

Additional Criteria Applicable to Equity Commitment Notes

a. The indenture or note agreement must contain the following two provisions:

1. The proceeds of the sale of common or perpetual preferred stock will be the sole source of repayment for the notes, and the issuer must dedicate the proceeds for the purpose of repaying the notes. (Documentation certified by an authorized agent of the issuer showing the amount of common or perpetual preferred stock issued, the dates of issue, and amounts of such issues dedicated to the retirement or redemption of mandatory convertible securities will satisfy the dedication requirement.)

2. By the time that one-third of the life of the securities has run, the issuer must have raised and dedicated an amount equal to one-third of the original principal of the securities. By the time that two-thirds of the life of the securities has run, the issuer must have raised and dedicated an amount equal to two-thirds of the original principal of the securities. At least 60 days prior to the maturity of the securities, the issuer must have raised and dedicated an amount equal to the entire original principal of the securities. Proceeds dedicated to redemption or retirement of the notes must come only from the sale of common or perpetual preferred stock.⁶

b. If the issuer fails to meet any of these periodic funding requirements, the Federal Reserve immediately will cease to treat the unfunded securities as primary capital and will take appropriate supervisory action. In addition, failure to meet the funding requirements will be viewed as a breach of a regulatory commitment and will be taken into consideration by the Board in acting on statutory applications.

c. If a security is issued by a subsidiary of a bank or bank holding company, any guarantee of the principal by that subsidiary's parent bank or bank holding company must be subordinate to the same degree as the security issued by the subsidiary and limited to repayment of the principal amount of the security at its final maturity.

CRITERIA FOR DETERMINING THE PRIMARY CAPITAL STATUS OF PERPETUAL DEBT INSTRUMENTS OF BANK HOLDING COMPANIES

1. The instrument must be unsecured and, if issued by a bank, must be subordinated to the claims of depositors.

2. The instrument may not provide the noteholder with the right to demand repayment of principal except in the event of bankruptcy, insolvency, or reorganization. The instrument must provide that non-

payment of interest shall not trigger repayment of the principal of the perpetual debt note or any other obligation of the issuer, nor shall it constitute prima facie evidence of insolvency or bankruptcy.

3. The issuer shall not voluntarily redeem the debt issue without prior approval of the Federal Reserve, except when the debt is converted to, exchanged for, or simultaneously replaced in like amount by an issue of common or perpetual preferred stock of the issuer or the issuer's parent company.

4. If issued by a bank holding company, a bank subsidiary, or a subsidiary with substantial operations, the instrument must contain a provision that allows the issuer to defer interest payments on the perpetual debt in the event of, and at the same time as the elimination of dividends on all outstanding common or preferred stock of the issuer (or in the case of a guarantee by a parent company at the same time as the elimination of the dividends of the parent company's common and preferred stock). In the case of a nonoperating subsidiary (a funding subsidiary or one formed to issue securities), the deferral of interest payments must be triggered by elimination of dividends by the parent company.

5. If issued by a bank holding company or a subsidiary with substantial operations, the instrument must convert automatically to common or perpetual preferred stock of the issuer when the issuer's retained earnings and surplus accounts become negative. If an operating subsidiary's perpetual debt is guaranteed by its parent, the debt may convert to the shares of the issuer or guarantor and such conversion may be triggered when the issuer's or parent's retained earnings and surplus accounts become negative. If issued by a nonoperating subsidiary of a bank holding company or bank, the instrument must convert automatically to common or preferred stock of the issuer's parent when the retained earnings and surplus accounts of the issuer's parent become negative.

APPENDIX C TO PART 225—SMALL BANK HOLDING COMPANY POLICY STATEMENT

Policy Statement on Assessment of Financial and Managerial Factors

In acting on applications filed under the Bank Holding Company Act, the Board has adopted, and continues to follow, the principle that bank holding companies should serve as a source of strength for their subsidiary banks. When bank holding companies incur debt and rely upon the earnings of their subsidiary banks as the means of repaying such debt, a question arises as to the

⁶The funded portions of the securities will be deducted from primary capital to avoid double counting.

probable effect upon the financial condition of the holding company and its subsidiary bank or banks.

