9904.407 Use of standard costs for direct material and direct labor.

9904.407–10 [Reserved]

9904.407–20 Purpose.

(a) The purpose of this Cost Accounting Standard is to provide criteria under which standard costs may be used for estimating, accumulating, and reporting costs of direct material and direct labor; and to provide criteria relating to the establishment of standards, accumulation of standard costs, and accumulation and disposition of variances from standard costs. Consistent application of these criteria where standard costs are in use will improve cost measurement and cost assignment.

(b) This Cost Accounting Standard is not intended to cover the use of pre-established measures solely for estimating.

9904.407–30 Definitions.

(a) The following are definitions of terms which are prominent in this Standard. Other terms defined elsewhere in this chapter 99 shall have the meanings ascribed to them in those definitions unless paragraph (b) of this subsection requires otherwise.

(1) Labor cost at standard means a pre-established measure of the labor element of cost, computed by multiplying labor-rate standard by labor-time standard.

(2) Labor-rate standard means a pre-established measure, expressed in monetary terms, of the price of labor.

(3) Labor-time standard means a pre-established measure, expressed in temporal terms, of the quantity of labor.

(4) Material cost at standard means a pre-established measure of the material element of cost, computed by multiplying material-price standard by material-quantity standard.

(5) Material-price standard means a pre-established measure, expressed in monetary terms, of the price of material.

(6) Material-quantity standard means a pre-established measure, expressed in physical terms, of the quantity of material.

(b) The following modifications of terms defined elsewhere in this Chapter 99 are applicable to this Standard:

(1) Actual cost. An amount determined on the basis of cost incurred.

(2) [Reserved]

9904.407–40 Fundamental requirement.

Standard costs may be used for estimating, accumulating, and reporting costs of direct material and direct labor only when all of the following criteria are met:

(a) Standard costs are entered into the books of account.

(b) Standard costs and related variances are appropriately accounted for at the level of the production unit.

(c) Practices with respect to the setting and revising of standards, use of standard costs, and disposition of variances are stated in writing and are consistently followed.

9904.407–50 Techniques for application.

(a)(1) A contractor’s written statement of practices with respect to standards shall include the bases and criteria (such as engineering studies, experience, or other supporting data) used in setting and revising standards; the period during which standards are to remain effective; the level (such as ideal or realistic) at which material-quantity standards and labor-time standards are set; and conditions (such as those expected to prevail at the beginning of a period) which material-price standards and labor-rate standards are designed to reflect.

(2) Where only either the material price or material quantity is set at standard, with the other component stated at actual, the result of the multiplication shall be treated as material.
