

§ 1.989(a)-1

in paragraph (f)(2) of this section, section 1.988-6 shall not apply to a debt instrument the interest on which is excluded from gross income under section 103(a).

(2) *Operative rules.* [Reserved].

(g) *Effective date.* This section shall apply to debt instruments issued on or after October 29, 2004.

[T.D. 9157, 69 FR 52819, Aug. 30, 2004]

§ 1.989(a)-1 Definition of a qualified business unit.

(a) *Applicability*—(1) *In general.* This section provides rules relating to the definition of the term “qualified business unit” (QBU) within the meaning of section 989.

(2) *Effective date.* These rules shall apply to taxable years beginning after December 31, 1986. However, any person may apply on a consistent basis § 1.989(a)-1T (c) of the Temporary Income Tax Regulations in lieu of § 1.989(a)-1 (c) to all taxable years beginning after December 31, 1986, and on or before February 5, 1990. For the text of the temporary regulation, see 53 FR 20612 (June 8, 1988).

(b) *Definition of a qualified business unit*—(1) *In general.* A QBU is any separate and clearly identified unit of a trade or business of a taxpayer provided that separate books and records are maintained.

(2) *Application of the QBU definition*—(i) *Persons.* A corporation is QBU. An individual is not a QBU. A partnership, trust, or estate is a QBU of a partner or beneficiary.

(ii) *Activities.* Activities of a corporation, partnership, trust, estate, or individual qualify as a QBU if—

(A) The activities constitute a trade or business; and

(B) A separate set of books and records is maintained with respect to the activities.

(3) *Special rule.* Any activity (wherever conducted and regardless of its frequency) that produces income or loss that is, or is treated as, effectively connected with the conduct of a trade or business within the United States shall be treated as a separate QBU, provided the books and records requirement of paragraph (d)(2) of this section is satisfied.

(c) *Trade or business.* The determination as to whether activities constitute a trade or business is ultimately dependent upon an examination of all the facts and circumstances. Generally, a trade or business for purposes of section 989(a) is a specific unified group of activities that constitutes (or could constitute) an independent economic enterprise carried on for profit, the expenses related to which are deductible under section 162 or 212 (other than that part of section 212 dealing with expenses incurred in connection with taxes). To constitute a trade or business, a group of activities must ordinarily include every operation which forms a part of, or a step in, a process by which an enterprise may earn income or profit. Such group of activities must ordinarily include the collection of income and the payment of expenses. It is not necessary that the activities carried out by a QBU constitute a different trade or business from those carried out by other QBUs of the taxpayer. A vertical, functional, or geographic division of the same trade or business may be a trade or business for this purpose provided that the activities otherwise qualify as trade or business under this paragraph (c). However, activities that are merely ancillary to a trade or business will not constitute a trade or business under this paragraph (c). Activities of an individual as an employee are not considered by themselves to constitute a trade or business under this paragraph (c).

(d) *Separate books and records*—(1) *General rule.* Except as provided in paragraph (d)(2) of this section, a separate set of books and records shall include books of original entry and ledger accounts, both general and subsidiary, or similar records. For example, in the case of a taxpayer using the cash receipts and disbursements method of accounting, the books of original entry include a cash receipts and disbursements journal where each receipt and each disbursement is recorded. Similarly, in the case of a taxpayer using an accrual method of accounting, the books of original entry include a journal to record sales (accounts receivable) and a journal to record expenses incurred (accounts payable). In

general, a journal represents a chronological account of all transactions entered into by an entity for an accounting period. A ledger account, on the other hand, chronicles the impact during an accounting period of the specific transactions recorded in the journal for that period upon the various items shown on the entity's balance sheet (*i.e.*, assets, liabilities, and capital accounts) and income statement (*i.e.*, revenues and expenses).

(2) *Special rule.* For purposes of paragraph (b)(3) of this section, books and records include books and records used to determine income or loss that is, or is treated as, effectively connected with the conduct of a trade or business within the United States.

