or loss is not an experience gain or loss. Therefore, a plan using a spread gain type of funding method together with the shortfall method must amortize shortfall gains and losses and otherwise meet the requirements of paragraph (g) of this section.

(ii) *Asset adjustment for aggregate method.* A plan using the shortfall method with the aggregate cost method of funding must adjust its plan assets for a shortfall gain or loss in calculating normal cost. The unamortized portion of any shortfall gain is subtracted from plan assets. The unamortized portion of any shortfall loss is added to plan assets.

(5) *Reconciliation of shortfall gain or loss with funding standard account.* At the beginning of each year, the actual unfunded liability under the method used by the plan must equal the outstanding balance of all amortization bases, including bases for shortfall gains and losses, less the credit balance under the funding standard account at the end of the prior year.

(6) *Example.* This paragraph is illustrated by the following examples:

Example 1. A multiemployer plan described in section 414 (f) is maintained with the calendar year as the plan year and uses the shortfall method. The plan uses the frozen initial liability funding method. A five percent interest assumption is used by the plan, with payments computed as of the first day of each plan year for all items. The expiration dates of contracts in effect during plan years 1976, 1977, and 1978 are such that the amortization of gains or losses for each year must begin in the fifth following plan year. The assumed plan costs and estimated base units for selected years, and the computations under this section which follow from such assumptions are shown in the following table. In the table, “*” denotes an assumed item. The remaining figures have been calculated on the basis of these assumptions.

(A) COMPUTATION OF NET SHORTFALL CHARGE AND SHORTFALL GAIN OR LOSS

Plan year	1976	1977	1978
1. Normal cost* ..	\$100,000	\$100,000	\$100,000
2. Amortization of unfunded liability*	50,000	50,000	50,000
3. Total annual computation charges	\$150,000	\$150,000	\$150,000
4. Estimated base units*	100,000	100,000	100,000
5. Estimated unit charge (line 3÷line 4)	\$1.50	\$1.50	\$1.50
6. Actual units during year*	80,000	90,000	110,000
7. Net shortfall charge for year (line 5×line 6) ..	120,000	135,000	165,000
8. Shortfall (gain) or loss (line 3 – line 7)	30,000	15,000	(\$15,000)

(B) ANNUAL AMORTIZATION AMOUNT

	1976	1977	1978
9. Year of shortfall gain or loss			
10. First year of amortization	1981	1982	1983
11. Last year of amortization	1996	1997	1998
12. (Gain) or loss adjusted for interest to year amortization begins (1–1–76 to 1–1–81, etc.)	\$38,288	\$19,144	(\$19,144)
13. Annual amortization (16 years)	\$3,364	\$1,682	(\$1,682)

Internal Revenue Service, Treasury

§ 1.412(c)(1)-2

(C) COMPUTATION OF NET SHORTFALL CHARGES FOR SELECTED YEARS (INCLUDING SHORTFALL AMORTIZATION)

Plan year	1981	1982	1983
14. Normal cost*	\$120,000	\$125,000	\$130,000
15. Amortization of unfunded liability*	50,000	50,000	50,000
16. Shortfall amortization (see line 13) from:			
1976	3,364	3,364	3,364
1977		1,682	1,682
1978			(1,682)
17. Total annual computation charges	173,364	180,046	183,364
18. Estimated base units*	110,000	110,000	110,000
19. Estimated unit charge (line 17÷line 18)	1.576	1.637	1.667
20. Actual units during year*	105,000	110,000	105,000
21. Net shortfall charge for year (line 19×line 20)	165,480	180,070	175,035
22. Shortfall (gain) loss (line 17 – line 21)	7,884	(24)	8,329

The amounts in line 22 will be amortized beginning 1986, 1987, and 1988, respectively. The \$24 gain in 1982 results from rounding the estimated unit charge.

Example 2. Assume the facts in Example 1. Also assume that the plan uses the frozen initial liability funding method, that the unfunded liability as of January 1, 1976 (corresponding to a 40-year charge of \$50,000 due at the beginning of the year) is \$900,850, and that actual contributions at the rate of \$1.75 per unit are paid at mid-year in 1976.

(A) COMPUTATION OF THE UNFUNDED LIABILITY AS OF DECEMBER 31, 1976

1. Unfunded liability as of 1/1/76	\$900,850
2. Normal cost (that used in the calculation of the total annual computation charges)	100,000
3. Interest at 5% due on items 1 and 2	50,043
4. Contribution with interest: \$1.75×80,000×1.025 (actual contribution rate times actual base units times interest adjustment from mid-year)	143,500
5. Unfunded liability as of 12/31/76: item 1+item 2+item 3 – item 4	907,393

(B) COMPUTATION OF THE OUTSTANDING BALANCE OF THE BASES AS OF DECEMBER 31, 1976

1. Original base: (\$900,850 – \$50,000)×1.05	\$893,393
2. Shortfall loss \$30,000×1.05	31,500
3. Total	924,893

(C) COMPUTATION OF THE CREDIT BALANCE AS OF DECEMBER 31, 1976

1. Net shortfall charge (§ 1.412 (c) (1)-2 (b)) adjusted for interest: \$120,000×1.05	\$126,000
2. Actual contributions with interest	143,500
3. Credit balance as of 12/31/76: item 2 – item 1	17,500

(D) RECONCILIATION OF COMPUTATIONS

As of January 1, 1977, the unfunded liability (\$907,393) equals the outstanding balance of the bases minus the credit balance (\$924,893 – \$17,500=\$907,393).

(h) *Amortization of experience gain or loss—(1) General rule.* In the case of a plan using an immediate gain type of funding method, an experience gain or loss shall be amortized pursuant to section 412 (b)(2)(B)(iv) or (b)(3)(B)(ii). (Examples of the immediate gain type of funding method are the unit credit method, the entry age normal cost method, and the individual level premium cost method.) For purposes of this section, a shortfall gain or loss is not an experience gain or loss. The amount of the experience gain or loss must be adjusted for interest at the rate used for determining the plan's normal cost.

(2) *Experience amortization period under shortfall method—(i) First year.* The plan year in which the amortization of an experience gain or loss must begin in the case of a plan using the shortfall method is the earlier of two years: the fifth plan year following the plan year in which the experience gain or loss arose, or the first plan year beginning after the last scheduled expiration date of a contract in effect during the plan year in which the experience gain or loss arose. For purposes of this subparagraph a contract expiring on the last day of the plan year shall be deemed to be renewed on such last day for the same period of years as the contract that succeeds the expiring contract.

(ii) *Last year.* The plan year in which the amortization of an experience gain or loss must end in the case of a plan using the shortfall method is the 15th plan year following the plan year in which the experience gain or loss arose. For a multi-employer plan described in section 414 (f), the amortization must end with the 20th plan year instead of the 15th.

§ 1.412(c)(1)-2

26 CFR Ch. I (4-1-08 Edition)

(3) *Use of annual computation charge in determining experience gain or loss.* In the case of a plan using an immediate gain type of funding method, an experience gain or loss is the difference between the expected unfunded liability and the actual unfunded liability under the plan. The expected unfunded liability as of the end of a plan year equals the actual unfunded liability as of the beginning of the year plus normal cost, minus contributions, all adjusted for interest. If the plan adopts the shortfall method, the expected unfunded liability is computed by using the normal cost applicable for the plan year in determining the annual computation charge under paragraph (d) of this section. The same normal cost is used in computing the unfunded liability under the frozen initial liability funding method.

(4) *Example.* This paragraph is illustrated by the following example:

Example. Assume the facts in Example 2 from paragraph (g) (6) of this section, except that the entry age normal funding method is used. Also assume that as of December 31, 1976, the actual unfunded liability is \$900,000.

(A) COMPUTATION OF EXPECTED UNFUNDED LIABILITY

1. Actual unfunded liability as of 1-1-76	\$900,850
2. Normal cost portion of annual computation charge as of 1-1-76	100,000
3. Interest at 5% due on items 1 and 2	50,043
4. Contribution received with interest: $\$1.75 \times 80,000 \times 1.025$ (actual contribution rate times actual base units times interest adjustment at mid-year)	143,500
5. Expected unfunded liability as of 12-31-76 (item 1 + item 2 + item 3 - item 4)	907,393

(B) COMPUTATION OF GAIN OR LOSS

1. Expected unfunded liability as of 12-31-76	\$907,393
2. Actual unfunded liability as of 12-31-76	900,000
3. Gain (or loss) (item 1 - item 2)	7,393

(i) *Election procedure—(1) In general.* To elect the shortfall method, a collectively bargained plan must attach a statement to the annual report required under section 6058 (a) for the first plan year to which it is applied. The statement shall state that the shortfall method is adopted, beginning with the plan year covered by such report. Advance approval from the Internal Revenue Service is not required if the shortfall method is first adopted on or before the later of—

(i) The first plan year to which section 412 applies or

(ii) The last plan year commencing before December 31, 1981.

However, approval must be received pursuant to section 412(c)(5) prior to the adoption of the shortfall method at a later time, or the discontinuance of such method, once adopted.

(2) *Use of specific computation method.*

A specific method of computation under the shortfall method is described in paragraph (b)(3) of this section, regarding the treatment of more than one contract, employer, or benefit level under the plan. This specific method may be adopted with respect to any plan year to which the shortfall method applies. Approval from the Commissioner must be received under section 412(c)(5) prior to the adoption of this specific computation method for a plan year subsequent to the first plan year to which the shortfall method applies, or prior to the discontinuance of a specific computation method, once adopted.

(3) *Reporting requirements.* Each annual report required by section 6058(a) and periodic report of the actuary required by section 6059 must include all additional information relevant to the use of the shortfall method as may be required by the applicable forms and the instructions for such forms.

(j) *Transitional rule.* In lieu of paragraphs (g)(2) and (h)(2) of this section relating to the amortization period for shortfall and experience gains and losses, for gains and losses arising in plan years beginning before January 1, 1981, a plan may rely on the prior published position of the Internal Revenue Service with respect to the amortization period for shortfall and experience gains and losses.

(k) *Supersession.* This section and § 1.412 (c) (1)-1 supersede §§ 1.412 (c) (1)-1 and (c) (1)-2 of the Temporary Income Tax Regulations Under the Employee Retirement Income Security Act of 1974.

(Secs. 412, 7805, Internal Revenue Code of 1954 (88 Stat. 914 and 68A Stat. 917; (26 U.S.C. 412 and 7805)), and sec. 3 (31) of the Employee Retirement Income Security Act of 1974 (88 Stat. 837; (29 U.S.C. 1002)))

[T.D. 7733, 45 FR 75202, Nov. 14, 1980]

§ 1.412(c)(1)-3 Applying the minimum funding requirements to restored plans.

(a) *In general*—(1) *Restoration method*. The restoration method is a funding method that adapts the underlying funding method of section 412 in the case of certain plans that are or have been terminated and are later restored by the Pension Benefit Guaranty Corporation (PBGC). The normal operation of the funding standard account, and all other provisions of section 412 and the regulations thereunder, are unchanged except as provided in this § 1.412(c)(1)-3. Under the restoration method, the PBGC shall determine a restoration payment schedule, extending over no more than 30 years, that replaces all charges and credits to the funding standard account attributable to pre-restoration amortization bases. The restoration payment schedule is determined on the basis of an actuarial valuation of the accrued liability of the plan on the initial post-restoration valuation date less the actuarial value of the plan assets on that date. The initial post-restoration valuation date is the date of the valuation that falls in the first plan year beginning on or after the date of the restoration order.

(2) *Applicability of restoration method*. A plan must use the restoration method if, and only if—

(i) The plan is being or has been terminated pursuant to section 4041(c) or section 4042 of the Employee Retirement Income Security Act of 1974 (ERISA); and

(ii) The plan has been restored by the PBGC pursuant to its authority under section 4047 of ERISA.

(b) *Computation and effect of the initial restoration amortization base*—(1) *In general*. The initial restoration amortization base is determined under the underlying funding method used by the plan. When the plan uses a spread gain funding method that does not maintain an unfunded liability, the plan must change either to an immediate gain method that directly calculates an accrued liability or to a spread gain method that maintains an unfunded liability. A plan may adopt any cost method that satisfies this requirement and that is acceptable under section 412 and the regulations thereunder, pro-

vided that the plan administrator follows the procedures established by the Commissioner for changes in funding methods. The initial restoration amortization base is determined using the valuation for the plan year in which the initial post-restoration valuation date falls. The initial restoration amortization base equals the accrued liability with respect to plan benefit liabilities returned by the PBGC less the value of the plan assets returned by the PBGC. The initial restoration amortization base replaces all prior amortization bases including those under section 412(b)(2) (B), (C), and (D) and under section 412(b)(3)(B). Any base resulting from a change in funding method, including a change required under this paragraph, is treated as a prior amortization base within the meaning of this paragraph (b). Any accumulated funding deficiency or credit balance in the funding standard account is set equal to zero when the initial restoration amortization base is established.

(2) *Example*. The following example illustrates the provisions of this paragraph (b):

Example. A pension plan uses the calendar year as its plan year, makes its annual periodic valuation as of January 1, and uses the unit credit actuarial cost method for funding purposes. The plan is in the process of being terminated. By order of the PBGC the plan is restored as of July 1, 1991. The initial post-restoration valuation date is January 1, 1992, and a restoration payment schedule order is issued on October 31, 1992. If, as of January 1, 1992, the accrued liability of the plan is \$1,000,000 and the value of the plan assets is \$200,000, the initial restoration amortization base is \$800,000.

(c) *Establishment of a restoration payment schedule*—(1) *Certification requirement*. When the PBGC establishes a restoration payment schedule, the Executive Director of the PBGC must certify to the PBGC's Board of Directors, and to the Internal Revenue Service, that the PBGC has reviewed the funding of the plan, the financial condition of the plan sponsor and its controlled group members, the payments required under the restoration payment schedule (taking into account the availability of deferrals authorized under paragraph (c)(4) of this section), and any other factor that the PBGC deems relevant, and, based on that review, determines

that it is in the best interests of participants and beneficiaries of the plan and the pension insurance program that the restored plan not be reterminated.

(2) *Requirements for restoration payment schedule*—(i) *Amortization of base over period of no more than 30 years.* The restoration payment schedule must be prescribed in an order requiring the employer to make stated contributions to the plan sufficient to amortize the initial restoration amortization base over a period extending not more than 30 years after the initial post-restoration valuation date (the restoration payment period). Payments included in the restoration payment schedule order are charged to the funding standard account of the plan at the end of each plan year in accordance with paragraph (d) of this section. The restoration payment schedule must provide for total charges that are sufficient to amortize the entire amount of the initial restoration amortization base by the end of the restoration payment period. The scheduled charges need not be in level amounts, but the present value of the prescribed charges on the initial post-restoration valuation date, computed with interest at the valuation rate, must equal the initial restoration amortization base.

(ii) *Minimum annual charge.* The restoration payment schedule must prescribe annual charges that are sufficient to prevent the outstanding balance of the initial restoration amortization base from exceeding whichever of the following amounts is applicable—

(A) During the first 10 plan years on the restoration payment schedule, the amount of the initial restoration amortization base on the date the base was established; or

(B) During plan years 11 through 20 on the restoration payment schedule, the maximum permitted outstanding balance of the initial restoration amortization base at the end of the tenth plan year, as calculated under paragraph (c)(2)(iii) of this section; or

(C) During plan years 21 through the end of the restoration payment schedule, the maximum permitted outstanding balance of the initial restoration amortization base at the end of

the twentieth plan year, as calculated under paragraph (c)(2)(iii) of this section.

(iii) *Interim amortization requirements.* The restoration payment schedule must provide for sufficient periodic charges so that the outstanding balance of the initial restoration amortization base at the end of the tenth plan year and at the end of the twentieth plan year of the restoration payment period will not be larger than the outstanding balance that would have remained at the end of the tenth plan year and at the end of the twentieth plan year, respectively, if the initial restoration amortization base had been amortized in level annual amounts over the restoration payment period at the valuation rate.

(3) *Amendments to the restoration payment schedule.* The order establishing the restoration payment schedule may be amended by the PBGC from time to time with respect to any remaining payments, provided that no amendment may extend the restoration payment period beyond 30 years from the initial post-restoration valuation date, and provided further that the restoration payment schedule, as amended, satisfies the requirements of paragraph (c)(2) of this section.

(4) *Deferral of minimum scheduled annual payment amounts*—(i) *Authority to grant deferral.* Not later than 2½ months following the end of the plan year, the PBGC may grant a deferral of the charges required in the restoration payment schedule for that plan year if the requirements in paragraph (c)(4)(ii) of this section are satisfied. The PBGC may require the plan sponsor and its controlled group members to provide security to the plan as a condition to granting a deferral.

(ii) *Determination of business hardship.* Before granting a deferral under this paragraph (c)(4), the PBGC must make a determination that the granting of the deferral is in the best interests of plan participants and the plan termination insurance system, and that the plan sponsor and its controlled group members are unable to make the scheduled restoration payments without experiencing temporary substantial business hardship. In making these determinations, the factors the PBGC

shall consider, include, but are not limited to, the following—

(A) Whether the plan sponsor and its controlled group members are operating at an economic loss;

(B) Whether there is substantial unemployment or underemployment in the trades or businesses of the plan sponsor and its controlled group members;

(C) Whether the sales and profits of the industry or industries are depressed or declining; and

(D) Whether it is reasonable to expect that the plan termination insurance system will suffer a greater loss if the plan is terminated than if it is continued as a restored plan.

(iii) *Amount of deferral.* The amount of the deferral for any particular plan year may not exceed the lesser of the amount that would have been required to be contributed under the restoration payment schedule for that year or interest at the valuation rate on the outstanding balance of the initial restoration amortization base for that year. An amortization payment for a deferral granted for a prior plan year may not be deferred. No deferral may extend the overall restoration payment period beyond 30 years.

(iv) *Modification of payment schedule.* The restoration payment schedule must be adjusted to reflect any deferral granted for a plan year in the manner prescribed in this paragraph (c). The charge otherwise specified in the schedule is reduced by the amount of any deferral. The charges under the restoration payment schedule for the subsequent plan years are increased by the amounts in paragraph (c)(4)(v) of this section.

(v) *Amortization of deferred amount.* The amount of any deferral granted by the PBGC for any plan year must be amortized in level amounts over five years or such shorter period as may be prescribed by the PBGC, at the valuation rate, beginning with the plan year following the year of the deferral.

(vi) *Number of deferrals permitted.* The PBGC may not grant more than five deferrals of the minimum scheduled payments as required by this section during the restoration payment period and no more than three of these defer-

rals may be granted during the first ten years of that period.

(vii) *Deferrals override minimum annual charges and interim amortization requirements.* In determining the minimum annual charge under paragraph (c)(2)(ii) of this section and in applying the interim amortization requirements of paragraph (c)(2)(iii) of this section, the unamortized balances of any deferrals granted by the PBGC under this paragraph shall be added to the outstanding balance of the initial restoration amortization base otherwise allowable.

(d) *Charging the scheduled restoration payments to the funding standard account.* In addition to any other charges and credits prescribed in the normal operation of the funding standard account under section 412, the amount of each payment specified in the restoration payment schedule shall be charged against the funding standard account of the plan for the plan year to which that payment is attributed in the restoration payment schedule. To the extent that the restoration payment schedule provides for payments before the end of the plan year, the annual charge to the funding standard account attributable to the restoration payment schedule is equal to the sum of the periodic payments for the plan year accumulated with interest at the valuation rate to the last day of the plan year.

(e) *Changes in actuarial assumptions or methods.* The plan administrator must notify the PBGC of any changes in the actuarial assumptions or methods used by the plan. Upon notification of any such change, the PBGC may make any changes to the restoration payment schedule that it deems appropriate.

(f) *Change to restoration method.* A plan that has been restored must use the restoration method until the initial restoration amortization base has been fully amortized. The use of this method does not require prior approval from the Commissioner. A plan using the restoration method must compute the charges to the funding standard account to amortize the initial restoration amortization base in accordance with the order of the PBGC and in accordance with this section.

(g) *Deficit reduction contribution*—(1) *Calculation of deficit reduction contribution.* For any plan using the restoration method, the deficit reduction contribution under section 412(l)(2) is equal to the sum of—

(i) The unfunded section 412(l) restoration liability amount; plus

(ii) The unfunded new liability amount.

(2) *Unfunded section 412(l) restoration liability amount.* The unfunded section 412(l) restoration liability amount is the amount necessary to amortize fully the unfunded section 412(l) restoration liability in installments, as prescribed by the PBGC, over not more than 30 years. The annual amount need not be level, but at all times the present value of the future amortization charges prescribed under the restoration payment schedule, at the current liability interest rate, must equal the outstanding balance of the unfunded section 412(l) restoration liability and the schedule must provide that at the end of no more than 30 years the entire amount of the unfunded section 412(l) restoration liability base will have been fully amortized. The schedule prescribed for amortization of the unfunded section 412(l) restoration liability must comply with the requirements imposed in paragraph (c) of this section on the restoration payment schedule, except as provided in paragraph (g)(7) of this section and except that the maximum permitted outstanding balance of the unfunded section 412(l) restoration liability at the end of the tenth plan year must not be greater than the outstanding balance of the section 412(l) restoration liability that would have remained at the end of the tenth plan year if the unfunded section 412(l) restoration liability had been amortized in level amounts over the restoration payment period at the actual current liability interest rate for each year, increased by the current liability interest rate differential as defined under paragraph (g)(7) of this section. The unfunded section 412(l) restoration liability amount for the tenth plan year otherwise prescribed under the restoration payment schedule is increased by any outstanding current liability interest rate differential. By issuing an appropriate order, the PBGC may permit the

outstanding current liability interest rate differential to be amortized over the tenth through the fourteenth plan years. If the PBGC permits the amortization of the outstanding current liability interest rate differential, then the unfunded section 412(l) restoration liability amount for each year to which an amortization payment is attributed under the order shall be increased by such payment. The outstanding balance otherwise required by paragraph (g)(2) of this section is increased by the outstanding balance, if any, of the base resulting from the amortization of the current liability interest rate differential. The PBGC may amend the amortization schedule for the unfunded section 412(l) restoration liability subject to the limits on amendments to the amortization schedule prescribed for the initial restoration amortization base.

(3) *Establishment of unfunded section 412(l) restoration liability.* In the plan year in which the initial post-restoration valuation date falls, the unfunded section 412(l) restoration liability is equal to the unfunded current liability of the plan.

(4) *Unfunded new liability amount.* In the case of a plan using the restoration method, the unfunded new liability amount is the applicable percentage, as defined in section 412(l)(4)(C), of the unfunded new liability determined under paragraph (g)(5) of this section.

(5) *Unfunded new liability.* The unfunded new liability of a plan using the restoration method is the excess, if any, of the unfunded current liability of the plan, within the meaning of section 412(l)(8)(A) for the plan year (determined without taking into account any unpredictable contingent event benefits, even if the event has occurred) over the outstanding balance of the unfunded section 412(l) restoration liability determined under paragraph (g)(3) of this section.

(6) *Offset of amortization charges.* The amounts charged to the funding standard account pursuant to the restoration payment schedule in order to amortize the initial restoration base, as described in paragraph (d) of this section, must be offset against the deficit reduction contribution in paragraph (g)(1) of this section along with any

other applicable amounts provided in section 412(l)(1)(A)(ii).

(7) *Interest rate differential.* During the first 10 plan years after the initial post-restoration valuation date, the restoration payment schedule must prescribe an unfunded section 412(l) restoration liability amount for each plan year that is sufficient to prevent the outstanding balance of the unfunded section 412(l) restoration liability from exceeding the initial amount of the unfunded section 412(l) restoration liability increased by the current liability interest rate differential. The current liability interest rate differential at any point during the first ten years of the restoration payment period is the excess, if any, of the outstanding balance of the unfunded section 412(l) restoration liability determined using the actual current liability interest rate for each year, taking into account the charges described in paragraph (d) of this section, over the outstanding balance of the unfunded section 412(l) restoration liability determined using the lowest, for each year, of the initial current liability interest rate, the current liability interest rate for the computation year, and the valuation interest rate, taking into account the charges described in paragraph (d) of this section.

(h) *Election of the alternative minimum funding standard.* A plan using the restoration method may not elect the alternative minimum funding standard under section 412(g).

(i) *Funding review by the PBGC.* The PBGC must review the funding of any plan using the restoration method at least once in each plan year. As a result of a funding review, the PBGC may amend the restoration payment schedule as provided in paragraph (c)(3) of this section. As part of the funding review, the Executive Director of the PBGC must certify to the PBGC's Board of Directors, and to the Internal Revenue Service, that the PBGC has reviewed the funding of the plan, the financial condition of the plan sponsor and its controlled group members, the payments required under the restoration payment schedule (taking into account the availability of deferrals authorized under paragraph (c)(4) of this section), and any other factor that the

PBGC deems relevant, and, based on that review, determines that it is in the best interests of participants and beneficiaries of the plan and the pension insurance program that the restored plan not be reterminated.

[T.D. 8494, 58 FR 54491, Oct. 22, 1993]

§ 1.412(c)(1)–3T Applying the minimum funding requirements to restored plans (temporary).

(a) *In general—(1) Restoration method.* The restoration method is a funding method that adapts the underlying funding method of section 412 in the case of certain plans that are or have been terminated and are later restored by the Pension Benefit Guaranty Corporation. The normal operation of the funding standard account, and all other provisions of section 412 and the regulations thereunder, are unchanged except as provided in this § 1.412(c)(1)–3T. Under the restoration method, the Pension Benefit Guaranty Corporation shall determine a restoration payment schedule, extending over no more than 30 years, that replaces all charges and credits to the funding standard account attributable to pre-restoration amortization bases. The restoration payment schedule is determined on the basis of an actuarial valuation of the accrued liability of the plan on the initial post-restoration valuation date less the actuarial value of the plan assets on that date. The initial post-restoration valuation date is the date of the first valuation that falls in the first plan year beginning on or after the later of October 23, 1990, or the date of the restoration order.

(2) *Applicability of restoration method.* A plan must use the restoration method if, and only if:

(i) The plan is being or has been terminated pursuant to section 4041(c) or section 4042 of the Employee Retirement Income Security Act of 1974 (ERISA), and

(ii) The plan has been restored by the Pension Benefit Guaranty Corporation pursuant to its authority under section 4047 of ERISA.

(b) *Computation and effect of the initial restoration amortization base—(1) In general.* The initial restoration amortization base is determined under the underlying funding method used by the

plan. When the plan uses a spread gain funding method that does not maintain an unfunded liability, the plan must change either to an immediate gain method that directly calculates an accrued liability or to a spread gain method that maintains an unfunded liability. A plan may adopt any cost method that satisfies this requirement and that is acceptable under section 412 and the regulations thereunder, provided that the plan follows the procedures established by the Commissioner for changes in funding methods. The initial restoration amortization base is determined using the valuation for the plan year in which the initial post-restoration valuation date falls. The initial restoration amortization base equals the accrued liability with respect to plan benefit liabilities returned by the Pension Benefit Guaranty Corporation less the value of the plan assets returned by the Pension Benefit Guaranty Corporation. The initial restoration amortization base replaces all prior amortization bases including those under subparagraphs (B), (C), and (D) of section 412(b)(2) and under subparagraph (B) of section 412(b)(3). Any base resulting from a change in funding method is treated as a prior amortization base within the meaning of this paragraph (b). Any accumulated funding deficiency or credit balance in the funding standard account is set equal to zero when the initial restoration amortization base is established.

(2) *Example.* A pension plan uses the calendar year as its plan year, makes its annual periodic valuation as of January 1, and uses the unit credit actuarial cost method for funding purposes. The plan is in the process of being terminated. By order of the Pension Benefit Guaranty Corporation the plan is restored as of July 1, 1991, and a restoration payment schedule order issued on October 31, 1992. The initial post-restoration valuation date is January 1, 1993. If, as of that date, the accrued liability of the plan is \$1,000,000 and the value of the plan assets is \$200,000, the initial restoration amortization base is \$800,000.

(c) *Establishment of a restoration payment schedule—(1) Certification requirement.* When the PBGC establishes a res-

toration payment schedule, the Executive Director of the PBGC must certify to the Corporation's Board of Directors, and to the Internal Revenue Service, that the Corporation has reviewed the funding of the plan, the financial condition of the plan sponsor and its controlled group members, the payments required under the restoration payment schedule (taking into account the availability of deferrals authorized under paragraph (c)(4) of this section), and any other factor that the Corporation deems relevant, and, based on that review, determines that it is in the best interests of participants and beneficiaries of the plan and the pension insurance program that the restored plan not be reterminated.

