

## § 404.1528

requirements of any impairment listed in appendix 1 to this subpart. When administrative law judges consider these opinions, they will evaluate them using the rules in paragraphs (a) through (e) of this section.

(3) When the Appeals Council makes a decision, it will follow the same rules for considering opinion evidence as administrative law judges follow.

(4) In claims adjudicated under the procedures in part 405 of this chapter at the Federal reviewing official, administrative law judge, and the Decision Review Board levels of the administrative review process, we will follow the same rules for considering opinion evidence that administrative law judges follow under this section.

[56 FR 36960, Aug. 1, 1991, as amended at 62 FR 38451, July 18, 1997; 65 FR 11877, Mar. 7, 2000; 71 FR 16445, Mar. 31, 2006]

### § 404.1528 Symptoms, signs, and laboratory findings.

(a) *Symptoms* are your own description of your physical or mental impairment. Your statements alone are not enough to establish that there is a physical or mental impairment.

(b) *Signs* are anatomical, physiological, or psychological abnormalities which can be observed, apart from your statements (symptoms). Signs must be shown by medically acceptable clinical diagnostic techniques. Psychiatric signs are medically demonstrable phenomena that indicate specific psychological abnormalities, e.g., abnormalities of behavior, mood, thought, memory, orientation, development, or perception. They must also be shown by observable facts that can be medically described and evaluated.

(c) *Laboratory findings* are anatomical, physiological, or psychological phenomena which can be shown by the use of medically acceptable laboratory diagnostic techniques. Some of these diagnostic techniques include chemical tests, electrophysiological studies (electrocardiogram, electroencephalogram, etc.), roentgenological studies (X-rays), and psychological tests.

## 20 CFR Ch. III (4–1–10 Edition)

### § 404.1529 How we evaluate symptoms, including pain.

(a) *General.* In determining whether you are disabled, we consider all your symptoms, including pain, and the extent to which your symptoms can reasonably be accepted as consistent with the objective medical evidence and other evidence. By objective medical evidence, we mean medical signs and laboratory findings as defined in § 404.1528 (b) and (c). By other evidence, we mean the kinds of evidence described in §§ 404.1512(b)(2) through (6) and 404.1513(b)(1), (4), and (5), and (d). These include statements or reports from you, your treating or nontreating source, and others about your medical history, diagnosis, prescribed treatment, daily activities, efforts to work, and any other evidence showing how your impairment(s) and any related symptoms affect your ability to work. We will consider all of your statements about your symptoms, such as pain, and any description you, your treating source or nontreating source, or other persons may provide about how the symptoms affect your activities of daily living and your ability to work. However, statements about your pain or other symptoms will not alone establish that you are disabled; there must be medical signs and laboratory findings which show that you have a medical impairment(s) which could reasonably be expected to produce the pain or other symptoms alleged and which, when considered with all of the other evidence (including statements about the intensity and persistence of your pain or other symptoms which may reasonably be accepted as consistent with the medical signs and laboratory findings), would lead to a conclusion that you are disabled. In evaluating the intensity and persistence of your symptoms, including pain, we will consider all of the available evidence, including your medical history, the medical signs and laboratory findings and statements about how your symptoms affect you. (Section 404.1527 explains how we consider opinions of your treating source and other medical opinions on the existence and severity of your symptoms, such as pain.) We will then determine the extent to
