to the medical use of unsealed byproduct material requiring a written directive. The training and experience must include—

(i) Classroom and laboratory training in the following areas—
   (A) Radiation physics and instrumentation;
   (B) Radiation protection;
   (C) Mathematics pertaining to the use and measurement of radioactivity;
   (D) Chemistry of byproduct material for medical use; and
   (E) Radiation biology; and

(ii) Work experience, under the supervision of an authorized user who meets the requirements in §§35.57, 35.390, or equivalent Agreement State requirements. A supervising authorized user, who meets the requirements in §35.390(b), must also have experience in administering dosages in the same dosage category or categories (i.e., §35.390(b)(1)(ii)(G)) as the individual requesting authorized user status. The work experience must involve—
   (A) Ordering, receiving, and unpacking radioactive materials safely and performing the related radiation surveys;
   (B) Performing quality control procedures on instruments used to determine the activity of dosages, and performing checks for proper operation of survey meters;
   (C) Calculating, measuring, and safely preparing patient or human research subject dosages;
   (D) Using administrative controls to prevent a medical event involving the use of unsealed byproduct material;
   (E) Using procedures to contain spilled byproduct material safely and using proper decontamination procedures;
   (F) [Reserved]
   (G) Administering dosages of radioactive drugs to patients or human research subjects involving a minimum of three cases in each of the following categories for which the individual is requesting authorized user status—
   (1) Oral administration of greater than 1.22 gigabecquerels (33 millicuries) of sodium iodide I-131;
   (2) Oral administration of any beta emitter, or a photon-emitting radionuclide with a photon energy less than 150 keV, for which a written directive is required; and/or
   (3) Parenteral administration of any other radionuclide, for which a written directive is required; and

(2) Has obtained written attestation that the individual has satisfactorily completed the requirements in paragraphs (a)(1) and (b)(1)(ii)(G) or (b)(1) of this section, and has achieved a level of competency sufficient to function independently as an authorized user for the medical uses authorized under §35.300. The written attestation must be signed by a preceptor authorized user who meets the requirements in §§35.57, 35.390, or equivalent Agreement State requirements. The preceptor authorized user, who meets the requirements in §35.390(b) must have experience in administering dosages in the same dosage category or categories (i.e., §35.390(b)(1)(ii)(G)) as the individual requesting authorized user status.

§ 35.392 Training for the oral administration of sodium iodide I-131 requiring a written directive in quantities less than or equal to 1.22 gigabecquerels (33 millicuries).

Except as provided in §35.57, the licensee shall require an authorized user for the oral administration of sodium iodide I-131 requiring a written directive in quantities less than or equal to 1.22 Gigabecquerels (33 millicuries), to be a physician who—

(a) Is certified by a medical specialty board whose certification process includes all of the requirements in paragraphs (c)(1) and (c)(2) of this section and whose certification process has been recognized by the Commission or an Agreement State and who meets the requirements in paragraph (c)(3) of this

2Experience with at least 3 cases in Category (G)(2) also satisfies the requirement in Category (G)(1).
section. (The names of board certifications which have been recognized by the Commission or an Agreement State will be posted on the NRC’s Web page.); or

(b) Is an authorized user under §35.390 for uses listed in §§35.390(b)(1)(i)(G)(1) or (2), §35.394, or equivalent Agreement State requirements; or

(c)(1) Has successfully completed 80 hours of classroom and laboratory training, applicable to the medical use of sodium iodide I-131 for procedures requiring a written directive. The training must include—

(i) Radiation physics and instrumentation;

(ii) Radiation protection;

(iii) Mathematics pertaining to the use and measurement of radioactivity;

(iv) Chemistry of byproduct material for medical use; and

(v) Radiation biology; and

(2) Has work experience, under the supervision of an authorized user who meets the requirements in §§35.57, 35.390, 35.392, 35.394, or equivalent Agreement State requirements. A supervising authorized user who meets the requirements in §35.390 must also have experience in administering dosages as specified in §§35.390(b)(1)(i)(G)(1) or 35.390(b)(1)(i)(G)(2).

§ 35.394 Training for the oral administration of sodium iodide I–131 requiring a written directive in quantities greater than 1.22 gigabecquerels (33 millicuries).

Except as provided in §35.57, the licensee shall require an authorized user for the oral administration of sodium iodide I-131 requiring a written directive in quantities greater than 1.22 gigabecquerels (33 millicuries), to be a physician who—

(a) Is certified by a medical specialty board whose certification process includes all of the requirements in paragraphs (c)(1) and (c)(2) of this section, and whose certification has been recognized by the Commission or an Agreement State, and who meets the requirements in paragraph (c)(3) of this section. (The names of board certifications which have been recognized by the Commission or an Agreement State will be posted on the NRC’s Web page.); or

(b) Is an authorized user under §35.390 for uses listed in §§35.390(b)(1)(i)(G)(2) or equivalent Agreement State requirements; or

(c)(1) Has successfully completed 80 hours of classroom and laboratory training, applicable to the medical use of sodium iodide I-131 for procedures requiring a written directive in quantities greater than 1.22 gigabecquerels (33 millicuries).