(2) *Requirements for restoration payment schedule—(i) Amortization of base over period of no more than 30 years.* The restoration payment schedule must be prescribed in an order requiring the employer to make stated contributions to the plan sufficient to amortize the initial restoration amortization base over a period extending not more than 30 years after the initial post-restoration valuation date (the restoration payment period). The restoration payment schedule must be sufficient to amortize the entire amount of the initial restoration amortization base by the end of the restoration payment period. The scheduled charges need not be in level amounts, but the present value of the prescribed charges on the initial post-restoration valuation date, computed with interest at the valuation rate, must equal the initial restoration amortization base.

(ii) *Minimum annual charge.* The restoration payment schedule must require annual charges that are sufficient to prevent the outstanding balance of the initial restoration amortization base from exceeding whichever of the following amounts is applicable:

(A) During the first 10 plan years on the restoration payment schedule, the amount of the initial restoration amortization base on the date the base was established, or

(B) During plan years 11 through 20 on the restoration payment schedule, the maximum permitted outstanding balance of the initial restoration amortization base at the end of the tenth

plan year, as calculated under paragraph (c)(2)(iii) below, or

(C) During plan years 21 through the end of the restoration payment schedule, the maximum permitted outstanding balance of the initial restoration amortization base at the end of the twentieth plan year, as calculated under paragraph (c)(2)(iii) below.

(iii) *Interim amortization requirements.* The restoration payment schedule must provide for sufficient periodic charges so that the outstanding balance of the initial restoration amortization base at the end of the tenth plan year and at the end of the twentieth plan year of the restoration payment period will not be larger than the outstanding balance that would have remained at the end of the tenth plan year and at the end of the twentieth plan year, respectively, if the initial restoration amortization base had been amortized in level amounts over the restoration payment period at the valuation rate.

(3) *Amendments to the restoration payment schedule.* The order establishing the restoration payment schedule may be amended by the Pension Benefit Guaranty Corporation from time to time with respect to any remaining payments, provided that no amendment may extend the restoration payment period beyond 30 years from the initial post-restoration valuation date, and provided further that the restoration payment schedule, as amended, satisfies the requirements of paragraph (c)(2) of this section.

(4) *Deferral of minimum scheduled annual payment amounts—*(i) *Authority to grant deferral.* Not later than 2½ months following the end of the plan year, the Pension Benefit Guaranty Corporation may grant a deferral of the charges required in the restoration payment schedule for that plan year if the requirements in paragraph (c)(4)(ii) of this section are satisfied. The Pension Benefit Guaranty Corporation may require the plan sponsor and its controlled group members to provide security to the plan as a condition to granting a deferral.

(ii) *Determination of business hardship.* Before granting a deferral under this paragraph (c)(4), the Pension Benefit Guaranty Corporation must make a de-

termination that the granting of the deferral is in the best interests of plan participants and the plan termination insurance system, and that the plan sponsor and its controlled group members are unable to make the scheduled restoration payments without experiencing temporary substantial business hardship. In making these determinations, the factors the Pension Benefit Guaranty Corporation shall consider, include, but are not limited to, the following:

(A) Whether the plan sponsor and its controlled group members are operating at an economic loss,

(B) Whether there is substantial unemployment or underemployment in the trades or businesses of the plan sponsor and its controlled group members,

(C) Whether the sales and profits of the industry or industries are depressed or declining, and

(D) Whether it is reasonable to expect that the plan termination insurance system will suffer a greater loss if the plan is terminated than if it is continued as a restored plan.

(iii) *Amount of deferral.* The amount of the deferral for any particular plan year may not exceed the lesser of the amount that would have been required to be contributed under the restoration payment schedule for that year or interest on the outstanding balance of the initial restoration amortization base for that year. An amortization payment for a deferral granted for a prior plan year may not be deferred. No deferral may extend the overall restoration payment period beyond 30 years.

(iv) *Modification of payment schedule.* The restoration payment schedule must be adjusted to reflect any deferral granted for a plan year in the manner prescribed in this paragraph (c). The charge otherwise specified in the schedule is reduced by the amount of any deferral. The charges under the restoration payment schedule for the subsequent plan years are increased by the amounts in paragraph (c)(4)(v) of this section.

(v) *Amortization of deferred amount.* The amount of any deferral granted by

the Pension Benefit Guaranty Corporation for any plan year must be amortized in level amounts over five years or such shorter period as may be prescribed by the Pension Benefit Guaranty Corporation, at the valuation rate, beginning with the plan year following the year of the deferral.

(vi) *Number of deferrals permitted.* The Pension Benefit Guaranty Corporation may not grant more than five deferrals of the minimum scheduled payments as required by this section during the restoration payment period and no more than three of these deferrals may be granted during the first ten years of that period.

(d) *Charging the scheduled restoration charges to the funding standard account.* In addition to any other charges and credits prescribed in the normal operation of the funding standard account under section 412, the amount of each charge specified in the restoration payment schedule shall be charged against the funding standard account of the plan for the plan year to which that payment is attributed in the restoration payment schedule.

(e) *Changes in actuarial assumptions.* If changes in actuarial assumptions increase or decrease the charges that would be required to amortize the outstanding balance of the initial restoration amortization base over the remaining years of the restoration payment schedule, the plan must notify the Pension Benefit Guaranty Corporation of the changes so that it may make appropriate changes to the restoration payment schedule.

(f) *Change to restoration method.* A plan that has been restored must use the restoration method until the initial restoration amortization base has been fully amortized. The use of this method does not require prior approval from the Commissioner. A plan using the restoration method must compute the charges and credits to the initial restoration amortization base in accordance with the order of the Pension Benefit Guaranty Corporation and in accordance with this section.

(g) *Deficit reduction contribution—(1) Calculation of deficit reduction contribution.* For any plan using the restoration method, the deficit reduction contribu-

tion under section 412(l)(2) is equal to the sum of—

(i) The unfunded section 412(l) restoration liability amount, plus

(ii) The unfunded new liability amount.

(2) *Unfunded section 412(l) restoration liability amount.* The unfunded section 412(l) restoration liability amount is the amount necessary to amortize fully the unfunded section 412(l) restoration liability in installments, as prescribed by the Pension Benefit Guaranty Corporation, over not more than 30 years. The annual amount need not be level, but at all times the present value of the future amortization charges under the restoration payment schedule, at the current liability interest rate, must equal the outstanding balance of the unfunded section 412(l) restoration liability and the schedule must provide that at the end of no more than 30 years the entire amount of the unfunded section 412(l) restoration liability base will have been fully amortized. The schedule prescribed for amortization of the unfunded section 412(l) restoration liability must comply with the requirements imposed in paragraph (c) of this section on the restoration payment schedule, except as provided in paragraph (g)(7) of this section and except that the maximum permitted outstanding balance of the unfunded section 412(l) restoration liability at the end of the tenth plan year must not be greater than the outstanding balance of the section 412(l) restoration liability that would have remained at the end of the tenth plan year if the unfunded section 412(l) restoration liability had been amortized in level amounts over the restoration payment period at the current liability interest rate, increased by the current liability interest rate differential as defined under paragraph (g)(7) of this section. The Pension Benefit Guaranty Corporation may amend the amortization schedule for the unfunded section 412(l) restoration liability subject to the limits on amendments to the amortization schedule prescribed for the initial restoration amortization base.

(3) *Establishment of unfunded section 412(l) restoration liability.* In the plan year in which the initial post-restoration valuation date falls, the unfunded

section 412(l) restoration liability is equal to the unfunded current liability of the plan.

(4) *Unfunded new liability amount.* In the case of a plan using the restoration method, the unfunded new liability amount is the applicable percentage, as defined in section 412(l)(4)(C), of the unfunded new liability determined under paragraph (g)(5) of this section.

(5) *Unfunded new liability.* The unfunded new liability of a plan using the restoration method is the unfunded current liability of the plan for the plan year less the outstanding balance of the unfunded section 412(l) restoration liability determined under paragraph (g)(3) of this section and less any unpredictable contingent event benefit liabilities (without regard to whether or not the event has occurred).

(6) *Offset of amortization charges.* The charges specified in the restoration payment schedule to amortize the initial restoration amortization base, must be offset against the deficit reduction contribution in paragraph (g)(1) of this section along with any other applicable amounts provided in section 412(l)(1)(A)(ii).

(7) *Interest rate differential.* During the first 10 plan years after the initial post-restoration valuation date, the unfunded section 412(l) restoration liability amount for the plan as determined for purposes of this section must be sufficient to prevent the outstanding balance of the unfunded section 412(l) restoration liability from exceeding the initial amount of the unfunded section 412(l) restoration liability increased by the current liability interest rate differential. The current liability interest rate differential at any point during the first ten years of the restoration payment period is the excess if any of the accumulated interest on the unfunded section 412(l) restoration liability computed at the current liability interest rate over the accumulated interest on the unfunded section 412(l) restoration liability computed at the least of the valuation rate, the current liability interest rate and current liability interest rate for the plan year in which the initial post restoration valuation date falls. The current liability interest rate differential is charged to the funding standard

account at the end of the tenth plan year, but the Pension Benefit Guaranty Corporation may, as part of the restoration payment schedule order, or a modification to that order, direct that the charging of this amount must be spread over not more than 5 years, beginning with the eleventh plan year.

(h) *Election of the alternative minimum funding standard.* A plan using the restoration method may not elect the alternative minimum funding standard under section 412(g).

(i) *Funding review by the Pension Benefit Guaranty Corporation.* The Pension Benefit Guaranty Corporation must review the funding of any plan using the restoration method at least once in each plan year. As a result of a funding review, the Pension Benefit Guaranty Corporation may amend the restoration payment schedule as provided in paragraph (c)(3) of this section. As part of the funding review, the Executive Director of the PBGC must certify to the Corporation's Board of Directors, and to the Internal Revenue Service, that the Corporation has reviewed the funding of the plan, the financial condition of the plan sponsor and its controlled group members, the payments required under the restoration payment schedule (taking into account the availability of deferrals authorized under paragraph (c)(4) of this section), and any other factor that the Corporation deems relevant, and, based on that review, determines that it is in the best interests of participants and beneficiaries of the plan and the pension insurance program that the restored plan not be reterminated.

[T.D. 8317, 55 FR 42707, Oct. 23, 1990; 56 FR 19038, Apr. 25, 1991]

§ 1.412(c)(2)-1 Valuation of plan assets; reasonable actuarial valuation methods.

(a) *Introduction—(1) In general.* This section prescribes rules for valuing plan assets under an actuarial valuation method which satisfies the requirements of section 412(c)(2)(A). An actuarial valuation method is a funding method within the meaning of section 412(c)(3) and the regulations thereunder. Therefore, certain changes affecting the actuarial valuation method

are identified in this section as changes in a plan's funding method.

(2) *Exception for certain bonds, etc.* The rules of this section do not apply to bonds or other evidences of indebtedness for which the election described in section 412(c)(2)(B) has been made, nor are such assets counted in applying paragraphs (b) or (c) of this section. Also, an election under section 412(c)(2)(B) is not a change in funding method within the meaning of section 412(c)(5).

(3) *Money purchase pension plan.* A money purchase pension plan must value assets for the purpose of satisfying the requirements of section 412(c)(2)(A) solely on the basis of their fair market value (under paragraph (c) of this section).

(4) *Defined benefit plans.* (i) To satisfy the requirements of section 412(c)(2)(A), an actuarial method valuing assets of a defined benefit plan must meet the requirements of paragraph (b) of this section.

(ii) In general, the purpose of paragraph (b) of this section is to permit use of reasonable actuarial valuation methods designed to mitigate short-run changes in the fair market value of plan assets. The funding of plan benefits and the charges and credits to the funding standard account required by section 412 are generally based upon the assumption that the defined benefit plan will be continued by the employer. Thus, short-run changes in the value of plan assets presumably will offset one another in the long term. Accordingly, in the determination of the amount required to be contributed under section 412 it is generally not necessary to recognize fully each change in fair market value of the assets in the period in which it occurs.

(iii) The asset valuation rules contained in paragraph (b) produce a "smoothing" effect. Thus, investment performance, including appreciation or depreciation in the market value of the assets occurring in each plan year, may be recognized gradually over several plan years. This "smoothing" is in addition to the "smoothing" effect which results, for example, from amortizing experience losses and gains over 15 or 20 years under section 412(b)(2)(B)(iv) and (3)(B)(ii).

(b) *Asset valuation method requirements*—(1) *Consistent basis.* (i) The actuarial asset valuation method must be applied on a consistent basis. Any change in meeting the requirements of this paragraph (b) is a change in funding method subject to section 412(c)(5).

(ii) A method may satisfy the consistency requirement even though computations are based only on the period elapsed since the adoption of the method or on asset values occurring during that period.

(2) *Statement of plan's method.* The method of determining the actuarial value (but not fair market value) of the assets must be specified in the plan's actuarial report (required under section 6059). The method must be described in sufficient detail so that another actuary employing the method described would arrive at a reasonably similar result. Whether a deviation from the stated actuarial valuation method is a change in funding method is to be determined in accordance with section 412(c)(5) and the regulations thereunder. A deviation to include a type of asset not previously held by the plan would not be a change in funding method.

(3) *Consistent valuation dates.* The same day or days (such as the first or the last day of a plan year) must be used for all purposes to value the plan's assets for each plan year, or portion of plan year, for which a valuation is made. For purposes of this section, each such day is a valuation date. A change in the day or days used is a change in funding method.

(4) *Reflect fair market value.* The valuation method must take into account fair market value by making use of the—

(i) Fair market value (determined under paragraph (c) of this section), or

(ii) Average value (determined under paragraph (b)(7) of this section) of the plan's assets as of the applicable asset valuation date. This is done either directly in the computation of their actuarial value or indirectly in the computation of upper or lower limits placed on that value.

(5) *Results above and below fair market or average value.* A method will not satisfy the requirements of this paragraph (b) if it is designed to produce a result

which will be consistently above or below the values described in paragraph (b)(4) (i) and (ii). However, a method designed to produce a result which consistently falls between fair market value and average value will satisfy this requirement. See Example 5 in paragraph (b)(9) of this section for an illustration of a method described in the preceding sentence.

(6) *Corridor limits.* (i) Regardless of how the method reflects fair market value under paragraph (b)(4), the method must result in an actuarial value of the plan's assets which is not less than a minimum amount and not more than a maximum amount. The minimum amount is the lesser of 80 percent of the current fair market value of plan assets as of the applicable asset valuation date or 85 percent of the average value (as described in subparagraph (7)) of plan assets as of that date. The maximum amount is the greater of 120 percent of the current fair market value of plan assets as of the applicable asset valuation date or 115 percent of the average value of plan assets as of that date.

(ii) Under a plan's method, a preliminary computation of the expected actuarial value may fall outside the prescribed corridor. A method meets the requirements of paragraph (b)(6)(i) of this section is such a case only by adjusting the expected actuarial value to the nearest corridor limit applicable under the method. A plan may use an actuarial valuation method with a narrower corridor than the general corridor required under paragraph (b)(6)(i). The adjustment to the nearest corridor limit of such a method for purposes of this subdivision (ii) would be determined by the narrower corridor stated in the description of the plan's method.

(7) *Average value.* the average value of plan assets is computed by—

(i) Determining the fair market value of plan assets at least annually,

(ii) Adding the current fair market value of the assets (as of the applicable valuation date) and their adjusted values (as described in paragraph (b)(8) of this section) for a stated period not to exceed the five most recent plan years (including the current year), and

(iii) Dividing this sum by the number of values (including the current fair

market value) considered in computing the sum described in subdivision (ii).

(8) *Adjusted value.* (i) the adjusted value of plan assets for a prior valuation date is their fair market value on that date with certain positive and negative adjustments. These adjustments reflect changes that occur between the prior asset valuation date and the current valuation date. However, no adjustment is made for increases or decreases in the total value of plan assets that result from the purchase, sale, or exchange of plan assets or from the receipt of payment on a debt obligation held by the plan.

(ii) In determining the adjusted value of plan assets for a prior valuation date, there is added to the fair market value of the plan assets of that date the sum of all additions to the plan assets since that date, excluding appreciation in the fair market value of the assets. The additions would include, for example, any contribution to the plan; any interest or dividend paid to the plan; and any asset not taken into account in a prior valuation of assets, but taken into account for the current year, in computing the fair market value of plan assets under paragraph (c) of this section.

(iii) In determining the adjusted value of plan assets for a prior valuation date, there is subtracted from the fair market value of the plan assets on that date the sum of all reductions in plan assets since that date, excluding depreciation in the fair market value of the assets. The reductions would include, for example, any benefit paid from plan assets; any expense paid from plan assets; and any asset taken into account in a prior valuation of assets but not taken into account for the current year, in computing the fair market value of plan assets under paragraph (c) of this section.

(9) *Examples.* This paragraph (b) may be illustrated by the following examples. In each example, assume that the pension plan uses a consistent actuarial method of valuing its assets within the meaning of paragraph (b)(1), (2), and (3) of this section.

Example 1. Plan A considers the value of its assets to be initial cost, increased by an assumed rate of growth of X percent annually.

§ 1.412(c)(2)-1

26 CFR Ch. I (4-1-08 Edition)

Under the circumstances, the X-percent factor used by the plan is a reasonable assumption. Thus, this method is not designed to produce results consistently above or below fair market value as prohibited by paragraph (b)(5) of this section. Also, the method requires that the actuarial value be adjusted as required to fall within the corridor under paragraph (b) (6) and (7) of this section. Therefore, the method reflects fair market value as required by paragraph (b)(4) of this section.

Example 2. Plan B computes the actuarial value of its assets as follows: It determines the fair market value of the plan assets. Then the fair market value is adjusted to the extent necessary to make the actuarial value fall within a “5 percent” corridor. This corridor is plus or minus 5 percent of the following amount: the fair market value of the assets at the beginning of the valuation period plus an assumed annual growth of 4 percent with adjustments for contributions and benefit payments during the period. This method reflects fair market value in a manner prescribed by paragraph (b)(4) of this section. If the 4 percent factor used by the plan is a reasonable assumption, this method is not designed to produce results consistently above or below fair market value, and thus it satisfies paragraph (b)(5). However, this method is unacceptable because in some instances it may result in an actuarial value outside the corridor described in paragraph (b)(6) of this section. This method would be permitted if a second corridor were imposed which would adjust the value of the total plan assets to the corridor limits as required by paragraph (b)(6).

Example 3. Plan C values its assets by multiplying their fair market value by an index number. The use of the index results in the hypothetical average value that plan assets present on the valuation date would have had if they had been held during the current and four preceding years, and had appreciated or depreciated at the actual yield rates including appreciation and depreciation experienced by the plan during that pe-

riod. However, the method requires an adjustment to the extent necessary to bring the resulting actuarial value of the assets inside the corridor described in the statement of the plan’s actuarial valuation method. In this case, the stated corridor is 90 to 110 percent of fair market value, a corridor narrower than that described in paragraph (b)(7) of this section. This method is permitted.

Example 4. Plan D values its assets by multiplying their fair market value by 95 percent. Although the method reflects fair market value and the results of this method will always be within the required corridor, it is not acceptable because it will consistently result in a value less than fair market value.

Example 5. Plan E values its assets by using a five-year average method with appropriate adjustments for the period. Under the particular method used by Plan E, assets are not valued below 80 percent of fair market value or above 100 percent of fair market value. If the average produces a value that exceeds 100 percent of fair market value, the excess between 100 and 120 percent is recorded in a “value reserve account.” In years after one in which the average exceeds 100 percent of fair market value, amounts are subtracted from this account and added, to the extent necessary, to raise the value produced by the average for that year to 100 percent of fair market value. This method is permitted because it reflects fair market value under paragraph (b)(4) of this section by appropriately computing an average value, it satisfies paragraph (b)(5) by producing a result that falls consistently between fair market value and average value, and it properly reflects the corridor described in paragraph (b)(7).

Example 6. All assets of Plan F are invested in a trust fund and the plan year is the calendar year. The actuarial value is determined by averaging fair market value over 4 years. An actuarial valuation is performed as of December 31, 1988.

(i) The average value as of December 31, 1988, is computed as follows:

	1986	1986	1987	1987	1988	1988
Fair market value: Jan. 1		\$150,000		\$196,500		\$238,000
Contributions	\$65,000		\$62,000		\$66,000	
Benefit payments	(22,000)		(24,000)		(25,000)	
Expenses	(6,500)		(7,000)		(7,500)	
Interest and dividends	8,000	44,500	7,500	38,500	7,000	240,500
Net realized gains (losses)		(2,000)		6,000		(8,000)
Balancing item ¹		4,000		(3,000)		(42,000)
Fair market value: Dec. 31		196,500		238,000		228,000

¹ This equals the increase (decrease) in unrealized appreciation.

Adjusted values	1985	1986	1987	1988
Fair market value: Dec. 31	\$150,000	\$196,500	\$238,000	\$228,000
Net adjustments:				
1988	40,500	40,500	40,500	
1987	38,500	38,500		

Internal Revenue Service, Treasury

§ 1.412(c)(2)-1

Adjusted values	1985	1986	1987	1988
1986	44,500			
Total	273,500	275,500	278,500	228,000

Average value: $1988 = \$273,500 + \$275,500 + \$278,500 + \$228,000 \div 4 = \$263,875$

(ii) Plan F properly determines an average value under paragraph (b)(7) of this section for use as an actuarial value. Therefore, the valuation method meets the requirements of this section.

Example 7. Plan G computes the actuarial value of the plan assets as follows: The current fair market value of the plan assets is averaged with the most recent prior adjusted actuarial value. This average value is adjusted up or down toward the current fair market value by 20 percent of the difference between it and the current fair market value of the assets. This value is further adjusted to the extent necessary to fall within the corridor described in the statement of the plan's actuarial valuation method. The lower end of the corridor is the lesser of 80 percent of the fair market value of the plan assets or 85 percent of the average value of the plan assets. The higher end of the corridor is the greater of 120 percent of the fair market value of plan assets or 115 percent of the average value of plan assets. Average value for purposes of the corridor is determined under paragraph (b)(7) of this section. Assuming the numerical data of Example 6, the application of the corridor is as follows. The actuarial asset value as of December 31, 1988, must not be less than \$182,400 (80 percent of current fair market value, \$228,000) nor greater than \$303,456 (115 percent of average value, 263,875). This method is permitted because it reflects fair market value in a manner permitted by paragraph (b)(4) of this section, it produces an actuarial value which is neither consistently above nor consistently below fair market or average value to satisfy paragraph (b)(5), and it is appropriately limited by the corridor described in paragraph (b)(6).

(c) *Fair market value of assets—(1) General rules.* Except as otherwise provided in this paragraph (c), the fair market value of a plan's assets for purposes of this section is the price at which the property would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or sell and both having reasonable knowledge of relevant facts.

(d) *Methods for taking into account the fair market value of certain agreements.* [Reserved]

(e) *Effective date and transition rules—*

(1) *Effective date.* This section applies to plan years to which section 412, or section 302 of the Employee Retirement Income Security Act of 1974, applies.

(2) *Special rule for certain plan years.* For plan years beginning prior to November 12, 1980, the amounts required to be determined under section 412 may be computed on the basis of any reasonable actuarial method of asset valuation which takes into account the fair market value of the plan's assets, even if the method does not meet all of the requirements of paragraphs (a) through (c) of this section.

(3) *Plan years beginning on or after November 12, 1980.* Paragraphs (a) through (c) of this section apply beginning with the first valuation of plan assets made for a plan year to which section 412 applies that begins on or after November 12, 1980. The statement of the plan's actuarial asset valuation method required by paragraph (b)(2) of this section must be included with the plan's actuarial report for that year, in addition to any subsequent reports.

(4) *Effect of change of asset valuation method.* A plan which is required to change its asset valuation method to comply with paragraphs (a) through (c) of this section must make the change no later than the time when the plan is first required to comply with this section under paragraph (e)(3). A method of adjustment must be used to take account of any difference in the actuarial value of the plan's assets based on the old and new valuation methods. The plan may use either—

(i) A method of adjustment described in paragraph (e)(5) or (e)(6) of this section without prior approval by the Commissioner, or

(ii) Any other method of adjustment if the Commissioner gives prior approval under section 412(c)(5).

(5) *Retroactive recomputation method.*

(i) Under this method of adjustment, the plan recomputes the balance of the

§ 1.412(c)(3)-1

26 CFR Ch. I (4-1-08 Edition)

funding standard account as of the beginning of the first plan year for which it uses its new asset valuation method to comply with paragraphs (a) through (c) of this section. This new balance is recomputed by retroactively applying the plan's new method as of the first day of the first plan year to which section 412 applies.

(ii) Beginning with the first plan year for which it uses its new method, the plan computes the normal cost and amortization charges and credits to the funding standard account based on the retroactive application of its new method as of the first day of the first plan year to which section 412 applies.

(iii) If the recomputed aggregate charges exceed the recomputed aggregate credits to the funding standard account as of the end of the first plan year for which the plan uses its new method, an additional contribution to the plan may be necessary to avoid an accumulated funding deficiency in that year. The use of the retroactive recomputation method may also result in an accumulated funding deficiency for years prior to that first year. In such cases, the rules of section 412(c)(10), relating to the time when certain contributions are deemed to have been made, apply.

(6) *Prospective gain or loss adjustment method.* (i) Under this method of adjustment the plan values its assets under its new method no later than the valuation date for the first plan year beginning after [the publication date of this section]

(ii) Regardless of the type of funding method used by a plan, the difference in the value of the assets under the old and the new asset valuation methods may be treated as arising from an experience loss or gain; or alternatively it may be treated as arising from a change in actuarial assumptions.

(iii) The treatment of this difference as an experience gain or loss or as a change in actuarial assumptions must be consistent with the treatment of such gains, losses, or changes under the funding method used by the plan. Thus, if a plan uses a spread gain type funding method other than the aggregate cost method, the difference in the value of assets under the old and the new asset valuation methods may be

either amortized or spread over future periods as a part of normal cost. Examples of this type of funding method are the frozen initial liability cost method and the attained age normal cost method. With an aggregate method, the difference in the value of assets under the old and the new asset valuation methods must be spread over future periods as a part of normal cost.

(Secs. 412(c)(2) and 7805 of the Internal Revenue Code of 1954 (88 Stat. 916 and 68A Stat. 917; 26 U.S.C. 412(c)(2) and 7805))

[T.D. 7734, 45 FR 74718, Nov. 12, 1980]

§ 1.412(c)(3)-1 Reasonable funding methods.

(a) *Introduction*—(1) *In general.* This section prescribes rules for determining whether or not, in the case of an ongoing plan, a funding method is reasonable for purposes of section 412(c)(3). A method is unreasonable only if it is found to be inconsistent with a rule prescribed in this section. The term “reasonable funding method” under this section has the same meaning as the term “acceptable actuarial cost method” under section 3(31) of the Employee Retirement Income Security Act of 1974 (ERISA).

(2) *Computations included in method.* See § 1.412(c)(1)-1(b) for a discussion of matters that are, and are not, included in the funding method of a plan.

(3) *Plans using shortfall.* The shortfall method is a method of determining charges to the funding standard account by adapting the underlying funding method of certain collectively bargained plans in the manner described in § 1.412(c)(1)-2. As such, the shortfall method is a funding method. The underlying method of a plan that uses the shortfall method must be a reasonable funding method under this section. The rules contained in this section, relating to cost under a reasonable funding method, apply in the shortfall method to the annual computation charge under § 1.412(c)(1)-2(d).

(4) *Scope of funding method.* Except for the shortfall method, a reasonable funding method is applied to the computation of—

(i) The normal cost of a plan for a plan year; and, if applicable,

(ii) The bases established under section 412(b)(2)(B), (C), and (D), and (3)(B) (“amortizable bases”).

(b) *General rules for reasonable funding methods*—(1) *Basic funding formula*. At any time, except as provided by the Commissioner, the present value of future benefits under a reasonable funding method must equal the sum of the following amounts:

(i) The present value of normal costs (taking into account future mandatory employee contributions, within the meaning of section 411(c)(2)(C), in the case of a contributory plan) over the future working lifetime of participants;

(ii) The sum of the unamortized portions of amortizable bases, if any, treating credit bases under section 412(b)(3)(B) as negative numbers; and

(iii) The plan assets, decreased by a credit balance (and increased by a debit balance) in the funding standard account under section 412(b).

(2) *Normal cost*. Normal cost under a reasonable funding method must be expressed as—

(i) A level dollar amount, or a level percentage of pay, that is computed from year to year on either an individual basis or an aggregate basis; or

(ii) An amount equal to the present value of benefits accruing under the method for a particular plan year.

