§ 447.12 Methods of analysis set forth in 40 CFR part 401 shall apply to this subpart.

§ 447.12 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

Except as provided in §§125.30 through 125.32, any existing point source subject to this subpart shall achieve the following effluent limitations representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available (BPT): There shall be no discharge of process waste water pollutants to navigable waters.

[60 FR 33970, June 29, 1995]

§ 447.13 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

The following limitations establish the quantity or quality of pollutants or pollutant properties which may be discharged by a point source subject to the provisions of this subpart after application of the best available technology economically achievable: There shall be no discharge of process waste water pollutants to navigable waters.

§ 447.14 [Reserved]

§ 447.15 Standards of performance for new sources.

The following standards of performance establish the quantity or quality of pollutants or pollutant properties which may be discharged by a new source subject to the provisions of this subpart: There shall be no discharge of process waste water pollutants to navigable waters.

§ 447.16 Pretreatment standards for new sources.

Any new source subject to this subpart that introduces process waste water pollutants into a publicly owned treatment works must comply with 40 CFR part 403. In addition, the following pretreatment standard establishes the quantity or quality of pollutants or pollutant properties controlled by this section which may be discharged to a publically owned treatment works by a new source subject to the provisions of this subpart: There shall be no discharge of process water pollutants to a publically owned treatment works.

PART 450—CONSTRUCTION AND DEVELOPMENT POINT SOURCE CATEGORY

Subpart A—General Provisions

Sec.
450.10 Applicability.
450.11 General definitions.

Subpart B—Construction and Development Effluent Guidelines

450.21 Effluent limitations reflecting the best practicable technology currently available (BPT).
450.22 Effluent limitations reflecting the best available technology economically achievable (BAT).
450.23 Effluent limitations reflecting the best conventional pollutant control technology (BCT).
450.24 New source performance standards reflecting the best available demonstrated control technology (NSPS).

SOURCE: 74 FR 63057, Dec. 1, 2009, unless otherwise noted.

Subpart A—General Provisions

§ 450.10 Applicability.

(a) This part applies to discharges associated with construction activity required to obtain NPDES permit coverage pursuant to 40 CFR 122.26(b)(14)(x) and (b)(15).

(b) The provisions of §450.22(a) do not apply to discharges associated with interstate natural gas pipeline construction activity.

(c) The New Source Performance Standards at §450.24 apply to all new sources and are effective February 1, 2010.

(d) The BPT, BCT and BAT effluent limitations at §450.21 through §450.23 apply to all sources not otherwise covered by paragraph (c) of this section and are effective February 1, 2010.