The Board believes that a high level of debt at the parent holding company impairs the ability of a bank holding company to provide financial assistance to its subsidiary bank(s) and, in some cases, the servicing requirements on such debt may be a significant drain on the resources of the bank(s). For these reasons, the Board has not favored the use of acquisition debt in the formation of bank holding companies or in the acquisition of additional banks. Nevertheless, the Board has recognized that the transfer of ownership of small banks often requires the use of acquisition debt. The Board, therefore, has permitted the formation and expansion of small bank holding companies with debt levels higher than would be permitted for larger holding companies. Approval of these applications has been given on the condition that small bank holding companies demonstrate the ability to service acquisition debt without straining the capital of their subsidiary banks and, further, that such companies restore their ability to serve as a source of strength for their subsidiary banks within a relatively short period of time.

In the interest of continuing its policy of facilitating the transfer of ownership in banks without compromising bank safety and soundness, the Board has, as described below, adopted the following procedures and standards for the formation and expansion of small bank holding companies subject to this policy statement.

1. APPLICABILITY OF POLICY STATEMENT

This policy statement applies only to bank holding companies with *pro forma* consolidated assets of less than \$500 million that (i) are not engaged in significant nonbanking activities either directly or through a nonbank subsidiary; (ii) do not conduct significant off-balance sheet activities (including securitization and asset management or administration) either directly or through a nonbank subsidiary; and (iii) do not have a material amount of debt or equity securities outstanding (other than trust preferred securities) that are registered with the Securities and Exchange Commission. The Board may in its discretion exclude any bank holding company, regardless of asset size, from the policy statement if such action is warranted for supervisory purposes.¹

While this policy statement primarily applies to the formation of small bank holding companies, it also applies to existing small bank holding companies that wish to acquire an additional bank or company and to transactions involving changes in control, stock

redemptions, or other shareholder transactions.²

2. ONGOING REQUIREMENTS

The following guidelines must be followed on an ongoing basis for all organizations operating under this policy statement.

A. Reduction in parent company leverage: Small bank holding companies are to reduce their parent company debt consistent with the requirement that all debt be retired within 25 years of being incurred. The Board also expects that these bank holding companies reach a debt to equity ratio of .30:1 or less within 12 years of the incurrence of the debt.³ The bank holding company must also

²The appropriate Reserve Bank should be contacted to determine the manner in which a specific situation may qualify for treatment under this policy statement.

³The term *debt*, as used in the ratio of debt to equity, means any borrowed funds (exclusive of short-term borrowings that arise out of current transactions, the proceeds of which are used for current transactions), and any securities issued by, or obligations of, the holding company that are the functional equivalent of borrowed funds.

Subordinated debt associated with trust preferred securities generally would be treated as debt for purposes of paragraphs 2.C., 3.A., 4.A.i., and 4.B.i. of this policy statement. A bank holding company, however, may exclude from debt an amount of subordinated debt associated with trust preferred securities up to 25 percent of the holding company's equity (as defined below) less goodwill on the parent company's balance sheet in determining compliance with the requirements of such paragraphs of the policy statement. In addition, a bank holding company subject to this policy statement that has not issued subordinated debt associated with a new issuance of trust preferred securities after December 31, 2005, may exclude from debt any subordinated debt associated with trust preferred securities until December 31, 2010. Bank holding companies subject to this policy statement also may exclude from debt until December 31, 2010, any subordinated debt associated with refinanced issuances of trust preferred securities originally issued on or prior to December 31, 2005, provided that the refinancing does not increase the bank holding company's outstanding amount of subordinated debt. Subordinated debt associated with trust preferred securities will not be included as debt in determining compliance with any other requirements of this policy statement.

In addition, notwithstanding any other provision of this policy statement and for purposes of compliance with paragraphs 2.C., 3.A., 4.A.i., and 4.B.i. of this policy statement, both a bank holding company that is

¹ [Reserved]

comply with debt servicing and other requirements imposed by its creditors.

B. Capital adequacy: Each insured depository subsidiary of a small bank holding company is expected to be well-capitalized. Any institution that is not well-capitalized is expected to become well-capitalized within a brief period of time.

