### Subpart G—Production Certificates

SOURCE: Docket No. 5085, 29 FR 14569, Oct. 24, 1964, unless otherwise noted.

EFFECTIVE DATE NOTE: By Doc. No. FAA-2006-25877, 74 FR 53887, Oct. 16, 2009, subpart G of part 21 was revised, effective Apr. 14, 2010. For the convenience of the user, the new subpart G follows the text of this subpart.

**§ 21.131 Applicability.**

This subpart prescribes procedural requirements for the issue of production certificates and rules governing the holders of those certificates.

**§ 21.133 Eligibility.**

(a) Any person may apply for a production certificate if he holds, for the product concerned, a—

- (1) Current type certificate;
- (2) Right to the benefits of that type certificate under a licensing agreement; or
- (3) Supplemental type certificate.

(b) Each application for a production certificate must be made in a form and manner prescribed by the Administrator.

**§ 21.135 Requirements for issuance.**

An applicant is entitled to a production certificate if the Administrator

finds, after examination of the supporting data and after inspection of the organization and production facilities, that the applicant has complied with §§ 21.139 and 21.143.

**§ 21.137 Location of manufacturing facilities.**

The Administrator does not issue a production certificate if the manufacturing facilities concerned are located outside the United States, unless the Administrator finds no undue burden on the United States in administering the applicable requirements of the Federal Aviation Act of 1958 or of the Federal Aviation Regulations.

**§ 21.139 Quality control.**

The applicant must show that he has established and can maintain a quality control system for any product, for which he requests a production certificate, so that each article will meet the design provisions of the pertinent type certificate.

**§ 21.143 Quality control data requirements; prime manufacturer.**

(a) Each applicant must submit, for approval, data describing the inspection and test procedures necessary to ensure that each article produced conforms to the type design and is in a condition for safe operation, including as applicable—

(1) A statement describing assigned responsibilities and delegated authority of the quality control organization, together with a chart indicating the functional relationship of the quality control organization to management and to other organizational components, and indicating the chain of authority and responsibility within the quality control organization;

(2) A description of inspection procedures for raw materials, purchased items, and parts and assemblies produced by manufacturers' suppliers including methods used to ensure acceptable quality of parts and assemblies that cannot be completely inspected for conformity and quality when delivered to the prime manufacturer's plant;

(3) A description of the methods used for production inspection of individual