(3) *Application to shortfall*. Paragraph (b)(2) will not fail to be satisfied merely because an amount described in (i) or (ii) is expressed as permitted under the shortfall method.

(c) *Additional requirements*—(1) *Inclusion of all liabilities*. Under a reasonable funding method, all liabilities of the plan for benefits, whether vested or not, must be taken into account.

(2) *Production of experience gains and losses*. If each actuarial assumption is exactly realized under a reasonable funding method, no experience gains or losses are produced.

(3) *Plan population*—(i) *In general*. Under a reasonable funding method, the plan population must include three classes of individuals: participants currently employed in the service of the employer; former participants who either terminated service with the employer, or retired, under the plan; and all other individuals currently entitled

to benefits under the plan. See § 1.412(c)(3)-1(d)(2) for rules concerning anticipated future participants.

(ii) *Limited exclusion for certain recent participants*. Under a reasonable funding method, certain individuals may be excluded from the first class of individuals described in paragraph (c)(3)(i) of this section unless otherwise provided by the Commissioner. The excludable individuals are participants who would be excluded from participation by the minimum age or service requirement of section 410 but who, under the terms of the plan, participate immediately upon entering the service of the employer.

(iii) *Special exclusion for “rule of parity” cases*. Under a reasonable funding method, certain individuals may be excluded from the second class of individuals described in paragraph (c)(3)(i) of this section. The excludable individuals are those former participants who have terminated service with the employer without vested benefits and whose service might be taken into account in future years because the “rule of parity” of section 411(a)(6)(D) does not permit that service to be disregarded. However if the plan’s experience as to separated employees’ returning to service has been such that the exclusion described in this subparagraph would be unreasonable, the exclusion would no longer apply.

(4) *Use of salary scale*—(i) *General acceptability*. The use of a salary scale assumption is not inappropriate merely because of the funding method with which it is used. Therefore, in determining whether actuarial assumptions are reasonable, a salary scale will not be considered to be prohibited merely because a particular funding method is being used.

(ii) *Projection to appropriate salary*. Under a reasonable funding method, salary scales reflected in projected benefits must be the expected salary on which benefits would be based under the plan at the age when the receipt of benefits is expected to begin.

(5) *Treatment of allocable items*. Under a reasonable funding method that allocates assets to individual participants to determine costs, the allocation of assets among participants must be reasonable. An initial allocation of assets among participants will be considered

reasonable only if it is in proportion to related liabilities. However, the Commissioner may determine, based on the facts and circumstances, that it is unreasonable to continue to allocate assets on this basis beyond the initial year. Under a reasonable funding method that allocates liabilities among different elements of past and future service, the allocation of liabilities must be reasonable.

(d) *Prohibited considerations under a reasonable funding method*—(1) *Anticipated benefit changes*—(i) *In general.* Except as otherwise provided by the Commissioner, a reasonable funding method does not anticipate changes in plan benefits that become effective, whether or not retroactively, in a future plan year or that become effective after the first day of, but during, a current plan year.

(ii) *Exception for collectively bargained plans.* A collectively bargained plan described in section 413(a) may on a consistent basis anticipate benefit increases scheduled to take effect during the term of the collective-bargaining agreement applicable to the plan. A plan's treatment of benefit increases scheduled in a collective bargaining agreement is part of its funding method. Accordingly, a change in a plan's treatment of such benefit increases (for example, ignoring anticipated increases after taking them into account) is a change of funding method.

(2) *Anticipated future participants.* A reasonable funding method must not anticipate the affiliation with the plan of future participants not employed in the service of the employer on the plan valuation date. However, a reasonable funding method may anticipate the affiliation with the plan of current employees who have not satisfied the participation requirements of the plan.

(e) *Special rules for certain funding methods*—(1) *Applicability of special rules.* Paragraph (e) of this section applies to a funding method that determines normal cost under paragraph (b)(2)(ii) of this section.

(2) *Use of salary scale.* For rules relating to use of a salary scale assumption, see paragraph (c)(4) of this section.

(3) *Allocation of liabilities.* In determining a plan's normal cost and accrued liability for a particular plan

year, the projected benefits of the plan must be allocated between past years and future years. Except in the case of a career average pay plan, this allocation must be in proportion to the applicable rates of benefit accrual under the plan. Thus, the allocation to past years is effected by multiplying the projected benefit by a fraction. The numerator of the fraction is the participant's credited years of service. The denominator is the participant's total credited years of service at the anticipated benefit commencement date. Adjustments are made to account for changes in the rate of benefit accrual. An allocation based on compensation is not permitted. In the case of a career average pay plan, an allocation between past and future service benefits must be reasonable.

(f) *Treatment of ancillary benefit costs*—(1) *General rule.* Under a reasonable funding method, except as otherwise provided by this paragraph (f), ancillary benefit costs must be computed by using the same method used to compute retirement benefit costs under a plan.

(2) *Ancillary benefit defined.* For purposes of this paragraph an ancillary benefit is a benefit that is paid as a result of a specified event which—

(i) Occurs not later than a participant's separation from service, and

(ii) Was detrimental to the participant's health.

Thus, for example, benefits payable if a participant dies or becomes disabled prior to separation from service are ancillary benefits because the events giving rise to the benefits are detrimental to the participant's health. However, an early retirement benefit, a social security supplement (as defined in § 1.411(a)-7(c)(4)(ii)), and the vesting of plan benefits (even if more rapid than is required by section 411) are not ancillary benefits because those benefits do not result from an event which is detrimental to the participant's health.

(3) *Exception for certain insurance contracts.* Under a reasonable funding method, regardless of the method used to compute retirement benefit costs, the cost of an ancillary benefit may equal the premium paid for that benefit under an insurance contract if—

(i) The ancillary benefit is provided under the contract, and

(ii) The benefit is guaranteed under the contract.

(4) *Exception for 1-year term funding and other approved methods.* [Reserved]

(5) *Section 401(h) benefits.* Section 412 does not apply to benefits that are described in section 401(h) and for which a separate account is maintained.

(g) *Examples.* The principles of this section are illustrated by the following examples:

Example 1. Assume that a plan, using funding method A, is in its first year. No contributions have been made to the plan, other than a nominal contribution to establish a corpus for the plan's trust. There is no past service liability, and the normal cost is a constant percentage of an annually determined amount. The constant percentage is 99 percent, and the annually determined amount is the excess of the present value of future benefits over plan assets. The present value of future benefits is \$10,000. Under paragraph (b)(1) of this section, the present value of future benefits must equal the present value of future normal costs plus plan assets. (No amortizable bases exist, nor are there credit or debit balances.) Under method A, the present value of future normal costs would equal the sum of a series of annually decreasing amounts. Because of the constant percentage factor, the present value of future normal costs over the years can never equal \$10,000, the present value of future benefits. In effect, then, assets under method A can never equal the present value of future benefits if all assumptions are exactly realized. Therefore, method A is not a reasonable funding method.

Example 2. Assume that a plan, using funding method B, determines normal cost by computing the present value of benefits expected to be accrued under the plan by the end of 10 years after the valuation date and adding to this the present value of benefits expected to be paid within these 10 years. Plan assets are subtracted from the sum of the two present value amounts. The difference then is divided by the present value of salaries projected over the 10 years. Under paragraph (c)(1) of this section, all liabilities of a plan must be taken into account. Because method B takes into account only benefits paid or accrued by the end of 10 years, it is not a reasonable funding method.

Example 3. Assume that a plan, using funding method C, determines normal cost as a constant percentage of compensation. (This percentage is determined as follows: The excess of projected benefits over accrued benefits is computed. Then the present value of this excess is divided by the present value of future salaries.) However, the accrued liability

is computed each year as the present value of accrued benefits. (This computation does not reflect normal cost as a constant percentage of compensation. Thus, normal cost under the plan does not link accrued liabilities under the plan for consecutive years as would be the case, for example, under a unit credit cost method.) In determining gains and losses, method C compares the actual unfunded liability (the accrued liability less assets) with the expected unfunded liability (the sum of the actual unfunded liability in the previous year and the normal cost for the previous year less the contribution made for the previous year, all adjusted for interest). Under paragraph (c)(2) of this section, if actuarial assumptions are exactly realized, experience gains and losses must not be produced. Under method C, the use of a constant percentage in computing normal cost (and the expected unfunded liability) coupled with the manner of computing the accrued liability (and the actual unfunded liability) generally produces gains in the earlier years and losses in the later years if each actuarial assumption is exactly realized. Therefore, method C is not a reasonable funding method.

Example 4. Assume that a plan, using funding method D, bases benefits on final average pay. Under method D, the past service liability on any date equals the present value of the accrued benefit on that date based on compensation as of that date. The normal cost for any year equals the present value of a certain amount. That amount is the excess of the projected accrued benefit as of the end of the year over the actual accrued benefit at the beginning of the year. Accrued benefits, projected as of the end of a year, reflect a 1-year salary projection. Under paragraph (c)(4) of this section, salary scales reflected in projected benefits must project salaries to the salary on which benefits would be based under the plan at the age when the receipt of benefits under the plan is expected to begin. Because the plan is not a career average pay plan and compensation is projected only 1 year, method D is not a reasonable funding method. (Under paragraph (c)(4) of this section, the use of a salary scale assumption could be required with a unit credit method if, without the use of a salary scale, assumptions in the aggregate are unreasonable.)

Example 5. Assume that a plan, using method E, a unit credit funding method, calculates a participant's accrued benefit according to the following formula: 2 percent of final salary for the first 10 years of service and 1 percent of final salary for the years of service in excess of 10. Under the plan, no employee may be credited with more than 25 years of service. The actuarial assumptions for the valuation include a salary scale of 5 percent per year. For a participant at age 40 with 15 years of service, a current salary of \$20,000 and a normal retirement age of 65, the

§ 1.412(c)(3)-2

26 CFR Ch. I (4-1-08 Edition)

accrued liability for the retirement benefit is the present value of an annuity of \$16,932

per year, commencing at age 65. The \$16,932 is calculated as follows:

$$\$20,000 \times 3.3864 \times 35\% \times \frac{(10 \times 2) + (5 \times 1)}{(10 \times 2) - (15 \times 1) + (15 \times 0)}$$

(3.3864 is 1.05 raised to the 25th power; the 25th power reflects the difference between normal retirement age and attained age (65-40).)

Salary under this method is projected to the age when the receipt of benefits is expected to begin. Therefore, method E meets the requirement of paragraph (c)(4) of this section. Also, the allocation of benefits under method E between past and future years of service meets the requirements of paragraph (e)(3) of this section.

Example 6. Assume that a plan that has two participants and that previously used the unit credit cost method wishes to change the funding method at the beginning of the plan year to funding method F, a modification of the aggregate cost method. The modification involves determining normal cost for each of the two participants under the plan. Therefore, it requires an allocation of assets to each participant for valuation purposes. The actuary proposes to allocate the assets on hand at the beginning of the plan year of the change in funding method in proportion to the accrued liabilities calculated under the unit credit cost method. The relevant results of the calculations are shown below:

	Employees		Totals
	M	N	
Accrued Liabilities (unit credit method):			
Dollar amount	15,670	906	16,576
Per cent of total	94.53	5.47	100.00
Assets:			
Dollar amount	7,835	453	8,288
per cent of total	94.53	5.47	100.00

The proposed allocation in proportion to the accrued liabilities under the unit credit cost method satisfies the requirements of paragraph (c)(5) of this section at the beginning of the first plan year for which the new method is used.

Example 7. The facts are the same as in Example 6. However, the actuary proposes to allocate all the assets to employee M, the older employee. Method F, under these facts, is not an acceptable funding method because the allocation is not in proportion to related liabilities as required under paragraph (c)(5) of this section.

[T.D. 7746, 45 FR 86430, Dec. 31, 1980]

§ 1.412(c)(3)-2 Effective dates and transitional rules relating to reasonable funding methods.

(a) **Introduction.** This section prescribes effective dates for rules relating to reasonable funding methods, under section 412(c)(3) and § 1.412(c)(3)-1. Also, this section sets forth rules concerning adjustments to a plan's funding standard account that are necessitated by a change in funding method, and a provision setting forth procedural requirements for use of an optional phase-in of required changes.

(b) **Effective date—(1) General rule.** Except as otherwise provided by subparagraph (2) of this paragraph, § 1.412(c)(3)-1 applies to any valuation of a plan's liabilities (within the meaning of section 412(c)(9)) as of a date after April 30, 1981.

(2) **Exception.** If a collective bargaining agreement which determines contributions to a plan is in effect on April 30, 1981, then § 1.412(c)(3)-1 applies to any valuation of that plan's liabilities as of a date after the earlier of the date on which the last such collective bargaining agreement expires or April 30, 1984.

(3) **Transitional rule.** The reasonableness of a funding method used in making a valuation of a plan's liability as of a date before the effective date determined under subparagraph (1) or (2) of this paragraph is determined on the basis of such published guidance as was available on the date as of which the valuation was made.

(c) **Change of funding method without approval—(1) In general.** A plan that is required to change its funding method to comply with § 1.412(c)(3)-1 is not required to submit the change of funding method for approval as otherwise required by section 412(c)(5). However, this change must be described on Form 5500, Schedule B for the plan year with respect to which the change is first effective.

(2) *Amortization base.* An amortization base must be established in the plan year of the change in method equal to the change in the unfunded liability due to the change (where both unfunded liabilities are based on the same actuarial assumptions). Such a base must be amortized over 30 years in determining the charges or credits to the funding standard account, unless the Commissioner upon application permits amortization over a shorter period.

(d) *Phase-in of additional funding required by new method—*(1) *In general.* A plan that is required to change its funding method to comply with § 1.412(c)(3)-1 may elect to charge and credit the funding standard account as provided in this paragraph. An election under this paragraph shall be irrevocable.

(2) *Credit in year of change.* In the plan year of the change in method the funding standard account may be credited with an amount not in excess of 0.8 multiplied by the excess (if any) of—

(i) The normal cost under the new method plus the amortization charge (or minus the amortization credit) computed as described in § 1.412(c)(3)-2(c)(2), over

(ii) The normal cost under the prior method, for the plan year of the change in method.

(3) *Credits in the next three years.* In the three years following the year of the change the funding standard account may be credited with an amount not in excess of 0.6, 0.4, and 0.2 respectively in the first, second, and third years, multiplied by either of the following amounts, computed as of the last day of the year of credit—

(i) The excess described in § 1.412(c)(3)-2(d)(2) multiplied by a fraction (not greater than 1), the numerator of which is the number of participants in the year of the credit and the denominator of which is the number of participants in the year of the change, or, at the option of the plan,

(ii) The excess (if any) in the year of credit of—

(A) The net charge to the funding standard account based on the new method, over

(B) The net charge to the funding standing account based on the prior method.

(4) *Computational rules.* For purposes of the calculation described in § 1.412(c)(3)-2(d)(3)(ii), the net charge is the excess of charges under section 412(b)(2) (A) and (B) over the credits under section 412(b)(3)(B) (including the charge or credit described in § 1.412(c)(3)-2(c)) which would be required using the actuarial assumptions and plan benefit structure in effect on the last day of the plan year of change.

(5) *Fifteen-year amortization of credits.* The funding standard account shall be charged with 15-year amortization of each credit described in § 1.412(c)(3)-2(d)(2) and (3) beginning in the year following each such credit.

(6) *Manner of election.* An election under this paragraph shall be made by the claiming of the credits described in § 1.412(c)(3)-2(d)(2) and (3) on Schedule B to Form 5500 and by filing such other information as may be required by the Commissioner.

(e) *Effect on shortfall method.* The charges and credits described in this section apply in the shortfall method to the annual computation charge described in § 1.412(c)(1)-2(d). The amounts described in § 1.412(c)(3)-2(d) shall be determined before the application of the shortfall method.

(Sec. 3(31) of the Employee Retirement Income Security Act of 1974 (88 Stat. 837; 29 U.S.C. 1002) and sec. 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805))

[T.D. 7746, 45 FR 86432, Dec. 31, 1980]

§ 1.412(i)-1 Certain insurance contract plans.

(a) *In general.* Under section 412(h)(2) of the Internal Revenue Code of 1954, as added by section 1013(a) of the Employee Retirement Income Security Act of 1974 (88 Stat. 914) (hereinafter referred to as “the Act”), an insurance contract plan described in section 412(i) for a plan year is not subject to the minimum funding requirements of section 412 for that plan year. Consequently, if an individual or group insurance contract plan satisfies all of the requirements of paragraph (b)(2) or (c)(2) of this section, whichever are applicable, for the plan year, the plan is

not subject to the requirements of section 412 for that plan year. The effective date for section 412 of the Code is determined under section 1017 of the Act. In general, in the case of a plan which was not in existence on January 1, 1974, this section applies for plan years beginning after September 2, 1974, and in the case of a plan in existence on January 1, 1974, to plan years beginning after December 31, 1975.

(b) *Individual insurance contract plans.*

(1) An individual insurance contract plan is described in section 412(i) during a plan year if the plan satisfies the requirements of paragraph (b)(2) of this section for the plan year.

(2) The requirements of this paragraph are:

(i) The plan must be funded exclusively by the purchase from an insurance company or companies (licensed under the law of a State or the District of Columbia to do business with the plan) of individual annuity or individual insurance contracts, or a combination thereof. The purchase may be made either directly by the employer or through the use of a custodial account or trust. A plan shall not be considered to be funded otherwise than exclusively by the purchase of individual annuity or individual insurance contracts merely because the employer makes a payment necessary to comply with the provisions of section 411(c)(2) (relating to accrued benefit from employee contributions).

(ii) The individual annuity or individual insurance contracts issued under the plan must provide for level annual, or more frequent, premium payments to be paid under the plan for the period commencing with the date each individual participating in the plan became a participant and ending not later than the normal retirement age for that individual or, if earlier, the date the individual ceases his participation in the plan. Premium payments may be considered to be level even though items such as experience gains and dividends are applied against premiums. In the case of an increase in benefits, the contracts must provide for level annual payments with respect to such increase to be paid for the period commencing at the time the increase becomes effective. If payment

commences on the first payment date under the contract occurring after the date an individual becomes a participant or after the effective date of an increase in benefits, the requirements of this subdivision will be satisfied even though payment does not commence on the date on which the individual's participation commenced or on the effective date of the benefit increase, whichever is applicable. If an individual accrues benefits after his normal retirement age, the requirements of this subdivision are satisfied if payment is made at the time such benefits accrue. If the provisions required by this subdivision are set forth in a separate agreement with the issuer of the individual contracts, they need not be included in the individual contracts.

(iii) The benefits provided by the plan for each individual participant must be equal to the benefits provided under his individual contracts at his normal retirement age under the plan provisions.

(iv) The benefits provided by the plan for each individual participant must be guaranteed by the life insurance company, described in paragraph (b)(2)(i) of this section, issuing the individual contracts to the extent premiums have been paid.

(v) Except as provided in the following sentence, all premiums payable for the plan year, and for all prior plan years, under the insurance or annuity contracts must have been paid before lapse. If the lapse has occurred during the plan year, the requirements of this subdivision will be considered to have been met if reinstatement of the insurance policy, under which the individual insurance contracts are issued, occurs during the year of the lapse and before distribution is made or benefits commence to any participant whose benefits are reduced because of the lapse.

(vi) No rights under the individual contracts may have been subject to a security interest at any time during the plan year. This subdivision shall not apply to contracts which have been distributed to participants if the security interest is created after the date of distribution.

(vii) No policy loans, including loans to individual participants, on any of

the individual contracts may be outstanding at any time during the plan year. This subdivision shall not apply to contracts which have been distributed to participants if the loan is made after the date of distribution. An application of funds by the issuer to pay premiums due under the contracts shall be deemed not to be a policy loan if the amount of the funds so applied, and interest thereon, is repaid during the plan year in which the funds are applied and before distribution is made or benefits commence to any participant whose benefits are reduced because of such application.

(c) *Group insurance contract plans.* (1) A group insurance contract plan is described in section 412(i) during a plan year if the plan satisfies the requirements of subparagraph (2) for the plan year.

(2) The requirements of this subparagraph are:

(i) The plan must be funded exclusively by the purchase from an insurance company or companies, described in paragraph (b)(2)(i) of this section, of group annuity or group insurance contracts, or a combination thereof. The purchase may be made either directly by the employer or through the use of a custodial account or trust. A plan shall not be considered to be funded otherwise than exclusively by the purchase of group annuity or group insurance contracts merely because the employer makes a payment necessary to comply with the provisions of section 411 (c)(2) (relating to accrued benefit derived from employee contributions).

(ii) In the case of a plan funded by a group insurance contract or a group annuity contract the requirements of paragraph (b)(2)(ii) of this section must be satisfied by the group contract issued under the plan. Thus, for example, each individual participant's benefits under the group contract must be provided for by level annual, or more frequent, payments equivalent to the payments required to satisfy such paragraph. The requirements of this subdivision will not be satisfied if benefits for any individual are not provided for by level payments made on his behalf under the group contract.

(iii) The group annuity or group insurance contract must satisfy the re-

quirements of clauses (iii), (iv), (v), (vi), and (vii) of paragraph (b)(2). Thus, for example, each participant's benefits provided by the plan must be equal to his benefits provided under the group contract at his normal retirement age.

(iv)(A) If the plan is funded by a group annuity contract, the value of the benefits guaranteed by the insurance company issuing the contract under the plan with respect to each participant under the contract must not be less than the value of such benefits which the cash surrender value would provide for that participant under any individual annuity contract plan satisfying the requirements of paragraph (b) and approved for sale in the State where the principal office of the plan is located.

(B) If the plan is funded by a group insurance contract, the value of the benefits guaranteed by the insurance company issuing the contract under the plan with respect to each participant under the contract must not be less than the value of such benefits which the cash surrender value would provide for that participant under any individual insurance contract plan satisfying the requirements of paragraph (b) and approved for sale in the State where the principal office of the plan is located.

(v) Under the group annuity or group insurance contract, premiums or other consideration received by the insurance company (and, if a custodial account or trust is used, the custodian or trustee thereof) must be allocated to purchase individual benefits for participants under the plan. A plan which maintains unallocated funds in an auxiliary trust fund or which provides that an insurance company will maintain unallocated funds in a separate account, such as a group deposit administration contract, does not satisfy the requirements of this subdivision.

(d) *Combination of plans.* A plan which is funded by a combination of individual contracts and a group contract shall be treated as a plan described in section 412 (i) for the plan year if the combination, in the aggregate, satisfies the requirements of this section for the plan year.

[T.D. 7746, 45 FR 47676, July 16, 1980; 45 FR 50563, July 30, 1980]

§ 1.412(l)(7)–1 Mortality tables used to determine current liability.

(a) *In general.* The mortality tables set forth in paragraph (d) of this section are to be used in determining current liability under section 412(l)(7) for participants and beneficiaries (other than disabled participants) for plan years beginning in 2007. For plan years beginning on or after January 1, 2008, the mortality tables described in section 430(h)(3)(A) are to be used in determining current liability under section 412(l)(7) for participants and beneficiaries (other than disabled participants).

(b) *Separate tables for annuitants and nonannuitants.* The separate tables for annuitants and nonannuitants are used unless the plan applies the optional combined table pursuant to paragraph (c) of this section. If these separate tables are used, the nonannuitant mortality table is applied to determine the probability of survival for a nonannuitant for the period before the nonannuitant is projected to commence receiving benefits. The annuitant mortality table is applied to determine the present value of benefits for each annuitant, and for each nonannuitant for the period after which the nonannuitant is projected to commence receiving benefits. For purposes of this section, an annuitant means a plan participant who has commenced receiving benefits and a nonannuitant means a plan participant who has not yet commenced receiving benefits (e.g., an active employee or a terminated vested participant). Thus, for example, with

respect to a 45-year-old active participant who is projected to commence receiving an annuity at age 55, current liability would be determined using the nonannuitant mortality table for the period before the participant attains age 55 (i.e., so that the probability of an active male participant living from age 45 to the age of 55 for the table that applies in plan years beginning in 2007 is 98.59%) and the annuitant mortality table for the period ages 55 and above. Similarly, if a 45-year-old terminated vested participant is projected to commence an annuity at age 65, current liability would be determined using the nonannuitant mortality table for the period before the participant attains age 65 and the annuitant mortality table for ages 65 and above. For purposes of this section, a participant whose benefit has partially commenced is treated as an annuitant with respect to the portion of the benefit which has commenced and a nonannuitant with respect to the balance of the benefit.

(c) *Optional combined tables.* As an alternative to the separate tables specified for annuitants and nonannuitants as described in paragraph (b) of this section, the optional combined table, which applies the same mortality rates to both annuitants and nonannuitants, can be used.

(d) *Mortality tables for 2007.* As set forth in paragraph (a) of this section, the following tables are to be used for determining current liability for plan years beginning during 2007 in accordance with the rules of this section.

Age	Male			Female		
	Non-annuitant table	Annuitant table	Optional combined table	Non-annuitant table	Annuitant table	Optional combined table
1	0.000408	0.000408	0.000408	0.000366	0.000366	0.000366
2	0.000276	0.000276	0.000276	0.000239	0.000239	0.000239

(e) *Effective date.* This section applies for plan years beginning on or after January 1, 2007.

[T.D. 9310, 72 FR 4958, Feb. 2, 2007]

§ 1.413-1 Special rules for collectively bargained plans.

(a) *Application of section 413(b) to certain collectively bargained plans—*(1) *In general.* Section 413(b) sets forth special rules applicable to certain pension, profit-sharing, and stock bonus plans (and each trust which is a part of such a plan), hereinafter referred to as “section 413(b) plans”, described in paragraph (a)(2) of this section. Notwithstanding any other provision of the Code, a section 413(b) plan is subject to the special rules of section 413(b) (1) through (8) and paragraphs (b) through (i) of this section.

(2) *Requirements.* Section 413(b) applies to a plan (and each trust which is a part of such plan) if the plan is a single plan which is maintained pursuant to one or more agreements which the Secretary of Labor finds to be a collec-

tive bargaining agreement between employee representatives and one or more employers. A plan which provides benefits for employees of more than one employer is considered a single plan subject to the requirements of section 413(b) and this section if the plan is considered a single plan for purposes of applying section 414(l) (see § 1.414(l)-1(b)(1)). For purposes of determining whether one or more plans (or agreements) are a single plan, under sections 413(a) and 414(l), it is irrelevant that there are in form two or more separate plans (or agreements). For example, a single plan will be considered to exist where agreements are entered into separately by a national labor organization (or one or more local units of such organization), on one hand, and individual employers, on the other hand, if the plan is considered a single plan for purposes of applying section 414(l).

(3) *Additional rules and effective dates.* (i) If a plan is a section 413(b) plan at a relevant time, the rules of section 413(b) and this section apply, and the

rules of section 413(c) and § 1.413-2 do not apply to the plan.

(ii) The qualification of a section 413(b) plan, at any relevant time, under section 401(a), 403(a), or 405(a), as modified by sections 413(b) and this section, is determined with respect to all employers maintaining the plan. Consequently, the failure by one employer maintaining the plan (or by the plan itself) to satisfy an applicable qualification requirement will result in the disqualification of the plan for all employers maintaining the plan.

(iii) Except as otherwise provided, section 413 (a) and (b) and this section apply to a plan for plan years beginning after December 31, 1953.

(b) *Participation.* Section 410 and the regulations thereunder shall be applied as if all employees of each of the employers who are parties to the collective-bargaining agreement and all such employees who are subject to the same benefit computation formula under the plan were employed by a single employer.

(c) *Discrimination, etc.—(1) General rule.* Section 401(a)(4) (relating to prohibited discrimination) and section 411(d)(3) (relating to vesting required on termination, partial termination, or discontinuance of contributions) shall be applied as if all the participants in the plan, who are subject to the same benefit computation formula and who are employed by employers who are parties to the collective bargaining agreement, are employed by a single employer.

(2) *Application of discrimination rules.* Under section 401(a)(4) and the regulations thereunder a plan is not qualified unless the contributions or benefits provided under the plan do not discriminate in favor of officers, shareholders or highly compensated employees (hereinafter referred to collectively as “the prohibited group”). The presence or absence of such discrimination under a plan to which this section applies at any time shall not be determined on an employer-by-employer basis, but rather by testing separately each group of employees who are subject to the same benefit computation formula to determine if there is discrimination within such group. Consequently, discrimination in contribu-

tions or benefits among two or more different groups or among employees in different groups covered by the plan may be present without causing the plan to be disqualified. However, the presence of prohibited discrimination within one such group will result in the disqualification of the plan for all groups. Section 401(a)(4) and the regulations thereunder provide rules relating to the determination of which employees are members of the prohibited group and to the determination of discrimination in contributions or benefits which are applicable to a plan to which this section applies. The determination of whether or not an individual employee is a highly compensated employee shall be based on the relationship of the compensation of the employee to the compensation of all the other employees of all employers who are maintaining the plan and have employees covered under the same benefit computation formula, whether or not such other employees are covered by the plan or are covered under the same benefit computation formula, rather than to the compensation of all the other employees of the employer of such individual employee.

