

§ 74.786 Digital channel assignments.

(a) An applicant for a new low power television or television translator digital station or for changes in the facilities of an authorized digital station shall endeavor to select a channel on which its operation is not likely to cause interference. The applications must be specific with regard to the channel requested. Only one channel will be assigned each station.

(b) Any one of the 12 standard VHF Channels (2 to 13 inclusive) may be assigned to a VHF digital low power television or television translator station. Channels 5 and 6 assigned in Alaska shall not cause harmful interference to and must accept interference from non-Government fixed operation authorized prior to January 1, 1982.

(c) UHF channels 14 to 36 and 38 to 51 may be assigned to a UHF digital low power television or television translator station. In accordance with § 73.603(c) of this chapter, Channel 37 will not be assigned to such stations.

(d) UHF Channels 52-59 may be assigned to a digital low power television or television translator station for use as a *digital conversion channel*. These channels may also be assigned as a *companion digital channel* if the applicant is able to demonstrate that a *suitable in core channel* is not available. Stations proposing use of such channels shall notify all potentially affected 700 MHz wireless licensees not later than 30 days prior to the submission of their application (FCC Form 346). Applicants shall notify wireless licensees of the 700 MHz spectrum comprising the same TV channel and the adjacent channel within whose licensed geographic boundaries the digital LPTV or translator station is proposed to be located, and also notify licensees of co-channel and adjacent channel spectrum whose service boundaries lie within 75 miles and 50 miles, respectively, of their proposed station location. Specific information for this purpose can be obtained from the Commission's auction Web site at <http://www.fcc.gov/auctions>.

(e) UHF Channels 60-69 may be assigned to a digital low power television or television translator station for use as a *digital conversion channel* only. Stations proposing use of such chan-

nels shall notify all potentially affected 700 MHz commercial licensees not later than 30 days prior to the submission of their application (FCC Form 346) in the manner provided in paragraph of this section. Stations proposing use of channels 63, 64, 68 and 69 must secure a coordinated spectrum use agreement with the pertinent 700 MHz public safety regional planning committee and state administrator prior to the submission of their application (FCC Form 346). Coordination shall be undertaken with regional planning committee and state administrator of the region and state within which the digital LPTV or translator station is proposed to be located, and those of adjoining regions and states with boundaries within 75 miles of the proposed station location. Stations proposing use of channels 62, 65, and 67 must notify the pertinent regional planning committee and state administrator not later than 30 days prior to the submission of their application (FCC Form 346). Notification shall be made to the regional and state administrators of region and state within which the digital LPTV or translator station is proposed to be located, and those of adjoining regions and states with boundaries within 50 miles of the proposed station location. Information for this purpose is available at the above web site and also at the following internet sites: <http://wireless.fcc.gov/publicsafety700MHzregional.html>, <http://wireless.fcc.gov/publicsafety/700MHz/state.html>, and <http://wireless.fcc.gov/publicsafety/700MHz/interop-contacts.html>.

(f) Application for new analog low power television or television translator stations specifying operation above Channel 51 will not be accepted for filing. Applications for displacement relief on channels above 51 will continue to be accepted.

[69 FR 69332, Nov. 29, 2004]

§ 74.787 Digital licensing.

(a) *Applications for digital low power television and television translator stations*—(1) *Applications for digital conversion channels* may be filed at any time. Such applications shall be filed on FCC Form 346 and will be treated as a minor

change application. There will be no application fee.

(2) *Applications for companion digital channel.* (i) A public notice will specify a time period or “window” for filing applications for companion digital channels. During this window, only existing low power television or television translator stations or licensees and permittees of Class A TV stations may submit applications for companion digital channels. Applications submitted prior to the initial window identified in the public notice will be returned as premature. At a subsequent time, a public notice will announce the commencement of a filing procedure in which applications will be accepted on a first-come, first-served basis not restricted to existing station licensees and permittees;

(ii) Applications for companion digital channels filed during the initial window shall be filed in accordance with the provisions of §§ 1.2105 and 73.5002 of this chapter regarding the submission of the short-form application, FCC Form 175, and all appropriate certifications, information and exhibits contained therein. To determine which applicants are mutually exclusive, applicants must submit the engineering data contained in FCC Form 346 as a supplement to its short-form application. Such engineering data will not be studied for technical acceptability, but will be protected from subsequently filed applications as of the close of the initial window period. Determinations as to the acceptability or grantability of an applicant’s proposal will not be made prior to an auction;

