testing is solely responsible for the report contents and for the conclusions, explanations or comments provided with respect to the history, examination and evaluation of laboratory test results.

§ 220.62 Reviewing reports of consultative examinations.

(a) The Board will review the report of the consultative examination to determine whether the specific information requested has been furnished. The Board will consider these factors in reviewing the report:

(1) Whether the report provides evidence which serves as an adequate basis for decision-making in terms of the impairment it assesses.

(2) Whether the report is internally consistent. Whether all the diseases, impairments and complaints described in the history are adequately assessed and reported in the physical findings. Whether the conclusions correlate the findings from the claimant’s medical history, physical examination and laboratory tests and explain all abnormalities.

(3) Whether the report is consistent with the other information available to the Board within the specialty of the examination requested. Whether the report fails to mention an important or relevant complaint within the specialty that is noted on other evidence in the file (e.g., blindness in one eye, amputations, flail limbs or claw hands, etc.).

(4) Whether the report is properly signed.

(b) If the report is inadequate or incomplete, the Board will contact the examining consultative physician or psychologist, give an explanation of the Board’s evidentiary needs, and ask that the physician or psychologist furnish the missing information or prepare a revised report.

(c) Where the examination discloses new diagnostic information or test results which are significant to the claimant’s treatment, the Board will consider referral of the consultative examination report to the claimant’s treating physician or psychologist.

(d) The Board will take steps to ensure that consultative examinations are scheduled only with medical sources who have the equipment required to provide an adequate assessment and record of the level of severity of the claimant’s alleged impairments.

§ 220.63 Conflict of interest.

All implications of possible conflict of interest between Board medical consultants and their medical practices will be avoided. Board review physicians or psychologists will not perform consultative examinations for the Board’s disability programs without prior approval. In addition, they will not acquire or maintain, directly or indirectly, including any member of their families, any financial interest in a medical partnership or similar relationship in which consultative examinations are provided. Sometimes one of the Board’s review physicians or psychologists will have prior knowledge of a case (e.g., the claimant was a patient). Where this is so, the physician or psychologist will not participate in the review or determination of the case. This does not preclude the physician or psychologist from submitting medical evidence based on prior treatment or examination of the claimant.

§ 220.64 Program integrity.

The Board will not use in its program any individual or entity who is excluded, suspended, or otherwise barred from participation in the Medicare or Medicaid programs, or any other Federal or Federally-assisted program; who has been convicted, under Federal or State law, in connection with the delivery of health care services, of fraud, theft, embezzlement, breach of fiduciary responsibility or financial abuse; who has been convicted under Federal or State law of unlawful manufacture, distribution, prescription, or dispensing of a controlled substance; whose license to provide health care services is revoked or suspended by any State licensing authority for reasons bearing on professional competence, professional conduct, or financial integrity; who has surrendered such a license while formal disciplinary proceedings involving professional conduct were pending; or who has had a
