computed using a one-engine-inoperative cruise speed under standard conditions in still air.

**ETOPS Entry Point** means the first point on the route of an ETOPS flight, determined using a one-engine-inoperative cruise speed under standard conditions in still air, that is—

1. More than 60 minutes from an adequate airport for airplanes with two engines;
2. More than 180 minutes from an adequate airport for passenger-carrying airplanes with more than two engines.

**ETOPS Qualified Person** means a person, performing maintenance for the certificate holder, who has satisfactorily completed the certificate holder’s ETOPS training program.

**Maximum Diversion Time** means, for the purposes of ETOPS route planning, the longest diversion time authorized for a flight under the operator’s ETOPS authority. It is calculated under standard conditions in still air at a one-engine-inoperative cruise speed.

**North Pacific Area of Operation** means Pacific Ocean areas north of 40° N latitudes including NOPAC ATS routes, and published PACOTS tracks between Japan and North America.

**North Polar Area** means the entire area north of 78° N latitude.

**One-engine-inoperative-Cruise Speed** means a speed within the certified operating limits of the airplane that is specified by the certificate holder and approved by the FAA for—

1. Calculating required fuel reserves needed to account for an inoperative engine; or
2. Determining whether an ETOPS alternate is within the maximum diversion time authorized for an ETOPS flight.

**South Polar Area** means the entire area South of 60° S latitude.
