

duties of the agency activity responsible for establishment of the qualification requirement.) If the number of sources is inadequate, the contracting officer shall request the agency activity which established the requirement to—

(1) Indicate the anticipated date on which any sources presently undergoing evaluation will have demonstrated their abilities to meet the qualification requirement so that the solicitation could be rescheduled to allow as many additional sources as possible to qualify; or

(2) Indicate whether a means other than the qualification requirement is feasible for testing or demonstrating quality assurance.

(b) *Postsolicitation.* The contracting officer shall submit to the agency activity which established the qualification requirement the names and addresses of concerns which expressed interest in the acquisition but are not included on the applicable QPL, QML, or QBL or identified as meeting the qualification requirement. The activity will then assist interested concerns in meeting the standards specified for qualification (see 9.202(a) (2) and (4)).

9.207 Changes in status regarding qualification requirements.

(a) The contracting officer shall promptly report to the agency activity which established the qualification requirement any conditions which may merit removal or omission from a QPL, QML, or QBL or affect whether a source should continue to be otherwise identified as meeting the requirement. These conditions exist when—

(1) Products or services are submitted for inspection or acceptance that do not meet the qualification requirement;

(2) Products or services were previously rejected and the defects were not corrected when resubmitted for inspection or acceptance;

(3) A supplier fails to request reevaluation following change of location or ownership of the plant where the product which met the qualification requirement was manufactured (see the

clause at 52.209-1, Qualification Requirements);

(4) A manufacturer of a product which met the qualification requirement has discontinued manufacture of the product;

(5) A source requests removal from a QPL, QML, or QBL;

(6) A condition of meeting the qualification requirement was violated; e.g., advertising or publicity contrary to 9.204(h)(5);

(7) A revised specification imposes a new qualification requirement;

(8) Manufacturing or design changes have been incorporated in the qualification requirement;

(9) The source is on the Excluded Parties List System (see Subpart 9.4); or

(10) Performance of a contract subject to a qualification requirement is otherwise unsatisfactory.

(b) After considering any of the above or other conditions reasonably related to whether a product or source continues to meet the standards specified for qualification, an agency may take appropriate action without advance notification. The agency shall, however, promptly notify the affected parties if a product or source is removed from a QPL, QML, or QBL, or will no longer be identified as meeting the standards specified for qualification. This notice shall contain specific information why the product or source no longer meets the qualification requirement.
