Subpart O—Well Control and Production Safety Training

SOURCE: 65 FR 49490, Aug. 14, 2000, unless otherwise noted.

§ 250.1500 Definitions.

Terms used in this subpart have the following meaning:

Contractor and contract personnel mean anyone, other than an employee of the lessee, performing well control or production safety duties for the lessee.

Employee means direct employees of the lessees who are assigned well control or production safety duties.

I or you means the lessee engaged in oil, gas, or sulphur operations in the Outer Continental Shelf (OCS).

Lessee means a person who has entered into a lease with the United States to explore for, develop, and produce the leased minerals. The term lessee also includes an owner of operating rights for that lease and the MMS-approved assignee of that lease.

Periodic means occurring or recurring at regular intervals. Each lessee must specify the intervals for periodic training and periodic assessment of training needs in their training programs.

Production safety includes measures, practices, procedures, and equipment to ensure safe, accident-free, and pollution-free production operations, as well as installation, repair, testing, maintenance, and operation of surface and subsurface safety equipment. Production operations include, but are not limited to, separation, dehydration, compression, sweetening, and metering operations.

Well control means drilling, well completion, well workover, and well servicing operations. For purposes of this subpart, well completion/well workover means those operations following the drilling of a well that are intended to establish or restore production to a well. It includes small tubing operations but does not include well servicing. Well servicing means snubbing, coil tubing, and wireline operations.

§ 250.1501 What is the goal of my training program?

The goal of your training program must be safe and clean OCS operations. To accomplish this, you must ensure that your employees and contract personnel engaged in well control or production safety operations understand and can properly perform their duties.

§ 250.1503 What are my general responsibilities for training?

(a) You must establish and implement a training program so that all of your employees are trained to competently perform their assigned well control and production safety duties. You must verify that your employees understand and can perform the assigned well control or production safety duties.

(b) You must have a training plan that specifies the type, method(s), length, frequency, and content of the training for your employees. Your training plan must specify the method(s) of verifying employee understanding and performance. This plan must include at least the following information:

   (1) Procedures for training employees in well control or production safety practices;
   (2) Procedures for evaluating the training programs of your contractors;
   (3) Procedures for verifying that all employees and contractor personnel engaged in well control or production safety operations can perform their assigned duties;
   (4) Procedures for assessing the training needs of your employees on a periodic basis;
   (5) Recordkeeping and documentation procedures; and
   (6) Internal audit procedures.

(c) Upon request of the District Manager or Regional Supervisor, you must provide:

   (1) Copies of training documentation for personnel involved in well control or production safety operations during the past 5 years; and
   (2) A copy of your training plan.