(3) *Application of termination, etc. rules.* Section 411(d)(3) and the regulations thereunder (relating to vesting required in the case of a termination, partial termination, or complete discontinuance of contributions) apply to a plan subject to the provisions of this section. The requirements of section 411(d)(3) shall be applied as if all participants in the plan who are subject to the same benefit computation formula and who are employed by employers who are parties to the collective bargaining agreement are employed by a single employer. The determination of whether or not there is a termination, partial termination, or complete discontinuance of contributions shall be made separately for each such group of participants who are treated as employed by a single employer. Consequently, if there are two or more groups of participants, a termination, partial termination, or complete discontinuance can take place under a plan with respect to one group of participants but not with respect to another such group of participants or for

the entire plan. See § 1.411(d)-2 for rules prescribed under section 411(d)(3).

(4) *Effective dates and transitional rules.* (i) Section 413(b)(2) and this paragraph apply to a plan for plan years beginning after December 31, 1953.

(ii) In applying the rules of this paragraph to a plan for plan years to which section 411 does not apply, section 401(a)(7) (as in effect on September 1, 1974) shall be substituted for section 411(d)(3). See § 1.401-6 for rules prescribed under section 401(a)(7) as in effect on September 1, 1974. See § 1.411(a)-2 for the effective dates of section 411.

(5) *Examples.* The provisions of this paragraph are illustrated by the following examples:

Example 1. Plan A is a defined benefit plan subject to the provisions of this section and covers two groups of participants, local unions 1 and 2. Each local union has negotiated its own bargaining agreement with employers X, Y, and Z to provide its own benefit computation formula. The following table indicates the composition of the plan A participants:

	Employer X	Employer Y	Employer Z	Total
Local union 1	20	10	70	100
Local union 2	30	70	100	200

Under the rules of subparagraph (2) of this paragraph, the determination of whether contributions or benefits provided under the plan discriminate in favor of the prohibited group is made by applying the rules of section 401(a)(4) separately to participants who are members of local union 1 and local union 2. Thus, plan A will satisfy the qualification requirements of section 401(a)(4) if, within local union 1 and local union 2, respectively, plan benefits do not discriminate in favor of participants who are prohibited group employees within local union 1 and local union 2. Under the rules of subparagraph (2) of this paragraph, the determination under section 401(a)(4) of whether or not any individual employee, included within the 300 participants in plan A, is a highly compensated employee is based on the relationship of the compensation of such individual employee to the compensation of all the employees of Employers X, Y, and Z, whether or not such employees are participants in plan A. Thus, if there are 20 participants who are prohibited group employees within the 100 participants of local union 1, discrimination is determined by comparing the benefits of the 20 prohibited group participants to the benefits of the other 80 participants within local union 1.

The same comparison would have to be made for the local union 2 participants between the prohibited group participants and the other participants in local union 2. Discrimination in benefits, if any, between the participants in local union 1 and local union 2, or among the employees of X, Y, or Z, would not affect the qualification of plan A under section 401(a)(4).

Example 2. Assume the same facts as in example (1). Employer X withdraws from the plan. Under subparagraph (3) of this paragraph, whether or not as a result of the withdrawal there is a partial termination under section 411(d)(3) is to be determined by applying the requirements of such section separately to the local union 1 and local union 2 participants. See § 1.411(d)-2 for the requirements relating to partial terminations. The application of such requirements raises the following possibilities with respect to the plan: (1) A partial termination as to local union 1, (2) a partial termination as to local union 2, (3) a partial termination as to both local unions 1 and 2, or (4) no partial termination for either local union.

Example 3. Assume the same facts as in example (1). Plan A is amended to cease future benefit accruals under the plan for local union 1 participants. Under subparagraph (3) of the paragraph, whether or not as a result of the cessation there is a partial termination under section 411(d)(3) is to be determined by applying the requirements of such section separately to the local union 1 and local union 2 participants.

Example 4. Plan A is a defined benefit plan that provides for two normal retirement benefits, X and 2X. A participant receives benefit X if the collective bargaining agreement covering his employment provides for a contribution rate, M. If such agreement provides for a contribution rate of N, the participant receives benefit 2X. Benefit X and benefit 2X constitute separate benefit computation formulas.

Example 5. Plan B is a defined benefit plan that provides for a normal retirement benefit, X. Benefit X is provided for all plan participants even though there are two collective bargaining agreements providing for different contribution rates, M and N. Plan B has a single benefit computation formula, even though there are two contribution rates.

(d) *Exclusive benefit.* Under section 401(a), a plan is not qualified unless the plan is for the exclusive benefit of the employees (and their beneficiaries) of the employer establishing and maintaining the plan. Other qualification requirements under section 401(a) require the application of the exclusive benefit rule (for example, section 401(a)(2), which precludes diversion of

plan assets). For purposes of applying the requirements of section 401(a) in determining whether a plan subject to this section is, with respect to each employer establishing and maintaining the plan, for the exclusive benefit of its employees (and their beneficiaries), all of the employees participating in the plan shall be treated as employees of each such employer. Thus, for example, contributions by employer A to a plan subject to this section could be allocated to employees of other employers maintaining the plan without violating the requirements of section 401(a)(2), because all the employees participating in the plan are deemed to be employees of A.

(e) *Vesting.* Section 411 (other than section 411(d)(3) relating to termination or partial termination; discontinuance of contributions) and the regulations thereunder shall be applied as if all employers who have been parties to the collective-bargaining agreement constituted a single employer. The application of any rules with respect to breaks in service under section 411 shall be made under regulations prescribed by the Secretary of Labor. Thus, for example, all the hours which an employee worked for each employer in a collectively-bargained plan would be aggregated in computing the employee's hours of service under the plan. See also 29 CFR Part 2530 (Department of Labor regulations relating to minimum standards for employee pension benefit plans.)

(f)-(h) [Reserved]

(i) *Employees of labor unions—(1) General rule.* For purposes of section 413(b) and this section, employees of employee representatives shall be treated as employees of an employer establishing and maintaining a plan to which section 413(b) and this section apply if, with respect to the employees of such representatives, the plan satisfies the nondiscrimination requirements of section 401(a)(4) (determined without regard to section 413(b)(2)) and the minimum participation and coverage requirements of section 410 (determined without regard to section 413(b)(1)). For purposes of the preceding sentence, the plan and any affiliated employee health or welfare plan shall be deemed to be an employee rep-

resentative. If employees of employee representatives, the plan, or an affiliated employee health or welfare plan are covered by the plan and are not treated as employees of an employer establishing and maintaining the plan under the provisions of this paragraph, the plan fails to satisfy the qualification requirements of section 401(a). In addition, in order for such a plan to be qualified, the plan must satisfy the requirements of section 413(b) (1) and (2), relating to participation and discrimination, respectively; see paragraphs (b) and (c) of this section. For purposes of this paragraph, an affiliated health or welfare plan is a health or welfare plan that is maintained under the same collective bargaining agreement or agreements, and that covers the same membership.

(2) *Effective dates and transitional rules.* (i) Section 413(b)(8) and this paragraph apply to a plan for plan years beginning after December 31, 1953.

(ii) In applying the rules of this paragraph to a plan for plan years to which section 410 does not apply, section 401(a)(3) (as in effect on September 1, 1974) shall be substituted for section 410. See § 1.401-3 for rules prescribed under section 401(a)(3) as in effect on September 1, 1974. See § 1.410(a)-2 for the effective dates of section 410.

(3) *Examples.* The provisions of this paragraph are illustrated by the following examples:

Example 1. Plan A is a defined benefit plan, maintained pursuant to a collective bargaining agreement between employers, X, Y, and Z and labor union, L, which covers members of L employed by X, Y, and Z. In 1978, plan A is amended to cover, under the same benefit formula, all five employees of L who have satisfied the minimum age and service requirements of the plans (age 25 and 1 year of service). Assume that plan A is subject to section 413(b) and satisfies the requirements of section 413(b) (1) and (2). Assume further that with respect to employees of L, plan A (i) satisfies the nondiscrimination requirements of section 401(a)(4), (ii) meets the minimum participation requirements of section 410(a), and (iii) meets the minimum coverage requirements of section 410(b)(1)(A). Under the rules of subparagraph (1) of this paragraph, because such requirements are all satisfied, the employees of L are treated as employees of an employer establishing and maintaining plan A.

§ 1.413-2

26 CFR Ch. I (4-1-08 Edition)

Example 2. Assume the same facts as example (1), except that plan A is amended to cover only one of the five employees of L, none of whom is covered by any other plan. Assume further that, under plan A, L does not satisfy the minimum percentage coverage requirement of section 410(b)(1)(A) with respect to employees of L. Assume further that the compensation of the one L employee who is covered by the plan is such that he is highly compensated relative to the four employees of L not covered by the plan. Consequently, L does not satisfy the minimum coverage requirements of section 410(b)(1)(B), with respect to employees of L. Under the rules of subparagraph (1) of this paragraph, the employees of L cannot be treated as employees of an employer establishing and maintaining the A plan because such coverage requirements are not satisfied by L. Consequently, the A plan fails to satisfy the qualification requirements of section 401(a).

(Sec. 411 (88 Stat. 901; 26 U.S.C. 411))

[T.D. 7501, 42 FR 42340, Aug. 23, 1977, as amended by 42 FR 47198, Sept. 20, 1977; T.D. 7654, 44 FR 65063, Nov. 9, 1979]

§ 1.413-2 Special rules for plans maintained by more than one employer.

(a) *Application of section 413(c)*—(1) *In general.* Section 413(c) describes certain plans (and each trust which is a part of any such plan) hereinafter referred to as “section 413(c) plans.” A plan (and each trust which is a part of such plan) is deemed to be a section 413(c) plan if it is described in subparagraph (2) of this paragraph. Notwithstanding any other provision of the code (not specifically in conflict with the special rules hereinafter mentioned), a section 413(c) plan is subject to the special rules of section 413(c) (1) through (6) and paragraphs (b) through (g) of this section.

(2) *Section 413(c) plan.* A plan (and each trust which is a part of such plan) is a section 413(c) plan if—

(i) The plan is a single plan, within the meaning of section 413(a) and § 1.413-1(a)(2), and

(ii) The plan is maintained by more than one employer.

For purposes of subdivision (ii) of this subparagraph, the number of employers maintaining the plan is determined by treating any employers described in section 414(b) (relating to a controlled group of corporations) or any employers described in section 414(c) (relating to trades or businesses under common

control), whichever is applicable, as if such employers are a single employer. See § 1.411(a)-5(b)(3) for rules relating to the time when an employer maintains a plan. A master or prototype plan is not a section 413(c) plan unless such a plan is described in this subparagraph. Similarly, the mere fact that a plan, or plans, utilizes a common trust fund or otherwise pools plan assets for investment purposes does not, by itself, result in a particular plan being treated as a section 413(c) plan.

(3) *Additional rules.* (i) If a plan is a collectively bargained plan described in § 1.413-1(a), the rules of section 413(c) and this section do not apply, and the rules of section 413(b) and § 1.413-1 do apply to the plan.

(ii) The special rules of section 413(b)(1) and § 1.413-1(b) relating to the application of section 410, other than the rules of section 410(a), do not apply to a section 413(c) plan. Thus, for example, the minimum coverage requirements of section 410(b) are generally applied to a section 413(c) plan on an employer-by-employer basis, taking into account the generally applicable rules such as section 401(a)(5) and section 414 (b) and (c).

(iii) The special rules of section 413(b)(2) and § 1.413-1(c) (relating to (A) section 401(a)(4) and prohibited discrimination, and (B) 411(d)(3) and vesting required on termination, partial termination, or discontinuance of contributions) do not apply to a section 413(c) plan. Thus, for example, the determination of whether or not there is a termination, within the meaning of section 411(d)(3), of a section 413(c) plan is made solely by reference to the rules of sections 411(d)(3) and 413(c)(3).

(iv) The qualification of a section 413(c) plan, at any relevant time, under section 401(a), 403(a) or 405(a), as modified by section 413(c) and this section, is determined with respect to all employers maintaining the section 413(c) plan. Consequently, the failure by one employer maintaining the plan (or by the plan itself) to satisfy an applicable qualification requirement will result in the disqualification of the section 413(c) plan for all employers maintaining the plan.

(4) *Effective dates.* Except as otherwise provided, section 413(c) and this section apply to a plan for plan years beginning after December 31, 1953.

(b) *Participation.* Section 410(a) and the regulations thereunder shall be applied as if all employees of each of the employers who maintain the plan were employed by a single employer.

(c) *Exclusive benefit.* In the case of a plan subject to this section, the exclusive benefit requirements of section 401(a) shall be applied to the plan in the same manner as under section 413(b)(3) and § 1.413-1(d).

(d) *Vesting.* Section 411 and the regulations thereunder shall be applied as if all employers who maintain the plan constituted a single employer. The application of any rules with respect to breaks in service under section 411 shall be made under regulations prescribed by the Secretary of Labor. Thus, for example, all the hours which an employee worked for each employer maintaining the plan would be aggregated in computing the employee's hours of service under the plan. See also 29 CFR Part 2530 (Department of Labor regulations relating to minimum standards for employee pension benefit plans).

(Sec. 411 (88 Stat. 901; 26 U.S.C. 411))

[T.D. 7501, 42 FR 42340, Aug. 23, 1977, as amended by 42 FR 47198, Sept. 20, 1977; T.D. 7654, 44 FR 65065, Nov. 9, 1979]

§ 1.414(b)-1 Controlled group of corporations.

(a) *Definition of controlled group of corporations.* For purposes of this section, the term "controlled group of corporations" has the same meaning as is assigned to the term in section 1563(a) and the regulations thereunder, except that (1) the term "controlled group of corporations" shall not include an "insurance group" described in section 1563(a)(4), and (2) section 1563(e)(3)(C) (relating to stock owned by certain employees' trusts) shall not apply. For purposes of this section, the term "members of a controlled group" means two or more corporations connected through stock ownership described in section 1563(a) (1), (2), or (3), whether or not such corporations are "component members of a controlled group" within the meaning of section

1563(b). Two or more corporations are members of a controlled group at any time such corporations meet the requirements of section 1563(a) (as modified by this paragraph). For purposes of this section, if a corporation is a member of more than one controlled group of corporations, such corporation shall be treated as a member of each controlled group.

(b) *Single plan adopted by two or more members.* If two or more members of a controlled group of corporations adopt a single plan for a plan year, then the minimum funding standard provided in section 412, the tax imposed by section 4971, and the applicable limitations provided by section 404(a) shall be determined as if such members were a single employer. In such a case, the amount of such items and the allocable portion attributable to each member shall be determined in the manner provided in regulations under sections 412, 4971, and 404(a).

(c) *Cross reference.* For rules relating to the application of sections 401, 408(k), 410, 411, 415, and 416 with respect to two or more trades or businesses which are under common control, see section 414(c) and the regulations thereunder.

[T.D. 8179, 53 FR 6605, Mar. 2, 1988]

§ 1.414(c)-1 Commonly controlled trades or businesses.

For purposes of applying the provisions of sections 401 (relating to qualified pension, profit-sharing, and stock bonus plans), 408(k) (relating to simplified employee pensions), 410 (relating to minimum participation standards), 411 (relating to minimum vesting standards), 415 (relating to limitations on benefits and contributions under qualified plans), and 416 (relating to top-heavy plans), all employees of two or more trades or businesses under common control within the meaning of § 1.414(c)-2 for any period shall be treated as employed by a single employer. See sections 401, 408(k), 410, 411, 415, and 416 and the regulations thereunder for rules relating to employees of trades or businesses which are under common control. See § 1.414(c)-5 for effective date.

[T.D. 8179, 53 FR 6606, Mar. 2, 1988]

§ 1.414(c)-2 Two or more trades or businesses under common control.

(a) *In general.* For purposes of this section, the term “two or more trades or businesses under common control” means any group of trades or businesses which is either a “parent-subsidiary group of trades or businesses under common control” as defined in paragraph (b) of this section, a “brother-sister group of trades or businesses under common control” as defined in paragraph (c) of this section, or a “combined group of trades or businesses under common control” as defined in paragraph (d) of this section. For purposes of this section and §§ 1.414(c)-3 and 1.414(c)-4, the term “organization” means a sole proprietorship, a partnership (as defined in section 7701(a)(2)), a trust, an estate, or a corporation.

(b) *Parent-subsidiary group of trades or businesses under common control—(1) In general.* The term “parent-subsidiary group of trades or businesses under common control” means one or more chains of organizations conducting trades or businesses connected through ownership of a controlling interest with a common parent organization if—

(i) A controlling interest in each of the organizations, except the common parent organization, is owned (directly and with the application of § 1.414(c)-4(b)(1), relating to options) by one or more of the other organizations; and

(ii) The common parent organization owns (directly and with the application of § 1.414(c)-4(b)(1), relating to options) a controlling interest in at least one of the other organizations, excluding, in computing such controlling interest, any direct ownership interest by such other organizations.

(2) *Controlling interest defined—(i) Controlling interest.* For purposes of paragraphs (b) and (c) of this section, the phrase “controlling interest” means:

(A) In the case of an organization which is a corporation, ownership of stock possessing at least 80 percent of total combined voting power of all classes of stock entitled to vote of such corporation or at least 80 percent of the total value of shares of all classes of stock of such corporation;

(B) In the case of an organization which is a trust or estate, ownership of an actuarial interest of at least 80 percent of such trust or estate;

(C) In the case of an organization which is a partnership, ownership of at least 80 percent of the profits interest or capital interest of such partnership; and

(D) In the case of an organization which is a sole proprietorship, ownership of such sole proprietorship.

(ii) *Actuarial interest.* For purposes of this section, the actuarial interest of each beneficiary of trust or estate shall be determined by assuming the maximum exercise of discretion by the fiduciary in favor of such beneficiary. The factors and methods prescribed in § 20.2031-7 or, for certain prior periods, § 20.2031-7A (Estate Tax Regulations) for use in ascertaining the value of an interest in property for estate tax purposes shall be used for purposes of this subdivision in determining a beneficiary’s actuarial interest.

(c) *Brother-sister group of trades or businesses under common control—(1) In general.* The term “brother-sister group of trades or businesses under common control” means two or more organizations conducting trades or businesses if (i) the same five or fewer persons who are individuals, estates, or trusts own (directly and with the application of § 1.414(c)-4) a controlling interest in each organization, and (ii) taking into account the ownership of each such person only to the extent such ownership is identical with respect to each such organization, such persons are in effective control of each organization. The five or fewer persons whose ownership is considered for purposes of the controlling interest requirement for each organization must be the same persons whose ownership is considered for purposes of the effective control requirement.

(2) *Effective control defined.* For purposes of this paragraph, persons are in “effective control” of an organization if—

(i) In the case of an organization which is a corporation, such persons own stock possessing more than 50 percent of the total combined voting power of all classes of stock entitled to vote or more than 50 percent of the

Internal Revenue Service, Treasury

§ 1.414(c)-2

total value of shares of all classes of stock of such corporation;

(ii) In the case of an organization which is a trust or estate, such persons own an aggregate actuarial interest of more than 50 percent of such trust or estate;

(iii) In the case of an organization which is a partnership, such persons own an aggregate of more than 50 percent of the profits interest or capital interest of such partnership; and

(iv) In the case of an organization which is a sole proprietorship, one of such persons owns such sole proprietorship.

(d) *Combined group of trades or businesses under common control.* The term “combined group of trades or businesses under common control” means any group of three or more organizations, if (1) each such organization is a member of either a parent-subsidary group of trades or businesses under common control or a brother-sister group of trades or businesses under common control, and (2) at least one such organization is the common parent organization of a parent-subsidary group of trades or businesses under common control and is also a member of a brother-sister group of trades or businesses under common control.

(e) *Examples.* The definitions of parent-subsidary group of trades or businesses under common control, brother-sister group of trades or businesses under common control, and combined group of trades or businesses under common control may be illustrated by the following examples.

Example 1. (a) The ABC partnership owns stock possessing 80 percent of the total combined voting power of all classes of stock entitled to voting of S corporation. ABC partnership is the common parent of a parent-

subsidiary group of trades or businesses under common control consisting of the ABC partnership and S Corporation.

(b) Assume the same facts as in (a) and assume further that S owns 80 percent of the profits interest in the DEF Partnership. The ABC Partnership is the common parent of a parent-subsidary group of trades or businesses under common control consisting of the ABC Partnership, S Corporation, and the DEF Partnership. The result would be the same if the ABC Partnership, rather than S, owned 80 percent of the profits interest in the DEF Partnership.

Example 2. L Corporation owns 80 percent of the only class of stock of T Corporation, and T, in turn, owns 40 percent of the capital interest in the GHI Partnership. L also owns 80 percent of the only class of stock of N Corporation and N, in turn, owns 40 percent of the capital interest in the GHI Partnership. L is the common parent of a parent-subsidary group of trades or businesses under common control consisting of L Corporation, T Corporation, N Corporation, and the GHI Partnership.

Example 3. ABC Partnership owns 75 percent of the only class of stock of X and Y Corporations; X owns all the remaining stock of Y, and Y owns all the remaining stock of X. Since interorganization ownership is excluded (that is, treated as not outstanding) for purposes of determining whether ABC owns a controlling interest of at least one of the other organizations, ABC is treated as the owner of stock possessing 100 percent of the voting power and value of all classes of stock of X and of Y for purposes of paragraph (b)(1)(ii) of this section. Therefore, ABC is the common parent of a parent-subsidary group of trades or businesses under common control consisting of the ABC Partnership, X Corporation, and Y Corporation.

Example 4. Unrelated individuals A, B, C, D, E, and F own an interest in sole proprietorship A, a capital interest in the GHI Partnership, and stock of corporations M, W, X, Y, and Z (each of which has only one class of stock outstanding) in the following proportions:

ORGANIZATIONS

Individuals	A	GHI	M	W	X	Y	Z
A	100%	50%	100%	60%	40%	20%	60%
B	—	40%	—	15%	40%	50%	30%
C	—	—	—	—	10%	10%	10%
D	—	—	—	25%	—	20%	—
E	—	10%	—	—	10%	—	—
	100%	100%	100%	100%	100%	100%	100%

Under these facts the following four brother-sister groups of trades or businesses under

common control exist: GHI, X and Z; X, Y and Z; W and Y; A and M. In the case of GHI,

§ 1.414(c)-3

26 CFR Ch. I (4-1-08 Edition)

X, and Z, for example, A and B together have effective control of each organization because their combined identical ownership of GHI, X and Z is greater than 50%. (A's identical ownership of GHI, X and Z is 40% because A owns at least a 40% interest in each organization. B's identical ownership of GHI, X and Z is 30% because B owns at least a 30% interest in each organization.) A and B (the persons whose ownership is considered for purposes of the effective control requirement) together own a controlling interest in each organization because they own at least 80% of the capital interest of partnership GHI and at least 80% of the total combined voting power of corporations X and Z. Therefore, GHI, X and Z comprise a brother-sister group of trades or businesses under common control. Y is not a member of this group because neither the effective control requirement nor the 80% controlling interest requirement are met. (The effective control requirement is not met because A's and B's combined identical ownership in GHI, X, Y and Z (20% for A and 30% for B) does not exceed 50%. The 80% controlling interest test is not met because A and B together only own 70% of the total combined voting power of the stock of Y.) A and M are not members of this group because B owns no interest in either organization and A's ownership of GHI, X and Z, considered alone, is less than 80%.

Example 5. The outstanding stock of corporations U and V, which have only one class of stock outstanding, is owned by the following unrelated individuals:

CORPORATIONS		
Individuals	U	V
	(percent)	(percent)
A	12	12
B	12	12
C	12	12
D	12	12
E	13	13
F	13	13
G	13	13
H	13	13
	100	100

Any group of five of the shareholders will own more than 50 percent of the stock in each corporation, in identical holdings. However, U and V are not members of a brother-sister group of trades or businesses under common control because at least 80 percent of the stock of each corporation is not owned by the same five or fewer persons.

Example 6. A, an individual, owns a controlling interest in ABC Partnership and DEF Partnership. ABC, in turn, owns a controlling interest in X Corporation. Since ABC, DEF, and X are each members of either a parent-subsidiary group or a brother-sister

group of trades or businesses under common control, and ABC is the common parent of a parent-subsidiary group of trades or businesses under common control consisting of ABC and X, and also a member of a brother-sister group of trades or businesses under common control consisting of ABC and DEF, ABC Partnership, DEF Partnership, and X Corporation are members of the same combined group of trades or businesses under common control.

[T.D. 8179, 53 FR 6606, Mar. 2, 1988, as amended by T.D. 8540, 59 FR 30102, June 10, 1994]

§ 1.414(c)-3 Exclusion of certain interests or stock in determining control.

(a) *In general.* For purposes of § 1.414(c)-2 (b)(2)(i) and (c)(2), the term “interest” and the term “stock” do not include an interest which is treated as not outstanding under paragraph (b) of this section in the case of a parent-subsidiary group of trades or businesses under common control or under paragraph (c) of this section in the case of a brother-sister group of trades or businesses under common control. In addition, the term “stock” does not include treasury stock or nonvoting stock which is limited and preferred as to dividends. For definitions of certain terms used in this section, see paragraph (d) of this section.

(b) *Parent-subsidiary group of trades or businesses under common control—(1) In general.* If an organization (hereinafter in this section referred to as “parent organization”) owns (within the meaning of paragraph (b)(2) of this section)—

(i) In the case of a corporation, 50 percent or more of the total combined voting power of all classes of stock entitled to vote or 50 percent or more of the total value of shares of all classes of stock of such corporation.

(ii) In the case of a trust or an estate, an actuarial interest (within the meaning of § 1.414(c)-2(b)(2)(ii)) of 50 percent or more of such trust or estate, and

(iii) In the case of a partnership, 50 percent or more of the profits or capital interest of such partnership, then for purposes of determining whether the parent organization or such other organization (hereinafter in this section referred to as “subsidiary organization”) is a member of a parent-subsidiary group of trades or businesses under common control, an interest in

such subsidiary organization excluded under paragraph (b) (3), (4), (5), or (6) of this section shall be treated as not outstanding.

(2) *Ownership.* For purposes of paragraph (b)(1) of this section, a parent organization shall be considered to own an interest in or stock of another organization which it owns directly or indirectly with the application of § 1.414(c)-4(b)(1) and—

(i) In the case of a parent organization which is a partnership, a trust, or an estate, with the application of paragraphs (b) (2), (3), and (4) of § 1.414(c)-4, and

(ii) In the case of a parent organization which is a corporation, with the application of § 1.414(c)-4(b)(4).

(3) *Plan of deferred compensation.* An interest which is an interest in or stock of the subsidiary organization held by a trust which is part of a plan of deferred compensation (within the meaning of section 406(a)(3) and the regulations thereunder) for the benefit of the employees of the parent organization or the subsidiary organization shall be excluded.

(4) *Principal owners, officers, etc.* An interest which is an interest in or stock of the subsidiary organization owned (directly and with the application of § 1.414(c)-4) by an individual who is a principal owner, officer, partner, or fiduciary of the parent organization shall be excluded.

(5) *Employees.* An interest which is an interest in or stock of the subsidiary organization owned (directly and with the application of § 1.414(c)-4) by an employee of the subsidiary organization shall be excluded if such interest or such stock is subject to conditions which substantially restrict or limit the employee's right (or if the employee constructively owns such interest or such stock, the direct or record owner's right) to dispose of such interest or such stock and which run in favor of the parent or subsidiary organization.

(6) *Controlled exempt organization.* An interest which is an interest in or stock of the subsidiary organization shall be excluded if owned (directly and with the application of § 1.414(c)-4) by an organization (other than the parent organization):

(i) To which section 501 (relating to certain educational and charitable organizations which are exempt from tax) applies, and

(ii) Which is controlled directly or indirectly (within the meaning of paragraph (d)(7) of this section) by the parent organization or subsidiary organization, by an individual, estate, or trust that is a principal owner of the parent organization, by an officer, partner, or fiduciary of the parent organization, or by any combination thereof.

