 - (ii) Examples.
- (c) Revocation and re-election of S corporation status.
 - (1) In general.
 - (2) Example.

[T.D. 8579, 59 FR 66463, Dec. 27, 1994, as amended by T.D. 9236, 70 FR 75731, Dec. 21, 2005]

§ 1.1374-1 General rules and definitions.

(a) *Computation of tax.* The tax imposed on the income of an S corporation by section 1374(a) for any taxable year during the recognition period is computed as follows—

(1) Step One: Determine the net recognized built-in gain of the corporation for the taxable year under section 1374(d)(2) and § 1.1374-2;

(2) Step Two: Reduce the net recognized built-in gain (but not below zero) by any net operating loss and capital loss carryforward allowed under section 1374(b)(2) and § 1.1374-5;

(3) Step Three: Compute a tentative tax by applying the rate of tax determined under section 1374(b)(1) for the taxable year to the amount determined under paragraph (a)(2) of this section;

(4) Step Four: Compute the final tax by reducing the tentative tax (but not below zero) by any credit allowed under section 1374(b)(3) and § 1.1374-6.

(b) *Anti-trafficking rules.* If section 382, 383, or 384 would have applied to limit the use of a corporation's recognized built-in loss or section 1374 attributes at the beginning of the first day of the recognition period if the corporation had remained a C corporation,

these sections apply to limit their use in determining the S corporation's pre-limitation amount, taxable income limitation, net unrealized built-in gain limitation, deductions against net recognized built-in gain, and credits against the section 1374 tax.

(c) *Section 1374 attributes.* Section 1374 attributes are the loss carryforwards allowed under section 1374(b)(2) as a deduction against net recognized built-in gain and the credit and credit carryforwards allowed under section 1374(b)(3) as a credit against the section 1374 tax.

(d) *Recognition period.* The recognition period is the 10-year (120-month) period beginning on the first day the corporation is an S corporation or the day an S corporation acquires assets in a section 1374(d)(8) transaction. For example, if the first day of the recognition period is July 14, 1996, the last day of the recognition period is July 13, 2006. If the recognition period for certain assets ends during an S corporation's taxable year (for example, because the corporation was on a fiscal year as a C corporation and changed to a calendar year as an S corporation or because an S corporation acquired assets in a section 1374(d)(8) transaction during a taxable year), the S corporation must determine its pre-limitation amount (as defined in § 1.1374-2(a)(1)) for the year as if the corporation's books were closed at the end of the recognition period.

(e) *Predecessor corporation.* For purposes of section 1374(c)(1), if the basis of an asset of the S corporation is determined (in whole or in part) by reference to the basis of the asset (or any other property) in the hands of another corporation, the other corporation is a predecessor corporation of the S corporation.

[T.D. 8579, 59 FR 66463, Dec. 27, 1994]

§ 1.1374-2 Net recognized built-in gain.

(a) *In general.* An S corporation's net recognized built-in gain for any taxable year is the least of—

(1) Its taxable income determined by using all rules applying to C corporations and considering only its recognized built-in gain, recognized built-in loss, and recognized built-in gain carryover (pre-limitation amount);

(2) Its taxable income determined by using all rules applying to C corporations as modified by section 1375(b)(1)(B) (taxable income limitation); and

(3) The amount by which its net unrealized built-in gain exceeds its net recognized built-in gain for all prior taxable years (net unrealized built-in gain limitation).

(b) *Allocation rule.* If an S corporation's pre-limitation amount for any taxable year exceeds its net recognized built-in gain for that year, the S corporation's net recognized built-in gain consists of a ratable portion of each item of income, gain, loss, and deduction included in the pre-limitation amount.

(c) *Recognized built-in gain carryover.* If an S corporation's net recognized built-in gain for any taxable year is equal to its taxable income limitation, the amount by which its pre-limitation amount exceeds its taxable income limitation is a recognized built-in gain carryover included in its pre-limitation amount for the succeeding taxable year. The recognized built-in gain carryover consists of that portion of each item of income, gain, loss, and deduction not included in the S corporation's net recognized built-in gain for the year the carryover arose, as determined under paragraph (b) of this section.

(d) *Accounting methods.* In determining its taxable income for pre-limitation amount and taxable income limitation purposes, a corporation must use the accounting method(s) it uses for tax purposes as an S corporation.

(e) *Example.* The rules of this section are illustrated by the following example.

Example: Net recognized built-in gain. X is a calendar year C corporation that elects to become an S corporation on January 1, 1996. X has a net unrealized built-in gain of \$50,000 and no net operating loss or capital loss carryforwards. In 1996, X has a pre-limitation amount of \$20,000, consisting of ordinary income of \$15,000 and capital gain of \$5,000, a taxable income limitation of \$9,600, and a net unrealized built-in gain limitation of \$50,000. Therefore, X's net recognized built-in gain for 1996 is \$9,600, because that is the least of the three amounts described in paragraph (a) of this section. Under paragraph (b) of this section, X's net recognized built-in gain con-

sists of recognized built-in ordinary income of \$7,200 [$\$15,000 \times (\$9,600 / \$20,000) = \$7,200$] and recognized built-in capital gain of \$2,400 [$\$5,000 \times (\$9,600 / \$20,000) = \$2,400$]. Under paragraph (c) of this section, X has a recognized built-in gain carryover to 1997 of \$10,400 ($\$20,000 - \$9,600 = \$10,400$), consisting of \$7,800 ($\$15,000 - \$7,200 = \$7,800$) of recognized built-in ordinary income and \$2,600 ($\$5,000 - \$2,400 = \$2,600$) of recognized built-in capital gain.

[T.D. 8579, 59 FR 66463, Dec. 27, 1994]

§ 1.1374-3 Net unrealized built-in gain.

(a) *In general.* An S corporation's net unrealized built-in gain is the total of the following—

(1) The amount that would be the amount realized if, at the beginning of the first day of the recognition period, the corporation had remained a C corporation and had sold all its assets at fair market value to an unrelated party that assumed all its liabilities; decreased by

(2) Any liability of the corporation that would be included in the amount realized on the sale referred to in paragraph (a)(1) of this section, but only if the corporation would be allowed a deduction on payment of the liability; decreased by

(3) The aggregate adjusted bases of the corporation's assets at the time of the sale referred to in paragraph (a)(1) of this section; increased or decreased by

(4) The corporation's section 481 adjustments that would be taken into account on the sale referred to in paragraph (a)(1) of this section; and increased by

(5) Any recognized built-in loss that would not be allowed as a deduction under section 382, 383, or 384 on the sale referred to in paragraph (a)(1) of this section.

(b) *Adjustment to net unrealized built-in gain—*(1) *In general.* If section 1374(d)(8) applies to an S corporation's acquisition of assets, some or all of the stock of the corporation from which such assets were acquired was taken into account in the computation of the net unrealized built-in gain for a pool of assets of the S corporation, and some or all of such stock is redeemed or canceled in such transaction, then, subject to the limitations of paragraph
