§ 121.405 May a business concern self-certify its small business size status?

(a) A concern must self-certify it is small under the size standard specified in the solicitation, or as clarified, completed or supplied by SBA pursuant to §121.402(d).

(b) A contracting officer may accept a concern's self-certification as true for the particular procurement involved in the absence of a written protest by other offerors or other credible information which causes the contracting officer or SBA to question the size of the concern.

(c) Procedures for protesting the self-certification of an offeror are set forth in §§121.1001 through 121.1009.

§ 121.406 How does a small business concern qualify to provide manufactured products under small business set-aside or 8(a) contracts?

(a) General. In order to qualify as a small business concern for a small business set-aside or 8(a) contract to provide manufactured products, an offeror must either:

(1) Be the manufacturer of the end item being procured (and the end item must be manufactured or produced in the United States); or

(2) Comply with the requirements of paragraph (b), (c) or (d) of this section as a nonmanufacturer, a kit assembler or a supplier under Simplified Acquisition Procedures.

(b) Nonmanufacturers. (1) A concern may qualify for a requirement to provide manufactured products as a nonmanufacturer if it:

(i) Does not exceed 500 employees;

(ii) Is primarily engaged in the retail or wholesale trade and normally sells the type of item being supplied; and

(iii) Will supply the end item of a small business manufacturer or processor made in the United States, or obtains a waiver of such requirement pursuant to paragraph (b)(3) of this section.

(2) For size purposes, there can be only one manufacturer of the end item being acquired. The manufacturer is the concern which, with its own facilities, performs the primary activities in transforming inorganic or organic substances, including the assembly of parts and components, into the end item being acquired. The end item must possess characteristics which, as a result of mechanical, chemical or human action, it did not possess before the original substances, parts or components were assembled or transformed. The end item may be finished and ready for utilization or consumption, or it may be semifinished as a raw material to be used in further manufacturing. Firms which perform only minimal operations upon the item being procured do not qualify as manufacturers of the end item. Firms that add substances, parts, or components to an existing end item to modify its performance will not be considered the end item manufacturer where those identical modifications can be performed by and are available from the manufacturer of the existing end item:

(i) SBA will evaluate the following factors in determining whether a concern is the manufacturer of the end item:

(A) The proportion of total value in the end item added by the efforts of the concern, excluding costs of overhead, testing, quality control, and profit;

(B) The importance of the elements added by the concern to the function of the end item, regardless of their relative value; and
