Coast Guard, DHS § 153.909

(2) A description of the cargo’s appearance and color.
(3) Hazards in handling the cargo.
(4) Any special handling procedures for the cargo, such as inerting.
(5) Procedures to follow if the cargo spills or leaks.
(6) Procedures for treating a person exposed to the cargo.
(7) A list of fire fighting procedures and extinguishing agents effective with cargo fires.
(8) Shipper’s name.
(9) Loading point.
(10) Approximate quantity of cargo.
(11) Tank in which the cargo is located.
(12) The name of an agent in the United States authorized to accept service of legal process for the vessel.

(b) The master shall make sure that the following information for cargoes other than those carried under this part is readily available on the tankship:

(1) The name of the cargo as listed in Table 4 of Part 154 of this chapter or § 30.25–1 of this chapter if the cargo is listed in one of these two tables.
(2) The name of the cargo prescribed in the letter authorizing carriage of the cargo under § 153.900(d) if the cargo is a hazardous or flammable cargo authorized for carriage under that section.
(3) The shipper’s name for the cargo and the name of the shipper if the cargo is neither a hazardous nor flammable cargo.

§ 153.908 Cargo viscosity and melting point information; measuring cargo temperature during discharge: Categories A, B, and C.

(a) The person in charge of the ship may not accept a shipment of a Category A, B, or C NLS cargo having a reference to this paragraph in the “Special Requirements” column of Table 1 unless the person has a written statement of the cargo’s melting point in °C from the cargo’s manufacturer or the person listed as the shipper on the bill of lading. If the cargo’s melting point varies from shipment to shipment, the highest melting point may be supplied.

(b) The person in charge of the ship may not accept a shipment of a Category A, B, or C cargo having a reference to this paragraph in the “Special Requirements” column of Table 1 unless the person has a written statement of the cargo’s viscosity at 20 °C in mPa.s and, if the cargo’s viscosity exceeds 25 mPa.s at 20 °C, the temperature at which the viscosity is 25 mPa.s.

(2) For Category C NLS, the cargo’s viscosity at 20 °C in mPa.s and, if the cargo’s viscosity exceeds 60 mPa.s at 20 °C, the temperature at which the viscosity is 60 mPa.s. If the cargo’s viscosity varies from shipment to shipment, the maximum viscosity and maximum temperature values may be supplied.

(3) If the cargo’s viscosity varies from shipment to shipment, the highest viscosity may be supplied.

(c) The person in charge of the ship shall ensure that the cargo temperature is read and recorded in the Cargo Record Book following the procedures in paragraph (d) of this section when a cargo having a reference to paragraph (a) or (b) of this section in the “Special Requirements” column of Table 1 is unloaded.

(d) The cargo temperature measured in paragraph (c) of this section must be made using the following procedure:

(1) Each reading must be made with the sensor or thermometer required by § 153.440(a)(3) or (c). If a portable thermometer is used, it must be located as prescribed for the temperature sensor in § 153.440(a)(3).

(2) A total of 2 readings must be made, the first reading to be made no more than 30 minutes after cargo transfer begins and the second reading no more than 30 minutes before the main cargo pump is shut down.

(3) The cargo’s temperature is the average of the 2 readings made under paragraph (d)(2) of this section.

§ 153.909 Completing the Cargo Record Book and record retention: Categories A, B, C, and D.

(a) The person in charge of a ship shall ensure that the Cargo Record
