

reasonably required for carrying on mining and prospecting shall be allowed, except under the National Forest rules and regulations, nor shall the locator prevent or obstruct other occupancy of the surface or use of surface resources under authority of National Forest Regulations, or permits issued thereunder, if such occupancy or use is not in conflict with mineral developments.

(f) When any road is to be built for mining purposes upon a mining claim, the locator must apply to the Forest Supervisor for the applicable rules and regulations governing the construction and maintenance of roads within the Black Hills National Forest, and such road will be built in accordance with such specifications and in such locations as the Forest Supervisor may direct.

(g) In conducting mining operations the locator, his agents, representatives, or employees, or other persons whose presence in the area or in the vicinity thereof, is occasioned by such mining operations, shall use due diligence in the prevention and suppression of fires, and shall, when requested by the Forest Supervisor, or his authorized representative, be available for service in the extinguishment and suppression of all fires occurring within the Preserve: *Provided*, That if such fire does not originate through any negligence on the part of the locator, his agents, representatives, or employees, or other persons whose presence in the area or in the vicinity thereof, is occasioned by such mining operations and does not threaten the structures, improvements or property incident to the mining operation, such persons shall be paid for their services at the current rate of pay of fire fighters employed by the United States.

(h) Nothing contained in this section shall be construed to relieve the locator from complying with any requirements of the laws of the State of South Dakota, nor from compliance with or conformity to any requirements of any Federal law or regulation now existing or which later may be enacted or promulgated, and applicable to the subject involved in this section.

[13 FR 4792, Aug. 19, 1948, as amended at 48 FR 31854, July 12, 1983]

§ 251.14 Conditions, rules and regulations to govern exercise of timber rights reserved in conveyance to the United States.

(a) Except as otherwise provided in paragraphs (b) and (c) of this section, in conveyance of lands to the United States under authorized programs of the Forest Service, where owners reserve the right to enter upon the conveyed lands and to cut and remove timber and timber products, said reservations shall be subject to the following conditions, rules and regulations which shall be expressed in and made a part of the deed of conveyance to the United States and such reservations shall be exercised thereunder and in obedience thereto:

(1) Whoever undertakes to exercise the reserved rights, hereinafter called operator, shall give prior written notice to Forest Service and shall submit satisfactory evidence of authority to exercise such rights. Operator shall repair, replace, or restore any improvements owned by the United States or its permittees, damaged or destroyed by the timber operations and he shall restore the land to a condition safe and reasonably serviceable for authorized programs of Forest Service.

(2) In cutting and removing timber and timber products and in locating, constructing and using mills, logging roads, railroads, chutes, landings, camps, or other improvements, no unnecessary damage shall be done to the air, water and soil resources, and to young growth or to trees left standing. All survey monuments and witness trees shall be preserved.

(3) All trees, timber or timber products of species or sizes not specifically reserved which are unnecessarily cut, damaged, or destroyed by operator shall be paid for at double the usual rates charged in the locality for sales of similar National Forest timber and timber products.

(4) Slash and debris resulting from the cutting, removal, or processing of timber or timber products, or from construction operations, shall be disposed of or otherwise treated by methods acceptable to the Forest Service. Such treatment or disposal shall comply with known air and water quality

§ 251.14

36 CFR Ch. II (7-1-10 Edition)

criteria and standards and include necessary preparatory work such as fireline constructing and snag falling. The timing of log removal and preparatory work shall not unnecessarily delay slash disposal or treatment.

(5) Operator is authorized to construct and maintain buildings, facilities, and other improvements, including roads needed to log the reserved timber. Construction and maintenance plans, designs, and location shall be approved in writing by Forest Service before construction is started.

(6) All buildings, camps, equipment, and other structures or improvements shall be removed from the lands within 6 months from date of completion or abandonment of the operation, unless relieved by Forest Service by issuance of a special-use permit. Otherwise such buildings, camps, equipment, and other structures or improvements shall become the property of the United States, but this does not relieve operator of liability for the cost of removal and restoration of the site.

(7) Nothing in this section shall be construed to exempt operator from any requirements of the laws of the States in which situated; nor from compliance with or conformity to any requirement of any law which later may be enacted and which otherwise would be applicable.

(8) While operations are in progress, operator, his employees, any subcontractors, and their employees, shall take all reasonable and practicable action in the prevention and suppression of fire, and shall be available for service in the suppression of all fires within the reserved area. On any fire not caused by negligence on the part of the operator, Forest Service shall pay operator at fire-fighting rates common in the area or at prior agreed rates for equipment or manpower furnished by operator.

(9) Only one cutting shall be made on any portion of the area on which timber is reserved. Forest Service may permit the cutting of special products, or products the cutting of which is seasonal, on any portion of the area in advance of the cutting of the chief products of the reserved timber. Each reservation of timber shall include a spe-

cific period of time within which material may be removed.