(c) *Brother-sister group of trades or businesses under common control*—(1) *In general.* If five or fewer persons (hereinafter in this section referred to as “common owners”) who are individuals, estates, or trusts own (directly and with the application of § 1.414(c)-4)—

(i) In the case of a corporation, 50 percent or more of the total combined voting power of all classes of stock entitled to vote or 50 percent or more of the total value of shares of all classes of stock or such corporation,

(ii) In the case of a trust or an estate, an actuarial interest (within the meaning of § 1.414(c)-2(b)(2)(ii)) of 50 percent or more of such trust or estate, and

(iii) In the case of a partnership, 50 percent or more of the profits or capital interest of such partnership, then for purposes of determining whether such organization is a member of a brother-sister group of trades or businesses under common control, an interest in such organization excluded under paragraph (c) (2), (3), or (4) of this section shall be treated as not outstanding.

(2) *Exempt employees' trust.* An interest which is an interest in or stock of such organization held by an employees' trust described in section 401(a) which is exempt from tax under section 501(a) shall be excluded if such trust is for the benefit of the employees of such organization.

(3) *Employees.* An interest which is an interest in or stock of such organization owned (directly and with the application of § 1.414(c)-4) by an employee of such organization shall be excluded if such interest or stock is subject to conditions which run in favor of a common owner of such organization or in

§ 1.414(c)-3

26 CFR Ch. I (4-1-08 Edition)

favor of such organization and which substantially restrict or limit the employee's right (or if the employee constructively owns such interest or stock, the direct or record owner's right) to dispose of such interest or stock.

(4) *Controlled exempt organization.* An interest which is an interest in or stock of such organization shall be excluded if owned (directly and with the application of § 1.414(c)-4) by an organization:

(i) To which section 501(c)(3) (relating to certain educational and charitable organizations which are exempt from tax) applies, and

(ii) Which is controlled directly or indirectly (within the meaning of paragraph (d)(7) of this section) by such organization, by an individual, estate, or trust that is a principal owner of such organization, by an officer, partner, or fiduciary of such organization, or by any combination thereof.

(d) *Definitions*—(1) *Employee.* For purposes of this section, the term “employee” has the same meaning such term is given in section 3306(i) of the Code (relating to definitions for purposes of the Federal Unemployment Tax Act).

(2) *Principal owner.* For purposes of this section, the term “principal owner” means a person who owns (directly and with the application of § 1.414(c)-4)—

(i) In the case of a corporation, 5 percent or more of the total combined voting power of all classes of stock entitled to vote in such corporation or 5 percent of more of the total value of shares of all classes of stock of such corporation;

(ii) In the case of a trust or estate, an actuarial interest of 5 percent or more of such trust or estate; or

(iii) In the case of a partnership, 5 percent or more of the profits or capital interest of such partnership.

(3) *Officer.* For purposes of this section, the term “officer” includes the president, vice-presidents, general manager, treasurer, secretary, and comptroller of a corporation, and any other person who performs duties corresponding to those normally performed by persons occupying such positions.

(4) *Partner.* For purposes of this section, the term “partner” means any person defined in section 7701(a)(2) (relating to definitions of partner).

(5) *Fiduciary.* For purposes of this section and § 1.414(c)-4, the term “fiduciary” has the same meaning as such term is given in section 7701(a)(6) and the regulations thereunder.

(6) *Substantial conditions.* (i) *In general.* For purposes of this section, an interest in or stock of an organization is subject to conditions which substantially restrict or limit the right to dispose of such interest or stock and which run in favor of another person if the condition extends directly or indirectly to such person preferential rights with respect to the acquisition of the direct owner's (or the record owner's) interest or stock. For a condition to be in favor of another person it is not necessary that such person be extended a discriminatory concession with respect to price. A right of first refusal with respect to an interest or stock in favor of another person is a condition which substantially restricts or limits the direct or record owner's right of disposition which runs in favor of such person. Further, any legally enforceable condition which prohibits the direct or record owner from disposing of his or her interest or stock without the consent of another person will be considered to be a substantial limitation running in favor of such person.

(ii) *Special rule.* For purposes of paragraph (c)(3) of this section only, if a condition which restricts or limits an employee's right (or direct or record owner's right) to dispose of his or her interest or stock also applies to the interest or stock in such organization held by a common owner pursuant to a bonafide reciprocal purchase arrangement, such condition shall not be treated as a substantial limitation or restriction. An example of a reciprocal purchase arrangement is an agreement whereby a common owner and the employee are given a right of first refusal with respect to stock of the employer corporation owned by the other party. If, however, the agreement also provides that the common owner has the right to purchase the stock of the employer corporation owned by the employee in the event the corporation

should discharge the employee for reasonable cause, the purchase arrangement would not be reciprocal within the meaning of this subdivision.

(7) *Control.* For purposes of paragraphs (b)(6) and (c)(4) of this section, the term “control” means control in fact. The determination of whether there exists control in fact will depend upon all of the facts and circumstances of each case, without regard to whether such control is legally enforceable and irrespective of the method by which such control is exercised or exercisable.

(e) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. ABC Partnership owns 70 percent of the capital interest and of the profits interest in the DEF Partnership. The remaining capital interest and profits interest in DEF is owned as follows: 4 percent by A (a general partner in ABC), and 26 percent by D (a limited partner in ABC). ABC satisfies the 50-percent capital interest or profits interest ownership requirement of paragraph (b)(1)(iii) of this section with respect to DEF. Since A and D are partners of ABC, under paragraph (b)(4) of this section the capital and profits interests in DEF owned by A and D are treated as not outstanding for purposes of determining whether ABC and DEF are members of a parent-subsidary group of trades or businesses under common control under § 1.414 (c)-2(b). Thus, ABC is considered to own 100 percent (70+70) of the capital interest and profits interest in DEF. Accordingly, ABC and DEF are members of a parent-subsidary group of trades or businesses under common control.

Example 2. Assume the same facts as in example (1) and assume further that A owns 15 shares of the 100 shares of the only class of stock of S Corporation and DEF Partnership owns 75 shares of such stock. ABC satisfies the 50 percent stock requirement of paragraph (b)(1)(i) of this section with respect to S since ABC is considered as owning 52.5 percent (70 percent×75 percent) of the S stock with the application of § 1.414 (c)-4(b)(2). Since A is a partner of ABC, the S stock owned by A is treated as not outstanding for purposes of determining whether S is a member of a parent-subsidary group of trades or businesses under common control. Thus, DEF Partnership is considered to own stock possessing 88.2 percent (75+85) of the voting power and value of the S stock. Accordingly, ABC Partnership, DEF Partnership, and S Corporation are members of a parent-subsidary group of trades or businesses under common control.

Example 3. ABC Partnership owns 60 percent of the only class of stock of Corporation Y. D, the president of Y, owns the remaining 40 percent of the stock of Y. D has agreed that if she offers her stock in Y for sale she will first offer the stock to ABC at a price equal to the fair market value of the stock on the first date the stock is offered for sale. Since D is an employee of Y within the meaning of section 3306(i) of the Code and her stock in Y is subject to a condition which substantially restricts or limits her right to dispose of such stock and runs in favor of ABC Partnership, under paragraph (b)(5) of this section such stock is treated as not outstanding for purposes of determining whether ABC and Y are members of a parent-subsidary group of trades or businesses under common control. Thus, ABC Partnership is considered to own stock possessing 100 percent of the voting power and value of the stock of Y. Accordingly, ABC Partnership and Y Corporation are members of a parent-subsidary group of trades or businesses under common control. The result would be the same if D's husband, instead of D, owned directly the 40 percent stock interest in Y and such stock was subject to a right of first refusal running in favor of ABC Partnership.

(f) *Exception—(1) In general.* If an interest in an organization (including stock of a corporation) is owned by a person directly or with the application of the rules of paragraph (b) of § 1.414 (c)-4 and such ownership results in the membership of that organization in a group of two or more trades or businesses under common control for any period, then the interest will not be treated as an excluded interest under paragraph (b) or (c) of this section if the result of applying such provisions is that the organization is not a member of a group of two or more trades or businesses under common control for the period.

(2) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example. Corporation P owns directly 50 of the 100 shares of the only class of stock of corporation S. A, an officer of P, owns directly 30 shares of S stock which P has an option to acquire. If, under paragraph (b)(4) of this section, the 30 shares owned directly by A are treated as not outstanding, P would be treated as owning stock possessing only 71 percent (50/70) of the total voting power and value of S stock, and S should not be a member of a parent-subsidary group of trades or businesses under common control. However, because the 30 shares owned by A that P has

§ 1.414(c)-4

an option to purchase are considered as owned by P under paragraph (b)(2) of this section, and that ownership plus P's direct ownership of 50 shares result in S's membership in a parent-subsidary group of trades or businesses under common control for 1985, the provisions of this paragraph apply. Therefore, A's stock is not treated as an excluded interest and S is a member of a parent-subsidary group consisting of P and S.

[T.D. 8179, 53 FR 6607, Mar. 2, 1988; 53 FR 8302, Mar. 14, 1988]

§ 1.414(c)-4 Rules for determining ownership.

(a) *In general.* In determining the ownership of an interest in an organization for purposes of § 1.414(c)-2 and § 1.414(c)-3, the constructive ownership rules of paragraph (b) of this section shall apply, subject to the operating rules contained in paragraph (c). For purposes of this section the term "interest" means: in the case of a corporation, stock; in the case of a trust or estate, an actuarial interest; in the case of a partnership, an interest in the profits or capital; and in the case of a sole proprietorship, the proprietorship.

(b) *Constructive ownership*—(1) *Options.* If a person has an option to acquire any outstanding interest in an organization, such interest shall be considered as owned by such person. For this purpose, an option to acquire an option, and each one of a series of such options shall be considered as an option to acquire such interest.

(2) *Attribution from partnerships*—(i) *General.* An interest owned, directly or indirectly, by or for a partnership shall be considered as owned by any partner having an interest of 5 percent or more in either the profits or capital of the partnership in proportion to such partner's interest in the profits or capital, whichever such proportion is greater.

(ii) *Example.* The provisions of paragraph (b)(2)(i) of this section may be illustrated by the following example:

Example. A, B, and C, unrelated individuals, are partners in the ABC Partnership. The partners' interest in the capital and profits of ABC are as follows:

(IN PERCENT)		
Partner	Capital	Profits
A	36	25
B	60	71

26 CFR Ch. I (4-1-08 Edition)

(IN PERCENT)—Continued

Partner	Capital	Profits
C	4	4

The ABC Partnership owns the entire outstanding stock (100 shares) of X Corporation. Under paragraph (b)(2)(i) of this section, A is considered to own the stock of X owned by the partnership in proportion to his interest in capital (36 percent) or profits (25 percent), whichever such proportion is greater. Therefore, A is considered to own 36 shares of X stock. Since B has a greater interest in the profits of the partnership than in the capital, B is considered to own X stock in proportion to his interest in such profits. Therefore, B is considered to own 71 shares of X stock. Since C does not have an interest of 5 percent or more in either the capital or profits of ABC, he is not considered to own any shares of X stock.

(3) *Attribution from estates and trusts*—

(i) *In general.* An interest in an organization (hereinafter called an "organization interest") owned, directly or indirectly, by or for an estate or trust shall be considered as owned by any beneficiary of such estate or trust who has an actuarial interest of 5 percent or more in such organization interest, to the extent of such actuarial interest. For purposes of this subparagraph, the actuarial interest of each beneficiary shall be determined by assuming the maximum exercise of discretion by the fiduciary in favor of such beneficiary and the maximum use of the organization interest to satisfy the beneficiary's rights. A beneficiary of an estate or trust who cannot under any circumstances receive any part of an organization interest held by the estate or trust, including the proceeds from the disposition thereof, or the income therefrom, does not have an actuarial interest in such organization interest. Thus, where stock owned by a decedent's estate has been specifically bequeathed to certain beneficiaries and the remainder of the estate has been specifically bequeathed to other beneficiaries, the stock is attributable only to the beneficiaries to whom it is specifically bequeathed. Similarly a remainderman of a trust who cannot under any circumstances receive any interest in the stock of a corporation which is a part of the corpus of the trust (including any accumulated income therefrom or the proceeds from a

disposition thereof) does not have an actuarial interest in such stock. However, an income beneficiary of a trust does have an actuarial interest in stock if he has any right to the income from such stock even though under the terms of the trust instrument such stock can never be distributed to him. The factors and methods prescribed in § 20.2031-7 or, for certain prior periods, § 20.2031-7A (Estate Tax Regulations) for use in ascertaining the value of an interest in property for estate tax purposes shall be used for purposes of this subdivision in determining a beneficiary's actuarial interest in an organization interest owned directly or indirectly by or for an estate or trust.

(ii) *Special rules for estates.* (A) For purposes of this paragraph (b)(3) with respect to an estate, property of a decedent shall be considered as owned by his or her estate if such property is subject to administration by the executor or administrator for the purposes of paying claims against the estate and expenses of administration notwithstanding that, under local law, legal title to such property vests in the decedent's heirs, legatees or devisees immediately upon death.

(B) For purposes of this paragraph (b)(3) with respect to an estate, the term "beneficiary" includes any person entitled to receive property of a decedent pursuant to a will or pursuant to laws of descent and distribution.

(C) For purposes of this paragraph (b)(3) with respect to an estate, a person shall no longer be considered a beneficiary of an estate when all the property to which he or she is entitled has been received by him or her, when he or she no longer has a claim against the estate arising out of having been a beneficiary, and when there is only a remote possibility that it will be necessary for the estate to seek the return of property from him or her or to seek payment from him or her by contribution or otherwise to satisfy claims against the estate or expenses of administration.

(iii) *Grantor trusts, etc.* An interest owned, directly or indirectly, by or for any portion of a trust of which a person is considered the owner under subpart E, part I, subchapter J of the Code (relating to grantors and others treated

as substantial owners) is considered as owned by such person.

(4) *Attribution from corporations—(i) General.* An interest owned, directly or indirectly, by or for a corporation shall be considered as owned by any person who owns (directly and, in the case of a parent-subsidiary group of trades or businesses under common control, with the application of paragraph (b)(1) of this section, or in the case of a brother-sister group of trades or business under common control, with the application of this section), 5 percent or more in value of the stock in that proportion which the value of the stock which such person so owns bears to the total value of all the stock in such corporation.

(ii) *Example.* The provisions of paragraph (b)(4)(i) of this section may be illustrated by the following example:

Example. B, an individual, owns 60 of the 100 shares of the only class of outstanding stock of corporation P. C, an individual, owns 4 shares of the P stock, and corporation X owns 36 shares of the P stock. Corporation P owns, directly and indirectly, 50 shares of the stock of corporation S. Under this subparagraph, B is considered to own 30 shares of the S stock ($60/100 \times 50$), and X is considered to own 18 shares of S stock ($36/100 \times 50$). Since C does not own 5 percent or more in the value of P stock, he is not considered as owning any of the S stock owned by P. If in this example, C's wife had owned directly 1 share of the P stock, C and his wife would each be considered as owning 5 shares of the P stock, and therefore C and his wife would be considered as owning 2.5 shares of the S stock ($5/100 \times 50$).

(5) *Spouse—(i) General rule.* Except as provided in paragraph (b)(5)(ii) of this section, an individual shall be considered to own an interest owned, directly or indirectly, by or for his or her spouse, other than a spouse who is legally separated from the individual under a decree of divorce, whether interlocutory or final, or a decree of separate maintenance.

(ii) *Exception.* An individual shall not be considered to own an interest in an organization owned, directly or indirectly, by or for his or her spouse on any day of a taxable year of such organization, provided that each of the following conditions are satisfied with respect to such taxable year:

§ 1.414(c)-4

26 CFR Ch. I (4-1-08 Edition)

(A) Such individual does not, at any time during such taxable year, own directly any interest in such organization;

(B) Such individual is not a member of the board of directors, a fiduciary, or an employee of such organization and does not participate in the management of such organization at any time during such taxable year;

(C) Not more than 50 percent of such organization's gross income for such taxable year was derived from royalties, rents, dividends, interest, and annuities; and

(D) Such interest in such organization is not, at any time during such taxable year, subject to conditions which substantially restrict or limit the spouse's right to dispose of such interest and which run in favor of the individual or the individual's children who have not attained the age of 21 years. The principles of § 1.414(c)-3(d)(6)(i) shall apply in determining whether a condition is a condition described in the preceding sentence.

(iii) *Definitions.* For purposes of paragraph (b)(5)(ii)(C) of this section, the gross income of an organization shall be determined under section 61 and the regulations thereunder. The terms "interest", "royalties", "rents", "dividends", and "annuities" shall have the same meaning such terms are given for purposes of section 1244(c) and § 1.1244(c)-1(e)(1).

(6) *Children, grandchildren, parents, and grandparents—(i) Children and parents.* An individual shall be considered to own an interest owned, directly or indirectly, by or for the individual's children who have not attained the age of 21 years, and if the individual has not attained the age of 21 years, an interest owned, directly or indirectly, by or for the individual's parents.

(ii) *Children, grandchildren, parents, and grandparents.* If an individual is in effective control (within the meaning of § 1.414(c)-2(c)(2)), directly and with the application of the rules of this paragraph without regard to this subdivision, of an organization, then such individual shall be considered to own an interest in such organization owned, directly or indirectly, by or for the individual's parents, grandparents,

grandchildren, and children who have attained the age of 21 years.

(iii) *Adopted children.* For purposes of this section, a legally adopted child of an individual shall be treated as a child of such individual.

(iv) *Example.* The provisions of this subparagraph (6) may be illustrated by the following example:

Example: (A) Facts. Individual F owns directly 40 percent of the profits interest of the DEF Partnership. His son, M, 20 years of age, owns directly 30 percent of the profits interest of DEF, and his son, A, 30 years of age, owns directly 20 percent of the profits interest of DEF. The 10 percent remaining of the profits interest and 100 percent of the capital interest of DEF is owned by an unrelated person.

(B) *F's ownership.* F owns 40 percent of the profits interest in DEF directly and is considered to own the 30 percent profits interest owned directly by M. Since, for purposes of the effective control test contained in paragraph (b)(6)(ii) of this section, F is treated as owning 70 percent of the profits interest of DEF, F is also considered as owning the 20 percent profits interest of DEF owned by his adult son, A. Accordingly, F is considered as owning a total of 90 percent of the profits interest in DEF.

(C) *M's ownership.* Minor son, M, owns 30 percent of the profits interest in DEF directly, and is considered to own the 40 percent profits interest owned directly by his father, F. However, M is not considered to own the 20 percent profits interest of DEF owned directly by his brother, A, and constructively by F, because an interest constructively owned by F by reason of family attribution is not considered as owned by him for purposes of making another member of his family the constructive owner of such interest. (See paragraph (c)(2) of this section.) Accordingly, M is considered as owning a total of 70 percent of the profits interest of the DEF Partnership.

(D) *A's ownership.* Adult son, A, owns 20 percent of the profits interest in DEF directly. Since, for purposes of determining whether A effectively controls DEF under paragraph (b)(6)(ii) of this section, A is treated as owning only the percentage of profits interest he owns directly, he does not satisfy the condition precedent for the attribution of the DEF profits interest from his father. Accordingly, A is considered as owning only the 20 percent profits interest in DEF which he owns directly.

(c) *Operating rules—(1) In general.* Except as provided in paragraph (c)(2) of this section, an interest constructively owned by a person by reason of the application of paragraph (b) (1), (2), (3),

Internal Revenue Service, Treasury

§ 1.414(c)-5

(4), (5), or (6) of this section shall, for the purposes of applying such paragraph, be treated as actually owned by such person.

(2) *Members of family.* An interest constructively owned by an individual by reason of the application of paragraph (b) (5) or (6) of this section shall not be treated as owned by such individual for purposes of again applying such subparagraphs in order to make another the constructive owner of such interest.

(3) *Precedence of option attribution.* For purposes of this section, if an interest may be considered as owned under paragraph (b)(1) of this section (relating to option attribution) and under any other subparagraph of paragraph (b) of this section, such interest shall be considered as owned by such person under paragraph (b)(1) of this section.

(4) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. A, 30 years of age, has a 90 percent interest in the capital and profits of DEF Partnership. DEF owns all the outstanding stock of corporation X and X owns 60 shares of the 100 outstanding shares of corporation Y. Under paragraph (c)(1) of this section, the 60 shares of Y constructively owned by DEF by reason of paragraph (b)(4) of this section are treated as actually owned by DEF for purposes of applying paragraph (b)(2) of this section. Therefore, A is considered as owning 54 shares of the Y stock (90 percent of 60 shares).

Example 2. Assume the same facts as in example (1). Assume further that B, who is 20 years of age and the brother of A, directly owns 40 shares of Y stock. Although the stock of Y owned by B is considered as owned by C (the father of A and B) under paragraph (b)(6)(i) of this section, under paragraph (c)(2) of this section such stock may not be treated as owned by C for purposes of applying paragraph (b)(6)(ii) of this section in order to make A the constructive owner of such stock.

Example 3. Assume the same facts as in example (2), and further assume that C has an option to acquire the 40 shares of Y stock owned by his son, B. The rule contained in paragraph (c)(2) of this section does not prevent the reattribution of such 40 shares to A because, under paragraph (c)(3) of this section, C is considered as owning the 40 shares by reason of option attribution and not by reason of family attribution. Therefore, since A is in effective control of Y under paragraph (b)(6)(ii) of this section, the 40

shares of Y stock constructively owned by C are reattributed to A. A is considered as owning a total of 94 shares of Y stock.

[T.D. 8179, 53 FR 6609, Mar. 2, 1988; 53 FR 8302, Mar. 14, 1988, as amended by T.D. 8540, 59 FR 30102, June 10, 1994]

§ 1.414(c)-5 Certain tax-exempt organizations.

(a) *Application.* This section applies to an organization that is exempt from tax under section 501(a). The rules of this section only apply for purposes of determining when entities are treated as the same employer for purposes of section 414(b), (c), (m), and (o) (including the sections referred to in section 414(b), (c), (m), (o), and (t)), and are in addition to the rules otherwise applicable under section 414(b), (c), (m), and (o) for determining when entities are treated as the same employer. Except to the extent set forth in paragraphs (d), (e), and (f) of this section, this section does not apply to any church, as defined in section 3121(w)(3)(A), or any qualified church-controlled organization, as defined in section 3121(w)(3)(B).

(b) *General rule.* In the case of an organization that is exempt from tax under section 501(a) (an exempt organization) whose employees participate in a plan, the employer with respect to that plan includes the exempt organization whose employees participate in the plan and any other organization that is under common control with that exempt organization. For this purpose, common control exists between an exempt organization and another organization if at least 80 percent of the directors or trustees of one organization are either representatives of, or directly or indirectly controlled by, the other organization. A trustee or director is treated as a representative of another exempt organization if he or she also is a trustee, director, agent, or employee of the other exempt organization. A trustee or director is controlled by another organization if the other organization has the general power to remove such trustee or director and designate a new trustee or director. Whether a person has the power to remove or designate a trustee or director is based on facts and circumstances. To illustrate the rules of

this paragraph (b), if exempt organization A has the power to appoint at least 80 percent of the trustees of exempt organization B (which is the owner of the outstanding shares of corporation C, which is not an exempt organization) and to control at least 80 percent of the directors of exempt organization D, then, under this paragraph (b) and § 1.414(b)-1, entities A, B, C, and D are treated as the same employer with respect to any plan maintained by A, B, C, or D for purposes of the sections referenced in section 414(b), (c), (m), (o), and (t).

(c) *Permissive aggregation with entities having a common exempt purpose*—(1) *General rule.* For purposes of this section, exempt organizations that maintain a plan to which section 414(c) applies that covers one or more employees from each organization may treat themselves as under common control for purposes of section 414(c) (and, thus, as a single employer for all purposes for which section 414(c) applies) if each of the organizations regularly coordinates their day-to-day exempt activities. For example, an entity that provides a type of emergency relief within one geographic region and another exempt organization that provides that type of emergency relief within another geographic region may treat themselves as under common control if they have a single plan covering employees of both entities and regularly coordinate their day-to-day exempt activities. Similarly, a hospital that is an exempt organization and another exempt organization with which it coordinates the delivery of medical services or medical research may treat themselves as under common control if there is a single plan covering employees of the hospital and employees of the other exempt organization and the coordination is a regular part of their day-to-day exempt activities.

(2) *Authority to permit aggregation.* (i) For determining when entities are treated as the same employer under section 414(b), (c), (m), and (o), the Commissioner may issue rules of general applicability, in revenue rulings, notices, or other guidance published in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(b) of this chapter), permitting other types of combinations of

entities that include exempt organizations to elect to be treated as under common control for one or more specified purposes if:

(A) There are substantial business reasons for maintaining each entity in a separate trust, corporation, or other form; and

(B) Such treatment would be consistent with the anti-abuse standards in paragraph (f) of this section.

(ii) For example, this authority might be exercised in any situation in which the organizations are so integrated in their operations as to effectively constitute a single coordinated employer for purposes of section 414(b), (c), (m), and (o), including common employee benefit plans.

(d) *Permissive disaggregation between qualified church controlled organizations and other entities.* In the case of a church plan (as defined in section 414(e)) to which contributions are made by more than one common law entity, any employer may apply paragraphs (b) and (c) of this section to those entities that are not a church (as defined in section 403(b)(12)(B) and § 1.403(b)-2) separately from those entities that are churches. For example, in the case of a group of entities consisting of a church (as defined in section 3121(w)(3)(A)), a secondary school (that is treated as a church under § 1.403(b)-2), and several nursing homes each of which receives more than 25 percent of its support from fees paid by residents (so that none of them is a qualified church-controlled organization under § 1.403(b)-2 and section 3121(w)(3)(B)), the nursing homes may treat themselves as being under common control with each other, but not as being under common control with the church and the school, even though the nursing homes would be under common control with the school and the church under paragraph (b) of this section.

(e) *Application to certain church entities under section 3121(w)(3).* [Reserved]

(f) *Anti-abuse rule.* In any case in which the Commissioner determines that the structure of one or more exempt organizations (which may include an exempt organization and an entity that is not exempt from income tax) or

the positions taken by those organizations has the effect of avoiding or evading any requirements imposed under section 401(a), 403(b), or 457(b), or any applicable section (as defined in section 414(t)), or any other provision for which section 414(c) applies, the Commissioner may treat an entity as under common control with the exempt organization.

(g) *Examples.* The provisions of this section are illustrated by the following examples:

Example 1. (i) *Facts.* Organization A is a tax-exempt organization under section 501(c)(3) which owns 80% or more of the total value of all classes of stock of corporation B, which is a for profit organization.

(ii) *Conclusion.* Under paragraph (a) of this section, this section does not alter the rules of section 414(b) and (c), so that organization A and corporation B are under common control under § 1.414(c)-2(b).

Example 2. (i) *Facts.* Organization M is a hospital which is a tax-exempt organization under section 501(c)(3) and organization N is a medical clinic which is also a tax-exempt organization under section 501(c)(3). N is located in a city and M is located in a nearby suburb. There is a history of regular coordination of day-to-day activities between M and N, including periodic transfers of staff, coordination of staff training, common sources of income, and coordination of budget and operational goals. A single section 403(b) plan covers professional and staff employees of both the hospital and the medical clinic. While a number of members of the board of directors of M are also on the board of directors of N, there is less than 80% overlap in board membership. Both organizations have approximately the same percentage of employees who are highly compensated and have appropriate business reasons for being maintained in separate entities.

(ii) *Conclusion.* M and N are not under common control under this section, but, under paragraph (c) of this section, may choose to treat themselves as under common control, assuming both of them act in a manner that is consistent with that choice for purposes of § 1.403(b)-5(a), sections 401(a), 403(b), and 457(b), and any other applicable section (as defined in section 414(t)), or any other provision for which section 414(c) applies.

Example 3. (i) *Facts.* Organizations O and P are each tax-exempt organizations under section 501(c)(3). Each organization maintains a qualified plan for its employees, but one of the plans would not satisfy section 410(b) (or section 401(a)(4)) if the organizations were under common control. The two organizations are closely related and, while the organizations have several trustees in common, the common trustees constitute fewer than

80 percent of the trustees of either organization. Organization O has the power to remove any of the trustees of P and to select the slate of replacement nominees.

(ii) *Conclusion.* Under these facts, pursuant to paragraphs (b) and (f) of this section, the Commissioner treats the entities as under common control.

(h) *Applicable date.* This section applies for plan years beginning after December 31, 2008.

[T.D. 9340, FR 41158, July 26, 2007; 72 FR 54352, Sept. 25, 2007]

§ 1.414(c)-6 Effective date.

(a) *General rule.* Except as provided in paragraph (b), (c), (e), or (f) of this section, the provisions of § 1.414(b)-1 and §§ 1.414(c)-1 through 1.414 (c)-4 shall apply for plan years beginning after September 2, 1974.

