§ 351.520 Export insurance.

(a) Benefit—(1) In general. In the case of export insurance, a benefit exists if the premium rates charged are inadequate to cover the long-term operating costs and losses of the program.

(2) Amount of the benefit. If the Secretary determines under paragraph (a)(1) of this section that premium rates are inadequate, the Secretary normally will calculate the amount of the benefit as the difference between the amount of premiums paid by the firm and the amount received by the firm under the insurance program during the period of investigation or review.

(b) Time of receipt of benefit. In the case of export insurance, the Secretary normally will consider the benefit as having been received in the year in which the difference described in paragraph (a)(2) of this section occurs.

(c) Allocation of benefit to a particular time period. The Secretary normally will allocate (expense) the benefit from export insurance to the year in which the benefit is considered to have been received under paragraph (b) of this section.

§ 351.521 Import substitution subsidies. [Reserved]

§ 351.522 Green light and green box subsidies.

(a) Certain agricultural subsidies. The Secretary will treat as non-countervailable domestic support measures that are provided to certain agricultural products (i.e., products listed in Annex 1 of the WTO Agreement on Agriculture) and that the Secretary determines conform to the criteria of Annex 2 of the WTO Agreement on Agriculture. See section 771(5B)(F) of the Act. The Secretary will determine that a particular domestic support measure conforms fully to the provisions of Annex 2 if the Secretary finds that the measure:

(1) Is provided through a publicly-funded government program (including government revenue foregone) not involving transfers from consumers;

(2) Does not have the effect of providing a price support to producers; and

(3) Meets the relevant policy-specific criteria and conditions set out in paragraphs 2 through 13 of Annex 2.

(b) Research subsidies. In accordance with section 771(5B)(B)(iii)(II) of the Act, the Secretary will examine the total eligible costs to be incurred over the duration of a particular project to determine whether a subsidy for research activities exceeds 75 percent of the costs of industrial research, 50 percent of the costs of precompetitive development activity, or 62.5 percent of the costs for a project that includes both industrial research and precompetitive activity. If the Secretary determines that, at some point over the life of a particular project, these relevant thresholds will be exceeded, the Secretary will treat the entire amount of the subsidy as countervailable.

(c) Subsidies for adaptation of existing facilities to new environmental requirements. If the Secretary determines that a subsidy is given to upgrade existing facilities to environmental standards in excess of minimum statutory or regulatory requirements, the subsidy will not qualify for non-countervailable treatment under section 771(5B)(D) of the Act and the Secretary will treat the entire amount of the subsidy as countervailable.

§ 351.523 Upstream subsidies.

(a) Investigation of upstream subsidies—(1) In general. Before investigating the existence of an upstream subsidy (see section 771A of the Act), the Secretary must have a reasonable basis to believe or suspect that all of the following elements exist:

(i) A countervailable subsidy, other than an export subsidy, is provided with respect to an input product;

(ii) One of the following conditions exists:

(A) The supplier of the input product and the producer of the subject merchandise are affiliated;

(B) The price for the subsidized input product is lower than the price that the producer of the subject merchandise otherwise would pay another seller in an arm’s-length transaction for an unsubsidized input product; or

(C) The government sets the price of the input product so as to guarantee that the benefit provided with respect
