§ 101–25.001 Scope of part.
This part provides policies and guidelines pertaining to subject matter in the general area of supply management which is not appropriate for coverage in other parts of this subchapter E.

[29 FR 13256, Sept. 24, 1964]

Subpart 101–25.1—General Policies

SOURCE: 29 FR 13256, Sept. 24, 1964, unless otherwise noted.

§ 101–25.100 Use of Government personal property and nonpersonal services.
Except in emergencies, Government personal property and nonpersonal services shall be used only for those purposes for which they were obtained or contracted for or other officially designated purposes. Emergency conditions are those threatening loss of life and property. As used in this section nonpersonal services means those contractual services, other than personal and professional services (as defined in 40 U.S.C. 472). This includes property and services on interagency loan as well as property leased by agencies. Agency heads shall ensure that the provisions of this § 101–25.100 are enforced to restrict the use of Government property/services to officially designated activities.

[40 FR 29818, July 16, 1975]

(a) This § 101–25.101 prescribes general criteria governing selection of the appropriate methods of supply to be utilized in meeting the planned requirements of the Government. It is directly applicable to executive agencies, and other Federal agencies are requested to observe these criteria in conducting their supply operations.
(b) As used in this § 101–25.101, the term use point means a storeroom or other redistribution point where supplies, materials, or equipment representing more than a 30-day supply are maintained primarily for issue directly to consumers within the local area, as distinguished from storage points where supplies and equipment are issued to redistribution points.

The following criteria shall govern in determining whether an item can be most advantageously supplied through storage and issue to use points:
(a) The item shall be physically adaptable to storage and issue and of such a character that it is feasible to forecast overall requirements of the use points served with reasonable accuracy;
(b) Rate of use and frequency of ordering at use points shall be sufficient to warrant storage and issue;
(c) The rate of deterioration or obsolescence shall be sufficiently low to avoid unnecessary loss; and
(d) Conditions exist where any of the following factors require supply through storage and issue (except that dangerous commodities of high weight and density, or commodities highly susceptible to damage normally should not be considered for supply through storage and issue unless one or more of such factors are determined to be of overriding importance)—
(1) Where price advantage through bulk buying is sufficient to render storage and issue more economical, all costs, both direct and indirect, considered;
(2) Where close inspection or testing is necessary to secure quality, or where repetitive inspection and test of small lots are prohibitive from the standpoint of cost or potential urgency of need.
(3) Where advance purchase and storage are necessitated by long procurement leadtime.
(4) Where an item is of special manufacture or design and is not readily available from commercial sources.
(5) Where an adequate industry distribution system does not exist to assure availability at use point.
(6) Where volume purchases are necessary to secure timely deliveries and advantageous prices.
Federal Property Management Regulations

§ 101–25.101–5

(7) Where market conditions are such that supply through storage and issue is required to assure adequate supply.

(8) Where stocking of supplies and equipment necessary for implementation of emergency plans is required for an indefinite period.

§ 101–25.101–3 Supply through consolidated purchase for direct delivery to use points.

The following criteria shall govern in determining whether an item can be most advantageously supplied through consolidated purchase for direct delivery to use points:

(a) The items shall be equipment or supply items of such a character that it is feasible to forecast requirements for delivery to specific use points; and

(b) Conditions exist where any of the following factors requires consolidated purchasing of such items for direct delivery to use points—

(1) Where greatest price advantage, both direct and indirect costs considered, is obtainable through large definite quantity purchasing.

(2) Where an item is of special manufacture or design and is not readily available from commercial sources.

(3) Where market conditions are such that central procurement is required to assure adequate supply.

(4) Where contracts for production quantities are necessary to secure timely deliveries and advantageous prices.

(5) Where the quantity is large enough to assure lowest transportation costs or, conversely, where transportation costs for small quantity redistribution are so excessive that it is not feasible to store and issue the items.

§ 101–25.101–4 Supply through indefinite quantity requirement contracts.

The following criteria shall govern in determining whether an item should be supplied through local purchase:

(a) Urgency of need requires local purchase to assure prompt delivery;

(b) The items are perishable or subject to rapid deterioration which will not permit delay incident to shipment from distant points;

(c) The local purchase is within applicable limitation established by the agency head; or

(d) Local purchase will produce the greatest economy to the Government.

The following criteria shall govern in determining whether an item should be supplied through local purchase:

(a) The item shall be such a character that—

(1) Handling on a storage and issue basis is not economically sound, under the criteria prescribed in §101–25.101–2;