(b) *Existing plans.* In the case of a plan in existence on January 1, 1974, unless paragraph (c) of this section applies, the provisions of “§ 1.414 (b)-1 and §§ 1.414(c)-1 through 1.414(c)-4 shall apply for plan years beginning after December 31, 1975. For definition of the term “existing plan”, see § 1.410(a)-2(c).

(c) *Existing plans electing new provisions.* In the case of a plan in existence on January 1, 1974, for which the plan administrator makes an election under § 1.410 (a)-2(d), the provisions of § 1.414(b)-1 and §§ 1.414 (c)-1 through 1.414(c)-4 shall apply to the plan years elected under § 1.410 (a)-2 (d).

(d) *Application.* For purposes of the Employee Retirement Income Security Act of 1974, the provisions of § 1.414(b)-1 and §§ 1.414(c)-1 through 1.414(c)-4 do not apply for any period of time before the plan years described in paragraph (a), (b), or (c) of this section, whichever is applicable.

(e) *Special rule.* Notwithstanding paragraph (a), (b), or (c) of this section, § 1.414(c)-3 (f) is effective April 1, 1988.

(f) *Transitional rule—(1) In general.* The amendments made by T.D. 8179 apply to the plan years or period described in paragraphs (a), (b), or (c) of this section, whichever is applicable.

(2) *Exception.* In the case of a plan year or period beginning before March 2, 1988, if an organization—

(i) Is a member of a brother-sister group of trades or businesses under common control under § 1.414(c)-2(c),

§ 1.414(e)-1

26 CFR Ch. I (4-1-08 Edition)

as in effect before removal by T.D. 8179 (“old group”), for such plan year or period, and

(ii) Is not such a member for such plan year or period because of the amendments made by such Treasury decision,

such member (whether or not a corporation) nevertheless will be treated as a member of such old group for purposes of section 414(c) for that plan year or period to the extent provided in § 1.1563-1 (d)(2). Also, such member will be treated as a member of an old group for all purposes of the Code for such plan year or period if all the organizations (whether or not corporations) that are members of the old group meet all the requirements of § 1.1563-1(d)(3) with respect to such plan year or period.

[T.D. 8179, 53 FR 6611, Mar. 2, 1988. Redesignated by T.D. 9340, 72 FR 41158, July 26, 2007]

§ 1.414(e)-1 Definition of church plan.

(a) *General rule.* For the purposes of part I of subchapter D of chapter 1 of the Code and the regulations thereunder, the term “church plan” means a plan established and at all times maintained for its employees by a church or by a convention or association of churches (hereinafter included within the term “church”) which is exempt from tax under section 501(a), provided that such plan meets the requirements of paragraphs (b) and (if applicable) (c) of this section. If at any time during its existence a plan is not a church plan because of a failure to meet the requirements set forth in this section, it cannot thereafter become a church plan.

(b) *Unrelated businesses—(1) In general.* A plan is not a church plan unless it is established and maintained primarily for the benefit of employees (or their beneficiaries) who are not employed in connection with one or more unrelated trades or businesses (within the meaning of section 513).

(2) *Establishment or maintenance of a plan primarily for persons not employed in connection with one or more unrelated trades or businesses.* (i) (A) A plan, other than a plan in existence on September 2, 1974, is established primarily for the benefit of employees (or their beneficiaries) who are not employed in con-

nection with one or more unrelated trades or businesses if on the date the plan is established the number of employees employed in connection with the unrelated trades or businesses eligible to participate in the plan is less than 50 percent of the total number of employees of the church eligible to participate in the plan.

(B) A plan in existence on September 2, 1974, is to be considered established as a plan primarily for the benefit of employees (or their beneficiaries) who are not employed in connection with one or more unrelated trades or businesses if it meets the requirements of both paragraphs (b)(2)(ii) (A) and (B) (if applicable) in either of its first 2 plan years ending after September 2, 1974.

(ii) For plan years ending after September 2, 1974, a plan will be considered maintained primarily for the benefit of employees of a church who are not employed in connection with one or more unrelated trades or businesses if in 4 out of 5 of its most recently completed plan years—

(A) Less than 50 percent of the persons participating in the plan (at any time during the plan year) consist of and in the same year

(B) Less than 50 percent of the total compensation paid by the employer during the plan year (if benefits or contributions are a function of compensation) to employees participating in the plan is paid to,

employees employed in connection with an unrelated trade or business. The determination that the plan is not a church plan will apply to the second year (within a 5 year period) for which the plan fails to meet paragraph (b)(2)(ii) (A) or (B) (if applicable) and to all plan years thereafter unless, taking into consideration all of the facts and circumstances as described in paragraph (b)(2)(iii) of this section, the plan is still considered to be a church plan. A plan that has not completed 5 plan years ending after September 2, 1974, shall be considered maintained primarily for the benefit of employees not employed in connection with an unrelated trade or business unless it fails to meet paragraphs (b)(2)(ii) (A) and (B) in at least 2 such plan years.

(iii) Even though a plan does not meet the provisions of paragraph

(b)(2)(ii) of this section, it nonetheless will be considered maintained primarily for the benefit of employees who are not employed in connection with one or more unrelated trades or businesses if the church maintaining the plan can demonstrate that based on all of the facts and circumstances such is the case. Among the facts and circumstances to be considered in evaluating each case are:

(A) The margin by which the plan fails to meet the provisions of paragraph (b)(2)(ii) of this section, and

(B) Whether the failure to meet such provisions was due to a reasonable mistake as to what constituted an unrelated trade or business or whether a particular person or group of persons were employed in connection with one or more unrelated trades or businesses.

(iv) For purposes of this section, an employee will be considered eligible to participate in a plan if such employee is a participant in the plan or could be a participant in the plan upon making mandatory employee contributions to the plan.

(3) *Employment in connection with one or more unrelated trades or businesses.* An employee is employed in connection with one or more unrelated trades or businesses of a church if a majority of such employee's duties and responsibilities in the employ of the church are directly or indirectly related to the carrying on of such trades or businesses. Although an employee's duties and responsibilities may be insignificant with respect to any one unrelated trade or business, such employee will nonetheless be considered as employed in connection with one or more unrelated trades or businesses if such employee's duties and responsibilities with respect to all of the unrelated trades or businesses of the church represent a majority of the total of such person's duties and responsibilities in the employ of the church.

(c) *Plans of two or more employers.* The term "church plan" does not include a plan which, during the plan year, is maintained by two or more employers unless—

(1) Each of the employers is a church that is exempt from tax under section 501(a), and

(2) With respect to the employees of each employer, the plan meets the provisions of paragraph (b)(2)(ii) of this section or would be determined to be a church plan based on all the facts and circumstances described in paragraph (b)(2)(iii) of this section.

Thus, if with respect to a single employer the plan fails to meet any provision of this paragraph, the entire plan ceases to be a church plan unless that employer ceases maintaining the plan for all plan years beginning after the plan year in which it receives a final notification from the Internal Revenue Service that it does not meet the provisions of this paragraph. If the employer does cease maintaining the plan in accordance with this paragraph, the fact that the employer formerly did maintain the plan will not prevent the plan from being a church plan for prior years.

(d) *Special rule.* (1) Notwithstanding paragraph (c)(1) of this section, a plan maintained by a church and one or more agencies of such church for the employees of such church and of such agency or agencies, that is in existence on January 1, 1974, shall be treated as a church plan for plan years ending after September 2, 1974, and beginning before January 1, 1983, provided that the plan is described in paragraph (c) of this section without regard to paragraph (c)(1) of this section, and the plan is not maintained by an agency which did not maintain the plan on January 1, 1974.

(2) For the purposes of section 414(e) and this section, an agency of a church means an organization which is exempt from tax under section 501 and which is either controlled by, or associated with, a church. For example, an organization, a majority of whose officers or directors are appointed by a church's governing board or by officials of a church, is controlled by a church within the meaning of this paragraph. An organization is associated with a church if it shares common religious bonds and convictions with that church.

(e) *Religious orders and religious organizations.* For the purpose of this section the term "church" includes a religious order or a religious organization if such order or organization (1) is an

integral part of a church, and (2) is engaged in carrying out the functions of a church, whether as a civil law corporation or otherwise.

(f) *Separately incorporated fiduciaries.* A plan which otherwise meets the provisions of this section shall not lose its status as a church plan because of the fact that it is administered by a separately incorporated fiduciary such as a pension board or a bank.

(g) *Cross reference.* (1) For rules relating to treatment of church plans, see section 410(c), 411(e), 412(h), 4975(g), and the regulations thereunder.

(2) For rules relating to church plan elections, see section 410(d) and the regulations thereunder.

[T.D. 7688, 45 FR 20797, Mar. 31, 1980]

§ 1.414(f)-1 Definition of multiemployer plan.

(a) *General rule.* For purposes of part I of subchapter D of chapter 1 of the Code and the regulations thereunder, a plan is a multiemployer plan for a plan year if all of the following requirements are satisfied:

(1) *Number of contributing employers.* More than one employer is required by the plan instrument or other agreement to contribute (or to have contributions made on its behalf) to the plan for the plan year.

(2) *Collective bargaining agreement.* The plan is maintained for the plan year pursuant to one or more collective bargaining agreements between employee representatives and more than one employer.

(3) *Amount of contributions.* Except as provided by paragraph (c) of this section (relating to the special rule for contributions exceeding 50 percent), the amount of contributions made under the plan for the plan year by or on behalf of each employer is less than 50 percent of the total amount of contributions made under the plan for such plan year by or on behalf of all employers.

(4) *Benefits.* The plan provides that the amount of benefits payable with respect to each employee participating in the plan is determined without regard to whether or not his employer continues as a member of the plan. If benefits accrued as a result of the participant's service with his employer during

a period before such employer was a member of the plan, this requirement does not apply to the amount of those benefits, except that this requirement does apply to the amount of those benefits (i) which are accrued benefits derived from employee contributions, or (ii) which are accrued under a plan maintained by an employer prior to the time such employer became a member of the plan to which the requirements of this paragraph (a) are applied.

(5) *Other requirements.* The plan satisfies such other requirements as the Secretary of Labor by regulations prescribes under the authority of section 414(f)(1)(E) of the Code and section 3(37) of the Employee Retirement Income Security Act of 1974 (Pub. L. 93-406, 88 Stat. 839). See 29 CFR 2510.3-37.

(b) *Special rules—*(1) *Amount of contributions.* For purposes of paragraphs (a)(3) and (c) of this section, the amount of contributions made under the plan for the plan year by or on behalf of each employer shall be the sum of such contributions made on or before the last day of the plan year. For purposes of determining whether contributions are made on or before the last day of the plan year, the rule of section 412(c)(10) and the regulations thereunder (relating to the treatment of certain contributions made after the last day of the plan year as made on such last day) shall apply.

(2) *Benefits.* (i) For purposes of paragraph (a)(4) of this section, certain benefit amounts are treated as accrued as a result of the participant's service with an employer during a period before such employer was a member of the plan. The amount of such a benefit so treated is the difference (if any) between two calculated amounts. The first calculated amount is the participant's total accrued benefit calculated under the plan as of the date the employer ceased to be a member of the plan. The second calculated amount is the participant's accrued benefit calculated without regard to his service with such employer during the period before such employer was a member of the plan. However, under a special limitation, this difference may not exceed the benefit a participant accrued from service before his employer became a member of the plan. For purposes of

Internal Revenue Service, Treasury

§ 1.414(f)-1

this limitation, this benefit is the benefit accrued as of the date the employer ceases to be a member of the plan. An employer shall be deemed to be a member of the plan in a plan year if the employer is required by the plan instrument or other agreement to contribute (or to have contributions made on its behalf) to the plan for such plan year or if an employee of the employer accrues a benefit, on account of service with the employer during such plan year, under the plan for that plan year.

(ii) The provisions of paragraphs (a)(4) and (b)(2)(i) of this section are illustrated by the following example:

Example. On January 1, 1976, employer W became a member of the noncontributory XYZ pension plan which uses the calendar

year as the plan year. W did not maintain any plan prior to that date. The plan provided for benefits of \$4 per month per year of service (including service with W before January 1, 1976). On January 1, 1980, following adoption of a new collective bargaining agreement, the benefits were increased to \$12 per month per year of service for all years of service (including service with W before January 1, 1976). On January 1, 1991, W ceased to be a member of the plan.

A, an employee of W, had 15 years of service before January 1, 1976, 4 years of service between January 1, 1976, and December 31, 1979, and 11 years of service between January 1, 1980, and December 31, 1990. On December 31, 1990, A's accrued benefit was \$360 per month (\$12 per month×30). On January 1, 1991, the portion of A's accrued benefit retained and the portion forfeited under the terms of the XYZ pension plan were determined as follows:

Years	Monthly accrued benefit retained	Monthly accrued benefit forfeited
Before Jan. 1, 1976		\$12×15 years=\$180
Jan. 1, 1976 to Dec. 31, 1979	\$4×4 years=\$16	\$8×4 years=\$32
Jan. 1, 1980 to Dec. 31, 1990	\$12×11 years=\$132	
Total	\$148	\$212

The XYZ plan does not satisfy the requirements of paragraphs (a)(4) and (b)(2)(i) of this section because no benefit can be forfeited with respect to service after W began participating in the plan. Thus, the maximum accrued benefit that may be forfeited is \$180 per month (the accrued benefit with respect to A's service prior to January 1, 1976). Therefore, in order for the plan to meet the requirements of paragraphs (a)(4) and (b)(2)(i) of this section, the plan must provide for A's accrued benefit after W ceased to be a member of the plan to be at least \$180 per month (\$360 per month total accrued benefit less \$180 per month benefit accrued for service prior to W's membership in the plan).

(iii) For purposes of paragraphs (a)(4) and (b)(2) of this section, if an employer for a period employs two or more individuals who, solely by reason of their employment, are participants in the plan and who do not belong to the same collective bargaining unit, the dates on which the employer became and ceased to be a member of the plan shall be determined separately on a class basis for individuals who belong to separate collective bargaining units, as separate classes, and for individuals who do not belong to a collective bargaining unit, as a further single sepa-

rate class. Thus, such dates shall be determined with respect to individuals as a class who belong to the same collective bargaining unit (or who do not belong to a collective bargaining unit) without consideration of the employment by the employer of, or the participation in the plan by, other individuals (who do not belong to such collective bargaining unit and who may belong to another collective bargaining unit) or whether the employer is a member of the plan with respect to such other individuals. In no event, however, may service not attributable to service with a particular collective bargaining unit be disregarded under paragraphs (a)(4) and (b)(2) of this section merely because the employer ceases to maintain the plan with respect to such unit. Thus, for example, paragraphs (a)(4) and (b)(2) of this section do not permit the disregard of a period of service of an individual belonging to a collective bargaining unit prior to the time the employer became a member of the plan with respect to such unit to the extent that, during such period of service, the individual

belonged to another collective bargaining unit with respect to which the employer was a member of the plan.

(3) *Controlled groups.* For purposes of section 414(f) and this section, all corporations which are members of a controlled group of corporations (within the meaning of section 1563(a) and the regulations thereunder, but determined without regard to section 1563(e)(3)(C) and the regulations thereunder) are deemed to be one employer.

(c) *Contributions exceeding 50 percent.* If a plan was a multiemployer plan as defined in this section for any plan year (including plan years ending prior to September 3, 1974), “75 percent” shall be substituted for “50 percent” in applying paragraph (a)(3) of this section for subsequent plan years until the first plan year following a plan year in which the amount contributed by or on behalf of one employer is 75 percent or more of the total amount of contributions made under the plan for that plan year by or on behalf of all of the employers making contributions. In such case “75 percent” shall not again be substituted for “50 percent” until the plan has met the requirements of paragraph (a) of this section (determined without regard to this paragraph) for one plan year.

(d) *Examples.* The application of this section is illustrated by the following examples. For purposes of these examples, assume that the plan meets the requirements of paragraphs (a) (1), (2), (4), and (5) of this section for each plan year.

Example 1. On January 1, 1970, U, V, and W, three employers none of which is a member of a controlled group of corporations with any of the other two employers, establish a plan with a plan year corresponding to the calendar year. U, V, and W each contribute less than one-half of the total contributions made under the plan for each of the years 1970, 1971, and 1972. For the years 1973, 1974, and 1975, U contributes 70 percent and V and W each contribute 15 percent of the total contributions made under the plan for each year. The plan is a multiemployer plan under section 414(f) and this section for 1975 because no employer has contributed 75 percent or more of the total amount contributed for each of the plan years subsequent to 1972.

Example 2. (i) *First plan year.* On January 1, 1975, X, Y, and Z, three employers none of which is a member of a controlled group of

corporations with any of the other two employers, establish a plan with a plan year corresponding to the calendar year. X, Y, and Z each contribute less than one-half of the total contributions made under the plan for 1975. The plan is a multiemployer plan for 1975 because it meets the 50 percent contribution requirement of paragraph (a)(3) of this section.

(ii) *Second plan year.* For the second plan year, 1976, X contributes 70 percent and Y and Z each contribute 15 percent of the total contributions made under the plan. The plan is a multiemployer plan for 1976 because it was a multiemployer plan for the preceding plan year and satisfies the 75 percent contribution requirement of paragraph (c) of this section.

(iii) *Third plan year.* For the third plan year, 1977, X contributes 80 percent and Y and Z each contribute 10 percent of the total contributions made under the plan. The plan is not a multiemployer plan for 1977 because it fails to satisfy the 75 percent contribution requirement of paragraph (c) of this section.

(iv) *Fourth plan year.* For the fourth plan year, 1978, Y contributes 60 percent and X and Z each contribute 20 percent of the total contributions made under the plan. The 75 percent contribution requirement of paragraph (c) of this section does not apply. The plan is not a multiemployer plan for 1978 because it fails to satisfy the 50 percent contribution requirement of paragraph (a)(3) of this section.

(v) *Fifth plan year.* For the fifth plan year, 1979, X, Y, and Z each contribute less than one-half of the total contributions made under the plan. The 75 percent contribution requirement of paragraph (c) of this section does not apply. The plan is a multiemployer plan for 1979 because it again meets the 50 percent contribution requirement of paragraph (a)(3) of this section.

(vi) *Sixth plan year.* For the sixth plan year, 1980, the plan will continue to be a multiemployer plan, provided that no employer contributes 75 percent or more of the total amount of contributions made under the plan for the plan year.

(e) *Retention of records.* (1) For plan years ending prior to September 3, 1974, a plan may be required to furnish proof that it met the requirements of section 414(f) and this section for each plan year ending prior to that date to the extent necessary to show the applicability of the 75 percent test provided in paragraph (c) of this section.

(2) For plan years ending after September 2, 1974, a plan may be required to furnish proof that it met the requirements of section 414(f) and this

Internal Revenue Service, Treasury

§ 1.414(g)-1

section for 6 immediately preceding plan years.

(Secs. 414(f) and 7805 of the Internal Revenue Code of 1954 (88 Stat. 927, 26 U.S.C. 414(f); 68A Stat. 917; 26 U.S.C. 7805))

[T.D. 7552, 43 FR 29940, July 12, 1978]

§ 1.414(g)-1 Definition of plan administrator.

(a) *In general.* For purposes of part I of subchapter D of chapter 1 of the Code and the regulations thereunder, if the instrument under which the plan is operated for a plan year specifically designates a person or a group of persons as plan administrator, the person or group of persons collectively is the plan administrator for the plan year. The instrument may specifically designate a plan administrator—

(1) By name,

(2) By reference to the person or group of persons holding a named position or positions,

(3) By reference to a procedure established under the terms of the instrument pursuant to which a plan administrator is designated, or

(4) By reference to the person or group of persons charged with specific responsibilities of plan administrator. Consistent with the provisions of section 405 (c) (1) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1105 (c) (1)), a plan may provide for the allocation of specific responsibilities of plan administrator among named persons and for named persons to designate others to carry out such responsibilities. A person or group of persons may be designated as plan administrator in accordance with the rules of this paragraph even though the person or group of persons does not carry the specific title “plan administrator”. In the absence of a person or group of persons designated as the plan administrator (individually, collectively, or by designation of different specific administrative responsibilities), the plan administrator for the plan year is the person or group of persons specified in paragraph (b) of this section.

(b) *Plan administrator not specifically designated.* If no person or group of persons is specifically designated as the plan administrator for a plan year by the instrument under which the plan is

operated, the plan administrator for such year is the person or group of persons determined under the following rules:

(1) *Single employer.* In the case of a plan maintained by a single employer, the employer is the plan administrator. If the employer is a corporation, the corporation is the plan administrator. However, the corporation’s board of directors may authorize a person or group of persons to fulfill responsibilities of the corporation as plan administrator. In the absence of such authorization, any corporate officer authorized under law, corporate by-laws, or resolution of the board of directors to act on behalf of the corporation with respect to contracts of a value equivalent to the fair market value of the assets of the plan shall be presumed to have authority to fulfill responsibilities of the corporation as plan administrator. For purposes of this paragraph (b) (1), “employer” means the “employer” as defined in section 3 (5) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1003 (5)).

(2) *Employee organization.* In the case of a plan maintained by an employee organization, the employee organization is the plan administrator.

(3) *Group representing the parties.* In the case of a plan maintained by two or more employers, or jointly by one or more employers and one or more employee organizations, the association, committee, joint board of trustees, or other similar group of representatives of the parties who maintain the plan, as the case may be, is the plan administrator. For purposes of this subparagraph (3), a plan shall be considered maintained by two or more employers or jointly by one or more employers and one or more employee organizations only if none of the parties has the express power, under the terms of the instrument under which the plan is operated, to terminate the plan unilaterally.

(4) *Person in control of assets.* In any case where a plan administrator may not be determined by application of paragraphs (a) and (b), (1), (2), and (3) of this section, the plan administrator is the person or persons actually responsible, whether or not under the terms of the plan, for the control, disposition,

§ 1.414(l)-1

26 CFR Ch. I (4-1-08 Edition)

or management of the cash or property received by or contributed to the plan, irrespective of whether such control, disposition, or management is exercised directly by such person or persons or indirectly through an agent or trustee designated by such person or persons.

(Secs. 414(g) and 7805 of the Internal Revenue Code of 1954 (88 Stat. 927, 68A Stat 917; 26 U.S.C. 414(g), 7805))

[T.D. 7618, 44 FR 27657, May 11, 1979]

§ 1.414(l)-1 Mergers and consolidations of plans or transfers of plan assets.

(a) *In general*—(1) *Scope of the regulations.* Sections 401(a)(12) and 414(l) apply only to plans to which section 411 applies without regard to section 411(e)(2). Thus, for example, these sections do not apply to a governmental plan within the meaning of section 414(d); a church plan, within the meaning of section 414(e), for which there has not been made the election under section 410(d) to have the participation, vesting, funding, etc. requirements apply; or a plan which at no time after September 2, 1974, provided for employer contributions.

(2) *General rule.* Under section 414(l),

(i) A trust which forms a part of a plan will not constitute a qualified trust under section 401, and

(ii) A plan will not be treated as being qualified under section 403 (a) and 405 (a), unless, in the case of a merger or consolidation (as defined in paragraph (b)(2) of this section), or a transfer of assets or liabilities (as defined in paragraph (b)(3) of this section), the following condition is satisfied. This condition requires that each participant receive benefits on a termination basis (as defined in paragraph (b)(5) of this section) from the plan immediately after the merger, consolidation or transfer which are equal to or greater than the benefits the participant would receive on a termination basis immediately before the merger, consolidation, or transfer.

(b) *Definitions.* For purposes of this section:

(1) *Single plan.* A plan is a “single plan” if and only if, on an ongoing basis, all of the plan assets are available to pay benefits to employees who are covered by the plan and their bene-

ficiaries. For purposes of the preceding sentence, all the assets of a plan will not fail to be available to provide all the benefits of a plan merely because the plan is funded in part or in whole with allocated insurance instruments. A plan will not fail to be a single plan merely because of the following:

(i) The plan has several distinct benefit structures which apply either to the same or different participants,

(ii) The plan has several plan documents,

(iii) Several employers, whether or not affiliated, contribute to the plan,

(iv) The assets of the plan are invested in several trusts or annuity contracts, or

(v) Separate accounting is maintained for purposes of cost allocation but not for purposes of providing benefits under the plan.

However, more than one plan will exist if a portion of the plan assets is not available to pay some of the benefits. This will be so even if each plan has the same benefit structure or plan document, or if all or part of the assets are invested in one trust with separate accounting with respect to each plan.

(2) *Merger or consolidation.* The terms “merger” or “consolidation” means the combining of two or more plans into a single plan. A merger or consolidation will not occur merely because one or more corporations undergo a reorganization (whether or not taxable). Furthermore, a merger or consolidation will not occur if two plans are not combined into a single plan, such as by using one trust which limits the availability of assets of one plan to provide benefits to participants and beneficiaries of only that plan.

(3) *Transfer of assets or liabilities.* A “transfer of assets or liabilities” occurs when there is a diminution of assets or liabilities with respect to one plan and the acquisition of these assets or the assumption of these liabilities by another plan. For example, the shifting of assets or liabilities pursuant to a reciprocity agreement between two plans in which one plan assumes liabilities of another plan is a transfer of assets or liabilities. However, the shifting of assets between several funding media used for a single plan (such as

between trusts, between annuity contracts, or between trusts and annuity contracts) is not a transfer of assets or liabilities.

(4) *Spinoff*. The term “spinoff” means the splitting of a single plan into two or more plans.

(5) *Benefits on a termination basis*. (i) The term “benefits on a termination basis” means the benefits that would be provided exclusively by the plan assets pursuant to section 4044 of the Employee Retirement Income Security Act of 1974 (“ERISA”) and the regulations thereunder if the plan terminated. Thus, the term does not include benefits that are guaranteed by the Pension Benefit Guaranty Corporation, but not provided by the plan assets.

(ii) For purposes of determining the benefits on a termination basis, the allocation of assets to various priority categories under section 4044 of ERISA must be made on the basis of reasonable actuarial assumptions. The assumptions used by the Pension Benefit Guaranty Corporation as of the date of the merger or spinoff are deemed reasonable for this purpose.

(iii) If a change in the benefit structure of a plan in conjunction with a merger, consolidation, or transfer of assets or liabilities alters the benefits on a termination basis, the change should be designated, at the time the merger, consolidation, or transfer occurs, to be effective either immediately before or immediately after that occurrence. In the event that no designation is made, the change in the benefit structure will be deemed to occur immediately after the merger, consolidation, or transfer of assets or liabilities.

(6) *Lower funded plan*. (i) The term “lower funded plan” generally means the plan which, immediately prior to the merger, would have its assets exhausted in a higher priority category than the other plan.

(ii) Where two plans, immediately prior to the merger, would have their assets exhausted in the same priority category of section 4044 of ERISA in the event of termination, the lower funded plan is the one in which the assets would satisfy a lesser proportion of the liability allocated to that priority category.

(7) *Priority category*. The term “priority category” means the category of benefits described in each paragraph of section 4044(a) of ERISA. References to higher or highest priority categories refer to those priority categories which receive the first allocation of assets, i.e. the lowest paragraph numbers in section 4044(a).

(8) *Separate accounting of assets*. The term “separate accounting of assets” means the maintenance of an asset account with respect to a given group of participants which is:

(i) Credited with contributions made to the plan on behalf of the participants and with its allocable share of investment income, if any, and

(ii) Charged with benefits paid to the participants, and with its allocable share of investment losses or expenses.

(9) *Present value of accrued benefit*. For purposes of this section, the present value of an accrued benefit must be determined on the basis of reasonable actuarial assumptions. For this purpose, the assumptions used by the Pension Benefit Guaranty Corporation as of the date of the merger or spinoff are deemed reasonable.

(10) *Valuation of plan assets*. In determining the value of a plan’s assets, the standards set forth in regulations prescribed by the Pension Benefit Guaranty Corporation (29 CFR Part 2611) shall be applied.

(11) *Date of merger or spinoff*. The actual date of a merger or spinoff shall be determined on the basis of the facts and circumstances of the particular situation. For purposes of this determination, the following factors, none of which is necessarily controlling, are relevant:

(i) The date on which the affected employees stop accruing benefits under one plan and begin coverage and benefit accruals under another plan.

(ii) The date as of which the amount of assets to be eventually transferred is calculated.

(iii) If the merger or spinoff agreement provides that interest is to accrue from a certain date to the date of actual transfer, the date from which such interest will accrue.

