

(4) *Property management.* The net cost of managing real property prior to and during construction to provide for maintenance, protection, and the clearance and disposal of improvements until final project acceptance.

(5) *Payroll-related expenses and technical guidance.* Salary and related expenses of employees of an acquiring agency are eligible costs in accordance with OMB Circular A-87 (available at <http://www.whitehouse.gov/omb/circulars>). This includes State costs incurred for managing or providing technical guidance, consultation or oversight on projects where right-of-way services are performed by a political subdivision or others.

(6) *Property not incorporated into a project funded under title 23 of the United States Code.* The cost of property not incorporated into a project may be eligible for reimbursement in the following circumstances:

(i) *General.* Costs for construction material sites, property acquisitions to a logical boundary, or for eligible transportation enhancement, sites for disposal of hazardous materials, environmental mitigation, environmental banking activities, or last resort housing.

(ii) *Easements not incorporated into the right-of-way.* The cost of acquiring easements outside the right-of-way for permanent or temporary use.

(7) *Uneconomic remnants.* The cost of uneconomic remnants purchased in connection with the acquisition of a partial taking for the project as required by the Uniform Act.

(8) *Access rights.* Payment for full or partial control of access on an existing highway (*i.e.*, one not on a new location), based on elements compensable under applicable State law. Participation does not depend on another real property interest being acquired or on further construction of the highway facility.

(9) *Utility and railroad property.* (i) The cost to replace operating real property owned by a displaced utility or railroad and conveyed to an STD for a highway project, as provided in 23 CFR part 140, subpart I, Reimbursement for Railroad Work, and 23 CFR part 645, Subpart A, Utility Relocations, Adjustments and Reimbursement, and 23 CFR

part 646, Subpart B, Railroad-Highway Projects.

(ii) Participation in the cost of acquiring non-operating utility or railroad real property shall be in the same manner as that used in the acquisition of other privately owned property.

(c) *Withholding payment.* The FHWA may withhold payment under the conditions in 23 CFR 1.36 where the State fails to comply with Federal law or regulation, State law, or under circumstances of waste, fraud, and abuse.

(d) *Indirect costs.* Indirect costs may be claimed under the provisions of OMB Circular A-87. Indirect costs may be included on Federal-aid billings after the indirect cost rate has been approved by FHWA.

[64 FR 71290, Dec. 21, 1999, as amended at 67 FR 12863, Mar. 20, 2002]

Subpart C—Project Development

§ 710.301 General.

The project development process typically follows a sequence of actions and approvals in order to qualify for funding. The key steps in this process are provided in this subpart.

§ 710.303 Planning.

State and local governments conduct metropolitan and statewide planning to develop coordinated, financially constrained system plans to meet transportation needs for local and statewide systems, under FHWA's planning regulations contained in 23 CFR part 450. In addition, air quality non-attainment areas must meet the requirements of the U.S. EPA Transportation conformity regulations (40 CFR parts 51 and 93). Projects must be included in an approved State Transportation Improvement Program (STIP) in order to be eligible for Federal-aid funding.

§ 710.305 Environmental analysis.

The National Environmental Policy Act (NEPA) process, as described in FHWA's NEPA regulations in 23 CFR part 771, normally must be conducted and concluded with a record of decision (ROD) or equivalent before Federal funds can be placed under agreement for acquisition of right-of-way. Where

§ 710.307

applicable, a State also must complete Clean Air Act (42 U.S.C. 7401 *et seq.*) project level conformity analysis. In areas in which the Clean Air Act conformity determination has lapsed, acquiring agencies must coordinate with Federal Highway Administration for special instructions prior to initiating new projects or continuing activity on existing projects. At the time of processing an environmental document, a State may request reimbursement of costs incurred for early acquisition, provided conditions prescribed in 23 U.S.C. 108(c) and 23 CFR 710.501, are satisfied.

§ 710.307 Project agreement.

As a condition of Federal-aid, the STD shall obtain FHWA authorization in writing or electronically before proceeding with any real property acquisitions, including hardship acquisition and protective buying (see 23 CFR 710.503). The STD must prepare a project agreement in accordance with 23 CFR part 630, subpart C. The agreement shall be based on an acceptable estimate for the cost of acquisition. On projects where the initial project agreement was executed after June 9, 1998, a State may request credit toward the non-Federal share, for early acquisitions, donations, or other contributions applied to the project provided conditions in 23 U.S.C. 323 and 23 CFR 710.501, are satisfied.

§ 710.309 Acquisition.

The process of acquiring real property includes appraisal, appraisal review, establishing just compensation, negotiations, administrative and legal settlements, and condemnation. The State shall conduct acquisition and related relocation activities in accordance with 49 CFR part 24.

§ 710.311 Construction advertising.

The State must manage real property acquired for a project until it is required for construction. Clearance of improvements can be scheduled during the acquisition phase of the project using sale/removal agreements, separate demolition contracts, or be included as a work item in the construction contract. On Interstate projects, prior to advertising for construction,

23 CFR Ch. I (4–1–10 Edition)

the State shall develop ROW availability statements and certifications related to project acquisitions as required by 23 CFR 635.309. For non-Interstate projects, the oversight agreement must specify responsibility for the review and approval of the ROW availability statements and certifications. Generally, for non-NHS projects, the State has full responsibility for determining that right-of-way is available for construction.

§ 710.313 Design-build projects.

(a) In the case of a design-build project, right-of-way must be acquired and cleared in accordance with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended, and STD right-of-way procedures. The STD shall submit a right-of-way certification in accordance with 23 CFR 635.309(p) when requesting FHWA's authorization. If the right-of-way services are included in the Request for Proposal document, the STD shall ensure that right-of-way is available prior to the start of physical construction on individual properties.

(b) The decision to advance a right-of-way segment to the construction stage shall not impair the safety or in anyway be coercive in the context of 49 CFR 24.102(h) with respect to unacquired or occupied properties on the same or adjacent segments of project right-of-way.

(c) Certain right-of-way acquisition and clearance services may be incorporated into the design-build contract if allowed under State law. The contract may include language that provides that construction will not commence until all property is acquired and relocations have been completed; or, the construction could be phased or segmented to allow right-of-way activities to be completed on individual properties or a group of properties, thereby allowing certification in a manner satisfactory to the STD for each phase or segment.

(d) If the STD elects to include right-of-way services in the design-build contract, the following provisions must be addressed in the request for proposals document:
