

to the input product is passed through to producers of the subject merchandise; and

(iii) The *ad valorem* countervailable subsidy rate on the input product, multiplied by the proportion of the total production costs of the subject merchandise accounted for by the input product, is equal to, or greater than, one percent.

(b) *Input product.* For purposes of this section, “input product” means any product used in the production of the subject merchandise.

(c) *Competitive benefit—(1) In general.* In evaluating whether a competitive benefit exists under section 771A(b) of the Act, the Secretary will determine whether the price for the subsidized input product is lower than the benchmark input price. For purposes of this section, the Secretary will use as a benchmark input price the following, in order of preference:

(i) The actual price paid by, or offered to, the producer of the subject merchandise for an unsubsidized input product, including an imported input product;

(ii) An average price for an unsubsidized input product, including an imported input product, based upon publicly available data;

(iii) The actual price paid by, or offered to, the producer of the subject merchandise for a subsidized input product, including an imported input product, that is adjusted to account for the countervailable subsidy;

(iv) An average price for a subsidized input product, including an imported input product, based upon publicly available data, that is adjusted to account for the countervailable subsidy; or

(v) An unadjusted price for a subsidized input product or any other surrogate price deemed appropriate by the Secretary.

For purposes of this section, such prices must be reflective of a time period that reasonably corresponds to the time of the purchase of the input.

(2) *Use of delivered prices.* The Secretary will use a delivered price whenever the Secretary uses the price of an input product under paragraph (c)(1) of this section.

(d) *Significant effect—(1) Presumptions.* In evaluating whether an upstream subsidy has a significant effect on the cost of manufacturing or producing the subject merchandise (see section 771A(a)(3) of the Act), the Secretary will multiply the *ad valorem* countervailable subsidy rate on the input product by the proportion of the total production cost of the subject merchandise that is accounted for by the input product. If the product of that multiplication exceeds five percent, the Secretary will presume the existence of a significant effect. If the product is less than one percent, the Secretary will presume the absence of a significant effect. If the product is between one and five percent, there will be no presumption.

(2) *Rebuttal of presumptions.* A party to the proceeding may present information to rebut these presumptions. In evaluating such information, the Secretary will consider the extent to which factors other than price, such as quality differences, are important determinants of demand for the subject merchandise.

#### § 351.524 Allocation of benefit to a particular time period.

Unless otherwise specified in §§ 351.504–351.523, the Secretary will allocate benefits to a particular time period in accordance with this section.

(a) *Recurring benefits.* The Secretary will allocate (expense) a recurring benefit to the year in which the benefit is received.

(b) *Non-recurring benefits—(1) In general.* The Secretary will normally allocate a non-recurring benefit to a firm over the number of years corresponding to the average useful life (“AUL”) of renewable physical assets as defined in paragraph (d)(2) of this section.

(2) *Exception.* The Secretary will normally allocate (expense) non-recurring benefits provided under a particular subsidy program to the year in which the benefits are received if the total amount approved under the subsidy program is less than 0.5 percent of relevant sales (e.g., total sales, export sales, the sales of a particular product, or the sales to a particular market) of the firm in question during the year in which the subsidy was approved.

(c) “Recurring” versus “non-recurring” benefits—(1) *Non-binding illustrative lists of recurring and non-recurring benefits.* The Secretary normally will treat the following types of subsidies as providing recurring benefits: Direct tax exemptions and deductions; exemptions and excessive rebates of indirect taxes or import duties; provision of goods and services for less than adequate remuneration; price support payments; discounts on electricity, water, and other utilities; freight subsidies; export promotion assistance; early retirement payments; worker assistance; worker training; wage subsidies; and upstream subsidies. The Secretary normally will treat the following types of subsidies as providing non-recurring benefits: equity infusions, grants, plant closure assistance, debt forgiveness, coverage for operating losses, debt-to-equity conversions, provision of non-general infrastructure, and provision of plant and equipment.

(2) *The test for determining whether a benefit is recurring or non-recurring.* If a subsidy is not on the illustrative lists, or is not addressed elsewhere in these regulations, or if a party claims that a subsidy on the recurring list should be treated as non-recurring or a subsidy on the non-recurring list should be treated as recurring, the Secretary will consider the following criteria in determining whether the benefits from the subsidy should be considered recurring or non-recurring:

(i) Whether the subsidy is exceptional in the sense that the recipient cannot expect to receive additional subsidies under the same program on an ongoing basis from year to year;

(ii) Whether the subsidy required or received the government’s express authorization or approval (*i.e.*, receipt of benefits is not automatic), or

(iii) Whether the subsidy was provided for, or tied to, the capital structure or capital assets of the firm.

(d) *Process for allocating non-recurring benefits over time*—(1) *In general.* For purposes of allocating a non-recurring benefit over time and determining the annual benefit amount that should be assigned to a particular year, the Secretary will use the following formula:

$$A_k = \frac{y/n + [y - (y/n)(k - 1)]d}{1 + d}$$

Where:

$A_k$  = the amount of the benefit allocated to year  $k$ ,

$y$  = the face value of the subsidy,

$n$  = the AUL (see paragraph (d)(2) of this section),

$d$  = the discount rate (see paragraph (d)(3) of this section), and

$k$  = the year of allocation, where the year of receipt = 1 and  $1 \leq k \leq n$ .

