transportation, whichever occurs first, may be allowed.

§ 115.15 Permit bonds.

When compensatory works or the removal of temporary structures should be required of the permittee, or in other unusual cases when there is reason to anticipate that the permittee may fail to carry out parts of the work that are against his interest, an additional condition will be included in the permit requiring the permittee to furnish a bond insuring compliance with the permit requirements.

§ 115.20 Transfer of permits.

Permits express merely the assent of the Federal Government so far as concerns the public rights of navigation. Although issued to a specific party, the assent is not limited to execution of the work by that party and may be availed of by the assignees or purchasers of the property affected, provided the terms of the instrument are strictly complied with.

§ 115.30 Sufficiency of State authority for bridges.

An opinion of the attorney general of the State as to the sufficiency of State authority for the construction of a bridge is acceptable to the Coast Guard in doubtful cases.

§ 115.40 Bridge repairs.

Repairs to a bridge which do not alter the clearances, type of structure, or any integral part of the substructure or superstructure or navigation conditions, but which consist only in the replacement of worn or obsolete parts, may, if the bridge is a legally approved structure, be made as routine maintenance without approval of the U.S. Coast Guard.

§ 115.50 Application for bridge permits.

(a) Approval of plans. An application for authorization to construct a bridge across navigable waters of the United States must show the name and address of the applicant; the waywater and location of the bridge; citation to the act of Congress or the State legislature authorizing the bridge; be accompanied by a map of the location and plans of the bridge showing the features which affect navigation; and papers to establish the identity of the applicant.

(b) Prior authority necessary. Except as provided under paragraph (c) of this section, a bridge cannot lawfully be constructed across any navigable waterway of the United States until the location and plans have been approved by the Coast Guard.

(c) Prior authority not necessary. Coast Guard approval of the location and plans for construction or modification of a bridge or causeway is not required for any bridge or causeway over waters which are not subject to the ebb and flow of the tide and which are not used and are not susceptible to use in their natural condition or by reasonable improvement as a means to transport interstate or foreign commerce, whether or not such waters were used or were susceptible to use, at some previous time, to transport commerce (historic use). This provision does not apply to bridges which connect the United States with any foreign country.

(d) Form. The application for the approval of plans consists of a letter accompanied with maps and plans of the proposed structure.

(e) Signature. In case of signature by an agent or by an official of a corporation, a duly authenticated copy of the authority for the action must accompany the application.

(f) Identification. If the applicant is a corporation, it must furnish certified copies of the following papers, all properly authenticated: The charter or articles of incorporation; the minutes of organization; extract from minutes showing the names of the present officers of the corporation.

(1) Where State laws vest in State or county officers, such as boards of supervisors and county courts, the power to authorize the construction of bridges, they must furnish with their application certified extracts from their proceedings showing their action authorizing the proposed structure.

(g) Plans. Four sets of plans must be submitted with the application, on which the location of the work and the
§ 115.60 Procedures for handling applications for bridge construction permits.

The following procedures will be observed in the handling of applications for permits to construct, modify, or replace bridges over navigable waters.

(a) District Commander's review of application and plans. When an application is received, the District Commander verifies the authority for construction of the bridge, reviews the application and plans for sufficiency, ascertains the views of local authorities and other interested parties, and ensures that the application complies with relevant environmental laws, regulations, and orders. If the application contains any defects that would prevent issuance of a permit (as for example, if the proposed bridge provided insufficient clearance), the applicant is notified that the permit cannot be granted and given reasons for this determination. The applicant may then request that the application be considered by the Commandant. If the applicant makes such a request, or if the application is not found defective, the District Commander notifies the public that it has been received and continues its processing. A copy of this notification will be sent to the state, interstate agency or the Environmental Protection Agency (EPA) responsible for acting on requests for water quality certification for the project. If the state, interstate agency, or the EPA fails to issue or deny the water quality certification within 30 days after receiving the copy of this notification, the requirements for a water quality certification are waived. If the appropriate agency notifies the District Commander that the applicant has not filed a request for water quality certification, or requests additional time to review an application, additional time will be granted.

(b) Public meeting. (1) Public meetings will be held when there are substantial issues concerning the effect that the proposed bridge will have on the reasonable needs of navigation.

(2) Notice of the public meeting will be published in the Federal Register. Notice of the meeting is also mailed to State, county, and municipal authorities and all other known interested
