§ 14.171

area required for ventilation shall be located on the upper one-half of the enclosure.

(b) No more than one terrestrial mammal (other than rodents) shall be transported in a primary enclosure. However, a mother and her nursing young may be shipped in the same primary enclosure if the shipment complies with the provisions of §14.105(b).

(c) More than one rodent may be transported in the same primary enclosure if they are members of the same species and are maintained in compatible groups. Rodents that are incompatible shall be transported in individual primary enclosures that are stored and transported so they are visually separated. A female with young being transported for medical reasons shall not be placed in a primary enclosure with other animals. The following chart specifies maximum densities and minimum space for transporting rodents that fall within the specified weight limitations. Max. No. refers to maximum number per primary enclosure; Space/animal refers to minimum area of floor space per animals. Rodents weighing more than 5,000 grams shall be transported in individual enclosures.

(d) A primary enclosure used to transport terrestrial mammals shall be large enough to ensure that each animal has sufficient space to turn around freely in a normal manner. The height of the primary enclosure shall provide adequate space for the animal to stand upright in a normal posture with space above its head. The length of the primary enclosure shall be great enough to enable the animal to lie in a full prone position.

§ 14.171 Consignment to carrier.

(a) A personally owned pet bird originally transported from the United States and being returned to this country with its original United States certificate of veterinary inspection within 60 days of departure may be accepted by a carrier without a new veterinary examination.

(b) No carrier shall accept for transport to the United States any bird that was captured in the wild unless a qualified veterinarian, authorized by the national government of the country from which the bird is being exported, certifies that the bird has been held in captivity for at least 14 days.

§ 14.172 Primary enclosures.

(a) A primary enclosure for birds shall have ventilation openings on two vertical sides that comprise at least 16 percent of the surface area of each side and are positioned so as to decrease the likelihood of creating a draft.

(b) Perches shall be provided for birds that rest by perching. The diameter of the perch shall be sufficient to permit the birds to maintain a firm, comfortable grip. Perches shall be placed so that droppings do not fall into food or water troughs or onto other perched birds. There shall be enough head room to allow the birds to move onto and off the perches without touching the top of the enclosure.

(c) An enclosure used to transport one or more birds that rest by perching shall be large enough to ensure that sufficient perch space is available for all birds to perch comfortably at the same time. No more than 50 birds that rest by perching shall be transported in one primary enclosure, with the exception of large birds (longer than 23 cm, or 9 inches), which are limited to a maximum of 25 per primary enclosure.

(d) A primary enclosure used to transport a raptorial bird shall be large enough to transport the bird comfortably and to permit it to turn around without stretching its wings to the fullest extent. Only one raptorial bird shall be contained in a primary enclosure.

(e) A primary enclosure containing nonraptorial birds that do not rest by
perching shall be large enough for the birds to turn around, to lie down, to stand erect, and to change posture in a normal manner.

(f) Nectar-feeding birds shall either be transported in a primary enclosure equipped with feeding bottles accessible from outside the enclosure for replenishment or hand-carried and fed in accordance with the written instructions of the shipper.

(g) Birds transported in the same primary enclosure shall be of the same species and be compatible with one another. Birds that are incompatible shall be placed in individual primary enclosures and these enclosures shall not be stored or transported in visual proximity to one another.

Subpart K—Captive Wildlife Safety Act

SOURCE: 72 FR 45946, Aug. 16, 2007, unless otherwise noted.

§ 14.250 What is the purpose of these regulations?

§ 14.251 What other regulations may apply?

The provisions of this subpart are in addition to, and are not in place of, other regulations of this subchapter B that may require a permit or describe additional restrictions or conditions for the importation, exportation, transportation, sale, receipt, acquisition, or purchase of wildlife in interstate or foreign commerce.

§ 14.252 What definitions do I need to know?

In addition to the definitions contained in part 10 of this subchapter, and unless the context otherwise requires, in this subpart:

Accredited wildlife sanctuary means a facility that cares for live specimens of one or more of the prohibited wildlife species and:

(1) Is approved by the United States Internal Revenue Service as a corporation that is exempt from taxation under §501(a) of the Internal Revenue Code of 1986, which is described in §§501(c)(3) and 170(b)(1)(A)(vi) of that code;

(2) Does not commercially trade in prohibited wildlife species, including offspring, parts, and products;

(3) Does not propagate any of the prohibited wildlife species; and

(4) Does not allow any direct contact between the public and the prohibited wildlife species.

Direct contact means any situation in which any individual other than an authorized keeper or caregiver may potentially touch or otherwise come into physical contact with any live specimen of the prohibited wildlife species.

Licensed person means any individual, facility, agency, or other entity that holds a valid license from and is inspected by the U.S. Department of Agriculture’s Animal and Plant Health Inspection Service (APHIS) under the Animal Welfare Act (AWA) (7 U.S.C. 2131 et seq.) (See definition of “licensee” in 9 CFR 1.1.).

Prohibited wildlife species means a specimen of any of the following eight species: Lion (Panthera leo), tiger (Panthera tigris), leopard (Panthera pardus), snow leopard (Uncia uncia), clouded leopard (Neofelis nebulosa), jaguar (Panthera onca), cheetah (Acinonyx jubatus), and cougar (Puma concolor) or any hybrids resulting from the breeding of any combination of any of these species, for example, a liger (a male lion and a female tiger) or a tiglon (a male tiger and a female lion), whether naturally or artificially produced.

Propagate means to allow or facilitate the production of offspring of any of the prohibited wildlife species, by any means.

Registered person means any individual, facility, agency, or other entity that is registered with and inspected by APHIS under the AWA (See definition of “registrant” in 9 CFR 1.1.).

§ 14.253 What are the restrictions contained in these regulations?

Except as provided in §14.255, it is unlawful for any person to import, export, transport, sell, receive, acquire,
