§ 292.18 Recreation Area (SNRA) are subject to the General Management Plan and the laws, rules, and regulations pertaining to the National Forests with the exception that part 252 of this chapter does not apply to these resources. No use or disposal of such resources shall be authorized which will result in substantial impairment of the natural values of the Recreation Area.

(b) Definitions:
(1) Act means Pub. L. 92–400 (86 Stat. 612), which established the SNRA.
(2) Area Ranger or Superintendent means the Forest Service officer having administrative authority for the SNRA.
(3) General management plan means the document setting forth the land allocation and resource decisions for management of the SNRA.
(4) Letter of authorization means a letter signed by the Area Ranger, or his designee, authorizing an operator to conduct operations as approved in the operating plan.
(5) Mineral resources means all locatable minerals.
(6) Operator means a person conducting or proposing to conduct operations.
(7) Operations means all functions, works, and activities in connection with exploration, development, mining or processing of mineral resources and all uses reasonably incident thereto, including roads and other means of access on lands, regardless of whether said operations take place on or off mining claims.
(8) Operating plan means a written instrument describing proposed operations on Federal lands and containing such information as required by § 292.18.
(9) Person means any individual, partnership, association, corporation, or other legal entity.
(10) Substantial impairment means that level of disturbance of the values of the SNRA which is incompatible with the standards of the General Management Plan. The proposed activities will be evaluated as to:
   (i) The period of impact,
   (ii) The area affected, and
   (iii) The importance of the impact on the SNRA values.
(11) Unpatented mining claims means any mining claim or millsite claim located prior to August 22, 1972, pursuant to the Mining Law of 1872, but not patented.

§ 292.18 Mineral resources.

(a) Occupancy. No unpatented mining claim may be used or occupied, except as otherwise permitted for any purpose other than exploration, mining, or processing operations and uses reasonably incident thereto.

(b) Letter of authorization. A letter of authorization with the posting of an appropriate bond is required prior to conducting operations in the SNRA.

(c) Operating plan. A proposed operating plan must be filed with the Area Ranger prior to conducting any operations and prior to construction, reconstruction, improvement or maintenance of roads and trails, bridges, or other facilities for access within the SNRA; provided, that an operating plan is not required for—
(1) Operations which only involve vehicular travel on existing roads open to public use;
(2) Marking and/or reestablishing claims corners;
(3) Sampling and exploration work which will not cause significant damage to surface resources and will not involve the removal of more than 100 pounds of material for analysis and study, provided the Area Ranger has prior notice of such activities; or
(4) The evaluation and study of existing underground mine workings not involving surface disturbances.

(d) Operating plan—requirements. Each operating plan shall include:
(1) The names and mailing addresses of operators and their agents, along with a statement of ownership and/or authorization under which the operation is to be conducted, and including a copy of the location notice(s), proof of assessment labor, and quit claim deeds if ownership has changed within the assessment year.
(2) A map or sketch showing information sufficient to locate the proposed area of operations on the ground, existing and/or proposed roads or access routes to be used in connection with
the operations and the approximate location and size of areas where surface resources will be disturbed.

(3) Information describing the nature of operations proposed and how they will be conducted, the type and standard of existing and proposed roads or access routes, the means of transportation to be used, the period during which the proposed operations will take place, and measures to be taken for protecting the values of the SNRA and reclaiming the lands.

(e) Operating plan—approval. (1) The Area Ranger shall promptly acknowledge receipt of any operating plan to the operator. The Area Ranger shall review the environmental effects and conduct a technical examination of each proposed operating plan. The technical examination shall identify the resources and the land uses in the area of operations. The Area Ranger shall use the current General Management Plan of the SNRA and the Final Environmental Statement as guides in determining whether the proposed operations may result in substantial impairment of the values of the SNRA. In his review, the Area Ranger may solicit comments from the general public and/or other government agencies in analysis of environmental effects. In his review, the Area Ranger will consider the compatibility of the proposed operating plan with the Act and the General Management Plan. The Area Ranger may not approve an operating plan for an identical claimed area to more than one operator.

(2) Within 30 working days of receipt of a proposed operating plan, the Area Ranger shall take one of the following actions:

(i) Notify the operator that the operating plan has been approved as submitted; or,

(ii) Notify the operator that the operating plan has been approved as subject to the operator accepting the changes or conditions deemed necessary by the Area Ranger; or,

(iii) Notify the operator that more time is necessary to review the plan because of the need to prepare an environmental impact statement, or conduct a cultural resource survey, or other stated reasons; in such cases, the operator will be notified of the approximate time needed to complete the review; or,

(iv) Notify the operator of an apparent conflict of ownership and that additional proof of ownership is required; or,

(v) Notify the operator that the operating plan as submitted is inadequate to support any conclusion as to substantial impairment, and that additional information will be required; or,

(vi) Notify the operator that the operating plan is not approved since such operations as specified in the plan would create substantial impairment.

