assume that the overtime requirements of section 7 of the Act have been satisfied if computation is made as follows:

(1) Assume first that the overlapping hours are to be counted as hours worked only in the "old" workweek and not in the new; compute straight time and overtime compensation due for each of the 2 workweeks on this basis and total the two sums.

(2) Assume now that the overlapping hours are to be counted as hours worked only in the new workweek and not in the old, and complete the total computation accordingly.

(3) Pay the employee an amount not less than the greater of the amounts computed by methods (1) and (2).

(b) Application of rule illustrated. Suppose that, in the example given in §778.301, the employee, who receives $5 an hour and is subject to overtime pay after 40 hours a week, worked 5 hours on Sunday, March 7, 1965. Suppose also that his last "old" workweek commenced at 7 a.m. on Monday, March 1, and he worked 40 hours March 1 through March 5 so that for the workweek ending March 7 he would be owed straight time and overtime compensation for 45 hours. The proposal is to commence the "new" workweek at 7 a.m. on March 7. If in the "new" workweek of Sunday, March 7, through Saturday, March 13, the employee worked a total of 40 hours, including the 5 hours worked on Sunday, it is obvious that the allocation of the Sunday hours to the old workweek will result in higher total compensation to the employee for the 13-day period. He should, therefore, be paid 40\times$5+5\times$7.50 for the period of March 1 through March 7, and $175 (35\times$5) for the period of March 8 through March 13.

(c) Nonstatutory obligations unaffected. The fact that this method of compensation is permissible under the Fair Labor Standards Act when the beginning of the workweek is changed will not alter any obligation the employer may have under his employment contract to pay a greater amount of overtime compensation for the period in question.