(c) *Application of section 414(l)-(1) Two or more plans*. (i) Section 414(l) does not apply unless more than a single

plan is involved. It also does not apply unless at least a single plan assumes liabilities from another plan or obtains assets from another plan (as in a merger or spinoff). For purposes of section 414(l), a transfer of assets or liabilities will not be deemed to occur merely because a defined contribution plan is amended to become a defined benefit plan. This rule will apply even if, under the facts and circumstances of a particular case, a termination of the defined contribution plan will be considered to have occurred for purposes of other provisions of the Code.

(ii) The requirements of this subparagraph may be illustrated as follows:

Example. After acquiring Corporation B, Corporation A amends Corporation B's defined benefit plan (Plan B) to provide the same benefits as Corporation A's defined benefit plan (Plan A). The assets of Plan B are transferred to the trust containing the assets of Plan A in such a manner that the assets of each plan: (1) are separately accounted for, and (2) are not available to pay benefits of the other plan. Because of condition (2) there are still two plans and, therefore, a merger did not occur. As a result, section 414(l) does not apply. If at some later date Corporation A were to sell Corporation B and transfer the assets of Plan B that were separately accounted for to another trust or to an annuity contract solely for the purpose of providing Plan B's benefits, this transfer would also not involve section 414(l). This is so because Plan B was a separate plan before the entire transaction and because no plan assumed liabilities or obtained assets from another plan. If, on the other hand, Corporation A merged Plan A and Plan B at the time of the acquisition of Corporation B by deleting condition (2) above, then section 414(l) would apply both to the merger of Plan A and Plan B and to the spinoff of Plan B from the merged plan. The spinoff would have to satisfy the requirements of paragraph (n) of this section, even if the assets attributable to Plan A and Plan B were separately accounted for in order to allocate funding costs.

(2) *Multiemployer plans.* Except to the extent provided by regulations of the Pension Benefit Guaranty Corporation, section 114(l) does not apply to any transaction to the extent that participants either before or after that transaction are covered under a multiemployer plan within the meaning of section 414(f). Until these regulations are issued, section 414(l) does not apply to any of the following situations:

- (i) A multiemployer plan is split into two or more plans, one or more of which are not multiemployer plans, or
- (ii) A single employer plan is merged into a multiemployer plan.

Therefore, if some (but not all) of the participants in a single employer plan become participants in a multiemployer plan under an agreement in which the multiemployer plan assumes all the liabilities of the single employer plan with respect to these participants and in which some or all of the assets of the single employer plan are transferred to the multiemployer plan, section 414(l) applies, but only with respect to the participants in the single employer plan who did not transfer to the multiemployer plan.

(d) *Merger of defined contribution plans.* In the case of a merger of two or more defined contribution plans, the requirements of section 414(l) will be satisfied if all of the following conditions are met:

(1) The sum of the account balances in each plan equals the fair market value (determined as of the date of the merger) of the entire plan assets.

(2) The assets of each plan are combined to form the assets of the plan as merged.

(3) Immediately after the merger, each participant in the plan as merged has an account balance equal to the sum of the account balances the participant had in the plans immediately prior to merger.

(e) *Merger of defined benefit plans—(1) General rule.* Section 414(l) compares the benefits on a termination basis before and after the merger. If the sum of the assets of all plans is not less than the sum of the present values of the accrued benefit (whether or not vested) of all plans, the requirements of section 414(l) will be satisfied merely by combining the assets and preserving each participant's accrued benefits. This is so because all the accrued benefits of the plan as merged are provided on a termination basis by the plan as merged. However, if the sum of the assets of all plans is less than the sum of the present values of the accrued benefits (whether or not vested) in all plans, the accrued benefits in the plan as merged are not provided on a termination basis.

(2) *Special schedule of benefits.* Generally, for some participants, the benefits provided on a termination basis for the plan as merged would be different from the benefits provided on a termination basis in the plans prior to merger if the assets were merely combined and if each participant retained his accrued benefit. Some participants would, therefore, receive greater benefits on a termination basis as a result of the merger and some other participants would receive smaller benefits. Accordingly, the requirements of section 414(l) would not be satisfied unless the distribution on termination were modified in some manner to prevent any participant from receiving smaller benefits on a termination basis as a result of the merger. This is accomplished through modifying the application of section 4044 of ERISA by inserting a special schedule of benefits.

(f) *Operational rules for the special schedule.* The application of section 4044 of ERISA as modified by the schedule of benefits is accomplished by the following steps:

(1) Section 4044 is applied in the plan as merged through the priority categories fully satisfied by the assets of the lower funded plan immediately prior to the merger.

(2) The assets in the plan as merged are then allocated to the next priority category as a percentage of the value of the benefits that would otherwise be allocated to that priority category. That percentage is the ratio of (i) the assets allocated to the first priority category not fully satisfied by the lower funded plan immediately prior to the merger to (ii) the assets that would have been allocated had that priority category been fully satisfied.

(3) A schedule of benefits is formed listing participants and scheduled accrued benefits. The scheduled accrued benefit is the excess of the benefits provided on a termination basis with respect to any participant from the plans immediately prior to the merger, over the benefits provided on a termination basis in subparagraphs (1) and (2) of this paragraph immediately after the merger. After allocating the assets in accordance with subparagraph (2) of this paragraph, the assets are allocated to the schedule of benefits as follows:

(i) First the assets are allocated to the scheduled benefits to the extent that the participant would have benefits provided in subparagraph (4) of this paragraph if there were no scheduled benefits.

(ii) Then the assets are allocated to the scheduled benefits to the extent that the participant would have benefits provided pursuant to subparagraph (5) of this paragraph if there were no scheduled benefits.

These assets should be allocated first to those scheduled benefits that are in the highest priority category under section 4044.

(4) The assets are then allocated to those benefits in the priority category described in subparagraph (2) of this paragraph with respect to which assets were not allocated. This allocation is made to the extent that these benefits are not associated with benefits in the schedule.

(5) Finally, the assets are allocated in accordance with section 4044 with respect to priority categories lower than the priority category described in subparagraph (4) of this paragraph. This allocation is made to the extent that these benefits are not associated with benefits in the schedule.

(g) *Successive mergers—(1) In general.* In the case of a current merger of a defined benefit plan with another defined benefit plan which as a result of a previous merger has a special schedule, the rules of paragraphs (e) and (f) of this section apply as if the schedule were considered a category described in section 4044 of ERISA. Thus, a second schedule may be formed as a result of the current merger. The second schedule will be inserted in the priority category of section 4044 described in paragraph (f)(2) of this section as of the date of the current merger. This priority category may be higher, lower, or within the schedule of benefits existing on account of a previous merger. If this priority schedule is inserted within a schedule of benefits, a new single schedule of benefits replacing the old schedule of benefits would in effect be created.

(2) *Allocation of assets.* Assets in the new schedule of benefits are allocated as follows:

(i) First to the benefits remaining in the old schedule to the extent that there are assets immediately prior to the second merger to satisfy the original benefits,

(ii) Then to the benefits provided on a termination basis from the plans immediately prior to the second merger to the extent that they are not provided before the schedule after the second merger or in subdivision (i) of this subparagraph,

(iii) Then to benefits remaining in the original schedule not included in subdivision (i) of this subparagraph.

(h) *De minimis rule for merger of defined benefit plan*—(1) *In general.* In the case of a merger of a defined benefit plan (“smaller plan”) whose liabilities (i.e., the present value of accrued benefits, whether or not vested) are less than 3 percent of the assets of another defined benefit plan (“larger plan”) as of at least one day in the larger plan’s plan year in which the merger of the two plans occurs, section 414(l) will be deemed to be satisfied if the following condition is met. The condition requires that a special schedule of benefits (consisting of all the benefits that would be provided by the smaller plan on a termination basis just prior to the merger) be payable in a priority category higher than the highest priority category in section 4044 of ERISA. Assets will be allocated to that schedule in accordance with the allocation of assets to scheduled benefits in paragraph (f)(3) of this section.

(2) *Application to a series of mergers.* In the case of a series of such mergers in a given plan year of the larger plan, the rule described in subparagraph (1) of this paragraph will apply only if the sum of the liabilities (whether or not vested) assumed by the larger plan are less than 3 percent of the assets of the larger plan as of at least one day in the plan year of the larger plan in which the mergers occurred.

(3) *Application to a merger occurring over more than one plan year.* In the case of a merger of a smaller plan or a portion thereof with a larger plan designed to occur in steps over more than one plan year of the larger plan, the entire transaction will be deemed to occur in the plan year of the larger plan which contains the first of these steps.

(4) *Liabilities of the smaller plan.* For purposes of subparagraphs (2) and (3) of this paragraph, mergers satisfying paragraphs (e), (f) or (g) of this section will be ignored in determining the sum of the liabilities assumed by the larger plan.

(i) *Data maintenance*—(1) *Alternative to the special schedule.* In the case of a merger which would require the creation of a special schedule in order to satisfy section 414(l), the schedule need not be created at the time of the merger if data sufficient to create the schedule is maintained. The schedule would only have to be created in the event of a subsequent plan termination or a subsequent spinoff. In that case the schedule must be determined as of the date of the merger.

(2) *Required data.* The data that must be maintained depends on the plan, and care should be taken to ensure that all necessary data is maintained. Furthermore, in order to take advantage of the data maintenance alternative provided in this paragraph, an enrolled actuary must certify to the plan administrator that each element of data necessary to determine the schedule as of the date of the merger is maintained. This certification must be based either upon the enrolled actuary’s independent examination of the data, or upon his reliance, which under the circumstances of the particular situation must be reasonable, upon a written statement of the plan administrator concerning what data is actually being maintained.

(j) *Five year rule*—(1) *Limitation on the required use of the special schedule.* A plan will not fail to satisfy the requirements of section 414(l) merely because the effects of the special schedule created pursuant to paragraphs (e)(2) or (h) of this section are ignored 5 years after the date of a merger. Furthermore, the date maintained pursuant to paragraph (i) of this section need not be maintained for more than 5 years after the merger, if the plan does not have a spinoff or a termination within 5 years.

(2) *Illustration.* If Plans A and B merge to form Plan AB and if Plan AB merges with Plan C 3 years later to form Plan ABC and if Plan ABC terminates 4 years later, the data relating to

Internal Revenue Service, Treasury

§ 1.414(l)-1

the merger of Plans A and B need not be maintained for more than 5 years after the merger of Plans A and B. In addition, after 5 years have elapsed after the merger of Plans A and B, the effect of any special schedule created by the merger of Plans A and B on the schedule created by the merger of Plans AB and C may be ignored in determining the later schedule.

(k) *Examples.* The provisions of paragraphs (e) through (j) of this section may be illustrated by the following examples:

Example 1. Plan A, whose assets are \$220,000, is to be merged with Plan B, whose assets are \$200,000. Plan A has three employees. Plan B has two employees. If Plans A and B were to terminate just prior to the merger, the benefits provided on a termination basis would be as follows:

PLAN A

Priority category of section 4044 of ERISA	(1)—Annual accrued benefits			(2)—Present value of accrued benefits			(3)—Fair market value of assets allocated to priority category	(4)—Benefits on a termination basis		
	EE ₁	EE ₂	EE ₃	EE ₁	EE ₂	EE ₃		EE ₁	EE ₂	EE ₃
3	\$10,000			\$120,000			\$120,000	\$10,000		
4	2,000	\$4,000		24,000	\$44,000		68,000	2,000	\$4,000	
5		3,000	\$4,000		33,000	\$40,000	32,000		¹ 1,315	² \$1,753
6			1,000			10,000				
Total							220,000	12,000	5,315	1,753

¹ \$3,000×\$32,000÷\$73,000 i.e. accrued benefit × assets available for priority category 5—Total present value of accrued benefits in category 5.
² \$4,000×\$32,000÷\$73,000.

PLAN B

Priority category of section 4044 of ERISA	(1)—Annual accrued benefits					(2)—Present value of accrued benefits					(3)—Fair market value of assets allocated to priority category	(4)—Benefits on a termination basis				
	EE ₁	EE ₂	EE ₃	EE ₄	EE ₅	EE ₁	EE ₂	EE ₃	EE ₄	EE ₅		EE ₁	EE ₂	EE ₃	EE ₄	EE ₅
3				\$15,000					\$195,000		\$195,000				\$15,000	
4					\$5,000					\$50,000	5,000					¹ \$500
5					8,000					80,000						
Total											200,000				15,000	500

¹ \$5,000÷\$5,000×\$50,000.

Internal Revenue Service, Treasury

§ 1.414(l)-1

Because Plan B's assets are exhausted in a higher priority category than Plan A's assets, Plan B is the lower funded plan. A schedule will, therefore, be inserted in Priority Category 4 of the plan as merged after

providing 10% of the benefits provided in category 4, i.e. the ratio of \$5,000 assets in Plan B allocated to category 4 to the \$50,000 liability in category 4. The schedule would be constructed as follows:

EE	(1)—Benefits on a termination basis before merger	(2)—Benefits provided from priority categories higher than Category 4	(3)—10% of benefits provided in priority Category 4	(4)—Benefits provided before schedule (2) + (3)	(5)—Schedule of benefits (1) - (4)
1	\$12,000	\$10,000	\$200	\$10,200	\$1,800
2	5,315		400	400	4,915
3	1,753				1,753
4	15,000	15,000		15,000	
5	500		500	500	

Example 2. The facts are the same as in Example 1. The plan, however, terminates one year later. Furthermore, no employee has accrued additional benefits during the year except that the \$2,000 benefit for EE₁, that

was originally in category 4 is now in category 3. The assets would be allocated to the priority categories to the extent that there are assets to cover the following benefits.

Priority termination category	EE ₁	EE ₂	EE ₃	EE ₄	EE ₅
3	\$12,000			\$15,000	
10% of 4		\$400			\$500
Schedule of benefits included in balance of Category 4		3,600			
Schedule of benefits included in Category 5		1,315	\$1,753		
Schedule of benefits included in Category 6					
Balance of Category 4 not included in schedule					4,500
Balance of Category 5 not included in schedule		1,685	2,247		8,000
Balance of Category 6 not included in schedule			1,000		

(l) *Merger of defined benefit and defined contribution plan.* In the case of a merger of a defined benefit plan with a defined contribution plan, one of the plans before the merger should be converted into the other type of plan (i.e., the defined benefit converted into a defined contribution or the defined contribution converted into a defined benefit) and either paragraph (d) or paragraphs (e) through (j) of this section, whichever is appropriate, should be applied.

(m) *Spinoff of a defined contribution plan.* In the case of a spinoff of a defined contribution plan, the requirements of section 414(l) will be satisfied if after the spinoff—

(1) The sum of the account balances for each of the participants in the resulting plans equals the account balance of the participant in the plan before the spinoff, and

(2) The assets in each of the plans immediately after the spinoff equals the sum of the account balances for all participants in that plan.

(n) *Spinoff of a defined benefit plan—*
(1) *General rule.* In the case of a spinoff of a defined benefit plan, the requirements of section 414(l) will be satisfied if—

(i) All of the accrued benefits of each participant are allocated to only one of the spun off plans, and

(ii) The value of the assets allocated to each of the spun off plans is not less than the sum of the present value of the benefits on a termination basis in the plan before the spin off for all participants in that spun off plan.

(2) *De minimis rule.* In the case of a spin off the requirements of section 414(l) will be deemed to be satisfied if the value of the assets spun off—

(i) Equals the present value of the accrued benefits spun off (whether or not vested), and

(ii) In conjunction with other assets spun off during the plan year in which the spinoff occurs in accordance with this subparagraph, is less than 3 percent of the assets as of at least one day in that year.

§ 1.414(q)-1

26 CFR Ch. I (4-1-08 Edition)

Spinoffs occurring in previous or subsequent plan years are ignored if they are not part of a single spinoff designed to occur in steps over more than one plan year.

(3) *Special temporary rule.* In the case of a defined benefit plan maintained for different groups of employees, which is a single plan (as defined in paragraph (b)(1) of this section) and under which there has been separate accounting of assets for each group, a spinoff of the plan on or before July 1, 1978, into a separate plan for each group will be deemed to satisfy section 414 (l) if—

(i) All the liabilities with respect to each group of employees are allocated to a separate plan for that group of employees, and

(ii) The assets that are separately accounted for with respect to each group of employees are allocated to the separate plan for that group of employees. For purposes of this subparagraph, a separate accounting of assets will not be considered to have occurred to the extent that the assets allocated to each single plan are determined by an historical re-creation of benefits, contributions, investment gains, etc.

(o) *Transfers of assets or liabilities.* Any transfer of assets or liabilities will for purposes of section 414 (l) be considered as a combination of separate mergers and spinoffs using the rules of paragraphs (d), (e) through (j), (l), (m), or (n) of this section, whichever is appropriate. Thus, for example, if in accordance with the transfer of one or more employees, a block of assets and liabilities are transferred from Plan A to Plan B, each of which is a defined benefit plan, the transaction will be considered as a spinoff from Plan A and a merger of one of the spinoff plans with Plan B. The spinoff and merger described in the previous sentence would be subject to the requirements of paragraphs (n) and (e) through (j) of this section respectively.

[T.D. 7638, 44 FR 48195, Aug. 17, 1979]

§ 1.414(q)-1 Highly compensated employee.

Q&A-1—Q&A-8: [Reserved]. See § 1.414(q)-1T, Q&A-1 through Q&A-8 for further guidance.

Q-9: How is the top-paid group determined?

A-9: (a) [Reserved]. See § 1.414(q)-1T, Q&A-9(a) for further guidance.

(b) *Number of employees in the top-paid group—(1) Exclusions.* The number of employees who are in the top-paid group for a year is equal to 20 percent of the total number of active employees of the employer for such year. However, solely for purposes of determining the total number of active employees in the top-paid group for a year, the employees described in § 1.414(q)-1T, A-9(b)(1) (i), (ii) and (iii)(B) are disregarded. Paragraph (g) of this A-9 provides rules for determining those employees who are excluded for purposes of applying section 414(r)(2)(A), relating to the 50-employee requirement applicable to a qualified separate line of business.

(i)-(iii) [Reserved]. See § 1.414(q)-1T, Q&A-9(b)(1) (i) through (iii) for further guidance.

(2) *Alternative exclusion provisions—(i)-(ii)* [Reserved]. See § 1.414(q)-1T, Q&A-9(b)(2) (i) and (ii) for further guidance.

(iii) *Method of election.* The elections in this paragraph (b)(2) must be provided for in all plans of the employer and must be uniform and consistent with respect to all situations in which the section 414(q) definition is applicable to the employer. Thus, with respect to all plan years beginning in the same calendar year, the employer must apply the test uniformly for purposes of determining its top-paid group with respect to all its qualified plans and employee benefit plans. If either election is changed during the determination year, no recalculation of the look-back year based on the new election is required, provided the change in election does not result in discrimination in operation.

(c)-(f) [Reserved]. See § 1.414(q)-1T, Q&A-9 (c) through (f) for further guidance.

(g) *Excluded employees under section 414(r)(2)(A)—(1) In general.* This paragraph (g) provides the rules for determining which employees are excluded employees for purposes of applying section 414(r)(2)(A), relating to the 50-employee requirement applicable to a qualified separate line of business.

(2) *Excluded employees*—(i) *Age and service exclusion.* All employees are excluded who are described in § 1.414(q)-1T, A-9(b)(1)(i) (relating to exclusions based on age or service). For this purpose, the rules in § 1.414(q)-1T, A-9 (e) and (f) (relating respectively to the 17½-hour rule and the 6-month rule) apply. However, the election in § 1.414(q)-1T, A-9(b)(2)(i) (permitting the employer to elect reduced minimum age or service requirements) does not apply.

(ii) *Nonresident alien exclusion.* All employees are excluded who are described in § 1.414(q)-1T, A-9(b)(1)(ii) (relating to the exclusion of nonresident aliens with no U.S.- source income from the employer).

(iii) *Inclusion of employees covered under a collective bargaining agreement.* All employees are included who are described in § 1.414(q)-1T, A-9(b)(1)(iii)(A) (relating to employees covered under a collective bargaining agreement) and who are not otherwise described in paragraph (g)(2) (i) or (ii) of this A-9. For this purpose, the exclusion in § 1.414(q)-1T, A-9(b)(1)(iii)(B) and the related election in § 1.414(q)-1T, A-9(b)(2)(ii) do not apply.

(3) *Applicable period.* The determination of which employees are excluded employees is made on the basis of the testing year specified in the regulations under section 414(r) and not on the basis of the determination year or the look-back year under section 414(q).

(h) *Effective date.* The provisions of this A-9 apply to plan years and testing years beginning on or after January 1, 1994.

Q&A-10 through Q&A-15: [Reserved]. See § 1.414(q)-1T, Q&A-10 through Q&A-15 for further guidance.

[T.D. 8548, 59 FR 32915, June 27, 1994]

§ 1.414(q)-1T Highly compensated employee (temporary).

The following questions and answers relate to the definition of “highly compensated employee” provided in section 414(q). The definitions and rules provided in these questions and answers are provided solely for purposes of determining the group of highly compensated employees.

TABLE OF CONTENTS.

Q&A-1	General applicability of section 414(q).
Q&A-2	Definition of highly compensated employees.
Q&A-3	Definition of highly compensated active employees.
Q&A-4	Definition of highly compensated former employees.
Q&A-5	Definition of separation year.
Q&A-6	Definition of employer.
Q&A-7	Definition of employee.
Q&A-8	Definition of 5-percent owner.
Q&A-9	Definition of top-paid group.
Q&A-10	Definition of officer and rules on inclusion of officers in highly compensated group.
Q&A-11	Rules with respect to family aggregation.
Q&A-12	Definition of family member.
Q&A-13	Definition of compensation.
Q&A-14	Rules with respect to the relevant determination periods.
Q&A-15	Transition rule applicable to plan years beginning in 1987 and 1988 for certain employers that have plans that must comply with the provisions of section 401(k)(3) or 401(m)(2).

Q-1: To what employee benefit plans and statutory provisions is the definition of highly compensated employee contained in section 414(q) applicable?

A-1: (a) *In general.* This definition is applicable to statutory provisions that incorporate the definition by reference.

(b) *Qualified retirement plans*—(1) *In general.* Generally, this definition is incorporated in many of the nondiscrimination requirements applicable to pension, profit-sharing, and stock bonus plans qualified under section 401(a). See, e.g., the nondiscrimination provisions of sections 401(a) (4) and (5), 401(k)(3), 401(l), 401(m), 406(b), 407(b), 408(k), 410(b) and 411(d)(1). The definition is also incorporated by certain other provisions with respect to such plans, including the aggregation rules of section 414(m) and section 4975 (tax on prohibited transactions).

(2) *Not applicable where not incorporated by reference.* This definition is not applicable to qualified plan provisions that do not incorporate it. See, e.g., section 415 (limitations on contributions and benefits), with the exception of section 415(c)(3)(C) and 415(c)(6) (special rules for permanent and total disability and employee stock ownership plans respectively).

(c) *Other employee benefit plans or arrangements.* This definition is incorporated by various sections relating to employee benefit provisions. See, e.g., section 89 (certain other employee benefit plans), section 106 (accident and health plans), 117(d) (qualified tuition reduction), section 125 (cafeteria plans), section 129 (dependent care assistance programs), section 132 (certain fringe benefits), section 274 (certain entertainment, etc. expenses), section 423(b) (employee stock purchase plan provisions), section 501(c) (17) and (18) (certain exempt trusts providing benefits to employees), and section 505 (certain exempt organizations or trusts providing benefits to individuals). See the respective sections for the applicable effective dates.

(d) *ERISA.* This definition is not determinative with respect to any provisions of Title I of the Employee Retirement Income Security Act of 1974 (ERISA), unless it is explicitly incorporated by reference (e.g., section 408(b)(1)(B)).

Q-2: Who is a highly compensated employee?

A-2: The group of employees (including former employees) who are highly compensated employees consists of both highly compensated active employees (see A-3 of this § 1.414(q)-1T) and highly compensated former employees (see A-4 of this § 1.414(q)-1T). In many circumstances, highly compensated active employees and highly compensated former employees are considered separately in applying the provisions for which the definition of highly compensated employees in section 414(q) is applicable. Specific rules with respect to the treatment of highly compensated active employees and highly compensated former employees will be provided in the regulations with respect to the sections to which the definition of highly compensated employees is applicable.

Q-3: Who is a highly compensated active employee?

A-3: (a) *General rule.* For purposes of the year for which the determination is being made (the determination year), a highly compensated active employee is any employee who, with respect to the employer, performs services during the determination year and is described in

any one or more of the following groups applicable with respect to the look-back year calculation and/or determination year calculation for such determination year. See A-14 for rules relating to the periods for which the look-back year calculation and determination year calculation are to be made.

(1) *Look-back year calculation.*

(i) *5-percent owner.* The employee is a 5-percent owner at any time during the look-back year (i.e., generally, the 12-month period immediately preceding the determination year; see A-14. (See A-8 of this § 1.414(q)-1T.)

(ii) *Compensation above \$75,000.* The employee receives compensation in excess of \$75,000 during the look-back year.

(iii) *Compensation above \$50,000 and top-paid group.* The employee receives compensation in excess of \$50,000 during the look-back year and is a member of the top-paid group for the look-back year. (See A-9 of this § 1.414(q)-1T.)

(iv) *Officer.* The employee is an "includible officer" during the look-back year. (See A-10 of this § 1.414(q)-1T.)

(2) *Determination year calculation.*

(i) *5-percent owner.* The employee is a 5-percent owner at any time during the determination year. (See A-8 of this § 1.414(q)-1T.)

(ii) *Top-100 employees.* The employee is both (A) described in paragraph (a)(1)(i), (ii) and/or (iv) of this A-3, when such paragraphs are modified to substitute the determination year for the look-back year, and (B) one of the 100 employees who receive the most compensation from the employer during the determination year.

(b) *Rounding and tie-breaking rules.* In making the look-back year and determination year calculations for a determination year, it may be necessary for an employer to adopt a rule for rounding calculations (e.g., in determining the number of employees in the top-paid group). In addition, it may be necessary to adopt a rule breaking ties among two or more employees (e.g., in identifying those particular employees who are in the top-paid group or who are among the 100 most highly compensated employees). In such cases, the employer may adopt any rounding or tie-breaking rules it desires, so long as

Internal Revenue Service, Treasury

§ 1.414(q)–1T

such rules are reasonable, nondiscriminatory, and uniformly and consistently applied.

(c) *Adjustments to dollar thresholds*—(1) *Indexing of dollar thresholds.* The dollar amounts in paragraph (a)(1) (i) and (ii) of this A–3 are indexed at the same time and in the same manner as the section 415(b)(1)(A) dollar limitation for defined benefit plans.

(2) *Applicable dollar threshold.* The applicable dollar amount for a particular determination year or look-back year is the dollar amount for the calendar year in which such determination year or look-back year begins. Thus, the dollar amount for purposes of determining the highly compensated active employees for a particular look-back year is based on the calendar year in which such look-back year begins, not the calendar year in which such look-back year ends or in which the determination year with respect to such look-back year begins.

(d) *Employees described in more than one group.* An individual who is a highly compensated active employee for a determination year, by reason of being described in one group in paragraph (a) of this A–3, under either the look-back year calculation or the determination year calculation, is not disregarded in determining whether another individual is a highly compensated active

employee by reason of being described in another group under paragraph (a). For example, an individual who is a highly compensated active employee for a determination year, by reason of being a 5-percent owner during such year, who receives compensation in excess of \$50,000 during both the look-back year and the determination year, is taken into account in determining the group of employees who are highly compensated active employees for such determination year by reason of receiving more than \$50,000, and being in the top-paid group under either or both the look-back year calculation or determination year calculation for such determination year.

(e) *Examples.* The following examples, in which the determination year and look-back year are the calendar year, are illustrative of the rules in paragraph (a) of this A–3. For purposes of these examples, the threshold dollar amounts in paragraph (a)(1) (ii) and (iii) of this A–3 are not increased pursuant to paragraph (c) of this A–3.

Example 1. Employee A, who is not at any time a 5-percent owner, an officer, or a member of the top-100 within the meaning of paragraph (a)(1) (i), or (iv), or (a)(2) (i) or (ii), but who was a member of the top-paid group for each year, is included in or excluded from the highly compensated groups as specified below for the following years:

Year	Compensation	Status	Comments
1986	\$45,000	N/A	Although prior to 414(q) effective date, 1986 constitutes the look-back year for purposes of determining the highly compensated group for the 1987 determination year.
1987	80,000	Excl	Excluded because A was not an employee described in paragraph (a)(1) (ii) or (iii) of this A–3 for the look-back year (1986).
1988	80,000	Incl	Included because A was an employee described in paragraph (a)(1) (ii) or (iii) of this A–3 for the look-back year (1987).
1989	45,000	Incl	Included because A was an employee described in paragraph (a)(1) (ii) or (iii) of this A–3 for the look-back year (1988).
1990	45,000	Excl	Excluded because A was not an employee described in paragraph (a)(1) (ii) or (iii) of this A–3 for the look-back year (1989).

