§ 522.995 Fluprostopenol sodium injection.

(a) Specifications. Each milliliter of sterile aqueous solution contains fluprostopenol sodium equivalent to 50 micrograms of fluprostopenol.

(b) Sponsor. See 000859 in § 510.600(c) of this chapter.

(c) Conditions of use—(1) Amount. 0.55 microgram fluprostopenol per kilogram of body weight given once by intramuscular injection.

(ii) Indications for use. For the control of pyrexia associated with ovine respiratory disease and endotoxemia. Also indicated for control of inflammation in endotoxemia.

(b) For control of pyrexia associated with acute bovine mastitis.

(iii) Limitations. Do not for use in horses intended for food. For veterinary use only. Federal law restricts this drug to use by or on the order of a licensed veterinarian.

Women of childbearing age, asthmatics, and persons with bronchial and other respiratory problems should exercise extreme caution when handling this product. In the early stages, women may be unaware of their pregnancies. Fluprostopenol is readily absorbed through the skin and can cause abortion and/or bronchospasms. Direct contact with the skin should therefore be avoided. Accidental spillage on the skin should be washed off immediately with soap and water.

§ 522.1002 Follicle stimulating hormone.

(a)(1) Specifications. Each package contains 2 vials. One vial contains dry, powdered, porcine pituitary gland equivalent to 75 units (NIH-FSH-S1) of...
