

1804.470 Security requirements for unclassified information technology (IT) resources.

1804.470–1 Scope.

This section implements NASA's acquisition requirements pertaining to Federal policies for the security of unclassified information and information systems. Federal policies include the Federal Information System Management Act (FISMA) of 2002, Homeland Security Presidential Directive (HSPD) 12, Clinger-Cohen Act of 1996 (40 U.S.C. 1401 et seq.), OMB Circular A–130, Management of Federal Information Resources, and the National Institute of Standards and Technology (NIST) security requirements and standards. These requirements safeguard IT services provided to NASA such as the management, operation, maintenance, development, and administration of hardware, software, firmware, computer systems, networks, and telecommunications systems.

[72 FR 26561, May 10, 2007]

1804.470–2 Policy.

NASA IT security policies and procedures for unclassified information and IT are prescribed in NASA Policy Directive (NPD) 2810, Security of Information Technology; NASA Procedural Requirements (NPR) 2810, Security of Information Technology; and interim policy updates in the form of NASA Information Technology Requirements (NITR). IT services must be performed in accordance with these policies and procedures.

[72 FR 26561, May 10, 2007]

1804.470–3 IT security requirements.

These IT security requirements cover all NASA contracts in which IT plays a role in the provisioning of services or products (e.g., research and development, engineering, manufacturing, IT outsourcing, human resources, and finance) that support NASA in meeting its institutional and mission objectives. These requirements are applica-

ble where a contractor or subcontractor must obtain physical or electronic (i.e., authentication level 2 and above as defined in NIST Special Publication 800–63, Electronic Authentication Guideline) access to NASA's computer systems, networks, or IT infrastructure. These requirements are also applicable in cases where information categorized as low, moderate, or high by the Federal Information Processing Standards (FIPS) 199, Standards for Security Categorization of Federal Information and Information Systems, is stored, generated, processed, or exchanged by NASA or on behalf of NASA by a contractor or subcontractor, regardless of whether the information resides on a NASA or a contractor/subcontractor's information system.

[72 FR 26561, May 10, 2007]

1804.470–4 Contract clause.

(a) Insert the clause at 1852.204–76, Security Requirements for Unclassified Information Technology Resources, in all solicitations and contracts when contract performance requires contractors to—

(1) Have physical or electronic access to NASA's computer systems, networks, or IT infrastructure; or

(2) Use information systems to generate, store, process, or exchange data with NASA or on behalf of NASA, regardless of whether the data resides on a NASA or a contractor's information system.

(b) Paragraph (d) of the clause allows contracting officers to waive the requirements of paragraphs (b) and (c)(1) through (3) of the clause. Contracting officers must obtain the approval of the—

(1) Center IT Security Manager before granting any waivers to paragraph (b) of the clause; and

(2) The Center Chief of Security before granting any waivers to paragraphs (c)(1) through (3) of the clause.
