§ 112.01–1 Definitions of Emergency Lighting and Power Systems

Subpart 112.01—Definitions of Emergency Lighting and Power Systems

§ 112.01–1 Purpose.

The purpose of this subpart is to define types of emergency lighting and power systems.

§ 112.01–5 Manual emergency lighting and power system.

A manual emergency lighting and power system is one in which a single manual operation, such as the manual operation of a switch from an “off” to an “on” position, is necessary to cause the emergency power source to supply power to the emergency loads.

§ 112.40–1 General requirements.

Subpart 112.43—Emergency Lighting Systems

112.43–1 Switches.

112.43–5 Controls on island type vessels.

112.43–7 Navigating bridge distribution panel.

112.43–9 Signaling lights.

112.43–11 Illumination for launching operations.

112.43–13 Navigation light indicator panel supply.

112.43–15 Emergency lighting feeders.

Subpart 112.05—General

§ 112.05–1 Purpose.

(a) The purpose of this part is to ensure a dependable, independent, and dedicated emergency power source with sufficient capacity to supply those services that are necessary for the safety of the passengers, crew, and other persons in an emergency and those additional loads that may be authorized under paragraph (c) of this section.

(b) No load may be powered from an emergency power source, except:

(1) A load required by this part to be powered from the emergency power source;

(2) A bus-tie to the main switchboard that meets §112.05–3; and

(3) Emergency loads that may be necessary to maintain or restore the propulsion plant, such as control systems, controllable pitch propellers, hydraulic pumps, control air compressors, and machinery necessary for dead-ship start-up.

(c) Other loads may be authorized by the Commanding Officer, Marine Safety Center (MSC), to be connected to the emergency source of power to provide an increased level of safety in recognition of a unique vessel mission or
