Department of the Air Force, DoD

§ 935.134 Arm signals.

(a) Any person operating a motor vehicle and making a turn or coming to a stop shall signal the turn or stop in accordance with this section.

(b) A signal for a turn or stop is made by fully extending the left arm as follows:

(1) Left turn—extend left arm horizontally.

(2) Right turn—extend left arm upward.

(3) Stop or decrease speed—extend left arm downward.

(c) A signal light or other device may be used in place of an arm signal prescribed in paragraph (b) of this section if it is visible and intelligible.
