Coast Guard, DHS

§ 161.010–1

(b) Methods of test—(1) Waterproof test. The searchlight shall be subjected for 5 minutes to a stream of water under a head of approximately 35 feet from a hose not less than 1 inch in diameter from a distance of approximately 10 feet. The hose nozzle shall be adjusted to give a solid stream at the enclosure. No leakage shall occur in this test.

(2) Beam candlepower. All light except that produced from the searchlight under test shall be excluded from the room in which measurements are made. The searchlight shall be operated at rated voltage with a seasoned lamp as specified in §161.006–4(e). Measurements of beam candlepower shall be made at the corners of a 6-inch square located in the center of the beam at a distance of 32 feet immediately in front of the searchlight.

(3) Corrosion resistance. The searchlight shall be subjected to a 200-hour salt spray test in accordance with ASTM B 117 (incorporated by reference, see §161.006–1). There shall be no evidence of corrosion that will be detrimental to the operation of the searchlight.

(4) Heat run. The searchlight, completely assembled, shall be operated continuously for 2 hours at rated voltage following which the waterproof test shall be conducted. This cycle shall be repeated 3 times. The ambient temperature shall be approximately 25 °C. The water stream shall be from an ordinary cold water tap.

§ 161.006–6 Procedure for approval.

(a) General. Motor lifeboat searchlights are approved only by the Commandant, United States Coast Guard, Washington, DC, 20226. Correspondence relating to the subject matter of this specification shall be addressed to the Commander of the Coast Guard District in which the factory is located.

(b) Manufacturer’s plans and specifications. In order to obtain approval of motor lifeboat searchlights, submit detailed plans and specifications, including a complete bill of material, assembly drawings, and parts drawings descriptive of the arrangement and construction of the device, to the Commander of the Coast Guard District in which the factory is located. Each drawing shall have an identifying drawing number, date, and an identification of the device; and the general arrangement for assembly drawing shall include a list of all drawings applicable, together with drawing numbers and alteration numbers. The manufacturer will be advised whether or not the drawings and specifications appear satisfactory or what corrections appear necessary and then he may proceed with the construction of the pre-approval sample in accordance therewith. The pre-approval sample, together with four copies of the plans and specifications corrected as may be required, shall be forwarded to the Commandant via the Commander of the Coast Guard District in which the factory is located for inspection and tests. The cost of the tests is to be borne by the manufacturer.

Subpart 161.008 [Reserved]

Subpart 161.010—Floating Electric Waterlight

SOURCE: CGD 85–208, 54 FR 27020, June 27, 1989, unless otherwise noted.

§ 161.010–1 Incorporation by reference.

(a) Certain materials are incorporated by reference into this part with the approval of the Director of the Federal Register in accordance with 5 U.S.C. 552(a). To enforce any edition other than the one listed in paragraph (b) of this section, notice of change

281
must be published in the Federal Register and the material made available to the public. All approved material is on file or at the National Archives and Records Administration (NARA), and at the Commanding Officer, USCG Marine Safety Center, 1900 Half Street, SW., Suite 1000, Room 525, Washington, DC 20024, and is available from the sources indicated in paragraph (b) of this section. For information on the availability of this material at NARA, call 202–741–6030, or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

(b) The material approved for incorporation by reference in this part, and the sections affected are:

**Underwriters Laboratories, Inc.**
12 Laboratory Drive, Research Triangle Park, NC 27709–3995

**§ 161.010–2 Design, construction, and test requirements.**

Each floating electric waterlight shall meet the requirements of ANSI/UL 1196.

**§ 161.010–3 Inspections and methods of test.**

(a) Each inspection and test report required by this subpart shall comply with § 159.005–11 of this chapter.

(b) The U.S. Coast Guard reserves the right to make any inspection or test it deems necessary to determine the conformance of the materials and equipment to this subpart.

(c) The facilities, materials, and labor for all tests shall be furnished at no cost to the U.S. Coast Guard.

**§ 161.010–4 Procedure for approval.**

(a) A request for approval of an automatic floating electric waterlight must be submitted by visitors to the Commanding Officer, USCG Marine Safety Center, 1900 Half Street, SW., Suite 1000, Room 525, Washington, DC 20024, or transmitted by mail to: Commanding Officer, U.S. Coast Guard Marine Safety Center, 2100 2nd St., SW., Stop 7126, Washington, DC 20593–7126, in a written or electronic format. Information for submitting the VSP electronically can be found at http://www.uscg.mil/HQ/MSC.

(b) All inspections and tests must be performed by an independent laboratory which meets the requirements of § 159.010–3 of this chapter. A list of independent laboratories accepted by the Coast Guard as meeting § 159.010–3 of this chapter may be obtained by contacting the Commanding Officer, USCG Marine Safety Center.

(c) Each request for approval must contain:

(1) The name and address of the applicant,

(2) One copy of all plans and specifications that meet the requirements of § 159.005–12 of this chapter,

(3) A pre-approval sample of the waterlight,

(4) An inspection and test report verifying compliance with the construction and test requirements of ANSI/UL 1196, and

(5) A statement by the manufacturer certifying that the waterlight complies with the requirements of this subpart.

Subpart 161.011—Emergency Position Indicating Radiobeacons

**§ 161.011–1 Purpose.**

This subpart prescribes approval requirements for emergency position indicating radiobeacons (EPIRB).

[39 FR 10139, Mar. 18, 1974]

**§ 161.011–5 Classes.**

EPIRB’s are classed as follows:

(a) Class A—an EPIRB that has been type approved or type accepted by the FCC as a Class A EPIRB. These EPIRB’s are capable of floating free of a vessel and activating automatically if the vessel sinks.

(b) Class C—An EPIRB that has been type approved or type accepted by the
