Federal Communications Commission

§ 76.802 Disposition of cable home wiring.

(a)(1) Upon voluntary termination of cable service by a subscriber in a single unit installation, a cable operator shall not remove the cable home wiring unless it gives the subscriber the opportunity to purchase the wiring at the replacement cost, and the subscriber declines. If the subscriber declines to purchase the cable home wiring, the cable system operator must then remove the cable home wiring within seven days of the subscriber’s decision, under normal operating conditions, or make no subsequent attempt to remove it or to restrict its use.

(b) Upon voluntary termination of cable service by an individual subscriber in a multiple-unit installation, a cable operator shall not be entitled to remove the cable home wiring unless it gives the subscriber the opportunity to purchase the wiring at the replacement cost, and the subscriber declines. If the subscriber declines to purchase the cable home wiring, the cable system operator must then remove the cable home wiring within seven days of the subscriber’s decision, under normal operating conditions, or make no subsequent attempt to remove it or to restrict its use.

(c) The cost of the cable home wiring is to be based on the replacement cost of the home wiring belongs to the subscriber, such as where the operator has transferred ownership to the subscriber, the operator has been treating the wiring as belonging to the subscriber for tax purposes, or the wiring is considered to be a fixture by state or local law in the subscriber’s jurisdiction. Nothing in this subpart shall affect the cable system operator’s rights and responsibilities under §76.617 to prevent excessive signal leakage while providing cable service, or the cable operator’s right to access the subscriber’s property or premises.

[58 FR 11971, Mar. 2, 1993]

§ 76.801 Scope.

The provisions of this subpart set forth rules and regulations for the disposition, after a subscriber voluntarily terminates cable service, of that cable home wiring installed by the cable system operator or its contractor within the premises of the subscriber. The provisions do not apply where the cable wiring belongs to the subscriber, such as where the operator has transferred ownership to the subscriber, the operator has been treating the wiring as belonging to the subscriber for tax purposes, or the wiring is considered to be a fixture by state or local law in the subscriber’s jurisdiction. Nothing in this subpart shall affect the cable system operator’s rights and responsibilities under §76.617 to prevent excessive signal leakage while providing cable service, or the cable operator’s right to access the subscriber’s property or premises.

§ 76.802 47 CFR Ch. I (10–1–10 Edition)

per foot of the wiring on the subscriber’s side of the demarcation point multiplied by the length in feet of such wiring, and the replacement cost of any passive splitters located on the subscriber’s side of the demarcation point.

(b) During the initial telephone call in which a subscriber contacts a cable operator to voluntarily terminate cable service, the cable operator—if it owns and intends to remove the home wiring—must inform the subscriber:

(1) That the cable operator owns the home wiring;

(2) That the cable operator intends to remove the home wiring;

(3) That the subscriber has the right to purchase the home wiring; and

(4) What the per-foot replacement cost and total charge for the wiring would be (the total charge may be based on either the actual length of cable wiring and the actual number of passive splitters on the customer’s side of the demarcation point, or a reasonable approximation thereof; in either event, the information necessary for calculating the total charge must be available for use during the initial phone call).

(c) If the subscriber voluntarily terminates cable service in person, the procedures set forth in paragraph (b) of this section apply.

(d) If the subscriber requests termination of cable service in writing, it is the operator’s responsibility—if it wishes to remove the wiring—to make reasonable efforts to contact the subscriber prior to the date of service termination and follow the procedures set forth in paragraph (b) of this section.

(e) If the cable operator fails to adhere to the procedures described in paragraph (b) of this section, it will be deemed to have relinquished immediately any and all ownership interests in the home wiring; thus, the operator will not be entitled to compensation for the wiring and shall make no subsequent attempt to remove it or restrict its use.

(f) If the cable operator adheres to the procedures described in paragraph (b) of this section, and, at that point, the subscriber agrees to purchase the wiring, constructive ownership over the home wiring will transfer to the subscriber immediately, and the subscriber will be permitted to authorize a competing service provider to connect with and use the home wiring.