(e) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. Corporation X is a domestic corporation. Corporation X manufactures widgets in the U.S. for export. Corporation X sells widgets in the United Kingdom through a branch office in London. The London office has its own employees and solicits and processes orders. Corporation X maintains in the U.S. a separate set of books and records for all transactions conducted by the London office. Corporation X is a QBU under paragraph (b)(2)(i) of this section because of its corporate status. The London branch office is a QBU under paragraph (b)(2)(ii) of this section because (1) the sale of widgets is a trade or business as defined in paragraph (c) of this section; and (2) a complete and separate set of books and records (as described in paragraph (d) of this section) is maintained with respect to its sales operations.

Example 2. A domestic corporation incorporates a wholly-owned subsidiary in Switzerland. The domestic corporation is a manufacturer that markets its product abroad primarily through the Swiss subsidiary. To facilitate sales of the parent's product in Europe, the Swiss subsidiary has branch offices in France and West Germany that are responsible for all marketing operations in those countries. Each branch has its own employees, solicits and processes orders, and maintains a separate set of books and records. The domestic corporation and the Swiss subsidiary are both QBUs under paragraph (b)(2)(i) of this section because of their corporate status. The French and West German branches are QBUs of the Swiss subsidiary. They satisfy paragraph (b)(2)(ii) because each constitutes a trade or business (as defined in paragraph (c) of this section) and because separate sets of books and records (as described in paragraph (d) of this

section) of their respective operations is maintained. Each branch is considered to have a trade or business although each is a geographical division of the same trade or business.

Example 3. W is a domestic corporation that manufactures product X in the United States for sale worldwide. All of W's sales functions are conducted exclusively in the United States. W employs individual Q to work in France. Q's sole function is to act as a courier to deliver sales documents to customers in France. With respect to Q's activities in France, a separate set of books and records as described in paragraph (d) is maintained. Under paragraph (c) of this section, Q's activities in France do not constitute a QBU since they are merely ancillary to W's manufacturing and selling business. Q is not considered to have a QBU because an individual's activities as an employee are not considered to constitute a trade or business of the individual under paragraph (c).

Example 4. The facts are the same as in example (3) except that the courier function is the sole activity of a wholly-owned French subsidiary of W. Under paragraph (b)(2)(i) of this section, the French subsidiary is considered to be a QBU.

Example 5. A corporation incorporated in the Netherlands is a subsidiary of a domestic corporation and a holding company for the stock of one or more subsidiaries incorporated in other countries. The Dutch corporation's activities are limited to paying its directors and its administrative expenses, receiving capital contributions from its United States parent corporation, contributing capital to its subsidiaries, receiving dividend distributions from its subsidiaries, and distributing dividends to its domestic parent corporation. Under paragraph (b)(2)(i) of this section, the Netherlands corporation is considered to be a QBU.

Example 6. Taxpayer A, an individual resident of the United States, is engaged in a trade or business wholly unrelated to any type of investment activity. A also maintains a portfolio of foreign currency-denominated investments through a foreign broker. The broker is responsible for all activities necessary to the management of A's investments and maintains books and records as described in paragraph (d) of this section, with respect to all investment activities of A. A's investment activities qualify as a QBU under paragraph (b)(2)(ii) of this section to the extent the activities engaged in by A generate expenses that are deductible under section 212 (other than that part of section 212 dealing with expenses incurred in connection with taxes).

Example 7. Taxpayer A, an individual resident of the United States, is the sole shareholder of foreign corporation (FC) whose activities are limited to trading in stocks and

§ 1.989(b)-1

26 CFR Ch. I (4-1-10 Edition)

securities. FC is a QBU under paragraph (b)(2)(i) of this section.