(2) *AUL*—(i) *In general.* The Secretary will presume the allocation period for non-recurring subsidies to be the AUL of renewable physical assets for the industry concerned as listed in the Internal Revenue Service’s (“IRS”) 1977 Class Life Asset Depreciation Range System (Rev. Proc. 77-10, 1977-1, C.B. 548 (RR-38)), as updated by the Department of Treasury. The presumption will apply unless a party claims and establishes that the IRS tables do not reasonably reflect the company-specific AUL or the country-wide AUL for the industry under investigation, subject to the requirement, in paragraph (d)(2)(ii) of this section, that the difference between the company-specific AUL or country-wide AUL for the industry under investigation and the AUL in the IRS tables is significant. If this is the case, the Secretary will use company-specific or country-wide AULs to allocate non-recurring benefits over time (*see* paragraph (d)(2)(iii) of this section).

(ii) *Definition of “significant.”* For purposes of this paragraph (d), *significant* means that a party has demonstrated that the company-specific AUL or country-wide AUL for the industry differs from AUL in the IRS tables by one year or more.

(iii) *Calculation of a company-specific or country-wide AUL.* A calculation of a company-specific AUL will not be accepted by the Secretary unless it satisfies the following requirements: the company must base its depreciation on an estimate of the actual useful lives of assets and it must use straight-line depreciation or demonstrate that its calculation is not distorted through irregular or uneven additions to the pool of fixed assets. A company-specific AUL is calculated by dividing the aggregate

of the annual average gross book values of the firm's depreciable productive fixed assets by the firm's aggregated annual charge to accumulated depreciation, for a period considered appropriate by the Secretary, subject to appropriate normalizing adjustments. A country-wide AUL for the industry under investigation will not be accepted by the Secretary unless the respondent government demonstrates that it has a system in place to calculate AULs for its industries, and that this system provides a reliable representation of AUL.

(iv) *Exception.* Under certain extraordinary circumstances, the Secretary may consider whether an allocation period other than AUL is appropriate or whether the benefit stream begins at a date other than the date the subsidy was bestowed.

(3) *Selection of a discount rate.* (i) *In general.* The Secretary will select a discount rate based upon data for the year in which the government agreed to provide the subsidy. The Secretary will use as a discount rate the following, in order of preference:

(A) The cost of long-term, fixed-rate loans of the firm in question, excluding any loans that the Secretary has determined to be countervailable subsidies;

(B) The average cost of long-term, fixed-rate loans in the country in question; or

(C) A rate that the Secretary considers to be most appropriate.

(ii) *Exception for uncreditworthy firms.* In the case of a firm considered by the Secretary to be uncreditworthy (see § 351.505(a)(4)), the Secretary will use as a discount rate the interest rate described in § 351.505(a)(3)(iii).

**§ 351.525 Calculation of ad valorem subsidy rate and attribution of subsidy to a product.**

(a) *Calculation of ad valorem subsidy rate.* The Secretary will calculate an ad valorem subsidy rate by dividing the amount of the benefit allocated to the period of investigation or review by the sales value during the same period of the product or products to which the Secretary attributes the subsidy under paragraph (b) of this section. Normally, the Secretary will determine the sales value of a product on an f.o.b. (port)

basis (if the product is exported) or on an f.o.b. (factory) basis (if the product is sold for domestic consumption). However, if the Secretary determines that countervailable subsidies are provided with respect to the movement of a product from the port or factory to the place of destination (e.g., freight or insurance costs are subsidized), the Secretary may make appropriate adjustments to the sales value used in the denominator.

(b) *Attribution of subsidies—(1) In general.* In attributing a subsidy to one or more products, the Secretary will apply the rules set forth in paragraphs (b)(2) through (b)(7) of this section.

(2) *Export subsidies.* The Secretary will attribute an export subsidy only to products exported by a firm.

(3) *Domestic subsidies.* The Secretary will attribute a domestic subsidy to all products sold by a firm, including products that are exported.

(4) *Subsidies tied to a particular market.* If a subsidy is tied to sales to a particular market, the Secretary will attribute the subsidy only to products sold by the firm to that market.

(5) *Subsidies tied to a particular product.* (i) *In general.* If a subsidy is tied to the production or sale of a particular product, the Secretary will attribute the subsidy only to that product.

(ii) *Exception.* If a subsidy is tied to production of an input product, then the Secretary will attribute the subsidy to both the input and downstream products produced by a corporation.

(6) *Corporations with cross-ownership.* (i) *In general.* The Secretary normally will attribute a subsidy to the products produced by the corporation that received the subsidy.

(ii) *Corporations producing the same product.* If two (or more) corporations with cross-ownership produce the subject merchandise, the Secretary will attribute the subsidies received by either or both corporations to the products produced by both corporations.

(iii) *Holding or parent companies.* If the firm that received a subsidy is a holding company, including a parent company with its own operations, the Secretary will attribute the subsidy to the consolidated sales of the holding company and its subsidiaries. However, if the Secretary finds that the holding