(f) Operating plans—suspension or modification. The Area Ranger may suspend or terminate authorization to operate in whole or in part where such operations are causing substantial impairment which cannot be mitigated. At any time during operations under an approved operation plan, the operator may be required to modify the operating plan in order to minimize or avoid substantial impairment of the values of the SNRA.

(g) Bond requirements. (1) An operator shall furnish a bond, in the amount determined by the Area Ranger to be appropriate for reclamation of the disturbed surface area, prior to the commencement of operations. In lieu of a bond, the operator may deposit into a Federal depository, as directed by the Forest Service, cash in an amount equal to the required dollar amount of the bond or negotiable securities of the United States having market value at the time of deposit or not less than the required dollar amount of the bond.

(2) When the reclamation of the project, or portions thereof, has been completed, the operator will notify the Area Ranger who will examine the area to determine whether the reclamation is acceptable. When the Area Ranger has accepted as completed any portion of the reclamation, he shall reduce proportionately the amount of bond thereafter to be required with respect to the remaining reclamation. However, the operator will not be released from liability under the bond for the amount which may be necessary to revegetate each planting area for a minimum period of at least 5 years after the first efforts at revegetation if those initial efforts are unsuccessful.
(3) If the Area Ranger determines that revegetation is likely to occur before the expiration of such minimum period, he may release the operator from the extended liability under the bond for revegetation of planting area.

(b) Access. The operator shall permit free and unrestricted public access to and through lands included within an unpatented mining claim for all lawful and proper purposes. In areas where such access would unduly interfere with authorized operations or would constitute a hazard to public health and safety, public use may be restricted with prior approval of the Area Ranger.

Subpart E—Hells Canyon National Recreation Area—Private Lands

SOURCE: 59 FR 30497, June 13, 1994, unless otherwise noted.

§ 292.20 Purpose and scope.

(a) Purpose. The Act establishing the Hells Canyon National Recreation Area (hereafter referred to as HCNRA) (16 U.S.C. 460gg–460gg–13) encourages the retention of traditional and valid uses of private land within the HCNRA, such as ranching, grazing, farming, timber harvesting, and the occupation of homes and lands associated therewith, as they existed at the time the HCNRA was established on December 31, 1975. To this end, the Act directs the Secretary of Agriculture to promulgate regulations establishing standards for the use and development of private land within the HCNRA and grants the Secretary limited condemnation authority to address situations where the standards are not met. The purpose of this subpart is to establish standards that would guide the Secretary’s consideration of the use of the limited condemnation authority granted by the Act.

(b) Scope. The regulations in this subpart establish standards applicable to all private property within the boundaries of the HCNRA, including that within the boundaries of the Rapid, Snake, and Imnaha Wild and Scenic Rivers and the Hells Canyon Wilderness. The regulations in this subpart do not operate to restrict the use and development of private property; rather, they serve to inform the landowner of those uses that are compatible with purposes for which the HCNRA was established. Uses not compatible with these standards could result in the Secretary acquiring land or interests therein without a landowner’s consent.

The regulations in this subpart, in and of themselves, do not effect a taking of private property, including valid, existing water rights, nor do the standards established in this subpart limit or restrict a private landowner’s property use that is compatible with the purposes of the Act. The Responsible Official may use the regulations in this subpart solely to determine whether private land uses or developments are compatible with the purposes and direction of the Act and, if not, to determine whether the Secretary should consider initiating condemnation proceedings to acquire land or scenic easements.

§ 292.21 Definitions.

For the purposes of this subpart, the following terms are defined:

Archaeological sites are those sites containing relics, artifacts, and other evidence of past human cultures including historic properties as defined by the National Historic Preservation Act.

Commercial land is land within the HCNRA developed for commercial purposes as of June 13, 1994 and which is assigned to the commercial land category (§ 292.22).

Condemnation is the acquisition of lands or interests therein by the Secretary without the consent of the owner. In the case of the Act, condemnation is a limited authority that may be exercised by the Secretary only in the event that a standard or standards set forth herein are violated for all private land categories except mining lands. Where mining lands are involved, the Secretary may exercise his