C. Dividend restrictions: A small bank holding company whose debt to equity ratio is greater than 1.0:1 is not expected to pay corporate dividends until such time as it reduces its debt to equity ratio to 1.0:1 or less and otherwise meets the criteria set forth in §§225.14(c)(1)(ii), 225.14(c)(2), and 225.14(c)(7) of Regulation Y.⁴

organized in mutual form and a bank holding company that has made a valid election to be taxed under Subchapter S of Chapter 1 of the U.S. Internal Revenue Code may exclude from debt subordinated debentures issued to the United States Department of the Treasury under the Troubled Asset Relief Program established by the Emergency Economic Stabilization Act of 2008, Division A of Pub. L. No. 110-343, 122 Stat. 3765 (2008).

The term *equity*, as used in the ratio of debt to equity, means the total stockholders' equity of the bank holding company as defined in accordance with generally accepted accounting principles. In determining the total amount of stockholders' equity, the bank holding company should account for its investments in the common stock of subsidiaries by the equity method of accounting.

Ordinarily the Board does not view redeemable preferred stock as a substitute for common stock in a small bank holding company. Nevertheless, to a limited degree and under certain circumstances, the Board will consider redeemable preferred stock as equity in the capital accounts of the holding company if the following conditions are met: (1) The preferred stock is redeemable only at the option of the issuer; and (2) the debt to equity ratio of the holding company would be at or remain below .30:1 following the redemption or retirement of any preferred stock. Preferred stock that is convertible into common stock of the holding company may be treated as equity.

⁴Dividends may be paid by small bank holding companies with debt to equity at or below 1.0:1 and otherwise meeting the requirements of §§225.14(c)(1)(ii), 225.14(c)(2), and 225.14(c)(7) if the dividends are reasonable in amount, do not adversely affect the ability of the bank holding company to service its debt in an orderly manner, and do not adversely affect the ability of the subsidiary banks to be well-capitalized. It is expected that dividends will be eliminated if the holding company is (1) not reducing its debt consistent with the requirement that the debt to equity ratio be reduced to .30:1 within 12

Small bank holding companies formed before the effective date of this policy statement may switch to a plan that adheres to the intent of this statement provided they comply with the requirements set forth above.

3. CORE REQUIREMENTS FOR ALL APPLICANTS

In assessing applications or notices by organizations subject to this policy statement, the Board will continue to take into account a full range of financial and other information about the applicant, and its current and proposed subsidiaries, including the recent trend and stability of earnings, past and prospective growth, asset quality, the ability to meet debt servicing requirements without placing an undue strain on the resources of the bank(s), and the record and competency of management. In addition, the Board will require applicants to meet the following requirements:

A. Minimum down payment: The amount of acquisition debt should not exceed 75 percent of the purchase price of the bank(s) or company to be acquired. When the owner(s) of the holding company incurs debt to finance the purchase of the bank(s) or company, such debt will be considered acquisition debt even though it does not represent an obligation of the bank holding company, unless the owner(s) can demonstrate that such debt can be serviced without reliance on the resources of the bank(s) or bank holding company.

B. Ability to reduce parent company leverage: The bank holding company must clearly be able to reduce its debt to equity ratio and comply with its loan agreement(s) as set forth in paragraph 2A above.

Failure to meet the criteria in this section would normally result in denial of an application.

4. ADDITIONAL APPLICATION REQUIREMENTS FOR EXPEDITED/WAIVED PROCESSING

A. Expedited notices under §§225.14 and 225.23 of Regulation Y: A small bank holding company proposal will be eligible for the expedited processing procedures set forth in §§225.14 and 225.23 of Regulation Y if the bank holding company is in compliance with the ongoing requirements of this policy statement, the bank holding company meets the core requirements for all applicants noted above, and the following requirements are met:

- i. The parent bank holding company has a *pro forma* debt to equity ratio of 1.0:1 or less.
- ii. The bank holding company meets all of the criteria for expedited action set forth in §§225.14 or 225.23 of Regulation Y.

years of consummation of the proposal or (2) not meeting the requirements of its loan agreement(s).

Pt. 225, App. D

B. Waiver of stock redemption filing: A small bank holding company will be eligible for the stock redemption filing exception for well-capitalized bank holding companies contained in §225.4(b)(6) if the following requirements are met:

- i. The parent bank holding company has a *pro forma* debt to equity ratio of 1.0:1 or less.
- ii. The bank holding company is in compliance with the ongoing requirements of this policy statement and meets the requirements of §§225.14(c)(1)(ii), 225.14(c)(2), and 225.14(c)(7) of Regulation Y.