(iii) After the close of the initial window, a public notice will identify the short-form applications received during the window filing period which are found to be mutually exclusive. Such short-form applications will be resolved via the Commission’s Part 1 and broadcast competitive bidding rules, §§ 1.2100 *et seq.*, and §§ 73.5000 *et seq.* of this chapter. Such applicants shall be afforded an opportunity to submit settlements and engineering solutions to resolve mutual exclusivity pursuant to § 73.5002(d) of this chapter;

(iv) After the close of the window, a public notice will identify short-form applications received that are found to

be non-mutually exclusive. All non-mutually exclusive applicants will be required to submit an FCC Form 346 pursuant to § 73.5005 of this chapter. Such applications shall be processed pursuant to § 73.5006 of this chapter; and

(v) With regard to fees, an application (FCC Form 346) for companion digital channels shall be treated as a minor change application and there will be no application fee.

(3) *Construction permit applications for new stations, major changes to existing stations in the low power television service.* A public notice will specify the date upon which interested parties may begin to file applications for new stations and major facilities changes to existing stations in the low power television service. It will specify parameters for any applications that may be filed. Applications submitted prior to date announced by the public notice will be returned as premature. Such applications shall be accepted on a first-come, first-served basis, and shall be filed on FCC Form 346. Applications for new or major change shall be subject to the appropriate application fee. Mutually exclusive applications shall be resolved via the Commission’s part 1 and broadcast competitive bidding rules, § 1.2100 *et seq.*, and § 73.5000 *et seq.* of this chapter. Such applicants shall be afforded an opportunity to submit settlements and engineering solutions to resolve mutual exclusivity pursuant to § 73.5002(d) of this chapter.

(4) *Displacement applications.* A digital low power television or television translator station which is causing or receiving interference or is predicted to cause or receive interference to or from an authorized TV broadcast station, DTV station or allotment or other protected station or service, may at any time file a displacement relief application for change in channel, together with technical modifications that are necessary to avoid interference or continue serving the station’s protected service area, provided the proposed transmitter site is not located more than 30 miles from the reference coordinates of the existing station’s community of license. See § 76.53 of this chapter. A displacement relief application shall be filed on FCC Form

346 and will be considered a minor change and will be placed on public notice for a period of not less than 30 days to permit the filing of petitions to deny. These applications will not be subject to the filing of competing applications. Where a displacement relief application for a digital low power television or television translator station becomes mutually exclusive the application(s) for new analog or digital low power television or television translator stations, with a displacement relief application for an analog low power television or television translator station, or with other non-displacement relief applications for facilities modifications of analog or digital low power television or television translator stations, priority will be afforded to the displacement application for the digital low power television or television translator station to the exclusion of other applications. Mutually exclusive displacement relief applications for digital low power television and television translator stations shall be resolved via the Commission's part 1 and broadcast competitive bidding rules, § 1.2100 *et seq.*, and § 73.5000 *et seq.* of this chapter. Such applicants shall be afforded an opportunity to submit settlements and engineering solutions to resolve mutual exclusivity pursuant to § 73.5002(d) of this chapter.

(5) *Application for replacement digital television translator.* (i) An application for a replacement digital television translator may be filed at any time. A license for a replacement digital television translator will be issued only to a television broadcast station licensee that demonstrates in its application that a portion of the station's pre-transition analog service area will not be served by its full, post-transition digital facilities and that the proposed translator will be used to provide service to the area where service has been lost." Replacement digital television translators may operate on channels 2-51. Applications for replacement digital television translator shall be given processing priority over all other low power television and TV translator applications except displacement applications (with which they shall have co-equal priority) as set forth in 47 CFR 73.3572(a)(4)(ii). The service area of the

replacement translator shall be limited to only a demonstrated loss area within the full-service station's pre-transition analog service area. "Analog service area" is defined as the existing, authorized, protected service area actually served by the analog signal prior to analog termination for the DTV transition. An applicant for a replacement digital television translator may propose a *de minimis* expansion of its full-service pre-transition analog service area upon demonstrating that the expansion is necessary to replace its analog loss area. The license for the replacement digital television translator will be associated with the full power station's main license, will be assigned the same call sign, may not be separately assigned or transferred, and will be renewed with the full-service station's main license.

