§ 46.310 Contents of an environmental assessment.

(a) At a minimum, an environmental assessment must include brief discussions of:

(1) The proposal;
(2) The need for the proposal;
(3) The environmental impacts of the proposed action;
(4) The environmental impacts of the alternatives considered; and
(5) A list of agencies and persons consulted.

(b) When the Responsible Official determines that there are no unresolved conflicts about the proposed action with respect to alternative uses of available resources, the environmental assessment need only consider the proposed action and does not need to consider additional alternatives, including the no action alternative. (See section 102(2)(E) of NEPA).

(c) In addition, an environmental assessment may describe a broader range of alternatives to facilitate planning and decision-making.

(d) A proposed action or alternative(s) may include adaptive management strategies allowing for adjustment of the action during implementation. If the adjustments to an action are clearly articulated and pre-specified in the description of the alternative and fully analyzed, then the action may be adjusted during implementation without the need for further analysis. Adaptive management includes a monitoring component, approved adaptive actions that may be taken, and environmental effects analysis for the adaptive actions approved.

(e) The level of detail and depth of impact analysis should normally be limited to the minimum needed to determine whether there would be significant environmental effects.

(f) Bureaus may choose to provide additional detail and depth of analysis as appropriate in those environmental assessments prepared under paragraph 46.300(b).

(g) An environmental assessment must contain objective analyses that support conclusions concerning environmental impacts.

§ 46.315 How to format an environmental assessment.

(a) An environmental assessment may be prepared in any format useful to facilitate planning, decision-making, and appropriate public participation.

(b) An environmental assessment may be accompanied by any other planning or decision-making document. The portion of the document that analyzes the environmental impacts of the proposal and alternatives must be clearly and separately identified and not spread throughout or interwoven into other sections of the document.

§ 46.320 Adopting environmental assessments prepared by another agency, entity, or person.

(a) A Responsible Official may adopt an environmental assessment prepared by another agency, entity, or person, including an applicant, if the Responsible Official:

(1) Independently reviews the environmental assessment; and
(2) Finds that the environmental assessment complies with this subpart and relevant provisions of the CEQ Regulations and with other program requirements.

(b) When appropriate, the Responsible Official may augment the environmental assessment to be consistent with the bureau’s proposed action.

(c) In adopting or augmenting the environmental assessment, the Responsible Official will cite the original environmental assessment.
(d) The Responsible Official must ensure that its bureau’s public involvement requirements have been met before it adopts another agency’s environmental assessment.

§ 46.325 Conclusion of the environmental assessment process.
Upon review of the environmental assessment by the Responsible Official, the environmental assessment process concludes with one of the following:
(1) A notice of intent to prepare an environmental impact statement;
(2) A finding of no significant impact; or
(3) A result that no further action is taken on the proposal.

Subpart E—Environmental Impact Statements

§ 46.400 Timing of environmental impact statement development.
The bureau must prepare an environmental impact statement for each proposed major Federal action significantly affecting the quality of the human environment before making a decision on whether to proceed with the proposed action.

§ 46.405 Remaining within page limits.
To the extent possible, bureaus should use techniques such as incorporation of referenced documents into NEPA analysis (46.135) and tiering (46.140) in an effort to remain within the normal page limits stated in 40 CFR 1502.7.

§ 46.415 Environmental impact statement content, alternatives, circulation and filing requirements.
The Responsible Official may use any environmental impact statement format and design as long as the statement is in accordance with 40 CFR 1502.10.
(a) Contents. The environmental impact statement shall disclose:
(1) A statement of the purpose and need for the action;
(2) A description of the proposed action;
(3) The environmental impact of the proposed action;
(4) A brief description of the affected environment;
(5) Any adverse environmental effects which cannot be avoided should the proposal be implemented;
(6) Alternatives to the proposed action;
(7) The relationship between local short-term uses of the human environment and the maintenance and enhancement of long-term productivity;
(8) Any irreversible or irretrievable commitments of resources which would be involved in the proposed action should it be implemented; and
(9) The process used to coordinate with other Federal agencies, State, tribal and local governments, and persons or organizations who may be interested or affected, and the results thereof.
(b) Alternatives. The environmental impact statement shall document the examination of the range of alternatives (paragraph 46.420(c)). The range of alternatives includes those reasonable alternatives (paragraph 46.420(b)) that meet the purpose and need of the proposed action, and address one or more significant issues (40 CFR 1501.7(a)(2–3)) related to the proposed action. Since an alternative may be developed to address more than one significant issue, no specific number of alternatives is required or prescribed. In addition to the requirements in 40 CFR 1502.14, the Responsible Official has an option to use the following procedures to develop and analyze alternatives.
(1) The analysis of the effects of the no-action alternative may be documented by contrasting the current condition and expected future condition should the proposed action not be undertaken with the impacts of the proposed action and any reasonable alternatives.
(2) The Responsible Official may collaborate with those persons or organization that may be interested or affected to modify a proposed action and alternative(s) under consideration prior to issuing a draft environmental impact statement. In such cases the Responsible Official may consider these modifications as alternatives considered. Before engaging in any collaborative processes, the Responsible Official must consider the Federal Advisory Committee Act (FACA) implications of such processes.
