§ 404.1087 Figuring partner’s net earnings from self-employment for taxable year which ends as a result of death.

(a) General. In the case of a deceased partner whose taxable year ends because of death, the deceased partner’s net earnings from self-employment includes the amount of his or her distributive share of partnership ordinary income or loss for the partnership’s taxable year that is attributable to an interest in the partnership through the month of death.

(b) Computation. (1) The deceased partner’s distributive share of partnership ordinary income or loss for the partnership taxable year in which death occurred is determined by applying the rules contained in paragraphs (d) and (f) of §404.1081.

(2) The portion of the distributive share to be included in the deceased partner’s net earnings from self-employment for his or her last taxable year is determined by treating the ordinary income or loss constituting the distributive share as having been realized or sustained ratably over the partnership taxable year during which the deceased partner had an interest in the partnership and during which the deceased partner’s estate, or any other person succeeding by reason of the death to rights to his partnership interest, held an interest in the partnership.

(c) Deceased partner’s distributive share. A deceased partner’s distributive share includes the distributive share of the estate or of any other person succeeding to the interest of a deceased partner. It does not include any share attributable to a partnership interest that was not held by the deceased partner at the time of death. If a deceased partner’s estate should acquire an interest in a partnership in addition to the interest to which it succeeded upon the death of the deceased partner, the amount of the distributive share attributable to the additional interest acquired by the estate is not included in computing the deceased partner’s distributive share of the partnership’s ordinary income or loss for the partnership taxable year.
