§ 121.104 How does SBA calculate annual receipts?

(a) Receipts means “total income” (or in the case of a sole proprietorship, “gross income”) plus “cost of goods sold” as these terms are defined and reported on Internal Revenue Service (IRS) tax return forms (such as Form 1120 for corporations; Form 1120S and Schedule K for S corporations; Form 1120, Form 1065 or Form 1040 for LLCs; Form 1065 and Schedule K for partnerships; Form 1040, Schedule F for farms; Form 1040, Schedule C for other sole proprietorships). Receipts do not include net capital gains or losses; taxes collected for and remitted to a taxing authority if included in gross or total income, such as sales or other taxes collected from customers and excluding taxes levied on the concern or its employees; proceeds from transactions between a concern and its domestic or foreign affiliates; and amounts collected for another by a travel agent, real estate agent, advertising agent, conference management service provider, freight forwarder or customs broker. For size determination purposes, the only exclusions from receipts are those specifically provided for in this paragraph. All other items, such as subcontractor costs, reimbursements for purchases a contractor makes at a customer’s request, and employee-based costs such as payroll taxes, may not be excluded from receipts.

(1) The Federal income tax return and any amendments filed with the IRS on or before the date of self-certification must be used to determine the size status of a concern. SBA will not use tax returns or amendments filed with the IRS after the initiation of a size determination.

(2) When a concern has not filed a Federal income tax return with the IRS for a fiscal year which must be included in the period of measurement, SBA will calculate the concern’s annual receipts for that year using any other available information, such as the concern’s regular books of account, audited financial statements, or information contained in an affidavit by a person with personal knowledge of the facts.

(b) Completed fiscal year means a taxable year including any short year. “Taxable year” and “short year” have the meanings attributed to them by the IRS.

(c) Period of measurement. (1) Annual receipts of a concern that has been in business for three or more completed fiscal years means the total receipts of the concern over its most recently completed three fiscal years divided by three.

(2) Annual receipts of a concern which has been in business for less than three complete fiscal years means the total receipts for the period the concern has been in business divided by the number of weeks in business, multiplied by 52.

(3) Where a concern has been in business three or more complete fiscal years but has a short year as one of the years within its period of measurement, annual receipts means the total receipts for the short year and the two full fiscal years divided by the total
number of weeks in the short year and the two full fiscal years, multiplied by 52.

(d) Annual receipts of affiliates. (1) The average annual receipts size of a business concern with affiliates is calculated by adding the average annual receipts of the business concern with the average annual receipts of each affiliate.

(2) If a concern has acquired an affiliate or been acquired as an affiliate during the applicable period of measurement or before the date on which it self-certified as small, the annual receipts used in determining size status includes the receipts of the acquired or acquiring concern. Furthermore, this aggregation applies for the entire period of measurement, not just the period after the affiliation arose.

(3) If the business concern or an affiliate has been in business for a period of less than three years, the receipts for the fiscal year with less than a 12 month period are annualized in accordance with paragraph (c)(2) of this section. Receipts are determined for the concern and its affiliates in accordance with paragraph (c) of this section even though this may result in using a different period of measurement to calculate an affiliate’s annual receipts.

(4) The annual receipts of a former affiliate are not included if affiliation ceased before the date used for determining size. This exclusion of annual receipts of a former affiliate applies during the entire period of measurement, rather than only for the period after which affiliation ceased.

(e) Unless otherwise defined in this section, all terms shall have the meaning attributed to them by the IRS.

§ 121.106 How does SBA calculate number of employees?

(a) In determining a concern’s number of employees, SBA counts all individuals employed on a full-time, part-time, or other basis. This includes employees obtained from a temporary employee agency, professional employee organization or leasing concern. SBA will consider the totality of the circumstances, including criteria used by the IRS for Federal income tax purposes, in determining whether individuals are employees of a concern. Volunteers (i.e., individuals who receive no compensation, including no in-kind compensation, for work performed) are not considered employees.
