§ 110.8 List of nuclear facilities and equipment under NRC export licensing authority.

(a) Nuclear reactors and especially designed or prepared equipment and components for nuclear reactors. (See Appendix A to this part.)

(b) Plants for the separation of isotopes of uranium (source material or special nuclear material) including gas centrifuge plants, gaseous diffusion plants, aerodynamic enrichment plants, chemical exchange or ion exchange enrichment plants, laser based enrichment plants, plasma separation enrichment plants, electromagnetic enrichment plants, and especially designed or prepared equipment, other than analytical instruments, for the separation of isotopes of uranium. (See appendices to this part for lists of: gas centrifuge equipment—Appendix B; gaseous diffusion equipment—Appendix C; aerodynamic enrichment equipment—Appendix D; chemical exchange or ion exchange enrichment equipment—Appendix E; laser based enrichment equipment—Appendix F; plasma separation enrichment equipment—Appendix G; and electromagnetic enrichment equipment—Appendix H.)

(c) Plants for the separation of the isotopes of lithium and especially designed or prepared assemblies and components for these plants. (See Appendix N to this part.)

(d) Plants for the reprocessing of irradiated nuclear reactor fuel elements and especially designed or prepared assemblies and components for these plants. (See Appendix I to this part.)

(e) Plants for the fabrication of nuclear reactor fuel elements and especially designed or prepared assemblies and components for these plants. (See Appendix O to this part.)

(f) Plants for the conversion of uranium and plutonium and especially designed or prepared assemblies and components for these plants. (See Appendix J to this part.)

(g) Plants for the production, separation, or purification of heavy water, deuterium, and deuterium compounds and especially designed or prepared assemblies and components for these plants. (See Appendix K to this part.)

(h) Plants for the production of special nuclear material using accelerator-driven subcritical assembly systems capable of continuous operation above 5 MWe thermal.

(i) Other nuclear-related commodities are under the export licensing authority of the Department of Commerce.

[61 FR 35602, July 8, 1996, as amended at 65 FR 70290, Nov. 22, 2000]

§ 110.9 List of Nuclear Material under NRC export licensing authority.

(a) Special Nuclear Material.

(b) Source Material.
Nuclear Regulatory Commission

§ 110.20

(c) Byproduct Material.
(d) Deuterium.
(e) Nuclear grade graphite for nuclear end use.
[55 FR 30450, July 26, 1990, as amended at 70 FR 41939, July 21, 2005]

§ 110.9a List of nuclear equipment and material under NRC import licensing authority.
(a) Production and utilization facilities.
(b) Special nuclear material.
(c) Source material.
(d) Byproduct material.

Subpart B—Exemptions
§ 110.10 General.
(a) In response to a request or on its own initiative, the Commission may grant an exemption from the regulations in this part, if it determines that the exemption:
1. Is authorized by law;
2. Is not inimical to the common defense and security; and
3. Does not constitute an unreasonable risk to the public health and safety.
(b) An exemption from statutory licensing requirements, as authorized by sections 57d, 62, and 81 of the Atomic Energy Act, will be granted only after coordination with the Executive Branch.
(c) The granting of an exemption does not relieve any person from complying with the regulations of other Government agencies applicable to exports or imports under their authority.

§ 110.11 Export of IAEA safeguards samples.
A person is exempt from the requirements for a license to export special nuclear material set forth in sections 53 and 54d. of the Atomic Energy Act and from the regulations in this Part to the extent that the person exports special nuclear material in IAEA safeguards samples, if the samples are exported under § 75.8 of this chapter, or a comparable Department of Energy order, and are in quantities not exceeding a combined total of 100 grams of contained plutonium, U–233, and U–235 per facility per year. This exemption does not relieve any person from complying with Parts 71 or 73 of this chapter or any Commission order under section 201(a) of the Energy Reorganization Act of 1974 (42 U.S.C. 5841(a)).
[73 FR 78615, Dec. 23, 2008]

Subpart C—Licenses
§ 110.19 Types of licenses.
(a) Licenses for the export and import of nuclear equipment and material in this part consist of two types: General licenses and Specific licenses. Except as provided in paragraph (b) of this section, a general license is effective without the filing of an application with the Commission or the issuance of licensing documents to a particular person. A specific license is issued to a named person and is effective upon approval by the Commission of an application filed pursuant to the regulations in this part and issuance of licensing documents to the applicant. Issuance of a specific or general license under this part does not relieve a person from complying with applicable regulations of the Environmental Protection Agency for any export or import that contains or is contaminated with hazardous waste.
(b) A person using a general license under this part as authority to export incidental radioactive material that is contained in or a contaminant of a shipment that exceeds 100 kilograms in total weight shall file a completed NRC Form 7 before the export takes place.
[60 FR 37563, July 21, 1995]

§ 110.20 General license information.
(a) A person may use an NRC general license as authority to export or import nuclear equipment or material