[Reg. Y, 62 FR 9343, Feb. 28, 1997, as amended at 71 FR 9902, Feb. 28, 2006; 74 FR 26081, June 1, 2009]

APPENDIX D TO PART 225—CAPITAL ADEQUACY GUIDELINES FOR BANK HOLDING COMPANIES: TIER 1 LEVERAGE MEASURE

I. OVERVIEW

a. The Board of Governors of the Federal Reserve System has adopted a minimum ratio of tier 1 capital to total assets to assist in the assessment of the capital adequacy of bank holding companies (banking organizations).¹ The principal objectives of this measure is to place a constraint on the maximum degree to which a banking organization can leverage its equity capital base. It is intended to be used as a supplement to the risk-based capital measure.

b. The tier 1 leverage guidelines apply on a consolidated basis to any bank holding company with consolidated assets of \$500 million or more. The tier 1 leverage guidelines also apply on a consolidated basis to any bank holding company with consolidated assets of less than \$500 million if the holding company (i) is engaged in significant nonbanking activities either directly or through a nonbank subsidiary; (ii) conducts significant off-balance sheet activities (including securitization and asset management or administration) either directly or through a nonbank subsidiary; or (iii) has a material amount of debt or equity securities outstanding (other than trust preferred securities) that are registered with the Securities and Exchange Commission. The Federal Reserve may apply the tier 1 leverage guidelines at its discretion to any bank holding company, regardless of asset size, if such action is warranted for supervisory purposes.²

c. The tier 1 leverage guidelines are to be used in the inspection and supervisory process as well as in the analysis of applications acted upon by the Federal Reserve. The

¹Supervisory ratios that related capital to total assets for state member banks are outlined in appendix B of this part.

²[Reserved]

12 CFR Ch. II (1–1–10 Edition)

Board will review the guidelines from time to time and will consider the need for possible adjustments in light of any significant changes in the economy, financial markets, and banking practices.

II. THE TIER 1 LEVERAGE RATIO

a. The Board has established a minimum ratio of Tier 1 capital to total assets of 3.0 percent for strong bank holding companies (rated composite “1” under the BOPEC rating system of bank holding companies), and for bank holding companies that have implemented the Board’s risk-based capital measure for market risk as set forth in appendices A and E of this part. For all other bank holding companies, the minimum ratio of Tier 1 capital to total assets is 4.0 percent. Banking organizations with supervisory, financial, operational, or managerial weaknesses, as well as organizations that are anticipating or experiencing significant growth, are expected to maintain capital ratios well above the minimum levels. Moreover, higher capital ratios may be required for any bank holding company if warranted by its particular circumstances or risk profile. In all cases, bank holding companies should hold capital commensurate with the level and nature of the risks, including the volume and severity of problem loans, to which they are exposed.

b. A banking organization’s tier 1 leverage ratio is calculated by dividing its tier 1 capital (the numerator of the ratio) by its average total consolidated assets (the denominator of the ratio). The ratio will also be calculated using period-end assets whenever necessary, on a case-by-case basis. For the purpose of this leverage ratio, the definition of tier 1 capital as set forth in the risk-based capital guidelines contained in appendix A of this part will be used. As a general matter, average total consolidated assets are defined as the quarterly average total assets (defined net of the allowance for loan and lease losses) reported on the organization’s Consolidated Financial Statements (FR Y-9C Report), less goodwill; amounts of mortgage servicing assets, nonmortgage servicing assets, and purchased credit card relationships that, in the aggregate, are in excess of 100 percent of Tier 1 capital; amounts of nonmortgage servicing assets and purchased credit card relationships that, in the aggregate, are in excess of 25 percent of Tier 1 capital; amounts of credit-enhancing interest-only strips that are in excess of 25 percent of Tier 1 capital; all other identifiable intangible assets; any investments in subsidiaries or associated companies that the Federal Reserve determines should be deducted from Tier 1 capital; deferred tax assets that are dependent upon future taxable income, net of their valuation allowance, in excess of the
