

§ 767.5

(c) If the applicant believes that compliance with one or more of the factors, criteria, or procedures in the guidelines contained in this part is not practicable, the applicant should set forth why and explain how the purposes of NHC are better served without compliance with the specified requirements. Permits are valid for one year from the issue date.

§ 767.5 Evaluation of permit application.

(a) Permit applications for archeological research are reviewed for completeness, compliance with program policies, and adherence to the guidelines of this subpart. Incomplete applications will be returned to the applicant for clarification. Complete applications are reviewed by NHC personnel and, when necessary, outside experts. In addition to the criteria set forth in § 767.6, applications are also judged on the basis of: relevance or importance; archeological merits; appropriateness and environmental consequences of technical approach; and qualifications of the applicants.

(b) Under certain circumstances, it may be necessary to consult with the State Historic Preservation Officer (SHPO) and the Advisory Council on Historic Preservation (ACHP) about the need to comply with section 106 of the NHPA. A section 106 review may require the NHC to consult with the appropriate SHPO and the ACHP. The ACHP review can take up to 60 days beyond the NHC's required 120-day review. Therefore, the entire review process may take up to 180 days.

(c) The NHC shall send applications for research at sites located in units of the national park system, national wildlife refuge system, and national marine sanctuary system to the appropriate Federal land manager for review. The Federal land manager is responsible for ensuring that the proposed work is consistent with any management plan or established policy, objectives or requirements applicable to the management of the public lands concerned. NHC shall send applications for research at sites located on state bottomlands to the appropriate state agency for review. The burden of obtaining any and all additional permits

32 CFR Ch. VI (7-1-10 Edition)

or authorizations, such as from a state or foreign government or agency, private individual or organization, or from another federal agency, is on the applicant.

(d) Based on the findings of the NHC evaluation, the NHC Underwater Archeologist will recommend an appropriate action to the NHC Director. If approved, NHC will issue the permit; if denied, applicants are notified of the reason for denial and may appeal within 30 days of receipt of the denial. Appeals must be submitted in writing to: Director of Naval History, Naval Historical Center, 805 Kidder Breese St. SE, Washington Navy Yard, DC 20374-5060.

§ 767.6 Credentials of principal investigator.

A resume or curriculum vitae detailing the professional qualifications and professional publications and papers of the principal investigator (PI) must be submitted with the permit application. The PI must have: a graduate degree in archeology, anthropology, maritime history, or a closely related field; at least one year of professional experience or equivalent specialized training in archeological research, administration or management; at least four months of supervised field and analytic experience in general North American historic archaeology and maritime history; the demonstrated ability to carry research to completion; and at least one year of full-time professional experience at a supervisory level in the study of historic marine archeological resources. This person shall be able to demonstrate ability in comprehensive analysis and interpretation through authorship of reports and monographs.

§ 767.7 Conditions of permits.

(a) Upon receipt of a permit, permit holders must counter-sign the permit and return copies to the NHC and the applicable SHPO, Federal or State land manager, or foreign government official prior to conducting permitted activities on the site. Copies of counter-signed permits should also be provided to the applicable federal land manager when the sunken vessel or aircraft is located within a unit of the national

Department of the Navy, DoD

§ 767.10

park system, the national wildlife refuge system, or the national marine sanctuary system.

(b) Permits must be carried aboard research vessels and made available upon request for inspection to regional preservation personnel or law enforcement officials. Permits are non-transferable. Permit holders must abide by all provisions set forth in the permit as well as applicable state or Federal regulations. Permit holders should abide by applicable regulations of a foreign government when the sunken vessel or aircraft is located in foreign waters. To the extent reasonably possible, the environment must be returned to the condition that existed before the activity occurred.

(c) Upon completion of permitted activities, the permit holder is required to submit to NHC a working and diving log listing days spent in field research, activities pursued, and working area positions.

(d) The permit holder must prepare and submit a final report as detailed in § 767.9, summarizing the results of the permitted activity.

(e) The permit holder must agree to protect all sensitive information regarding the location and character of the wreck site that could potentially expose it to non-professional recovery techniques, looters, or treasure hunters. Sensitive information includes specific location data such as latitude and longitude, and information about a wreck's cargo, the existence of armaments, or the knowledge of gravesites.

(f) All recovered DON cultural resources remain the property of the United States. These resources and copies of associated archaeological records and data will be preserved by a suitable university, museum, or other scientific or educational institution and must meet the standards set forth in 36 CFR part 79, Curation of Federally Owned and Administered Archaeological Collections, at the expense of the applicant. The repository shall be specified in the permit application.

§ 767.8 Requests for amendments or extensions of active permits.

(a) Requests for amendments to active permits (e.g., a change in study design or other form of amendment) must

conform to the regulations in this part. All necessary information to make an objective evaluation of the amendment should be included as well as reference to the original application.

(b) Permit holders desiring to continue research activities must reapply for an extension of their current permit before it expires. A pending extension or amendment request does not guarantee extension or amendment of the original permit. Therefore, you must submit an extension request to NHC at least 30 days prior to the original permit's expiration date. Reference to the original application may be given in lieu of a new application, provided the scope of work does not change significantly. Applicants may apply for one-year extensions subject to annual review.

(c) Permit holders may appeal denied requests for amendments or extensions to the appeal authority listed in § 767.5.

§ 767.9 Content of permit holder's final report.

The permit holder's final report shall include the following:

(a) A site history and a contextual history relating the site to the general history of the region;

(b) A master site map;

(c) Feature map(s) of the location of any recovered artifacts in relation to their position within the wrecksite;

(d) Photographs of significant site features and significant artifacts both in situ and after removal;

(e) If applicable, a description of the conserved artifacts, laboratory conservation records, and before and after photographs of the artifacts at the conservation laboratory;

(f) A written report describing the site's historical background, environment, archeological field work, results, and analysis;

(g) A summary of the survey and/or excavation process; and

(h) An evaluation of the completed permitted activity that includes an assessment of the permit holder's success of his/her specified goals.

§ 767.10 Monitoring of performance.

Permitted activities will be monitored to ensure compliance with the conditions of the permit. NHC on-site
