

(2) *Label size and text font.* The label shall be four inches wide and three inches high. The text font shall be Arial or another equivalent font. The text on the label shall be black with a white background. The label's text size and content, and the order of the required disclosures shall be consistent with Ceiling Fan Label Illustration of appendix L of this part.

(3) *Placement.* The ceiling fan label shall be printed on the principal display panel of the product's packaging.

(4) *Additional information.* No marks or information other than that specified in this part shall appear on this label, except a model name, number, or similar identifying information.

(b) [Reserved]

[73 FR 63068, Oct. 23, 2008]

§ 305.14 Energy information disclosures for heating and cooling equipment.

(a) *Required information:* Manufacturers and private labelers of central air conditioners, heat pumps, and furnaces (including boilers) must provide energy information about the equipment they sell to distributors and retailers, including contractors. This information can be provided through means such as fact sheets, product brochures, and directories. All required information must be disclosed clearly and conspicuously. The information must include:

(1) Name of manufacturer or private labeler which, in the case of a corporation, shall be deemed to be satisfied only by the actual corporate name, which may be preceded or followed by the name of the particular division of the corporation. In the case of an individual, partnership, or association, the name under which the business is conducted shall be used;

(2) Trade name (if different from manufacturer);

(3) Model number(s) given by the manufacturer or private labeler;

(4) Capacity or size as determined in accordance with § 305.7;

(5) Energy efficiency rating as determined in accordance with § 305.5. The energy efficiency rating(s) for split system condenser-evaporator coil combinations shall be either:

(i) The energy efficiency rating of the actual condenser-evaporator coil com-

bination comprising the listed split system; or

(ii) The energy efficiency rating of the condenser-evaporator coil combination that is the particular manufacturer's most commonly sold combination for that condenser model.

(6) Ranges of comparability and of energy efficiency ratings found in the appropriate appendices accompanying this part.

(7) A statement that the energy efficiency ratings are based on U.S. Government standard tests.

(8) If the "most common" condenser-evaporator coil combinations are given for central air conditioners and heat pump efficiency ratings pursuant to § 305.14(a)(5)(ii), the statement required by § 305.14(a)(7) as follows:

(i) For information disclosing the seasonal energy efficiency ratio for cooling, the statement should read:

This energy rating is based on U.S. Government standard tests of this condenser model combined with the most common coil. The rating may vary slightly with different coils.

(ii) For information disclosing both the seasonal energy efficiency ratio for cooling and the heating seasonal performance factor for heating, the statement should read:

This energy rating is based on U.S. Government standard tests of this condenser model combined with the most common coil. The rating will vary slightly with different coils and in different geographic regions.

(iii) For information disclosing the heating seasonal performance factor for heating, the statement should read:

This energy rating is based on U.S. Government standard tests of this condenser model combined with the most common coil. The rating will vary slightly with different coils and in different geographic regions.

(9) For central air conditioners disclosing the efficiency ratings for specific condenser/coil combinations pursuant to § 305.14(a)(5)(i), a general disclosure that the efficiency ratings are based on U.S. Government tests.

(b) *Distribution.* (1) Manufacturers and private labelers must give distributors and retailers, including assemblers, the information specified under § 305.14(a) for the central air conditioners, heat pumps, and furnaces (including boilers) they sell to them. This information may be provided in paper or electronic form (including Internet-based access).

§ 305.15

16 CFR Ch. I (1–1–10 Edition)

Distributors must give this information to retailers, including assemblers, they supply.

(2) Retailers, including assemblers, who sell central air conditioners, heat pumps, and furnaces (including boilers) to consumers must make the information specified under §305.14(a) available to customers in any manner, as long as customers are likely to notice it. For example, it may be available in a display, where customers can take copies of them. It may be kept in a binder or made available electronically at a counter or service desk, with a sign telling customers where the required information is.

(3) Retailers, including assemblers, who negotiate or make sales at a place other than their regular places of business must show the required information to their customers and let them read the information before they agree to purchase the product. If the information is Internet-based, retailers, including assemblers, who negotiate or make sales at a place other than their regular places of business, may choose to provide customers with instructions to access such information in lieu of showing them a paper version of the information. Retailers who choose to use the Internet for the required information, must let customers read such information before the customers agree to purchase the product.

[72 FR 49971, Aug. 29, 2007]

§ 305.15 Labeling for lighting products.

(a) *Fluorescent lamp ballasts and luminaires*—(1) *Contents*. Fluorescent lamp ballasts that are “covered products,” as defined in §305.2(n), and to which standards are applicable under section 325 of the Act, shall be marked conspicuously, in color-contrasting ink, with a capital letter “E” printed within a circle. Packaging for such fluorescent lamp ballasts, as well as packaging for luminaires into which they are incorporated, shall also be marked conspicuously with a capital letter “E” printed within a circle. For purposes of this section, the encircled capital letter “E” will be deemed “conspicuous,” in terms of size, if it is as large as either the manufacturer’s name or another logo, such as the “UL,” “CBM” or “ETL” logos, whichever is larger,

that appears on the fluorescent lamp ballast, the packaging for such ballast or the packaging for the luminaire into which the covered ballast is incorporated, whichever is applicable for purpose of labeling.

(2) *Product labeling*. The encircled capital letter “E” on fluorescent lamp ballasts must appear conspicuously, in color-contrasting ink, (i.e., in a color that contrasts with the background on which the encircled capital letter “E” is placed) on the surface that is normally labeled. It may be printed on the label that normally appears on the fluorescent lamp ballast, printed on a separate label, or stamped indelibly on the surface of the fluorescent lamp ballast.

(3) *Package labeling*. For purposes of labeling under this section, packaging for such fluorescent lamp ballasts and the luminaires into which they are incorporated consists of the plastic sheeting, or “shrink-wrap,” covering pallet loads of fluorescent lamp ballasts or luminaires as well as any containers in which such fluorescent lamp ballasts or the luminaires into which they are incorporated are marketed individually or in small numbers. The encircled capital letter “E” on packages containing fluorescent lamp ballasts or the luminaires into which they are incorporated must appear conspicuously, in color-contrasting ink, on the surface of the package on which printing or a label normally appears. If the package contains printing on more than one surface, the label must appear on the surface on which the product inside the package is described. The encircled capital letter “E” may be printed on the surface of the package, printed on a label containing other information, printed on a separate label, or indelibly stamped on the surface of the package. In the case of pallet loads containing fluorescent lamp ballasts or the luminaires into which they are incorporated, the encircled capital letter “E” must appear conspicuously, in color-contrasting ink, on the plastic sheeting, unless clear plastic sheeting is used and the encircled capital letter “E” is legible underneath this packaging. The encircled capital letter “E” must also appear conspicuously on any documentation that would normally