(g) If the cable operator adheres to the procedures described in paragraph (b) of this section, and the subscriber asks for more time to make a decision regarding whether to purchase the home wiring, the seven (7) day period described in paragraph (b) of this section will not begin running until the subscriber declines to purchase the wiring; in addition, the subscriber may not use the wiring to connect to an alternative service provider until the subscriber notifies the operator whether or not the subscriber wishes to purchase the wiring.

(h) If an alternative video programming service provider connects its wiring to the home wiring before the incumbent cable operator has terminated service and has capped off its line to prevent signal leakage, the alternative video programming service provider shall be responsible for ensuring that the incumbent’s wiring is properly capped off in accordance with the Commission’s signal leakage requirements. See Subpart K (technical standards) of the Commission’s Cable Television Service rules (47 CFR 76.605(a)(13) and 76.610 through 76.617).

(i) Where the subscriber terminates cable service but will not be using the home wiring to receive another alternative video programming service, the cable operator shall properly cap off its own line in accordance with the Commission’s signal leakage requirements. See Subpart K (technical standards) of the Commission’s Cable Television Service rules (47 CFR 76.605(a)(13) and 76.610 through 76.617).

(j) Cable operators are prohibited from using any ownership interests they may have in property located on the subscriber’s side of the demarcation point, such as molding or conduit, to prevent, impede, or in any way interfere with, a subscriber’s right to use his or her home wiring to receive an alternative service. In addition, incumbent cable operators must take reasonable steps within their control to ensure that an alternative service provider has access to the home wiring.
§ 76.804 Disposition of home run wiring.

(a) Building-by-building disposition of home run wiring. (1) Where an MVPD owns the home run wiring in an MDU and does not (or will not at the conclusion of the notice period) have a legally enforceable right to remain on the premises against the wishes of the MDU owner, the MDU owner may give the MVPD a minimum of 90 days' written notice that its access to the entire building will be terminated to invoke the procedures in this section. The MVPD will then have 30 days to notify the MDU owner in writing of its election for all the home run wiring inside the MDU building: to remove the wiring and restore the MDU building consistent with state law within 30 days of the end of the 90-day notice period; or to sell the wiring to the MDU building owner. If the incumbent provider elects to remove or abandon the wiring, and it intends to terminate service before the end of the 90-day notice period or within 30 days of actual service termination, whichever occurs first; to abandon and not disable the wiring at the end of the 90-day notice period; or to sell the wiring to the MDU building owner. If the incumbent provider elects to remove or abandon the wiring, and it intends to terminate service before the end of the 90-day notice period, the incumbent provider shall notify the MDU owner at the time of this election if and when it intends to terminate service before the end of the 90-day notice period. If the incumbent elects at this point to remove its wiring and restore the building consistent with state law, it must do so within 30 days of the end of the 90-day notice period or within 30 days of actual service termination, whichever occurs first.

(2) If the incumbent provider elects to sell the home run wiring under paragraph (a)(1) of this section, the incumbent and the MDU owner or alternative provider shall have 30 days from the date of election to negotiate a price. If the parties are unable to agree on a price within that 30-day time period, the incumbent must elect: to abandon without disabling the wiring; to remove the wiring and restore the MDU consistent with state law; or to submit the price determination to binding arbitration by an independent expert. If the incumbent provider chooses to abandon or remove its wiring, it must notify the MDU owner at the time of this election if and when it intends to terminate service before the end of the 90-day notice period. If the incumbent service provider elects to abandon its wiring at this point, the abandonment shall become effective at the end of the 90-day notice period or upon service termination, whichever occurs first. If the incumbent provider chooses to abandon or remove its wiring, it must notify the MDU owner at the time of this election if and when it intends to terminate service before the end of the 90-day notice period. If the incumbent service provider elects to abandon its wiring at this point, the abandonment shall become effective at the end of the 90-day notice period or upon service termination, whichever occurs first. If the incumbent provider chooses to abandon or remove its wiring, it must notify the MDU owner at the time of this election if and when it intends to terminate service before the end of the 90-day notice period. If the incumbent service provider elects to abandon its wiring at this point, the abandonment shall become effective at the end of the 90-day notice period or upon service termination, whichever occurs first.

(3) If the incumbent elects to submit to binding arbitration, the parties shall have seven days to agree on an independent expert or to each designate an expert who will pick a third expert within an additional seven days. The
