

§ 801.4

§ 801.4 Project review.

(a) The Compact provides generally that no project affecting the water resources of the basin shall be undertaken by any person, governmental authority, or other entity prior to approval by the Commission.

(b) In many instances, one or more of the signatory parties will exercise project review authority regarding proposed projects in the basin coming under the review of the Commission. Accordingly the Commission will direct its attention to reviewing the completeness and effectiveness of the review procedures of the signatories and will endeavor to minimize duplication of staff effort, and time and cost to the applicant.

(c) The Commission will establish exempt categories in accordance with the section 3.10-3 of the Compact, and for projects determined not to have a substantial effect on the water resources of the basin. In dealing with Federal or federally licensed projects, the Commission will take the provisions of reservations (r) and (w) of United States Pub. L. 91-575 (84 Stat. 1509) and provisions of the Compact into account.

(d) It is expected that project review procedures will be modified following adoption of the comprehensive plan. In the meantime the Commission will:

(1) Base its review and comments pertaining to proposed projects within the basin coming under the purview of the Commission, on review and comments of signatory parties. In general, the Commission review will seek to ascertain the completeness of procedures followed by the signatory parties in their review, and will refrain from specifically rechecking detailed evaluations. (Susquehanna River Basin Commission Resolution No. 72-5)

(2) Require as it determines necessary, submission of pertinent project plans and documents for its independent review and approval. The purpose of this review will be to ascertain whether all relevant provisions of the Compact and actions taken pursuant thereto have been observed:

(i) When the Commission has determined that a project may have significant effect on the water resources of the basin.

18 CFR Ch. VIII (4-1-10 Edition)

(ii) When a proposed project does not fall under the review jurisdiction of any agency of the signatory parties.

§ 801.5 Comprehensive plan.

(a) The Compact requires that the Commission formulate and adopt a comprehensive plan for the immediate and long-range development and use of the water resources of the basin.

(1) The plan will include existing and proposed public and private programs, projects, and facilities which are required, in the judgment of the Commission, to meet present and future water resources needs of the basin. Consideration shall be given to the effect of the plan, or any part of the plan, on the receiving waters of the Chesapeake Bay. The Commission shall consult with interested public bodies and public utilities and fully consider the findings and recommendations of the signatory parties, their various subdivisions and interested groups. Prior to adoption of the plan the Commission shall conduct at least one public hearing in each signatory State.

(2) The plan will reflect consideration, of the multiobjectives of national economy, regional development and environmental quality; and multipurpose use of projects.

(3) Water quantity and water quality planning will be studied together and correlated to the extent feasible, with existing and proposed land uses. The development of a basinwide land use study to enable full consideration of basic and alternative proposals to meet water resources needs will be explored.

(4) An important phase of the plan formulation process is a thorough review and evaluation of the Susquehanna River Basin Coordinating Committee Study report, pertinent plans and reports of the signatories, including water quality standards and other data available. The findings and recommendations presented in the Susquehanna River Basin Coordinating Committee Study report will be considered for incorporation in the Commission's plan to the extent they are feasible and compatible with the current and projected needs and interests.

(5) Essentially the comprehensive plan will reflect the findings of an analysis of a mix of alternative futures
