

## Bureau of Reclamation, Interior

## § 404.4

(b) A rural water supply project may include the following, or any combination of the following:

(1) The construction or installation of new rural water supply infrastructure and facilities;

(2) The improvement or upgrade of existing rural water supply infrastructure and facilities;

(3) The extension of existing rural water supply infrastructure and facilities to reach an increased service area; and

(4) The inter-connection of existing rural water supply infrastructure and facilities currently serving individual communities, dispersed homesites, rural areas, or tribes.

*Secretary* means the Secretary of the Interior, acting through the Commissioner of the Bureau of Reclamation.

*Tribal organization* means:

(a) The recognized governing body of an Indian tribe; and

(b) Any legally established organization of Indians that is controlled, sanctioned, or chartered by the governing body, or democratically elected by the adult members of the Indian community to be served by the organization.

### § 404.3 What is the Reclamation Rural Water Supply Program?

This program addresses domestic, municipal, and industrial water supply needs in rural areas of the Reclamation States. Reclamation's experience, technical expertise, and financial resources assist rural communities to identify their water supply problems and needs, and evaluate options for addressing those needs. Using a regional or watershed perspective, Reclamation assists in planning projects that maximize regional and national benefits. Through this program, Reclamation works in cooperation with non-Federal project sponsors in Reclamation States on a cost-share basis to:

(a) Investigate and identify opportunities to ensure safe and adequate rural water supplies for domestic, municipal, and industrial use in rural areas and small communities, including Indian tribes;

(b) Plan the design and construction of rural water supply projects through the conduct of appraisal investigations and feasibility studies; and

(c) Oversee, as appropriate, the construction of rural water supply projects that the Secretary recommends to Congress, which are subsequently authorized and funded for construction by Congress.

### § 404.4 What are the goals of the program?

The goals of the program are to:

(a) Assess and address urgent and compelling rural water supply needs that are not currently met by other programs;

(b) Promote and apply a regional or watershed perspective to water resources management in planning rural water supply projects;

(c) Develop solutions to address rural water supply needs that are cost-effective, and that generate national net economic benefits as required under the "Economic Principles and Guidelines for Water and Related Land Resources" (Principles and Guidelines). The Principles and Guidelines, published in 1983 by the Water Resources Council pursuant to the Water Resources Planning Act of 1965 (Pub. L. 89-80) as amended, is incorporated by reference into this section with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. The Principles and Guidelines are intended to ensure proper and consistent planning by Federal agencies in the formulation and evaluation of water and related land resources implementation studies. To enforce any edition other than that specified in this section, the material must be available to the public and approved by the Director of the Federal Register. All approved material is available for inspection at the National Archives and Records Administration (NARA).