(ii) Each original construction permit for the construction of a replacement digital television translator station shall specify a period of three years from the date of issuance of the original construction permit within which construction shall be completed and application for license filed. The provisions of § 74.788(c) of this chapter shall apply for stations seeking additional time to complete construction of their replacement digital television translator station.

(iii) A public notice will specify the date upon which interested parties may begin to file applications for replacement digital television translators. Such applications shall be filed on FCC Form 346, shall be treated as an application for minor change and shall be accepted on a first-come, first-served basis. Mutually exclusive applications shall be resolved via the Commission's part 1 and broadcast competitive bidding rules, § 1.2100 *et seq.* and § 73.5000 *et seq.* of this chapter.

(iv) The following sections are applicable to replacement digital television translator stations:

- § 73.1030 Notifications concerning interference to radio astronomy, research and receiving installations.
- § 74.703 Interference.
- § 74.709 Land mobile station protection.
- § 74.734 Attended and unattended operation.
- § 74.735 Power Limitations.
- § 74.751 Modification of transmission systems.

§ 74.788

47 CFR Ch. I (10–1–10 Edition)

- § 74.763 Time of Operation.
- § 74.765 Posting of station and operator licenses.
- § 74.769 Copies of rules.
- § 74.780 Broadcast regulations applicable to translators, low power, and booster stations (except § 73.653—Operation of TV aural and visual transmitters and § 73.1201—Station identification).
- § 74.781 Station records.
- § 74.784 Rebroadcasts.

(b) *Definitions of “major” and “minor” changes to digital low power television and television translator stations.* (1) Applications for major changes in digital low power television and television translator stations include any change in the frequency (output channel) not related to displacement relief or transmitting antenna location where the protected contour resulting from the change does not overlap some portion of the protected contour of the authorized facilities of the existing station.

(2) Other facilities changes will be considered minor.

[69 FR 69333, Nov. 29, 2004, as amended at 74 FR 23655, May 20, 2009]

§ 74.788 Digital construction period.

(a) Each original construction permit for the construction of a new digital low power television or television translator station shall specify a period of three years from the date of issuance of the original construction permit within which construction shall be completed and application for license filed.

(b) Any construction permit for which construction has not been completed and for which an application for license or extension of time has not been filed, shall be automatically forfeited upon expiration without any further affirmative cancellation by the Commission.

(c) *Authority delegated.* (1) Authority is delegated to the Chief, Media Bureau to grant an extension of time of up to six months beyond the relevant construction period for each original construction permit upon demonstration by the digital licensee or permittee that failure to meet the construction deadline is due to circumstances that are either unforeseeable or beyond the licensee’s control where the licensee has take all reasonable steps to resolve the problem expeditiously.

(2) Such circumstances shall include, but shall not be limited to:

(i) Inability to construct and place in operation a facility necessary for transmitting digital television, such as a tower, because of delays in obtaining zoning or FAA approvals, or similar constraints;

(ii) The lack of equipment necessary to obtain a digital television signal; or

(iii) Where the cost of construction exceeds the station’s financial resources.

(3) The Bureau may grant no more than two extension requests upon delegated authority. Subsequent extension requests shall be referred to the Commission. The Bureau may deny extension requests upon delegated authority.

(4) Applications for extension of time shall be filed no earlier than 90 and no later than 60 days prior to the relevant construction deadline, absent a showing of sufficient reasons for filing within less than 60 days of the relevant construction deadline.

[69 FR 69334, Nov. 29, 2004]

§ 74.789 Broadcast regulations applicable to digital low power television and television translator stations.

The following sections are applicable to digital low power television and television translator stations:

- § 73.1030 Notifications concerning interference to radio astronomy, research and receiving installations.
- § 74.600 Eligibility for license.
- § 74.703 Interference.
- § 74.709 Land mobile station protection.
- § 74.732 Eligibility and licensing requirements.
- § 74.734 Attended and unattended operation.
- § 74.735 Power limitations.
- § 74.751 Modification of transmission systems.
- § 74.763 Time of operation.
- § 74.765 Posting of station and operator licenses.
- § 74.769 Copies of rules.
- § 74.780 Broadcast regulations applicable to translators, low power, and booster stations (except § 73.653—Operation of TV aural and visual transmitters and § 73.1201—Station identification).
- § 74.781 Station records.
