will assign an employee to accompany IAEA representative(s) at all times during the inspection or complementary access. The applicant, licensee, or certificate holder may accompany IAEA representatives who inspect or access the facility or location. The IAEA representatives should not be delayed or otherwise impeded in the exercise of their duties.

(e) Each applicant, licensee, or certificate holder shall permit the IAEA, in conducting an ad hoc, routine, or special inspection at a facility, to:

1. Examine records kept under § 75.21;
2. Observe that the measurements of nuclear material at key measurement points for material balance accounting are representative;
3. Verify the function and calibration of instruments and other measurement control equipment;
4. Observe that samples at key measurement points for material balance accounting are taken in accordance with procedures that produce representative samples, observe the treatment and analysis of the samples, and obtain duplicates of these samples;
5. Arrange to use the IAEA’s own equipment for independent measurement and surveillance; and
6. Perform other measures requested by the IAEA and approved by the NRC.

(f) Each applicant, licensee, or certificate holder shall, at the request of an IAEA inspector during an ad hoc, routine, or special inspection at a facility:

1. Ship material accountancy samples taken for the IAEA’s use, in accordance with applicable packaging and export licensing regulations, by the method of carriage and to the address specified by the inspector; and
2. Take other actions contemplated by the Safeguards Agreement, and included in the safeguards approach approved by the United States and the IAEA, including but not limited to the following examples:
   i. Enabling the IAEA to arrange to install its equipment for measurement and surveillance;
   ii. Enabling the IAEA to apply its seals and other identifying and tamper-indicating devices to containers;
   iii. Making additional measurements and taking additional samples for the IAEA’s use;
   iv. Analyzing the IAEA’s standard analytical samples;
   v. Using appropriate standards in calibrating instruments and other equipment; and
   vi. Carrying out other calibrations.

(g) Each applicant, licensee, or certificate holder shall permit the IAEA, in conducting complementary access at a location, under the provisions of the Additional Protocol and subsidiary arrangements, to:

1. Perform visual observations and record observations as photographs;
2. Conduct environmental sampling, when authorized by the U.S. Government;
3. Use radiation detection and measurement devices;
4. Apply seals and other identifying and tamper-indicating devices;
5. Perform nondestructive measurements and sampling;
6. Examine records relevant to quantities, origin, and disposition of materials to confirm the accuracy of the information provided under § 75.11;
7. Examine safeguards-relevant production and shipping records; and
8. Other objective measures that have been demonstrated to be technically feasible and the use of which has been agreed upon by the IAEA Board of Governors and following consultations between the IAEA and U.S. Government.

(h) Nothing in this section requires or authorizes an applicant, licensee, or certificate holder to carry out any operation that would otherwise constitute a violation of the terms of any applicable license, regulation, or order of the Commission.

[73 FR 78609, Dec. 23, 2008]

§ 75.9 Information collection requirements: OMB approval.

(a) The Nuclear Regulatory Commission, or another U.S. Government agency, has submitted the information collection requirements contained in this Part to the Office of Management and Budget (OMB) for approval as required by the Paperwork Reduction Act (44 U.S.C. 3501 et seq.). The NRC
may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. OMB has approved the information collection requirements contained in this Part under control number 3150–0055.

(b) The approved information collection requirements contained in this Part appear in §§75.6, 75.7a, 75.10, 75.11, 75.21, 75.22, 75.23, 75.24, 75.31, 75.32, 75.33, 75.34, 75.35, 75.36, 75.43, 75.44, and 75.45.

(c) This part contains information collection requirements in addition to those approved under the control number specified in paragraph (a) of this section. These information collection requirements and the control numbers under which they are approved are as follows:

(1) In §75.10, Form N–71 and associated forms are approved under control number 3150–0056.

(2) In §§75.31, 75.32, 75.33, and 75.35, DOE/NRC Form 742 is approved under control number 3150–0004.

(3) In §§75.33 and 75.34, DOE/NRC Form 741 is approved under control number 3150–0003.

(4) In §§75.34 and 75.35, DOE/NRC Form 740M is approved under OMB control number 3150–0057.

(5) In §75.35, DOE/NRC Form 742C is approved under control number 3150–0058.

(6) In §§75.10 and 75.11, DOC/NRC Forms AP–1, AP–A, and associated forms are approved under control number 0694–0135.

§75.10  Facility and Location Information

(a) Each applicant, licensee, or certificate holder subject to the provisions of this Part shall submit facility information, in response to written notification from the Commission, with respect to any facility that the Commission indicates has been identified under the Safeguards Agreement, the Initial Protocol to the Agreement, or meets the Additional Protocol reporting criteria, and in which the applicant, licensee, or certificate holder carries out licensed activities. (The Commission request must state whether the facility has been identified under Article 39(b) of the principal text of the Safeguards Agreement or Article 2(a) of the Initial protocol.) The applicant, licensee, or certificate holder shall submit the requested information to the Commission within the period specified in the Commission’s request.

(b) Facility information includes:

(1) The identification of the facility, stating its general character, purpose, nominal capacity (thermal power level, in the case of power reactors), and geographic location, and the name and address to be used for routine purposes;

(2) A description of the general arrangement of the facility with reference, to the extent feasible, to the form, location and flow of nuclear material, and to the general layout of important items of equipment which use, produce, or process nuclear material;

(3) A description of features of the facility relating to material accounting, containment, and surveillance;

(4) A description of the existing and proposed procedures at the facility for nuclear material accounting and control, with special reference to material balance areas established by the licensee, measurement of flow, and procedures for physical inventory taking (As part of this description, the applicant, licensee, or certificate holder may identify a process step involving information that it deems to be commercially sensitive and for which it proposes that a special material balance area be established so as to restrict IAEA access to this information); and

(5) A map of the site and information on the size of the buildings and on the general nature of the activities conducted in each building.

(c) Each licensee or certificate holder shall thereafter submit to the Commission information with respect to any modification at the facility affecting the information referred to in paragraph (a) of this section. The following information must be submitted:

(1) Regarding a modification of a type described in the license or certificate conditions: At least 180 days before the modification is scheduled to be started, except that in an emergency or
