§ 404.1581 Meaning of blindness as defined in the law.

We will consider you blind under the law for a period of disability and for payment of disability insurance benefits if we determine that you are statutorily blind. Statutory blindness is defined in the law as central visual acuity of 20/200 or less in the better eye with the use of correcting lens. An eye which has a limitation in the field of vision so that the widest diameter of the visual field subtends an angle no greater than 20 degrees is considered to have a central visual acuity of 20/200 or less. Your blindness must meet the duration requirement in § 404.1509. We do not consider certain felony-related and prison-related impairments, as explained in § 404.1506.

§ 404.1582 A period of disability based on blindness.

If we find that you are blind and you meet the insured status requirement, we may establish a period of disability for you regardless of whether you can do substantial gainful activity. A period of disability protects your earnings record under Social Security so that the time you are disabled will not count against you in determining whether you will have worked long enough to qualify for benefits and the amount of your benefits. However, you will not necessarily be entitled to receive disability insurance cash benefits even though you are blind. If you are a blind person under age 55, you must be unable to do any substantial gainful activity in order to be paid disability insurance cash benefits.

§ 404.1583 How we determine disability for blind persons who are age 55 or older.

We will find that you are eligible for disability insurance benefits even