Example 2. Assuming the same facts as those given in *Example 1*, except that A is a member of the top-100 employees within the

meaning of paragraph (a)(2)(ii) of this A–3 for the 1987 year and 1990 year, the results are as follows:

Year	Compensation	Status	Comments
1986	\$45,000	N/A	Although prior to 414(q) effective date, 1986 constitutes the look-back year for purposes of determining the highly compensated group for the 1987 determination year.
1987	80,000	Incl	Included because A was an employee described in paragraph (a)(1)(ii) or (iii) of this A–3 for the determination year (1987) and was described in paragraph (a)(2)(ii) of this A–3 in that year.

§ 1.414(q)–1T

26 CFR Ch. I (4–1–08 Edition)

Year	Compensation	Status	Comments
1988	80,000	Incl	Included because A was an employee described in paragraph (a)(1)(ii) or (iii) of this A–3 for the look-back year (1987).
1989	45,000	Incl	Included because A was an employee described in paragraph (a)(1)(ii) or (iii) of this A–3 for the look-back year (1988).
1990	45,000	Excl	Excluded even though in top-100 employees during 1990 determination year because A was not an employee described in paragraph (a)(1)(ii) or (iii) of this A–3 for the look-back year (1989) or for the determination year (1990).

A–4: Who is a highly compensated former employee?

Q–4: (a) *General rule.* Except to the extent provided in paragraph (d) of this A–4, a highly compensated former employee for a determination year is any former employee who, with respect to the employer, had a separation year (as defined in A–5 of this § 1.414(q)–1T) prior to the determination year and was a highly compensated active employee as defined in A–3 of this § 1.414(q)–1T for either such employee’s separation year or any determination year ending on or after the employee’s 55th birthday. Thus, for example, an employee who is a highly compensated active employee for such employee’s separation year, by reason of receiving over \$75,000 during the look-back year, is a highly compensated former employee for determination years after such employee’s separation year.

(b) *Special rule for employees who perform no services for the employer in the determination year.* For purposes of this rule, employees who perform no services for an employer during a determination year are treated as former employees. Thus, for example, an employee who performed no services for the employer during a determination year, by reason of a leave of absence during such year, is treated as a former employee for such year.

(c) *Dollar amounts for pre-1987 determination years.* For determination years beginning before January 1, 1987, the dollar amounts in paragraph (a)(1)(B) and (C) of A–2 of this § 1.414(q)–1T are \$75,000 and \$50,000 respectively.

(d) *Special rule for employees who separated from service before January 1, 1987—(1) Election of special rule.* Employers may elect to apply paragraph (d)(2) of this A–4 in lieu of paragraph (a) of this A–4 in determining whether former employees who separated from service prior to January 1, 1987, are highly compensated former employees.

If this election is made with respect to any qualified plan, it must be provided for in the plan. If the employer makes this election with respect to any employee benefit plan, such election must be used uniformly for all purposes for which the section 414(q) definition is applicable. The election, once made, cannot be changed without the consent of the Commissioner.

(2) *Special definition of highly compensated former employee.* A highly compensated former employee includes any former employee who separated from service with the employer prior to January 1, 1987, and was described in any one or more of the following groups during either the employee’s separation year (or the year preceding such separation year) or any year ending on or after such individual’s 55th birthday (or the last year ending before such employee’s 55th birthday):

(i) *5-percent owner.* The employee was a 5-percent owner of the employer at any time during the year.

(ii) *Compensation amount.* The employee received compensation in excess of \$50,000 during the year.

The determinations provided for in this paragraph (b)(2) may be made on the basis of the calendar year, the plan year, or any other twelve month period selected by the employer and applied on a reasonable and consistent basis.

(e) *Rules with respect to former employees—(1) In general.* For specific provisions with respect to the treatment of former employees and of highly compensated former employees, refer to the rules with respect to which the section 414(q) definition of highly compensated employee is applicable.

(2) *Former employees excluded in determining top-paid group, top-100 employees and includible officers.* Former employees are not included in the top-paid group, the group of the top-100 employees, or the group of includible officers for purposes of applying section 414(q)

to active employees. In addition, former employees are not counted as employees for purposes of determining the number of employees in the top-paid group.

Q-5: What is a separation year for purposes of section 414(q)?

A-5: (a) *Separation year*—(1) *In general*. The separation year generally is the determination year during which the employee separates from service with the employer. For purposes of this rule, an employee who performs no services for the employer during a determination year will be treated as having separated from service with the employer in the year in which such employee last performed services for the employer. Thus, for example, an employee who performs no services for the employer by reason of being on a leave of absence throughout the determination year is considered to have separated from service with the employer in the year in which such employee last performed services prior to beginning the leave of absence.

(2) *Deemed separation*. An employee who performs services for the employer during a determination year may be deemed to have separated from service with the employer during such year pursuant to the rules in paragraph (a)(3) of this A-5. Such deemed separation year is relevant for purposes of determining whether such employee is a highly compensated former employee after such employee actually separates from service, not for purposes of identifying such employee as either an active or former employee. Because employees to whom the provisions of paragraph (a)(2) of this A-5 apply are still performing services for the employer during the determination year, they are treated as active employees. Thus, for example, an employee who has a deemed separation year in 1989, a year during which he was a highly compensated employee, who continues to work for the employer until he retires from employment in 1995, is an active employee of the employer until 1995 and is either highly compensated or not highly compensated for any determination year during such period based on the rules with respect to highly compensated active employees. For determination years after the year of

such employee's retirement, such employee is a highly compensated former employee because such employee was a highly compensated active employee for the deemed separation year.

(3) *Deemed separation year*. An employee will be deemed to have a separation year if, in a determination year prior to attainment of age 55, the employee receives compensation in an amount less than 50% of the employee's average annual compensation for the three consecutive calendar years preceding such determination year during which the employee received the greatest amount of compensation from the employer (or the total period of the employee's service with the employer, if less).

(4) *Leave of absence*. The deemed separation rules contained in paragraph (a)(2) and (3) of this A-5 apply without regard to whether the reduction in compensation occurs on account of a leave of absence.

(b) *Deemed resumption of employment*. An employee who is treated as having a deemed separation year by reason of the provisions of paragraph (a) of this A-5 will not be treated as a highly compensated former employee (by reason of such deemed separation year) after such employee actually separates from service with the employer if, after such deemed separation year, and before the year of actual separation, such employee's services for and compensation from the employer for a determination year increase significantly so that such employee is treated as having a deemed resumption of employment. The determination of whether an employee who has incurred a deemed separation year has an increase in services and compensation sufficient to result in a deemed resumption of employment will be made on the basis of all the surrounding facts and circumstances pertaining to each individual case. At a minimum, there must be an increase in compensation from the employer to the extent that such compensation would not result in a deemed separation year under the tests in paragraph (a)(2) of this A-5 using the same three-year period taken into account in such paragraph.

§ 1.414(q)-1T

26 CFR Ch. I (4-1-08 Edition)

(c) *Examples.* Paragraphs (a) and (b) of this A-5 are illustrated by the following examples based on calendar years. For purposes of these examples the threshold dollar amounts in A-5(a) of this § 1.414(q)-1T have not been increased pursuant to A-5(b) of this § 1.414(q)-1T.

Example 1. Assume that in 1990 A is a highly compensated employee of X by reason of having earned more than \$75,000 during the 1989 look-back year. In 1987, 1988 and 1989, A's years of greatest compensation received from X, A received \$76,000, \$80,000 and \$79,000 respectively. In February of 1990, A received \$30,000 in compensation. Because A's compensation during the 1990 determination year is less than 50% of A's average annual compensation from X during A's high three prior determination years, A is deemed to have a separation year during the 1990 determination year pursuant to the provisions of paragraph (a) of this A-5. Since A is a highly compensated employee for X in 1990, A's deemed separation year, A will be treated as a highly compensated former employee after A actually separates from service with the employer unless A experiences a deemed resumption of employment within the meaning of paragraph (b) of this A-5.

Example 2. Assume that in 1990 A is a highly compensated employee by reason of having been an officer (with annual compensation in excess of the section 415(c)(1)(A) dollar limitation) during the 1989 look-back year. A's compensation from X during 1990 is \$37,000. A's average compensation from X for the three-year period ending with or within January, 1990, was \$60,000. A's compensation during the 1990 determination year is not less than 50% of the compensation earned during the test period. Therefore, A is not deemed to have a separation year under paragraph (a)(2)(i) of this A-5.

Example 3. Assume that in 1990 C is 35 and a highly compensated employee of Z for the reasons given in *Example 1* with the same compensation set forth in that example. During 1990, C leaves C's 40 hour a week position as director of the actuarial division of Z and starts working as an actuary for the same division, producing actuarial reports approximately 15 to 20 hours a week, approximately half of these hours at home. C contemplates returning to full-time employment with Z when C's child enters school. During the 1990 determination year, C's compensation is less than 50% of C's compensation during her high three preceding determination years. Therefore, C has a deemed separation year during the 1990 determination year. In 1991 C commences working 32 hours a week for X at X's place of business and receives compensation in an amount equal to 80 percent of her average annual compensation during her

high three prior determination years. The C's increased compensation, considered in conjunction with the reasons for the reduction in service, the nature and extent of the services performed before and after the reduction in services, and the lack of proximity of C's age to age 55 at the time of the reduction are sufficient to establish that C has a deemed resumption of employment within the meaning of paragraph (b) of this A-5. Therefore, when C separates from service with the employer, C will not be treated as a highly compensated former employee by reason of C's deemed separation year in 1990.

Q-6: Who is the employer?

A-6: (a) *Aggregation of certain entities.* The employer is the entity employing the employees and includes all other entities aggregated with such employing entity under the aggregation requirements of section 414(b), (c), (m) and (o). Thus, the following entities must be taken into account as a single employer for purposes of determining the employees who are "highly compensated employees" within the meaning of section 414(q):

(1) All corporations that are members of a controlled group of corporations (as defined in section 414(b)) that includes the employing entity.

(2) All trades or businesses (whether or not incorporated) that are under common control (as defined in section 414(c)) which group includes the employing entity.

(3) All organizations (whether or not incorporated) that are members of an affiliated service group (as defined in section 414(m)) that includes the employing entity.

(4) Any other entities required to be aggregated with the employing entity pursuant to section 414(o) and the regulations thereunder.

(b) *Priority of aggregation provisions.* The aggregation requirements of paragraph (a) of this A-6 and of A-7(b) of this section with respect to leased employees are applied before the application of any of the other provisions of section 414(q) and this section.

(c) *Line of business rules.* The section 414(r) rules with respect to separate lines of business are not applicable in determining the group of highly compensated employees.

Q-7: Who is an employee for purposes of section 414(q)?

A–7: (a) *General rule.* Except as provided in paragraph (b) of this A–7, the term “employee” for purposes of section 414(q) refers to individuals who perform services for the employer and are either common-law employees of the employer or self-employed individuals who are treated as employees pursuant to section 401(c)(1). This rule with respect to the inclusion of certain self-employed individuals in the group of highly compensated employees is applicable whether or not such individuals are eligible to participate in the plan or benefit arrangement being tested.

(b) *Leased employees—(1) In general.* The term “employee” includes a leased employee who is treated as an employee of the recipient pursuant to the provisions of section 414(n)(2) or 414(o)(2). Employees that an employer treats as leased employees under section 414(n), pursuant to the requirements of section 414(o), are considered to be leased employees for purposes of this rule.

(2) *Safe-harbor exception.* For purposes of qualified retirement plans, if an employee who would be a leased employee within the meaning of section 414(n)(2) is covered in a safe-harbor plan described in section 414(n)(5) (a qualified money purchase pension plan maintained by the leasing organization), and not otherwise covered under a qualified retirement plan of the employer, then such employee is excluded from the term “employee” unless the employer elects to include such employee pursuant to the provisions of paragraph (4) of this paragraph (b).

(3) *Other employee benefit plans.* The exception in paragraph (b)(2) of this A–7 is not applicable to the determination of the highly compensated employee group for purposes of the sections enumerated in section 414(n)(3)(C). Thus, for example, a leased employee covered by a safe-harbor plan is considered to be an employee in applying the non-discrimination provisions of section 89 to statutory benefit plans. Consequently, an employer with leased employees covered in a safe-harbor plan may have 2 groups of highly compensated employees, one with respect to its retirement plans and another

with respect to its statutory benefit plans.

(4) *Election with respect to leased employee exclusion.* An employer may elect to include the employees excepted under the provisions of paragraph (b)(2) of this A–7 in determining the highly compensated group with respect to an employer’s retirement plans. Thus, for example, by electing to forego the exception in paragraph (b)(2) of this A–7, an employer may achieve more uniform highly compensated employee groups for purposes of its retirement plans and welfare benefit plans. The election to include such employees must be made on a reasonable and consistent basis and must be provided for in the plan.

Q–8: Who is a 5-percent owner of the employer?

A–8: An employee is a 5-percent owner of the employer for a particular year if, at any time during such year, such employee is a 5-percent owner as defined in section 416(i)(B)(i) and § 1.416–1 A T–17&18. Thus, if the employer is a corporation, a 5-percent owner is any employee who owns (or is considered as owning within the meaning of section 318) more than 5 percent of the value of the outstanding stock of the corporation or stock possessing more than 5 percent of the total combined voting power of all stock of the corporation. If the employer is not a corporation, a 5-percent owner is any employee who owns more than 5 percent of the capital or profits interest in the employer. The rules of subsections (b), (c), and (m) of section 414 do not apply for purposes of determining who is a 5-percent owner. Thus, for example, an individual who is a 5-percent owner of a subsidiary corporation that is part of a controlled group of corporations within the meaning of section 414(b) is treated as a 5-percent owner for purposes of these rules.

Q–9: How is the “top-paid group” determined?

A–9: (a) *General rule.* An employee is in the top-paid group of employees for a particular year if such employee is in the group consisting of the top 20 percent of the employer’s employees when ranked on the basis of compensation received from the employer during such year. The identification of the

§ 1.414(q)-1T

26 CFR Ch. I (4-1-08 Edition)

particular employees who are in the top-paid group for a year involves a two-step procedure:

(1) The determination of the number of employees that corresponds to 20 percent of the employer's employees, and

(2) The identification of the particular employees who are among the number of employees who receive the most compensation during this year.

Employees who perform no services for the employer during a year are not included in making either of these determinations for such year.

(b) *Number of employees in the top-paid group*—(1) *Exclusions*. [Reserved]. See § 1.414(q)-1, Q&A-9(b)(1) for further information.

(i) *Age and service exclusion*. The following employees are excluded on the basis of age or service absent an election by the employer pursuant to the rules in paragraph (b)(2) of this A-9:

(A) Employees who have not completed 6 months of service by the end of such year. For purposes of this paragraph (A), an employee's service in the immediately preceding year is added to service in the current year in determining whether the exclusion is applicable with respect to a particular employee in the current year. For example, given a plan with a calendar determination year, if employee A commences work August 1, 1989, and terminates employment May 31, 1990, A may be excluded under this paragraph (b)(1)(i)(A) in 1989 because A completed only 5 months of service by December 31, 1989. However, A cannot be excluded pursuant to this rule in 1990 because A has completed 10 months of service, for purposes of this rule, by the end of 1990.

(B) Employees who normally work less than 17½ hours per week as defined in paragraph (d) of this A-9 for such year.

(C) Employees who normally work during less than 6 months during any year as defined in paragraph (e) of this A-9 for such year.

(D) Employees who have not had their 21st birthdays by the end of such year.

(ii) *Nonresident alien exclusion*. Employees who are nonresident aliens and who receive no earned income (within the meaning of section 911(d)(2)) from

the employer that constitutes income from sources within the United States (within the meaning of section 861(a)(3)) are excluded.

(iii) *Collective bargaining exclusion*—(A) *In general*. Except as provided in paragraph (B) of this paragraph (b)(1)(iii), employees who are included in a unit of employees covered by an agreement that the Secretary of Labor finds to be a collective bargaining agreement between employee representatives and the employer, which agreement satisfies section 7701(a)(46) and § 301.7701-17T (Temporary), are included in determining the number of employees in the top-paid group.

(B) *Percentage exclusion provision*. If 90 percent or more of the employees of the employer are covered under collective bargaining agreements that the Secretary of Labor finds to be collective bargaining agreements between employee representatives and the employer, which agreements satisfy section 7701(a)(46) and § 301.7701-17T (Temporary), and the plan being tested covers only employees who are not covered under such agreements, then the employees who are covered under such collective bargaining agreements are not counted in determining the number of noncollective bargaining employees who will be included in the top-paid group for purposes of testing such plan. In addition, such employees are not included in the top-paid group for such purposes. Thus, if the conditions of this paragraph (b)(1)(iii)(B) are satisfied, a separate calculation is required to determine the number and identity of noncollective bargaining employees who will be highly compensated employees by reason of receiving over \$50,000 and being in the top-paid group of employees for purposes of testing those plans that cover only noncollective bargaining employees.

(2) *Alternative exclusion provisions*—(i) *Age and service exclusion election*. An employer may elect, on a consistent and uniform basis, to modify the permissible exclusions set forth in paragraph (b)(1)(i) (A), (B), (C), and (D) of this A-9 by substituting any shorter period of service or lower age than that specified in such paragraph. These exclusions may be modified to substitute a zero service or age requirement.

(ii) *Election not to apply percentage exclusion provision.* An employer may elect not to exclude employees under the rules in paragraph (b)(1)(iii)(B) of this A-9.

(iii) *Method of election.* [Reserved]. See § 1.414(q)-1, Q&A-9(b)(2)(iii) for further information.

(c) *Identification of top-paid group members.* With the exception of the paragraph (b)(1)(iii) of this A-9 exclusion for certain employees covered by collective bargaining agreements, the exclusions in paragraph (b)(1) of this A-9 are not applicable for purposes of identifying the particular employees in the top-paid group. Thus, for example, even if an employee who normally works for less than 17½ hours is excluded in determining the number of employees in the top-paid group such employee may be a member of the top-paid group. Similarly, if during a determination year, employee A receives over \$75,000 and is one of the top-100 employees ranked by compensation, then employee A is a highly compensated active employee for such determination year. This is true even though employee A has worked less than six months and thus may be excluded in determining the number of persons in the top-paid group for the determination year.

(d) *Example.* Paragraphs (b) and (c) of this A-9 are illustrated by the following example:

Example. Employer X has 200 active employees during the 1989 determination year, 100 of whom normally work less than 17½ hours per week during such year and 80 of whom normally work less than 15 hours per week during such year. X elects to exclude all employees who normally work less than 15 hours per week in determining the number of employees in the top-paid group. Thus, X excludes 80 employees in determining the number of employees in the top-paid group. X's top-paid group for the 1989 determination year consists of 20% of 120 or 24 employees. All 200 of X's employees must then be ranked in order by compensation received during the year, and the 24 employees X paid the greatest amount of compensation during the year are top-paid employees with respect to X for the 1989 determination year.

(e) *17½ hour rule—(1) In general.* The determination of whether an employee normally works less than 17½ hours per week is made independently for each

year based on the rules in paragraph (e)(2) and (3) of this A-9. In making this determination, weeks during which the employee did not work for the employer are not considered. Thus, for example, if an employee normally works twenty hours a week for twenty-five weeks during the fall and winter school quarters, 10 hours a week for the 12 week spring quarter, and does not work for the employer during the three-month summer quarter, such employee is treated as normally working more than 17½ hours per week under the rule of this paragraph (e).

(2) *Deemed above 17½.* An employee who works 17½ hours a week or more, for more than fifty percent of the total weeks worked by such employee during the year, is deemed to normally work more than 17½ hours a week for purposes of this rule.

(3) *Deemed below 17½.* An employee who works less than 17½ hours a week for fifty percent or more of the total weeks worked by such employee during the year is deemed to normally work less than 17½ hours a week for purposes of this rule.

(4) *Application.* The determination provided for in paragraph (e)(1), (2), and (3) of this A-9 may be made separately with respect to each employee, or on the basis of groups of employees who fall within particular job categories as established by the employer on a reasonable basis. For example, under the rule of this paragraph (e)(4) an employer may exclude all office cleaning personnel if, for the year in question, the employees performing this function normally work less than 17½ hours a week. This is true even though one or more employees within this group normally work in excess of 17½ hours. The election to make this determination on the basis of individuals or groups is operational and does not require a plan provision.

(5) *Application based on groups.* (i) Groups of employees who perform the same job are not required to be considered as one category for purposes of the rule in paragraph (e)(4) of this A-9. Thus, for example, an employer supermarket may determine its highly compensated employees by excluding part-time grocery checkers if such personnel normally work less than 17½

hours a week while continuing to include full-time personnel performing this function. In general, 80 percent of the positions within a particular job category must be filled by employees who normally work less than 17½ hours a week before any employees may be excluded under this rule on the basis of their membership in that job category.

(ii) Alternatively, an employer may exclude employees who are members of a particular job category if the median number of hours of service credited to employees in that category during a determination or look-back year is 500 or less.

(f) *6-month rule*—(1) *In general.* The determination of whether employees normally work during not more than 6 months in any year is made on the basis of the facts and circumstances of the particular employer as evidenced by the employer's customary experience in the years preceding the determination year. An employee who works on one day during a month is deemed to have worked during that month.

(2) *Application of prior year experience.* In making the determination under this paragraph (f), the experience for years immediately preceding the determination year will generally be weighed more heavily than that of earlier years. However, this emphasis on more recent years is not appropriate if the data for a particular year reflects unusual circumstances. For example, if fishermen working for employer X worked 9 months in 1987 and 1988, 8 months in 1989, and then, because of abnormal ice conditions, worked only 5 months in 1990, such fishermen could not be excluded under this rule in 1990. Furthermore, the data with respect to 1990 would not be weighed more heavily in making a determination with respect to subsequent years.

(3) *Individual or group basis.* This determination may be made separately with respect to each employee or on the basis of groups of employees who fall within particular job categories in the manner set forth in paragraph (e)(4) of this A-8.

Q-10. For purposes of determining the group of highly compensated employees, which employees are officers and which officers must be included in the highly compensated group?

A-10: (a) *In general.* Subject to the limitations set forth in paragraph (b) of this A-10 and the top-100 employee rule set forth in A-2, an employee is an includible officer for purposes of this section and is a member of the group of highly compensated employees if such employee is an officer of the employer (within the meaning of section 416(i) and § 1.416-1 A-T 13 & A-T 15) at any time during the determination year or look-back year and receives compensation during such year that is greater than 150 percent of the dollar limitation in effect under section 415(c)(1)(A) for the calendar year in which the determination or look-back year begins. In addition, an officer who does not meet the 415(c)(1)(A) dollar limitation requirement may be an includible officer based on the minimum inclusion rules set forth in paragraph (c) of this A-10.

(b) *Maximum limitation*—(1) *In general.* Not more than 50 employees (or, if lesser, the greater of 3 employees or 10 percent of the employees without regard to any exclusions) shall be treated as officers for purposes of this provision in determining the group of highly compensated employees for any determination year or look-back year.

(2) *Total number of employees.* The total number of employees for purposes of the limitation in this paragraph (b) is the number of employees the employer has during the particular determination year or look-back year. For purposes of this A-10, employees include only those individuals who perform services for the employer during the determination or look-back year. The exclusions applicable for purposes of determining the number of employees in the top-paid group are not applicable for purposes of the limitations in this paragraph (b).

(3) *Inclusion ranking.* If the number of the employer's officers who satisfy paragraph (a) of this A-10 during either the determination year or the look-back year exceeds the limitation under this paragraph (b), then the officers who will be considered as includible officers for purposes of this rule are those who receive the greatest compensation from the employer during such determination or look-back year.

The definition of compensation in A–13 is to be used for this purpose.

(c) *Minimum inclusion rule.* This paragraph (c) is applicable when no officer of the employer satisfies the compensation requirements of paragraph (a) of this A–10 during either a determination year or look-back year. In such case, the highest paid officer of the employer for such year is treated as a highly compensated employee by reason of being an officer, without regard to the amount of compensation paid to such officer in relation to the section 415(c)(1)(A) dollar amount for the year. This is true whether or not such employee is also a highly compensated employee on any other basis. Thus, for example, if no officer of employer X meets the compensation requirements of paragraph (a) of this A–10 during the 1989 look-back year, and employee A is both the highest paid officer during such year and a 5-percent owner, employee A is treated as an includible officer satisfying the minimum inclusion rules of this paragraph.

(d) *Separate application.* The maximum and minimum officer inclusion rules of paragraphs (b) and (c) of this A–10 apply separately with respect to the determination year calculation and the look-back year calculation. Thus, for example, if no officer of employer X receives compensation above the threshold amount in paragraph (a) of this A–10 during either the determination year or look-back year, application of the minimum inclusion rule would result in the officer of employer X who received the greatest compensation during the look-back year being treated as a highly compensated employee and, in addition, the officer of employer X who receives the most compensation during the determination year would be included in the highly compensated group if such officer is also in the top-100 employees of employer X for such year. Thus, two officers may be treated as highly compensated active employees for a determination year by reason of the provisions of the minimum inclusion rule.

Q–11: To what extent must family members who are employed by the same employer be aggregated for purposes of section 414(q)?

A–11: (a) *Family aggregation*—(1) *In general.* Aggregation is required with respect to an employee who is, during a particular determination year or look-back year, a family member (as defined in A–12) of either (i) a 5-percent owner who is an active or former employee or (ii) a highly compensated employee who is one of the ten most highly compensated employees ranked on the basis of compensation paid by the employer during such year.

(2) *Aggregation of contributions or benefits.* As prescribed in regulations under the provisions to which section 414(q) is applicable, a family member and a 5-percent owner or top-10 highly compensated employee aggregated under this rule are generally treated as a single employee receiving an amount of compensation and a plan contribution or benefit that is based on the compensation, contributions, and benefits of such family member and 5-percent owner or top-10 highly compensated employee.

(b) *Exclusion status irrelevant.* Family members are subject to this aggregation rule whether or not they fall within the categories of employees that may be excluded for purposes of determining the number of employees in the top-paid group and whether or not they are highly compensated employees when considered separately.

(c) *Order of determination*—(1) *Determination of highly compensated employees.* The determination of which employees are highly compensated employees and which highly compensated employees are among the ten most highly compensated employees in making the look-back year calculation or the determination year calculation for a determination year will be made prior to the application of the rules in paragraph (a) of this A–11.

(2) *Determination of top-paid group and top-100 employees.* The determination of the number and identity of employees in the top-paid group under the look-back year calculation or the determination year calculation for a determination year and the identity of individuals in the top-100 employees under the determination year calculation for a determination year is made prior to application of the rules in paragraph (a) of this A–11.

(d) *Determination period.* The rules under paragraph (a) of this A-11 apply separately to the determination year and the look-back year. Thus, assuming there are no 5-percent owners, if employees A, B, C, D, E, F, G, H, I and J are the top 10 highly compensated employees in the 1988 look-back year, and employees F, G, H, I, J, K, L, M, N and O are the top 10 highly compensated employees in the 1989 determination year, then family aggregation would be required with respect to all fifteen of such employees (i.e. employees A, B, C, D, E, F, G, H, I, J, K, L, M, N, and O).

Q-12: Which individuals are family members for purposes of the aggregation rules in section 414(a)(6)(A) and A-11?

A-12: (a) *Definition of family member.* Individuals who are family members for purposes of these provisions include, with respect to any employee or former employee, such employee's or former employee's spouse and lineal ascendants or descendants and the spouses of such lineal ascendants and descendants. In determining whether an individual is a family member with respect to an employee or former employee, legal adoptions shall be taken into account.

(b) *Test period.* If an individual is a family member with respect to an employee or former employee on any day during the year, such individual is treated as a family member for the entire year. Thus, for example, if an individual is a family member with respect to an employee on the first day of a year, such individual continues to be a family member with respect to such employee throughout the year even though their relationship changes as a result of death or divorce.

Q-13: How is "compensation" determined for purposes of determining the group of "highly compensated employees."

A-13: (a) *In general.* For purposes of section 414(q), the term "compensation" means compensation within the meaning of section 415(c)(3) without regard to sections 125, 402(a)(8), and 402(h)(1)(B) and, in the case of employer contributions made pursuant to a salary reduction agreement, without regard to section 403(b). Thus, com-

pensation includes elective or salary reduction contributions to a cafeteria plan, cash or deferred arrangement or tax-sheltered annuity.