(10) Forest Service shall have the right to use any road constructed under the authority of this timber reservation for any and all purposes in connection with the protection and administration of the National Forest.

(11) Operator shall take all reasonable precautions to prevent pollution of the air, soil, and water, in operation hereunder.

(12) All activities by operator in the reserved area shall be conducted in a safe, orderly, and workmanlike manner.

(13) For the protection of streamcourses, the following measures shall be observed by operator: Culverts or bridges will be required on temporary roads at all points where it is necessary to cross streamcourses. Such facilities shall be of sufficient size and design to provide unobstructed flow of water. Equipment will not be operated in streamcourses except at designated crossings and as essential to construction or removal of culverts and bridges. Any stream that is temporarily diverted must be restored to the natural course as soon as practicable, and in any event prior to a major runoff season.

(14) Operator shall perform currently as weather and soil conditions permit, the following erosion control work on portions of the reserved area where logging is in progress or has been completed: Construct cross-ditches and water-spreading ditches where staked or otherwise marked on the ground by Forest Service; after a temporary road has served operator's purpose, operator shall remove culverts and bridges, eliminate ditches, out-slope and cross-drain roadbed and remove ruts and berms to the extent necessary to stabilize fills and otherwise minimize erosion; operator shall avoid felling into, yarding in, or crossing natural meadows; and operations will not take place when soil and water conditions are such that excessive damage will result.

(b) The conditions, rules and regulations set forth in paragraphs (a)(1) through (14) of this section shall not apply to reservations contained in conveyances of land to the United States under the Act of March 3, 1925, as

Forest Service, USDA

§ 251.15

amended (43 Stat. 1133, 64 Stat. 82, 16 U.S.C. 555).

(c) In cases where a State, or an agency, or a political subdivision thereof, reserves timber rights for the cutting and removal of timber and timber products, in the conveyance of land to the United States under authorized programs of the Forest Service and there are provisions in the laws of such State or in conditions, rules and regulations promulgated by such State, agency or political subdivision thereof, which the Chief, Forest Service, determines are adequate to protect the interest of the United States in the event of the exercise of such reservation, the Chief, Forest Service, is hereby authorized, in his discretion, to subject the exercise of the reservation to such statutory provisions or such conditions, rules, and regulations in lieu of the conditions, rules and regulations set forth in paragraphs (a) (1) through (14) of this section. In that event, such statutory provisions or such conditions, rules and regulations shall be expressed in and made a part of the deed of conveyance to the United States and the reservation shall be exercised thereunder and in obedience thereto.

All regulations heretofore issued by the Secretary of Agriculture to govern the exercise of timber rights reserved in conveyance of lands to the United States under authorized programs of Forest Service shall continue to be effective in the cases to which they are applicable, but are hereby superseded as to timber rights hereafter reserved in conveyances under such programs.

[35 FR 5401, Apr. 1, 1970]

§ 251.15 Conditions, rules and regulations to govern exercise of mineral rights reserved in conveyances to the United States.

(a) Except as otherwise provided in paragraphs (b) and (c) of this section, in conveyances of lands to the United States under authorized programs of the Forest Service, where owners reserve the right to enter upon the conveyed lands and to prospect for, mine and remove minerals, oil, gas, or other inorganic substances, said reservations shall be subject to the following conditions, rules and regulations which shall be expressed in and made a part of the

deed of conveyance to the United States and such reservations shall be exercised thereunder and in obedience thereto:

(1) Whoever undertakes to exercise the reserved rights shall give prior written notice to the Forest Service and shall submit satisfactory evidence of authority to exercise such rights. Only so much of the surface of the lands shall be occupied, used, or disturbed as is necessary in bona fide prospecting for, drilling, mining (including the milling or concentration of ores), and removal of the reserved minerals, oil, gas, or other inorganic substances.

(2)(i) None of the lands in which minerals are reserved shall be so used, occupied, or disturbed as to preclude their full use for authorized programs of the Forest Service until the record owner of the reserved rights, or the successors, assigns, or lessees thereof, shall have applied for and received a permit authorizing such use, occupancy, or disturbance of those specifically described parts of the lands as may reasonably be necessary to exercise of the reserved rights.

(ii) Said permit shall be issued upon agreement as to conditions necessary to protect the interest of the United States including such conditions deemed necessary to provide for the safety of the public and other users of the land, and upon initial payment of the annual fee, which shall be at the rate of \$2 per acre or fraction of acre included in the permit.

(iii) The permit shall also provide that the record owner of the reserved right or the successors, assigns, or lessees thereof, will repair or replace any improvements damaged or destroyed by the mining operations and restore the land to a condition safe and reasonably serviceable for authorized programs of the Forest Service, and shall provide for a bond in sufficient amount as determined necessary by the Forest Service to guarantee such repair, replacement or restoration.

(iv) Failure to comply with the terms and conditions of the aforesaid permit shall be cause for termination of all rights to use, occupy, or disturb the surface of the lands covered thereby, but in event of such termination a new
