

may require the use of generic equivalents where they are available.

**§ 10.311 What are the special rules for the services of chiropractors?**

(a) The services of chiropractors that may be reimbursed are limited by the FECA to treatment to correct a spinal subluxation. The costs of physical and related laboratory tests performed by or required by a chiropractor to diagnose such a subluxation are also payable.

(b) In accordance with 5 U.S.C. 8101(3), a diagnosis of spinal "subluxation as demonstrated by X-ray to exist" must appear in the chiropractor's report before OWCP can consider payment of a chiropractor's bill.

(c) A chiropractor may interpret his or her x-rays to the same extent as any other physician. To be given any weight, the medical report must state that x-rays support the finding of spinal subluxation. OWCP will not necessarily require submittal of the x-ray, or a report of the x-ray, but the report must be available for submittal on request.

(d) A chiropractor may also provide services in the nature of physical therapy under the direction of a qualified physician.

**§ 10.312 What are the special rules for the services of clinical psychologists?**

A clinical psychologist may serve as a physician only within the scope of his or her practice as defined by State law. Therefore, a clinical psychologist may not serve as a physician for conditions that include a physical component unless the applicable State law allows clinical psychologists to treat physical conditions. A clinical psychologist may also perform testing, evaluation and other services under the direction of a qualified physician.

**§ 10.313 Will OWCP pay for preventive treatment?**

The FECA does not authorize payment for preventive measures such as vaccines and inoculations, and in general, preventive treatment may be a responsibility of the employing agency under the provisions of 5 U.S.C. 7901 (see §10.303). However, OWCP can au-

thorize treatment for the following conditions, even though such treatment is designed, in part, to prevent further injury:

(a) Complications of preventive measures which are provided or sponsored by the agency, such as an adverse reaction to prophylactic immunization.

(b) Actual or probable exposure to a known contaminant due to an injury, thereby requiring disease-specific measures against infection. Examples include the provision of tetanus antitoxin or booster toxoid injections for puncture wounds; administration of rabies vaccine for a bite from a rabid or potentially rabid animal; or appropriate measures where exposure to human immunodeficiency virus (HIV) has occurred.

(c) Conversion of tuberculin reaction from negative to positive following exposure to tuberculosis in the performance of duty. In this situation, the appropriate therapy may be authorized.

(d) Where injury to one eye has resulted in loss of vision, periodic examination of the uninjured eye to detect possible sympathetic involvement of the uninjured eye at an early stage.

**§ 10.314 Will OWCP pay for the services of an attendant?**

Yes, OWCP will pay for the services of an attendant up to a maximum of \$1,500 per month, where the need for such services has been medically documented. In the exercise of the discretion afforded by 5 U.S.C. 8111(a), the Director has determined that, except where payments were being made prior to January 4, 1999, direct payments to the claimant to cover such services will no longer be made. Rather, the cost of providing attendant services will be paid under section 8103 of the Act, and medical bills for these services will be considered under §10.801. This decision is based on the following factors:

(a) The additional payments authorized under section 8111(a) should not be necessary since OWCP will authorize payment for personal care services under 5 U.S.C. 8103, whether or not such care includes medical services, so long as the personal care services have