Example 8. Taxpayer A, an individual resident of the United States, markets and sells in Spain and in the United States various products produced by other United States manufacturers. A has an office and employs a salesman to manage A's activities in Spain, maintains a separate set of books and records with respect to his activities in Spain, and is engaged in a trade or business as defined in paragraph (c) of this section. Therefore, under paragraph (b)(2)(ii) of this section, the activities of A in Spain are considered to be a QBU.

Example 9. Foreign corporation FX is incorporated in Mexico and is wholly owned by a domestic corporation. The domestic corporation elects to treat FX as a domestic corporation under section 1504(d). FX operates entirely in Mexico and maintains a separate set of books and records with respect to its activities in Mexico. FX is a QBU under paragraph (b)(2)(i) of this section. The activities of FX in Mexico also constitute a QBU under paragraph (b)(2)(ii) of this section.

Example 10. F, a foreign corporation, computes a gain of \$100 from the disposition of a United States real property interest (as defined in section 897(c)). The gain is taken into account as if F were engaged in a trade or business in the United States and as if such gain were effectively connected with such trade or business. F is a QBU under paragraph (b)(2)(i) of this section because of its corporate status. F's disposition activity constitutes a separate QBU under paragraph (b)(3) of this section.

[T.D. 8279, 55 FR 284, Jan. 4, 1990]

§ 1.989(b)-1 Definition of weighted average exchange rate.

For purposes of section 989(b)(3) and (4), the term "weighted average exchange rate" means the simple average of the daily exchange rates (determined by reference to a qualified source of exchange rates described in § 1.988-1(d)(1)), excluding weekends, holidays and any other nonbusiness days for the taxable year.

[T.D. 8263, 54 FR 38664, Sept. 20, 1989. Redesignated by T.D. 8367, 56 FR 48437, Sept. 25, 1991; 57 FR 6060, Feb. 18, 1992; T.D. 9452, 74 FR 27890, June 11, 2009]

§ 1.989(c)-1 Transition rules for certain branches of United States persons using a net worth method of accounting for taxable years beginning before January 1, 1987.

(a) *Applicability*—(1) *In general.* This section applies to qualified business

units (QBU) branches of United States persons, whose functional currency (as defined in section 985 of the Code and regulations issued thereunder) is other than the United States dollar (dollar) and that used a net worth method of accounting for their last taxable year beginning before January 1, 1987. Generally, a net worth method of accounting is any method of accounting under which the taxpayer calculates the taxable income of a QBU branch based on the net change in the dollar value of the QBU branch's equity over the course of a taxable year, taking into account any remittance made during the year. QBU branch equity is the excess of QBU branch assets over QBU branch liabilities. For all taxable years beginning after December 31, 1986, such QBU branches must use the profit and loss method of accounting as described in section 987, except to the extent otherwise provided in regulations under section 985 or any other provision of the Code.

(2) *Insolvent QBU branches.* A taxpayer may apply the principles of this section to a QBU branch that used a net worth method of accounting for its last taxable year beginning before January 1, 1987, whose \$E pool (as defined in paragraph (d)(3)(i) of this section) is negative. For taxable years beginning on or after October 25, 1991, the principles of this section shall apply to insolvent QBU branches.

(b) *General rules.* For the general rules, see § 1.987-5(b).

(c) *Determining the pool(s) from which a remittance is made.* To determine from which pool(s) a remittance is made, see § 1.987-5(c).

(d) *Calculation of section 987 gain or loss*—(1) *In general.* See § 1.987-5(d)(1) for rules to make this calculation.

(2) *Step 1—Calculate the amount of the functional currency pools.* For calculation of the amount of the functional currency pools, see § 1.987-5(d)(2).

(3) *Step 2—Calculate the dollar basis pools*—(i) *Dollar basis of the EQ pool*—(A) *Beginning dollar basis.* The beginning dollar basis of the EQ pool (hereinafter referred to as the \$E pool) equals the final net worth of the QBU branch. Final net worth of the QBU branch equals the QBU branch's equity value
