(1) The consideration of practicable alternatives to the proposed site or method may include:
   (i) Locations outside the floodplain (or 500-year floodplain for a Critical Action);
   (ii) Alternative methods to serve the identical project objective; and
   (iii) A determination not to approve any action.
(2) In reviewing practicable alternatives, the Department or a grant recipient subject to 24 CFR part 58 shall consider feasible technological alternatives, hazard reduction methods and related mitigation costs, and environmental impacts.
(d) Step 4. Identify the potential direct and indirect impacts associated with the occupancy or modification of the floodplain (or 500-year floodplain for a Critical Action).
(e) Step 5. Where practicable, design or modify the proposed action to minimize the potential adverse impacts within the floodplain (including the 500-year floodplain for a Critical Action) and to restore and preserve its natural and beneficial values. All critical actions in the 500-year floodplain shall be designed and built at or above the 100-year floodplain (in the case of new construction) and modified to include:
   (1) Preparation of and participation in an early warning system;
   (2) An emergency evacuation and relocation plan;
   (3) Identification of evacuation route(s) out of the 500-year floodplain; and
   (4) Identification marks of past or estimated flood levels on all structures.
(f) Step 6. Reevaluate the proposed action to determine:
   (1) Whether it is still practicable in light of its exposure to flood hazards in the floodplain, the extent to which it will aggravate the current hazards to other floodplains, and its potential to disrupt floodplain values; and
   (2) Whether alternatives preliminarily rejected at Step 3 (paragraph (c)) of this section are practicable in light of the information gained in Steps 4 and 5 (paragraphs (d) and (e)) of this section.
(g) Step 7. (1) If the reevaluation results in a determination that there is no practicable alternative to locating the proposal in the floodplain (or the 500-year floodplain for a Critical Action), publish a final notice that includes:
   (i) The reasons why the proposal must be located in the floodplain;
   (ii) A list of the alternatives considered; and
   (iii) All mitigation measures to be taken to minimize adverse impacts and to restore and preserve natural and beneficial values.
(2) In addition, the public notice procedures of § 55.20(b)(1) shall be followed, and a minimum of 7 calendar days for public comment before approval of the proposed action shall be provided.
(h) Step 8. Upon completion of the decision making process in Steps 1 through 7, implement the proposed action. There is a continuing responsibility to ensure that the mitigating measures identified in Step 7 are implemented.

§ 55.21 Notification of floodplain hazard.

For HUD programs under which a financial transaction for a property located in a floodplain (a 500-year floodplain for a Critical Action) is guaranteed, approved, regulated or insured, any private party participating in the transaction and any current or prospective tenant shall be informed by HUD (or by HUD's designee, e.g., a mortgagor) or a grant recipient subject to 24 CFR part 58 of the hazards of the floodplain location before the execution of documents completing the transaction.

§ 55.22 Conveyance restrictions for the disposition of multifamily real property.

(a) In the disposition (including leasing) of multifamily properties acquired by HUD that are located in a floodplain (a 500-year floodplain for a Critical Action), the documents used for the conveyance must:
   (1) Refer to those uses that are restricted under identified federal, state, or local floodplain regulations; and
   (2) Include any land use restrictions limiting the use of the property by a grantee or purchaser and any successors under state or local laws.
