the June 21, 2001 final rule in effect on October 1, 2001 are authorized on packagings and shipping papers in place of the word “stabilized” until October 1, 2007. Proper shipping names that included the word “compressed” prior to the final rule published on July 31, 2003 and effective on October 1, 2003 may continue to be shown on packagings and shipping papers until October 1, 2007.

Section 172.202(a)(7) requires the number and types of packages to be indicated on shipping papers. Until October 1, 2007, a person may elect to comply with the requirements for the number and type of packages in effect on September 30, 2003.

The shipping description sequences in effect on December 31, 2006, may be used until January 1, 2013.

Except for transportation by highway, a Division 5.2 label and a Division 5.2 placard conforming to the specifications in §§172.427 and 172.552, respectively, of this subchapter in effect on December 31, 2006, may be used until January 1, 2011. For transportation by highway, a Division 5.2 placard conforming to the specifications in §172.552 of this subchapter in effect on December 31, 2006 may be used until January 1, 2014.

The Class 3 and Division 6.1 classification criteria and packing group assignments in effect on December 31, 2006, may be used until January 1, 2012.

The proper shipping name “Gasohol gasoline mixed with ethyl alcohol, with not more than 20 percent alcohol” in effect on January 28, 2008, may continue to be used until October 1, 2010. Effective October 1, 2010, the new proper shipping name “Ethanol and gasoline mixture or ethanol and motor spirit mixture or ethanol and petrol mixture,” and the revised proper shipping name “Gasohol gasoline mixed with ethyl alcohol, with not more than 10% alcohol” must be used, as appropriate.

§171.15 Immediate notice of certain hazardous materials incidents.

(a) General. As soon as practical but no later than 12 hours after the occurrence of any incident described in paragraph (b) of this section, each person in physical possession of the hazardous material must provide notice to the National Response Center (NRC) by telephone at 800–424–8802 (toll free) or 202–267–2675 (toll call) or online at http://www.nrc.uscg.mil. Notice involving an infectious substance (etiologic agent) may be given to the Director, Centers for Disease Control and Prevention (CDC), U.S. Public Health Service, Atlanta, GA, 800–232–0124 (toll free), in place of notice to the NRC. Each notice must include the following information:

(1) Name of reporter;
(2) Name and address of person represented by reporter;
(3) Phone number where reporter can be contacted;
(4) Date, time, and location of incident;
(5) The extent of injury, if any;
(6) Class or division, proper shipping name, and quantity of hazardous materials involved, if such information is available; and
(7) Type of incident and nature of hazardous material involvement and whether a continuing danger to life exists at the scene.

(b) Reportable incident. A telephone report is required whenever any of the following occurs during the course of transportation in commerce (including loading, unloading, and temporary storage):

(1) As a direct result of a hazardous material—
(i) A person is killed;
(ii) A person receives an injury requiring admittance to a hospital;
(iii) The general public is evacuated for one hour or more;
(iv) A major transportation artery or facility is closed or shut down for one hour or more; or
(v) The operational flight pattern or routine of an aircraft is altered;
§ 171.16

(2) Fire, breakage, spillage, or suspected radioactive contamination occurs involving a radioactive material (see also §176.16 of this subchapter); (3) Fire, breakage, spillage, or suspected contamination occurs involving an infectious substance other than a regulated medical waste; (4) A release of a marine pollutant occurs in a quantity exceeding 450 L (119 gallons) for a liquid or 400 kg (882 pounds) for a solid; (5) A situation exists of such a nature (e.g., a continuing danger to life exists at the scene of the incident) that, in the judgment of the person in possession of the hazardous material, it should be reported to the NRC even though it does not meet the criteria of paragraphs (b)(1), (2), (3) or (4) of this section; or (6) During transportation by aircraft, a fire, violent rupture, explosion or dangerous evolution of heat (i.e., an amount of heat sufficient to be dangerous to packaging or personal safety to include charring of packaging, melting of packaging, scorching of packaging, or other evidence) occurs as a direct result of a battery or battery-powered device.

(c) Written report. Each person making a report under this section must also make the report required by §171.16 of this subpart.

NOTE TO §171.16: Under 40 CFR 302.6, EPA requires persons in charge of facilities (including transport vehicles, vessels, and aircraft) to report any release of a hazardous substance in a quantity equal to or greater than its reportable quantity, as soon as that person has knowledge of the release, to DOT’s National Response Center at (toll free) 800–424–8802 or (toll) 202–267–2675.

§ 171.16 Detailed hazardous materials incident reports.

(a) General. Each person in physical possession of a hazardous material at the time that any of the following incidents occurs during transportation (including loading, unloading, and temporary storage) must submit a Hazardous Materials Incident Report on DOT Form F 5801.1 (01/2004) within 30 days of discovery of the incident: (1) Any of the circumstances set forth in §171.15(b); (2) An unintentional release of a hazardous material or the discharge of any quantity of hazardous waste; (3) A specification cargo tank with a capacity of 1,000 gallons or greater containing any hazardous material suffers structural damage to the lading retention system or damage that requires repair to a system intended to protect the lading retention system, even if there is no release of hazardous material; (4) An undeclared hazardous material is discovered; or (5) A fire, violent rupture, explosion or dangerous evolution of heat (i.e., an amount of heat sufficient to be dangerous to packaging or personal safety to include charring of packaging, melting of packaging, scorching of packaging, or other evidence) occurs as a direct result of a battery or battery-powered device.

(b) Providing and retaining copies of the report. Each person reporting under this section must— (1) Submit a written Hazardous Materials Incident Report to the Information Systems Manager, PHH–63, Pipeline and Hazardous Materials Safety Administration, Department of Transportation, Washington, DC 20590–0001, or an electronic Hazardous Material Incident Report to the Information System Manager, DHM–63, Research and Special Programs Administration, Department of Transportation, Washington, DC 20590–0001 at http://hazmat.dot.gov; (2) For an incident involving transportation by aircraft, submit a written or electronic copy of the Hazardous Materials Incident Report to the FAA Security Field Office nearest the location of the incident; and (3) Retain a written or electronic copy of the Hazardous Materials Incident Report for a period of two years at the reporting person’s principal place of business. If the written or electronic Hazardous Materials Incident Report is maintained at other than the reporting person’s principal place of business, the report must be made available at the reporting person’s principal place of business within 24 hours of a request.
