other unforeseen situation a shorter period may be approved by the Commission.

(2) Regarding any other modification relevant to the application of the provisions of the Safeguards Agreement: At the time the first inventory change report is submitted after the modification is completed.

(d) The information specified in paragraphs (b) and (c) of this section, except for the information specified in paragraph (b)(5) of this section, must be prepared on IAEA approved Design Information Questionnaire forms (Form N–71 and associated forms or other forms supplied by the Commission). The information must be sufficiently detailed to enable knowledgeable determinations to be made in the development of Facility Attachments or amendments thereto, including:

(1) Identification of the features of facilities and nuclear material relevant to the application of safeguards to nuclear material in sufficient detail to facilitate verification;
(2) Determination of IAEA material balance areas to be used for IAEA accounting purposes and selection of those strategic points which are key measurement points and which will be used to determine flow and inventory of nuclear material;
(3) Establishment of the nominal timing and procedures for taking of physical inventories of nuclear material for IAEA accounting purposes;
(4) Establishment of the records and reports requirements and records evaluation procedures;
(5) Establishment of requirements and procedures for verification of the quantity and location of nuclear material;
(6) Selection of appropriate combinations of containment and surveillance methods and techniques at the strategic points at which they are to be applied; and
(7) Information on organizational responsibility for material accounting and control.

(e) Information specified in paragraph (b)(5) of this section must be submitted as specified by instructions for DOC/NRC Form AP–A and associated forms and shall contain a site map drawn to scale as an attachment.

(f) The applicant’s, licensee’s, or certificate holder’s security rules for physical protection that will impact the IAEA inspectors at the facility must be included in the facility information only when and to the extent specifically requested by the Commission.

(g) Health and safety rules that are to be observed by the IAEA inspectors at the facility must be included in the facility information.

(h) Information must be provided on the need to manage IAEA access to the facility to protect health and safety or to protect classified, proprietary, or other sensitive information, and on other protective measures that should be implemented should an IAEA access be requested.

[73 FR 78611, Dec. 23, 2008]

§ 75.11 Location information.

(a) As required by the Additional Protocol, each applicant, licensee, or certificate holder shall submit location information to the Commission as specified in the instructions for DOC/NRC Form AP–1 and associated forms.

(b) Location information includes:

(1) Nuclear fuel cycle-related research and development information including a general description of the activity and information specifying the location of the activity.

(2) Nuclear fuel cycle-related manufacturing or construction information including a description of the scale of operations for the activity.

(3) Uranium and thorium mine and concentration plant information including information on the location, operational status, and the estimated annual production capacity and current annual production of the activity.

(4) Impure source material possession information including the quantities, the chemical composition, and the use or intended use of the material (e.g., nuclear or non-nuclear use).

(5) Imports and exports of source material for non-nuclear end uses including the location, quantities, chemical compositions, and use of the imported or exported material.

(6) IAEA-exempted and -terminated nuclear material information including information regarding the quantities,
§ 75.12 Communication of information to IAEA.

(a) Except as otherwise provided in this section, the Commission will furnish to the IAEA all information submitted under §§75.10, 75.11, and 75.31 through 75.43.

(b)(1) An applicant, licensee, or certificate holder may request that information of particular sensitivity, that it customarily holds in confidence, not be transmitted physically to the IAEA. An applicant, licensee, or certificate holder who makes this request shall, at the time the information is submitted, identify the pertinent document or part thereof and make a full statement of the reasons supporting the request. The applicant, licensee, or certificate holder shall retain a copy of the request and all documents related to the request as a record until the Commission terminates the license or certificate for the facility involved with the request, or until the Commission notifies the applicant, licensee, or certificate holder that the applicant, licensee, or certificate holder is no longer under the Safeguards Agreement. Superseded material must be retained for 3 years after each change is made.

(2) In considering such a request, it is the policy of the Commission to achieve an effective balance between legitimate concerns of licensees, applicants, or certificate holders, including protection of the competitive position of the owner of the information, and the undertaking of the United States to cooperate with the IAEA to facilitate the implementation of the safeguards provided for in the Safeguards Agreement and Additional Protocol. The Commission will take into account the obligation of the IAEA to take every precaution to protect commercial and industrial secrets and other confidential information coming to its knowledge in the implementation of the Safeguards Agreement and Additional Protocol.

(3) A request made under §2.390 of this chapter will not be treated as a request under this section unless the application makes specific reference to this section, nor shall a determination to withhold information from public disclosure necessarily require a determination that such information not be transmitted physically to the IAEA.

(4) If a request is granted, the Commission will determine a location where the information will remain readily available for examination by the IAEA and will so inform the applicant, licensee, or certificate holder. The applicant, licensee, or certificate holder shall retain this information as a record until the Commission terminates the license or certificate for the facility involved with the request or until the Commission notifies the applicant, licensee, or certificate holder that the applicant, licensee, or certificate holder is no longer under the Safeguards Agreement. Superseded material must be retained for 3 years after each change is made.

(c) A request made under §2.390(b) of this chapter will not be treated as a request under this section unless the application makes specific reference to this section, nor shall a determination
