

Department of the Air Force, DoD

§ 989.21

significant change in circumstances, development of significant new information of a relevant nature, or where there is substantial environmental controversy concerning the proposed action. Significant new information leading to public controversy regarding the scope after the scoping process is such a changed circumstance. An additional public comment period may also be necessary after the publication of the draft EIS due to public controversy or changes made as the result of previous public comments. Such periods when additional public comments are sought shall last for at least 30 days.

[64 FR 38129, July 15, 1999, as amended at 66 FR 16868, Mar. 28, 2001; 72 FR 37106, July 9, 2007]

§ 989.20 Final EIS.

(a) If changes in the draft EIS are minor or limited to factual corrections and responses to comments, the proponent and EPF may, with the prior approval of HQ USAF/A7CI and SAF/IEE, prepare a document containing only comments on the Draft EIS, Air Force responses, and errata sheets of changes staffed to the HQ USAF ESOHC for coordination. However, the EPF must submit the Draft EIS and all of the above documents, with a new cover sheet indicating that it is a final EIS (40 CFR 1503.4(c)), to HQ USAF/A7CI for filing with the EPA (40 CFR 1506.9). If more extensive modifications are required, the EPF must prepare a preliminary final EIS incorporating these modifications for coordination within the Air Force. Regardless of which procedure is followed, the final EIS must be processed in the same way as the draft EIS, including receipt of copies of the EIS by SAF/LLP, except that the public need not be invited to comment during the 30-day post-filing waiting period. The Final EIS should be furnished to every person, organization, or agency that made substantive comments on the Draft EIS or requested a copy. Although the EPF is not required to respond to public comments received during this period, comments received must be considered in determining final decisions such as identifying the preferred alternative, appropriate mitigations, or if a supplemental analysis is required.

(b) The EPF processes all necessary supplements to EISs (40 CFR 1502.9) in the same way as the original Draft and Final EIS, except that a new scoping process is not required.

(c) If major steps to advance the proposal have not occurred within 5 years from the date of the Final EIS approval, reevaluation of the documentation should be accomplished to ensure its continued validity.

[64 FR 38129, July 15, 1999, as amended at 66 FR 16868, Mar. 28, 2001; 72 FR 37106, July 9, 2007]

§ 989.21 Record of decision (ROD).

(a) The proponent and the EPF prepare a draft ROD, formally staff it through the MAJCOM EPC, to HQ USAF/A7CI for verification of adequacy, and forwards it to either SAF/IEE or SAF/AQR, as the case may be, for approval and designation of the signator. A ROD (40 CFR 1505.2) is a concise public document stating what an agency's decision is on a specific action. The ROD may be integrated into any other document required to implement the agency's decision. A decision on a course of action may not be made until the later of the following dates:

(1) 90 days after publication of the DEIS; or

(2) 30 days after publication of the NOA of the Final EIS in the FEDERAL REGISTER.

(b) The Air Force must announce the ROD to the affected public as specified in § 989.24, except for classified portions. The ROD should be concise and should explain the conclusion, the reason for the selection, and the alternatives considered. The ROD must identify the course of action, whether it is the proposed action or an alternative, that is considered environmentally preferable regardless of whether it is the alternative selected for implementation. The ROD should summarize all the major factors the agency weighed in making its decision, including essential considerations of national policy.

(c) The ROD must state whether the selected alternative employs all practicable means to avoid, minimize, or

§ 989.22

mitigate environmental impacts and, if not, explain why not.

[64 FR 38129, July 15, 1999, as amended at 66 FR 16868, Mar. 28, 2001; 72 FR 37106, July 9, 2007]

§ 989.22 Mitigation.

(a) When preparing EIAP documents, indicate clearly whether mitigation measures (40 CFR 1508.20) must be implemented for the alternative selected. If using Best Management Practices (BMPs), identify the specific BMPs being used and include those BMPs in the mitigation plan. Discuss mitigation measures in terms of “will” and “would” when such measures have already been incorporated into the proposal. Use terms like “may” and “could” when proposing or suggesting mitigation measures. Both the public and the Air Force community need to know what commitments are being considered and selected, and who will be responsible for implementing, funding, and monitoring the mitigation measures.

(b) The proponent funds and implements mitigation measures in the mitigation plan that is approved by the decision-maker. Where possible and appropriate because of amount, the proponent should include the cost of mitigation as a line item in the budget for a proposed project. The proponent must ensure compliance with mitigation requirements, monitoring their effectiveness, and must keep the EPF informed of the mitigation status. The EPF reports its status, through the MAJCOM, to HQ USAF/A7CI when requested. Upon request, the EPF must also provide the results of relevant mitigation monitoring to the public.

(c) The proponent may “mitigate to insignificance” potentially significant environmental impacts found during preparation of an EA, in lieu of preparing an EIS. The FONSI for the EA must include these mitigation measures. Such mitigations are legally binding and must be carried out as the proponent implements the project. If, for any reason, the project proponent later abandons or revises in environmentally adverse ways the mitigation commitments made in the FONSI, the proponent must prepare a supplemental EIAP document before con-

32 CFR Ch. VII (7–1–10 Edition)

tinuing the project. If potentially significant environmental impacts would result from any project revisions, the proponent must prepare an EIS.

(d) For each FONSI or ROD containing mitigation measures, the proponent prepares a plan specifically identifying each mitigation, discussing how the proponent will execute the mitigations, identifying who will fund and implement the mitigations, and stating when the proponent will complete the mitigation. The mitigation plan will be forwarded, through the MAJCOM EPF to HQ USAF/A7CI for review within 90 days from the date of signature of the FONSI or ROD.

[64 FR 38129, July 15, 1999, as amended at 66 FR 16868, Mar. 28, 2001; 72 FR 37106, July 9, 2007]

§ 989.23 Contractor prepared documents.

All Air Force EIAP documents belong to and are the responsibility of the Air Force. EIAP correspondence and documents distributed outside of the Air Force should generally be signed out by Air Force personnel and documents should reflect on the cover sheet they are an Air Force document. Contractor preparation information should be contained within the document's list of preparers.

§ 989.24 Public notification.

(a) Except as provided in § 989.26, public notification is required for various aspects of the EIAP.

(b) Activities that require public notification include:

- (1) An EA and FONSI.
- (2) An EIS NOI.
- (3) Public scoping meetings.
- (4) Availability of the draft EIS.
- (5) Public hearings on the draft EIS (which should be included in the NOA for the draft EIS).
- (6) Availability of the final EIS.
- (7) The ROD for an EIS.

(c) For actions of local concern, the list of possible notification methods in 40 CFR 1506.6(b)(3) is only illustrative. The EPF may use other equally effective means of notification as a substitute for any of the methods listed. Because many Air Force actions are of limited interest to persons or organizations outside the Air Force, the EPF
