(4) Annual reports (exhibit 9). Submit:

Such information may be referenced through notes to the chart.

(7) If applicant is not a carrier, indicate (i) the type of business in which it is engaged, (ii) the length of time so engaged, and (iii) its present and prospective activities which have or may have a relation to transportation subject to 49 U.S.C. Subtitle IV.

(8) Intercorporate or financial relationships. Indicate whether there are any direct or indirect intercorporate or financial relationships at the time the application is filed, not disclosed elsewhere in the application, through holding companies, ownership of securities, or otherwise, in which applicants or their affiliates own or control more than 5% of the stock of a non-affiliated carrier, including those relationships in which a group affiliated with applicants owns more than 5% of the stock of such a carrier. Indicate the nature and extent of any such relationships, and, if an applicant owns securities of a carrier subject to 49 U.S.C. Subtitle IV, provide the carrier’s name, a description of securities, the par value of each class of securities held, and the applicant’s percentage of total ownership. (10) Conditions to mitigate and offset merger-related harms. Applicants are expected to propose measures to mitigate and offset merger-related harms. These conditions should not simply preserve, but also enhance, competition.

(i) Applicants must explain how they would preserve competitive options for shippers and for Class II and III rail carriers. At a minimum, applicants must explain how they would preserve the use of major existing gateways, the potential for build-outs or build-ins, and the opportunity to enter into contracts for one segment of a movement as a means of gaining the right separately to pursue rate relief for the remainder of the movement.

(ii) Applicants should explain how the transaction and conditions they propose would enhance competition and improve service.
Calculating public benefits. Applicants must enumerate and, where possible, quantify the net public benefits their merger would generate (if approved). In making this estimate, applicants should identify the benefits that would arise from service improvements, enhanced competition, cost savings, and other merger-related public interest benefits, and should discuss whether the particular benefits they are relying upon could be achieved short of merger. Applicants must also identify, discuss, and, where possible, quantify the likely negative effects approval would entail, such as losses of competition, potential for service disruption, and other merger-related harms. In addition, applicants must suggest additional measures that the Board might take if it approves the application and the anticipated public benefits identified by applicants fail to materialize in a timely manner.

Downstream merger applications. (i) Applicants should anticipate whether additional Class I mergers are likely to be proposed in response to their own proposal and explain how, taken together, these mergers, if approved, could affect the eventual structure of the industry and the public interest.

(ii) Applicants are expected to discuss whether any conditions imposed on an approval of their proposed merger would have to be altered, or any new conditions imposed, if the Board should approve additional future rail mergers.

Purpose of the proposed transaction. The purpose sought to be accomplished by the proposed transaction, such as improving service, enhancing competition, strengthening the nation’s transportation infrastructure, creating operating economies, and ensuring financial viability.

In a significant transaction, submit the information specified in paragraphs (b)(3), (b)(5), (b)(6), (b)(7), and (b)(8) of this section.

Market analyses.

(a) For major and significant transactions, applicants shall submit impact analyses (exhibit 12) describing the impacts of the proposed transaction—both adverse and beneficial—on inter- and intramodal competition with respect to freight surface transportation in the regions affected and on the provision of essential services by applicants and other carriers. An impact analysis should include underlying data, a study of the implications of those data, and a description of the resulting likely effects of the proposed transaction on the transportation alternatives that would be available to the shipping public. Each aspect of the analysis should specifically address significant impacts as they relate to the applicable statutory criteria (49 U.S.C. 11324(b) or (d)), essential services, and competition. Applicants must identify and address relevant markets and issues, and provide additional information as requested by the Board on markets and issues that warrant further study. Applicants (and any other party submitting analyses) must demonstrate both the relevance of the markets and issues analyzed and the validity of their methodology. All underlying assumptions must be clearly stated. Analyses should reflect the consolidated company’s marketing plan and existing and potential competitive alternatives (inter- as well as intramodal). They can address: city pairs, interregional movements, movements through a point, or other factors; a particular commodity, group of commodities, or other commodity factor that would be significantly affected by the transaction; or other effects of the transaction (such as on a particular type of service offered).

(b) For major transactions, applicants shall submit “full system” impact analyses (incorporating any operations in Canada or Mexico) from which they must demonstrate the impacts of the transaction—both adverse and beneficial—on competition within regions of the United States and this nation as a whole (including inter- and intramodal competition, product competition, and geographic competition) and the provision of essential services.
