Coast Guard, DHS § 157.27

(4) Documentation, calculations, or a revised loading manual to show that the vessel, with the addition of the segregated ballast tanks, meets the structural standards in 46 CFR part 32.

(5) Plans and calculations to show that the vessel, as modified, complies with the segregated ballast capacity and distribution requirements in §157.10a.

(b) Before each foreign vessel under §157.7a(a)(1) or §157.10a(c)(1) enters the navigable waters of the United States, the owner or operator of that vessel must—

(1) Submit to the Commandant (CG–543), U.S. Coast Guard, Washington, D.C. 20593–0001—

(i) A letter from the authority that assigns the load line to the vessel finding that the location of the segregated ballast tanks is acceptable; and

(ii) Plans and calculations to substantiate compliance with the segregated ballast capacity requirements in §157.10(b); or

(2) Submit to the Officer in Charge, Marine Inspection, of the zone in which the first U.S. port call is made, a letter from the government of the vessel's flag state certifying that the vessel complies with the segregated ballast capacity requirements in §157.09(b) or Regulation 13 of the MARPOL 73/78.

Reporting and Recordkeeping requirements approved by the Office of Management and Budget under control number 1625–0036)

Subpart C—Vessel Operation

§ 157.25 Applicability of subpart C.

(a) This subpart applies to each vessel to which this part applies of 150 gross tons or more, unless otherwise indicated, that carries crude oil or products in bulk as cargo. This subpart does not apply to a foreign vessel which remains beyond the navigable waters of the United States and does not transfer oil cargo at a port or place subject to the jurisdiction of the United States.

(b) Sections 157.29, 157.31, 157.37(a)(5), 157.37(a)(6) and 157.43 apply to foreign vessels when they discharge into the navigable waters of the United States.

(c) Sections 157.35, 157.37, except paragraphs (a)(5) and (a)(6), 157.39, 157.45, and 157.47 do not apply to foreign vessels.

§ 157.26 Operation of a tank vessel in violation of regulations.

No person may cause or authorize the operation of a tank vessel in violation of the regulations in this part.

§ 157.27 Discharges: Tank vessels carrying oil exclusively on rivers, lakes, bays, sounds, and the Great Lakes, and seagoing tank vessels of less than 150 gross tons.

Unless a tank vessel carrying oil exclusively on rivers, lakes, bays, sounds, and the Great Lakes, or a seagoing tank vessel of less than 150 gross tons discharges clean ballast or segregated ballast, the vessel must:
§ 157.28 Discharges from tank barges exempted from certain design requirements.

The person in charge of a tank barge exempted under § 157.08(g) from the requirements in §§ 157.11, 157.13, 157.15, and 157.23 shall ensure that while the barge is proceeding en route:

(a) Cargo tanks are not ballasted or washed; and
(b) Oil or oily mixtures are not discharged.

§ 157.29 Discharges: Seagoing tank vessels of 150 gross tons or more.

Unless a seagoing tank vessel of 150 gross tons or more discharges an oily mixture in compliance with the requirements in § 157.37, § 157.39, or § 157.43, the vessel must:

(a) Retain the mixture; or
(b) Transfer the mixture to a reception facility.

§ 157.31 Discharges: Chemical additives.

No person may use a chemical additive to circumvent the discharge requirements in §§ 157.27, 157.29, 157.37, 157.39, and 157.43.

§ 157.33 Water ballast in fuel oil tanks.

A new vessel may not carry ballast water in a fuel oil tank.

§ 157.35 Ballast added to cargo tanks.

The master of a tank vessel with segregated ballast tanks or dedicated clean ballast tanks under § 157.09, § 157.10, § 157.10a(a)(1), § 157.10a(b), § 157.10a(c), § 157.10b(a), § 157.10b(b)(1), or § 157.10c(c) shall ensure that ballast water is carried in a cargo tank only if—

(a) The vessel encounters abnormally severe weather conditions;
(b) More ballast water than can be carried in segregated ballast tanks or dedicated clean ballast tanks is necessary for the safety of the vessel;
(c) The ballast water is processed and discharged in compliance with § 157.37; and
(d) On a new vessel under § 157.10 that carries crude oil, the ballast water is only carried in a cargo tank that is crude oil washed in accordance with Subpart D of this part during or after the most recent discharge of crude oil from that tank.

§ 157.37 Discharge of oily mixtures from oil cargoes.

(a) A tank vessel may not discharge an oily mixture into the sea from a cargo tank, slop tank, or cargo pump room bilge unless the vessel:

(1) Is more than 50 nautical miles from the nearest land;

(2) Is proceeding en route;

(3) Is discharging at an instantaneous rate of oil content not exceeding 30 liters per nautical mile;

(4) Is an existing vessel and the total quantity of oil discharged into the sea does not exceed 1/15,000 of the total quantity of the cargo that the discharge formed a part, or is a new vessel and the total quantity of oil discharged into the sea does not exceed 1/30,000 of the total quantity of the cargo that the discharge formed a part;

(5) Discharges:

(i) Through the above waterline discharge point described in § 157.11(b)(2);

(ii) In accordance with paragraph 5 of appendix E to this part, if the vessel is an existing vessel with a Part Flow System meeting that appendix;

(iii) Below the waterline in accordance with paragraph (e) of this section;

(6) Has in operation an oil discharge monitoring and control system required by § 157.12 that is designed for use with the oily mixture being discharged, except that the system may be operated manually if:

(i) The automatic system fails during a ballast voyage;

(ii) The failure is recorded in the Oil Record Book;
